CEO COMMENTS

We are proud to report continued solid performance, says Carl-Henric Svanberg, president and CEO of Ericsson. Through leveraging our industry leadership we are experiencing good progress throughout the world and across technologies. Understanding of consumer needs, technology leadership and responsiveness to our customers, will be key to further reinforce our leading position.

We continue to see healthy margin levels and strong results. This is a tribute to our employees' ever-present focus on serving the needs of our customers and delivering operational excellence. It is our ambition to continue to deliver best in class margins.

Consumer convenience is crucial for our industry's future development. Consumers want personal, reliable and easy-to-use services with broadband capabilities in both the fixed and mobile environment. Converging technologies will enable seamless services regardless of access method. Our ability to provide end-to-end solutions, cutting-edge infrastructure, handset technology and network integration, will be key to success.

Ericsson's 3G Evolved, with HSDPA-capabilities, is a cornerstone in providing mobile broadband for richer consumer experiences. Our strong position in 3G and technology leadership has enabled us to take an early lead in HSDPA.

We are enjoying the benefits of our restructuring which enabled us to increase our focus on future growth areas. We are well positioned for profitable growth and continued market leadership, concludes Carl-Henric Svanberg.

MARKET VIEW

The underlying growth drivers remain solid. Voice and data traffic is increasing steadily as a result of new services as well as the introduction of more efficient technology. Revenue growth via new services and increased usage is in focus for operators. Net subscriber additions continue at a high level.

Europe continues to show strong development as a result of continued 3G roll out and GSM capacity enhancements. Spending on WCDMA radio networks is quickly catching up with GSM in Western Europe. Operators' more aggressive tariffing strategies add to the market dynamic. In Russia, Central Europe, Middle East and Africa the activity level is high with several new networks being rolled out and strong subscriber growth.

The Asia Pacific region continues to develop well with increasing usage and subscriber growth. Minutes of use per mobile subscriber are increasing steadily with India and China presently showing double the European levels. Japan is in the lead in 3G deployments and is experiencing strong subscriber take up and dramatic increases in data usage.

The North American market continues to show healthy development with increasing focus on quality of service. The Cingular/AWS merger regulatory process continues to affect the market. Latin America, where operator consolidation has taken place, now shows strong growth. The

Edgar Filing: ERICSSON LM TELEPHONE CO - Form 6-K

development is particularly encouraging in Brazil and Mexico with improving GSM coverage and capacity expansions.

During the quarter, nine new WCDMA networks were commercially launched, reaching a total of 45. During the quarter the number of WCDMA subscriptions grew from approximately 7 million to more than 10 million. The number of CDMA2000 1xEV-DO subscriptions has now reached more than 9 million.

Worldwide subscription penetration is 25% with a total of 1.6 billion subscriptions, of which more than 1.1 billion are in GSM. The global number of subscriptions could pass 2 billion already during 2006 and is expected to pass 2.5 billion by 2009.

OUTLOOK

The traffic growth in the world's mobile networks should generate a slight to moderate growth in the global mobile systems market 2004. In addition to this underlying growth there is an effect from operators catching up on previous years' limited investments. This effect has started to abate and we expect the market to gradually return to a more normal growth pattern.

The temporary catch up effect inflates the total mobile systems market growth in 2004. Therefore, compared to total growth in 2004, we expect the global market for mobile systems to show slight growth in 2005. Excluding this catch up effect in 2004, we estimate a moderate underlying market growth in 2005.

We maintain our view that the addressable market for professional services is expected to continue to show good growth.

All estimates are measured in USD and refer to market growth compared to previous year.

With our technology leadership and global presence we are well positioned to take advantage of these market opportunities.

ACCOUNTING POLICIES AND REPORTING

ACCOUNTING POLICIES

Interim reports are prepared in accordance with RR20 Interim Financial Reporting.

CHANGED ACCOUNTING POLICIES AND REPORTING IN 2004

RR29 Employee Benefits, which is based on IAS 19 Employee Benefits issued by International Accounting Standards Committee (IASC), has been adopted as from January 1, 2004. When applying RR 29, defined benefit plans for pensions and other post-employment benefits are accounted for using consistent principles. Prior to 2004, such plans have been accounted for by using local principles for each country in the consolidated accounts. The effect of this standard is mainly a change in timing of pension costs compared to previous principles, so that pension costs for future salary increases are estimated and recognized during the service period. In accordance with the transition rules, a transition liability was determined as of 1 January 2004. This transition liability exceeded the liability for pensions recognized per December 31, 2003 in accordance with earlier principles and the net effect of the change in accounting principles at adoption has in accordance with RR29 been charged to stockholders' equity. The one-time effect of adopting RR29 was an increase of the pension liability as of January 1, 2004, by SEK 1.8 billion. The effect on equity, net after taxes, was SEK 1.3 billion. RR29 has not had material impact on reported Net Income or Earnings Per Share.

The company has chosen to follow the guidance of the draft interpretation URA43 Accounting for particular social taxes and wealth tax issued by The Swedish Accounting Standards Council.

INTERNATIONAL FINANCIAL REPORTING STANDARDS 2005

From 2005, Ericsson will be required to report according to IFRS. An internal project is underway to identify differences between current GAAP and what changes will be necessary. The company is in the process of evaluating the impact. It is expected that IAS 39 regarding financial instruments, IFRS 3 Business combinations and IAS 38 Intangible Assets will be the standards with the largest impact.

REPORTING

CHANGED DEFINITIONS COMPARED TO PREVIOUS ANNUAL REPORT

Items affecting comparability

Edgar Filing: ERICSSON LM TELEPHONE CO - Form 6-K

During 2003 restructuring costs, non-operational capital gains/losses and capitalization of development expenses were reported as items affecting comparability. Due to the immateriality of the non-operational capital gains/losses for 2003 and the fact that the capitalization of development expenses are no longer, per se, affecting comparability, these items are no longer reported as items affecting comparability.
