(Do not check if a smaller reporting company.)

Check whether the issuer is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of December 31, 2010, there was 1 non-affiliate holder of common stock of the Company.

APPLICABLE ONLY TO CORPORATE REGISTRANTS

As of March 22, 2011, there were 2,061,856 shares of common stock, par value \$.0001, outstanding.

FORWARD-LOOKING STATEMENTS

Certain statements made in this Annual Report on Form 10-K are “forward-looking statements” (within the meaning of the Private Securities Litigation Reform Act of 1995) regarding the plans and objectives of management for future operations. Such statements involve known and unknown risks, uncertainties and other factors that may cause actual results, performance or achievements of Plastron Acquisition Corp. II (the “Company”) to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. The forward-looking statements included herein are based on current expectations that involve numerous risks and uncertainties. The Company's plans and objectives are based, in part, on assumptions involving the continued expansion of business. Assumptions relating to the foregoing involve judgments with respect to, among other things, future economic, competitive and market conditions and future business decisions, all of which are difficult or impossible to predict accurately and many of which are beyond the control of the Company. Although the Company believes its assumptions underlying the forward-looking statements are reasonable, any of the assumptions could prove inaccurate and, therefore, there can be no assurance that the forward-looking statements included in this Report will prove to be accurate. In light of the significant uncertainties inherent in the forward-looking statements included herein, the inclusion of such information should not be regarded as a representation by the Company or any other person that the objectives and plans of the Company will be achieved.

PART I

Item 1. Description of Business.

Plastron Acquisition Corp. II (“we”, “us”, “our”, the "Company") was incorporated in the State of Delaware on January 24, 2006 and maintains its principal executive office at c/o Michael Rapp, 712 Fifth Avenue, New York, NY 10019. The Company was formed as a vehicle to pursue a business combination through the acquisition of, or merger with, an operating business. The Company filed a Registration Statement on Form 10-SB with the U.S. Securities and Exchange Commission (the “SEC”) on May 15, 2007, and since its effectiveness, the Company has focused its efforts to identify a possible business combination. The business purpose of the Company is to seek the acquisition of, or merger with, an existing company. The Company selected December 31 as its fiscal year end.

The Company is currently considered to be a "blank check" company. The U.S. Securities and Exchange Commission (the “SEC”) defines those companies as "any development stage company that is issuing a penny stock, within the meaning of Section 3 (a)(51) of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), and that has no specific business plan or purpose, or has indicated that its business plan is to merge with an unidentified company or companies." Under SEC Rule 12b-2 under the Exchange Act, the Company also qualifies as a “shell company,” because it has no or nominal assets (other than cash) and no or nominal operations. Many states have enacted statutes, rules and regulations limiting the sale of securities of "blank check" companies in their respective jurisdictions. Management does not intend to undertake any efforts to cause a market to develop in our securities, either debt or equity, until we have successfully concluded a business combination. The Company intends to comply with the periodic reporting requirements of the Exchange Act for so long as it is subject to those requirements.

The Company was organized as a vehicle to investigate and, if such investigation warrants, acquire a target company or business seeking the perceived advantages of being a publicly held corporation. The Company’s principal business objective for the next 12 months and beyond such time will be to achieve long-term growth potential through a combination with a business rather than immediate, short-term earnings. The Company will not restrict its potential candidate target companies to any specific business, industry or geographical location and, thus, may acquire any type of business.

The analysis of new business opportunities will be undertaken by or under the supervision of the officers and directors of the Company. As of this date, the Company has not entered into any definitive agreement with any party, nor have there been any specific discussions with any potential business combination candidate regarding business opportunities for the Company. The Company has unrestricted flexibility in seeking, analyzing and participating in potential business opportunities. In its efforts to analyze potential acquisition targets, the Company will consider the following kinds of factors:

- (a) Potential for growth, indicated by new technology, anticipated market expansion or new products;
- (b) Competitive position as compared to other firms of similar size and experience within the industry segment as well as within the industry as a whole;
- (c) Strength and diversity of management, either in place or scheduled for recruitment;
- (d) Capital requirements and anticipated availability of required funds, to be provided by the Company or from operations, through the sale of additional securities, through joint ventures or similar arrangements or from other sources;

(e) The cost of participation by the Company as compared to the perceived tangible and intangible values and potentials;

(f) The extent to which the business opportunity can be advanced; and

(g) The accessibility of required management expertise, personnel, raw materials, services, professional assistance and other required items.

In applying the foregoing criteria, no one of which will be controlling, management will attempt to analyze all factors and circumstances and make a determination based upon reasonable investigative measures and available data. Potentially available business opportunities may occur in many different industries, and at various stages of development, all of which will make the task of comparative investigation and analysis of such business opportunities extremely difficult and complex. Due to the Company's limited capital available for investigation, the Company may not discover or adequately evaluate adverse facts about the opportunity to be acquired. In evaluating a prospective business combination, we will conduct as extensive a due diligence review of potential targets as possible given the lack of information which may be available regarding private companies, our limited personnel and financial resources and the inexperience of our management with respect to such activities. We expect that our due diligence will encompass, among other things, meetings with the target business's incumbent management and inspection of its facilities, as necessary, as well as a review of financial and other information which is made available to us. This due diligence review will be conducted either by our management or by unaffiliated third parties we may engage, including but not limited to attorneys, accountants, consultants or such other professionals. At this time the Company has not specifically identified any third parties that it may engage. The costs associated with hiring third parties to complete a business combination target may be significant and are difficult to determine as such costs may vary depending on a variety of factors, including the amount of time it takes to complete a business combination, the location of the target company and the size and the complexity of the target company. Our limited funds and the lack of full-time management will likely make it impracticable to conduct a complete and exhaustive investigation and analysis of a target business before we consummate a business combination. Management decisions, therefore, will likely be made without detailed feasibility studies, independent analysis, market surveys and the like which, if we had more funds available to us, would be desirable. We will be particularly dependent in making decisions upon information provided by the promoters, owners, sponsors or other associated with the target business seeking our participation.

The time and costs required to select and evaluate a target business and to structure and complete a business combination cannot presently be ascertained with any degree of certainty. The amount of time it takes to complete a business combination, the location of the target company and the size and complexity of the business of the target company are all factors that determine the costs associated with completing a business combination transaction. The time and costs required to complete a business combination transaction can be ascertained once a business combination target has been identified. Any costs incurred with respect to evaluation of a prospective business combination that is not ultimately completed will result in a loss to us.

COMPETITION

In identifying, evaluating and selecting a target business, we may encounter intense competition from other entities having a business objective similar to ours. There are numerous "public shell" companies either actively or passively seeking operating businesses with which to merge in addition to a large number of "blank check" companies formed and capitalized specifically to acquire operating businesses. Additionally, we are subject to competition from other companies looking to expand their operations through the acquisition of a target business. Many of these entities are well established and have extensive experience identifying and effecting business combinations directly or through affiliates. Many of these competitors possess greater technical, human and other resources than us and our financial

resources will be relatively limited when contrasted with those of many of these competitors. Our ability to compete in acquiring certain sizable target businesses is limited by our available financial resources. This inherent competitive limitation gives others an advantage in pursuing the acquisition of a target business. Further, our outstanding warrants and the future dilution they potentially represent may not be viewed favorably by certain target businesses.

Any of these factors may place us at a competitive disadvantage in successfully negotiating a business combination. Our management believes, however, that our status as a public entity and potential access to the United States public equity markets may give us a competitive advantage over privately-held entities with a business objective similar to ours to acquire a target business on favorable terms.

If we succeed in effecting a business combination, there will be, in all likelihood, intense competition from competitors of the target business. Many of our target business' competitors are likely to be significantly larger and have far greater financial and other resources than we will. Some of these competitors may be divisions or subsidiaries of large, diversified companies that have access to financial resources of their respective parent companies. Our target business may not be able to compete effectively with these companies or maintain them as customers while competing with them on other projects. In addition, it is likely that our target business will face significant competition from smaller companies that have specialized capabilities in similar areas. We cannot accurately predict how our target business' competitive position may be affected by changing economic conditions, customer requirements or technical developments. We cannot assure you that, subsequent to a business combination, we will have the resources to compete effectively.

FORM OF ACQUISITION

The manner in which the Company participates in an opportunity will depend upon the nature of the opportunity, the respective needs and desires of the Company and the promoters of the opportunity, and the relative negotiating strength of the Company and such promoters.

It is likely that the Company will acquire its participation in a business opportunity through the issuance of common stock or other securities of the Company. Although the terms of any such transaction cannot be predicted, it should be noted that in certain circumstances the criteria for determining whether or not an acquisition is a so-called "tax free" reorganization under Section 368(a)(1) of the Internal Revenue Code of 1986, as amended (the "Code") depends upon whether the owners of the acquired business own 80% or more of the voting stock of the surviving entity. If a transaction were structured to take advantage of these provisions rather than other "tax free" provisions provided under the Code, all prior stockholders would in such circumstances retain 20% or less of the total issued and outstanding shares of the surviving entity. Under other circumstances, depending upon the relative negotiating strength of the parties, prior stockholders may retain substantially less than 20% of the total issued and outstanding shares of the surviving entity. This could result in substantial additional dilution to the equity of those who were stockholders of the Company prior to such reorganization.

The present stockholders of the Company will likely not have control of a majority of the voting securities of the Company following a reorganization transaction. As part of such a transaction, all or a majority of the Company's directors may resign and one or more new directors may be appointed without any vote by stockholders.

In the case of an acquisition, the transaction may be accomplished upon the sole determination of management without any vote or approval by stockholders. In the case of a statutory merger or consolidation directly involving the Company, it will likely be necessary to call a stockholders' meeting and obtain the approval of the holders of a majority of the outstanding securities. The necessity to obtain such stockholder approval may result in delay and additional expense in the consummation of any proposed transaction and will also give rise to certain appraisal rights to dissenting stockholders. Most likely, management will seek to structure any such transaction so as not to require stockholder approval.

It is anticipated that the investigation of specific business opportunities and the negotiation, drafting and execution of relevant agreements, disclosure documents and other instruments will require substantial management time and attention and substantial cost for accountants, attorneys and others. If a decision is made not to participate in a specific business opportunity, the costs therefore incurred in the related investigation might not be recoverable. Furthermore, even if an agreement is reached for the participation in a specific business opportunity, the failure to consummate that transaction may result in the loss to the Registrant of the related costs incurred.

We presently have no employees apart from our officers and directors. Our officers and directors are engaged in outside business activities and anticipate that they will devote to our business very limited time until the acquisition of a successful business opportunity has been identified. We expect no significant changes in the number of our employees other than such changes, if any, incident to a business combination.

Item 1A. Risk Factors.

As a “smaller reporting company” as defined by Item 10 of Regulation S-K, the Company is not required to provide this information.

Item 1B. Unresolved Staff Comments.

As a “smaller reporting company” as defined by Item 10 of Regulation S-K, the Company is not required to provide this information.

Item 2. Description of Property.

The Company neither rents nor owns any properties. The Company utilizes the office space and equipment of its management at no cost. Management estimates such amounts to be immaterial. The Company currently has no policy with respect to investments or interests in real estate, real estate mortgages or securities of, or interests in, persons primarily engaged in real estate activities.

Item 3. Legal Proceedings.

There are no material pending legal proceedings to which the Company, any executive officer, any owner of record or beneficially of more than five percent of any class of voting securities is a party or as to which any of its property is subject, and no such proceedings are known to the Company to be threatened or contemplated against it.

Item 4. Removed and Reserved.

None.

PART II

Item 5. Market for Common Equity, Related Stockholder Matters and Small Business Issuer Purchases of Equity Securities.

Common Stock

Our Certificate of Incorporation authorizes the issuance of up to 75,000,000 shares of common stock, par value \$.0001 per share (the "Common Stock"). The Common Stock is not listed on a publicly-traded market. As of March 22, 2011, there were 4 holders of record of the Common Stock.

Preferred Stock

Our Certificate of Incorporation authorizes the issuance of up to 10,000,000 shares of preferred stock, par value \$.0001 per share (the "Preferred Stock"). The Company has not yet issued any of its preferred stock.

Dividend Policy

The Company has not declared or paid any cash dividends on its common stock and does not intend to declare or pay any cash dividend in the foreseeable future. The payment of dividends, if any, is within the discretion of the Board of Directors and will depend on the Company's earnings, if any, its capital requirements and financial condition and such other factors as the Board of Directors may consider.

Securities Authorized for Issuance under Equity Compensation Plans

The Company does not have any equity compensation plans or any individual compensation arrangements with respect to its common stock or preferred stock. The issuance of any of our common or preferred stock is within the discretion of our Board of Directors, which has the power to issue any or all of our authorized but unissued shares without stockholder approval.

Recent Sales of Unregistered Securities

The Company did not sell any equity securities that were not registered under the Securities Act during the quarter ended December 31, 2010.

No securities have been issued for services. Neither the Registrant nor any person acting on its behalf offered or sold the securities by means of any form of general solicitation or general advertising. No services were performed by any purchaser as consideration for the shares issued.

Issuer Purchases of Equity Securities

None.

Item 6. Selected Financial Data.

As a "smaller reporting company" as defined by Item 10 of Regulation S-K, the Company is not required to provide this information.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operation

The Company was organized as a vehicle to investigate and, if such investigation warrants, acquire a target company or business seeking the perceived advantages of being a publicly held corporation. Our principal business objective for the next 12 months and beyond such time will be to achieve long-term growth potential through a combination with a business rather than immediate, short-term earnings. The Company will not restrict our potential candidate target companies to any specific business, industry or geographical location and, thus, may acquire any type of business.

The Company currently does not engage in any business activities that provide cash flow. During the next twelve months we anticipate incurring costs related to:

- (i) filing Exchange Act reports, and
- (ii) investigating, analyzing and consummating an acquisition.

We believe we will be able to meet these costs through use of funds in our treasury, through deferral of fees by certain service providers and additional amounts, as necessary, to be loaned to or invested in us by our stockholders, management or other investors. As of the date of the period covered by this report, the Company has \$612 in its treasury. There are no assurances that the Company will be able to secure any additional funding as needed. Currently, however our ability to continue as a going concern is dependent upon our ability to generate future profitable operations and/or to obtain the necessary financing to meet our obligations and repay our liabilities arising from normal business operations when they come due. Our ability to continue as a going concern is also dependant on our ability to find a suitable target company and enter into a possible reverse merger with such company. Management's plan includes obtaining additional funds by equity financing through a reverse merger transaction and/or related party advances, however there is no assurance of additional funding being available.

The Company may consider acquiring a business which has recently commenced operations, is a developing company in need of additional funds for expansion into new products or markets, is seeking to develop a new product or service, or is an established business which may be experiencing financial or operating difficulties and is in need of additional capital. In the alternative, a business combination may involve the acquisition of, or merger with, a company which does not need substantial additional capital but which desires to establish a public trading market for its shares while avoiding, among other things, the time delays, significant expense, and loss of voting control which may occur in a public offering.

Our management has not had any contact or discussions with representatives of other entities regarding a business combination with us. Any target business that is selected may be a financially unstable company or an entity in its early stages of development or growth, including entities without established records of sales or earnings. In that event, we will be subject to numerous risks inherent in the business and operations of financially unstable and early stage or potential emerging growth companies. In addition, we may effect a business combination with an entity in an industry characterized by a high level of risk, and, although our management will endeavor to evaluate the risks inherent in a particular target business, there can be no assurance that we will properly ascertain or assess all significant risks. Our management anticipates that it will likely be able to effect only one business combination, due primarily to our limited financing and the dilution of interest for present and prospective stockholders, which is likely to occur as a result of our management's plan to offer a controlling interest to a target business in order to achieve a tax-free reorganization. This lack of diversification should be considered a substantial risk in investing in us, because it will not permit us to offset potential losses from one venture against gains from another.

The Company anticipates that the selection of a business combination will be complex and extremely risky. Because of general economic conditions, rapid technological advances being made in some industries and shortages of available capital, our management believes that there are numerous firms seeking the perceived benefits of becoming a publicly traded corporation. Such perceived benefits of becoming a publicly traded corporation include, among other things, facilitating or improving the terms on which additional equity financing may be obtained, providing liquidity for the principals of and investors in a business, creating a means for providing incentive stock options or similar benefits to key employees, and offering greater flexibility in structuring acquisitions, joint ventures and the like through the issuance of stock. Potentially available business combinations may occur in many different industries and at various stages of development, all of which will make the task of comparative investigation and analysis of such business opportunities extremely difficult and complex.

Liquidity and Capital Resources

As of December 31, 2010, the Company had assets equal to \$5,112, comprised exclusively of cash and cash equivalents and prepaid expenses. This compares with assets of \$6,559, comprised exclusively of cash and cash equivalents as of December 31, 2009. The Company's current liabilities as of December 31, 2010 totaled \$84,406, comprised exclusively of notes payable, accrued interest and related party advances. This compares with current liabilities equal to \$55,412, comprised exclusively of notes payable, accrued interest and accounts payable as of December 31, 2009. The Company can provide no assurance that it can continue to satisfy its cash requirements for at least the next twelve months.

The following is a summary of the Company's cash flows provided by (used in) operating, investing, and financing activities for the years ended December 31, 2010 and 2009 and for the cumulative period from January 24, 2006 (Inception) to December 31, 2010.

	Fiscal Year Ended December 31, 2010	Fiscal Year Ended December 31, 2009	For the Cumulative Period from Inception (January 24, 2006) to December 31, 2010
Net cash used in operating activities	\$(32,329)	\$(21,451)	\$(105,698)
Net cash used in investing activities	-	-	-
Net cash provided by financing activities	\$26,382	\$27,428	\$106,310
Net Increase (Decrease) in Cash and Cash Equivalents	\$(5,947)	\$5,977	\$612

The Company has nominal assets and has generated no revenues since inception. The Company is also dependent upon the receipt of capital investment or other financing to fund its ongoing operations and to execute its business plan of seeking a combination with a private operating company. In addition, the Company is dependent upon certain related parties to provide continued funding and capital resources. If continued funding and capital resources are unavailable at reasonable terms, the Company may not be able to implement its plan of operations.

Results of Operations

The Company has not conducted any active operations since inception, except for its efforts to locate suitable acquisition candidates. No revenue has been generated by the Company from Inception (January 24, 2006) to December 31, 2010. It is unlikely the Company will have any revenues unless it is able to effect an acquisition or merger with an operating company, of which there can be no assurance. It is management's assertion that these circumstances may hinder the Company's ability to continue as a going concern. The Company's plan of operation for the next twelve months shall be to continue its efforts to locate suitable acquisition candidates.

For the fiscal years ended December 31, 2010 and 2009, the Company had a net loss of \$30,441 and \$24,973 consisting of legal, accounting, audit, and other professional service fees incurred in relation to the preparation and filing of the Company's periodic reports.

For the cumulative period from Inception (January 24, 2006) to December 31, 2010, the Company had a net loss of \$110,222 comprised exclusively of legal, accounting, audit, and other professional service fees incurred in relation to the formation of the Company, the filing of the Company's Registration Statement on Form 10-SB in May of 2007, and the filing of the Company's periodic reports.

Off-Balance Sheet Arrangements

The Company does not have any off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on the Company's financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that is material to investors.

Contractual Obligations

As a "smaller reporting company" as defined by Item 10 of Regulation S-K, the Company is not required to provide this information.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk.

As a "smaller reporting company" as defined by Item 10 of Regulation S-K, the Company is not required to provide this information.

Item 8. Financial Statements and Supplementary Data.

Audited financial statements begin on the following page of this report.

CERTIFIED PUBLIC ACCOUNTANTS & CONSULTANTS

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders
Plastron Acquisition Corp. II

We have audited the accompanying balance sheets of Plastron Acquisition Corp II (A Development Stage Company) as of December 31, 2010 and 2009, and the related statements of operations, stockholders' deficit, and cash flows for the years ended December 31, 2010 and 2009 and from inception (January 24, 2006) to December 31, 2010. Plastron Acquisition Corp II management is responsible for these financial statements. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The company is not required to have, nor were we engaged to perform an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control over the financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Plastron Acquisition Corp II. (A Development Stage Company) as of December 31, 2010 and 2009, and the results of its operations and its cash flows for the years ended December 31, 2010 and 2009 and from inception (January 24, 2006) to December 31, 2010 in conformity with accounting principles generally accepted in the United States of America.

The accompanying financial statements have been prepared assuming the Company will continue as a going concern. As discussed in Note 1 to the financial statements, the Company has suffered recurring losses from operations, which raise substantial doubt about its ability to continue as a going concern. Management's plans in regard to these matters are also described in Note 1. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.
