As filed with the Securities and Exchange Commission on June 27, 2005.

SECURITIES AND EXCHANGE COMMISSION

Washington, DC 20549

FORM 20-F

ANNUAL REPORT PURSUANT TO SECTION 13
OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2004

Commission File Number: 1-10749

Teléfonos de México, S.A. de C.V.

(Exact name of registrant as specified in its charter)

Telephones of Mexico

(Translation of registrant's name into English)

United Mexican States

(Jurisdiction of incorporation or organization)

Parque Vía 190, Colonia Cuauhtémoc, 06599 México, D.F., México

(Address of principal executive offices)

SECURITIES REGISTERED PURSUANT TO SECTION 12(b) OF THE ACT:

<u>Title of each class</u>	<u>Name of each exchange on which registered</u>
American Depositary Shares, each representing 20	New York Stock Exchange
Series L Shares, without par value (L Share ADSs)	
Series L Shares, without par value (L Shares)	New York Stock Exchange (for listing purposes only)

SECURITIES REGISTERED PURSUANT TO SECTION 12(g) OF THE ACT:

American Depositary Shares, each representing 20

Series A Shares, without par value (A Share ADSs)

Series A Shares, without par value (A Shares)

SECURITIES FOR WHICH THERE IS A REPORTING OBLIGATION PURSUANT TO SECTION 15(d) OF THE ACT: None

The number of outstanding shares of each class of capital or common stock as of December 31, 2004 was:

4,063 million AA Shares
252 million A Shares
7,517 million L Shares

Edgar Filing: TELEFONOS DE MEXICO S A DE C V - Form 20-F

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark which financial statement item the registrant has elected to follow. Item 17 Item 18

SELECTED FINANCIAL DATA

The selected consolidated financial data set forth below have been derived from our audited consolidated financial statements for each of the five years in the period ended December 31, 2004, which have been reported on by Mancera, S.C., a member of Ernst & Young Global, an independent, registered public accounting firm. The selected consolidated financial data should be read in conjunction with, and are qualified in their entirety by reference to, our consolidated financial statements and notes thereto included elsewhere in this Annual Report.

Our consolidated financial statements have been prepared in accordance with generally accepted accounting principles in Mexico, or Mexican GAAP, which differ in certain respects from generally accepted accounting principles in the United States, or U.S. GAAP. Note 19 to our audited consolidated financial statements provides a description of the principal differences between Mexican GAAP and U.S. GAAP, as they relate to us; a reconciliation to U.S. GAAP of operating income, net income and total stockholders' equity; and a condensed statement of cash flows under U.S. GAAP.

Pursuant to Mexican GAAP, in the consolidated financial statements and the selected consolidated financial data set forth below:

nonmonetary assets (excluding plant, property and equipment of non-Mexican origin) and stockholders' equity are restated for inflation based on the Mexican National Consumer Price Index;

plant, property and equipment of non-Mexican origin are restated based on the rate of inflation in the country of origin and converted into Mexican pesos using the prevailing exchange rate at the balance sheet date;

Edgar Filing: TELEFONOS DE MEXICO S A DE C V - Form 20-F

gains and losses in purchasing power from holding monetary assets and liabilities are recognized in income; and

all financial statements are restated in constant pesos as of December 31, 2004.

We have not reversed the effect of inflation accounting under Mexican GAAP in the reconciliation to U.S. GAAP of our net income and stockholders' equity, except with respect to the methodology for restatement of plant, property and equipment of non-Mexican origin. See Note 19 to our consolidated financial statements.

- (1) Includes income from discontinued operations representing the businesses we spun off to América Móvil, S.A. de C.V., or América Móvil, in September 2000, of P.1,779 million (Mexican GAAP) and P.1,525 million (U.S. GAAP) operations. See *Item 4. Information on the Company General History*.
- (2) We have not presented net income or dividends on a per ADS basis. Each L Share ADS represents twenty L Shares, and each A Share ADS represents twenty A Shares.
- (3) Nominal amounts. For information on dividends paid per share translated into U.S. dollars, see *Item 8. Financial Information Dividends*.
- (4) All amounts have been adjusted to reflect a two-for-one stock split approved in December 1999 and effected in February 2000. They have not been adjusted to reflect a further two-for-one stock split approved on April 28, 2005 and effected on May 25, 2005.
- (5) Earnings for this purpose consist of earnings before provision for income tax but after provision for employee profit sharing, plus fixed charges and depreciation of capitalized interest and minus interest capitalized during the period. Fixed charges for this purpose consist of interest expense plus interest capitalized during the period. Fixed charges do not take into account gain or loss from monetary position or exchange gain or loss attributable to our indebtedness.

Table of Contents**EXCHANGE RATES**

Mexico has a free market for foreign exchange, and the Mexican government allows the peso to float freely against the U.S. dollar. There can be no assurance that the Mexican government will maintain its current policies with regard to the peso or that the peso will not depreciate or appreciate significantly in the future.

The following table sets forth, for the periods indicated, the high, low, average and period-end noon buying rate in New York City for cable transfers in pesos published by the Federal Reserve Bank of New York, expressed in pesos per U.S. dollar. The rates have not been restated in constant currency units.

<u>Period</u>	<u>High</u>	<u>Low</u>	<u>Average</u> ⁽¹⁾	<u>Period End</u>
2000	P. 9.18	P. 10.09	P. 9.47	P. 9.62
2001	8.95	9.97	9.33	9.16
2002	9.00	10.43	9.66	10.43
2003	10.11	11.41	10.79	11.24
2004	10.81	11.64	11.29	11.15
2004:				
December	11.11	11.33		11.15
2005:				
January	11.17	11.41		11.21
February	11.04	11.21		11.09
March	10.98	11.33		11.18
April	11.04	11.23		11.08
May	10.89	11.03		10.91

(1) Average of month-end rates.

On June 23, 2005, the noon buying rate was P.10.79 to U.S.\$1.00.

We will pay any cash dividends in pesos, and exchange rate fluctuations will affect the U.S. dollar amounts received by holders of American Depositary Shares, or ADSs, on conversion by the depositary of cash dividends on the shares represented by such ADSs. Fluctuations in the exchange rate between the peso and the U.S. dollar have affected the U.S. dollar equivalent of the peso price of our shares on the Mexican Stock Exchange (*Bolsa Mexicana de Valores, S.A. de C.V.*) and, as a result, have also affected the market price of the ADSs.

Table of Contents

RISK FACTORS

Risks Relating to Our Business Generally

Increasing competition in Mexico and the other countries in which we operate could adversely affect our revenues and profitability

We face significant competition in Mexico and the other countries in which we operate, which could result in decreases in current and potential customers, revenues and profitability. Governmental authorities in many of these countries continue to grant new licenses and concessions to new market entrants, which results in increased competition in those countries. In addition, technological developments are increasing cross-competition in certain markets, such as between wireless providers and fixed-line operators.

In Mexico, competition in local service, principally from wireless service providers, has been developing since 1999. In December 2004, there were approximately 38 million cellular lines in service, compared with approximately 18.1 million fixed lines in service (17.2 million of which are part of our network). At present, 18 fixed-line local operators have been granted licenses, primarily in Mexico City, Guadalajara, Monterrey, Puebla and other large cities.

We have also begun to face new competition in Mexico from cable television providers, who have recently been authorized by the Communications Ministry (*Secretaría de Comunicaciones y Transportes*) to provide voice-transmission services to local fixed-line telecommunications operators and data and broadband Internet services to the Mexican public.

The effects of competition on our business are highly uncertain and will depend on a variety of factors, including economic conditions; regulatory developments; the behavior of our customers and competitors; and the effectiveness of measures we take.

Dominant carrier regulations and other regulatory developments could hurt our business by limiting our ability to pursue competitive and profitable strategies

Our business is subject to extensive regulation, and it can be adversely affected by changes in law, regulation or regulatory policy. The Mexican Competition Commission has determined that we are a dominant provider of certain telecommunications services, and Mexican law provides for the regulatory authorities to impose additional regulations on a dominant provider. In the past several years, the Mexican Competition Commission and the Mexican Federal Telecommunications Commission (*Comisión Federal de Telecomunicaciones*, or Cofetel) have adopted resolutions and regulations that apply specifically to us as a dominant carrier. We have successfully challenged these resolutions and regulations in Mexican federal court. We cannot predict whether the Mexican Competition Commission or Cofetel will issue new resolutions or regulations that are substantially similar to the successfully challenged dominant carrier provisions, and if so, whether our judicial challenges will be successful in the future. We believe that if dominant carrier regulations are eventually implemented, the new rules and the related regulatory procedures will reduce our flexibility to adopt competitive tariff policies.

World Trade Organization dispute settlement between the United States and Mexico will result in changes in regulation that may affect our business

In August 2000, the United States initiated a World Trade Organization, or WTO, dispute settlement against Mexico regarding alleged illegal barriers to competition in the Mexican telecommunications market. In June 2004, the United States and Mexico reached an agreement under which Mexico has eliminated its uniform settlement rate system, its proportional return system and its

Table of Contents

requirement that the Mexican carrier with the greatest share of outgoing traffic to a particular country negotiate the settlement rate on behalf of all Mexican carriers for that country. Mexico also agreed to introduce new regulations authorizing the resale of outgoing international long distance service. Mexico is expected to adopt regulations authorizing resale of outgoing international long distance service as well as domestic long distance, local, cellular and other services. These regulations are expected to be adopted by the end of July 2005. We expect that these new regulations will likely affect our business and competition in the future and will put downward pressure on the prices we charge our customers for those services.

Shifting usage patterns could adversely affect our revenues

Our fixed-line network services face increasing competition due to shifting usage patterns resulting from the adoption of popular new technologies, including wireless devices for voice and other communications, and the subsequent substitution of these technologies for fixed-line phones. For example, we estimate that an increasing proportion of calls that previously would have been made over our fixed-line network are now being made on wireless telephones and voice over IP, or VoIP, services outside our network, for which we receive no revenues. There can be no assurance that this process will not adversely affect our traffic volume and our results of operations.

We have invested in countries in which we have limited experience, and we may be unsuccessful in addressing the new challenges and risks they present

We have invested in a growing number of telecommunications businesses outside our historical core activity of providing fixed-line telecommunications services in Mexico, and we plan to continue to do so in the rest of Latin America. These investments have been made in some countries in which we have little experience and may involve risks to which we have not previously been exposed. Some of the investments are in countries that may present different or greater risks than Mexico, such as Brazil, Chile, Argentina, Peru and Colombia. We cannot assure you that these investments will be successful.

Risks Relating to Our Controlling Shareholder and Capital Structure

We are controlled by one shareholder

A majority of the voting shares of our company (70.6% as of May 17, 2005) is owned by Carso Global Telecom, S.A. de C.V., or Carso Global Telecom, which is controlled by Carlos Slim Helú and members of his immediate family who, taken together, own a majority of the common stock. Carso Global Telecom has the effective power to designate a majority of the members of our Board of Directors and to determine the outcome of other actions requiring a vote of the shareholders, except in very limited cases that require a vote of the holders of L Shares.

The protections afforded to minority shareholders in Mexico are different from those in the United States

Under Mexican law, the protections afforded to minority shareholders are different from those in the United States. In particular, the law concerning fiduciary duties of directors is not well developed, there is no procedure for class actions or shareholder derivative actions and there

Edgar Filing: TELEFONOS DE MEXICO S A DE C V - Form 20-F

are different procedural requirements for bringing shareholder lawsuits. As a result, in practice it may be more difficult for minority shareholders of Telmex to enforce their rights against us or our directors or controlling shareholder than it would be for shareholders of a U.S. company.

Table of Contents

We engage in transactions with related parties that may create the potential for conflicts of interest

We engage in transactions with certain subsidiaries of Grupo Carso, S.A. de C.V., or Grupo Carso, and Grupo Financiero Inbursa, S.A. de C.V., or Grupo Financiero Inbursa. Transactions with subsidiaries of Grupo Carso include the purchase of network construction services and materials, and transactions with Grupo Financiero Inbursa include banking services and insurance. We also have ongoing operational relationships with América Móvil, which is controlled by América Telecom, S.A. de C.V., or América Telecom. América Telecom, Carso Global Telecom, Grupo Carso and Grupo Financiero Inbursa are controlled by Carlos Slim Helú and members of his immediate family who, taken together, own a majority of the common stock of each company.

We also make investments jointly with related parties, sell our investments to related parties and buy investments from related parties. Recent investment transactions with related parties include our investment in the equity securities of MCI, Inc., or MCI, which we and others who may be deemed to be under common control with us sold to Verizon Communications, Inc. on May 17, 2005.

Our transactions with related parties may create the potential for conflicts of interest.

Holders of L Shares and L Share ADSs have limited voting rights

Our bylaws provide that holders of L Shares are not permitted to vote except on such limited matters as the transformation or merger of Telmex or the cancellation of registration of the L Shares with the Mexican National Banking and Securities Commission or any stock exchange on which they are listed. If you hold L Shares or L Share ADSs, you will not be able to vote on most matters, including the declaration of dividends, that are subject to a shareholder vote in accordance with our bylaws.

Holders of ADSs are not entitled to attend shareholders meetings, and they may only vote through the depositary

Under Mexican law, a shareholder is required to deposit its shares with a Mexican custodian in order to attend a shareholders meeting. As long as a shareholder holds shares in ADS form, the shareholder will not be able to satisfy this requirement. There can be no assurance that holders of ADSs will receive notice of shareholders meetings from our ADS depositary in sufficient time to enable such holders to return voting instructions to the ADS depositary in a timely manner. In the event that instructions are not received with respect to any shares underlying ADSs, the ADS depositary will, subject to certain limitations, grant a proxy to a person designated by us. In the event that this proxy is not granted, the ADS depositary will vote these shares in the same manner as the majority of the shares of each class for which voting instructions are received.

You may not be entitled to participate in future preemptive rights offerings

Under Mexican law, if we issue new shares for cash as part of a capital increase, we generally must grant our shareholders the right to purchase a sufficient number of shares to maintain their existing ownership percentage in Telmex. Rights to purchase shares in these circumstances are known as preemptive rights. We may not legally be permitted to allow holders of ADSs or holders of L Shares or A Shares in the United States

Edgar Filing: TELEFONOS DE MEXICO S A DE C V - Form 20-F

to exercise any preemptive rights in any future capital increase unless we file a registration statement with the U.S. Securities and Exchange Commission, or SEC, with respect to that future issuance of shares. At the time of any future capital increase, we will evaluate the costs and potential liabilities associated with filing a registration statement with the SEC and any other factors that we consider important to determine whether we will file such a registration statement.

Table of Contents

We cannot assure you that we will file a registration statement with the SEC to allow holders of ADSs or U.S. holders of L Shares or A Shares to participate in a preemptive rights offering. As a result, the equity interest of such holders in Telmex may be diluted proportionately. In addition, under current Mexican law, it is not practicable for the depositary to sell preemptive rights and distribute the proceeds from such sales to ADS holders.

Our bylaws restrict transfers of shares in some circumstances

Our bylaws provide that any acquisition or transfer of more than 10% of our capital stock by any person or group of persons acting together requires the approval of our Board of Directors. If you wish to acquire or transfer more than 10% of our capital stock, you will not be able to do so without the approval of our Board of Directors.

Our bylaws restrict the ability of non-Mexican shareholders to invoke the protection of their governments with respect to their rights as shareholders

As required by Mexican law, our bylaws provide that non-Mexican shareholders shall be considered as Mexicans in respect of their ownership interests in Telmex and shall be deemed to have agreed not to invoke the protection of their governments in certain circumstances. Under this provision, a non-Mexican shareholder is deemed to have agreed not to invoke the protection of his own government by asking such government to interpose a diplomatic claim against the Mexican government with respect to the shareholder's rights as a shareholder, but is not deemed to have waived any other rights he may have, including any rights under the U.S. securities laws, with respect to his investment in Telmex. If you invoke such governmental protection in violation of this agreement, your shares could be forfeited to the Mexican government.

Our bylaws may only be enforced in Mexico

Our bylaws provide that legal actions relating to the execution, interpretation or performance of the bylaws may be brought only in Mexican courts. As a result, it may be difficult for non-Mexican shareholders to enforce their shareholder rights pursuant to the bylaws.

It may be difficult to enforce civil liabilities against us or our directors, officers and controlling persons

Telmex is organized under the laws of Mexico, and most of our directors, officers and controlling persons reside outside the United States. In addition, a substantial portion of our assets and their assets are located in Mexico. As a result, it may be difficult for investors to effect service of process within the United States on such persons or to enforce judgments against them, including in any action based on civil liabilities under the U.S. federal securities laws. There is doubt as to the enforceability against such persons in Mexico, whether in original actions or in actions to enforce judgments of U.S. courts, of liabilities based solely on the U.S. federal securities laws.

Risks Relating to Developments in Mexico and Other Countries

Economic and political developments may adversely affect our business

Our business operations and assets are principally located in Mexico. As a result, our business may be significantly affected by the general condition of the Mexican economy, by devaluation of the peso, by inflation and high interest rates in Mexico and by political developments in Mexico.

Table of Contents

Mexico has experienced adverse economic conditions

In the past, Mexico has experienced both prolonged periods of weak economic conditions and deteriorations in economic conditions that have had a negative impact on our company. If the Mexican economy falls into a recession or if inflation and interest rates increase significantly, our business, financial condition and results of operations could suffer material adverse consequences because, among other things, demand for telecommunications services may decrease and consumers may find it difficult to pay for the services we offer.

Depreciation or fluctuation of the currencies in which we conduct operations relative to the U.S. dollar could adversely affect our financial condition and results of operations

We are affected by fluctuations in exchange rates.

Changes in the value of the various currencies in which we conduct operations against the Mexican peso or changes in the value of the Mexican peso or the various currencies in which we conduct operations against the U.S. dollar may result in exchange losses or gains on our indebtedness and accounts payable. At December 31, 2004, our U.S. dollar-denominated indebtedness amounted to P.75,718 million. In 2004, the peso depreciated against the U.S. dollar at year-end by approximately 0.3%, but our loss in Mexico was more than offset by a gain at our non-Mexican subsidiaries, particularly Embratel Participações S.A. As a result, we had a net foreign exchange gain of P.26 million. In 2003, the peso depreciated against the U.S. dollar at year-end by approximately 9.0% and we had a net exchange loss of P.3,296 million. In addition, currency fluctuations between the Mexican peso and the currencies of our non-Mexican subsidiaries affect our results as reported in Mexican pesos. Currency fluctuations may continue to affect our financial income and expense and our revenues from international settlements.

Major devaluation or depreciation of any such currencies may also result in disruption of the international foreign exchange markets and may limit our ability to transfer or to convert such currencies into U.S. dollars and other currencies for the purpose of making timely payments of interest and principal on our indebtedness. While the Mexican government does not currently restrict, and for many years has not restricted, the right or ability of Mexican or foreign persons or entities to convert pesos into U.S. dollars or to transfer other currencies out of Mexico, the government could institute restrictive exchange rate policies in the future.

High levels of inflation and high interest rates in Mexico could adversely affect our financial condition and results of operations

Mexico has experienced high levels of inflation and high domestic interest rates. The annual rate of inflation, as measured by changes in the National Consumer Price Index, was 5.2% for 2004. Inflation for the first quarter of 2005 was 0.79%. If Mexico experiences high levels of inflation, our profitability could be adversely affected, and more generally, high inflation might result in lower demand or lower growth in demand for telecommunications services.

Developments in the U.S. economy may adversely affect our business

Edgar Filing: TELEFONOS DE MEXICO S A DE C V - Form 20-F

Economic conditions in Mexico are heavily influenced by the condition of the U.S. economy due to various factors, including commercial trade pursuant to the North American Free Trade Agreement, or NAFTA, U.S. investment in Mexico and emigration from Mexico to the United States. Events and conditions affecting the U.S. economy may adversely affect our business, results of operations, prospects and financial condition.

Table of Contents

Developments in other emerging market countries may adversely affect the market price of our securities

The market value of securities of Mexican companies is, to varying degrees, affected by economic and market conditions in other emerging market countries. Although economic conditions in such countries may differ significantly from economic conditions in Mexico, investors reactions to developments in any of these other countries may have an adverse effect on the market value of securities of Mexican issuers. In late October 1997, prices of both Mexican debt securities and Mexican equity securities dropped substantially, precipitated by a sharp drop in value of Asian markets. Similarly, in the second half of 1998, prices of Mexican securities were adversely affected by the economic crises in Russia and in Brazil. There can be no assurance that the market value of our securities would not be adversely affected by events elsewhere, especially in emerging market countries.

Political events in Mexico could adversely affect Mexican economic policy and our operations

The national elections held in July 2000 ended 71 years of rule by the Institutional Revolutionary Party, or PRI, with the election of President Vicente Fox, a member of the National Action Party, or PAN, and resulted in the increased representation of opposition parties in the Mexican Congress and in mayoral and gubernatorial positions. There has been a lack of alignment between the legislature and the President that has resulted in deadlock and has prevented the timely implementation of legislative and economic reforms, which some believe has had an adverse impact on the Mexican economy and is expected to continue at least until the Mexican presidential elections in 2006. Further delays may continue to adversely affect the Mexican economy and our business.

Developments in other Latin American countries in which we operate may affect our business

We have expanded our operations through our investment in telecommunications companies and our acquisition of telecommunications assets in Brazil, Chile, Argentina, Peru and Colombia. These countries expose us to different or greater country risk than Mexico. Our future results may be affected by the economic and financial condition of the countries in which we operate, the devaluation of the local currency, inflation and high interest rates, or political developments, changes in law or changes in labor conditions. Devaluation of the local currency against the U.S. dollar may increase the operating costs in that country, and a depreciation against the Mexican peso may negatively affect the results of our operations in that country.

FORWARD-LOOKING STATEMENTS

This Annual Report contains forward-looking statements. We may from time to time make forward-looking statements in our periodic reports to the SEC on Form 6-K, in our annual report to shareholders, in offering circulars and prospectuses, in press releases and other written materials and in oral statements made by our officers, directors or employees to analysts, investors, representatives of the media and others. Examples of such forward-looking statements include:

projections of operating revenues, net income (loss), net income (loss) per share, capital expenditures, dividends, capital structure or other financial items or ratios;

statements of our acquisition or divestiture plans;

statements about the impact of our acquisition of businesses outside of Mexico;

statements of our plans, objectives or goals relating to competition, regulation and rates;

statements about the escalation of competition in the business sectors in which we operate;

statements about our future economic performance or that of Mexico or other countries;

statements about the exchange rates between Mexican pesos and foreign currencies;

statements about the future impact of regulations; and

statements of assumptions underlying such statements.

Words such as believe, anticipate, plan, expect, intend, target, estimate, project, predict, forecast, guideline, should and intended to identify forward-looking statements but are not the exclusive means of identifying them.

Forward-looking statements involve inherent risks and uncertainties. We caution you that a number of important factors could cause actual results to differ materially from the plans, objectives, expectations, estimates and intentions expressed in such forward-looking statements. These factors, some of which are discussed under *Risk Factors* beginning on page 5, include economic and political conditions and government policies in Mexico or elsewhere, inflation rates, exchange rates, regulatory developments, technological improvements, customer demand and competition. We caution you that the foregoing list of factors is not exclusive and that other risks and uncertainties may cause actual results to differ materially from those in forward-looking statements.

Edgar Filing: TELEFONOS DE MEXICO S A DE C V - Form 20-F

Forward-looking statements speak only as of the date they are made. We do not undertake to update such statements in light of new information or new developments.

Item 4. Information on the Company

GENERAL

Overview

We own and operate the largest telecommunications system in Mexico, where we are the only nationwide provider of fixed-line telephony services and the leading provider of fixed local and long distance telephone services. We also provide other telecommunications and telecommunications-related services such as corporate networks, Internet services, directory services, information network management, telephone equipment sales, interconnection services to other carriers and paging services. Since February 2004, we have offered voice, data and Internet services in Brazil, Chile, Argentina, Peru and Colombia.

In Mexico, we have developed a multi-service network in which 90% of the lines have the capacity to provide simultaneous transmission of voice and data through a broadband connection. We have facilitated access to our network through new services such as Prodigy Móvil, which offers Wireless Fidelity, or Wi-Fi, access in over 50 cities. At the same time, we are extending our telephone and Internet services to remote areas. In 2004, we obtained a major part of the *Fondo de Cobertura Social*, through which we will provide basic telephone services to 4,000 rural towns throughout Mexico, and through e-Mexico, we are participating in a government-sponsored program that will extend e-learning, e-health, e-government and e-commerce services via satellite to over 4,000 community digital centers in over 3,200 towns.

For our lower income customers and customers who need to control their telephone expenses, our Multifon service offers a telephone line without requiring payment of a monthly fee. By the end of 2004, the service gave more than one million customers the ability to access voice and Internet services using a prepaid phone card. We also offer prepaid cards for use in public telephones and a discounted Internet access plan for use during off-peak hours.

Outside Mexico, we have focused on restructuring and integrating our international operations. We believe that all of our international operations are self-sufficient and have the potential to grow. In 2005, we will focus on optimizing the cost structure of our international operations by achieving economies of scale in investments and management. We will also seek to improve operating efficiencies by introducing best practices in the different countries and implementing a management model similar to the one we use in Mexico. We expect to continue to work on the restructuring, management and strengthening of the business of Embratel Participações S.A., or Embratel. We will also explore ways to integrate with Embratel our other Brazilian investments, in particular Net Serviços de Comunicação S.A. and Telmex do Brasil Ltda. See *Non-Mexican Operations Brazil Possible Transactions with Embratel*.

We are a Mexican corporation headquartered in Mexico City, D.F., Mexico. Our legal name is Teléfonos de México, S.A. de C.V., and we frequently refer to ourselves commercially as Telmex. Our principal executive offices are located at Parque Vía 190, Colonia Cuauhtémoc, 06599 México, D.F., México. Our telephone number at this location is (52) 55 5703-3990.

History

Edgar Filing: TELEFONOS DE MEXICO S A DE C V - Form 20-F

We were formed in 1947 under private foreign ownership to acquire the Mexican telephone business of a wholly owned subsidiary of the LM Ericsson group of Sweden. In 1950, we acquired the Mexican telephone business of a wholly owned subsidiary of the International Telephone and Telegraph Company, which operated the only other national telephone network in Mexico at that time. In 1972, the

Table of Contents

Mexican federal government acquired the majority of our capital stock. In December 1990, the Mexican government sold shares representing voting control of our company. The Mexican government sold the balance of its shares in a series of transactions beginning in May 1991. In September 2000, we spun off our Mexican wireless business and other operations to América Móvil, a new Mexican corporation.

Significant Subsidiaries and Investees

The following table sets forth our significant subsidiaries and investees accounted for using the equity method at May 31, 2005:

Name of Company	Jurisdiction of Establishment	Percentage of Ownership and Voting Interest	Description
Controladora de Servicios de Telecomunicaciones, S.A. de C.V.	Mexico	100.0%	Intermediate holding company
Alquiladora de Casas, S.A. de C.V.	Mexico	100.0%	Real estate company owning our facilities
Anuncios en Directorios, S.A. de C.V.	Mexico	100.0%	Producer of yellow pages directories
Compañía de Teléfonos y Bienes Raíces, S.A. de C.V.	Mexico	100.0%	Real estate company owning our facilities
Consorcio Red Uno, S.A. de C.V.	Mexico	100.0%	Supplier of telecommunications network integration services and information systems
Teléfonos del Noroeste, S.A. de C.V., or Telnor	Mexico	100.0%	Fixed-line network concessionaire for the state of Baja California Norte and the San Luis Rio Colorado region of the state of Sonora
Uninet, S.A. de C.V.	Mexico	100.0%	Provider of corporate networks services and Internet access to Telmex and commercial customers
Telmex USA, L.L.C.	Delaware	100.0%	Authorized reseller of long distance services and holder of FCC authorization to provide facility-based long distance services in the United States
Latam Telecomunicaciones LLC	Delaware	100.0%	Holding company for non-Mexican subsidiaries and investments
Embratel Participações S.A.	Brazil	95.1% ⁽¹⁾	Intermediate holding company of subsidiary that provides domestic and international long distance, local and data services in Brazil
Empresa Brasileira de Telecomunicações S.A. EMBRATEL	Brazil	94.0% ⁽¹⁾	Provider of domestic and international long distance, local and data services in Brazil
Star One S.A.	Brazil	75.2%	Provider of satellite services in Brazil
Telmex do Brasil, Ltda.	Brazil	100.0%	Provider of telecommunications services to corporate customers in Brazil
Telmex Chile Holding, S.A.	Chile	100.0%	Holding company for assets acquired from AT&T Latin America Corp. in Chile
Telmex Corp. S.A. (formerly Chilesat Corp S.A.)	Chile	99.3%	

Intermediate holding company whose subsidiaries provide long distance, Internet and data network services in Chile

Table of Contents

Name of Company	Jurisdiction of Establishment	Percentage of Ownership and Voting Interest	Description
Techtel-LMDS Comunicaciones Interactivas, S.A.	Argentina	93.4%	Provider of wireless voice, data and video transfer services and local and long distance fixed-line voice services in Argentina
Telmex Argentina S.A.	Argentina	100.0%	Provider of telecommunications services to corporate customers in Argentina
Metrored Telecomunicaciones S.R.L.	Argentina	83.4%	Provider of data services in Argentina
Telmex Colombia S.A.	Colombia	100.0%	Provider of telecommunications services to corporate customers in Colombia
Telmex Perú S.A.	Peru	100.0%	Provider of telecommunications services to corporate customers in Peru
Grupo Telvista S.A. de C.V. ⁽²⁾	Delaware	45.0%	Provider of telemarketing services in the United States and Mexico
TM & MS, LLC ⁽²⁾	Delaware	50.0%	Joint venture with Microsoft to operate an Internet portal (TIMSN)

(1) Corresponds to voting interest. Our effective ownership of the total capital of Embratel Participações S.A. is 63.9% and of Empresa Brasileira de Telecomunicações S.A. EMBRATEL is 63.1%.

(2) Investments accounted for using the equity method.

Table of Contents**MEXICAN OPERATIONS**

At March 31, 2005, we had 17.5 million local fixed lines in service in Mexico, up 9.0% over March 31, 2004. In long distance services, we estimate that during December 2004, our share of traffic in cities open to competition was 79.4% for domestic long distance and 77.6% for international long distance calls originating in Mexico.

Of our revenues from our Mexican operations in 2004, 45.5% was attributable to local service, 21.4% was attributable to long distance service, 15.2% was attributable to interconnection, 7.8% was attributable to corporate networks and 5.5% was attributable to Internet services. Other services, including yellow pages and equipment sales, accounted for 4.6% of revenues.

Overview

The following table gives selected data on the size and usage of our Mexican network:

	December 31,				
	2004	2003	2002	2001	2000
Lines in service (thousands)	17,172	15,683	14,446	13,372	12,069
Internet access accounts (thousands)	1,741	1,452	1,165	913	634
Data transmission line equivalents (thousands)	3,327	2,291	2,021	1,574	997
Lines in service per employee	371.2	331.4	301.2	272.8	247.4
Domestic long distance call minutes for the year (millions)	16,700	15,376	14,347	14,251	12,309
International long distance call minutes for the year (millions) ⁽¹⁾	6,256	4,513	4,922	4,404	5,521
Total local calls (millions)	26,782	26,625	25,679	25,567	24,738
Prepaid telephone service cards sold (millions)	273	279	274	268	257

(1) Includes incoming and outgoing traffic.

Local Service

Our network included 17.2 million local fixed lines in service at December 31, 2004, an increase of 9.5% compared to December 31, 2003, reflecting 2.2 million new lines and 712 thousand disconnections in 2004. Local traffic in 2004 increased by 0.6% compared to 2003, for a total of 26,782 million calls. The increase in billed traffic in 2004 was attributable primarily to the increase in lines in service, the increased use of Telmex Voice Mailbox (*Buzón Telmex*) and the growth of digital services.

Our network is 100% digital, with all of our lines connected to digital exchanges. During 2004, customers made increasing use of digital services, such as caller ID, call waiting, three-way calling, call forwarding and voicemail. The number of lines with digital services in use at year-end 2004 was 6.6 million (38.2% of the total number of lines in service), representing an increase of 3.2% from 2003. This increase was due largely to an increase in new lines.

We provide local telephone service to 21,596 communities throughout Mexico. Lines in service are concentrated in large urban areas. Of all lines in service, 40% are in the Mexico City, Monterrey and Guadalajara areas, and 29.1% are in the Mexico City area alone. We provide service to 12,640 rural communities, exceeding our obligations to extend services to rural areas.

Table of Contents

Our charges for fixed-line local telephone service include (a) installation charges, (b) monthly line rental charges, (c) monthly measured service charges, (d) digital services and (e) charges for other services, such as the transfer of a line to another address and reconnection. Residential customers pay a fixed charge per local call in excess of a monthly allowance of 100 local calls, and commercial customers pay for every local call at the same fixed rate per call. We estimate that in any given month approximately 56% of residential customers made fewer than 100 local calls per month on average in 2004. The concession we hold to operate a public network for basic telephone services (the Concession) permits but does not require us to base our charges on the duration of each call, with a monthly allowance of free calls or call minutes for residential customers. We currently do not charge by duration of invoiced calls in any region, except in the case of prepaid services.

In 2004, to promote local service among our commercial customers we introduced a plan called Business Line (*Línea Negocio*), for which we charge a monthly line rental fee, which includes a monthly allowance of 200, 500 or 1,000 calls.

We offer prepaid local and long distance service through our Ladatel and Multifon calling cards. Multifon cards, originally developed for use with public phones and invoiced fixed-line phones, are now available for our Multifon residential lines. Multifon Home offers prepaid local and long distance service on home telephones. For a total cost of P.1,000, Multifon Kit provides installation, a handset and an initial P.100 of airtime for calls to the United States and Canada. In the case of our Multifon products, customers do not pay monthly fees, and prepaid fixed-line service is charged on a per-minute basis like public telephony services. At December 31, 2004, Multifon lines totaled 1,187,593, an increase of 85.8% compared to December 31, 2003.

In October 2004, we announced that we would not increase rates for local telephone service during 2005. No rate increases have been made since March 2001, when we increased our monthly line rental charges for residential customers by 6.5% and monthly measured service charges for all customers by 6.4% (in each case, in nominal terms).

Domestic Long Distance Service

We are the leading provider of domestic long distance telecommunications services in Mexico. Our domestic long distance transmission network consists of close to 75,000 kilometers of optical fiber connecting Mexico's major cities, and includes secondary branches and an additional transmission ring around Mexico City designed to avoid network congestion.

Our charges for domestic long distance service are based on call duration and the type of service, i.e., direct-dial or operator-assisted. In October 2004, we announced that we would not increase our nominal rates for domestic long distance service in 2005. Our nominal rates for domestic long distance service have remained unchanged since March 1999.

We offer a variety of domestic long distance discount plans that reduce the effective rates paid by our customers based on volume, time of use or other factors. High volume corporate clients pay P.1.00 per minute, which represents a discount of up to 55.9% from our nominal rate, while other customers that maintain service with us receive discounts of up to 39%, as well as a 50% discount on calls made between 8:00 p.m. and 7:59 a.m. from Monday to Saturday and all day Sunday. In 2003, we introduced Lada 100, a service that offers a monthly package of 200 domestic long distance minutes for P.100.

Table of Contents

International Long Distance Service

We are the leading provider of international long distance telecommunications services in Mexico. International long distance traffic with the United States, Canada, Central America and other countries is carried by a combination of the fiber optic network, microwave transmission, satellite systems and submarine cable. See *Network*.

Charges for international long distance calls are based on type of service, call duration and the region of the world called. In October 2004, we announced that we would not increase our nominal rates for international long distance service in 2005. Our nominal rates for international long distance service have remained unchanged since March 1999. Customers receive a 33.3% discount on calls made to the United States and Canada between 7:00 p.m. and 6:59 a.m. from Monday to Friday, all day Saturday, and between 12:00 a.m. and 4:59 p.m. on Sunday. More recently, we have introduced Favorite Lada Destinations (*Lada Favorito*), a plan offering discounts on calls to cities in the United States pre-selected by customers. In July 2004, we launched Lada 100 International, which offers 100 minutes per month to the United States and Canada for P.200.

Bilateral agreements with foreign carriers govern the rates of our payment to foreign carriers for completing international calls from Mexico and by foreign carriers to us for completing international calls to Mexico. The rates of payment under such agreements are negotiated with each foreign carrier. Settlements among carriers are normally made monthly on a net basis. Settlement amounts payable to us in respect of calls from the United States to Mexico generally exceed amounts payable by us in respect of calls from Mexico to the United States. As a result, we receive monthly net settlement payments from U.S. carriers. We make monthly net settlement payments to other international carriers taken as a whole.

The international settlement rates that U.S. carriers pay to foreign carriers have been subject to intense downward pressure due to competition and regulatory factors, including initiatives by the United States government. Since 1999, there has been a cumulative reduction of 75.5% in our settlement rates with U.S. carriers. Until July 2004, Mexican regulations required that (i) all carriers pay the same rates, (ii) incoming international calls be distributed among the Mexican carriers in proportion to the outgoing calls they originated and (iii) the Mexican carrier with the largest market share on a particular international route negotiate rates for all Mexican carriers on that route.

In 2004, we paid U.S.\$0.037 per minute for northbound (Mexico to the United States) calls and received an average rate of U.S.\$0.059 per minute for settling international calls compared with an average rate of U.S.\$0.099 per minute in 2003.

We are in the process of negotiating with most of the U.S. carriers new settlement rates for the period beginning January 1, 2005.

We believe that our international traffic volume has been adversely affected by an unauthorized practice in Mexico referred to as illegal bypass. In the past, companies engaged in illegal bypass because international settlement rates to terminate traffic in Mexico were generally higher than rates for terminating domestic Mexican long distance traffic. The unreported international traffic negatively impacted our revenues by diminishing both the settlement payments we received and our share of the proportional return on incoming traffic. We believe that illegal bypass was primarily responsible for the decline in the number of minutes of our international long distance traffic from 2000 to 2003.

In August 2004, however, Mexico eliminated its uniform settlement rate system, its proportional return system and its requirement that the Mexican carrier with the greatest share of outgoing traffic to a particular country negotiate the settlement rate on behalf of all Mexican carriers for that country. Because each Mexican carrier is now free to negotiate settlement rates with each foreign carrier, this form of bypass has

disappeared.

Table of Contents

Our results are increasingly affected, however, by a practice we call local bypass, in which incoming international calls are routed from domestic long distance carriers to local lines other than ours and then connected to our local network for termination. As a result of Mexico's bill and keep system, which provides that local carriers do not pay interconnection fees to other local carriers, we do not receive an interconnection fee from these calls. But for local bypass, we would receive a domestic termination fee for completing these incoming calls. Though we have agreed with most local carriers to request regulatory intervention to eliminate illegal local bypass, we believe our interconnection results will continue to be adversely affected by this practice.

Our international long distance revenues are also affected by VoIP technology, which transmits ordinary telephone calls over the Internet. Because calls made through VoIP services bypass our network, we receive neither the interconnection fees nor the termination fees associated with calls made through traditional fixed-line telephony services. Domestic long distance and local revenues are also affected by VoIP technology.

Interconnection

We provide interconnection service pursuant to which (a) long distance, local and cellular carriers operating in Mexico establish points of interconnection between their networks and our network and (b) we carry calls between the points of interconnection and our customers. When a customer of another carrier calls a local service customer of ours, we complete the call by carrying the call from the point of interconnection to the particular customer, and when a local service customer of ours who has preselected a competing long distance carrier makes a long distance call, we carry the call from the customer to the point of interconnection with the relevant carrier's network. We have one rate for interconnecting all categories of carriers and all types of calls.

Corporate Networks

Corporate networks consist of the transmission of voice, video and data between two or more end points using private or virtual circuits. During 2004, the number of line equivalents provided by means of corporate networks increased by 33.2%, to 1,517 thousand. Our principal product offerings for corporate networks are Ladalinks (*Ladaenlaces*), Frame Relay and Internet through Internet Protocol / Multi-Protocol Label Switching, or IP/MPLS. Using equipment installed on-site, Ladalinks customers have dedicated network links that transmit information at speeds ranging from 64 Kbps to 622 Mbps. IP/MPLS is a multi-service platform that allows us to provide integrated voice, data and video services, along with Next Generation VoIP services. Frame Relay is a protocol for transmission of data, voice and video over a shared digital network. The speed of Frame Relay transmission ranges from 64 Kbps to 2,048 Kbps. Ladalinks and Frame Relay offer extensive technical assistance and customer support. In addition, we provide networks outsourcing, including network maintenance and support, to major institutions and private companies. We also provide hosting and co-location products, as well as telecommunications network integration services and information systems.

Internet Services

Internet services connect both business and residential customers to the Internet through either a dedicated or dial-up connection. In 2004, the number of Internet customers increased to 1,741 thousand, an increase of 19.9% compared with 2003. Business and residential customers connect to the Internet using telephone lines or broadband connections. We estimate that we are the leading Internet access provider in Mexico in terms of number of subscribers. As of March 31, 2005, the number of Internet service subscribers was 1,855 thousand, compared with 1,521 thousand as of March 31, 2004, representing an increase of 21.9%.

Table of Contents

Our broadband service, Prodigy Infinitum, makes it possible for customers to use our high-capacity connectivity services with applications such as video-conferencing, file transfer, terminals, e-mail and protocol conversion. Prodigy Infinitum operates over asymmetric digital subscriber line, or ADSL, technology. In March 2004, we launched the Prodigy Infinitum kit, which provides our customers with all the equipment necessary to set up their own service. At year-end 2004, we had 560 thousand customers using our ADSL broadband services, an increase of 212.5% over 2003. We further expanded our broadband offerings with the launch of Prodigy Mobile (*Prodigy Móvil*), a high-speed wireless connection for residential and business customers that connects users to the Internet at speeds up to 11 Mbps at a range that extends 20 and 100 meters. As of December 31, 2004, we also provided 388 public hot spots in 58 cities in Mexico at which our clients could obtain wireless access to the Internet.

Prodigy Internet Plus provides a customer with a multi-media personal computer, a personal web page, an e-mail account and two years of unlimited access time for a fixed monthly price. This program accounted for 149 thousand subscribers in 2004, or 12.8% of the total number of Internet access account subscribers at year-end. Our Prodigy Home (*Prodigy Hogar*) package, for a lower fixed monthly price than Prodigy Internet Plus, provides customers with a basic personal computer, a personal web page, an e-mail account, three years of unlimited Internet access during off-peak hours and billed access on a per-minute basis during peak hours.

Consistent with our strategy of providing value-added services to maximize the value of residential and business Internet accounts, we introduced two new services in 2004: (i) Prodigy Home with a reduced monthly fee, which provides customers with unlimited Internet access between 6:00 p.m. and 8:00 a.m. from Monday to Friday plus the entire weekend and access for P.0.13 per minute at all other times and (ii) a new Multifon Card function, which allows customers who do not otherwise have Internet access to access the Internet with their Multifon Card for P.0.13 per minute. We also offer Prodigy Internet i-call, a service that notifies customers of incoming calls, Prodigy Configuration (*Configurador Prodigy*), a service that provides traveling customers with a connection from anywhere in Mexico at the rate for local calls and Prodigy Patrol, a service that allows Prodigy Internet, Prodigy Internet Plus and Prodigy Infinitum customers to limit access to certain web sites.

Other Services

We provide various other telecommunications and telecommunications-related products and services, including printed and online yellow pages directories, public phones and prepaid cards and Internet portals and e-commerce for consumers and businesses.

Yellow Pages Directories

We offer both a printed and an Internet-based yellow pages directory. During 2004, our yellow pages web site averaged over seven million page views per month. The number of Internet directory users reached over 700 thousand per month in 2004.

Public Telephony and Prepaid Phone Cards

We have several programs to meet the need for different kinds of public telephone service in different areas. We had more than 784 thousand fixed public telephones in operation at December 31, 2004. In the increasingly competitive market to provide telecommunications services, independent operators have installed public telephones for which we provide access. There were 26,512 independently operated public telephones at December 31, 2004, an increase of 20.5% compared with 2003.

Table of Contents

In 2004, we sold over 247.5 million prepaid cards under the brand name Ladatel for use in public phones and 25.5 million prepaid cards under the brand name Multifon for use in public and residential telephones, a decrease of 2.0% from 2003. This represents an average of almost 2.5 cards per Mexican resident. We have installed Internet kiosks in public places so that our customers have access to Internet products and services by using Ladatel cards. Revenues from sales of prepaid cards (based on an estimate of usage) accounted for 5.3% of our consolidated revenues in 2004. In 2004, our revenues from public telephony decreased by 6.0% as a result of intense competition from wireless carriers.

Internet Portals and e-Commerce

In March 2000, we launched TIMSN, an Internet portal that is a 50-50 joint venture between Microsoft Corporation, or Microsoft, and us. TIMSN takes advantage of Microsoft's world-class technologies and our leading infrastructure, operations and regional knowledge to offer users a broad range of services and content in Spanish, such as easy and secure shopping services and enhanced communication features.

We operate a web-based service called Eficentrum, which is a horizontal business-to-business market for the indirect exchange of goods and services. The current volume of transactions has made Eficentrum the biggest horizontal portal in Mexico. We plan to implement other new e-commerce initiatives in different market sectors, thereby continuing to broaden our range of services to the corporate sector.

Network

Our technologically advanced, high-capacity and high-speed, local and long distance fiber optic network, the largest in Mexico, extends approximately 82,700 kilometers, reaches 90% of Mexico's population and has connections via submarine cables with 40 other countries while also connecting most major cities throughout Mexico. As a result of our substantial investment, our network has been 100% digital since 2000, providing a wide variety of telephony, data and video services.

Our network includes digital switching equipment and a digital network infrastructure that includes network access cables and domestic and long distance transmission equipment. In addition, we use advanced routing technology and routers to connect end-users with our network.

We use fiber optic cable to transmit both voice and high bandwidth applications such as video and image data. For network access we use ADSL, a copper modem technology that uses existing phone lines to access the Internet at speeds of up to 10 megabits per second. The network is fully redundant and is supported by fiber optic ground rings, which allow the network to be restored within 50 milliseconds in the event of a system failure. In addition, our digital microwave network serves as a backup to the fiber optic network and as a primary means of transmission in rural areas and small towns where a fiber optic infrastructure is not available. We also have satellite systems that support domestic and international network traffic. In addition, in order to further boost transmission speeds, we use a technology called Dense Wavelength Division Multiplexing, or DWDM, which divides optical fiber signals into multiple wavelengths and allows us to operate our network at speeds of up to 140 gigabits per second.

Table of Contents

Core Network

Our core transmission network uses a technology called Next Generation Synchronous Digital Hierarchy, or Next Generation SDH. Transmissions pass through a series of optic rings that give us the unique ability to protect information carried on the network from origin to destination. This level of protection is achieved through the ring's self-repairing mechanism, which prevents equipment and connection failures. This mechanism minimizes the risk of interruption of the signal in the event of any failure in the network.

Additionally, in our core transmission network we have introduced optical cross-connect technology, which is capable of transporting higher volumes of traffic and protecting optical links with different self-recovery schemes to enhance network efficiency and allow for service differentiation.

Telephone communication in our network is controlled by digital local and long distance centers that employ a high degree of protection and load sharing. We also rely on data management technology, which uses voice and data switches to manage large amounts of transmitted information in both our telephone and data networks. This technology also gives us the ability to develop and implement advanced telephone applications in a short amount of time.

Our physical network comprises a combination of fiber optic, microwave and copper cable systems and wireless last-mile systems, which connect our clients to the network and allow us to provide our clients with numerous applications and services. Our modernized external copper network is set up to support not only conventional telephone systems, but also modern broadband applications, which also rely on digital technology and result in high data transmission speeds.

We control and monitor our network's performance and traffic levels and manage the routing of traffic and other network functions through centralized network management. This centralized management facilitates geographical expansion of the network and permits the implementation of higher capacity systems. Next Generation SDH technology gives us flexibility in the geographic placement of these switches and enables us to handle significantly more traffic with fewer switches than would a traditional non-digital network.

Next Generation Network

In the face of new challenges arising from the globalization of telecommunications and the development of new technologies, we are transitioning our current network infrastructure to become a Next Generation Network. Our core transmission network uses Next Generation SDH technology, and we are gradually integrating our service and data management systems under a unified network infrastructure with multi-service user ports that have the ability to integrate voice, data and video transmissions into one standardized application. The Next Generation Network will allow us to improve flexibility in offering broadband services, increase efficiency in managing our network and improve the quality of our service.

As part of our transition to a Next Generation Network, we are deploying a new network platform based on data packets, which will permit the creation of multi-service networks to carry different kinds of information in standardized formats. By utilizing such packet technology, we can provide superior local access, network connectivity, data transmission and bandwidth delivery.

Edgar Filing: TELEFONOS DE MEXICO S A DE C V - Form 20-F

As of December 31, 2004, our cumulative investment in the Next Generation Network totaled U.S.\$570 million. We have budgeted approximately U.S.\$310 million for investment in our Next Generation Network infrastructure.

Table of Contents

Billing and Customer Service

For corporate customers, we offer SI@NA, an Internet service that permits customers to analyze their telecommunications spending. Residential customers may also access billing information over the Internet using the Telmex on-line (*Telmex en Línea*) service. We provide our customers with a bill format that details their local service usage.

We provide customer service through a network of customer service centers and call centers. These customer service centers have evolved from their traditional purpose as places for payment to become Telmex stores that offer telecommunications products and services. Large corporate customers also receive customer service from dedicated customer service personnel. Through our Integrated Solutions (*Solución Integral*) service, we assist corporate customers in meeting their telecommunications needs by providing them with integrated telecommunications solutions consisting of a broad range of telecommunications services. We offer service level agreements to corporate customers that set service standards and guarantee continuity of service.

Competition

The Mexican market for fixed-line domestic and international long distance services was opened to competition beginning in 1996. Thirty-three carriers have been granted licenses to provide long distance service in Mexico, 14 of which are in operation. Alestra (a joint venture led by Alfa, S.A. de C.V., Grupo Financiero BBVA Bancomer, S.A. de C.V. and AT&T Corp.) and Avantel (a joint venture led by Grupo Financiero Banamex and MCI) have made the most substantial investments in infrastructure and marketing. Most competing carriers have been principally focused on the long distance market, although some carriers also provide certain business customers with direct access to their long distance networks using lines leased from us.

The Communications Ministry (*Secretaría de Comunicaciones y Transportes*) has established rules for the determination of interconnection rates between our competitors and us. If we are unable to agree with our competitors on interconnection rates, Cofetel imposes the rates. During the last five years, however, we have agreed on these rates with our long distance competitors. We agreed with our long distance competitors to maintain the same interconnection rates for 2004 and 2005 that have applied since 2002.

Customers are free to choose a competing carrier at any time. An independent organization confirms all requests to change long distance carriers. In addition to pre-subscription, customers eventually may be able to select a long distance carrier on a call-by-call basis by dialing a three-digit prefix. In general, our competitors have focused their attention on obtaining market share in Mexico's most profitable markets, such as the major cities and high-volume users of international and domestic long distance.

Competition in the Mexican market for fixed-line local services began in 1999. As of December 31, 2004, 18 carriers have been granted licenses to provide local fixed wire and wireless telephony and 23 carriers have been granted licenses for cellular and mobile telephony. The 23 carriers are owned by only four companies: Radiomóvil Dipsa, S.A. de C.V., or Telcel, Telefónica Móviles México, S.A. de C.V. and sister companies Grupo Iusacell, S.A. de C.V. and Unefon, S.A. de C.V. At present, there are 11 competitive local operators, primarily in Mexico City and other large cities. Avantel, Axtel and Maxcom are our principal fixed-line competitors. To date, our competitors in local service have focused on servicing first-time customers and providing second lines in new housing, as well as inducing our customers to switch carriers.

Table of Contents

The competitive environment in the Mexican telecommunications market has been the subject of controversy and of attention from Mexican regulators and from abroad. See *Regulation Competition*.

The effects of competition on us depend, in part, on the business strategies of competitors, regulatory developments, exchange rates and the general economic and business climate in Mexico, including demand growth, interest rates and inflation. The effects could include loss of market share and pressure to reduce rates for our services.

During December 2004, we estimate our market share in Mexico to be 79.4% in domestic long distance service and 77.6% in international long distance service measured on the basis of total number of billed minutes generated by our local customers making domestic and international long distance calls in cities open to competition. Our market share in Internet access is estimated to be 52.3% of dial-up connections, measured on the basis of the total number of Internet access accounts in Mexico. We believe that, at present, competitors do not have a material share of the market for fixed-line local service, but we expect that this will change as the number of competitors grows and their market strategies develop. In local service and public telephony, we also face competition from cellular carriers, which we estimate had a combined total of 38.4 million cellular lines in service at year-end 2004. We anticipate continued intense competition as mobile carriers promote mobile-to-mobile calls as a cheaper alternative to fixed-to-mobile calls. We also face increasing competition in international and domestic long distance and local services from VoIP, a technology that transmits ordinary telephone calls over the Internet at a cost lower than that associated with traditional fixed-line telephony services.

Regulation

Our business is subject to comprehensive regulation and oversight by the Communications Ministry and Cofetel. The Communications Ministry is part of the executive branch of the Mexican federal government, and Cofetel is an agency of the Communications Ministry. Regulation and oversight are governed by the Law of General Means of Communication (*Ley de Vías Generales de Comunicación*, or the General Communications Law), the Telecommunications Regulations adopted under such law, the Federal Telecommunications Law (*Ley Federal de Telecomunicaciones*), the Concession and other concessions and license agreements granted by the Communications Ministry. We are also subject to oversight by the Agency of Consumer Protection (*Procuraduría Federal del Consumidor*) and Antitrust Agency (*Comisión Federal de Competencia*).

Set forth below is a summary of certain provisions of the General Communications Law, the Federal Telecommunications Law, the Telecommunications Regulations and our concessions.

General

The General Communications Law, the Federal Telecommunications Law and the Telecommunications Regulations provide the general legal framework for the regulation of telecommunications services in Mexico. The Federal Telecommunications Law replaced most of the provisions of the General Communications Law relating to telephone communications, but those provisions of the General Communications Law not specifically addressed in the Federal Telecommunications Law, such as rules governing local and long distance carriers, remain in effect. Regulations implementing particular provisions of the Federal Telecommunications Law have been issued by the Communications Ministry and Cofetel. Regulations implementing other provisions of the Federal Telecommunications Law are pending. The objectives of the Federal Telecommunications Law are to promote the efficient development of the telecommunications industry, to encourage fair competition in the provision of quality, low-priced services and to assure satisfactory breadth of coverage of the Mexican population.

Table of Contents

In October 2001, the Mexican Congress announced the beginning of a process to reform the Federal Telecommunications Law. Some of the proposals that have been discussed, such as strengthening the regulatory power of Cofetel, stimulating increased investment in telecommunications and increasing competition, could have a material effect on our operations. We are unable to predict whether or when such amendments may be implemented and, if implemented, their effect on our business.

Regulatory Oversight

The Communications Ministry is the Mexican government agency principally responsible for regulating telecommunications services. The Communications Ministry's approval is required for any change in our bylaws. It also has broad powers to monitor our compliance with the Concession, and it may revoke our Concession or temporarily seize or expropriate our assets. The Communications Ministry may require us to supply it with such technical, administrative and financial information as it may request.

The Federal Telecommunications Law provided for the establishment of an administrative agency, Cofetel, to regulate the telecommunications industry. Cofetel commenced operations in August 1996. It is an independent agency within the Communications Ministry, with four commissioners appointed by the Communications Ministry on behalf of the President of Mexico, one of whom is appointed as chairman. Many of the powers and obligations of the Communications Ministry under the Federal Telecommunications Law and the Telecommunications Regulations have been delegated to Cofetel. We regularly provide reports to Cofetel on our operations, financial performance and other matters. We are also required to publish our annual network expansion program, and we must advise Cofetel of the progress of our expansion program on an annual basis.

Mexican law gives certain rights to the Mexican government in its relations with concessionaires and provides that when the concession expires we may not sell or transfer any of our assets unless we give the Mexican government a right of first refusal. If the Mexican government declines to exercise its right, our unions also have a right of first refusal. In addition, Mexican law permits the Mexican government to expropriate our assets in certain circumstances.

Concessions

Under the Federal Telecommunications Law and the Telecommunications Regulations, a provider of public telecommunications services must operate under a concession granted by the Communications Ministry. Such a concession may not be transferred or assigned without the approval of the Communications Ministry. A concession to provide public fixed-network local and long distance services has a term for up to 30 years and may be extended for additional 30-year terms. Our Concession was granted in 1976 and amended in August 1990, and will expire in 2026. Our subsidiary Telnor holds a separate concession in two states in northwestern Mexico, which will expire in 2026. The material terms of the Telnor concession are essentially the same as the Concession.

Operators of private networks that do not use electro-magnetic frequencies are not required to obtain a concession to provide private telecommunications services but are required to obtain approval from the Communications Ministry.

In addition to the Concession, we currently hold concessions for the use of frequencies to provide wireless local access and point-to-point and point-to-multipoint transmission, which we obtained from Cofetel through a competitive bidding process. These concessions are granted for a term up to 20 years and may be extended for additional 20-year terms.

Table of Contents

Termination of the Concession

The Concession provides that it will remain in force until 2026 and that we may renew it for an additional 15 years, subject to additional requirements the Communications Ministry may impose. Thereafter, it may be renewed for successive 30-year terms as provided under the Federal Telecommunications Law.

The Concession provides that upon its expiration the Mexican government is entitled to purchase our telecommunications assets at a price determined on the basis of an appraisal by a public official, and the Telecommunications Regulations provide that upon expiration of the Concession the Mexican government has a right of first refusal to acquire our telecommunications assets. The General Communications Law, however, provides that upon expiration of the Concession our telecommunications assets will revert to the Mexican government free of charge. There is substantial doubt as to whether the provisions of the Concession and the Telecommunications Regulations would prevail, and accordingly there can be no assurance that upon expiration of the Concession our telecommunications assets would not revert to the Mexican government free of charge.

The General Communications Law and the Concession include various provisions under which the Concession may be terminated before its scheduled expiration date. Under the General Communications Law, the Communications Ministry may cause early termination of the Concession in certain cases, including:

failure to expand telephone services at the rate specified in the Concession;

interruption of all or a material part of the services provided by us;

transfer or assignment without Communications Ministry approval of the Concession, the rights provided under the Concession or any asset used to provide telephone service;

violation of the prohibition against ownership of our shares by foreign states;

any material modification of the nature of our services without prior Communications Ministry approval; and

breach of certain other obligations under the General Communications Law.

In addition, the Concession provides for early termination by the Communications Ministry following administrative proceedings in the event of:

a material and continuing violation of any of the conditions set forth in the Concession;

material failure to meet any of the service expansion requirements under the Concession;

Edgar Filing: TELEFONOS DE MEXICO S A DE C V - Form 20-F

material failure to meet any of the requirements under the Concession for improvement in the quality of service;

engagement in any telecommunications business not authorized under the Concession and requiring prior approval of the Communications Ministry;

following notice and a cure period, failure without just cause to allow other concessionaires to interconnect their telephone networks to our telephone network; or

our bankruptcy.

Table of Contents

Under the Federal Telecommunications Law, our concessions could be terminated if: (i) the term of any concession expires; (ii) we resign our rights under any concession; (iii) the Mexican Government through the Communications Ministry expropriates any of the concessions; (iv) we are liquidated or become bankrupt; or (v) the Communications Ministry revokes any of the concessions. Our assets and rights under the concessions may also be temporarily seized by the Communications Ministry.

The General Communications Law provides that in the event of early termination of the Concession for specified causes, including violation of the prohibition on ownership of our shares by foreign states, we would forfeit all of our telecommunications assets to the Mexican government. In the event of early termination of the Concession for any other cause, the General Communications Law provides that a portion of our telecommunications assets would revert to the Mexican government free of charge, and that we may be required to dismantle the remaining portion. There is substantial doubt as to whether the provisions of the Concession and the Telecommunications Regulations regarding the consequences of expiration of the Concession would apply to mitigate the provisions of the General Communications Law in the event of early termination.

Dominant Carrier Regulations

The Federal Telecommunications Law provides that if a company is determined to be dominant in a relevant market, the Communications Ministry has the power to adopt specific regulations on rates, quality of service and information provided by a dominant provider. In February 1998, the Mexican Competition Commission, or MCC, issued a resolution confirming its determination that we are a dominant carrier in the following markets: (i) local telephone service, (ii) access service, (iii) inter-urban transport, (iv) domestic long distance service and (v) international long distance service. This 1998 resolution was held unconstitutional in May 2001.

In September 2000, Cofetel adopted specific regulations, which we refer to as the dominant carrier regulations, applicable to us as a dominant carrier. The September 2000 Cofetel resolution to adopt these regulations was nullified in May 2002. The dominant carrier regulations applied to the five markets identified by the MCC in 1998, and also to certain other services, including directory assistance, operator services and billing and collection services. They imposed standards for the quality of our services, and required that we prepare and provide specific information and specific tariff regulations. We have met or exceeded the standards established in the former regulations on quality of services and on information, and we believe we will be able to continue doing so without significant cost or competitive impact.

The most significant elements of the dominant carrier regulations were the following three specific rules on tariffs:

First, our prices for covered services must always exceed a floor price based on total average costs. The Concession says our price for any service must exceed the average incremental cost, and while the methodology for determining total average costs is not clear, it would presumably result in a higher floor price for the services to which it applies.

Second, the regulations prohibit any rate or rate package that reduces our operating margin in a competitive market, except as a defensive response to competitors' rates that present a risk of substantial loss of market share.

Third, prices for services (other than interconnection) that we provide to other carriers would, for the first time, be subject to prior approval of Cofetel.

Table of Contents

It is difficult to assess the impact these regulations would have had on tariffs or competition, in part because neither the methodologies nor the procedures were fully specified. We believe, however, that if similar rules were implemented in the future, they would, to some degree, reduce our flexibility to adopt competitive tariff policies.

After the MCC issued the February 1998 resolution, we commenced constitutional proceedings in the Mexican federal courts challenging the validity of the resolution, and we commenced a proceeding in the Mexican federal courts challenging the validity of the dominant carrier regulations. We asserted that they constituted a unilateral amendment of the terms of our Concession, which we believe is not permitted under the Mexican constitution or the terms of the Concession itself. We also asserted that the determination that we are a dominant carrier, on which Cofetel's power to issue these regulations was predicated, was flawed because the MCC made its determinations in 1997 in reliance on earlier findings that were out of date, and because its determinations did not extend to all the markets covered by the dominant carrier regulations. Finally, we objected to the specific tariff regulations imposed by the dominant carrier regulations on a variety of grounds, including that they gave Cofetel excessive discretion, that they would unfairly burden competition and that they did not adequately permit us to recover our investments in infrastructure.

Following several appeals, the February 1998 resolution of the MCC was held unconstitutional in May 2001. It is our assertion that all subsequent rulings by Mexican government agencies (including Cofetel) that relied upon the 1998 resolution are also unconstitutional. We filed petitions to have dominant carrier regulations based on the 1998 resolution declared unconstitutional, and in May 2002, several resolutions issued by the MCC and Cofetel were nullified, including the September 2000 Cofetel resolution adopting the dominant carrier regulations.

In May 2001, the MCC addressed the defect of the February 1998 resolution and issued a new resolution with the same terms in which it concluded that we are a dominant carrier in the same five markets. This resolution was affirmed by the MCC following an appeal, and in September 2001, we commenced constitutional proceedings in the Mexican federal courts challenging the validity of this new resolution. In July 2003, a Mexican federal court held that certain aspects of the MCC's second dominant carrier resolution were invalid, although the MCC sought further review. In April 2004, a Mexican federal court decided in favor of our constitutional challenge to the resolution and declared the resolution invalid. In September 2004, the MCC issued additional resolutions in which it again concluded that we are a dominant carrier, and in October 2004, we again commenced constitutional proceedings in the Mexican federal courts challenging the validity of the new resolutions. We cannot predict whether our constitutional challenge will be successful or if it is successful whether the MCC or Cofetel will issue new resolutions or regulations that are substantially similar to the prior dominant carrier resolutions or regulations that were nullified.

Rates

The General Communications Law, the Federal Telecommunications Law and the Telecommunications Regulations provide that the basis for setting rates of a telecommunications concessionaire is set forth in its concession.

Under the Concession, our rates in any period for basic telephone services, including installation, monthly rent, measured local service and long distance service, are subject to a ceiling on the price of a basket of such services weighted to reflect the volume of each service provided by us during the preceding period. There is also a price floor based on our average long run incremental cost. Within this aggregate price cap, we are free to determine the structure of our own rates. We must publish our rates and register them with Cofetel before they may take effect.

Table of Contents

The price cap varies directly with the Mexican National Consumer Price Index, permitting us to raise nominal rates to keep pace with inflation, subject to consultation with the Communications Ministry. Since the beginning of 2001, we have not raised our nominal rates. Under the Concession, the price cap is also adjusted downward periodically to pass on the benefits of increased productivity to our customers. The Concession fixed the adjustment for 1998 and 1999 at 0.74% per quarter in nominal terms, and requires the Communications Ministry to set a new periodic adjustment for every four-year period so as to permit us to maintain an internal rate of return equal to our weighted average cost of capital. The Communications Ministry fixed the adjustment per quarter in nominal terms at 1.11% for 1999-2002 and at 0.74% for 2003-2006.

For services extending beyond basic telephone service, under the Concession we are permitted to set our prices free of rate regulation. These services include data transmission, directory services and services based on digital technology, such as caller ID, call waiting, speed calling, automatic redialing, three-way calling and call forwarding. We are required to register the rates of value-added services on an annual basis.

Competition

The Telecommunications Regulations and the Concession contain various provisions designed to introduce competition in the provision of communications services. In general, the Communications Ministry is authorized to grant concessions to other parties for the provision of any of the services provided by us under the Concession. There are currently 14 competing long distance carriers operating in Mexico and concessions have been granted to a total of 33 long distance companies, all of which also have concessions for international long distance services. As of December 31, 2004, there were 18 fixed-line local operators that have been granted licenses, primarily in Mexico City, Guadalajara, Monterrey, Puebla and other large cities. See *Mexican Operations Competition*. Concessions are not required to operate certain private local telecommunications networks or to provide value-added services, although other authorizations may be required.

The Federal Telecommunications Law provides that the Communications Ministry may authorize the resale of telecommunications services. Though no regulations have yet been adopted implementing that provision of the law, we expect the Mexican government to introduce new regulations regarding resale by the end of July 2005.

In 2003, the Communications Ministry expanded the concessions granted to cable television operators to permit them to provide bi-directional transmission of data. In addition, in 2004, the Communications Ministry began to permit cable operators to provide signal-transmission services to local fixed-line operators and data and broadband Internet Services to the Mexican public. Our Concession permits us to distribute, with prior authorization, television signals through our network to companies authorized to provide television services to the public, but we are not allowed to hold a concession to provide television signals to end users.

With respect to international long distance services, Cofetel rules cover matters such as international interconnection and mechanisms for routing calls into and out of Mexico. Currently, international traffic must be carried by Mexican concessionaires and through authorized international gateways consistent with Cofetel's international long distance rules.

The competitive environment in the Mexican telecommunications market has been the subject of controversy and of attention from Mexican regulators and from abroad. In particular, the MCC has determined that we are a dominant provider of certain telecommunications services, though our appeal of this determination is pending. Mexican law provides for the regulatory authorities to impose additional regulations on a dominant provider. As discussed above, Cofetel has adopted specific regulations

Table of Contents

applicable to us as a dominant carrier, although these regulations were later nullified by a Mexican federal court. The MCC has repeatedly ruled that we have engaged in relative anti-competitive practices, which are less significant violations than absolute anti-competitive practices and carry lower fines. Most of these resolutions have been declared null and void by federal courts or withdrawn by the MCC.

In August 2000, the United States initiated a World Trade Organization, or WTO, dispute settlement against Mexico regarding alleged illegal barriers to competition in the Mexican telecommunications market. The allegations related to our status as a dominant telecommunications provider in Mexico and the interconnection fees and charging mechanisms for international calls.

On June 1, 2004, the United States and Mexico announced that they had mutually agreed to resolve the dispute. Under this agreement, Mexico eliminated its uniform settlement rate system, its proportional return system and its requirement that the Mexican carrier with the greatest share of outgoing traffic to a particular country negotiate the settlement rate on behalf of all Mexican carriers for that country. Mexico also agreed to introduce new regulations authorizing the resale of outgoing international long distance services in 2005. In addition, the United States recognized that Mexico will continue to restrict international simple resale, or the use of leased lines to carry cross-border calls. We expect that the changes in regulation will likely affect our business and competition in the future, and in particular, that the authorization of resale of telecommunications services will put downward pressure on the prices we charge our customers for those services.

Interconnection

We are required under the Federal Telecommunications Law to permit any other long distance concessionaire to connect to our network in a manner that enables customers to choose the network by which their long distance calls are carried. Cofotel rules governing the interconnection rights and obligations of local service concessionaires require local service concessionaires to provide interconnection on a nondiscriminatory basis to any other concessionaire.

The Concession provides that other terms of interconnection, including fees, are to be negotiated between us and each other long distance carrier, and that, in the event the parties are unable to agree, the Communications Ministry may impose terms on us and the other carriers. We were unable to agree with our competitors on interconnection rates for 1997 through 2000, and accordingly Cofotel imposed rates. The interconnection fees imposed by Cofotel were the subject of numerous legal challenges. We also brought proceedings contesting our obligation to renew the existing service agreements with competing carriers based on the new interconnection tariffs, on the grounds that the carriers had not honored the current agreements.

Since 2002, we have agreed with competing long distance carriers to an interconnection rate of U.S.\$0.00975 per minute and per interconnection point. This rate will apply through December 31, 2005.

Table of Contents**NON-MEXICAN OPERATIONS**

Through our subsidiaries, we provide voice, data and Internet services in Brazil, Chile, Argentina, Peru and Colombia. The revenues of our non-Mexican operations represented 11.4% of our consolidated revenues for 2004. These operations derive from our acquisition of AT&T Latin America Corp. in February 2004 for U.S.\$196.3 million (with operations in all five countries), Techtel-LMDS Comunicaciones Interactivas, S.A. in April 2004, Chilesat Corp. S.A. and Metrored Telecomunicaciones S.R.L. in June 2004 and Embratel in a series of transactions beginning in July 2004.

The following table sets forth selected financial information for the year ended December 31, 2004 expressed as a percentage of our total consolidated group. For our operations in Brazil and other countries outside Mexico, all of which were acquired during 2004, the table includes financial information subsequent to the date of consolidation.

	Year Ended December 31, 2004				
	(in millions of constant Mexican pesos as of December 31, 2004, except percentages)				
	Mexico	Brazil ⁽¹⁾	Other Countries ⁽²⁾	Total	Consolidated
Revenues	88.6%	9.8%	1.6%	100.0%	P. 138,802
Operating income	99.2%	0.9%	(0.1)%	100.0%	43,656
Assets ⁽³⁾	79.2%	19.5%	1.3%	100.0%	P. 418,341

- (1) We began consolidating the results of companies holding the assets of AT&T Latin America in Brazil on March 1, 2004, and began consolidating the results of Embratel Participações S.A. on August 1, 2004.
- (2) The other countries in which we have operations are Chile, Argentina, Peru and Colombia. We began consolidating the results of companies holding the assets of AT&T Latin America in each these countries on March 1, 2004. In Chile, we began consolidating the results of Telmex Corp. S.A. on July 1, 2004. In Argentina, we began consolidating the results of Techtel-LMDS Comunicaciones Interactivas, S.A. on May 1, 2004, and began consolidating the results of Metrored Telecomunicaciones S.R.L. on July 1, 2004.
- (3) Assets include plant, property and equipment (on a gross basis), construction in progress, advances to suppliers and inventories for operation of the telephone plant. See Note 18 to our consolidated financial statements.

Brazil***Embratel Participações and Telmex do Brasil***

Embratel Participações S.A., or Embratel, and Telmex do Brasil Ltda. are our principal subsidiaries in Brazil.

Of our revenues from our Brazilian operations in 2004, over 70% was attributable to voice services, approximately 25% was attributable to data services and the remainder was attributable to other services. Voice services include domestic and international long distance and local service. Data services include data and Internet services. Other services include the transmission of television and radio, telex and mobile satellite communications services.

Edgar Filing: TELEFONOS DE MEXICO S A DE C V - Form 20-F

We own 95.1% of the voting stock and 45.4% of the non-voting stock of Embratel (63.9% of the total capital stock) as a result of a series of transactions in 2004 and 2005. In July 2004, we purchased 51.8% of the voting stock of Embratel from MCI for a cash purchase price of U.S.\$400 million. We purchased additional voting stock through a mandatory tender offer in December 2004 and both voting and non-voting stock in various subscriptions from March to May 2005 in Embratel s approximately U.S.\$700 million capital increase.

Through its subsidiaries, Embratel is one of the leading providers of communications services in Brazil. Of its total revenues in 2004, approximately 57% were derived from corporate customers, and the remainder from residential customers. Its principal service offerings include domestic and international long distance, data communications, local and other services. Through its high-speed data network, it

Table of Contents

offers a broad array of products and services to a substantial number of Brazil's 500 largest corporations. Telmex do Brasil provides telecommunications services to corporate customers in Brazil's largest cities including Rio de Janeiro and São Paulo, complementing Embratel's business in those cities.

The Brazilian domestic and international long distance markets are increasingly open to full competition, and competitors have gained market share at Embratel's expense and are placing pressure on its prices and competing for attractive customers in its long distance and data businesses. To respond, Embratel is pursuing a marketing strategy to attract and retain customers and develop its customer base. Embratel is promoting price clarity, implementing win-back programs and tailoring marketing campaigns to each region.

Embratel was founded in 1965 and later became the long distance subsidiary of Telebrás, the Brazilian government-owned telephone company. In 1998, Telebrás was broken up into 12 new holding companies, which were then privatized, including one holding company, Embratel, for the domestic and international long distance operator. After the opening up of the Brazilian local service market, Embratel began providing local telephone services in 2002. In 2003, Embratel acquired Vésper Holding S.A. and Vésper Holding São Paulo and their subsidiaries, wireless local loop local service and broadband data operators with operations in São Paulo and 16 other Brazilian states. Through its subsidiary Star One, Embratel is also Brazil's leading provider of satellite services, with applications including broadcasting, broadband data and telephony. Star One currently has four satellites in orbit, which cover the entire territory of Brazil as well as Argentina, Uruguay and Paraguay. Embratel expects to replace one of its satellites in the second half of 2006 with a new satellite that will also provide coverage over South America, as well as part of Florida.

Embratel owns the largest long distance telecommunications network in Latin America and the largest network of broadband fiber optic transmission systems in Brazil. The network, which connects all of the regional fixed-line and cellular operators throughout Brazil, uses a 100% digital switching system for voice and data and packet-switched data communications, asynchronous transfer mode, or ATM, and frame relay for data and Internet services. The domestic long distance and international transmission facilities extend to all 26 states and the Federal District of Brazil and include fiber optic, digital microwave, satellite and copper wireline networks.

Telmex do Brasil's network extends to seven major cities in Brazil and has points of presence, or POPs, for data and voice services in two other cities. POPs are nodes that are extensions of a network that permit access to customers in cities where a provider does not have metropolitan networks. The network is based on fiber optic cable and like Embratel's, uses primarily ATM transport technology.

Regulation

The Brazilian Telecommunications Law provides a framework for telecommunications regulation. Pursuant to Article 8 of the Telecommunications Law and Decree No. 2,338 of October 7, 1997, the primary regulator of Embratel and Telmex do Brasil is Anatel.

Companies wishing to offer telecommunications services to consumers are required to apply to Anatel for a concession or an authorization. Concessions are granted for services in the public regime and authorizations are granted for services in the private regime.

Embratel's concession for the provision of long distance service is subject to certain obligations and is valid until 2005. Prior to its expiration in 2005, the concession may be renewed for an additional 20 years. In the event that the concession is not renewed or is revoked by Anatel, all assets relating to the provision of services under the concession revert to the Brazilian government. In June 2003, Anatel established the basic

Edgar Filing: TELEFONOS DE MEXICO S A DE C V - Form 20-F

terms for the renewal of the concession contracts. Embratel formally notified Anatel of its intention to renew the concession contract on these terms, but the new concession contract has not yet been signed.

Table of Contents

The initial grant of the concession to Embratel did not require payment of a fee. After December 31, 2005, Embratel is required to pay a fee every two years equal to 2% of annual net revenues from the provision of switched fixed telephone services in the prior year (excluding taxes and social contributions). This requirement will last throughout the 20-year renewal period.

Since the privatization of the Brazilian telecommunications system, concessionaires have been required to meet certain universal service and quality targets. Failure to meet these targets carries the possibility of fines and penalties from Anatel.

After the privatization of the Brazilian telecommunications system, authorizations were granted to new competitors wishing to offer switched fixed telephone services in the private regime, including local, intra-regional long distance, inter-regional long distance and international long distance services. Providers granted authorizations are not subject to the same obligations concerning network expansion (universal service obligations) and continuity of service as those applicable to concessionaires providing switched fixed telephone services in the public regime, although individual authorizations may contain certain related obligations. There are no limitations on the number of authorizations that may be granted. In July 2002, AT&T do Brasil Ltda., now Telmex do Brasil, obtained authorizations to provide local switched fixed telephony services and domestic and international multimedia communications services, which allow it to provide facilities-based voice services. The switched fixed telephony license for local service includes the seven largest business centers in the country.

Embratel's concession establishes a mechanism of annual rate adjustment, based on rate baskets and an adjustment for inflation. Anatel defines rate baskets for local, intra-regional long distance, inter-regional long distance and international long distance services. While the weighted percentage increase for the entire basket is capped by Anatel, tariffs for individual services within the basket may be increased at Embratel's discretion. Because Telmex do Brasil operates under an authorization granted by Anatel and not a concession, the rates it charges its customers are not regulated by Anatel. However, Telmex do Brasil is required to publish its rates for fixed-line telephone service in Brazilian newspapers.

Competition

The strongest operators in Brazil's telecommunications market are the companies that were broken off from Telebrás, the former government-owned telephone company, upon its privatization, Telefónica (formerly Telesp), Brasil Telecom (formerly Tele Centro Sul) and Telemar (formerly Tele Norte Leste). Following the privatization of Telebrás, three mirror companies were created by the auction of mirror licenses to provide local services over public switched networks in the same geographic areas served by the incumbent carriers. In 2003, Embratel acquired Vésper and Vésper São Paulo, two of the three mirror companies. Global Village Telecom holds the third mirror license for local service. Intelig holds a mirror license for the provision of intra-regional, inter-regional and international long distance service, in competition with Embratel.

Since 2002, the Brazilian federal government has been authorized to grant an unlimited number of authorizations for the provision of any type of telecommunications service. Embratel was granted a nationwide license in August 2002 to provide local telephone service after it met certain universal service requirements.

Embratel's principal competitors vary by region and type of service. In northern and eastern Brazil, Embratel competes with Telemar and CTBC Telecom for local services and Telemar and Intelig for long distance services. In southern and western Brazil, Embratel competes with Telefónica for local

Table of Contents

services and Telefónica and Intelig for long distance services. In São Paulo, Embratel competes with Brasil Telecom and Global Village Telecom for local services and Brasil Telecom and Intelig for long distance services.

Investment in Net Serviços de Comunicação S.A.

We own a non-controlling interest in Net Serviços de Comunicação S.A., or Net, the largest cable television operator in Brazil. As of December 31, 2004, Net had approximately 1.4 million connected cable television subscribers and 184 thousand subscribers to its high-speed cable modem Internet access service. Net had total revenues of U.S.\$518 million (P.5,835 million) and net income of U.S.\$17 million (P.192 million) during 2004.

We acquired our interest in Net in 2005 pursuant to agreements with Globo Comunicações e Participações S.A., Distel Holding S.A. and Roma Participações Ltda. (together, Globo). After a series of transactions, we own (a) 49% of the voting interests and all of the non-voting interests in GB Empreendimentos e Participações S.A., or GB, a special-purpose company that owns 51% of the voting shares of Net and (b) 37.4% of the voting and 7.7% of the non-voting shares of Net. Globo owns the remaining 51% of the voting interests in GB.

The total cost of these transactions was U.S.\$313 million (P.3,526 million). Our total direct and indirect equity interest in Net is 37.1% (calculated by multiplying the shares of Net held by GB by our percentage equity interest in GB, and adding the shares we own directly in Net).

Under current Brazilian law governing cable operators, because we are not controlled by Brazilian persons we are not permitted to control Net. Globo owns a majority of the voting interests in GB, which owns a majority of the voting shares of Net. We have agreed that if Brazilian law changes to allow us to own a controlling interest in Net, we have the right to purchase an additional interest in GB to give us control of 51% of the voting shares of Net, and Globo has the right to cause us to purchase such interest.

Possible Transactions with Embratel

We are formally evaluating whether we should sell Telmex do Brasil and our 37.1% equity stake in Net to Embratel. We believe there might be advantages to this, because of the complementarity and possible synergies among these businesses. We would expect to receive new ordinary shares of Embratel as consideration for the acquisition of Telmex do Brasil and our interest in Net. These transactions would present a number of important issues, including the price in shares Embratel would pay and the procedures we and Embratel would follow to negotiate and approve the transaction while protecting the interests of Embratel's other shareholders. As a result, there can be no assurance as to whether any such transaction will occur or, if it does occur, on what terms or on what timetable.

Chile

In February 2004, we acquired substantially all of the assets of AT&T Latin America including those of AT&T Chile Holding S.A., which was renamed Telmex Chile Holding S.A., or Telmex Chile.

In April 2004, we acquired an approximately 40% interest in Chilesat Corp. S.A., or Chilesat, for U.S.\$47 million from Redes Ópticas, S.A. and Redes Ópticas (Cayman) Corp., entities owned by Southern Cross Latin American Private Equity Fund L.P. and GE Capital Equity Investments, Ltd. Pursuant to a cash tender offer required by Chilean law, in June 2004 we purchased an additional 59.3%, increasing our ownership of Chilesat to 99.3%. We changed the name of Chilesat to Telmex Corp. S.A., or Telmex Corp.

Table of Contents

We provide voice, Internet and data services to more than 500 thousand corporate and residential customers in Chile. In 2004, we integrated the operations of Telmex Corp. and Telmex Chile. To corporate customers, we provide local service, private long distance networks, virtual private networks, Internet services and other value-added services, as well as video and audio satellite links for broadcasting corporations. For residential customers, in addition to local service, we are focusing on long distance and Internet services, including value-added services with the goal of increasing our overall profitability. Our multi-service platform, IP/MPLS, allows us to provide integrated voice, data and video services, along with Next Generation VoIP services.

Our fiber optic network comprises more than 4,200 kilometers of physical cable, which cover the continental territory of Chile from Arica to Santiago, Santiago to Valparaiso and Santiago to Valdivia. In 2002, to cover the segment between Valparaiso and Puerto Montt, a capacity exchange was carried out with Telefónica del Sur S.A. In the southern regions of the country, we use a satellite platform. We also own and operate metropolitan fiber networks covering Santiago and Chile's other major cities.

Of our revenues from our Chilean operations in 2004, almost two-thirds were attributable to voice services, approximately one-third was attributable to data and Internet services and the remainder was attributable to other services. Telmex Corp. and Telmex Chile together have a market share of 33.3% in the national long distance market, 10.8% in the international long distance market and 1.7% in the local service market.

The General Telecommunications Law (No. 18,168) of 1982, as amended, established the legal framework for the provision of telecommunications services in Chile. The law established the rules for granting concessions and permits to provide telecommunications services and for the regulation of rates and interconnection. The main regulatory agency of the Chilean telecommunication sector is the Ministry of Transportation and Telecommunications, which acts primarily through the Undersecretary of Telecommunications, or SUBTEL.

We hold licenses to provide local service, domestic and international long distance service, data services and value-added services.

We face strong competition in all of our business segments and we compete with Telefónica CTC Chile, the ultimate parent of which is Telefónica S.A., Entel S.A. and five other carriers. This competition has mainly been vigorous in international and national long distance public markets since implementation of the multicarrier system, which requires local telephone companies to provide facilities that allow long distance carriers to access the local telephone network on an equal access basis. We, Entel and other similar companies compete on an equal access basis in the national long distance and international long distance Chilean market.

Although competition remains strong, the Chilean long distance industry has demonstrated signs of increased stability due to the settlement of legal and operational disputes among competitors, mergers between certain facilities and non-facilities-based carriers and the existence of the Long Distance Carriers Association, an institution dedicated to solving the various problems of the industry.

Argentina

Techtel-LMDS Comunicaciones Interactivas, S.A., or Techtel, provides data, Internet and voice services in Argentina. Telmex Argentina S.A. provides data, Internet and voice services to corporate customers in Argentina's largest cities. Our principal subsidiaries in Argentina are Telmex Argentina, Techtel and Metrored Telecomunicaciones S.R.L., or Metrored. Metrored operates fiber optic rings in metropolitan areas that provide last mile access to reach our customers.

Table of Contents

Through its digital fiber optic network, Telmex Argentina offers local, long distance, data and Internet access to corporate and residential customers. Through its two data centers it also offers data administration and hosting, among other services.

In April 2004, we acquired an 80% indirect interest in Techtel in two separate purchases. We acquired a 20% interest from an affiliate of Techint Compañía Técnica Internacional S.A.C.I., or Techint, one of Argentina's largest industrial groups, for U.S.\$25 million. We subsequently acquired a 60% interest from América Móvil, on the same pricing terms, for U.S.\$75 million. In June 2004 we capitalized Techtel with U.S.\$26.2 million to buy Metrored and to repay debt of Techtel. This capitalization increased our ownership of Techtel by 3.4%.

After the capitalization, the Techint affiliate continued to hold the remaining 16.6% indirect interest in Techtel. Pursuant to an agreement with the Techint affiliate, on June 23, 2005, we exercised our right to acquire an additional interest in Techtel of approximately 10% for which we paid U.S.\$15 million, increasing our ownership to 93.4%. Pursuant to a further agreement with the Techint affiliate, we have a right to acquire, and the Techint affiliate can cause us to acquire, in 2007, its remaining 6.6% indirect interest in Techtel for U.S.\$10 million. In addition, we have agreed to pay Techint's affiliate, Tecnologia en Servicios Urbanos TESUR S.A., a U.S.\$6 million consulting fee for management services to be rendered through December 2006.

Techtel operates a local multipoint distribution service, or LMDS, and fiber optic network in Argentina, providing voice, data and video transfer services and other related telecommunications services. LMDS is a wireless broadband technology that uses radio signals to transmit voice, video and data. Techtel began providing long distance fixed-line voice services and call center support in December 2000 and launched local fixed-line voice services in August 2001. In June 2004, Techtel acquired a controlling interest in Metrored, which has one of the largest fiber optic networks in Buenos Aires.

We have a fiber optic network of over 4,000 km that covers thirteen cities in Argentina and reaches approximately 68% of its population. Our voice network covers approximately 46 cities.

Of our revenues from our Argentine operations in 2004, over one-half was attributable to voice services, approximately 40% was attributable to data services and the remainder was attributable to other services.

We hold licenses to provide local, domestic and international long distance telephone service, public telephony, data services, value-added services and video conferencing.

Peru

Through Telmex Perú S.A., we provide domestic and international long distance services, public telephones, and data, Internet and hosting services to corporate and residential customers in Peru through a fiber optic network.

Revenues of our Peruvian operations for the full year 2004 were P.465.7 million, of which nearly two-thirds were attributable to voice services, approximately one-third was attributable to data services and the remainder was attributable to other services.

The main regulatory agency of the Peruvian telecommunications sector is the Ministry of Transportation and Communication. Telmex Perú holds concessions to provide local, domestic and international long distance service.

Table of Contents

Our main competitor in fixed local telephony services, public telephone services, data services and Internet services is Telefónica del Perú, S.A., and in long distance telephony services our main competitors are Americatel Perú S.A., a Telecom Italia Group affiliate, and Telefónica del Perú.

Colombia

Through Telmex Colombia S.A., we provide data and Internet services to corporate clients in Colombia through a metropolitan and inter-city fiber optic network.

Of our revenues from our Colombian operations for 2004, over 90% was attributable to data and Internet services and the remainder was attributable to other services.

We hold licenses to provide local, domestic and international long distance service, mobile telephone service, data services, value-added services and video conferencing.

United States

In April 2003, the U.S. Federal Communications Commission, or FCC, granted our U.S. subsidiary, Telmex USA, a facilities-based authorization that permits Telmex USA to install and operate telecommunications facilities in the United States. Telmex USA also holds an FCC authorization to resell long distance services in the United States. As a result of our acquisition of the assets of AT&T Latin America and of Embratel, we hold two additional facilities-based and resale-based authorizations. We are in the process of evaluating potential future operations in the United States.

Table of Contents**CAPITAL EXPENDITURES**

The following table sets forth, in constant pesos as of December 31, 2004, our capital expenditures, before retirements, for each year in the three-year period ended December 31, 2004:

	Year ended December 31,		
	2004	2003	2002
	(in millions of constant pesos as of December 31, 2004)		
Data, connectivity and transmission network	P. 3,686	P. 3,565	P. 3,199
Internal plant	8,369	1,639	2,369
Outside plant	5,359	2,588	3,396
Systems	839	695	1,014
Other	2,121	2,242	2,250
Total capital expenditures	P. 20,375	P. 10,728	P. 12,227

Our investment in capital expenditures increased by 89.9% in 2004 due to an increase in our investments in Mexico and the inclusion of the investments made by our non-Mexican subsidiaries following our consolidation of the respective businesses.

We have budgeted capital expenditures in an amount equivalent to approximately U.S.\$2.14 billion for the year 2005, including U.S.\$1.55 billion in Mexico, U.S.\$473 million for Embratel principally for investments related to the C1 and C2 satellites and U.S.\$117 million for our other operations in Brazil, Argentina, Chile, Peru and Colombia. See *Item 5. Operating and Financial Review and Prospects Liquidity and Capital Resources*.

OTHER MATTERS**Investments****General**

We occasionally make investments and joint ventures in telecommunications-related businesses within and outside Mexico. To date in 2005, we have made investments totaling U.S.\$924 million, including U.S.\$611 million in Embratel through subscription to its capital increase and U.S.\$313 million to acquire a 37.1% equity interest in Net. We also invest in publicly traded equity securities of companies in technology and communications businesses. At December 31, 2004, we had U.S.\$658 million of marketable securities on our balance sheet. Our marketable securities are carried at market value, and gains and losses are recognized in our statement of income.

MCI, Inc.

Through a wholly owned subsidiary, we invested in several series of bonds of MCI's predecessor, WorldCom, Inc. As of December 31, 2003, we held approximately U.S.\$1,759 million in face amount of the bonds, with a market value of approximately U.S.\$589 million at such date.

In April 2004, MCI emerged from bankruptcy pursuant to a reorganization plan approved by the U.S. bankruptcy court in October 2003. Under the reorganization plan, in exchange for our bonds, we received approximately 25.6 million shares of common stock of MCI, which represented approximately 8.1% of MCI's outstanding common stock. Other parties that may be deemed to be under common control with us held an additional interest of approximately 5.7% of MCI's outstanding common stock.

Table of Contents

On April 9, 2005, we and certain parties related to us entered into an agreement with Verizon Communications Inc. and certain of its subsidiaries, together Verizon, to sell to Verizon our entire interest in common shares of MCI for a cash purchase price of U.S.\$25.72 per share. We received approximately U.S.\$660 million for our 25.6 million MCI shares on May 17, 2005. We expect to recognize a gain of close to U.S.\$58 million before taxes, which is in addition to gains recognized in prior periods. If, on the third trading date prior to the first anniversary of this agreement, Verizon Communications' average stock price for the preceding 20 trading days exceeds U.S.\$35.52 per share (subject to adjustment in certain circumstances), we will be entitled to receive an additional cash payment per share equal to approximately 72.4% of the excess. The additional cash payment to which we will be entitled will be capped at approximately U.S.\$19.54 per share if Verizon Communications' planned merger with MCI has been consummated by the third trading date prior to the first anniversary of our agreement with Verizon.

Property, Plants and Equipment

We have transmission facilities, exchanges, outside plant and commercial and administrative offices throughout Mexico. We own most of the locations of our exchanges and offices and lease other locations. We hold a small number of operating properties under financial leases, but the aggregate amount of such financing is not material to our operations as a whole. We carry casualty insurance against loss or damage to buildings, equipment contained in buildings and outside plant, including our fiber optic network. Outside Mexico, we hold additional facilities and offices in Brazil, Chile, Argentina, Peru and Colombia.

We have purchased equipment from a variety of suppliers, and there are sufficient alternative sources of equipment so that interruption of any source would be unlikely to cause a significant disturbance to our operations or our investment plan.

The Telmex Foundation

Since 1996, we have sponsored a philanthropic foundation called Fundación Telmex, A.C., or the Telmex Foundation, which is active in the charitable areas of education, health, justice and culture. We do not consolidate the Telmex Foundation in our financial statements. We contributed P.578 million in 2001. We did not contribute to the Telmex Foundation in 2002, 2003 or 2004, and do not expect to contribute to the Telmex Foundation in 2005. The assets of the Telmex Foundation are devoted only to its charitable activities, and our contributions are deductible for purposes of the Mexican Income Tax Law.

During 2004, the Telmex Foundation provided over 10,000 scholarships, donated over 3,300 personal computers and over 2,800 printers, and provided approximately 2,750 eyeglasses for children. The Telmex Foundation also works in conjunction with the Mexican government's health agencies in providing specialized health care to people in remote areas through a surgery program that funded treatment for over 28,700 patients in 2004. The Telmex Foundation also works to increase participation in organ donor registries. In cooperation with non-governmental organizations, the Telmex Foundation provided assistance to nearly 7,000 persons charged with minor crimes whose lack of financial resources prevented them from otherwise posting bail during 2004.

Table of Contents

Item 5. Operating and Financial Review and Prospects

The following discussion should be read in conjunction with the consolidated financial statements and notes thereto included in this Annual Report.

Our consolidated financial statements have been prepared in accordance with Mexican GAAP, which differ in certain respects from U.S. GAAP. Note 19 to our audited consolidated financial statements provides a description of the principal differences between Mexican GAAP and U.S. GAAP, as they relate to us; a reconciliation to U.S. GAAP of operating income, net income and total stockholders' equity; and a condensed statement of cash flows under U.S. GAAP.

Mexican GAAP requires that the financial statements recognize certain effects of inflation. In particular:

nonmonetary assets (excluding plant, property and equipment of non-Mexican origin) and stockholders' equity are restated for inflation based on the Mexican National Consumer Price Index;

plant, property and equipment of non-Mexican origin are restated based on the rate of inflation in the country of origin and converted into Mexican pesos using the prevailing exchange rate at the balance sheet date;

gains and losses in purchasing power from holding monetary assets and liabilities are recognized in income; and

all financial statements are restated in constant pesos as of December 31, 2004.

We have not reversed the effect of inflation accounting under Mexican GAAP in the reconciliation to U.S. GAAP of our net income and stockholders' equity, except with respect to the methodology for restatement of plant, property and equipment of non-Mexican origin. See Note 19 to our consolidated financial statements.

Overview

Our financial statements are presented in constant pesos, so all financial information is restated in pesos with purchasing power as of December 31, 2004. We refer to constant-peso figures as being real, as opposed to nominal. If nominal revenues or income do not increase by at least the rate of inflation, they decrease in real terms.

In 2004, as a part of our strategy for growth, we acquired operations in Brazil and four other countries in Latin America where we now offer voice, data and Internet services, among other services. Total revenues grew 12.9% in 2004, primarily because of these acquisitions. Revenues from our new non-Mexican operations represented 11.3% of total revenues in 2004. We expect the contribution of our non-Mexican operations to total revenues to increase in 2005 when we consolidate the results of our non-Mexican operations for the full year.

In Mexico, our revenues grew slightly in 2004 due to strong growth in Internet services and corporate networks, despite a decrease in revenues for local and domestic and international long distance services. We did not raise our nominal rates in 2003 or 2004, and we gave discounts for some domestic long distance and connectivity services, so in real terms our prices have continued to fall. The number of lines in service has continued to grow, but average revenue per line has declined, partly because we have added new customers who have less disposable income and make less use of their lines.

Table of Contents

Competition and changing technologies have had extensive effects on our financial performance, and it is difficult to predict their future impact. We expect continued pressure on prices for long distance services. In local service, the rapid growth in mobile telecommunications has made them the principal competitor for local networks. In addition, local service faces competition from other means of communication such as private circuits and the Internet, including VoIP, a technology that transmits ordinary telephone calls over the Internet. The growth of other service providers in long distance and mobile has made interconnection fees a growing component of both our revenues and our costs. The number of our broadband subscribers grew by 212.5% in 2004 and we expect that it will continue to grow and to affect usage of other services. Revenues from voice services (including local, long distance and interconnection) represented 80.5% of our consolidated 2004 revenues while revenues from corporate networks and Internet services represented 15.2% but were growing at a much faster pace.

Faced with uncertain potential for growth in revenues and operating income in the Mexican market, we have worked to control costs while integrating the non-Mexican businesses we acquired in 2004. The consolidation of these businesses increased our revenues and operating income in 2004, but decreased our overall operating margin. It is likely that the results of our non-Mexican subsidiaries will continue to adversely impact our overall operating margin in the future.

Our future results may be affected significantly by the general economic and financial conditions in the countries where we operate, including levels of economic growth, devaluation of the local currency, inflation or high interest rates. Exchange rate variations on our U.S. dollar-denominated indebtedness, and the effect of inflation on our net monetary liabilities, contribute to the volatility of our comprehensive financing cost.

Effects of Recent Acquisitions

In 2004, we acquired Techtel, Chilesat, Metrored, a majority of the voting stock of Embratel and substantially all of the assets of AT&T Latin America. The consolidation of these companies affects the comparability of our 2004 results to our 2003 results and will continue to affect comparability in 2005, particularly since the largest of our 2004 acquisitions were not consolidated until the third quarter of 2004.

Our consolidated financial statements reflect the consolidation of these companies as follows:

Telmex Argentina, Telmex do Brasil, Telmex Chile, Telmex Colombia and Telmex Peru (holding the assets of AT&T Latin America in each respective country) (from March 1, 2004),

Techtel (from May 1, 2004),

Metrored (from July 1, 2004),

Chilesat, now Telmex Corp. (from July 1, 2004) and

Embratel (from August 1, 2004).

Table of Contents**Summary of Operating Income and Net Income**

In the table below we set forth our operating revenues, operating costs and expenses (each expressed as a percentage of total operating revenues) and operating income, as well as our comprehensive financing cost, provisions, equity in results of affiliates, minority interest and net income for each of the years in the three-year period ended December 31, 2004.

	Year ended December 31,					
	2004		2003		2002	
	(millions of pesos)	(percentage of operating revenues)	(millions of pesos)	(percentage of operating revenues)	(millions of pesos)	(percentage of operating revenues)
Operating revenues						
Local service	P. 56,953	41.0%	P. 56,667	46.1%	P. 58,094	47.1%
Domestic long distance service	24,905	18.0	18,818	15.3	19,179	15.6
International long distance service	10,675	7.7	9,112	7.4	9,912	8.0
Interconnection service	19,199	13.8	18,477	15.0	17,019	13.8
Corporate networks	13,283	9.6	8,974	7.3	9,387	7.6

Table of Contents

Revenues

Total revenues in 2004 were P.138,802 million, an increase of 12.9% over 2003, due primarily to the consolidation of our non-Mexican operations. Of our total revenues in 2004, 80.5% was attributable to voice services, which includes local, long distance and interconnection services, and 15.2% was attributable to corporate networks and Internet services.

In 2005, we will consolidate for the full year the non-Mexican operations we acquired during 2004. As a result, we expect that the portion of revenues attributable to our Mexican operations (88.7% in 2004) to decrease in 2005. We also expect that voice services will represent a smaller portion of total revenues in 2005 as a result of our consolidation of the revenues from corporate networks and Internet services of our non-Mexican operations. In 2004, voice services represented more than 70% of Embratel's revenues.

Local Service Revenues

Operating revenues from local service include installation charges for new lines, monthly line rental charges, monthly fees for digital service and monthly measured service charges based on the number of calls. These revenues depend on the number of lines in service, the number of new lines installed and the volume of calls. In Mexico, measured service charges are due from residential customers only for the number of local calls exceeding a specified monthly minimum. Accordingly, revenues from local service for residential customers do not depend solely on usage volume. Operating revenues from local service also include miscellaneous charges, such as fees paid by long distance carriers related to certain costs of modifying our network to accommodate interconnection and fees for reconnecting customers.

Revenues from local service increased by 0.5% in 2004 and decreased by 2.5% in 2003. The increase in 2004 was primarily due to the consolidation in August 2004 of the local service revenues of Embratel. Without the local service revenues of Embratel, revenues from local service would have decreased by 1.1%, as total local traffic in Mexico increased by only 0.6%. Revenues from our Mexican operations declined in 2004 and 2003 because of lower real rates, which resulted from inflation, as our nominal rates remained unchanged for the fourth year. Traffic increased slightly, reflecting the effects of economic growth and increased competition. These effects were partially offset by the higher penetration of digital services, growth of voicemail and an increase in the number of lines in service to 17,172 thousand at December 31, 2004 from 15,683 thousand at December 31, 2003 and 14,446 thousand at December 31, 2002. The proportion of lines with at least one digital service (such as call waiting, caller ID, voicemail, three-way calling and call forwarding) rose to 38.2% in 2004, compared with 35.0% in 2003 and 30.2% in 2002. Income per line decreased to P.302.3 in 2004 from P.334.5 in 2003.

Domestic Long Distance Revenues

Operating revenues from domestic long distance service depend on rates and traffic volume. Domestic long distance revenues increased by 32.3% in 2004 and decreased by 1.9% in 2003. The increase in 2004 was primarily due to the consolidation of long distance revenues amounting to P.7,693 million from Embratel and other subsidiaries outside Mexico. With respect to our Mexican operations, although billed minutes increased by 8.6% to 16,700 million in 2004 from 15,376 million in 2003, domestic long distance revenues declined by 8.5% due to lower real rates. In 2003, revenues from domestic long distance services decreased due to lower real rates, partly offset by increased traffic. The number of billed minutes increased by 7.2% to 15,376 million in 2003 from 14,347 in 2002.

Table of Contents

International Long Distance Revenues

Operating revenues from international long distance service consist of (a) amounts earned from our customers and (b) amounts earned from foreign telecommunications carriers for terminating international calls. The amount of operating revenues from international long distance service depends on the volume of traffic, the rates charged to our customers, the rates charged by each party under agreements with foreign carriers, principally in the United States, and the effects of competition. The contribution of net settlements from foreign carriers represented 1.9% of our consolidated revenues in 2004 and 24.7% of our international long distance revenues in 2004. Settlement payments under service agreements with foreign carriers are generally denominated in U.S. dollars.

International long distance revenues increased by 17.2% in 2004 and decreased by 8.1% in 2003. The increase in 2004 was due to the consolidation of international long distance revenues amounting to P.1,600 million from Embratel and other subsidiaries outside Mexico. Without this revenue, there would have been a decrease in revenue of 0.4% due to lower real rates and customer discounts, partially offset by a large increase in traffic. Outgoing billed minutes grew by 7.9%, while incoming billed minutes grew by 54.8% due to lower international settlement rates and lower illegal bypass.

The decrease in 2003 was due to (i) lower real rates billed in Mexico and (ii) lower incoming traffic, which we attribute, in part, to illegal bypass, both of which were partly offset by higher outgoing traffic, principally to the United States.

We estimate that illegal bypass decreased our revenues by approximately P.1,769 million in 2004 and approximately P.2,661 million in 2003. Our estimated lost revenues consisted of settlement payments that we otherwise would have received but for illegal bypass.

In August 2004, Mexico eliminated its uniform settlement rate system, its proportional return system and its requirement that the Mexican carrier with the greatest share of outgoing traffic to a particular country negotiate the settlement rate on behalf of all Mexican carriers for that country. Because each Mexican carrier is now free to negotiate settlement rates with each foreign carrier, this form of bypass has disappeared.

Revenues from Interconnection

Revenues from interconnection represent fees for connection to our network of fixed-to-mobile, mobile-to-fixed and long distance calls. In Mexico, under the calling party pays system, our fixed-line customers pay us an interconnection charge when they call mobile customers, and we pay approximately three-quarters of that amount to the mobile carrier that completes the call. We recognize the amount the customer pays us under interconnection revenue, and we recognize the amount we pay to the mobile carrier under interconnection cost. For our Mexican operations, revenue from fixed-to-mobile calls represented 89.9% of interconnection revenues in 2004 and 92.3% in 2003, and revenues from competing local and long distance carriers represented 7.8% of interconnection revenues in 2004. The balance of interconnection revenues represents payments from cellular carriers for mobile-to-fixed calls.

Revenues from interconnection increased by 3.9% in 2004 and by 8.6% in 2003. The increase in 2004 was due in part to the inclusion of revenue from non-Mexican operations, in particular Embratel, without which the growth would have been 1.4%. For our Mexican operations, revenues from calling party pays decreased in 2004 by 1.1%, but this decrease was more than offset by growth in revenue from interconnection of local, long distance and cellular operators. The increase in 2003 was due to growth in calling party pays minutes. In addition, in 2003, the increase resulted from growth in minutes from long distance carriers.

Table of Contents

Revenues from Corporate Networks

Revenues from corporate networks include revenues primarily from the installation and leasing of dedicated private lines and revenues from virtual private network services. Revenues from corporate networks increased by 48.0% in 2004 and decreased by 4.4% in 2003. A large part of the increase in 2004 was due to the consolidation of our non-Mexican operations, in particular Embratel. Without the non-Mexican operations, revenues would have increased by 7.3% due to the increase in line equivalents and the expansion of our administrative networks business, partially offset by customer discounts and lower real rates. The decrease in 2003 was due to customer discounts and lower real rates as a result of inflation.

Revenues from Internet Services

Revenues from Internet services include set-up and service fees for dial-up and broadband Internet access. Revenues from Internet services increased by 45.3% in 2004 and by 27.1% in 2003. The increase in 2004 was due in part to the inclusion of revenue from our non-Mexican operations, in particular Embratel, without which the growth would have been 25.0%. The increase in Mexico was due to an increase in the number of broadband (ADSL) customers, which grew by 212.5%, from 179.3 thousand at the end of 2003 to 560.3 thousand at the end of 2004. The increase in 2003 was due to an increase in both dial-up and broadband customers.

Other Revenues

The largest components of other revenues are sales of yellow pages advertising, telecommunications equipment and accessories and billing and collection services offered to third parties. Other revenues increased by 8.9% in 2004 and decreased by 0.3% in 2003. The increase in 2004 was due to growth in Mexican other revenues and the effect of the consolidation of Embratel. In Mexico, other revenues increased by 3.3% in 2004 due to growth in revenue from the sale of telecommunications materials and billing and collection services offered to third parties. The decrease in 2003 was principally due to lower revenues from yellow pages advertising, particularly in the Mexico City, Guadalajara and Monterrey directories, and a delay in the recognition of revenues from two directories, the publication of which was postponed from December 2003 until February 2004. The effects were partially offset by higher revenues from the sale of telecommunications equipment and accessories and billing and collection services to third parties.

Operating Costs and Expenses

Cost of Sales and Services

Cost of sales and services increased by 7.0% in 2004 and by 0.7% in 2003. The increase in 2004 was due to the consolidation of our non-Mexican operations. In 2004, cost of sales and services for our Mexican operations increased by only 1.1%, due to the expansion of our telephone plant and to expenses related to maintenance of our data network, partially offset by lower expenses for pensions and lower costs for computers for resale to customers. The increase in 2003 was mainly due to higher expenses for pensions and seniority premiums, the increase of electricity rates and higher costs for telephone sets and computers, partially offset by decreased expenses for maintenance of outside plant and systems, and lower production costs for telephone directories.

Table of Contents***Commercial, Administrative and General Expenses***

Commercial, administrative and general expenses increased by 21.9% in 2004 and by 0.2% in 2003. In 2004, the increase was due to the inclusion of expenses from our non-Mexican operations. In 2004, for our Mexican operations, these expenses decreased by 0.7%, due to lower expenses for pensions and lower costs for prepaid phone cards. In 2003, we maintained strict cost control policies, including the continued reduction of marketing expenditures, and we reduced the cost of prepaid cards. This cost control policy helped reduce the impact of higher expenses in pensions and seniority premiums and higher payments to third-party service providers. In addition, we made no contributions to the Telmex Foundation in 2003. As a result, we maintained commercial, administrative and general expenses at almost the same level as in 2002.

Interconnection and Transport

Costs from interconnection include payments we make in Mexico, principally to cellular carriers under calling party pays, and costs from transport include fees paid by our non-Mexican subsidiaries for the use of facilities to complete their calls in areas where they do not have a network. Total interconnection and transport costs increased by 52.6% in 2004 due primarily to the inclusion of our non-Mexican operations. Interconnection costs for our Mexican operations increased by 0.3% in 2004 and 4.1% in 2003, due in both years to the growth in traffic from our customers terminating calls on the networks of other operators, especially cellular operators.

Depreciation and Amortization

Depreciation and amortization increased by 5.4% in 2004 and by 1.7% in 2003. Under Mexican GAAP, we restate imported fixed assets based on the exchange rate between the peso and the currency of the country of origin and the inflation of the country of origin. As a result, changes in exchange rates and inflation rates affect the amount of depreciation. In 2004, the increase was due to the inclusion of our non-Mexican operations, principally Embratel. For our Mexican operations, depreciation and amortization decreased by 7.3% due to lower depreciable assets, reflecting declining equipment prices and the fact that the rate of Mexican inflation exceeded the rate of devaluation of the peso in 2004. Depreciation and amortization increased in 2003 because the rate of devaluation exceeded the rate of Mexican inflation and we reduced the useful lives of certain assets to respond to technological changes. These effects were offset by a decrease in the amount of our depreciable assets, as the rate of our investment has slowed and an increased proportion of our assets has fully depreciated.

Operating Income

In 2004, operating income increased by 4.5%, reflecting a 12.9% increase in revenues and a 17.3% increase in costs. Our operating margin decreased to 31.5% in 2004 from 34.0% in 2003 due to the consolidation of our non-Mexican operations, which had lower operating margins than our Mexican operations. In 2004, operating income from our Mexican operations increased by 3.7%, reflecting a 0.1% increase in revenues and a 1.7% decrease in operating costs and expenses. Operating margin from our Mexican operations increased to 35.2% in 2004 from 34.0% in 2003, due to decreased costs and expenses, including lower depreciation. The operating margin of our Mexican operations reflects an increase in our margin for other services (from 36.0% in 2003 to 44.1% in 2004).

In 2003, operating income decreased by 3.5%, reflecting a 0.3% decrease in revenues and a 1.4% increase in operating costs and expenses. As a result, the operating margin decreased by 1.0%, to 34.0% in 2003 from 35.0% in 2002. The decrease in operating margin reflects a small decrease in margin for local service (from 30.9% to 30.6%) and a larger decrease in the margin for long distance service (from 31.9% to 28.1%),

primarily because of lower real rates for both local and long distance services.

Table of Contents

In Mexico, we operate in two primary segments, local and long distance, and several smaller segments that we group together for reporting purposes. These other segments include connectivity, Internet, public and rural telephones, directories and other services. We group all of our Latin American operations other than those in Mexico into an additional segment. See Note 18 to our consolidated financial statements. Local service in Mexico represents more than half of our operating income and accounts for a majority of our operating cash flow and of our capital expenditure requirements. In 2004, operating margin was 30.4% in our local segment, 27.0% in our long-distance segment and 44.1% in our other segments in Mexico and 2.2% in Latin America.

Comprehensive Financing Cost

Under Mexican GAAP, comprehensive financing cost reflects interest income, interest expense, foreign exchange gain or loss and the gain or loss attributable to the effects of inflation on monetary liabilities and assets. A substantial proportion of our indebtedness (90.3% at December 31, 2004) is denominated in foreign currencies, so when there is depreciation of the peso it results in foreign exchange loss and higher interest expense. Most of our financial assets are denominated in foreign currencies.

In 2004, comprehensive financing cost was P.521 million (88.3% lower than in 2003), as compared with P.4,472 million in 2003 (36.5% lower than in 2002). The changes in each component were as follows:

Interest income decreased by 5.2% in 2004 and increased by 128.9% in 2003. Interest income included gains on marketable securities of approximately P.202 million in 2004 and P.2,273 million in 2003. Excluding these gains in both years, interest income would have increased 214.7% in 2004, due principally to inclusion of P.673 million of interest income of Embratel and P.231 million in dividends on its shares of MCI. The increase in 2003 was mainly due to the recognition of P.2,273 million of unrealized gain on marketable securities (P.1,937 million of it attributable to MCI securities). Excluding this amount, interest income decreased by 36.6% in 2003, reflecting lower average treasury balances after the investment in MCI and lower interest rates in Mexico and abroad.

Interest expense increased by 5.3% in 2004 and decreased by 8.3% in 2003. The increase in 2004 was primarily due to the inclusion of P.1,169 million in interest expense of Embratel and the P.327 million premium paid for repurchases of our convertible senior debentures. In 2003, we recognized P.1,012 million related to the cancellation of our peso-denominated interest-rate swaps. Excluding the interest expense related to the cancellation of these swaps, interest expense would have increased by 26.4% in 2004. In 2002, we recognized P.1,182 million of unrealized loss on marketable securities (P.672 million of it attributable to MCI securities). Excluding this amount, interest expense increased by 11.5% in 2003, reflecting a charge of P.481 million on swap contracts and an additional charge of P.1,012 million related to the cancellation of peso-denominated interest-rate swaps by other swaps at more attractive rates.

In 2004, we recorded a net exchange gain of P.26 million. In 2004, the peso depreciated against the U.S. dollar at year-end by approximately 0.3%, but our loss in Mexico was more than offset by a gain at our non-Mexican subsidiaries, particularly Embratel. In 2003, the depreciation of the peso against the U.S. dollar by 9.0% resulted in a net exchange loss of P.3,296 million, compared to a net exchange loss of P.4,861 million in 2002.

Because average monetary liabilities exceeded average monetary assets, we recognized a net gain from monetary position. The net gain in monetary position increased by 64.0% in 2004 due to a higher net monetary position and a higher inflation rate compared to 2003. The net gain in monetary position decreased by 43.1% in 2003 due to a lower net monetary position and a lower inflation rate compared to 2002.

Table of Contents

Income Tax and Employee Profit Sharing

The statutory rate of the Mexican corporate income tax was 33.0% in 2004, 34.0% in 2003 and 35.0% in 2002. The Mexican Income Tax Law was amended in 2004 to decrease the corporate income tax rate to 30% in 2005, 29% in 2006 and 28% thereafter. Our effective rate of corporate income tax as a percentage of pre-tax profit was 28.7% in 2004, 28.9% in 2003 and 31.2% in 2002. The effective tax rate was slightly lower in 2004 than in 2003 due to the effect of the reduction in the Mexican corporate income tax rate, partly offset by a decrease in comprehensive financing cost and the contribution of taxes imposed on foreign subsidiaries. The effective tax rate was lower in 2003 than in 2002, due to unrealized gains in marketable securities recognized in 2003.

Like other Mexican companies, we are required by law to pay to our employees, in addition to their agreed compensation and benefits, profit sharing in an aggregate amount equal to 10% of our taxable income (calculated without reference to inflation adjustments). The employee profit sharing amount increased by 3.8% in 2004 and decreased by 17.2% in 2003. The increase in 2004 was due to higher income before income tax. The decrease in 2003 was due principally to the increase in tax-deductible contributions we made to our pension plan.

Net Income

Net income increased by 17.9% in 2004 and by 10.3% in 2003. In 2004, the increase was due to a 4.5% increase in operating income and the stability of the peso against the U.S. dollar. In 2003, the increase was principally due to a 36.5% decrease in comprehensive financing cost and a 7.4% decrease in the provision for income tax and employee profit sharing.

Results of Operations by Segment

We discuss below our operating results by segment. All amounts discussed below are presented in accordance with Mexican GAAP. Note 1(a) of our financial statements included in this annual report describes how we translate the financial statements of our non-Mexican subsidiaries. For the Latin America segment, we restate the financial statements of foreign subsidiaries for inflationary effects using restatement factors of the relevant country and then convert foreign currency amounts into Mexican pesos, using, for items from our income statement, the exchange rate between the Mexican peso and the local currency at the end of the applicable year. Accordingly, changes in local inflation rates and in exchange rates could significantly affect reported results in Mexican pesos and the comparability of reported results with those of prior years.

Mexico Local Service

Operating revenues from local service in Mexico represented 64.5% of our consolidated revenues in 2004. Operating revenues decreased by 0.4% in 2004 due to lower real rates resulting from inflation and increased by 0.9% in 2003 due to increased revenues from interconnection, partly offset by lower real rates resulting from inflation.

Operating income for local service represented 62.3% of our consolidated operating income in 2004. Operating income decreased by 1.2% in 2004 and increased by 0.1% in 2003. Our operating margin was 30.4% in 2004 and 30.6% in 2003.

Table of Contents

Mexico Long Distance Service

Operating revenues from long distance service in Mexico represented 17.5% of our consolidated revenues in 2004. Operating revenues decreased by 5.7% in 2004 and by 3.6% in 2003 due to lower real rates and customer discounts.

Operating income for long distance service represented 15.0% of our consolidated operating income in 2004. Operating income decreased by 9.3% in 2004 and by 15.1% in 2003. Our operating margin was 27.0% in 2004 and 28.1% in 2003. The decrease in operating margin in 2004 reflects lower rates partly offset by a decrease in illegal bypass.

Mexico Other Services

Operating revenues from other services in Mexico represented 15.6% of our consolidated revenues in 2004. Operating revenues increased by 11.1% in 2004 due mainly to increased revenues from corporate networks and Internet services. Operating revenues from other services decreased by 1.0% in 2003 due to lower intersegment revenues.

Operating income for other services in Mexico represented 21.9% of our consolidated operating income in 2004. Operating income increased by 36.1% in 2004. In 2003, operating income for other services decreased by 3.4%. Our operating margin was 44.1% in 2004 and 36.0% in 2003. The increase in operating margin in 2004 reflects increased revenues from corporate networks and Internet services.

Latin America

Our Latin America segment includes all operations outside of Mexico. This segment is new in 2004 as a result of acquisitions. Operating revenues from Latin America represented 11.4% of our consolidated operating revenues in 2004, and this percentage will increase in 2005. In the first quarter of 2005, our Latin America segment represented 23.3% of consolidated operating revenues. Revenues from this segment are principally from long distance service.

Operating income from our Latin American operations was P.341 million in 2004, which represented 0.8% of our consolidated operating income. Our operating margin was 2.2%. We hope that our efforts to reduce costs for these businesses will lead to an increase in our operating margin in our Latin America segment in the future.

Liquidity and Capital Resources

Our principal capital requirements are for capital expenditures, dividend payments, our share repurchase program and acquisitions. In addition, in 2003 and 2002 we used cash to acquire debt securities of MCI. We have generally met our capital requirements primarily from operating cash flows and limited borrowing. Resources provided by operating activities were P.60,945 million in 2004, P.27,630 million in 2003 and P.38,958

Edgar Filing: TELEFONOS DE MEXICO S A DE C V - Form 20-F

million in 2002. Our resources provided by operating activities increased due to the decreased application of resources to exchange securities, accounts payable, accrued liabilities, taxes payable and pension fund contributions.

Our capital expenditures were P.20,375 million in 2004, P.10,728 million in 2003 and P.12,227 million in 2002. The 89.9% increase in 2004 was due both to higher investment in Mexico and to the consolidation of Embratel, and we expect that our capital expenditures will be approximately U.S.\$2.0 billion for 2005. Budgeted capital expenditures for 2005 exclude any other investments we may make to acquire other companies. For subsequent years, our capital expenditures will depend on economic and market conditions.

Table of Contents

The amount spent on share repurchases was P.13,893 million in 2004, P.12,078 million in 2003 and P.6,797 million in 2002. The amount spent on share repurchases is determined from time to time by the executive committee taking into account factors including the price of our shares and our capital resources. The shareholders have given renewed authorization to our officers to make share repurchases, most recently on April 28, 2005. There is no obligation to spend any of the authorized amounts. See *Item 16E. Purchases of Equity Securities by the Issuer and Affiliated Purchasers*.

Dividends paid totaled P.8,144 million in 2004, P.8,018 million in 2003 and P.7,887 million in 2002. The shareholders have approved dividends of P.0.38 per share (post-split) to be paid in four installments out of 2004 income. We expect to pay an aggregate of approximately P.8.8 billion in dividends from June 2005 through March 2006 (based on the number of outstanding shares at May 23, 2005).

We had a working capital surplus (an excess of current assets over current liabilities) of P.11,604 million at December 31, 2004. Our current assets at December 31, 2004 included the shares of MCI that we sold to Verizon in May 2005. See *Item 4. Information on the Company Other Matters Investments MCI, Inc.*

In the table below we set forth certain contractual obligations as of December 31, 2004, consisting of debt (including financial leases) and purchase obligations, and the period in which the contractual obligations come due. We do not expect to contribute to our pension funds in 2005 and the extent of future contributions will depend on the performance of our plan assets and actuarial calculations in future years. The table below does not include pension liabilities, deferred taxes or current accounts payable.

	Payments Due by Period				
	(as of December 31, 2004)				
	Total	2005	2006-2007	2008-2009	2010 and beyond
(in millions of pesos)					
Contractual obligations:					
Total debt	P. 90,041	P. 13,194	P. 45,731	P. 27,882	P. 3,234
Purchase obligations	9,390	9,390			
Total	P. 99,431	P. 22,584	P. 45,731	P. 27,882	P. 3,234

At December 31, 2004, we had total indebtedness of P.90,041 million compared to total indebtedness of P.72,243 million at December 31, 2003. The increase is attributable primarily to the consolidation of Embratel, which had P.13,727 million of indebtedness at December 31, 2004, of which P.8,373 million was due within one year. The major categories of indebtedness at Telmex are as follows:

U.S. dollar-denominated bank loans. These include a large syndicated loan facility, loans with support from export credit agencies and other loans. Our bank facilities bear interest at specified spreads over LIBOR. The weighted average interest rate at December 31, 2004 was approximately 3.6%. We had U.S.\$3,809 million in bank loans, which was equivalent to P.42,905 million, outstanding at December 31, 2004, which includes P.5,520 million in bank loans of Embratel and a U.S.\$2,425 million facility Telmex obtained in July 2004. The loan has two tranches. One tranche bears interest at LIBOR plus 0.45% and matures in 2007, and the other tranche bears interest at LIBOR plus 0.525% and matures in 2009. Certain of our bank loans contain financial and operating covenants. The

Edgar Filing: TELEFONOS DE MEXICO S A DE C V - Form 20-F

most restrictive covenants require us to maintain a consolidated ratio of EBITDA to interest expense of no less than 3.00 to 1.00 and a consolidated ratio of total debt to EBITDA of no more than 3.75 to 1.00 (using terms defined in the credit agreements). Compliance with these covenants has not been a significant constraint on our ability to obtain financing.

Table of Contents

U.S. dollar-denominated senior notes. At Telmex, we had U.S.\$2,500 million aggregate principal amount of senior notes outstanding, which was equivalent to P.28,162 million at December 31, 2004, and we issued a further U.S.\$1.75 billion aggregate principal amount of senior notes in January and February 2005. As a result, Telmex has four series of senior notes outstanding:

<u>Maturity</u>	<u>Issuance</u>	<u>Interest</u>	<u>Original Amount (U.S.\$ millions)</u>
January 2006	January/May 2001	8.25%	1,500
November 2008	November 2003	4.50%	1,000
January 2010	January/February 2005	4.75%	950
January 2015	January/February 2005	5.50%	800

We have repurchased in the open market part of the 8.25% notes due in January 2006, and the outstanding balance as of March 31, 2005 was U.S.\$1,199 million.

Peso-denominated senior notes (*certificados bursátiles*). We have issued senior notes from time to time in the Mexican market. Part of these notes bear interest at fixed rates and part bear interest at specified spreads over Mexican *Cetes* (short-term Mexican government obligations). At December 31, 2004, we had P.7,450 million outstanding maturing from 2005 to 2012, and the weighted average interest rate was 9.9%. On February 10, 2005, P.850 million of our peso-denominated notes matured, leaving P.6,600 million outstanding.

We also have smaller amounts of other categories of indebtedness outstanding at Telmex, including peso-denominated loans from Mexican banks, financial leases and supplier credits for equipment financing. We rely primarily on borrowings in the Mexican and international capital markets and from international banks, although if market conditions change, we may seek currency from export credit agencies or other sources. A number of our financing instruments are subject to either acceleration or repurchase at the holder's option if there is a change of control, as defined in the respective instruments. The definitions of change of control vary, but none of them is met so long as Carso Global Telecom or its present controlling shareholders continue to control a majority of our voting stock.

The major categories of indebtedness at Embratel are bank facilities denominated in U.S. dollars (P.5,520 million at December 31, 2004), commercial paper denominated in *reais* (P.4,244 million at December 31, 2004) and bonds denominated in U.S. dollars (P.3,098 million at December 31, 2004). In November 2004, Embratel issued R\$1.0 billion in commercial paper in Brazil equivalent to P.4,244 million that bears interest at a rate of 102.3% of the CDI rate (the interest rate applicable to inter-bank certificates in Brazil) and had a term of 180 days. In early December 2003, Embratel issued U.S.\$275 million of notes, which was equivalent to P.3,098 million at December 31, 2004. The notes mature in 2008 and bear interest at an interest rate of 11% per year. These notes are fully and unconditionally guaranteed by Embratel Holdings. Since acquiring control of Embratel, we have reduced its debt and prepaid the debt with the most restrictive terms. In the first half of 2005, Embratel completed a R\$1.8 billion capital increase in which we subscribed 87.5% of the shares sold, and it used part of the proceeds to prepay U.S.\$96.3 million of its notes due 2008 at a redemption price of U.S.\$106.8 million and to repay its R\$1.0 billion in commercial paper.

Table of Contents

Embratel has a substantial amount of tax-related contingencies. If a major part of the tax disputes were to be decided against Embratel, this could have a material effect on liquidity. See Note 12 to our consolidated financial statements.

At December 31, 2004, 84.1% of our total consolidated indebtedness was denominated in U.S. dollars, 9.7% was in Mexican pesos, 4.8% was in Brazilian *reals* and 1.4% was in other currencies. Our currency hedging practices are described below.

At December 31, 2004, 60.3% of our debt obligations bore interest at floating rates. The weighted average cost of all borrowed funds, including those of Embratel, at December 31, 2004 (including interest and reimbursement of certain lenders for Mexican taxes withheld, but excluding fees) was approximately 6.9%. The inclusion of fees in the calculation of weighted average cost of all borrowed funds at December 31, 2004 would increase such cost by 0.3%, to 7.2%.

Hedging

Currently, our hedging activities fall into three categories, as described below. Our hedging practices vary from time to time depending on our judgment about the level of risk and the costs of hedging.

Because our U.S. dollar-denominated indebtedness far exceeds our U.S. dollar-denominated assets and revenues, from time to time Telmex enters into hedging transactions to protect to some degree against the short-term risks of devaluation of the Mexican peso. Gains and losses on these transactions are recognized in income as incurred. Under Mexican GAAP, we account for these transactions on an accrual basis, and such amounts offset gains and losses on the foreign currency liabilities that are hedged. At December 31, 2004, our hedges covered liabilities of U.S.\$3,220 million out of our total U.S. dollar-denominated liability of U.S.\$6,721 million, but the amount of our hedging position varies substantially from time to time. In 2004, we recognized a net charge of P.499,679 in our results of operations, reflecting the effects of exchange rate variations under our hedging agreements. See Note 8 to our consolidated financial statements. This resulted from devaluation of the U.S. dollar against the peso and especially against the *real*. Our hedges are short-term, typically averaging about 60 days, and will not protect us against the long-term effects of a devaluation on our U.S. dollar-denominated indebtedness. We may stop hedging or modify our hedging practices at any time.

A substantial portion of our peso-denominated indebtedness (P.7,050 million at December 31, 2004) bears interest at floating rates. We have engaged in extensive hedging transactions to reduce our exposure to changes in Mexican interest rates. Specifically, we have entered into interest rate swaps in which we pay interest at a fixed rate and receive interest at a floating rate, on a notional amount in Mexican pesos or U.S. dollars. The general effect of these swaps is to replace an obligation to pay floating-rate interest on our debt with an obligation to pay fixed-rate interest. Because the peso-denominated swap market is not highly liquid, we do not ordinarily obtain interest rate swaps that precisely match the tenors or amounts of our floating-rate liabilities. The aggregate notional amount of our swaps may be greater or less than the principal amount of our floating-rate peso-denominated debt, and we may discontinue hedging at any time. At December 31, 2004, the aggregate notional amount of domestic interest rate swaps was P.12,390 million. At December 31, 2004, we had entered into interest rate swaps for a total of U.S.\$1,050 million for which we paid fixed rates and received six-month LIBOR rates and swaps for a total of U.S.\$1,050 million for which we paid six-month LIBOR rates and received fixed rates.

Because a substantial portion of the indebtedness of Embratel is denominated in foreign currencies, Embratel enters into hedging transactions to protect itself to some degree against the short-term risks of devaluation of the Brazilian *real*. At December 31, 2004, Embratel had swaps covering U.S.\$323.9 million of its indebtedness. Embratel recognized a charge of P.767,817, reflecting the effects of exchange rate variations under its hedging agreements.

Table of Contents

Off-Balance Sheet Arrangements

We do not have any off-balance sheet arrangements of the type that we are required to disclose under Item 5.E of Form 20-F.

U.S. GAAP Reconciliation

Net income under U.S. GAAP was P.28,235 million in 2004, P.22,833 million in 2003 and P.19,425 million in 2002. Compared to Mexican GAAP, net income under U.S. GAAP was 1.4% higher in 2004, 3.3% lower in 2003 and 9.2% lower in 2002.

There are certain differences between Mexican GAAP and U.S. GAAP that affect our net income and stockholders' equity. The most significant in its effect on net income is the difference in how the carrying value of plant, property and equipment is restated to reflect effects of inflation. Under Mexican GAAP, we restate fixed assets of non-Mexican origin based on the rate of inflation in the country of origin and the prevailing exchange rate at the balance sheet date, while under U.S. GAAP we use the Mexican inflation rate.

Other differences that affected net income relate to accounting for costs of pension and seniority premium plans, capitalization of interest on assets under construction, accounting for swaps and other derivatives, deferred profit-sharing and our stock option plan. The differences in stockholders' equity under Mexican GAAP and U.S. GAAP reflect these same matters. For a discussion of the principal differences between Mexican GAAP and U.S. GAAP, see Note 19 to our consolidated financial statements.

Use of Estimates in Certain Accounting Policies

In preparing our financial statements, we make estimates concerning a variety of matters. Some of these matters are highly uncertain, and our estimates involve judgments we make based on the information available to us. In the discussion below, we have identified several of these matters for which our financial presentation would be materially affected if either (a) we used different estimates that we could reasonably have used or (b) in the future we change our estimates in response to changes that are reasonably likely to occur.

The discussion addresses only those estimates that we consider most important based on the degree of uncertainty and the likelihood of a material impact if we used a different estimate. There are many other areas in which we use estimates about uncertain matters, but the reasonably likely effect of changed or different estimates is not material to our financial presentation.

Estimated Useful Lives of Plant, Property and Equipment

We estimate the useful lives of particular classes of plant, property and equipment in order to determine the amount of depreciation expense to be recorded in each period. Depreciation expense is a significant element of our costs, amounting in 2004 to P.22,602 million, or 23.8% of our operating costs and expenses, under Mexican GAAP, and P.25,410 million, or 25.2% of our operating costs and expenses, under U.S. GAAP.

Edgar Filing: TELEFONOS DE MEXICO S A DE C V - Form 20-F

See Notes 4 and 19 to our consolidated financial statements.

The estimates are based on historical experience with similar assets, anticipated technological changes and other factors, taking into account the practices of other telecommunications companies. We

Table of Contents

review estimated useful lives each year to determine whether they should be changed, and at times we have changed them for particular classes of assets. We may shorten the estimated useful life of an asset class in response to technological changes, changes in the market or other developments. This results in increased depreciation expense, and in some cases it can result in our recognizing an impairment charge to reflect a write-down in value. For example, in 2003, we reduced the useful lives of certain assets to reflect technological changes, which resulted in a P.887 million increase in depreciation expense. The same kinds of developments can also lead us to lengthen the useful life of an asset class, resulting in reduced depreciation expense. For example, in both 1999 and 2000, we lengthened the useful lives of certain categories of fixed assets.

Employee Pensions and Seniority Premiums

We recognize liabilities on our balance sheet and expenses in our income statement to reflect our obligations to pay employees under defined benefit retirement and seniority premium plans. The amounts we recognize are determined on an actuarial basis that involves many estimates. In 2004, we recognized net period cost relating to these obligations of P.4,390 million under Mexican GAAP and P.3,620 million under U.S. GAAP.

We use estimates in three specific areas that have a significant effect on these amounts: (a) the real discount rates that we use to calculate the present value of our future obligations, (b) the real rate of increase in salaries that we assume we will observe in future years and (c) the rate of return we assume our pension fund will achieve on its investments. The assumptions we have applied are identified in Note 7 (Mexican GAAP) and Note 19 (U.S. GAAP) to our consolidated financial statements. These estimates are based on our historical experience, on current conditions in the financial markets and on our judgments about the future development of our salary costs and the financial markets. We review the estimates each year, and if we change them, our reported expense for pension costs may increase or decrease.

Our liability for future pensions and seniority premiums is also affected by our estimate of the number of retired employees and our pension fund is affected by the estimated rate of return on investments. Actual results may vary from these estimates. In 2004, an actuarial loss of P.7,704 million was attributable to the increase in the projected benefit obligation due primarily to: (i) a greater number of employees retiring than had been estimated at the beginning of the year, (ii) modification of the estimated retirement age based on our experience with retiring personnel and (iii) updating of the mortality rates. In addition, the return on investments of our pension fund amounted to a gain of P.9,394 million in 2004, due to the gains by plan assets on the Mexican Stock Exchange and the increase in fixed-yield interest rates. As of December 31, 2004, 55.6% of fund assets consisted of peso-denominated fixed-income securities and 44.4% consisted of variable-income securities of Mexican companies. The fund has experienced volatile returns on its investments in equity securities, which resulted in net losses on plan assets in prior years. Our actuarial assumptions as of December 31, 2004 include an assumed annual return of 6.8% in real terms on plan assets.

Allowance for Doubtful Accounts

We maintain an allowance for doubtful accounts based on our estimates of losses we may experience because our customers or other telecommunications carriers do not pay the amounts they owe us. At December 31, 2004, the amount of the allowance was P.11,398 million. For our customers, we perform a statistical analysis based on our past experience, current delinquencies and economic trends. For carriers, we make individual estimates that may reflect our evaluation of pending disputes over amounts owed. Our allowance could prove insufficient if our statistical analysis of our customer receivables is inadequate, or if one or more carriers refuse or are unable to pay us. See Note 3 to our consolidated financial statements.

Table of Contents

Revenues from Prepaid Telephone Cards

We recognize revenues from the sale of our prepaid telephone service cards based on our estimate of the usage of time covered by the prepaid card. We estimate the period for usage of prepaid telephone cards in accordance with available statistics that reflect the total usage of cards and the total amounts sold. The cards do not have an expiration date.

The prepaid telephone card contains a data chip that tracks the number of units of service the card can provide. Each time the card is used, the telephone equipment records the number of units used and reduces the number of available units on the chip. When the number of available units in the chip is reduced to zero, it ceases to function. We track the aggregate number of units sold and the aggregate number of units used, but we do not track the number of units used on a card-by-card basis.

Impairment of Long-Lived Assets

In addition, we review our property, plant and equipment for impairment whenever events or circumstances indicate that the carrying amount may not be recoverable. To estimate the fair value of long-lived assets, we typically make various assumptions about the future prospects for the business that the asset relates to, consider market factors specific to that business and estimate future cash flows to be generated by that business. Based on these assumptions and estimates, we determine whether we need to take an impairment charge to reduce the value of the asset stated on our balance sheet to reflect its estimated fair value. Assumptions and estimates about future values and remaining useful lives are complex and often subjective. They can be affected by a variety of factors, including external factors such as industry and economic trends, and internal factors such as changes in our business strategy and our internal forecasts. Different assumptions and estimates could materially impact our reported financial results. More conservative assumptions of the anticipated future benefits from these businesses could result in impairment charges, which would decrease net income and result in lower asset values on our balance sheet. Conversely, less conservative assumptions could result in smaller or no impairment charges, higher net income and higher asset values.

Realization of Net Deferred Tax Assets

The recognition of net deferred tax assets on temporary differences in our non-Mexican subsidiaries, mainly due to Brazilian tax losses and to the negative basis for calculating social contribution in Brazil, is supported by the history of taxable income and Embratel's estimate of future profitability. Bulletin D-4 establishes the conditions for recording and maintenance of these deferred assets. Based on Embratel's financial projections, we believe that these assets will be realized over a period of ten years. A future change in these projections of profitability could result in the need to record a valuation allowance against these net deferred tax assets, resulting in a negative impact on future results.

Table of Contents

Provision for Contingencies

We are subject to proceedings, lawsuits and other claims related to tax, labor and civil matters. We are required to assess the likelihood of any adverse judgments or outcomes to these matters as well as potential ranges of probable losses. A determination of the amount of reserves required, if any, for these contingencies is made after careful analysis of each individual matter, based on advice of our legal counsel. We record provisions for contingencies only when we believe that it is probable that we will incur a loss in connection with the matter in dispute. In a number of significant tax disputes with the Brazilian tax authorities, we have recorded no provisions because we do not believe a loss is probable. The total balance of probable losses is recorded as a current liability, because it is not possible to estimate the time required to reach a settlement. The required reserves for these and other contingencies may change in the future due to new developments in each matter or changes in approach, such as a change in settlement strategy in dealing with these matters. Such changes could have a negative impact on future results and cash flows.

Item 6. Directors and Officers of Registrant

Directors

Management of our business is vested in the Board of Directors. Our bylaws provide for the Board of Directors to consist of at least five directors and up to an equal number of alternate directors. A majority of the directors and a majority of the alternate directors must be Mexican nationals and elected by Mexican shareholders. Directors are elected by a majority of the holders of the AA Shares and A Shares voting together, provided that any holder or group of holders of at least 10% of the total AA Shares and A Shares is entitled to name one of such directors and one of such alternate directors, and two directors and two alternate directors are elected by a majority vote of the holders of L Shares. Each alternate director may attend meetings of the Board of Directors and vote in the absence of a corresponding director. Directors and alternate directors are elected at each annual ordinary general meeting of shareholders and each annual ordinary special meeting of holders of L Shares, and each serves until a successor is elected and takes office. Pursuant to our bylaws and Mexican law, at least 25% of our directors and 25% of our alternate directors must be independent, as defined under the Mexican Securities Market Law (*Ley del Mercado de Valores*). In order to have a quorum for a meeting of the Board of Directors, a majority of those present must be Mexican nationals.

Carso Global Telecom and SBC International have agreed to vote for the number of directors and alternate directors named by Carso Global Telecom and SBC International, respectively, considering their respective share ownership.

Table of Contents

Our bylaws provide that the members of the Board of Directors are appointed for terms of one year and may be reelected. Pursuant to Mexican law, members of the Board of Directors continue in their positions after the expiration of their terms if new members are not appointed or if newly appointed members do not assume their positions. The names and positions of the current members of our Board of Directors, as of April 28, 2005, their dates of birth and information on their principal business activities outside Telmex are as follows:

Carlos Slim Helú Honorary chairman for life	Born: First elected: Principal occupation:	1940 1990 Honorary chairman for life of the board of directors of Grupo Carso, Carso Global Telecom and América Telecom
	Other directorships and business experience:	Honorary chairman for life of the board of directors of América Móvil and Grupo Financiero Inbursa and member of the board of directors of SBC Communications, Inc.
Carlos Slim Domit Chairman; chairman of the executive committee	Born: First elected: Term expires:	1967 1995 2006
	Principal occupation and other directorships:	Chairman of the board of directors of Grupo Carso and Grupo Sanborns, S.A. de C.V. and member of the board of directors of Carso Global Telecom and América Telecom
	Business experience:	President of Sanborns Hermanos
Jaime Chico Pardo Vice Chairman; member of the executive committee	Born: First elected: Term expires:	1950 1990 2006
	Principal occupation:	Vice Chairman and Chief Executive Officer of Telmex
	Other principal directorships:	Chairman of the board of directors of Carso Global Telecom, Vice Chairman of the board of directors of América Telecom and member of the board of directors of América Móvil and Honeywell International
	Business experience:	Chief Executive Officer of Grupo Condumex, S.A. and Chairman of Corporación Industrial Llantera (Euzkadi General Tire de México)
Emilio Azcárraga Jean Director	Born: First elected: Term expires:	1968 2000 2006
	Principal occupation:	Chairman and President of Grupo Televisa, S.A. de C.V.
	Other directorships:	Member of Consejo Mexicano de Hombres de Negocios
Antonio Cosío Ariño Director; alternate member of the executive committee	Born: First elected: Term expires:	1935 1990 2006

Table of Contents

	Principal occupation:	Chief Executive Officer of Cía. Industrial de Tepeji del Rfo, S.A. de C.V.
	Other directorships:	Chairman of the board of directors of Agrocultivos Todos Santos, S.A. de C.V., Bodegas de Santos Tomás, S.A. de C.V., Cía Inmobiliaría Cabo San Lucas, S.A. de C.V. and Grupo Hotelero Brisas, S.A. de C.V.
Laura Diez Barroso de Laviada Director	Born:	1951
	First elected:	2005
	Term expires:	2006
	Principal occupation:	Chief Executive Officer of Area Editores, S.A. de C.V.
	Other directorships:	Member of the board of directors of Grupo Financiero Inbursa and Royal Caribbean Cruises
Amparo Espinosa Rugarcía Director	Born:	1941
	First elected:	1990
	Term expires:	2006
	Principal occupation:	Chief Executive Officer of Documentación y Estudios de Mujeres, A.C.
Élmer Franco Macías Director	Born:	1940
	First elected:	1990
	Term expires:	2006
	Principal occupation:	Chief Executive Officer and member of the board of directors of Grupo Infra, S.A. de C.V.
	Other directorships:	Member of the board of directors of Banco Nacional de México, S.A., Grupo Financiero Inbursa and Grupo Condumex
	Business experience:	Various positions at Grupo Infra since 1958
Ángel Losada Moreno Director	Born:	1955
	First elected:	1990
	Term expires:	2006
	Principal occupation:	Chief Executive Officer of Grupo Gigante, S.A. de C.V.
	Other directorships:	Vice Chairman of the board of directors of Grupo Gigante and member of the board of directors of Grupo Financiero Banamex Accival

Richard P. Resnick Director	Born: First elected: Term expires: Principal occupation:	1966 2004 2006 President of SBC International Management Services, Inc.
Robert L. Henrichs Director	Born: First elected: Term expires: Principal occupation:	1959 2004 2006 Chief Financial Officer of SBC International Management Services, Inc.
Rafael Kalach Mizrahi Director	Born: First elected: Term expires: Principal occupation: Other directorships:	1946 2000 2006 Chief Executive Officer of Grupo Kaltex, S.A. de C.V. Member of the board of directors of Grupo Carso, Sears Roebuck, S.A. de C.V. and Grupo Sanborns, S.A. de C.V.
Ricardo Martín Bringas Director	Born: First elected: Term expires: Principal occupation: Other directorships:	1960 2000 2006 Chief Executive Officer of Organización Soriana, S.A. de C.V. Member of the board of directors of Banco HSBC, S.A., Grupo Financiero Banamex Accival, Banco Banorte, S.A. and ING de México and member of Consejo Mexicano de Hombres de Negocios

The alternate directors, as of April 28, 2005, are as follows:

	<u>First Elected Director or Alternate Director</u>
Patrick Slim Domit	1999
Arturo Elías Ayub	2000
José Humberto Gutiérrez-Olvera Zubizarreta	1996
Jorge C. Esteve Recolons	2004
Antonio Cosío Pando	2002
Eduardo Tricio Haro	2005
Ángeles Espinosa Yglesias	1993
Agustín Franco Macías	1990
Jaime Alverde Goya	1993
Antonio del Valle Ruíz	1990
José Kuri Harfush	1995
Fernando Solana Morales	2002
Eduardo Valdés Acra	2000
Carlos Bernal Vereá	1990
Federico Laffan Fano	1990
Jorge A. Chapa Salazar	2002
Bernardo Quintana Isaac	1990
Francisco Medina Chávez	2002

Table of Contents

The Secretary of the Board of Directors is Sergio F. Medina Noriega.

Of our directors and alternate directors, Élmer Franco Macías and Agustín Franco Macías are brothers; Antonio Cosío Pando is the son of Antonio Cosío Ariño; Carlos Slim Domit, Marco Antonio Slim Domit and Patrick Slim Domit are sons of Carlos Slim Helú; Arturo Elías Ayub is the son-in-law of Carlos Slim Helú; and Amparo Espinosa Rugarcía and Ángeles Espinosa Yglesias are sisters.

Executive Committee

Our bylaws provide that the executive committee may generally exercise the powers of the Board of Directors. The Board of Directors is also required to consult the executive committee before deciding on certain matters set forth in the bylaws, and the executive committee must provide its views within 10 calendar days following a request from the Board of Directors.

The executive committee is elected from among the directors and alternate directors by a majority vote of the AA Shares, A Shares and A Share ADSs voting together. Under the agreement entered into in December 2000 between Carso Global Telecom and SBC International, the executive committee consists of four members. The majority of its members must be of Mexican nationality and elected by Mexican shareholders. Carso Global Telecom and SBC International have agreed to vote for three members named by Carso Global Telecom and one member named by SBC International. The current members of the executive committee are Jaime Chico Pardo, Juan Antonio Pérez Simón and Carlos Slim Domit, all named by Carso Global Telecom and various other Mexican investors, and Richard P. Resnick, named by SBC International. The current alternate members of the executive committee are Antonio Cosío Ariño, José Humberto Gutiérrez-Olvera Zubizarreta and Marco Antonio Slim Domit, all named by Carso Global Telecom and various other Mexican investors, and Robert L. Henrichs, named by SBC International.

Mexican Code of Best Corporate Practices

In January 2001, a Mexican commission of business leaders, with the support of the Mexican Banking and Securities Commission (*Comisión Nacional Bancaria y de Valores*, or the CNBV), issued a Code of Best Corporate Practices (*Código de Mejores Prácticas Corporativas*) for publicly traded Mexican companies, recommending certain actions with respect to various areas of corporate governance. Following these recommendations, in February 2001, the Board of Directors created an audit committee and an evaluation and compensation committee. The Mexican Securities Market Law was amended effective June 2001 to require that all publicly traded Mexican companies have an audit committee. In March 2003, the CNBV codified certain provisions of the Code of Best Corporate Practices, requiring among other things, increased responsibilities for audit committees. While compliance with the Code of Best Corporate Practices is voluntary, the CNBV requires companies listed on the Mexican Stock Exchange to file a report, on a yearly basis, regarding their compliance with the Code of Best Corporate Practices. Our report on compliance with the Code of Best Corporate Practices is on file with the CNBV and the Mexican Stock Exchange. The Mexican Congress is considering significant changes to the Mexican Securities Market Law with a focus on increasing its adherence to international standards, including increased protections for minority shareholders.

Table of Contents**Audit Committee**

The audit committee consists of Antonio del Valle Ruíz (the audit committee's chairman), Rafael Kalach Mizrahi and José Kuri Harfush. Mr. Kalach Mizrahi is a director and Messrs. del Valle Ruíz and Kuri Harfush are alternate directors. Each member of the audit committee is independent, as independence is defined under the Mexican Securities Market Law, and also meets the independence requirements of Rule 10A-3 under the U.S. Securities Exchange Act of 1934, as amended, or Rule 10A-3. See *Item 16A. Audit Committee Financial Expert*. The audit committee operates primarily under a written mandate adopted by our Board of Directors. A copy of the audit committee mandate is available on our web site at www.telmex.com.

The mandate of the audit committee is to establish and monitor procedures and controls to ensure that the financial information we distribute is useful, appropriate and reliable and accurately reflects our financial position. In particular, the audit committee is required to perform the following functions: (a) appoint and oversee our external auditors and review the scope and terms of their engagement; (b) assist the Board of Directors in supervising the performance of auditing services contracts, evaluating the services and assuring the independence and objectivity of our external auditors, including ensuring that the total compensation paid to an auditing firm does not exceed 20% of its total income; (c) recommend guidelines for the preparation and distribution of our financial information and general guidelines for our internal control system (which consists of operational and financial controls that ensure that Telmex operates within the Board of Directors' general guidelines); (d) discuss with the Board of Directors our internal control system relating to risk management and compliance with applicable laws, particularly concerning (i) disclosure of relevant information to the market, (ii) acquisition accounting, (iii) anticipated revenue recognition, (iv) restructuring charges, (v) management of reserve accounts and (vi) accounting for derivatives and arbitrage activity; (e) ensure the existence of control mechanisms to provide that consistent unaudited financial information is presented to the Board of Directors; (f) review with our auditors the annual financial statements contained in our annual report and the quality of the accounting principles applied therein and review interim financial information to ensure that it is prepared using the same principles; (g) review the audit committee rules and, if appropriate, propose to the Board of Directors improvements designed to achieve the audit committee's mandate; (h) report to the Board of Directors on its activities; (i) conduct an annual self-evaluation of the committee's activities aimed at achieving the committee's objectives; (j) supervise, review and discuss the audit procedures of our internal audit department; (k) perform any other functions that correspond to its responsibilities and that the audit committee or Board of Directors considers proper to achieve the audit committee's mandate, as well as any other functions expressly conferred by the Board of Directors; (l) approve non-audit services provided by our external auditors and ensure that the provision of these services does not impair the independence of the external auditors; (m) resolve any disagreements between the external auditors and the chief executive officer and senior executive officers; (n) receive from the external auditors a report that includes an analysis of: (i) all critical accounting policies utilized by the company; (ii) all policies and accounting principles that differ from those utilized by the company and that have been discussed with the chief executive officer and senior executive officers, including the implications of using such policies and practices; and (iii) any other written communications regarding significant matters between the external auditors and the chief executive officer and senior executive officers, including the annual letter to the chief executive officer and senior executive officers, in which the external auditors summarize their recommendations regarding our internal controls and the non-adjusted differences in inventory identified during the audit process; (o) establish procedures for the receipt, retention and treatment of complaints regarding accounting, internal control or auditing matters, including procedures for the confidential and anonymous submission by our employees or those of our subsidiaries; (p) in its sole discretion, select, engage and approve the compensation of counsel, experts and other advisers to provide services that the audit committee deems necessary to carry out its duties, for which the company must provide appropriate funding; (q) reserve time during its meetings, in its discretion, to discuss and deliberate without the chief executive officer and senior executive officers; (r) establish a schedule to

Table of Contents

meet separately with the internal auditors and the external auditors without the presence of the chief executive officer and/or the senior executive officers; and (s) review and analyze with the management and external auditors the annual report of the company and the quarterly financial results to be presented to the SEC, and in particular, those parts of the annual report in which the financial information and critical accounting policies of the company are discussed. In addition, pursuant to our bylaws and Mexican law, (i) the audit committee is required to submit an annual report to the Board of Directors and (ii) the audit committee must provide an opinion regarding any transaction with a related party that is outside the ordinary course of our business, which must be approved by the Board of Directors.

The audit committee has reviewed this Annual Report, as well as our consolidated financial statements and notes thereto included elsewhere in this Annual Report, and recommended that such financial statements be included herein.

The Audit Committee Report

A translation of the audit committee's annual report submitted to the Board of Directors on March 9, 2005 is provided below.

Audit Committee Report

To the Board of Directors of

Teléfonos de México, S.A. de C.V.

The Company's management has the basic responsibility of issuing financial statements based on generally accepted accounting principles in Mexico, preparing financial information in a timely manner, and implementing internal control systems. The Audit Committee, on behalf of the Board of Directors of the Company, has reviewed the consolidated audited financial statements of Teléfonos de México, S.A. de C.V. and its subsidiaries as of December 31, 2004. This review included analysis and approval of policies, procedures and accounting practices of the Company and its subsidiaries. The accounting policies for the preparation of the Company's financial information, proposed and recommended by this Committee to the Board of Directors, has the approval of the Board of Directors.

The Committee evaluated the performance of the external auditors, who are responsible for expressing an opinion about the reasonableness of the financial statements of the Company and the conformity of such financial statements to generally accepted accounting principles in Mexico. The Committee has concluded that the partners of the external audit firm meet the professional standards and have the performance, intellectual and economic independence required to perform this duty.

The Committee has ensured that interim public financial information, such as the quarterly financial information presented to the Mexican Stock Exchange (Bolsa Mexicana de Valores, S.A.) and the National Banking and Securities Commission (Comisión Nacional Bancaria y de Valores), is prepared in accordance with the same principles, procedures, criteria and accounting practices used in the preparation of the annual information.

Edgar Filing: TELEFONOS DE MEXICO S A DE C V - Form 20-F

Based on the revisions and opinions mentioned above, the Committee recommends to the Board of Directors, that the audited consolidated financial statements of Teléfonos de México, S.A. de C.V. and its subsidiaries as of December 31, 2004, be included in the 2004 annual report, which the Company submits to the Shareholders Meeting for approval.

Table of Contents

Additionally, the Company has an Internal Auditing Area. The internal control system has been reviewed and evaluated by the Audit Committee and in the Committee's opinion, meets the required level of effectiveness so that the Company operates in a general control environment. The External Auditors studied, evaluated and validated the effectiveness of the internal control system in connection with their audit of the financial statements and issued a report with suggestions about such controls. The internal control system complies with the general guidelines approved by the Board of Directors by recommendation of this Committee.

Finally, the Committee reports that it verified that there are controls in the Company that allow a determination about whether the Company complies with applicable legal and administrative dispositions and reviewed the respective reports regarding litigation and proceedings that in each case could represent a risk. As a result, the Committee did not detect any significant risk that could result from the current legal situation of the Company.

Antonio del Valle Ruíz
President

Mexico City

Evaluation and Compensation Committee

The evaluation and compensation committee consists of Juan Antonio Pérez Simón (the evaluation and compensation committee's chairman), Antonio Cosío Ariño and Amparo Espinosa Rugarcía. The mandate of the evaluation and compensation committee is to assist the Board of Directors in evaluating and compensating our senior executives. In particular, it is required to (a) recommend to the Board of Directors procedures for the selection and succession of our chief executive officer and our principal executives; (b) propose criteria for evaluating executive performance; (c) analyze the proposals of the chief executive officer concerning the structure and amount of compensation for our senior executives, and to raise them with the Board of Directors; (d) review new executive compensation programs and the operations of existing programs; (e) establish contracting practices to avoid excessive payments to executives; (f) assist the Board of Directors in developing appropriate personnel policies; (g) participate with the Board of Directors in developing a plan for employees to invest in our Series L Shares, and to review the implementation of such plan; (h) report to the Board of Directors on its activities; and (i) perform any other functions the Board of Directors may delegate to the evaluation and compensation committee. Each member of the evaluation and compensation committee is independent, as independence is defined under the Mexican Securities Market Law.

The Evaluation and Compensation Committee Report

A translation of the evaluation and compensation committee's annual report submitted to the Board of Directors on February 9, 2005 is provided below.

Evaluation and Compensation Committee Report

To the Board of Directors of

Teléfonos de México, S.A. de C.V.

Based on the dispositions of the Best Corporate Practices Code, the Evaluation and Compensation Committee of Teléfonos de México, S.A. de C.V., presents a report to the Board of Directors regarding the relevant activities carried out by this Committee that, if the Board approves, is to be included in the annual report that is submitted for the consideration at the Shareholders Meeting where the results and activities of the Company at December 31, 2004 will be made known.

The Committee, in the exercise of the mandated functions and during the several sessions it has held, carried out the relevant activities that are mentioned below.

- a) The hiring conditions of executives were reviewed and it was determined that they comply with the guidelines established by the Board of Directors and the Committee verified that special payments between the Company and executives in the event of their departure from the Company do not exist.

- b) The structure and policies used to determine compensation packages for executives and board members of the Company were reviewed.

Finance and Planning Committee

The finance and planning committee consists of Fernando Solana Morales (the finance and planning committee's chairman), Ángeles Espinosa Yglesias, Jaime Alverde Goya and Ricardo Martín Bringas. The mandate of the finance and planning committee is to assist the Board of Directors in evaluating our investment, financial and planning policies. In particular, it is required to (a) review investment policies proposed by senior management; (b) evaluate the financing policies proposed by senior management and submit them for approval by the Board of Directors; (c) participate in presentations to the Board of Directors regarding the conformity of principal proposed investments and financing transactions to our guidelines; (d) weigh in on strategic planning and assist the Board of Directors in monitoring financial projections and the concurrence of investment and financing policies with strategic objectives; (e) review annual budget assumptions and submit them for approval by the Board of Directors; (f) monitor our budget and strategic plan; (g) identify risk factors and review policies for managing those risks; and (h) perform any other functions the Board of Directors may delegate to the finance and planning committee. Each member of the finance and planning committee is independent, as independence is defined under the Mexican Securities Market Law.

Finance and Planning Committee Report

To the Board of Directors of

Teléfonos de México, S.A. de C.V.

Mr. Chairman, Board members:

The relevant issues that have been discussed in the sessions of the Finance and Planning Committee of the Board of Directors are the following:

We reviewed the results of the investment programs and liabilities of the Company at year-end 2004. The investments and financing complied with the policies established by the Board and achieved the projected viability.

We analyzed and evaluated the projected investment and liabilities plans for 2005 and both were within framework of the policies established by the Board, which policies are also in line with the established strategic vision of the Company.

Therefore, the Committee considered that the principal investments and financing for 2005 that management has planned are viable and adequate.

We also reviewed the figures of the financial statements at December 31, 2004, and compared them with the figures of 2003 and the 2004 budget. Additionally, we analyzed the premises and financial projections included in the Company's budget for 2005. The Committee considered that these projections are in line with the Company's strategic plan.

In addition, we carried out an evaluation and verified that the strategic position of the Company is consistent with its strategic plan.

We consider that this information should be included in the annual report that the Board of Directors presents to the Shareholders Meeting where the 2004 results will be made known in order to comply with the Best Corporate Practices Code.

Fernando Solana Morales
President

Héctor Slim Seade is the nephew of Carlos Slim Helú.

Statutory Auditors

Under our bylaws, the holders of a majority of the outstanding AA Shares and A Shares voting together may elect one or more statutory auditors (*comisarios*) and corresponding alternate statutory auditors. The primary role of the statutory auditors is to report to the holders of AA Shares and A Shares at the annual ordinary general meeting regarding the accuracy of the financial information presented to such holders by the Board of Directors. The statutory auditors are also authorized to, among other things, (a) call ordinary or extraordinary general shareholders meetings, (b) place items on the agenda for meetings of shareholders or the Board of Directors, (c) attend meetings of shareholders or the Board of Directors and (d) generally monitor our affairs. The statutory auditors also receive monthly reports from the Board of Directors regarding material aspects of our affairs, including our financial condition. The current statutory auditor and alternate statutory auditor are:

	Position	First Elected
Alberto Tiburcio Celorio	Statutory Auditor	1993
Fernando Espinosa López	Alternate Statutory Auditor	2001

Compensation of Directors and Officers

For the year ended December 31, 2004, the aggregate compensation of all of our directors, alternate directors and executive officers paid for services in all capacities was approximately P.87.3 million. Each director or alternate director received an average fee of P.47.2 thousand (nominal) for each meeting of the Board of Directors attended in 2004. Members of committees of the Board of Directors received an average fee of P.14.7 thousand (nominal) for each committee meeting attended in 2004.

In 2005, we terminated our stock option plan for our executive officers. In January 2003, we granted options to purchase an aggregate of 11.7 million L Shares at P.11.17 per L Share, which were exercisable over a period of nearly four years from the date of grant. We subsequently reduced this period to two years. In January 2004, we granted options to purchase an aggregate of 9.0 million L Shares at P.13.45 per L Share, which were exercisable for a period of nearly four years from the date of grant. We subsequently reduced this period to one year. In accordance with Mexican GAAP, we do not recognize any compensation expense as a result of granting stock options to our executive officers.

Table of Contents

Share ownership of Carlos Slim Helú and certain members of his immediate family is set forth in *Item 7. Major Shareholders and Related Party Transactions Major Shareholders*. Except as discussed therein, none of our other directors, alternate directors or executive officers is the beneficial owner of more than one percent of any class of our capital stock.

Employees

We are one of the largest non-governmental employers in Mexico. The following table sets forth the number of employees and a breakdown of employees by main category of activity and geographic location as of the end of each year in the three-year period ended December 31, 2004:

	December 31,		
	2004	2003	2002
End-of-period number of employees	76,683	62,103	63,775
Employees by category of activity:			
Local Mexico	39,420	40,353	41,519
Long distance Mexico	7,216	7,405	7,482
Other Mexico	14,431	14,345	14,774
Latin America ⁽¹⁾	15,616		
Employees by geographic location:			
Mexico	61,067	62,103	63,775
Latin America	15,616		

(1) Includes Brazil, Chile, Argentina, Peru and Colombia.

At December 31, 2004, the Telephone Workers Union of Mexico (known by its Spanish acronym, STRM) represented approximately 58.0% of our employees, and members of other unions represented approximately 9.7% of our employees. All management positions are held by non-union employees. Salaries and certain benefits for unionized personnel are renegotiated every year and the collective bargaining agreements with our unionized employees are renegotiated every two years. In April 2005, we and the STRM agreed to a 4.6% nominal increase in basic wages and a 1.5% nominal increase in benefits.

Table of Contents**Item 7. Major Shareholders and Related Party Transactions****MAJOR SHAREHOLDERS**

The AA Shares represented 35.1% of the total capital stock and 94.2% of the full voting shares (AA shares and A Shares) as of May 17, 2005. The AA Shares are owned by (1) Carso Global Telecom, (2) SBC International, a subsidiary of the U.S. telecommunications company SBC Communications, Inc. and (3) various other Mexican investors. Carso Global Telecom holds interests in telecommunications and was spun off from Grupo Carso in 1996. Carso Global Telecom may be deemed to control us. According to reports of beneficial ownership of our shares filed with the SEC, Carso Global Telecom is controlled by Mr. Carlos Slim Helú and members of his immediate family.

Carso Global Telecom and SBC International are parties to an agreement entered into in December 2000 providing for certain matters relating to their ownership of AA Shares. Among other things, the agreement subjects certain transfers of AA Shares by either party to a right of first offer in favor of the other party, although the right of first offer does not apply to the conversion of AA Shares to L Shares, as permitted by our bylaws, or the subsequent transfer of L Shares. The agreement also provides for the composition of the Board of Directors and the executive committee (see *Item 6. Directors and Officers of Registrant Directors* and *Item 6. Directors and Officers of Registrant Executive Committee*) and for each party to enter into a Management Services Agreement with us (see *Related Party Transactions*).

The following table identifies each owner of five percent or more of any class of our shares as of May 17, 2005, unless otherwise indicated. Except as described below, we are not aware of any holder of five percent or more of any class of our shares.

	AA Shares ⁽¹⁾		A Shares ⁽²⁾		L Shares ⁽³⁾		Percent of voting shares ⁽⁴⁾
	Shares	Percent	Shares	Percent	Shares	Percent	
	(millions)	of class	(millions)	of class	(millions)	of class	
Carso Global Telecom ⁽⁵⁾	3,000.0	73.8%	46.0	18.5%	1,746.2	24.1%	70.6%
SBC International ⁽⁵⁾	899.7	22.1%					20.9%
Brandes Investment Partners, L.P. ⁽⁶⁾					516.3	7.1%	
Franklin Resources, Inc. ⁽⁶⁾					576.0	7.9%	
JPMorgan Chase & Co. ⁽⁶⁾					474.1	6.5%	

(1) As of May 17, 2005, there were 4,063 million AA Shares outstanding, representing 94.2% of the total full voting shares (AA Shares and A Shares).

(2) As of May 17, 2005, there were 248 million A Shares outstanding, representing 5.8% of the total full voting shares (AA Shares and A Shares).

(3) As of May 17, 2005, there were 7,249 million L Shares outstanding.

(4) AA Shares and A Shares.

(5) Holders of AA Shares and A Shares are entitled to convert a portion of these Shares to L Shares, subject to the restrictions set forth in our bylaws. See *Item 10. Additional Information Bylaws*.

(6) Derived from reports of beneficial ownership of our shares filed with the SEC. All figures are as of March 31, 2005.

The following table sets forth the share ownership, as of May 17, 2005, of our officers and directors who own more than one percent of any class of our capital stock. Mr. Carlos Slim Helú, together with certain members of his immediate family, may be deemed to share beneficial ownership of 3,000 million AA Shares and 46.0 million A Shares held by Carso Global Telecom and 1,821.9 million L Shares held by Carso

Edgar Filing: TELEFONOS DE MEXICO S A DE C V - Form 20-F

Global Telecom and other companies that are under common control with us. Except as provided below, none of our directors, alternate directors or executive officers is the beneficial owner of more than 1% of any class of our capital stock.

Table of Contents

	AA Shares ⁽¹⁾		A Shares ⁽¹⁾		L Shares ⁽¹⁾		Percent of voting shares ⁽²⁾
	Shares	Percent	Shares	Percent	Shares	Percent	
	(millions)	of class	(millions)	of class	(millions)	of class	
Carlos Slim Helú ⁽³⁾	3,000.0	73.8%	46.0	18.5%	1,829.5	25.2%	70.6%
Carlos Slim Domit ⁽⁴⁾	3,000.0	73.8%	46.0	18.5%	1,829.5	25.2%	70.6%
Marco Antonio Slim Domit ⁽⁵⁾	3,000.0	73.8%	46.0	18.5%	1,829.5	25.2%	70.6%
Patrick Slim Domit ⁽⁶⁾	3,000.0	73.8%	46.0	18.5%	1,829.8	25.2%	70.6%
Antonio Cosío Ariño	65.2	1.6%					1.5%

- (1) Holders of AA Shares and A Shares are entitled to convert a portion of these Shares to L Shares, subject to the restrictions set forth in our bylaws. See *Item 10. Additional Information Bylaws*.
- (2) AA Shares and A Shares.
- (3) Includes 40,000 A shares and 60,000 L Shares owned directly by Carlos Slim Helú.
- (4) Includes 8,132 L Shares owned directly by Carlos Slim Domit.
- (5) Includes 8,132 L Shares owned directly by Marco Antonio Slim Domit.
- (6) Includes 335,324 L Shares owned directly by Patrick Slim Domit.

At December 31, 2004, 76.8% of our outstanding L Shares were represented by L Share ADSs, each representing the right to receive 20 L Shares, and 99.2% of the holders of L Share ADSs (15,240 holders, including The Depository Trust Company) had registered addresses in the United States. In November 2000, we established a sponsored ADS program for the A Share ADSs. 28.2% of our outstanding A Shares were held in the form of A Share ADSs at December 31, 2004, each representing the right to receive 20 A Shares, and 98.3% of the holders of A Share ADSs (4,467 holders, including The Depository Trust Company) had registered addresses in the United States.

We have no information concerning holders with registered addresses in the United States that hold:

A Shares;

L Shares not represented by ADSs; or

A Share ADS that are held under the unsponsored A Share ADS programs, which pre-date the establishment of the sponsored program, and have not been exchanged for ADSs issued under such sponsored program. See *Item 9. The Offer and Listing Trading Market*.

We purchase our shares on the Mexican Stock Exchange from time to time up to a specified maximum aggregate value authorized by the holders of AA Shares and A Shares and our Board of Directors. In 2004, we purchased 707.8 million L Shares and 1.7 million A Shares, representing 5.9% of the shares outstanding at the beginning of 2004, with an aggregate value of P.13,894 million (P.13,514 million historical). As of April 28, 2005, we are authorized to purchase shares with an aggregate value of up to P.10 billion.

Since January 1, 1997, Carso Global Telecom has purchased A Shares and L Shares on the open market from time to time. In percentage terms, the ownership position of Carso Global Telecom has also increased as a result of our repurchase of our own shares. Carso Global Telecom's percentage ownership of the A Shares was 18.2% on December 31, 2004, 17.4% on December 31, 2003 and 15.9% on December 31, 2002. Carso Global Telecom's percentage ownership of the L Shares was 23.6% on December 31, 2004, 17.0% on December 31, 2003 and 13.4% on

Edgar Filing: TELEFONOS DE MEXICO S A DE C V - Form 20-F

December 31, 2002. In June 2001, Carso Global Telecom converted 500 million L Shares to AA Shares, raising its total ownership of AA Shares to 3,000 million.

Table of Contents

RELATED PARTY TRANSACTIONS

General

We engage in a variety of transactions in the ordinary course of business with affiliates. Pursuant to our bylaws and Mexican law, the audit committee of our Board of Directors must express an opinion on, and our Board of Directors has exclusive power to approve, any transaction with a related party that is outside the ordinary course of our business.

Our transactions with affiliates include purchasing network construction services and materials from a subsidiary of Grupo Condumex, S.A. de C.V. and insurance and bank services from Grupo Financiero Inbursa. In addition, we sell network construction materials to Grupo Condumex and provide certain services to Grupo Carso and Grupo Financiero Inbursa. Grupo Condumex and Grupo Financiero Inbursa are under common control with Carso Global Telecom, and several of their directors are also members of our Board of Directors. See *Item 6. Directors and Officers of Registrant Directors*. The aggregate amount of our purchases from affiliates was P.9,041 million in 2004, P.8,028 million in 2003 and P.7,959 million in 2002. The aggregate amount of our sales to these affiliates was P.989.1 million in 2004, P.685.8 million in 2003 and P.585.5 million in 2002. We believe that the prices paid in these transactions are comparable to those that would be obtained in arm's length negotiations with unaffiliated parties.

From time to time we make investments together with affiliated companies, sell our investments to affiliates and buy investments from affiliates. Some of these transactions are described below.

In June 2001, we acquired a 45% interest in Grupo Telvista, S.A. de C.V., whose principal asset is Telvista, Inc. (Telvista), a U.S. telemarketing company, for U.S.\$47.0 million. We made this investment together with our affiliates, the other shareholders of Telvista, América Móvil (45%) and Grupo Carso (10%).

In April 2004, we acquired a 60% indirect interest in Techtel from América Móvil for U.S.\$75 million.

We owned a 50% interest in Technology and Internet L.L.C., a company that invests in e-commerce enterprises in the United States and Latin America. We made this investment together with our affiliates, América Móvil (40.3%) and Grupo Financiero Inbursa (9.7%). On June 21, 2005, we sold our entire interest in Technology and Internet L.L.C. to Grupo Condumex.

We owned approximately 25.6 million shares of common stock of MCI. Other parties that may be deemed to be under common control with us held an additional interest. In May 2005, we and the other parties that may be deemed to be under common control with us sold all shares held.

We also pay fees to Carso Global Telecom and SBC International for consulting and management services, pursuant to agreements with each party negotiated on behalf of us by a special committee of directors unaffiliated with any of the parties. The current agreements with Carso Global Telecom and SBC International were renewed for the period beginning January 1, 2005 on substantially similar terms to prior agreements. We paid to both companies an aggregate amount of U.S.\$29 million in 2004, U.S.\$29 million in 2003 and U.S.\$29 million in 2002.

Edgar Filing: TELEFONOS DE MEXICO S A DE C V - Form 20-F

Executives of Carso Global Telecom periodically use our corporate airplane for business purposes. Carso Global Telecom pays us market rates for this service.

Table of Contents

We are working with Grupo Financiero Inbursa on the continued joint development and promotion of the Count on Telmex card. With respect to the debit feature of the card, Grupo Financiero Inbursa manages the cash balances, and we and Grupo Financiero Inbursa divide the related earnings and costs. With respect to the credit feature of the card, Grupo Financiero Inbursa is responsible for, and bears all risks related to, the credit card operations. We are responsible for basic logistical support and invoicing and collection services in connection with the card.

Transactions between Telmex and América Móvil

América Móvil has had in recent periods a variety of contractual relationships with us and with our subsidiaries. Because both we and América Móvil, the leading wireless operator that was established in a spin-off from us in 2000, provide telecommunications services in the same geographical markets, we have extensive operational relationships. These include interconnection between our respective networks; use by América Móvil of our private circuits; our provision of long distance service to América Móvil's customers; use of facilities, particularly for the co-location of equipment on premises we own; and use by each of the services provided by the other. These operational relationships are subject to a variety of agreements, which for the most part were in place prior to the spin-off and were not significantly modified as a result of the spin-off. Many of them are also subject to specific regulations governing all telecommunications operators. Interconnection fees represent the largest component of amounts paid under these agreements. In 2004, the aggregate amount we paid América Móvil for interconnection fees totaled P.10,319 million, and the aggregate amount paid to us by América Móvil totaled P.4,318 million, primarily for use of our private circuits and long distance services. The terms of the arrangements with América Móvil are generally similar to those on which each company does business with other, unaffiliated parties.

In addition, we distribute América Móvil's handsets and prepaid cards on commercial terms similar to those given to other cellular distributors.

Transactions between Embratel and Related Parties

Embratel engages in a variety of transactions in the ordinary course of business with our subsidiaries and with other companies that may be deemed to be under common control with us.

Embratel completes international traffic from our subsidiaries and subsidiaries of América Móvil in Mexico, Chile and Argentina. Our subsidiaries and subsidiaries of América Móvil in Mexico, Chile and Argentina complete international traffic from Embratel.

Because both Embratel and América Móvil's subsidiary, Telecom Americas S.A., which operates under the brand Claro, provide telecommunications services in the same geographical markets, they have extensive operational relationships. Embratel originates mobile domestic and international long distance traffic from Claro and terminates mobile domestic and international long distance traffic to Claro. Embratel also transports Claro's traffic and leases lines to Claro.

Through its subsidiary, BrasilCenter, Embratel provides call center services to Claro and Net. Embratel also leases access facilities from Telmex do Brasil.

Edgar Filing: TELEFONOS DE MEXICO S A DE C V - Form 20-F

The terms of Embratel's arrangements with our subsidiaries and with other companies that may be deemed to be under common control with us are generally similar to those on which each company does business with other, unaffiliated parties.

In November 2004, Embratel entered into a U.S.\$75 million credit agreement with Banco Inbursa, *Institución de Banca Múltiple, Grupo Financiero Inbursa*, a subsidiary of Grupo Financiero Inbursa. The agreement had terms comparable to those of three other loans Embratel received from unaffiliated parties in November and December 2004.

Item 8. Financial Information

CONSOLIDATED FINANCIAL STATEMENTS

See *Item 18. Financial Statements* and pages F-1 through F-56.

LEGAL PROCEEDINGS

Telmex

There were a number of pending proceedings before the Mexican courts in which we or our competitors had challenged determinations or regulations issued by Cofetel, most of which were withdrawn as a result of December 2000 agreements with certain competitors. We are also involved in legal proceedings in the ordinary course of our business, none of which is material. In addition, we are in the process of appealing various proceedings brought by our competitors alleging anticompetitive practices by us before competition authorities in Mexico. The proceedings could result in fines by the authorities and subsequent civil actions by our competitors, but we believe that a negative outcome of these proceedings would not be material on an aggregate basis.

The Mexican Social Security Institute (*Instituto Mexicano del Seguro Social*) conducted an audit of our social security obligations for the period from 1997 through 2001. Following the audit, we were ordered to pay a total of approximately P.330 million (nominal value) consisting of past due obligations, penalties and accrued interest as of July 2, 2003. We have appealed these rulings to the Federal Administration and Taxation Court (*Tribunal Federal de Justicia Fiscal y Administrativa*) and, in accordance with Mexican law, have deposited a bond guaranteeing the amount alleged to be owed. Although we believe the basis for our appeal is well founded, there can be no assurance that we will prevail.

Embratel

Embratel has a substantial amount of tax-related and other contingencies. See Note 12 to our consolidated financial statements. Although Embratel believes the cases to which these contingencies relate are well founded, there is no guarantee that it will prevail in these cases.

Brazilian value-added goods and services tax (ICMS)

Embratel has received a number of fines for non-payment of ICMS on international outbound traffic and certain bundled services that are considered exempt or non-taxable for ICMS purposes. Embratel recorded a provision for P.368 million for losses considered probable but did not record a provision for P.3.8 billion, which corresponds to the claims in which Embratel expects to prevail.

Edgar Filing: TELEFONOS DE MEXICO S A DE C V - Form 20-F

In July 2002, Star One received two assessments by the tax authorities in the state of Rio de Janeiro for payment of ICMS in the amount of approximately P.1.0 billion related to Internet services and satellite use. In March 2004, Star One was required to pay approximately P.84.0 million in the Brazilian Federal District for ICMS not paid on satellite use and other obligations. Star One determined that it faces little risk of losing these suits so it has not recorded a provision for such amounts in its financial statements.

Table of Contents

Income Tax on Inbound International Income

Embratel believes that the foreign operating income from telecommunications services (inbound traffic) is not subject to taxation. In connection with this matter, in late March 1999, the Brazilian Federal Tax Agency, or SRF, assessed Embratel approximately P.1.2 billion for failing to pay the related income tax for the years 1996 and 1997. Embratel's appeal of this decision is still pending.

In June 1999, Embratel was further assessed for non-payment of income tax on net foreign source income for 1998 amounting to approximately P.273 million. Embratel considers the probability of loss unlikely, so no provisions have been recorded in the financial statements for the claim.

Brazilian Social Welfare Tax on Service Exports (PIS)

In August 2001, the SRF issued a tax claim against Embratel totaling approximately P.675 million for payment of PIS prior to 1995, which had been offset in accordance with Brazilian tax law. Embratel's management evaluated the probability of a loss, and determined that no provision would be recorded in the financial statements for the claim.

Brazilian Finance Tax for Service Export Security Tax (COFINS)

There is also a P.1,451 million claim against Embratel related to the COFINS exemption on the exportation of telecommunication services for revenues through the end of 1999. Embratel argued that the government auditor made several errors in the computation of this tax and, consequently, this tax was later reduced by approximately P.934 million. A new decision at the administrative level has restated this tax to an amount of approximately P.1,004 million. Embratel has appealed this decision to a higher administrative level, and this appeal is still pending.

Disputes with third parties

Embratel is involved in a variety of additional litigation and administrative proceedings that have arisen in the ordinary course of business. Various disputes are in an advanced stage of the litigation process, and Embratel may lose at least some of the cases. Embratel has recorded a provision of P.700 million (restated) for unfavorable rulings. For other claims totaling P.62.8 million, Embratel provided guarantee deposits of P.46.0 million.

DIVIDENDS

We have paid cash dividends on our shares each year since 1958. The table below sets forth the nominal amount of dividends paid per share in each year indicated, in pesos and translated into U.S. dollars at the exchange rate on each of the respective payment dates.

Edgar Filing: TELEFONOS DE MEXICO S A DE C V - Form 20-F

<u>Year ended December 31,</u>	<u>Pesos per Share</u>		<u>Dollars per Share</u>	
2004	P.	0.6650	U.S.\$	0.0588
2003		0.6050		0.0555
2002		0.5450		0.0559
2001		0.4900		0.0529
2000		0.4450		0.0424

Since 1998, we have paid dividends quarterly. The dividends from earnings in a given year are determined at the annual meeting of shareholders in April of the following year, and paid in June, September and December of such following year and in March of the year after that. In April 2003, we declared a dividend of P.0.620 per share, which we paid in equal installments of P.0.155 per share in June

Table of Contents

2003, September 2003, December 2003 and March 2004. In April 2004, we declared a dividend of P.0.680 per share, which we paid in equal installments of P.0.170 per share in June 2004, September 2004, December 2004 and March 2005. In April 2005, we declared a dividend of P.0.380 (post-split) per share, which will be payable in equal installments of P.0.095 per share in June 2005, September 2005, December 2005 and March 2006.

The declaration, amount and payment of dividends are determined by majority vote of the holders of AA Shares and A Shares, generally on the recommendation of the Board of Directors, and will depend on our results of operations, financial condition, cash requirements, future prospects and other factors deemed relevant by the holders of AA Shares and A Shares. Accordingly, we cannot assure you that we will continue to pay dividends or that future dividends will be comparable to historical dividends. Our bylaws provide that holders of the AA Shares, the A Shares and the L Shares share equally on a per-share basis in dividend payments and other distributions.

Table of Contents**Item 9. The Offer and Listing****TRADING MARKET**

The L Share ADSs, each representing 20 L Shares of Telmex, are issued by JPMorgan Chase Bank, N.A., or the Depositary, as depositary for the L Share ADSs. The L Share ADSs are traded on the New York Stock Exchange and listed on the Frankfurt Stock Exchange, and the L Shares are traded on the Mexican Stock Exchange and listed on the *Mercado de Valores Latinoamericano* (Latibex) in Madrid, Spain.

The A Share ADSs, each representing 20 A Shares of Telmex, are issued by the Depositary, as depositary for the A Share ADSs. The A Shares are traded on the Mexican Stock Exchange, and the sponsored A Share ADSs are quoted on the NASDAQ SmallCap Market. Trading has ceased with respect to the unsponsored A Share ADSs.

The following table sets forth, for the periods indicated, the reported high and low sales prices for the L Shares on the Mexican Stock Exchange and the reported high and low sales prices for the L Share ADSs on the New York Stock Exchange. Prices have not been restated in constant currency units.

TRADING ON THE MEXICAN STOCK EXCHANGE

The Mexican Stock Exchange (*Bolsa Mexicana de Valores, S.A. de C.V.*), located in Mexico City, is the only stock exchange in Mexico. Founded in 1907, it is organized as a corporation whose shares are held by 26 brokerage firms, which are exclusively authorized to trade on the Mexican Stock Exchange. Trading on the Mexican Stock Exchange takes place principally through automated systems, which are open between the hours of 8:30 a.m. and 3:00 p.m., Mexico City time, each business day. Trades in securities listed on the Mexican Stock Exchange can also be effected off the exchange. The Mexican Stock Exchange operates a system of automatic suspension of trading in shares of a particular issuer as a means of controlling excessive price volatility, but under current regulations this system does not apply to securities such as the A Shares or the L Shares that are directly or indirectly (for example, through American Depositary Shares) quoted on a stock exchange (including for these purposes NASDAQ) outside Mexico.

Settlement is effected two business days after a share transaction on the Mexican Stock Exchange. Deferred settlement, even by mutual agreement, is not permitted without the approval of the Mexican National Securities Commission. Most securities traded on the Mexican Stock Exchange, including those of Telmex, are on deposit with S.D. Indeval, S.A. de C.V., a privately owned securities depository that acts as a clearinghouse for Mexican Stock Exchange transactions.

Table of Contents

Item 10. Additional Information

BYLAWS

Set forth below is a brief summary of certain significant provisions of our bylaws and Mexican law. The full text of our bylaws has been filed as an exhibit to this Annual Report. For a description of the provisions of our bylaws relating to our Board of Directors, committees of the Board of Directors and statutory auditors, see *Item 6. Directors and Officers of Registrant*.

On March 19, 2003, the CNBV published new general rules, or the Rules, for issuers, which codify the principal rules applicable to issuers and public offerings. The Rules increased the obligations and responsibilities of the audit committee by requiring the committee's opinion to delist or cancel the registration of the shares of a company and to authorize any changes to the accounting policies and practices, among other important provisions.

Organization and Register

Telmex is a *sociedad anónima de capital variable* organized in Mexico under the Mexican Companies Law (*Ley General de Sociedades Mercantiles*). It is registered with the Public Registry of Commerce of Mexico City under the number 5229.

Share Capital

Our capital stock comprises Series AA Shares, without par value, Series A Shares, without par value and Series L Shares, without par value. All of the outstanding shares are fully paid and non-assessable.

AA Shares and A Shares have full voting rights. Holders of L Shares may vote only in limited circumstances as described under *Voting Rights*. The rights of holders of all series of capital stock are otherwise identical except for limitations on non-Mexican ownership of AA Shares. The AA Shares, which must always represent at least 51% of the combined AA Shares and A Shares, may be owned only by holders that qualify as Mexican investors as defined in the Foreign Investment Law and our bylaws. See *Limitations on Share Ownership*.

Each AA Share or A Share may be exchanged at the option of the holder for one L Share, provided that the AA Shares may never represent less than 20% of our outstanding capital stock or less than 51% of our combined AA Shares and A Shares. As of December 31, 2004, the AA Shares represented 34.3% of our outstanding capital stock and 94.2% of our combined AA Shares and A Shares.

Each L Share is exchangeable at the option of the holder for one AA Share by delivering the L Share certificate to our treasury for cancellation and receiving the corresponding AA Share certificate. The right to exchange is subject to limitations on non-Mexican ownership of AA Shares and to the requirement that the AA Shares and A Shares together may never represent more than 51% of our outstanding capital stock. As of

December 31, 2004, the AA Shares and A Shares together represented 36.5% of our outstanding capital stock.

Table of Contents

Voting Rights

Each AA Share and A Share entitles the holder thereof to one vote at any meeting of our shareholders. Each L Share entitles the holder to one vote at any meeting at which holders of L Shares are entitled to vote. Holders of L Shares are entitled to vote only to elect two members of the Board of Directors and the corresponding alternate directors and on the following matters:

the extension of Telmex's term of duration;

the transformation of Telmex from one type of company to another;

any merger in which Telmex is not the surviving entity or any merger with an entity whose principal corporate purposes are different from those of Telmex;

removal of our shares from listing on the Mexican Stock Exchange or any foreign stock exchange; and

any action that would prejudice the rights of holders of L Shares.

A resolution on any of the specified matters requires the affirmative vote of both a majority of all outstanding shares and a majority of the AA Shares and the A Shares voting together.

Under Mexican law, holders of shares of any series are also entitled to vote as a class on any action that would prejudice the rights of holders of shares of such series and a holder of shares of such series would be entitled to judicial relief against any such action taken without such a vote. The determination whether an action requires a class vote on these grounds would initially be made by the Board of Directors or other party calling for shareholder action. A negative determination would be subject to judicial challenge by an affected shareholder, and a court would ultimately determine the necessity for a class vote. There are no other procedures for determining whether a proposed shareholder action requires a class vote, and Mexican law does not provide extensive guidance on the criteria to be applied in making such a determination.

Shareholders Meetings

General shareholders' meetings may be ordinary meetings or extraordinary meetings. Extraordinary general meetings are those called to consider certain matters specified in Article 182 of the Mexican Companies Law, including, principally, amendments of the bylaws, liquidation, merger and transformation from one type of company to another, as well as to consider the removal of our shares from listing on the Mexican Stock Exchange or any foreign stock exchange. General meetings called to consider other matters are ordinary meetings. The two directors elected by the holders of L Shares are elected at a special meeting of holders of L Shares. All other matters on which holders of L Shares are entitled to vote would be considered at an extraordinary general meeting. Holders of L Shares are not entitled to attend or address meetings of shareholders at which they are not entitled to vote.

Edgar Filing: TELEFONOS DE MEXICO S A DE C V - Form 20-F

A special meeting of the holders of L Shares must be held each year for the election of directors. An ordinary general meeting of the holders of AA Shares and A Shares must be held each year to consider the approval of the financial statements for the preceding fiscal year, to elect directors and statutory auditors and to determine the allocation of the profits of the preceding year.

Table of Contents

The quorum for an ordinary general meeting of the AA Shares and A Shares is 50% of such shares, and action may be taken by a majority of the shares present. If a quorum is not available, a second meeting may be called at which action may be taken by a majority of the AA Shares and A Shares present, regardless of the number of such shares. Special meetings of holders of L Shares are governed by the same rules applicable to ordinary general meetings of holders of AA Shares and A Shares. The quorum for an extraordinary general meeting at which holders of L Shares may not vote is 75% of the AA shares and A Shares, and the quorum for an extraordinary general meeting at which holders of L Shares are entitled to vote is 75% of the outstanding capital stock. If a quorum is not available in either case, a second meeting may be called and action may be taken, provided a majority of the shares entitled to vote is present. Whether on first or second call, actions at an extraordinary general meeting may be taken by a majority vote of the AA Shares and A Shares outstanding and, on matters which holders of L Shares are entitled to vote, a majority vote of all the capital stock.

Holders of 20% of our outstanding capital stock may have any shareholder action set aside by filing a complaint with a court of law within 15 days after the close of the meeting at which such action was taken and showing that the challenged action violates Mexican law or our bylaws. In addition, any holder of our capital stock may bring an action at any time within five years challenging any shareholder action. Relief under these provisions is only available to holders:

who were entitled to vote on, or whose rights as shareholders were adversely affected by, the challenged shareholder action; and

whose shares were not represented when the action was taken or, if represented, were voted against it.

Shareholders' meetings may be called by the Board of Directors, its chairman, the statutory auditors or a court. The Board of Directors or the statutory auditors may be required to call a meeting of shareholders by the holders of 10% of the outstanding capital stock. Notice of meetings must be published in the *Diario Oficial* (Official Gazette) or a newspaper of general circulation in Mexico City at least 15 days prior to the meeting. In order to attend a meeting, shareholders must deposit their shares with us at our office in Mexico City, with a Mexican or foreign banking institution or with a Mexican exchange broker. If so entitled to attend the meeting, a shareholder may be represented by proxy. The depositary for the L Share ADSs and the A Share ADSs does not satisfy this requirement, so ADS holders are not entitled to attend shareholder meetings. ADS holders must exercise their voting rights through the depositary.

Dividend Rights

At the annual ordinary general meeting of holders of AA Shares and A Shares, the Board of Directors submits our financial statements for the previous fiscal year, together with a report thereon by the Board of Directors, to the holders of AA Shares and A Shares for approval. The holders of AA Shares and A Shares, once they have approved the financial statements, determine the allocation of our net profits for the preceding year. They are required by law to allocate 5% of such net profits to a legal reserve, which is not thereafter available for distribution except as a stock dividend, until the amount of the legal reserve equals 20% of our capital stock. The remainder of net profits is available for distribution.

All shares outstanding at the time a dividend or other distribution is declared are entitled to participate in such dividend or other distribution.

Table of Contents

Limitation on Capital Increases

Our bylaws require that any capital increase be represented by new shares of each series in proportion to the number of shares of each series outstanding.

Preemptive Rights

In the event of a capital increase, a holder of existing shares of a given series has a preferential right to subscribe for a sufficient number of shares of the same series to maintain the holder's existing proportionate holdings of shares of that series. Preemptive rights must be exercised within 30 calendar days following the publication of notice of the capital increase in the *Diario Oficial* (Official Gazette) and a newspaper of general circulation in Mexico City. Under Mexican law, preemptive rights cannot be traded separately from the corresponding shares that give rise to such rights. As a result, there is no trading market for the rights in connection with a capital increase. Holders of ADSs may exercise preemptive rights only through the depositary. We are not required to take steps that may be necessary to make this possible.

Limitations on Share Ownership

Ownership by non-Mexicans of shares of Mexican enterprises in certain economic sectors, including telephone services, is regulated by the Foreign Investment Law and the Regulations thereunder. The National Commission on Foreign Investment is responsible for administration of the Foreign Investment Law and Regulations. In order to comply with restrictions on the percentage of their capital stock that may be owned by non-Mexican investors, Mexican companies typically limit particular classes of their stock to Mexican ownership. Under the Foreign Investment Law, a trust for the benefit of one or more non-Mexican investors may qualify as Mexican if the trust meets certain conditions that will generally ensure that the non-Mexican investors do not determine how the shares are voted.

Non-Mexican investors are not permitted to own more than 49% of the capital stock of a Mexican corporation engaged in the telephone business. Pursuant to a decision of the Foreign Investment Commission dated August 10, 1990, the L Shares of Telmex, because of their limited voting rights, are not taken into account in determining compliance with this restriction and accordingly are not subject to Mexican ownership restrictions. The A Shares are also unrestricted. The AA Shares, however, which must always represent at least 51% of the combined AA Shares and A Shares, may be owned only by holders that qualify as Mexican investors as defined in the Foreign Investment Law and our bylaws. A holder that acquires AA Shares in violation of the restrictions on non-Mexican ownership will have none of the rights of a shareholder with respect to those AA Shares. As a consequence of these limitations, a non-Mexican investor cannot under Mexican law own AA Shares except through a trust that effectively neutralizes the votes of non-Mexican investors.

Pursuant to the Foreign Investment Law and Regulations, we have registered any foreign owner of our shares, and the depositary with respect to the ADSs representing our shares, with the National Registry of Foreign Investment.

In addition, pursuant to the Foreign Investment Law and Regulations, our Mexican shareholders retain the power to determine our administrative control and management.

Edgar Filing: TELEFONOS DE MEXICO S A DE C V - Form 20-F

Foreign states are prohibited under the General Communications Law from directly or indirectly owning shares of Telmex. The Telecommunications Regulations provide, however, that foreign state-owned enterprises organized as separate entities with their own assets may own minority interests in Telmex or any number of shares with limited voting rights. Ownership of A Shares or L Shares by such foreign state-owned companies, or by pension or retirement funds organized for the benefit of employees of state, municipal or other Mexican governmental agencies, is not considered direct or indirect ownership by foreign states for the purposes of the General Communications Law.

Table of Contents

Restrictions on Certain Transactions

Our bylaws provide that any acquisition or transfer by us of more than 10% of our issued and outstanding shares, effected in one or more transactions by any person or group of persons acting in concert, requires prior approval by our Board of Directors.

Restrictions on Deregistration in Mexico

Our shares are registered with the National Registry for Securities, as required under the Securities Market Law and regulations issued by the CNBV. If we wish to cancel our registration, or if it is cancelled by the CNBV, the stockholders having the majority of the ordinary shares or that may, on any basis, impose decisions at shareholders' meetings, or appoint the majority of the Board of Directors of Telmex at that time will be required to make a public offer to purchase all outstanding shares prior to such cancellation. Unless the CNBV authorizes otherwise, the offer price will be the higher of: (i) the average of the closing price during the previous 30 days on which the shares may have been quoted, or (ii) the book value of the shares in accordance with the most recent quarterly report submitted to the CNBV and to the Mexican Stock Exchange. In order to comply with the Rules, at the extraordinary shareholders' meeting held in April 30, 2003, we amended certain articles of our bylaws. Some of the amendments were made to comply with certain new requirements for the delisting and cancellation of the registration of the shares of the company. As a result, our bylaws now provide that if, after the public offer is concluded, there are still outstanding shares held by the general public, the shareholders that control Telmex will be required to create a trust for a period of six months, into which such controlling shareholders will be required to contribute funds in an amount sufficient to purchase, at the same price as the offer price, the number of outstanding shares held by the general public. Within the five days prior to the commencement of the public offer, after taking into account the opinion of the audit committee, our Board of Directors must publish its opinion regarding the offer price.

Tender Offer Rules

Our bylaws provide that any purchasers or group of purchasers that obtain or increase a significant participation (*i.e.*, 30% or more) in the capital stock of the company, without conducting a previous public offer in accordance with the applicable rules issued by the CNBV, would not have the right to exercise the corporate rights of their shares, and that the company will not register such shares in the share registry book.

Other Provisions

Variable capital. We are permitted to issue shares constituting fixed and variable capital. All of our outstanding shares of capital stock constitute fixed capital. The issuance of variable-capital shares, unlike the issuance of fixed-capital shares, does not require an amendment of the bylaws, although it does require a majority vote of the AA Shares and the A Shares. Under Mexican law and our bylaws, if we issued variable-capital shares, any holder of such shares would be entitled to redeem them at the holder's option at any time at a redemption price equal to the lower of:

95% of the average market value of such shares on the Mexican Stock Exchange for 30 trading days preceding the date on which the exercise of the option is effective; and

the book value of such shares at the end of the fiscal year in which the exercise of the option is effective.

Table of Contents

If the option is exercised during the first three quarters of a fiscal year, it is effective at the end of the next succeeding fiscal year. The redemption price would be payable following the annual ordinary general meeting of holders of AA Shares and A Shares at which the relevant annual financial statements were approved.

Forfeiture of shares. As required by Mexican law, our bylaws provide that any alien who at the time of incorporation or at any time thereafter acquires an interest or participation in the capital of the corporation shall be considered, by virtue thereof, as Mexican in respect thereof and shall be deemed to have agreed not to invoke the protection of his own government, under penalty, in case of breach of such agreement, of forfeiture to the nation of such interest or participation. Under this provision, a non-Mexican shareholder is deemed to have agreed not to invoke the protection of his own government by asking such government to interpose a diplomatic claim against the Mexican government with respect to the shareholder's rights as a shareholder, but is not deemed to have waived any other rights he may have, including any rights under the U.S. securities laws, with respect to his investment in Telmex. If the shareholder invokes such governmental protection in violation of this agreement, his shares could be forfeited to the Mexican government. Mexican law requires that such a provision be included in the bylaws of all Mexican corporations unless such bylaws prohibit ownership of shares by non-Mexican persons.

Exclusive jurisdiction. Our bylaws provide that legal actions relating to the execution, interpretation or performance of the bylaws shall be brought only in Mexican federal courts.

Duration. Telmex's existence under the bylaws is 100 years from the date of the public deed in which its incorporation is evidenced.

Purchase of our own shares. According to the bylaws, we may repurchase our shares on the Mexican Stock Exchange at any time at the then prevailing market price. Any such repurchase must be made in compliance with the policies established by the Board of Directors, and the amount of shares to be repurchased must be approved by the general ordinary shareholders' meeting. The shareholders' meeting approves the maximum amount of funds that may be used during the year for the repurchase of shares. The ordinary shareholders' meeting held on April 28, 2005 approved up to an additional P.6 billion to be used for share repurchases. Such funds may be used for the repurchase of shares through the Mexican Stock Exchange. In the event that we repurchase shares, our shareholders' equity will be reduced automatically in an amount equal to the assumed par value of each repurchased share. However, if repurchased shares are held as treasury stock, our capital stock will be reduced automatically in an amount equal to the assumed par value of each repurchased share, pending future sales thereof on the Mexican Stock Exchange or cancellation. Our capital stock is automatically increased upon the resale of such shares in an amount equal to their assumed par value. The economic and voting rights corresponding to repurchased shares may not be exercised during the period in which we own such shares, and such shares are not deemed to be outstanding for purposes of calculating any quorum or vote at any shareholders' meeting during such period.

Conflict of interest. Shareholders with conflicting interests with Telmex with respect to a transaction are required to abstain from deliberating and voting on the specific transaction. A shareholder that votes on a specific business transaction in which its interest conflicts with Telmex's may be liable for damages, but only if the transaction would not have been approved without its vote. A determination of conflicting interest would initially be made by the shareholder subject to judicial challenge. Mexican law does not provide extensive guidance on the criteria to be applied in making such a decision.

Table of Contents

Appraisal rights. Whenever the shareholders approve a change of corporate purposes, change of nationality of the corporation or transformation from one type of company to another, any shareholder entitled to vote on such change that has voted against it may withdraw from Telmex and receive the book value attributable to its shares, provided it exercises its right within 15 days following the adjournment of the meeting at which the change was approved.

Rights of Shareholders

The protections afforded to minority shareholders under Mexican law are different from those in the United States and many other jurisdictions. The substantive law concerning fiduciary duties of directors has not been the subject of extensive judicial interpretation in Mexico, unlike many states in the United States where duties of care and loyalty elaborated by judicial decisions help to shape the rights of minority shareholders. Mexican civil procedure does not contemplate class actions or shareholder derivative actions, which permit shareholders in U.S. courts to bring actions on behalf of other shareholders or to enforce rights of the corporation itself. Shareholders cannot challenge corporate action taken at a shareholders meeting unless they meet certain procedural requirements, as described above under *Shareholders Meetings*. As a result of these factors, in practice it may be more difficult for our minority shareholders to enforce rights against us or our directors or controlling shareholders than it would be for shareholders of a U.S. company.

Enforceability of Civil Liabilities

Telmex is organized under the laws of Mexico, and most of our directors, officers and controlling persons reside outside the United States. In addition, all or a substantial portion of our assets and their assets are located in Mexico. As a result, it may be difficult for investors to effect service of process within the United States on such persons. It may also be difficult to enforce against them, either inside or outside the United States, judgments obtained against them in U.S. courts, or to enforce in U.S. courts judgments obtained against them in courts in jurisdictions outside the United States, in any action based on civil liabilities under the U.S. federal securities laws. There is doubt as to the enforceability against such persons in Mexico, whether in original actions or in actions to enforce judgments of U.S. courts, of liabilities based solely on the U.S. federal securities laws.

CERTAIN CONTRACTS

We are party to concession agreements that authorize us to provide certain telecommunications services on specific terms. These are described in *Item 4. Information on the Company Mexican Operations Regulation*.

Our agreements with related parties are described in *Item 7. Major Shareholders and Related Party Transactions Related Party Transactions*.

EXCHANGE CONTROLS

Mexico has had a free market for foreign exchange since 1991, and the Mexican government has allowed the peso to float freely against the U.S. dollar since December 1994. There can be no assurance that the Mexican government will maintain its current foreign exchange policies. See

Item 3. Key Information Exchange Rates.

Table of Contents

TAXATION

The following summary contains a description of certain Mexican federal and U.S. federal income tax consequences of the acquisition, ownership and disposition of L Shares, A Shares, AA Shares, L Share ADSs, or A Share ADSs, but it does not purport to be a comprehensive description of all of the tax considerations that may be relevant to a decision to purchase, hold or sell shares or ADSs.

The Convention for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion and a Protocol thereto between the United States and Mexico entered into force on January 1, 1994 and has been amended recently by an additional protocol that entered into force on July 3, 2003 (the Tax Treaty). The United States and Mexico have also entered into an agreement concerning the exchange of information with respect to tax matters.

This discussion does not constitute, and should not be considered as, legal or tax advice to holders. The discussion is for general information purposes only and is based upon the federal tax laws of Mexico (including the Mexican Income Tax Law and the Mexican Federal Tax Code) and the United States as in effect on the date of this Annual Report (including the Tax Treaty), which are subject to change, and such changes may have retroactive effect. Holders of shares or ADSs should consult their own tax advisers as to the Mexican, U.S. or other tax consequences of the purchase, ownership and disposition of shares or ADSs, including, in particular, the effect of any foreign, state or local tax laws.

Mexican Tax Considerations

The following is a general summary of the principal consequences under the Mexican Income Tax Law (*Ley del Impuesto sobre la Renta*) and the rules and regulations thereunder, as currently in effect, of an investment in shares or ADSs by a holder that is not a resident of Mexico and that will not hold the shares or ADSs or a beneficial interest therein in connection with the conduct of a trade or business through a permanent establishment in Mexico (a nonresident holder).

For purposes of Mexican taxation, the definition of residency is highly technical and residency results in several situations. Generally, an individual is a resident of Mexico if he or she has established his or her home in Mexico or if he or she has his or her center of interests in Mexico; a corporation is considered a resident if it is incorporated under the laws of Mexico or if it has established its headquarters in Mexico. However, any determination of residence should take into account the particular situation of each person or legal entity.

Tax Treaties

Provisions of the Tax Treaty that may affect the taxation of certain U.S. holders (as defined in *U.S. Federal Income Tax Considerations*) are summarized below.

The Mexican Income Tax Law has established procedural requirements for a nonresident holder disposing of his shares to be entitled to the benefits under any of the tax treaties to which Mexico is a party. These procedural requirements include the obligation to (i) prove tax treaty residence, and (ii) appoint a representative in Mexico for taxation purposes.

Payment of Dividends

Dividends, either in cash or in kind, paid with respect to the of L Shares, A Shares, AA Shares, L Share ADSs, or A Share ADSs will not be subject to Mexican withholding tax.

Table of Contents

Taxation of Dispositions

Under current Mexican law and regulations, there is no basis for the Mexican tax authorities to impose taxes on income realized by a nonresident holder from a disposition of shares or ADSs, provided that (i) the transaction is carried out through (a) the Mexican Stock Exchange, (b) other securities exchanges or markets approved by the Mexican Ministry of Finance or (c) other securities exchanges or markets with ample securities trading that are located in countries with which Mexico has entered into an income tax treaty, such as the New York Stock Exchange, the Frankfurt Stock Exchange, NASDAQ and the *Mercado de Valores Latinoamericanos en Euros* (LATIBEX), and (ii) certain other requirements are met. In addition, income realized by a nonresident holder from tendering shares or ADSs pursuant to a public tender offer may be exempt from Mexican taxation, provided that certain requirements are met. Sales or other dispositions of shares or ADSs carried out in other circumstances generally are subject to Mexican tax, except to the extent that a nonresident holder is eligible for benefits under an income tax treaty to which Mexico is a party.

For non-resident corporations and individuals that do not meet the requirements mentioned above, gross income obtained on the sale or disposition of shares will be subject to 5% tax if the transaction is carried out through the Mexican Stock Exchange or other securities markets approved by the Mexican Ministry of Finance. Under certain circumstances, non-resident corporations and individuals, alternatively, may elect to pay a 20% tax on the net amount of the transaction.

Pursuant to the Tax Treaty, gains realized by a U.S. holder (as defined in *U.S. Federal Income Tax Considerations*) from the sale or other disposition of shares, even if the sale or disposition is not carried out under the circumstances described in the preceding paragraphs, will not be subject to Mexican income tax, provided that such U.S. holder owned less than 25% of the shares representing our capital stock (including ADSs), directly or indirectly, during the 12-month period preceding such disposition.

Gains realized by other nonresident holders that are eligible to receive benefits pursuant to other income tax treaties to which Mexico is a party may be exempt from Mexican income tax in whole or in part. Non-U.S. holders should consult their own tax advisers as to their possible eligibility under such treaties.

In other cases, nonresident holders will be subject to Mexican income tax on the sale or other disposition of shares or ADSs. Such nonresident holders should consult with their own tax advisers as to how Mexican income tax would apply to their circumstances.

Other Mexican Taxes

Under certain circumstances, a nonresident holder will not be liable for estate, inheritance or similar taxes with respect to its holdings of shares or ADSs. A gratuitous transfer of shares by a nonresident holder, however, may in certain circumstances result in the imposition of Mexican tax upon the recipient. There are no Mexican stamp, issue registration or similar taxes payable by a nonresident holder with respect to shares or ADSs.

U.S. Federal Income Tax Considerations

Edgar Filing: TELEFONOS DE MEXICO S A DE C V - Form 20-F

The following is a summary of certain U.S. federal income tax consequences to U.S. holders (as defined below) of the acquisition, ownership and disposition of shares or ADSs. The summary does not purport to be a comprehensive description of all of the tax consequences of the acquisition, ownership or disposition of shares or ADSs. The summary applies only to U.S. holders that will hold their shares or ADSs as capital assets and does not apply to special classes of U.S. holders such as dealers in securities or currencies, holders with a functional currency other than the U.S. dollar, holders of 10% or more of our

Table of Contents

voting shares (whether held directly or through ADSs or both), tax-exempt organizations, financial institutions, holders liable for the alternative minimum tax, securities traders electing to account for their investment in their shares or ADSs on a mark-to-market basis, and persons holding their shares or ADSs in a hedging transaction or as part of a straddle or conversion transaction.

For purposes of this discussion, a U.S. holder is a holder of shares or ADSs that is:

a citizen or resident of the United States of America;

a corporation organized under the laws of the United States of America or any state thereof; or

otherwise subject to U.S. federal income taxation on a net income basis with respect to the shares or ADSs.

Each U.S. holder should consult such holder's own tax advisor concerning the overall tax consequences to it of the ownership or disposition of shares or ADSs that may arise under foreign, state and local laws.

Treatment of ADSs

In general, a U.S. holder of ADSs will be treated as the owner of the shares represented by those ADSs for U.S. federal income tax purposes. Deposits or withdrawals of shares by U.S. holders in exchange for ADSs will not result in the realization of gain or loss for U.S. federal income tax purposes. U.S. holders that withdraw any shares should consult their own tax advisors regarding the treatment of any foreign currency gain or loss on any pesos received in respect of such shares.

Taxation of Distributions

In this discussion, we use the term dividends to mean distributions paid out of our current or accumulated earnings and profits with respect to shares or ADSs. In general, the gross amount of any dividends will be subject to U.S. federal income taxation. Dividends will be paid in pesos and will be includible in the income of a U.S. holder in a U.S. dollar amount calculated by reference to the exchange rate in effect on the day that they are received by the U.S. holder in the case of shares or by the depository in the case of ADSs. U.S. holders should consult their own tax advisors regarding the treatment of foreign currency gain or loss, if any, on any pesos received by a U.S. holder or depository that are converted into U.S. dollars on a date subsequent to receipt. Subject to certain exceptions for short-term and hedged positions, the U.S. dollar amount of dividends received by an individual prior to January 1, 2009 with respect to the ADSs, L Shares and A Shares will be subject to taxation at a maximum rate of 15% if the dividends are qualified dividends. Dividends paid on the ADSs, L Shares and A Shares will be treated as qualified dividends if (i) we are eligible for the benefits of a comprehensive income tax treaty with the United States that the Internal Revenue Service has approved for the purposes of the qualified dividend rules and (ii) we were not, in the year prior to the year in which the dividend was paid, and are not, in the year in which the dividend is paid, (a) a passive foreign investment company, or PFIC, or (b) for dividends paid prior to the 2005 tax year, a foreign personal holding company, or FPHC, or foreign investment company, or FIC. The Tax Treaty has been approved for the purposes of the qualified dividend rules. In addition, based on our audited financial statements and relevant market and shareholder data, we believe that we were not treated as a PFIC, FPHC or FIC for U.S. federal income tax purposes with respect to our 2003 or 2004 taxable years. In addition, based on our audited financial statements and our current expectations regarding the value and nature of our assets, the sources and nature of our income and relevant market and shareholder data, we do not anticipate becoming a PFIC for our 2005 taxable year.

Table of Contents

The U.S. Treasury has announced its intention to promulgate rules pursuant to which holders of ADSs or common stock and intermediaries through whom such securities are held will be permitted to rely on certifications from issuers to establish that dividends are treated as qualified dividends. Because such procedures have not yet been issued, it is not clear whether we will be able to comply with them. *Holders of ADSs and common shares should consult their own tax advisers regarding the availability of the reduced dividend tax rate in light of their own particular circumstances.*

Dividends paid by us will not be eligible for the dividends-received deduction allowed to corporations under the U.S. Internal Revenue Code of 1986, as amended (the Code).

Distributions of additional shares or ADSs to U.S. holders with respect to their shares or ADSs that are made as part of a pro rata distribution to all of our shareholders generally will not be subject to U.S. federal income tax.

Taxation of Dispositions

A U.S. holder will recognize gain or loss on the sale or other disposition of the shares or ADSs in an amount equal to the difference between the U.S. holder's basis in such shares or ADSs (in U.S. dollars) and the amount realized on the disposition (in U.S. dollars, determined at the spot rate on the date of disposition if the amount realized is denominated in a foreign currency). Gain or loss realized by a U.S. holder on such sale or other disposition generally will be long-term capital gain or loss if, at the time of disposition, the shares or ADSs have been held for more than one year. The net amount of long-term capital gain recognized by an individual holder is taxed at a reduced rate. Such gain or loss generally will be treated as U.S. source gain or loss for U.S. foreign tax credit purposes.

Gain, if any, realized by a U.S. holder on the sale or other disposition of the shares or ADSs will be treated as U.S. source income for U.S. foreign tax credit purposes. Consequently if a Mexican withholding tax is imposed on the sale or disposition of L Shares or A Shares, a U.S. holder that does not receive significant foreign source income from other sources may not be able to derive effective U.S. foreign tax credit benefits in respect of these Mexican taxes. U.S. holders should consult their own tax advisers regarding the application of the foreign tax credit rules to their investment in, and disposition of, L Shares or A Shares.

Exchange of Shares

A U.S. holder's exchange of A Shares for L Shares will not constitute a taxable event for U.S. federal income tax purposes. An exchanging U.S. holder will have a tax basis in the L Shares equal to the basis such holder had in the exchanged A Shares. An exchanging U.S. holder's holding period for the L Shares will include the holding period such U.S. holder had in the A Shares before such shares were exchanged.

A U.S. holder's exchange of L Shares for AA Shares, pursuant to the option to exchange in respect of such L Shares, will not constitute a taxable event for U.S. federal income tax purposes. An exchanging U.S. holder will have a tax basis in the AA Shares received equal to the basis such holder had in the exchanged L Shares. A U.S. holder's holding period for AA Shares received in such an exchange will include the holding period such U.S. holder had in the L Shares prior to such exchange.

Information Reporting and Backup Withholding

Dividends on, and proceeds from the sale or other disposition of, the shares or ADSs paid to a U.S. holder generally may be subject to the information reporting requirements of the Code and may be subject to backup withholding unless the holder:

establishes that it is a corporation or other exempt holder; or

Table of Contents

provides an accurate taxpayer identification number on a properly completed Internal Revenue Service Form W-9 and certifies that no loss of exemption from backup withholding has occurred.

The amount of any backup withholding from a payment to a holder will be allowed as a credit against the U.S. holder's U.S. federal income tax liability and may entitle such holder to a refund, provided that certain required information is furnished to the Service.

U.S. Tax Consequences for Non-U.S. holders

Distributions. A holder of shares or ADSs that is, with respect to the United States, a foreign corporation or a non-resident alien individual (a non-U.S. holder) generally will not be subject to U.S. federal income or withholding tax on dividends received on shares or ADSs, unless such income is effectively connected with the conduct by the holder of a U.S. trade or business.

Dispositions. A non-U.S. holder of shares or ADSs will not be subject to U.S. federal income or withholding tax on gain realized on the sale of shares or ADSs, unless:

such gain is effectively connected with the conduct by the holder of a U.S. trade or business; or

in the case of gain realized by an individual holder, the holder is present in the United States for 183 days or more in the taxable year of the sale and certain other conditions are met.

Information reporting and backup withholding. Although non-U.S. holders generally are exempt from backup withholding, a non-U.S. holder may be required to comply with certification and identification procedures in order to establish its exemption from information reporting and backup withholding.

CORPORATE GOVERNANCE PRACTICES

Pursuant to Section 303A.11 of the Listed Company Manual of the New York Stock Exchange (NYSE) and Rule 4350(a)(1) of the NASDAQ Stock Market, Inc. (NASDAQ) Marketplace Rules, we are required to provide a summary of the significant ways in which our corporate governance practices differ from those required for U.S. companies under the NYSE and NASDAQ listing standards.

The table below discloses the significant differences between our corporate governance practices and the NYSE and NASDAQ standards.

NYSE Standards	NASDAQ Standards	Our Corporate Governance Practices
----------------	------------------	------------------------------------

Director Independence. Majority of board of directors must be independent. Controlled companies, which would include our company if we were a U.S. issuer, are exempt from this requirement. A controlled company is one in which more than 50% of the voting power is held by an

Director Independence. Majority of board of directors must be independent and directors deemed independent must be identified in a listed company's proxy statement (or annual report on Form 10-K or 20-F if the issuer does not file a proxy statement). Controlled companies, which would include

Director Independence. Pursuant to the Mexican Securities Market Law and our bylaws, our shareholders are required to appoint a Board of Directors of between five and 20 members, 25% of whom must be independent as defined under the Mexican Securities Market Law. Our Board of

We file reports, including annual reports on Form 20-F, and other information with the SEC pursuant to the rules and regulations of the SEC that apply to foreign private issuers. You may read and copy any materials filed with the SEC at its Public Reference Room at 450 Fifth Street, N.W., Washington, D.C. 20549. You may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. As a foreign private issuer, we have been required to make filings with the SEC by electronic means since November 2002. Any filings we make electronically will be available to the public over the Internet at the SEC's web site at www.sec.gov and at our web site at www.telmex.com. (This URL is intended to be an inactive textual reference only. It is not intended to be an active hyperlink to our web site. The information on our web site, which might be accessible through a hyperlink resulting from this URL, is not and shall not be deemed to be incorporated into this Annual Report.)

Table of Contents

Item 11. Quantitative and Qualitative Disclosures about Market Risk

EXCHANGE RATE AND INTEREST RATE RISKS

We are exposed to market risk from changes in currency exchange rates, changes in interest rates and changes in market prices of publicly traded securities.

Interest rate risk exists principally with respect to our indebtedness that bears interest at floating rates. We had P.54,310 million of indebtedness bearing interest at floating rates at December 31, 2004. In 2002, we began entering into interest rate swaps under which we pay fixed-rate interest in pesos and receive floating-rate interest in pesos. In 2003, we began entering into U.S. dollar-denominated interest rate swaps under which we pay fixed-rate interest in U.S. dollars and receive floating-rate interest in U.S. dollars. See *Item 5. Operating and Financial Review and Prospects Hedging*.

Exchange rate risk exists principally with respect to our indebtedness denominated in currencies other than Mexican pesos. As of December 31, 2004, indebtedness denominated in foreign currencies was P.81,291 million, of which P.75,718 million was denominated in U.S. dollars, P.4,344 million was denominated in Brazilian *reais* and P.1,229 million was denominated in other foreign currencies.

Market price risk exists principally with respect to our publicly-traded marketable securities. As of December 31, 2004, we had P.6,146 million in marketable securities, which we hold for trading purposes. Our marketable securities are carried at market value, and gains and losses are recognized in our statement of income. We do not use any derivative instruments to hedge our marketable securities.

We regularly assess our exposure and monitor opportunities to manage these risks, for example through the use of financial instruments. From time to time we use financial instruments to manage our market risk exposures. Since late 2001, we have entered into hedging transactions with respect to our U.S. dollar-denominated indebtedness. We use these transactions, which may be foreign exchange forward exchange and option contracts, to hedge against changes in the exchange rate between the U.S. dollar and the Mexican peso. See *Item 5. Operating and Financial Review and Prospects Hedging*.

SENSITIVITY ANALYSIS DISCLOSURES

Exchange Rates

The potential loss in fair value of financial instruments held at December 31, 2004 that would have resulted from a hypothetical, instantaneous and unfavorable 10% change in currency exchange rates would have been approximately P.6,300 million. Such a change in currency exchange rates would also have resulted in additional interest expense of approximately P.293 million per year, assuming no change in the principal amount of such indebtedness, reflecting the increased costs in pesos of servicing foreign currency indebtedness. This sensitivity analysis assumes an instantaneous unfavorable 10% change in exchange rates affecting the foreign currencies in which our indebtedness is denominated.

Interest Rates

The potential loss in fair market value of financial instruments held at December 31, 2004 that would have resulted from a hypothetical, instantaneous and unfavorable change of 100 basis points in the interest rate applicable to such financial instruments would have been approximately P.784 million. This effect would be fully attributable to the impact of the interest rate change on fixed-rate financial assets and liabilities. A hypothetical, instantaneous and unfavorable change of 100 basis points in the interest rate applicable to floating-rate financial assets and liabilities held at December 31, 2004 would have resulted in additional interest expense of approximately P.378 million per year, assuming no change in the

Table of Contents

principal amount of such indebtedness. The above sensitivity analyses are based on the assumption of an unfavorable 100 basis point movement of the interest rates applicable to each homogeneous category of financial assets and liabilities. A homogeneous category is defined according to the currency in which financial assets and liabilities are denominated and assumes the same interest rate movement with each homogeneous category. As a result, interest rate risk sensitivity analysis may overstate the impact of interest rate fluctuations for such financial instruments, as consistently unfavorable.

Market Prices

The potential loss in fair value of marketable securities held at December 31, 2004 that would have resulted from a hypothetical, instantaneous and unfavorable 10% change in the market price of such securities would have been approximately P.615 million.

Item 12. Description of Securities Other Than Equity Securities

Not applicable.

Table of Contents

PART II

Item 13. Defaults, Dividend Arrearages and Delinquencies

None.

Item 14. Material Modifications to the Rights of Securities Holders and Use of Proceeds

None.

Item 15. Controls and Procedures

We carried out an evaluation under the supervision and with the participation of our management, including our chief executive officer and chief financial officer, of the effectiveness of the design and operation of our disclosure controls and procedures as of December 31, 2004. There are inherent limitations to the effectiveness of any system of disclosure controls and procedures, including the possibility of human error and the circumvention or overriding of the controls and procedures. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance of achieving their control objectives. Based upon our evaluation, our chief executive officer and chief financial officer concluded that the disclosure controls and procedures as of December 31, 2004 were effective to provide reasonable assurance that information required to be disclosed in the reports we file and submit under the Securities Exchange Act is recorded, processed, summarized and reported as and when required.

There has been no change in our internal control over financial reporting during 2004 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Item 16A. Audit Committee Financial Expert

Antonio del Valle Ruíz, the chairman of our audit committee and one of our alternate directors, has financial experience as required by the mandate of our audit committee. Our Board of Directors has established that Mr. del Valle Ruíz is an audit committee financial expert. Mr. del Valle Ruíz, who studied accounting at the *Escuela Bancaria y Comercial*, acquired his expertise through his role as chief executive officer at various Mexican banks over the last 35 years. Mr. del Valle Ruíz is independent, as audit committee member independence is defined in Rule 10A-3 under the U.S. Securities Exchange Act of 1934, as amended. See *Item 6. Directors and Officers of Registrant Audit Committee*.

Item 16B. Code of Ethics

Edgar Filing: TELEFONOS DE MEXICO S A DE C V - Form 20-F

We have adopted a code of ethics, as defined in Item 16B of Form 20-F. Our code of ethics applies to all our personnel, including our chief executive officer, chief financial officer, principal accounting officer and persons performing similar functions. Our code of ethics is available on our web site at www.telmex.com. If we amend the provisions of our code of ethics that apply to our chief executive officer, our chief financial officer, our principal accounting officer and persons performing similar functions, or if we grant any waiver of such provisions, we will disclose such amendment or waiver on our web site at the same address.

Table of Contents**Item 16C. Principal Accountant Fees and Services****Audit and Non-Audit Fees**

The following table sets forth the fees billed to us by our independent auditors, Mancera, S.C., a member practice of Ernst & Young Global, an independent, registered public accounting firm and by other Ernst & Young Global members, during the fiscal years ended December 31, 2004 and 2003:

	Year ended December 31,	
	2004	2003
	(in thousands of constant pesos as of	
	December 31, 2004)	
Audit fees	P. 40,732	P. 23,648
Audit-related fees	2,086	1,167
Tax fees	2,343	911
Other fees	959	2,203
Total fees	P. 46,120	P. 27,928

Audit fees in the above table are the aggregate fees billed by Mancera, S.C. in connection with the audit of our annual financial statements, the review of our interim financial statements and statutory and regulatory audits.

Audit-related fees in the above table are fees billed by Mancera, S.C. for the review of reports on our operations submitted to Cofetel.

Tax fees in the above table are fees billed by Mancera, S.C. for tax compliance services.

Other fees in the above table are fees billed by Mancera, S.C. primarily related to evaluation of the security of our information technology in 2004 and assistance in information technology services, an evaluation of our internal auditing functions and training in 2003.

The increase in 2004 in each of the four fees billed to us by Mancera, S.C. was a result of the consolidation of our non-Mexican operations.

Audit Committee Approval Policies and Procedures

Our audit committee has established pre-approval policies and procedures for the engagement of our independent auditors for services. Such policies and procedures outline services that require specific approval on a case-by-case basis and general services that have been approved in advance by the audit committee, which include statutory and regulatory audits, tax compliance and evaluation of the security of our information technology. Prior to providing any services that require specific pre-approval, our independent auditor, together with our chief financial officer, will jointly present to the audit committee a request for approval of audit services, in which such persons confirm that the request complies with applicable rules.

Item 16D. Exemptions from the Listing Standards for Audit Committees

Not applicable.

Table of Contents**Item 16E. Purchases of Equity Securities by the Issuer and Affiliated Purchasers**

- 15.1 Consent of Mancera, S.C., to the incorporation by reference into the effective registration statement on Form F-3 of Teléfonos de México, S.A. de C.V. (File No. 333-111040) of its report with respect to the consolidated financial statements of Teléfonos de México, S.A. de C.V., which appears in this Annual Report on Form 20-F.

The exhibits do not include any instrument defining the rights of holders of long-term debt of the registrant or of its subsidiaries for which consolidated or unconsolidated financial statements are required to be filed when under such instrument the total amount of securities authorized does not exceed 10% of the total assets of the registrant and its subsidiaries on a consolidated basis. The registrant agrees to furnish a copy of any such instrument to the Securities and Exchange Commission upon its request.

Table of Contents

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Stockholders of

Teléfonos de México, S.A. de C.V.

We have audited the accompanying consolidated balance sheets of Teléfonos de México, S.A. de C.V. and subsidiaries as of December 31, 2004 and 2003, and the related consolidated statements of income, changes in stockholders' equity and changes in financial position for each of the three years in the period ended December 31, 2004. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in Mexico and with the standards of the Public Company Accounting Oversight Board (United States of America). Such standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. We were not engaged to perform an audit of the Company's internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and the significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Teléfonos de México, S.A. de C.V. and subsidiaries at December 31, 2004 and 2003, and the consolidated results of their operations, changes in their stockholders' equity and changes in their financial position for each of the three years in the period ended December 31, 2004, in conformity with accounting principles generally accepted in Mexico, which differ in certain respects from those followed in the United States of America (see Note 19).

AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****Years Ended December 31, 2004 and 2003****(In thousands of Mexican pesos with purchasing power at December 31, 2004)****1. Description of the Business and Significant Accounting Policies***I. Description of business*

Teléfonos de México, S.A. de C.V. and its subsidiaries (collectively the Company or TELMEX) provide telecommunications services, primarily in Mexico. However, as a result of a number of business acquisitions throughout Latin America, starting in 2004, the Company also provides telecommunication services in Argentina, Brazil, Chile, Colombia and Peru.

TELMEX obtains its revenues primarily from telecommunications services, including, among others, domestic and international long-distance and local telephone services, data transmission to corporate networks and Internet services, and the interconnection of the subscribers with cellular networks, as well as the interconnection of domestic long-distance operators , cellular telephone companies and local service operators networks with the TELMEX local network. The Company also obtains revenues from other activities related to its telephone operations, such as the sale of advertising in the published telephone directory and the sale of telephone equipment.

An analysis of the principal subsidiaries and affiliated companies of TELMEX at December 31, 2004 and 2003 is as follows:

TELÉFONOS DE MÉXICO, S.A. DE C.V. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Years Ended December 31, 2004 and 2003

(In thousands of Mexican pesos with purchasing power at December 31, 2004)

The amended Mexican government concession under which the Company operates was signed on August 10, 1990. The concession runs through the year 2026, but it may be renewed for an additional period of fifteen years. The concession defines, among other things, the quality standards for telephone service and establishes the basis for regulating rates.

Under this concession, the Company's basic telephone service rates are subject to a ceiling determined by the Federal Telecommunications Commission (COFETEL). During the last four years, TELMEX management decided not to raise its rates for basic services.

Empresa Brasileira de Telecomunicações S.A. (Embratel) provides domestic and international long-distance services, which include voice, data transmission and other services, and Star One S.A. (Star One), a subsidiary of Embratel, provides satellite services. Both companies operate under two separate concessions granted by the Brazilian federal government via the Brazilian Telecommunications Agency (Anatel). Both concessions expire on December 31, 2005. Embratel's concession for domestic and international long-distance services may be renewed for an additional twenty years and Star One's concession for satellite use may be renewed for an additional fifteen years, subject to certain restrictions. In June 2003, Anatel announced the general terms and conditions under which the licenses will be renewed. Both companies formally notified Anatel of their approval of such terms and conditions and expressed their intention to renew the concessions. The companies have not yet received renewals on the agreements, though management is certain that such concessions will be renewed subject to certain rules.

The rest of the countries operate under concessions and government licenses.

II. Significant accounting policies

The accompanying consolidated financial statements were prepared in conformity with accounting principles generally accepted in Mexico. The significant accounting policies and practices followed in the preparation of the financial statements are described below:

a) Consolidation and basis of translation of financial statements of foreign subsidiaries

The consolidated financial statements include the accounts of Teléfonos de México, S.A. de C.V. and its subsidiaries (see Note 1.I). All the companies operate in the telecommunications sector or they provide services to companies operating in this sector.

Edgar Filing: TELEFONOS DE MEXICO S A DE C V - Form 20-F

All significant intercompany accounts and transactions have been eliminated in consolidation. Minority interest refers to certain foreign subsidiaries.

The financial statements of the subsidiaries located abroad were translated into Mexican pesos in conformity with Mexican Accounting Principles Bulletin B-15, *Transactions in Foreign Currency and Translation of Financial Statements of Foreign Operations*, issued by the Mexican Institute of Public Accountants (MIPA), as follows:

The financial statements as reported by the subsidiaries abroad were adjusted to conform to accounting principles accepted in Mexico. Such conversion includes, among other areas, the recognition of the effects of inflation as required by Mexican Accounting Principles Bulletin B-10, *Accounting Recognition of the Effects of Inflation on Financial Information*, issued by the MIPA, using restatement factors of each country.

All balance sheet amounts, except for stockholders' equity, were translated at the prevailing exchange rate at year-end; stockholders' equity accounts were translated at the prevailing exchange rate at the time capital contributions were made and earnings were generated. The statement of income amounts were translated at the prevailing exchange rate at the end of the reporting period.

(In thousands of Mexican pesos with purchasing power at December 31, 2004)

Translation differences are included in the caption *Effect of translation of foreign entities* and are included in stockholders' equity as part of the caption *Other comprehensive income items*.

b) Recognition of revenues

Revenues are recognized as they accrue and are subject to management's estimates at the date of the financial statements.

Local service revenues are derived from new-line installation charges, monthly service fees, measured usage charges based on the number of calls made and other service charges to subscribers. Local service revenues also include measured usage charges based on the number of minutes in the case of prepayment plans.

Revenues from domestic and international long-distance telephone services are determined on the basis of the duration of the calls and the type of service used. All these services are billed monthly, based on the rates authorized by the relevant regulatory bodies of each country. International long-distance service revenues also include the revenues earned under agreements with foreign telephone service providers or operators for the use of facilities in interconnecting international calls. These agreements specify the rates for the use of such international interconnecting facilities. These service revenues represent the net settlement between the parties and include costs of P.1,212,960, P.1,677,282 and P.1,311,179 in 2004, 2003 and 2002, respectively.

Interconnection service revenues include charges for interconnecting fixed-system users with cellular users, as well as the interconnection of domestic long-distance operators', cellular telephone companies' and local service operators' networks with the TELMEX local network.

Revenues from the sale of prepaid telephone service cards are recognized based on an estimate of the usage of time covered by the prepaid card. Revenues from corporate networks are those related to data transmission services. In 2003, the Company began to defer its revenues from prepaid Internet plans. The effects of this policy change represented a decrease in revenues of 2003 of approximately P. 185,000.

c) Recognition of the effects of inflation on financial information

The Company recognizes the effects of inflation on financial information as required by Bulletin B-10. Consequently, the amounts shown in the accompanying financial statements and in these notes are expressed in thousands of constant Mexican pesos as of December 31, 2004. The

Edgar Filing: TELEFONOS DE MEXICO S A DE C V - Form 20-F

December 31, 2004 restatement factors applied to the financial statements for the years ended December 31, 2003 and 2002 were 1.0519 and 1.0938, corresponding to the percentages of inflation for the periods from January 1 of 2004 and 2003 through December 31, 2004, respectively, based on the Mexican National Consumer Price Index (NCPI) published by Banco de México (the Central Bank).

Plant, property and equipment and construction in progress were restated as described in Note 4. Telephone plant and equipment are mainly depreciated using the straight-line method based on the estimated useful lives of the related assets (see Note 4 d).

Inventories for the operation of the telephone plant are valued at average cost and are restated on the basis of specific indexes. The restated value of inventories is similar to replacement value, not in excess of market.

Other non-monetary assets were restated using adjustment factors obtained from the NCPI.

Capital stock, premium on sale of shares, and retained earnings were restated using adjustment factors obtained from the NCPI.

Other accumulated comprehensive income items includes the deficit from restatement of stockholders' equity, which consists of the accumulated monetary position loss at the time the provisions of Bulletin B-10 were first applied, which was P. 13,591,715 and of the result from holding non-monetary assets, which represents the net difference between restatement by the specific indexation method (see Note 4) and restatement based on the NCPI. This item is included in stockholders' equity as part of the caption *Other comprehensive income items*.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Years Ended December 31, 2004 and 2003

(In thousands of Mexican pesos with purchasing power at December 31, 2004)

The net monetary gain of each year is included in the statement of income as a part of the comprehensive financing cost. The net monetary gain represents the effect of inflation on monetary assets and liabilities. The net monetary gain of each year is included in the statements of income as a part of the comprehensive financing cost.

Mexican Accounting Principles Bulletin B-12, *Statement of Changes in Financial Position*, issued by the MIPA, specifies the appropriate presentation of the statement of changes in financial position based on financial statements restated in constant pesos. Bulletin B-12 identifies the sources and applications of resources representing differences between beginning and ending financial statement balances in constant pesos. In accordance with this bulletin, monetary and foreign exchange gains and losses are not treated as non-cash items in the determination of resources provided by operations.

d) Cash equivalents, marketable securities and instruments available for sale

Cash equivalents consist basically of time deposits in financial institutions with original maturities of 90 days or less.

Marketable securities are represented by equity securities and corporate bonds for trading; instruments available for sale are represented by equity securities. Both are stated at market value. Changes in the fair value of instruments classified as available for sale are included in comprehensive income caption of stockholders' equity through the time they are sold (see paragraph t).

e) Hedging instruments

To protect itself against fluctuations in interest and exchange rates, the Company uses derivatives including interest-rate swaps and short-term currency exchange hedges. The determined gains or losses on these transactions are credited or charged to income using the accrual method, net of the gains or losses on the related liabilities covered, as required by Mexican Accounting Principles Bulletin C-2, *Financial Instruments*, issued by the MIPA (see Note 8).

(In thousands of Mexican pesos with purchasing power at December 31, 2004)

f) Allowance for doubtful accounts

The Company's policy with respect to the allowance for doubtful accounts is basically to provide for accounts receivable more than 90 days old.

g) Equity investments in affiliates

The investment in shares of affiliates is valued using the equity method. This accounting method consists basically of recognizing the investor's equity interest in the results of operations and in the stockholders' equity of investees at the time such results are determined (see Note 6).

h) Goodwill

Goodwill represents the excess purchase price paid for shares of acquired companies over the fair value of the acquired net assets. Goodwill is being amortized using the straight-line method over periods of 5 to 20 years (see paragraph t).

i) Impairment of assets

Effective January 1, 2004, the Company adopted the requirements of Mexican Accounting Principles Bulletin C-15, *Accounting for the Impairment or Disposal of Long-lived Assets*, issued in March 2003.

Such Bulletin C-15 establishes that if there are any indications of impairment in the value of long-lived assets, the related loss should be determined based on the recovery value of the related assets, which is defined as the difference between the assets' fair value and its carrying amount. An impairment loss is recognized if the net carrying amount of the assets exceeds the recovery value.

The application of this new pronouncement had no effect on the Company's financial position or on its results of operations.

j) Exchange differences

Transactions in foreign currencies are recorded at the prevailing exchange rate at the time of the related transactions. Foreign currency denominated assets and liabilities are translated at the prevailing exchange rate at the balance sheet date. Exchange rate differences are charged or credited to income of the year.

k) Labor obligations

Pension, seniority premiums and medical assistance costs are recognized periodically during the years of service of personnel, based on actuarial computations made by independent actuaries, using the projected unit-credit method (see Note 7). Termination payments are charged to income in the year in which the decision to dismiss an employee is made.

(In thousands of Mexican pesos with purchasing power at December 31, 2004)

l) Liability provisions

Mexican Accounting Principles Bulletin C-9, *Liabilities, Provisions, Contingent Assets and Liabilities and Commitments*, went into effect on January 1, 2003. This Bulletin establishes the rules for valuing, presenting and disclosing both liabilities and provisions. This pronouncement also establishes the specific rules for valuing and disclosing contingent assets and liabilities. It includes also the rules for disclosing commitments contracted by the Company in its day-to-day activities.

The initial accumulated effect of applying this accounting pronouncement and of creating the provision for vacations represented a charge to retained earnings at the beginning of the 2003 of P. 748,489 (net of deferred taxes).

m) Income tax and employee profit sharing

The Company recognizes deferred taxes using the asset and liability method. Under this method, deferred taxes are recognized on virtually all temporary differences in balance sheet accounts for financial and tax reporting purposes, using the enacted income tax rate at the date of the financial statements or the income tax rate that will be in force at the time the temporary differences giving rise to deferred tax assets and liabilities are expected to reverse.

The Company evaluates periodically the possibility of recovering deferred tax assets and, if necessary, creates a valuation allowance for those assets that are unlikely to be recovered.

Deferred employee profit sharing is provided on temporary non-recurring differences with a known turnaround time.

n) Comprehensive income

In conformity with Mexican Accounting Principles Bulletin B-4, *Comprehensive Income*, in the particular case of the Company, comprehensive income consists of current year net income plus the effects of deferred taxes, labor obligations, the translation of financial statements of foreign entities, minority interest, the result from holding non-monetary assets and changes in the value of instruments classified as available for sale applied directly to stockholders' equity.

o) Earnings per share

The Company determined earnings per share by dividing majority net income by the weighted average number of shares issued and outstanding during the period. The diluted earnings per share was determined by adjusting earnings per share for the effect of the shares that may be delivered (potentially dilutive shares) (see Note 15), as specified in Mexican Accounting Principles Bulletin B-14, *Earnings per share*.

p) Use of estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires the use of estimates and assumptions in certain areas. Actual results could differ from those estimates.

q) Concentration of risk

The Company invests a portion of its surplus cash in cash deposits in financial institutions with strong credit ratings. TELMEX does not believe it has significant concentrations of credit risks in its accounts receivable because it has a broad and geographically diverse customer base.

r) Segment information

Segment information is prepared based on information used by the Company in its decision making processes based on the services provided and the geographical areas in which TELMEX operates, in conformity with the requirements of Mexican Accounting Principles Bulletin B-5, *Financial Inform*
