Amended & Restated Notes

Item 3.02 Unregistered sales of Equity Securities.

Item 1.01 above is incorporated into this Item 3.02 by reference.

Each of Investor and Gottbetter is an “accredited investor,” as defined in Regulation D under the Securities Act of 1933, as amended, or the Securities Act. None of the Series B Preferred Stock, the Series F Warrant, the Series G Warrant, the Series D Warrant or the shares of our common stock underlying such securities were registered under the Securities Act, or the securities laws of any state and were offered and sold in reliance on the exemption from registration afforded by Section 4(2) and Regulation D (Rule 506) under the Securities Act and corresponding provisions of state securities laws, which exempts transactions by an issuer not involving any public offering.

We made this determination with respect to the sale of the Series B Preferred Stock, the Series F Warrant, the Series G Warrant based on the representations of the Investor, and we made this determination with respect to the issuance of the Series D Warrant based on the representations of Gottbetter, which included, in pertinent part, that the entity acquiring the securities described above is an “accredited investor” within the meaning of Rule 501 of Regulation D promulgated under the Securities Act, and that such entity was acquiring the securities it was acquiring for investment purposes for its own account and not as nominee or agent, and not with a view to the resale or distribution, and that such entity understood such securities may not be sold or otherwise disposed of without registration under the Securities Act or an applicable exemption therefrom.

Thus, the Series B Preferred Stock, the Series F Warrant, the Series G Warrant and the Series D Warrant and shares of common stock underlying such securities may not be offered or sold in the United States absent registration or an applicable exemption from the registration requirements and certificates evidencing such shares contain a legend stating the same.
