FORWARD-LOOKING INFORMATION

This report contains forward-looking statements within the meaning of the U.S. federal securities laws that involve risks and uncertainties. Certain statements contained in this report are not purely historical including, without limitation, statements regarding our expectations, beliefs, intentions, anticipations, commitments or strategies regarding the future that are forward-looking. These statements include those discussed in Item 2, Management's Discussion and Analysis of Financial Condition and Results of Operations, including Critical Accounting Estimates, Results of Operations, Off-Balance-Sheet Arrangements and Other Critical Contractual Obligations, Liquidity and Capital Resources, and Recently Issued Accounting Standards, and elsewhere in this report.

In this report, the words may, could, would, might, will, should, plan, forecast, anticipate, believe, expect, intend, estimate, predict, potential, continue, future, moving toward or the negative of these terms or other similar expressions also identify forward-looking statements. Our actual results could differ materially from those forward-looking statements contained in this report as a result of a number of risk factors including, but not limited to, those set forth in the section entitled Factors That May Affect Future Results of Operations and elsewhere in this report. You should carefully consider these risks, in addition to the other information in this report and in our other filings with the SEC. All forward-looking statements and reasons why results may differ included in this report are made as of the date of this report, and we assume no obligation to update any such forward-looking statement or reason why such results might differ.

ECHELON CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1. Summary of Significant Accounting Policies

Basis of Presentation

The condensed consolidated financial statements include the accounts of Echelon Corporation (the Company), a Delaware corporation, and its wholly owned subsidiaries. All significant intercompany accounts and transactions have been eliminated.

While the financial information furnished is unaudited, the condensed consolidated financial statements included in this report reflect all adjustments (consisting only of normal recurring adjustments) which the Company considers necessary for the fair presentation of the results of operations for the interim periods covered and of the financial condition of the Company at the date of the interim balance sheet. The results for interim periods are not necessarily indicative of the results for the entire year. The condensed consolidated financial statements should be read in conjunction with the Company's consolidated financial statements for the year ended December 31, 2006 included in its Annual Report on Form 10-K.

Revenue Recognition

The Company's revenues are derived from the sale and license of its products and to a lesser extent, from fees associated with training, technical support, and custom software design services offered to its customers. Product revenues consist of revenues from hardware sales and software licensing arrangements. Service revenues consist of product technical support (including software post-contract support services), training, and custom software development services.

The Company recognizes revenue when persuasive evidence of an arrangement exists, delivery has occurred, the sales price is fixed or determinable, collectibility is probable, and there are no post-delivery obligations. For hardware sales, including sales to third party manufacturers, these criteria are generally met at the time of shipment. For sales made to the Company's distributor partners, these criteria are generally met at the time the distributor sells the products through to its end-use customer. For software licenses, these criteria are generally met upon shipment to the final end-user. Service revenue is recognized as the training services are performed, or ratably over the term of the support period. In the case of custom software development services, revenue is recognized when the customer accepts the software.

In accordance with AICPA Statement of Position 97-2 (SOP 97-2), *Software Revenue Recognition*, as amended, revenue earned on software arrangements involving multiple elements is allocated to each element based upon the relative fair values of the elements. The Company uses the residual method to recognize revenue when a license agreement includes one or more elements to be delivered at a future date. In these instances, the amount of revenue deferred at the time of sale is based on vendor specific objective evidence (VSOE) of the fair value for each undelivered element. If VSOE of fair value does not exist for each undelivered element, all revenue attributable to the multi-element arrangement is deferred until sufficient VSOE of fair value exists for each undelivered element or all elements have been delivered.

The Company currently sells a limited number of its LONWORKS® Infrastructure products that are considered multiple element arrangements under SOP 97-2. Revenue for the software license element is recognized at the time of delivery of the applicable product to the end-user. The only undelivered element at the time of sale consists of post-contract customer support (PCS). The VSOE for this PCS is based on prices paid by the Company's customers for stand-alone purchases of PCS. Revenue for the PCS element is deferred and recognized ratably over the PCS service period. The costs of providing these PCS services are expensed when incurred.

In certain instances, the Company's Networked Energy Services (NES) System products are sold as part of multiple element arrangements, which may include electricity meters and data concentrators (collectively, the Hardware); NES System software, for which a royalty is charged on a per-meter basis; PCS for the NES System

Table of Contents

software; and extended warranties for the Hardware. These arrangements may require the Company to deliver Hardware over an extended period of time. In accordance with SOP 97-2, when the multiple element arrangement includes NES System software, the Company defers the recognition of all revenue until all software required under the arrangement has been delivered to the customer. Once the software has been delivered, the Company recognizes revenues for the Hardware and NES System software royalties upon customer acceptance of the Hardware based on a constant ratio of meters to data concentrators, which is determined on a contract-by-contract basis. To the extent actual deliveries of either meters or data concentrators is disproportionate to the expected overall ratio for any given arrangement, revenue for the excess meters or data concentrators is deferred until such time as additional deliveries of meters or data concentrators has occurred. The Company has established VSOE for the PCS on the NES System software, as well as for the warranties on its NES Hardware products. These revenues are recognized ratably over the associated service period, which generally commences upon the latter of the delivery of all software, or the customer's acceptance of any given Hardware shipment.

The Company accounts for the rights of return, price protection, rebates, and other sales incentives offered to its distributors in accordance with Statement of Financial Accounting Standards (SFAS) No. 48, *Revenue Recognition When Right of Return Exists*, and EITF 01-09, *Accounting for Consideration Given by a Vendor to a Customer (Including a Reseller of the Vendor's Products)*. During the first and second quarters of 2006, the Company modified its revenue recognition method for sales made to its distributor partners. Under the revised method, revenue on sales made to distributors is deferred until the distributor sells the products through to its end-use customers. The impact of these revenue recognition methodology revisions were one-time reductions in revenues of approximately \$1.0 million during the quarter ended June 30, 2006, and \$3.9 million during the six month period ended June 30, 2006.

Deferred Revenue and Deferred Cost of Goods Sold

Deferred revenue and deferred cost of goods sold result from transactions where the Company has shipped product or performed services for which all revenue recognition criteria have not yet been met. Deferred cost of goods sold related to deferred product revenues includes direct product costs and applied overhead. Deferred cost of goods sold related to deferred service revenues includes direct labor costs and applied overhead. Once all revenue recognition criteria have been met, the deferred revenues and associated cost of goods sold are recognized.

Recent Accounting Pronouncements

With the exception of the Financial Accounting Standards Board (FASB) statement described below, there have been no significant changes in recent accounting pronouncements during the three and six months ended June 30, 2007, as compared to the recent accounting pronouncements described in our Annual Report on Form 10-K for the year ended December 31, 2006.

In February 2007, the FASB issued Statement of Financial Accounting Standards No. 159 (SFAS 159), *The Fair Value Option for Financial Assets and Financial Liabilities*. SFAS 159 permits companies to choose to measure certain financial instruments and certain other items at fair value. The standard requires that unrealized gains and losses on items for which the fair value option has been elected be reported in earnings. SFAS 159 is effective for the Company beginning in its fiscal year ending December 31, 2008, although earlier adoption is permitted. The Company is currently evaluating the impact that SFAS 159 will have on its consolidated financial statements.

2. Short-Term Investments

As of June 30, 2007, the Company's available-for-sale securities had contractual maturities from six to twenty-four months and an average remaining term to maturity of eight months. The fair value of available-for-sale securities was determined based on quoted market prices at the reporting date for those instruments. As of June 30, 2007, the amortized cost basis, aggregate fair value, and gross unrealized holding losses by major security type were as follows (in thousands):

	Amortized Cost	Aggregate Fair Value	Unrealized Holding Losses
U.S. corporate securities:			
Commercial paper	\$ 30,810	\$ 30,809	\$ (1)
Corporate notes and bonds	29,743	29,718	(25)
	60,553	60,527	(26)

Edgar Filing: ECHELON CORP - Form 10-Q

Foreign corporate notes and bonds	517	517	
U.S. government securities	18,851	18,843	(8)
Total investments in debt and equity securities	\$ 79,921	\$ 79,887	\$ (34)

Table of Contents**3. Earnings Per Share**

The following is a reconciliation of the numerators and denominators of the basic and diluted net loss per share computations for the three months and six months ended June 30, 2007 and June 30, 2006 (in thousands, except per share amounts):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2007	2006	2007	2006
Net loss (Numerator):				
Net loss, basic & diluted	\$ (5,126)	\$ (3,107)	\$ (10,511)	\$ (11,596)
Shares (Denominator):				
Weighted average common shares outstanding	39,508	39,615	39,368	39,691
Shares used in basic computation	39,508	39,615	39,368	39,691
Common shares issuable upon exercise of stock options (treasury stock method)				
Shares used in diluted computation	39,508	39,615	39,368	39,691
Net loss per share:				
Basic	\$ (0.13)	\$ (0.08)	\$ (0.27)	\$ (0.29)
Diluted	\$ (0.13)	\$ (0.08)	\$ (0.27)	\$ (0.29)

For the three and six months ended June 30, 2007 and 2006, the diluted net loss per share calculation is equivalent to the basic net loss per share calculation as there were no potentially dilutive stock options due to the Company's net loss position. The number of stock options and stock appreciation rights excluded from this calculation for the three and six months ended June 30, 2007 was 7,501,664. The number of stock options excluded from this calculation for the three and six months ended June 30, 2006 was 7,608,798.

4. Stockholders' Equity and Employee Stock Option Plans*Common Stock*

In March and August 2004, the Company's board of directors approved a stock repurchase program, which authorizes the Company to repurchase up to 3.0 million shares of the Company's common stock. During the three and six months ended June 30, 2007, the Company did not repurchase any shares under the program. As of June 30, 2007, 795,816 shares were available for repurchase. The stock repurchase program will expire in March 2008.

Comprehensive Loss

Comprehensive loss for the Company consists of net loss plus the effect of unrealized holding gains or losses on investments classified as available-for-sale and foreign currency translation adjustments. Comprehensive loss for the three and six months ended June 30, 2007 and 2006 is as follows (in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2007	2006	2007	2006
Net loss	\$ (5,126)	\$ (3,107)	\$ (10,511)	\$ (11,596)
Other comprehensive income/(loss), net of tax:				
Foreign currency translation adjustment	41	388	124	528
Unrealized holding gain/(loss) on available-for-sale securities	(43)	15	(3)	50

Edgar Filing: ECHELON CORP - Form 10-Q

Comprehensive loss	\$ (5,128)	\$ (2,704)	\$ (10,390)	\$ (11,018)
--------------------	------------	------------	-------------	-------------

Table of Contents*Stock Award Activity*

The total intrinsic value of options exercised during the three and six months ended June 30, 2007 was approximately \$3.5 million and \$4.1 million, respectively. The intrinsic value is calculated as the difference between the market value on the date of exercise and the exercise price of the shares.

The total fair value of performance shares vested and released during the three and six months ended June 30, 2007 was approximately \$8,000 and \$839,000, respectively. The fair value is calculated by multiplying the fair market value of the Company's stock on the vesting date by the number of shares vested.

5. Significant Customers

The Company markets its products and services throughout the world to original equipment manufacturers (OEMs) and systems integrators in the building, industrial, transportation, utility/home, and other automation markets. The Company currently has four customers that accounted for a majority of its revenues: EBV Elektronik GmbH (EBV), the Company's primary distributor of its LonWorks® infrastructure products in Europe, Enel S.p.A. (Enel), an Italian utility company (including Enel's third party meter manufacturers), and Telvent Energia y Medioambiente SA (Telvent) and ES Elektrosandberg AB (ES), value added resellers of the Company's NES products. For the three and six months ended June 30, 2007 and 2006, the percentage of the Company's revenues attributable to sales made to these customers was as follows:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2007	2006	2007	2006
Telvent	15.9%		39.0%	
EBV	16.3%	22.0%	13.7%	22.3%
ES	18.7%		11.5%	0.2%
Enel	14.4%	35.4%	7.6%	23.4%
Total	65.3%	57.4%	71.8%	45.9%

The Company's contract with EBV, which has been in effect since 1997 and has been renewed annually thereafter, expires in December 2007. Please refer to Note 11, Related Party, for additional information regarding the Company's agreement with Enel.

6. Commitments and Contingencies*Royalties*

The Company has certain royalty commitments associated with the shipment and licensing of certain of its products. Royalty expense is generally based on a U.S. dollar amount per unit shipped or a percentage of the underlying revenue. Royalty expense, which is recorded as a component of cost of product revenues in our condensed statements of income, was approximately \$150,000 during the quarter ended June 30, 2007, and \$102,000 for the same period in 2006. Royalty expense was approximately \$299,000 for the six months ended June 30, 2007, and \$211,000 for the same period in 2006.

Table of Contents

The Company will continue to be obligated for royalty payments in the future associated with the shipment and licensing of certain of its products. The Company is currently unable to estimate the maximum amount of these future royalties. However, such amounts will continue to be dependent on the number of units shipped or the amount of revenue generated from these products.

Warranties

The Company typically sells its products with a limited warranty against defects in manufacture or performance. When evaluating the reserve for warranty costs, management takes into consideration the term of the warranty coverage, the quantity of product in the field that is currently under warranty, historical return rates, and historical costs of repair. In addition, certain other applicable factors, such as technical complexity, may also be taken into consideration when historical information is not yet available for recently introduced products. Estimated reserves for warranty costs are recorded at the time of shipment. In addition, additional warranty reserves may be established when the Company becomes aware of a specific warranty related problem, such as a product recall. Such additional warranty reserves are based on the Company's current estimate of the total out-of-pocket costs expected to be incurred to resolve the problem, including, but not limited to, costs to replace or repair the defective items and shipping costs. The reserve for warranty costs was \$270,000 as of June 30, 2007 and \$224,000 as of December 31, 2006.

Guarantees

In the normal course of business, the Company provides indemnifications of varying scope to its customers against claims of intellectual property infringement made by third parties arising from the use of its products. Historically, costs related to these indemnification provisions have not been significant. However, the Company is unable to estimate the maximum potential impact of these indemnification provisions on its future results of operations.

As permitted under Delaware law, the Company has entered into agreements whereby it indemnifies its officers and directors for certain events or occurrences while the officer or director is, or was serving, at the Company's request in such capacity. The indemnification period covers all pertinent events and occurrences during the officer's or director's lifetime. The maximum potential amount of future payments the Company could be required to make under these indemnification agreements is unlimited. However, the Company has directors and officers insurance coverage that would enable it to recover a portion of any future amounts paid. The Company believes the estimated fair value of these indemnification agreements in excess of the applicable insurance coverage is minimal.

Taxes

The Company conducts operations in many tax jurisdictions throughout the world. In many of these jurisdictions, non-income based taxes such as property taxes, sales and use taxes, and value-added taxes are assessed on the Company's operations in that particular location. While the Company strives to ensure compliance with these various non-income based tax filing requirements, there have been instances where potential non-compliance exposures have been identified. In accordance with accounting principles generally accepted in the United States of America, the Company makes a provision for these exposures when it is both probable that a liability has been incurred and the amount of the exposure can be reasonably estimated. To date, such provisions have been immaterial, and the Company believes that, as of June 30, 2007, it has adequately provided for such contingencies. However, it is possible that the Company's results of operations, cash flows, and financial position could be harmed if one or more non-compliance tax exposures are asserted by any of the jurisdictions where the Company conducts its operations.

Legal Actions

From time to time, in the ordinary course of business, the Company is subject to legal proceedings, claims, investigations, and other proceedings, including claims of alleged infringement of third-party patents and other intellectual property rights, and commercial, employment, and other matters. In accordance with generally accepted accounting principles, the Company makes a provision for a liability when it is both probable that a liability has been incurred and the amount of the loss can be reasonably estimated. These provisions are reviewed at least quarterly and adjusted to reflect the impacts of negotiations, settlements, rulings, advice of legal counsel, and other

Table of Contents

information and events pertaining to a particular case. While the Company believes it has adequately provided for such contingencies as of June 30, 2007, the amounts of which were immaterial, it is possible that the Company's results of operations, cash flows, and financial position could be harmed by the resolution of any such outstanding claims.

7. Inventories

Inventories are stated at the lower of cost (first-in, first-out) or market and include material, labor and manufacturing overhead. When required, provisions are made to reduce excess and obsolete inventories to their estimated net realizable value. Inventories consist of the following (in thousands):

	June 30, 2007	December 31, 2006
Purchased materials	\$ 3,144	\$ 3,378
Work-in-process	141	107
Finished goods	6,181	7,874
	\$ 9,466	\$ 11,359

8. Accrued Liabilities

Accrued liabilities consist of the following (in thousands):

	June 30, 2007	December 31, 2006
Accrued payroll and related costs	\$ 3,016	\$ 2,776
Accrued taxes	1,366	1,307
Other accrued liabilities	1,039	614
	\$ 5,421	\$ 4,697

9. Segment Disclosure

The Company operates in one principal industry segment: the design, manufacture, and sale of control networking infrastructure products; and markets its products primarily to the building automation, industrial automation, transportation, utility, and home automation markets. The Company's products provide the infrastructure and support required to implement and deploy open and interoperable control networks, enabling everyday devices such as air conditioners, appliances, electricity meters, light switches, thermostats, and valves to be made smart and inter-connected. The Company also provides a range of services to its customers that consist of technical support, training courses covering its networking technology and products, and custom software development.

In total, the Company offers a wide ranging set of control networking infrastructure products and services. Any given customer may purchase a subset of such products and services that are appropriate for that customer's application. For example, a utility might use the Company's Networked Energy Services products to more efficiently manage its distribution grid, while another customer who installs building controls might use the Company's LonWorks Infrastructure transceivers and internet servers to enable the monitoring and management of building occupancy and energy consumption.

The Company manages its business primarily on a geographic basis. The Company's geographic areas are comprised of three main groups: the Americas; Europe, Middle East and Africa (EMEA); and Asia Pacific / Japan (APJ). Each geographic area provides products and services as further described in Item 2, Management's Discussion and Analysis of Financial Condition and Results of Operations. The Company evaluates

Edgar Filing: ECHELON CORP - Form 10-Q

the performance of its geographic areas based on profit or loss from operations. Profit or loss for each geographic area includes sales and marketing expenses and other charges directly attributable to the geographic area and excludes certain expenses that are managed outside the geographic area. Costs excluded from geographic area profit or loss consist primarily of unallocated corporate expenses, which are comprised of product development costs, corporate marketing costs, and other general and administrative expenses, which are separately managed. The Company's long-lived assets

Table of Contents

include property and equipment, goodwill, loans to certain key employees, purchased technology, and deposits on its leased facilities. Long-lived assets are attributed to geographic areas based on the country where the assets are located. As of June 30, 2007 and December 31, 2006, long-lived assets of approximately \$23.4 million and \$22.2 million, respectively, were domiciled in the United States. Long-lived assets for all other locations are not material to the consolidated financial statements. Assets and the related depreciation and amortization are not reported by geography because that information is not reviewed by the executive staff when making decisions about resource allocation to the geographic areas based on their performance.

The Company typically sells its products through a direct sales organization and select third-party electronics representatives in North America. Outside North America, the Company typically sells its products through direct sales organizations in EMEA and APJ, value-added resellers, and local distributors. Revenues are attributed to geographic areas based on the country where the customer is domiciled. Summary information by geography for the three and six months ended June 30, 2007 and 2006 is as follows (in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2007	2006	2007	2006
Revenues from customers:				
Americas	\$ 4,996	\$ 4,695	\$ 9,251	\$ 9,495
EMEA	15,738	13,595	47,100	17,579
APJ	5,962	1,084	9,614	3,045
Total	\$ 26,696	\$ 19,374	\$ 65,965	\$ 30,119
Gross profit:				
Americas	\$ 3,436	\$ 3,092	\$ 6,203	\$ 5,741
EMEA	3,917	7,771	9,060	9,955
APJ	3,514	756	5,754	1,660
Total	\$ 10,867	\$ 11,619	\$ 21,017	\$ 17,356
Income (loss) from operations:				
Americas	\$ 2,399	\$ 1,908	\$ 3,929	\$ 3,308
EMEA	2,459	6,359	6,043	7,087
APJ	2,431	(266)	3,476	(489)
Unallocated	(13,796)	(12,432)	(26,729)	(24,140)
Total	\$ (6,507)	\$ (4,431)	\$ (13,281)	\$ (14,234)

Products sold to Enel and its designated manufacturers (see discussion of Enel below in Note 11- Related Party) accounted for approximately \$3.8 million, or 14.4% of total revenues for the quarter ended June 30, 2007, and \$6.9 million, or 35.4% for the same period in 2006; and \$5.0 million, or 7.6% of total revenues for the six months ended June 30, 2007, and \$7.1 million, or 23.4% for the same period in 2006. For the quarter ended June 30, 2007, 95.9% of the revenues under the Enel program were derived from products shipped to customers in APJ, while the remaining 4.1% from customers in EMEA. For the six months ended June 30, 2007, 95.3% of the revenues derived from products shipped under the Enel program were from customers in APJ and the remaining 4.7% from customers in EMEA.

10. Income Taxes

We adopted FASB Interpretation No. 48 (FIN 48), *Accounting for Uncertainty in Income Taxes- an interpretation of FASB Statement No. 109*, on January 1, 2007. This interpretation prescribes a recognition threshold and measurement attributes for the financial statement recognition and measurement of a tax position taken or expected to be taken on a tax return. FIN 48 also provides guidance on de-recognition of tax benefits, classification on the balance sheet, interest and penalties, accounting in interim periods, and disclosure and transition.

Table of Contents

As a result of the implementation of FIN 48, the Company recognized no material adjustment in the liability for unrecognized income tax benefits. The Company had unrecognized tax benefits of approximately \$1.2 million as of January 1, 2007, all of which, if recognized, would result in a reduction of the Company's effective tax rate. There have been no significant changes to the Company's unrecognized tax benefits since January 1, 2007.

In connection with the adoption of FIN 48, the Company will continue to include interest and penalties related to uncertain tax positions as a component of income tax, which was immaterial for the three and six months ended June 30, 2007. We do not believe it is reasonably possible that the Company's unrecognized tax benefits will change significantly within the next twelve months.

The Company is subject to taxation in the U.S. and various state and foreign jurisdictions. The tax years 1992-2006 remain open to examination by the federal and most state tax authorities due to certain net operating loss and credit carryforward positions.

The provision for income taxes for the quarters and six month periods ended June 30, 2007 and 2006 includes a provision for Federal, state and foreign taxes based on the annual estimated effective tax rate applied to the Company and its subsidiaries for the year. The difference between the statutory rate and the Company's effective tax rate is primarily due to the impact of foreign taxes.

11. Related Party

The law firm of Wilson Sonsini Goodrich & Rosati, P.C. acts as principal outside counsel to our company. Mr. Sonsini, a director of our company, is a member of Wilson Sonsini Goodrich & Rosati, P.C.

In June 2000, the Company entered into a stock purchase agreement with Enel pursuant to which Enel purchased 3.0 million newly issued shares of our common stock. At the same time, the Company also entered into a Research and Development and Technological Cooperation Agreement with an affiliate of Enel (the R&D Agreement). Under the terms of the R&D Agreement, the Company cooperated with Enel to integrate LONWORKS technology into Enel's remote metering management project in Italy. Revenues associated with sales made to Enel and its designated manufacturers for the quarter and six month periods ended June 30, 2007 and 2006 are discussed above in Note 9 Segment Disclosure. As of June 30, 2007 and June 30, 2006, \$158,000 and \$6.8 million, respectively, of the Company's total accounts receivable balance related to amounts owed by Enel and its designated manufacturers.

In October 2006, Enel and the Company entered into a new development and supply agreement as well as a software enhancement agreement. Under the development and supply agreement, Enel will purchase additional metering kit and data concentrator products from the Company, assuming initial acceptance tests are completed successfully. Under the software enhancement agreement, the Company will provide software enhancements to Enel for use in its Contatore Elettronico system. Both the new development and supply agreement and the software enhancement agreement expire on December 31, 2009, although delivery of products and services can extend beyond that date and the agreements may be extended under certain circumstances.

Table of Contents**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

The following discussion should be read in conjunction with the consolidated financial statements and notes thereto included elsewhere in this Quarterly Report. The following discussion contains predictions, estimates, and other forward-looking statements that involve a number of risks and uncertainties about our business. These statements may be identified by the use of words such as we believe, expect, anticipate, intend, plan, goal, continues, may, and similar expressions. In addition, forward-looking statements include statements that refer to projections of our future financial performance, our anticipated growth and trends in our businesses, and other characterizations of future events or circumstances. Such statements are based on our current expectations and could be affected by the uncertainties and risk factors described throughout this filing and particularly in the Factors That May Affect Future Results Of Operations section. Our actual results may differ materially.

OVERVIEW

Echelon Corporation was incorporated in California in February 1988 and reincorporated in Delaware in January 1989. We are based in San Jose, California, and maintain offices in nine foreign countries throughout Europe and Asia. We develop, market, and sell system and network infrastructure products that enable everyday devices — such as air conditioners, appliances, electricity meters, light switches, thermostats, and valves — to be made smart and inter-connected. Working together, products and systems equipped with our technology can monitor and save energy, lower costs, improve productivity and enhance service, quality, safety and convenience. We offer these hardware and software products and related services to OEMs and systems integrators in the building, industrial, transportation, utility/home, and other automation markets.

We have been investing in products for use by electricity utilities in management of electricity distribution. We refer to these products (and related services) as our networked energy services, or NES, offerings. We began to receive modest amounts of NES revenue in 2004, which increased to approximately \$883,000 in 2005 and decreased slightly to \$791,000 in 2006. During the first six months of 2007, NES revenue increased significantly to \$34.3 million. We sell certain of our products to Enel and certain suppliers of Enel for use in Enel's Contatore Elettronico electricity meter management project in Italy. We refer to Echelon's revenue derived from sales to Enel and Enel's designated manufacturers as Enel Project revenue. We refer to all other revenue as LONWORKS Infrastructure, or LWI, revenue. We also provide a variety of technical training courses related to our products and the underlying technology. Some of our customers also rely on us to provide customer support on a per-incident or term contract basis.

During the first and second quarters of 2006, we revised our revenue recognition methodology for sales made to the distributors of our LWI products. Under the revised methodology, we now defer revenue, as well as cost of goods sold, on items shipped to these distributors that remain in their inventories at quarter-end. The revision significantly reduced our first and second quarter 2006 revenues, but did not have an impact on cash flows from operations or require any changes to our historical financial statements. A more thorough explanation of this revision can be found later in this report in the LONWORKS Infrastructure revenues and EBV revenues sections of our discussion on Results of Operations.

We have a history of losses and, we incurred a loss for the quarter and six months ended June 30, 2007 and expect to incur an operating loss for the full year ending December 31, 2007. This expectation is due primarily to two factors. First, as we expected in both 2005 and 2006, revenues from the Enel Project decreased significantly as compared to prior periods as the deployment phase of the Contatore Elettronico project came to an end. We expect that during 2007, Enel Project revenues attributable to the two recently signed agreements with Enel will rise only slightly from 2006 levels. While we expect our NES revenues to increase substantially during 2007, we do not currently believe they will increase rapidly enough to return us to an operating profit for the full year ending December 31, 2007.

The second factor contributing to our expectation for losses in 2007 relates to the fact that, effective January 1, 2006, we began recording compensation expense associated with stock options and other forms of equity compensation as required under SFAS 123R. For the year ended December 31, 2006, the adoption of this new

Table of Contents

accounting standard resulted in an increase in equity compensation expenses of approximately \$4.3 million as compared to the same period in 2005. We expect equity compensation expense in 2007 will be higher than that charged in 2006.

CRITICAL ACCOUNTING ESTIMATES

Our discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these consolidated financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses and related disclosure of contingent assets and liabilities. On an on-going basis, we evaluate our estimates, including those related to our revenues, allowance for doubtful accounts, inventories, commitments and contingencies, income taxes, and asset impairments. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities. Actual results may differ from these estimates under different assumptions or conditions.

We believe the following critical accounting estimates relate to those policies that are most important to the presentation of our consolidated financial statements and require the most difficult, subjective and complex judgments.

Stock-Based Compensation. Effective January 1, 2006, we adopted the provisions of and account for stock-based compensation in accordance with SFAS 123R. We elected the modified-prospective method, under which prior periods are not revised for comparative purposes. Under the fair value recognition provisions of this statement, stock-based compensation cost is measured at the grant date based on the calculated fair value of the award and is recognized as expense ratably over the requisite service period, which is the vesting period.

We currently use the Black-Scholes-Merton (BSM) option-pricing model to determine the calculated fair value of stock options. The determination of the calculated fair value of stock-based payment awards on the date of grant using the BSM option-pricing model is affected by our stock price on the date of grant, as well as a number of highly complex and subjective variables. These variables include the expected volatility of our stock price over the expected term of the option, actual and projected employee stock option exercise behaviors, risk-free interest rates, and expected dividends.

We estimate the expected term of options granted using the simplified method as illustrated in SEC Staff Accounting Bulletin No. 107 (SAB 107). Under the simplified method, the expected term is calculated by taking the average of the vesting term and the contractual term of the option. The expected volatility is based on the historical volatility of our common stock over the most recent period commensurate with the expected life of the option, and does not include any implied volatility as there are currently no market traded options on our stock that meet the criteria required for reliance on implied volatility in accordance with SAB 107. We base the risk-free interest rate that we use in the BSM option-pricing model on U.S. Treasury issues in effect at the time of option grant that have remaining terms similar to the expected term of the option. We have never paid cash dividends on our common stock, and do not anticipate paying cash dividends in the foreseeable future. Therefore, we use an expected dividend yield of zero in the BSM option-pricing model.

SFAS 123R also requires us to record compensation expense for stock-based compensation net of estimated forfeitures, and to revise those estimates in subsequent periods if actual forfeitures differ from those estimates. We use historical data to estimate pre-vesting option forfeitures and record stock-based compensation expense only for those awards that are expected to vest. All share-based payment awards are amortized using the multiple option method over their requisite service period, which is generally the vesting period.

There are significant differences among valuation models, and there is a possibility that we will adopt different valuation models in the future. This may result in a lack of consistency in future periods and may materially affect the calculated fair value estimate of stock-based payments. It may also result in a lack of comparability with other companies that use different models, methods, and assumptions. The BSM option-pricing model was developed for use in estimating the calculated fair value of traded options that have no vesting or hedging restrictions and that are fully transferable, characteristics that are not present in our option grants.

Table of Contents

Existing valuation models, including the BSM and lattice binomial models, may not provide reliable measures of fair values of our stock-based compensation. Consequently, there is a risk that our estimates of the calculated fair values of our stock-based compensation awards on the grant dates may be significantly different from the actual values realized, if any, upon the exercise, expiration, early termination, or forfeiture of those stock-based payments in the future. For example, our employee stock options may expire worthless or otherwise result in zero intrinsic value as compared to the calculated fair values originally estimated on the grant date and reported in our financial statements. Alternatively, value may be realized from these instruments that is significantly higher than the calculated fair values originally estimated on the grant date and reported in our financial statements. There is currently no market-based mechanism or other practical application to verify the reliability and accuracy of the estimated fair values resulting from these valuation models, nor is there a means to compare and adjust the estimates to actual values.

If factors change and we employ different assumptions for estimated stock-based compensation expense in future periods, or if we decide to use a different option-pricing model, stock-based compensation expense in those future periods may differ significantly from what we have recorded in the current period and could materially affect our operating results and earnings per share.

Sales Returns and Allowances. We sell our products and services to OEMs, systems integrators, and our other customers directly through our sales force and indirectly through distributors located in the geographic markets that we serve. Sales to certain distributors are made under terms allowing limited rights of return. Sales to EBV, our largest distributor, accounted for 16.3% of total net revenues for the quarter ended June 30, 2007, and 22.0% for the same period in 2006; and 13.7% of total revenues for the six months ended June 30, 2007 and 22.3% for the same period in 2006. Worldwide sales to distributors, including those to EBV, accounted for approximately 24.1% of total net revenues for the quarter ended June 30, 2007, and 25.5% for the same period in 2006, and 20.1% of total net revenues for the six months ended June 30, 2007 and 29.2% for the same period in 2006.

Net revenues consist of product and service revenues reduced by estimated sales returns and allowances. Provisions for estimated sales returns and allowances are recorded at the time of sale, and are based on management's estimates of potential future product returns and allowances related to product revenues in the current period. In evaluating the adequacy of our sales returns and other allowances, management analyzes historical returns, current and historical economic trends, contractual terms, and changes in customer demand and acceptance of our products.

Other than standard warranty repair work, Enel and its designated contract meter manufacturers do not have rights to return products we ship to them. However, our agreement with Enel contains an acceptance provision, whereby Enel is entitled to inspect products we ship to them to ensure the products conform, in all material respects, to the product's specifications. Once the product has been inspected and approved by Enel, or if the acceptance period lapses before Enel inspects or approves the products, the goods are considered accepted. Prior to shipping our products to Enel, we perform detailed reviews and tests to ensure the products will meet Enel's acceptance criteria. We do not ship products unless they have passed these reviews and tests. As a result, we record revenue for these products upon shipment to Enel. If Enel were to subsequently properly reject any material portion of a shipment for not meeting the agreed upon specifications, we would defer the revenue on that portion of the transaction until such time as Enel and we were able to resolve the discrepancy. Such a deferral could have a material impact on the amount and timing of our Enel related revenues.

Our allowances for sales returns and other sales-related reserves were approximately \$881,000 as of June 30, 2007, and \$791,000 as of December 31, 2006.

Allowance for Doubtful Accounts. We typically sell our products and services to customers with net 30-day payment terms. In certain instances, payment terms may extend to as much as net 90 days. For a customer whose credit-worthiness does not meet our minimum criteria, we may require partial or full payment prior to shipment. Alternatively, customers may be required to provide us with an irrevocable letter of credit prior to shipment.

Table of Contents

We evaluate the collectibility of our accounts receivable based on a combination of factors. In circumstances where we are aware of a specific customer's inability to meet its financial obligations to us, we record a specific allowance against amounts due to reduce the net recognized receivable to the amount we reasonably believe will be collected. These determinations are made based on several sources of information, including, but not limited to, a specific customer's payment history, recent discussions we have had with the customer, updated financial information for the customer, and publicly available news related to that customer. For all other customers, we recognize allowances for doubtful accounts based on the length of time the receivables are past due, the current business environment, the credit-worthiness of our overall customer base, changes in our customers' payment patterns, and our historical experience. If the financial condition of our customers were to deteriorate, or if general economic conditions were to worsen, additional allowances may be required in the future, which could materially impact our results of operations and financial condition. Our allowance for doubtful accounts was \$185,000 as of June 30, 2007, and \$250,000 as of December 31, 2006.

Inventory Valuation. At each balance sheet date, we evaluate our ending inventories for excess quantities and obsolescence. This evaluation includes analyses of sales levels by product and projections of future demand. Inventories on hand, in excess of one year's forecasted demand, are not valued. In addition, we write off inventories that we consider obsolete. We consider a product to be obsolete when one of several factors exists. These factors include, but are not limited to, our decision to discontinue selling an existing product, the product has been re-designed and we are unable to rework our existing inventory to update it to the new version, or our competitors introduce new products that make our products obsolete. We adjust remaining inventory balances to approximate the lower of our cost or market value. If future demand or market conditions are less favorable than our projections, additional inventory write-downs may be required and would be reflected in cost of sales in the period the revision is made.

Warranty Reserves. We evaluate our reserve for warranty costs based on a combination of factors. In circumstances where we are aware of a specific warranty related problem, for example a product recall, we reserve an estimate of the total out-of-pocket costs we expect to incur to resolve the problem, including, but not limited to, costs to replace or repair the defective items and shipping costs. When evaluating the need for any additional reserve for warranty costs, management takes into consideration the term of the warranty coverage, the quantity of product in the field that is currently under warranty, historical warranty-related return rates, historical costs of repair, and knowledge of new products introduced. If any of these factors were to change materially in the future, we may be required to increase our warranty reserve, which could have a material negative impact on our results of operations and our financial condition. Our reserve for warranty costs was \$270,000 as of June 30, 2007, and \$224,000 as of December 31, 2006.

Deferred Income Taxes. We record a valuation allowance to reduce our deferred tax assets to the amount that is more likely than not to be realized. Based on our historical net operating losses, and the uncertainty of our future operating results, we have recorded a valuation allowance that fully reserves our deferred tax assets. If we later determine that, more likely than not, some or all of the net deferred tax assets will be realized, we would then need to reverse some or all of the previously provided valuation allowance. Our deferred tax asset valuation allowance was \$61.2 million as of December 31, 2006.

Valuation of Goodwill. We assess the impairment of goodwill on an annual basis during the quarter ending March 31 and whenever events or changes in circumstances indicate that the carrying value may not be recoverable. Factors we consider important which could trigger an impairment review include the following:

significant underperformance relative to expected historical or projected future operating results;

significant changes in the manner or use of the acquired assets or the strategy for our overall business;

significant negative industry or economic trends; and

significant changes in the composition of the intangible assets acquired.

Our review during the quarter ended March 31, 2007 indicated no impairment. If, as a result of an annual or any other impairment review that we perform in the future, we determine that there has been an impairment of our goodwill, we would be required to take an impairment charge. Such a charge could have a material adverse impact on our financial position and/or operating results.

Table of Contents**RESULTS OF OPERATIONS**

The following table reflects the percentage of total revenues represented by each item in our Condensed Consolidated Statements of Operations for the three and six month ended June 30, 2007 and June 30, 2006:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2007	2006	2007	2006
Revenues:				
Product	99.0%	99.1%	99.3%	98.9%
Service	1.0	0.9	0.7	1.1
Total revenues	100.0	100.0	100.0	100.0
Cost of revenues:				
Cost of product	57.4	37.7	66.6	39.4
Cost of service	1.9	2.3	1.5	3.0
Total cost of revenues	59.3	40.0	68.1	42.4
Gross profit	40.7	60.0	31.9	57.6
Operating expenses:				
Product development	30.5	37.0	24.2	47.0
Sales and marketing	18.5	26.2	15.7	34.0
General and administrative	16.1	19.6	12.1	23.9
Total operating expenses	65.1	82.8	52.0	104.9
Loss from operations	(24.4)	(22.8)	(20.1)	(47.3)
Interest and other income, net	5.6	7.2	4.5	9.3
Loss before provision for income taxes	(18.8)	(15.6)	(15.6)	(38.0)
Income tax expense	0.4	0.4	0.3	0.5
Net loss	(19.2%)	(16.0%)	(15.9%)	(38.5%)

Total Revenues	\$ 65,965	\$ 30,119	\$ 35,846	119.0%
----------------	-----------	-----------	-----------	--------

The \$7.3 million increase in total revenues for the quarter ended June 30, 2007 as compared to the same period in 2006 was primarily the result of a \$9.1 million increase in NES revenues and a \$1.3 million increase in LONWORKS Infrastructure revenues, partially offset by a \$3.0 million decrease in Enel Project revenues. The \$35.8 million increase in total revenues for the six months ended June 30, 2007 as compared to the same period in 2006 was primarily the result of a \$33.8 million increase in NES revenues and a \$4.1 million increase in LONWORKS Infrastructure revenues, partially offset by a \$2.1 million decrease in Enel Project revenues.

Table of Contents*NES revenues*

<i>(Dollars in thousands)</i>	Three Months Ended		2007 over 2006 \$ Change	2007 over 2006 % Change
	June 30,			
	2007	June 30, 2006		
NES revenues	\$ 9,411	\$ 323	\$ 9,088	2,813.6%

<i>(Dollars in thousands)</i>	Six Months Ended		2007 over 2006 \$ Change	2007 over 2006 % Change

	2007	June 30, 2006		
NES revenues	\$ 34,272	\$ 488	\$ 33,784	6,923.0%

NES revenues generated during the three and six months ended June 30, 2007 were primarily related to large scale deployments of our NES system products. NES revenues generated during the quarter and six months ended June 30, 2006 were primarily related to the completion of system trials and, to a lesser extent, shipments of NES products.

We expect that, during 2007, shipments of our NES products will continue to increase over 2006 levels. Our ability to recognize revenue on these shipments depends on several factors, including, but not limited to, delivery to the customer of all of the software called for in any given agreement, modification of the existing shipment schedules included in the contracts that have been awarded to us thus far, and certain contractual provisions, such as customer acceptance. In addition, the complex revenue recognition rules relating to products such as our NES system will likely require us to defer some or all of the revenue associated with NES product shipments until certain conditions are met in a future period. In some instances, the reasons for these deferrals may not be fully under our control, which could result in the actual timing of revenue being significantly different than we currently anticipate.

We also expect that some foreign utilities will require us to price our NES system in the respective utility's local currency, which will expose us to foreign currency risk. For the six months ended June 30, 2007, the portion of our NES revenues conducted in currencies other than the U.S. dollar, principally the Australian dollar, was about \$300,000, or 0.9%. There were no NES revenues conducted in foreign currencies during the six months ended June 30, 2006. In most cases, in the event of a significant contract award, we intend to hedge this foreign currency risk so long as we can secure forward currency contracts that are reasonably priced and that are consistent with the scheduled deliveries for that project. In addition, we will face foreign currency exposures from the time we submit our foreign currency denominated bid until the award of a contract by the utility (the bid to award term). This bid to award term can often exceed several months. If a utility awards us a contract that gives the utility the right to exercise options for additional supply in the future, we would also be exposed to foreign currency risk until such time as these options, if any, were exercised. We may decide that it is too expensive to hedge the foreign currency risks during the bid to award term or for any unexercised options. Any resulting adverse foreign currency fluctuations could significantly harm our revenues, results of operations, and financial condition.

LONWORKS Infrastructure revenues

<i>(Dollars in thousands)</i>	Three Months Ended		2007 over 2006 \$ Change	2007 over 2006 % Change
	June 30,			
	2007	June 30, 2006		
LONWORKS Infrastructure Revenues	\$ 13,453	\$ 12,201	\$ 1,252	10.3%

Table of Contents

	Six Months Ended		2007 over 2006 \$ Change	2007 over 2006 % Change
	June 30, 2007	June 30, 2006		
<i>(Dollars in thousands)</i>				
LONWORKS Infrastructure Revenues	\$ 26,705	\$ 22,581	\$ 4,124	18.3%

Our LONWORKS Infrastructure revenues are primarily comprised of sales of our hardware and software products, and to a lesser extent, revenues we generate from our customer support and training offerings. Both the \$1.3 million increase in LONWORKS Infrastructure revenues for the quarter ended June 30, 2007 as compared to the same period in 2006, and the \$4.1 million increase for the six months ended June 30, 2007 as compared to the same period in 2006, were primarily attributable to the one-time effect of revisions we made in 2006 to our revenue recognition methodology for sales made to our distributor partners. During the first quarter of 2006, we modified our revenue recognition method for sales made to our European distributor, EBV (see EBV revenue discussion below). Under the revised method, revenue on sales made to EBV is deferred until EBV sells the products through to its end use customers. During the second quarter of 2006, we completed a similar revision to our revenue recognition methodology for sales made to our Asian distributor partners. This revision was necessary as, during the quarter, we modified our agreements with our Asian distributor partners. These contractual modifications, which allow the distributors to return certain of their excess inventory, were made to address changing business conditions in our Asian markets and to expand our customer base there. The revenue recognition methodology revisions for EBV and our Asian distributors resulted in one-time reductions in revenue of approximately \$1.0 million during the second quarter of 2006, and \$3.9 million during the six months ended June 30, 2006.

Excluding the impact of these revenue recognition revisions, LONWORKS Infrastructure revenues increased by approximately \$252,000 during the quarter ended June 30, 2007 as compared to the same period in 2006, and by approximately \$224,000 for the six months ended June 30, 2007 as compared to the same period in 2006. We believe these increases are due, at least in part, to our customer's utilization of our products in new applications, such as energy management and street lighting controls.

Also impacting the fluctuations in LONWORKS Infrastructure revenues between the two quarters ended June 30, 2007 and 2006, and the two six month periods ended June 30, 2007 and 2006, were the unfavorable impacts of exchange rates on sales made in foreign currencies, principally the Japanese Yen. These exchange rate fluctuations resulted in a \$37,000 decrease in LONWORKS Infrastructure revenues between the two quarterly periods, and a \$45,000 decrease between the two six month periods.

We believe that, as long as current worldwide economic conditions do not deteriorate, full year 2007 LONWORKS Infrastructure revenues will improve from the \$49.4 million recorded in 2006. This expected improvement, however, will be subject to further fluctuations in exchange rates between the U.S. dollar and the foreign currencies in which we generate revenues, principally the Japanese Yen. If the U.S. dollar were to strengthen against these currencies, our revenues would decrease. Conversely, if the U.S. dollar were to weaken against these currencies, our revenues would increase. The extent of this exchange rate fluctuation increase or decrease will depend on the amount of sales conducted in foreign currencies and the magnitude of the exchange rate fluctuation from year to year. The portion of our LONWORKS Infrastructure revenues conducted in currencies other than the U.S. dollar, principally the Japanese Yen, was about 6.3% for both the six months ended June 30, 2007 and the six months ended June 30, 2006. We do not currently expect that, during the remainder of 2007, the amount of our LONWORKS Infrastructure revenues conducted in these or other foreign currencies will fluctuate significantly from that experienced in 2006. Given the historical and expected future level of sales made in foreign currencies, we do not currently plan to hedge against these currency rate fluctuations. However, if the portion of our LONWORKS Infrastructure revenues conducted in foreign currencies were to grow significantly, we would re-evaluate these exposures and, if necessary, enter into hedging arrangements to help minimize these risks.

Table of Contents*Enel Project revenues*

<i>(Dollars in thousands)</i>	Three Months Ended			
	June 30,		2007 over 2006 \$ Change	2007 over 2006 % Change
	2007	June 30, 2006		
Enel Project Revenues	\$ 3,833	\$ 6,850	\$ (3,017)	(44.0%)

<i>(Dollars in thousands)</i>	Six Months Ended			
	June 30,		2007 over 2006 \$ Change	2007 over 2006 % Change
	2007	June 30, 2006		
Enel Project Revenues	\$ 4,988	\$ 7,050	\$ (2,062)	(29.2%)

In October 2006, we entered into two new agreements with Enel, a development and supply agreement and a software enhancement agreement. Under the development and supply agreement, Enel will purchase additional metering kit and data concentrator products from us. Under the software enhancement agreement, we will provide software enhancements to Enel for use in its Contatore Elettronico system. There were no revenues from either of these new agreements during 2006. The \$3.8 million and \$5.0 million of Enel project revenue recognized during the quarter and six months ended June 30, 2007, respectively, related to initial shipments under the new development and supply agreement. Both the development and supply agreement and the software enhancement agreement expire on December 31, 2009, although delivery of products and services can extend beyond that date and the agreements may be extended under certain circumstances.

Early in 2006, Enel asked us to provide them with spare parts for use in their system in Italy. The \$6.9 million and \$7.1 million of Enel project revenue recognized during the quarter and six months ended June 30, 2006, respectively, represent shipments we made against that request. We sell our products to Enel and its designated manufacturers in U.S. dollars. Therefore, the associated revenues are not subject to foreign currency risks.

We believe that full year 2007 revenues attributable to the Enel project will increase over the \$7.1 million reported in 2006 and will relate primarily to products shipped to Enel and its designated manufacturers under the new development and supply agreement.

EBV revenues

<i>(Dollars in thousands)</i>	Three Months Ended			
	June 30,		2007 over 2006 \$ Change	2007 over 2006 % Change
	2007	June 30, 2006		
EBV Revenues	\$ 4,360	\$ 4,266	\$ 94	2.2%

<i>(Dollars in thousands)</i>	Six Months Ended			
	June 30,		2007 over 2006 \$ Change	2007 over 2006 % Change
	2007	June 30, 2006		
EBV Revenues	\$ 9,008	\$ 6,710	\$ 2,298	34.2%

Sales to EBV, our largest distributor and the sole independent distributor of our products in Europe, accounted for 16.3% of our total revenues for the quarter ended June 30, 2007 and 22.0% of our total revenues for the same period in 2006; and 13.7% of our total revenues for the six months ended June 30, 2007 and 22.3% for the same period in 2006. While EBV revenues increased by only 2.2% during the quarter ended June 30, 2007 as compared to the same period in 2006, they increased substantially during the six months ended June 30, 2007 as compared to the same period in 2006. The primary factor contributing to the \$2.3 million increase between the six month periods was the fact that, during the first quarter of 2006, we revised our revenue recognition methodology for sales made to EBV. Under the revised methodology, revenues, as well as cost of goods sold, are deferred on items shipped to EBV.

Table of Contents

that remain in EBV's inventories at quarter-end. Revenue is then recognized on these products, along with the corresponding gross margin, when EBV sells them to its customers in future periods. This revision resulted in a one-time revenue decrease of approximately \$2.9 million for the quarter ended March 31, 2006. The revision did not have an impact on cash flows from operations or require any changes to historical financial statements.

Excluding the impact of the accounting method revision, EBV's shipments to its customers decreased by approximately \$600,000 during the first half of 2007 as compared to the same period in 2006. We believe this decrease is the result of the Restriction of Hazardous Substances, or RoHS, regulations, which became effective in the European Union July 1, 2006. Under these new rules, manufacturers such as Echelon were required to eliminate certain hazardous substances (e.g., lead, cadmium, mercury, etc.) from the products they sell into the region. We believe that many of EBV's customers increased their purchases of our non-RoHS compliant products during the first half of 2006, prior to effective date of the new regulations. This resulted in a high level of EBV revenue during the first half of 2006.

We currently sell our products to EBV in U.S. dollars. Therefore, the associated revenues are not subject to foreign currency exchange rate risks. However, EBV has the right, on notice to our company, to require that we sell our products to them in Euros.

Our contract with EBV, which has been in effect since 1997 and to date has been renewed annually thereafter, expires in December 2007. If our agreement with EBV is not renewed, or is renewed on terms that are less favorable to us, our revenues could decrease and our future financial position could be harmed.

Product revenues

<i>(Dollars in thousands)</i>	Three Months Ended		2007 over 2006 \$ Change	2007 over 2006 % Change
	June 30,			
	2007	June 30, 2006		
Product Revenues	\$ 26,437	\$ 19,209	\$ 7,228	37.6%

<i>(Dollars in thousands)</i>	Six Months Ended		2007 over 2006 \$ Change	2007 over 2006 % Change
	June 30,			
	2007	June 30, 2006		
Product Revenues	\$ 65,514	\$ 29,783	\$ 35,731	120.0%

The \$7.2 million increase in product revenues for the quarter ended June 30, 2007 as compared to the same period in 2006 was primarily the result of a \$9.0 million increase in NES product revenues and a \$1.2 million increase in LONWORKS Infrastructure product revenues, partially offset by a \$3.0 million decrease in Enel Project revenues. The \$35.7 million increase in product revenues for the six months ended June 30, 2007 as compared to the same period in 2006 was primarily the result of a \$33.6 million increase in NES product revenues and a \$4.2 million increase in LONWORKS Infrastructure product revenues, partially offset by a \$2.1 million decrease in Enel Project revenues.

Service revenues

<i>(Dollars in thousands)</i>	Three Months Ended		2007 over 2006 \$ Change	2007 over 2006 % Change
	June 30,			
	2007	June 30, 2006		
Service Revenues	\$ 259	\$ 165	\$ 94	57.0%

	June			
	2007	June 30, 2006		
Service Revenues	\$ 451	\$ 336	\$ 115	34.2%

Table of Contents

The \$94,000 increase in service revenues during the quarter ended June 30, 2007 as compared to the same period in 2006, and the \$115,000 increase during the six months ended June 30, 2007 as compared to the same period in 2006, were primarily due to an increase in NES support revenues, partially offset by a reduction in our LonWORKS Infrastructure customer support and training revenues. Primarily due to the increase in NES service revenues associated with our large scale deployment projects, we currently expect that our full year 2007 service revenues will increase modestly from the \$761,000 recorded in 2006.

Gross Profit and Gross Margin

	Three Months Ended		2007 over 2006 \$ Change	2007 over 2006 % Change
	June 30, 2007	June 30, 2006		
<i>(Dollars in thousands)</i>				
Gross Profit	\$ 10,867	\$ 11,619	\$ (752)	(6.5%)
Gross Margin	40.7%	60.0%		(19.3)

	Six Months Ended		2007 over 2006 \$ Change	2007 over 2006 % Change
	June 30, 2007	June 30, 2006		
<i>(Dollars in thousands)</i>				
Gross Profit	\$ 21,017	\$ 17,356	\$ 3,661	21.1%
Gross Margin	31.9%	57.6%		(25.7)

Gross profit is equal to revenues less cost of goods sold. Cost of goods sold for product revenues includes direct costs associated with the purchase of components, subassemblies, and finished goods, as well as indirect costs such as allocated labor and overhead; costs associated with the packaging, preparation, and shipment of products; and charges related to warranty and excess and obsolete inventory reserves. Cost of goods sold for service revenues consists of employee-related costs such as salaries and fringe benefits as well as other direct and indirect costs incurred in providing training, customer support, and custom software development services. Gross margin is equal to gross profit divided by revenues.

Both the 19.3 percentage point decrease in gross margin during the second quarter of 2007, as well as the 25.7 percentage point decrease during the first six months of 2007, were due primarily to the mix of revenues reported. In each case, the proportion of our revenues attributable to sales of our NES system products increased significantly as compared to the same periods in 2006. In general, gross margins generated from sales of our NES system products are much lower than those generated from both sales of our LonWORKS Infrastructure products and services as well as sales made under the Enel Project. As a result, when NES revenues are higher as a percentage of overall revenues, as they were during the quarter and six months ended June 30, 2007, overall gross margins will be lower. Conversely, when NES revenues comprise a lower percentage of overall revenues, as they were during the quarter and six months ended June 30, 2006, overall gross margins will be higher.

Partially offsetting the decrease in gross margins during the three and six months ended June 30, 2007 as compared to the same periods in 2006 were the impacts of higher revenues. As discussed above, a portion of our cost of goods sold relates to indirect costs. Some of these costs do not increase or decrease in conjunction with revenue levels, but rather remain relatively constant from quarter to quarter. As a result, when revenues increase, as they did in the quarter and six months ended June 30, 2007 as compared to the same periods in 2006, gross margins are favorably impacted.

We expect that, for full year 2007, overall gross margin will decrease significantly from the 58.2% experienced in 2006 due to the significant increase we expect in NES revenues.

Table of Contents**Operating Expenses***Product Development*

<i>(Dollars in thousands)</i>	Three Months Ended June 30,		2007 over 2006 \$ Change	2007 over 2006 % Change
	2007	June 30, 2006		
Product Development	\$ 8,130	\$ 7,163	\$ 967	13.5%

<i>(Dollars in thousands)</i>	Six Months Ended June 30,		2007 over 2006 \$ Change	2007 over 2006 % Change
	2007	June 30, 2006		
Product Development	\$ 15,931	\$ 14,154	\$ 1,777	12.6%

Product development expenses consist primarily of payroll and related expenses for development personnel, facility costs, equipment and supplies, fees paid to third party consultants, depreciation and amortization, and other costs associated with the development of new technologies and products.

The \$967,000 and \$1.8 million increases in product development expenses for the quarter and six month periods ended June 30, 2007 as compared to the same periods in 2006 were primarily due to increases in compensation expenses for our product development personnel, fees paid to third party service providers, and equipment and supplies used in the development process.

We expect that, for full year 2007, product development expenses will increase over 2006 levels. This increase will primarily be the result of increased development efforts related to our NES system products.

Sales and Marketing

<i>(Dollars in thousands)</i>	Three Months Ended June 30,		2007 over 2006 \$ Change	2007 over 2006 % Change
	2007	June 30, 2006		
Sales and Marketing	\$ 4,953	\$ 5,089	\$ (136)	(2.7%)

<i>(Dollars in thousands)</i>	Six Months Ended June 30,		2007 over 2006 \$ Change	2007 over 2006 % Change
	2007	June 30, 2006		
Sales and Marketing	\$ 10,368	\$ 10,236	\$ 132	1.3%

Sales and marketing expenses consist primarily of payroll and related expenses for sales and marketing personnel, including commissions to sales personnel, travel and entertainment, facilities costs, advertising and product promotion, and other costs associated with our sales and support offices.

The \$136,000 reduction in sales and marketing expenses during the quarter ended June 30, 2007 as compared to the same period in 2006 was primarily the result of a decrease in costs associated with tradeshow. The \$132,000 increase in sales and marketing expenses during the six months ended June 30, 2007 as compared to the same period in 2006 was primarily due to increases in compensation related expenses for our sales and marketing personnel.

Also contributing to the changes in sales and marketing expenses between 2006 and 2007 were the impacts of foreign currency exchange rate fluctuations between the U.S. dollar and the local currencies in several of the foreign countries in which we have operations, including the Euro, the British Pound Sterling, and the Japanese Yen. These exchange rate fluctuations caused sales and marketing expenses to increase by approximately \$74,000 during the second quarter of 2007 as compared to the same period in 2006, and to increase by approximately \$192,000

Edgar Filing: ECHELON CORP - Form 10-Q

during the six months ended June 30, 2007 as compared to the same period in 2006.

Table of Contents

We expect that, during 2007, our sales and marketing expenses will increase over 2006 levels. In addition, if the United States dollar were to weaken against the foreign currencies where we do business, our sales and marketing expenses could increase further. Conversely, if the dollar were to strengthen against these currencies, it would have a favorable impact on our sales and marketing expenses.

General and Administrative

<i>(Dollars in thousands)</i>	Three Months Ended June 30,		2007 over 2006 \$ Change	2007 over 2006 % Change
	2007	June 30, 2006		
General and Administrative	\$ 4,291	\$ 3,798	\$ 493	13.0%

<i>(Dollars in thousands)</i>	Six Months Ended June 30,		2007 over 2006 \$ Change	2007 over 2006 % Change
	2007	June 30, 2006		
General and Administrative	\$ 7,999	\$ 7,200	\$ 799	11.1%

General and administrative expenses consist primarily of payroll and related expenses for executive, accounting, and administrative personnel, professional fees for legal and accounting services rendered to the company, facility costs, insurance, and other general corporate expenses.

Both the \$493,000 and \$799,000 increases in general and administrative expenses during the quarter and six months ended June 30, 2007, respectively, as compared to the same periods in 2006, were primarily attributable to increases in compensation related expenses for our executive, accounting, and administrative personnel, and to a lesser extent, fees paid to our independent accountants and other third party service providers.

We believe that, during 2007, general and administrative costs will increase modestly above 2006 levels.

Interest and Other Income, Net

<i>(Dollars in thousands)</i>	Three Months Ended June 30,		2007 over 2006 \$ Change	2007 over 2006 % Change
	2007	June 30, 2006		
Interest and Other Income, Net	\$ 1,488	\$ 1,404	\$ 84	6.0%

<i>(Dollars in thousands)</i>	Six Months Ended June 30,		2007 over 2006 \$ Change	2007 over 2006 % Change
	2007	June 30, 2006		
Interest and Other Income, Net	\$ 2,985	\$ 2,798	\$ 187	6.7%

Interest and other income, net primarily reflects interest earned by our company on cash and short-term investment balances. In addition, foreign exchange translation gains and losses related to short-term intercompany balances are also reflected in this amount.

During the second quarter of 2007, interest and other income, net increased by approximately \$84,000 as compared to the same period in 2006. This increase was primarily due to a \$168,000 reduction in foreign exchange translation losses, partially offset by a \$101,000 decrease in interest income. During the six months ended June 30, 2007, interest and other income, net increased by approximately \$187,000 as compared to the same period in 2006. As was the case with the change between the two quarterly periods, this increase was primarily due to a \$244,000 reduction in foreign exchange translation losses, partially offset by a \$78,000 decrease in interest income. The reduction in interest income for both the quarter and six months ended June 30, 2007 as compared to the same periods in 2006 is primarily the result of a reduction in our average invested cash balance between the periods.

Table of Contents

Although interest rates have increased substantially since June 2004, we expect that our anticipated operating losses for 2007 will require us to use a portion of our existing cash and short-term investment portfolio to fund ongoing business operations. In addition, we may decide to continue repurchasing our common stock in accordance with our board of directors approved stock repurchase program, which expires in March 2008. As a result, we expect that the average amount of our invested cash will decrease during 2007, which will result in reduced interest income if interest rates remain unchanged. In addition, future fluctuations in the exchange rates between the United States dollar and the currencies in which we maintain our short-term intercompany balances (principally the European Euro and the British Pound Sterling) will also affect our interest and other income, net.

Provision for Income Taxes

	Three Months Ended		2007 over 2006 \$ Change	2007 over 2006 % Change
	June 30, 2007	June 30, 2006		
<i>(Dollars in thousands)</i>				
Provision for Income Taxes	\$ 107	\$ 80	\$ 27	33.8%

	Six Months Ended		2007 over 2006 \$ Change	2007 over 2006 % Change
	June 30, 2007	June 30, 2006		
<i>(Dollars in thousands)</i>				
Provision for Income Taxes	\$ 215	\$ 160	\$ 55	34.4%

The provision for income taxes for 2007 includes a provision for federal, state and foreign taxes based on our annual estimated effective tax rate for the year. The difference between the statutory rate and our effective tax rate is primarily due to the impact of foreign taxes. Income taxes of \$107,000 and \$80,000 for the quarters ended June 30, 2007 and 2006, respectively, and \$215,000 and \$160,000 for the six months ended June 30, 2007 and 2006, respectively, consist primarily of taxes related to profitable foreign subsidiaries and various state minimum taxes.

Although we expect to generate a loss before provision for income taxes in 2007, we will be required to book income tax expense to cover, at a minimum, the foreign taxes owed on income generated by our profitable foreign subsidiaries as well as state minimum taxes. We currently expect our 2007 provision for income taxes will be slightly higher than the amounts provided for in 2006.

OFF-BALANCE-SHEET ARRANGEMENTS AND OTHER CONTRACTUAL OBLIGATIONS

Off-Balance-Sheet Arrangements. We have not entered into any transactions with unconsolidated entities whereby we have financial guarantees, subordinated retained interests, derivative instruments, or other contingent arrangements that expose Echelon to material continuing risks, contingent liabilities, or any other obligation under a variable interest in an unconsolidated entity that provides financing, liquidity, market risk, or credit risk support to us.

Operating Lease Commitments. We lease our present corporate headquarters facility in San Jose, California, under two non-cancelable operating leases. The first lease agreement expires in 2011 and the second lease agreement expires in 2013. Upon expiration, both lease agreements provide for extensions of up to ten years. As part of these lease transactions, we provided the lessor with security deposits in the form of two standby letters of credit totaling \$6.2 million.

In addition to our corporate headquarters facility, we also lease facilities for our sales, marketing, distribution, and product development personnel located elsewhere within the United States and in nine foreign countries throughout Europe and Asia. These operating leases are of shorter duration, generally one to five years, and in some instances are cancelable with advance notice. Lastly, we also lease certain equipment and, for some of our sales personnel, automobiles. These operating leases are generally less than five years in duration.

Purchase Commitments. We utilize several contract manufacturers that manufacture and test our products requiring assembly. These contract manufacturers acquire components and build product based on demand information supplied by us in the form of purchase orders and demand forecasts. These purchase orders and demand forecasts

Table of Contents

generally cover periods that range from one to six months, and in some cases, up to one year. We also obtain individual components for our products from a wide variety of individual suppliers. We generally acquire these components through the issuance of purchase orders, and in some cases through demand forecasts, both of which cover periods ranging from one to nine months.

We also utilize purchase orders when procuring capital equipment, supplies, and services necessary for our day-to-day operations. These purchase orders generally cover periods ranging up to twelve months, but in some instances cover a longer duration.

Indemnifications. In the normal course of business, we provide indemnifications of varying scope to customers against claims of intellectual property infringement made by third parties arising from the use of our products. Historically, costs related to these indemnification provisions have not been significant. However, we are unable to estimate the maximum potential impact of these indemnification provisions on our future results of operations.

As permitted under Delaware law, we have agreements whereby we indemnify our officers and directors for certain events or occurrences while the officer or director is, or was serving, at our request in such capacity. The indemnification period covers all pertinent events and occurrences during the officer's or director's lifetime. The maximum potential amount of future payments we could be required to make under these indemnification agreements is unlimited; however, we have director and officer insurance coverage that could enable us to recover a portion of any future amounts paid. We believe the estimated fair value of these indemnification agreements in excess of the applicable insurance coverage is minimal.

Royalties. We have certain royalty commitments associated with the shipment and licensing of certain products. Royalty expense is generally based on a U.S. dollar amount per unit shipped or a percentage of the underlying revenue. Royalty expense, which is recorded under our cost of products revenue on our consolidated statements of operations, was approximately \$150,000 during the quarter ended June 30, 2007, and \$102,000 for the same period in 2006, and \$299,000 for the six months ended June 30, 2007, and \$211,000 for the same period in 2006.

We will continue to be obligated for royalty payments in the future associated with the shipment and licensing of certain of our products. While we are currently unable to estimate the maximum amount of these future royalties, such amounts will continue to be dependent on the number of units shipped or the amount of revenue generated from these products.

Taxes. We conduct our operations in many tax jurisdictions throughout the world. In many of these jurisdictions, non-income based taxes such as property taxes, sales and use taxes, and value-added taxes are assessed on Echelon's operations in that particular location. While we strive to ensure compliance with these various non-income based tax filing requirements, there have been instances where potential non-compliance exposures have been identified. In accordance with generally accepted accounting principles, we make a provision for these exposures when it is both probable that a liability has been incurred and the amount of the exposure can be reasonably estimated. To date, such provisions have been immaterial, and we believe that, as of June 30, 2007, we have adequately provided for such contingencies. However, it is possible that our results of operations, cash flows, and financial position could be harmed if one or more non-compliance tax exposures are asserted by any of the jurisdictions where we conduct our operations.

Legal Actions. From time to time, in the ordinary course of business, we are subject to legal proceedings, claims, investigations, and other proceedings, including claims of alleged infringement of third-party patents and other intellectual property rights, and commercial, employment, and other matters. In accordance with generally accepted accounting principles, we make a provision for a liability when it is both probable that a liability has been incurred and the amount of the loss can be reasonably estimated. These provisions are reviewed at least quarterly and adjusted to reflect the impacts of negotiations, settlements, rulings, advice of legal counsel, and other information and events pertaining to a particular case. While we believe we have adequately provided for such contingencies as of June 30, 2007, it is possible that our results of operations, cash flows, and financial position could be harmed by the resolution of any such outstanding claims.

LIQUIDITY AND CAPITAL RESOURCES

Since our inception, we have financed our operations and met our capital expenditure requirements primarily from the sale of preferred stock and common stock, although during the years 2002 through 2004, we were also able

Table of Contents

to finance our operations through operating cash flow. From inception through June 30, 2007, we raised \$281.3 million from the sale of preferred stock and common stock, including the exercise of stock options and warrants from our employees and directors.

In March and August 2004, March 2006, and February 2007, our board of directors approved a stock repurchase program, which authorizes us to repurchase up to 3.0 million shares of our common stock, in accordance with Rule 10b-18 and other applicable laws, rules and regulations. There were no repurchases under the program during the three and six months ended June 30, 2007. Since inception, we have repurchased a total of 2,204,184 shares under the program at a cost of \$16.1 million. As of June 30, 2007, 795,816 shares are available for repurchase. The stock repurchase program will expire in March 2008.

The following table presents selected financial information as of June 30, 2007 and for each of the last three fiscal years (dollars in thousands):

	June 30,		December 31,	
	2007	2006	2005	2004
Cash, cash equivalents, and short-term investments	\$ 117,464	\$ 124,157	\$ 154,480	\$ 160,364
Trade accounts receivable, net	18,161	13,918	11,006	17,261
Working capital	125,742	132,420	157,474	173,391
Stockholders' equity	151,093	156,575	181,308	211,062

As of June 30, 2007, we had \$117.5 million in cash, cash equivalents, and short-term investments, a decrease of \$6.7 million as compared to December 31, 2006. Historically, our primary source of cash, other than stock sales, has been receipts from revenue, and to a lesser extent, proceeds from the exercise of stock options and warrants by our employees and directors. Our primary uses of cash have been cost of product revenue, payroll (salaries, commissions, bonuses, and benefits), general operating expenses (costs associated with our offices such as rent, utilities, and maintenance; fees paid to third party service providers such as consultants, accountants, and attorneys; travel and entertainment; equipment and supplies; advertising; and other miscellaneous expenses), acquisitions, capital expenditures, and purchases under our stock repurchase program.

Cash flows from operating activities. Cash flows from operating activities have historically been driven by net income (loss) levels, adjustments for non-cash charges such as depreciation, amortization, in-process research and development charges, and stock-based compensation, as well as fluctuations in operating asset and liability balances. Net cash used in operating activities was \$6.3 million for the six months ended June 30, 2007, a \$2.3 million decrease from the same period in 2006. During the six months ended June 30, 2007, net cash used in operating activities was primarily a result of our net loss of \$10.5 million, changes in our operating assets and liabilities of \$253,000, an increase in accrued investment income of \$245,000, and a reduction in our bad debt reserve balance of \$57,000, partially offset by stock-based compensation expenses of \$2.6 million, and depreciation and amortization expense of \$2.2 million. During the six months ended June 30, 2006, net cash used in operating activities was primarily a result of our net loss of \$11.6 million, changes in our operating assets and liabilities of \$1.5 million, an increase in accrued investment income of \$286,000, and a reduction in our bad debt reserve balance of \$35,000, partially offset by stock-based compensation expenses of \$2.7 million, and depreciation and amortization expense of \$2.2 million.

Cash flows from investing activities. Cash flows from investing activities have historically been driven by transactions involving our short-term investment portfolio, capital expenditures, changes in our long-term assets, and acquisitions. Net cash provided by investing activities was \$4.0 million for the six months ended June 30, 2007, a \$4.0 million increase from the same period in 2006. During the six months ended June 30, 2007, net cash provided by investing activities was primarily the result of proceeds from maturities and sales of available-for-sale short-term investments of \$62.2 million, and changes in our other long-term assets of \$43,000, partially offset by purchases of available-for-sale short-term investments of \$55.1 million, and capital expenditures of \$3.1 million. During the six months ended June 30, 2006, net cash provided by investing activities was primarily the result of proceeds from maturities and sales of available-for-sale short-term investments of \$37.4 million, and changes in our

Table of Contents

other long-term assets of \$22,000, partially offset by purchases of available-for-sale short-term investments of \$34.5 million, and capital expenditures of \$2.9 million.

Cash flows from financing activities. Cash flows from financing activities have historically been driven by the proceeds from issuance of common and preferred stock offset by transactions under our stock repurchase programs. Net cash provided by financing activities was \$2.3 million for the six months ended June 30, 2007, a \$4.7 million increase over the same period in 2006. During the six month period ended June 30, 2007, net cash provided by financing activities was attributable to proceeds of \$3.2 million from issuance of common stock as a result of options exercised by our employees, partially offset by \$842,000 of repurchases of common stock from our employees for payment of income and other payroll taxes they owed upon the vesting of performance shares and upon the exercise of stock options. During the six month period ended June 30, 2006, net cash used in financing activities was attributable to \$2.5 million of open-market purchases of our common stock under our stock repurchase program, partially offset by \$191,000 of proceeds from issuance of common stock as a result of options exercised by our employees.

We use well-regarded investment management firms to manage our invested cash. Our portfolio of investments managed by these investment managers is primarily composed of highly rated United States corporate obligations, United States government securities, and to a lesser extent, foreign corporate obligations, certificates of deposit, and money market funds. All investments are made according to guidelines and within compliance of policies approved by the Audit Committee of our board of directors.

We expect that cash requirements for our payroll and other operating costs will continue at or slightly above existing levels. We also expect that we will continue to acquire capital assets such as computer systems and related software, office and manufacturing equipment, furniture and fixtures, and leasehold improvements, as the need for these items arises. Furthermore, our cash reserves may be used to strategically acquire other companies, products, or technologies that are complementary to our business.

Our existing cash, cash equivalents, and investment balances will likely decline during 2007 as a result of our anticipated operating losses. In addition, any weakening of current economic conditions, or changes in our planned cash outlay, could also negatively affect our existing cash, cash equivalents, and investment balances. However, based on our current business plan and revenue prospects, we believe that our existing cash and short-term investment balances will be sufficient to meet our projected working capital and other cash requirements for at least the next twelve months. Cash from operations could be affected by various risks and uncertainties, including, but not limited to, the risks detailed later in this discussion in the section titled *Factors That May Affect Future Results of Operations*. In the unlikely event that we would require additional financing within this period, such financing may not be available to us in the amounts or at the times that we require, or on acceptable terms. If we fail to obtain additional financing, when and if necessary, our business would be harmed.

RELATED PARTY TRANSACTIONS

During the quarter and six months ended June 30, 2007, and the years ended December 31, 2006, 2005, and 2004, the law firm of Wilson Sonsini Goodrich & Rosati, P.C. acted as principal outside counsel to our company. Mr. Sonsini, a director of our company, is a member of Wilson Sonsini Goodrich & Rosati, P.C.

From time to time, M. Kenneth Oshman, our Chairman of the Board and Chief Executive Officer, uses private air travel services for business trips for himself and for any employees accompanying him. Prior to January 1, 2005, a company controlled by Armas Clifford Markkula, a director of our company, provided these private air travel services. Our net expense with respect to such private air travel services is no greater than comparable first class commercial air travel services. Such net outlays to date have not been material.

In June 2000, we entered into a stock purchase agreement with Enel pursuant to which Enel purchased 3.0 million newly issued shares of our common stock for \$130.7 million (see Note 11 to our accompanying condensed consolidated financial statements for additional information on our transactions with Enel). The closing of this stock purchase occurred on September 11, 2000. At the closing, Enel had agreed that it would not, except under limited circumstances, sell or otherwise transfer any of those shares for a specified time period. That time period expired September 11, 2003. To our knowledge, Enel has not disposed of any of its 3.0 million shares.

Table of Contents

Under the terms of the stock purchase agreement, Enel has the right to nominate a member of our board of directors. As of July 31, 2007, a representative of Enel has not been appointed to our board.

At the time we entered into the stock purchase agreement with Enel, we also entered into a research and development agreement with an affiliate of Enel (the R&D Agreement). Under the terms of the R&D Agreement, we cooperated with Enel to integrate LonWorks technology into Enel's remote metering management project in Italy, the Contatore Elettronico. We completed the sale of our components and products for the deployment phase of the Contatore Elettronico project during 2005. During 2006, we supplied Enel and its designated manufacturers with limited spare parts for the Contatore Elettronico system. In October 2006, we entered into a new development and supply agreement and a software enhancement agreement with Enel. Under the development and supply agreement, Enel and its contract manufacturers will purchase additional electronic components and finished goods from Echelon, assuming certain initial acceptance tests are completed successfully. Under the software enhancement agreement, we will provide software enhancements to Enel for use in its Contatore Elettronico system. Both the new development and supply agreement and the software enhancement agreement expire in December 2009, although delivery of products and services can extend beyond that date and the agreements may be extended under certain circumstances.

For the quarter and six months ended June 30, 2007, we recognized revenue from products and services sold to Enel and its designated manufacturers of approximately \$3.8 million and \$5.0 million, respectively. As of June 30, 2007, \$158,000 of our total accounts receivable balance related to amounts owed by Enel and its designated manufacturers. For the quarter and six months ended June 30, 2006, we recognized revenue from products and services sold to Enel and its designated manufacturers of approximately \$6.9 million and \$7.1 million, respectively. As of June 30, 2006, \$6.8 million of our total accounts receivable balance related to amounts owed by Enel and its designated manufacturers.

RECENTLY ISSUED ACCOUNTING STANDARDS

In February 2007, the FASB issued Statement of Financial Accounting Standards No. 159 (SFAS 159), *The Fair Value Option for Financial Assets and Financial Liabilities*. SFAS 159 permits companies to choose to measure certain financial instruments and certain other items at fair value. The standard requires that unrealized gains and losses on items for which the fair value option has been elected be reported in earnings. SFAS 159 is effective for Echelon beginning in our fiscal year ending December 31, 2008, although earlier adoption is permitted. We are currently evaluating the impact that SFAS 159 will have on our consolidated financial statements.

FACTORS THAT MAY AFFECT FUTURE RESULTS OF OPERATIONS

Interested persons should carefully consider the risks described below in evaluating our company. Additional risks and uncertainties not presently known to us, or that we currently consider immaterial, may also impair our business operations. If any of the following risks actually occur, our business, financial condition or results of operations could be materially adversely affected. In that case, the trading price of our common stock would likely decline.

Our NES revenues may not be predictable.

We and our partners sell our NES system to utilities. For several reasons sales cycles with utility companies are generally extended and unpredictable. Utilities generally have complex budgeting, purchasing, and regulatory processes that govern their capital spending. In addition, in many instances, a utility may require one or more field trials of our NES system before moving to a volume deployment. There is also generally an extended development and integration effort required in order to incorporate a new technology into a utility's existing infrastructure. A number of other factors may also need to be addressed before the utility decides to engage in a full-scale deployment of our NES system, including:

the time it takes for utilities to evaluate multiple competing bids, negotiate terms, and award contracts for large scale metering system deployments;

Table of Contents

the deployment schedule for projects undertaken by our utility or systems integrator customers; and

delays in installing, operating, and evaluating the results of NES system field trials.

Once a utility decides to move forward with a large-scale deployment of our NES system, the timing of and our ability to recognize revenue on our NES system product shipments will depend on several factors. These factors, some of which may not be under our control, include shipment schedules that may be delayed or subject to modification, other contractual provisions, such as customer acceptance of all or any part of the system, and our ability to manufacture and deliver quality products according to expected schedules. In addition, the complex revenue recognition rules relating to products such as our NES system may also require us to defer some or all of the revenue associated with NES product shipments until certain conditions are met in a future period. As a consequence, our ability to predict the amount of NES revenues that we may expect to recognize in any given fiscal quarter is likely to be limited. As NES revenues account for an increasing percentage of our overall revenues, we and our investors will have increasing difficulty in projecting our financial results.

Sales of our NES system may fail to meet our financial targets.

We have invested and intend to continue to invest significant resources in the development and sales of our NES system. Our long-term financial goals include expectations for a reasonable return on these investments. However, to date the revenues generated from sales of our NES system products have yielded very little gross profit, while our NES related operating expenses have increased significantly. Additionally, gross margins on our NES system offerings are currently lower than gross margins on our other product offerings.

In order to achieve our financial targets, we must meet the following objectives:

Increase market acceptance of our NES system products in order to increase revenues;

Increase gross margin from our NES revenues by reducing the cost of manufacturing our NES system products;

Manage the manufacturing transition to reduced-cost NES products; and

Manage our operating expenses to a reasonable percentage of revenues.

We cannot assure you that we will meet any or all of these objectives to the extent necessary to achieve our financial goals.

We depend on a limited number of key suppliers.

Our future success will depend significantly on our ability to timely manufacture our products cost-effectively, in sufficient volumes, and in accordance with quality standards. For most of our products requiring assembly, we rely on a limited number of contract electronic manufacturers (CEMs), principally WKK Technology, TYCO TEPC/Transpower, and Flextronics. These CEMs procure material and assemble, test, and inspect the final products to our specifications. This strategy involves certain risks, including reduced control over quality, costs, delivery schedules, availability of materials, components, and finished products, and manufacturing yields. In addition, CEMs can experience turnover and instability, exposing us to additional risks as well as missed commitments to our customers.

We also maintain manufacturing agreements with a limited number of semiconductor manufacturers for the production of key products, including those used in our NES system. The Neuron Chip, which is an important component that we and our customers use in control network devices, is currently manufactured and distributed by two providers, Toshiba and Cypress Semiconductor. Another semiconductor supplier, STMicroelectronics, manufactures our power line smart transceiver products, for which we have no alternative source. In addition, we currently purchase several key products and components from sole or limited source suppliers with which we do not maintain signed agreements that would obligate them to supply to us on negotiated terms.

Table of Contents

We cannot be certain that these and other key suppliers will continue to supply us with critical products or components. If any of our key suppliers were to stop manufacturing our products or supplying us with our key components, it could be expensive and time-consuming to find a replacement. In addition, as our NES business grows, we will be required to expand our business with our key suppliers or find additional sources of supply. There is no guarantee that we would be able to find acceptable alternative or additional sources. Additional risks that we face if we must transition between CEMs include:

moving raw material and in-process inventory between locations in different parts of the world;

reestablishing acceptable manufacturing processes with a new work force; and

exposure to excess or obsolete inventory held by contract manufacturers for use in our products.

The failure of any key manufacturer to produce a sufficient number of products on time, at agreed quality levels, and fully compliant with our product, assembly and test specifications could adversely affect our revenues and gross profit, and could result in claims against us by our customers, which could harm our results of operations and financial position.

We may incur penalties and/or be liable for damages with respect to sales of our NES system products.

In the event of late deliveries, late or improper installations or operations, failure to meet product specifications or other product failures, failure to achieve performance specifications, indemnities or other compliance issues, the agreements governing the sales of the NES system will expose us to penalties, damages and other liabilities. Even in the absence of such contractual provisions, we may agree to assume certain liabilities for the benefit of our customers. Any such liabilities would have an adverse effect on our financial condition and operating results.

Our products use components or materials that may be subject to price fluctuations, shortages, or interruptions of supply.

We may be vulnerable to price increases for products, components, or materials, such as copper and cobalt. In addition, in the past we have occasionally experienced shortages or interruptions in supply for certain of these items, including products or components that have been or will be discontinued, which caused us to delay shipments beyond targeted or announced dates. To help address these issues, we may decide to purchase quantities of these items that are in excess of our estimated requirements. As a result, we could be forced to increase our excess and obsolete inventory reserves to provide for these excess quantities, which could harm our operating results.

If we experience any shortage of products or components of acceptable quality, or any interruption in the supply of these products or components, or if we are not able to procure them from alternate sources at acceptable prices and within a reasonable period of time, our revenues, gross profits or both could decrease. In addition, under the terms of some of our contracts with our customers, we may also be subject to penalties if we fail to deliver our products on time.

The markets for our products are highly competitive.

Competition in our markets is intense and involves rapidly changing technologies, evolving industry standards, frequent new product introductions, and rapid changes in customer requirements. In each of our markets, we compete with a wide array of manufacturers, vendors, strategic alliances, systems developers and other businesses.

The principal competitive factors that affect the markets for our products include the following:

our ability to anticipate changes in customer requirements and to develop new or improved products that meet these requirements in a timely manner;

Edgar Filing: ECHELON CORP - Form 10-Q

the price and features of our products such as adaptability, scalability, functionality, ease of use, and the ability to integrate with other products;

Table of Contents

our product reputation, quality, performance, and conformance with established industry standards;

our customer service and support;

warranties, indemnities, and other contractual terms; and

customer relationships and market awareness.

Competitors for our NES system products include the Bayard Capital group of companies, DCSI, Elster, General Electric, Iskraemeco, Itron/Actaris, Kamstrup, Sensus, and Siemens, which directly or through IT integrators such as IBM or telecommunications companies such as Telenor, offer metering systems that compete with our NES system offering.

For our LWI products, our competitors include some of the largest companies in the electronics industry, operating either alone or together with trade associations and partners. Key company competitors include companies such as Siemens in the building industry; Allen-Bradley (a subsidiary of Rockwell Automation), Groupe Schneider and Siemens in the industrial automation industry; Siemens in the transportation industry; and Zensys in the home control market. Key industry standard and trade group competitors include BACnet, DALI, and Konnex in the buildings industry; DeviceNet, HART, and Profibus in the industrial control market; DLMS in the utility industry; Echonet, Zigbee and the Z-Wave alliance in the home control market; and the Train Control Network (TCN) in the rail transportation market. Each of these standards and/or alliances is backed by one or more competitors. For example, the Zigbee alliance includes over 150 member companies with promoter members such as Eaton, Freescale, Motorola, Texas Instruments, STMicroelectronics, Ember, Siemens, Honeywell, Mitsubishi Electric, Samsung, Schneider Electric, Tendril, Huawei Technologies, and Philips.

Many of our competitors, alone or together with their trade associations and partners, have significantly greater financial, technical, marketing, service and other resources, significantly greater name recognition, and broader product offerings. In addition, the utility metering market is experiencing a trend towards consolidation. As a result, these competitors may be able to devote greater resources to the development, marketing, and sale of their products, and may be able to respond more quickly to changes in customer requirements or product technology. If we are unable to compete effectively in any of the markets we serve, our revenues, results of operations, and financial position would be harmed.

Liabilities resulting from defects in or misuse of our products, whether or not covered by insurance, may delay our revenues and increase our liabilities and expenses.

Our products may contain undetected errors or failures when first introduced, as new versions are released, or as a result of the manufacturing process. In addition, our customers or their installation partners may improperly install or implement our products, which could delay completion of a deployment or hinder our ability to win a subsequent award. Furthermore, because of the low cost and interoperable nature of our products, LONWORKS technology could be used in a manner for which it was not intended.

If errors or failures are found in our products, we may not be able to successfully correct them in a timely manner, or at all. Such errors or failures could delay our product shipments and divert our engineering resources while we attempt to correct them. In addition, we could decide to extend the warranty period, or incur other costs outside of our normal warranty coverage, to help address any known errors or failures in our products and mitigate the impact on our customers.

To address these issues, the agreements we maintain with our customers may contain provisions intended to limit our exposure to potential errors and omissions claims as well as any liabilities arising from them. In certain very limited instances, these agreements require that we be named as an additional insured on our customers' insurance policies. However, our customer contracts and additional insured coverage may not effectively protect us against the liabilities and expenses associated with errors or failures attributable to our products.

Table of Contents

Defects in our products may also cause us to be liable for losses in the event of property damage, harm or death to persons, claims against our directors or officers, and the like. Such liabilities could harm our reputation, expose our company to liability, and adversely affect our operating results and financial position.

To help reduce our exposure to these types of liabilities, we currently maintain property, general commercial liability, errors and omissions, directors and officers, and other lines of insurance. However, it is possible that such insurance may not be available in the future or, if available, may be insufficient in amount to cover any particular claim, or we might not carry insurance that covers a specific claim. In addition, we believe that the premiums for the types of insurance we carry will continue to fluctuate from period to period. Significant cost increases could also result in increased premiums or reduced coverage limits. Consequently, if we elect to reduce our coverage, or if we do not carry insurance for a particular type of claim, we will face increased exposure to these types of claims.

If we do not maintain adequate distribution channels, our revenues will be harmed.

We market our NES system products directly, as well as through selected VARs and integration partners. We believe that a significant portion of our NES system sales will be made through our VARs and integration partners, rather than directly by our company. To date, our VARs and integration partners have greater experience in overseeing projects for utilities. As a result, if our relationships with our VARs and integration partners are not successful, or if we are not able to create similar distribution channels for our NES system products with other companies in various geographic areas, revenues from sales of our NES system products may not meet our financial targets, which will harm our operating results and financial condition.

Currently, significant portions of our LWI revenues are derived from sales to distributors, including EBV, the primary independent distributor of our products to OEMs in Europe. Historically, sales to EBV, as well as sales to our other distributor partners, have accounted for a substantial portion of our total LWI revenues. Agreements with our distributor partners are generally renewed on an annual basis. If any of these agreements are not renewed, we would be required to locate another distributor or add our own distribution capability to meet the needs of our end-use customers. Any replacement distribution channel could prove less effective than our current arrangements. In addition, if any of our distributor partners fail to dedicate sufficient resources to market and sell our products, our revenues would suffer. Furthermore, if they significantly reduce their inventory levels for our products, service levels to our end-use customers could decrease.

We face financial and operational risks associated with international operations.

We have operations located in nine countries around the world. Revenues from international sales, which include both export sales and sales by international subsidiaries, accounted for about 81.2% of our total net revenues for the quarter ended June 30, 2007, and 75.9% for the same period in 2006, and 86.0% of our total net revenues for the six months ended June 30, 2007, and 68.7% for the same period in 2006. We expect that international sales will constitute an even more significant portion of our total net revenues as our NES revenues, which currently result predominantly from international sales, will increase significantly in 2007 as compared to 2006.

Changes in the value of currencies in which we conduct our business relative to the U.S. dollar could cause fluctuations in our reported financial results. The three primary areas where we are exposed to foreign currency fluctuations are revenues, cost of goods sold, and operating expenses.

With respect to revenues generated in foreign currencies, our historical foreign currency exposure has been related primarily to the Japanese Yen and has not been material to our consolidated results of operations. However, in the future, we expect that some foreign utilities may require us to price our NES system in the utility's local currency, which will increase our exposure to foreign currency risk. In addition, we have agreed with EBV, our European distributor, that upon notice from EBV, we will sell our products to EBV in European Euros rather than U.S. dollars. If EBV were to exercise this right, our revenue exposure to foreign currency fluctuations would increase.

For our cost of goods sold, the majority of our products are assembled by CEMs in China, and to a lesser extent, in the European Union, although our transactions with these vendors have historically been denominated in U.S. dollars. These vendors may require us to pay in their local currency, or demand a U.S. dollar price adjustment or

Table of Contents

other payment to address a change in exchange rates, which would increase our cost to procure our products. This is particularly a risk in China, where any future revaluations of the Chinese currency against the U.S. dollar could result in significant cost increases.

We use the local currency to pay for our operating expenses in the various countries where we have operations. If the value of the U.S. dollar declines as compared to the local currency where the expenses are incurred, our expenses, when translated back into U.S. dollars, will increase.

To date, we have not hedged any of our foreign currency exposures and currently do not maintain any hedges to mitigate our foreign currency risks. Consequently, any resulting adverse foreign currency fluctuations could significantly harm our revenues, cost of goods sold, or operating expenses.

Additional risks inherent in our international business activities include the following:

costs of localizing products for foreign countries and lack of acceptance of non-local products in foreign countries;

inherent challenges in managing international operations;

the burdens of complying with a wide variety of foreign laws and unexpected changes in regulatory requirements, tariffs, and other trade barriers;

economic and political conditions in the countries where we do business;

differing vacation and holiday patterns in other countries, particularly in Europe;

labor actions generally affecting individual countries, regions, or any of our customers, which could result in reduced demand for our products;

international terrorism and anti-American sentiment; and

potentially adverse tax consequences, including restrictions on repatriation of earnings.

Any of these factors could have a material adverse effect on our revenues, results of operations, and our financial condition.

The sales cycle for our LWI products is lengthy and unpredictable.

The sales cycle between initial LWI customer contact and execution of a contract or license agreement with a customer or purchase of our products, can vary widely. Initially, we must educate our customers about the potential applications of and cost savings associated with our products. If we are successful in this effort, OEMs typically conduct extensive and lengthy product evaluations before making a decision to design our products into their offerings. Once the OEM decides to incorporate our products, volume purchases of our products are generally delayed until the OEM's product development, system integration, and product introduction periods have been completed. In addition, changes in our customer's budgets, or the priority they assign to control network development, could also affect the sales cycle.

We generally have little or no control over these factors, any of which could prevent or substantially delay our ability to complete a transaction and could adversely affect the timing of our revenues and results of operations.

If we sell our NES system products directly to a utility, we will face additional risks.

Edgar Filing: ECHELON CORP - Form 10-Q

If we sell our NES system products to a utility directly, we may be required to assume responsibility for installing the NES system in the utility's territory, integrating the NES system into the utility's operating and billing system, overseeing management of the combined system, and undertaking other activities. To date, we do not have

Table of Contents

any significant experience with providing these types of services. As a result, if we sold directly to a utility, it may be necessary for us to contract with third parties to satisfy these obligations. We cannot assure you that we would find appropriate third parties to provide these services on reasonable terms, or at all. Assuming responsibility for these or other services would add to the costs and risks associated with NES system installations, and could also negatively affect the timing of our revenues and cash flows related to these transactions.

Fluctuations in our operating results may cause our stock price to decline.

Our quarterly and annual results have varied significantly from period to period, and we have sometimes failed to meet securities analysts expectations. Moreover, we have a history of losses and we expect to incur substantial losses again in 2007. Our future operating results will depend on many factors, many of which are outside of our control, including the following:

the mix of products and services that we sell may change to a less profitable mix;

the complex revenue recognition rules relating to products such as our NES system could require us to defer some or all of the revenue associated with NES product shipments until certain conditions, such as delivery and acceptance criteria, are met in a future period;

our contract electronic manufacturers may not be able to provide quality products on a timely basis, especially during periods where capacity in the CEM market is limited;

shipment and payment schedules may be delayed;

our products may not be manufactured in accordance with specifications or our established quality standards, or may not perform as designed;

our products may not be accepted by utilities, OEMs, systems integrators, service providers and end-users at the levels we project;

downturns in any customer's or potential customer's business, or declines in general economic conditions, could cause significant reductions in capital spending, thereby reducing the levels of orders from our customers;

recording of expense relating to equity compensation as required under Statement of Financial Accounting Standard (SFAS) No. 123(revised 2004), *Share-Based Payment*, will decrease our earnings;

we may incur costs associated with any future business acquisitions; and

results of impairment tests for goodwill and other intangible assets in accordance with SFAS No. 142, *Goodwill and Other Intangible Assets*, with respect to goodwill and other identified intangible assets that we acquired in the past or that we may acquire in the future may negatively affect our earnings and financial condition.

Any of the above factors could, individually or in the aggregate, have a material adverse effect on our results of operations and our financial condition, which could cause our stock price to decline.

We may be unable to promote and expand acceptance of our open, interoperable control systems over competing protocols, standards, or technologies.

LONWORKS technology is open, meaning that many of our technology patents are broadly licensed without royalties or license fees. As a result, our customers are able to develop hardware and software solutions that compete with some of our products. Because some of our customers are OEMs that develop and market their own control systems, these customers in particular could develop competing products based on our open technology. For

Table of Contents

instance, we have published all of the network management commands required to develop software that competes with our LNS software.

In addition, many of our competitors are dedicated to promoting closed or proprietary systems, technologies, software and network protocols or product standards that differ from or are incompatible with ours. We also face strong competition from large trade associations that promote alternative technologies and standards for particular vertical applications or for use in specific countries. These include BACnet, DALI, and KNX in the buildings market; DeviceNet, HART, and Profibus in the industrial controls market; TCN in the rail transportation market, DLMS in the metering market, and Echonet, Zigbee, and Z-Wave in the home control market.

Our technologies, protocols, or standards may not be successful or we may not be able to compete with new or enhanced products or standards introduced by our competitors, which would have a material adverse affect on our revenues, results of operations, and financial condition.

Our business may suffer if it is alleged or found that our products infringe the intellectual property rights of others.

We may be contractually obligated to indemnify our customers or other third parties that use our products in the event our products are alleged to infringe a third party's intellectual property rights. From time to time, we may also receive notice that a third party believes that our products may be infringing patents or other intellectual property rights of that third party. Responding to those claims, regardless of their merit, can be time consuming, result in costly litigation, divert management's attention and resources, and cause us to incur significant expenses.

As the result of such a claim, we may elect or be required to redesign our products, some of our product offerings could be delayed, or we could be required to cease distributing some of our products. In the alternative, we could seek a license to the third party's intellectual property. Even if our products do not infringe, we may elect to take a license or settle to avoid incurring litigation costs. However, it is possible that we would not be able to obtain such a license or settle on reasonable terms, or at all.

Lastly, our customers may not purchase our products if they are concerned our products may infringe third party intellectual property rights. This could reduce the market opportunity for the sale of our products and services.

Any of the foregoing risks could have a material adverse affect on our revenues, results of operations, and financial condition.

We have limited ability to protect our intellectual property rights.

Our success depends significantly upon our intellectual property rights. We rely on a combination of patent, copyright, trademark and trade secret laws, non-disclosure agreements and other contractual provisions to establish, maintain and protect these intellectual property rights, all of which afford only limited protection. If any of our patents fail to protect our technology, or if we do not obtain patents in certain countries, our competitors may find it easier to offer equivalent or superior technology.

We have also registered or applied for registration for certain trademarks, and will continue to evaluate the registration of additional trademarks as appropriate. If we fail to properly register or maintain our trademarks or to otherwise take all necessary steps to protect our trademarks, the value associated with the trademarks may diminish. In addition, if we fail to protect our trade secrets or other intellectual property rights, we may not be able to compete as effectively in our markets.

Despite our efforts to protect our proprietary rights, unauthorized parties may attempt to copy aspects of our products or services or use information that we regard as proprietary. Any of our patents, trademarks, copyrights or intellectual property rights could be challenged, invalidated or circumvented. In addition, we cannot assure you that we have taken or will take all necessary steps to protect our intellectual property rights. Third parties may also independently develop similar technology without breach of our trade secrets or other proprietary rights. In addition, the laws of some foreign countries, including several in which we operate or sell our products, do not protect proprietary rights to as great an extent as do the laws of the United States and it may take longer to receive a remedy.

Table of Contents

from a court outside of the United States. Also, some of our products are licensed under shrink-wrap license agreements that are not signed by licensees and therefore may not be binding under the laws of certain jurisdictions.

From time to time, litigation may be necessary to defend and enforce our proprietary rights. As a result, we could incur substantial costs and divert management resources, which could harm our business, regardless of the final outcome. Despite our efforts to safeguard and maintain our proprietary rights both in the United States and abroad, we may be unsuccessful in doing so. Also, the steps that we take to safeguard and maintain our proprietary rights may be inadequate to deter third parties from infringing, misusing, misappropriating, or independently developing our technology or intellectual property rights, or to prevent an unauthorized third party from misappropriating our products or technology.

Our executive officers and technical personnel are critical to our business.

Our company's success depends substantially on the performance of our executive officers and key employees. Due to the specialized technical nature of our business, we are particularly dependent on our Chief Executive Officer, our President and Chief Operating Officer, and our technical personnel. Our future success will depend on our ability to attract, integrate, motivate and retain qualified technical, sales, operations, and managerial personnel, as well as our ability to successfully implement a plan for management succession.

Competition for qualified personnel in our business areas is intense, and we may not be able to continue to attract and retain qualified executive officers and key personnel. Our product development and marketing functions are largely based in Silicon Valley, which is a highly competitive marketplace. It may be particularly difficult to recruit, relocate and retain qualified personnel in this geographic area. Moreover, the cost of living, including the cost of housing, in Silicon Valley is known to be high. Because we are legally prohibited from making loans to executive officers, we will not be able to assist potential key personnel as they acquire housing or incur other costs that might be associated with joining our company. In addition, if we lose the services of any of our key personnel and are not able to find suitable replacements in a timely manner, our business could be disrupted, other key personnel may decide to leave, and we may incur increased operating expenses in finding and compensating their replacements.

The trading price of our stock has been volatile, and may fluctuate due to factors beyond our control.

The trading price of our common stock is subject to significant fluctuations in response to numerous factors, including the following:

significant stockholders may sell some or all of their holdings of our stock;

investors may be concerned about our ability to develop additional customers for our products and services;

volatility in our stock price may be unrelated or disproportionate to our operating performance; and

our stock has very limited analyst coverage.

Any of these factors could have a negative impact on the market price of our stock.

Voluntary standards and governmental regulatory actions in our markets could limit our ability to sell our products.

Standards bodies, which are formal and informal associations that attempt to set voluntary, non-governmental product standards, are influential in many of our target markets. We participate in many voluntary standards organizations around the world in order to both help prevent the adoption of exclusionary standards and to promote voluntary standards for our products. However, we do not have the resources to participate in all voluntary standards processes that may affect our markets.

In addition, many of our products and the industries in which they are used are subject to U.S. and foreign regulation. For example, the power line medium, which is the communications medium used by some of our

Table of Contents

products, is subject to special regulations in North America, Europe and Japan. In general, these regulations limit the ability of companies to use power lines as a communication medium. In addition, some of our competitors have attempted to use regulatory actions to reduce the market opportunity for our products or to increase the market opportunity for their own products.

The adoption of voluntary standards or the passage of governmental regulations that are incompatible with our products or technology could limit the market opportunity for our products, which could harm our revenues, results of operations, and financial condition.

Our existing stockholders control a significant percentage of our stock, which will limit other stockholders' ability to influence corporate matters.

As of July 31, 2007, our directors and executive officers, together with certain entities affiliated with them (including, for this purpose, Enel, which has the right to nominate a director to our board of directors), beneficially owned 35.4% of our outstanding stock.

When we sold 3.0 million newly issued shares of our common stock to Enel on September 11, 2000, we granted Enel the right to nominate a director to our board of directors, although a representative of Enel does not currently sit on our board. In connection with the stock sale, our directors and our Chief Financial Officer agreed to enter into a voting agreement with Enel in which each of them agreed to vote in favor of Enel's nominee to our board of directors. In addition, Enel agreed to vote for our board's recommendations for the election of directors, approval of accountants, approval of Echelon's equity compensation plans, and certain other matters. As a result, our directors and executive officers, together with certain entities affiliated with them, may be able to control substantially all matters requiring approval by our stockholders, including the election of all directors and approval of certain other corporate matters.

Natural disasters, power outages, and other factors outside of our control such as widespread pandemics could disrupt our business.

We must protect our business and our network infrastructure against damage from earthquake, flood, hurricane and similar events, as well as from power outages. A natural disaster, power outage, or other unanticipated problem could also adversely affect our business by, among other things, harming our primary data center or other internal operations, limiting our ability to communicate with our customers, and limiting our ability to sell our products. We do not insure against several natural disasters, including earthquakes.

Any outbreak of a widespread communicable disease pandemic could similarly impact our operations. Such impact could include, among other things, the inability for our sales and operations personnel located in affected regions to travel and conduct business freely, the impact any such disease may have on one or more of the distributors for our products in those regions, and increased supply chain costs. Additionally, any future health-related disruptions at our third-party contract manufacturers or other key suppliers could affect our ability to supply our customers with products in a timely manner, which would harm our results of operations.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISKS

We have not experienced any material change in our exposure to interest rate and foreign currency risks since the date of our Annual Report on Form 10-K for the year ended December 31, 2006.

Market Risk Disclosures. The following discussion about our market risk disclosures involves forward-looking statements. Actual results could differ materially from those projected in the forward-looking statements. We are exposed to market risk related to changes in interest rates and foreign currency exchange rates. We do not use derivative financial instruments to hedge these exposures.

Interest Rate Sensitivity. We maintain a short-term investment portfolio consisting mainly of fixed income securities with a weighted average maturity of less than one year. These available-for-sale securities are subject to interest rate risk and will fall in value if market interest rates increase. If market rates were to increase immediately and uniformly by 10% from levels at June 30, 2007 and June 30, 2006, the fair value of the portfolio would decline

Table of Contents

by an immaterial amount. We currently intend to hold our fixed income investments until maturity, and therefore we would not expect our operating results or cash flows to be affected to any significant degree by a sudden change in market interest rates. If necessary, we may sell short-term investments prior to maturity to meet the liquidity needs of the company.

Foreign Currency Exchange Risk. We have international subsidiaries and operations and are, therefore, subject to foreign currency rate exposure. To date, our exposure to exchange rate volatility has not been significant. If foreign exchange rates were to fluctuate by 10% from rates at June 30, 2007, and June 30, 2006, our financial position and results of operations would not be materially affected. However, we could experience a material impact in the future.

ITEM 4. CONTROLS AND PROCEDURES

Our review of our internal controls over financial reporting was made within the context of the relevant professional auditing standards defining internal controls over financial reporting, reportable conditions, and material weaknesses. As part of our evaluation of internal controls over financial reporting, we also address other, less significant control matters that we or our auditors identify, and we determine what revision or improvement to make, if any, in accordance with our on-going procedures.

Limitations on the Effectiveness of Controls

Since we began reviewing our internal controls over financial reporting, we have identified a number of procedures where an opportunity to improve our internal controls existed. As part of our ongoing effort to maximize our internal controls over financial reporting, each of these control improvement opportunities has been, or is in the process of being, remediated by management.

Our management, including our Chief Executive Officer and Chief Financial Officer, does not expect that our disclosure controls and procedures (as defined in the Securities Exchange Act of 1934, or the Exchange Act, Rules 13a-15(e) and 15d-15(e)) or our internal controls over financial reporting will prevent all error and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the company have been detected.

Conclusions Regarding Disclosure Controls and Procedures and Internal Controls Over Financial Reporting

Our CEO and our CFO have reviewed our disclosure controls and procedures and our internal controls over financial reporting in order to both evaluate their effectiveness and to ensure they have been designed to provide reasonable assurance of achieving their objectives, which is to make sure that information we are required to disclose in reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in Securities and Exchange Commission rules and forms. Based on this evaluation, they have concluded that as of June 30, 2007, our disclosure controls and procedures and our internal controls over financial reporting are effective at this reasonable assurance level.

Changes in Internal Controls Over Financial Reporting

There were no changes in our internal controls over financial reporting (as defined in Rule 13a-15(e) of the Exchange Act) that occurred during the quarter ended June 30, 2007 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents**PART II. OTHER INFORMATION****ITEM 1. LEGAL PROCEEDINGS**

For a discussion regarding our legal proceedings and matters, please refer to the Legal Actions section of Note 6, Commitments and Contingencies, to our condensed consolidated financial statements included under Item 1 of Part I, Financial Information, which information is incorporated herein by reference.

ITEM 1A. RISK FACTORS

A restated description of the risk factors associated with our business is included under Factors That May Affect Future Results Of Operations in Management's Discussion and Analysis of Financial Condition and Results of Operations, contained in Item 2 of Part I of this report. This restated description includes any material changes to and supersedes the description of the risk factors associated with our business previously disclosed in Part I Item 1A of our 2006 Annual Report on Form 10-K and in Part II Item 1A of our Quarterly Report on Form 10-Q for the quarter ended March 31, 2007, and is incorporated herein by reference.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

In March and August 2004, our board of directors approved a stock repurchase program, which authorizes us to repurchase up to 3.0 million shares of our common stock in the open market, in accordance with Rule 10b-18 and other applicable laws, rules and regulations. The board of directors extended the term of the stock repurchase program in March 2006 and again in February 2007. Since inception, we have repurchased a total of 2,204,184 shares under the program at a cost of \$16.1 million. As of June 30, 2007, 795,816 shares are available for repurchase. The stock repurchase program will expire in March 2008. The following table provides information about the repurchase of our common stock during the quarter ended June 30, 2007:

Period	Total Number of Shares Purchased (1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs (1)
April 1- April 30	41,822	\$ 11.96		795,816
May 1- May 31	62,708	\$ 15.00		795,816
June 1- June 30 31	38,613	\$ 18.26		795,816
Total	143,143	\$ 14.99		795,816

- (1) Shares purchased that were not part of our publicly announced repurchase program represent those shares surrendered to us by employees in order to satisfy stock-for-stock option exercises and/or withholding tax obligations related to stock-based compensation. These purchases do not reduce the number of shares that may yet be purchased under our publicly announced repurchase program.

Table of Contents

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

The Company held its annual meeting of stockholders on May 15, 2007. At such meeting, the following directors were elected: Richard M. Moley and Betsy Rafael. Our incumbent directors, M. Kenneth Oshman, Robert J. Finocchio, Jr., Armas Clifford Markkula, Jr., Robert R. Maxfield, and Larry W. Sonsini will continue to serve on the Board. Voting results for the election of the directors were as follows:

	Votes For	Votes Withheld
Richard M. Moley	33,545,860	102,320
Betsy Rafael	33,522,012	126,168

The only other matter submitted to stockholder vote at the Annual Meeting was the ratification of the appointment of KPMG LLP as independent auditors of the Company for the fiscal year ending December 31, 2007. Voting results for the KPMG LLP appointment were as follows:

Votes For:	Votes Against:	Abstain:
33,402,415	194,883	50,882
