Delaware
(Jurisdiction of Incorporation
or Organization)

43-2052503
(IRS Employer
Identification No.)

125 West 55th Street
New York, New York 10019

(Address of Principal Executive Offices) (Zip Code)

Registrant's Telephone Number, Including Area Code: **(212) 231-1000**

Securities registered pursuant to Section 12(b) of the Act:

Title of Each Class:	Name of Exchange on Which Registered:
Limited Liability Company Interests of Macquarie Infrastructure Company LLC (LLC Interests)	New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act: **None**

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.
Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the
Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the
Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was
required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if
any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T
 (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required
to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained
herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements
incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer,
or a smaller reporting company. See the definitions of "large accelerated filer", "accelerated filer" and "smaller reporting
company" in Rule 12b-2 of the Exchange Act.

Edgar Filing: Macquarie Infrastructure CO LLC - Form 10-K

Large Accelerated Filer Accelerated Filer Non-Accelerated Filer Smaller Reporting Company
Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes
 No

The aggregate market value of the outstanding shares of stock held by non-affiliates of Macquarie Infrastructure Company LLC at June 30, 2011 was \$1,146,804,509 based on the closing price on the New York Stock Exchange on that date. This calculation does not reflect a determination that persons are affiliates for any other purposes.

There were 46,338,225 shares of stock without par value outstanding at February 22, 2012.

DOCUMENTS INCORPORATED BY REFERENCE

The definitive proxy statement relating to Macquarie Infrastructure Company LLC's Annual Meeting of Shareholders for fiscal year ended December 31, 2011, to be held May 31, 2012, is incorporated by reference in Part III to the extent described therein.

TABLE OF CONTENTS

FORWARD-LOOKING STATEMENTS

We have included or incorporated by reference into this report, and from time to time may make in our public filings, press releases or other public statements, certain statements that may constitute forward-looking statements. These include without limitation those under Risk Factors in Part I, Item 1A, Legal Proceedings in Part I, Item 3, Management's Discussion and Analysis of Financial Condition and Results of Operations in Part II, Item 7, and Quantitative and Qualitative Disclosures about Market Risk in Part II, Item 7A. In addition, our management may make forward-looking statements to analysts, investors, representatives of the media and others. These forward-looking statements are not historical facts and represent only our beliefs regarding future events, many of which, by their nature, are inherently uncertain and beyond our control. We may, in some cases, use words such as project, believe, anticipate, plan, expect, estimate, intend, should, would, could, potentially, convey uncertainty of future events or outcomes to identify these forward-looking statements.

In connection with the safe harbor provisions of the Private Securities Litigation Reform Act of 1995, we are identifying important factors that, individually or in the aggregate, could cause actual results to differ materially from those contained in any forward-looking statements made by us. Any such forward-looking statements are qualified by reference to the following cautionary statements.

Forward-looking statements in this report are subject to a number of risks and uncertainties, some of which are beyond our control, including, among other things:

- changes in general economic, business or demographic conditions or trends in the United States or changes in the political environment, level of travel or construction or transportation costs where we operate, including changes in interest rates and price levels;
- our holding company structure and/or investments in businesses that we may not control, may limit our ability to pay or increase a dividend;
- changes in patterns of commercial or general aviation air travel, including variations in customer demand for our business;
- our Manager's affiliation with the Macquarie Group or equity market sentiment, which may affect the market price of our LLC interests;
 - our limited ability to remove our Manager for underperformance and our Manager's right to resign;
 - our ability to service, comply with the terms of and refinance at maturity our substantial indebtedness;
 - our ability to make, finance and integrate acquisitions;
 - our ability to implement our operating and internal growth strategies;
- the regulatory environment, including U.S. energy policy, in which our businesses and the businesses in which we hold investments operate and our ability to estimate compliance costs, comply with any changes thereto, rates implemented by regulators of our businesses and the businesses in which we hold investments, and our relationships and rights under and contracts with governmental agencies and authorities;
 - technological innovations leading to a change in energy consumption patterns;
 - changes in electricity or other energy costs, including natural gas pricing;
- the competitive environment for attractive acquisition opportunities facing our businesses and the businesses in which we hold investments;
- environmental risks, including the impact of climate change and weather conditions, pertaining to our businesses and the businesses in which we hold investments;
 - work interruptions or other labor stoppages at our businesses or the businesses in which we hold investments;

1

TABLE OF CONTENTS

changes in the current treatment of qualified dividend income and long-term capital gains under current U.S. federal income tax law and the qualification of our income and gains for such treatment;
disruptions or other extraordinary or force majeure events affecting the facilities or operations of our businesses and the businesses in which we hold investments and our ability to insure against any losses resulting from such events or disruptions;
fluctuations in fuel costs, or the costs of supplies upon which our gas processing and distribution business is dependent, and our ability to recover increases in these costs from customers;
our ability to make alternate arrangements to account for any disruptions or shutdowns that may affect the facilities of the suppliers or the operation of the barges upon which our gas processing and distribution business is dependent; and changes in U.S. domestic demand for chemical, petroleum and vegetable and animal oil products, the relative availability of tank storage capacity and the extent to which such products are imported.

Our actual results, performance, prospects or opportunities could differ materially from those expressed in or implied by the forward-looking statements. A description of risks that could cause our actual results to differ appears under the caption Risk Factors in Part I, Item 1A and elsewhere in this report. It is not possible to predict or identify all risk factors and you should not consider that description to be a complete discussion of all potential risks or uncertainties that could cause our actual results to differ.

In light of these risks, uncertainties and assumptions, you should not place undue reliance on any forward-looking statements. The forward-looking events discussed in this report may not occur. These forward-looking statements are made as of the date of this report. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. You should, however, consult further disclosures we may make in future filings with the Securities and Exchange Commission, or the SEC.

MBL does not guarantee or otherwise provide assurance in respect of the obligations of Macquarie Infrastructure Company LLC.

TABLE OF CONTENTS

PART I

ITEM 1. BUSINESS

Macquarie Infrastructure Company, LLC, a Delaware limited liability company, was formed on April 13, 2004. Except as otherwise specified, Macquarie Infrastructure Company, MIC, we, us, and our refer to the Company and its subsidiaries together from June 25, 2007 and, prior to that date, to the Trust, the Company and its subsidiaries. Macquarie Infrastructure Management (USA) Inc., which we refer to as our Manager, is part of the Macquarie Group, comprised of Macquarie Group Limited and its subsidiaries and affiliates worldwide.

General

We own, operate and invest in a diversified group of infrastructure businesses that provide basic services, such as chilled water for building cooling and gas utility services to businesses and individuals primarily in the U.S. The businesses we own and operate are reported as individual segments with three of them grouped as the Energy-Related Businesses.

The Energy-Related Businesses:

a 50% interest in a bulk liquid storage terminal business (International Matex Tank Terminals or IMTT), that provides bulk liquid storage and handling services at ten marine terminals in the United States and two in Canada and is one of the largest participants in this industry in the U.S., based on storage capacity;

a gas processing and distribution business (The Gas Company), that is the only full-service gas energy company in Hawaii; and,

a 50.01% controlling interest in a district energy business (District Energy), which operates the largest district cooling system in the U.S., serving various customers in Chicago, Illinois and Las Vegas, Nevada.

Atlantic Aviation: an airport services business providing products and services, including fuel and aircraft hangaring/parking, to owners and operators of general aviation aircraft at 65 airports in the U.S.

Our businesses generally operate in sectors with significant barriers to entry, including high initial development and construction costs, the existence of long-term contracts or the requirement to obtain government approvals and a lack of immediate cost-efficient alternatives to the services provided. Overall they tend to generate sustainable long-term cash flows.

We have elected to treat MIC as a corporation for federal tax purposes. As a result, all investor tax reporting regarding dividends will be provided on Form 1099.

On June 2, 2010, we concluded the sale in bankruptcy of an airport parking business (Parking Company of America Airports or PCAA). The results of operations from this business and the gain from the bankruptcy sale are separately reported as discontinued operations in the Company's consolidated financial statements. This business is no longer a reportable segment. See Note 4, Discontinued Operations, in our consolidated financial statements in Financial Statements and Supplementary Data in Part II, Item 8, of this Form 10-K for financial information and further discussions.

Our Manager

MIC is managed externally by Macquarie Infrastructure Management (USA) Inc. (MIMUSA or Manager). MIMUSA is a member of the Macquarie Group, a diversified international provider of financial, advisory and investment services. The Macquarie Group is headquartered in Sydney, Australia and is a global leader in management of infrastructure investment vehicles on behalf of third-party investors and advising on the acquisition, disposition and financing of infrastructure assets.

We have entered into a management services agreement with MIMUSA. MIMUSA is responsible for our day-to-day operations and affairs and oversees the management teams of our operating businesses. The Company does not have any employees. MIMUSA has assigned, or seconded, to the Company, on a

3

TABLE OF CONTENTS

permanent and wholly dedicated basis, two of its employees to serve as chief executive officer and chief financial officer of the Company and second or makes other personnel available as required. The services performed for the Company are provided at our Manager's expense, and include the compensation of our seconded personnel.

We pay MIMUSA a quarterly base management fee based primarily on our market capitalization. Our Manager can also earn a performance fee if the quarterly total return to shareholders (capital appreciation plus dividends) exceeds the quarterly total return of a U.S. utilities index. For MIMUSA to be eligible for the performance fee, MIC's quarterly total returns must be positive and in excess of any prior underperformance. The performance fee is equal to 20% of the difference between the benchmark return and the return for our shareholders. Please see the Management Services Agreement filed as an exhibit to this Annual Report on Form 10-K for a complete discussion of the compensation of our Manager.

We believe that Macquarie Group's demonstrated expertise and experience in the management, acquisition and funding of infrastructure businesses provide us with an advantage in pursuing our strategy. Our Manager is part of the Macquarie Funds Group, the asset management division of Macquarie globally. Macquarie-managed entities own, operate and/or invest in a global portfolio of approximately 100 businesses including toll roads, airports and airport-related infrastructure, bulk liquid storage, ports, communications, media, electricity and gas distribution networks, water utilities, renewable energy generation, aged care, rail and ferry assets across 24 countries.

Industry

Infrastructure businesses, in general, tend to generate sustainable cash flows resulting from less elastic customer demand and their strong competitive positions. Characteristics of infrastructure businesses typically include:

- ownership of long-lived, high-value physical assets that are difficult to replicate or substitute around;
- predictable maintenance capital expenditure requirements;
- consistent, less elastic demand for their services, such as those provided by our energy-related businesses;
- scalability, such that relatively small amounts of growth can generate significant increases in earnings before interest, taxes, depreciation and amortization, or EBITDA;
- the provision of basic, often essential services; and
- strong competitive positions, largely due to high barriers to entry, including:
 - high initial development and construction costs;
 - difficulty in obtaining suitable land on which to operate the business;
 - long-term, exclusive concessions or leases and customer contracts; and
 - lack of cost-effective alternatives to customers in the foreseeable future.

In addition to the benefits related to these characteristics, the revenues generated by most of our infrastructure businesses generally can be expected to keep pace with inflation. The price escalators built into many customer contracts, and the inflation and cost pass-through adjustments typically a part of pricing terms in user pays businesses or provided for by the regulatory process to regulated businesses, serve to insulate infrastructure businesses to a significant degree from the negative effects of inflation and commodity price risk. We also often employ interest rate swaps in connection with our businesses' floating rate debt to effectively fix our interest expense and hedge variability in cash flows from changes in interest rates.

TABLE OF CONTENTS

We focus on the ownership and operation of infrastructure businesses in the following categories:

those with contracted revenue such as IMTT, the revenues of which are derived from per-use or rental charges in medium-term contracts, and District Energy, a majority of the revenues of which are derived from long-term contracts with businesses and governments;

those with regulated revenue such as the utility operations of The Gas Company; and, those with user pays or patronage exposure, such as Atlantic Aviation, the revenues of which are based on the number of aircrafts that use the services of our fixed based operations, or FBOs.

Strategy

There are three principal components to our strategy:

we intend to develop and implement programs designed to improve the operating performance of each of our businesses;

we intend to maintain a prudent balance between cash dividends to our shareholders and investments in the growth of new or existing businesses; and

when it is economically sensible to do so, we intend to grow through the acquisitions of additional infrastructure businesses.

Our Businesses and Investments

We provide below information about our businesses and investments, including key financial information for each business. We are disclosing EBITDA excluding non-cash items as defined by us. We believe EBITDA excluding non-cash items provides additional insight into the performance of our operating businesses relative to each other and similar businesses without regard to their capital structure, the ability of the businesses to service or reduce debt, fund capital expenditures and/or support distributions to the holding company. Additionally, EBITDA excluding non-cash items is a key performance metric relied on by management in evaluating the performance of the Company and our operating segments. Therefore, this Annual Report on Form 10-K discloses EBITDA excluding non-cash items in addition to the other financial information provided in accordance with GAAP. See Management's Discussion and Analysis of Financial Condition and Results of Operations Results of Operations in Part II, Item 7 for a reconciliation of net income (loss) to EBITDA excluding non-cash items for the Company and its operating segments.

Energy-Related Businesses

IMTT

Business Overview

We own 50% of IMTT. The remaining 50% is owned by a trust for the benefit of members of the founding family.

IMTT stores and handles petroleum products, various chemicals, renewable fuels and vegetable and animal oils.

IMTT is one of the largest independent providers of bulk liquid storage terminal services in the U.S., based on capacity.

For the year ended December 31, 2011, IMTT generated approximately 41% of its total terminal revenue and approximately 45% of its terminal gross profit at its St. Rose, Gretna, Avondale and Geismar facilities, which together service the lower Mississippi River region (with St. Rose as the largest contributor).

Edgar Filing: Macquarie Infrastructure CO LLC - Form 10-K

For the year ended December 31, 2011, IMTT generated approximately 45% of its terminal revenue and approximately 44% of its terminal gross profit at its Bayonne, New Jersey facility in New York Harbor.

IMTT also owns OMI Environmental Solutions, or Oil Mop, an environmental emergency responses, industrial services, waste transportation and disposal business. Oil Mop has a network of facilities along the U.S. Gulf Coast between Houston and New Orleans. These facilities primarily service the Gulf region, but also respond to spill events and provides services as needed throughout the United States and internationally.

TABLE OF CONTENTS**Energy-Related Business: IMTT (continued)**

The table below summarizes the proportion of the terminal revenue generated from the commodities stored at IMTT's U.S. terminals for the year ended December 31, 2011:

Proportion of Terminal Revenue from Major Commodities Stored

Petroleum/Asphalt	Chemical	Renewable/Vegetable & Animal Oil	Other
62%	26%	8%	4%

Summary financial information for 100% of IMTT is as follows (\$ in millions):

	As of, and for the Year Ended, December 31,		
	2011	2010	2009
Revenue	\$ 447.1	\$ 557.2	\$ 346.2
EBITDA excluding non-cash items ⁽¹⁾	206.4	236.8	147.7
Total assets	1,264.0	1,221.9	1,064.8

See Business Our Business and Investments in Part I, Item 1 and Management's Discussion and Analysis of (1) Financial Condition and Results of Operations Results of Operations in Part II, Item 7 for further information and a reconciliation of net income (loss) to EBITDA excluding non-cash items.

Industry Overview

Bulk liquid storage terminals provide an essential link in the supply chain for liquid commodities such as crude oil, refined petroleum products and basic and specialized chemicals. In addition to renting storage tanks, bulk liquid storage terminals generate revenues by offering ancillary services including product transfer (throughput), heating and blending. Pricing for storage and other services typically reflects local supply and demand as well as the specific attributes of each terminal including access to deepwater berths and connections to land-based infrastructure such as roads, pipelines and rail.

Both domestic and international factors influence demand for bulk liquid storage in the United States. Demand for storage rises and falls according to local and regional consumption, which largely reflects the underlying economic activity over the medium term. In addition to these domestic forces, import and export activity also accounts for a material portion of the business. Shippers require storage for the staging, aggregation and/or distribution of products before and after shipment. The extent of import/export activity depends on macroeconomic trends such as currency fluctuations as well as industry-specific conditions, such as supply and demand balances in different geographic regions. The medium-term length of storage contracts tends to offset short-term fluctuations in demand for storage in both the domestic and import/export markets.

Potential entrants into the bulk liquid storage terminal business face several substantial barriers. Strict environmental regulations, limited availability of waterfront land with the necessary access to land-based infrastructure, local community resistance to new fuel/chemical sites, and high initial investment costs impede the construction of new bulk liquid storage facilities. These deterrents are most formidable around New York Harbor and other waterways near major urban centers. As a consequence, new supply is generally created by the addition of tankage to existing terminals where existing infrastructure can be leveraged, resulting in higher returns on invested capital. However,

restrictions on land use, difficulties in securing environmental permits, and the potential for operational bottlenecks due to infrastructure constraints may limit the ability of existing terminals to expand the storage capacity of their facilities.

Strategy

The key components of IMTT's strategy, from MIC's perspective, are to (1) improve business processes and systems; (2) drive growth in revenue and cash flows by attracting and retaining customers who place a premium on flexibility, speed and efficiency in bulk liquid storage; and (3) invest, where prudent, in additional storage capacity.

TABLE OF CONTENTS**Energy-Related Business: IMTT (continued)**

Improve Business Processes and Systems: Following the recent rapid growth of this business, MIC believes that IMTT's business processes would benefit from re-engineering. This growth has highlighted the need for more sophisticated financial planning and analysis, including budgeting, as well as affording more opportunities for operating improvements due to the enhanced scale of the business.

Flexibility: Operational flexibility is essential to making IMTT an attractive supplier of bulk liquid storage services in its key markets. Its facilities operate 24/7 providing shippers, refiners, manufacturers, traders and distributors with prompt access to a wide range of storage services. In each of its two key markets, IMTT's scale ensures availability of sophisticated product handling and storage capabilities. IMTT continues to improve its facilities' speed and flexibility of operations by investing in upgrades of its docks, pipelines and pumping infrastructure and facility management systems.

Investment in Growth: IMTT seeks to increase its available storage capacity at its existing locations, especially in New York Harbor and the lower Mississippi River, by building new tankage when supported by customer demand so long as the returns to IMTT's shareholders on such projects are attractive. Since MIC's investment in IMTT, in May of 2006, IMTT has completed \$605.9 million of growth capital expenditure projects and it has another \$241.2 million in process. Following this period of unprecedented growth, IMTT's shareholders now need to determine the optimal mix of realizing the full potential of this recent expansion with incremental growth.

Locations

The following table summarizes the location of each IMTT facility, the corresponding storage capacity in service and ship and barge docks available for product transfer. This information is as of December 31, 2011 and does not include tanks used in packaging, recovery tanks, and/or other storage capacity not typically available for rent.

Facility	Land	Aggregate Capacity of Storage Tanks in Service (Millions of Barrels)	Number of Ship & Barge Berths in Service
Facilities in the United States:			
Bayonne, NJ	Owned	16.0	20
St. Rose, LA*	Owned	14.9	17
Gretna, LA*	Owned	2.0	5
Avondale, LA*	Owned	1.1	4
Geismar, LA*	Owned	0.9	3
Lemont, IL	Owned/Leased	0.9	3
Joliet, IL	Owned	0.7	2
Richmond, CA	Owned	0.7	1
Chesapeake, VA	Owned	1.0	1
Richmond, VA	Owned	0.4	1
Facilities in Canada:			

Edgar Filing: Macquarie Infrastructure CO LLC - Form 10-K

Quebec City, Quebec ⁽¹⁾	Leased	2.0	2
Placentia Bay, Newfoundland ⁽²⁾	Leased	3.0	2
Total		43.6	61

* Collectively the Louisiana facilities.

(1) Indirectly 66.7% owned and managed by IMTT.

(2) Indirectly 20.1% owned and managed by IMTT.

All facilities have marine access, road access and, except for Richmond, Virginia and Placentia Bay, Newfoundland, all sites have rail access.

TABLE OF CONTENTS

Energy-Related Business: IMTT (continued)

Bayonne, New Jersey

The 16.0 million barrel storage terminal at Bayonne, New Jersey has the most storage capacity of any IMTT site.

Located on the Kill Van Kull between New Jersey and Staten Island, the terminal occupies a strategically advantageous position in New York Harbor, or NYH. As the largest independent bulk liquid storage facility in NYH, IMTT-Bayonne has substantial market share for third-party storage of refined petroleum products and chemicals.

NYH serves as the main petroleum trading hub in the northeast United States and the physical delivery point for the gasoline and heating oil futures contracts traded on New York Mercantile Exchange (NYMEX). In addition to waterborne shipments, products reach NYH through petroleum product pipelines from the U.S. Gulf region and elsewhere. NYH also serves as the starting point for refined product pipelines linked to inland markets and as a key port for refined petroleum product exports. IMTT-Bayonne has connections to the Colonial, Buckeye and Harbor refined petroleum product pipelines as well as rail and road connections. As a result, IMTT-Bayonne provides its customers with substantial logistical flexibility.

IMTT-Bayonne has the capability to quickly load and unload the largest bulk liquid transport ships entering NYH. The U.S. Army Corp of Engineers (USACE) has dredged the Kill Van Kull channel passing the IMTT-Bayonne docks to 45 feet (IMTT has dredged some but not all of its docks to that depth). Most competitors in NYH have facilities located on the southern portion of the Arthur Kill (water depth of approximately 35 feet) and force large ships to transfer product through lightering (transferring cargo to barges at anchorage) before docking. This technique substantially increases the cost of loading and unloading vessels. This competitive advantage for Bayonne may improve as the USACE is in the process of dredging the Kill Van Kull to 50 feet (with no planned increase in the depth of the southern portion of the Arthur Kill). Demand for third-party bulk liquid storage in NYH has remained strong during the past several years.

St. Rose/Gretna/Avondale/Geismar

On the lower Mississippi River, IMTT currently operates four terminals (St. Rose, Gretna, Avondale and Geismar). With combined storage capacity of 18.9 million barrels, the four sites give IMTT substantial market share in storage for black oil, bulk liquid chemicals, and vegetable oils on the lower Mississippi River.

The Louisiana facilities also give IMTT a substantial presence in a key domestic transport hub. The lower Mississippi River serves as a major transshipment point between the central United States and the rest of the world for exported agricultural products (such as vegetable oils) and imported commodity chemicals (such as methanol). The region also has substantial domestic traffic related to the petroleum industry. Gulf Coast refiners send their products to other regions of the U.S. and overseas and require storage capacity and ancillary services to facilitate distribution. IMTT's Louisiana facilities, with their deep water ship and barge docks as well as access to rail, road and pipeline infrastructure, are highly capable of performing these functions. Demand for third-party bulk liquid storage on the lower Mississippi River has remained strong during the past several years.

Competition

The competitive environment in which IMTT operates varies by terminal location. The principal competition for each of IMTT's facilities comes from other bulk liquid storage facilities located in the same regional market.

The main terminal operation competitors include (in alphabetical order): Bahamas Oil Refining Company International Limited; Buckeye Partners, L.P.; Enterprise Products Partners L.P.; Houston Fuel Oil Terminal Company; Kinder Morgan Energy Partners, L.P.; Magellan Midstream Partners, L.P.; NuStar Energy L.P.; Oiltanking Partners, L.P.; Plains All American Pipeline, L.P.; Royal Vopak N.V.; Sunoco Logistics Partners L.P.; TransMontaigne Partners L.P.; Vitol Holding B.V.; and Westway Group, Inc. Certain financial institutions may also be competitors. These include: Alinda Capital Partners LLC; ArcLight Capital Partners; Challenger Infrastructure Fund; First Reserve Corporation; and Global Infrastructure Partners.

TABLE OF CONTENTS

Energy-Related Business: IMTT (continued)

In both the NYH and lower Mississippi River markets, IMTT operates the largest terminal by capacity which, combined with the capabilities of IMTT's facilities, provides IMTT with a strong competitive position in both of these key bulk liquid storage markets.

Customers

IMTT provides bulk liquid storage services primarily to vertically integrated petroleum product producers and refiners, chemical manufacturers, food processors and traders of bulk liquid petroleum, chemical and agricultural products. No customer represented more than 10% of IMTT's consolidated revenues and accounts receivable for the year ended and at December 31, 2011.

Customer Contracts

A typical IMTT customer contract includes:

- terms of three to five years;
- charges at rates stated in terms of cents per barrel of storage capacity per month and payable whether the storage is used or not;
- a certain number of free product movements into and out of the storage tank and throughput rates for movements in excess of this number;
- charges for heating which essentially reflect a pass-through of IMTT's cost;
- charges for other services such as rail car unloading and other ancillary services;
- annual inflation based escalators for all contracted rates and charges;
- provisions that ensure customers retain title to products stored and have responsibility for securing insurance against loss;
- provisions for rate step ups in the event that storage costs increase due to changes in laws or other environmental obligations; and
- responsibility for customers to return their tanks, at the end of the contract, clean and odor free.

IMTT is responsible for ensuring appropriate care of products stored at its facilities and maintains adequate insurance with respect to its exposure.

Regulation

The rates that IMTT charges for its services are not subject to regulation. However, a number of regulatory bodies oversee IMTT's operations. IMTT must comply with numerous federal, state and local environmental, occupational health and safety, security, tax and planning statutes and regulations. These regulations require IMTT to obtain and maintain permits to operate its facilities and impose standards that govern the way IMTT operates its business. If IMTT does not comply with the relevant regulations, it could lose its operating permits and/or incur fines and increased liability. As a result, IMTT has developed environmental and health and safety compliance functions which are overseen by the terminal managers at the terminal level, as well as IMTT's Director of Environmental, Health and Safety, Chief Operating Officer and Chief Executive Officer. While changes in environmental, health and safety regulations pose a risk to IMTT's operations, such changes are generally phased in over time to manage the impact on industry.

The Bayonne terminal was acquired and expanded over a 28 year period. It has significant remediation requirements that were partially assumed at the time of purchase from the various former owners. One former owner retained environmental remediation responsibilities for a purchased site as well as responsibility for sharing other remediation costs. Remediation efforts entail removal of the free product, groundwater control and treatment, soil treatment, repair/replacement of sewer systems, and the implementation of containment and monitoring systems. These remediation activities are expected to continue for ten to twenty years.

TABLE OF CONTENTS

Energy-Related Business: IMTT (continued)

The Lemont terminal has entered into a consent order with the State of Illinois to remediate contamination at the site that pre-dated IMTT's ownership. This remediation effort, including the implementation of extraction and monitoring wells and soil treatment, is estimated to continue for ten to twenty years.

See Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources in Part II, Item 7 for discussion of the expected future capitalized cost of environmental remediation.

Management

The day-to-day operations of IMTT's terminals are overseen by individual terminal managers who are responsible for all aspects of the operations at their respective sites. IMTT's terminal managers have on average 30 years experience in the bulk liquid storage industry and 18 years of service with IMTT.

The IMTT head office in New Orleans provides the business with central management that performs support functions such as accounting, tax, finance, human resources, insurance, information technology and legal services and provides support for functions that have been partially de-centralized to the terminal level such as engineering and environmental and occupational health and safety regulatory compliance. The Board of IMTT Holdings consists of six members with three appointees each from Macquarie Terminal Holdings, LLC, our wholly owned subsidiary, and our co-investor. All decisions of the Board require majority approval, including the approval of at least one member appointed by Macquarie Terminal Holdings, LLC and one member appointed by our co-investor. The Shareholders Agreement to which we became a party at the time of our investment in IMTT contains a customary list of items that must be referred to the Board for approval. The Shareholders' Agreement is included as an exhibit to this Annual Report on Form 10-K.

Distribution of funds to the Company from IMTT is governed by the Shareholders' Agreement between the Company and the co-investor that owns the remaining 50% stake. The co-investor has refused to vote in favor of distributing these funds, and the Company believes that such refusal violates the Shareholders' Agreement. MIC has been unable to resolve this dispute with the co-owner of IMTT regarding distributions, despite efforts to do so in accordance with the Shareholders' Agreement. Accordingly, on April 18, 2011, MIC initiated formal arbitration proceedings with the Voting Trust of IMTT Holdings Inc. (Voting Trust) and IMTT Holdings Inc. under the auspices of the American Arbitration Association, as provided under the Shareholders' Agreement. MIC believes the Voting Trust's defenses and claims in the arbitration are without merit. We currently expect a decision by the arbitrators in the first quarter of 2012, or soon after. See Risk Factors—Risks Related to IMTT in Part I, Item 1A for further discussion.

Employees

As of December 31, 2011, IMTT (excluding non-consolidated sites) had a total of 1,063 employees, including 157 employed by Oil Mop. At the Bayonne terminal, 142 employees are unionized, 52 of the employees are unionized at the Lemont and Joliet terminals and 35 employees are unionized at the Quebec terminal. We believe employee relations at IMTT are good.

TABLE OF CONTENTS**Energy-Related Business: The Gas Company****Business Overview**

The Gas Company is Hawaii's only government franchised full-service gas company, manufacturing and distributing gas products and services in Hawaii. The market includes Hawaii's approximately 1.4 million residents and approximately 7.3 million visitors in 2011. The Gas Company manufactures synthetic natural gas, or SNG, for its utility customers on Oahu, and distributes Liquefied Petroleum Gas, or LPG, to utility and non-utility customers throughout the state's six primary islands.

The Gas Company has two primary businesses, utility (or regulated) and non-utility (or unregulated):

The utility business serves approximately 35,300 customers through localized pipeline distribution systems located on the islands of Oahu, Hawaii, Maui, Kauai, Molokai and Lanai. Over 90% of these customers are on Oahu. The utility business includes the manufacture, distribution and sale of SNG on the island of Oahu and distribution and sale of LPG. Utility revenue consists principally of sales of SNG and LPG. The operating costs for the utility business include the cost of locally purchased feedstock, the cost of manufacturing SNG from the feedstock, LPG purchase costs and the cost of distributing SNG and LPG to customers. Utility sales comprised approximately 43% of The Gas Company's total contribution margin in 2011.

The non-utility business sells and distributes LPG to approximately 33,400 customers. LPG is delivered by truck to individual tanks located on customer sites on Oahu, Hawaii, Maui, Kauai, Molokai and Lanai. Non-utility revenue is generated primarily from the sale of LPG delivered to customers. The operating costs for the non-utility business include the cost of purchased LPG and the cost of distributing the LPG to customers. Non-utility sales comprised approximately 57% of The Gas Company's total contribution margin in 2011.

The Gas Company's two products, SNG and LPG, are relatively clean-burning fuels that produce lower levels of carbon emissions than other hydrocarbon fuels such as coal or oil. This is particularly important in Hawaii where heightened public awareness of environmental impact makes lower emission products attractive to customers.

SNG and LPG have a wide number of commercial and residential applications including water heating, drying, cooking, emergency power generation and decorative lighting, such as tiki torches. LPG is also used as a fuel for specialty vehicles such as forklifts. Gas customers include residential customers and a wide variety of commercial, hospitality, military, public sector and wholesale customers.

The Gas Company is exploring the use of Liquefied Natural Gas, or LNG, as a back-up for the business' SNG supply requirements, which includes determining the feasibility of importing LNG from the U.S. in conventional containers.

Summary financial information of The Gas Company is as follows (\$ in millions):

	As of, and for the Year Ended, December 31,					
	2011	2010	2009			
Revenue	\$ 252.8	\$ 210.6	\$ 175.4			
EBITDA excluding non-cash items ⁽¹⁾	49.0	44.4	37.6			
Total assets	373.5	350.4	344.9			
% of our consolidated revenue	25.6 %	25.0 %	24.7 %			

See **Business** Our Business and Investments in Part I, Item 1 and **Management** s Discussion and Analysis of (1) Financial Condition and Results of Operations Results of Operations in Part II, Item 7 for further information and a reconciliation of net income (loss) to EBITDA excluding non-cash items.

Strategy

The Gas Company s long-term strategy has three components. The first is to increase and diversify its customer base.

The business intends to increase penetration of the residential, government (primarily military) and tourism-related markets. The business also intends to invest in and promote the value of The Gas Company s products and services and its attractiveness as a cleaner alternative to other energy sources in Hawaii.

TABLE OF CONTENTS

Energy-Related Business: The Gas Company (continued)

As a second component of its strategy, The Gas Company intends to diversify its sources of SNG feedstock and LPG to ensure reliable supply and to mitigate any potential cost increases to its customers. The Gas Company is exploring other clean and renewable energy alternatives that may be distributed using its existing infrastructure, including renewable natural gas and LNG.

The Gas Company also recognizes the important role it plays in the local community and, as a component of its strategy, will focus on maintaining good relationships with regulators, governments and the communities it serves.

Products

While the mainland U.S. obtains natural gas from wells drilled into underground reservoirs of porous rock, Hawaii relies solely on manufactured and imported alternatives. Hawaii has no natural gas reserves.

Synthetic Natural Gas. The business converts a light hydrocarbon feedstock (currently naphtha) to SNG. The product is chemically similar in most respects to natural gas and has a similar heating value on a per cubic foot basis. The Gas Company has the only SNG manufacturing capability in Hawaii at its plant located on the island of Oahu. SNG is delivered by underground piping systems to customers on Oahu.

Liquefied Petroleum Gas. LPG is a generic name for a mixture of hydrocarbon gases, typically propane and butane. LPG liquefies at a relatively low pressure under normal temperature conditions. As a result, LPG can be stored or transported more easily than natural gas or SNG. LPG is typically transported in cylinders or tanks. Domestic and commercial applications of LPG are similar to those of natural gas and SNG.

Utility Regulation

The Gas Company's utility business is regulated by the Hawaii Public Utilities Commission, or HPUC, while the business's non-utility business is not. The HPUC exercises broad regulatory oversight and investigative authority over all public utility companies in the state of Hawaii.

Rate Regulation. The HPUC establishes the rates that The Gas Company can charge its utility customers via cost of service regulation. The rate approval process is intended to ensure that a public utility has a reasonable opportunity to recover costs that are prudently incurred and earn a fair return on its investments, while protecting consumer interests.

Although the HPUC sets the base rate for the SNG and LPG sold by The Gas Company's utility business, the business is permitted to pass through changes in its raw materials cost by means of a monthly fuel adjustment charge, or FAC. The adjustment protects the business's earnings from volatility in feedstock costs.

The business's utility rates are established by the HPUC in periodic rate cases typically initiated by The Gas Company. The business initiates a rate case by submitting a request to the HPUC for an increase in rates based, for example, upon materially higher costs related to providing the service. Following initiation of the rate increase request and submissions by other intervening parties of their positions on the rate request, and potentially an evidentiary hearing, the HPUC issues a decision establishing the revenue requirements and the resulting rates that The Gas Company will be allowed to charge.

Other Regulations. The HPUC regulates all franchised or certificated public service companies operating in Hawaii; prescribes rates, tariffs, charges and fees; determines the allowable rate of earnings in establishing rates; issues guidelines concerning the general management of franchised or certificated utility businesses; acts on requests for the acquisition, sale, disposition or other exchange of utility properties, including mergers and consolidations; and acts on requests for financings. When we acquired The Gas Company, we agreed to 14 regulatory conditions with the HPUC that address a variety of matters including: a requirement that the ratio of consolidated debt to total capital for The Gas Company, LLC and HGC Holdings LLC, or HGC, does not exceed 65%; and a requirement to maintain \$20.0 million in readily-available cash resources at The Gas Company, HGC or MIC.

TABLE OF CONTENTS

Energy-Related Business: The Gas Company (continued)

Competition

Depending upon the end-use, the business competes with electricity, diesel, solar energy, geo-thermal, wind, other gas providers and alternative energy sources. Hawaii's electricity is generated by four electric utilities and various non-utility generators.

Utility Business. The Gas Company holds the only government franchise for regulated gas services in Hawaii. This enables it to utilize public easements for its pipeline distribution systems. This franchise also provides protection from competition within the same gas-energy sector since the business has developed and owns extensive below-ground distribution infrastructure. The costs associated with developing distribution infrastructure are significant. However, in most instances, the business' utility customers also have the ability to use non-utility gas supplied by The Gas Company or its competitors by using LPG tanks.

Non-Utility Business. The Gas Company also sells LPG in an unregulated market on the six primary islands of Hawaii. There are two other wholesale companies and several small retail distributors that share the LPG market. The Gas Company believes it has a competitive advantage because of its established customer base, storage facilities, distribution network and reputation for reliable service.

Fuel Supply, SNG Plant and Distribution System

Fuel Supply

The business obtains its LPG from three sources: imports from foreign sources and each of the Chevron and Tesoro oil refineries located on Oahu. The business has LPG supply arrangements for all three sources. If required, the business can purchase LPG from foreign sources through the spot-market. In 2011, The Gas Company purchased approximately half of its LPG requirement from foreign sources, one-third from Chevron and the remainder from Tesoro.

In January 2012, Tesoro announced plans to sell its operations in Hawaii, including its refinery on Oahu, its operations at 32 retail gas stations and all associated logistical assets. Tesoro indicated that the sale would occur no earlier than the second half of 2012. In 2010, Chevron considered converting its Hawaii refinery to a storage terminal and concluded that it would continue operating as a refinery in Hawaii; however, to our knowledge, Chevron has not publicly commented on the matter since. The Chevron refinery also supplies The Gas Company's principal competitor in the non-utility market.

Any decision by Tesoro or Chevron regarding their operations in Hawaii could affect the business' cost of LPG and may adversely impact its non-utility contribution margin and profitability. In an effort to mitigate the risk of supply disruption and/or a potential increase in costs, the business has increased the number of shipments of foreign sourced product and has been making additional investments in storage.

The business also obtains all of its feedstock and fuel for SNG production, naphtha, from the Tesoro refinery on Oahu. The Gas Company has a supply agreement in place with Tesoro through September 30, 2013. The agreement is subject to approval by the HPUC, and such approval is expected by mid-2012. The Gas Company expects that a modest level of savings will be passed through to consumers, all else being equal, via the fuel adjustment charge mechanism and will have no impact on utility contribution margin and minimal impact on the non-utility margin.

In the event that Tesoro shuts down the refinery completely or limits supply, The Gas Company has been evaluating alternatives for its utility business, including extended usage of the backup utility propane air unit, importation of naphtha, development of locally-sourced naphtha on Oahu, and importation of LNG.

SNG Plant and Distribution System (Utility Business)

The Gas Company manufactures SNG at its plant located west of the Honolulu business district. With proper inspection and testing and with routine maintenance and capital investment, the economic life of the SNG plant life is expected to be approximately 20 years. The economic life of the plant may be extended with additional capital investment.

TABLE OF CONTENTS

Energy-Related Business: The Gas Company (continued)

A 22-mile transmission pipeline links the SNG plant to a distribution system that ends at Pier 38 in south Oahu. From Pier 38, a pipeline distribution system consisting of approximately 900 miles of distribution and service pipelines takes the gas to customers. Additionally, LPG is trucked to holding tanks on Oahu and shipped by barge to the neighboring islands where it is distributed via pipelines to utility customers that are not connected to the Oahu SNG pipeline system. Approximately 90% of the business pipeline system is on Oahu.

Distribution System (Non-Utility Business)

The non-utility business provides gas on all six primary islands to customers that are not connected to the business utility pipeline system. The majority of The Gas Company's non-utility customers are on islands other than Oahu. LPG is distributed to these islands by direct deliveries from overseas suppliers and by barge delivery. The business also owns the infrastructure to distribute LPG to its customers, such as harbor pipelines, trucks, several holding facilities and storage base-yards on Kauai, Maui and Hawaii.

Environmental Matters

Environmental Permits: Gas manufacturing requires environmental operating permits. The most significant are air and wastewater permits that are required for the SNG plant. The Gas Company is in compliance in all material respects with all applicable provisions of these permits.

Environmental Compliance: The business believes that it is in compliance in all material respects with applicable state and federal environmental laws and regulations. Under normal operating conditions, its facilities do not generate hazardous waste. Hazardous waste, when produced, poses little ongoing risk to the facilities from a regulatory standpoint because SNG and LPG dissipate quickly if released.

Employees and Management

As of December 31, 2011, The Gas Company had 310 employees, of which 206 were unionized. The unionized employees are subject to a collective bargaining agreement that expires on April 30, 2015. The business believes it has a good relationship with the union and there have been no major disruptions in operations due to labor matters for over 30 years. Management of the business is headquartered in Honolulu, Hawaii.

District Energy

Business Overview

Through December 22, 2009, District Energy consisted of a 100% ownership of Thermal Chicago and a 75% interest in Northwind Aladdin. The remaining 25% equity interest in Northwind Aladdin was owned by Nevada Electric Investment Company, or NEICO, an indirect subsidiary of NV Energy, Inc.

On December 23, 2009, we sold 49.99% of our membership interests in District Energy to John Hancock Life Insurance Company and John Hancock Life Insurance Company (U.S.A.) (collectively John Hancock) for \$29.5 million. NEICO continues to own 25% equity stake in Northwind Aladdin. The financial results discussed in this Form 10-K reflect 100% of District Energy's full year performance.

District Energy operates the largest district cooling system in the United States. The system currently serves approximately 100 customers in downtown Chicago and one customer outside the downtown area under long-term contracts. District Energy produces chilled water at five plants located in downtown Chicago and distributes it through a closed loop of underground piping for use in the air conditioning systems of large commercial, retail and residential buildings in the central business district. The first of the plants became operational in 1995, and the most recent came on line in June 2002. With modifications made in 2009, the downtown system has the capacity to produce approximately 92,000 tons of chilled water, although it has approximately 105,000 tons of cooling under contract. The business is able to sell continuous service capacity in excess of the total system capacity because not all customers use their contracted capacity at the same time.

TABLE OF CONTENTS**Energy-Related Business: District Energy (continued)**

District Energy also owns a site-specific heating and cooling plant that serves a single customer in Chicago outside the downtown area. This plant has the capacity to produce 4,900 tons of cooling and 58 million British Thermal Units, or BTUs, of heating per hour.

District Energy's Las Vegas operation owns and operates a stand-alone facility that provides cold and hot water (for chilling and heating, respectively) to three customers in Las Vegas, Nevada. These customers consist of a resort and casino, a condominium that began receiving full service in February 2010 and a shopping complex. The three customers represent approximately 47%, 45% and 8% of the Las Vegas operation's cash flows, respectively. All three Las Vegas contracts expire in February 2020. The Las Vegas operation represented approximately 25% of the cash flows of District Energy in 2011.

Summary financial information for 100% of District Energy is as follows (\$ in millions):

	As of, and for the Year Ended, December 31,					
	2011	2010	2009			
Revenue	\$ 52.4	\$ 56.8	\$ 48.6			
EBITDA excluding non-cash items ⁽¹⁾	22.7	22.8	20.8			
Total assets	217.6	228.5	234.8			
% of our consolidated revenue	5.3 %	6.8 %	6.8 %			

See Business Our Business and Investments in Part I, Item 1 and Management's Discussion and Analysis of (1) Financial Condition and Results of Operations Results of Operations in Part II, Item 7 for further information and a reconciliation of net income (loss) to EBITDA excluding non-cash items.

Industry Overview

District energy systems provide chilled water, steam and/or hot water from a centralized plant through underground piping for cooling and heating purposes. A typical district energy customer is the owner/manager of a large office or residential building or facilities such as hospitals, universities or municipal buildings. District energy systems exist in many major North American and European cities and some have been in operation for over 100 years.

Strategy

District Energy's strategy comprises attracting and connecting new customers to the system and investing in further expansion. We believe that District Energy's successful execution of this strategy will contribute to the continued generation of consistent revenue and stable cash flows as a result of the long-term contractual relationships with its customers and the management team's proven ability to improve the operating performance of the business.

Growth: This business intends to grow revenue and profits by marketing its services to developers in the downtown Chicago market. Its value proposition is centered on high reliability, ease of operation and maintenance. The management team develops and maintains relationships with property developers, engineers, architects and city planners as a means of keeping District Energy and these attributes top of mind when they select among building cooling systems and services.

Business Management: The business focuses on minimizing the cost of electricity consumed per unit of chilled water produced by its plants. District Energy is able to maintain and potentially increase its competitive advantage over self cooling by consuming electricity efficiently. District Energy has the ability to create ice during off-peak hours when electricity costs are typically lower. District Energy uses the cold energy in the ice to produce chilled water during the day when electricity prices are typically higher. The resulting cost savings are passed through to its customers.

System Expansion: Since our acquisition in 2004, system modifications and expansion have increased total cooling capacity of the business plants by approximately 15,000 tons or 15%. Projects currently under development can further expand the system capability and accommodate an expected increase in demand for district cooling in Chicago.

TABLE OF CONTENTS

Energy-Related Business: District Energy (continued)

Operations

Maintenance is typically performed by qualified contract personnel and off-season maintenance is performed by a combination of plant staff and contract personnel. The majority of preventive maintenance is conducted off-season.

Customers

District Energy currently serves approximately 100 customers in downtown Chicago and one outside the downtown area. Its customer base is diverse and consists of retail stores, office buildings, residential buildings, theaters and government facilities. Office and commercial buildings constitute approximately 67% of its customer base. No one customer accounts for more than 10% of total contracted capacity at December 31, 2011 and 2010.

The business typically enters into contracts with the owners of the buildings to which the chilled water service is provided. The weighted average life of customer contracts as of December 31, 2011 is approximately 9 years. The majority of these contracts require a termination payment if a customer wishes to terminate a contract early or if the business terminates the contract for customer default. The termination payment allows the business to recover the remaining capital that it invested to provide service to the customer.

Customers pay two charges to receive chilled water services: a fixed capacity charge and a variable consumption charge. The capacity charge is a fixed monthly amount based on the maximum number of tons of chilled water that the business has contracted to make available to the customer at any point in time whether they use it or not. The consumption charge is a variable amount based on the volume of chilled water actually used during a billing period.

Contractual adjustments to the capacity charge and consumption charge occur periodically, typically annually.

Capacity charges generally increase at a fixed rate or are indexed to the Consumer Price Index, or CPI, as a broad measure of inflation. Consumption payments generally increase in line with a number of indices that reflect the cost of electricity, labor and other input costs relevant to the operations of the business. The largest and most variable direct expense of the operation is electricity. District Energy passes through to its customers changes in electricity costs. The business focuses on minimizing the cost of electricity consumed per unit of chilled water produced by operating its plants to maximize efficient use of electricity.

Seasonality

Consumption revenue is higher in the summer months when the demand for chilled water is at its highest. Approximately 75% of consumption revenue is received in the second and third quarters combined each year.

Competition

District Energy is not subject to substantial competitive pressures. Customers are generally not contractually permitted to cool their premises by means other than the chilled water service the business provides. In addition, the primary alternative available to building owners is the installation of a stand-alone water chilling system (self-cooling). While competition from self-cooling exists, the business expects that the majority of its current contracts will be renewed at maturity. Installation of a water chilling system can require significant building reconfiguration as well as space for reconfiguration, and capital expenditure, whereas District Energy has the advantage of economies of scale in terms of

efficiency, staff and electricity procurement.

District Energy believes competition from an alternative district energy system in the Chicago downtown market is unlikely. There are significant barriers to entry including the considerable capital investment required, the need to obtain City of Chicago consent and the difficulty in obtaining sufficient customers given the number of buildings in downtown Chicago already committed under long-term contracts to use its system.

TABLE OF CONTENTS

Energy-Related Business: District Energy (continued)

City of Chicago Use Agreement

The business is not subject to specific government regulation, but its downtown Chicago system operates under the terms of a Use Agreement with the City of Chicago. The Use Agreement establishes the rights and obligations of District Energy and the City of Chicago with respect to its use of the public ways. Under the Use Agreement, the business has a non-exclusive right to construct, install, repair, operate and maintain the plants, facilities and piping essential in providing district cooling chilled water service to customers. During 2008, the Chicago City Council extended the term of the Use Agreement for an additional 20 years until December 31, 2040. Any proposed renewal, extension or modification of the Use Agreement will be subject to approval by the City Council of Chicago.

Management

The day-to-day operations of District Energy are managed by a team located in Chicago, Illinois. The management team has a broad range of experience that includes engineering, construction and project management, business development, operations and maintenance, project consulting, energy performance contracting and retail electricity sales. The team also has significant financial and accounting experience.

The business is governed by a board of directors on which we have three representatives and our co-shareholder has two. Although we control decisions that require a simple majority, certain issues require super majority approval including sale or other disposal of all or substantially all of the business property or assets, entry into a new line of business, modifications of constituent or governing documents and pursuit of an initial public offering of any membership interests.

Employees

As of December 31, 2011, District Energy had 40 full-time employees and one part-time employee. In Chicago, 27 plant staff members are employed under a three-year collective bargaining agreement expiring on January 14, 2015. In Las Vegas, 6 plant staff members are employed under a four-year labor agreement expiring on March 31, 2013. We believe employee relations at District Energy are good.

Aviation-Related Business

Atlantic Aviation

Business Overview

Atlantic Aviation operates FBOs at 65 airports in the United States. Atlantic Aviation's FBOs provide fueling and fuel-related services, aircraft parking and hangar services to owners/operators of jet aircraft, primarily in the general aviation sector of the air transportation industry, but also commercial, military, freight and government aviation customers.

Summary financial information for Atlantic Aviation is as follows (\$ in millions):

	As of, and for the Year Ended, December 31,					
	2011		2010		2009	
Revenue	\$ 683.6		\$ 573.4		\$ 486.1	
EBITDA excluding non-cash items ⁽¹⁾	126.7		117.5		106.5	
Total assets	1,374.4		1,410.1		1,473.2	
% of our consolidated revenue	69.1	%	68.2	%	68.5	%

See Business Our Business and Investments in Part I, Item 1 and Management's Discussion and Analysis of (1) Financial Condition and Results of Operations Results of Operations in Part II, Item 7 for further information and a reconciliation of net income (loss) to EBITDA excluding non-cash items.

17

TABLE OF CONTENTS

Aviation-Related Business: Atlantic Aviation (continued)

Industry Overview

FBOs service the general aviation segment of the air transportation industry. General aviation includes corporate and leisure flying and does not include commercial air carriers or military operations. Local airport authorities, the owners of the airport property, grant FBO operators the right to provide fueling and other services pursuant to a long-term ground lease. Fuel sales provide the majority of an FBO's revenue and gross profit.

FBOs generally operate in environments with high barriers to entry. Airports often have limited physical space for additional FBOs. Airport authorities generally do not have an incentive to add additional FBOs unless there is a significant demand for additional capacity, as profit-making FBOs are more likely to reinvest in the airport and provide a broad range of services, thus attracting increased airport traffic. The increased traffic tends to generate additional revenue for the airport authority in the form of landing and fuel flowage fees. Government approvals and design and construction of a new FBO can also take significant time and capital expenditures.

Demand for FBO services is driven by the level of general aviation flight activity. The general aviation activity level is measured by the number of take-offs and landings in a given period. General aviation business jet take-offs and landings increased 2.2% in 2011 compared with 2010 according to flight data reported by the Federal Aviation Administration, or FAA. Because Atlantic Aviation operates at a subset of the airports surveyed by the FAA, the correlation between Atlantic Aviation's performance and the industry data will not be perfect. Nonetheless, the business believes it is a useful directional tool to assess trends in the general aviation sector. The business believes business jet traffic will continue to expand if economic activity continues to recover.

Strategy

Atlantic Aviation is pursuing a strategy that has five principal components:

- an overarching commitment to provide superior service and safety to its customers;
- organically grow the business and leverage the size of the Atlantic Aviation network and its information technology capabilities to identify marketing leads and implement cross-selling initiatives;
- aggressively manage the business so as to minimize, to the extent possible, its operating expenses;
- optimize the portfolio through selective site acquisition and divestitures as well as taking actions to extend the life of its existing leases; and
- continue to reduce debt to levels believed to be sustainable over the long-term.

These components are discussed in greater detail in the *Operations* and *Marketing* sections below.

Operations

The business has high-quality facilities and focuses on attracting customers who desire a high level of personal service. Fuel and fuel-related services generated 82% of Atlantic Aviation's revenue and accounted for 66% of Atlantic Aviation's gross profit in 2011. Other services, including de-icing, aircraft parking, hangar rental and catering, provided the balance. Fuel is stored in fuel tank farms and each FBO operates refueling vehicles owned or leased by the FBO. The FBO either owns or has access to the fuel storage tanks to support its fueling activities. At some of Atlantic Aviation's locations, services are also provided to commercial carriers. These may include refueling from the carrier's own fuel supplies stored in the carrier's fuel farm, de-icing and/or ground and ramp handling services.

Atlantic Aviation buys fuel at a wholesale price and sells fuel to customers at a contracted price, or at a price negotiated at the point of purchase. While wholesale fuel costs can be volatile, Atlantic Aviation generally passes fuel cost changes through to customers and attempts to maintain and, when possible, increase dollar-based margin per gallon of fuel sold. Atlantic Aviation also fuels aircraft with fuel owned by other parties and charges customers a service fee.

TABLE OF CONTENTS

Aviation-Related Business: Atlantic Aviation (continued)

Atlantic Aviation has limited exposure to commodity price risk as it generally carries a limited inventory of jet fuel on its books and passes fluctuations in the wholesale cost of fuel through to its customers.

Atlantic Aviation is particularly focused on managing costs effectively. Atlantic Aviation will continue to evaluate opportunities to reduce expenses through, for example, business reengineering, more efficient purchasing, partnering with service providers such as credit card processors and capturing synergies in acquisitions.

Atlantic Aviation periodically evaluates its portfolio of FBOs. As a result, the business may conclude that some of its sites do not have sufficient scale nor do they serve a market with sufficiently strong growth prospects to warrant continued operations at these sites. Consistent with this, in 2011, Atlantic Aviation divested certain FBOs, primarily to in-field competitors who valued the opportunity to consolidate operations. Proceeds from these divestitures were used to purchase new FBOs in markets that have a rate of growth in general aviation activity greater than in the markets exited. Atlantic Aviation will continue to evaluate its portfolio and may opportunistically divest certain sites and redeploy proceeds of these into acquisitions of sites in more attractive markets.

Locations

Atlantic Aviation's FBO facilities operate pursuant to long-term leases from airport authorities or local government agencies. The business and its predecessors have a strong history of successfully renewing leases, and have held some leases for over 40 years.

During 2011, Atlantic Aviation was able to increase its weighted average remaining lease length from 16.8 to 17.8 years including extension options. The leases at 17 of Atlantic Aviation's FBOs, accounting for 21.4% of Atlantic Aviation's gross profit, will expire within the next five years. No individual FBO generates more than 10% of the gross profit of the business at December 31, 2011.

The airport authorities have termination rights in each of Atlantic Aviation's leases. Standard terms allow for termination if Atlantic Aviation defaults on the terms and conditions of the lease, abandons the property or becomes insolvent or bankrupt. Less than ten leases may be terminated with notice by the airport authority for convenience or other similar reasons. In each of these cases, there are compensation agreements based on amortization schedules or obligations of the authority to make best efforts to relocate the FBO. Most of the leases allow for termination if liens are filed against the property.

Marketing

Atlantic Aviation has a number of marketing programs, each utilizing an internally-developed point-of-sale system that tracks general aviation flight movements. One program supports flight tracking and provides customer relationship management data that facilitates upselling of fuel and optimization of revenue per customer.

In 2011, Atlantic Aviation enhanced their business intelligence system which improved the timeliness and accuracy of management data. As part of their enhancements, Atlantic Aviation partnered with a provider of flight planning data to better understand the universe of take-offs and landings. By combining this information with their internal business intelligence system, Atlantic Aviation is able to serve their customers more effectively and drive operational efficiencies.

Another marketing program is a loyalty program for pilots known as Atlantic Awards that provides an incentive to purchase fuel from Atlantic Aviation. Atlantic Awards has gained wide acceptance among pilots. These awards are recorded as a reduction in fuel-revenue in Atlantic Aviation's consolidated financial statements.

Competition

Atlantic Aviation competes with other FBO operators at approximately half of its locations. The FBOs compete on the basis of location of the facility relative to runways and street access, service, value-added features, reliability and price. Each FBO also faces competitive pressure from the fact that aircraft may take on sufficient fuel at one location and not need to refuel at a specific destination. FBO operators also face indirect competition from facilities located at nearby airports.

TABLE OF CONTENTS

Aviation-Related Business: Atlantic Aviation (continued)

Atlantic Aviation's main competitors are Signature Flight Support, Landmark Aviation and Million Air. Other than Signature, these competitors are privately owned. To our knowledge, other than the three main competitors listed, no other competitor operates more than 20 FBOs.

Regulation

The aviation industry is overseen by a number of regulatory bodies, but its primary regulator is the FAA. The business is also regulated by the local airport authorities through lease contracts with those authorities. The business must comply with federal, state and local environmental statutes and regulations associated in part with the operation of underground fuel storage tanks. These requirements include, among other things, tank and pipe testing for tightness, soil sampling for evidence of leaking and remediation of detected leaks and spills. Atlantic Aviation's FBOs are subject to regular inspection by federal and local environmental agencies and local fire and airline quality control departments. The business does not expect that compliance and related remediation work will have a material negative impact on earnings or the competitive position of Atlantic Aviation. The business has not received notice requiring it to cease operations at any location or of any abatement proceeding by any government agency as a result of failure to comply with applicable environmental laws and regulations.

Management

The day-to-day operations of Atlantic Aviation are managed by individual site managers who are responsible for all aspects of the operations at their site. Responsibilities include ensuring that customer requirements are met by the staff employed at the site and that revenue is collected, and expenses incurred, in accordance with internal guidelines. Local managers are, within the specified guidelines, empowered to make decisions as to fuel pricing and other services, thereby improving responsiveness and customer service. Local managers within a geographic region are supervised by one of four regional managers covering the United States.

Atlantic Aviation's operations are overseen by senior personnel with an average of approximately 24 years experience each in the aviation industry. The business management team has established close and effective working relationships with local authorities, customers, service providers and subcontractors. The team is responsible for overseeing the FBO operations, setting strategic direction and ensuring compliance with all contractual and regulatory obligations.

Atlantic Aviation's head office is in Plano, Texas. The head office provides the business with overall management and performs centralized functions including accounting, information technology, risk management, human resources, payroll and insurance arrangements.

During 2011, Atlantic Aviation established a Business Development group in order to continually evaluate various options to optimize Atlantic Aviation's FBO portfolio. These options include selective dispositions at locations where Atlantic Aviation's operations are sub-scale relative to their markets or where there is opportunity to create value, and redeployment of sales proceeds in new or existing markets with attractive growth prospects, whether through acquisition or in response to requests for proposals from airport authorities.

Employees

As of December 31, 2011, the business employed 1,709 people across all of its sites. Approximately 7.8% of the employee population is covered by collective bargaining agreements. We believe employee relations at Atlantic Aviation are good.

Our Employees Consolidated Group

As of December 31, 2011, we employed approximately 2,100 people across our three ongoing, consolidated businesses (excluding IMTT) of which approximately 18% were subject to collective bargaining agreements. The Company itself does not have any employees.

AVAILABLE INFORMATION

We file annual, quarterly and current reports, proxy statements and other information with the SEC. You may read and copy any document we file with the SEC at the SEC's public reference room at 100 F Street, NE, Washington, DC 20549. Please call the SEC at 1-800-SEC-0330 for information on the operations of the public reference room. The SEC maintains a website that contains annual, quarterly and current reports, proxy and information statements and other information that issuers (including Macquarie Infrastructure Company LLC) file electronically with the SEC.

The SEC's website is www.sec.gov.

Our website is www.macquarie.com/mic. You can access our Investor Center through this website. We make available free of charge, on or through our Investor Center, our proxy statements, annual reports to shareholders, annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and any amendments to these filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, or the Exchange Act, as amended, as soon as reasonably practicable after such material is electronically filed with, or furnished to, the SEC. We also make available through our Investor Center statements of beneficial ownership of the LLC interests filed by our Manager, our directors and officers, any holders of 10% or more of our LLC interests outstanding and others under Section 16 of the Exchange Act.

You can also find information on the Governance page on our website where we post documents including:

Third Amended and Restated Operating Agreement of Macquarie Infrastructure Company LLC;
Amended and Restated Management Services Agreement, as further amended;
Corporate Governance Guidelines;
Code of Ethics and Conduct;

Charters for our Audit Committee, Compensation Committee and Nominating and Corporate Governance Committee;
Policy for Shareholder Nomination of Candidates to Become Directors of Macquarie Infrastructure Company LLC;
and

Information for Shareholder Communication with our Board of Directors, our Audit Committee and our Lead Independent Director.

Our Code of Ethics and Conduct applies to all of our directors, officers and employees as well as all directors, officers and employees of our Manager involved in the management of the Company and its businesses. We will post any amendments to the Code of Ethics and Conduct, and any waivers that are required to be disclosed by the rules of either the SEC or the New York Stock Exchange (NYSE), on our website. The information on our website is not incorporated by reference into this report.

You can request a copy of these documents at no cost, excluding exhibits, by contacting Investor Relations at 125 West 55th Street, New York, NY 10019 (212-231-1825).

TABLE OF CONTENTS

ITEM 1A. RISK FACTORS

An investment in our LLC interests involves a number of risks. Any of these risks could result in a significant or material adverse effect on our results of operations or financial condition and a corresponding decline in the market price of the LLC interests.

Risks Related to Our Business Operations

We own, and may acquire in the future, investments in which we share voting control with third parties and, consequently, our ability to exercise significant influence over the business or level of their distributions to us may be limited.

We own 50% of IMTT and 50.01% of District Energy and may acquire less than majority ownership in other businesses in the future. Our ability to influence the management of businesses in which we own noncontrolling interests, and the ability of these businesses to continue operating without disruption, depends on our reaching agreement with our co-investors and reconciling investment and performance objectives for these businesses. Our co-investors may become bankrupt or may have economic or other business interests that are inconsistent with our interests and goals. To the extent that we are unable to agree with co-investors regarding the business and operations of the relevant investment, the performance of the investment and the operations may suffer, we may not receive anticipated distributions or such distributions may be delayed and there may be a material adverse impact on our results. In addition, we may become involved in costly litigation or other dispute resolution procedures to resolve disagreements with our co-investors, which would divert management's attention.

Furthermore, we may, from time to time, own noncontrolling interests in investments. Management and controlling shareholders of these investments may develop different objectives than we have and we may be unable to control the timing or amount of distributions we receive from these investments. Our inability to exercise significant influence over the operations, strategies and policies of non-controlled investments means that decisions could be made that could adversely affect our results and our ability to generate cash and pay dividends on our LLC interests. See also

Risks Related to IMTT We share ownership and voting control of IMTT with a third party co-investor. A representative and beneficiary of that co-investor is currently the CEO of IMTT. Our ability to exercise significant influence over the business or level of distributions from IMTT is limited, and we have been, and we may continue to be negatively impacted by disagreements with our co-investor regarding IMTT's business and operations .

Our holding company structure may limit our ability to make regular dividends in the future to our shareholders because we will rely on the cash flows and distributions from our businesses.

The Company is a holding company with no operations. Therefore, it is dependent upon the ability of our businesses and investments to pay dividends and make distributions to the Company to enable it to meet its expenses, and to make dividends to shareholders in the future. The ability of our operating subsidiaries and the businesses in which we will hold investments to make distributions to the Company is subject to limitations based on their operating performance, the terms of their debt agreements and the applicable laws of their respective jurisdictions. In addition, the ability of each business to reduce its outstanding debt will be similarly limited by its operating performance, as discussed below and in Part II, Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations .

Fluctuations in economic, equity and credit market conditions may have a material adverse effect on our results of operations, our liquidity or our ability to obtain credit on acceptable terms.

Should the economic, equity and credit market conditions become disrupted, our ability to raise equity or obtain capital, to repay or refinance credit facilities at maturity, pay significant capital expenditures or fund growth may be costly and/or impaired. Our access to debt financing in particular will depend on a variety of factors such as market conditions, the general availability of credit, the overall availability of credit to our industry, our credit history and credit capacity, as well as the historical performance of our businesses and lender perceptions of their and our financial prospects. In the event we are unable to obtain debt financing, particularly as significant credit facilities mature, our internal sources of liquidity may not be sufficient.

TABLE OF CONTENTS

Economic conditions may also increase our counterparty risk, particularly in those businesses whose revenues are determined under multi-year contracts, such as IMTT and District Energy. Should conditions deteriorate, we would expect to see increases in counterparty defaults and/or bankruptcies, which could result in an increase in bad debt expense and may cause our operating results to decline.

The volatility in the financial markets makes projections regarding future obligations under pension plans difficult.

Two of our businesses, The Gas Company and IMTT, have defined benefit retirement plans. Future funding obligations under those plans depend in large part on the future performance of plan assets and the mix of investment assets. Our defined benefit plans hold a significant amount of equity securities as well as fixed income securities. If the market values of these securities decline or if interest rates decline, our pension expense and cash funding requirements would increase and, as a result, could materially adversely affect the results and liquidity of these businesses and the Company.

If borrowing costs increase or if debt terms become more restrictive, the cost of refinancing and servicing our debt will increase, reducing our profitability and ability to freely deploy free cash flow.

The majority of indebtedness at our businesses matures within two to three years. Refinancing this debt may result in substantially higher interest rates or margins or substantially more restrictive covenants. Any of these could limit operational flexibility or reduce dividends and/or distributions from our operating businesses to us, which would have an adverse impact on our ability to freely deploy free cash flow. We cannot provide assurance that we or the other owners of any of our businesses will be able to make capital contributions to repay some or all of the debt if required.

The debt facilities at our businesses contain terms that become more restrictive over time, with stricter covenants and increased amortization schedules. Those terms will limit our ability to freely deploy free cash flow.

Security breaches or interruptions in our information systems could materially adversely affect our business.

We rely on information technology networks and systems to process, transmit and store electronic information used to operate our businesses. We also share certain information technology networks with our Manager. The information technology infrastructure we use, as well as the information technology systems used by our Manager, could be vulnerable to security breach, damage or interruption from computer viruses, cyber attacks, cyber terrorism, natural disasters or telecommunications failures. If our technology systems were to fail or be breached and we were unable to recover in a timely manner, we may be unable to fulfill critical business functions and confidential data could be compromised, which could have a material adverse effect on our results of operations, financial condition and cash flows.

Unfavorable publicity or public perception of the industries in which we operate could adversely impact our operating results and our reputation.

Accidents and incidents involving the aviation industry, particularly those involving the airports and heliport at which we operate, whether or not directly related to the Company's services, and the media coverage thereof, can adversely impact the Company's reputation and the demand for our services. Similarly, negative publicity or public perception of the energy-related industries in which we operate, including through media coverage of environmental contamination and climate change concerns, could reduce demand for our services and harm our reputation. Any reduction in

If borrowing costs increase or if debt terms become more restrictive, the cost of refinancing and servicing our debt will

demand for the services our businesses provide or damage to our reputation could have a material adverse effect on our results of operations and business prospects.

Our businesses are subject to environmental risks that may impact our future profitability.

Our businesses (including businesses in which we invest) are subject to numerous statutes, rules and regulations relating to environmental protection. Atlantic Aviation is subject to environmental protection requirements relating to the storage, transport, pumping and transfer of fuel, and District Energy is subject to requirements relating mainly to its handling of significant amounts of hazardous materials. The Gas Company is subject to risks and hazards associated with the refining, handling, storage and transportation of combustible products. These risks could result in substantial losses due to personal injury, loss of life, damage or

TABLE OF CONTENTS

destruction of property and equipment and environmental damage. Any losses we face could be greater than insurance levels maintained by our businesses, which could have an adverse effect on their and our financial results. In addition, disruptions to physical assets could reduce our ability to serve customers and adversely affect sales and cash flows.

IMTT's operations in particular are subject to complex, stringent and expensive environmental regulation and future compliance costs are difficult to estimate with certainty. IMTT also faces risks relating to the handling and transportation of significant amounts of hazardous materials. Failure to comply with regulations or other claims may give rise to interruptions in operations and civil or criminal penalties and liabilities that could adversely affect the profitability of this business and the distributions it makes to us, as could significant unexpected compliance costs.

Further, these rules and regulations are subject to change and compliance with any changes that could result in a restriction of the activities of our businesses, significant capital expenditures and/or increased ongoing operating costs.

A number of the properties owned by IMTT have been subject to environmental contamination in the past and require remediation for which IMTT is liable. These remediation obligations exist principally at IMTT's Bayonne and Lemont facilities and could cost more than anticipated or could be incurred earlier than anticipated, or both. In addition, IMTT may discover additional environmental contamination at its Bayonne, Lemont or other facilities that may require remediation at significant cost to IMTT. Further, the past contamination of the properties owned by IMTT, including by former owners or operators of such properties, could result in remediation obligations, personal injury, property damage, environmental damage or similar claims by third parties.

We may also be required to address other prior or future environmental contamination, including soil and groundwater contamination that results from the spillage of fuel, hazardous materials or other pollutants. Under various federal, state, local and foreign environmental statutes, rules and regulations, a current or previous owner or operator of real property may be liable for noncompliance with applicable environmental and health and safety requirements and for the costs of investigation, monitoring, removal or remediation of hazardous materials. These laws often impose liability, whether or not the owner or operator knew of, or was responsible for, the presence of hazardous materials. Persons who arrange for the disposal or treatment of hazardous materials may also be liable for the costs of removal or remediation of those materials at the disposal or treatment facility, whether or not that facility is or ever was owned or operated by that person and whether or not the original disposal or treatment activity accorded with all regulatory requirements. The presence of hazardous materials on a property could result in personal injury, loss of life, damage or destruction of property and equipment, environmental damage and/or claims by third parties that could have a material adverse effect on our financial condition or operating results.

Climate change, climate change regulations and greenhouse effects may adversely impact our operations and markets.

Climate change is receiving increased attention from the scientific and political communities. There is an ongoing debate as to the extent to which our climate is changing, the possible causes of this change and its potential impacts. Some attribute global warming to increased levels of greenhouse gases, including carbon dioxide, which has led to significant legislative and regulatory efforts to limit greenhouse gas emissions. The outcome of federal and state actions to address global climate change could result in significant new regulations, additional changes to fund energy efficiency activities or other regulatory actions. These actions could increase the costs of operating our businesses, reduce the demand for our products and services and impact the prices we charge our customers, any or all of which could adversely affect our results of operations. In addition, climate change could make severe weather events more frequent, which would increase the likelihood of capital expenditures to replace damaged infrastructure at our businesses.

Energy efficiency and technology advances, as well as conservation efforts, may result in reduced demand for our products and services.

The trend toward increased conservation, as well as technological advances, including installation of improved insulation, the development of more efficient heating and cooling devices and advances in energy generation technology, may reduce demand for certain of our products and services. During periods of high

TABLE OF CONTENTS

energy commodity costs, the prices of certain of our products and services generally increase, which may lead to customer conservation. In addition, federal and/or state regulation may require mandatory conservation measures, which would also reduce demand. A reduction in demand for our products and services could adversely affect our results of operations.

Our businesses are dependent on our relationships, on a contractual and regulatory level, with government entities that may have significant leverage over us. Government entities may be influenced by political considerations to take actions adverse to us.

Our businesses generally are, and will continue to be, subject to substantial regulation by governmental agencies. In addition, our businesses rely on obtaining and maintaining government permits, licenses, concessions, leases or contracts. Government entities, due to the wide-ranging scope of their authority, have significant leverage over us in their contractual and regulatory relationships with us that they may exercise in a manner that causes us delays in the operation of our businesses or pursuit of our strategy, or increased administrative expense. Furthermore, government permits, licenses, concessions, leases and contracts are generally very complex, which may result in periods of non-compliance, or disputes over interpretation or enforceability. If we fail to comply with these regulations or contractual obligations, we could be subject to monetary penalties or we may lose our rights to operate the affected business, or both. Where our ability to operate an infrastructure business is subject to a concession or lease from the government, the concession or lease may restrict our ability to operate the business in a way that maximizes cash flows and profitability. Further, our ability to grow our current and future businesses will often require consent of numerous government regulators. Increased regulation restricting the ownership or management of U.S. assets, particularly infrastructure assets, by non-U.S. persons, given the non-U.S. ultimate ownership of our Manager, may limit our ability to pursue acquisitions. Any such regulation may also limit our Manager's ability to continue to manage our operations, which could cause disruption to our businesses and a decline in our performance. In addition, any required government consents may be costly to seek and we may not be able to obtain them. Failure to obtain any required consents could limit our ability to achieve our growth strategy.

Our contracts with government entities may also contain clauses more favorable to the government counterparty than a typical commercial contract. For instance, a lease, concession or general service contract may enable the government to terminate the agreement without requiring them to pay adequate compensation. In addition, government counterparties also may have the discretion to change or increase regulation of our operations, or implement laws or regulations affecting our operations, separate from any contractual rights they may have. Governments have considerable discretion in implementing regulations that could impact these businesses. Because our businesses provide basic services, and face limited competition, governments may be influenced by political considerations to take actions that may hinder the efficient and profitable operation of our businesses and investments.

Governmental agencies may determine the prices we charge and may be able to restrict our ability to operate our businesses to maximize profitability.

Where our businesses or investments are sole or predominant service providers in their respective service areas and provide services that are essential to the community, they are likely to be subject to rate regulation by governmental agencies that will determine the prices they may charge. We may also face fees or other charges imposed by government agencies that increase our costs and over which we have no control. We may be subject to increases in fees or unfavorable price determinations that may be final with no right of appeal or that, despite a right of appeal, could result in our profits being negatively affected. In addition, we may have very little negotiating leverage in

Our businesses are dependent on our relationships, on a contractual and regulatory level, with government entities

establishing contracts with government entities, which may decrease the prices that we otherwise might be able to charge or the terms upon which we provide products or services. Businesses and investments we acquire in the future may also be subject to rate regulation or similar negotiating limitations.

Our income may be affected adversely if additional compliance costs are required as a result of new safety, health or environmental regulation.

Our businesses and investments are subject to federal, state and local safety, health and environmental laws and regulations. These laws and regulations affect all aspects of their operations and are frequently modified. There is a risk that any one of our businesses or investments may not be able to comply with some

TABLE OF CONTENTS

aspect of these laws and regulations, resulting in fines or penalties. Additionally, if new laws and regulations are adopted or if interpretations of existing laws and regulations change, we could be required to increase capital spending and incur increased operating expenses in order to comply. Because the regulatory environment frequently changes, we cannot predict when or how we may be affected by such changes. Environmental emissions and other compliance testing technologies continue to improve, which may result in more stringent, targeted environmental regulations and compliance obligations in the future, for example at IMTT, the costs of which could be material and adversely affect our cash flows and results of operations.

A significant and sustained increase in the price of oil could have a negative impact on the revenue of a number of our businesses.

A significant and sustained increase in the price of oil could have a negative impact on the profitability of a number of our businesses. Higher prices for jet fuel could result in less use of aircraft by general aviation customers, which would have a negative impact on the profitability of Atlantic Aviation. Higher fuel prices could increase the cost of power to our businesses generally which they may not be able to fully pass on to customers.

We may face a greater exposure to terrorism than other companies because of the nature of our businesses and investments.

We believe that infrastructure businesses face a greater risk of terrorist attack than other businesses, particularly those businesses that have operations within the immediate vicinity of metropolitan and suburban areas. Specifically, because of the combustible nature of the products of The Gas Company and consumer reliance on these products for basic services, the business SNG plant, transmission pipelines, barges and storage facilities may be at greater risk for terrorism attacks than other businesses, which could affect its operations significantly. Any terrorist attacks that occur at or near our business locations would likely cause significant harm to our employees and assets. In recent years, insurers have significantly reduced the amount of insurance coverage available for liability to persons other than employees or passengers for claims resulting from acts of terrorism, war or similar events. A terrorist attack that makes use of our property, or property under our control, may result in liability far in excess of available insurance coverage. In addition, any terrorist attack, regardless of location, could cause a disruption to our business and a decline in earnings. Furthermore, it is likely to result in an increase in insurance premiums and a reduction in coverage, which could cause our profitability to suffer.

We are dependent on certain key personnel, and the loss of key personnel, or the inability to retain or replace qualified employees, could have an adverse effect on our businesses, financial condition and results of operations.

We operate our businesses on a stand-alone basis, relying on existing management teams for day-to-day operations. Consequently, our operational success, as well as the success of our internal growth strategy, will be dependent on the continued efforts of the management teams of our businesses, who have extensive experience in the day-to-day operations of these businesses. Furthermore, we will likely be dependent on the operating management teams of businesses that we may acquire in the future. The loss of key personnel, or the inability to retain or replace qualified employees, could have an adverse effect on our business, financial condition and results of operations.

Risks Related to IMTT

We share ownership and voting control of IMTT with a third party co-investor. A representative and beneficiary of that co-investor is currently the CEO of IMTT. Our ability to exercise significant influence over the business or level of distributions from IMTT is limited, and we have been, and we may continue to be negatively impacted by disagreements with our co-investor regarding IMTT's business and operations.

We own 50% of IMTT; the remaining 50% is owned by a trust for the benefit of members of IMTT's founding family. Our co-investor currently manages the day to day operations of IMTT, and our ability to influence the business is limited to our rights under the Shareholders' Agreement governing our investment in IMTT. Our co-investor may continue to fail to act in compliance with the Shareholders' Agreement and may

TABLE OF CONTENTS

have other business interests that are inconsistent with our interests and goals, and may continue to take actions that are contrary to our business objectives and requests. For example, management, operating under the express or implied direction of the CEO or the co-investor, may oppose MIC's interests in dealings with lenders, contractors, customers, suppliers, regulators and other third party stakeholders, as well MIC's interests in normal business planning and budgeting processes. We may not agree with our co-investor as to the payment, amount or timing of distributions or as to transactions such as significant capital expenditures, acquisitions or dispositions of assets and financings.

Disputes with our co-investor have resulted in arbitration that has been costly and diverted the attention of our management. Our inability to exercise control over the management of IMTT's business could materially adversely affect IMTT's and our results of operations. To the extent that our co-investor and IMTT management continue to act in ways inconsistent with their obligations to MIC, further arbitration or litigation will be necessary to preserve MIC's rights.

Distribution of funds to the Company from IMTT is governed by the Shareholders' Agreement between the Company and the co-investor that owns the remaining 50% stake. The co-investor has refused to vote in favor of distributing these funds, and the Company believes that such refusal violates the Shareholders' Agreement. MIC has been unable to resolve this dispute with the co-owner of IMTT regarding distributions, despite efforts to do so in accordance with the Shareholders' Agreement. Accordingly, on April 18, 2011, MIC initiated formal arbitration proceedings with the Voting Trust of IMTT Holdings Inc. ("Voting Trust") and IMTT Holdings Inc. under the auspices of the American Arbitration Association.

Although we had hoped that the day to day operations of IMTT would not be affected by this dispute, MIC is concerned that, until the issues in the arbitration have been finally resolved, IMTT's senior management (which includes members and beneficiaries of the Voting Trust) will continue to make operational decisions that are influenced by the context of the arbitration. We also cannot assure that this dispute will be resolved favorably for us or within the time frame expected, that any negative publicity will not adversely affect the Company or IMTT, or that the costs involved, and the diversion of management's attention, will not adversely impact our results of operations. We can also not ensure that MIC will not need to seek judicial enforcement of any award from the arbitration or initiate other arbitration or litigation to preserve MIC's rights with respect to IMTT. In addition, we cannot ensure that the Voting Trust or IMTT management will abide by an award. The value and trading price of our LLC interests may be negatively impacted by the uncertainty surrounding the outcome of this dispute.

IMTT's business is dependent on the demand for bulk liquid storage capacity in the locations where it operates.

Demand for IMTT's bulk liquid storage is largely a function of U.S. domestic demand for chemical, petroleum and vegetable and animal oil products and, less significantly, the extent to which such products are imported into and/or exported out of the United States. U.S. domestic demand for chemical, petroleum and vegetable and animal oil products is influenced by a number of factors, including economic conditions, growth in the U.S. economy, the pricing of chemical, petroleum and vegetable and animal oil products and their substitutes. Import and export volumes of these products to and from the United States are influenced by demand and supply imbalances in the United States and overseas, the cost of producing chemical, petroleum and vegetable and animal oil products domestically versus overseas and the cost of transporting the products between the United States and overseas destinations. Specifically, production of natural gas from mainland North America may increase or decrease the demand for bulk liquid storage. This situation continues to develop and the effects are not yet predictable.

In addition, changes in government regulations that affect imports and exports of bulk chemical, petroleum and vegetable and animal oil products, including the imposition of surcharges or taxes on imported or exported products,

We share ownership and voting control of IMTT with a third party co-investor. A representative and beneficiary of the

could adversely affect import and export volumes to and from the United States. A reduction in demand for bulk liquid storage, particularly in the New York Harbor or the lower Mississippi River, as a consequence of lower U.S. domestic demand for, or imports/exports of, chemical, petroleum or vegetable and animal oil products, could lead to a decline in storage rates and tankage volumes rented out by IMTT and adversely affect IMTT's revenue and profitability and the distributions it makes to us.

TABLE OF CONTENTS

IMTT's business could be adversely affected by a substantial increase in bulk liquid storage capacity in the locations where it operates.

An increase in available bulk liquid storage capacity in excess of growth in demand for such storage in the key locations in which IMTT operates, such as New York Harbor and the lower Mississippi River, could result in overcapacity and a decline in storage rates and tankage volumes rented out by IMTT and could adversely affect IMTT's revenue and profitability and the distributions it makes to us.

IMTT's business could be adversely affected by the insolvency of one or more large customers.

IMTT has a number of customers that together generate a material proportion of IMTT's revenue and gross profit. In 2011, IMTT's ten largest customers by revenue generated approximately 54.0% of terminal revenue. The insolvency of any of these large customers could result in an increase in unutilized storage capacity in the absence of such capacity being rented to other customers and adversely affect IMTT's revenue and profitability and the distributions it makes to us.

IMTT's business involves hazardous activities and is partly located in a region with a history of significant adverse weather events and is potentially a target for terrorist attacks. We cannot assure you that IMTT is, or will be in the future, adequately insured against all such risks.

The transportation, handling and storage of petroleum, chemical and vegetable and animal oil products are subject to the risk of spills, leakage, contamination, fires and explosions. Any of these events may result in loss of revenue, loss of reputation or goodwill, fines, penalties and other liabilities. In certain circumstances, such events could also require IMTT to halt or significantly alter operations at all or part of the facility at which the event occurred. IMTT carries insurance to protect against most of the accident-related risks involved in the conduct of the business; however, the limits of IMTT's coverage mean IMTT cannot insure against all risks. In addition, because IMTT's facilities are not insured against loss from terrorism or acts of war, such an attack that significantly damages one or more of IMTT's major facilities would have a negative impact on IMTT's future cash flow and profitability and the distributions it makes to us. Further, future losses sustained by insurers during hurricanes in the U.S. Gulf region may result in lower insurance coverage and/or increased insurance premiums for IMTT's properties in Louisiana.

Risks Related to The Gas Company

Disruptions or shutdowns at either of the oil refineries on Oahu from which The Gas Company obtains both LPG and the primary feedstock for its SNG plant may have an adverse effect on the operations of the business.

The Gas Company manufactures SNG and distributes SNG and LPG. SNG feedstock or LPG supply disruptions or refinery shutdowns that limit the business's ability to manufacture and/or deliver gas to customers could increase costs as a result of an inability to source feedstock at rates comparable to those being paid currently. The extended unavailability of one or both of the refineries or disruption to crude oil supplies or feedstock to Hawaii could also result in an increased reliance on imported sources. An inability to purchase LPG from foreign sources would

adversely affect operations. The business is also limited in its ability to store LPG, and any disruption in supply may cause a depletion of LPG stocks. Currently, the business has only one contracted source of feedstock for SNG, the Tesoro refinery, and if Tesoro chooses to discontinue the production or sale of feedstock to the business, which they could do with little notice, The Gas Company's utility business would suffer a significant disruption and potentially incur significant operating cost increases and/or capital expenditures until alternative supplies of feedstock could be developed. In the event of a supply disruption, an inability to obtain feedstock from alternative sources would adversely affect operations. The business is also limited in its ability to warehouse SNG feedstock in the event of a disruption. All supply disruptions of SNG or LPG, if occurring for an extended period, could adversely impact the business contribution margin and cash flows.

In January 2012, Tesoro announced plans to sell its operations in Hawaii, including its refinery on Oahu, its operations at 32 retail gas stations and all associated logistical assets. Tesoro indicated that the sale would occur no earlier than the second half of 2012. The Gas Company maintains feedstock and LPG contracts with

TABLE OF CONTENTS

Tesoro expiring September 30, 2013. The Gas Company cannot, however, rely on indefinite supply from the Tesoro Hawaii Refinery and may be required to make provisions to replace the SNG feedstock and LPG from other sources.

This may result in an increase in the cost of both SNG feedstock and LPG. The Gas Company also shares common infrastructure with Tesoro, which it utilizes under the terms of its services agreement. If The Gas Company is unable to utilize these facilities as part of its ongoing operations, and it is unable to operate a back-up solution, there could be an adverse impact to the business contribution margin and cash flows.

The most significant costs for The Gas Company are locally-sourced LPG, LPG imports and feedstock for the SNG plant, the costs of which are directly related to petroleum prices. To the extent that these costs cannot be passed on to customers, the business contribution margin and cash flows will be adversely affected.

The profitability of The Gas Company is based on the margin of sales prices over costs. Since LPG and feedstock for the SNG plant are commodities, changes in global supply of and demand for these products can have a significant impact on costs. In addition, increased reliance on higher-priced foreign sources of LPG, whether as a result of disruptions to or shortages in local sources or otherwise, could also have a significant impact on costs. The Gas Company has no control over these costs, and, to the extent that these costs cannot be passed on to customers, the business financial condition and the results of operations would be adversely affected. Higher prices could result in reduced customer demand or customer conversion to alternative energy sources, or both, that would reduce the volume of gas sold and adversely affect the profitability of The Gas Company.

The Gas Company relies on its SNG plant, including its transmission pipeline, for a significant portion of its sales. Disruptions at that facility could adversely affect the business ability to serve customers.

Disruptions at the SNG plant resulting from mechanical or operational problems or power failures could affect the ability of The Gas Company to produce SNG. Most of the utility sales on Oahu are of SNG and all SNG is produced at the Oahu plant. Disruptions to the primary and redundant production systems would have a significant adverse effect on The Gas Company's sales and cash flows.

The operations of The Gas Company are subject to a variety of competitive pressures and the actions of competitors, particularly those involved in other energy sources, could have a materially adverse effect on operating results.

Other fuel sources such as electricity, diesel, solar energy, geo-thermal, wind, other gas providers and alternative energy sources may be substituted for certain gas end-use applications, particularly if the price of gas increases relative to other fuel sources, whether due to higher costs or otherwise. Customers could, for a number of reasons, including increased gas prices, lower costs of alternative energy or convenience, meet their energy needs through alternative sources. This could have an adverse effect on the business revenue and cash flows.

The Gas Company's utility business is subject to regulation by the Hawaii Public Utilities Commission, or HPUC, and actions by the HPUC or changes to the regulatory environment may constrain the operation or profitability of the

business.

If the business fails to comply with certain HPUC regulatory conditions, the profitability of The Gas Company could be adversely impacted. The business agreed to 14 regulatory conditions with the HPUC that address a variety of matters including: a requirement that The Gas Company and HGC's ratio of consolidated debt to total capital does not exceed 65%; and a requirement to maintain \$20.0 million in readily-available cash resources at The Gas Company, HGC or MIC. The HPUC regulates all franchised or certificated public service companies operating in Hawaii; prescribes rates, tariffs, charges and fees; determines the allowable rate of earnings in establishing rates; issues guidelines concerning the general management of franchised or certificated utility businesses; and acts on requests for the acquisition, sale, disposition or other exchange of utility properties, including mergers and consolidations. Any adverse decision by the HPUC concerning the level or method of determining utility rates, the items and amounts that may be included in the rate base, the

TABLE OF CONTENTS

returns on equity or rate base found to be reasonable, the potential consequences of exceeding or not meeting such returns, or any prolonged delay in rendering a decision in a rate or other proceeding, could have an adverse effect on the business.

The Gas Company's operations on the islands of Hawaii, Maui and Kauai rely on LPG that is transported to those islands by Jones Act qualified barges from Oahu and from non-Jones Act vessels from foreign ports. Disruptions to service by those vessels could adversely affect the financial performance of the business.

The Jones Act requires that all goods transported by water between U.S. ports be carried in U.S.-flag ships and that they meet certain other requirements. The business has time charter agreements allowing the use of two barges that currently have a cargo capacity of approximately 470,000 gallons and 550,000 gallons of LPG, respectively. The barges used by the business are the only two Jones Act qualified barges available in the Hawaiian Islands capable of carrying large volumes of LPG. They were both refurbished in their last dry dock during 2010 and 2011, which extended their useful economic lives at least through to the next scheduled dry dock in 2016. If the barges are unable to transport LPG from Oahu and the business is not able to secure foreign-source LPG or obtain an exemption to the Jones Act that would permit importation of a sufficient quantity of LPG from the mainland U.S., the profitability of the business could be adversely impacted. If the barges require refurbishment or repair at a greater frequency than forecast, cash outflows for capital costs could adversely impact The Gas Company's results and cash flows.

The Gas Company is subject to risks associated with volatility in the Hawaii economy.

Tourism and government activities (including the military) are two of the largest components of Hawaii's economy. Hawaii's economy is heavily influenced by economic conditions in the U.S. and Asia and their impact on tourism, as well as by government spending. A large portion of The Gas Company's sales are generated by businesses that rely on tourism. If the local economy deteriorates, the volume of gas sold could be negatively affected by business closures and/or lower usage and adversely impact the business' financial performance. Additionally, a lack of growth in the Hawaiian economy could reduce the level of new residential construction, and adversely impact growth in volume from new residential customers. A reduction in government activity, particularly military activity, or a shift by either away from the use of gas products, could also have a negative impact on The Gas Company's results.

Because of its geographic location, Hawaii, and in turn The Gas Company, is subject to earthquakes and certain weather risks that could materially disrupt operations.

Hawaii is subject to earthquakes and certain weather risks, such as hurricanes, floods, heavy and sustained rains and tidal waves. Because the business' SNG plant, SNG transmission line and several storage facilities are close to the ocean, weather-related disruptions to operations are possible. In addition, earthquakes may cause disruptions. These events could damage the business' assets or could result in wide-spread damage to its customers, thereby reducing the volume of gas sold and, to the extent such damages are not covered by insurance, the business' revenue and cash flows.

Because of its geographic location and the unique economy of Hawaii, The Gas Company is subject to challenges in hiring and maintaining staff with specialized skill sets.

The changing nature of the Hawaiian energy complex, combined with the impact of the global economic recession has had an impact on the Company's staffing requirements. Volatility in feedstock prices, together with the impact of the State of Hawaii's goals to reduce dependency on imported petroleum require staff with specialized knowledge of the energy sector. Because the resident labor pool in Hawaii is both small, and oriented mainly to Hawaii's basic industries, it is difficult to find individuals with the ideal skill sets. Moreover, relocation to Hawaii is costly and often requires employees to make cultural and family adjustments not normally required for a change of employment. The inability to source and retain staff with appropriate skill sets could adversely impact the performance of the business.

The renewable natural gas initiative exposes The Gas Company to new supply, counterparty, facility and technology risks.

The Gas Company expects it will convert up to 1.0 million gallons per year of animal fat and non-food grade oils to renewable natural gas. The technology used to produce renewable gas from non-petroleum based

TABLE OF CONTENTS

feedstock is not widely used and must be customized by The Gas Company for its particular application. The Gas Company may not be able to obtain sufficient quantities of feedstock from locally produced sources to satisfy its needs. Commencing April 1, 2012, The Gas Company must report the percentage of renewable and sustainable components in its feedstock to the HPUC. In the event The Gas Company fails to produce a reasonable proportion of gas from renewable and sustainable sources, its reputation could be adversely impacted.

Risks Related to District Energy

Pursuant to the terms of a use agreement with the City of Chicago, the City of Chicago has rights that, if exercised, could have a significant negative impact on District Energy.

In order to operate the district cooling system in downtown Chicago, the business has obtained the right to use certain public ways of the City of Chicago under a use agreement, which we refer to as the Use Agreement. Under the terms of the Use Agreement, the City of Chicago retains the right to use the public ways for a public purpose and has the right in the interest of public safety or convenience to cause the business to remove, modify, replace or relocate its facilities at the expense of the business. If the City of Chicago exercises these rights, District Energy could incur significant costs and its ability to provide service to its customers could be disrupted, which would have an adverse effect on the business' financial condition and results of operations. In addition, the Use Agreement is non-exclusive, and the City of Chicago is entitled to enter into use agreements with the business' potential competitors.

The Use Agreement expires on December 31, 2040 and may be terminated by the City of Chicago for any uncured material breach of its terms and conditions. The City of Chicago may also require District Energy to pay liquidated damages of \$6,000 a day if the business fails to remove, modify, replace or relocate its facilities when required to do so, if it installs any facilities that are not properly authorized under the Use Agreement or if the district cooling system does not conform to the City of Chicago's standards. Each of these non-compliance penalties could result in substantial financial loss or effectively shut down the district cooling system in downtown Chicago.

Any proposed renewal, extension or modification of the Use Agreement requires approval by the City Council of Chicago. Extensions and modifications subject to the City of Chicago's approval include those to enable the expansion of chilling capacity and the connection of new customers to the district cooling system. The City of Chicago's approval is contingent upon the timely filing of an Economic Disclosure Statement, or EDS (disclosure required by Illinois state law and Chicago city ordinances to certify compliance with various laws and ordinances), by us and certain of the beneficial owners of our stock. If any of these investors fails to file a completed EDS form within 30 days of the City of Chicago's request or files an incomplete or inaccurate EDS, the City of Chicago has the right to refuse to provide the necessary approval for any extension or modification of the Use Agreement or to rescind the Use Agreement altogether. If the City of Chicago declines to approve extensions or modifications to the Use Agreement, District Energy may not be able to increase the capacity of its district cooling system and pursue its growth strategy. Furthermore, if the City of Chicago rescinds or voids the Use Agreement, the district cooling system in downtown Chicago would be effectively shut down and the business' financial condition and results of operations would be materially and adversely affected as a result.

A certain number of our investors may be required to comply with certain disclosure requirements of the City of Chicago and non-compliance may result in the City of Chicago's rescission or voidance of the Use Agreement

and any other arrangements District Energy may have with the City of Chicago at the time of the non-compliance.

In order to secure any amendment to the Use Agreement with the City of Chicago to pursue expansion plans or otherwise, or to enter into other contracts with the City of Chicago, the City of Chicago may require any person who owns or acquires 15% or more of our LLC interests to make a number of representations to the City of Chicago by filing a completed EDS. Our LLC agreement requires that in the event that we need to obtain approval from the City of Chicago in the future for any specific matter, including to expand the district cooling system or to amend the Use Agreement, we and each of our then 15% investors would need to submit an EDS to the City of Chicago within 30 days of the City of Chicago's request. In addition, our LLC

TABLE OF CONTENTS

agreement requires each 15% investor to provide any supplemental information needed to update any EDS filed with the City of Chicago as required by the City of Chicago and as requested by us from time to time.

Any EDS filed by an investor may become publicly available. By completing and signing an EDS, an investor will have waived and released any possible rights or claims which it may have against the City of Chicago in connection with the public release of information contained in the EDS and also will have authorized the City of Chicago to verify the accuracy of information submitted in the EDS. The requirements and consequences of filing an EDS with the City of Chicago will make compliance with the EDS requirements difficult for our investors.

If any investor fails to comply with the EDS requirements on time or the City of Chicago determines that any information provided in any EDS is false, incomplete or inaccurate, the City of Chicago may rescind or void the Use Agreement or any other arrangements Thermal Chicago has with the City of Chicago, and pursue any other remedies available to them. If the City of Chicago rescinds or voids the Use Agreement, the business district cooling system in downtown Chicago would be effectively shut down and the business financial condition and results of operations would be adversely affected as a result.

If certain events within or beyond the control of District Energy occur, District Energy may be unable to perform its contractual obligations to provide chilling and heating services to its customers. If, as a result, its customers elect to terminate their contracts, District Energy may suffer loss of revenue. In addition, District Energy may be required to make payments to such customers for damages.

In the event of a shutdown of one or more of District Energy's plants due to operational breakdown, strikes, the inability to retain or replace key technical personnel or events outside its control, such as an electricity blackout, or unprecedented weather conditions in Chicago, District Energy may be unable to continue to provide chilling and heating services to all of its customers. As a result, District Energy may be in breach of the terms of some or all of its customer contracts. In the event that such customers elect to terminate their contracts with District Energy as a consequence of their loss of service, its revenue may be materially adversely affected. In addition, under a number of contracts, District Energy may be required to pay damages to a customer in the event that a cessation of service results in loss to that customer.

Northwind Aladdin currently derives a majority of its operating cash flows from a contract with a single customer, the Planet Hollywood Resort and Casino, which emerged from bankruptcy several years ago. If this customer were to enter into bankruptcy again, Northwind's Aladdin's contract may be amended or terminated and the business may receive no compensation, which could result in the loss of our investment in Northwind Aladdin.

Northwind Aladdin derives a majority of its cash flows from a contract with the Planet Hollywood resort and casino (formerly known as the Aladdin resort and casino) in Las Vegas to supply cold and hot water and back-up electricity.

The Aladdin resort and casino emerged from bankruptcy immediately prior to District Energy's acquisition of Northwind Aladdin in September 2004, and during the course of those proceedings, the contract with Northwind Aladdin was amended to reduce the payment obligations of the Aladdin resort and casino. If the Planet Hollywood

resort and casino were to enter into bankruptcy again and a cheaper source of the services that Northwind Aladdin provides can be found, the current contract may be terminated or amended. This could result in a total loss or significant reduction in District Energy's income from Northwind Aladdin, for which the business may receive no compensation.

Weather conditions and conservation efforts may negatively impact District Energy's results of operations.

District Energy's earnings are generated by the sale of cooling and heating services. Weather conditions that are significantly cooler than normal in District Energy's service areas may negatively affect demand for the services it provides. Demand for its services may also be reduced by the conservation efforts of its customers and by any conservation mandated by regulations to curb the effects of climate change and global warming. A reduction in demand for District Energy's services could adversely affect District Energy's results of operations.

TABLE OF CONTENTS

Risks Related to Atlantic Aviation

Deterioration of business jet traffic at airports where Atlantic Aviation operates would decrease Atlantic Aviation's ability to refinance its debt.

As of December 31, 2011, Atlantic Aviation had total long-term debt outstanding of \$780.6 million, consisting of \$727.2 million in term loan debt; \$50.0 million in capital expenditure facilities; and \$3.4 million in stand-alone debt facility. The terms of these debt arrangements require compliance with certain operating and financial covenants. The ability of Atlantic Aviation to meet their respective debt service obligations and to refinance or repay their outstanding indebtedness will depend primarily upon cash produced by this business.

At December 31, 2011, Atlantic Aviation's current debt-to-EBITDA ratio, as defined under its loan agreement, was 5.98x. This compares with a maximum permitted debt-to-EBITDA ratio of 7.50x. The maximum permitted debt-to-EBITDA ratio drops to 6.75x on March 31, 2012. A decline in business jet take-offs and landings at airports where Atlantic Aviation operates FBOs could result in a reduction of Atlantic Aviation's EBITDA as defined under its loan agreement, absent an ability for the business to reduce costs or take other mitigating actions. Consequently, Atlantic Aviation's debt-to-EBITDA ratio may increase, decreasing its ability to refinance its debt when it falls due. If Atlantic Aviation is unable to repay or refinance this debt, it may be rendered insolvent. A default on the debt obligations leading to bankruptcy or insolvency would cause Atlantic Aviation to default on its FBO leases and would allow the local airport authorities to terminate the leases.

Deterioration in the economy in general or in the aviation industry that results in less air traffic at airports that Atlantic Aviation services would have a material adverse impact on our business.

A large part of the business's revenue is derived from fuel sales and other services provided to general aviation customers and, to a lesser extent, commercial air travelers. An economic downturn could reduce the level of air travel, adversely affecting Atlantic Aviation. General aviation travel is primarily a function of economic activity. Consequently, during periods of economic downturn, FBO customers are more likely to curtail air travel.

Air travel and air traffic volume can also be affected by events that have nationwide and industry-wide implications. Events such as wars, outbreaks of disease such as SARS, and terrorist activities in the United States or overseas may reduce air travel. Local circumstances include downturns in the general economic conditions of the area where an airport is located or other situations in which the business's major FBO customers relocates their home base or preferred fueling stop to alternative locations.

In addition, changes to regulations governing the tax treatment relating to general aviation travel, either for businesses or individuals, may cause a reduction in general aviation travel. Increased environmental regulation restricting or increasing the cost of aviation activities could also cause the business's revenue to decline.

Atlantic Aviation is subject to a variety of competitive pressures, and the actions of competitors may have a material adverse effect on its revenue.

FBO operators at a particular airport compete based on a number of factors, including location of the facility relative to runways and street access, service, value added features, reliability and price. Many of Atlantic Aviation's FBOs

compete with one or more FBOs at their respective airports and with FBOs at nearby airports. Furthermore, leases related to FBO operations may be subject to competitive bidding at the end of their term. Some present and potential competitors may have or may obtain greater financial and marketing resources than Atlantic Aviation, which may negatively impact Atlantic's Aviation ability to compete at each airport or for lease renewal. Some competitors may aggressively or irrationally price their bids for airport concessions, which may limit the business's ability to grow or renew its portfolio.

Atlantic Aviation's FBOs do not have the right to be the sole provider of FBO services at any airport. The authority responsible for each airport has the ability to grant other leases to other operators and new competitors could be established at those airports. The addition of new competitors may reduce or impair Atlantic Aviation's ability to grow or improve its financial performance.

TABLE OF CONTENTS

Increased pricing competition at Atlantic Aviation may have an adverse effect on market share and fuel margins, causing a decline in the profitability of that business.

Atlantic Aviation's competitors may pursue more aggressive pricing strategies. These competitors may operate FBOs at a number of airports where Atlantic Aviation operates or at airports near where it operates. Excessive price discounting may cause fuel volume and market share decline, potential decline in hangar rentals and de-icing and may result in increased margin pressure, adversely affecting the profitability of this business.

The termination for cause or convenience of one or more of the FBO leases would damage Atlantic Aviation's operations significantly.

Atlantic Aviation's revenue is derived from long-term leases at 65 airports in the U.S. If Atlantic Aviation defaults on the terms and conditions of its leases, including upon insolvency, the relevant authority may terminate the lease without compensation. Additionally, leases at six airports, representing approximately 11.8% of Atlantic Aviation's gross profit in 2011, allow the relevant authority to terminate the lease at their convenience. In each case, Atlantic Aviation would then lose the income from that location and potentially the expected returns from prior capital expenditures. Atlantic Aviation would also likely be in default under the loan agreements and be obliged to repay its lenders a portion or the entire outstanding loan amount. Any such events would have a material adverse effect on Atlantic Aviation's results of operations.

The Transportation Security Administration, or TSA, is considering new regulations which could impair the relative convenience of general aviation and adversely affect demand for Atlantic Aviation's services.

The TSA has proposed new regulations known as the Large Aircraft Security Program (LASP), which would require all U.S. operators of general aviation aircraft exceeding 12,500 pounds maximum take-off weight to implement security programs that are subject to TSA audit. In addition, the proposed regulations would require airports servicing these aircraft to implement security programs involving additional security measures, including passenger and baggage screening. The business believes these new regulations, if implemented, will affect many of Atlantic Aviation's customers and all of the airports at which it operates. These rules, if adopted, could decrease the convenience and attractiveness of general aviation travel relative to commercial air travel and, therefore, may adversely impact demand for Atlantic Aviation's services.

The lack of accurate and reliable industry data can result in unfavorable strategic planning, mergers and acquisitions and macro pricing decisions.

The business uses industry and airport-specific general aviation traffic data published by the FAA to identify trends in the FBO industry. The business also uses this traffic data as a key input to decision-making in strategic planning, mergers and acquisitions and macro pricing matters. However, as noted by the FAA on their website, the data has several limitations and challenges. As a result, the use of the FAA traffic data may result in conclusions in strategic planning, mergers and acquisitions or macro pricing decisions that are ultimately unfavorable.

Risks Related to Ownership of Our Stock

MIC s inherently complex structure and financial reporting may make it difficult for some investors to value our LLC interests.

We are a limited liability company structured as a non-operating holding company of three operating businesses and one substantial, unconsolidated investment. We have elected to be treated as a corporation for tax purposes. Our consolidated federal income tax group is comprised of two of our operating businesses. Our investment and one of our operating businesses file stand-alone federal income tax returns. To the extent we receive distributions either from our investment or operating business that is not a part of our tax group, and these distributions are characterized as a dividend for tax purposes (as opposed to a return of capital), such distributions would be eligible for the federal dividends received deductions (80% exclusion in calculating taxes). These and other factors may make it difficult for some potential investors, particularly those without a moderate level of financial acumen, to accurately assess the value of our LLC interests and may adversely impact the market for our LLC interests.

TABLE OF CONTENTS

Our Manager's decision to reinvest its quarterly base management fees in LLC interests or retain the cash will affect holders of LLC interests differently.

Our Manager, in its sole discretion, may elect to retain base management fees paid in cash or to reinvest such payments in additional LLC interests. In the event the Manager chooses not to reinvest the fees to which it is entitled in additional LLC interests, the amount paid will reduce the cash that may otherwise be distributed as a dividend to all shareholders or used in the Company's operations. In the event the Manager chooses to reinvest the fees to which it is entitled in additional LLC interests, effectively returning the cash to us, such reinvestment will dilute existing shareholders by the increase in the percentage of shares owned by the Manager. Either option may adversely impact the market for our LLC interests.

Our reported EBITDA excluding non-cash items and free cash flow will be lower if the Manager elects to retain base management fees in cash as compared with its election to reinvest such base management fees in additional LLC interests. The amount by which these items are lower could be material. See Management's Discussion and Analysis of Financial Condition and Results of Operations Results of Operations in Part II, Item 7 for further information on how we calculate these items and what management uses these items for.

Our total assets include a substantial amount of goodwill and intangible assets. The write-off of a significant portion of intangible assets would negatively affect our reported earnings.

Our total assets reflect a substantial amount of goodwill and other intangible assets. At December 31, 2011, goodwill and other intangible assets, net, represented approximately 54.3% of total assets from continuing operations. Goodwill and other intangible assets were primarily recognized as a result of the acquisitions of our businesses and investments.

Other intangible assets consist primarily of airport operating rights, customer relationships and trade names. On at least an annual basis, we assess whether there has been an impairment in the value of goodwill and assess for impairment of other intangible assets with indefinite lives when there are triggering events or circumstances. If the carrying value of the tested asset exceeds its estimated fair value, impairment is deemed to have occurred. In this event, the amount is written down to fair value. Under current accounting rules, this would result in a charge to reported earnings. We have recognized significant impairments in the past, and any future determination requiring the write-off of a significant portion of goodwill or other intangible assets would negatively affect our reported earnings and total capitalization, and could be material.

Our total assets include a substantial amount of goodwill, intangible assets and fixed assets. The depreciation and amortization of these assets may negatively impact our reported earnings.

The high level of intangible and physical assets written up to fair value upon acquisition of our businesses generates substantial amounts of depreciation and amortization. These non-cash items serve to lower net income as reported in our statement of operations as well as our taxable income. The generation of net losses or relatively small net income may contribute to a net operating loss (NOL) carryforward that can be used to offset currently taxable income in future periods. However, the continued reporting of little or negative net income may adversely affect the attractiveness of the Company among some potential investors and may reduce the market for our LLC interests.

Our Manager's affiliation with Macquarie Group Limited and the Macquarie Group may result in conflicts of interest or a decline in our stock price.

Our Manager is an affiliate of Macquarie Group Limited and a member of the Macquarie Group. From time to time, we have entered into, and in the future we may enter into, transactions and relationships involving Macquarie Group Limited, its affiliates, or other members of the Macquarie Group. Such transactions have included and may include, among other things, the entry into debt facilities and derivative instruments with members of the Macquarie Group serving as lender or counterparty, and financial advisory services provided to us by the Macquarie Group.

Although our audit committee, all of the members of which are independent directors, is required to approve of any related party transactions, including those involving members of the Macquarie Group or its affiliates, the relationship of our Manager to the Macquarie Group may result in conflicts of interest.

TABLE OF CONTENTS

In addition, as a result of our Manager's being a member of the Macquarie Group, negative market perceptions of Macquarie Group Limited generally or of Macquarie's infrastructure management model, or Macquarie Group statements or actions with respect to other managed vehicles, may affect market perceptions of our Company and cause a decline in the price of our LLC interests unrelated to our financial performance and prospects.

Our Manager can resign with 90 days notice and we may not be able to find a suitable replacement within that time, resulting in a disruption in our operations, which could adversely affect our financial results and negatively impact the market price of our LLC interests.

Our Manager has the right, under the management services agreement, to resign at any time with 90 days notice, whether we have found a replacement or not. The resignation of our Manager will trigger mandatory repayment obligations under debt facilities at all of our operating companies other than IMTT. If our Manager resigns, we may not be able to find a new external manager or hire internal management with similar expertise within 90 days to provide the same or equivalent services on acceptable terms, or at all. If we are unable to do so quickly, our operations are likely to experience a disruption, our financial results could be adversely affected, perhaps materially, and the market price of our LLC interests may decline substantially. In addition, the coordination of our internal management, acquisition activities and supervision of our businesses and investments are likely to suffer if we were unable to identify and reach an agreement with a single institution or group of executives having the expertise possessed by our Manager and its affiliates.

Furthermore, if our Manager resigns, the Company and its subsidiaries will be required to cease use of the Macquarie brand entirely, and change their names to remove any reference to Macquarie. This may cause the value of the Company and the market price of our LLC interests to decline.

In the event of the underperformance of our Manager, we may be unable to remove our Manager, which could limit our ability to improve our performance and could adversely affect the market price of our LLC interests.

Under the terms of the management services agreement, our Manager must significantly underperform in order for the management services agreement to be terminated. The Company's Board of Directors cannot remove our Manager unless:

our LLC interests underperform a weighted average of two benchmark indices by more than 30% in relative terms and more than 2.5% in absolute terms in 16 out of 20 consecutive quarters prior to and including the most recent full quarter, and the holders of a minimum of 66.67% of the outstanding LLC interests (excluding any LLC interests owned by our Manager or any affiliate of the Manager) vote to remove our Manager;

our Manager materially breaches the terms of the management services agreement and such breach continues unremedied for 60 days after notice;

our Manager acts with gross negligence, willful misconduct, bad faith or reckless disregard of its duties in carrying out its obligations under the management services agreement, or engages in fraudulent or dishonest acts; or

our Manager experiences certain bankruptcy events.

Because our Manager's performance is measured by the market performance of our LLC interests relative to a benchmark index, even if the absolute market performance of our LLC interests does not meet expectations, the Company's Board of Directors cannot remove our Manager unless the market performance of our LLC interests also significantly underperforms the benchmark index. If we were unable to remove our Manager in circumstances where

Our Manager can resign with 90 days notice and we may not be able to find a suitable replacement within that time

the absolute market performance of our LLC interests does not meet expectations, the market price of our LLC interests could be negatively affected.

TABLE OF CONTENTS

Certain provisions of the management services agreement and the operating agreement of the Company makes it difficult for third parties to acquire control of the Company and could deprive investors of the opportunity to obtain a takeover premium for their LLC interests.

In addition to the limited circumstances in which our Manager can be terminated under the terms of the management services agreement, the management services agreement provides that in circumstances where the stock ceases to be listed on a recognized U.S. exchange as a result of the acquisition of stock by third parties in an amount that results in the stock ceasing to meet the distribution and trading criteria on such exchange or market, the Manager has the option to either propose an alternate fee structure and remain our Manager or resign, terminate the management services agreement upon 30 days' written notice and be paid a substantial termination fee. The termination fee payable on the Manager's exercise of its right to resign as our Manager subsequent to a delisting of our LLC interests could delay or prevent a change in control that may favor our shareholders. Furthermore, in the event of such a delisting, any proceeds from the sale, lease or exchange of a significant amount of assets must be reinvested in new assets of our Company, subject to debt repayment obligations. We would also be prohibited from incurring any new indebtedness or engaging in any transactions with shareholders of the Company or its affiliates without the prior written approval of the Manager. These provisions could deprive shareholders of opportunities to realize a premium on the LLC interests owned by them.

The operating agreement of the Company, which we refer to as the LLC agreement, contains a number of provisions that could have the effect of making it more difficult for a third-party to acquire, or discouraging a third-party from acquiring, control of the Company. These provisions include:

restrictions on the Company's ability to enter into certain transactions with our major shareholders, with the exception of our Manager, modeled on the limitation contained in Section 203 of the Delaware General Corporation Law; allowing only the Company's Board of Directors to fill vacancies, including newly created directorships and requiring that directors may be removed only for cause and by a shareholder vote of 66 2/3%; requiring that only the Company's chairman or Board of Directors may call a special meeting of our shareholders; prohibiting shareholders from taking any action by written consent; establishing advance notice requirements for nominations of candidates for election to the Company's Board of Directors or for proposing matters that can be acted upon by our shareholders at a shareholders' meeting; having a substantial number of additional LLC interests authorized but unissued; providing the Company's Board of Directors with broad authority to amend the LLC agreement; and requiring that any person who is the beneficial owner of 15% or more of our LLC interests make a number of representations to the City of Chicago in its standard form of EDS, the current form of which is included in our LLC agreement, which is incorporated by reference as an exhibit to this report.

The market price and marketability of our LLC interests may from time to time be significantly affected by numerous factors beyond our control, which may adversely affect our ability to raise capital through future equity financings.

The market price of our LLC interests may fluctuate significantly. Many factors that are beyond our control may significantly affect the market price and marketability of our LLC interests and may adversely affect our ability to raise capital through equity financings. These factors include the following:

price and volume fluctuations in the stock markets generally;

The market price and marketability of our LLC interests may from time to time be significantly affected by numerous

TABLE OF CONTENTS

significant volatility in the market price and trading volume of securities of Macquarie Group Limited and/or vehicles managed by the Macquarie Group or branded under the Macquarie name or logo;
significant volatility in the market price and trading volume of securities of registered investment companies, business development companies or companies in our sectors, which may not be related to the operating performance of these companies;

changes in our earnings or variations in operating results;
any shortfall in EBITDA excluding non-cash items or free cash flow from levels expected by securities analysts;
changes in regulatory policies or tax law;
operating performance of companies comparable to us; and
loss of funding sources.

Risks Related to Taxation

We have significant income tax Net Operating Losses, or NOLs, which may not be realized before they expire.

We have \$135.2 million in federal NOL carryforwards. While we have concluded that all but \$7.8 million of the NOLs will more likely than not be realized, there can be no assurance that we will utilize the NOLs generated to date or any NOLs we might generate in the future. In addition, we have incurred state NOLs and have provided a valuation allowance against a portion of those state NOLs. As with our federal NOLs, there is also no assurance that we will utilize those state losses or future losses. Further, the State of Illinois has suspended the use of NOL carryforwards through 2014, similar to the State of California's suspension of an NOL deduction through 2011 for large corporations. There can be no assurance that other states will not suspend the use of NOL carryforwards or that California and Illinois will not extend the suspension of the use of NOL carryforwards.

The current treatment of qualified dividend income and long-term capital gains under current U.S. federal income tax law may be adversely affected, changed or repealed in the future.

Under current law, qualified dividend income and long-term capital gains are taxed to non-corporate investors at a maximum U.S. federal income tax rate of 15%. This tax treatment may be adversely affected, changed or repealed by future changes in tax laws at any time and is currently scheduled to expire for tax years beginning after December 31, 2012. This may affect market perceptions of our Company and the market price of our LLC interests could be negatively affected.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

In general, the assets of our businesses, including real property, are pledged to secure the financing arrangements of each business on a stand-alone basis. See Management's Discussion and Analysis of Financial Condition and Results of Operations—Liquidity and Capital Resources in Part II, Item 7 for a further discussion of these financing arrangements.

Energy-Related Businesses

IMTT

IMTT operates ten wholly-owned bulk liquid storage facilities in the United States and has part ownership in two companies that each own bulk liquid storage facilities in Canada. The land on which the facilities are located is either owned or leased by IMTT with leased land comprising a small proportion of the total land in use. IMTT also owns the storage tanks, piping and transportation infrastructure such as truck and

TABLE OF CONTENTS

rail loading equipment located at the facilities and related ship docks, except in Quebec and Geismar, where the docks are leased. The business believes that the aforementioned equipment is generally well maintained and adequate for the present operations. For further details, see Our Businesses and Investments IMTT Locations in Part I, Item 1.

The Gas Company

The Gas Company has facilities and equipment on all major Hawaiian Islands including: land beneath the SNG plant; several LPG holding tanks and cylinders; approximately 1,100 miles of underground piping, of which approximately 900 miles are on Oahu; and a 22-mile transmission pipeline from the SNG plant to Pier 38 in Honolulu.

A summary of property, by island, follows. For more information regarding The Gas Company's operations, see Our Businesses and Investments The Gas Company Fuel Supply, SNG Plant and Distribution System in Part I, Item 1.

Island	Description	Use	Own/Lease
Oahu	SNG Plant	Production of SNG	Lease
	Kamakee Street Buildings and Maintenance yard	Engineering, Maintenance Facility, Warehouse	Own
	LPG Baseyard	Storage facility for tanks and cylinders	Lease
	Topa Fort Street Tower	Executive Offices	Lease
	Various Holding Tanks	Store and supply LPG to utility customers	Lease
Maui	Office, tank storage facilities and baseyard	Island-wide operations	Lease
Kauai	Office	Island-wide operations	Own
Kauai	Tank storage facility and baseyard	Island-wide operations	Lease
Hawaii	Office, tank storage facilities and baseyard	Island-wide operations	Own

District Energy

District Energy owns or leases six plants in Chicago as follows:

Plant Number	Ownership or Lease Information
P-1	The building and equipment are owned by District Energy and the business has a long-term property lease until 2043 with an option to renew for 49 years.
P-2	Property, building and equipment are owned by District Energy.
P-3	District Energy has a property lease that expires in 2033 with a right to renew for ten years. The equipment is owned by District Energy, but the landlord has a purchase option over approximately one-fourth of the equipment.
P-4	District Energy has a property lease that expires in 2016 and the business may renew the lease for another 10 years for the P-4B property unilaterally, and for P-4A, with the consent of the landlord. The equipment at P-4A and P-4B is owned by District Energy. The landlord can terminate the service agreement and the P-4A property lease upon transfer of the property, on which P-4A and P-4B are located, to a third-party.
P-5	

Stand-Alone

District Energy has an exclusive perpetual easement for the use of the basement where the equipment is located. The equipment is owned by District Energy. District Energy has a contractual right to use the property pursuant to a service agreement and will own the equipment until the earliest of 2025 when the equipment reverts to the customer or if the customer exercises an early purchase option.

District Energy also owns approximately 14 miles of underground piping through which it distributes chilled water from its facilities to the customers in downtown Chicago.

TABLE OF CONTENTS

The equipment at District Energy's Las Vegas facility is housed in its own building on a parcel of leased property within the perimeter of the Planet Hollywood resort. The property lease expires in 2020 and is co-terminous with the supply contract with the Planet Hollywood resort. The building and equipment are owned by District Energy and upon expiration of the lease the business is required to either abandon the building and equipment or remove them at the landlord's expense. For further details, see Our Business and Investments District Energy Business Overview in Part I, Item 1.

Aviation-Related Business

Atlantic Aviation

Atlantic Aviation does not own any real property. Its operations are carried out under various long-term leases. The business leases office space for its head office in Plano, Texas. For more information regarding Atlantic Aviation's FBO locations, see Our Businesses and Investments Atlantic Aviation Business Locations in Part I, Item 1. The current lease in Plano, Texas expires in 2012. Atlantic Aviation has negotiated a new 7 year lease for a larger premise within 2 miles of its current location. We believe that these facilities are adequate to meet current and foreseeable future needs.

Atlantic Aviation owns or leases a number of vehicles, including fuel trucks and other equipment needed to provide service to customers. Routine maintenance is performed on this equipment and a portion is replaced in accordance with a pre-determined schedule. Atlantic Aviation believes that the equipment is generally well maintained and adequate for present operations.

ITEM 3. LEGAL PROCEEDINGS

Arbitration Proceeding Between MIC and Co-investor in IMTT

MIC has been unable to resolve the dispute with the co-owner of IMTT regarding distributions, despite efforts to do so in accordance with the Shareholders' Agreement. Accordingly, on April 18, 2011, MIC initiated formal arbitration proceedings with the Voting Trust of IMTT Holdings Inc. (Voting Trust) and IMTT Holdings Inc. under the auspices of the American Arbitration Association, as provided under the Shareholders' Agreement. MIC believes the Voting Trust's defenses and claims in the arbitration are without merit. We currently expect a decision by the arbitrators in the first quarter of 2012, or soon after.

IMTT is named as a respondent because under the Shareholders' Agreement it is responsible for any monetary damages resulting from a breach of the Shareholders' Agreement by the Voting Trust. MIC is seeking payment of distributions due for the quarter ended December 31, 2010 and subsequent periods, or appropriate damages as a result of the nonpayment of distributions, an order covering future periods and other non-monetary relief that is designed to minimize the risk of future disputes. MIC is concerned that, until the issues in the arbitration have been finally resolved, IMTT's senior management (which includes members and beneficiaries of the Voting Trust) will continue to make operational decisions that are influenced by the context of the arbitration. We expect that this will be resolved through the arbitration.

See Management's Discussion and Analysis of Financial Condition and Results of Operations Dividends .

IMTT Bayonne Clean Air Act

Section 185 of the Clean Air Act (CAA) requires States (or in the absence of state action, the EPA) in severe and extreme non-attainment areas to adopt a penalty for major stationary sources of volatile organic compounds and nitrogen oxides if the area fails to attain the one-hour ozone National Ambient Air Quality Standard (NAAQS) set by the EPA. IMTT's Bayonne facility is a major stationary source of volatile organic compounds and nitrogen oxides in the New Jersey-Connecticut severe non-attainment area. Although we believe IMTT's Bayonne facility is in substantial compliance with CAA obligations, the subject area failed to meet the required NAAQS by the attainment date in 2007 and as a consequence IMTT-Bayonne believes it is likely to be assessed a penalty linked to its 2008 to 2011 emissions that were in excess of baseline levels. IMTT expects that the penalty related to these matters will be less than \$500,000 in the aggregate and that it will not be payable until 2012 or later. IMTT continues to work to reduce, to the extent feasible, its emissions in order to avoid or reduce potential future penalties.

TABLE OF CONTENTS

Except as noted above, there are no legal proceedings pending that we believe will have a material adverse effect on us other than ordinary course litigation incidental to our businesses. We are involved in ordinary course legal, regulatory, administrative and environmental proceedings. Typically, expenses associated with these proceedings are covered by insurance.

ITEM 4. MINE SAFETY DISCLOSURES

Not Applicable.

41

TABLE OF CONTENTS**PART II****ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY,
RELATED STOCKHOLDER MATTERS AND ISSUER
PURCHASES OF EQUITY SECURITIES****Market Information**

Our LLC interests are traded on the NYSE under the symbol MIC. The following table sets forth, for the fiscal periods indicated, the high and low closing prices per LLC interest on the NYSE:

	High	Low
Fiscal 2010		
First Quarter	\$ 14.13	\$ 12.20
Second Quarter	16.95	12.79
Third Quarter	15.50	12.49
Fourth Quarter	21.17	15.40
Fiscal 2011		
First Quarter	\$ 24.97	\$ 20.56
Second Quarter	28.09	22.24
Third Quarter	27.76	20.21
Fourth Quarter	28.15	21.97
Fiscal 2012		
First Quarter (through February 17, 2012)	\$ 29.56	\$ 27.57

As of February 17, 2012, we had 46,338,225 LLC interests issued and outstanding that we believe were held by 60 holders of record, representing approximately 18,500 beneficial holders.

Dividend Policy

MIC has been structured to provide investors with an opportunity to generate an attractive total return based on the capital appreciation resulting from the improved operating performance of our businesses and investments over time and the payment of a sustainable and growing cash dividend. We reinstated a quarterly cash dividend in May of 2011 with a \$0.20 per share dividend for the first quarter of 2011. A \$0.20 dividend has been paid for each quarter since. The amount of the dividend was determined based on the cash flows available to MIC from its operating companies. It is our intent to pay out the majority of the cash that is freely distributable at the MIC level, subject to maintaining a prudent level of reserves and without creating volatility in the amount of such dividends.

MIC is receiving distributions from Atlantic Aviation, The Gas Company and from its controlling interest in District Energy. A portion of the cash generated by Atlantic Aviation is being used to reduce Atlantic Aviation's indebtedness.

Cash generated by IMTT is the subject of an ongoing arbitration involving MIC and its co-investor in IMTT. We believe that when we have access to a portion of the cash generated by IMTT and when we are no longer applying the cash generated by Atlantic Aviation to prepay its debt, we will distribute the majority of the free cash flow generated by our businesses as a dividend to our shareholders.

TABLE OF CONTENTS

Since January 1, 2010, MIC has made or declared the following dividends:

Declared	Period Covered	\$ per LLC Interest	Record Date	Payable Date
February 21, 2012	Fourth quarter 2011	\$ 0.20	March 5, 2012	March 8, 2012
October 31, 2011	Third quarter 2011	\$ 0.20	November 14, 2011	November 17, 2011
August 1, 2011	Second quarter 2011	\$ 0.20	August 15, 2011	August 18, 2011
May 2, 2011	First quarter 2011	\$ 0.20	May 11, 2011	May 18, 2011

The Company has determined that the dividends paid in 2011 are characterized as a taxable dividend for tax purposes. The Company anticipates that the dividend will be eligible for treatment as qualified dividend income for U.S. federal income tax purposes, subject to the shareholder having met the holding period requirements as defined by the Internal Revenue Code. Holders of MIC LLC interests are encouraged to seek their own tax advice with regard to their investment in MIC.

The declaration and payment of any future dividends will be subject to a decision of the Company's Board of Directors. The Board will take into account such matters as the state of the capital markets and general business conditions, the Company's financial condition, results of operations, capital requirements and any contractual, legal and regulatory restrictions on the payment of dividends by the Company to its shareholders or by its subsidiaries to the Company, and any other factors that it deems relevant. In particular, each of the Company's businesses and investments have substantial debt commitments and restrictive covenants, which must be satisfied before any of them can make distributions to the Company. Any or all of these factors could affect both the timing and amount, if any, of future dividends. See Management's Discussion and Analysis of Financial Condition and Results of Operations Liquidity and Capital Resources in Part II, Item 7.

TABLE OF CONTENTS**ITEM 6. SELECTED FINANCIAL DATA**

The selected financial data includes the results of operations, cash flow and balance sheet data for the years ended, and as of, December 31, 2011, 2010, 2009, 2008 and 2007 for our consolidated group, with the results of businesses acquired during those years being included from the date of each acquisition. The selected financial data for each of the five years in the period ended December 31, 2011 have been derived from the consolidated financial statements of the Company, which financial statements have been audited by KPMG LLP, independent registered public accountants. The information below should be read in conjunction with the consolidated financial statements (and notes thereon) and Management's Discussion and Analysis of Financial Condition and Results of Operations in Part II, Item 7.

TABLE OF CONTENTS

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion of the financial condition and results of operations of Macquarie Infrastructure Company LLC should be read in conjunction with the consolidated financial statements and the notes to those statements included elsewhere herein.

Overview

We own, operate and invest in a diversified group of infrastructure businesses that provide basic services, such as chilled water for building cooling and gas utility services to businesses and individuals primarily in the U.S. The businesses we own and operate are energy-related businesses consisting of: a 50% interest in IMTT, The Gas Company and our controlling interest in District Energy; and an aviation-related business, Atlantic Aviation.

Our infrastructure businesses generally operate in sectors with significant barriers to entry, including high initial development and construction costs, the existence of long-term contracts or the requirement to obtain government approvals and a lack of immediate cost-efficient alternatives to the services provided. Overall they tend to generate sustainable long-term cash flows.

In analyzing the financial condition and results of operations of our businesses, we focus primarily on cash generation generally, and our ability to distribute cash to shareholders in particular. The ability of our businesses to generate cash, broadly, is tied to their ability to effectively manage the volume of product/services sold and the margin earned on those sales. Offsetting these are required payments on debt facilities, taxes and capital expenditures necessary to maintain the productivity of the fixed assets of the businesses, among others.

At IMTT, we focus on the amount of storage under contract and the rates at which that storage is leased to third parties and on making appropriate expenditures in maintaining fixed assets of the business. We currently expect capacity utilization to grow marginally in 2012 and average storage rates to increase, though at a lower percentage than in 2011, subject to the drivers of storage demand remaining intact. In 2012, we will also be focused on resolving our pending dispute with the co-owner of IMTT and on receiving distributions in accordance with the Shareholders Agreement between the owners of the business.

At Atlantic Aviation, our focus is on attracting and maintaining relationships with general aviation aircraft owners and pilots such that they are incentivized to use our FBOs, and with managing the capital structure of the business to maintain access to a portion of the cash flow being generated. We currently expect general aviation activity to increase in 2012 and along with that the gross profit generated by our FBOs, subject to there being continued economic recovery, particularly in the United States. We intend to manage the expenses of the business in a manner generally consistent with keeping leverage levels at or below agreed upon levels and in doing so making distributions of 50% of the free cash flow of the business to our holding company.

At The Gas Company, our focus is on the number of customers served, and in the case of the non-utility portion of the business, the margins achieved on sales of gas products as well. We periodically pursue rate cases that allow for adjustment of the rates in the utility portion of the business. We presently do not intend to pursue any significant rate case in 2012. In the coming year our efforts will be aimed at increasing the percentage of the addressable market receiving gas products from The Gas Company. Subject to the debt markets remaining favorable, we will seek to refinance the debt facilities of the business on economically sensible terms consistent with the amount and tenor of

that debt. We currently expect that the distribution of cash generated by The Gas Company will be used to support our current level of dividends to shareholders.

At District Energy, we focus on attracting and maintaining relationships with building owners and managers such that they choose to or continue to use the cooling services of the business. In 2012, we will seek to contract with a provider of electricity for the 2013 year on terms that are at least as favorable as those currently in effect. We currently anticipate that the cash generated by District Energy, up to the point at which it is used to reduce debt principal, will be used to support our current level of dividends to shareholders.

TABLE OF CONTENTS**Dividends**

Since January 1, 2011, MIC has made or declared the following dividends:

Declared	Period Covered	\$ per LLC Interest	Record Date	Payable Date
February 21, 2012	Fourth quarter 2011	\$ 0.20	March 5, 2012	March 8, 2012
October 31, 2011	Third quarter 2011	\$ 0.20	November 14, 2011	November 17, 2011
August 1, 2011	Second quarter 2011	\$ 0.20	August 15, 2011	August 18, 2011
May 2, 2011	First quarter 2011	\$ 0.20	May 11, 2011	May 18, 2011

The precise timing and amount of any future dividend will be based on the continued stable performance of the Company's businesses and the economic conditions prevailing at the time of any authorization.

In determining the amount of the dividend, we had expected to include certain funds from the cash flow of IMTT. Distribution of funds to us from IMTT is governed by the Shareholders' Agreement between us and the co-investor that owns the remaining 50% stake. The co-investor has refused to vote in favor of distributing certain of these funds, and we believe that such a refusal violates the Shareholders' Agreement. This matter is the subject of arbitration proceedings described under *Arbitration Proceeding Between MIC and Co-investor in IMTT* below.

Contingent upon the favorable outcome related to the IMTT arbitration, and the compliance therewith, and the continued stable performance of our businesses, and subject to prevailing economic conditions, our board of directors expect to increase our dividend to approximately \$0.375 per share per quarter.

Tax Treatment of Dividends

Dividends paid in 2011 will be characterized as a dividend for tax purposes, which shareholders should include in their taxable income. We anticipate that the dividend for U.S. federal income tax purposes will be eligible for treatment as qualified dividend income, subject to the shareholder having met the holding period requirements as defined by the Internal Revenue Code. Holders of MIC LLC interests are encouraged to seek their own tax advice with regards to their investment in MIC.

Arbitration Proceeding Between MIC and Co-investor in IMTT

MIC has been unable to resolve the dispute with the co-owner of IMTT regarding distributions, despite efforts to do so in accordance with the Shareholders' Agreement. Accordingly, on April 18, 2011, MIC initiated formal arbitration proceedings with the Voting Trust of IMTT Holdings Inc. ("Voting Trust") and IMTT Holdings Inc. under the auspices of the American Arbitration Association, as provided under the Shareholders' Agreement. MIC believes the Voting Trust's defenses and claims in the arbitration are without merit. We currently expect a decision by the arbitrators in the first quarter of 2012, or soon after.

IMTT is named as a respondent because under the Shareholders' Agreement it is responsible for any monetary damages resulting from a breach of the Shareholders' Agreement by the Voting Trust. MIC is seeking payment of distributions due for the quarter ended December 31, 2010 and subsequent periods, or appropriate damages as a result of the nonpayment of distributions, an order covering future periods and other non-monetary relief that is designed to minimize the risk of future disputes. MIC is concerned that, until the issues in the arbitration have been finally resolved, IMTT's senior management (which includes members and beneficiaries of the Voting Trust) will continue to

make operational decisions that are influenced by the context of the arbitration. We expect that this will be resolved through the arbitration.

Continuing Operations

Our energy-related businesses were largely resistant to the recent economic downturn, due primarily to the contracted or utility-like nature of their revenues combined with the essential services they provide and the contractual or regulatory ability to pass through most cost increases to customers. We believe these businesses are generally able to generate consistent cash flows throughout the business cycle.

Improvement in general aviation activity levels have resulted in improvement in the operating performance of Atlantic Aviation. Atlantic Aviation is generating a substantial amount of cash, however a

48

TABLE OF CONTENTS

significant portion of that cash is being used to reduce Atlantic Aviation's indebtedness. Those repayments are expected to enhance the terms on which we may be able to refinance this debt when it matures in 2014.

For the quarter ended December 31, 2011, the leverage ratio on Atlantic Aviation's term loan debt decreased below 6.0x. In accordance with terms of the term loan debt, amended February of 2009, the business is required to apply all excess cash flow to prepay additional debt principal whenever the leverage ratio (debt to adjusted EBITDA) is equal to or greater than 6.0x to 1.0 for the trailing twelve months and to use 50% of excess cash flow to prepay debt whenever the leverage ratio is equal to or greater than 5.5x to 1.0 and below 6.0x to 1.0. As such, and until October of 2012, Atlantic Aviation will and anticipates that it will distribute 50% of its excess cash flow to MIC each quarter as long its leverage ratio remains below 6.0x and above 5.5x. Commencing October of 2012, the business is required to apply all excess cash flow to pay debt principal, regardless of leverage ratio.

2011 and 2010 FBO Transactions at Atlantic Aviation

As a result of a strategic review commenced in 2010, Atlantic Aviation concluded that several of its sites did not have sufficient scale or serve a market with sufficiently strong growth prospects to warrant continued operations at these sites. Therefore, Atlantic Aviation has undertaken to exit certain markets and redeploy resources that may be made available in the process into markets which it views as having better growth profiles and recorded \$1.5 million and \$17.9 million in loss on disposal of assets in the consolidated statement of operations during the years ended December 31, 2011 and 2010, respectively.

In November 2011, Atlantic Aviation exchanged one of its FBOs for additional property adjacent to one of its existing FBOs. No cash was exchanged in this transaction, but the business recognized a gain of \$223,000.

During the quarter ended June 30, 2011, Atlantic Aviation concluded the sale of FBOs at Hayward Executive Airport in California and Burlington International Airport in Vermont. As a result, during 2011 and during the fourth quarter of 2010, the business recorded losses on disposal of its assets totaling \$864,000 and \$4.4 million, respectively.

In January 2011, Atlantic Aviation concluded the sale of FBOs at Fresno Yosemite International Airport and Cleveland Cuyahoga County Airport. As a result, during 2011 and during the fourth quarter of 2010, the business recorded losses on disposal of its assets totaling \$249,000 and \$9.8 million, respectively.

In 2010, Atlantic Aviation bid for renewal of an operating lease at Atlanta's Hartsfield airport. This lease had been operating on a month to month basis since being acquired by Atlantic Aviation in August 2007. In November 2010, the lease was tentatively awarded to a party other than Atlantic Aviation. As a result, during 2011 and in December 2010, the business recorded losses on disposal of its assets totaling \$627,000 and \$3.7 million, respectively.

Proceeds from the above mentioned sales in 2011 were redeployed into the acquisition of two FBOs. On August 31, 2011, Atlantic Aviation concluded a purchase of the assets of Portland International and Eugene airports in Oregon for \$23.1 million. This acquisition expanded the business network into the Pacific Northwest. See Note 5, Acquisitions and Dispositions, in our consolidated financial statements in Financial Statements and Supplementary Data in Part II, Item 8 of this Form 10-K for financial information and further discussions.

MIC Inc. Revolving Credit Facility

Until March 31, 2010, the Company had a revolving credit facility provided by various financial institutions, including entities within the Macquarie Group. The facility was repaid in full in December 2009 and no amounts were

outstanding under the revolving credit facility as of December 31, 2009 or at the facility's maturity on March 31, 2010.
This facility was not renewed or replaced and we have no other holding company debt.

TABLE OF CONTENTS

Income Taxes

We file a consolidated federal income tax return that includes the taxable income of The Gas Company and Atlantic Aviation. IMTT and District Energy file separate federal income tax returns. To the extent we receive distributions from IMTT and District Energy, such distributions may be characterized as non-taxable returns of capital and reduce our tax basis in these companies, or as a taxable dividend. We include in our taxable income the portion of any distributions from IMTT and District Energy characterized as a dividend. Those dividends are eligible for the 80% dividends received deduction. We also receive and include in taxable income interest income on intercompany debt from District Energy.

As a result of having federal net operating loss, or NOL, carryforwards, we do not expect to have a consolidated regular federal income tax liability or make regular federal tax payments at least through the 2013 tax year. However, we expect to pay an Alternative Minimum Tax of less than \$250,000 for 2011. The cash state and local taxes paid by our individual businesses are discussed in the sections entitled **Income Taxes** for each of these businesses.

The individual businesses included in our consolidated federal income tax return pay federal income taxes to MIC in an amount approximately equivalent to the federal income taxes each would have paid on a standalone basis if they were not part of the MIC consolidated federal income tax return.

Tax Relief, Unemployment Insurance Reauthorization and Job Creation Act of 2010

In December 2010, the Tax Relief, Unemployment Insurance Reauthorization and Job Creation Act of 2010 (the **Act**) was signed. The Act provides for 100% tax depreciation for certain fixed assets placed in service after September 8, 2010 and before January 1, 2012, and 50% tax depreciation for certain fixed assets placed in service during 2012 for federal income tax purposes. Generally, states do not allow this tax depreciation deduction in determining state taxable income. Importantly, Illinois and Louisiana, two states in which we have significant operations, do permit the use of federal tax depreciation deductions in calculating state taxable income. The Company took and will take into consideration the benefits of these accelerated depreciation provisions of the Act when evaluating capital expenditure plans for 2011 and 2012.

President Obama's proposed budget for 2012 includes an extension of the 100% tax depreciation for certain fixed assets. There is some congressional support for this proposal, although there can be no certainty that any extension will be approved. Such approval, if made, may result in our accelerating a portion of our business maintenance capital expenditures into 2012 in order to capture the associated tax benefit.

Taxpayer Accountability and Budget Stabilization Act

In January 2011, Illinois enacted the Taxpayer Accountability and Budget Stabilization Act. The legislation increases the corporate income tax rate to 7.0% from 4.8% for taxable years beginning on or after January 1, 2011 and prior to January 1, 2015; to 5.25% for taxable years beginning on or after January 1, 2015 and prior to January 1, 2025; and returns the rate to 4.8% for taxable years beginning on or after January 1, 2025. The legislation also suspends the use of state NOL carryforwards until 2012, and limits the annual utilization in 2012 through 2014 to \$100,000 per year. For purposes of determining the taxable years to which a net loss may be carriedforward, no taxable year for which a deduction is disallowed under this provision will be counted. As discussed below in District Energy's Results of Operations, the income tax expense for the year ended December 31, 2011 reflects a change in the deferred tax liability of this business consistent with the change in Illinois law.

Discontinued Operations PCAA Bankruptcy

On June 2, 2010, we concluded the sale in bankruptcy of an airport parking business (Parking Company of America Airports or PCAA), resulting in a pre-tax gain of \$130.3 million, of which \$76.5 million related to the forgiveness of debt and the elimination of \$201.0 million of current debt from liabilities from our consolidated balance sheet. The results of operations from this business and the gain from the bankruptcy sale are separately reported as discontinued operations in the Company's consolidated financial statements. This business is no longer a reportable segment. As a part of the bankruptcy sale process, substantially all of the cash proceeds were used to pay the creditors of this business and were not paid to us. See Note 4, Discontinued Operations, in our consolidated financial statements in Financial Statements and Supplementary Data in Part II, Item 8, of this Form 10-K for financial information and further discussions.

TABLE OF CONTENTS

Operating Segments and Businesses

Energy-Related Businesses

IMTT

IMTT provides bulk liquid storage and handling services in North America through ten terminals located on the East, West and Gulf Coasts, the Great Lakes region of the United States and two partially owned terminals in Quebec and Newfoundland, Canada. IMTT's largest terminals are located in New York Harbor and the lower Mississippi River near New Orleans. IMTT stores and handles petroleum products, various chemicals, renewable fuels, and vegetable and animal oils and, based on storage capacity, operates one of the largest independent bulk liquid storage terminal businesses in the United States.

The key drivers of IMTT's revenue and gross profit include the amount of tank capacity rented to customers and the rental rates. Customers generally rent tanks under contracts with terms of three and five years. Payments are due regardless of actual tank usage. Demand for storage capacity within a particular region (e.g. New York Harbor) serves as the key driver of storage capacity utilization and tank rental rates. This demand reflects both the level of consumption of the bulk liquid products stored by the terminals as well as import and export activity of such products.

We believe major constraints on increases in the supply of new bulk liquid storage capacity in IMTT's key markets have been and will continue to be limited by availability of waterfront land with access to the infrastructure necessary for land based receipt and distribution of stored product (road, rail and pipelines), lengthy environmental permitting processes and high capital costs. We believe a favorable supply/demand in balance for bulk liquid storage currently exists in the markets served by IMTT's major facilities. This condition, when combined with the attributes of IMTT's facilities such as deep water drafts and access to land based infrastructure, have allowed IMTT to increase rental rates while maintaining high storage capacity utilization rates.

IMTT earns revenue at its terminals from a number of sources including storage charges for bulk liquids (per barrel, per month rental), throughput of liquids (handling charges), heating (a pass through of the cost associated with heating liquids to prevent excessive viscosity) and other revenue (blending, packaging, warehousing, etc.). Most customer contracts include provisions for annual price increases based on inflation.

In operating its terminals, IMTT incurs labor costs, fuel costs, repair and maintenance costs, real and personal property taxes and other costs (which include insurance and other operating costs such as utilities and inventory used in packaging and drumming activities).

In 2011, IMTT generated approximately 45% of its total terminal revenue and approximately 44% of its terminal gross profit at its Bayonne facility, which serves the New York Harbor market, and approximately 41% of its total terminal revenue and approximately 45% of its terminal gross profit at its St. Rose, Gretna, Avondale and Geismar facilities, which together service the lower Mississippi River region (with St. Rose being the largest contributor).

IMTT also owns OMI Environmental Solutions, or Oil Mop, an environmental emergency responses, industrial services, waste transportation and disposal business. Oil Mop has a network of facilities along the U.S. Gulf Coast between Houston and New Orleans. These facilities predominantly service the Gulf region, but also respond to spill events and provides services as needed throughout the United States and internationally. In 2010, Oil Mop was involved in the clean up of the BP oil spill in the Gulf of Mexico and generated 33% of IMTT's total revenues. Oil Mop's contribution to IMTT's total revenues returned to a historical level of less than 10% of IMTT's total revenues

during 2011.

Our interest in IMTT Holdings, from the date of closing our acquisition on May 1, 2006, is reflected in our equity in earnings and amortization charges of investee line in our consolidated statements of operations. Cash distributions received by us in excess of our equity in IMTT's earnings and amortization charges are reflected in our consolidated statements of cash flows from investing activities under return on investment in unconsolidated business.

51

TABLE OF CONTENTS

Energy-Related Businesses: The Gas Company

The Gas Company

The Gas Company is Hawaii's only government franchised full-service gas company, manufacturing and distributing gas products and services in Hawaii. The market includes Hawaii's approximately 1.4 million residents and approximately 7.3 million visitors in 2011. The Gas Company manufactures synthetic natural gas, or SNG, for its utility customers on Oahu, and distributes Liquefied Petroleum Gas, or LPG, to utility and non-utility customers throughout the state's six primary islands.

The Gas Company has two primary businesses: utility (or regulated) and non-utility (or unregulated).

The utility business serves approximately 35,300 customers through localized distribution systems located on the islands of Oahu, Hawaii, Maui, Kauai, Molokai and Lanai. Over 90% of these customers are on Oahu. The utility business includes the manufacture, distribution and sale of SNG on the island of Oahu and distribution and sale of LPG. Utility revenue consists principally of sales of SNG and LPG. The operating costs for the utility business include the cost of locally purchased feedstock, the cost of manufacturing SNG from the feedstock, LPG purchase costs and the cost of distributing SNG and LPG to customers. Utility sales comprised approximately 43% of The Gas Company's total contribution margin in 2011.

The non-utility business sells and distributes LPG to approximately 33,400 customers. Trucks deliver LPG to individual tanks located on customer sites on Oahu, Hawaii, Maui, Kauai, Molokai and Lanai. Non-utility revenue is generated primarily from the sale of LPG delivered to customers. The operating costs for the non-utility business include the cost of purchased LPG and the cost of distributing the LPG to customers. Non-utility sales comprised approximately 57% of The Gas Company's total contribution margin in 2011.

SNG and LPG have a wide range of commercial and residential applications, including water heating, drying, cooking, emergency power generation and decorative lighting, such as tiki torches. LPG is also used as a fuel for specialty vehicles such as forklifts. Gas customers include residential customers and a variety of commercial, hospitality, military, public sector and wholesale customers.

Revenue is primarily a function of the volume of SNG and LPG consumed by customers and the price per thermal unit or gallon charged to customers. Because both SNG and LPG are derived from crude oil, revenue levels, without volume changes, will generally track global oil prices. Utility revenue includes fuel adjustment charges through which the changes in feedstock costs are passed through to customers. Evaluating the performance of this business based on contribution margin removes the volatility associated with fluctuations in the price of feedstock.

Prices charged by The Gas Company to its customers for the utility gas business are based on HPUC utility rates that enable the business to recover its costs of providing utility gas service, including operating expenses and taxes, and capital investments through recovery of depreciation and a return on the capital invested. The Gas Company's rate structure generally allows it to maintain a relatively consistent dollar-based margin per thermal unit by passing increases or decreases in fuel costs through to customers via fuel adjustment charges without filing a general rate case.

The rates that are charged to non-utility customers are based on the cost of LPG plus delivery costs, the cost of alternative fuels and competitive factors.

The Gas Company incurs expenses in operating and maintaining its facilities and distribution network, comprising a SNG plant, a 22-mile transmission line, 1,100 miles of distribution and service pipelines, several tank storage facilities and a fleet of vehicles. These costs are generally fixed in nature. Other operating expenses incurred, such as for LPG,

feedstock for the SNG plant and revenue-based taxes, generally fluctuate with the volume of product sold. In addition, the business incurs general and administrative expenses at its executive office that include expenses for senior management, accounting, information technology, human resources, environmental compliance, regulatory compliance, employee benefits, rents, utilities, insurance and other normal business costs.

TABLE OF CONTENTS

Energy-Related Businesses: District Energy

District Energy

District Energy consists of Thermal Chicago and Northwind Aladdin, which are 50.01% and 37.51% indirectly owned by us, respectively. Thermal Chicago sells chilled water under long-term contracts to approximately 100 customers in downtown Chicago and one customer outside of the downtown area. Thermal Chicago receives both capacity and consumption payments. Capacity payments (cooling capacity revenue) are received regardless of the volume of chilled water used by a customer and these payments generally increase in line with inflation.

Consumption payments (cooling consumption revenue) are per unit charges for the volume of chilled water used. Such payments are higher in the second and third quarters of each year when the demand for building cooling is at its highest. Consumption payments also fluctuate moderately from year to year depending on weather conditions. By contract, consumption payments generally increase in line with a number of indices that reflect the cost of electricity, labor and other input costs relevant to the operations of Thermal Chicago. The weighting of the individual indices broadly reflects the composition of Thermal Chicago's direct expenses.

Thermal Chicago's principal direct expense is electricity. Other direct expenses are water, labor, operations and maintenance and depreciation and accretion. Electricity usage, and to a lesser extent water usage, fluctuates in line with the volume of chilled water produced. Other direct expenses are largely fixed regardless of the volumes of chilled water produced.

Thermal Chicago has entered into a contract with a retail energy supplier to provide the majority of the business electricity in 2012 at a fixed price. Electricity for one of the plants is purchased by the landlord/customer and the cost is passed through to the business. Thermal Chicago passes through changes in electricity costs to its customers. The business anticipates it will enter into supply contracts for 2013 and subsequent years and prices will fluctuate based on underlying power costs.

Northwind Aladdin services customers (a hotel/casino complex, a condominium and a shopping mall) in Las Vegas, Nevada. Under its customer contracts, Northwind Aladdin receives monthly fixed payments totaling approximately \$6.4 million per year through March 2016 and monthly fixed payments totaling approximately \$3.0 million per year thereafter through February 2020.

Aviation-Related Business

Atlantic Aviation

The performance of Atlantic Aviation depends upon the level of general aviation activity, and jet fuel consumption, for the largest portion of its gross profit. General aviation activity is in turn a function of economic activity and demographic trends in the regions serviced by the airport at which the business operates and the general level of economic activity in the United States. A number of these airports are located near key business centers such as New York, Chicago, Philadelphia and Houston as well as recreational destinations such as Aspen, Colorado and Sun Valley, Idaho.

Fuel gross profit is a function of the volume (gallons) sold and the average dollar margin per gallon. The average price per gallon is based on our cost of fuel plus, where applicable, fees and taxes paid to airports or other local authorities

(cost of revenue fuel), plus Atlantic Aviation's margin. Dollar-based margins per gallon have been relatively insensitive to the wholesale price of fuel with both increases and decreases in the wholesale price of fuel generally passed through to customers, subject to the level of price competition that exists at the various FBOs. The average dollar-based margin varies based on business considerations and customer mix. Base tenants generally benefit from price discounts based on a higher utilization of Atlantic Aviation's networks. Transient customers typically pay a higher price.

TABLE OF CONTENTS

Aviation-Related Business: Atlantic Aviation (continued)

Atlantic Aviation also earns revenue from activities other than fuel sales (non-fuel revenue). For example, Atlantic Aviation earns revenue from refueling some general aviation customers on a pass-through basis, where it acts as a fueling agent for fuel suppliers. Atlantic Aviation receives a fee for this service, generally calculated on a per gallon basis. In addition, the business earns revenue from aircraft parking and hangar rental fees and by providing general aviation customers with other services, such as de-icing. At some sites Atlantic Aviation also earns revenue from refueling and de-icing some commercial airlines on a fee for service basis.

Expenses associated with non-fuel revenue (cost of revenue non-fuel) include de-icing fluid costs and payments to airport authorities which vary from site to site. Cost of revenue non-fuel is directly related to the volume of services provided and therefore generally increases in line with non-fuel revenue in dollar terms.

Atlantic Aviation incurs expenses in operating and maintaining each FBO. Operating expenses include rent and insurance, which are generally fixed in nature and other expenses, such as salaries, that generally increase with the level of activity. In addition, Atlantic Aviation incurs general and administrative expenses at the head office that include senior management expenses as well as accounting, information technology, human resources, environmental compliance and other corporate costs.

Results of Operations

Consolidated

Key Factors Affecting Operating Results

strong performance from our energy-related businesses reflecting:
an increase in average storage rates at IMTT; and
an increase in contribution margin at The Gas Company; partially offset by
reduced spill response activity in 2011 compared with 2010 at IMTT.
improved contribution from Atlantic Aviation reflecting:
increased volume of general aviation fuel sold; and
lower interest expense.

TABLE OF CONTENTS**Results of Operations: Consolidated (continued)**

Our consolidated results of operations are as follows:

	Year Ended December 31,			Change (From 2010 to 2011)		Change (From 2009 to 2010)	
	2011	2010	2009	Favorable/(Unfavorable) \$	%	Favorable/(Unfavorable) \$	%
	(\$ In Thousands) (Unaudited)						
Revenue							
Revenue from product sales	\$639,521	\$514,344	\$394,200	125,177	24.3	120,144	30.5
Revenue from product sales utility	140,746	113,752	95,769	26,994	23.7	17,983	18.8

Net income (loss) attributable to MIC
LLC

NM Not meaningful

Interest expense includes non-cash gains on derivative instruments of \$18.2 million for the year ended December (1)31, 2011. For the years ended December 31, 2010 and 2009, interest expense includes non-cash losses on derivative instruments of \$23.4 million and \$4.3 million, respectively.

Gross Profit

Consolidated gross profit increased from 2010 to 2011 reflecting improved results for fuel gross profit at Atlantic Aviation and The Gas Company generally, offset by decreases at District Energy and in non-fuel gross profit at Atlantic Aviation.

Consolidated gross profit increased from 2009 to 2010 reflecting improved results at our energy-related businesses and in fuel-related services at Atlantic Aviation, offset by a decrease in non-fuel gross profit from Atlantic Aviation.

55

TABLE OF CONTENTS**Results of Operations: Consolidated (continued)****Selling, General and Administrative Expenses**

Selling, general and administrative expenses increased from 2010 to 2011 at Corporate, primarily due to the arbitration proceedings between MIC and its IMTT co-investor, offset by decreases at The Gas Company and Atlantic Aviation.

Selling, general and administrative expenses decreased from 2009 to 2010 at all of our consolidated businesses, particularly at Atlantic Aviation.

Fees to Manager

Base management fees to our Manager increased in line with our increased market capitalization. Our Manager elected to reinvest its base management fees for the following quarters of 2011, 2010 and 2009 in additional LLC interests as follows:

Period	Base Management Fee Amount (\$ in thousands)	LLC Interests Issued	Issue Date
2011 Activities:			
Fourth quarter 2011	\$ 4,222	(1)	(1)
Third quarter 2011	3,465	130,344	November 30, 2011
Second quarter 2011	4,156	179,623	August 31, 2011
First quarter 2011	3,632	144,742	June 6, 2011
2010 Activities:			
Fourth quarter 2010	\$ 3,214	136,079	March 22, 2011
First quarter 2010	2,189	155,375	June 11, 2010
2009 Activities:			
Fourth quarter 2009	\$ 1,894	138,955	March 31, 2010
Third quarter 2009	1,639	180,309	December 2, 2009
Second quarter 2009	851	149,795	September 4, 2009

(1) LLC interests for the fourth quarter 2011 base management fee will be issued to the Manager during the first quarter of 2012.

The base management fees in the amount of \$2.3 million and \$2.4 million for the second and third quarters of 2010, respectively, were paid in cash to our Manager during the third and fourth quarters of 2010, respectively. The base management fee in the amount of \$462,000 for the first quarter of 2009 was paid in cash to our Manager during the second quarter of 2009.

Goodwill Impairment

There were no impairment charges in 2011 or 2010. During the first six months of 2009, we recognized goodwill impairment charges of \$71.2 million at Atlantic Aviation.

Depreciation

Depreciation for 2011 includes non-cash write-offs of \$2.9 million primarily associated with the leasehold improvements recorded during the quarter ended September 30, 2011 at Atlantic Aviation. This write-off was due to the consolidation of two FBOs it operated at one airport. In addition, depreciation for 2011 includes non-cash asset impairment charges of \$1.4 million recorded at Atlantic Aviation during the quarter ended June 30, 2011. The impairment charges resulted from adverse trading conditions specific to three small locations. There were no impairment charges in 2010.

Depreciation for 2009 includes non-cash asset impairment charges of \$7.5 million during the first six months of 2009 recorded at Atlantic Aviation.

TABLE OF CONTENTS

Results of Operations: Consolidated (continued)

Amortization of Intangibles

The increase in amortization of intangible expenses from 2010 to 2011 reflects the non-cash impairment charges of \$7.3 million recorded at Atlantic Aviation during the quarter ended June 30, 2011. The impairment charges resulted from adverse trading conditions specific to three small locations. There were no impairment charges in 2010.

Amortization of intangibles expense for 2009 includes non-cash asset impairment charges of \$23.3 million recorded during the first six months of 2009 by Atlantic Aviation. These impairments reduced the amortizable balance.

Loss on disposal of assets

During 2011 and 2010, Atlantic Aviation concluded that several of its sites did not have sufficient scale or serve a market with sufficiently strong growth prospects to warrant continued operations at these sites. Atlantic Aviation sold certain FBOs and reinvested the proceeds in the acquisition of two FBOs in Oregon during the third quarter of 2011.

Accordingly, Atlantic Aviation recorded \$1.5 million, of which \$617,000 was non-cash, and \$17.9 million of non-cash losses on disposal of assets in 2011 and 2010, respectively.

Interest Expense and Loss on Derivative Instruments

Interest expense includes non-cash gains on derivative instruments of \$18.2 million for 2011. For 2010 and 2009, interest expense includes non-cash losses on derivative instruments of \$23.4 million and \$4.3 million, respectively. The change in the non-cash gains (losses) on derivatives recorded in interest expense is attributable to the change in fair value of interest rate swaps and includes the reclassification of amounts from accumulated other comprehensive loss into earnings. Excluding the portion related to non-cash gains (losses) on derivatives, interest expense decreased due primarily to a lower principal balance at Atlantic Aviation, partially offset by the expiration of an interest rate basis swap agreements in March 2010 at each of the consolidated operating businesses.

Equity in Earnings and Amortization Charges of Investees

The decrease in equity in the earnings in 2011 compared with 2010 primarily reflects our share of the decrease in operating results of IMTT. IMTT's operating results reflect a lower level of spill response activity and related gross profit, as a result of the BP oil spill in 2010, and our share of the increase in net non-cash derivative losses.

Our equity in the earnings of IMTT increased from 2009 to 2010 reflecting our share of the improved operating results of the business due to higher level of spill response activity and related gross profit, as a result of the BP oil spill in 2010, offset by our share of net non-cash derivative losses 2010 compared with our share of net non-cash derivative gains in 2009.

Income Taxes

For 2011, we expect that any consolidated taxable income will be fully offset by our NOL carryforwards. At December 31, 2011, our federal NOL balance was \$135.2 million. This balance excludes the NOL carryforwards of District Energy (see District Energy *Income Taxes* below). For 2011, we expect to pay a federal Alternative Minimum Tax of less than \$250,000.

As we own less than 80% of IMTT and District Energy, these businesses are not included in our consolidated federal tax return. These businesses file separate federal income tax returns. We expect that dividends from District Energy in 2011 will be treated as taxable dividends and qualify for the 80% Dividends Received Deduction (DRD).

For 2011, our full year federal and state income taxes will be approximately \$22.7 million, or 44.02% of net income before taxes. The provision for income taxes includes \$6.1 million for state and local income taxes. As discussed below, the provision for state and local income taxes includes a valuation allowance of approximately \$1.3 million for the use of certain state NOL carryforwards. The difference between our effective tax rate and the U.S. federal statutory rate of 35% is primarily attributable to state and local income taxes and adjustments for our less than 80% owned businesses.

TABLE OF CONTENTS

Results of Operations: Consolidated (continued)

For 2010, we reported a consolidated net operating loss, for which we recorded a deferred tax benefit. Further, our taxable income for 2010 included a capital loss of approximately \$10.4 million on the disposal of our airport parking business, which we carriedback to 2009. The carriedback eliminated our 2009 consolidated taxable income.

For 2009, we reported consolidated federal taxable income of \$11.5 million, which was offset by a portion of our consolidated federal NOL carryforward. For 2009, we paid a federal Alternative Minimum tax of \$203,000.

Valuation allowance:

As discussed in Note 17, *Income Taxes*, in our consolidated financial statements in *Financial Statements and Supplementary Data* in Part II, Item 8, of our Form 10-K for our 2010 fiscal year (filed on February 23, 2011), from the date of sale of the noncontrolling interest in District Energy and onwards, we evaluate the need for a valuation allowance against our deferred tax assets without taking into consideration the deferred tax liabilities of District Energy. As of December 31, 2009, our valuation allowance was approximately \$20.6 million.

In 2011, we increased the valuation allowance by \$1.3 million for certain state NOL carryforwards.

During 2010 we reduced the valuation allowance to approximately \$9.2 million, resulting in a net decrease of \$11.4 million. Of this decrease, \$1.8 million has been recorded as part of the benefit for federal and state income taxes included in continuing operations on the consolidated statements of operations. The remaining \$9.6 million of the decrease is included in net income from discontinued operations.

In calculating our consolidated state income tax provision, we have provided a valuation allowance for certain state income tax NOL carryforwards, the utilization of which is not assured beyond a reasonable doubt. In addition, we expect to incur certain expenses that will not be deductible in determining state taxable income. Accordingly, these expenses have also been excluded in determining our state income tax expense.

Discontinued Operations

On June 2, 2010, we concluded the sale in bankruptcy of PCAA, resulting in a pre-tax gain of \$130.3 million, of which \$76.5 million related to the forgiveness of debt. The results of operations from this business and the gain from the bankruptcy sale are separately reported as discontinued operations in our consolidated financial statements and prior comparable periods have been restated to conform to the current period presentation. See Note 4, *Discontinued Operations*, in our consolidated financial statements in *Financial Statements and Supplementary Data* in Part II, Item 8, of this Form 10-K for financial information and further discussions.

Earnings Before Interest, Taxes, Depreciation and Amortization (EBITDA) excluding non-cash items and Free Cash Flow

We have disclosed EBITDA excluding non-cash items for our Company and each of our operating segments in Note 14, *Reportable Segments*, in our consolidated financial statements in *Financial Statements and Supplementary Data* in Part II, Item 8, of this Form 10-K, as a key performance metric relied on by management in evaluating our performance. EBITDA excluding non-cash items is defined as earnings before interest, taxes, depreciation and amortization and noncash items, which includes impairments, derivative gains and losses and adjustments for other non-cash items reflected in the statements of operations. We believe EBITDA excluding non-cash items provides

additional insight into the performance of our operating businesses relative to each other and similar businesses without regard to their capital structure, and their ability to service or reduce debt, fund capital expenditures and/or support distributions to the holding company.

We also disclose Free Cash Flow, as defined by us, as a means of assessing the amount of cash generated by our businesses and supplementing other information provided in accordance with GAAP. We define Free Cash Flow as cash from operating activities, less maintenance capital expenditures and changes in working capital. Working capital movements are excluded on the basis that these are largely timing differences in payables and receivables, and are therefore not reflective of our ability to generate cash.

TABLE OF CONTENTS**Results of Operations: Consolidated (continued)**

We believe that reporting Free Cash Flow will provide our investors with additional insight into our future ability to deploy cash, as GAAP metrics such as net income and cash from operating activities do not reflect all of the items that our management considers in estimating the amount of cash generated by our operating entities. In this Annual Report on Form 10-K, we have disclosed Free Cash Flow for our consolidated results and for each of our operating segments.

We note that Free Cash Flow does not fully reflect our ability to freely deploy generated cash, as it does not reflect required payments to be made on our indebtedness, pay dividends and other fixed obligations or the other cash items excluded when calculating Free Cash Flow. We also note that Free Cash Flow may be calculated in a different manner by other companies, which limits its usefulness as a comparative measure. Therefore, our Free Cash Flow should be used as a supplemental measure and not in lieu of our financial results reported under GAAP.

A reconciliation of net income (loss) attributable to MIC LLC from continuing operations to EBITDA excluding non-cash items and EBITDA excluding non-cash items to Free Cash Flow from continuing operations, on a consolidated basis, is provided below:

	Year Ended December 31,			Change (From 2010 to 2011)		Change (From 2009 to 2010)

61

TABLE OF CONTENTS**Energy-Related Businesses: IMTT (continued)****Key Factors Affecting Operating Results:**

terminal revenue and terminal gross profit increased principally due to an increase in average tank rental rates; offset by

increased terminal repairs and maintenance costs predominantly in the second and third quarter of 2011; increased terminal labor costs, predominantly in the second quarter of 2011; and a decrease in environmental response service revenue and gross profit, principally due to a lower level of spill response activity.

Year Ended December 31, 2011 Compared with Year Ended December 31, 2010

The increase in terminal revenue primarily reflects growth in storage revenue. Storage revenue grew due to an increase in average rental rates of 13.3% during 2011 as compared with 2010. In 2010, average rental rates increased by 7.2% compared to 2009. Capacity utilization was 94.3% during 2011 compared with 93.6% in 2010.

Over the past six years, IMTT has achieved annual rate increases between 7.1% and 14.8%, and utilization between 93.6% and 95.7% as illustrated below.

	Year Ended December 31,					
	2006	2007	2008	2009	2010	2011
Storage Utilization	95.7 %	94.5 %	94.3 %	94.0 %	93.6 %	94.3 %
Year-on-Year Change in Storage Rates	7.1 %	9.1 %	14.8 %	9.7 %	7.2 %	13.3 %

Terminal operating costs increased during 2011. IMTT management has explained that the causes for the year ended 2011 cost growth included factors beyond their control, such as medical costs and storm related damages, certain costs pulled forward into 2011, increased tank repair and cleaning costs and increased labor costs.

Labor costs and tank repair and cleaning costs were the largest cost increases during 2011. Approximately 30% of the increase in tank repair costs relates to the repair of a construction defect in tanks recently constructed at Bayonne (for some of which IMTT is seeking reimbursement), with the majority of the balance relating to repairs arising as a result of IMTT's various tank inspection programs.

The increase in labor cost was driven by wage increases and unusually high healthcare claims.

Revenue and gross profit from environmental response services decreased during 2011 compared with 2010 due primarily to a lower level of spill response activity in 2011 in comparison to the level of spill response activity as a result of the BP oil spill in 2010.

General and Administrative Expenses

General and administrative expenses decreased during 2011 compared to 2010 due primarily to the current absence of the costs of the spill response activity associated with the BP oil spill that occurred in 2010.

Depreciation and Amortization

Depreciation and amortization expense increased as IMTT completed several major expansion projects, resulting in higher asset balances.

62

TABLE OF CONTENTS

Energy-Related Businesses: IMTT (continued)

Interest Expense, Net

Interest expense, net, includes non-cash losses on derivative instruments of \$16.7 million and \$15.7 million for the years ended December 31, 2011 and 2010, respectively. Excluding the non-cash losses on derivative instruments, interest expense for 2011 was higher than 2010 due to interest relating to the issuance of GO Zone bonds in November and December 2010 as well as increased rates on the amended revolving credit facility and letter of credit fees associated with the tax-exempt debt. Cash interest paid was \$31.5 million and \$34.1 million for 2011 and 2010, respectively.

Income Taxes

The business files a consolidated federal income tax return and files a separate state income tax return in six states.

For 2011, IMTT recorded \$28.9 million of federal income tax expense and \$5.9 million of state income tax expense.

IMTT made federal tax payments related to 2011 of \$8.4 million and state payments of \$4.7 million. The federal income tax expense exceeds the cash taxes primarily due to accelerated tax depreciation, which is discussed below.

At December 31, 2010, IMTT expected its current federal and state tax expense for 2010 would be \$5.5 million and \$7.0 million, respectively. The actual current federal and state tax expense amounts for 2010 were \$2.9 million and \$4.7 million, respectively. The primary reason for the reduction in current tax expense was an additional pension plan contribution for the 2010 plan year. At December 31, 2009, IMTT had federal NOLs of \$50.5 million, of which \$5.8 million was carried back to 2008 and \$44.7 million was carried forward and fully utilized in 2010.

The Provision for income taxes, net of changes in deferred taxes of \$8.2 million, in the table above, represents the cash taxes for 2011 of \$13.1 million, offset by a net \$4.9 million reduction in the 2010 current tax expense primarily for pension plan contributions made during 2010.

A significant difference between IMTT's book and federal taxable income relates to depreciation of terminalling fixed assets. For book purposes, these fixed assets are depreciated primarily over 15 to 30 years using the straight-line method of depreciation. For federal income tax purposes, these fixed assets are depreciated primarily over 5 to 15 years using accelerated methods. Most terminalling fixed assets placed in service in 2010 and 2011 qualify for the federal 50% or 100% tax depreciation, except assets placed in service in Louisiana financed with GO Zone Bonds. A significant portion of Louisiana terminalling fixed assets constructed since Hurricane Katrina are financed with Gulf Opportunity Zone Bonds (GO Zone Bonds). GO Zone Bond financed assets are depreciated, for tax purposes, primarily over 9 to 20 years using the straight-line depreciation method. Most of the states in which the business operates do not allow the use of the federal tax depreciation calculation methods.

Year Ended December 31, 2010 Compared with Year Ended December 31, 2009

Key Factors Affecting Operating Results

environmental response service revenue and gross profit increased principally due to spill response work and other activities related to the oil spill in the Gulf of Mexico; and

terminal revenue and gross profit increased principally due to:

increase in average tank rental rates; and

increase in volume of storage under contract.

Revenue and Gross Profit

The increase in terminal revenue primarily reflects growth in storage revenue. Storage revenue grew due to an increase in average rental rates of 7.2% during 2010 and an increase in storage capacity mainly attributable to certain expansion projects at IMTT's Louisiana facilities.

TABLE OF CONTENTS

Energy-Related Businesses: IMTT (continued)

Capacity utilization was essentially flat at 93.6% during 2010 compared with 94.0% in 2009. Utilization rates were lower in the second half of 2010, primarily due to tanks being taken out of service for inspection and repairs and maintenance. Many of these tanks were returned to service in early 2011.

Terminal operating costs increased during 2010 as compared to 2009 primarily as a result of an increase in salaries and wages and higher repairs and maintenance.

Revenue and gross profit from environmental response services increased substantially during 2010 primarily due to the increase in spill response activities following the April 20, 2010 BP oil spill in the Gulf of Mexico.

General and Administrative Expenses

General and administrative expenses for 2010 increased primarily due to the increase in environmental response services activity compared with 2009. The increase reflects a \$9.1 million increase from the environmental response service business, primarily related to cash and accrued bonuses and sales commissions.

Depreciation and Amortization

Depreciation and amortization expense increased as IMTT completed several major expansion projects, resulting in higher asset balances.

Interest Expense, Net

Interest expense, net, includes non-cash losses on derivative instruments of \$15.7 million in 2010 and non-cash gains of \$27.4 million in 2009. Excluding the non-cash (losses) gains on derivative instruments, interest expense is higher due to increased rates on the revolving credit facility, an increase in the notional value of the hedged portion of the revolving credit facility and letter of credit fees associated with the additional issuance of Gulf Opportunity Zone Bonds, partially offset by a lower outstanding amount on the revolving credit facility.

Cash interest paid was \$34.1 million and \$29.0 million for years ended December 31, 2010 and 2009, respectively.

Income Taxes

For 2010, IMTT recorded \$5.5 million of current federal income tax expense and \$7.0 million of current state income tax expense. For 2009, the business paid state income taxes of approximately \$1.6 million.

(1) Interest expense, net, includes non-cash gains (losses) on derivative instruments and non-cash amortization of deferred financing fees.

(2) Corporate allocation expense, intercompany fees and the tax effect have been excluded from the above table as they are eliminated on consolidation at the MIC Inc. level.

65

TABLE OF CONTENTS

Energy-Related Businesses: The Gas Company (continued)

Management believes that the presentation and analysis of contribution margin, a non-GAAP performance measure, is meaningful to understanding the business performance under both a utility rate structure and a non-utility unregulated pricing structure. Regulation of the utility portion of The Gas Company's operations provides for the pass through of increases or decreases in feedstock costs to customers. Changes in the cost of LPG distributed to non-utility customers can be recovered in pricing, subject to competitive conditions.

Contribution margin should not be considered an alternative to revenue, gross profit, operating income, or net income, determined in accordance with U.S. GAAP. A reconciliation of contribution margin to gross profit is presented in the above table. The business calculates contribution margin as revenue less direct costs of revenue other than production and transmission and distribution costs. Other companies may calculate contribution margin differently or may use different metrics and, therefore, the contribution margin presented for The Gas Company is not necessarily comparable with metrics of other companies.

Year Ended December 31, 2011 Compared with Year Ended December 31, 2010

Key Factors Affecting Operating Results:

an increase in non-utility contribution margin driven by effective margin management and increase in the volume of gas sold, partially offset by increased transportation costs; and higher utility contribution margin driven by increase in the volume of gas sold, partially offset by increased transportation costs.

Contribution Margin and Operating Income

Non-utility contribution margin improved as the result of effective margin management and a 2.9% increase in volume of gas sold, partially offset by increased transportation costs. The increase in transportation costs is due primarily to increase in inter-island barging costs.

Utility contribution margin was higher driven by a 1.5% increase in the volume of gas sold as the Hawaiian economy continues to recover, partially offset by increased cost of inter-island barging.

The Gas Company renegotiated its LPG contract and SNG feedstock contract with Tesoro during 2011, with both contracts now expiring September 30, 2013. The feedstock contract is subject to approval by the HPUC, and such approval is expected by mid-2012. The Gas Company expects that a modest level of savings will be passed through to consumers, all else being equal, via the fuel adjustment charge mechanism and will have no impact on utility contribution margin and minimal impact on the non-utility margin.

Production, transmission and distribution and selling, general and administrative expenses are composed primarily of labor-related expenses and professional fees. On a combined basis, these costs were higher in 2011 compared to 2010, driven primarily by higher vehicle expenses, vendor services and electricity costs. These increases were partially offset by increased allocation of labor costs to capital projects.

Interest Expense, Net

Interest expense, net, includes non-cash gains on derivative instruments of \$225,000 for 2011. For 2010, interest expense, net, includes non-cash losses on derivative instruments of \$7.3 million. Excluding the non-cash gains (losses) on derivative instruments, interest expense 2011 was higher primarily due to the expiration of an interest rate basis swap agreement in March 2010 and a contractual increase in interest rate margin for The Gas Company's primary debt facilities beginning June 2011. Cash interest paid was \$8.7 million and \$8.6 million for 2011 and 2010, respectively.

TABLE OF CONTENTS

Energy-Related Businesses: The Gas Company (continued)

Income Taxes

Income from The Gas Company is included in our consolidated federal income tax return, and is subject to Hawaii state income taxes. The tax expense in the table above includes both state taxes and the portion of the consolidated federal tax liability attributable to the business. For 2011, the business expects to pay cash state income taxes of approximately \$1.2 million. Any federal income tax liability is expected to be offset in consolidation from the application of NOLs. The Provision for income taxes, net of changes in deferred taxes of \$3.1 million in the above table, includes \$2.1 million of federal income taxes payable to MIC, which is offset by MIC's NOLs.

The business' federal taxable income differs from book income primarily as a result of differences in the depreciation of fixed assets. The state of Hawaii does not allow the federal bonus depreciation deduction of 100% for 2011 or 50% for 2012 in determining state taxable income.

Year Ended December 31, 2010 Compared with Year Ended December 31, 2009

Key Factors Affecting Operating Results

utility rate increase effective June 11, 2009; and
effective non-utility margin management.

Contribution Margin and Operating Income

Utility contribution margin was higher for 2010 due to implementation of a rate increase from June 11, 2009, partially offset by the timing of fuel adjustment charge reconciliations, higher gas hauling and transportation costs and the implementation of the final rate case order. The volume of gas products sold for 2010 was relatively flat compared with 2009.

The Gas Company renegotiated its SNG feedstock contract with Tesoro during 2010. The contract was approved by the HPUC in 2011. Changes in cost of feedstock were passed through to consumers via the fuel adjustment charge mechanism.

Non-utility contribution margin was higher for 2010 as a result of effective margin management. The volume of gas products sold in 2010 was approximately 1.7% higher than 2009. The Gas Company renegotiated its LPG supply contracts during 2010. In the fourth quarter, Chevron had an unexpected shut down, which impacted the business' local supplies, requiring the business to procure higher-priced foreign sources of LPG.

On a combined basis, production, transmission and distribution and selling, general and administrative expenses were 0.8% higher than 2009 primarily due to higher salary and electricity costs, mostly offset by capitalized labor costs.

Interest Expense, Net

Interest expense, net, includes non-cash losses on derivative instruments of \$7.3 million and \$309,000 for 2010 and 2009, respectively. Excluding the non-cash losses on derivative instruments, interest expense was slightly higher in

2010 compared with 2009 due to the expiration of an interest rate basis swap agreement. Cash interest paid was \$8.6 million and \$8.5 million for 2010 and 2009, respectively.

Income Taxes

For 2010, the business had a current state income tax expense of \$830,000 on current state taxable income of \$18.7 million.

District Energy

Customers of District Energy pay two charges to receive chilled water services: a fixed charge based on contracted capacity and a variable charge based on the consumption of chilled water. Capacity charges are typically adjusted annually at a fixed rate or are indexed to the Consumer Price Index (CPI). The terms of the business customer contracts provide for the pass through of increases or decreases in electricity costs, the largest component of the business direct expenses.

NM Not meaningful

(1) Includes depreciation expense of \$6.6 million, \$6.6 million and \$6.1 million for the years ended December 31, 2011, 2010 and 2009, respectively.

(2) Interest expense, net, includes non-cash (losses) gains on derivative instruments and non-cash amortization of deferred financing fees.

(3) For the year ended December 31, 2009, corporate allocation expense and the tax effect have been excluded from the above table as they are eliminated on consolidation at the MIC Inc. level.

68

TABLE OF CONTENTS

Energy-Related Businesses: District Energy (continued)
Year Ended December 31, 2011 Compared with Year
Ended December 31, 2010

Key Factors Affecting Operating Results:

an increase in capacity revenue from new customers and annual inflation-linked increases in contract capacity rates; and

decreased other direct expenses due to lower real estate taxes.

Gross Profit

Excluding the finance lease revenue adjustment in 2010 discussed below, gross profit increased due primarily to an increase in cooling capacity revenue from new customers and annual inflation-related increases of contract capacity rates, in accordance with customer contract terms, and lower real estate taxes related to a successful tax appeal at one of the business facilities. The increase was partially offset by lower consumption revenue, net of electricity costs, due to cooler average temperatures during the second and third quarters of 2011 compared with 2010.

Finance Lease Revenue

Finance lease revenue is comprised of the interest portion of lease payments received from equipment leases with various customers primarily in Las Vegas. The principal receipts on these equipment leases are recorded in cash from operating activities in the cash flow statement.

Finance lease revenue decreased by \$2.9 million in 2011 compared with 2010 primarily due to a one-time \$2.5 million adjustment made in 2010 to the allocation of cash received from customers between principal and interest since the inception of the lease. The increase in the interest portion of the lease in 2010 was directly offset by a decrease in other non-cash (income) expenses on District Energy and the consolidated statement of cash flows in 2010. This has no effect on free cash flow or cash from operating activities, as discussed in Management's Discussion and Analysis of Financial Condition and Results of Operations Liquidity and Capital Resources in Part II, Item 7.

Selling, General and Administrative Expenses

Selling, general and administrative expenses were higher compared with 2010 due to a larger accrual for performance-linked management incentives earned in 2011.

Other Income

Other income decreased due to lower payments received under agreements to manage the business energy consumption during periods of peak demand on the Illinois electricity grid.

Interest Expense, Net

Interest expense, net, includes non-cash losses on derivative instruments of \$2.6 million and \$10.1 million for 2011 and 2010, respectively. Excluding the non-cash losses on derivative instruments, interest expense was slightly higher

in 2011 compared with 2010 due to the expiration of an interest rate basis swap agreement in March 2010. Cash interest paid was \$10.0 million and \$9.8 million for 2011 and 2010, respectively.

Income Taxes

For periods prior to the sale of 49.99% noncontrolling interest in the business in December 2009, the income from District Energy was included in our consolidated federal income tax return and District Energy filed a separate Illinois state income tax return. For periods after December 2009, District Energy files a separate federal income tax return and will continue to file a separate Illinois state income tax return.

TABLE OF CONTENTS

Energy-Related Businesses: District Energy (continued)

As of December 31, 2011, the business has approximately \$16.4 million in federal NOL carryforwards available to offset positive taxable income and \$23.1 million in Illinois state NOL carryforwards, for which utilization is deferred until 2015. For 2011, District Energy expects to pay a federal Alternative Minimum Tax of approximately \$112,000 and state income taxes of approximately \$606,000, which is reflected in the Provision/benefit for income taxes, net of changes in deferred taxes of \$868,000 in the above table. The remainder of the change includes \$150,000 of taxes paid in 2011, but attributable to 2010. The business expects to have federal taxable income in 2012 and 2013, which will be wholly offset by NOL carryforwards.

In 2011, Illinois enacted the Taxpayer Accountability and Budget Stabilization Act, which increased the state corporate income tax rate to 7.0% from 4.8% through 2014 and suspended the use of state NOL carryforward through 2014. For 2011, District Energy recorded \$147,000 of deferred state income tax expense due to the increase in Illinois corporate income tax rates enacted in 2011.

Year Ended December 31, 2010 Compared with Year Ended December 31, 2009

Key Factors Affecting Operating Results

an increase in consumption gross profit driven by warmer average temperatures in 2010; and
a net increase in contracted capacity revenue from new customers.

Gross Profit

Gross profit increased primarily due to warmer average temperatures during the second and third quarters of 2010 compared with the comparable period in 2009 resulting in higher ton-hour sales. Additionally, cooling capacity revenue increased due to a net increase in contracted capacity provided to new customers that began service predominantly in the second quarter of 2009, and annual inflation-related increases of contract capacity rates, in accordance with customer contract terms.

Finance Lease Revenue

Finance lease revenue increased by \$3.1 million from 2009 to 2010 primarily due to a one-time \$2.5 million adjustment primarily in the allocation of cash received from customers between principal and interest since the inception of the lease. The increase in the interest portion of the lease in 2010 was directly offset by a decrease in other non-cash (income) expenses on District Energy and the consolidated statement of cash flows in 2010. This has no effect on free cash flow or cash from operating activities, as discussed in Management's Discussion and Analysis of Financial Condition and Results of Operations Liquidity and Capital Resources in Part II, Item 7.

Selling, General and Administrative Expenses

Selling, general and administrative expenses decreased due to a reduction in incentives. This decrease was offset by a reimbursement from a customer for professional fees related to the Las Vegas plant expansion that occurred in 2009.

Other Income

Other income increased due to the timing of payments earned under agreements to review and manage the business energy consumption during periods of peak demand in 2010.

Interest Expense, Net

Interest expense, net, includes non-cash losses on derivative instruments of \$10.1 million for 2010 and non-cash gains of \$1.2 million for 2009. Excluding the non-cash (losses) gains on derivative instruments, interest expense was higher in 2010 compared with 2009 due to the expiration of an interest rate basis swap agreement and a higher debt balance during 2010 compared with 2009. Cash interest paid was \$9.8 million and \$9.5 million for 2010 and 2009, respectively.

Income Taxes

For 2010 and 2009, District Energy did not pay federal or state income taxes due to its NOL carryforwards.

NM Not meaningful

- (1) Includes \$2.4 million increase in the bad debt reserve in the first quarter of 2009 due to the deterioration of accounts receivable aging.
- (2) Interest expense, net, includes non-cash gains (losses) on derivative instruments, non-cash amortization of deferred financing fees and interest rate swap breakage fees.
- (3) Corporate allocation expense, intercompany fees and the tax effect have been excluded from the above table as they are eliminated on consolidation at the MIC Inc. level.

71

TABLE OF CONTENTS

Aviation-Related Business: Atlantic Aviation (continued)

Key Factors Affecting Operating Results:

Year Ended December 31, 2011 Compared with Year Ended December 31, 2010

higher general aviation (GA) volume of fuel sold and marginally higher weighted average GA fuel margins;
lower cash interest expense driven by reduced debt levels; and
flat selling, general and administrative expenses.

Revenue and Gross Profit

The majority of the revenue and gross profit by Atlantic Aviation is generated through fueling GA aircraft at 65 airports in the U.S. Revenue is categorized according to who owns the fuel used to service these aircraft. If our business owns the fuel, it records the cost to purchase that fuel as cost of revenue-fuel. The business corresponding fuel revenue is its cost to purchase that fuel plus a margin. The business generally pursues a strategy of maintaining, and where appropriate increasing, dollar-based margins, thereby passing any fluctuations in fuel prices to the customer.

Atlantic Aviation also has into-plane arrangements whereby it fuels aircraft with fuel owned by another party. It collects a fee for this service that is recorded as non-fuel revenue. Non-fuel revenue also includes various services such as hangar rentals, de-icing, landing fees, tie-down fees and miscellaneous services.

The business fuel-related revenue and gross profit are driven by the volume of fuel sold and dollar-based margin/fee per gallon. This applies to both fuel and into-plane revenue. Customers will sometimes move from one category to the other.

Management believes discussing total fuel-related revenue and gross profit, including both fuel sales and into-plane arrangements (as recorded in the non-fuel revenue line) and related key metrics on an aggregate basis, provides a more meaningful analysis of Atlantic Aviation's gross profit than a discussion of each item. In 2011, the business derived 66.1% of total gross profit from fuel and fuel-related services compared with 65.1% in 2010.

The increase in gross profit for the year ended December 31, 2011 resulted from an increase in volume of fuel sold and slightly higher margins, due primarily to more efficient fuel procurement. The business also benefited from the contributions from the opening of its Oklahoma City FBO in June 2011 and the acquisition of two Oregon FBOs in September 2011. The increase was partially offset by the divestiture of four FBOs in 2011.

On a same store basis, gross profit increased by 5.2% for 2011. On the same store basis, the volume of GA fuel sold increased by 5.5% and GA average fuel margin increased by 2.5%. Non-fuel and non-GA gross profit increased by 2.2%.

Selling, General and Administrative Expenses

Selling, general and administrative expenses for the year ended December 31, 2011 were flat compared with 2010. Higher weather-related expenses in the first quarter of 2011, and higher motor fuel cost and credit card fees

throughout 2011 were offset by lower rent expense resulting from the sale of FBOs and lower insurance premiums. The reduction in insurance premiums were a result of Atlantic Aviation's safety program and safety record.

Depreciation and Amortization

Depreciation for 2011 includes non-cash write-offs of \$2.9 million primarily associated with the leasehold improvements recorded during the quarter ended September 30, 2011 at Atlantic Aviation. This write-off was due to the consolidation of two FBOs it operated at one airport.

In addition, depreciation and amortization of intangible expense for 2011 includes non-cash asset impairment charges of \$8.7 million recorded at Atlantic Aviation during the quarter ended June 30, 2011. The impairment charges resulted from adverse trading conditions specific to three small locations. There were no impairment charges in 2010.

72

TABLE OF CONTENTS

Aviation-Related Business: Atlantic Aviation (continued)

Loss on disposal of assets

During 2011 and 2010, Atlantic Aviation concluded that several of its sites did not have sufficient scale or serve a market with sufficiently strong growth prospects to warrant continued operations at these sites. Atlantic Aviation sold certain FBOs and reinvested the proceeds in the acquisition of two FBOs in Oregon during the third quarter of 2011. Accordingly, Atlantic Aviation recorded \$1.5 million, of which \$617,000 was non-cash, and \$17.9 million in non-cash losses on disposal of assets in 2011 and 2010, respectively.

Interest Expense, Net

Interest expense, net, includes non-cash gains on derivative instruments of \$20.6 million for the year ended December 31, 2011. For the year ended December 31, 2010, interest expense, net, includes non-cash losses on derivative instruments of \$5.9 million. Excluding the non-cash gains (losses) on derivative instruments, interest expense for year ended December 31, 2011 was lower due to the prepayment of the outstanding principal balance of the term loan debt, partially offset by the expiration of an interest rate basis swap agreement in March 2010.

In connection with the debt prepayments, Atlantic Aviation incurred interest rate swap breakage fees. Cash paid for interest rate swap breakage fees was \$2.3 million for 2011 and \$5.5 million for 2010. The interest rate swap breakage fees are excluded from interest expense, net, in the current quarter as they have been included in interest expense, net, in prior periods as part of the mark-to-market derivative adjustments at Atlantic Aviation. Excluding cash paid for interest rate swap breakage fees, cash interest paid was \$52.0 million for 2011 and \$54.7 million for 2010.

Income Taxes

Income generated by Atlantic Aviation is included in our consolidated federal income tax return. The business files state income tax returns in more than 30 states in which it operates. The tax expense in the table above includes both state taxes and the portion of the consolidated federal tax liability attributable to the business.

The business had approximately \$24.4 million of state NOL carryforwards at December 31, 2011. State NOL carryforwards are specific to the state in which the NOL was generated and various states impose limitations on the utilization of NOL carryforwards. Therefore, the business may incur state income tax liabilities in the future, even if its consolidated state taxable income is less than \$24.4 million.

Atlantic Aviation, as a whole, expects to generate a current year federal taxable income that will be offset by its separate NOLs, although the business expects to pay an Alternative Minimum Income tax of approximately \$300,000 to MIC under the federal tax sharing agreement between the two entities.

The business also expects to have state taxable income in 2011, and pay state income taxes of approximately \$1.3 million.

Year Ended December 31, 2010 Compared with Year Ended December 31, 2009

Key Factors Affecting Operating Results

higher GA fuel volumes and higher weighted average GA fuel margins;
lower selling, general and administrative expenses due to ongoing expense reduction initiatives; and
lower interest expense driven by reduced debt levels; partially offset by
a decrease in other non-fuel revenue primarily driven by lower landing fees and miscellaneous fixed based operations related-services.

Revenue and Gross Profit

In 2010, the business derived 65.1% of total gross profit from fuel and fuel-related services. In 2009, Atlantic Aviation derived 63.3% from these services.

TABLE OF CONTENTS

Aviation-Related Business: Atlantic Aviation (continued)

Gross profit for 2010 increased 1.6% compared with 2009 as a result of an increase in aggregate fuel-related gross profit, offset by lower gross profit from other services. The increase in aggregate fuel-related gross profit resulted from a 2.8% increase in GA fuel volume, driven by increased business jet traffic. The full year GA fuel volume increase reflects volume growth in the first nine months of the year and relatively flat volume in the fourth quarter as a result of weaker fuel sales to military customers. Weighted average fuel margin increased by 2.0% compared with the previous year. Margins started to increase in the third quarter and expanded at an accelerated rate in the fourth quarter.

The year-on-year change in fuel-related gross profit includes a number of events which will not reoccur in any given year, such as the G-20 meeting in Pittsburgh in 2009 and the temporary closure of the runway at Rifle airport in 2010. Excluding such events, GA fuel volume would have increased 5.8%, and weighted average fuel related margin would have remained flat in 2010. Margin contraction in the first half of the year was offset by margin expansion in the second half of the year. On the same basis, gross profit from other services would have decreased 1.1% for 2010.

Gross profit from other services decreased by 3.9% for the fourth quarter of 2010 compared with the fourth quarter of 2009. The decrease in other services gross profit mainly reflects non-recurring revenue recorded at a location in December 2009.

Selling, General and Administrative Expenses

Selling, general and administrative expenses decreased from 2009 to 2010 due to the ongoing cost reduction initiatives and a one time increase of \$2.0 million to the bad debt reserve in the first quarter of 2009 due to the deterioration of the accounts receivable aging. Accounts receivables aging improved significantly since the first quarter of 2009. No further adjustment to the bad debt reserve was necessary in subsequent periods as a result of continued improvement in the aging of accounts receivables. Excluding this one-time adjustment in 2009, the underlying selling, general and administrative expenses would have decreased by a 1.9% in 2010.

Goodwill Impairment

In addition to its annual impairment test in the fourth quarter, the business performed an impairment test at the reporting unit level during the first six months of 2009. Goodwill is considered impaired when the carrying amount of a reporting unit's goodwill exceeds its implied fair value, as determined under a two step approach. Based on the testing performed, the business recognized goodwill impairment charges of \$71.2 million in the first six months of 2009. There were no impairment charges in 2010.

Depreciation and Amortization

The decrease in depreciation and amortization expense was due to non-cash impairment charges of \$30.8 million incurred in the first half of 2009. There were no impairment charges in 2010.

Loss on disposal of assets

As a result of a strategic review commenced in 2010, Atlantic Aviation concluded that several of its sites did not have sufficient scale or serve a market with sufficiently strong growth prospects to warrant continued operations at these sites. Therefore, Atlantic Aviation has undertaken to exit certain markets and redeploy resources that may be made available in the process into markets which it views as having better growth profiles and recorded \$17.9 million of

non-cash losses on disposal of assets in the consolidated statement of operations during the fourth quarter of 2010.

Interest Expense, Net

Interest expense, net, includes non-cash losses on derivative instruments of \$5.9 million for the year ended December 31, 2010 and \$4.9 million for the year ended December 31, 2009. Excluding the non-cash losses on derivative instruments, interest expense for year ended December 31, 2010 was lower due to an aggregate \$136.7 million of prepayments of the term loan principal since February 2009.

74

TABLE OF CONTENTS

Aviation-Related Business: Atlantic Aviation (continued)

Income Taxes

While Atlantic Aviation as a whole had a current year federal income tax loss for 2010, certain entities within the business generated state taxable income. For the year ended December 31, 2010, the business paid state income taxes of approximately \$1.2 million.

Liquidity and Capital Resources

Consolidated

Our primary cash requirements include normal operating expenses, debt service, debt principal payments, payments of dividends and capital expenditures. Our primary source of cash is operating activities, although we may borrow against existing credit facilities for growth capital expenditures, issue additional LLC interests or sell assets to generate cash.

On February 21, 2012, our board of directors declared a dividend of \$0.20 per share for the quarter ended December 31, 2011. The dividend will be paid on March 8, 2012 to holders of record on March 5, 2012. Our board authorized and we have paid a \$0.20 dividend for each of the quarters ended September 30, 2011, June 30, 2011 and March 31, 2011.

Contingent upon the favorable outcome related to the IMTT arbitration, and the compliance therewith, and the continued stable performance of our businesses, and subject to prevailing economic conditions, our board of directors expect to increase our dividend to approximately \$0.375 per share per quarter.

We believe that our operating businesses will have sufficient liquidity and capital resources to meet future requirements, including servicing long-term debt obligations and making distribution payments to MIC. We base our assessment of the sufficiency of our liquidity and capital resources on the following assumptions:

our businesses and investments overall generate, and are expected to continue to generate, significant operating cash flow;

the ongoing maintenance capital expenditures associated with our businesses are readily funded from their respective operating cash flow or available financing;

all significant short-term growth capital expenditures will be funded with cash on hand or from committed undrawn credit facilities; and

we will be able to refinance, extend and/or repay the principal amount of maturing long-term debt on terms that can be supported by our businesses.

We have capitalized our businesses, in part, using project-finance style debt. Project-finance style debt is limited-recourse, floating rate, non-amortizing debt with a medium term maturity of between five and seven years. We are prepaying the principal balance in the following three circumstances:

Atlantic Aviation apply all excess cash flow to prepay additional debt principal whenever the leverage ratio, as defined in the amended debt agreement, is equal to or greater than 6.0x trailing twelve months EBITDA, as adjusted, and apply 50% of excess cash flow to prepay debt whenever the leverage ratio is equal to or greater than 5.5x trailing twelve months EBITDA and below 6.0x;

Atlantic Aviation apply all excess cash flow generated in the fourth quarter of 2012 and thereafter to prepay the principal balance on its term loan facility; and

District Energy apply all excess cash flow generated in the third quarter of 2012 and thereafter to prepay the principal balance on its term loan facility.

At December 31, 2011, the average remaining maturity of the drawn balances of the primary debt facilities across all of our businesses, including our proportional interest in the revolving credit facility of IMTT, was approximately 2.6 years. In light of the improvement in the functioning of the credit markets generally, and the leverage and interest coverage ratios set forth in the following table, we expect each of our businesses and investments to successfully refinance their long-term debt on economically reasonable terms on or before maturity.

TABLE OF CONTENTS**Liquidity and Capital Resources: Consolidated (continued)**

Business/Investment	Debt Facility	Maturity	Type of Ratio ⁽¹⁾	Required Ratio ⁽²⁾	Actual Ratio at December 31, 2011	Percent of Headroom Available at December 31, 2011
Energy-Related Businesses:

			Backward Interest Coverage	> 3.50x	6.95x	99 %
District Energy ⁽⁴⁾	Term Loan	September 2014	Leverage	> 6.00 %	8.73 %	46 %
			Interest Coverage	> 1.50x	2.27x	51 %
Aviation-Related Business:						
Atlantic Aviation ⁽⁴⁾	Term Loan	October 2014	Leverage	< 7.50x	5.98x	25 %
			Debt Service Coverage	> 1.20x	2.12x	77 %

(1) Ratio as per the debt agreement

(2) Maximum leverage permitted, or minimum coverage required as per debt agreement

(3) For a description and material terms of IMTT's debt facilities, see Management's Discussion and Analysis of Financial Condition and Results of Operations *Liquidity and Capital Resources IMTT* in Part II, Item 7

(4) For a description and material terms of our consolidated businesses' debt facilities, see Note 10, Long-Term Debt, in our consolidated financial statements Financial Statements and Supplementary Data in Part II, Item 8, of this Form 10-K

Until March 31, 2010, the Company had a revolving credit facility provided by various financial institutions, including entities within the Macquarie Group. The facility was repaid in full in December 2009 and no amounts were outstanding under the revolving credit facility as of December 31, 2009 or at the facility's maturity on March 31, 2010.

This facility was not renewed or replaced and we have no other holding company debt.

The section below discusses the sources and uses of cash on a consolidated basis and for each of our businesses and investments. All intercompany activities such as corporate allocations, capital contributions to our businesses and distributions from our businesses have been excluded from the tables as these transactions are eliminated in consolidation.

TABLE OF CONTENTS**Liquidity and Capital Resources: Consolidated (continued)****COMMITMENTS AND CONTINGENCIES**

The following table summarizes our future obligations, by period due, as of December 31, 2011, under our various contractual obligations and commitments. We had no off-balance sheet arrangement at that date or currently. The following information does not include IMTT, which is not consolidated.

	Payments Due by Period				
	Total	Less than One Year	1 3 Years	3 5 Years	More than 5 Years
	(\$ In Thousands)				
Long-term debt ⁽¹⁾	\$ 1,120,588	\$ 34,535	\$ 1,083,540	\$ 692	\$ 1,821
Interest obligations	112,450	61,766	50,265	211	208
Capital lease obligations ⁽²⁾	2,706	944	1,756	6	
Notes payable	1,272	1,008	186	78	
Operating lease obligations ⁽³⁾	387,595	33,465	63,353	55,863	234,914
Time charter obligations ⁽⁴⁾	1,253	682	571		
Pension benefit obligations	25,808	2,250	4,882	5,138	13,538
Post-retirement benefit obligations	2,741	323	583	527	1,308
Purchase commitments ⁽⁵⁾	10,849	10,849			
Other	116	100	16		
Total contractual cash obligations ⁽⁶⁾	\$ 1,665,378	\$ 145,922	\$ 1,205,152	\$ 62,515	\$ 251,789

The long-term debt represents the consolidated principal obligations to various lenders. The primary debt facilities, (1) which are obligations of the operating businesses and have maturities between 2013 and 2014, are subject to certain covenants, the violation of which could result in acceleration of the maturity dates.

(2) Capital lease obligations are for the lease of certain transportation equipment. Such equipment could be subject to repossession upon violation of the terms of the lease agreements.

(3) This represents the minimum annual rentals required to be paid under non-cancellable operating leases with terms in excess of one year.

(4) The Gas Company currently has a time charter arrangement for the use of two barges for transporting LPG between Oahu and its neighbor islands.

(5) Represents purchase commitments for LPG at The Gas Company.

(6) The above table does not reflect certain long-term obligations, such as deferred taxes, for which we are unable to estimate the period in which the obligation will be incurred.

In addition to these commitments and contingencies, we typically incur capital expenditures on a regular basis to:

maintain our existing revenue-producing assets in good working order (maintenance capital expenditures); and expand our existing revenue-producing assets or acquire new ones (growth capital expenditures).

See Investing Activities below for further discussion of capital expenditures.

We also have other contingencies, including pending or threatened legal and administrative proceedings that are not reflected above as amounts at this time are not ascertainable. See Legal Proceedings in Part I, Item 3.

Our sources of cash to meet these obligations are as follows:

cash generated from our operations (see Operating Activities below);
sale of all or part of any of our businesses (see Investing Activities below);
refinancing our current credit facilities on or before maturity (see Financing Activities below); and
cash available from our undrawn credit facilities (see Financing Activities below).

77

TABLE OF CONTENTS**Liquidity and Capital Resources: Consolidated (continued)****Analysis of Consolidated Historical Cash Flows from Continuing Operations**

	Year Ended December 31,			Change		Change	
	2011	2010	2009	(From 2010 to 2011)	(Favorable/(Unfavorable))	(From 2009 to 2010)	(Favorable/(Unfavorable))
(\$ In Thousands)	\$	\$	\$	\$	%	\$	%
Cash provided by operating activities	91,042	98,555	82,976	(7,513)	(7.6)	15,579	18.8

Cash used in financing activities	(53,137)	(76,528)	(117,818)	23,391	30.6	41,290	35.0

NM Not meaningful

Operating Activities

Consolidated cash provided by (used in) operating activities comprises primarily the cash from operations of the businesses we own, as described in each of the business discussions below. The cash flow from our consolidated business operations is partially offset by expenses paid by the holding company, including base management fees paid in cash, professional fees, cost associated with being a public company and interest incurred in periods prior to March 31, 2010 on any amounts drawn on our revolving credit facility.

The decrease in consolidated cash provided by operating activities from 2010 to 2011 was due primarily to:

absence of distribution from IMTT in 2011; and
higher working capital requirements due to increased energy costs at Atlantic Aviation and The Gas Company; partially offset by
improved operating performance and lower cash interest paid on the reduced term loan balance for Atlantic Aviation; improved operating performance at The Gas Company; and
\$4.7 million of base management fees paid in cash during 2010 compared to the reinvestment of the 2011 base management fees by our Manager in LLC interests.

Our reported EBITDA excluding non-cash items and free cash flow will be lower if the Manager elects to retain base management fees in cash as compared with its election to reinvest such base management fees in additional LLC interests. The amount by which these items are lower could be material.

The increase in consolidated cash provided by operating activities from 2009 to 2010 was primarily due to:

improved operating performance at Atlantic Aviation due to stable gross profit and cost savings;
lower interest paid on the reduced term loan balance for Atlantic Aviation and no interest paid on holding company debt;

a larger dividend received from IMTT; and
improved operating results at the consolidated energy-related businesses.

Distributions from IMTT are reflected in our consolidated cash provided by operating activities only up to our 50% share of IMTT's positive earnings. Distributions in excess of this, and any distributions when IMTT records a net loss, are reflected in our consolidated cash from investing activities as a return of investment in unconsolidated business. No distribution was received from IMTT during 2011. For 2010, \$15.0 million in distributions were included in cash from operating activities compared with \$7.0 million in 2009.

TABLE OF CONTENTS

Liquidity and Capital Resources: Consolidated (continued)

We believe our operating activities overall provide a source of sustainable and stable cash flows over the long-term with the opportunity for future growth due to:

- consistent customer demand driven by the basic nature of the services provided;
- our strong competitive position due to factors including:
 - high initial development and construction costs;
- difficulty in obtaining suitable land near many of our operations (for example, airports, waterfront near ports);
 - long-term concessions/contracts;
- required government approvals, which may be difficult or time-consuming to obtain;
- lack of cost-efficient alternatives to the services we provide in the foreseeable future; and
- product/service pricing that we expect to generally keep pace with price changes due to factors including:
 - consistent demand;
 - limited alternatives;
 - contractual terms; and
 - regulatory rate setting.

Investing Activities

The increase in consolidated cash used in investing activities from 2010 to 2011 was primarily due to:

- acquisition of two Oregon FBOs at Atlantic Aviation during the third quarter of 2011;
- an increase in capital expenditures at The Gas Company; and
- an increase in capital expenditures at Atlantic Aviation due to construction costs of a new FBO at Oklahoma City and FBO facility upgrades at a number of locations; partially offset by
 - cash proceeds received in 2011 for the sale of FBOs at Atlantic Aviation; and
 - a decrease in investment in capital leased asset at District Energy.

The increase in consolidated cash used in investing activities from 2009 to 2010 was primarily due to:

- cash received from the sale of the noncontrolling stake in District Energy in 2009; and
 - higher capital expenditures at The Gas Company; partially offset by
 - lower capital expenditures at District Energy in 2010; and
- cash received in 2010 from the PCAA bankruptcy estate for expenses paid on behalf of PCAA during its operations.

The primary driver of provided by (cash used) in investing activities in our consolidated cash flows has been acquisitions of businesses in new and existing segments, and the sale of the noncontrolling stake in District Energy. The other main driver is capital expenditures. Maintenance capital expenditures are generally funded by cash from operating activities and growth capital expenditures are generally funded by drawing on our available credit facilities or with equity capital. We may fund maintenance capital expenditures from credit facilities or equity capital and growth capital expenditures from operating activities from time to time. Acquisitions of businesses are generally funded on a long-term basis through raising additional equity capital and/or project-financing style credit facilities.

TABLE OF CONTENTS

Liquidity and Capital Resources: Consolidated (continued)

In December 2010, the Tax Relief, Unemployment Insurance Reauthorization and Job Creation Act of 2010 (the Act) was signed. The Act provides for 100% bonus depreciation for certain fixed assets placed in service after September 8, 2010 and before January 1, 2012, and 50% bonus depreciation for certain fixed assets placed in service during 2012 for federal income tax purposes. Generally, states do not allow this bonus depreciation deduction in determining state taxable income. Importantly, Illinois and Louisiana, two states in which we have significant operations, do permit the use of bonus depreciation in calculating state taxable income. We took and will take into consideration the benefits of these accelerated depreciation provisions of the Act when evaluating capital expenditure plans for 2011 and 2012.

Financing Activities

The decrease in consolidated cash used in financing activities from 2010 to 2011 was primarily due to:

lower net debt repayments at Atlantic Aviation and no debt repayments at The Gas Company during 2011; and proceeds from long-term debt in 2011 at The Gas Company and Atlantic Aviation and borrowings on line of credit facilities at Atlantic Aviation; partially offset by

dividends paid to our shareholders during 2011; and
an increase in distributions paid to noncontrolling interest in District Energy.

The decrease in consolidated cash used in financing activities from 2009 to 2010 was primarily due to:

higher debt repayment during 2009 at Atlantic Aviation; and
full repayment of the MIC Inc. revolving credit facility during 2009; partially offset by
debt draw downs at District Energy and The Gas Company to fund capital expenditures during 2009;
full repayment on The Gas Company working capital facility during 2010; and
distributions paid to the noncontrolling interest in District Energy.

The primary drivers of cash provided by (used in) financing activities are equity offerings, debt financing of acquisitions and capital expenditures, the subsequent refinancing of our businesses and the repayment of the outstanding principal balance on maturing debt and principal payments on capital leases.

Given the favorable interest rate environment, management is seeking to refinance The Gas Company's credit facilities in 2012 ahead of its maturity in mid-2013.

See below for further description of the cash flows related to our businesses.

Energy-Related Businesses

IMTT

The following analysis represents 100% of the cash flows of IMTT, rather than just the composition of cash flows that are included in our consolidated cash flows. We believe this is the most appropriate and meaningful approach to discussion of the historical cash flow trends of IMTT. We account for our 50% ownership of this business using the equity method. Distributions from IMTT when IMTT records a net loss, or pays distributions in excess of our share of its earnings, are reflected in investing activities in our consolidated cash flow.

TABLE OF CONTENTS**Energy-Related Businesses: IMTT (continued)**

	Year Ended December 31,			Change		Change	
	2011	2010	2009	(From 2010 to 2011)		(From 2009 to 2010)	
				Favorable/(Unfavorable)		Favorable/(Unfavorable)

NM Not meaningful

Operating Activities

Cash provided by operating activities at IMTT is generated primarily from storage rentals and ancillary services that are billed monthly and paid on various terms. Cash used in operating activities is mainly for payroll and benefits costs, maintenance and repair of fixed assets, utilities and professional services, interest payments and payments to tax jurisdictions.

Cash provided by operating activities decreased from 2010 to 2011 primarily as a result of the reduced contribution from IMTT's environmental response services business, the timing of payment of various accrued expenses and a larger contribution to the pension fund, partially offset by improved terminal operating results.

In 2010, working capital requirements increased substantially as a result of the timing of payments on work being performed in connection with the BP oil spill in the Gulf of Mexico.

Cash provided by operating activities increased from 2009 to 2010 primarily due to cash received from customers in connection with the BP oil spill in the Gulf of Mexico and improved terminal operating results.

Investing Activities

Cash used in investing activities primarily relates to capital expenditures and an investment in a tax-exempt bond escrow.

The decrease in cash used in investing activities from 2010 to 2011 was due primarily to the release of a tax-exempt bond escrow, partially offset by higher capital expenditures in 2011 as compared with 2010. Total capital expenditures increased from \$110.8 million in 2010 to \$130.2 million in 2011.

The increase in cash used in investing activities from 2009 to 2010 was primarily due to the tax-exempt bond escrow, partially offset by lower capital expenditures in 2010 as compared with 2009. Total capital expenditures decreased from \$122.6 million in 2009 to \$110.8 million in 2010 primarily reflecting a reduction in growth capital expenditures, partially offset by an increase in maintenance capital expenditures.

In December 2010, the Tax Relief, Unemployment Insurance Reauthorization and Job Creation Act of 2010 (the Act) was signed. The Act provides for 100% tax depreciation for certain fixed assets placed in service after September 8, 2010 and before January 1, 2012, and 50% tax depreciation for certain fixed assets placed in service during 2012 for federal income tax purposes. Generally, states do not allow this tax depreciation deduction in determining state taxable income. Importantly, Louisiana, in which IMTT has significant operations, does permit the use of federal tax depreciation in calculating state taxable income. IMTT took and will take into consideration the benefits of these accelerated depreciation provisions of the Act when evaluating capital expenditure plans for 2011 and 2012.

TABLE OF CONTENTS**Energy-Related Businesses: IMTT (continued)****Maintenance and Environmental Capital Expenditure**

IMTT incurs maintenance and environmental capital expenditures to prolong the useful lives and increase the service capacity of existing revenue-producing assets. Maintenance and environmental capital expenditures include the refurbishment of storage tanks, piping, dock facilities and environmental capital expenditures, principally in relation to improvements in containment measures and remediation. During the years ended December 31, 2011, 2010 and 2009, IMTT incurred \$57.3 million, \$45.0 million and \$40.0 million, respectively, on maintenance and environmental capital expenditures, including (i) \$45.9 million, \$37.5 million and \$36.0 million, respectively, principally in relation to refurbishments of tanks, docks and other infrastructure and (ii) \$11.4 million, \$7.5 million and \$4.0 million, respectively, on environmental capital expenditures.

For the full-year 2012, MIC expects IMTT to spend approximately \$50.0 million on maintenance and environmental capital expenditures. MIC anticipates that maintenance and environmental capital expenditures at IMTT will remain at elevated levels through 2014 due to required cleaning and inspection program in Louisiana.

Growth Capital Expenditure

During 2011, IMTT incurred growth capital expenditures of \$72.9 million. This compares to growth capital expenditures incurred of \$65.8 million and \$82.6 million for 2010 and 2009, respectively.

IMTT has completed growth projects costing \$65.1 million, of which \$28.0 million related to the construction or upgrade of support infrastructure, primarily docks. These projects are expected to generate \$6.5 million of annualized gross profit and EBITDA as outlined in the table below.

	Anticipated Incremental Gross Profit/EBITDA Annualized	Anticipated Cumulative Gross Profit/EBITDA Annualized
2011	\$ 4.8 million	\$ 4.8 million
2012	\$ 1.7 million	\$ 6.5 million

Since November 2011, the IMTT board has approved incremental growth projects having a total value of \$21.7 million. These projects are expected to generate an additional \$4.8 million of annualized gross profit and EBITDA. These amounts are expected to realize from 2012 to 2014 and are reflected in the table below.

IMTT has growth projects with an estimated total cost of \$241.2 million underway, including \$52.5 million of support infrastructure projects. To date, \$77.6 million has been spent on these projects including \$20.7 million on support infrastructure. The projects are expected to generate an additional \$41.2 million of annualized gross profit and EBITDA, including a \$1.6 million increase in annualized gross profit and EBITDA generated by previously announced projects.

	Anticipated Incremental Gross Profit/EBITDA	Anticipated Cumulative Gross Profit/EBITDA
--	---	--

	Annualized	Annualized
2011	\$ 2.7 million	\$ 2.7 million
2012	\$ 17.9 million	\$ 20.6 million
2013	\$ 15.1 million	\$ 35.7 million
2014	\$ 5.5 million	\$ 41.2 million

Support infrastructure is growth capital expenditure that does not directly generate incremental gross profit or EBITDA as it has no contractual revenue stream associated with it. However, it does facilitate the ongoing growth of IMTT. Examples of such projects include new docks and berths, new truck racks and other inter-modal facilities and new or improved pumps and piping.

Financing Activities

Cash flows used in financing activities decreased from 2010 to 2011 due primarily to a distribution of \$5.0 million to each shareholder on January 4, 2010 and \$10.0 million to each shareholder on August 9, 2010, as compared with no distributions paid during 2011 and debt issuance costs in 2010 that did not recur. These were partially offset by a decrease in net borrowings on debt facilities.

TABLE OF CONTENTS**Energy-Related Businesses: IMTT (continued)**

Cash flows from financing activities decreased from 2009 to 2010 primarily due to net debt repayments in 2010 as compared with net borrowings in 2009 and increased distributions to its shareholders. During 2010, IMTT made \$15.0 million of distributions to each of its shareholders, compared with \$7.0 million to each of its shareholders in 2009.

At December 31, 2011, the outstanding balance on IMTT's debt facilities, excluding capitalized leases, consisted of \$336.3 million in letter of credit backed tax exempt bonds, \$187.9 million in bank owned tax exempt bonds, \$86.8 million in revolving credit facilities and \$28.7 million in shareholder loans. The weighted average interest rate of the outstanding debt facilities, including any interest rate swaps and fees associated with outstanding letters of credit is 5.05%. Cash interest paid was \$31.5 million, \$34.1 million and \$29.0 million for 2011, 2010 and 2009, respectively.

The following tables summarize the key terms of IMTT's senior debt facilities as of December 31, 2011.

Revolving Credit Facility

On June 7, 2007, IMTT entered into a Revolving Credit Agreement with Suntrust Bank, Citibank N.A., Regions Bank, Rabobank Nederland, Branch Banking & Trust Co., DNB NOR Bank ASA, Bank of America N.A., BNP Paribas, Bank of Montreal, The Royal Bank of Scotland PLC, Mizuho Corporate Bank Ltd. and eight other banks establishing a \$600.0 million U.S. dollar denominated revolving credit facility and a \$25.0 million equivalent Canadian dollar revolving credit facility.

In 2010, IMTT amended its revolving credit facility. The amendment increased the size of the facility from \$625.0 million to \$1.1 billion. The maturity of \$1,025.0 million has been extended to June 7, 2014, with \$75.0 million maturing on June 7, 2012. The facility is guaranteed by IMTT's key operating subsidiaries.

The revolving credit facilities have been used primarily to fund IMTT's growth capital expenditures in the U.S. and Canada. The terms of IMTT's U.S. dollar and Canadian dollar denominated revolving credit facilities are summarized in the table below.

	USD Revolving Credit Facility	USD Revolving Credit Facility Non-Extended	USD DNB Nor Loans	CAD Revolving Credit Facility Extended
Total Committed Amount	\$930.0 million	\$75.0 million	\$65.0 million	\$30.0 million

The Revolving Credit Facility is unsecured except for a pledge of 65% of shares in IMTT's two Canadian affiliates.

Each of the above components of IMTT's Revolving Credit Facility includes a covenant limiting the Debt to EBITDA ratio to a maximum of 4.75x. At December 31, 2011, IMTT's Debt to EBITDA ratio was 2.70x. IMTT's Revolving Credit Facility is also limited by a minimum Interest Coverage Ratio of 3.0x. At December 31, 2011, IMTT's Interest Coverage Ratio was 6.12x.

Of the \$430.1 million outstanding balance against the revolving credit facility, IMTT had drawn \$86.8 million in cash and issued \$343.3 million in letters of credit primarily backing tax-exempt GO Zone bonds and New Jersey Economic Development Authority Bonds, or NJEDA bonds, at December 31, 2011.

To partially hedge the interest rate risk associated with IMTT's current floating rate borrowings under the revolving credit agreement, IMTT entered into a 10 year fixed quarterly LIBOR swap, maturing in March 2017, with a notional amount of \$140.0 million as of December 31, 2011 increasing to \$200.0 million by December 31, 2012, at a fixed rate of 5.507%.

IMTT has also entered into a \$52.0 million, 6.29% fixed vs. LIBOR interest rate swap expiring December 2012.

Gulf Opportunity Zone Bonds (GO Zone Bonds)

In August, November and December of 2010, IMTT closed on \$85.0 million, \$100.0 million and \$90.0 million, respectively, of additional GO Zone Bonds, respectively. Proceeds were used to reimburse IMTT for qualified project costs and/or fund future qualifying projects.

IMTT sold \$190.0 million of the additional GO Zone Bonds issued in 2011 to banking institutions. These bonds do not need to be backed by a letter of credit and will incur a lower interest rate, equal to 68% of 30 day LIBOR plus 65% of the applicable margin (per the revolving credit agreement).

The \$300.0 million of GO Zone Bonds that were not sold to banking institutions are required to be supported at all times by bank letters of credit issued under the revolving credit facility.

TABLE OF CONTENTS**Energy-Related Businesses: IMTT (continued)**

The key terms of the GO Zone Bonds issued are summarized in the table below:

	Gulf Opportunity Zone Bonds I	Gulf Opportunity Zone Bonds II	Gulf Opportunity Zone Bonds III	Gulf Opportunity Zone Bonds IV

In addition to the debt facilities discussed above, IMTT Holdings Inc. received loans from its shareholders other than MIC from 2006 to 2008. The shareholder loans have a fixed interest rate of 5.5% and will be repaid over 15 years by IMTT Holdings Inc. with equal quarterly amortization that commenced March 31, 2008. Shareholder loans of \$28.7 million were outstanding as of December 31, 2011.

The Gas Company

	Year Ended December 31,			Change		Change	
	2011	2010	2009	(From 2010 to 2011)	Favorable/(Unfavorable)	(From 2009 to 2010)	Favorable/(Unfavorable)

NM Not meaningful

Operating Activities

The principal source of cash provided by operating activities is customer receipts. The business incurs payments for fuel, materials, pipeline repairs, vendor services and supplies, payroll and benefit costs, revenue-based taxes and payment of administrative costs. Customers are generally billed monthly and make payments on account. Vendors and suppliers generally bill the business when services are rendered or when products are shipped. The decrease in cash from operations from 2010 to 2011 was driven primarily by the increased LPG and SNG feedstock costs and increased dollar value of inventory held. These were partially offset by improved operating results, and the fact that LPG and SNG feedstock costs are recovered from customers, and lower federal taxes payable to MIC, primarily due

to the 100% bonus depreciation deduction taken on fixed assets placed in service during 2011.

The increase from 2009 to 2010 was primarily due to improved operating results and lower cash pension payments in 2010 as compared with 2009, partially offset by an increased dollar value of inventory held at December 31, 2010 due to higher input prices.

Investing Activities

Cash used in investing activities is composed primarily of capital expenditures. Capital expenditures for the non-utility business are funded by cash from operating activities and capital expenditures for the utility business are funded by drawing on credit facilities, as well as cash from operating activities.

TABLE OF CONTENTS**Energy-Related Businesses: The Gas Company (continued)****Maintenance Capital Expenditure**

Maintenance capital expenditures include replacement of pipeline sections, improvements to the business transmission system and SNG plant, improvements to buildings and other property and the purchase of equipment.

Growth Capital Expenditure

Growth capital expenditures include the purchase of meters, regulators and propane tanks for new customers, the cost of installing pipelines for new residential and commercial construction, new product initiatives, the renewable natural gas pilot plant and the expansion of gas storage facilities.

The following table sets forth information about capital expenditures in The Gas Company:

	Maintenance	Growth
2009	\$ 3.3 million	\$ 4.1 million
2010	\$ 5.3 million	\$ 5.5 million
2011	\$ 9.2 million	\$ 7.1 million
2012 projected	\$ 6.7 million	\$ 8.5 million

In 2012, growth capital expenditures are expected to be higher than in 2011 due to an LNG backup project for a portion of the business SNG supply requirements, other new product initiatives and expansion of storage facilities, offset by the completion, in 2011, of additional storage facilities on Maui. Maintenance capital expenditures in 2012 are expected to be lower than in 2011 due to the completion of required pipeline maintenance and inspection projects related to the integrity management program due by 2012 and the completion of several IT system upgrades, offset by an electrical efficiency and reliability project for the SNG plant.

In 2011, growth capital expenditures were higher than in 2010 due to the construction of storage facilities on Maui and the completion of the renewable natural gas project. Maintenance capital expenditures in 2011 were higher than in 2010 as a result of required pipeline maintenance and inspection projects related to the integrity management program due by 2012 and several IT system upgrades, offset by the completion of work on the Tesoro bypass project mainly in 2010.

In December 2010, the Tax Relief, Unemployment Insurance Reauthorization and Job Creation Act of 2010 (the Act) was signed. The Act provides for 100% tax depreciation for certain fixed assets placed in service after September 8, 2010 and before January 1, 2012, and 50% tax depreciation for certain fixed assets placed in service during 2012 for federal income tax purposes. Generally, states do not allow this federal tax depreciation deduction in determining state taxable income. The Gas Company took and will take into consideration the benefits of these accelerated depreciation provisions of the Act when evaluating capital expenditure plans for 2011 and 2012.

Capital expenditures in 2010 were higher than 2009 due to required pipeline maintenance and inspection projects and the renewable feedstock project at the SNG plant.

Financing Activities

The main drivers of cash from financing activities are debt financings for capital expenditures and the repayment of outstanding credit facilities. At December 31, 2011, the outstanding balance on the business debt facilities consisted of \$160.0 million in term loan facility borrowings and \$10.0 million from the revolving credit facility.

The change in cash from financing activities from 2010 to 2011 was due to the drawdown of the revolving credit facility of \$10.0 million during 2011 compared with the repayment of \$19.0 million in 2010. The change from 2009 to 2010 was due to the repayment of the revolving credit facility of \$19.0 million during 2010 compared with draw down of \$10.0 million in 2009.

The Gas Company has interest rate swaps hedging 100% of the interest rate exposure under the two \$80.0 million term loan facilities that effectively fix the interest rate at 4.8375% (excluding the margin). The

87

TABLE OF CONTENTS**Energy-Related Businesses: The Gas Company (continued)**

weighted average interest rate of the outstanding debt facilities, including any interest rate swaps at December 31, 2011, was 5.16%. The business paid \$8.7 million, \$8.6 million and \$8.5 million in cash interest related to its debt facilities during 2011, 2010 and 2009, respectively.

The Gas Company also has an uncommitted unsecured short-term borrowing facility of \$10.0 million that was amended during the fourth quarter of 2011 to increase its limit from \$7.5 million. The facility was renewed during the second quarter of 2011. This credit line bears interest at the lending bank's quoted rate or prime rate. The facility is available for working capital needs. No amount was outstanding for this facility at December 31, 2011.

Additionally, the HPUC requires that the ratio of consolidated debt to total capital for HGC Holdings not exceed 65% and that \$20.0 million be readily available in cash resources at The Gas Company, HGC Holdings or MIC. At December 31, 2011, the debt to total capital ratio was 58.7% and \$20.0 million in cash resources was readily available.

Given the favorable interest rate environment, management is seeking to refinance The Gas Company's credit facilities in 2012 ahead of its maturity in mid-2013.

The financial covenants triggering distribution lock-up or default under the business credit facility are as follows:

12 mo. look-forward and 12 mo. look-backward adjusted EBITDA/interest <3.5x (distribution lock-up) and <2.5x (default). The look-backward ratio and look-forward ratios at December 31, 2011 were 6.95x and 10.07x, respectively.

For a description of the material terms of The Gas Company's credit facilities, see Note 10, Long-Term Debt, in our consolidated financial statements in Financial Statements and Supplementary Data in Part II, Item 8, of this Form 10-K.

District Energy

The following analysis represents 100% of the cash flows of District Energy.

	Year Ended December 31,			Change		Change	
	2011	2010	2009	(From 2010 to 2011)		(From 2009 to 2010)	
				Favorable/(Unfavorable)		Favorable/(Unfavorable)	
(\$ In Thousands)	\$	\$	\$	\$	%	\$	%
Cash provided by operating activities	15,512	14,959	14,448	553	3.7	511	3.5
Cash used in investing activities	(2,153)	(4,479)	(12,095)	2,326	51.9	7,616	63.0
Cash (used in) provided by financing activities	(8,077)	(5,047)	17,917	(3,030)	(60.0)	(22,964)	(128.2)

Operating Activities

Cash provided by operating activities is driven primarily by customer receipts for services provided and leased equipment payments received (including non-revenue lease principal). Cash used in operating activities is driven by the timing of payments for electricity, vendor services or supplies and the payment of payroll and benefit costs.

Cash from operating activities increased from 2010 to 2011 due primarily to the collection of payments earned under agreements to review and manage the business energy consumption during periods of peak demand. The increase in cash provided by operating activities from 2009 to 2010 was primarily due to improved operating results.

Non-revenue lease principal is the principal portion of lease payments received from equipment leases with various customers. This cash inflow is not included in EBITDA, as there is no impact to income, but as an adjustment to calculate cash from operating activities. Non-revenue lease principal was \$3.1 million, \$2.8 million and \$2.8 million in 2011, 2010 and 2009, respectively.

TABLE OF CONTENTS**Energy-Related Businesses: District Energy (continued)**

As provided in the agreement between MIC and John Hancock, the owners of the noncontrolling interest of District Energy (collectively, the members), all available cash will be distributed pro rata to the members on a quarterly basis.

Available cash is calculated as cash from operating activities plus cash from investing activities (excluding debt funded capital expenditures, and acquisitions, net of cash) plus net debt proceeds minus distributions paid to minority shareholders of the Nevada district energy business. The distribution of available cash may be reduced to comply with any contractual or legal limitations, including restrictions on distributions contained in the business credit facility, and to provide for working capital requirements.

Investing Activities

Cash used in investing activities mainly comprises capital expenditures, which are generally funded by drawing on available facilities. Cash used in investing activities in 2011, 2010 and 2009 primarily funded growth capital expenditures for new customer connections and plant expansion.

Maintenance Capital Expenditure

The business expects to spend approximately \$1.0 million per year on capital expenditures relating to the replacement of parts, system reliability, customer service improvements and minor system modifications. Maintenance capital expenditures will be funded from available facilities and cash from operating activities and will fluctuate due to the timing of spend on ordinary course maintenance projects.

Growth Capital Expenditure

Since 2008, District Energy signed contracts with five additional customers and committed to spend \$1.6 million on interconnection of these contracts. As of December 31, 2011, \$1.2 million had been spent, with \$386,000 remaining to be spent. The business anticipates it will receive reimbursements from customers for approximately \$1.0 million of the total \$1.6 million expenditure, of which it had received \$663,000 as of December 31, 2011. These additional customers are expected to contribute \$625,000 to gross profit and EBITDA on an annualized basis.

District Energy continues to actively market to new potential customers. New customers will typically reimburse the business for a substantial portion of expenditures related to connecting them to the business system, thereby reducing the impact of this element of capital expenditure.

The following table sets forth information about District Energy's capital expenditures:

	Maintenance	Growth
2009	\$ 875,000	\$ 11.2 million
2010	\$ 1.1 million	\$ 407,000
2011	\$ 960,000	\$ 1.2 million
2012 projected	\$ 1.0 million	\$ 1.0 million

Growth capital expenditures were higher during 2011 due to the timing of spending related to connecting new customers.

In 2009, District Energy incurred capital expenditures related to a Chicago plant renovation and expansion in addition to connecting new customers. This resulted in higher growth capital expenditures in 2009 compared with 2010.

In early 2009, District Energy's Las Vegas operation began providing service to a new customer building. This service required a \$3.0 million expansion of the Las Vegas facility, of which \$300,000 was funded through a capital contribution from the noncontrolling interest shareholder of District Energy's Las Vegas operation during the first quarter of 2010 (see Financing Activities below).

TABLE OF CONTENTS**Energy-Related Businesses: District Energy (continued)****Financing Activities**

The increase in cash used in financing activities from 2010 to 2011 was due primarily to increased distributions paid to the noncontrolling interest shareholders. The decrease in cash provided by financing activities from 2009 to 2010 was primarily due to decreased borrowings used to finance growth and maintenance capital expenditures, partially offset by a \$300,000 capital contribution from the noncontrolling interest shareholder of District Energy's Las Vegas operations (as discussed above in Investing Activities).

At December 31, 2011, the outstanding balance on the business debt facilities consisted of \$170.0 million in term loan facilities. The weighted average interest rate of the outstanding debt facilities, including any interest rate swaps and fees associated with outstanding letters of credit at December 31, 2011, was 5.54%. Cash interest paid was \$10.0 million, \$9.8 million and \$9.5 million for 2011, 2010 and 2009, respectively. Cash interest expense was slightly higher in 2011 and 2010 due to the expiration of an interest rate basis swap agreement in March 2010. To eliminate volatility in the debt service costs, District Energy entered into interest rate swaps fixing 100% of the term loan cost at 5.074% (excluding the margin).

In accordance with the terms of its loan agreement, District Energy will be applying 100% of its excess cash flow generated during the third quarter of 2012 and thereafter to repay its term loan facility through the loan maturity in September 2014. District Energy's revolving loan facility of \$18.5 million, which is currently undrawn and is being utilized to back \$7.0 million letters of credit as required by the City of Chicago, matures in September 2012. The business anticipates being able to extend the maturity of this facility or put in place financing to comply with the required letters of credit.

The financial covenants triggering distribution lock-up or default under the business credit facility are as follows:

Backward Interest Coverage Ratio <1.5x (distribution lock-up) and <1.2x (default). The ratio at December 31, 2011 was 2.27x.

Leverage Ratio (funds from operations less interest expense to net debt) for the previous 12 months less than 6.0% (distribution lock-up) and 4.0% (default). The ratio at December 31, 2011 was 8.73%.

For a description of the material terms of District Energy's credit facilities, see Note 10, Long-Term Debt, in our consolidated financial statements in Financial Statements and Supplementary Data in Part II, Item 8, of this Form 10-K.

Aviation-Related Business**Atlantic Aviation**

	Year Ended December 31,			Change		Change	
	2011	2010	2009	(From 2010 to 2011)		(From 2009 to 2010)	
				Favorable/(Unfavorable)		Favorable/(Unfavorable)	
(\$ In Thousands)	\$	\$	\$	\$	%	\$	%
	55,307	54,035	50,930	1,272	2.4	3,105	6.1

Cash provided by operating activities							
Cash used in investing activities	(21,487)	(10,346)	(10,817)	(11,141)	(107.7)	471	4.4
Cash used in financing activities ⁽¹⁾	(27,442)	(52,424)	(76,736)	24,982	47.7	24,312	31.7

During the first quarter of 2009, we provided Atlantic Aviation with a capital contribution of \$50.0 million to pay (1)down \$44.6 million of debt. The remainder of the capital contribution was used to pay interest rate swap breakage fees and expenses. This contribution has been excluded from the above table as it is eliminated on consolidation.

90

TABLE OF CONTENTS

Aviation-Related Business: Atlantic Aviation (continued)

Operating Activities

Cash from operations at Atlantic Aviation is generated from sales transactions primarily paid by credit cards. Some customers have extended payment terms and are billed accordingly. Cash is used in operating activities mainly for payments to vendors of fuel, aircraft services and professional services, as well as payroll costs and payments to tax jurisdictions. Cash provided by operating activities increased from 2010 to 2011 due primarily to:

improved operating results; and
lower cash interest paid driven by reduced debt levels, partially offset by
the timing of fuel related transactions.

Cash provided by operating activities increased from 2009 to 2010 mainly due to:

improved operating results; and
reduced interest expense from lower debt levels, partially offset by
higher level of collection of accounts receivable in 2009 compared with 2010.

Investing Activities

Cash used in investing activities relates primarily to cash used for acquisitions, proceeds from the sale of FBOs and capital expenditures. Cash used in investing activities increased during 2011 as compared to 2010 as a result of the acquisition of two FBOs in Oregon during the quarter ended September 30, 2011 and an increase in capital expenditures in 2011, partially offset by proceeds received from the sale of FBOs during 2011. Cash used in investing activities was flat from 2009 to 2010.

Maintenance expenditures are generally funded by cash from operating activities and growth capital expenditures are generally funded with draws on capital expenditure facilities.

Maintenance Capital Expenditure

Maintenance capital expenditures include repainting, replacing equipment as necessary and any ongoing environmental or required regulatory expenditure, such as installing safety equipment. These expenditures are generally funded from cash flow from operating activities.

Growth Capital Expenditure

Growth capital expenditures are incurred primarily where the business expects to receive an appropriate return relative to its cost of capital. Historically these expenditures have included development of hangars, terminal buildings and ramp upgrades. The business has generally funded these projects through its growth capital expenditure facility or capital contributions from MIC.

The following table sets forth information about capital expenditures by Atlantic Aviation:

	Maintenance	Growth
2009	\$ 4.5 million	\$ 6.3 million
2010	\$ 6.8 million	\$ 3.6 million

Edgar Filing: Macquarie Infrastructure CO LLC - Form 10-K

2011	\$ 8.7 million	\$ 6.6 million
2012 projected	\$ 13.1 million	\$ 1.5 million

Growth capital expenditures incurred in 2011 primarily reflect the completion of construction of a new FBO at Will Rogers World Airport in Oklahoma City and the construction of hangars at Atlanta DeKalb-Peachtree airport in Georgia and Elmira Corning Regional airport in New York.

Growth capital expenditures incurred in 2010 primarily reflects the ongoing construction cost of the new FBO at Will Rogers World Airport in Oklahoma City. The decrease in growth capital expenditures from 2009 to 2010 was primarily related to the completion of a terminal and ramp project in Nashville, Tennessee during 2009.

TABLE OF CONTENTS

Aviation-Related Business: Atlantic Aviation (continued)

Maintenance capital expenditures increased in 2011 as Atlantic Aviation upgraded FBO facilities at a number of locations. The relatively low level of maintenance capital expenditures during 2009 was primarily due to the deferral of maintenance capital expenditures in response to the overall soft economy. The increase from 2009 to 2010 and from 2010 to 2011 reflects a return to historical levels of maintenance capital expenditures as well as consideration of the benefits afforded by the Tax Relief, Unemployment Insurance Reauthorization and Job Creation Act of 2010, as discussed below. The projected increase from 2011 to 2012 reflects a number of specific projects, including a project at Los Angeles International FBO, which was deferred from 2011, as well as the execution of maintenance projects deferred from 2009.

In December 2010, the Tax Relief, Unemployment Insurance Reauthorization and Job Creation Act of 2010 (the Act) was signed. The Act provides for 100% tax depreciation for certain fixed assets placed in service after September 8, 2010 and before January 1, 2012, and 50% tax depreciation for certain fixed assets placed in service during 2012 for federal income tax purposes. Generally, states do not allow this federal tax depreciation deduction in determining state taxable income. The business took and will take into consideration the benefits of these accelerated depreciation provisions of the Act when evaluating capital expenditure plans in 2011 and 2012.

Financing Activities

At December 31, 2011, the outstanding balance on Atlantic Aviation's debt facilities consisted of \$727.2 million in term loan facility borrowings, which is 100% hedged with interest rate swaps, and a \$50.0 million unhedged capital expenditure facility. The weighted average interest rate on the term loan was 6.79%. The interest rate applicable on the capital expenditure facility is the three-month U.S. Libor plus a margin of 1.60%. The weighted average interest rate of all outstanding debt facilities, including any interest rate swaps, at December 31, 2011, was 6.49%. Cash interest paid was \$52.0 million, \$54.7 million and \$57.3 million 2011, 2010 and 2009, respectively, excluding interest rate swap breakage fees, related to its debt facilities. Atlantic Aviation's existing interest rate swaps will expire in October of 2012.

In addition to the debt facilities described above, Atlantic Aviation raised a \$3.5 million stand-alone debt facility to partially fund the construction of a new FBO at Oklahoma City Will Rogers World Airport. At December 31, 2011, the outstanding balance on the stand-alone facility was \$3.4 million, bearing fixed interest rate of 4.75%.

Cash used in financing activities was lower in 2011 as compared to 2010 and 2009, due primarily to a larger prepayment of the outstanding principal balance of the term loan debt in 2010 of \$55.0 million compared with \$36.2 million in 2011 and \$81.6 million in 2009.

On February 10, 2012, the business prepaid \$6.5 million of term loan principal and incurred \$248,000 in swap breakage fees. As a result of this prepayment, the proforma leverage ratio would decrease to 5.93x based upon the trailing twelve months December 31, 2011 EBITDA, as calculated under the facility. The maximum permitted debt-to-EBITDA ratio drops to 6.75x on March 31, 2012. The business expects to remain in compliance with the maximum leverage covenant through the maturity of its debt facilities if the performance of the business remains at current levels.

The financial covenant requirements under Atlantic Aviation's credit facility, and the calculation of these measures at December 31, 2011, were as follows:

Debt Service Coverage Ratio $> 1.2x$ (default threshold). The ratio at December 31, 2011 was 2.12x.
Leverage Ratio debt to adjusted EBITDA for the trailing twelve months $< 7.50x$ (default threshold). The ratio at December 31, 2011 was 5.98x.

In cooperation with the business lenders, the terms of Atlantic Aviation's loan agreement were amended on February 25, 2009. The amendments require that the business apply all excess cash flow to prepay additional debt principal whenever the leverage ratio (debt to adjusted EBITDA) is equal to or greater than 6.0x to 1.0 for the trailing twelve months and to use 50% of excess cash flow to prepay debt whenever the leverage ratio is equal to or greater than 5.5x to 1.0 and below 6.0x to 1.0.

TABLE OF CONTENTS

Aviation-Related Business: Atlantic Aviation (continued)

For a description of the material terms of Atlantic Aviation's credit facilities, see Note 10, "Long-Term Debt", in our consolidated financial statements in "Financial Statements and Supplementary Data" in Part II, Item 8, of this Form 10-K.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The preparation of our financial statements requires management to make estimates and judgments that affect the amounts reported in the financial statements and accompanying notes. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances. Actual results could differ from these estimates under different assumptions and judgments and uncertainties, and potentially could result in materially different results under different conditions. Our critical accounting policies and estimates are discussed below. These estimates and policies are consistent with the estimates and accounting policies followed by the businesses we own.

Business Combinations

Our acquisitions of businesses that we control are accounted for under the purchase method of accounting. The amounts assigned to the identifiable assets acquired and liabilities assumed in connection with acquisitions are based on estimated fair values as of the date of the acquisition, with the remainder, if any, recorded as goodwill. The fair values are determined by our management, taking into consideration information supplied by the management of acquired entities and other relevant information. Such information includes valuations supplied by independent appraisal experts for significant business combinations. The valuations are generally based upon future cash flow projections for the acquired assets, discounted to present value. The determination of fair values require significant judgment both by management and outside experts engaged to assist in this process.

Goodwill, Intangible Assets and Property, Plant and Equipment

Significant assets acquired in connection with our acquisition of The Gas Company, District Energy and Atlantic Aviation include contract rights, customer relationships, non-compete agreements, trademarks, property and equipment and goodwill.

Trademarks are generally considered to be indefinite life intangibles. Trademarks and goodwill are not amortized in most circumstances. It may be appropriate to amortize some trademarks. However, for unamortized intangible assets, we are required to perform annual impairment reviews and more frequently in certain circumstances.

During 2011, we adopted ASU No. 2011-08, *Intangibles - Goodwill and Other (Topic 350): Testing Goodwill for Impairment*, which permits an entity to make a qualitative assessment of whether it is more likely than not that a reporting unit's fair value is less than its carrying amount before applying the two-step goodwill impairment test, as discussed below. If an entity concludes it is not more likely than not that the fair value of a reporting unit is less than its carrying amount, it need not perform the two-step impairment test.

If an entity concludes that it is more likely than not that the fair value of reporting unit is less than its carrying amount, it needs to perform the two-step impairment test. This requires management to make judgments in determining what assumptions to use in the calculation. The first step of the process consists of estimating the fair value of each

reporting unit based on a discounted cash flow model using revenue and profit forecasts and comparing those estimated fair values with the carrying values, which included the allocated goodwill. If the estimated fair value is less than the carrying value, a second step is performed to compute the amount of the impairment by determining an implied fair value of goodwill. The determination of a reporting unit's implied fair value of goodwill requires the allocation of the estimated fair value of the reporting unit to the assets and liabilities of the reporting unit. Any unallocated fair value represents the implied fair value of goodwill, which is compared with its corresponding carrying value. The Gas Company, District Energy and Atlantic Aviation are separate reporting units for purposes of this analysis. The impairment test for trademarks, which are not amortized, requires the determination of the fair value of such assets. If the fair value of the trademarks are less than their carrying value, an impairment loss is recognized in an amount equal to the difference. We cannot predict the occurrence of certain future events that

TABLE OF CONTENTS

might adversely affect the reported value of goodwill and/or intangible assets. Such events include, but are not limited to, strategic decisions made in response to economic and competitive conditions, the impact of the economic environment on our customer base, or material negative change in relationship with significant customers.

Property and equipment is initially stated at cost. Depreciation on property and equipment is computed using the straight-line method over the estimated useful lives of the property and equipment after consideration of historical results and anticipated results based on our current plans. Our estimated useful lives represent the period the asset remains in service assuming normal routine maintenance. We review the estimated useful lives assigned to property and equipment when our business experience suggests that they do not properly reflect the consumption of economic benefits embodied in the property and equipment nor result in the appropriate matching of cost against revenue. Factors that lead to such a conclusion may include physical observation of asset usage, examination of realized gains and losses on asset disposals and consideration of market trends such as technological obsolescence or change in market demand.

Significant intangibles, including contract rights, customer relationships, non-compete agreements and technology are amortized using the straight-line method over the estimated useful lives of the intangible asset after consideration of historical results and anticipated results based on our current plans. With respect to contract rights in our Atlantic Aviation business, we take into consideration the history of contract right renewals in determining our assessment of useful life and the corresponding amortization period.

We perform impairment reviews of property and equipment and intangibles subject to amortization, when events or circumstances indicate that assets are less than their carrying amount and the undiscounted cash flows estimated to be generated by those assets are less than the carrying amount of those assets. In this circumstance, the impairment charge is determined based upon the amount by which the net book value of the assets exceeds their fair market value. Any impairment is measured by comparing the fair value of the asset to its carrying value.

The implied fair value of reporting units and fair value of property and equipment and intangible assets is determined by our management and is generally based upon future cash flow projections for the acquired assets, discounted to present value. We use outside valuation experts when management considers that it is appropriate to do so.

We test for goodwill and indefinite-lived intangible assets when there is an indicator of impairment. Impairments of goodwill, property, equipment, land and leasehold improvements and intangible assets during 2011 and 2009 relating to Atlantic Aviation, are discussed in Management's Discussion and Analysis of Financial Condition and Results of Operations Results of Operations in Part II, Item 7. In addition, see Note 7, Property, Equipment, Land and Leasehold Improvements, and Note 8, Intangible Assets, in our consolidated financial statements in Financial Statements and Supplementary Data in Part II, Item 8, of this Form 10-K for financial information and further discussions.

Revenue Recognition

The Gas Company recognizes revenue when the services are provided. Sales of gas to customers are billed on a monthly cycle basis. Most revenue is based upon consumption; however, certain revenue is based upon a flat rate.

District Energy recognizes revenue from cooling capacity and consumption at the time of performance of service. Cash received from customers for services to be provided in the future are recorded as unearned revenue and recognized over the expected services period on a straight-line basis.

Fuel revenue from Atlantic Aviation is recorded when fuel is provided or when services are rendered. Atlantic

Aviation also records hangar rental fees, which are recognized during the month for which service is provided.

TABLE OF CONTENTS

Hedging

We have in place variable-rate debt. Management believes that it is prudent to limit the variability of a portion of its interest payments. To meet this objective, the Company enters into interest rate swap agreements to manage fluctuations in cash flows resulting from interest rate risk on a majority of its debt with a variable-rate component.

As of February 25, 2009 for Atlantic Aviation and effective April 1, 2009 for our other businesses, we elected to discontinue hedge accounting. From the dates that hedge accounting was discontinued, all movements in the fair value of the interest rate swaps are recorded directly through earnings. As a result of the discontinuance of hedge accounting, we will reclassify into earnings net derivative losses included in accumulated other comprehensive loss over the remaining life of the existing interest rate swaps. Our derivative instruments are recorded on the balance sheet at fair value with changes in fair value of interest rate swaps recorded directly through earnings. We measure derivative instruments at fair value using the income approach, which discounts the future net cash settlements expected under the derivative contracts to a present value. See Note 11, *Derivative Instruments and Hedging Activities*, in our consolidated financial statements in *Financial Statements and Supplementary Data* in Part II, Item 8, of this Form 10-K for financial information and further discussions.

Income Taxes

We account for income taxes using the asset and liability method of accounting. Under this method, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis and for operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled.

In assessing the need for a valuation allowance, management considers whether it is more likely than not that some portion or all of the deferred tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences become deductible. Management considers the scheduled reversal of deferred tax liabilities, projected future taxable income, and tax planning strategies in making this assessment.

Accounting Policies, Accounting Changes and Future Application of Accounting Standards

See Note 2, *Summary of Significant Accounting Policies*, in our consolidated financial statements in *Financial Statements and Supplementary Data* in Part II, Item 8, of this Form 10-K for financial information and further discussions, for a summary of the Company's significant accounting policies, including a discussion of recently adopted and issued accounting pronouncements.

TABLE OF CONTENTS

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The discussion that follows describes our exposure to market risks and the use of derivatives to address those risks. See Critical Accounting Policies and Estimates Hedging for a discussion of the related accounting.

Interest Rate Risk

We are exposed to interest rate risk in relation to the borrowings of our businesses. Our current policy is to enter into derivative financial instruments to fix variable-rate interest payments covering a portion of the interest rate risk associated with the borrowings of our businesses, subject to the requirements of our lenders. As of December 31, 2011, we had \$1.1 billion of current and long-term debt for our consolidated continuing operations, \$1.0 billion of which was economically hedged with interest rate swaps and \$83.4 million of which was unhedged.

IMTT

At December 31, 2011, IMTT had two issues of New Jersey Economic Development Authority tax exempt revenue bonds outstanding with a total balance of \$36.3 million, where the interest rate is reset daily by tender. A 1% increase in interest rates on this tax exempt debt would result in a \$363,000 increase in interest cost per year and a corresponding 1% decrease would result in a \$363,000 decrease in interest cost per year. IMTT's exposure to interest rate changes through this tax exempt debt has been hedged from October 2007 through November 2012 through the use of a \$36.3 million face value 67% of LIBOR swap. As this interest rate swap is fixed against 67% of 30-day LIBOR and not the daily tax exempt tender rate, it does not result in a perfect hedge for short-term rates on tax exempt debt, although it will largely offset any additional interest rate expense incurred as a result of increases in interest rates. If interest rates decrease, the fair market value of this interest rate swap will also decrease. A 10% relative decrease in interest rates would result in a decrease in the fair market value of the interest rate swap of \$13,000 and a corresponding 10% relative increase would result in a \$13,000 increase in the fair market value.

At December 31, 2011, IMTT had outstanding \$487.9 million in Gulf Opportunity Zone Bonds (GO Zone Bonds) to fund qualified project costs at its St. Rose, Gretna and Geismar storage facilities. A 1% increase in interest rates on the outstanding GO Zone Bonds would result in a \$4.9 million increase in interest cost per year and a corresponding 1% decrease would result in a \$4.9 million decrease in interest cost per year. IMTT's exposure to interest rate changes through the GO Zone Bonds has been partially hedged until June 2017 through the use of an interest rate swap, which has a notional value of \$215.0 million. As the interest rate swap is fixed against 67% of the 30-day LIBOR rate and not the tax exempt tender rate, it does not result in a perfect hedge for short-term rates on tax exempt debt, although it will largely offset any additional interest rate expense incurred as a result of increases in interest rates. If interest rates decrease, the fair market value of the interest rate swap will also decrease. A 10% relative decrease in interest rates would result in a decrease in the fair market value of the interest rate swap of \$1.1 million and a corresponding 10% relative increase would result in a \$1.1 million increase in the fair market value.

On December 31, 2011, IMTT had \$65.0 million outstanding under its USD Revolving Credit Facility, which is associated with the USD DNB Loan. A 1% increase in interest rates on this debt would result in a \$650,000 increase in interest cost per year and a corresponding 1% decrease would result in a \$650,000 decrease in interest cost per year. IMTT's exposure to interest rate changes on its U.S. revolving credit facility has been partially hedged against 90-day LIBOR from October 2007 through March 2017 through the use of an interest rate swap, which has a notional value of \$140.0 million as of December 31, 2011. This notional value will increase to \$200.0 million from December 31,

2013 to maturity. If interest rates decrease, the fair market value of the interest rate swap will also decrease. A 10% relative decrease in interest rates would result in a decrease in the fair market value of the interest rate swap of \$1.4 million and a corresponding 10% relative increase would result in a \$1.4 million increase in the fair market value. Before the USD DNB Loan was incorporated into the USD Revolving Credit Facility, its interest was hedged through a swap with a notional value that matched the original amortization schedule of the loan. From December 31, 2011 to maturity at December 31, 2012, the notional value of the swap is fixed at \$52.0 million. This hedging arrangement will partially offset any additional interest rate expense incurred as a result of increases in interest rates. However, if interest rates decrease, the fair market value of the interest rate swap will also decrease. A

TABLE OF CONTENTS

10% relative decrease in interest rates would result in a decrease in the fair market value of the interest rate swap of \$36,000. A corresponding 10% relative increase in interest rates would result in a \$36,000 increase in the fair market value of the interest rate swap.

On December 31, 2011, IMTT had \$21.8 million outstanding under its Canadian revolving credit facility. A 1% increase in interest rates on this debt would result in a \$218,000 increase in interest cost per year and a corresponding 1% decrease would result in a \$218,000 decrease in interest cost per year.

The Gas Company

The senior term-debt for The Gas Company and HGC comprise two non-amortizing term facilities totaling \$160.0 million and a senior secured revolving credit facility totaling \$20.0 million. At December 31, 2011, the entire \$160.0 million in term debt and \$10.0 million of the capital expenditure facility had been drawn. These variable-rate facilities mature on June 7, 2013.

A 1% increase in the interest rate on The Gas Company and HGC's term debt would result in a \$1.6 million increase in interest cost per year. A corresponding 1% decrease would result in a \$1.6 million decrease in annual interest cost. The Gas Company and HGC's exposure to interest rate changes for the term facilities has, however, been fully hedged from September 1, 2006 until maturity through interest rate swaps. These derivative hedging arrangements will offset any interest rate increases or decreases during the term of the notes, resulting in stable interest rates of 5.34% for The Gas Company and 5.54% for HGC. A 10% relative decrease in market interest rates from December 31, 2011 levels would decrease the fair market value of the hedge instruments by \$199,000. A corresponding 10% relative increase would increase their fair market value by \$198,000.

The Gas Company also has a \$20.0 million capital expenditure revolver of which \$10.0 million was drawn at December 31, 2011. A 1% increase in the interest rate on The Gas Company's capital expenditure revolver would result in a \$100,000 increase in interest cost per year. A corresponding 1% decrease would result in a \$100,000 decrease in annual interest cost.

District Energy

District Energy has a \$150.0 million floating rate term loan facility maturing in 2014. A 1% increase in the interest rate on the \$150.0 million District Energy debt would result in a \$1.5 million increase in the interest cost per year. A corresponding 1% decrease would result in a \$1.5 million decrease in interest cost per year.

District Energy's exposure to interest rate changes through the term loan facility has been fully hedged to maturity through the use of interest rate swaps. These hedging arrangements will offset any additional interest rate expense incurred as a result of increases in interest rates. However, if interest rates decrease, the value of District Energy's hedge instruments will also decrease. A 10% relative decrease in interest rates would result in a decrease in the fair market value of the hedge instruments of approximately \$350,000. A corresponding 10% relative increase would result in an approximately \$350,000 increase in the fair market value.

District Energy also has a \$20.0 million capital expenditure loan facility which was fully drawn at December 31, 2011. A 1% increase in the interest rate on District Energy's capital expenditure loan facility would result in a \$200,000 increase in interest cost per year. A corresponding 1% decrease would result in a \$200,000 decrease in annual interest cost.

Atlantic Aviation

On December 31, 2011, the outstanding balance of the floating rate senior debt for Atlantic Aviation was \$777.2 million. A 1% increase in the interest rate on Atlantic Aviation's debt would result in a \$7.7 million increase in the interest cost per year. A corresponding 1% decrease would result in a \$7.7 million decrease in interest cost per year.

The exposure of the term loan portion of the senior debt, which at December 31, 2011 was \$727.2 million, to interest rate changes has been 100% hedged until October 2012 through the use of interest rate swaps. These hedging arrangements will offset any additional interest rate expense incurred as a result of increases in interest rates during that period. However, if interest rates decrease, the value of our hedge instruments will also decrease. A 10% relative decrease in interest rates would result in a decrease in the fair market value of the hedge instruments of \$351,000. A corresponding 10% relative increase would result in a \$351,000 increase in the fair market value.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Stockholders
Macquarie Infrastructure Company LLC:

We have audited the accompanying consolidated balance sheets of Macquarie Infrastructure Company LLC and subsidiaries as of December 31, 2011 and 2010, and the related consolidated statements of operations, comprehensive income (loss), members' equity, and cash flows for each of the years in the three-year period ended December 31, 2011. In connection with our audits of the consolidated financial statements, we also have audited the financial statement schedule. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Macquarie Infrastructure Company LLC and subsidiaries as of December 31, 2011 and 2010, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2011, in conformity with U.S. generally accepted accounting principles. Also in our opinion, the related financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein. As discussed in Note 2 to the consolidated financial statements, the Company has changed the presentation of comprehensive income (loss) due to the adoption of ASU No. 2011-05, *Comprehensive Income (Topic 220): Presentation of Comprehensive Income*, and has changed its method of accounting for testing goodwill for impairment due to the adoption of ASU No. 2011-08, *Intangibles-Goodwill and Other (Topic 350): Testing Goodwill for Impairment*, in 2011.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Macquarie Infrastructure Company LLC's internal control over financial reporting as of December 31, 2011, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated February 22, 2012 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

Cash of discontinued operations held for sale is reported in assets of discontinued operations held for sale in the (1) accompanying consolidated balance sheets. The cash used in discontinued operations is different than the change in cash of discontinued operations held for sale due to intercompany transactions that are eliminated in consolidation.

See accompanying notes to the consolidated financial statements.

TABLE OF CONTENTS

MACQUARIE INFRASTRUCTURE COMPANY LLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Organization and Description of Business

Macquarie Infrastructure Company LLC, a Delaware limited liability company, was formed on April 13, 2004.

Macquarie Infrastructure Company LLC, both on an individual entity basis and together with its consolidated subsidiaries, is referred to in these financial statements as the Company or MIC. The Company owns, operates and invests in a diversified group of infrastructure businesses in the United States. Macquarie Infrastructure Management (USA) Inc. is the Company's manager and is referred to in these financial statements as the Manager. The Manager is a wholly-owned subsidiary within the Macquarie Group of companies, which is comprised of Macquarie Group Limited and its subsidiaries and affiliates worldwide. Macquarie Group Limited is headquartered in Australia and is listed on the Australian Stock Exchange.

MIC LLC is a non-operating holding company with a Board of Directors and other corporate governance responsibilities generally consistent with those of a Delaware corporation. MIC LLC has made an election to be treated as a corporation for tax purposes.

The Company owns its businesses through its wholly-owned subsidiary, Macquarie Infrastructure Company Inc., or MIC Inc. The Company's businesses operate predominantly in the United States and consist of the following:

The Energy-Related Businesses:

a 50% interest in a bulk liquid storage terminal business (International Matex Tank Terminals or IMTT), which provides bulk liquid storage and handling services at ten marine terminals in the United States and two in Canada and is one of the largest participants in this industry in the U.S., based on storage capacity;

a gas processing and distribution business (The Gas Company), which is a full-service gas energy company, making gas products and services available in Hawaii; and

a 50.01% controlling interest in a district energy business (District Energy), which operates the largest district cooling system in the U.S., serving various customers in Chicago, Illinois and Las Vegas, Nevada.

Atlantic Aviation an airport services business providing products and services, including fuel and aircraft hangaring/parking, to owners and operators of general aviation aircraft at 65 airports in the U.S.

2. Summary of Significant Accounting Policies

Principles of Consolidation

The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. All intercompany balances and transactions have been eliminated in consolidation. Except as otherwise specified, we refer to Macquarie Infrastructure Company LLC and its subsidiaries collectively as the Company. The Company consolidates investments where it has a controlling financial interest. The usual condition for a controlling financial interest is ownership of a majority of the voting interest and, therefore, as a general rule, ownership, directly or indirectly, of over 50% of the outstanding voting shares is a condition for consolidation. For investments in variable

interest entities, the Company consolidates when it is determined to be the primary beneficiary of the variable interest entity. As of December 31, 2011, the Company was not the primary beneficiary of any variable interest entity in which it did not own a majority of the outstanding voting stock.

MACQUARIE INFRASTRUCTURE COMPANY LLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

2. Summary of Significant Accounting Policies (continued)

Investments

The Company accounts for 50% or less owned companies over which it has the ability to exercise significant influence using the equity method of accounting, otherwise the cost method is used. The Company's share of net income or losses of equity investments is included in equity in earnings (loss) and amortization charges of investee in the consolidated statements of operations. Losses are recognized in other income (expense) when a decline in the value of the investment is deemed to be other than temporary. In making this determination, the Company considers factors to be evaluated in determining whether a loss in value should be recognized, including the Company's ability to hold its investment and inability of the investee to sustain an earnings capacity, which would justify the carrying amount of the investment.

Use of Estimates

The preparation of our consolidated financial statements, which are in conformity with generally accepted accounting principles, or GAAP, requires the Company to make estimates and assumptions. These estimates and assumptions affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the consolidated financial statements, and the reported amounts of revenue and expenses during the reporting period. The Company evaluates these estimates and judgments on an ongoing basis and the estimates are based on experience, current and expected future conditions, third-party evaluations and various other assumptions that the Company believes are reasonable under the circumstances. Significant items subject to such estimates and assumptions include the carrying amount of property, equipment and leasehold improvements, intangibles, asset retirement obligations and goodwill; valuation allowances for receivables, inventories and deferred income tax assets; assets and obligations related to employee benefits; environmental liabilities; and valuation of derivative instruments. The results of these estimates form the basis for making judgments about the carrying values of assets and liabilities as well as identifying and assessing the accounting treatment with respect to commitments and contingencies. Actual results may differ from the estimates and assumptions used in the financial statements and related notes.

Cash and Cash Equivalents

The Company considers all highly liquid investments with a maturity of three months or less when purchased to be cash equivalents. Commercial paper, issued by a counterparty with Standard & Poor rating of A1+ are also considered cash and cash equivalents. At December 31, 2011 and 2010, the Company did not have any commercial paper.

Restricted Cash

The Company classifies all cash pledged as collateral on the outstanding senior debt as restricted cash in the consolidated balance sheets relating to Atlantic Aviation. The Company recorded \$12.8 million and \$13.8 million of cash pledged as collateral in the consolidated balance sheets at December 31, 2011 and at December 31, 2010,

respectively.

Allowance for Doubtful Accounts

The Company uses estimates to determine the amount of the allowance for doubtful accounts necessary to reduce billed and unbilled accounts receivable to their net realizable value. The Company estimates the required allowance by reviewing the status of past-due receivables and analyzing historical bad debt trends. Actual collection experience has not varied significantly from estimates primarily due to credit policies and a lack of concentration of accounts receivable. The Company writes off receivables deemed to be uncollectible to the allowance for doubtful accounts.

107

TABLE OF CONTENTS**MACQUARIE INFRASTRUCTURE COMPANY LLC****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****2. Summary of Significant Accounting Policies (continued)****Inventory**

Inventory consists principally of fuel purchased from various third-party vendors and materials and supplies at Atlantic Aviation and The Gas Company. Fuel inventory is stated at the lower of cost or market. Materials and supplies inventory is valued at the lower of average cost or market. Inventory sold is recorded using the first-in-first-out method at Atlantic Aviation and an average cost method at The Gas Company. Cash flows related to the sale of inventory are classified in net cash provided by operating activities in the consolidated statements of cash flows. The Company's inventory balance at December 31, 2011 comprised \$17.5 million of fuel and \$5.6 million of materials and supplies. The Company's inventory balance at December 31, 2010 comprised \$12.8 million of fuel and \$4.3 million of materials and supplies.

Property, Equipment, Land and Leasehold Improvements

Property, equipment and land are initially recorded at cost. Leasehold improvements are recorded at the initial present value of the minimum lease payments less accumulated amortization. Major renewals and improvements are capitalized while maintenance and repair expenditures are expensed when incurred. Interest expense relating to construction in progress is capitalized as an additional cost of the asset. The Company depreciates property, equipment and leasehold improvements over their estimated useful lives on a straight-line basis. Depreciation expense for District Energy is included within cost of services in the consolidated statements of operations. The estimated economic useful lives range according to the table below:

Buildings	10 to 68 years
Leasehold and land improvements	5 to 40 years
Machinery and equipment	5 to 62 years
Furniture and Fixtures	3 to 25 years

Goodwill and Intangible Assets

Goodwill consists of costs in excess of the aggregate purchase price over the fair value of tangible and identifiable intangible net assets acquired in the purchase business combinations. The cost of intangible assets with determinable useful lives are amortized over their estimated useful lives ranging as follows:

Customer relationships	5 to 15 years
Contract rights	5 to 40 years
Non-compete agreements	2 to 10 years
Leasehold interests	3 to 20 years
Trade names	Indefinite

Technology

5 years

Impairment of Long-lived Assets, Excluding Goodwill

Long-lived assets, including amortizable intangible assets, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset or group of assets may not be fully recoverable. These events or changes in circumstances may include a significant deterioration of operating results, changes in business plans, or changes in anticipated future cash flows. If an impairment indicator is present, the Company evaluates recoverability by a comparison of the carrying amount of the assets to future undiscounted net cash flows expected to be generated by the assets. If the assets are impaired, the impairment recognized is measured by the amount by which the carrying amount exceeds the fair value of the assets. Fair value is generally determined by estimates of discounted cash flows or value expected to be realized in a third party sale. The discount rate used in any estimate of discounted cash flows would be the rate required for a similar investment of like risk.

108

TABLE OF CONTENTS

MACQUARIE INFRASTRUCTURE COMPANY LLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

2. Summary of Significant Accounting Policies (continued)

Impairment of Goodwill

Goodwill is tested for impairment at least annually or when there is a triggering event that indicates impairment. For the annual impairment test, the Company can make a qualitative assessment of whether it is more likely than not that a reporting unit's fair value is less than its carrying amount before applying the two-step goodwill impairment test, as discussed below. If an entity concludes it is not more likely than not that the fair value of a reporting unit is less than its carrying amount, it need not perform the two-step impairment test.

If an entity concludes that it is more likely than not that the fair value of reporting unit is less than its carrying amount, and if there is a triggering event that indicates impairment, the Company needs to perform the two-step impairment test. This requires management to make judgments in determining what assumptions to use in the calculation. The first step is to determine the estimated fair value of each reporting unit with goodwill. The reporting units of the Company, for purposes of the impairment test, are those components of operating segments for which discrete financial information is available and segment management regularly reviews the operating results of that component. When determining reporting units, components with similar economic characteristics are combined.

The Company estimates the fair value of each reporting unit by estimating the present value of the reporting unit's future discounted cash flows or value expected to be realized in a third party sale. If the recorded net assets of the reporting unit are less than the reporting unit's estimated fair value, then no impairment is indicated. Alternatively, if the recorded net assets of the reporting unit exceed its estimated fair value, then goodwill is assumed to be impaired and a second step is performed. In the second step, the implied fair value of goodwill is determined by deducting the estimated fair value of all tangible and identifiable intangible net assets of the reporting unit from the estimated fair value of the reporting unit. If the recorded amount of goodwill exceeds this implied fair value, an impairment charge is recorded for the excess.

See *Recently Issued Accounting Standards* below.

Impairment of Indefinite-lived Intangibles, Excluding Goodwill

Indefinite-lived intangibles, trademarks, are considered impaired when the carrying amount of the asset exceeds its implied fair value.

The Company estimates the fair value of each trademark using the relief-from-royalty method that discounts the estimated net cash flows the Company would have to pay to license the trademark under an arm's length licensing agreement.

If the recorded indefinite-lived intangible is less than its estimated fair value, then no impairment is indicated. Alternatively, if the recorded intangible asset exceeds its fair value, an impairment loss is recognized in an amount

equal to that excess.

Debt Issuance Costs

The Company capitalizes all direct costs incurred in connection with the issuance of debt as debt issuance costs. These costs are amortized over the contractual term of the debt instrument, which ranges from 3 to 7 years, using the effective interest method.

Derivative Instruments

The Company accounts for derivatives and hedging activities in accordance with ASC 815 *Derivatives and Hedging*, which requires that all derivative instruments be recorded on the balance sheet at their respective fair values.

109

TABLE OF CONTENTS

MACQUARIE INFRASTRUCTURE COMPANY LLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

2. Summary of Significant Accounting Policies (continued)

Previously, the Company applied hedge accounting to its derivative instruments. On the date a derivative contract was entered into, the Company designated the derivative as either a hedge of the fair value of a recognized asset or liability or of an unrecognized firm commitment (fair value hedge), a hedge of a forecasted transaction or the variability of cash flows to be received or paid related to a recognized asset or liability (cash flow hedge) or a foreign-currency fair-value or cash-flow hedge (foreign currency hedge).

The Company formally documented the hedging relationship and its risk-management objective and strategy for undertaking the hedge, the hedging instrument, the hedged item, the nature of the risk being hedged, how the hedging instrument's effectiveness in offsetting the hedged risk would be assessed prospectively and retrospectively, and a description of the method of measuring ineffectiveness. This process included linking all derivatives that were designated as hedges to specific assets and liabilities on the balance sheet or to specific firm commitments or forecasted transactions. The Company also formally assessed, both at the hedge's inception and on an ongoing basis, whether the derivatives used in hedging transactions were highly effective in offsetting changes in fair values or cash flows of hedged items. Changes in the fair value of a derivative that were highly effective and that were designated and qualified as a cash-flow hedge were recorded in other comprehensive income to the extent that the derivative was effective as a hedge, until earnings were affected by the variability in cash flows of the designated hedged item. The ineffective portion of the change in fair value of a derivative instrument that qualified as a cash-flow hedge was reported in earnings.

The Company discontinues hedge accounting prospectively when it is determined that the derivative is no longer effective in offsetting changes in the fair value or cash flows of the hedged item; the derivative expires or is sold, terminated, or exercised; the derivative is no longer designated as a hedging instrument because it is unlikely that a forecasted transaction will occur; a hedged firm commitment no longer meets the definition of a firm commitment; or management determines that designation of the derivative as a hedging instrument is no longer appropriate.

In all situations in which hedge accounting is discontinued, the Company continues to carry the derivative at its fair value on the balance sheet and recognizes any subsequent changes in its fair value in earnings. When hedge accounting is discontinued because it is probable that a forecasted transaction will not occur, the Company recognizes immediately in earnings gains and losses that were accumulated in other comprehensive income.

As of February 25, 2009 for Atlantic Aviation and effective April 1, 2009 for the other businesses, the Company elected to discontinue hedge accounting. From the dates that hedge accounting was discontinued, all movements in the fair value of the interest rate swaps are recorded directly through earnings. As a result of the discontinuance of hedge accounting, the Company will reclassify into earnings net derivative losses included in accumulated other comprehensive loss over the remaining life of the existing interest rate swaps. See Note 11, Derivative Instruments and Hedging Activities, for further discussion.

Financial Instruments

The Company's financial instruments, including cash and cash equivalents, accounts receivable, accounts payable and variable-rate senior debt, are carried at cost, which approximates their fair value because of either the short-term maturity, or variable or competitive interest rates assigned to these financial instruments.

Concentrations of Credit Risk

Financial instruments that potentially expose the Company to concentrations of credit risk consist primarily of cash and cash equivalents and accounts receivable. The Company places its cash and cash equivalents with financial institutions and its balances may exceed federally insured limits. The Company's accounts receivable are mainly derived from fuel and gas sales and services rendered under contract terms with commercial and private customers located primarily in the United States. At December 31, 2011 and 2010, there were no outstanding accounts receivable due from a single customer that accounted for more than

110

TABLE OF CONTENTS

MACQUARIE INFRASTRUCTURE COMPANY LLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

2. Summary of Significant Accounting Policies (continued)

10% of the total accounts receivable. Additionally, no single customer accounted for more than 10% of the Company's revenue during the years ended December 31, 2011, 2010 and 2009.

Income (Loss) per Share

The Company calculates income (loss) per share using the weighted average number of common shares outstanding during the period. Diluted income (loss) per share is computed using the weighted average number of common and dilutive common equivalent shares outstanding during the period. Common equivalent shares consist of shares issuable upon the exercise of stock options (using the treasury stock method) and stock units granted to the Company's independent directors; common equivalent shares are excluded from the calculation if their effect is anti-dilutive.

Comprehensive Income (Loss)

The Company follows the requirements of ASC 220 *Comprehensive Income*, for the reporting and presentation of comprehensive income (loss) and its components. This guidance requires unrealized gains or losses on the Company's available for sale securities, foreign currency translation adjustments, minimum pension liability adjustments and changes in fair value of derivatives, where hedge accounting is applied, to be included in other comprehensive income (loss). See *Recently Issued Accounting Standards* below.

Advertising

Advertising costs are expensed as incurred. Costs associated with direct response advertising programs may be prepaid and are expensed once the printed materials are distributed to the public.

Revenue Recognition

The Company recognizes revenue when persuasive evidence of an arrangement exists, delivery has occurred or services have been rendered, the seller's price to the buyer is fixed and determinable and collectability is probable.

The Gas Company

The Gas Company recognizes revenue when the services are provided. Sales of gas to customers are billed on a monthly-cycle basis. Earned but unbilled revenue is accrued and included in accounts receivable and revenue based on the amount of gas that is delivered but not billed to customers from the latest meter reading or billed delivery date to the end of an accounting period, and the related costs are charged to expense. Most revenue is based upon consumption; however, certain revenue is based upon a flat rate.

District Energy

Revenue from cooling capacity and consumption are recognized at the time of performance of service. Cash received from customers for services to be provided in the future are recorded as unearned revenue and recognized over the expected service period on a straight-line basis.

Atlantic Aviation

Revenue on fuel sales is recognized when the fuel has been delivered to the customer, collection of the resulting receivable is probable, persuasive evidence of an arrangement exists and the fee is fixed or determinable. Fuel sales are recorded net of volume discounts and rebates.

Service revenue includes certain fuelling fees. The Company receives a fuelling fee for fuelling certain carriers with fuel owned by such carriers. Revenue from these transactions is recorded based on the service fee earned and does not include the cost of the carriers fuel.

Other FBO revenue consists principally of de-icing services, landing and fuel distribution fees as well as rental income for hangar and terminal use. Other FBO revenue is recognized as the services are rendered to the customer.

TABLE OF CONTENTS

MACQUARIE INFRASTRUCTURE COMPANY LLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

2. Summary of Significant Accounting Policies (continued)

Regulatory Assets and Liabilities

The regulated utility operations of The Gas Company are subject to regulations with respect to rates, service, maintenance of accounting records, and various other matters by the Hawaii Public Utilities Commission, or HPUC. The established accounting policies recognize the financial effects of the rate-making and accounting practices and policies of the HPUC. Regulated utility operations are subject to the provisions of ASC 980, *Regulated Operations*. This guidance requires regulated entities to disclose in their financial statements the authorized recovery of costs associated with regulatory decisions. Accordingly, certain costs that otherwise would normally be charged to expense may, in certain instances, be recorded as an asset in a regulatory entity's balance sheet. The Gas Company records regulatory assets for costs that have been deferred for which future recovery through customer rates has been approved by the HPUC. Regulatory liabilities represent amounts included in rates and collected from customers for costs expected to be incurred in the future.

ASC 980 may, at some future date, be deemed inapplicable because of changes in the regulatory and competitive environments or other factors. If the Company were to discontinue the application of this guidance, the Company would be required to write-off its regulatory assets and regulatory liabilities and would be required to adjust the carrying amount of any other assets, including property, plant and equipment, that would be deemed not recoverable related to these affected operations. The Company believes its regulated operations in The Gas Company continue to meet the criteria of ASC 980 and that the carrying value of its regulated property, plant and equipment is recoverable in accordance with established HPUC rate-making practices.

Income Taxes

The Company uses the asset and liability method in accounting for income taxes. Under this method, deferred income tax assets and liabilities are determined based on differences between financial reporting and tax basis of assets and liabilities and are measured using the enacted tax rates and laws that will be in effect when the differences are expected to reverse. Commencing 2007, the Company and its subsidiaries file a consolidated U.S. federal income tax return. The Company's consolidated income tax return does not include the taxable income of IMTT and, subsequent to the sale of 49.99% of the business, the taxable income of District Energy. Those businesses file separate income tax returns.

Reclassifications

Certain reclassifications were made to the financial statements for the prior period to conform to current year presentation.

Recently Issued Accounting Standards

In September 2011, the Financial Accounting Standards Board, or FASB, issued ASU No. 2011-08, *Intangibles - Goodwill and Other (Topic 350): Testing Goodwill for Impairment*, which is effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 31, 2011. Early adoption is permitted. This ASU permits an entity to make a qualitative assessment of whether it is more likely than not that a reporting unit's fair value is less than its carrying amount before applying the two-step goodwill impairment test. If an entity concludes it is not more likely than not that the fair value of a reporting unit is less than its carrying amount, it need not perform the two-step impairment test. The Company early adopted this ASU for its annual goodwill testing on October 1, 2011, its measurement date, and concluded that it is not more likely than not that the fair values of its reporting units are less than its carrying amounts.

112

TABLE OF CONTENTS**MACQUARIE INFRASTRUCTURE COMPANY LLC****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****2. Summary of Significant Accounting Policies (continued)**

In June 2011, the FASB issued ASU No. 2011-05, *Comprehensive Income (Topic 220): Presentation of Comprehensive Income*, which is effective for fiscal years ending after December 15, 2011. Early adoption is permitted. This ASU increases the prominence of other comprehensive income in financial statements. Under this ASU, an entity will have the option to present the components of net income and comprehensive income in either one or two consecutive financial statements. The ASU eliminates the option in U.S. GAAP to present other comprehensive income in the statement of changes in equity. The Company early adopted this ASU and has reclassified the adjustments for each component of other comprehensive income (loss) from the consolidated statements of members equity to the consolidated statements of comprehensive income (loss). The Company did not early adopt the requirement to present separate line items on the consolidated statement of operations for reclassification adjustments of items out of accumulated other comprehensive income (loss) into net income. Since this ASU requires only additional disclosures on comprehensive income, the adoption did not have an impact on the Company's financial results of operations and financial condition.

3. Income (Loss) per Share

Following is a reconciliation of the basic and diluted number of shares used in computing income (loss) per share:

	Year Ended December 31,		
	2011	2010	2009
Weighted average number of shares outstanding: basic	45,995,207	45,549,803	45,020,085
Dilutive effect of restricted stock unit grants	25,808	81,807	
Weighted average number of shares outstanding: diluted	46,021,015	45,631,610	45,020,085

The effect of potentially dilutive shares for the year ended December 31, 2011 are calculated assuming that the 31,989 restricted stock unit grants provided to the independent directors on June 3, 2010, which vested in 2011, the 17,925 restricted stock unit grants on June 2, 2011, which will vest in 2012, and the 5,209 restricted stock unit grants on August 12, 2011, which will vest in 2012, had been fully converted to shares on those grant dates.

The effect of potentially dilutive shares for the year ended December 31, 2010 are calculated assuming that the 128,205 restricted stock unit grants provided to the independent directors on June 4, 2009, which vested in 2010, and the 31,989 restricted stock unit grants on June 3, 2010, which vested in 2011, had been fully converted to shares on those grant dates.

The restricted stock unit grants were anti-dilutive for the year ended December 31, 2009 due to the Company's net loss for that period.

See Note 13, *Members' Equity*, for further discussions on restricted stock unit grants.

4. Discontinued Operations

On June 2, 2010, the Company concluded the sale in bankruptcy of an airport parking business (Parking Company of America Airports or PCAA) resulting in a pre-tax gain of \$130.3 million, of which \$76.5 million related to the forgiveness of debt, and the elimination of \$201.0 million of current debt from liabilities from the Company s consolidated balance sheet. As a part of the bankruptcy sale process, substantially all of the cash proceeds were used to pay the creditors of this business and were not paid to the Company. The Company received \$602,000 from the PCAA bankruptcy estate for expenses paid on behalf of PCAA during its operations.

As a result of the approval of the sale of PCAA s assets in bankruptcy and the dissolution of PCAA during 2010, the Company has reduced its valuation allowance in 2010 on the realization of a portion of the

113

TABLE OF CONTENTS**MACQUARIE INFRASTRUCTURE COMPANY LLC****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****4. Discontinued Operations (continued)**

deferred tax assets attributable to its basis in PCAA and its consolidated federal net operating loss, or NOL. The change in the valuation allowance recorded in discontinued operations was \$9.6 million for the year ended December 31, 2010.

The results of operations from this business, for all periods presented, and the gain from the bankruptcy sale are separately reported as discontinued operations in the Company's consolidated financial statements. This business is no longer a reportable segment.

Summarized financial information for discontinued operations related to PCAA for the years ended December 31, 2010 and 2009 are as follows (\$ in thousands, except share and per share data):

	For the Year Ended December	
	31,	2009
	2010	2009
Service revenue	\$28,826	\$68,457
Gain on sale of assets through bankruptcy (pre-tax)	130,260	
Net income (loss) from discontinued operations before income taxes and noncontrolling interests	\$132,709	\$(23,647)
(Provision) benefit for income taxes	(51,386)	1,787
Net income (loss) from discontinued operations	81,323	(21,860)
Less: net income (loss) attributable to noncontrolling interests	136	(1,863)
Net income (loss) from discontinued operations attributable to MIC LLC	\$81,187	\$(19,997)
Basic income (loss) per share from discontinued operations attributable to MIC LLC interest holders	\$1.78	\$(0.44)
Weighted average number of shares outstanding at the Company level: basic	45,549,803	45,020,085
Diluted income (loss) per share from discontinued operations attributable to MIC LLC interest holders	\$1.78	\$(0.44)
Weighted average number of shares outstanding at the Company level: diluted	45,631,610	45,020,085

TABLE OF CONTENTS**MACQUARIE INFRASTRUCTURE COMPANY LLC****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****5. Acquisitions and Dispositions****Acquisition of Flightcraft FBOs**

On August 31, 2011, Atlantic Aviation completed the acquisition of the assets and liabilities of the FBOs at the Portland International and Eugene airports in Oregon for \$23.1 million (together referred to as Flightcraft). This acquisition expanded the business network into the Pacific Northwest and was funded from cash proceeds received from sale of smaller FBOs during the quarter ended June 30, 2011.

The acquisition has been accounted for as a business combination. Accordingly, the results of operations of Flightcraft are included in the consolidated statement of operations, and as a component of the Company's Atlantic Aviation business segment, since September 1, 2011. The allocation of the purchase price for Flightcraft's assets and liabilities acquired was as follow (\$ in thousands):

Accounts receivable	\$ 1,190
Inventory	1,314
Prepaid expenses	57
Total current assets	2,561
Property, equipment, land and leasehold improvements	7,297
Intangible assets:	
Contractual arrangements ⁽¹⁾	6,340
Customer relationships ⁽²⁾	1,680
Non-compete agreements ⁽³⁾	60
Trade names ⁽⁴⁾	270
Goodwill ⁽⁵⁾	5,022
Total assets acquired	\$ 23,230
Total current liabilities assumed	\$ 81
Net assets acquired, net of cash acquired	\$ 23,149

(1) Contractual arrangements are being amortized over a weighted average life of twenty seven years.

(2) Customer relationships are being amortized over a nine year period.

(3) Non-compete agreements are being amortized over a ten year period.

(4) Trade names are indefinite in life.

(5) Goodwill of \$5.0 million is expected to be deductible for tax purposes.

As of February 15, 2012, Atlantic Aviation collected approximately 96.6% of the total accounts receivable acquired.

Atlantic Aviation paid more than the fair value of the underlying net assets for the expansion of the business network into the Pacific Northwest based on the expectation that it would earn a higher rate of return on the acquisition than it would had those net assets been developed separately.

The fair value of each component was determined using various valuation techniques, including the market approach, income approach and/or cost approach. Had the acquisition occurred as of January 1, 2011, the consolidated results of operations would not have been materially different. For the year ended December 31, 2011, Atlantic Aviation recorded transaction related costs of \$414,000 in selling, general and administrative expense.

TABLE OF CONTENTS

MACQUARIE INFRASTRUCTURE COMPANY LLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

5. Acquisitions and Dispositions (continued)

Disposal of Assets at Atlantic Aviation

A strategic review commenced in 2010, and as a result, Atlantic Aviation concluded that several of its sites did not have sufficient scale or serve a market with sufficiently strong growth prospects to warrant continued operations at these sites. Therefore, Atlantic Aviation has undertaken to exit certain markets and redeploy resources that may be made available in the process into markets which it views as having better growth profiles and recorded \$1.5 million and \$17.9 million in loss on disposal of assets in the consolidated statement of operations during the years ended December 31, 2011 and 2010, respectively.

In November 2011, Atlantic Aviation exchanged one of its FBOs for additional property adjacent to one of its existing FBOs. No cash was exchanged in this transaction, but the business recognized a gain of \$223,000.

During the quarter ended June 30, 2011, Atlantic Aviation concluded the sale of FBOs at Hayward Executive Airport in California and Burlington International Airport in Vermont. As a result, during 2011 and during the fourth quarter of 2010, the business recorded losses on disposal of its assets totaling \$864,000 and \$4.4 million, respectively.

In January 2011, Atlantic Aviation concluded the sale of FBOs at Fresno Yosemite International Airport and Cleveland Cuyahoga County Airport. As a result, during 2011 and during the fourth quarter of 2010, the business recorded losses on disposal of its assets totaling \$249,000 and \$9.8 million, respectively.

In 2010, Atlantic Aviation bid for renewal of an operating lease at Atlanta's Hartsfield airport. This lease had been operating on a month to month basis since being acquired by Atlantic Aviation in August 2007. In November 2010, the lease was tentatively awarded to a party other than Atlantic Aviation. As a result, during 2011 and in December 2010, the business recorded losses on disposal of its assets totaling \$627,000 and \$3.7 million, respectively.

District Energy Noncontrolling Interest 49.99% Sale

District Energy consists of Thermal Chicago, which services customers in Chicago, Illinois and a 75% interest in Northwind Aladdin, which services customers in Las Vegas, Nevada. The remaining 25% equity interest in Northwind Aladdin is owned by Nevada Electric Investment Company, or NEICO, an indirect subsidiary of NV Energy, Inc. On December 23, 2009, the Company sold 49.99% of the membership interests of District Energy to John Hancock Life Insurance Company and John Hancock Life Insurance Company (U.S.A.) (collectively John Hancock) for \$29.5 million.

As the Company has retained majority ownership and control in District Energy, the business continues to be reported as part of the Company's consolidated financial statements. The noncontrolling interest portion of the business results are recorded in the consolidated financial statements since the date of sale. The difference between the sale price and the Company's portion of the investment sold and associated recognition of the noncontrolling interest was \$22.0

million (net of taxes), which has been recorded in additional paid in capital in the consolidated balance sheets in accordance with ASC 810-10, *Consolidation*.

TABLE OF CONTENTS**MACQUARIE INFRASTRUCTURE COMPANY LLC****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****6. Direct Financing Lease Transactions**

The Company has entered into energy service agreements containing provisions to lease equipment to customers. Under these agreements, title to the leased equipment will transfer to the customer at the end of the lease terms, which range from 5 to 25 years. The lease agreements are accounted for as direct financing leases. The components of the Company's consolidated net investments in direct financing leases at December 31, 2011 and 2010 are as follows (\$ in thousands):

	December 31, 2011	December 31, 2010
Minimum lease payments receivable	\$ 57,693	\$ 65,816
Less: unearned financing lease income	(21,291)	(26,282)
Net investment in direct financing leases	\$ 36,402	\$ 39,534
Equipment lease:		
Current portion	\$ 4,213	\$ 3,871
Long-term portion	32,189	35,663
	\$ 36,402	\$ 39,534

At December 31, 2011 and 2010, the Company did not have a reserve for the allowance for credit losses for its direct financing lease receivables.

Unearned financing lease income is recognized over the terms of the leases. Future minimum lease payments to be received by the Company are approximately \$57.7 million as follows (\$ in thousands):

2012	\$ 8,501
2013	8,028
2014	8,023
2015	7,993
2016	5,697
Thereafter	19,451
Total	\$ 57,693

7. Property, Equipment, Land and Leasehold Improvements

Property, equipment, land and leasehold improvements at December 31, 2011 and 2010 consist of the following (\$ in thousands):

Edgar Filing: Macquarie Infrastructure CO LLC - Form 10-K

	December 31, 2011	December 31, 2010
Land	\$ 4,618	\$ 4,618
Easements	5,624	5,624
Buildings	24,938	24,796
Leasehold and land improvements	329,710	320,170
Machinery and equipment	359,455	337,595
Furniture and fixtures	9,466	9,240
Construction in progress	12,501	17,070
Property held for future use	1,626	1,573
	747,938	720,686
Less: accumulated depreciation	(186,916)	(157,235)
Property, equipment, land and leasehold improvements, net ⁽¹⁾	\$ 561,022	\$ 563,451

⁽¹⁾ Includes \$127,000 and \$136,000 of capitalized interest for the years ended December 31, 2011 and 2010, respectively.

117

TABLE OF CONTENTS**MACQUARIE INFRASTRUCTURE COMPANY LLC****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****7. Property, Equipment, Land and Leasehold Improvements
(continued)**

As a result of a decline in the performance of certain asset groups at Atlantic Aviation during the quarter ended June 30, 2011, the Company evaluated such asset groups for impairment and determined the asset groups were impaired. Accordingly, the Company recognized non-cash impairment charges of \$1.4 million relating primarily to leasehold and land improvements; buildings; machinery and equipment; and furniture and fixtures at Atlantic Aviation, on assets with a carrying value of \$1.8 million. The fair value of \$405,000 of the impaired asset group was estimated using discounted cash flows. The significant unobservable inputs (level 3) used for the fair value measurement included forecasted cash flows of Atlantic Aviation and its asset groups and the discount rate. The forecasted cash flows for this business were developed using actual cash flows from 2011 and forecasted volume of jet fuel sold based on market dynamics at three small sites. The discount rate was developed using a capital asset pricing model. These charges are recorded in depreciation expense in the consolidated statement of operations during the quarter ended June 30, 2011.

During the quarter ended September 30, 2011, Atlantic Aviation consolidated two FBOs it operated at one airport. Atlantic Aviation has vacated a portion of its leased premises and recorded non-cash write-offs of \$2.9 million primarily associated with leasehold improvements.

As discussed in Note 5, *Acquisitions and Dispositions* , Atlantic Aviation acquired \$7.3 million in property, equipment, land and leasehold improvements during the Oregon FBOs acquisition during the third quarter of 2011.

8. Intangible Assets

Intangible assets at December 31, 2011 and 2010 consist of the following (\$ in thousands):

	December 31, 2011	December 31, 2010
Contractual arrangements	\$ 748,722	\$ 762,595
Non-compete agreements	9,575	9,515
Customer relationships	79,445	77,842
Leasehold rights	3,330	3,330
Trade names	15,671	15,401
Technology	460	460
	857,203	869,143
Less: accumulated amortization	(195,068)	(163,281)
Intangible assets, net	\$ 662,135	\$ 705,862

As a result of a decline in the performance of certain asset groups at Atlantic Aviation during the quarter ended June 30, 2011, the Company evaluated such asset groups for impairment and determined the asset groups were impaired.

Accordingly, the Company recognized non-cash impairment charges of \$7.3 million relating to contractual arrangements at Atlantic Aviation, on assets with a carrying value of \$7.5 million. The fair value of \$233,000 of the impaired asset group was estimated using discounted cash flows. The significant unobservable inputs (level 3) used for the fair value measurement included forecasted cash flows of Atlantic Aviation and its asset groups and the discount rate. The forecasted cash flows for this business were developed using actual cash flows from 2011 and forecasted volume of jet fuel sold based on market dynamics at three small sites. The discount rate was developed using a capital asset pricing model. These charges are recorded in amortization of intangibles in the consolidated statement of operations during the quarter ended June 30, 2011.

As discussed in Note 5, *Acquisitions and Dispositions* , Atlantic Aviation acquired \$8.4 million in intangible assets during the Oregon FBOs acquisition during the third quarter of 2011.

TABLE OF CONTENTS**MACQUARIE INFRASTRUCTURE COMPANY LLC****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****8. Intangible Assets (continued)**

Amortization expense of intangible assets for the years ended December 31, 2011, 2010 and 2009 totaled \$42.1 million, \$34.9 million and \$60.9 million, respectively.

The Company's trade names are considered to be indefinite-lived assets. The estimated future amortization expense for amortizable intangible assets to be recognized is as follow (\$ in thousands):

2012	\$ 34,184
2013	34,153
2014	34,029
2015	33,563
2016	30,540
Thereafter	479,995
Total	\$ 646,464

The goodwill balance as of December 31, 2011 is comprised of the following (\$ in thousands):

Goodwill acquired in business combinations, net of disposals	\$ 639,382
Add: goodwill acquired in 2011 acquisition	5,022
Less: accumulated impairment charges	(123,200)
Less: write-off of goodwill with disposal of assets	(5,029)
Balance at December 31, 2011	\$ 516,175

As discussed in Note 5, Acquisitions and Dispositions, Atlantic Aviation acquired \$5.0 million in goodwill during the Oregon FBOs acquisition during the third quarter of 2011.

During the quarter ended June 30, 2011 and the quarter ended December 31, 2010, the Company wrote-off \$3.1 million and \$1.9 million, respectively, of goodwill associated with the sale of FBOs discussed in Note 5, Acquisitions and Dispositions at Atlantic Aviation.

The Company tests for goodwill impairment at the reporting unit level on an annual basis on October 1st of each year and between annual tests if a triggering event indicates impairment.

9. Accrued Expenses

Accrued expenses at December 31, 2011 and 2010 consist of the following (\$ in thousands):

	December 31, 2011	December 31, 2010
Payroll and related liabilities	\$ 6,395	\$ 6,506
Interest	816	695
Insurance	1,431	1,484
Real estate taxes	845	987
Other	14,340	13,375
	\$ 23,827	\$ 23,047

10. Long-Term Debt

The Company capitalizes its operating businesses separately using non-recourse, project finance style debt. In addition, it had a credit facility at its subsidiary, MIC Inc., with various financial institutions primarily to finance acquisitions and capital expenditures, which matured on March 31, 2010. The facility was repaid in full in December 2009 and no amounts were outstanding under the revolving credit facility as of December 31, 2009 or at the facility's maturity on March 31, 2010. This facility was not renewed or replaced and the Company does not have other holding company debt.

TABLE OF CONTENTS**MACQUARIE INFRASTRUCTURE COMPANY LLC****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****10. Long-Term Debt (continued)**

All of the term debt facilities described below contain customary financial covenants, including maintaining or exceeding certain financial ratios, and limitations on capital expenditures and additional debt. The facilities include events of default, representations and warranties and other covenants that are customary for facilities of this type. A change of control will occur if the Macquarie Group, or any fund or entity managed by the Macquarie Group, fails to control a majority of the Borrower.

For a description of related party transactions associated with the Company's long-term debt, see Note 15, Related Party Transactions .

At December 31, 2011 and 2010, the Company's consolidated long-term debt comprised the following (\$ in thousands):

	December 31, 2011	December 31, 2010
The Gas Company	\$ 170,000	\$ 160,000
District Energy	170,000	170,000
Atlantic Aviation	780,588	808,884
Total	1,120,588	1,138,884
Less: current portion	(34,535)	(49,325)
Long-term portion	\$ 1,086,053	\$ 1,089,559

At December 31, 2011, future maturities of long-term debt are as follows (\$ in thousands):

2012	\$ 34,535
2013	269,548
2014	813,992
2015	338
2016	354
Thereafter	1,821
Total	\$ 1,120,588

TABLE OF CONTENTS**MACQUARIE INFRASTRUCTURE COMPANY LLC****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****10. Long-Term Debt (continued)****The Gas Company**

The acquisition of The Gas Company in June 2006 was partially financed with \$160.0 million of term loans borrowed under the two amended and restated loan agreements. One of these loan agreements provides for an \$80.0 million term loan borrowed by HGC Holdings LLC, the parent company of The Gas Company, LLC. The other loan agreement provides for an \$80.0 million term loan borrowed by The Gas Company and a \$20.0 million revolving credit facility, including a \$5.0 million letter of credit facility. The Gas Company generally intends to utilize the \$20.0 million revolving credit facility to finance its working capital and to finance or refinance its capital expenditures for regulated assets.

The obligations under the credit agreements are secured by security interests in the assets of The Gas Company as well as the equity interests of The Gas Company and HGC Holdings LLC. Material terms of the term and revolving credit facilities are presented below:

Facility Terms	Holding Company Debt	Operating Company Debt	
Borrowers	HGC	The Gas Company, LLC	
			\$20.0 million Revolver
Facilities	\$80.0 million Term Loan (fully drawn at December 31, 2011 and 2010)	\$80.0 million Term Loan (fully drawn at December 31, 2011 and 2010)	Credit Facility (\$10.0 million drawn at December 31, 2011 and no amount drawn at December 31, 2010)
Collateral	First priority security interest on HGC's assets and equity interests	First priority security interest on The Gas Company's assets and equity interests	
Maturity	June 2013	June 2013	June 2013
Amortization	Payable at maturity	Payable at maturity	Payable at maturity for utility capital expenditures
Interest Rate: Years 1 - 5	LIBOR plus 0.60%	LIBOR plus 0.40%	LIBOR plus 0.40%
Commitment Fees: Years 1 - 5			0.14% on undrawn portion
Interest Rate: Years 6 - 7	LIBOR plus 0.70%	LIBOR plus 0.50%	LIBOR plus 0.50%
Commitment Fees: Years 6 - 7			0.18% on undrawn portion

To hedge the interest commitments under the term loan, The Gas Company entered into interest rate swaps fixing 100% of the term loans at 4.8375% (excluding the margin).

In addition to customary terms and conditions for secured term loan and revolving credit agreements, the agreements provide that The Gas Company:

may not incur more than \$10.0 million of new debt; and
may not sell or dispose of more than \$10.0 million of assets per year.

The facilities also require mandatory repayment if the Company or another entity managed by the Macquarie Group fails to either own 75% of the respective borrowers or control the management and policies of the respective borrowers.

MACQUARIE INFRASTRUCTURE COMPANY LLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

10. Long-Term Debt (continued)

As part of the regulatory approval process of the Company's acquisition of The Gas Company, the Company agreed to 14 regulatory conditions from The Hawaii Public Utilities Commission that address a variety of matters. The more significant conditions include:

the non-recoverability of goodwill, transaction or transition costs in future rate cases;
a requirement that The Gas Company and HGC Holdings LLC's ratio of consolidated debt to total capital does not exceed 65%; and
a requirement to maintain \$20.0 million in readily available cash resources at The Gas Company, HGC Holdings LLC or the Company.

This ratio was 58.7% and 58.0% at December 31, 2011 and 2010, respectively, and \$20.0 million in cash resources was readily available at December 31, 2011 and 2010.

The Gas Company also has an uncommitted unsecured short-term borrowing facility of \$10.0 million that was amended during the fourth quarter of 2011 to increase its limit from \$7.5 million. The facility was renewed during the second quarter of 2011. This credit line bears interest at the lending bank's quoted rate or prime rate. The facility is available for working capital needs. No amount was outstanding for this facility at December 31, 2011.

Given the favorable interest rate environment, the Company is seeking to refinance The Gas Company's credit facilities in 2012 ahead of its maturity in mid-2013.

District Energy

District Energy has in place a term loan facility, a capital expenditure loan facility and a revolving loan facility. Proceeds of \$150.0 million, drawn under the term loan facility in 2007, were used to repay the previously existing debt outstanding, to pay a \$14.7 million make-whole payment, and to pay accrued interest, fees and transaction costs.

Material terms of the facility are presented below:

	Facility Terms
Borrower	Macquarie District Energy LLC, or MDE
Facilities	\$150.0 million term loan facility (fully drawn at December 31, 2011 and 2010)
	\$20.0 million capital expenditure loan facility (fully drawn at December 31,

2011 and 2010)

Amortization \$18.5 million revolving loan facility and letter of credit (\$7.1 million utilized at December 31, 2011 and 2010 for letters of credit)

MACQUARIE INFRASTRUCTURE COMPANY LLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

10. Long-Term Debt (continued)

Facility Terms

Mandatory prepayment

With net proceeds that exceed \$1.0 million from the sale of assets not used for replacement assets;

With insurance proceeds that exceed \$1.0 million not used to repair, restore or replace assets;

In the event of a change of control;

In years 6 and 7, with 100% of excess cash flow applied to repay the term loan and capital expenditure loan facilities;

With net proceeds from equity and certain debt issuances; and

Collateral

With net proceeds that exceed \$1.0 million in a fiscal year from contract terminations that are not reinvested.

First lien on the following (with limited exceptions):

Project revenues;

Equity of the Borrower and its subsidiaries;

Substantially all assets of the business; and

Insurance policies and claims or proceeds.

To hedge the interest commitments under the term loan facility, District Energy entered into an interest rate swap fixing 100% of the term loan facility at 5.074% (excluding the margin).

As of December 31, 2011, the Company classified \$5.3 million relating to District Energy's debt in the current portion of long-term debt in the consolidated 2011 balance sheet as it expects to repay this amount during 2012.

Atlantic Aviation

Atlantic Aviation has in place a term loan facility, a capital expenditure facility and a revolving credit facility. On February 25, 2009, Atlantic Aviation amended its credit facility to provide the business additional financial flexibility over the near and medium term. Under the amended terms, the business must apply all excess cash flow from the business to prepay additional debt whenever the leverage ratio (debt to EBITDA as defined under the loan agreement) is equal to or greater than 6.0x to 1.0 for the trailing twelve months and must use 50% of excess cash flow to prepay debt whenever the leverage ratio is equal to or greater than 5.5x to 1.0 and below 6.0x to 1.0.

During the first quarter of 2009, the Company provided the business with a capital contribution of \$50.0 million. The business paid down \$44.6 million of debt and used the remainder of the capital contribution to pay interest rate swap breakage fees and debt amendment costs. In addition, during 2009 the business used \$40.6 million of its excess cash flow to prepay \$37.0 million of the outstanding principal balance of the term loan and \$3.6 million in interest rate swap breakage fees. During 2010, the business used \$60.5 million of its excess cash flow to prepay \$55.0 million of the outstanding principal balance of the term loan and \$5.5 million in interest rate swap breakage fees. During 2011, the business used \$38.5 million of its excess cash flow to prepay \$36.2 million of the outstanding principal balance of the term loan and \$2.3 million in interest rate swap breakage fees. The Company has classified \$29.0 million relating to Atlantic Aviation's term loan debt in current portion of long-term debt in the consolidated 2011 balance sheet as it expects to repay this amount during 2012.

On February 10, 2012, Atlantic Aviation used \$6.8 million of excess cash flow to prepay \$6.5 million of the outstanding principal balance of the term debt under this facility and incurred \$248,000 in interest rate swap breakage fees.

MACQUARIE INFRASTRUCTURE COMPANY LLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

10. Long-Term Debt (continued)

The key terms of the loan agreement of Atlantic Aviation, as revised on February 25, 2009, are presented below:

Borrower	Facility Terms Atlantic Aviation
Facilities	\$900.0 million term loan facility (outstanding balance of \$727.2 million and \$763.3 million at December 31, 2011 and 2010, respectively) \$50.0 million capital expenditure facility (\$50.0 million and \$45.4 million drawn at December 31, 2011 and 2010, respectively) \$18.0 million revolving working capital and letters of credit facility (\$7.6 million and \$11.7 million utilized to back letters of credit at December 31, 2011 and 2010, respectively)
Amortization	Payable at maturity Years 1 to 5: 100% excess cash flow when Leverage Ratio is 6.0x or above 50% excess cash flow when Leverage Ratio is between 6.0x and 5.5x
Interest type	100% of excess cash flow in years 6 and 7 Floating
Interest rate and fees	Years 1 5:

LIBOR plus 1.6% or

Base Rate (for revolving credit facility only): 0.6% above the greater of: (i) the prime rate or (ii) the federal funds rate plus 0.5%

Years 6 - 7:

LIBOR plus 1.725% or

Base Rate (for revolving credit facility only): 0.725% above the greater of: (i) the prime rate or (ii) the federal funds rate plus 0.5%

Maturity

October 2014

Mandatory prepayment

With net proceeds that exceed \$1.0 million from the sale of assets not used for replacement assets;

With net proceeds of any debt other than permitted debt;

With net insurance proceeds that exceed \$1.0 million not used to repair, restore or replace assets;

In the event of a change of control;

Additional mandatory prepayment based on leverage grid;

With any FBO lease termination payments received; and

Collateral

With excess cash flows in years 6 and 7.

First lien on the following (with limited exceptions):

Project revenues;

Equity of the borrower and its subsidiaries; and

Insurance policies and claims or proceeds.

TABLE OF CONTENTS

MACQUARIE INFRASTRUCTURE COMPANY LLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

10. Long-Term Debt (continued)

To hedge the interest risk associated with commitments under Atlantic Aviation's term loan, Atlantic Aviation entered into a number of interest rate swaps with various maturity dates to hedge 100% of the term loan through October 16, 2012. As of December 31, 2011, Atlantic Aviation has only one remaining swap hedging 100% of the outstanding balance of the term loan, with a hedge rate of 5.19%.

In addition to the debt facilities described above, during 2010, Atlantic Aviation raised a \$3.5 million stand-alone debt facility to partially fund the construction of a new FBO at Oklahoma City Will Rogers World Airport. At December 31, 2011 and 2010, the outstanding balance on the stand-alone facility was \$3.4 million and \$141,000, respectively.

The Company has classified \$292,000 in current portion of long-term debt in the 2011 balance sheet.

11. Derivative Instruments and Hedging Activities

The Company has interest rate-related derivative instruments to manage its interest rate exposure on its debt instruments. The Company does not enter into derivative instruments for any purpose other than economic interest rate hedging. That is, the Company does not speculate using derivative instruments.

By using derivative financial instruments to hedge exposures to changes in interest rates, the Company exposes itself to credit risk and market risk. Credit risk is the failure of the counterparty to perform under the terms of the derivative contract. When the fair value of a derivative contract is positive, the counterparty owes the Company, which creates credit risk for the Company. When the fair value of a derivative contract is negative, the Company owes the counterparty and, therefore, it does not possess credit risk. The Company minimizes the credit risk in derivative instruments by entering into transactions with high-quality counterparties.

Market risk is the adverse effect on the value of a financial instrument that results from a change in interest rates. The market risk associated with interest rates is managed by establishing and monitoring parameters that limit the types and degree of market risk that may be undertaken.

Debt Obligations

The Company and its businesses have in place variable-rate debt. Management believes that it is prudent to limit the variability of a portion of the business' interest payments. To meet this objective, the Company enters into interest rate swap agreements to manage fluctuations in cash flows resulting from interest rate risk on a majority of its debt with a variable-rate component. These swaps change the variable-rate cash flow exposure on the debt obligations to fixed cash flows. Under the terms of the interest rate swaps, the Company receives variable interest rate payments and makes fixed interest rate payments, thereby creating the equivalent of fixed-rate debt for the portion of the debt that is swapped.

At December 31, 2011, the Company had \$1.1 billion of current and long-term debt, \$1.0 billion of which was economically hedged with interest rate swaps and \$83.4 million of which was unhedged. At December 31, 2010, the Company had \$1.1 billion of current and long-term debt, \$1.1 billion of which was economically hedged with interest rate swaps and \$65.5 million of which was unhedged.

As discussed in Note 10, Long-Term Debt, Atlantic Aviation must apply all of its excess cash flow to prepay debt whenever the leverage ratio, as defined by the amended credit facility, is equal to or greater than 6.0x to 1.0 for the trailing twelve months and must use 50% of excess cash flow to prepay debt whenever the leverage ratio is equal to or greater than 5.5x to 1.0 and below 6.0x to 1.0. As a result, \$1.5 million of accumulated other comprehensive loss in the consolidated balance sheet related to Atlantic Aviation's derivatives was reclassified to interest expense in the consolidated statement of operations for the year ended December 31, 2010. Atlantic Aviation will record additional reclassifications from accumulated other comprehensive loss to interest expense as the business continues to pay down its debt more quickly than anticipated.

TABLE OF CONTENTS

MACQUARIE INFRASTRUCTURE COMPANY LLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

11. Derivative Instruments and Hedging Activities (continued)

Similarly, excess cash flow generated at District Energy must be applied toward the principal balance of the term loan during the last two years before maturity. District Energy will record reclassifications from accumulated other comprehensive loss to interest expense when the business pays down its debt more quickly than anticipated.

In March 2009, Atlantic Aviation, The Gas Company and District Energy entered into interest rate basis swap contracts that expired on March 31, 2010. These contracts effectively changed the interest rate index on each business existing swap contracts from the 90-day LIBOR rate to the 30-day LIBOR rate plus a margin of 19.50 basis points for Atlantic Aviation and 24.75 basis points for The Gas Company and District Energy. This transaction, adjusted for the prepayments of outstanding principal on the term loan debt at Atlantic Aviation, resulted in \$580,000 and \$1.8 million lower interest expense for these businesses for the quarter ended March 31, 2010 and the year ended December 31, 2009, respectively.

Effective February 25, 2009 for Atlantic Aviation and effective April 1, 2009 for the Company's other businesses, the Company elected to discontinue hedge accounting. In prior periods, when the Company applied hedge accounting, changes in the fair value of derivatives that effectively offset the variability of cash flows on the Company's debt interest obligations were recorded in other comprehensive income or loss. From the dates that hedge accounting was discontinued, all movements in the fair value of the interest rate swaps are recorded directly through earnings. As interest payments are made, a portion of the other comprehensive loss recorded under hedge accounting is also reclassified into earnings. The Company will reclassify into earnings \$15.4 million of net derivative losses, included in accumulated other comprehensive loss as of December 31, 2011, over the remaining life of the existing interest rate swaps, of which approximately \$12.4 million will be reclassified over the next 12 months.

The Company measures derivative instruments at fair value using the income approach which discounts the future net cash settlements expected under the derivative contracts to a present value. These valuations utilize primarily observable (level 2) inputs, including contractual terms, interest rates and yield curves observable at commonly quoted intervals.

The Company's fair value measurements of its derivative instruments and the related location of the liabilities associated with the hedging instruments within the consolidated balance sheets at December 31, 2011 and December 31, 2010 were as follows (\$ in thousands):

Balance Sheet Location	Liabilities at Fair Value ⁽¹⁾	
	December 31, 2011	December 31, 2010
	Interest Rate Swap Contracts	
	Not Designated as Hedging Instruments	
	December 31, 2011	December 31, 2010

Edgar Filing: Macquarie Infrastructure CO LLC - Form 10-K

		2011	
Fair value of derivative instruments	current liabilities	\$ (39,339)	\$ (43,496)
Fair value of derivative instruments	non-current liabilities	(15,576)	(51,729)
Total interest rate derivative contracts		\$ (54,915)	\$ (95,225)

(1) Fair value measurements at reporting date were made using significant other observable inputs (level 2).

126

TABLE OF CONTENTS**MACQUARIE INFRASTRUCTURE COMPANY LLC****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****11. Derivative Instruments and Hedging Activities (continued)**

The Company's hedging activities for the years ended December 31, 2011 and 2010 and the related location within the consolidated financial statements were as follows for derivatives not designated as hedging instruments (\$ in thousands):

Financial Statement Account	Derivatives Not Designated as Hedging Instruments ⁽¹⁾ Amount of Gain/Loss Recognized in Interest Expense for the Years Ended December 31,	
	2011 ⁽²⁾	2010 ⁽³⁾
Interest expense	\$ (35,007)	\$ (81,273)
Total	\$ (35,007)	\$ (81,273)

(1) All derivatives are interest rate swap contracts.

(2) Net gains recognized in interest expense for the year ended December 31, 2011 includes \$50.9 million in interest rate swap payments, offset by net unrealized derivative gains of \$15.9 million, arising from:
the change in fair value of interest rate swaps from the discontinuation of hedge accounting; and
interest rate swap break fees related to the pay down of debt at Atlantic Aviation.

(3) Net losses recognized in interest expense for the year ended December 31, 2010 includes \$52.4 million in interest rate swap payments and \$28.9 million in net unrealized derivative losses.

All of the Company's derivative instruments are collateralized by all of the assets of the respective businesses.

12. Notes Payable and Capital Leases

The Company has existing notes payable with various finance companies for the purchase of equipment. The notes are secured by the equipment and require monthly payments of principal and interest. The Company also leases certain equipment under capital leases. The following is a summary of the maturities of the notes payable and the future minimum lease payments under capital leases, together with the present value of the minimum lease payments, as of December 31, 2011 (\$ in thousands):

	Notes Payable	Capital Leases
2012	\$ 1,008	\$ 944
2013	93	937
2014	93	819

2015	78	6
2016		
Thereafter		
Present value of minimum payments	1,272	2,706
Less: current portion	(1,008)	(944)
Long-term portion	\$ 264	\$ 1,762

The net book value of equipment under capital leases at December 31, 2011 and 2010 was \$2.7 million and \$238,000, respectively.

13. Members Equity

The Company is authorized to issue 500,000,000 LLC interests. Each outstanding LLC interest of the Company is entitled to one vote on any matter with respect to which holders of LLC interests are entitled to vote.

TABLE OF CONTENTS

MACQUARIE INFRASTRUCTURE COMPANY LLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

13. Members Equity (continued)

Dividends

The Company's Board of Directors have made or declared the following dividends during 2011:

Declared	Period Covered	\$ per LLC Interest	Record Date	Payable Date
February 21, 2012	Fourth quarter 2011	\$ 0.20	March 5, 2012	March 8, 2012
October 31, 2011	Third quarter 2011	\$ 0.20	November 14, 2011	November 17, 2011
August 1, 2011	Second quarter 2011	\$ 0.20	August 15, 2011	August 18, 2011
May 2, 2011	First quarter 2011	\$ 0.20	May 11, 2011	May 18, 2011

The Company has determined that the dividends paid in 2011 are characterized as a taxable dividend for tax purposes. The Company anticipates that the dividend will be eligible for treatment as qualified dividend income for U.S. federal income tax purposes, subject to the shareholder having met the holding period requirements as defined by the Internal Revenue Code. Holders of MIC LLC interests are encouraged to seek their own tax advice with regard to their investment in MIC.

The dividends paid have been recorded as a reduction to LLC interests in the members' equity section of the consolidated balance sheets.

The declaration and payment of any future dividends will be subject to a decision of the Company's Board of Directors. The Board will take into account such matters as the state of the capital markets and general business conditions, the Company's financial condition, results of operations, capital requirements and any contractual, legal and regulatory restrictions on the payment of dividends by the Company to its shareholders or by its subsidiaries to the Company, and any other factors that it deems relevant. In particular, each of the Company's businesses and investments have substantial debt commitments and restrictive covenants, which must be satisfied before any of them can make distributions to the Company. Any or all of these factors could affect both the timing and amount, if any, of future dividends.

Independent Director Equity Plan

The Company has an independent director equity plan, which provides for automatic, non-discretionary awards of director stock units as an additional fee for the independent directors' services on the Board. The purpose of this plan is to promote the long-term growth and financial success of the Company by attracting, motivating and retaining independent directors of outstanding ability. Only the Company's independent directors may participate in the plan.

On the date of each annual meeting, each director receives a grant of stock units equal to \$150,000 divided by the average closing sale price of the stock during the 10-day period immediately preceding the annual meeting of the Company's stockholders. The stock units vest, assuming continued service by the director, on the date immediately preceding the next annual meeting of the Company's stockholders.

TABLE OF CONTENTS**MACQUARIE INFRASTRUCTURE COMPANY LLC****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****13. Members Equity (continued)**

The Company has issued the following stock to the Board of Directors under this plan:

Date of Grant	Stock Units Granted		Price of Stock Units Granted	Date of Vesting
December 21, 2004	7,644	(1)	\$ 25.00	May 24, 2005
May 25, 2005	15,873		\$ 28.35	May 25, 2006
May 25, 2006	16,869		\$ 26.68	May 23, 2007
May 24, 2007	10,314		\$ 43.63	May 26, 2008
May 27, 2008	14,115		\$ 31.88	June 3, 2009
June 4, 2009	128,205		\$ 3.51	June 2, 2010
June 3, 2010	31,989		\$ 14.07	June 1, 2011
June 2, 2011	17,925		\$ 25.10	(2)
August 12, 2011 ⁽³⁾	5,209		\$ 23.21	(3) (2)

(1) Pro rata basis relating to the period from the closing of the initial public offering through the anticipated date of the Company's first annual meeting of stockholders.

(2) Date of vesting will be the day immediately preceding the 2012 annual meeting of the Company's LLC interest holders.

(3) Effective August 12, 2011, the Company elected a fourth independent director to serve as a director of the Company until the next annual meeting of the LLC interest holders. The restricted stock units granted were calculated on a pro rata basis from the date of election and the average closing sale price of the stock during the 10-day period immediately preceding the date of election.

14. Reportable Segments

The Company's operations are broadly classified into the energy-related businesses and an aviation-related business, Atlantic Aviation. The energy-related businesses consist of two reportable segments: The Gas Company and District Energy. The energy-related businesses also include a 50% investment in IMTT, which is accounted for under the equity method. Financial information for IMTT's business as a whole is presented below (\$ in thousands):

	As of, and for the Year Ended, December 31,		
	2011	2010	2009
Revenue	\$447,092	\$557,184	\$346,175
Net income	\$54,957	\$72,064	\$54,584
Interest expense, net	52,257	50,335	2,130
Provision of income taxes	34,820	53,521	38,842

Edgar Filing: Macquarie Infrastructure CO LLC - Form 10-K

Depreciation and amortization	64,470	61,277	55,998
Unrealized gains on derivative instruments			(3,306)
Other non-cash income	(114)	(361)	(590)
EBITDA excluding non-cash items ⁽¹⁾	\$206,390	\$236,836	\$147,658
Capital expenditures paid	\$122,268	\$107,832	\$137,008

MACQUARIE INFRASTRUCTURE COMPANY LLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

14. Reportable Segments (continued)

All of the business segments are managed separately and management has chosen to organize the Company around the distinct products and services offered.

Energy-Related Businesses

IMTT provides bulk liquid storage and handling services in North America through ten terminals located on the East, West and Gulf Coasts, the Great Lakes region of the United States and partially owned terminals in Quebec and Newfoundland, Canada. IMTT derives the majority of its revenue from storage and handling of petroleum products, various chemicals, renewable fuels, and vegetable and animal oils. Based on storage capacity, IMTT operates one of the largest third-party bulk liquid storage terminal businesses in the United States.

The revenue from The Gas Company segment is included in revenue from product sales. Revenue is generated from the distribution and sales of synthetic natural gas, or SNG, and liquefied petroleum gas, or LPG. Revenue is primarily a function of the volume of SNG and LPG consumed by customers and the price per thermal unit or gallon charged to customers. Because both SNG and LPG are derived from petroleum, revenue levels, without organic growth, will generally track global oil prices. The utility revenue of The Gas Company reflects fuel adjustment charges, or FACs, through which changes in fuel costs are passed through to customers.

The revenue from the District Energy segment is included in service revenue and financing and equipment lease income. Included in service revenue is capacity revenue, which relates to monthly fixed contract charges, and consumption revenue, which relates to contractual rates applied to actual usage. Financing and equipment lease income relates to direct financing lease transactions and equipment leases to the business various customers. Finance lease revenue, recorded on the consolidated statement of operations, is the interest portion of lease payments received from equipment leases with various customers primarily in Las Vegas. The principal portion of the cash receipts on these equipment leases are recorded in the operating activities of the consolidated cash flow statement. District Energy provides its services to buildings primarily in the downtown Chicago, Illinois area and to a casino and a shopping mall located in Las Vegas, Nevada.

Atlantic Aviation

The Atlantic Aviation segment derives the majority of its revenues from fuel sales and from other airport services, including de-icing, aircraft hangarage and other aviation services. All of the revenue of Atlantic Aviation is generated at 65 airports in the U.S.

Selected information by segment is presented in the following tables. The tables do not include financial data for the Company's equity investment in IMTT.

In accordance with FASB ASC 280 *Segment Reporting*, the Company has disclosed earnings before interest, taxes, depreciation and amortization (EBITDA) excluding non-cash items as a key performance metric relied on by management in the evaluation of the Company's performance. Non-cash items include impairments, derivative gains and losses and adjustments for other non-cash items reflected in the statements of operations. The Company believes EBITDA excluding non-cash items provides additional insight into the performance of the operating businesses relative to each other and similar businesses without regard to their capital structure, and their ability to service or reduce debt, fund capital expenditures and/or support distributions to the holding company. EBITDA excluding non-cash items is reconciled to net income or loss.

EBITDA excluding non-cash items for the Company's consolidated reportable segments is shown in the tables below (\$ in thousands). Allocation of corporate expenses, intercompany fees and the tax effect have been excluded as they are eliminated on consolidation.

	Year Ended December 31, 2011			
	Energy-related Businesses			
	The Gas Company	District Energy	Atlantic Aviation ⁽¹⁾	Total Reportable Segments
Net income	\$ 18,172	\$ 304	\$ 9,642	\$ 28,118

Edgar Filing: Macquarie Infrastructure CO LLC - Form 10-K

Amortization of intangibles	823	1,368	39,916	42,107
Loss on disposal of assets			617	617
Other non-cash expense	2,279	964	228	3,471
EBITDA excluding non-cash items	\$ 49,032	\$ 22,695	\$ 126,680	\$ 198,407

(1) Includes non-cash impairment charges of \$8.7 million recorded during the quarter ended June 30, 2011, consisting of \$7.3 million related to intangible assets (in amortization of intangibles) and \$1.4 million related to property, equipment, land and leasehold improvements (in depreciation). In addition, during the quarter ended September 30, 2011, Atlantic Aviation consolidated two FBOs it operated at one airport. Atlantic Aviation has vacated a portion of its leased premises and recorded non-cash write-offs of \$2.9 million primarily associated with leasehold improvements in depreciation expense in the consolidated statement of operations.

Depreciation includes depreciation expense for District Energy, which is reported in cost of services in the consolidated statement of operations. Depreciation also includes non-cash impairment charges of \$1.4 million and \$7.5 million recorded by Atlantic Aviation for the quarter ended June 30, 2011 and during the first six months of (1)2009, respectively. In addition, during the quarter ended September 30, 2011, Atlantic Aviation consolidated two FBOs it operated at one airport. Atlantic Aviation has vacated a portion of its leased premises and recorded non-cash write-offs of \$2.9 million primarily associated with leasehold improvements in depreciation expense in the consolidated statement of operations.

Amortization expense includes non-cash impairment charges of \$7.3 million and \$23.3 million for contractual (2)arrangements recorded by Atlantic Aviation during the quarter ended June 30, 2011 and the first six months of 2009, respectively.

(3) Non-cash loss on disposal of assets includes \$617,000 and \$17.9 million for FBOs sold at Atlantic Aviation during the year ended December 31, 2011 and 2010, respectively.

Capital expenditures for the Company's reportable segments were as follows (\$ in thousands):

15. Related Party Transactions

Management Services Agreement with Macquarie Infrastructure Management (USA) Inc. (the Manager)

The Manager acquired 2,000,000 shares of trust stock concurrently with the closing of the initial public offering in December 2004, with an aggregate purchase price of \$50.0 million, at a purchase price per share equal to the initial public offering price of \$25.00, which were exchanged for LLC interests on June 25, 2007. Pursuant to the terms of the Management Agreement (discussed below), the Manager may sell these LLC interests at any time. The Manager has also received additional shares of trust stock and LLC interests (the LLC interests replacing the trust stock

following the dissolution of the Trust in June 2007) by reinvesting some performance fees and base management fees. As part of the equity offering which closed in July 2007, the Manager sold 599,000 of its LLC interests at a price of \$40.99 per LLC interest. At December 31, 2011, the Manager held 4,388,345 LLC interests of the Company.

TABLE OF CONTENTS**MACQUARIE INFRASTRUCTURE COMPANY LLC****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****15. Related Party Transactions (continued)**

Since January 1, 2011, the Company paid the Manager cash dividends on LLC interests held for the following periods:

Declared	Period Covered	\$ per LLC Interest	Record Date	Payable Date	Amount Paid to Manager (in thousands)
February 21, 2012	Fourth quarter 2011	\$ 0.20	March 5, 2012	March 8, 2012	\$ (1)
October 31, 2011	Third quarter 2011	\$ 0.20	November 14, 2011	November 17, 2011	\$ 852
August 1, 2011	Second quarter 2011	\$ 0.20	August 15, 2011	August 18, 2011	\$ 816
May 2, 2011	First quarter 2011	\$ 0.20	May 11, 2011	May 18, 2011	\$ 787

(1) The amount of dividend payable to the Manager for the fourth quarter of 2011 will be determined on March 5, 2012, the record date.

The Company entered into a management services agreement, or Management Agreement, with the Manager pursuant to which the Manager manages the Company's day-to-day operations and oversees the management teams of the Company's operating businesses. In addition, the Manager has the right to appoint the Chairman of the Board of the Company, and an alternate, subject to minimum equity ownership, and to assign, or second, to the Company, on a permanent and wholly-dedicated basis, employees to assume the role of Chief Executive Officer and Chief Financial Officer and second or make other personnel available as required.

In accordance with the Management Agreement, the Manager is entitled to a quarterly base management fee based primarily on the Company's market capitalization, and a performance fee, based on the performance of the Company's stock relative to a U.S. utilities index. For the years ended December 31, 2011, 2010 and 2009, the Manager did not earn a performance fee.

For the years ended December 31, 2011, 2010 and 2009, the Company incurred base management fees of \$15.5 million, \$10.1 million and \$4.8 million, respectively. The unpaid portion of the fees at the end of each reporting period is included in due to manager-related party in the consolidated balance sheets. The following table shows the Manager's election to reinvest its quarterly base management fees in additional LLC interests:

Period	Base Management	LLC Interests Issued	Issue Date
--------	--------------------	-------------------------	------------

Edgar Filing: Macquarie Infrastructure CO LLC - Form 10-K

	Fee Amount (\$ in thousands)		
2011 Activities:			
Fourth quarter 2011	\$ 4,222	(1)	(1)

TABLE OF CONTENTS

MACQUARIE INFRASTRUCTURE COMPANY LLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

15. Related Party Transactions (continued)

The base management fees in the amount of \$2.3 million and \$2.4 million for the second and third quarters of 2010, respectively, were paid in cash to the Manager during the third and fourth quarter of 2010, respectively. The base management fee in the amount of \$462,000 for the first quarter of 2009 was paid in cash to the Manager during the second quarter of 2009.

The Manager is not entitled to any other compensation and all costs incurred by the Manager, including compensation of seconded staff, are paid by the Manager out of its base management fee. However, the Company is responsible for other direct costs including, but not limited to, expenses incurred in the administration or management of the Company and its subsidiaries and investments, income taxes, audit and legal fees, acquisitions and dispositions and its compliance with applicable laws and regulations. During the years ended December 31, 2011, 2010 and 2009, the Manager charged the Company \$286,000, \$323,000 and \$275,000, respectively, for reimbursement of out-of-pocket expenses. The unpaid portion of the out-of-pocket expenses at the end of the reporting period is included in due to manager-related party in the consolidated balance sheet.

Advisory and Other Services from the Macquarie Group

The Macquarie Group, and wholly-owned subsidiaries within the Macquarie Group, including Macquarie Bank Limited, or MBL, and Macquarie Capital (USA) Inc., or MCUSA, have provided various advisory and other services and incurred expenses in connection with the Company's equity raising activities, acquisitions and debt structuring for the Company and its businesses. Underwriting fees are recorded in members' equity as a direct cost of equity offerings.

Advisory fees and out-of-pocket expenses relating to acquisitions are expensed as incurred. Debt arranging fees are deferred and amortized over the term of the credit facility. No amounts were incurred during the year ended December 31, 2011. During 2010, the Company incurred the following charges (\$ in thousands):

Year Ended December 31, 2010

Holding company debt restructuring advice advisory services from MCUSA \$ 500

Long-Term Debt

Until March 31, 2010, the Company had a revolving credit facility provided by various financial institutions, including entities within the Macquarie Group. The facility was repaid in full during 2009 and no amounts were outstanding under the revolving credit facility at the facility's maturity on March 31, 2010. Amounts relating to the Macquarie Group's portion of this revolving credit facility comprised of the following during the year ended December 31, 2010 (\$ in thousands):

Year Ended December 31, 2010

\$4,444

Edgar Filing: Macquarie Infrastructure CO LLC - Form 10-K

Revolving credit facility commitment provided by Macquarie Group during January 1, 2010 through March 31, 2010

15. Related Party Transactions (continued)

Derivative Instruments and Hedging Activities

The Company has derivative instruments in place to fix the interest rate on certain outstanding variable-rate term loan facilities. MBL has provided interest rate swaps for Atlantic Aviation, which matured in December 2010, and The Gas Company. At December 31, 2009, Atlantic Aviation had \$818.4 million of its variable-rate term loans hedged, of which MBL was providing the interest rate swaps for a notional amount of \$307.0 million. The remainder of the swaps are from an unrelated third party. During the years ended December 31, 2010 and 2009, Atlantic Aviation made net payments to MBL of \$13.0 million and \$14.1 million, respectively, in relation to these swaps.

As discussed in Note 10, Long-Term Debt, for the years ended December 31, 2010 and 2009, Atlantic Aviation paid \$5.5 million and \$8.8 million, respectively, in interest rate swap breakage fees, of which \$496,000 and \$1.8 million, respectively, was paid to MBL.

At December 31, 2011 and 2010, The Gas Company had \$160.0 million of its term loans hedged, of which MBL was providing the interest rate swaps for a notional amount of \$48.0 million. The remainder of the swaps are from an unrelated third party. During the years ended December 31, 2011, 2010 and 2009, The Gas Company made net payments to MBL of \$2.2 million, \$2.1 million and \$1.9 million, respectively, in relation to these swaps.

Other Transactions

Macquarie, through the Macquarie Insurance Facility (MIF), has an aggregated insurance buying program. By combining the insurance premiums of Macquarie owned and managed funds, MIF has been able to deliver very competitive terms to businesses that participate in the facility. MIF earns a commission from the insurers. In February 2012, the Company purchased its Directors and Officers liability insurance utilizing several of the MIF insurers. No payments were made to MIF by the Company.

Atlantic Aviation, The Gas Company, and District Energy purchase casualty and property insurance coverage from insurance underwriters who then pay commissions to MIF. During 2011 and 2010, Atlantic Aviation, The Gas Company, and District Energy renewed their casualty and property insurance coverage. For the years ended December 31, 2011 and 2010, no payments were made directly to MIF.

In August 2010, Macquarie AirFinance, or MAF, an indirect subsidiary of Macquarie Group Limited, parked an aircraft at one of Atlantic Aviation's airports. During the year ended December 31, 2010, Atlantic Aviation recorded \$11,000 in revenue from MAF's agent. As of December 31, 2010, there was no receivable balance outstanding from MAF.

During 2010, Atlantic Aviation entered into a copiers lease agreement with Macquarie Equipment Finance, or MEF, an indirect subsidiary of Macquarie Group Limited. For the years ended December 31, 2011 and 2010, Atlantic

Aviation incurred \$23,000 and \$31,000, respectively, in lease expense on these copiers. As of December 31, 2011 and 2010, Atlantic Aviation had prepaid the January 2012 and January 2011, respectively, monthly payment to MEF for \$2,000, which is included in prepaid expenses in the consolidated balance sheet for both periods.

On March 30, 2009, The Gas Company entered into licensing agreements with Utility Service Partners, Inc. and America's Water Heater Rentals, LLC, both indirect subsidiaries of Macquarie Group Limited, to enable these entities to offer products and services to The Gas Company's customer base. No payments were made under these arrangements during the years ended December 31, 2011, 2010 and 2009.

On August 29, 2008, Macquarie Global Opportunities Partners, or MGOP, a private equity fund managed by the Macquarie Group, completed the acquisition of the jet membership, retail charter and fuel management business units previously owned by Sentient Jet Holdings, LLC. The new company is called Sentient Flight Group (referred to hereafter as Sentient). Sentient was an existing customer of Atlantic Aviation. For the

TABLE OF CONTENTS**MACQUARIE INFRASTRUCTURE COMPANY LLC****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****15. Related Party Transactions (continued)**

years ended December 31, 2011, 2010 and 2009, Atlantic Aviation recorded \$20.5 million, \$16.6 million and \$9.6 million, respectively, in revenue from Sentient. As of December 31, 2011 and 2010, Atlantic Aviation had \$452,000 and \$269,000, respectively, in receivables from Sentient, which is included in accounts receivable in the consolidated balance sheets. During the year ended December 31, 2010, Atlantic Aviation paid \$15,000 to Sentient for charter services rendered.

In addition, the Company and several of its subsidiaries have entered into a licensing agreement with the Macquarie Group related to the use of the Macquarie name and trademark. The Macquarie Group does not charge the Company any fees for this license.

16. Income Taxes

The Company and its subsidiaries are subject to income taxes. The Company files a consolidated U.S. income tax return with its wholly-owned subsidiaries. District Energy and IMTT each file separate consolidated federal income tax returns with their respective subsidiaries. The Company includes in its income the taxable portion of distributions received from its interests in IMTT and District Energy. The taxable portion of these distributions generally qualify for the 80% dividends received deduction. The Company and its subsidiaries file separate and combined state income tax returns.

Components of the Company's income tax benefit or expense related to the income or loss from continuing operations for the years ended December 31, 2011, 2010 and 2009 were as follows (\$ in thousands):

	Year Ended December 31,		
	2011	2010	2009
Current taxes:			
Federal	\$ 222	\$	\$ 334
State	3,281	2,401	1,859
Total current tax provision	\$ 3,503	\$ 2,401	\$ 2,193
Deferred taxes:			
Federal	\$ 16,422	\$ (6,122)	\$ (20,175)
State	1,476	(3,171)	(7,333)
Total deferred tax provision (benefit)	17,898	(9,293)	(27,508)
Change in valuation allowance	1,317	(1,805)	9,497
Total tax provision (benefit)	\$ 22,718	\$ (8,697)	\$ (15,818)

In January 2011, the State of Illinois enacted the Taxpayer Accountability and Budget Stabilization Act. The legislation increases the corporate income tax rate to 7.0% from 4.8% for taxable years beginning on or after January 1, 2011 and prior to January 1, 2015; to 5.25% for taxable years beginning on or after January 1, 2015 and prior to

January 1, 2025; and returns the rate to 4.8% for taxable years beginning on or after January 1, 2025. The income tax expense for 2011 includes a deferred income tax expense of approximately \$147,000 to reflect the effects of the rate increase. In addition, the Act suspends the use of state net operating loss carryforwards until 2012, and limits the annual utilization in 2012 through 2014 to \$100,000 per year.

The Company's sale in 2010 of its investment in the off airport parking business, PCAA, resulted in a capital loss of approximately \$10.4 million, which the Company carried back to offset, in part, the 2009 capital gain on the sale of the 49.99% interest in District Energy. This carryback reduced the federal NOL used in 2009 by approximately \$10.4 million.

The Company sold 49.99% of District Energy in 2009 and converted a holding company within the District Energy group from an entity disregarded for income tax purposes to a taxable corporation, resulting in

TABLE OF CONTENTS**MACQUARIE INFRASTRUCTURE COMPANY LLC****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****16. Income Taxes (continued)**

\$10.2 million income tax provision. This provision was reflected as a reduction in the \$32.2 million gain on the sale and recorded in additional paid in capital in the consolidated 2009 balance sheet. This taxable income was offset by the Company's other consolidated taxable loss and its NOL carryforwards in 2009.

The tax effects of temporary differences give rise to significant portions of the deferred tax assets and deferred tax liabilities at December 31, 2011 and 2010, are presented below (\$ in thousands):

	At December 31,	
	2011	2010
Deferred tax assets:		
Net operating loss carryforwards	\$ 63,415	\$ 66,901
Lease transaction costs	1,111	1,478
Deferred revenue	1,586	1,286
Accrued compensation	11,026	9,616
Accrued expenses	959	1,953
Other	2,192	1,630
Unrealized losses	21,902	38,093
Allowance for doubtful accounts	177	244
Total gross deferred tax assets	102,368	121,201
Less: valuation allowance	(10,490)	(9,173)
Net deferred tax assets after valuation allowance	\$ 91,878	\$ 112,028
Deferred tax liabilities:		
Intangible assets	\$ (157,686)	\$ (162,615)
Investment basis difference	(84,897)	(4,043)
Property and equipment	(6,316)	(81,500)
Prepaid expenses	(1,139)	(1,168)
Total deferred tax liabilities	(250,038)	(249,326)
Net deferred tax liability	(158,160)	(137,298)
Less: current deferred tax asset	(19,102)	(19,030)
Noncurrent deferred tax liability	\$ (177,262)	\$ (156,328)

At December 31, 2011, the Company and its wholly owned subsidiaries had federal income tax NOL carryforwards of approximately \$135.2 million, which are available to offset future taxable income, if any, through 2030. However, the Company has placed a full valuation allowance on \$7.8 million of these NOLs, as their probability of being realized is less than more likely than not. Approximately \$35.0 million of these NOLs may be limited, on an annual basis, due to the change of control for tax purposes of the respective subsidiaries in which such losses were incurred. In addition,

District Energy has NOL carryforwards of approximately \$16.4 million, all of which are subject to limitations on realization due to a change in control for tax purposes in 2010.

In assessing the need for a valuation allowance, management considers whether it is more likely than not that some portion of the deferred tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences become deductible.

Management considers the scheduled reversal of deferred tax liabilities, projected future taxable income, and tax planning strategies in making this assessment. The sale of a 49.99% interest in District Energy precludes including that business in the Company's consolidated federal income tax return from the date of sale. Accordingly, the net deferred tax liabilities of that business, approximately \$44.1 million, cannot be considered in evaluating the ultimate realization of the Company's deferred tax assets.

140

TABLE OF CONTENTS**MACQUARIE INFRASTRUCTURE COMPANY LLC****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****16. Income Taxes (continued)**

In 2011, the Company increased the valuation allowance by \$1.3 million for certain state net operating loss carryforwards.

In 2010, the Company's management concluded that the reversal of deferred tax liabilities should more likely than not result in the ultimate realization of all but approximately \$2.8 million of federal deferred tax assets. The Company also provided a valuation allowance of approximately \$6.4 million for the realization of certain state NOL carryforwards, for a total valuation allowance of approximately \$9.2 million. In 2010, the Company's valuation allowance for both federal and state deferred tax assets decreased by approximately \$11.4 million from approximately \$20.6 million at December 31, 2009. The net decrease included an approximate \$9.6 million decrease reflected in net income from discontinued operations, an approximate \$2.5 million decrease reflected in federal tax expense or benefit from continuing operations and an increase of approximately \$745,000 included in state income tax expense or benefit from continuing operations.

As of December 31, 2011, the Company had approximately \$158.2 million in net deferred tax liabilities. A significant portion of the Company's deferred tax liabilities relates to tax basis temporary differences of both intangible assets and property and equipment and the Company's unrealized liability on derivatives. The Company records the acquisitions of consolidated businesses under the purchase method of accounting and accordingly recognizes a significant increase to the value of the intangible assets and to property and equipment. For tax purposes, the Company may assume the existing tax basis of the acquired businesses, in which cases the Company records a deferred tax liability to reflect the increase in the purchase accounting basis of the assets acquired over the carryover income tax basis. This liability will reduce in future periods as these temporary differences reverse.

Income tax provision (benefit) attributable to income from continuing operations was \$22.7 million, \$(8.7) million and \$(15.8) million for the years ended December 31, 2011, 2010 and 2009, respectively, and differed from the amounts computed by applying the U.S. federal income tax rate of 35% to pretax income from continuing operations as a result of the following (\$ in thousands):

	Year Ended December 31,		
	2011	2010	2009
Tax provision (benefit) at U.S. statutory rate	\$ 18,062	\$ 458	\$ (43,746)
Impairment of non-deductible intangibles		675	18,601
Permanent and other differences between book and federal taxable income	708	(1,680)	1,073
State income taxes, net of federal benefit	2,583	(502)	(3,559)
Income attributable to noncontrolling interest in Northwind Aladdin	(297)	(449)	
District Energy taxable dividend income in excess of book income	1,926	3,584	

Edgar Filing: Macquarie Infrastructure CO LLC - Form 10-K

IMTT book income in excess of taxable dividend	(7,967)	(5,693)	(7,895)
Federal dividends received deduction on IMTT and District Energy dividends	(1,541)	(7,068)	
Increase in book basis in excess of tax basis in IMTT	7,927	4,043	
Change in District Energy tax status			10,211
Change in valuation allowance	1,317	(2,065)	9,497
Total tax provision (benefit)	\$22,718	\$ (8,697)	\$ (15,818)

141

TABLE OF CONTENTS**MACQUARIE INFRASTRUCTURE COMPANY LLC****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****16. Income Taxes (continued)****Uncertain Tax Positions**

It is expected that the amount of unrecognized tax benefits will change in the next 12 months; however, the Company does not expect the change to have a significant impact on the results of operations or the financial position of the Company.

The Company recognizes interest and penalties related to unrecognized tax benefits in income tax expense in the statements of operations, which is consistent with the recognition of these items in prior reporting periods.

During the year ended December 31, 2009, the IRS completed its audit of PCAA for 2004 and 2003. The conclusion of the audit did not result in material assessment. In 2011, the IRS concluded an audit of the Company's amended 2006 federal income tax return with no audit adjustments. In 2011, the IRS began an audit of The Gas Company for the 2009 tax year. The Company does not expect the audit will result in any changes to the return as filed.

In 2011 and 2010, several states began examinations of state income returns filed by the Company or its subsidiaries. Audits of returns filed in South Carolina and Mississippi resulted in assessments of \$209,000, which the Company has agreed to and paid. Those assessments are included in the Company's state income tax expense for 2011. The Company does not expect the results of any ongoing state income tax return audits to be material to its financial statements.

The following table sets forth a reconciliation of the Company's unrecognized tax benefits from January 1, 2011 to December 31, 2011 (\$ in thousands).

Balance as of January 1, 2011	\$ 368
Current year increases	32
Balance as of December 31, 2011	\$ 400

17. Leases

The Company leases land, buildings, office space and certain office equipment under non-cancellable operating lease agreements that expire through April 2057.

Future minimum rental commitments at December 31, 2011 are as follows (\$ in thousands):

2012	\$ 33,465
2013	32,193
2014	31,160

2015	29,121
2016	26,742
Thereafter	234,914
Total	\$ 387,595

Rent expense under all operating leases for the years ended December 31, 2011, 2010 and 2009 was \$34.4 million, \$35.9 million and \$34.9 million, respectively.

MACQUARIE INFRASTRUCTURE COMPANY LLC

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

18. Employee Benefit Plans

401(k) Savings Plan

In 2006, MIC Inc. established a defined contribution plan under section 401(k) of the Internal Revenue Code, allowing eligible employees of the consolidated businesses to contribute a percentage of their annual compensation up to an annual amount as set by the IRS. Prior to this, each of the consolidated businesses maintained their own plans. Following the establishment of the MIC Inc. Plan, Atlantic Aviation, District Energy and PCAA consolidated their plans under the MIC Inc. Plan. The Gas Company also sponsored a 401(k) plan for eligible employees of that business. On January 1, 2008, employees in The Gas Company 401(k) plan were added to the MIC Inc. Plan. The Company completed the merger of The Gas Company plan into the MIC Inc. Plan in the first quarter of 2008. Subsequent to the sale in bankruptcy of PCAA in June 2010, the eligible employees of PCAA are no longer allowed to participate in the Plan. In addition, District Energy started their own defined contribution plan following the sale of 49.99% of noncontrolling interest in December 2009.

The employer contribution to these plans ranges from 0% to 6% of eligible compensation. For the years ended December 31, 2011, 2010 and 2009, contributions were \$1.1 million, \$1.0 million and \$1.3 million, respectively.

Union Pension Plan

The Gas Company has a Defined Benefit Pension Plan for Classified Employees of GASCO, Inc. (the DB Plan) that accrues benefits pursuant to the terms of a collective bargaining agreement. The DB Plan is non-contributory and covers all bargaining unit employees who have met certain service and age requirements. The benefits are based on a flat rate per year of service through the date of employment termination or retirement. The Gas Company made contributions to the DB Plan of \$2.7 million during 2011 and \$2.6 million during 2010. Future contributions will be made to meet ERISA funding requirements. The DB Plan's trustee, First Hawaiian Bank, handles the DB Plan's assets and as an investment manager, invests them in a diversified portfolio of equity and fixed-income securities. The projected benefit obligation for the DB Plan totaled \$42.4 million at December 31, 2011 and \$38.2 million at December 31, 2010. The DB Plan has assets of \$26.7 million and \$25.6 million at December 31, 2011 and 2010, respectively.

The Gas Company expects to make contributions in 2012 and annually for at least five years as it complies with the requirements of the Pension Protection Act of 2006. The annual amount of contributions will be dependent upon a number of factors such as market conditions and changes to regulations. However, for the 2012 calendar year, the Company expects to make contributions of approximately \$3.8 million.

In May 2008, The Gas Company entered into a new five-year collective bargaining agreement which increased the benefits for participants and that immediately froze the plan to new participants. The benefit increases will occur annually for three years after which there will be no further increase to the flat rate. Participants will, however, continue to accrue years of service toward their final benefit. The financial effects of the new agreement are included

below as Plan amendments .

Other Benefits Plan

The Gas Company has a postretirement plan. The GASCO, Inc. Hourly Postretirement Medical and Life Insurance Plan (the PMLI Plan) covers all bargaining unit participants who were employed by The Gas Company on May 1, 1999 and who retire after the attainment of age 62 with 15 years of service. Prior to the establishment of this plan, the participants were covered under a multiemployer plan administered by the Hawaii Teamsters Health and Welfare Trust; the PMLI Plan was formed when the multiemployer plan was dissolved. Under the provisions of the PMLI Plan, The Gas Company pays for medical premiums of the retirees and spouses up until age 65. After age 65, The Gas Company pays for medical premiums up to a maximum of \$150 per month. The retirees are also provided \$1,000 of life insurance benefits.

143

TABLE OF CONTENTS**MACQUARIE INFRASTRUCTURE COMPANY LLC****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****18. Employee Benefit Plans (continued)**

The Gas Company's overall investment strategy is to achieve a mix of approximately 65% of investments in equities for long-term growth and 35% in fixed income securities for asset allocation purposes as well as near-term needs. The

Gas Company has instructed the trustee, the investment manager, to maintain the allocation of the DB Plan's assets between equity mutual fund securities and fixed income mutual fund securities within the pre-approved parameters set by the management of The Gas Company. The DB Plan weighted average asset allocation at December 31, 2011 and 2010 was:

	2011		2010	
Equity instruments	65	%	65	%
Fixed income securities	34	%	34	%
Cash	1	%	1	%
Total	100	%	100	%

The expected return on plan assets of 7.25% was estimated based on the allocation of assets and management's expectations regarding future performance of the investments held in the investment portfolio. The asset allocations of The Gas Company's pension benefits as of December 31, 2011 measurement date were as follows (\$ in thousands):

Asset category:	Fair Value Measurements at December 31, 2011			
	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Cash and money market	\$ 343	\$ 23	\$ 320	\$
Equity securities:				
U.S. large-cap blend ⁽¹⁾	13,937	13,937		
International large-cap blend ⁽²⁾	3,298	3,298		
Fixed income securities:				
Intermediate term corporate bonds ⁽³⁾	9,119	9,119		
Total	\$ 26,697	\$ 26,377	\$ 320	\$

TABLE OF CONTENTS**MACQUARIE INFRASTRUCTURE COMPANY LLC****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****18. Employee Benefit Plans (continued)**

The discount rates of 4.50% and 4.40% for the DB Plan and PMLI Plan, respectively, were based on high quality corporate bond rates that approximate the expected settlement of obligations. The estimated future benefit payments for the next ten years are as follows (\$ in thousands):

	DB Plans Benefits	PMLI Benefits
2012	\$ 2,250	\$ 283
2013	2,386	308
2014	2,497	220
2015	2,547	247
2016	2,591	231
Thereafter	13,538	1,125
Total	\$ 25,809	\$ 2,414

19. Legal Proceedings and Contingencies

The subsidiaries of MIC Inc. are subject to legal proceedings arising in the ordinary course of business. In management's opinion, the Company has adequate legal defenses and/or insurance coverage with respect to the eventuality of such actions, and does not believe the outcome of any pending legal proceedings will be material to the Company's financial position or results of operations.

Arbitration Proceeding Between MIC and Co-investor in IMTT

MIC has been unable to resolve the dispute with the co-owner of IMTT regarding distributions, despite efforts to do so in accordance with the Shareholders' Agreement. Accordingly, on April 18, 2011, MIC initiated formal arbitration proceedings with the Voting Trust of IMTT Holdings Inc. ("Voting Trust") and IMTT Holdings Inc. under the auspices of the American Arbitration Association, as provided under the Shareholders' Agreement. MIC believes the Voting Trust's defenses and claims in the arbitration are without merit. MIC currently expects a decision by the arbitrators in the first quarter of 2012, or soon after.

IMTT is named as a respondent because under the Shareholders' Agreement it is responsible for any monetary damages resulting from a breach of the Shareholders' Agreement by the Voting Trust. MIC is seeking payment of distributions due for the quarter ended December 31, 2010 and subsequent periods, or appropriate damages as a result of the nonpayment of distributions, an order covering future periods and other non-monetary relief that is designed to minimize the risk of future disputes. MIC is concerned that, until the issues in the arbitration have been finally resolved, IMTT's senior management (which includes members and beneficiaries of the Voting Trust) will continue to make operational decisions that are influenced by the context of the arbitration. MIC expects that this will be resolved through the arbitration.

Except noted above, there are no material legal proceedings pending other than ordinary routine litigation incidental to the Company's businesses.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

(a) Management's Evaluation of Disclosure Controls and Procedures

Our principal executive officer and principal financial officer, after evaluating the effectiveness of our disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) as of the end of the period covered by this Form 10-K, have concluded that, based on such evaluation, our disclosure controls and procedures were effective to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms, and is accumulated and communicated to our management, including our principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

(b) Management's Annual Report on Internal Control over Financial Reporting

Management of the Company is responsible for establishing and maintaining effective internal control over financial reporting, and for performing an assessment of the effectiveness of internal control over financial reporting as of December 31, 2011. Internal control over financial reporting is defined in Rule 13a-15(f) or 15d-15(f) promulgated under the Securities Exchange Act of 1934 as a process designed by, or under the supervision of, the Company's principal executive and principal financial officers and effected by the Company's Board of Directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with U.S. generally accepted accounting principles.

Internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit the preparation of financial statements in accordance with U.S. generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the financial statements.

All internal control systems, no matter how well designed, have inherent limitations. Because of the inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Accordingly, even

those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation.

Management used the framework set forth in the report entitled *Internal Control-Integrated Framework* published by the Committee of Sponsoring Organizations of the Treadway Commission (referred to as *COSO*) to evaluate the effectiveness of the Company's internal control over financial reporting as of December 31, 2011. As a result of its evaluation, management has concluded that the Company's internal control over financial reporting was effective as of December 31, 2011 based on those criteria.

The effectiveness of the Company's internal control over financial reporting as of December 31, 2011 has been audited by KPMG LLP, the Company's independent registered public accounting firm, as stated in their report appearing on page 150, which expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting as of December 31, 2011.

TABLE OF CONTENTS

(c) Attestation Report of Registered Public Accounting Firm
REPORT OF INDEPENDENT REGISTERED PUBLIC
ACCOUNTING FIRM

The Board of Directors and Stockholders
Macquarie Infrastructure Company LLC:

We have audited Macquarie Infrastructure Company LLC's internal control over financial reporting as of December 31, 2011, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Macquarie Infrastructure Company LLC's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Annual Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Macquarie Infrastructure Company LLC maintained, in all material respects, effective internal control over financial reporting as of December 31, 2011, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Macquarie Infrastructure Company LLC and subsidiaries as of December

31, 2011 and 2010, and the related consolidated statements of operations, comprehensive income (loss), members equity, and cash flows for each of the years in the three-year period ended December 31, 2011, and our report dated February 22, 2012 expressed an unqualified opinion on those consolidated financial statements.

As discussed in Note 2 to the consolidated financial statements, the Company has changed the presentation of comprehensive income (loss) due to the adoption of ASU No. 2011-05, *Comprehensive Income (Topic 220): Presentation of Comprehensive Income*, and has changed its method of accounting for testing goodwill for impairment due to the adoption of ASU No. 2011-08, *Intangibles-Goodwill and Other (Topic 350): Testing Goodwill for Impairment*, in 2011.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

The Company will furnish to the Securities and Exchange Commission a definitive proxy statement not later than 120 days after the end of the fiscal year ended December 31, 2011.

The information required by this Item 10 is included under the captions Election of Directors , Governance Information and Section 16(A) Beneficial Ownership Reporting Compliance in our proxy statement for our 2012 annual meeting of shareholders and is incorporated herein by reference.

Our Code of Ethics and Conduct applies to all of our directors, officers and employees as well as all directors, officers and employees of our Manager involved in the management of the Company and its businesses. Our Code of Ethics and Conduct is posted on the Governance page of our website, *www.macquarie.com/mic*. You may request a copy of our Code of Ethics and Conduct by contacting Investor Relations at 125 West 55th Street, New York, NY 10019 ((212) 231-1000). We will post any amendment to the Code of Ethics and Conduct, and any waivers that are required to be disclosed by the rules of either the SEC or the NYSE, on our website.

ITEM 11. EXECUTIVE COMPENSATION

The information required by this Item 11 is included under the captions Director Compensation , Compensation Discussion and Analysis , Executive Compensation , Governance Information and Compensation Committee Report in our proxy statement for our 2012 annual meeting of shareholders and is incorporated herein by reference.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

Securities Authorized for Issuance Under Equity Compensation Plans

The table below sets forth information with respect to LLC interests authorized for issuance as of December 31, 2011:

Plan Category	Number of Securities to Be Issued Upon Exercise of Outstanding Options, Warrants and Rights	Weighted-Average Exercise Price of Outstanding Options, Warrants and Rights (b)	Number of Securities Remaining Available for Future Issuance Under Equity Compensation
---------------	---	---	--

	(a)		Plans (Excluding Securities Under Column (a)) (c)
Equity compensation plans approved by securityholders ⁽¹⁾	23,134	\$	(1)
Equity compensation plans not approved by securityholders			
Total	23,134	\$	(1)

Information represents number of LLC interests issuable upon the vesting of director stock units pursuant to our independent directors equity plan, which was approved and became effective in December 2004. Under the plan, each independent director elected at our annual meeting of shareholders is entitled to receive a number of director stock units equal to \$150,000 divided by the average closing sale price of the stock during the 10-day period immediately preceding our annual meeting. The units vest on the day prior to the following year's annual meeting.

(1) We granted 5,975 restricted stock units to each of our independent directors elected at our 2011 annual shareholders meeting based on the average closing price per share over a 10-day period of \$25.10. In addition, effective August 12, 2011, we elected a new independent director and we granted 5,209 restricted stock units calculated on a pro rata basis from the date of election and the average closing sale price of the stock during the 10-day period immediately preceding the date of election. We have 442,635 LLC interests reserved for future issuance under the plan.

152

TABLE OF CONTENTS

The remaining information required by this Item 12 is included under the caption **Share Ownership of Directors, Executive Officers and Principal Shareholders** in our proxy statement for our 2012 annual meeting of shareholders and is incorporated herein by reference.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS AND DIRECTOR INDEPENDENCE

The information required by this Item 13 is included under the caption **Certain Relationships and Related Party Transactions** and **Governance Information** in our proxy statement for our 2012 annual meeting of shareholders and is incorporated herein by reference.

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

The information required by this Item 14 is included under the caption **Ratification of Selection of Independent Auditor** in our proxy statement for our 2012 annual meeting of shareholders and is incorporated herein by reference.
