Table of Contents

TO OUR SHAREHOLDERS

In the first half of the 60th accounting period, ended September 30, 2005, consolidated operating revenue of Pioneer Corporation was ¥349,898 million, up 1.4% over the previous year.

However, net loss of ¥12,261 million was posted for the period, compared to net income of ¥4,809 million in the corresponding period of the previous year. This loss was principally caused by lower market prices for our main products due to more severe competition, resulting in a decrease of gross profit margins.

Reflecting the impact of continued severe business conditions, we have set interim dividend payments at ¥7.5 per share of common stock, a decrease of ¥5.0 from that for the corresponding period last year.

The business environment remains severe, characterized by uncertain economic conditions, particularly as the rising prices of crude oil and other raw materials may exert negative impact on the economies of Japan and the U.S., in which consumer spending had been steady. Also, price competition is increasingly tough in markets for our key products.

Despite these difficult conditions, we are committed to becoming profitable again by reviewing every aspect of our major business fields, reinvesting our resources in advanced, high-quality, value-added products that identify the core value of our Company, and enhancing our brand equity.

Table of Contents

In the plasma display business, we have been reinforcing our production capacity, as the market rapidly expands. Incoming orders, however, did not reach the levels we had planned for in the OEM (original equipment manufacturing) plasma display business, so we decided to adjust total production output until demand recovers. As we keep cutting costs extensively, we will continue to develop and launch unique products of superior innovation, performance and function. We are making efforts to enhance the value and strength of the Pioneer brand and to expand plasma display sales.

In the DVD business, the market is rapidly expanding, especially in DVD recorders and DVD drives for personal computers (PCs), while product prices are falling sharply. To overcome the competition, we must introduce more advanced products as early as possible, in addition to carrying out more cost cutting in production in China. We are aggressively reviewing our development and design process, aiming to enhance speed and efficiency of development, and to precede our competitors in supplying markets with products that customers welcome.

In the car electronics business, we are determined to maintain a leading position in the consumer market by reinforcing our car audio operations in the fast-growing markets of China, Central and South America and Russia. Developing products that differentiate us from our industry competitors will help extend the value of our brand. Our car navigation operations are renowned in Japan, where our sales efforts are as aggressive as ever. We are making a similarly bold push

Table of Contents

to fortify and extend our operations for this business in Europe and North America. In our business with automobile manufacturers, we are capitalizing on our product planning expertise in the consumer market, and propose innovative products to open up new business opportunities and increase sales.

Along with our ongoing efforts to improve management efficiency, we are advancing discussion on a restructuring that may include renewal of the Pioneer group business structure, as well as consequent consolidation of plants and offices and review of staffing. These measures, plus inventory reduction through better supply chain management, will help us return to profitability and improve cash flows.

We greatly appreciate the support that you have always given us. We are doing everything in our power to overcome the present difficulties and to improve shareholder value.

December 2005

Table of Contents

CONSOLIDATED OPERATING REVENUE BY BUSINESS SEGMENT

Effective from this 60th accounting period, the Company changed business segment classification for certain businesses. Results related to plasma displays for business use and DJ equipment have been moved from Others to Home Electronics. Previously reported amounts have been reclassified accordingly.

Percent of Operating Revenue

Six months ended September 30

Home Electronics

This segment includes plasma displays, DVD recorders, DVD players, DVD drives, stereo systems, individual stereo components, DJ equipment, telephones and equipment for cable TV systems.

Sales in the Home Electronics segment increased 9.4% from the corresponding period in the previous year to ¥144,958 million, as plasma display sales increased, despite a decrease in sales of DVD products.

In Japan, sales decreased 2.3% to ¥36,068 million mainly due to a decrease in sales of DVD recorders, despite an increase in sales of plasma displays.

Table of Contents

Overseas sales increased 14.0% to ¥108,890 million, due to a rise in sales of plasma displays worldwide, and of DVD drives for PCs in Asia, despite the decline in sales of DVD drives for PCs in Europe and North America and the discontinuation of sales of cable TV set-top boxes in North America.

Car Electronics

This segment includes car navigation systems, car stereos, car AV (audio/video) systems and car speakers.

Sales in the Car Electronics segment amounted to ¥160,353 million, up 3.9% over the corresponding period in the previous year. Car audio product sales were good, although car navigation system sales decreased, due to lower sales in Japan of these systems to automobile manufacturers.

In Japan, sales decreased 9.1% to ¥56,177 million, due to a decrease in sales of car navigation systems to automobile manufacturers, which reflected a lack of new car model launches in comparison to the corresponding period of the previous year, despite an increase in sales of car navigation systems for the consumer market.

Overseas sales increased 12.6% to ¥104,176 million, due to growth in sales of car audio products and car navigation systems to automobile manufacturers in North America, and of car audio products for the consumer market in Central and South America and Europe.

Table of Contents

Patent Licensing

This segment includes the licensing of patents related to laser optical disc technologies.

Royalty revenue from Patent Licensing decreased 21.6% from the corresponding period in the previous year to ¥5,285 million, reflecting the expiration of patents included in a portfolio of patents licensed to the optical disc industry and the lack of revenue from renewed contracts with licensees compared with the corresponding period of the previous year.

Others

This segment includes organic light-emitting diode (OLED) display panels, factory automation systems, electronics devices and parts, business-use AV systems.

Sales in this segment decreased 23.7% from the corresponding period in the previous year to ¥39,302 million, mainly as a result of a drop in sales of optical disc manufacturing systems in Asia.

In Japan, sales decreased 21.2% to ¥19,918 million reflecting a sales shift from Japan to China of devices for cellular phones.

Overseas, sales decreased 26.1% to ¥19,384 million, due to a drop in sales of optical disc manufacturing systems in Asia, despite an increase in sales of devices for cellular phones in China.

Table of Contents

Notes:

1. The Company's consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America (U.S. GAAP).
2. The consolidated financial statements include the accounts of the parent company and 126 subsidiaries and the investments in 5 affiliated companies accounted for on an equity basis.
3. Computation of net income per share is based on Statements of Financial Accounting Standards No.128 Earnings per Share.
4. Effective from the fiscal 2005 year-end presentation, the Company changed the format of the consolidated statements of operations from multiple-step form to single-step form, which shows income before taxes by deducting total expenses from total revenue. Previously reported amounts have been reclassified accordingly.
5. Effective from the fiscal 2005 year-end presentation, the Company presented Loss on sale and disposal of fixed assets separately in the consolidated statements of operations, which was previously included in Selling, general and administrative expenses. Previously reported amounts have been restated accordingly.

To Our Shareholders

Notice Regarding Change in Management

The board of directors of Pioneer Corporation, at its meeting held on November 21, 2005, resolved to appoint Mr. Tamihiko Sudo, currently Executive Vice President and Representative Director, as its new President and Representative Director, effective as of January 1, 2006.

Mr. Kanya Matsumoto, currently Chairman and Representative Director, and I, currently President and Representative Director, will both assume new offices as Directors and Advisors, effective January 1, 2006.

This change in management reflects the responsibility we assume for the steep decline in our financial performance due to the smaller-than-planned number of units sold of plasma displays and DVD recorders, both strategic products.

Mr. Sudo has held various top executive posts, including president of Pioneer's Mobile Entertainment Company (MEC) and Pioneer's overseas subsidiary. He has a wealth of experience in managerial methods, and was project leader when MEC won the Japan Quality Award.

We will expedite restructuring of operations and seek to improve our business performance as soon as possible. We sincerely hope that you, our shareholders, will continue in your understanding and support of Pioneer.

Very truly yours,

Kaneo Ito
President and Representative Director
Pioneer Corporation
