**ITEM 7.01. REGULATION FD DISCLOSURE**

Environmental Power Corporation (the Registrant) is releasing certain revised internal business metrics used by its wholly owned subsidiary, Microgy, Inc. (Microgy), as well as certain information regarding the status of current and planned projects. The release of this information is made in advance of scheduled meetings with various institutional investors and analysts where representatives of the Company and Microgy expect to present this information. The information set forth in this Current Report on Form 8-K is comprised only of targets, which may or may not be achieved, and should not be taken as indicative of future financial performance or operational results. In addition, the information set forth in this Current Report on Form 8-K is subject to various risks and uncertainties, as set forth in more detail in the section entitled "Cautionary Statement" appearing below.

The information set forth in this Current Report on Form 8-K is furnished pursuant to Regulation FD. It is not filed.

**TARGET REVENUE AND PROFIT MODELS**

Each of the models set forth below represents target revenue and profit over a 15-year timeframe from a Microgy digester servicing 1,000 dairy cows, which is the standard base unit Microgy uses for modeling purposes. Microgy intends to use these targets when evaluating potential projects and estimating results from existing projects underway. Figures are in thousands, except for percentages. Model 1 assumes that Microgy will construct the digester, sell it to a third party purchaser, and enter into an agreement with that purchaser to operate the digester. Model 2 assumes that Microgy will construct, own and operate the digester for itself or a special purpose entity wholly or partly owned by Microgy. Model 2 is further based on the assumption that Microgy will be able to obtain \$6.00 per MMBTU of gas produced by the digester, and that 50% of the cost of the digester will be financed with project debt bearing interest at a rate of 10%.

**PROJECT STATUS**

The following table sets forth the status of various current and potential project targeted by Microgy for development. A project may enter backlog (signed definitive project documents) at any phase after the project is identified. Microgy currently has only five projects in backlog, two of which are in the permitting stage. Accordingly, Microgy does not have definitive agreements for most of its projects in the permitting stage, including all of the projects listed under the heading Pipeline in the table below. In addition, project financing may be put into place at any point during the project cycle, including after the project is operating. Microgy currently does not have project financing in place for any of its projects.
