(A development stage company)  
Notes to the financial statements

NOTE 1 - GENERAL

- A. Brainstorm Cell Therapeutics Inc. (formerly: Golden Hand Resources Inc.) ("Company") was incorporated in the State of Washington on September 22, 2000.
- B. On May 21, 2004, the former major stockholders of the Company entered into a purchase agreement with a group of private investors, who purchased from the former major stockholders 6,880,000 shares of the then issued and outstanding 10,238,000 shares of Common Stock.
- C. On July 8, 2004, the Company entered into a licensing agreement with Ramot of Tel Aviv University Ltd. ("Ramot"), an Israeli corporation, to acquire a license certain stem cell technology (see Note 3). Subsequent to this agreement, the Company decided to focus on the development of novel cell therapies for neurodegenerative diseases, particularly Parkinson's disease, based on the acquired technology and research to be conducted and funded by the Company.
- D. On November 22, 2004, the Company changed its name from Golden Hand Resources Inc. to Brainstorm Cell Therapeutics Inc. to better reflect its new line of business in the development of novel cell therapies for neurodegenerative diseases. The Company owns all operational property and equipment.
- E. On October 25, 2004, the Company formed a wholly-owned subsidiary in Israel, Brainstorm Cell Therapeutics Ltd. ("BCT").
- F. On September 17, 2006, the Company's changed its fiscal year-end from March 31 to December 31.
- G. In December 2006, the Company changed its state of incorporation from Washington to Delaware.
- H. Since inception, the Company has devoted substantially all of its efforts to research and development, recruiting management and technical staff, acquiring assets and raising capital. In addition, the Company has not generated revenues. Accordingly, the Company is considered to be in the development stage, as defined in Statement of Financial Accounting Standards No. 7, "Accounting and reporting by development Stage Enterprises" ASC 915-10 (formerly "SFAS" 7).
- I. In October 2010, the Israeli Ministry of Health granted clearance for a Phase I/II clinical trial using the Company's autologous NurOwn™ stem cell therapy in patients with ALS, subject to some additional process specifications as well as completion of the sterility validation study for tests performed.
- On February 23, 2011, the Company submitted, to the Israel Ministry of Health (MOH), all the required documents. Following approval of the MOH, a Phase I/II clinical study for ALS patients using the Company's autologous NurOwn™ stem cell therapy was initiated in June 2011.
- J. In February 2011, the U.S. Food and Drug Administration (FDA) granted orphan drug designation to the Company's NurOwn™ autologous adult stem cell product candidate for the treatment of amyotrophic lateral sclerosis (ALS).

Notes to the financial statements

NOTE 1 - GENERAL (Cont.)

GOING CONCERN

As reflected in the accompanying financial statements, the Company's operations for the six months ended on June 30, 2011, resulted in a net loss of \$1,802. The Company's balance sheet reflects accumulated deficit of \$41,962. These conditions, together with the fact that the Company is a development stage Company and has no revenues nor are revenues expected in the near future, raise substantial doubt about the Company's ability to continue to operate as a going concern. The Company's ability to continue operating as a "going concern" is dependent on several factors, among them is its ability to raise sufficient additional working capital.

In 2009 the Company decided to focus on the effort to commence clinical trials in ALS amyotrophic lateral sclerosis (ALS) in 2011.

In February 2011, the Company raised approximately \$3.8 million from institutional and private investors. However, there can be no assurance that additional funds will be available on terms acceptable to the Company, or at all.

These financial statements do not include any adjustments relating to the recoverability and classification of assets carrying amounts or the amount and classification of liabilities that may be required should the Company be unable to continue as a going concern.

NOTE 2 - SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies applied in the annual financial statements of the Company as of December 31, 2010 are applied consistently in these financial statements.

NOTE 3 - UNAUDITED INTERIM CONSOLIDATED FINANCIAL STATEMENTS

The accompanying unaudited interim financial statements have been prepared in a condensed format and include the consolidated financial operations of the Company and its wholly-owned subsidiary as of June 30, 2011 and for the six months then ended, in accordance with accounting principles generally accepted in the United States relating to the preparation of financial statements for interim periods. Accordingly, they do not include all the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the six months ended June 30, 2011, may not necessarily be indicative of the results that may be expected for the year ended December 31, 2011.

NOTE 4 - RESEARCH AND LICENSE AGREEMENT

The Company has a Research and License Agreement, as amended and restated, with Ramot. The Company obtained a waiver and release from Ramot pursuant to which Ramot agreed to an amended payment schedule regarding the Company's payment obligations under the Research and License Agreement and waived all claims against the Company resulting from the Company's previous defaults and non-payment under the Research and License Agreement. The waiver and release amended and restated the original payment schedule under the original agreement providing for payments during the initial research period and additional payments for any extended research period.

NOTE 4 - RESEARCH AND LICENSE AGREEMENT (Cont.)

As of December 24, 2009, the Company had paid to Ramot \$400 but did not make payments totaling \$240 for the initial research period and payments totaling \$380 for the extended research period.

On December 24, 2009, the Company and Ramot entered into a settlement agreement which amended the Research and License Agreement, as amended and restated pursuant to which, among other things, the following matters were agreed upon:

- a) Ramot released the Company from its obligation to fund the extended research period in the total amount of \$1,140. Therefore, the Company reversed an expense in 2009, equal to \$760, from its research and development expenses that were previously expensed.
- b) Past due amounts of \$240 for the initial research period plus interest of \$32 owed by the Company to Ramot were converted into 1,120,000 shares of Common Stock on December 30, 2009. Ramot was required to deposit the shares with a broker and only sell the shares in the open market after 185 days from the issuance date.
- c) In the event that the total proceeds generated by sales of the shares on December 31, 2010, together with the March 31, 2010 payment, are less than \$240 on or prior to December 31, 2010, then on such date the Company would be required to pay to Ramot the difference between the proceeds that Ramot has received from sales of the shares up to such date together with the September Payment (if any) that has been transferred to Ramot up to such date, and \$240. Related compensation in the amount of \$51 was recorded as research and development expenses.

In January 2011, Ramot exercised additional 167,530 Common Stock of the Company, for \$35, which finalized the sale of the 1,120,000 Common Stock of the Company granted to Ramot for \$235. In February 2011, the Company paid the remaining \$5 and finalized the balance due to Ramot according to the settlement agreement between the parties dated December 24, 2009.

During the first quarter of 2010, the Company entered into an agreement with Hadassah Medical Centre to conduct clinical trials in up to 26 ALS patients in 2011.

NOTE 5 - CONSULTING AGREEMENTS

- A. On July 8, 2004, the Company entered into consulting agreements with each of Prof. Eldad Melamed and Dr. Daniel Offen (together, the "Consultants"), under which the Consultants provide the Company scientific and medical consulting services in consideration for a monthly payment of \$6 each. In addition, the Company granted each of the Consultants, a fully vested warrant to purchase 1,097,215 shares of Common Stock at an exercise price of \$0.01 per share. The warrants issued pursuant to the agreements were issued to the Consultants effective as of November 4, 2004. Each of the warrants was exercisable for a seven-year period beginning on November 4, 2005. As of June 2011, all the above warrants had been exercised.
- B. On December 16, 2010, the Company granted to the Consultants 1,100,000 shares of the Company's Common Stock for services rendered through December 31, 2010. Related compensation in the amount of \$220 is recorded as research and development expense.

C. On June 27, 2011, the Company granted to one of the Consultants 400,000 shares of Common Stock of the Company for services rendered through December 31, 2009 in the amount of \$192.

BRAINSTORM CELL THERAPEUTICS INC. AND SUBSIDIARY  
(A development stage company)  
Notes to the financial statements

NOTE 5 - CONSULTING AGREEMENTS (Cont.)

E. As of June 30, 2011, the Company had a total liability of \$57 for services rendered by the Consultants under the abovementioned agreements.

NOTE 6 - SHORT-TERM CONVERTIBLE NOTE

On December 13, 2009, the Company issued a \$135 Convertible Promissory Note to its legal advisor for \$217 in legal fees accrued through October 31, 2009. Interest on the Note accrued at the rate of 4%. The legal advisor had the right at any time to convert all or part of the outstanding principal and interest amount of the note into shares of Common Stock based on the five day average closing stock price prior to conversion election.

The difference between the amount the Company owed to the legal advisor and the principal of the Convertible Promissory Note in the amount of \$82 was recorded in general and administrative expenses.

On February 19, 2010, the Company's legal advisor converted the entire accrued principal and interest of a \$135 Convertible Promissory Note into 402,385 shares of Common Stock.

On September 15, 2010, the Company issued a \$135 Convertible Promissory Note to its legal advisor for certain legal fees accrued through December 31, 2010. Interest on the Note was at the rate of 4%. The legal advisor had the right at any time to convert all or part of the outstanding principal and interest amount of the note into shares of Common Stock based on the five day average closing stock price prior to conversion election.

On February 18, 2011, the legal advisor converted the entire accrued principal and interest into 445,617 shares of Common Stock.

NOTE 7 - SHORT-TERM LOANS

In March 2007, the Company issued a \$150 convertible note to a lender, with an annual interest rate of 8% for the first year, with an increase up to 10% after the first year. On January 27, 2010, the lender converted the entire accrued principal and interest of \$189 into 1,016,109 shares of Common Stock of the Company. After the balance sheet date, the Company issued an additional 309,977 shares of Common Stock of the Company with regard to the above conversion (see Note 9 C).

Since the outcome of the issuance of the shares was to relieve the debtor from its obligation, based on guidance in ASC 860-10 and ASC 450-20 Extinguishment of Liabilities” the Company derecognized the liability with the difference recognized in earnings.

NOTE 8 - STOCK CAPITAL

A. The rights of Common Stock are as follows:

Holders of Common Stock have the right to receive notice to participate and vote in annual and special meetings of the Stockholders of the Company, the right to a share in the excess of assets upon liquidation of the Company and the right to receive dividends, if declared.

The Common Stock is registered and publicly traded on the Over-the-Counter Bulletin Board service of the FINRA, under the symbol BCLI.

Company Overview

Brainstorm Cell Therapeutics Inc. ("Brainstorm" or the "Company") is a leading company developing stem cell therapeutic products based on technologies enabling the in-vitro differentiation of bone marrow stem cells into neural-like cells. The Company aims to become a leader in adult stem cell transplantation for neurodegenerative diseases. Our technology entails exploiting the patient's own bone marrow stem cells to generate glial-like cells that may provide an effective treatment for Amyotrophic Lateral Sclerosis ("ALS"), Parkinson's like Disease ("PD"), Multiple Sclerosis ("MS") and Spinal Cord Injury.

Our core technology was developed in collaboration with prominent neurologist, Prof. Eldad Melamed, former head of Neurology of the Rabin Medical Center and member of the Scientific Committee of the Michael J. Fox Foundation for Parkinson's Research, and expert Cell biologist Prof. Daniel Offen, of the Felsenstein Medical Research Center of Tel Aviv University.

The Company's team is among the first to demonstrate formation of neurotrophic-factor secreting cells (glial-like cells) from in-vitro differentiated bone marrow cells that produce neurotrophic factors ("NTF") including GDNF, BDNF and additional factors. Moreover, in research conducted by this team, implantation of these differentiated cells into brains of animal models that had been induced to Parkinsonian behavior markedly improved their condition.

The Company's aim is to provide neural-supporting stem cell transplants that are expected to maintain, preserve and possibly restore the damaged neurons, protecting them from further degeneration.

The Company holds exclusive worldwide rights to commercialize the technology, through a licensing agreement with Ramot, the technology transfer company of Tel Aviv University, Israel.

As a result of limited cash resources and the desire to take a faster path to clinical trials, since the fourth quarter of 2008 the Company has focused all of its efforts on ALS, and is currently not allocating resources towards PD or other neurodegenerative diseases.

We are currently in the clinical stage of development of our technology and we intend to begin the process of seeking regulatory approval from regulatory agencies in the U.S and Europe.

In Israel, following approval of the Israel Ministry of Health (MoH), a Phase I/II clinical study for ALS patients using the Company's autologous NurOwn™ stem cell therapy was initiated in June 2011.

In February 2011, the U.S. Food and Drug Administration ("FDA") granted Orphan Drug designation to the Company's NurOwn™ autologous adult stem cell product candidate for the treatment of ALS. Orphan Drug status entitles BrainStorm to seven years of marketing exclusivity for NurOwn™ upon regulatory approval, as well as the opportunity to apply for grant funding from the FDA of up to \$400,000 per year for four years to defray costs of clinical trial expenses, tax credits for clinical research expenses and potential exemption from the FDA's application user fee.

Our efforts are directed at:

- Finalizing a GMP compliant production process;
- Demonstrating Safety Tolerability and Therapeutic effect of transplantation of Autologous cultured Bone Marrow Stromal Cells secreting Neurotrophic factors (MSC-NTF) in a Phase I/II Clinical trial in human ALS patients;
- Setting up a centralized facility to provide the therapeutic products and services for transplantation in patients in the US and in Europe, as part of the clinical development program; and
  - Submitting an IND to the FDA.

#### Our Approach

Our research team led by Prof. Melamed and Prof. Offen has shown that human bone marrow mesenchymal stem cells can be expanded and induced to differentiate into two types of brain cells, neuron-like and astrocyte-like cells, each having different therapeutic potential, as follows:

NurOwn™ program one - Neurotrophic-factors ("NTF") secreting cells (MSC-NTF) - human bone marrow derived NTF secreting cells for treatment of, ALS, PD and MS. In-vitro differentiation of the expanded human bone marrow derived mesenchymal stem cells in a proprietary medium led to the generation of neurotrophic-factors secreting cells. The in-vitro differentiated cells were shown to express and secrete GDNF, as well as other NTFs, into the growth medium. GDNF is a neurotrophic-factor, previously shown to protect, preserve and even restore neuronal function, particularly dopaminergic cells in PD, but also neuron function in other neurodegenerative pathologies such as ALS and Huntington's disease. Unfortunately, therapeutic application of GDNF is hampered by its poor brain penetration and stability. Attempting to infuse the protein directly to the brain is impractical and the alternative, using GDNF gene therapy, suffers from the limitations and risks of using viral vectors. Our preliminary results show that our NTF secreting cells, when transplanted into a 6-OHDA lesion PD rat model, show significant efficacy. Within weeks of the transplantation, there was an improvement of more than 50% in the animals' characteristic disease symptoms.

We have optimized the proprietary processes for induction of differentiation of human bone marrow derived mesenchymal stem cells into differentiated cells that produce NTF (MSC-NTF). The optimization and process development is conducted in Good Manufacturing Practice ("GMP") compliance.

NurOwn™ program two - Dopaminergic neuron-like cells - human bone marrow derived dopamine producing neural cells for restorative treatment in PD. Human bone marrow mesenchymal stem cells were isolated and expanded. Subsequent differentiation of the cell cultures in a proprietary differentiation medium generated cells with neuronal-like morphology and showing protein markers specific to neuronal cells. Moreover, the in-vitro differentiated cells were shown to express enzymes and proteins required for dopamine metabolism, particularly the enzyme tyrosine hydroxylase. Most importantly, the cells produce and release dopamine in-vitro. Further research consisting of implanting these cells in an animal model of PD (6-OHDA induced lesions), showed the differentiated cells exhibit long-term engraftment, survival and function in vivo. Most importantly, such implantation resulted in marked attenuation of their symptoms, essentially reversing their Parkinsonian movements.

Our technology is based on the NurOwn™ products - an autologous cell therapeutic modality, comprising the extraction of the patient bone marrow, which is then processed into the appropriate neuronal-like cells and re-implanted into the patient's muscles, spinal cord or brain. This approach is taken in order to increase patient safety and minimize any chance of immune reaction or cell rejection.

The therapeutic modality will comprise the following:

- Bone marrow aspiration from patient;
- Isolation and expansion of the mesenchymal stem cells;
- Differentiation of the expanded stem cells into neurotrophic-factor secreting cells; and
- Autologous transplantation into the patient into the site of damage.

#### Results of Operations

The Company has been a development stage company since its inception. For the period from inception (September 22, 2000) until June 30, 2011, the Company has not earned any revenues from operations. The Company does not expect to earn revenues from operations until 2013. In addition, the Company has incurred operating costs and other expenses of approximately \$1,415,000 during the three months ended June 30, 2011, and approximately \$39,471,000 for the period from inception (September 22, 2000) until June 30, 2011. Operating expenses incurred since inception were approximately \$15,885,000 for general and administrative expenses and \$23,586,000 for research and development costs.

#### Research and Development, net:

Research and development expenses, net for the three months ended June 30, 2011 and 2010 were \$586,000 and \$348,000, respectively. The research and development expenses for the three months ended June 30, 2011 and 2010 do not include participation from The Office of the Chief Scientist.

The increase in research and development expenses for the three months ended June 30, 2011 from the three month period ended June 30, 2010 is primarily due to: (i) initiation costs for the clinical trial; (ii) rent of clean rooms from Hadassah; and (iii) the increase in development activities, including sterility validation studies and other tests required for clinical trials.

#### General and Administrative:

General and administrative expenses for the three months ended June 30, 2011 and 2010 were \$829,000 and \$268,000, respectively.

The increase in general and administrative expenses for the three month period ended June 30, 2011 from the three month period ended June 30, 2010 is primarily due to a increase of \$374,000 in compensation expenses for options granted to directors and employees and an increase in legal costs.

Other Income:

Other income is \$132,000 for the three months ended June 30, 2011, compared to zero for from the three month period ended June 30, 2010, and due to settlement agreements that the Company reached with third parties, that are lower than the debt incurred in the financial statements.

Financial Expenses:

Financial income increased by \$189,000 to income of \$191,000 for the three months ended June 30, 2011 from expenses of \$2,000 for the three months ended June 30, 2010.

The financial income is attributable to a \$192,000 income from conversion of a debt to a consultant to Common Stock of the Company.

Net Loss:

Net loss for the three months ended June 30, 2011 was \$1,097,000, as compared to a net loss of \$614,000 for the three months ended June 30, 2010. Net loss per share for the three months ended June 30, 2011 and for the three months ended June 30, 2010, was \$0.01.

The increase in the net loss for the three month period ended June 30, 2011 from the three month period ended June 30, 2010 is primarily due to an increase of \$559,000 in compensation expenses for options granted to directors and employees.

The weighted average number of shares of common stock used in computing basic and diluted net loss per share for the three months ended June 30, 2011 was 121,253,983, compared to 88,609,663 for the three months ended June 30, 2010.

The increase in the weighted average number of shares of common stock used in computing basic and diluted net loss per share for the three months ended June 30, 2011 was due to (i) the issuances of shares in private placements, (ii) the conversion of convertible loans, (iii) the exercise of warrants and (iv) the issuance of shares to service providers.

Liquidity and Capital Resources

The Company has financed its operations since inception primarily through private sales of its common stock and warrants and the issuance of convertible promissory notes. At June 30, 2011, we had \$3,134,000 in total current assets and \$1,276,000 in total current liabilities.

Net cash used in operating activities was \$800,000 for the three months ended June 30, 2011. Cash used for operating activities in the three months ended June 30, 2011 was primarily attributed to payroll costs, initiation costs of clinical trial, rent of clean room and materials for clinical trials, rent, outside legal fee expenses and public relations expenses.

Net cash used in investing activities was \$9,000 for the three months ended June 30, 2011.

Net cash provided by financing activities was \$44,000 for the three months ended June 30, 2011 and is primarily attributable to funds received from exercise of options.

Our material cash needs for the next 12 months include the payments due under an agreement with Hadassah to conduct clinical trials in ALS patients, under which we must pay to Hadassah an amount of (i) up to \$32,225 per patient (up to \$773,400 in the aggregate) and (ii) \$31,500 per month for rent and operation of the GMP facility in anticipation of Hadassah's clinical trials.

Our other material cash needs for the next 12 months will include payments of (i) employee salaries, (ii) patents, (iii) construction fees for facilities to be used in our research and development and (iv) fees to our consultants and legal advisors.

We will need to raise substantial additional capital in order to meet our anticipated expenses. If we are not able to raise substantial additional capital, we may not be able to continue to function as a going concern and we may have to cease operations. Even if we obtain funding sufficient to continue functioning as a going concern, we will be required to raise a substantial amount of capital in the future in order to reach profitability and to complete the commercialization of our products. Our ability to fund these future capital requirements will depend on many factors, including the following:

- our ability to obtain funding from third parties, including any future collaborative partners;
- the scope, rate of progress and cost of our clinical trials and other research and development programs;
  - the time and costs required to gain regulatory approvals;
- the terms and timing of any collaborative, licensing and other arrangements that we may establish;
- the costs of filing, prosecuting, defending and enforcing patents, patent applications, patent claims, trademarks and other intellectual property rights;
  - the effect of competition and market developments; and
  - future pre-clinical and clinical trial results.

#### Critical Accounting Policies

Our discussion and analysis of our financial condition and results of operations are based on our financial statements, which have been prepared in accordance with accounting principles generally accepted in the U.S. The preparation of these financial statements requires us to make judgments, estimates, and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements as well as the reported revenue and expenses during the reporting periods. We continually evaluate our judgments, estimates and assumptions. We base our estimates on the terms of underlying agreements, our expected course of development, historical experience and other factors we believe are reasonable based on the circumstances, the results of which form our management's basis for making judgments about the carrying value of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

There were no significant changes to our critical accounting policies during the quarter ended June 30, 2011. For information about critical accounting policies, see the discussion of critical accounting policies in our Annual Report on Form 10-K for the fiscal year ended December 31, 2010.

#### Off Balance Sheet Arrangements

We have no off balance sheet arrangements that have or are reasonably likely to have a current or future material effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures, or capital resources.

### Item 3. Quantitative and Qualitative Disclosures About Market Risk.

This information has been omitted as the Company qualifies as a smaller reporting company.

### Item 4. Controls and Procedures.

#### Evaluation of Disclosure Controls and Procedures

As of the end of the period covered by this quarterly report, we carried out an evaluation, under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, of the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")). Based on this evaluation, our Chief Executive Officer and Chief Financial Officer concluded that, as a result of the material weakness in our internal control over financial reporting described below, our disclosure controls and procedures were not effective, as of the end of the period covered by this report, to ensure that information required to be disclosed by us in the reports we file under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and that the information required to be disclosed by us in such reports is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

#### Internal Control Over Financial Reporting

Management identified the following material weakness in its assessment of the effectiveness of internal control over financial reporting as of December 31, 2010, which continued to exist as of June 30, 2011:

- The Company did not maintain effective controls over certain aspects of the financial reporting process because we lacked a sufficient complement of personnel with a level of accounting expertise and an adequate supervisory review structure that is commensurate with the Company's financial reporting requirements.

Nevertheless, based on a number of factors, including the performance of additional procedures performed by management designed to ensure the reliability of our financial reporting, our Chief Executive Officer and Chief Financial Officer believe that the consolidated financial statements included with this quarterly report fairly present, in all material respects, our financial position, results of operations, and cash flows as of the dates, and for the periods, presented, in conformity with U.S. GAAP.

#### Management's Remediation Initiatives

We plan to develop policies and procedures for training of personnel or external advisers to verify that we have a sufficient number of personnel with knowledge, experience and training in the application of generally accepted accounting principles commensurate with our financial reporting and U.S. GAAP requirements. Where necessary, we will supplement personnel with qualified external advisors. Additionally, where appropriate, we plan to identify training on accounting principles and procedures that would benefit our accounting and finance personnel.

#### Changes in Internal Control Over Financial Reporting

There have been no changes in our internal controls over financial reporting that occurred during the quarter ended June 30, 2011 that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

## PART II: OTHER INFORMATION

### Item 1. Legal Proceedings.

For a description of legal proceedings affecting the Company refer to Part I, Item 3, “Legal Proceedings” of our Annual Report on Form 10-K for the fiscal year ended December 31, 2010. There were no additional material developments to the legal proceedings affecting the Company in the fiscal quarter ended June 30, 2011.

From time to time, we may become involved in litigation relating to claims arising out of operations in the normal course of business, which we consider routine and incidental to our business. We currently are not a party to any material legal proceedings, other than as described in Part I, Item 3, “Legal Proceedings” in our Annual Report on Form 10-K for the fiscal year ended December 31, 2010, the adverse outcome of which, in management’s opinion, would have a material adverse effect on our business, results of operation or financial condition.

### Item 1A. Risk Factors.

There have not been any material changes from the risk factors previously disclosed in the “Risk Factors” section of our Annual Report on Form 10-K for the fiscal year ended December 31, 2010. In addition to the other information set forth in this Quarterly Report on Form 10-Q, you should carefully consider the risk factors discussed below and in our Annual Report on Form 10-K for the fiscal year ended December 31, 2010, which could materially affect our business, financial condition or future results. The risks described in our Annual Report on Form 10-K for the fiscal year ended December 31, 2010 are not the only risks we face. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition and/or operating results.

### Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

In July 2011, Amatrine Ltd. exercised a warrant, dated as of March 1, 2011, held by such entity for the purchase of 759,334 shares of common stock of the Company. The exercise price paid upon exercise of the warrant was \$0.28 per share for a total of \$212,613.52, which has been received by the Company.

The issuance of the securities described in this Item 2 was effected without registration in reliance on Section 4(2) of the Securities Act of 1933, as amended, as a sale by the Company not involving a public offering. No underwriters were involved with the issuance of such securities.

### Item 5. Other Information.

On June 27, 2011, a wholly owned Israeli subsidiary of the Company entered into the Amendment (the “Amendment”) to the Clinical Trial Agreement with Hadasit Medical Research Services and Development Ltd., a subsidiary of the Hadassah Medical Organization (“Hadassah”) and Professor Dimitrios Karousis (the “Clinical Trial Agreement”). The Amendment amended the Clinical Trial Agreement to, among other things: (i) decreased the total payment due to Hadassah from \$992,880 to \$773,400 and (ii) changed the termination provisions so only Brainstorm may terminate the agreement upon 60 days’ notice.

As previously disclosed, On February 17, 2010, a wholly owned Israeli subsidiary of the Company entered into a series of agreements with Hadassah. Under the agreements, Hadassah and Company personnel will conduct a clinical trial to evaluate the safety and tolerability of the Company’s treatment using mesenchymal bone marrow stem cells secreting neurotrophic factors (MSC-NTF) in patients with ALS, in accordance with a protocol developed jointly by

the Company and Hadassah. The trial is scheduled to include 26 patients.

Intellectual property generated through the study will be owned by the Company. Hadassah will be entitled to use the intellectual property generated through the study for non-commercial purposes. All existing intellectual property of the Company and Hadassah shall be retained by them.

In connection with the study, the Company agreed to pay Hadassah \$38,190 per patient totaling up to \$992,880, as well as \$31,250 per month for rental and operation of clean room facilities according to GMP standards at Hadassah facilities in Jerusalem in order to apply the cell growth and differentiation process in accordance with the Company's methods. The rental is for a period of 11 months (including one free month rent), which period may be extended for up to an additional 5 months.

On June 27, 2011, the Board of Directors adopted the Brainstorm Cell Therapeutics Inc. Shareholder Nominations and Communications Policy (the "Policy"), pursuant to which procedures by which stockholders may recommend nominees to our Board of Directors were established. Previously, the Company had no formal policy by which a stockholder could recommend nominees to our Board of Directors.

Pursuant to the Policy, stockholders may recommend nominees for consideration by submitting the following information to the Company's Secretary at the Company's executive offices: (i) a current resume and curriculum vitae of the candidate; (ii) statement describing the candidate's qualifications; and (iii) contact information for personal and professional references. In addition, submission must include the name and address of the stockholder making the nomination, the number of shares which are owned by such stockholder and a description of all arrangements or understandings between such stockholder and the candidate.

#### Item 6. Exhibits.

The Exhibits listed in the Exhibit Index immediately preceding such Exhibits are filed with or incorporated by reference in this report.
