☒ ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2016

OR

☐ TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from ____ to ____

Commission file no. 333-94288

THE FIRST BANCSHARES, INC.
(Exact name of registrant as specified in its charter)

Mississippi 64-0862173
(State or Other Jurisdiction of (I.R.S. Employer Identification Number)
Incorporation or Organization)

6480 U.S. Hwy. 98 West, Suite A
Hattiesburg, Mississippi 39402

Edgar Filing: FIRST BANCSHARES INC /MS/ - Form 10-K

(Address of principal executive offices) (Zip Code)

Issuer's telephone number: (601) 268-8998

Securities registered under Section 12(b) of the Exchange Act:

Title of Each Class	Name of Each Exchange on Which Registered
Common Stock, \$1.00 par value	The NASDAQ Stock Market LLC

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in rule 405 of the Securities Act.

Yes ☐ No ☒

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Act.

Yes ☐ No ☒

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes ☒ No ☐

Indicate by check mark if disclosure of delinquent filers in response to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of the registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this

Form 10-K ☒

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes ☐ No ☒

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer," and "smaller reporting company" in Rule 12b-2 of the Exchange Act (Check one):

Large accelerated filer ☐ Accelerated filer ☒ Non-accelerated filer ☐ Smaller reporting company ☐

Based on the price at which the registrant's Common Stock was last sold on June 30, 2016, at that date, the aggregate market value of the registrant's Common Stock held by non-affiliates of the registrant (assuming solely for the purposes of this calculation that all directors and executive officers of the registrant are "affiliates") was \$82,750,310.28

On March 13, 2017, the registrant had outstanding 9,144,412 shares of common stock.

DOCUMENTS INCORPORATED BY REFERENCE

FORM 10-K

PART I

This Report, including information incorporated by reference herein, contains statements which constitute forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 (the “Securities Act”) and Section 21E of the Securities Exchange Act of 1934 (the “Exchange Act”), which statements are inherently subject to risks and uncertainties. These statements are based on many assumptions and estimates and are not guarantees of future performance. Forward looking statements are statements that include projections, predictions, expectations, or beliefs about future events or results or otherwise are not statements of historical fact. Such statements are often characterized by the use of qualifying words (and their derivatives) such as “may,” “would,” “could,” “should,” “will,” “expect,” “anticipate,” “predict,” “project,” “potential,” “continue,” “assume,” “believe,” “intend,” “plan,” “forecast,” “goal,” “estimate,” statements concerning opinions or judgments of the Company, the Bank, and management about possible future events or outcomes. Factors that could influence the accuracy of such forward looking statements include, but are not limited to, the financial success or changing strategies of the Bank’s customers or vendors, actions of government regulators, the level of market interest rates, and general economic conditions.

Potential risks and uncertainties that could cause our actual results to differ materially from those anticipated in any forward-looking statements include, but are not limited to, the following:

- reduced earnings due to higher credit losses generally and specifically because losses in the sectors of our loan portfolio secured by real estate are greater than expected due to economic factors, including declining real estate values, increasing interest rates, increasing unemployment, or changes in payment behavior or other factors;

- reduced earnings due to higher credit losses because our loans are concentrated by loan type, industry segment, borrower type, or location of the borrower or collateral;

- the rate of delinquencies and amount of loans charged-off;

- the adequacy of the level of our allowance for loan losses and the amount of loan loss provisions required to replenish the allowance in future periods;

results of examinations by our regulatory authorities, including the possibility that the regulatory authorities may, among other things, require us to increase our allowance for loan losses through additional loan loss provisions or writedown assets;

· the amount of our loan portfolio collateralized by real estate and the weakness in the commercial real estate market;

· the impact of our efforts to raise capital on our financial position, liquidity, capital, and profitability;

risks and uncertainties relating to not successfully negotiating and entering into definitive agreements with respect to, and closing the, currently contemplated acquisitions within our currently expected timeframe and other terms;

· adverse changes in asset quality and resulting credit risk-related losses and expenses;

increased funding costs due to market illiquidity, increased competition for funding, higher interest rates, and increased regulatory requirements with regard to funding;

· significant increases in competition in the banking and financial services industries;

- changes in the interest rate environment which could reduce anticipated or actual margins;
- changes in political conditions or the legislative or regulatory environment;
- general economic conditions, either nationally or regionally and especially in our primary service area, becoming less favorable than expected resulting in, among other things, a deterioration in credit quality;
- our ability to retain our existing customers, including our deposit relationships;
- changes occurring in business conditions and inflation;
- changes in technology;
- changes in monetary and tax policies;
- ability of borrowers to repay loans, which can be adversely affected by a number of factors, including changes in economic conditions, adverse trends or events affecting business industry groups, reductions in real estate values or markets, business closings or lay-offs, natural disasters, and international instability;
- changes in deposit flows;
- changes in accounting principles, policies, or guidelines;
- our ability to maintain adequate internal controls over financial reporting;
- loss of consumer confidence and economic disruptions resulting from terrorist activities;
- changes in the securities markets; and
- other risks and uncertainties detailed from time to time in our filings with the SEC.

We have based our forward-looking statements on our current expectations about future events. Although we believe that the expectations reflected in and the assumptions underlying our forward-looking statements are reasonable, we

cannot guarantee that these expectations will be achieved or the assumptions will prove out. We undertake no obligation to publicly update or otherwise revise any forward-looking statements, whether as a result of new information, future events, or otherwise.

ITEM 1. BUSINESS

BUSINESS OF THE COMPANY

Overview and History

The Company was incorporated on June 23, 1995 to serve as a bank holding company for The First, A National Banking Association (“The First”), headquartered in Hattiesburg, Mississippi. The Company is a Mississippi corporation and is a registered financial holding company. The First began operations on August 5, 1996 from our main office in the Oak Grove community, which is now incorporated within the city of Hattiesburg. The First currently operates its main office and 43 full-service branches, one motorbank, and four loan production offices in Mississippi, Alabama, Louisiana and Florida. Our principal executive offices are located at 6480 U.S. Highway 98 West, Hattiesburg, Mississippi 39402, and our telephone number is (601) 268-8998.

We exited the recent recession with strong asset quality metrics compared to most of our peers, which we believe illustrates our historically disciplined underwriting and credit culture. As such, we benefited from our strength by taking advantage of growth opportunities when many of our peers were unable to do so. Since that time, we focused on growing earnings per share and increasing our tangible common equity and tangible book value per share. In addition, we returned to strong levels of loan growth by continuing to strengthen our relationships with existing clients and creating new relationships.

We believe we are well-positioned to continue to benefit from the ongoing post-Katrina rebuilding efforts along the Gulf Coast. In September 2011 we completed the purchase of eight branches required to be divested by another financial institution. Seven of these branches were located along the Mississippi Gulf Coast and one was in Louisiana.

In April 2013, we completed our first post-recession acquisition with the purchase of First National Bank of Baldwin County, which resulted in our strategic entry into the south Alabama market. Then in July 2014 we completed our acquisition of Bay Bank, previously headquartered in Mobile, Alabama. The conversion and integration of these acquisitions have been successful to date, and we are optimistic that this market will continue to contribute to our future growth and success. Also in 2014 we established a *de novo* branch in Baton Rouge, Louisiana and a loan production office in Slidell, Louisiana.

In January, 2017, we completed the acquisitions of Iberville Bank and Gulf Coast Community Bank. We expect the conversion and integrations of these two banks to be successful and to be completed by the end of the second quarter of 2017.

As of December 31, 2016, we had 306 full-time employees and 9 part-time employees, and as of March 13, 2017, we had 427 full-time employees and 22 part-time employees.

Unless otherwise indicated or unless the context requires otherwise, all references in this report to “the Company”, “we”, “us”, “our”, or similar references, mean The First Bancshares, Inc. and our subsidiaries, including our banking subsidiary, The First, A National Banking Association on a consolidated basis. References to “The First” or the “Bank” mean our wholly owned banking subsidiary, The First A National Banking Association.

Market Areas and Recent Developments

The First operates its main office, 16 full-service branches, and one motor branch in Mississippi, ten branches in Alabama, twelve branches in Louisiana and five branches in Florida. In Mississippi, we serve the cities of Hattiesburg, Laurel, Purvis, Picayune, Pascagoula, Bay St. Louis, Wiggins, Gulfport, Biloxi, Long Beach, Diamondhead, and the surrounding areas of Lamar, Forrest, Jones, Pearl River, Jackson, Hancock, Stone, and Harrison Counties. In Alabama, we serve the Baldwin County and Mobile County, Alabama markets with branches in the following cities: Foley, Daphne, Fairhope, Gulf Shores, Orange Beach, Mobile, Bay Minette, Dauphin Island, and Theodore. In Louisiana, we serve the city of Bogalusa in Washington Parish and Baton Rouge in East Baton Rouge Parish. With the recent acquisitions, we will additionally operate ten branches in Addis, Baton Rouge, Denham Springs, Pierre Part, Plaquemine, Plattenville, Port Allen, Prairieville, Saint Gabriel, and White Castle, Louisiana, and five branches in Gulf Breeze, Pace, and Pensacola, Florida. For more information about the acquisitions of Iberville Bank and Gulf Coast Community Bank you should read “Recent Developments” below [and Note T to the Consolidated Financial Statements]. In addition, the First operates production office in Ocean Springs, Brandon, and Madison in Mississippi and in Slidell, Louisiana.

Recent Developments

Acquisitions of Iberville Bank and Gulf Coast Community Bank

Iberville Bank. On January 1, 2017, we completed our acquisition of 100% of the common stock of Iberville Bank, Plaquemine, Louisiana from A. Wilbert’s Sons Lumber and Shingle Co. (“Iberville Parent”), and immediately thereafter merged Iberville Bank with and into The First. We paid Iberville Parent a total of \$28.6 million in cash for all of the outstanding equity securities of Iberville Bank. An additional \$2.5 million of the purchase price paid in connection with the purchase of Iberville Bank is being held in escrow as contingency for flood-related losses in the loan portfolio that may be incurred due to recent flooding in Iberville Bank’s market area. At September 30, 2016, Iberville Bank had \$257.8 million in total assets, \$147.2 million in net loans, \$229.6 million in deposits, and \$26.5 million in stockholders’ equity.

Gulf Coast Community Bank. Also on January 1, 2017, we completed our merger with Gulf Coast Community Bank, Pensacola, Florida which was merged with and into The First. Each shareholder of Gulf Coast Community Bank are received, in the aggregate, shares of the Company's common stock having a value of \$25.10, determined by averaging the trading price of our common stock price over a 30 day trading period ending on the fifth business day prior to the closing of the Gulf Coast acquisition, which was December 23, 2016. The aggregate purchase price was 89,591 shares of our common stock in the aggregate value at \$2.2 million in exchange for all of the outstanding equity securities of Gulf Coast. As of September 30, 2016, Gulf Coast had total assets of approximately \$135.4 million, deposits of approximately \$116.6 million, and total stockholders' equity of approximately \$5.8 million.

Banking Services

We strive to provide our customers with the breadth of products and services offered by large regional banks, while maintaining the timely response and personal service of a locally owned and managed bank. In addition to offering a full range of deposit services and commercial and personal loans, we have a mortgage division. The following is a description of the products and services we offer.

Deposit Services. We offer a full range of deposit services that are typically available in most banks and savings institutions, including checking accounts, NOW accounts, savings accounts, and other time deposits of various types, ranging from daily money market accounts to longer-term certificates of deposit. The transaction accounts and time certificates are tailored to our principal market areas at rates competitive to those offered by other banks in these areas. All deposit accounts are insured by the FDIC up to the maximum amount allowed by law. We solicit these accounts from individuals, businesses, associations and organizations, and governmental authorities. In addition, we offer certain retirement account services, such as Individual Retirement Accounts (IRAs).

Loan Products. We offer a full range of commercial and personal loans. Commercial loans include both secured and unsecured loans for working capital (including loans secured by inventory and accounts receivable), business expansion (including acquisition of real estate and improvements), and purchase of equipment and machinery. Consumer loans include equity lines of credit and secured and unsecured loans for financing automobiles, home improvements, education, and personal investments. We also make real estate construction and acquisition loans. Our lending activities are subject to a variety of lending limits imposed by federal law. While differing limits apply in certain circumstances based on the type of loan or the nature of the borrower (including the borrower's relationship to the bank), in general we are subject to an aggregate loans-to-one-borrower limit of 15% of our unimpaired capital and surplus.

Mortgage Loan Division. We have a residential mortgage loan division which originates loans to purchase existing residential homes or construct new homes and to refinance existing mortgages.

Private Banking Division. We have a private banking division, which offers financial services and wealth management services to individuals who meet certain criteria.

Other Services. Other bank services we offer include on-line internet banking services, voice response telephone inquiry services, commercial sweep accounts, cash management services, safe deposit boxes, travelers checks, mobile deposit, direct deposit of payroll and social security checks, and automatic drafts for various accounts. We are associated with the MasterCard, Cirrus, Pulse, and Community Cash networks of automated teller machines that may be used by our customers throughout our market area and other regions. The First also offers VISA credit card services through a correspondent bank.

Competition

The First generally competes with other financial institutions through the selection of banking products and services offered, the pricing of services, the level of service provided, the convenience and availability of services, and the degree of expertise and the personal manner in which services are offered. State law permits statewide branching by banks and savings institutions, and many financial institutions in our market area have branch networks.

Consequently, commercial banking in Mississippi, Alabama, Louisiana and Florida is highly competitive. Many large banking organizations currently operate in our market area, several of which are controlled by out-of-state ownership. In addition, competition between commercial banks and thrift institutions (savings institutions and credit unions) has been intensified significantly by the elimination of many previous distinctions between the various types of financial institutions and the expanded powers and increased activity of thrift institutions in areas of banking which previously had been the sole domain of commercial banks. Federal legislation, together with other regulatory changes by the primary regulators of the various financial institutions, has resulted in the almost total elimination of practical distinctions between a commercial bank and a thrift institution. Consequently, competition among financial institutions of all types is largely unlimited with respect to legal ability and authority to provide most financial services. Currently there are numerous other commercial banks, savings institutions, and credit unions operating in The First's primary service area.

We face increased competition from both federally-chartered and state-chartered financial and thrift institutions, as well as credit unions, consumer finance companies, insurance companies, and other institutions in the Company's market area. Some of these competitors are not subject to the same degree of regulation and restriction imposed upon the Company. Many of these competitors also have broader geographic markets and substantially greater resources and lending limits than the Company and offer certain services such as trust banking that the Company does not currently provide. In addition, many of these competitors have numerous branch offices located throughout the extended market areas of the Company that may provide these competitors with an advantage in geographic convenience that the Company does not have at present.

We also compete with numerous financial and quasi-financial institutions for deposits and loans, including providers of financial services over the internet. Recent technology advances and other changes have allowed parties to effectuate financial transactions that previously required the involvement of banks. For example, consumers can maintain funds in brokerage accounts or mutual funds that would have historically been held as bank deposits. Consumers can also complete transactions such as paying bills and transferring funds directly without the assistance of banks.

Available Information

We file reports with the Securities and Exchange Commission. We make available free of charge, on or through our website www.thefirstbank.com, our Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, and other filings pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, and amendments to such filings, as soon as reasonably practicable after each is electronically filed with, or furnished to, the SEC. You may read and copy any materials we file with the SEC at the SEC's Public Reference Room at 100 F Street, N.E., Washington, DC 20549. Information on the operation of the Public Reference Room may be obtained by calling the Commission at 1-800-SEC-0330. The SEC maintains a website that contains the Company's reports, proxy statements, and the Company's other SEC filings. The address of the SEC's website is www.sec.gov. Information appearing on the Company's website is not part of any report that it files with the SEC.

SUPERVISION AND REGULATION

The Company and The First are subject to state and federal banking laws and regulations which impose specific requirements or restrictions on and provide for general regulatory oversight with respect to virtually all aspects of our operations. These laws and regulations are generally intended to protect depositors, not shareholders. To the extent that the following summary describes statutory or regulatory provisions, it is qualified in its entirety by reference to the particular statutory and regulatory provisions. Any change in applicable laws or regulations may have a material effect on the business and prospects of the Company. Beginning with the enactment of the Financial Institutions Reform, Recovery and Enforcement Act of 1989 and following with the Federal Deposit Insurance Corporation Improvement Act of 1991 ("FDICIA"), and now most recently the sweeping Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (the "Dodd-Frank Act"), numerous additional regulatory requirements have been placed on the banking industry in the past several years, and additional changes have been proposed. The operations of the Company and The First may be affected by legislative changes and the policies of various regulatory authorities. We are unable to predict the nature or the extent of the effect on our business and earnings that fiscal or monetary policies, economic control, or new federal or state legislation may have in the future.

Bank Holding Company Regulation

The Company is subject to extensive regulation by the Board of Governors of the Federal Reserve System (the “Federal Reserve”) pursuant to the Bank Holding Company Act of 1956, as amended (the “Bank Holding Company Act”). The Company is also required to file certain reports with, and otherwise comply with the rules and regulations of the SEC under federal securities laws.

Federal Regulation

The Company is registered with the Federal Reserve as a bank holding company and has elected to be treated as a financial holding company under the Bank Holding Company Act. As such, the Company and its subsidiaries are subject to the supervision, examination and reporting requirements of the Bank Holding Company Act and the regulations of the Federal Reserve.

The Bank Holding Company Act generally prohibits a corporation that owns a federally insured financial institution (“bank”) from engaging in activities other than banking, managing or controlling banks or other subsidiaries engaging in permissible activities. Also prohibited is acquiring or obtaining control of more than 5% of the voting interests of any company that engages in activities other than those activities determined by the Federal Reserve to be so closely related to banking, managing or controlling banks as to be proper incident thereto. In determining whether a particular activity is permissible, the Federal Reserve considers whether the performance of the activity can reasonably be expected to produce benefits to the public that outweigh possible adverse effects. Examples of activities that the Federal Reserve has determined to be permissible are making, acquiring or servicing loans; leasing personal property; providing certain investment or financial advice; performing certain data processing services; acting as agent or broker in selling credit life insurance; and performing certain insurance underwriting activities. The Bank Holding Company Act does not place territorial limits on permissible bank-related activities of bank holding companies. Even with respect to permissible activities, however, the Federal Reserve has the power to order a holding company or its subsidiaries to terminate any activity or its control of any subsidiary when the Federal Reserve has reasonable cause to believe that continuation of such activity or control of such subsidiary would pose a serious risk to the financial safety, soundness or stability of any bank subsidiary of that holding company.

The Bank Holding Company Act requires every bank holding company to obtain the prior approval of the Federal Reserve before it: (1) acquires ownership or control of any voting shares of any bank if, after such acquisition, such bank holding company will own or control more than 5% of the voting shares of such bank, (2) causes any of its non-bank subsidiaries to acquire all of the assets of a bank, (3) merges with any other bank holding company, or (4) engages in permissible non-banking activities. In reviewing a proposed covered acquisition, the Federal Reserve considers a bank holding company’s financial, managerial and competitive posture. The future prospects of the companies and banks concerned and the convenience and needs of the community to be served are also considered.

The Federal Reserve also reviews the indebtedness to be incurred by a bank holding company in connection with the proposed acquisition to ensure that the bank holding company can service such indebtedness without adversely affecting its ability, and the ability of its subsidiaries, to meet their respective regulatory capital requirements. The Bank Holding Company Act further requires that consummation of approved bank holding company or bank acquisitions or mergers must be delayed for a period of not less than 15 or more than 30 days following the date of Federal Reserve approval. During such 15 to 30-day period, the Department of Justice has the right to review the competitive aspects of the proposed transaction. The Department of Justice may file a lawsuit with the relevant United States Court of Appeals seeking an injunction against the proposed acquisition.

As described above, the prior approval of the Federal Reserve must be obtained before the Company may acquire substantially all of the assets of any bank, or ownership or control of any voting shares of any bank, if, after such acquisition, it would own or control, directly or indirectly, more than 5% of the voting shares of such bank. The Riegle-Neal Interstate Banking and Branching Efficiency Act of 1994 (the “Riegle-Neal Act”) permits adequately capitalized and managed bank holding companies to acquire control of banks in any state, subject to federal regulatory approval, without regard to whether such a transaction is prohibited by the laws of any state. The Riegle-Neal Act further provides that a bank holding company may not, following an interstate acquisition, control more than 10% of nationwide insured deposits or 30% of deposits within any state in which the acquiring bank operates. States have the right to adopt legislation to lower the 30% limit, although no states within the Company’s current market area have done so. Additional provisions require that interstate activities conform to the Community Reinvestment Act, which is intended to encourage depository institutions to help meet the credit needs of the communities in which they operate, including low-and moderate-income neighborhoods, consistent with safe and sound operations.

The Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (the “Dodd-Frank Act”) authorizes national and state banks to establish de novo branches in other states to the same extent a bank chartered in those states would be so permitted.

The Gramm-Leach-Bliley Act of 1999 (the “Financial Services Modernization Act”) established a comprehensive framework that permits affiliations among qualified bank holding companies, commercial banks, insurance companies, securities firms, and other financial service providers by revising and expanding the Bank Holding Company Act framework to permit a holding company to engage in a full range of financial activities through a financial holding company.

Capital Requirements

General Risk-Based and Leverage-Based Capital Adequacy Requirements

The Federal Reserve has adopted capital adequacy guidelines for use in its examination and regulation of bank holding companies and financial holding companies. The regulatory capital of a bank holding company or financial holding company under applicable federal capital adequacy guidelines is particularly important in the Federal Reserve’s evaluation of the overall safety and soundness of the bank holding company or financial holding company and are important factors considered by the Federal Reserve in evaluating any applications made by such holding company to the Federal Reserve. If regulatory capital falls below minimum guideline levels, a financial holding company may lose its status as a financial holding company and a bank holding company or bank may be denied approval to acquire or establish additional banks or non-bank businesses or to open additional facilities. Additionally, each bank subsidiary of a financial holding company as well as the holding company itself must be well capitalized and well managed as determined by the subsidiary bank’s primary federal regulator, which in the case of The First, is

the Office of the Comptroller of the Currency (the “OCC”). To be considered well managed, the bank and holding company must have received at least a satisfactory composite rating and a satisfactory management rating at its most recent examination. The Federal Reserve rates bank holding companies through a confidential component and composite 1-5 rating system, with a composite rating of 1 being the highest rating and 5 being the lowest. This system is designed to help identify institutions requiring special attention. Financial institutions are assigned ratings based on evaluation and rating of their financial condition and operations. Components reviewed include capital adequacy, asset quality, management capability, the quality and level of earnings, the adequacy of liquidity and sensitivity to interest rate fluctuations. As of December 31, 2016, the Company and The First were both well capitalized and well managed.

A financial holding company that becomes aware that it or a subsidiary bank has ceased to be well capitalized or well managed must notify the Federal Reserve and enter into an agreement to cure the identified deficiency. If the deficiency is not cured timely, the Federal Reserve Board may order the financial holding company to divest its banking operations. Alternatively, to avoid divestiture, a financial holding company may cease to engage in the financial holding company activities that are unrelated to banking or otherwise impermissible for a bank holding company.

The final rules concerning capital adequacy that became effective January 1, 2015 established a new category of capital measure, Common Equity Tier 1 capital, which includes a limited number of capital instruments from the existing definition of Tier 1 Capital, as well as raised minimum thresholds for Tier 1 Leverage capital (100 basis points), and Tier 1 Risk-based capital (200 basis points). Additionally, the final rules introduced a capital conservation buffer of Common Equity Tier 1, Tier 1 Risk-based and Total Risk-based capital ratios above the minimum risk-based capital requirements. The buffer must be maintained to avoid limitations on capital distributions and limitations on discretionary bonus payments to executive officers. Each of the minimum capital ratios took effect in 2015, with the capital conservation buffer set to be phased in beginning in 2016 and implemented in full by 2019. Based on estimated capital ratios using Basel III definitions, the Company and The First currently exceed all capital requirements of the new rule, including the fully phased-in conservation buffer.

The new rules addressed both the components of capital and other issues affecting the numerator in banking institutions' regulatory capital ratios, as well as the risk weights and other issues affecting the denominator, replacing the existing Basel I-derived risk weighting approach with a more risk-sensitive approach based, in part, on the standardized approach in the Basel Committee's 2004 "Basel II" capital accords. Regarding the denominator, under the final rules, the Company, among other items, is required to increase the risk weights applied to certain high volatility commercial real estate loans and to certain loans past due. Additionally, the Company is required to risk weight at 20% the conversion factors for commitments with an original maturity of one year or less that are not unconditionally cancellable at any time. Regarding the numerator under the final rules, NOLs and tax credits carried forward are deducted from Tier 1 capital. Additionally, there are deductions and adjustments to capital for goodwill and other intangibles as well as deductions and adjustments to capital by the amount that the carrying value of certain assets exceeds 10% of capital. Examples of these assets are deferred tax assets, mortgage servicing rights, significant investments in unconsolidated subsidiaries, investments in certain capital instruments of financial entities and unrealized gains on cash flow hedges included in accumulated other comprehensive income arising from hedges not carried at fair market value on the balance sheet. Under the final rules, some banks, including The First, were given a one-time "opt out" in which they were allowed to elect to filter certain volatile accumulated other comprehensive income ("AOCI") components from inclusion in regulatory capital. The AOCI opt-out election was made on the institution's first Call Report, FR Y-9C or FR Y-9SP, as applicable, filed after January 1, 2015. The Company and The First elected to opt out.

Below are measures of regulatory capital applicable to holding companies in 2016.

	Minimum		Company at 12/31/2016	
Tier 1 leverage capital ratio	4.00	%	11.9	%
Common equity Tier 1 capital ratio*	7.00	%	13.8	%
Tier 1 capital ratio**	8.50	%	14.7	%
Total risk-based capital (Tier 1 plus Tier 2)***	10.50	%	15.5	%

* a minimum of 4.5% plus a capital conservation buffer of 2.5%, which will be fully phased in by January 1, 2019

**a minimum of 6.0% plus a phased-in capital conservation buffer of 2.5%

*** a minimum of 8% plus a phased-in capital conservation buffer of 2.5%

The essential difference between the leverage capital ratio and the risk-based capital ratios is that the latter identify and weight both balance sheet and off-balance sheet risks. Tier 1 capital generally includes common equity, retained earnings, qualifying minority interests (issued by consolidated depository institutions or foreign bank subsidiaries), accounts of consolidated subsidiaries and an amount of qualifying perpetual preferred stock, limited to 50% of Tier 1 capital. In calculating Tier 1 capital, goodwill and other disallowed intangibles and disallowed deferred tax assets and certain other assets are excluded. Tier 2 capital is a secondary component of risk-based capital, consisting primarily of perpetual preferred stock that may not be included as Tier 1 capital, mandatory convertible securities, certain types of subordinated debt and an amount of the allowance for loan losses (limited to 1.25% of risk weighted assets).

The risk-based capital guidelines are designed to make regulatory capital requirements more sensitive to differences in risk profiles among banks and bank holding companies, to take into account off-balance sheet exposure and to minimize disincentives for holding liquid assets. Under the risk-based capital guidelines, assets are assigned to one of four risk categories: 0%, 20%, 50% and 100%. For example, U.S. Treasury securities are assigned to the 0% risk category while most categories of loans are assigned to the 100% risk category. Off-balance sheet exposures such as standby letters of credit are risk-weighted and all or a portion thereof are included in risk-weighted assets based on an assessment of the relative risks that they present. The risk-weighted asset base is equal to the sum of the aggregate dollar values of assets and off-balance sheet items in each risk category, multiplied by the weight assigned to that category.

Federal Reserve Oversight

The Company is required to give the Federal Reserve prior written notice of any purchase or redemption of its outstanding equity securities if the gross consideration for the purchase or redemption, when combined with the net consideration paid for all such purchases or redemptions during the preceding 12 months, is equal to 10% or more of the Company's consolidated net worth. The Federal Reserve may disapprove such a transaction if it determines that the proposed redemption or stock purchase would constitute an unsafe or unsound practice, would violate any law, regulation, Federal Reserve order or directive or any condition imposed by, or written agreement with, the Federal Reserve.

The Federal Reserve has issued its "Policy Statement on Cash Dividends Not Fully Covered by Earnings (the "Policy Statement")" which sets forth various guidelines that the Federal Reserve believes a bank holding company should follow in establishing its dividend policy. In general, the Federal Reserve stated that bank holding companies should pay dividends only out of current earnings. The Federal Reserve also stated that dividends should not be paid unless the prospective rate of earnings retention by the holding company appears consistent with its capital needs, asset quality and overall financial condition.

The Company is required to file annual and quarterly reports with the Federal Reserve, and such additional information as the Federal Reserve may require pursuant to the Bank Holding Company Act. The Federal Reserve may examine a bank holding company or any of its subsidiaries.

Additional Federal Regulatory Issues

In June 2010, the federal banking agencies issued joint guidance on executive compensation designed to help ensure that a banking organization's incentive compensation policies do not encourage imprudent risk taking and are consistent with the safety and soundness of the organization. In addition, the Dodd-Frank Act requires those agencies, along with the Commission, to adopt rules to require reporting of incentive compensation and to prohibit certain compensation arrangements. The federal banking agencies and the Commission proposed such rules in April 2011. In addition, in June 2012, the Commission issued final rules to implement the Dodd-Frank Act's requirement that the Commission direct the national securities exchanges to adopt certain listing standards related to the compensation committee of a company's board of directors as well as its compensation advisers.

The Company is a legal entity separate and distinct from The First. There are various restrictions that limit the ability of The First to finance, pay dividends or otherwise supply funds to the Company or other affiliates. In addition, subsidiary banks of holding companies are subject to certain restrictions under Sections 23A and 23B of the Federal

Reserve Act on any extension of credit to the bank holding company or any of its subsidiaries, on investments in the stock or other securities thereof and on the taking of such stock or securities as collateral for loans to any borrower. Further, a bank holding company and its subsidiaries are prohibited from engaging in certain tie-in arrangements in connection with extensions of credit, leases or sales of property, or furnishing of services.

Stress Testing

The Dodd-Frank Act requires stress testing of certain bank holding companies and banks that have more than \$10 billion but less than \$50 billion of consolidated assets (“medium-sized companies”). Additional stress testing is required for banking organizations having \$50 billion or more of assets. Because the consolidated assets of the Company and The First are less than these threshold levels, the stress test requirements are not applicable to the Company or to The First at present.

Company Participation in Legislative and Regulatory Initiatives

The Congress, Treasury Department and the federal banking regulators, including the FDIC, have taken broad action since early September 2008 to address volatility in the U.S. banking system. In October 2008, the Emergency Economic Stabilization Act of 2008 (“EESA”) was enacted. The EESA authorized the Treasury Department to purchase from financial institutions and their holding companies up to \$700 billion in mortgage loans, mortgage-related securities and certain other financial instruments, including debt and equity securities issued by financial institutions and their holding companies in a troubled asset relief program (“TARP”). The purpose of TARP was to restore confidence and stability to the U.S. banking system and to encourage financial institutions to increase their lending to customers and to each other. The Treasury Department allocated \$250 billion towards the TARP Capital Purchase Program (“CPP”), pursuant to which the Treasury Department purchased debt or equity securities from participating institutions. The TARP also included the Community Development Capital Initiative (“CDCI”), which was made available only to certified Community Development Financial Institutions (“CDFIs”) and imposed a lower dividend or interest rate, as applicable, than the CPP funding. Participants in the TARP are subject to executive compensation limits and are encouraged to expand their lending and mortgage loan modifications.

On February 6, 2009, as part of the CPP, the Company entered into a Letter Agreement and Securities Purchase Agreement (collectively, the “Purchase Agreement”) with the Treasury Department, pursuant to which the Company sold (i) 5,000 shares of the Company’s Fixed Rate Cumulative Perpetual Preferred Stock, Series UST (the “CPP Preferred Stock”) and (ii) a warrant (the “Warrant”) to purchase 54,705 shares of the Company’s Common Stock for an exercise price of \$13.71 per share. On September 29, 2010, after successfully obtaining CDFI certification, the Company exited the CPP by refinancing its CPP funding into lower-cost CDCI funding and also accepted additional CDCI funding. In connection with this transaction, the Company retired its CPP Preferred Stock and issued to the Treasury Department 17,123 shares of the Company’s Fixed Rate Cumulative Perpetual Preferred Stock, Series CD (the “CDCI Preferred Stock”). Including refinanced funding and newly obtained funding, the Company’s total CDCI funding was \$17,123,000.

The CDCI Preferred Stock qualified as Tier 1 capital and, provided that the Company maintains its CDFI eligibility and certification. While the CDCI Preferred Stock was outstanding, Treasury was entitled to cumulative dividends at a rate of 2% per annum until 2018, and 9% per annum thereafter.

The Company was required to maintain compliance with the eligibility requirements of the CDFI Program. These eligibility requirements included the following:

The Company must have a primary mission of promoting community development, based on criteria set forth in 12 C.F.R. 1805.201(b)(1);

The Company must provide Financial Products, Development Services, and/or other similar financing as a predominant business activity in arm's-length transactions, as provided in 12 C.F.R. 1805.201(b)(2);

The Company must serve a Target Market by serving one or more Investment Areas and/or Targeted Populations, substantially in the manner set forth in 12 C.F.R. 1805.201(b)(3);

The Company must provide Development Services in conjunction with its Financial Products, either directly, through an Affiliate, or through a contract with a third-party provider, as provided in 12 C.F.R. 1805.201(b)(4);

The Company must maintain accountability to residents of the applicable Investment Area(s) and/or Targeted Population(s) through representation on its governing Board of Directors or otherwise, as provided in 12 C.F.R. 1805.201(b)(5); and

The Company must remain a non-governmental entity which is not an agency or instrumentality of the United States of America, or any State or political subdivision thereof, as described in 12 C.F.R. 1805.201(b)(6) and within the meaning of any supplemental regulations or interpretations of 12 C.F.R. 1805.201(b)(6) or such supplemental regulations published by the Fund.

As used in the discussion above, the terms “Affiliate,” “Financial Products,” “Development Services,” “Target Market,” “Investment Area(s),” and “Targeted Population(s)” have the meanings ascribed to such terms in 12 C.F.R. 1805.104.

American Reinvestment and Recovery Act of 2009. The America Reinvestment and Recovery Act of 2009 (“ARRA”) contained expansive new restrictions on executive compensation for financial institutions and other companies participating in the TARP. As long as the Treasury continued to hold equity interests in the Company issued under the TARP, the Company monitored its compensation arrangements, modified such compensation arrangements, agreed to limit and limit its compensation deductions, and took such other actions as were necessary to comply with the standards discussed below. These restrictions applied to us during 2016 and are further detailed in implementing regulations found at 31 CFR Part 30, which are described below (any reference to “ARRA” herein includes a reference to the implementing regulations). On December 6, 2016, the Company repurchased all 17,123 shares of its CDCI Preferred Shares from Treasury at fair market value. Therefore, as of December 6, 2016, the Company no longer has any obligations under TARP or the ARRA. However, as part of its repurchase obligations with the Treasury, the Company agreed to maintain its CDFI certification status for a period of two years.

ARRA prohibits bonus and similar payments to the most highly compensated employee of the Company. The prohibition does not apply to bonuses payable pursuant to “employment agreements” in effect prior to February 11, 2009. “Long-term” restricted stock is excluded from ARRA’s bonus prohibition, but only to the extent the value of the stock does not exceed one-third of the total amount of annual compensation of the employee receiving the stock, the stock does not “fully vest” until after all TARP-related obligations have been satisfied, and any other conditions which the Treasury may specify have been met.

ARRA prohibits any payment to the principal executive officer, the principal financial officer, and any of the next eight most highly compensated employees upon departure from the Company for any reason for as long as any TARP-related obligations remain outstanding.

Under ARRA TARP-participating companies are required to recover any bonus or other incentive payment paid to the principal executive officer, the principal financial officer, or any of the next 23 most highly compensated employees on the basis of materially inaccurate financial or other performance criteria.

ARRA prohibits TARP participants from implementing any compensation plan that would encourage manipulation of the reported earnings of the Company in order to enhance the compensation of any of its employees.

ARRA requires the principal executive officer and the principal financial officer of any publicly-traded TARP-participating company to provide a written certification of compliance with the executive compensation

restrictions in ARRA in the Company's annual filings with the SEC beginning in 2010.

ARRA requires each TARP-participating company to implement a company-wide policy regarding excessive or luxury expenditures, including excessive expenditures on entertainment or events, office and facility renovations, aviation or other transportation services.

ARRA directs the Treasury to review bonuses, retention awards, and other compensation paid to the principal executive officer and the next four other highest paid executive officer of the Company and the next 20 most highly compensated employees of each company receiving TARP assistance before ARRA was enacted, and to "seek to negotiate" with the TARP recipient and affected employees for reimbursement if it finds any such payments were inconsistent with TARP or otherwise in conflict with the public interest.

ARRA also prohibits the payment of tax gross-ups; required disclosures related to perquisite payments and the engagement, if any, by the TARP participant of a compensation consultant; and prohibits the deduction for tax purposes of executive compensation in excess of \$500,000 for each applicable senior executive.

The First, A National Banking Association

The First operates as a national banking association incorporated under the laws of the United States and subject to examination by the OCC. Deposits in The First are insured by the FDIC up to a maximum amount (generally \$250,000 per depositor, subject to aggregation rules). The OCC and the FDIC regulate or monitor virtually all areas of The First's operations, including security devices and procedures, adequacy of capitalization and loan loss reserves, loans, investments, borrowings, deposits, mergers, issuances of securities, payment of dividends, interest rates payable on deposits, interest rates or fees chargeable on loans, establishment of branches, corporate reorganizations, maintenance of books and records, and adequacy of staff training to carry on safe lending and deposit gathering practices. The OCC requires The First to maintain certain capital ratios and imposes limitations on The First's aggregate investment in real estate, bank premises, and furniture and fixtures. The First is required by the OCC to prepare quarterly reports on their financial condition and to conduct an annual audit of their financial affairs in compliance with minimum standards and procedures prescribed by the OCC.

Under FDICIA, all insured institutions must undergo regular on-site examinations by their appropriate banking agency. The cost of examinations of insured depository institutions and any affiliates may be assessed by the appropriate agency against each institution or affiliate as it deems necessary or appropriate. Insured institutions are required to submit annual reports to the FDIC and the appropriate agency (and state supervisor when applicable). FDICIA also directs the FDIC to develop with other appropriate agencies a method for insured depository institutions to provide supplemental disclosure of the estimated fair market value of assets and liabilities, to the extent feasible and practicable, in any balance sheet, financial statement, report of condition, or any other report of any insured depository institution. FDICIA also requires the federal banking regulatory agencies to prescribe, by regulation, standards for all insured depository institutions and depository institution holding companies relating, among other things, to: (i) internal controls, information systems, and audit systems; (ii) loan documentation; (iii) credit underwriting; (iv) interest rate risk exposure; and (v) asset quality.

National banks and their holding companies which have been chartered or registered or undergone a change in control within the past two years or which have been deemed by the OCC or the Federal Reserve Board, respectively, to be troubled institutions must give the OCC or the Federal Reserve Board, respectively, thirty days prior notice of the appointment of any senior executive officer or director. Within the thirty day period, the OCC or the Federal Reserve Board, as the case may be, may approve or disapprove any such appointment.

Deposit Insurance. The FDIC establishes rates for the payment of premiums by federally insured banks and thrifts for deposit insurance. A Deposit Insurance Fund ("DIF") is maintained for commercial banks and thrifts, with insurance premiums from the industry used to offset losses from insurance payouts when banks and thrifts fail. Since 1993, insured depository institutions like The First have paid for deposit insurance under a risk-based premium system. Assessments are calculated based on the depository institution's average consolidated total assets, less its average amount of tangible equity.

Transactions With Affiliates and Insiders. The First is subject to Section 23A of the Federal Reserve Act, which places limits on the amount of loans to, and certain other transactions with, affiliates, as well as on the amount of advances to third parties collateralized by the securities or obligations of affiliates. The aggregate of all covered transactions is limited in amount, as to any one affiliate, to 10% of The First's capital and surplus and, as to all affiliates combined, to 20% of The First's capital and surplus. Furthermore, within the foregoing limitations as to amount, each covered transaction must meet specified collateral requirements.

The First is also subject to Section 23B of the Federal Reserve Act, which prohibits an institution from engaging in certain transactions with affiliates unless the transactions are on terms substantially the same, or at least as favorable to such institution, as those prevailing at the time for comparable transactions with nonaffiliated companies. The First is subject to certain restrictions on extensions of credit to executive officers, directors, certain principal shareholders, and their related interests. Such extensions of credit (i) must be made on substantially the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with third parties and (ii) must not involve more than the normal risk of repayment or present other unfavorable features.

Dividends. The principal source of funds from which we pay cash dividends are the dividends received from our bank subsidiary, The First. Federal banking laws and regulations restrict the amount of dividends and loans a bank may make to its parent company. Under certain conditions, dividends paid to us by The First are subject to approval by the Office of the Comptroller of the Currency. A national bank may not pay dividends from its capital. All dividends must be paid out of undivided profits then on hand, after deducting expenses, including reserves for losses and bad debts. In addition, a national bank is prohibited from declaring a dividend on its shares of common stock until its surplus equals its stated capital, unless the bank has transferred to surplus no less than one-tenth of its net profits of the preceding two consecutive half-year periods (in the case of an annual dividend). The approval of the OCC is required if the total of all dividends declared by a national bank in any calendar year exceeds the total of its net profits for that year combined with its retained net profits for the preceding two years, less any required transfers to surplus. In addition, under FDICIA, the banks may not pay a dividend if, after paying the dividend, the bank would be undercapitalized. See "Capital Requirements" above.

Additionally, as discussed above we participated in the CDCI program under TARP during 2016. We received \$17,123,000 in funding under the CDCI program in exchange for our issuance of preferred stock and common stock warrants on September 29, 2010. On December 6, 2016, the Company repurchased all 17,123 shares of its CDCI Preferred Shares at fair market value \$15,925,000, which equated to a discount of 7% to par, or \$1,198,000. Therefore, the Company no longer has any obligations under the CDCI or TARP. However, due to our participation in the CDCI program during 2016, our ability to raise dividends was constrained by TARP and ARRA to no more than \$0.15 per share annually.

Branching. National banks are required by the National Bank Act to adhere to branch office banking laws applicable to state banks in the states in which they are located. Under current Mississippi, Alabama, Louisiana and Florida law, banks may open branches throughout these states with the prior approval of the OCC or other primary federal regulator. In addition, with prior regulatory approval, banks are able to acquire existing banking operations in Mississippi, Alabama, Louisiana and Florida. Furthermore, federal legislation has recently been passed which permits interstate branching. The new law permits out of state acquisitions by bank holding companies (subject to veto by new state law), interstate branching by banks if allowed by state law, interstate merging by banks, and de novo branching by national banks if allowed by state law.

Community Reinvestment Act. The Community Reinvestment Act requires that, in connection with examinations of financial institutions within their respective jurisdictions, the Federal Reserve, the FDIC, the OCC, or the Office of Thrift Supervision shall evaluate the record of the financial institutions in meeting the credit needs of their local communities, including low and moderate income neighborhoods, consistent with the safe and sound operation of those institutions. These factors are also considered in evaluating mergers, acquisitions, and applications to open a branch or facility.

USA Patriot Act. In 2001, the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 (the "USA Patriot Act") was signed into law. The USA Patriot Act

broadened the application of anti-money laundering regulations to apply to additional types of financial institutions, such as broker-dealers, and strengthened the ability of the U.S. government to detect and prosecute international money laundering and the financing of terrorism. The principal provisions of Title III of the USA Patriot Act require that regulated financial institutions, including banks: (i) establish an anti-money laundering program that includes training and audit components; (ii) comply with regulations regarding the verification of the identity of any person seeking to open an account; (iii) take additional required precautions with non-U.S. owned accounts; and (iv) perform certain verification and certification of money laundering risk for their foreign correspondent banking relationships. The USA Patriot Act also expanded the conditions under which funds in a U.S. interbank account may be subject to forfeiture and increased the penalties for violation of anti-money laundering regulations. Failure of a financial institution to comply with the USA Patriot Act's requirements could have serious legal and reputational consequences for the institution. The First has adopted policies, procedures and controls to address compliance with the requirements of the USA Patriot Act under the existing regulations and will continue to revise and update its policies, procedures and controls to reflect changes required by the USA Patriot Act and implementing regulations.

Other Bank Regulations. Interest and certain other charges collected or contracted for by The First are subject to state usury laws and certain federal laws concerning interest rates. The First's loan operations are subject to certain federal laws applicable to credit transactions, such as the federal Truth-In-Lending Act, governing disclosures of credit terms to consumer borrowers; the Home Mortgage Disclosure Act of 1975, requiring financial institutions to provide information to enable the public and public officials to determine whether a financial institution is fulfilling its obligation to help meet the housing needs community it serves; the Equal Credit Opportunity Act, prohibiting discrimination on the basis of creed or other prohibited factors in extending credit; the Fair Credit Reporting Act of 1978, governing the use and provision of information to credit reporting agencies; the Fair Debt Collection Practices Act, concerning the manner in which consumer debts may be collected by collection agencies; and the rules and regulations of the various federal agencies charged with the responsibility of implementing such federal laws. The deposit operations of The First also are subject to the Right to Financial Privacy Act, which imposes a duty to maintain confidentiality of consumer financial records and prescribes procedures for complying with administrative subpoenas of financial records, and the Electronic Funds Transfer Act and Regulation E issued by the Federal Reserve Board to implement that Act, which governs automatic deposits to and withdrawals from deposit accounts and customers' rights and liabilities arising from the use of automated teller machines and other electronic banking services.

Other Regulatory Matters

Risk-retention rules. Under the final risk-retention rules, banks that sponsor the securitization of asset-backed securities and residential-mortgage backed securities are required to retain 5% of any loan they sell or securitize, except for mortgages that meet low-risk standards to be developed by regulators.

Changes to federal preemption. The Dodd-Frank Act created a new independent supervisory body, the Consumer Financial Protection Bureau (the "CFPB") that is to be housed within the Federal Reserve. The CFPB is the primary regulator for federal consumer financial statutes. State attorneys general are authorized to enforce new regulations issued by the CFPB. Although state consumer financial laws will continue to be preempted under the National Bank Act, OCC determinations of such preemption are made on a case-by-case basis. As a result, it is possible that state consumer financial laws enacted in the future may be held to apply to our business activities. The cost of complying with any such additional laws could have a negative impact on our financial results.

Changes to regulation of bank holding companies. Under the Dodd-Frank Act, bank holding companies must be well-capitalized and well-managed to engage in interstate transactions. In the past, only the subsidiary banks were required to meet those standards. The Federal Reserve Board's "source of strength doctrine" has now been codified, mandating that bank holding companies such as the Company serve as a source of strength for their subsidiary banks, such that the bank holding company must be able to provide financial assistance in the event the subsidiary bank experiences financial distress.

Mortgage Rules. During 2013, the CFPB finalized a series of rules related to the extension of residential mortgage loans made by banks. Among these rules are requirements that a bank make a good faith determination that a borrower has the ability to repay a mortgage loan prior to extending such credit, a requirement that certain mortgage loans contain escrow payments, new appraisal requirements, and specific rules regarding how loan originators may be compensated and the servicing of residential mortgage loans. The implementation of these new rules began in January 2014.

Volcker Rule. In December 2013, the Federal Reserve, the FDIC, the OCC, the Commission, and the Commodity Futures Trading Commission issued the “Prohibitions And Restrictions On Proprietary Trading And Certain Interests In, And Relationships With, Hedge Funds And Private Equity Funds,” commonly referred to as the Volcker Rule, which regulates and restricts investments which may be made by banks. The Volcker Rule was adopted to implement a portion of the Dodd-Frank Act and new Section 13 of the Bank Holding Company Act, which prohibits any banking entity from engaging in proprietary trading or from acquiring or retaining an ownership interest in, or sponsoring or having certain relationships with, a hedge fund or private equity fund (“covered funds”), subject to certain exemptions.

Debit Interchange Fees

Interchange fees, or “swipe” fees, are fees that merchants pay to credit card companies and card-issuing banks such as The First for processing electronic payment transactions on their behalf. The maximum permissible interchange fee that an issuer may receive for an electronic debit transaction is the sum of 21 cents per transaction and 5 basis points multiplied by the value of the transaction, subject to an upward adjustment of 1 cent if an issuer certifies that it has implemented policies and procedures reasonably designed to achieve the fraud-prevention standards set forth by the Federal Reserve.

In addition, the legislation prohibits card issuers and networks from entering into exclusive arrangements requiring that debit card transactions be processed on a single network or only two affiliated networks, and allows merchants to determine transaction routing. Due to the Company’s size, The Federal Reserve rule limiting debit interchange fees has not reduced our debit card interchange revenues.

Summary

The foregoing is a brief summary of certain statutes, rules and regulations affecting the Company and The First. It is not intended to be an exhaustive discussion of all statutes and regulations having an impact on the operations of such entities.

Increased regulation generally has resulted in increased legal and compliance expense.

Finally, additional bills may be introduced in the future in the U.S. Congress and state legislatures to alter the structure, regulation and competitive relationships of financial institutions. It cannot be predicted whether and in what form any of these proposals will be adopted or the extent to which the business of the Company and The First may be affected thereby.

Effect of Governmental Monetary and Fiscal Policies

The difference between the interest rate paid on deposits and other borrowings and the interest rate received on loans and securities comprises most of a bank’s earnings. In order to mitigate the interest rate risk inherent in the industry,

the banking business is becoming increasingly dependent on the generation of fee and service charge revenue.

The earnings and growth of a bank will be affected by both general economic conditions and the monetary and fiscal policy of the U.S. government and its agencies, particularly the Federal Reserve. The Federal Reserve sets national monetary policy such as seeking to curb inflation and combat recession. This is accomplished by its open-market operations in U.S. government securities, adjustments in the amount of reserves that financial institutions are required to maintain and adjustments to the discount rates on borrowings and target rates for federal funds transactions. The actions of the Federal Reserve in these areas influence the growth of bank loans, investments and deposits and also affect interest rates on loans and deposits. The nature and timing of any future changes in monetary policies and their potential impact on the Company cannot be predicted.

ITEM 1A. RISK FACTORS

Making or continuing an investment in securities, including the Company's Common Stock, involves certain risks that you should carefully consider. The risks and uncertainties described below are not the only risks that may have a material adverse effect on the Company. Additional risks and uncertainties also could adversely affect the Company's business and results of operations. If any of the following risks actually occur, our business, financial condition or results of operations could be affected, the market price for your securities could decline, and you could lose all or a part of your investment. Further, to the extent that any of the information contained in this Annual Report on Form 10-K constitutes forward-looking statements, the risk factors set forth below also are cautionary statements identifying important factors that could cause the Company's actual results to differ materially from those expressed in any forward-looking statements made by or on behalf of the Company.

We may be vulnerable to certain sectors of the economy.

A significant portion of our loan portfolio is secured by real estate. If the economy deteriorates and real estate values depress beyond a certain point, as happened during the recent recession, the collateral value of the portfolio and the revenue stream from those loans could come under stress and possibly require additional loan loss accruals which would negatively impact our earnings. Our ability to dispose of foreclosed real estate at prices above the respective carrying values could also be adversely affected, causing additional losses.

Difficult market conditions in past years have adversely affected the industry in which we operate.

The capital and credit markets are subject to volatility and disruption. Dramatic declines in the housing market in years past caused home prices to fall and increased foreclosures, unemployment and under-employment. These events, if they were to happen again, could negatively impact the credit performance of mortgage loans and result in significant write-downs of asset values, including government-sponsored entities as well as major commercial and investment banks. Still wary about the stability of the financial markets generally and the strength of counterparties, many lenders still have reduced funding to borrowers, including to other financial institutions. Market turmoil and tightening of credit could lead to an increased level of commercial and consumer delinquencies, lack of consumer confidence and widespread reduction of business activity generally. A worsening of these conditions would have an adverse effect on us and others in the financial institution industry generally, particularly in our real estate markets, as lower home prices and increased foreclosures would result in higher charge-offs and delinquencies.

General economic conditions in the areas where our operations or loans are concentrated may adversely affect our customers' ability to meet their obligations.

A sudden or severe downturn in the economy in the geographic markets we serve in the states of Mississippi, Louisiana, Alabama or Florida may affect the ability of our customers to meet loan payment obligations on a timely basis. The local economic conditions in these areas have a significant impact on our commercial, real estate, and construction loans, the ability of borrowers to repay these loans and the value of the collateral securing such loans. Changes resulting in adverse economic conditions of these market areas could negatively impact the financial results of the Company's banking operations, earnings, and profitability.

Additionally, adverse economic changes may cause customers to withdraw deposit balances, thereby causing a strain on our liquidity.

We are subject to a risk of rapid and significant changes in market interest rates.

Our assets and liabilities are primarily monetary in nature, and as a result we are subject to significant risks tied to changes in interest rates. Our ability to operate profitably is largely dependent upon net interest income. Unexpected movement in interest rates markedly changing the slope of the current yield curve could cause net interest margins to decrease, subsequently decreasing net interest income. In addition, such changes could adversely affect the valuation of our assets and liabilities.

At present the Company's one-year interest rate sensitivity position is slightly asset sensitive, but a gradual increase in interest rates during the next twelve months should not have a significant impact on net interest income during that period. However, as with most financial institutions, the Company's results of operations are affected by changes in interest rates and the Company's ability to manage this risk. The difference between interest rates charged on interest-earning assets and interest rates paid on interest-bearing liabilities may be affected by changes in market interest rates, changes in relationships between interest rate indices, and/or changes in the relationships between long-term and short-term market interest rates. A change in this difference might result in an increase in interest expense relative to interest income, or a decrease in the Company's interest rate spread.

Certain changes in interest rates, inflation, or the financial markets could affect demand for our products and our ability to deliver products efficiently.

Loan originations, and therefore loan revenues, could be adversely impacted by sharply rising interest rates. Conversely, sharply falling rates could increase prepayments within our loan and securities portfolio lowering interest earnings from those assets. An unanticipated increase in inflation could cause operating costs related to salaries and benefits, technology, and supplies to increase at a faster pace than revenues.

The fair market value of the securities portfolio and the investment income from these securities also fluctuates depending on general economic and market conditions. In addition, actual net investment income and/or cash flows from investments that carry prepayment risk, such as mortgage-backed and other asset-backed securities, may differ from those anticipated at the time of investment as a result of interest rate fluctuations.

Changes in the policies of monetary authorities and other government action could adversely affect profitability.

The results of operations of the Company are affected by credit policies of monetary authorities, particularly the Board of Governors of the Federal Reserve System, which we refer to as the Federal Reserve Board. The instruments of monetary policy employed by the Federal Reserve Board include open market operations in U.S. government securities, changes in the discount rate or the federal funds rate on bank borrowings and changes in reserve requirements against bank deposits. In view of changing conditions in the national economy and in the money markets, we cannot predict possible future changes in interest rates, deposit levels, loan demand or the Company's business and earnings. Furthermore, the actions of the United States government and other governments in responding to developing situations or implementing new fiscal or trade policies may result in currency fluctuations, exchange controls, market disruption and other adverse effects.

Natural disasters could affect our ability to operate.

Our market areas are susceptible to natural disasters such as hurricanes and tornados. Natural disasters can disrupt operations, result in damage to properties that may be securing our loan assets and negatively affect the local economies in which we operate. We cannot predict whether or to what extent damage caused by future hurricanes, tornados or other natural disasters will affect operations or the economies in our market areas, but such weather events could cause a decline in loan originations, a decline in the value or destruction of properties securing the loans and an increase in the risk of delinquencies, foreclosures or loan losses.

Greater loan losses than expected may adversely affect our earnings.

The First, as lender, is exposed to the risk that its customers will be unable to repay their loans in accordance with their terms and that any collateral securing the payment of their loans may not be sufficient to assure repayment. Credit losses are inherent in the business of making loans and could have a material adverse effect on operating results. Credit risk with respect to our real estate and construction loan portfolio will relate principally to the creditworthiness of corporations and the value of the real estate serving as security for the repayment of loans. Credit risk with respect to its commercial and consumer loan portfolio will relate principally to the general creditworthiness of businesses and individuals within our local markets.

The First makes various assumptions and judgments about the collectability of its loan portfolio and provides an allowance for estimated loan losses based on a number of factors. The First believes that its current allowance for loan losses is adequate. However, if our assumptions or judgments prove to be incorrect, the allowance for loan losses may not be sufficient to cover actual loan losses. We may have to increase the allowance in the future in response to the request of one of our primary banking regulators, to adjust for changing conditions and assumptions, or as a result of any deterioration in the quality of the loan portfolio. The actual amount of future provisions for loan losses cannot be determined at this time and may vary from the amounts of past provisions.

We may need to rely on the financial markets to provide needed capital.

Our common stock is listed and traded on the NASDAQ stock market. Although we anticipate that our capital resources will be adequate for the foreseeable future to meet our capital requirements, at times we may depend on the liquidity of the NASDAQ stock market to raise equity capital. If the market should fail to operate, or if conditions in the capital markets are adverse, we may be constrained in raising capital. Should these risks materialize, the ability to further expand our operations through organic or acquisitive growth may be limited.

We are subject to regulation by various Federal and State entities.

The Company and The First are subject to the regulations of the Securities and Exchange Commission (“SEC”), the Consumer Financial Protection Bureau, the Federal Reserve Board, the Federal Deposit Insurance Corporation, and the OCC. New regulations issued by these agencies may adversely affect our ability to carry on our business activities. The Company is subject to various Federal and state laws and certain changes in these laws and regulations may adversely affect operations.

The Company and The First are also subject to the accounting rules and regulations of the SEC and the Financial Accounting Standards Board. Changes in accounting rules could adversely affect the reported financial statements or results of operations of the Company and may also require extraordinary efforts or additional costs to implement. Any of these laws or regulations may be modified or changed from time to time, and we cannot be assured that such modifications or changes will not adversely affect the Company.

We may engage in acquisitions of other businesses from time to time, which may not be well-received.

On occasion, we may engage in acquisitions of other businesses. Difficulty in integrating an acquired business or company may cause us not to realize expected revenue increases, cost savings, increases in geographic or product presence, or other anticipated benefits from any acquisition. The integration could result in higher than expected deposit attrition (run-off), loss of key employees, disruption of the Company’s business or the business of the acquired company, or otherwise adversely affect the Company’s ability to maintain relationships with customers and employees or achieve the anticipated benefits of the acquisition. The acquired companies may also have legal contingencies, beyond those that we are aware of, that could result in unexpected costs. The Company may need to make additional investment in equipment and personnel to manage higher asset levels and loan balances as a result of any significant acquisition, which may adversely impact earnings.

We may fail to realize the anticipated cost savings and other financial benefits of the Iberville Bank Acquisition and Gulf Coast Acquisition on the anticipated schedule, if at all..

The First, Iberville Bank, and Gulf Coast have historically operated independently. The success of the mergers of Iberville Bank and Gulf Coast into The First will depend, in part, on our ability to successfully combine the businesses of The First, Iberville Bank, and Gulf Coast. To realize these anticipated benefits, The First expects to integrate Iberville Bank's and Gulf Coast's businesses with its own businesses. We may face significant challenges in integrating both Iberville Bank's and Gulf Coast's operations into our operations in a timely and efficient manner and in retaining personnel from these two banks that we anticipate needing. Achieving the anticipated cost savings and financial benefits of the mergers will depend, in part, on whether we can successfully integrate these businesses. It is possible that the integration process could result in the loss of key employees, the disruption of each company's ongoing businesses or inconsistencies in standards, controls, procedures, and policies that adversely affect our ability to maintain relationships with clients, customers, depositors, and employees or to achieve the anticipated benefits of the merger. In addition, the integration of certain operations following the mergers will require the dedication of significant management resources, which may temporarily distract management's attention from the day-to-day business of the combined company. Any inability to realize the full extent of, or any of, the anticipated cost savings and financial benefits of the mergers, as well as any delays encountered in the integration process, could have an adverse effect on the business and results of operations of the combined company, which may affect the market price of our common stock.

We are subject to industry competition which may have an adverse impact upon our success.

The profitability of the Company depends on its ability to compete successfully with other financial services companies. We operate in a highly competitive financial services environment. Certain competitors are larger and may have more resources than we do. We face competition in our regional market areas from other commercial banks, savings institutions, credit unions, internet banks, finance companies, mutual funds, insurance companies, brokerage and investment banking firms, and other financial intermediaries that offer similar services. Some of the nonbank competitors are not subject to the same extensive regulations that govern the Company or The First and may have greater flexibility in competing for business.

The First faces increased competition from both federally-chartered and state-chartered financial and thrift institutions, as well as credit unions, consumer finance companies, insurance companies, and other institutions in The First's market area. Some of these competitors are not subject to the same degree of regulation and restriction imposed upon The First. Many of these competitors also have broader geographic markets and substantially greater resources and lending limits than The First and offer certain services such as trust banking that The First does not currently provide. In addition, many of these competitors have numerous branch offices located throughout the extended market areas of The First that may provide these competitors with an advantage in geographic convenience that The First does not have at present. Currently there are numerous other commercial banks, savings institutions, and credit unions operating in The First's primary service area.

We also compete with numerous financial and quasi-financial institutions for deposits and loans, including providers of financial services over the internet. Recent technology advances and other changes have allowed parties to effectuate financial transactions that previously required the involvement of banks. For example, consumers can maintain funds in brokerage accounts or mutual funds that would have historically been held as bank deposits. Consumers can also complete transactions such as paying bills and transferring funds directly without the assistance of banks. The process of eliminating banks as intermediaries, known as "disintermediation," could result in the loss of fee income, as well as the loss of customer deposits and the related income generated from those deposits. The loss of these revenue streams and access to lower cost deposits as a source of funds could have a material adverse effect on our financial condition and results of operations.

Future issuances of additional securities could result in dilution of shareholders' ownership.

We may determine from time to time to issue additional securities to raise additional capital, support growth, or to make acquisitions. Further, we may issue stock options or other stock grants to retain and motivate our employees. Such issuances of our securities could dilute the ownership interests of the Company's shareholders.

Anti-takeover laws and certain agreements and charter provisions may adversely affect share value.

Certain provisions of state and federal law and our articles of incorporation may make it more difficult for someone to acquire control of the Company. Under federal law, subject to certain exemptions, a person, entity, or group must notify the federal banking agencies before acquiring 10% or more of the outstanding voting stock of a bank holding company, including the Company's shares. Banking agencies review the acquisition to determine if it will result in a change of control. The banking agencies have 60 days to act on the notice, and take into account several factors, including the resources of the acquiror and the antitrust effects of the acquisition. There also are Mississippi statutory provisions and provisions in our articles of incorporation that may be used to delay or block a takeover attempt. As a result, these statutory provisions and provisions in our articles of incorporation could result in the Company being less attractive to a potential acquiror.

Securities issued by the Company, including the Company's common stock, are not FDIC insured.

Securities issued by the Company, including the Company's common stock, are not savings or deposit accounts or other obligations of any bank and are not insured by the FDIC, the Deposit Insurance Fund, or any other governmental agency or instrumentality, or any private insurer, and are subject to investment risk, including the possible loss of principal.

The failure of other financial institutions could adversely affect the Company.

Our ability to engage in routine funding transactions could be adversely affected by the actions and potential failures of other financial institutions. Financial institutions are interrelated as a result of trading, clearing, counterparty and other relationships. As a result, defaults by, or even rumors or concerns about, one or more financial institutions or the financial services industry generally have led to market-wide liquidity problems and could lead to losses or defaults by the Company or by other institutions.

Concern by customers over deposit insurance may cause a decrease in deposits and changes in the mix of funding sources available to the Company.

With increased concerns about bank failures during and after the recent recession, customers increasingly are concerned about the extent to which their deposits are insured by the FDIC. Customers may withdraw deposits in an effort to ensure that the amount they have on deposit with their bank is fully insured and some may seek deposit products or other bank savings and investment products that are collateralized. Decreases in deposits and changes in the mix of funding sources may adversely affect the Company's funding costs and net income.

Evaluation of investment securities for other-than-temporary impairment involves subjective determinations and could materially impact our results of operations and financial condition.

The evaluation of impairments is a quantitative and qualitative process, which is subject to risks and uncertainties, and is intended to determine whether declines in the fair value of investments should be recognized in current period earnings. The risks and uncertainties include changes in general economic conditions, the issuers' financial condition or future recovery prospects, the effects of changes in interest rates or credit spreads and the expected recovery period. Estimating future cash flows involves incorporating information received from third-party sources and making internal assumptions and judgments regarding the future performance of the underlying collateral and assessing the probability that an adverse change in future cash flows has occurred. The determination of the amount of other-than-temporary impairments is based upon the Company's quarterly evaluation and assessment of known and inherent risks associated with the respective asset class. Such evaluations and assessments are revised as conditions change and new information becomes available.

Additionally, our management considers a wide range of factors about the security issuer and uses its reasonable judgment in evaluating the cause of the decline in the estimated fair value of the security and in assessing the

prospects for recovery. Inherent in management's evaluation of the security are assumptions and estimates about the operations of the issuer and its future earnings potential. Impairments to the carrying value of our investment securities may need to be taken in the future, which would have a material adverse effect on our results of operations and financial condition.

We may be required to pay additional insurance premiums to the FDIC, which could negatively impact earnings.

Pursuant to the Dodd-Frank Act, the limit on FDIC coverage has been permanently increased to \$250,000, causing the premiums assessed to The First by the FDIC to increase. Depending upon any future losses that the FDIC insurance fund may suffer, there can be no assurance that there will not be additional premium increases in order to replenish the fund. The FDIC may need to set a higher base rate schedule or impose special assessments due to future financial institution failures and updated failure and loss projections. Potentially higher FDIC assessment rates than those currently projected could have an adverse impact on our results of operations.

With the completion of the acquisitions of Iberville Bank and Gulf Coast, the market price of our common stock may be affected by factors different from those historically affecting our independent operations through The First.

The historic businesses of each of The First, Iberville Bank, and Gulf Coast differ in important respects, and accordingly, the results of operations of the combined company and the market price of the combined company's shares of common stock may be affected by factors different from those historically affecting the independent results of operations of The First, Iberville Bank, and Gulf Coast.

The impact of flooding events in Louisiana and southwest Mississippi in 2016 on our market areas and those of Iberville Bank is presently unknown.

The First (including through the legacy operations of Iberville Bank) has a physical presence and collateral securing loans in or near parts of Louisiana and Mississippi that were affected by the late summer 2016 significant flooding in those areas. The First has worked diligently to assess and quantify the impact, if any, of this flooding on their respective businesses. While The First believes that any impact on their respective businesses has already been or will be adequately accounted for, either through the presence of insurance, special loan provisions, or otherwise, there can be no assurances that such measures will be appropriate or adequate. If the residual impact from such flooding is more significant on the businesses of The First, then the results of operations or financial condition of The First could be negatively impacted. If the impact from the flooding is more adverse than believed, the anticipated benefits from the Iberville Bank Acquisition may not be realized or realized to a lesser extent, and might have an adverse effect on the combined company and our Common Stock following such merger.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None

ITEM 2. PROPERTIES

Our company's main office, which is the holding company headquarters, is located at 6480 U.S. Hwy 98 West in Hattiesburg, Mississippi. As of year-end, we had 28 full service banking and financial services offices and one motor bank facility as well as four loan production offices. We lease the Hardy Court Branch, the Gulfport Downtown Branch, the Pascagoula Branch, the Ocean Springs Branch, the Fairhope Branch, the Bayley's Corner Branch, the Theodore Branch, the Dauphin Island Branch and the Baton Rouge Branch, which comprise nine of our full services

banking and financial services offices. We also lease the Brandon, the Madison, the Ocean Springs and the Slidell loan production offices. Management ensures that all properties, whether owned or leased, are maintained in suitable condition.

ITEM 3. LEGAL PROCEEDINGS

From time to time the Company and/or The First may be named as defendants in various lawsuits arising out of the normal course of business. At present, the Company is not aware of any legal proceedings that it anticipates may materially adversely affect its business.

There were approximately 2,031 record holders of the Company's common stock at March 13, 2017 and 9,144,412 shares outstanding.

Payment of Dividends

The principal sources of funds to the Company to pay dividends are the dividends received from The First, National Banking Association, Hattiesburg, Mississippi. Consequently, dividends are dependent upon The First's earnings, capital needs, regulatory policies, as well as statutory and regulatory limitations. Federal and state banking laws and regulations restrict the amount of dividends and loans a bank may make to its parent company. Approval by the Company's regulators is required if the total of all dividends declared in any calendar year exceed the total of its net income for that year combined with its retained net income of the preceding two years.

Not applicable.

ITEM 9A. CONTROLS AND PROCEDURES

The Company's principal executive officer and principal financial officer have concluded, based upon their evaluation of the Company's "disclosure controls and procedures" (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934) as of December 31, 2016 that the Company's disclosure controls and procedures were effective. During the quarter ended December 31, 2016, no changes have occurred in the Company's internal control over financial reporting that have materially affected or are reasonably likely to materially affect the Company's

internal control over financial reporting.

The First Bancshares, Inc.

Management's Report on Internal Control Over Financial Reporting

Management of the Company is responsible for establishing and maintaining effective "internal control over financial reporting" (as defined in Rule 13a-15(f) or 15d-15(f) under the Securities Exchange Act of 1934). Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with U.S. generally accepted accounting principles.

Under the supervision and with the participation of management, including the principal executive officer and principal financial officer, the Company conducted an evaluation of the effectiveness of internal control over financial reporting based on the framework in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework). This assessment included controls over the preparation of the schedules equivalent to the basic financial statements in accordance with the instructions for the Consolidated Financial Statements for Bank Holding Companies (Form FR Y-9C) to meet the reporting requirements of Section 112 of the Federal Deposit Insurance Corporation Improvement Act. Based on this evaluation, management of the Company has concluded the Company maintained effective internal control over financial reporting, as such term is defined in Securities Exchange Act of 1934 Rule 13a-15(f), as of December 31, 2016.

Internal control over financial reporting cannot provide absolute assurance of achieving financial reporting objectives because of its inherent limitations. Internal control over financial reporting is a process that involves human diligence and compliance and is subject to lapses in judgment and breakdowns resulting from human failures. Internal control over financial reporting can also be circumvented by collusion or improper management override. Because of such limitations, there is a risk that material misstatements may not be prevented or detected on a timely basis by internal control over financial reporting. These inherent limitations, however, are known features of the financial reporting process. It is possible, therefore, to design into the process safeguards to reduce, though not eliminate, this risk.

T. E. Lott & Company, an independent registered public accounting firm, which audited the Company's consolidated financial statements included in this Form 10-K, has issued an attestation report on the Company's internal control over financial reporting, which is included herein.

REPORT OF INDEPENDENT

REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of

The First Bancshares, Inc.

Hattiesburg, Mississippi

We have audited the internal control over financial reporting of The First Bancshares, Inc. and subsidiary (the "Company") as of December 31, 2016, based on criteria established in *Internal Control — Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Because management's assessment and our audit were conducted to meet the reporting requirements of Section 112 of the Federal Deposit Insurance Corporation Improvement Act (FDICIA), management's assessment and our audit of the Company's internal control over financial reporting included controls over the preparation of the schedules equivalent to the basic financial statements in accordance with the instructions for the Consolidated Financial Statements for Bank Holding Companies (Form FR Y-9C). The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and effected by the company's Board of Directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2016, based on the criteria established in *Internal Control — Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

We have not examined and, accordingly, we do not express an opinion or any other form of assurance on management's statement referring to compliance with laws and regulations.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of The First Bancshares, Inc. and subsidiary as of December 31, 2016 and 2015, and the related consolidated statements of income, comprehensive income, changes in stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2016, and our report dated March 16, 2017, expressed an unqualified opinion on those consolidated financial statements.

/s/ T. E. Lott & Company

Columbus, Mississippi

March 16, 2017

ITEM 9B. OTHER INFORMATION

Not applicable.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS, AND CORPORATE GOVERNANCE

In response to this Item, the information contained under the captions, “Election of Directors” and “Additional Information Concerning Directors and Officers” of the Company's Proxy Statement to be filed with the SEC relating to the Annual Meeting of Shareholders to be held on May 25, 2017, is incorporated herein by reference.

Code of Ethics

Our company's Board of Directors has adopted a Code of Ethics that applies to the Company's directors, officers and employees. A copy of this Code of Ethics can be found at the Company's internet website at www.thefirstbank.com. We intend to disclose any amendments to the Company's Code of Ethics, and any waiver from a provision of the Code of Ethics granted to our principal executive officer, principal financial officer, principal accounting officer, or persons performing similar functions, on the Company's internet website within five business days following such amendment or waiver. The information contained on or connected to the Company's internet website is not incorporated by reference into this Form 10-K and should not be considered part of this or any other report that we file with or furnish to the SEC.

Audit Committee

The information contained under the caption “Committees of the Board of Directors” of the Company's Proxy Statement for the Annual Meeting of Shareholders to be held on May 25, 2017, is incorporated herein by reference. The Board of Directors has determined that there is at least one independent audit committee financial expert, J. Douglas Seidenburg, serving on the Audit Committee, as the terms independent and audit committee financial expert are used in pertinent NASDAQ listing standards and Securities and Exchange Commission regulations.

Corporate Governance

The information contained under the caption “Additional Information Concerning Directors and Officers” of the Company’s Proxy Statement for the Annual Meeting of Shareholders to be held on May 25, 2017 is incorporated herein by reference.

ITEM 11. EXECUTIVE COMPENSATION

In response to this Item, the information contained under the captions “Executive Officer Compensation” and “Director Compensation” of the Company’s Proxy Statement for the Annual Meeting of Shareholders to be held on May 25, 2017, is incorporated herein by reference.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

In response to this Item, the information contained under the caption “Security Ownership of Certain Beneficial Owners and Management” of the Company’s Proxy Statement for the Annual Meeting of Shareholders to be held on May 25, 2017, is incorporated herein by reference.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS AND DIRECTOR INDEPENDENCE

In response to this Item, the information contained under the caption “Certain Relationships and Related Transactions” of the Company’s Proxy Statement for the Annual Meeting of Shareholders to be held on May 25, 2017, is incorporated herein by reference.

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

In response to this Item, the information contained under the caption “Principal Accountant Fees and Services” of the Company’s Proxy Statement for the Annual meeting of Shareholders to be held on May 25, 2017, is incorporated herein by reference.

PART IV

ITEM 15. EXHIBITS AND FINANCIAL STATEMENT SCHEDULES

(a) The following documents are filed as part of this Report:

1. The following consolidated financial statements of The First Bancshares, Inc. and subsidiaries are filed as part of this Report under Item 8 – Financial Statements and Supplementary Data and included as Exhibit 13.1, hereto:

Consolidated balance sheets – December 31, 2016 and 2015 (page 39)

Consolidated statements of income – Years ended December 31, 2016, 2015, and 2014 (pages 40 to 41)

Consolidated statements of other comprehensive income – Years ended December 31, 2016, 2015, and 2014 (page 42)

Consolidated statements of changes in stockholders' equity – Years ended December 31, 2016, 2015 and 2014 (pages 43-45)

Consolidated statements of cash flows – Years ended December 31, 2016, 2015, and 2014 (pages 46 to 47)

Notes to consolidated financial statements – December 31, 2016, 2015, and 2014 (pages 48 to 90)

2. Consolidated Financial Statement Schedules:

All schedules have been omitted, as the required information is either inapplicable or included in the Notes to Consolidated Financial Statements.

3. Exhibits required to be filed by Item 601 of Regulation S-K, by Item 15(b) are listed below.

(b) Exhibits:

All other financial statements and schedules are omitted as the required information is inapplicable or the required information is presented in the consolidated financial statements or related notes.

(a) 3. Exhibits:
