ODYSSEY OIL & GAS, INC. AND SUBSIDIARY  
(A DEVELOPMENT STAGE COMPANY)  
NOTES TO FINANCIAL STATEMENTS  
AS OF MARCH 31, 2006  
(UNAUDITED)

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ORGANIZATION

(A) Basis of Presentation

The accompanying unaudited condensed financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America and the rules and regulations of the Securities and Exchange Commission for interim financial information. Accordingly, they do not include all the information necessary for a comprehensive presentation of financial position and results of operations.

It is management's opinion however, that all material adjustments (consisting of normal recurring adjustments) have been made which are necessary for a fair financial statements presentation. The results for the interim period are not necessarily indicative of the results to be expected for the year.

For further information, refer to the financial statements and footnotes included in the Company's Form 10-KSB for the year ended December 31, 2005.

(B) Principles of Consolidation

The financial statements for 2006 include the accounts of Odyssey Oil & Gas, Inc. (F/K/A Advanced Sports Technologies, Inc.) and CardioBioMedical Corporation (a development stage company). The financial statements for 2005 include the accounts of CardioBioMedical Corporation. All intercompany accounts have been eliminated in the consolidation.

Odyssey Oil & Gas, Inc. (F/K/A Advanced Sports Technologies, Inc.) and its wholly-owned subsidiary are hereafter referred to as the "Company."

(C) Use of Estimates

In preparing financial statements in conformity with generally accepted accounting principles, management is required to make

## Edgar Filing: ADVANCED SPORTS TECHNOLOGIES INC - Form 10QSB

estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and revenues and expenses during the reported period. Actual results could differ from those estimates.

### (D) Loss Per Share

Basic and diluted net loss per common share is computed based upon the weighted average common shares outstanding as defined by Financial Accounting Standards No. 128, "Earnings Per Share." As of March 31, 2006 there were 6,500,000 warrants outstanding that were not included in dilutive net loss per share as the effect was anti-dilutive. As of March 31, 2005, there were no common share equivalents outstanding.

NOTE 5 COMMITMENTS AND CONTINGENCIES

(A) License Agreement

During 2003, the Company acquired the North America license rights to the bio-cybernetic technology and frequency analysis technology covered by U.S. Patent 6,145,228 and copyright TXU 856-320. The license period is for the life of the patent or for 15 years from the first sale of products developed using the license rights. The agreement requires a royalty payment of 5% of all sales after

(UNAUDITED)

initial sales of \$3,000,000 or 50 units, minimum royalties equal to 12.5% of all equity raised in the first year and minimum annual royalties of \$250,000, thereafter. On September 16, 2005, a new agreement superseding the previous license agreement and other agreements was entered into. This new agreement provided for the return for cancellation of 16,500,000 shares of Company common stock owned by the inventor, the issuance to him of a nontransferable warrant to purchase 6,500,000 shares of common stock at \$ .01 per share exercisable between January 1, 2007 and December 31, 2014, agreement that \$310,000 was due him payable in quarterly installments of \$ 50,000 beginning for the quarter starting July 1, 2006 and a non-exclusive license agreement. The non-exclusive license agreement is for North America covering the same technology/products as before with a royalty of 5% of the sale price for each device sold to a customer within the defined territory. The minimum royalty, beginning in 2006, is \$250,000 per year, payable in installments every two months beginning on the last day of February 2006. The license may be cancelled at any time for failure to pay. The inventor also may license the product in the defined territory to two other companies with certain exceptions that expire beginning January 1, 2008. As of March 31, 2006, the Company has not sold any products and has accrued \$373,500 due to the license holder.

During the three months ended March 31, 2006, the Company did not raise additional equity capital and consequently, was unable to make the minimum royalty payment of \$50,000 due on February 28, 2006 and is in default under the agreement.

(B) Employment Agreement

During 2003, the Company entered into an employment agreement with an individual to assume the position of Chief Executive Officer and President for a term of five years at an annual salary of \$250,000 upon the Company raising \$500,000 in equity financing, with additional annual increases of 10% every July 1 over the life of the agreement. The agreement also calls for the officer to receive fringe benefits and participate in all Company employment benefits as approved by the Board of Directors. As of March 31, 2006, the Company has not raised the minimum equity capital and no salary has been accrued or paid.

NOTE 6 DISCONTINUED OPERATIONS

On April 21, 2006, the ownership of CardioBioMedical Corporation was exchanged for 22,077,509 shares of Odyssey common stock to the original stockholders (See Note 8). Accordingly, all current and prior period amounts relating to the operations of CardioBioMedical Corporation have been reclassified to conform to this presentation. The loss from discontinued operations was equal to operating expenses.

ODYSSEY OIL & GAS, INC. AND SUBSIDIARY  
(A DEVELOPMENT STAGE COMPANY)  
NOTES TO FINANCIAL STATEMENTS  
AS OF MARCH 31, 2006  
(UNAUDITED)

NOTE 7 GOING CONCERN

As reflected in the accompanying financial statements, the Company is in the development stage with a working capital deficiency of \$348,970, an accumulated deficit of \$4,062,461 and a negative cash flow from operations of \$450,111 from inception. This raises substantial doubt about its ability to continue as a going concern. The ability of the Company to continue as a going concern is dependent on the Company's ability to raise additional capital and implement its business plan. The financial statements do not include any adjustments that might be necessary if the Company is unable to continue as a going concern.

On April 21, 2006, the Company acquired a 10% working interest in certain gas and oil leases in Texas. The Company's portion of the capital requirement to finish the well is approximately \$59,000. This capital requirement was funded by an affiliated party (Note 8). Management anticipates that the well will produce cash flow in the second quarter of 2006 sufficient to ensure that the Company will be able to continue as a going concern.

NOTE 8 SUBSEQUENT EVENTS

On April 20, 2006, the Articles of Incorporation were amended to change the name of the Company to Odyssey Oil & Gas, Inc. and to increase the number of authorized common shares from 20 million to 250 million.

On April 21, 2006, the Company exchanged all of its ownership in CardioBioMedical Corporation to the original stockholders for 22,077,509 common shares of Odyssey and the warrant issued to purchase 6,500,000 shares of the Company's common stock was cancelled.

On April 21, 2006, the Company issued 20 million shares of common stock to purchase a 10% working interest in certain gas and oil leases in Texas.

As a result of the CardioBioMedical Corporation and gas and oil lease transactions referred to above, the Company incurred a change in control.

Subsequent to March 31, 2006, an affiliated party advanced the Company on additional \$58,229 and a third party advanced an additional \$9,203 for operating and oil well development expenses. The advances are non-interest bearing, unsecured and due on demand.

### ITEM 2. MANAGEMENT DISCUSSION

#### OVERVIEW

The Company was formed in Florida in August 2001 with the plan of becoming a direct marketing company that developed and marketed premium-quality, premium-priced, branded fitness and exercise equipment to the home fitness equipment market. Our original business plan included marketing products directly to consumers through a variety of direct marketing channels.

As an initial step, the Company licensed the rights to a portable gym subject to patent protection in the United States, which was eligible to be marketed under the trademark Better Buns. It was the Company's intention for this product to be its first direct-marketed product. The Company was unsuccessful in its attempts to raise funding to pursue this goal and in May 2005, received notice that it was in breach of its license agreement for the Better Buns product and that the license was being terminated. Since inception to date, the Company had not generated any revenues through the sale of the Better Buns product or otherwise, and had not engaged in any marketing activities due to limited funds and resources.

In September 2005, the Company changed focus in connection with the Merger of a wholly-owned subsidiary of the Company and CardioBioMedical Corporation ("CBM"), a Delaware corporation. The subsidiary merged with and into CBM, with CBM as the surviving corporation which became a subsidiary of the Company. The consideration for the merger consisted of 22,077,509 shares of the Company common stock, \$.0001 par value, payable on a one-for-one basis to the consenting shareholders of CBM and a warrant, exercisable beginning January 1, 2008, to purchase 6,500,000 shares of the Company common stock at a purchase price of \$.01 per share payable to the sole warrant holder of CBM in exchange for an equivalent CBM warrant. The new objective of the Company was to establish a medical device, the Cardio Spectrum Diagnostic System as the standard of care for the detection of early-stage ischemic heart disease. Our strategy consisted in first obtaining insurance reimbursement for performance of the diagnostic test then establishing the device with cardiologists and later gaining

## Edgar Filing: ADVANCED SPORTS TECHNOLOGIES INC - Form 10QSB

acceptance and use by other physician specialties and hospitals. The Company was unsuccessful in its attempts to pursue its goal of obtaining insurance reimbursement and then marketing CSD. On April 21, 2006, our Board of Directors authorized the purchase (the "Purchase") of a ten percent (10%) working interest in the BBB Area, Wharton, Texas an oil exploration project. At the present time, the business operations of BBB Area constitute all of the business operations of the Company.

### CRITICAL ACCOUNTING POLICIES AND CHANGES TO ACCOUNTING POLICIES

The Company historically has utilized the following critical accounting policies in making its more significant judgments and estimates used in the preparation of its financial statements:

**USE OF ESTIMATES.** In preparing financial statements in conformity with accounting principles generally accepted in the United States, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reported period. Actual results could differ from those estimates.

**INCOME TAXES.** The Company accounts for income taxes under Statement of Financial Accounting Standards No. 109, Accounting for Income Taxes ("Statement 109"). Under Statement 109, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. As a result of the acquisition described above the Company has acquired a ten percent (10%) working interest in BBB Area,

Wharton, Texas. On April 21, 2006 a change in control occurred as a result of the acquisition of the 10% working interest in BBB Area, Wharton, Texas. ### PLAN OF OPERATIONS

Neither AST nor CBM has generated any revenues from operations or otherwise since their inception. AST intended to generate revenue through the sale of a licensed product, Better Buns(R) - a portable patented gym product, but the license to such product was terminated due to AST 's failure to make minimum royalty payments. Through September 23, 2005, the Company had not been successful in raising capital for the development, marketing or sale of any other products. The Company then adopted a new strategy through the merger with CBM.

In order to implement the new strategy of the Company, AST needed to raise capital during 2006. Both entities have funded operations to date in part through the sale of equity securities and loans, although such efforts have been insufficient to effectively pursue their business strategies.

We intended to raise capital primarily through the public or private sale of securities (equity and/or debt), although there can be no assurance that we will be able to obtain capital or, if such capital is available, that the terms of any financing will be acceptable. If the Company had succeeded in raising capital, such funds would have been used to implement the new strategy of developing clinical trial data to support the market introduction of the Cardio Spectrum Diagnostic System in the United States, Canada and Mexico. Payment for clinical trials includes retaining the services of a clinical research organization, payment to the clinical research site(s) for patients enrolled in the clinical trials, payment for the CSD unit(s) used in these clinical trials, payment for costs associated with Institution Review Board Approval, and preparation of marketing materials to support commercial introduction of the CSD.

Pursuant to its new strategy, the Company continued to operate at a reduced level as it attempted to raise capital. The Company believed such an approach would help leverage results through better allocation of its capital by retaining as needed the diverse expertise required to conduct clinical trials and to prepare for market introduction.

Having been unsuccessful at raising sufficient capital to fund our operations in order to implement the new strategy, we were forced to seek opportunities

outside of our new corporate focus or to seek a buyer for our business or another entity with which we could partner.

### EXPENSES

Expenses of CBM decreased 38% to \$76,464 for the quarter ended March 31, 2006 compared to \$124,043 for the quarter ended March 31, 2005. This decrease in expenses was necessitated by the inability of the Company to raise additional equity capital to fund its operations. During 2006, CBM was able to minimize expenses while it sought additional equity capital. In this regard, the major expense of a clinical trial at Cedars - Sinai Medical Center was placed on hold pending resolution of the financial status of CBM and, therefore, no expense were incurred for research and development during the quarter ending March 31, 2006.

At the present time, the business operations of the Company consist of the ownership in the 10% working interest in the BBB Area, Wharton, Texas an oil exploration project. The Company intends to devote its energy to the exploration and exploitation of the BBB Area. Given this new focus, our capital requirements was \$67,432 for our share of the working interest, in order to bring the well into production. Odyssey was able to raise the funds from an affiliated party and the payments were made in the second quarter of 2006. Future activities will be subject to our ability to raise funds.
