Notes to the Consolidated Financial Statements
(unaudited)

1. Basis of Presentation

The information presented as of June 30, 2006 and 2005 and for the three-month and six-month periods then ended is unaudited, but includes all adjustments (which consist only of normal recurring adjustments) that the management of Neoprobe Corporation (Neoprobe, the Company, or we) believes to be necessary for the fair presentation of results for the periods presented. Certain information and footnote disclosures normally included in financial statements prepared in accordance with U.S. generally accepted accounting principles have been condensed or omitted pursuant to the rules and regulations of the U.S. Securities and Exchange Commission. The results for the interim periods are not necessarily indicative of results to be expected for the year. The consolidated financial statements should be read in conjunction with Neoprobe's audited consolidated financial statements for the year ended December 31, 2005, which were included as part of our Annual Report on Form 10-KSB.

Our consolidated financial statements include the accounts of Neoprobe, our wholly-owned subsidiary, Cardiosonix Ltd. (Cardiosonix), and our 90%-owned subsidiary, Cira Biosciences, Inc. (Cira Bio). All significant inter-company accounts were eliminated in consolidation.

2. Stock-Based Compensation

Effective January 1, 2006, we adopted Statement of Financial Accounting Standards (SFAS) No. 123(R), *Share-Based Payment*, which is a revision of SFAS No. 123, *Accounting for Stock-Based Compensation*. SFAS No. 123(R) supersedes APB Opinion No. 25, *Accounting for Stock Issued to Employees*, and amends SFAS No. 95, *Statement of Cash Flows*. Generally, the approach in SFAS No. 123(R) is similar to the approach described in SFAS No. 123. However, SFAS No. 123(R) requires all share-based payments to employees, including grants of employee stock options, to be recognized in the income statement based on their estimated fair values.

We are applying the modified prospective method for recognizing the expense over the remaining vesting period for awards that were outstanding but unvested as of January 1, 2006. Under the modified prospective method, we have not adjusted the financial statements for periods ending prior to January 1, 2006. Under the modified prospective method, the adoption of SFAS No. 123(R) applies to new awards and to awards modified, repurchased, or cancelled after December 31, 2005, as well as to the unvested portion of awards outstanding as of January 1, 2006.

We are continuing to use the Black-Scholes option pricing model to value share-based payments. Compensation cost arising from stock-based awards is recognized as expense using the straight-line method over the vesting period. As of June 30, 2006, there was approximately \$407,000 of total unrecognized compensation cost related to unvested stock-based awards, which we expect to recognize over remaining weighted average vesting terms of 1.4 years. For the three-month and six-month periods ended June 30, 2006, our total stock-based compensation expense was \$59,000 and \$139,000, respectively. We have not recorded any income tax benefit related to stock-based compensation in any of the three-month and six-month periods ended June 30, 2006 and 2005.

As permitted by SFAS No. 123, prior to 2006 Neoprobe accounted for share-based payments to employees using APB Opinion No. 25's intrinsic value method and, as such, generally recognized no compensation cost for employee stock options. The following table illustrates the effect on net loss and net loss per share for the three-month and six-month periods ended June 30, 2005 as if compensation cost for our stock-based compensation plans had been determined based on the fair value at the grant dates for awards under those plans consistent with SFAS No. 123.

	Three Months Ended June 30, 2005	Six Months Ended June 30, 2005
Net loss, as reported	\$ (1,344,411)	\$ (2,347,182)
Deduct: Total stock-based employee compensation expense determined under fair value based method for all awards	(91,470)	(305,770)
Pro forma net loss	\$ (1,435,881)	\$ (2,652,952)
Loss per common share:		
As reported (basic and diluted)	\$ (0.02)	\$ (0.04)
Pro forma (basic and diluted)	\$ (0.02)	\$ (0.05)

During the first six months of 2005, the Board of Directors granted options to directors and certain employees to purchase 338,000 shares of our common stock, exercisable at an average price of \$0.67 per share, vesting over three years. No options were granted during the first six months of 2006. As of June 30, 2006, we have 5.4 million options outstanding under three stock option plans. Of the outstanding options, 4.0 million options have vested as of June 30, 2006, at an average exercise price of \$0.47 per share.

3. Comprehensive Income (Loss)

Due to our net operating loss position, there are no income tax effects on comprehensive income (loss) components for the three-month and six-month periods ended June 30, 2006 and 2005.

	Three Months Ended June 30, 2006	Three Months Ended June 30, 2005
Net loss	\$ (861,469)	\$ (1,344,411)
Unrealized gains (losses) on securities	55	(3,962)
Other comprehensive loss	\$ (861,414)	\$ (1,348,373)
	Six Months Ended June 30, 2006	Six Months Ended June 30, 2005
Net loss	\$ (1,789,071)	\$ (2,347,182)
Unrealized losses on securities	(2,018)	(6,160)
Other comprehensive loss	\$ (1,791,089)	\$ (2,353,342)

4. Earnings Per Share

Basic earnings (loss) per share is calculated using the weighted average number of common shares outstanding during the periods. Diluted earnings (loss) per share is calculated using the weighted average number of common shares outstanding during the periods, adjusted for the effects of convertible securities, options and warrants, if dilutive.

	Three Months Ended June 30, 2006		Three Months Ended June 30, 2005	
	Basic Earnings Per Share	Diluted Earnings Per Share	Basic Earnings Per Share	Diluted Earnings Per Share
Outstanding shares	58,690,046	58,690,046	58,585,008	58,585,008
Effect of weighting changes in outstanding shares	-	-	-	-
Contingently issuable shares	(130,000)	(130,000)	(130,000)	(130,000)
Adjusted shares	58,560,046	58,560,046	58,455,008	58,455,008

	Six Months Ended June 30, 2006		Six Months Ended June 30, 2005	
	Basic Earnings Per Share	Diluted Earnings Per Share	Basic Earnings Per Share	Diluted Earnings Per Share
Outstanding shares	58,690,046	58,690,046	58,585,008	58,585,008
Effect of weighting changes in outstanding shares	(24,415)	(24,415)	(68,574)	(68,574)
Contingently issuable shares	(130,000)	(130,000)	(130,000)	(130,000)
Adjusted shares	58,535,631	58,535,631	58,386,434	58,386,434

There is no difference in basic and diluted loss per share related to the three-month and six-month periods ended June 30, 2006 and 2005. The net loss per common share for these periods excludes 41,242,351 and 40,274,030, respectively, of common shares issuable upon exercise of outstanding stock options and warrants into our common stock or upon the conversion of convertible debt since such inclusion would be anti-dilutive.

5. Inventory

The components of inventory are as follows:

	June 30, 2006 (unaudited)	December 31, 2005
Materials and component parts	\$ 329,169	\$ 461,218
Finished goods	483,413	342,485
	\$ 812,582	\$ 803,703

6. Intangible Assets

The major classes of intangible assets are as follows:

	Wtd Avg Life	June 30, 2006		December 31, 2005	
		Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Patents and trademarks	10.0 yrs	\$ 3,183,393	\$ 1,275,143	\$ 3,162,547	\$ 1,164,763
Acquired technology	2.5 yrs	237,271	152,999	237,271	136,145
Total		\$ 3,420,664	\$ 1,428,142	\$ 3,399,818	\$ 1,300,908

The estimated future amortization expenses for the next five fiscal years are as follows:

	Estimated Amortization Expense
For the year ended 12/31/2006	\$ 262,992
For the year ended 12/31/2007	226,830
For the year ended 12/31/2008	201,976
For the year ended 12/31/2009	168,267
For the year ended 12/31/2010	168,267

7. Product Warranty

We warrant our products against defects in design, materials, and workmanship generally for a period of one year from the date of sale to the end customer, except in cases where the product has a limited use as designed. Our accrual for warranty expenses is adjusted periodically to reflect actual experience. Our primary marketing partner, Ethicon Endo-Surgery, Inc. (EES), a Johnson & Johnson company, also reimburses us for a portion of warranty expense incurred based on end customer sales they make during a given fiscal year. Payments charged against the reserve are disclosed net of EES' estimated reimbursement.

The activity in the warranty reserve account for the three-month and six-month periods ended June 30, 2006 and 2005 is as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2006	2005	2006	2005
Warranty reserve at beginning of period	\$ 43,725	\$ 66,500	\$ 41,185	\$ 66,000
Provision for warranty claims and changes in reserve for warranties	9,823	7,040	23,274	30,613
Payments charged against the reserve	(10,883)	(24,945)	(21,794)	(48,018)
Warranty reserve at end of period	\$ 42,665	\$ 48,595	\$ 42,665	\$ 48,595

8. Notes Payable

In December 2004, we completed a private placement of four-year convertible promissory notes in an aggregate principal amount of \$8.1 million with Biomedical Value Fund, L.P., Biomedical Offshore Value Fund, Ltd. and David C. Bupp (our President and CEO). Biomedical Value Fund, L.P. and Biomedical Offshore Value Fund, Ltd. are funds managed by Great Point Partners, LLC. The notes bear interest at 8% per annum, payable quarterly on each March 31, June 30, September 30 and December 31 of each year, and are freely convertible into shares of our common stock at a price of \$0.40 per share. Neoprobe may force conversion of the notes prior to their stated maturity under certain circumstances. All of our material assets, except the intellectual property associated with our Lymphoseek® and RIGS® products under development, have been pledged as collateral for these notes.

In addition to the security interest in our assets, the notes carry substantial covenants that impose significant requirements on us, including, among others, requirements that: we pay all principal, interest and other charges on the notes when due; we use the proceeds from the sale of the notes only for permitted purposes such as Lymphoseek development and general corporate purposes; we nominate and recommend for election as a director a person designated by the holders of the notes (as of June 30, 2006, the holders of the notes have not designated a potential board member); we keep reserved out of our authorized shares of common stock sufficient shares to satisfy our obligation to issue shares on conversion of the notes and the exercise of the warrants issued in connection with the sale of the notes; we achieve annual revenues on a consolidated basis of at least \$6.5 million in 2006 and \$9.0 million in each year thereafter; we maintain minimum cash balances of \$3.5 million at June 30, 2006 and at the end of each six-month period thereafter; and we indemnify the purchasers of the notes against certain liabilities. Additionally, with certain exceptions, the notes prohibit us from: amending our organizational or governing agreements and documents, entering into any merger or consolidation, dissolving the company or liquidating its assets, or acquiring all or any substantial part of the business or assets of any other person; engaging in transactions with any affiliate; entering into any agreement inconsistent with our obligations under the notes and related agreements; incurring any indebtedness, capital leases, or contingent obligations outside the ordinary course of business; granting or permitting liens against or security interests in our assets; making any material dispositions of our assets outside the ordinary course of business; declaring or paying any dividends or making any other restricted payments; or making any loans to or investments in other persons outside of the ordinary course of business.

As part of this transaction, we issued the investors 10,125,000 Series T warrants to purchase our common stock at an exercise price of \$0.46, expiring in December 2009. The fair value of the warrants issued to the investors was \$1,315,000 on the date of issuance and was determined by a third-party valuation expert using the Black-Scholes option pricing model with the following assumptions: an average risk-free interest rate of 3.4%, volatility of 50% and no expected dividend rate. In connection with this financing, we also issued 1,600,000 warrants to purchase our common stock to the placement agents, containing substantially the same terms as the warrants issued to the investors. The fair value of the warrants issued to the placement agents was \$208,014 using the Black-Scholes option pricing model with the same assumptions used to determine the fair value of the warrants issued to the investors. The value of the beneficial conversion feature of the notes was estimated at \$1,315,000 based on the effective conversion price at the date of issuance. The fair value of the warrants issued to the investors and the value of the beneficial conversion feature were recorded as discounts on the note and are being amortized over the term of the notes using an effective interest rate of 19.8%. The fair value of the warrants issued to the placement agents was recorded as a deferred debt issuance cost and is being amortized over the term of the notes. If we issue equity at prices below the conversion rate for the promissory notes (and for the warrants below the exercise price), then we would be required to reset the exercise and conversion prices for these securities. This provision results in a contingent beneficial conversion feature that may require us to estimate an additional debt discount if a reset occurs.

U.S. generally accepted accounting principles also required us to classify the warrants issued in connection with the placement as a liability due to penalty provisions contained in the securities purchase agreement. The penalty provisions could have required us to pay a penalty of 0.0667% per day of the total debt amount if we failed to meet certain registration deadlines, or if our stock was suspended from trading for more than 30 days. As a liability, the warrants were considered a derivative instrument that were required to be periodically "marked to market" on our consolidated balance sheet. We estimated the fair value of the warrants at December 31, 2004 using the Black-Scholes option pricing model with the following assumptions: an average risk-free interest rate of 3.4%, volatility of 50% and no expected dividend rate. On February 16, 2005, Neoprobe and the investors confirmed in writing their intention that the penalty provisions which led to this accounting treatment were intended to apply only to the \$8.1 million principal balance of the promissory notes and underlying conversion shares and not to the warrant shares. Because the value of our stock increased \$0.02 per share from \$0.59 per share at December 31, 2004 to \$0.61 per share at February 16, 2005, the effect of marking the warrant liability to "market" resulted in an increase in the estimated fair value of the warrant liability of \$142,427 which was recorded as non-cash expense during the first quarter of 2005. The estimated fair value of the warrant liability was then reclassified to additional paid-in capital during the first quarter of 2005.

9. Stock Warrants

During the first six months of 2005, 143,278 of our Series R and 63,587 of our Series S warrants that were issued in October 2003 were exercised and we realized net proceeds of \$57,922. No warrants were exercised during the first six months of 2006.

At June 30, 2006 there are 17.0 million warrants outstanding to purchase our common stock. The warrants are exercisable at prices ranging from \$0.13 to \$0.75 per share with a weighted average exercise price \$0.40 per share.

10. Segment and Subsidiary Information

We report information about our operating segments using the “management approach” in accordance with SFAS No. 131, *Disclosures about Segments of an Enterprise and Related Information*. This information is based on the way management organizes and reports the segments within the enterprise for making operating decisions and assessing performance. Our reportable segments are identified based on differences in products, services and markets served. There were no inter-segment sales. We own or have rights to intellectual property involving two primary types of medical device products, including gamma detection instruments currently used primarily in the application of intraoperative lymphatic mapping (ILM), and blood flow measurement devices. We also own or have rights to intellectual property related to several drug and therapy products.

The information in the following table is derived directly from each segment's financial reporting.

<i>(\$ amounts in thousands)</i> Three Months Ended June 30, 2006	Gamma Detection Devices	Blood Flow Devices	Drug and Therapy Products	Corporate	Total

¹ All sales to EES are made in the United States. EES distributes the product globally through its international affiliates.

² Selling, general and administrative expenses, excluding depreciation and amortization, represent expenses that relate to the general administration of the Company and as such are not currently allocated to our individual reportable segments.

³ Income (loss) from operations does not reflect the allocation of selling, general and administrative expenses to the operating segments.

⁴ Amounts consist primarily of interest income and interest expense which are not currently allocated to our individual reportable segments.

11. Supplemental Disclosure for Statements of Cash Flows

During the first six months of 2006 and 2005, we paid interest aggregating \$331,000 and \$346,000, respectively. During the first six months of 2005, we purchased equipment under capital leases totaling \$20,000.

14

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The Company

Neoprobe Corporation is a biomedical technology company that provides innovative surgical and diagnostic products that enhance patient care by meeting the critical decision-making needs of physicians. The December 2001 acquisition of Cardiosonix Ltd. (Cardiosonix) expanded our potential product offerings beyond the neo2000® gamma detection device, which is marketed in the oncology arena, into the area of blood flow measurement and cardiac care.

Cardiosonix has received marketing clearance for two of its products, Quantix/ND™ and Quantix/OR™, in the U.S. and in Europe. Neoprobe is commercializing the proprietary Cardiosonix blood flow monitoring devices for a variety of diagnostic and surgical applications. In addition to our medical device products, we have two radiopharmaceutical products, Lymphoseek® and RIGScan® CR, in the advanced phases of clinical development. In January 2005 we also formed a majority-owned (90%) subsidiary, Cira Biosciences, Inc. (Cira Bio) to advance our activated cellular therapy (ACT) platform.

Overview

This Overview section contains a number of forward-looking statements, all of which are based on current expectations. Actual results may differ materially from the anticipated results discussed herein. Our financial performance is highly dependent on our ability to continue to generate income and cash flow from our gamma device product line and on our ability to successfully commercialize the blood flow products of Cardiosonix. We cannot assure you that we will achieve the volume of sales anticipated, or if achieved, that the margin on such sales will be adequate to produce positive operating cash flow. We continue to be optimistic about the longer-term potential for our other proprietary, procedural-based technologies such as Lymphoseek, RIGS® (radioimmunoguided surgery) and ACT; however, these technologies are not anticipated to generate any significant revenue for us during 2006. In addition, we cannot assure you that these products will ever obtain marketing clearance from the appropriate regulatory bodies.

Our revenue for the first six months of 2006 was consistent with our original expectations. Our sales of Quantix® blood flow devices for the first six months of 2006 represent a combination of demonstration and customer unit sales. We expect that net sales of gamma detection devices for 2006 will be consistent with 2005; however, further price declines or unfavorable foreign currency exchange rate movements may adversely affect our revenue for the remainder of 2006. We continue to expect that our sales of blood flow measurement devices for 2006 will exceed 2005 by a significant percentage. However, future sales of Quantix devices remain highly dependent upon our ability to maintain and train our new marketing and distribution partners, the success of our distribution partners in generating sales leads and ultimately on physician response to the products themselves.

Our operating expenses during the first six months of 2006 were focused primarily on support of Lymphoseek product development. However, we continued to invest in our Quantix blood flow measurement line and our neo2000 gamma detection device line, and to a lesser extent on our RIGScan CR technology and Cira Bio's ACT technology. We expect our development expenses to increase over the remainder of 2006 as we conduct multi-center Phase 2 and Phase 3 clinical evaluations of Lymphoseek. We expect to continue to incur development expenses to support and to innovate our device product lines as well as move our other product initiatives forward. We will also continue to invest in marketing and clinical development support for our blood flow products during the remainder of 2006 as we work with our distribution partners to expand market penetration of our Quantix product lines.

Our efforts thus far in 2006 have resulted in the following milestone achievements:

- Received notification of the renewal of our Marketing and Distribution agreement with our primary gamma detection device marketing partner, Ethicon Endo-Surgery, Inc. (EES), a Johnson & Johnson company, through December 2008;
- Completed a submission to the U.S. Food and Drug Administration (FDA) to respond to information requested by FDA regarding both preclinical toxicity studies and the chemistry, manufacturing and control (CMC) issues surrounding the commercial production of Lymphoseek;
 - Authorized by FDA to commence patient enrollment in a Phase 2 clinical study of Lymphoseek;
 - Received cGMP-produced Lymphoseek drug kits from Cardinal Health, Inc.;
- Reviewed Phase 2 Lymphoseek protocol and clinical program with clinical investigators at the Society of Surgical Oncology meeting;
 - Commenced Phase 2 Lymphoseek clinical study with cGMP-produced drug;
 - Completed Investigational New Drug (IND) amendment submission for RIGScan CR;
- Received first commercial production of Quantix devices from U.S.-based contract manufacturer; and
 - Completed an agreement with ESTECH, Inc. for the distribution of the Quantix/OR in the U.S.

In September 2005, Neoprobe received a letter from FDA confirming feedback from discussions regarding our IND application for Lymphoseek. The letter formalized FDA's feedback and was consistent with the information that the agency had provided in the first half of 2005. In its feedback, FDA formalized a very stringent non-clinical template for drug safety involving a total of seven tests. All seven non-clinical tests, including repeat dose studies, were completed and we received the final reports. The final reports were submitted to FDA in late December 2005. Based on a review of the information from all of these tests, we are not aware of any drug-related adverse results. FDA's September 2005 letter also confirmed that we will be required to use commercial drug, produced under commercial conditions, in the conduct of the Phase 2 trial, rather than the laboratory grade material produced by the University of California, San Diego, as originally planned. The additional non-clinical tests and the requirement to use commercial drug resulted in delays to the start of multi-center studies of Lymphoseek. However, we believe that use of commercially produced drug will help in FDA's review of the New Drug Application (NDA) regarding efficacy from the pivotal (i.e., Phase 3) trial and will ultimately put us in a much stronger regulatory position once the NDA is filed.

Our drug manufacturing partners, Reliable Biopharmaceuticals and Cardinal Health, completed their development and validation work and provided responses to the CMC questions raised by FDA, which, along with the previously completed non-clinical testing results, were submitted to FDA for review in April. Cardinal Health completed initial commercial drug production and the commercial-quality drug packaged and labeled and available for clinical trial use. However, even though commercial drug is available, it may still not be marketed for sale until the appropriate regulatory clearances have been obtained. We cannot assure you that such regulatory clearances will be obtained on a timely basis, if at all.

The effects of these changes required us to adjust our original timelines and expectations for Lymphoseek over the last several months. We were notified by FDA in May 2006 that they completed their review of our recent submissions and that we were released from clinical hold to commence patient enrollment for a Phase 2 clinical study of Lymphoseek. We began patient screening and enrollment activities for the Phase 2 trial during July 2006 and expect to be in a position to report preliminary results on the first 40 patients in late September or early October. This will likely mean that the pivotal trial or Phase 3 clinical study will start sometime in late 2006 (at the earliest) or in early 2007 pending obtaining appropriate regulatory and clinical site clearances. Our current goal is to file the NDA by the middle of 2007; however, we believe that strenuously following the guidance we are receiving from FDA will ultimately pay dividends in the review process for the NDA as we remain highly confident in the clinical benefit and market potential of Lymphoseek. We believe that Lymphoseek can be commercialized by mid-2008 and, if approved, should provide a significant positive financial contribution to Neoprobe in 2008. As a result of the delays we have experienced and modifications made to the number of patients we expect to enroll, as well as revisions in our

regulatory pathway, our current estimate of total out-of-pocket development costs has increased to approximately \$6 million. In addition, Neoprobe has discussed the drug approval and registration process through the centralized European drug evaluation procedures with the European Medicinal Evaluation Agency (EMA) in London. We intend to use the results from the Phase 3 clinical evaluation of Lymphoseek to support the drug registration application process with the EMA.

With respect to our RIGS initiative, our current efforts are focused on preparing a Special Protocol Assessment (SPA) request related to RIGS which we believe will be important in attracting a potential development partner. In that regard, we have established a corporate IND for a second-generation humanized version of the RIGS antibody. With the establishment of a corporate IND, responsibility for the clinical and commercial development of this humanized version of RIGScan CR has now been officially transferred from a physician-sponsored IND to Neoprobe. Neoprobe's contract statisticians have also concluded, based on data published in 2005 on adjuvant post-operative chemotherapies for colorectal cancer, that it will be necessary to increase the number of patients in a proposed pivotal trial for RIGScan CR to approximately 2,300 in order to show a statistically valid differential in time to recurrence between patients treated using RIGScan CR versus other more traditional methods. We expect the increase in patients will cause an increase in the development cost; however, we also expect that the effect on the development timeline, once a partner is secured and development commences, will be less than six months. It remains our intent to seek a development partner to assist in or take full responsibility for funding of RIGScan CR development. In the meantime, until a partner is secured, we are moving forward with our plans to submit to FDA a request for a SPA related to RIGS; however, we do not expect to incur any significant additional expenses related to RIGS until a partner is secured.

Our efforts to raise capital to support the development activities of our subsidiary, Cira Bio, have thus far been unsuccessful due, we believe, to recent developmental failures by potential competitors to Cira Bio's ACT technology. We are evaluating alternative strategies to determine an appropriate way to enhance shareholder value by financing a reduced clinical development strategy for Cira Bio.

We anticipate generating a net profit from the sale of our gamma detection devices in 2006; however, we expect that our blood flow device product line will operate at a net loss for 2006 due to increased marketing and administrative support costs that are still required to commercialize the product line. Currently, we expect the loss on blood flow products for 2006 to be less than the loss incurred in 2005. However, this expectation is based to a large degree on our anticipation that we will achieve the level of commercial sales we expect from our Quantix/OR product during the remainder of 2006.

Our overall operating results for 2006 will be significantly affected by the amount of development costs associated with the radiopharmaceutical products. If we are unsuccessful in achieving significant commercial sales of the Quantix/OR product in 2006, or if we decide to carry out RIGS development internally, our estimates and our business plan will likely need to be modified. As a result of our decision to fund Lymphoseek development internally, we do not expect to achieve operating profit during 2006. In addition, our net loss and net loss per share will likely continue to be significantly impacted by the non-cash interest expense we expect to record related to the accounting treatment for the beneficial conversion feature of the convertible debt and for the warrants issued in connection with the private placement we completed in December 2004. Also, we cannot assure you that our current or potential new products will be successfully commercialized, that we will achieve significant product revenues, or that we will achieve or be able to sustain profitability in the future.

Results of Operations

Revenue for the first six months of 2006 remained constant at \$3.2 million compared to the same period in 2005. Research and development expenses, as a percentage of net sales, decreased to 46% during the first six months of 2006 from 61% during the same period in 2005. Selling, general and administrative expenses, as a percentage of net sales, decreased to 50% during the first six months of 2006 from 53% during the same period in 2005. Due to the ongoing development activities of the Company, research and development expenses as a percentage of sales are expected to be higher in the second half and full year of 2006 than they were in 2005. In addition, should we be successful in our ongoing commercialization activities related to the Quantix product line, selling, general and administrative expenses as a percentage of sales are expected to decrease in 2006 compared to 2005.

Three Months Ended June 30, 2006 and 2005

Net Sales and Margins. Net sales, primarily comprised of our gamma detection systems, decreased \$267,000, or 16%, to \$1.4 million during the second quarter of 2006 from \$1.7 million during the same period in 2005. Gross margins on net sales decreased to 58% of net sales for the second quarter of 2006 compared to 62% of net sales for the same period in 2005. The decrease in net sales was the combined result of decreases of \$320,000 in gamma detection device sales due to decreased unit sales as well as decreased unit prices coupled with a decrease of \$27,000 in gamma detection device extended service contract revenue which were offset by increases of \$59,000 in blood flow device sales and \$22,000 in gamma detection device service revenue. The decrease in gross margins on net product sales was due to the decrease in gamma detection device prices coupled with a greater proportion of blood flow devices being sold on a wholesale basis to distributors as opposed to on a retail basis to end customers.

Research and Development Expenses. Research and development expenses decreased \$661,000 or 51% to \$643,000 during the second quarter of 2006 from \$1.3 million during the same period in 2005. Research and development expenses in the second quarter of 2006 included approximately \$235,000 in gamma detection device development costs, \$207,000 in drug and therapy product development costs, and \$201,000 in product design activities for the Quantix/OR system. This compares to expenses of \$84,000, \$830,000 and \$390,000 in these relative segment categories during the same period in 2005. The changes in each category were primarily due to (i) increased development activities related to updated versions of our gamma detection devices, (ii) delays in commencing Lymphoseek Phase 2 clinical trials offset by non-clinical and manufacturing validation activities, and (iii) reduced costs of product refinement and manufacturing transfer activities related to the Quantix/OR.

Selling, General and Administrative Expenses. Selling, general and administrative expenses decreased \$74,000 or 9% to \$754,000 during the second quarter of 2006 from \$828,000 during the same period in 2005. Decreases in amortization of intangible assets, marketing costs and insurance were offset by increases in base compensation, including \$29,000 of stock option compensation required to be expensed under SFAS No. 123(R).

Other Income (Expenses). Other expenses increased \$26,000 to \$298,000 during the second quarter of 2006 from \$272,000 during the same period in 2005. The primary reason for the increase was an increase of \$30,000 in interest expense on debt financings we entered into during 2004. Of this interest expense, \$198,000 and \$168,000 in the second quarter of 2006 and 2005, respectively, was non-cash in nature related to the amortization of debt issuance costs and discounts resulting from the warrants and beneficial conversion features of the convertible debt. These increases were offset by an increase of \$6,000 in interest income resulting from higher interest rates earned on our cash and investments during the second quarter of 2006 compared to the same period in 2005.

Six Months Ended June 30, 2006 and 2005

Net Sales and Margins. Net sales, primarily of our gamma detection systems, remained constant at \$3.2 million during the first six months of 2006 and 2005. Gross margins on net sales decreased to 58% of net sales for the first six months of 2006 compared to 62% of net sales for the same period in 2005. Increases of \$203,000 in blood flow device sales were offset by decreases of \$141,000 in gamma detection device sales experienced due primarily to an approximately 5% decline in sales prices on relatively consistent volumes. The decrease in gross margins on net product sales was due to the decrease in gamma detection device sales prices coupled with a greater proportion of blood flow devices being sold on a wholesale basis to distributors as opposed to on a retail basis to end customers.

Research and Development Expenses. Research and development expenses decreased \$465,000 or 24% to \$1.5 million during the first six months of 2006 from \$1.9 million during the same period in 2005. Research and development expenses in the first six months of 2006 included approximately \$672,000 in drug and therapy product development costs, \$458,000 in product design activities for the Quantix/OR system and \$347,000 in gamma detection device development costs. This compares to expenses of \$1.1 million, \$740,000 and \$122,000 in these

relative segment categories during the same period in 2005. The changes in each category were primarily due to (i) delays in commencing Lymphoseek Phase 2 clinical trials offset by non-clinical and manufacturing validation activities, (ii) reduced costs of product refinement and manufacturing transfer activities related to the Quantix/OR, and (iii) increased development activities related to updated versions of our gamma detection devices.

Selling, General and Administrative Expenses. Selling, general and administrative expenses decreased \$58,000 or 3% to \$1.6 million during the first six months of 2006 from \$1.7 million during the same period in 2005. Decreases in amortization of intangible assets, professional services, insurance and investor relations were offset by increases in base compensation, including \$56,000 of stock option compensation required to be expensed under SFAS No. 123(R), coupled with increases in marketing, recruiting and facilities expenses.

Other Income (Expenses). Other expenses decreased \$113,000 to \$590,000 during the first six months of 2006 from \$703,000 during the same period in 2005. The primary reason for the decrease was the first quarter 2005 increase in warrant liability of \$142,000 resulting from the accounting treatment for the warrants we issued in connection with the private placement of convertible debt we completed in December 2004. In addition, we recorded an increase of \$19,000 in interest income resulting from higher interest rates on our cash and investments during the first six months of 2006 compared to the same period in 2005. These decreases were offset by an increase of \$58,000 in interest expense on debt financings we entered into during 2004. Of this interest expense, \$389,000 and \$330,000 in the first six months of 2006 and 2005, respectively, was non-cash in nature related to the amortization of debt issuance costs and discounts resulting from the warrants and beneficial conversion features of the convertible debt.

Liquidity and Capital Resources

Operating Activities. Cash used in operations increased \$695,000 to \$1.6 million used during the first six months of 2006 compared to \$865,000 used during the same period in 2005. Working capital decreased \$1.2 million to \$5.8 million at June 30, 2006 compared to \$6.9 million at December 31, 2005. The current ratio increased to 7.5:1 at June 30, 2006 from 5.6:1 at December 31, 2005. The decrease in working capital was primarily related to cash used in operations, mainly for research and development activities.

Cash and investment balances decreased to \$4.7 million at June 30, 2006 from \$6.5 million at December 31, 2005, primarily as a result of cash used to fund operating activities and service our debt during the first six months of 2006.

Accounts receivable increased to \$911,000 at June 30, 2006 from \$673,000 at December 31, 2005. The increase was primarily a result of increased sales of blood flow measurement devices coupled with normal fluctuations in timing of purchases and payments by EES. We expect overall receivable levels will continue to fluctuate during 2006 depending on the timing of purchases and payments by EES. However, on average, we expect accounts receivable balances will start to increase commensurate with anticipated increases in sales of blood flow products to our distributors, many of whom are foreign-domiciled entities who typically pay at a slower rate than domestic companies. Such increases, if any, will require the increased use of our cash resources over time.

Inventory levels increased slightly to \$813,000 at June 30, 2006 compared to \$804,000 at December 31, 2005. Materials and component parts were consumed as we manufactured finished goods. We expect inventory levels to increase during 2006 as we ramp up our blood flow device business and reassess our gamma detection and blood flow measurement device safety stock levels.

Investing Activities. Investing activities provided \$1.5 million during the first six months of 2006 versus \$4.3 million used during the same period in 2005. Available-for-sale securities of \$1.5 million matured during the first six months of 2006. We purchased \$4.7 million of available-for-sale securities during the first six months of 2005. Capital expenditures during the first six months of 2006 were primarily for software. Capital expenditures during the first six months of 2005 were split between purchases of office equipment and production tools and equipment. We expect to make capital expenditures during the second half of 2006 primarily for production tooling and equipment; however, we expect our overall capital expenditures for 2006 will be lower than for 2005.

Financing Activities. Cash used in financing activities increased \$31,000 to \$145,000 during the first six months of 2006 from \$113,000 during the same period in 2005. Proceeds from the issuance of common stock were \$58,000 during the first six months of 2005. Payments of notes payable were \$130,000 and \$155,000 during the first six months of 2006 and 2005, respectively.

During the first quarter of 2005, certain investors and placement agents who received warrants to purchase our common stock in connection with a November 2003 financing exercised a total of 206,865 warrants in exchange for 206,865 shares of our common stock, resulting in net proceeds of \$57,922.

In December 2004, we completed a private placement of Convertible Promissory Notes in an aggregate principal amount of \$8.1 million with Biomedical Value Fund, L.P., Biomedical Offshore Value Fund, Ltd. and David C. Bupp (our President and CEO). Biomedical Value Fund, L.P. and Biomedical Offshore Value Fund, Ltd. are funds managed by Great Point Partners, LLC. The notes bear interest at 8% per annum and are freely convertible into shares of our common stock at a price of \$0.40 per share. Neoprobe may force conversion of the notes prior to their stated maturity under certain circumstances. The conversion price represents the ten-day volume weighted average trading price of our common stock through December 10, 2004. As part of this transaction, we issued the investors 10,125,000 Series T warrants to purchase our common stock at an exercise price of \$0.46, expiring in December 2009. In connection with this financing, we also issued 1,600,000 warrants to purchase our common stock to the placement agents, containing substantially identical terms to the warrants issued to the investors.

Our near-term business priorities are to complete multi-center trials for our Lymphoseek product, develop innovations for our gamma detection device line, support the launch of the reengineered version of the Quantix/OR products, identify a development and commercialization partner for our RIGS technology, and identify funding sources for our ACT technology. Our future liquidity and capital requirements to execute our near-term plans will depend on a number of factors, including our ability to raise additional capital in a timely manner through additional investment, expanded market acceptance of our current products, our ability to complete the commercialization of new products, our ability to monetize our investment in non-core technologies, our ability to obtain milestone or development funds from potential development and distribution partners, regulatory actions by FDA and international regulatory bodies, and intellectual property protection.

We believe we have adequate capital to assure that we can properly support our current business goals and objectives; however, we are subject to certain financial covenants as a part of debt agreements as described in the footnotes to our consolidated financial statements. A failure to meet these covenants could impact our liquidity beyond 2006. Our current business plans anticipate that we will take the actions necessary to meet or exceed the applicable covenant requirements; however, we cannot assure you that we will be successful in satisfying these covenants. If we are unsuccessful in satisfying the covenants, we may have to modify our business plans, attempt to raise additional capital or seek other forms of relief. In addition, we cannot assure you that we would be successful in raising additional capital, if necessary, at terms acceptable to the Company, or at all. We also cannot assure you that we will achieve profitability again.

Recent Accounting Developments

In February 2006, the FASB issued SFAS No. 155, *Accounting for Certain Hybrid Financial Instruments - An Amendment of FASB Statements No. 133 and 140* (SFAS No. 155). SFAS No. 155 amends SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*, and SFAS No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*. SFAS No. 155 (a) permits fair value remeasurement for any hybrid financial instrument that contains an embedded derivative that otherwise would require bifurcation, (b) clarifies which interest-only strips and principal-only strips are not subject to the requirements of SFAS No. 133, (c) establishes a requirement to evaluate interests in securitized financial assets to identify interests that are freestanding derivatives or that are hybrid financial instruments that contain an embedded derivative requiring bifurcation, (d)

clarifies that concentrations of credit risk in the form of subordination are not embedded derivatives, and (e) amends SFAS No. 140 to eliminate the prohibition on a qualifying special-purpose entity from holding a derivative financial instrument that pertains to a beneficial interest other than another derivative financial instrument. SFAS No. 155 is effective for all financial instruments acquired or issued after the beginning of an entity's first fiscal year that begins after September 15, 2006 and is required to be adopted by Neoprobe beginning January 1, 2007. We do not expect the adoption of SFAS No. 155 to have a material impact on our consolidated results of operations and financial condition.

In March 2006, the FASB issued SFAS No. 156, *Accounting for Servicing of Financial Assets - An Amendment of FASB Statement No. 140* (SFAS No. 156). SFAS No. 156 amends SFAS No. 140, *Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities*. SFAS No. 156 (a) requires recognition of a servicing asset or servicing liability each time an obligation to service a financial asset is undertaken by entering into a servicing contract in certain circumstances, (b) requires measurement at fair value of all separately recognized servicing assets and servicing liabilities, (c) permits the use of either the amortization method or the fair value measurement method for each class of separately recognized servicing assets and servicing liabilities, (d) permits a one-time reclassification of available-for-sale securities to trading securities at initial adoption, and (e) requires separate presentation of servicing assets and servicing liabilities subsequently measured at fair value in the statement of financial position and additional disclosures for all separately recognized servicing assets and servicing liabilities. SFAS No. 156 is effective for fiscal years beginning after September 15, 2006, and is required to be adopted by Neoprobe beginning January 1, 2007. We are currently evaluating the effect that the adoption of SFAS No. 156 will have on our consolidated results of operations and financial condition but do not expect it to have a material impact.

In June 2006, the FASB issued Financial Interpretation (FIN) No. 48, *Accounting for Uncertainty in Income Taxes - an Interpretation of FASB Statement No. 109* (FIN 48). FIN 48 clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with SFAS No. 109, *Accounting for Income Taxes*. FIN 48 outlines a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. FIN 48 also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. FIN 48 is effective for fiscal years beginning after December 15, 2006, and is required to be adopted by Neoprobe beginning January 1, 2007. We do not expect the adoption of FIN 48 to have a material impact on our consolidated results of operations and financial condition.

Critical Accounting Policies

The following accounting policies are considered by us to be critical to our results of operations and financial condition.

Revenue Recognition Related to Net Sales. We currently generate revenue primarily from sales of our gamma detection products; however, sales of blood flow products constituted approximately 11% of total revenues for the first six months of 2006 and are expected to increase in the future. Our standard shipping terms are FOB shipping point, and title and risk of loss passes to the customer upon shipment. We generally recognize sales revenue related to sales of our products when the products are shipped and the earnings process has been completed. However, in cases where product is shipped but the earnings process is not yet completed, revenue is deferred until it has been determined that the earnings process has been completed. Our customers have no right to return products purchased in the ordinary course of business.

The prices we charge our primary customer, EES, related to sales of products are subject to retroactive annual adjustment based on a fixed percentage of the actual sales prices achieved by EES on sales to end customers made during each fiscal year. To the extent that we can reasonably estimate the end-customer prices received by EES, we record sales to EES based upon these estimates. If we are unable to reasonably estimate end customer sales prices related to certain products sold to EES, we record revenue related to these product sales at the minimum (i.e., floor) price provided for under our distribution agreement with EES.

We also generate revenue from the service and repair of out-of-warranty products. Fees charged for service and repair on products not covered by an extended service agreement are recognized on completion of the service process when the serviced or repaired product has been returned to the customer. Fees charged for service or repair of products covered by an extended warranty agreement are deferred and recognized as revenue ratably over the life of the extended service agreement.

Use of Estimates. The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. We base these estimates and assumptions upon historical experience and existing, known circumstances. Actual results could differ from those estimates. Specifically, management may make significant estimates in the following areas:

- *Stock-Based Compensation.* Effective January 1, 2006, we adopted SFAS No. 123(R), *Share-Based Payment*, which is a revision of SFAS No. 123, *Accounting for Stock-Based Compensation*. SFAS No. 123(R) supersedes APB Opinion No. 25, *Accounting for Stock Issued to Employees*, and amends SFAS No. 95, *Statement of Cash Flows*. SFAS No. 123(R) requires all share-based payments to employees, including grants of employee stock options, to be recognized in the income statement based on their estimated fair values. Compensation cost arising from stock-based awards is recognized as expense using the straight-line method over the vesting period. We used the modified prospective application method in adopting SFAS No. 123 (R). We use the Black-Scholes option pricing model to value share-based payments. The valuation assumptions used have not changed from those used under SFAS No. 123. Prior to the adoption of SFAS No. 123(R), we followed the guidance in APB No. 25 which resulted in disclosure only of the financial impact of stock options. Financial statements of the Company for periods prior to January 1, 2006 do not reflect any recorded stock-based compensation expense. In adopting SFAS No. 123(R), we made no modifications to outstanding stock options, nor do we have any other outstanding share-based payment instruments subject to SFAS No. 123(R). Based in part on the anticipated adoption of SFAS No. 123(R), the Company generally reduced the number of stock options issued to employees in 2005 and shortened the vesting periods, with a portion of the options vesting immediately and the remainder vesting over a two-year period as compared to our previous practice of issuing stock options that vested over a three-year period. We will continue to evaluate compensation trends and may further revise our option granting practices in future years.
- *Allowance for Doubtful Accounts.* We maintain an allowance for doubtful accounts receivable to cover estimated losses resulting from the inability of our customers to make required payments. We determine the adequacy of this allowance by regularly reviewing our accounts receivable aging and evaluating individual customer receivables, considering customers' credit and financial condition, payment history and relevant economic conditions. If the financial condition of our customers were to deteriorate, resulting in an impairment of their ability to make payments, additional allowances for doubtful accounts may be required.
- *Inventory Valuation.* We value our inventory at the lower of cost (first-in, first-out method) or market. Our valuation reflects our estimates of excess, slow moving and obsolete inventory as well as inventory with a carrying value in excess of its net realizable value. Write-offs are recorded when product is removed from saleable inventory. We review inventory on hand at least quarterly and record provisions for excess and obsolete inventory based on several factors, including current assessment of future product demand, anticipated release of new products into the market, historical experience and product expiration. Our industry is characterized by rapid product development and frequent new product introductions. Uncertain timing of product approvals, variability in product launch strategies, product recalls and variation in product utilization all impact the estimates related to excess and obsolete inventory.

- *Impairment or Disposal of Long-Lived Assets.* We account for long-lived assets in accordance with the provisions of SFAS No. 144. This Statement requires that long-lived assets and certain identifiable intangibles be reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. The recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to future net undiscounted cash flows expected to be generated by the asset. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the assets exceeds the fair value of the assets. Assets to be disposed of are reported at the lower of the carrying amount or fair value less costs to sell. As of June 30, 2006, the most significant long-lived assets on our balance sheet relate to assets recorded in connection with the acquisition of Cardiosonix and gamma detection device patents related to ILM. The recoverability of these assets is based on the financial projections and models related to the future sales success of Cardiosonix' products and the continuing success of our gamma detection product line. As such, these assets could be subject to significant adjustment should the Cardiosonix technology not be successfully commercialized or the sales amounts in our current projections not be realized.
- *Product Warranty.* We warrant our products against defects in design, materials, and workmanship generally for a period of one year from the date of sale to the end customer. Our accrual for warranty expenses is adjusted periodically to reflect actual experience. EES also reimburses us for a portion of warranty expense incurred based on end customer sales they make during a given fiscal year.
- *Fair Value of Warrant Liability.* U.S. generally accepted accounting principles required us to classify the warrants issued in connection with our December 2004 placement of convertible promissory notes as a liability due to penalty provisions contained in the underlying securities purchase agreement. The penalty provisions could have required us to pay a penalty of 0.0667% per day of the total debt amount if we failed to meet certain registration deadlines, or if our stock was suspended from trading for more than 30 days. As a liability, the warrants were considered derivative instruments that were required to be periodically "marked to market" on our balance sheet. We estimated the fair value of the warrants at December 31, 2004 using the Black-Scholes option pricing model. On February 16, 2005, Neoprobe and the investors confirmed in writing their intention that the penalty provisions which led to this accounting treatment were intended to apply only to the \$8.1 million principal balance of the promissory notes and underlying conversion shares and not to the warrant shares. Because the value of our stock increased \$0.19 per share from \$0.40 per share at the closing date of the financing on December 14, 2004 to \$0.59 per share at December 31, 2004, our year end, the effect of marking the warrant liability to "market" at December 31, 2004 resulted in an increase in the estimated fair value of the warrant liability of \$1.2 million which was recorded as non-cash expense during the fourth quarter of 2004. Subsequently, the value of our stock increased \$0.02 per share from \$0.59 at December 31, 2004 to \$0.61 per share at February 16, 2005, such that marking the warrant liability to "market" at February 16, 2005 resulted in an increase in the estimated fair value of the warrant liability of \$142,427 which was recorded as non-cash expense during the first quarter of 2005. The estimated fair value of the warrant liability was then reclassified to additional paid-in capital during the first quarter of 2005.

Forward-Looking Statements

The Private Securities Litigation Reform Act of 1995 (the Act) provides a safe harbor for forward-looking statements made by or on behalf of our company. From time to time, our representatives and we may make written or verbal forward-looking statements, including statements contained in this report and other company filings with the SEC and in our reports to stockholders. Statements that relate to other than strictly historical facts, such as statements about our plans and strategies, expectations for future financial performance, new and existing products and technologies, anticipated clinical and regulatory pathways, and markets for our products are forward-looking statements within the meaning of the Act. Generally, the words "believe," "expect," "intend," "estimate," "anticipate," "will" and other similar expressions identify forward-looking statements. The forward-looking statements are and will be based on our then-current views and assumptions regarding future events and operating performance, and speak only as of their

dates. Investors are cautioned that such statements involve risks and uncertainties that could cause actual results to differ materially from historical or anticipated results due to many factors including, but not limited to, our continuing operating losses, uncertainty of market acceptance of our products, reliance on third party manufacturers, accumulated deficit, future capital needs, uncertainty of capital funding, dependence on limited product line and distribution channels, competition, limited marketing and manufacturing experience, risks of development of new products, regulatory risks, and other risks detailed in our most recent Annual Report on Form 10-KSB and other SEC filings. We undertake no obligation to publicly update or revise any forward-looking statements.

Item 3. Controls and Procedures

Under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934 (the Exchange Act)). Based on that evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that, as of the end of the period covered by this report, our disclosure controls and procedures are adequately designed to ensure that the information required to be disclosed by us in the reports we file or submit under the Exchange Act is recorded, possessed, summarized and reported, within the time periods specified in the applicable rules and forms. During the last fiscal quarter covered by this Annual Report on Form 10-KSB, there was no change in our internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) identified in connection with the evaluation required by paragraph (d) of Rule 13a-15 that materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II - OTHER INFORMATION

Item 4. Submission of Matters to a Vote of Security Holders

(a) Neoprobe Corporation held its Annual Meeting of Stockholders on June 8, 2006, for the purpose of electing two directors.

(b) At the Annual Meeting of Stockholders, the directors nominated were elected.

(c) The following table shows the voting tabulation for the election of directors.

<u>ACTION</u>	<u>FOR</u>	<u>WITHHELD</u>
Election of Directors		
Kirby I. Bland, M.D.	44,530,042	2,428,879
J. Frank Whitley, Jr.	44,537,877	2,421,044

Item 6. Exhibits

31.1 Certification of Chief Executive Officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.

31.2 Certification of Chief Financial Officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.

32.1 Certification of Chief Executive Officer of Periodic Financial Reports pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, 18 U.S.C. Section 1350

32.2 Certification of Chief Financial Officer of Periodic Financial Reports pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, 18 U.S.C. Section 1350

Item 5 is not applicable and has been omitted.

SIGNATURES

In accordance with the requirements of the Exchange Act, the registrant caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.
