**Item 1.01 Entry Into a Material Definitive Agreement.**

On January 7, 2007, Seattle Genetics, Inc. (the Company ) entered into a collaboration agreement with Agensys, Inc. ( Agensys ) to jointly research, develop and commercialize antibody-drug conjugate (ADC) therapies for cancer. The collaboration will encompass combinations of the Company s ADC technology with antibodies developed by Agensys to proprietary cancer targets (the Agensys Agreement ). A copy of the related press release is furnished as Exhibit 99.1 to this Current Report.

Under the terms of the Agensys Agreement, the Company and Agensys will jointly screen and select ADC products to an initial target, co-fund all preclinical and clinical development and share equally in any profits. Agensys will also conduct further preclinical studies aimed at identifying ADC products to up to three (3) additional targets. The Company has the right to exercise a co-development option on one of these additional ADC products at IND filing on the same 50:50 cost and profit-sharing basis. The Company would receive fees, milestones and royalties on ADC products developed and commercialized solely by Agensys. Either party may opt out of co-development and profit-sharing in return for receiving milestones and royalties from the continuing party.

The Agensys Agreement will be filed as an exhibit to the Company s quarterly report on Form 10-Q for the quarter ending March 31, 2007, with portions omitted and filed separately with the Securities and Exchange Commission pursuant to a request for confidential treatment.

The Company does not have any other material relationship with Agensys or its affiliates.
