SUMMARY

SK Telecom Co. Ltd. (the Company) decided to provide the Caller ID service to its customers free of charge starting January 1, 2006, which was approved by the board of directors on October 18, 2005. By providing such Caller ID service free of charge, the Company will be able to lower the financial burden on its customers, which is expected to result in the increased usage of such service among its customers, increasing further competitiveness for telecommunication fees. The Company plans to reformat computerized billing system by December 2005 to ensure proper billing to its customers reflecting no such charge for the Caller ID service.

The Caller ID service was first introduced and provided to the customers in May 2001, for 2,000 Won per month, and the service fee was reduced to 1,000 Won per month in October 2003. The number of Caller ID subscribers reached 18 million, which is 94% of all of the Company's customers, by the end of September 2005, which shows that the Caller ID service is one of the most commonly used value added services.

The Company expects the consumer spending on telecommunications to decrease by 200 billion Won per year with the implementation of such service.
