SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

x **QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the quarterly period ended September 27, 2009

OR

.. **TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

Commission File Number 001-14962

CIRCOR INTERNATIONAL, INC.

(A Delaware Corporation)

I.R.S. Employer Identification No. 04-3477276

c/o Circor, Inc.

25 Corporate Drive, Suite 130, Burlington, MA 01803-4238

Telephone: (781) 270-1200

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of October 23, 2009, there were 16,990,609 shares of the Registrant's Common Stock, par value \$0.01, outstanding.

CIRCOR INTERNATIONAL, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

(1) Basis of Presentation

The accompanying unaudited, consolidated financial statements have been prepared according to the rules and regulations of the United States Securities and Exchange Commission (SEC) and, in the opinion of management, reflect all adjustments, which include normal recurring adjustments, necessary for a fair presentation of the consolidated balance sheets, consolidated statements of operations and consolidated statements of cash flows of CIRCOR International, Inc. (CIRCOR or the Company or we) for the periods presented. We prepare our interim financial information using the same accounting principles as we use for our annual audited financial statements. Certain information and note disclosures normally included in the annual audited financial statements have been condensed or omitted in accordance with prescribed SEC rules. We believe that the disclosures made in our consolidated financial statements and the accompanying notes are adequate to make the information presented not misleading.

The consolidated balance sheet at December 31, 2008 is as reported in our audited financial statements as of that date. Our accounting policies are described in the notes to our December 31, 2008 financial statements, which were included in our Annual Report filed on Form 10-K. We recommend that the financial statements included in this Quarterly Report on Form 10-Q be read in conjunction with the financial statements and notes included in our Annual Report filed on Form 10-K for the year ended December 31, 2008.

We operate and report financial information using a 52-week fiscal year ending December 31. The data periods contained within our Quarterly Reports on Form 10-Q reflect the results of operations for the 13-week, 26-week and 39-week periods which generally end on the Sunday nearest the calendar quarter-end date. Operating results for the three and nine months ended September 27, 2009 are not necessarily indicative of the results that may be expected for the year ending December 31, 2009.

Reclassifications

Certain items in the prior period financial statements have been reclassified to conform to currently reported presentations.

(2) Summary of Significant Accounting Policies

New Accounting Standards

In July 2009, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 168, FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles a replacement of FASB Statement No. 162 (SFAS 168). With the issuance of SFAS 168, the FASB Standards Codification (Codification) becomes the single source of authoritative U.S. accounting and reporting standards applicable for all non-governmental entities, with the exception of guidance issued by the Securities and Exchange Commission. The Codification does not change current U.S. GAAP, but changes the referencing of financial standards and is intended to simplify user access to authoritative U.S. GAAP, by providing all the authoritative literature related to a particular topic in one place. The Codification is effective for interim and annual periods ended after September 15, 2009. As the Codification was not intended to change or alter existing GAAP, it will not have any impact on the Company s consolidated financial statements.

In May 2009, the FASB issued a new accounting pronouncement found under Accounting Standards Codification (ASC) Topic 855-10 regarding subsequent events (formerly SFAS 165) which defines a date through which management must evaluate subsequent events, and lists the circumstances under which an entity must recognize and disclose events or transactions occurring after the balance-sheet date. We adopted this standard as of June 28, 2009 and it had no material effect on our results of operations or financial condition. We have evaluated all subsequent events through October 29, 2009.

In September 2006, the FASB issued an accounting pronouncement regarding fair value measurement found under ASC Topic 820.1 (formerly SFAS 157) , which not only defines fair value but also establishes a framework for measuring fair value and expands financial statement disclosures about fair value measurements. This standard was adopted on January 1, 2008 for financial assets and liabilities and had no material impact on our results of operations or financial condition. In February 2008, the FASB permitted a one-year deferral in applying the fair value measurement provisions found under ASC Topic 820.1 to non-financial assets and non-financial liabilities (non-financial items) that are not recognized or disclosed at fair value in an entity s financial statements on a recurring basis (at least annually). Therefore, if the change in fair

Edgar Filing: CIRCOR INTERNATIONAL INC - Form 10-Q

value of a non-financial item is not required to be recognized or disclosed in the financial statements on an annual basis or more frequently, the effective date of application of this standard was deferred until fiscal years beginning after November 15, 2008. The adoption of this standard as of January 1, 2009 had no material effect on our results of operations or financial condition.

Table of Contents

In December 2007, the FASB issued a new accounting pronouncement regarding business combinations (formerly SFAS 141R). The purpose of this accounting pronouncement, found under FASB ASC Topic 805, is to improve the information provided in financial reports about a business combination and its effects. The pronouncement requires acquisition-date fair value measurement of identifiable assets acquired, liabilities assumed, and non-controlling interests in the acquiree. The pronouncement is effective for fiscal years beginning on or after December 15, 2008 and applies to all business combinations. The Company adopted this standard as of January 1, 2009 and applied it prospectively to business combinations that occurred after adoption. During March 2009, we acquired the stock of Bodet Aero (Bodet) and its affiliate Atlas Productions (Atlas). For more detailed information, refer to Note 15, Business Acquisitions, in our Notes to Consolidated Financial Statements. The adoption of this standard had no material effect on our results of operations or financial condition although the new standard has materially changed the accounting for business combinations consummated subsequent to January 1, 2009.

(2) Share-Based Compensation

As of September 27, 2009 we have one share-based compensation plan. The 1999 Amended and Restated Stock Option and Incentive Plan (the 1999 Stock Plan) was adopted by our Board of Directors and approved by our shareholders and permits the grant of the following types of awards to our officers, other employees and non-employee directors: incentive stock options; non-qualified stock options; deferred stock awards; restricted stock awards; unrestricted stock awards; performance share awards; stock appreciation rights (SARs) and dividend equivalent rights. The 1999 Stock Plan provides for the issuance of up to 3,000,000 shares of common stock (subject to adjustment for stock splits and similar events). New options granted under the 1999 Stock Plan could have varying vesting provisions and exercise periods. Options granted, vest in periods ranging from 1 to 6 years and expire 10 years after the grant date. Restricted stock units granted generally vest from three to six years. Vested restricted stock units will be settled in shares of our common stock. Upon exercise, vested SARs will be payable in cash. As of September 27, 2009, there were 144,120 stock options, 544,149 restricted stock units, and 9,600 SARs outstanding. In addition, there were 680,779 shares available for grant under the 1999 Stock Plan as of September 27, 2009.

During 2004, we began granting restricted stock units (RSU Awards) in lieu of a portion of employee stock option awards and we have not granted any stock option awards for fiscal 2009. We account for these RSU Awards by expensing their weighted average fair-value to selling, general and administrative expenses ratably over the requisite vesting period. During the nine months ended September 27, 2009 and September 28, 2008, we granted 165,550 and 81,089 RSU Awards with approximate fair values of \$22.26 and \$47.49 per RSU, respectively.

For all of our stock option grants, the fair value of each grant was estimated at the date of grant using the Black-Scholes option pricing model. Black-Scholes utilizes assumptions related to volatility, the risk-free interest rate, and the dividend yield and employee exercise behavior. Expected volatilities utilized in the model are based on the historic volatility of the Company's stock price. The risk free interest rate is derived from the U.S. Treasury Yield curve in effect at the time of the grant. The model incorporates exercise and post-vesting forfeiture assumptions based on an analysis of historical data. We have not granted any stock options since 2005.

The CIRCOR Management Stock Purchase Plan, which is a component of the 1999 Stock Plan, provides that eligible employees may elect to receive RSU Awards in lieu of all or a portion of their pre-tax annual incentive bonus and, in some cases, make after-tax contributions in exchange for restricted stock units (RSU MIPs). In addition, non-employee directors may elect to receive restricted stock units in lieu of all or a portion of their annual directors' fees. Each RSU MIP represents a right to receive one share of our common stock after a three-year vesting period. RSU MIPs are granted at a discount of 33% from the fair market value of the shares of common stock on the date of grant. This discount is amortized as compensation expense, to selling, general and administrative expenses, over a four year period. During the nine months ended September 27, 2009 and September 28, 2008, we granted under the CIRCOR Management Stock Purchase Plan 140,759 and 57,385 RSU MIPs with a fair value per unit of \$7.34 and \$16.06, respectively.

Compensation expense related to RSU MIPs, RSU Awards, and SARs for the nine month periods ended September 27, 2009, and September 28, 2008 was \$2.4 million and \$3.4 million, respectively. For the nine months ended September 27, 2009 and September 28, 2008, \$2.4 million and \$3.2 million, respectively, was recorded as selling, general and administrative expense. For the three and nine months ended September 28, 2008, an incremental \$0.2 million associated with the retirement agreement entered into with the Company's former Chief Financial Officer, specifically the accelerated vesting of certain equity awards, was recorded as a special charge. As of September 27, 2009 there was \$7.9 million of total unrecognized compensation costs related to our outstanding share-based compensation arrangements. That cost is expected to be recognized over a weighted average period of 4.01 years.

Table of Contents

A summary of the status of all stock options granted to employees and non-employee directors as of September 27, 2009 and changes during the nine month period then ended is presented in the table below (Options in thousands):

	Options	Weighted Average Exercise Price
Options outstanding at beginning of period	152	\$ 19.35
Granted		N/A
Exercised	(2)	24.39
Forfeited	(6)	25.94
Options outstanding at end of period	144	\$ 19.02
Options exercisable at end of period	132	\$ 18.50

The weighted average contractual term for stock options outstanding and exercisable as of September 27, 2009 was 3.7 years and 3.6 years, respectively. There was no aggregate intrinsic value of stock options exercised during the nine months ended September 27, 2009. The aggregate intrinsic value of stock options outstanding and exercisable as of September 27, 2009 was \$1.5 million and \$1.4 million, respectively.

A summary of the status of all RSU Awards granted to employees and non-employee directors as of September 27, 2009 and changes during the nine month period then ended is presented in the table below (RSUs in thousands):

	RSUs	Weighted Average Grant Price
RSU Awards outstanding at beginning of period	213	\$ 38.35
Granted	166	22.26
Settled	(39)	36.78
Cancelled	(17)	38.84
RSU Awards outstanding at end of period	323	\$ 30.43
RSU Awards vested and deferred at end of period	30	\$ 29.14

The aggregate intrinsic value of RSU Awards settled during the nine months ended September 27, 2009 was \$1.2 million and the aggregate intrinsic value of RSU Awards outstanding and vested and deferred as of September 27, 2009 was \$9.5 million and \$0.9 million, respectively.

A summary of the status of all RSU MIPs granted to employees and non-employee directors as of September 27, 2009 and changes during the nine month period then ended is presented in the table below (RSUs in thousands):

	RSUs	Weighted Average Grant Price
RSU MIPs outstanding at beginning of period	137	\$ 20.29
Granted	141	14.89
Settled	(36)	18.67
Cancelled	(21)	18.44
RSU MIPs outstanding at end of period	221	\$ 17.33
RSU MIPs vested and deferred at end of period	19	\$ 10.80

Edgar Filing: CIRCOR INTERNATIONAL INC - Form 10-Q

The aggregate intrinsic value of RSU MIPs settled during the nine months ended September 27, 2009 was \$1.1 million and the aggregate intrinsic value of RSU MIPs outstanding and vested and deferred as of September 27, 2009 was \$2.4 million and \$0.4 million, respectively.

(4) Inventories

Inventories consist of the following (In thousands):

	September 27, 2009	December 31, 2008
Raw materials	\$ 51,479	\$ 68,954
Work in process	63,579	70,656
Finished goods	35,218	43,681
	\$ 150,276	\$ 183,291

Table of Contents**(5) Goodwill and Intangible Assets**

The following table shows goodwill, by segment, net of accumulated amortization, as of September 27, 2009 (In thousands):

	Instrumentation & Thermal Fluid		
	Controls Products	Energy Products	Consolidated Total
Goodwill as of December 31, 2008	\$ 6,801	\$ 25,291	\$ 32,092

Each reporting segment is individually managed and has separate financial results that are reviewed by our chief operating decision-maker. Each segment contains closely related products that are unique to the particular segment. For further discussion of the products included in each segment, refer to Note 1 of the consolidated financial statements included in our Annual Report on Form 10-K for the year ended December 31, 2008.

Table of Contents

In calculating operating income for each reporting segment, substantial administrative expenses incurred at the corporate level for the benefit of other reporting segments were allocated to the segments based upon specific identification of costs, employment related information or net revenues.

Corporate / Eliminations are reported on a net after allocations basis. Inter-segment intercompany transactions affecting net operating profit have been eliminated within the respective operating segments.

The operating loss reported in the Corporate / Eliminations column in the preceding table consists primarily of the following corporate expenses: compensation and fringe benefit costs for executive management and other corporate staff; corporate development costs (relating to mergers and acquisitions); human resource development and benefit plan administration expenses; legal, accounting and other professional and consulting fees; facilities, equipment and maintenance costs; and travel and various other administrative costs. The above costs are incurred in the course of furthering the business prospects of the Company and relate to activities such as: implementing strategic business growth opportunities; corporate governance; risk management; treasury; investor relations and shareholder services; regulatory compliance; and stock transfer agent costs.

The total assets for each operating segment have been reported as the Identifiable Assets for that segment, including inter-segment intercompany receivables, payables and investments in other CIRCOR companies. Identifiable assets reported in Corporate / Eliminations include both corporate assets, such as cash, deferred taxes, prepaid and other assets, fixed assets, plus the elimination of all inter-segment intercompany assets. The elimination of intercompany assets may result in negative amounts reported in Corporate / Eliminations for Identifiable Assets as of September 27, 2009 and September 28, 2008. Corporate Identifiable Assets, after elimination of intercompany assets, were \$17.8 million and \$15.5 million as of September 27, 2009 and September 28, 2008, respectively.

(7) Special Charges (Recoveries)

For the three months ended September 27, 2009, within the Instrumentation and Thermal Fluid Controls Segment, we recorded a special charge (recovery) of (\$0.5) million associated with a recent acquisition. This special recovery was a result of the fair value of the acquired assets exceeding the consideration transferred. For the nine months ended September 27, 2009, we recorded special charges (recoveries) of (\$1.7) million, which includes the special recovery of (\$0.5) million mentioned above as well as payments of (\$1.1) million we received in the first quarter of 2009 relating to a 2007 asset sale within our Energy Products Segment.

(8) Earnings Per Common Share (In thousands, except per share amounts):

	Three Months Ended					
	September 27, 2009			September 28, 2008

Diluted EPS	\$ 26,597	17,050	\$ 1.56	\$ 51,093	17,000	\$ 3.01

Edgar Filing: CIRCOR INTERNATIONAL INC - Form 10-Q

There were 241,705 anti-dilutive stock options and RSUs for three months ended September 27, 2009 as compared to 592 anti-dilutive stock options and RSUs for the three months ended September 28, 2008.

Table of Contents**(9) Financial Instruments***Fair Value*

The carrying amounts of cash and cash equivalents, trade receivables and trade payables approximate fair value because of the short maturity of these financial instruments. Short-term investments (principally bank repurchase agreements) are carried at cost which approximates fair value at the balance sheet date. The fair value of our variable rate debt approximates its carrying value.

In the normal course of our business, we manage risk associated with foreign exchange rates through a variety of strategies, including the use of hedging transactions, executed in accordance with our policies. As a matter of policy, we ordinarily do not use derivative instruments unless there is an underlying exposure. Any change in the value of our derivative instruments would be substantially offset by an opposite change in the underlying hedged items. We do not use derivative instruments for speculative trading purposes.

Accounting Policies

In September 2006, the FASB issued an accounting pronouncement regarding fair value measurement under ASC Topic 820.1 that not only defines fair value but establishes a framework for measuring fair value and expands financial statement disclosures about fair value measurements. This pronouncement emphasizes that fair value is a market-based measurement rather than an entity-specific measurement and establishes a fair value hierarchy to make the distinction between assumptions developed based on market data obtained from independent sources (observable inputs) and the reporting entity's own assumptions (unobservable inputs). This fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). We utilize fair value measurements for forward currency contracts, guarantee and indemnification obligations, as well as our annual assessment of goodwill and intangible assets.

Derivative instruments are designated and accounted for as either a hedge of a recognized asset or liability (fair value hedge) or a hedge of a forecasted transaction (cash flow hedge). For a fair value hedge, both the effective and ineffective portions of the change in fair value of the derivative instrument, along with an adjustment to the carrying amount of the hedged item for fair value changes attributable to the hedged risk, are recognized in earnings. For a cash flow hedge, changes in the fair value of the derivative instrument that are highly effective are deferred in accumulated other comprehensive income or loss until the underlying hedged item is recognized in earnings. If the effective portion of fair value or cash flow hedges were to cease to qualify for hedge accounting, or to be terminated, it would continue to be carried on the balance sheet at fair value until settled; however, hedge accounting would be discontinued prospectively. If forecasted transactions were no longer probable of occurring within the specified time period or within an additional two month period thereafter, amounts previously deferred in accumulated other comprehensive income or loss would be recognized immediately in earnings. During the nine months ended September 27, 2009 and September 28, 2008, we did not have any hedges that qualified for hedge accounting.

Foreign Currency Risk

We use forward contracts to manage the currency risk related to certain business transactions denominated in foreign currencies. To the extent the underlying transactions hedged are completed, the contracts do not subject us to significant risk from exchange rate movements because they offset gains and losses on the related foreign currency denominated transactions. Our foreign currency forward contracts have not been designated as hedging instruments and, therefore, do not qualify for fair value or cash flow hedge treatment. Therefore, any unrealized gains and losses on our contracts are recognized as a component of other expense in the consolidated statements of operations. As of September 27, 2009, we had nineteen forward contracts to sell currencies, principally US dollar contracts held by our foreign subsidiaries, with a contract value of \$27.2 million. The fair value at September 27, 2009 of these derivative forward contracts was approximately \$1.0 million and is carried in other current assets on our balance sheet. This compares to four forward contracts to sell currencies with a contract value of \$3.8 million as of September 28, 2008.

We have determined that the majority of the inputs used to value our foreign currency forward contracts fall within Level 2 of fair value hierarchy, found under ASC Topic 820.1. The credit valuation adjustments, such as estimates of current credit spreads to evaluate the likelihood of default by ourselves and our counterparties are Level 3 inputs. However, we have assessed the significance of the impact of the credit valuation adjustments on the overall valuation of our foreign currency forward contracts and determined that the credit valuation adjustments are not significant to the overall valuation. As a result, we have determined that our derivative valuations in their entirety are classified in Level 2 of the fair value hierarchy.

Table of Contents**(10) Comprehensive Income**

Comprehensive income for the three and nine months ended September 27, 2009 and September 28, 2008 consists of the following (In thousands):

	Three Months Ended		Nine Months Ended	
	September 27, 2009	September 28, 2008	September 27, 2009	September 28, 2008
Net income	\$ 8,405	\$ 19,773	\$ 26,597	\$ 51,093
Cumulative translation adjustments	10,492	(13,911)	16,657	(5,542)
Total comprehensive income	\$ 18,897	\$ 5,862	\$ 43,254	\$ 45,551

(11) Contingencies and Commitments**Asbestos Litigation*****Background***

Like many other manufacturers of fluid control products, our subsidiary Leslie Controls, Inc. (Leslie), which we acquired in 1989, has been and continues to be named as a defendant in product liability actions brought on behalf of individuals who seek compensation for their alleged exposure to airborne asbestos fibers. In some instances, we also have been named individually and/or as alleged successor in interest in these cases.

As of the end of September 2009, Leslie was a named defendant in approximately 1,143 active, unresolved asbestos-related claims filed in California, Texas, New York, Massachusetts, Illinois, Pennsylvania, West Virginia, Rhode Island and approximately two dozen other states. Approximately 612 of these claims involve claimants allegedly suffering from (or the estates of decedents who allegedly died from) mesothelioma, a fatal malignancy associated with asbestos exposure.

In addition to these claims, Leslie remains a named defendant in approximately 4,700 unresolved asbestos-related claims filed in Mississippi. Since 2004, however, the Mississippi Supreme Court has interpreted joinder rules more strictly, and the state legislature enacted a tort reform act under which each plaintiff must independently satisfy venue provisions, thus preventing thousands of out-of-state claimants from tagging onto a single in-state plaintiff's case. As a result of these changes, Mississippi state court judges since 2004 have severed and dismissed tens of thousands of out-of-state asbestos claims against numerous defendants including Leslie. We continue to expect that most of the remaining Mississippi claims against Leslie will be dismissed as well. Leslie has not incurred any indemnity costs in Mississippi and defense costs to resolve these Mississippi claims have not been significant. While it is possible that certain dismissed claims could be re-filed in Mississippi or in other jurisdictions, any such re-filings likely would be made on behalf of one or a small number of related individuals who could demonstrate actual injury and some connection to Leslie's products.

Leslie's asbestos-related claims generally involve its fluid control products. Leslie management believes that any asbestos was incorporated entirely within the product in a way that would not allow for any ambient asbestos during normal operation or during normal inspection and repair procedures. Leslie and its insurers' general strategy has been to vigorously defend these claims. Nevertheless, while we strongly believe that exposure to Leslie's products has not caused asbestos-related illness to any plaintiff, juries or courts have reached a different conclusion in particular cases and could do so in others.

Leslie has resolved a number of asbestos-related claims over the past few years and continues to do so for strategic reasons, including avoidance of defense costs and the possible risk of excessive verdicts. The amounts expended on asbestos-related claims in any year are generally impacted by the number of claims filed, the volume of pre-trial proceedings, and the number of trials and settlements.

During 2007, Los Angeles state court juries rendered two verdicts that, if allowed to stand, would result in a liability to Leslie of approximately \$3.8 million. Although Leslie accrued a liability during 2007 for each of these verdicts, both verdicts were appealed and, during September 2009, the California Court of Appeals reversed one of the two judgments against Leslie. Subsequently, however, the Court of Appeals granted the plaintiff's petition for a re-hearing and thus vacated its appellate order. While we remain optimistic that the Court of Appeals ultimately will issue a final order reversing the judgment, we have not reduced the accrued liability. With respect to the remaining verdict, appellate arguments

Edgar Filing: CIRCOR INTERNATIONAL INC - Form 10-Q

have not yet been scheduled; however, we continue to believe there are strong grounds for overturning this verdict, or for significantly reducing the amount of the award or requiring a new trial. Leslie has recorded \$0.8 million in accrued interest for both adverse verdicts.

Table of Contents***Accounting Indemnity and Defense Cost Liabilities and Assets***

Leslie records an estimated liability associated with reported asbestos claims when it believes that a loss is both probable and can be reasonably estimated. Prior to the fourth quarter of 2007, with respect to its unresolved pending claims, Leslie did not believe that it had sufficient information to assess the likelihood of resolving such claims. Accordingly, Leslie accrued for defense costs as incurred, and accrued for pending claims only when resolution of a particular claim was probable and the probable loss was estimable. As a practical matter, the claims accrual generally occurred close in time to when a settlement agreement for a particular claim was reached. In most cases, settlement payments are paid to claimants within thirty to sixty days of settlement.

During the fourth quarter of 2007, Hamilton, Rabinovitz and Associates, Inc. (HR&A), a firm specializing in estimating expected liabilities of mass tort claims, was engaged to help determine an estimate of Leslie's asbestos-related liabilities. Because Leslie's claims experience is both limited and variable, HR&A concluded that any estimate of pending or future liabilities of Leslie's asbestos claims would be highly uncertain from a statistical perspective. Leslie's management determined, however, that, by using its historical (albeit limited and variable) average cost by disease classification in resolving closed claims, and by applying this information to the mix of current open claims, it could make a reasonable estimate of the indemnity costs to be incurred in resolving such current open claims. As a result, Leslie recorded a liability of \$9.0 million during the fourth quarter of 2007 for the estimated indemnity cost associated with resolution of its then current open claims. During the fourth quarter of 2008, HR&A updated its analysis and reaffirmed its conclusion that a forecast of the number and value of any future asbestos claims is unwarranted and highly uncertain from a statistical perspective.

As of September 27, 2009, Leslie has recorded asbestos liabilities of \$23.7 million (\$11.6 million short-term and \$12.1 million long-term) compared to \$19.2 million as of December 31, 2008. The \$23.7 million liability as of September 27, 2009 is comprised of \$15.5 million for existing claims, \$4.6 million related to adverse verdicts and \$3.6 million for incurred but unpaid legal costs. Asbestos related insurance receivable amounts totaled \$6.5 million (all short-term) as of September 27, 2009 compared to \$10.7 million as of December 31, 2008. The \$6.5 million receivable as of September 27, 2009 is comprised of \$1.5 million for existing claims, \$2.2 million related to adverse verdicts and \$2.8 million for incurred but unpaid legal costs.

A summary of Leslie's unpaid existing asbestos claims and incurred asbestos defense cost liabilities and the related insurance recoveries is provided below.

In Thousands	September 27, 2009	December 31, 2008
Existing claim indemnity liability	\$ 20,060	\$ 16,661
Incurred defense cost liability	3,615	2,584
Insurance recoveries receivable	(6,485)	(10,765)
Net asbestos liability	\$ 17,190	\$ 8,480

Although Leslie believes its estimates are reasonable, such estimates are also highly uncertain, especially because Leslie's claims history is relatively limited, recent and quite variable. Depending on future events, the actual costs of resolving these pending claims could be substantially higher or lower than the current estimate. Some of the more significant unknown or uncertain factors that will affect these costs going forward include:

the severity of the injuries alleged by each pending claimant;

increases or decreases in Leslie's average settlement costs;

possible adverse or favorable jury verdicts;

rulings on unresolved legal issues in various jurisdictions that bear on Leslie's legal liability;

the numbers of claims that will be dismissed with no indemnity payments;

the impact of potential changes in legislative or judicial standards in different jurisdictions; and

the potential bankruptcies of other companies named as defendants in asbestos-related claims.

As a result of these factors, Leslie is unable to estimate a range of additional losses that may be reasonably possible in the event that actual indemnity costs of resolving pending claims are higher than our estimate. In addition, while the likelihood of future claims is probable, Leslie's management cannot estimate the amount of future claims or any range of losses that may be reasonably possible arising from such claims. With respect to current claims, critical information is known regarding such factors as disease mix, jurisdiction and identity of plaintiff's counsel. Such information is of course unknown with respect to any future claims, and Leslie's management believes that the disease mix, jurisdictional information and plaintiff counsel identity associated with its current case experience, which has been both limited and variable, cannot reasonably be extrapolated to any future filings. Moreover, Leslie management believes that appellate actions recently commenced and currently pending in certain jurisdictions such as California, together with movements toward legislative and judicial reform in such jurisdictions, may significantly alter the litigation landscape, thus affecting both the rate at which claims may be filed as well as the likelihood of incurring indemnity amounts on account of such future claims and the level of indemnity that may be incurred to resolve such claims.

Table of Contents**Q3 and YTD 2009 Experience and Financial Statement Impact**

The following tables provide information regarding Leslie's claim activity during the three months ended September 27, 2009 as well as the financial impact on the Company of the asbestos litigation for the three and nine months ended September 27, 2009 and September 28, 2008 (excluding open Mississippi claims for which we anticipate dismissal of such claims for the reasons described above)

	Three Months Ended September 27, 2009
Beginning open claims	1,158
Claims filed	131
Claims resolved and dismissed	(146)
Ending open claims	1,143
Ending open mesothelioma claims	612

(In Thousands)	Three Months Ended		Nine Months Ended	
	September 27, 2009	September 28, 2008	September 27, 2009	September 28, 2008
Indemnity costs accrued	\$ 1,140	\$ 3,182	\$ 7,851	\$ 7,041
Adverse verdict interest costs (verdicts appealed)	95	316	283	406
Defense cost incurred	3,009	2,650	9,450	7,805
Insurance recoveries adjustment			2,069	
Insurance recoveries accrued	(2,267)	(2,340)	(5,971)	(8,359)
Net pre-tax asbestos expense	\$ 1,977	\$ 3,808	\$ 13,682	\$ 6,893

Insurance**Historical**

To date, Leslie's insurers have paid the majority of the costs associated with its defense and settlement of asbestos-related actions. Under Leslie's cost-sharing arrangements with its insurers, Leslie's insurers historically paid 71% of defense and settlement costs associated with asbestos-related claims and Leslie was responsible for the remaining 29% of all such defense and indemnity costs. The amount of indemnity available under Leslie's primary layer of insurance coverage was therefore reduced by 71% of any amounts paid through settlement or verdict.

Recent Developments

During the third quarter of 2008, Zurich, an insurer that paid 8% of Leslie's historical asbestos defense and indemnity costs, informed Leslie that it had reached its maximum indemnity obligation under the applicable insurance policy and that Leslie, therefore, was now responsible for the 8% share previously paid by Zurich. More recently, however, Zurich acknowledged that its calculations concerning policy exhaustion were incorrect and that such policy exhaustion actually occurred on January 30, 2009. As a result, Zurich is obligated to reimburse Leslie for a portion of the additional indemnity and defense costs incurred by Leslie from Zurich's original notification until the end of January 2009. Nonetheless, upon making such reimbursement, Zurich will have completed its obligations to Leslie under the policy and Leslie is now responsible for the 8% share previously paid by Zurich.

During the first quarter of 2009, one of Leslie's other primary insurers, Continental Casualty, a CNA company (Continental), informed Leslie that indemnity payments had exhausted a three-year policy covering Leslie from 1967 through 1970. In so claiming, Continental expressed its belief that the policy in question contained a single aggregate limit of \$1 million for the three-year period rather than annual limits of \$1 million for each of the three years. As a result of the revised claimed coverage limit, Continental believes that its allocation under the cost sharing arrangement is now 15.44% compared to the 27% historically paid by Continental. Leslie strongly disagrees with Continental's position and intends to vigorously dispute Continental's position. Leslie has reaffirmed its position that there are two additional years of insurance coverage with \$1 million policy limits. However, in light of the uncertainty surrounding this dispute, Leslie reduced its insurance recovery receivable by

\$2.1 million in the first quarter of 2009.

Table of Contents**Remaining Insurance**

As of September 27, 2009, we believe that the aggregate amount of indemnity (on a cash basis) remaining on Leslie's primary layer of insurance was approximately \$3.2 million. After giving effect to our accrual for the adverse verdicts currently on appeal, the remaining amount of Leslie's primary layer of insurance is \$1.5 million. From a financial statement perspective, however, after giving effect to our accrual for the estimated indemnity cost of resolving pending claims, Leslie recorded the maximum amount of available primary layer insurance as of September 2008. As a result, asbestos related indemnity costs are no longer partially offset by a corresponding insurance recovery. However, defense costs, which are recognized as incurred, will continue to be partially offset by insurance until such time as the aggregate amount of indemnity claims paid out (on a cash basis) by the remaining two primary layer insurance carriers exceeds policy limits. The amount of this partial insurance recovery may vary depending upon the outcome of the disagreement with Continental within an anticipated range of 51.4% and 63% of such defense costs. While we cannot reasonably predict when Leslie's primary layer will be fully exhausted, if Leslie's rate of settlements were to continue at a pace consistent with the past two years, and, assuming no payments on account of the adverse verdicts, policy limits would be reached within approximately one year. If, however, Leslie were to be required to make payments on account of any adverse verdicts, the time period within which such policy limits would be reached could be significantly shorter than one year.

In addition to its primary layer of insurance, Leslie does have limited available excess insurance coverage. However, some of this excess insurance lies above layers of excess insurance written by insolvent insurers, which could affect when Leslie may be able to recover this excess insurance. Moreover, unlike primary policies under which defense costs do not erode policy limits, the terms of excess policies typically provide that covered defense costs do erode policy limits. As a result, upon exhaustion of its primary layer of insurance, Leslie will become responsible for a substantial majority of any indemnity and defense costs, which could have a material adverse effect on our financial condition, results of operations, and cash flows.

Expected Limitations and Other Matters

We believe that payment of any litigation-related asbestos liabilities of Leslie (Leslie currently constitutes approximately 6% of the Company's consolidated revenues and 1% of the Company's shareholders' equity) is legally limited to the net assets of that subsidiary. This belief is based on the principle of American law that a shareholder (including a parent corporation) is generally not liable for an incorporated entity's obligations.

Smaller numbers of asbestos-related claims have also been filed against two of our other subsidiaries: Spence Engineering Company, Inc. (Spence), the stock of which we acquired in 1984; and Hoke, Inc. (Hoke), the stock of which we acquired in 1998. Due to the nature of the products supplied by these entities, the markets they serve and our historical experience in resolving these claims, we do not believe that asbestos-related claims will have a material adverse effect on the financial condition, results of operations or liquidity of Spence or Hoke, or the financial condition, consolidated results of operations or liquidity of the Company.

Standby Letters of Credit

We execute standby letters of credit, which include bid bonds and performance bonds, in the normal course of business to ensure our performance or payments to third parties. The aggregate notional value of these instruments was \$44.9 million at September 27, 2009. Our historical experience with these types of instruments has been good and no claims have been paid in the current or past fiscal years. We believe that the likelihood of demand for payments related to the outstanding instruments is remote. These instruments have expiration dates ranging from less than one month to 5.75 years from September 27, 2009.

The following table contains information related to standby letters of credit instruments outstanding as of September 27, 2009 (In thousands):

Term Remaining	Maximum Potential Future Payments	
0-12 months	\$	16,401
Greater than 12 months		28,508
Total	\$	44,909

Table of Contents**(12) Defined Pension Benefit Plans**

We maintain two pension benefit plans, a qualified noncontributory defined benefit plan and a nonqualified, noncontributory defined benefit supplemental plan that provides benefits to certain highly compensated officers and employees. To date, the supplemental plan remains an unfunded plan. These plans include significant pension benefit obligations which are calculated based on actuarial valuations. Key assumptions are made in determining these obligations and related expenses, including expected rates of return on plan assets and discount rates. Benefits are based primarily on years of service and employee compensation.

As of July 1, 2006, in connection with a revision to our retirement plan, we froze the pension benefits of our qualified noncontributory plan participants. Under the revised plan, such participants generally do not accrue any additional benefits under the defined benefit plan after July 1, 2006.

Effective in December 2006, we adopted recognition and disclosure provisions which allow us to recognize in the balance sheet the underfunded status of the defined benefit post-retirement plans, measured as the difference between the fair value of plan assets and the projected benefit obligation. Changes in the funded status of the plan in the year in which the change occurs are recognized in other comprehensive income.

During the three months ended September 27, 2009, we made a cash contribution of \$1.2 million to our qualified defined benefit pension plan. For the remainder of 2009, we are expecting to make a cash contribution of \$0.1 million to our qualified defined benefit pension plan, although global capital market and interest rate fluctuations may impact future funding requirements. Based on a desire to ensure compliance with Section 409A of the Internal Revenue Service Code, during the three months ended March 29, 2009, we facilitated a mandatory cash-out to all active and terminated employees of the SERP, who were not currently receiving benefit payments. This pension settlement resulted in \$0.2 million of pre-tax expense during the first quarter of 2009.

During the three months ended September 27, 2009, we changed the estimated amortization period for certain pension losses. This change in estimate extended the amortization period and resulted in a reduction of our pension expense of approximately \$0.3 million for the three months ended September 27, 2009 as compared to the three months ended June 28, 2009.

Additionally, substantially all of our U.S. employees are eligible to participate in a 401(k) savings plan. Under this plan, we make a core contribution and match a specified percentage of employee contributions, subject to certain limitations.

The components of net pension benefit expense are as follows (In thousands):

	Three Months Ended		Nine Months Ended	
	September 27, 2009	September 28, 2008	September 27, 2009	September 28, 2008
Service cost-benefits earned	\$ 88	\$ 109	\$ 263	\$ 327
Interest cost on benefits obligation	511	490	1,533	1,470
Estimated return on assets	(423)	(573)	(1,227)	(1,720)
Prior service cost amortization	3	5	11	15
Transition obligation amortization				(2)
Loss (Gain) amortization	(155)	31	243	95
One time SERP settlement charge			240	
Net periodic cost of defined benefit pension plans	\$ 24	\$ 62	\$ 1,063	\$ 185

(13) Income Taxes

As required by the Income Tax Topic of the ASC at December 31, 2008 and at September 27, 2009, we had \$2.4 and \$2.6 million of unrecognized tax benefits, respectively, all of which would affect our effective tax rate if recognized in any future period.

We recognize interest and penalties related to unrecognized tax benefits in income tax expense. As of September 27, 2009, we have approximately \$0.4 million of accrued interest related to unrecognized tax benefits.

Edgar Filing: CIRCOR INTERNATIONAL INC - Form 10-Q

The Company files consolidated and separate income tax returns in the United States Federal jurisdiction and separate subsidiary specific tax returns in many state and foreign jurisdictions. Substantially all material state and foreign income tax matters have been concluded for years through 2003. The Company has concluded examinations by the Internal Revenue Service for years through 2003 and the statute of limitations for years through 2005 has expired. The 2007 tax year is currently under examination by the Internal Revenue Service.

Table of Contents

In 2007, German tax authorities commenced audits of certain German income tax returns for years ranging from 2001 through 2006. The audit has been completed and adjustment calculations are in the final phase. We expect that by the end of the year the tax assessments and the impact to the reserve will be finalized. We do not anticipate the results of these audits will have a material adverse effect on the Company's financial operations, financial condition or cash flows.

The Company anticipates that by September 30, 2010, total unrecognized tax benefits will decrease by approximately \$0.9 million as a result of settlements of current audits exclusive of interest of \$0.3 million.

(14) Guarantees and Indemnification Obligations

As permitted under Delaware law, we have agreements whereby we indemnify certain of our officers and directors for certain events or occurrences while the officer or director is, or was, serving at our request in such capacity. The term of the indemnification period is for the officer's or director's lifetime. The maximum potential amount of future payments we could be required to make under these indemnification agreements is unlimited. However, we have directors and officers' liability insurance policies that limit our exposure for events covered under the policies and should enable us to recover a portion of any future amounts paid. As a result of the coverage under these insurance policies, we believe the estimated fair value of these indemnification agreements based on Level 3 criteria as described under ASC Topic 820.1 is minimal and, therefore, have no liabilities recorded from those agreements as of September 27, 2009.

In connection with our industrial revenue bond financing arrangement which benefits one of our subsidiaries, we are obligated to indemnify the banks in connection with certain errors in the administration of these financing arrangements to the extent such errors are not willful and do not constitute gross negligence. This indemnification obligation is unlimited as to time and amount. We have never been required to make any payments pursuant to this indemnification. As a result, we believe the estimated fair value of this indemnification agreement is minimal as determined using Level 3 criteria. Accordingly, we have no liabilities recorded for those agreements as of September 27, 2009.

We record provisions for the estimated cost of product warranties, primarily from historical information, at the time product revenue is recognized. While we engage in extensive product quality programs and processes, our warranty obligation is affected by product failure rates, utilization levels, material usage, service delivery costs incurred in correcting a product failure, and supplier warranties on parts delivered to us. Should actual product failure rates, utilization levels, material usage, service delivery costs or supplier warranties on parts differ from our estimates, revisions to the estimated warranty liability would be required.

The following table sets forth information related to our product warranty reserves for the nine months ended September 27, 2009 (In thousands):

Balance at December 31, 2008	\$ 3,032
Provisions	1,806
Claims settled	(1,695)
Acquired liability	83
Currency translation adjustments	86
Balance at September 27, 2009	\$ 3,312

(15) Business Acquisition

During March 2009, we acquired the stock of Bodet, located in Chemille, France and its affiliate Atlas, located in Tangier, Morocco. Bodet and Atlas are leading manufacturers of electro-mechanical and fluidic controls for the aerospace, defense, and transportation markets with annual revenues of approximately \$13 million. These businesses are part of our Aerospace Products Group reported in the Instrumentation and Thermal Fluid Controls Segment. In connection with these acquisitions, we recorded estimated fair values of \$11.7 million for current assets, \$6.7 million for fixed assets, \$4.8 million for identified intangible assets, and \$3.5 million for debt. The fair value of the net identifiable assets exceeded the purchase price by \$0.5 million and was recorded as a special charge (recovery) during the three months ended September 27, 2009.

(16) Subsequent Event

Edgar Filing: CIRCOR INTERNATIONAL INC - Form 10-Q

On September 28, 2009, we acquired Pipeline Engineering & Supply Co. Ltd. (Pipeline Engineering). Pipeline Engineering is a turn-key manufacturer of a full range of products and services that assist pipeline cleaning, pipeline integrity and flow assurance in the oil and gas industry. Pipeline Engineering has annual revenues of approximately \$30 million. Pipeline Engineering will be integrated into our Energy Products Segment.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This Quarterly Report on Form 10-Q contains certain statements that are forward-looking statements as that term is defined under the Private Securities Litigation Reform Act of 1995 (the Act) and releases issued by the Securities and Exchange Commission. The words may, hope, should, expect, plan, anticipate, intend, believe, estimate, predict, potential, continue, and other expressions which are predictions of or indicate future events and trends and which do not relate to historical matters, identify forward-looking statements. We believe that it is important to communicate our future expectations to our stockholders, and we, therefore, make forward-looking statements in reliance upon the safe harbor provisions of the Act. However, there may be events in the future that we are not able to accurately predict or control, and our actual results may differ materially from the expectations we describe in our forward-looking statements. Forward-looking statements involve known and unknown risks, uncertainties and other factors, which may cause our actual results, performance or achievements to differ materially from anticipated future results, performance or achievements expressed or implied by such forward-looking statements. Factors that could cause or contribute to such differences include, but are not limited to, the cyclical nature of some of our end markets which can affect the overall demand for and pricing of our products, changes in the price of and demand for oil and gas in both domestic and international markets, variability of raw material and component pricing, changes in our suppliers' performance, fluctuations in foreign currency exchange rates, our ability to continue operating our manufacturing facilities at efficient levels including our ability to continue to reduce costs, our ability to generate increased cash by reducing our inventories, our prevention of the accumulation of excess inventory, our ability to successfully implement our acquisition strategy, increasing interest rates, our ability to successfully defend product liability actions including asbestos cases impacting our Leslie subsidiary, as well as the uncertain continuing impact on economic and financial conditions in the United States and around the world as a result of terrorist attacks, current Middle Eastern conflicts and related matters. We advise you to read further about certain of these and other risk factors set forth in Part I, Item 1A, Risk Factors of our Annual Report filed on Form 10-K for the year ended December 31, 2008, together with subsequent reports we have filed with the Securities and Exchange Commission on Forms 10-Q and 8-K, which may supplement, modify, supersede, or update those risk factors. We undertake no obligation to publicly update or revise any forward-looking statement, whether as a result of new information, future events or otherwise.

Overview

CIRCOR International, Inc. is a leading provider of valves and fluid control products for the industrial, aerospace, petrochemical, and energy markets. We offer one of the industry's broadest and most diverse range of products—a range that allows us to supply end-users with a wide array of valves, systems and component products for fluid control.

We have organized the Company into two segments: Instrumentation and Thermal Fluid Controls Products and Energy Products. The Instrumentation and Thermal Fluid Controls Products segment serves our broadest variety of end-markets, including military and commercial aerospace, downstream oil and gas, chemical processing, marine, power generation, commercial HVAC systems, food and beverage processing, and other general industrial markets. The Energy Products segment primarily serves the upstream and midstream oil and gas exploration, production and distribution markets.

Our growth strategy includes organic profitable growth as well as strategic acquisitions that extend our current offering of engineered flow control products and systems. For organic growth, our businesses focus on developing new products and systems, expanding the geographic reach of our product sales, and reacting quickly to changes in market conditions in order to help grow our revenues. Regarding acquisitions, we have made fifteen acquisitions in the last eight years that extended our product offerings. In February 2006, we acquired two businesses: Hale Hamilton Valves Limited and its subsidiary Cambridge Fluid Systems (Hale Hamilton), a leading provider of high pressure valves and flow control equipment, and Sagebrush Pipeline Equipment Company (Sagebrush) which provides pipeline flow control and measurement equipment to oil and gas markets. In July 2007, we purchased the assets of Survival Engineering, Inc. (SEI), a leader in the design of pneumatic controls and inflation systems for the aerospace, marine, defense, and industrial markets. In May 2008, we acquired Motor Technology, Inc. (Motor Tech), a leader in the design and manufacture of specialty electric motors, actuators, and tachometers for aerospace, defense, medical and transportation markets. In March 2009, we acquired Bodet and Atlas, leading manufacturers of electro-mechanical and fluidic controls for the aerospace, defense and transportation markets. On September 28, 2009, we acquired Pipeline Engineering & Supply Co. Ltd. (Pipeline Engineering). Pipeline Engineering is a turn-key manufacturer of a full range of products and services to assist pipeline cleaning, pipeline integrity and flow assurance in the oil and gas industry.

During the past four years, we have made progress in fundamentally altering the culture of the Company, adopting and instilling a disciplined adherence to the Lean principles of visual metric management, operational excellence and continuous improvement. While, as with virtually all industrial manufacturers, the economic recession has affected adversely our financial results, we continue to focus on our key strategic initiatives and on quality of earnings by reducing our cost structure, driving operational improvements with Lean, and

Table of Contents

expanding our low cost operations in emerging markets. During the first three quarters of 2009, excluding acquisitions, we have reduced our total workforce by approximately 17%. During our fourth quarter 2009, we expect to continue to rationalize our cost structure and will be consolidating facilities, relocating certain of our manufacturing operations, and continuing to expand our global sourcing initiatives. We expect these activities to result in termination and other costs of approximately \$2.0 to \$2.5 million of which \$0.1 million was recognized as of September 27, 2009.

Basis of Presentation

All significant intercompany balances and transactions have been eliminated in consolidation. Certain prior period financial statement amounts have been reclassified to conform to currently reported presentations. We monitor our business in two segments: Instrumentation and Thermal Fluid Controls Products and Energy Products.

We operate and report financial information using a 52-week fiscal year ending December 31. The data periods contained within our Quarterly Reports on Form 10-Q reflect the results of operations for the 13-week, 26-week and 39-week periods which generally end on the Sunday nearest the calendar quarter-end date.

Critical Accounting Policies

The following discussion of accounting policies is intended to supplement the section Summary of Significant Accounting Policies presented in Note 2 to our consolidated financial statements included in our Annual Report on Form 10-K for the year ended December 31, 2008. These policies were selected because they are broadly applicable within our operating units. The expenses and accrued liabilities or allowances related to certain of these policies are initially based on our best estimates at the time of original entry in our accounting records. Adjustments are recorded when our actual experience, or new information concerning our expected experience, differs from underlying initial estimates. These adjustments could be material if our actual or expected experience were to change significantly in a short period of time. We make frequent comparisons of actual experience and expected experience in order to mitigate the likelihood of material adjustments.

There have been no significant changes from the methodology applied by management for critical accounting estimates previously disclosed in our most recent Annual Report on Form 10-K.

Revenue Recognition

Revenue is recognized when products are delivered, title and risk of loss have passed to the customer, no significant post-delivery obligations remain and collection of the resulting receivable is reasonably assured. Shipping and handling costs invoiced to customers are recorded as components of revenues and the associated costs are recorded as cost of revenues.

Cash, Cash Equivalents, and Short-term Investments

Revenue Cash and cash equivalents consist of amounts on deposit in checking and savings accounts with banks and other financial institutions. Short-term investments primarily consist of bank repurchase agreements which generally have short-term maturities and are carried at cost which approximates fair value.

Allowance for Inventory

We typically analyze our inventory aging and projected future usage on a quarterly basis to assess the adequacy of our inventory allowances. We provide inventory allowances for excess, slow-moving, and obsolete inventories determined primarily by estimates of future demand. The allowance is measured on an item-by-item basis determined based on the difference between the cost of the inventory and estimated market value. The provision for inventory allowance is a component of our cost of revenues. Assumptions about future demand are among the primary factors utilized to estimate market value. At the point of the loss recognition, a new, lower-cost basis for that inventory is established, and subsequent changes in facts and circumstances do not result in the restoration or increase in that newly established cost basis.

Our net inventory balance was \$150.3 million as of September 27, 2009 compared to \$183.3 million as of December 31, 2008. Our inventory allowance as of September 27, 2009 was \$15.6 million, compared with \$12.5 million as of December 31, 2008. Our provision for excess, slow moving and obsolete inventory was \$4.4 million for the first nine months of 2009 compared to \$3.5 million for the same period in 2008.

Edgar Filing: CIRCOR INTERNATIONAL INC - Form 10-Q

If there were to be a sudden and significant decrease in demand for our products, or if there were a higher incidence of inventory obsolescence because of changing technology and customer requirements, we could be required to increase our inventory allowances significantly and our gross profit could be adversely affected.

Table of Contents

Inventory management remains an area of focus, as we balance the need to maintain adequate inventory levels to ensure competitive lead times against the risk of inventory obsolescence because of changing technology and customer requirements.

Penalty Accruals

Some of our customer agreements, primarily in our project related businesses, contain late shipment penalty clauses whereby we are contractually obligated to pay consideration to our customers if we do not meet specified shipment dates. The accrual for estimated penalties is shown as a reduction of revenue and is based on several factors including limited historical customer settlement experience and management's assessment of specific shipment delay information. As of December 31, 2008 and September 27, 2009, we have accrued \$10.6 million and \$14.4 million, respectively, related to these potential late shipment penalties. As we conclude performance under these agreements, the actual amount of consideration paid to our customers may vary significantly from the amounts we currently have accrued.

Acquisition Accounting

In connection with our acquisitions, we assess and formulate a plan related to the future integration of the acquired entity. This process begins during the due diligence process and is concluded within twelve months of the acquisition. Our methodology for determining the fair values relating to purchase acquisitions is determined through established valuation techniques for industrial manufacturing companies and we typically utilize third party valuation firms to assist in the valuation of certain tangible and intangible assets.

In December 2007, the FASB issued a new accounting pronouncement regarding business combinations. The purpose of this accounting pronouncement, found under FASB ASC Topic 805, is to improve the information provided in financial reports about a business combination and its effects. The pronouncement requires acquisition-date fair value measurement of identifiable assets acquired, liabilities assumed, and non-controlling interests in the acquiree. The pronouncement is effective for fiscal years beginning on or after December 15, 2008 and applies to all business combinations. The Company adopted this standard as of January 1, 2009 and applies it prospectively to business combinations that occur after adoption. During March 2009, we acquired the stock of Bodet and its affiliate Atlas. For more detailed information, refer to Note 15, Business Acquisitions in our Notes to Consolidated Financial Statements. The adoption of this standard had no material effect on our results of operations or financial condition although the new standard has materially changed the accounting for business combinations consummated subsequent to January 1, 2009.

Legal Contingencies

We are currently involved in various legal claims and legal proceedings, some of which may involve substantial dollar amounts. Periodically, we review the status of each significant matter and assess our potential financial exposure. If the potential loss from any claim or legal proceeding is considered probable and the amount can be estimated, we accrue a liability for the estimated loss. Significant judgment is required in both the determination of probability and the determination as to whether an exposure can be reasonably estimated. Because of uncertainties related to these matters, accruals are based on the best information available at the time. As additional information becomes available, we reassess the potential liability related to our pending claims and litigation and may revise our estimates. Such revisions in the estimates of the potential liabilities could have a material adverse effect on our business, results of operations and financial position. For more information related to our outstanding legal proceedings, see *Commitments and Contingencies* in Note 11 of the accompanying consolidated financial statements as well as *Legal Proceedings* in Part II, Item 1.

Impairment Analysis

As required by ASC Topic 350.1-3, *Goodwill and Intangible Assets*, we perform an annual assessment as to whether there is an indication that goodwill and certain intangible assets are impaired. We also perform impairment analyses whenever events and circumstances indicate that they may be impaired. In assessing the fair value of goodwill, we use our best estimates of future cash flows from operating activities and capital expenditures of the reporting unit, the estimated terminal value for each reporting unit, and a discount rate based on the weighted average cost of capital.

Certain negative macroeconomic factors began to impact the global credit markets in late 2008 and we noted significant adverse trends in business conditions in the fourth quarter of 2008. Concurrent with these adverse developments, we commenced our annual impairment assessment of goodwill and certain intangible assets. In connection with preparing the impairment assessment, we identified deterioration in the expected future financial performance of our Instrumentation and Thermal Fluid Controls segment compared to the expected future financial performance of this segment at the end of 2007. We also determined that the appropriate discount rate (based on weighted average cost of capital) as of December 31, 2008 was significantly higher than the discount rate in our 2007 impairment assessment. As a result, we recognized goodwill and intangible impairments of \$140.3 million and \$1.0 million, respectively, within the Instrumentation and Thermal Fluid Controls

Edgar Filing: CIRCOR INTERNATIONAL INC - Form 10-Q

segment for the year ended December 31, 2008. Although we anticipate continued weakness in business conditions for the remainder of 2009, there have no further indicators of impairment based on our analysis and longer-term outlook as of September 27, 2009.

Table of Contents

The goodwill recorded on the consolidated balance sheet as of September 27, 2009 increased \$0.9 million to \$33.0 million compared to \$32.1 million as of December 31, 2008. The increase was due to a combination of currency fluctuations and escrow release on our prior acquisition of Motor Tech.

Income Taxes

Significant management judgment is required in determining our provision for income taxes, deferred tax assets and liabilities and any valuation allowance. Our effective tax rates differ from the statutory rate due to the impact of research and product development tax credits, domestic manufacturing deduction, state taxes, and the tax impact of non-U.S. operations. Our effective tax rate was 44.9%, 31.1%, and 30.6% for 2008, 2007 and 2006, respectively. Our tax rate for 2008 included the tax impact of an adjustment for goodwill and intangible impairment of \$141.3 million for which the tax basis was \$32.8 million. Excluding the goodwill and impairment charge, the 2008 effective tax rate would have been 30.3%.

For 2009, we expect an effective income tax rate of 27.4%. Our future effective tax rates could be adversely affected by earnings being lower than anticipated in countries where we have lower statutory rates and vice versa. Changes in the valuation of our deferred tax assets or liabilities, or changes in tax laws or interpretations thereof may also adversely affect our future effective tax rate. In addition, we are subject to the continuous examination of our income tax returns by the Internal Revenue Service and other tax authorities. We regularly assess the likelihood of adverse outcomes resulting from these examinations to determine the adequacy of our provision for income taxes.

Regarding deferred income tax assets, we maintained a total valuation allowance of \$9.1 million at September 27, 2009 and at December 31, 2008, respectively, due to uncertainties related to our ability to utilize these assets, primarily consisting of certain foreign tax credits, state net operating losses and state tax credits carried forward. The valuation allowance is based on estimates of taxable income in each of the jurisdictions in which we operate and the period over which our deferred tax assets will be recoverable. If market conditions improve and future results of operations exceed our current expectations, our existing tax valuation allowances may be adjusted, resulting in future tax benefits. Alternatively, if market conditions deteriorate or future results of operations are less than expected, future assessments may result in a determination that some or all of the deferred tax assets are not realizable. Consequently, we may need to establish additional tax valuation allowances for all or a portion of the gross deferred tax assets, which may have a material adverse effect on our business, results of operations and financial condition.

Pension Benefits

We maintain two pension benefit plans, a qualified noncontributory defined benefit plan and a nonqualified, noncontributory defined benefit supplemental plan that provides benefits to certain highly compensated officers and employees. To date, the supplemental plan remains an unfunded plan. These plans include significant pension benefit obligations which are calculated based on actuarial valuations. Key assumptions are made in determining these obligations and related expenses, including expected rates of return on plan assets and discount rates. Benefits are based primarily on years of service and employees' compensation. As of July 1, 2006, in connection with a revision to our retirement plan, we froze the pension benefits of our qualified noncontributory plan participants. Under the revised plan, such participants generally do not accrue any additional benefits under the defined benefit plan after July 1, 2006 and instead receive enhanced benefits associated with our defined contribution 401(k) plan in which substantially all of our U.S. employees are eligible to participate.

During the three months ended September 27, 2009, we made a cash contribution of \$1.2 million to our qualified defined benefit pension plan. For the remainder of 2009, we currently expect to make voluntary cash contributions of approximately \$0.1 million to our pension plans, although global capital market and interest rate fluctuations will impact future funding requirements.

Table of Contents**Results of Operations for the Three Months Ended September 27, 2009 Compared to the Three Months Ended September 28, 2008.**

The following tables set forth the results of operations, percentage of net revenue and the period-to-period percentage change in certain financial data for the three months ended September 27, 2009 and September 28, 2008:

	September 27, 2009		Three Months Ended September 28, 2008		% Change
	(Dollars in thousands)				
Net revenues	\$ 144,327	100.0%	\$ 208,680	100.0%	(30.8)%
Cost of revenues	102,462	71.0%	141,369	67.7%	(27.5)%
Gross profit	41,865	29.0%	67,311	32.3%	(37.8)%
Selling, general and administrative expenses	29,787	20.6%	34,489	16.5%	(13.6)%
Asbestos charges	1,977	1.4%	3,808	1.8%	(48.1)%
Special charges (recoveries)	(543)	(0.4)%			NA
Operating income	10,644	7.4%	29,014	13.9%	(63.3)%
Other (income) expense:					
Interest (income) expense, net	394	0.3%	(182)	-0.1%	(316.5)%
Other (income) expense, net	(959)	(0.7)%	11	0.0%	8,818.2%
Total other (income) expense	(565)	(0.4)%	(171)	-0.1%	230.4%
Income before income taxes	11,209	7.8%	29,185	14.0%	(61.6)%
Provision for income taxes	2,804	1.9%	9,412	4.5%	(70.2)%
Net income	\$ 8,405	5.8%	\$ 19,773	9.5%	(57.5)%

Net Revenues

Net revenues for the three months ended September 27, 2009 decreased by \$64.4 million, or 31%, to \$144.3 million from \$208.7 million for the three months ended September 28, 2008. The decrease in net revenues for the three months ended September 27, 2009 was attributable to the following:

Segment	Three Months Ended		Total Change (In thousands)	Acquisition	Operations	Foreign Exchange
	September 27, 2009	September 28, 2008				
Instrumentation & Thermal Fluid Controls	\$ 83,142	\$ 96,298	\$(13,156)	\$ 3,479	\$ (13,442)	\$ (3,193)
Energy	61,185	112,382	(51,197)		(49,227)	(1,970)
Total	\$ 144,327	\$ 208,680	\$(64,353)	\$ 3,479	\$ (62,669)	\$ (5,163)

The Instrumentation and Thermal Fluid Controls Products segment accounted for 58% of net revenues for the three months ended September 27, 2009 compared to 46% for the three months ended September 28, 2008. Likewise, our Energy Products segment accounted for 42% of net revenues for the three months ended September 27, 2009 compared to 54% for the three months ended September 28, 2008.

Instrumentation and Thermal Fluid Controls Products revenues decreased \$13.2 million, or 14%, for the quarter ended September 27, 2009 compared to the quarter ended September 28, 2008. This segment's quarterly revenues were negatively impacted by organic declines of \$13.4 million and unfavorable foreign exchange rates compared to the US dollar of \$3.2 million. These declines were partially offset by \$3.5 million in incremental revenues from the acquisitions of Bodet and Atlas in March 2009. This segment's customer orders decreased 13% in the third quarter

Edgar Filing: CIRCOR INTERNATIONAL INC - Form 10-Q

2009 compared to the same period last year with weakness in most markets except semiconductor and medical, which enjoyed a significant order increase. Order backlog increased to \$183.7 million as of September 27, 2009 compared to \$169.6 million as of September 28, 2008 driven primarily by aerospace. Similar to our third quarter 2009, we expect market conditions to remain under pressure with low demand for most of the general industrial, commercial HVAC, power generation, and commercial aerospace end markets served by this segment for the remainder of 2009.

Table of Contents

Energy Products revenues decreased by \$51.2 million, or 46%, for the quarter ended September 27, 2009 compared to the quarter ended September 28, 2008. The decrease was the result of organic declines of \$49.2 million and unfavorable \$2.0 million from foreign currency fluctuations due to a lower Euro compared to the US dollar. The organic declines were primarily due to an approximately 50% decline in North American oil and gas drilling and production activities as well as fewer large international and U.S. pipeline equipment projects. Orders for this segment declined \$7.6 million to \$55.1 million for the three months ended September 27, 2009 compared to \$62.7 million for the three months ended September 28, 2008 primarily as a result of the continued weakness in North American drilling and production activities resulting from lower oil and natural gas pricing and demand, partially offset by increased orders in large international projects. Backlog has declined by \$117.9 million to \$114.1 million as of September 27, 2009 compared to the same period in 2008. With the sharp declines in drilling rig counts and destocking of inventory at our distributors as well as volatile prices for gas and oil, we anticipate a continued weakness in U.S. short cycle energy orders during the remainder of 2009 compared to 2008. However, due to very low 2008 activities in large international projects, we do anticipate an increase in orders for these markets in the remainder of 2009 compared to 2008.

Gross Profit

Consolidated gross profit decreased \$25.4 million to \$41.9 million for the quarter ended September 27, 2009 compared to \$67.3 million for the quarter ended September 28, 2008. Consolidated gross margin decreased 330 basis points to 29.0% for the quarter ended September 27, 2009 compared to 32.3% for the quarter ended September 28, 2008.

Gross profit for the Instrumentation and Thermal Fluid Controls Products segment decreased \$3.6 million or 12% for the quarter ended September 27, 2009 compared to the quarter ended September 28, 2008. Lower organic revenues reduced gross profit by \$3.0 million, primarily the result of the lower volume and associated operating leverage offset partially by reduced material costs and lower labor expenses. Labor expenses have been lower due to a reduced workforce of approximately 12%, net of acquisitions, since December of 2008. Our third quarter of 2009 also includes unfavorable foreign exchange rates which adversely impacted gross profit by \$1.0 million and a positive contribution of \$0.3 million from the recent acquisitions of Bodet and Atlas.

Gross profit for the Energy Products segment decreased \$21.8 million or 59% for the quarter ended September 27, 2009 compared to the quarter ended September 28, 2008. This segment's quarterly gross profit decreased \$21.2 million due primarily to the organic declines in both the North American short cycle business and in large international projects. In addition gross profit declined \$0.6 million due to lower foreign exchange rates compared to the US dollar. Due to dramatic North American short cycle organic declines of approximately 50%, we have significantly reduced production to react to the lower demand as we and our customers begin to bring inventory levels back in line. This loss in operating leverage during the three months ended September 27, 2009 plus unfavorable volume, pricing and product mix in large international projects were the major drivers in the 810 basis point decline in gross margin to 24.8% for the quarter ended September 27, 2009 compared to 32.9% for the quarter ended September 28, 2008.

Selling, General and Administrative Expenses

Selling, general and administrative expenses declined \$4.7 million to \$29.8 million for the three months ended September 27, 2009 compared to \$34.5 million for the three months ended September 28, 2008. Selling, general and administrative expenses as a percentage of revenues increased to 20.6% for the three months ended September 27, 2009 compared to 16.5% for the three months ended September 28, 2008.

Selling, general and administrative expenses for the Instrumentation and Thermal Fluid Controls Products segment decreased 8% or \$1.5 million compared to the third quarter 2008. This change was due primarily to lower selling and commission costs.

Selling, general and administrative expenses for the Energy Products segment decreased 23% or \$2.5 million. The majority of this decrease was due to the organic declines resulting in lower sales commissions, reduced other selling and general administrative costs, and a reduction of \$0.2 million due to lower foreign exchange rates, primarily for the Euro, partially offset by severance expenses related to employees terminated and paid out during the three months ended September 27, 2009.

Corporate, general and administrative expenses decreased \$0.7 million in the third quarter of 2009 from the same period in 2008. The decrease was primarily due to lower short-term incentive compensation and was partially offset by investments in supply chain initiatives.

Asbestos Charges

Asbestos charges are associated with our Leslie subsidiary in the Instrumentation and Thermal Fluid Controls segment. Net asbestos related costs decreased \$1.8 million to \$2.0 million for the three months ended September 27, 2009 compared to \$3.8 million for the three months ended September 28, 2008. This decrease was due primarily to lower case filings, and lower average cost per settled claim.

Table of Contents*Special Charges (Recoveries)*

For the three months ended September 27, 2009, within the Instrumentation and Thermal Fluid Controls Segment, we recorded a special charge (recovery) of (\$0.5) million associated with a recent acquisition. This special recovery was a result of the fair value of the acquired assets exceeding the consideration transferred.

Operating Income

The change in operating income for the three months ended September 27, 2009 compared to the three months ended September 28, 2008 was as follows:

Segment	Three Months Ended		Total Change (In thousands)	Acquisition	Operations	Foreign Exchange
	September 27, 2009	September 28, 2008				
Instrumentation & Thermal Fluid Controls	\$ 8,224	\$ 7,612	\$ 612	\$ (104)	\$ 1,077	\$ (361)
Energy	\$ 6,696	\$ 26,022	\$ (19,326)	\$	\$ (18,899)	\$ (427)
Corporate	(4,276)	(4,620)	344		329	15
Total	\$ 10,644	\$ 29,014	\$ (18,370)	\$ (104)	\$ (17,493)	\$ (773)

Operating income decreased 63% or \$18.4 million for the three months ended September 27, 2009 compared to the three months ended September 28, 2008, on a 31% decrease in revenues.

Operating income for the Instrumentation and Thermal Fluid Controls Products segment increased \$0.6 million, or 8% for the third quarter of 2009 compared to the same period last year. This increase is due primarily to lower asbestos related costs partially offset by foreign currency fluctuations and incremental post-acquisition income from the Bodet acquisition. Operating margins increased 200 basis points to 9.9% from 7.9%.

Operating income for the Energy Products segment decreased \$19.3 million, or 74% for the third quarter 2009. Operating margins declined 1,230 basis points to 10.9% on a revenue decrease of 46%, compared to the third quarter 2008. The decrease in operating income was due primarily to organic revenue declines across the segment, unfavorable pricing and product mix for large international projects, costs to reduce our workforce plus unfavorable currency translation partially offset by lower commissions and increased productivity.

Interest (Income) Expense, Net

Interest (Income) expense, net, increased \$0.6 million for the three months ended September 27, 2009 compared to the three months ended September 28, 2008 due to a combination of lower interest on cash invested and higher interest expense on current borrowings.

Provision for Taxes

The effective income tax rate was 25.0% and 32.3% for the third quarters of 2009 and 2008, respectively. The decrease in the income tax rate for the third quarter of 2009 compared to the third quarter of 2008 was primarily due to lower earnings in jurisdictions with higher tax rates.

Net Income

Net income decreased 57% to \$8.4 million in the third quarter of 2009 on a revenue decline of 31% compared to the same quarter of 2008. This decrease is primarily attributable to lower organic revenues and unfavorable foreign exchange rates compared to the US dollar.

Table of Contents**Results of Operations for the Nine Months Ended September 27, 2009 Compared to the Nine Months Ended September 28, 2008.**

The following tables set forth the results of operations, percentage of net revenue and the period-to-period percentage change in certain financial data for the nine months ended September 27, 2009 and September 28, 2008:

	September 27, 2009		Nine Months Ended September 28, 2008		% Change
	(Dollars in thousands)				
Net revenues	\$ 484,509	100.0%	\$ 591,860	100.0%	(18.1)%
Cost of revenues	338,123	69.8%	402,752	68.0%	(16.0)%
Gross profit	146,386	30.2%	189,108	32.0%	(22.6)%
Selling, general and administrative expenses	98,127	20.3%	106,041	17.9%	(7.5)%
Asbestos charges	13,682	2.8%	6,893	1.2%	98.5%
Special charges (recoveries)	(1,678)	(0.3)%	160	0.0%	1,148.8%
Operating income	36,255	7.5%	76,014	12.8%	(52.3)%
Other (income) expense:					
Interest expense, net	466	0.1%	(60)	0.0%	(876.7)%
Other (income) expense, net	(1,409)	(0.3)%	660	0.1%	313.5%
Total other (income) expense	(943)	(0.2)%	600	0.1%	(257.2)%
Income before income taxes	37,198	7.7%	75,414	12.7%	(50.7)%
Provision for income taxes	10,601	2.2%	24,321	4.1%	(56.4)%
Net income	\$ 26,597	5.5%	\$ 51,093	8.6%	(47.9)%

Net Revenues

Net revenues for the nine months ended September 27, 2009 decreased by \$107.4 million, or 18%, to \$484.5 million from \$591.9 million for the nine months ended September 28, 2008. The decrease in net revenues for the nine months ended September 27, 2009 was attributable to the following:

Segment	Nine Months Ended September 27, September 28, 2009 2008		Total Change (In Thousands)	Acquisitions	Operations	Foreign Exchange
Instrumentation & Thermal Fluid Controls	\$ 257,203	\$ 283,615	\$ (26,412)	\$ 11,129	\$ (21,727)	\$ (15,814)
Energy	227,306	308,245	(80,939)		(63,734)	(17,205)
Total	\$ 484,509	\$ 591,860	\$ (107,351)	\$ 11,129	\$ (85,461)	\$ (33,019)

The Instrumentation and Thermal Fluid Controls Products segment accounted for 53% of net revenues for the nine months ended September 27, 2009 compared to 48% for the nine months ended September 28, 2008. The Energy Products segment accounted for 47% of net revenues for the nine months ended September 27, 2009 compared to 52% for the nine months ended September 28, 2008.

Instrumentation and Thermal Fluid Controls Products revenues decreased \$26.4 million, or 9%, for the nine months ended September 27, 2009 compared to the nine months ended September 28, 2008. The decrease in revenues was the net result of several factors. Organic decreases from existing operations comprised \$21.7 million of the revenue decline and currency fluctuations accounted for \$15.8 million. These revenue reductions were partially offset by \$11.1 million in incremental post-acquisition revenue from Bodet, Atlas and Motor Tech. This segment s

Edgar Filing: CIRCOR INTERNATIONAL INC - Form 10-Q

customer orders decreased 17% in the first nine months of 2009 compared to the same period last year with particular weaknesses in most sectors excluding military, medical and semiconductors. For the remainder of 2009, we expect market conditions to remain under pressure with low demand for most of the general industrial, commercial HVAC, power generation, and commercial aerospace end markets served by this segment.

Table of Contents

Energy Products revenues decreased by \$80.9 million, or 26%, for the nine months ended September 27, 2009 compared to the nine months ended September 28, 2008. The decrease was the net result of lower organic revenue of \$63.7 million primarily in our short cycle business, which includes standard products sold through distributors, as well as lower international project shipments and unfavorable currency fluctuations of \$17.2 million. This short-cycle business has been negatively impacted by lower oil and gas drilling activity in North America. Meanwhile, revenues for large international projects and fabricated systems in North America were approximately 8% lower organically for the first nine months of 2009 when compared to the same period in 2008. Orders for this segment were down 39% for the first nine months of 2009 compared to the same period in 2008. With the sharp declines in drilling rig counts and destocking of inventory at our distributors as well as volatile prices for gas and oil, we anticipate a continued weakness in U.S. short cycle energy orders during the remainder of 2009 compared to 2008. However, due to very low 2008 activities in large international projects, we do anticipate an increase in orders for these markets in the remainder of 2009 compared to 2008.

Gross Profit

Consolidated gross profit decreased \$42.7 million, or 23%, to \$146.4 million for the nine months ended September 27, 2009 compared to \$189.1 million for the nine months ended September 28, 2008. Consolidated gross margin decreased 180 basis points to 30.2% for the nine months ended September 27, 2009 from 32.0% for the nine months ended September 28, 2008.

Gross profit for the Instrumentation and Thermal Fluid Controls Products segment decreased \$6.4 million for the nine months ended September 27, 2009 compared to the nine months ended September 28, 2008. Gross profit decreased \$5.3 million on unfavorable foreign exchange rates relative to the US dollar and \$3.8 million due to lower production activities; however, these decreases were partially offset by \$2.8 million incremental post-acquisition gross profit from Bodet, Atlas and Motor Tech.

Gross profit for the Energy Products segment decreased \$36.3 million for the nine months ended September 27, 2009 compared to the nine months ended September 28, 2008. This decrease was comprised of \$31.1 million in lower organic revenue and \$5.2 million in lower foreign exchange rates compared to the US dollar. Due to the dramatic declines experienced in the North American short cycle business and large international projects, we have significantly reduced production to react to lower demand and to bring our inventory levels back in line with the depressed market. Gross profit margins declined 480 basis points for the nine months of 2009 compared to the same period in 2008 due mainly to the loss of operating leverage and unfavorable pricing and product mix on large international projects partially offset by lower labor and material costs.

Selling, General and Administrative Expenses

Selling, general and administrative expenses decreased \$7.9 million, or 8%, to \$98.1 million for the nine months ended September 27, 2009 compared to \$106.0 million for the nine months ended September 28, 2008.

Selling, general and administrative expenses for the Instrumentation and Thermal Fluid Controls Products segment decreased by \$2.2 million compared to the first three quarters of 2008. The majority of the decline was due to favorable foreign exchange rates for the Euro and Pound Sterling and lower selling costs and commissions partially offset by higher costs related to new acquisitions of Bodet, Atlas and Motor Tech as well as severance expenses related to employees terminated during the nine months ended September 27, 2009.

Selling, general and administrative expenses for the Energy Products segment decreased by \$6.4 million compared to the same period 2008. This decline was due to lower sales commissions, lower foreign exchange rates compared to the US dollar partially offset by severance expenses related to employees terminated during the nine months ended September 27, 2009.

Corporate, general and administrative expenses increased \$0.7 million in the first nine months of 2009 from the same period in 2008. The increase was primarily due to higher professional fees, pension expenses and investments in supply chain initiatives, partially offset by lower share based and incentive compensation expenses.

Asbestos Charges

Asbestos charges are associated with our Leslie subsidiary in the Instrumentation and Thermal Fluid Controls segment. Net asbestos related costs increased \$6.8 million to \$13.7 million for the nine months ended September 27, 2009 compared to \$6.9 million for the nine months ended September 28, 2008. This increase was comprised of \$4.5 million in lower insurance recoveries primarily due to the exhaustion and revised coverage limits of certain insurance policies, and \$1.6 million in higher defense expenses and \$0.7 million in higher indemnity costs.

Special Charges (Recoveries)

Edgar Filing: CIRCOR INTERNATIONAL INC - Form 10-Q

For the nine months ended September 27, 2009, we recorded special charges (recoveries) of (\$1.7) million, which includes (\$0.5) million associated with a recent acquisition as well as payments of (\$1.1) million we received in the first quarter of 2009 relating to a 2007 asset sale within our Energy Products Segment.

Table of Contents*Operating Income*

The change in operating income for the nine months ended September 27, 2009 compared to the nine months ended September 28, 2008 was as follows:

Segment	Nine Months Ended		Total Change (In Thousands)	Acquisitions	Operations	Foreign Exchange
	September 27, 2009	September 28, 2008				
Instrumentation & Thermal Fluid Controls	\$ 18,024	\$ 28,428	\$ (10,405)	\$ 599	\$ (9,135)	\$ (1,869)
Energy	33,484	62,264	\$ (28,780)		(25,026)	(3,754)
Corporate	(15,253)	(14,678)	(575)		(607)	32
Total	\$ 36,255	\$ 76,014	\$ (39,758)	\$ 599	\$ (34,766)	\$ (5,591)

Operating income decreased \$39.8 million, or 52%, to \$36.3 million for the nine months ended September 27, 2009 from \$76.0 million for the nine months ended September 28, 2008.

Operating income for the Instrumentation and Thermal Fluid Controls Products segment decreased \$10.4 million or 37% compared to the nine months ended September 28, 2008. Operating margins decreased 300 basis points to 7.0%. Higher asbestos related costs were the primary factor followed by lower organic revenue and unfavorable foreign currency fluctuations. These declines were partially offset by incremental post-acquisition income from Bodet, Atlas and Motor Tech.

Operating income for the Energy Products segment decreased \$28.8 million, or 46% for the nine months ended September 27, 2009 compared to the nine months ended September 28, 2008. Operating margins decreased 550 basis points to 14.7% on a revenue decline of 26%, compared to the first three quarters of 2008. The decrease in operating income was due primarily to the organic revenue declines, pricing on large international projects, severance expenses for terminated employees plus unfavorable currency impact, partially offset by lower selling costs.

Interest Expense, Net

Interest expense, net, increased \$0.5 million for the nine months ended September 27, 2009 compared to the nine months ended September 28, 2008. The increase in interest expense, net was primarily due to lower interest on our invested cash and increased borrowing costs on our new revolving credit facility.

Other (Income) Expense, Net

The Company reported other income of \$1.4 million for the nine months ended September 27, 2009 compared to \$0.7 million of other expense for the nine months ended September 28, 2008. The \$2.1 million difference was largely the result of foreign currency fluctuations.

Provision for Taxes

The effective tax rate was 28.5% for the nine month period ended September 27, 2009 compared to 32.3% for the same period ended September 28, 2008. The decrease in the income tax rate for the first nine months of 2009 compared to the same period in 2008 was primarily due to lower earnings in jurisdictions with higher tax rates.

Net Income

Net income decreased \$24.5 million to \$26.6 million for the nine months ended September 27, 2009 compared to \$51.1 million for the nine months ended September 28, 2008. This decrease is primarily attributable to decreased profitability of both the Energy Products and Instrumentation and Thermal Fluid Products segments.

Liquidity and Capital Resources

Edgar Filing: CIRCOR INTERNATIONAL INC - Form 10-Q

Our liquidity needs arise primarily from capital investment in machinery, equipment and the improvement of facilities, funding working capital requirements to support business growth initiatives, acquisitions, dividend payments, pension funding obligations and debt service costs. We have historically generated cash from operations. We believe we remain in a strong financial position, with resources available for reinvestment in existing businesses, strategic acquisitions and managing our capital structure on a short and long-term basis.

Table of Contents

The following table summarizes our cash flow activities for the nine months ended September 27, 2009 (In thousands):

Cash flow from:	
Operating activities	\$ 29,231
Investing activities	17,563
Financing activities	(12,450)
Effect of exchange rates on cash and cash equivalents	1,891
 Increase in cash and cash equivalents	 \$ 36,235

During the nine months ended September 27, 2009, we generated \$29.2 million in cash flow from operating activities compared to \$36.2 million during the nine months ended September 28, 2008. The lower amount of cash provided by operating activities was primarily due to lower net income offset by reduced working capital needs compared to the same period in 2008. The \$17.6 million provided by investing activities was primarily generated from the net proceeds of the sale of short term investments offset by payments for the Bodet and Atlas acquisitions, as well as capital equipment expenditures. Financing activities used \$12.5 million including \$7.3 million for net debt payments, \$2.8 million of debt issuance costs, \$1.9 million for dividend payments to shareholders and \$0.4 million related to tax effects of share based compensation.

As of September 27, 2009, total debt was \$9.7 million compared to \$13.2 million as of December 31, 2008. Total debt as a percentage of total shareholders' equity was 3% as of September 27, 2009 compared to 4% as of December 31, 2008.

In July 2009, we entered into a new three and one half year, unsecured credit agreement that provides for a \$190 million revolving line of credit and terminated the previously available \$125 million revolving credit facility that we entered in December 2005. The new agreement includes a \$30 million accordion feature for a maximum facility size of \$220 million. In addition, the new credit agreement allows for additional indebtedness not to exceed \$80 million. There has been no change in our financial covenants from our previous agreement that we entered into in December 2005. We anticipate using this new credit facility to fund potential acquisitions, to support our working capital needs, and for general corporate purposes. As of September 27, 2009, we had borrowings of \$1.7 million outstanding under our new credit facility and \$44.9 million allocated to support outstanding letters of credit.

Certain of our loan agreements contain covenants that require, among other items, maintenance of certain financial ratios and also limit our ability to: enter into secured and unsecured borrowing arrangements; issue dividends to shareholders; acquire and dispose of businesses; transfer assets among domestic and international entities; participate in certain higher yielding long-term investment vehicles; and issue additional shares of our stock. As of September 27, 2009, we were in compliance with all covenants related to our existing debt obligations.

The ratio of current assets to current liabilities was 2.97:1 at September 27, 2009 and 2.05:1 at December 31, 2008. Cash and cash equivalents were \$83.7 million as of September 27, 2009, compared to \$47.5 million as of December 31, 2008.

In 2009, we expect to generate positive cash flow from operating activities sufficient to support our capital expenditures, to reduce our outstanding debt and help fund acquisitions and to pay dividends approximating \$2.5 million based on our current dividend practice of paying \$0.15 per share annually. Based on our expected cash flows from operations and contractually available borrowings under our credit facilities, we expect to have sufficient liquidity to fund working capital needs and future growth. We continue to search for strategic acquisitions that extend our current offering of engineered flow control products and systems. A larger acquisition may require additional borrowings and or the issuance of our common stock.

The public and private capital markets in the United States and around the world continue to experience extreme volatility, disruption and general slowdown at unprecedented levels. This has spawned an unprecedented deterioration in many industrial markets including several of the markets into which we sell our products. The breadth, depth and duration of this crisis remain uncertain. These conditions can adversely affect our revenue, results of operations and overall financial growth. Additionally, many lenders and institutional investors have reduced, and in some cases, ceased to provide funding to borrowers, including other financial institutions. A prolonged constriction on future lending by banks or investors could result in higher interest rates on future debt obligations or could restrict our ability to obtain sufficient financing to meet our long-term operational and capital needs or could limit our ability in the future to consummate strategic acquisitions. The current uncertainty and turmoil in the credit markets may also negatively impact the ability of our customers and vendors to finance their operations which, in turn, could result in a decline of our sales and in our ability to obtain necessary raw materials and components, thus potentially having an adverse effect on our business, financial condition and results of operations.

Table of Contents

Off-Balance Sheet Arrangements

We have no off-balance sheet arrangements that have or are reasonably likely to have a current or future material effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures, or capital resources.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Interest Rate Sensitivity Risk

As of September 27, 2009, our primary interest rate risk is related to borrowings under our revolving credit facility and our industrial revenue bonds. As of September 27, 2009, we have \$1.7 million borrowed under our revolving credit facility. Based upon expected levels of borrowings under our revolving credit facility in 2009 and our current balance for our industrial revenue bond, an increase in variable interest rates of 100 basis points would have an effect on our annual results of operations and cash flows of approximately \$0.1 million.

Foreign Currency Exchange Risk

We use forward contracts to manage the currency risk related to certain business transactions denominated in foreign currencies. Related gains and losses are recognized when hedged transactions affect earnings, which are generally in the same period as the underlying foreign currency denominated transactions. To the extent these transactions are completed, the contracts do not subject us to significant risk from exchange rate movements because they offset gains and losses on the related foreign currency denominated transactions. As of September 27, 2009, we had forward contracts to sell currencies, principally US dollar contracts held by our foreign subsidiaries, with a contract value of \$27.2 million. The fair value at September 27, 2009 of these derivative forward contracts was approximately \$1.0 million and is carried in other current assets on our balance sheet. The counterparties to these contracts are major financial institutions. Our risk of loss in the event of non-performance by the counterparties is not significant.

We do not use derivative financial instruments for trading purposes. Risk management strategies are reviewed and approved by senior management before implementation.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Our Chief Executive Officer and Chief Financial Officer (our principal executive officer and principal financial officer, respectively) have evaluated the effectiveness of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934) as of the end of the period covered by this report on Form 10-Q. Based on this evaluation, our principal executive officer and principal financial officer have concluded that, as of the end of the period covered by this report, the Company's disclosure controls and procedures were designed and were effective to give reasonable assurance that information we disclose in reports that we file or submit under the Securities and Exchange Act of 1934 is accumulated and communicated to management, including our principal executive and principal financial officers, to allow timely decisions regarding required disclosure and that such information is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

Changes in Internal Controls Over Financial Reporting

We have made no significant changes in our internal controls over financial reporting during the quarter ended September 27, 2009 that could materially affect, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II - OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

Asbestos Litigation

Background

Like many other manufacturers of fluid control products, our subsidiary Leslie Controls, Inc. (Leslie), which we acquired in 1989, has been and continues to be named as a defendant in product liability actions brought on behalf of individuals who seek compensation for their alleged exposure to airborne asbestos fibers. In some instances, we also have been named individually and/or as alleged successor in interest in these cases.

As of the end of September 2009, Leslie was a named defendant in approximately 1,143 active, unresolved asbestos-related claims filed in California, Texas, New York, Massachusetts, Illinois, Pennsylvania, West Virginia, Rhode Island and approximately two dozen other states. Approximately 612 of these claims involve claimants allegedly suffering from (or the estates of decedents who allegedly died from) mesothelioma, a fatal malignancy associated with asbestos exposure.

Table of Contents

In addition to these claims, Leslie remains a named defendant in approximately 4,700 unresolved asbestos-related claims filed in Mississippi. Since 2004, however, the Mississippi Supreme Court has interpreted joinder rules more strictly, and the state legislature enacted a tort reform act under which each plaintiff must independently satisfy venue provisions, thus preventing thousands of out-of-state claimants from tagging onto a single in-state plaintiff's case. As a result of these changes, Mississippi state court judges since 2004 have severed and dismissed tens of thousands of out-of-state asbestos claims against numerous defendants including Leslie. We continue to expect that most of the remaining Mississippi claims against Leslie will be dismissed as well. Leslie has not incurred any indemnity costs in Mississippi and defense costs to resolve these Mississippi claims have not been significant. While it is possible that certain dismissed claims could be re-filed in Mississippi or in other jurisdictions, any such re-filings likely would be made on behalf of one or a small number of related individuals who could demonstrate actual injury and some connection to Leslie's products.

Leslie's asbestos-related claims generally involve its fluid control products. Leslie management believes that any asbestos was incorporated entirely within the product in a way that would not allow for any ambient asbestos during normal operation or during normal inspection and repair procedures. Leslie and its insurers' general strategy has been to vigorously defend these claims. Nevertheless, while we strongly believe that exposure to Leslie's products has not caused asbestos-related illness to any plaintiff, juries or courts have reached a different conclusion in particular cases and could do so in others.

Leslie has resolved a number of asbestos-related claims over the past few years and continues to do so for strategic reasons, including avoidance of defense costs and the possible risk of excessive verdicts. The amounts expended on asbestos-related claims in any year are generally impacted by the number of claims filed, the volume of pre-trial proceedings, and the number of trials and settlements.

During 2007, Los Angeles state court juries rendered two verdicts that, if allowed to stand, would result in a liability to Leslie of approximately \$3.8 million. Although Leslie accrued a liability during 2007 for each of these verdicts, both verdicts were appealed and, during September 2009, the California Court of Appeals reversed one of the two judgments against Leslie. Subsequently, however, the Court of Appeals granted the plaintiff's petition for a re-hearing and thus vacated its appellate order. While we remain optimistic that the Court of Appeals ultimately will issue a final order reversing the judgment, we have not reduced the accrued liability. With respect to the remaining verdict, appellate arguments have not yet been scheduled; however, we continue to believe there are strong grounds for overturning this verdict, or for significantly reducing the amount of the award or requiring a new trial. Leslie has recorded \$0.8 million in accrued interest for both adverse verdicts.

Accounting Indemnity and Defense Cost Liabilities and Assets

Leslie records an estimated liability associated with reported asbestos claims when it believes that a loss is both probable and can be reasonably estimated. Prior to the fourth quarter of 2007, with respect to its unresolved pending claims, Leslie did not believe that it had sufficient information to assess the likelihood of resolving such claims. Accordingly, Leslie accrued for defense costs as incurred, and accrued for pending claims only when resolution of a particular claim was probable and the probable loss was estimable. As a practical matter, the claims accrual generally occurred close in time to when a settlement agreement for a particular claim was reached. In most cases, settlement payments are paid to claimants within thirty to sixty days of settlement.

During the fourth quarter of 2007, Hamilton, Rabinovitz and Associates, Inc. (HR&A), a firm specializing in estimating expected liabilities of mass tort claims, was engaged to help determine an estimate of Leslie's asbestos-related liabilities. Because Leslie's claims experience is both limited and variable, HR&A concluded that any estimate of pending or future liabilities of Leslie's asbestos claims would be highly uncertain from a statistical perspective. Leslie's management determined, however, that, by using its historical (albeit limited and variable) average cost by disease classification in resolving closed claims, and by applying this information to the mix of current open claims, it could make a reasonable estimate of the indemnity costs to be incurred in resolving such current open claims. As a result, Leslie recorded a liability of \$9.0 million during the fourth quarter of 2007 for the estimated indemnity cost associated with resolution of its then current open claims. During the fourth quarter of 2008, HR&A updated its analysis and reaffirmed its conclusion that a forecast of the number and value of any future asbestos claims is unwarranted and highly uncertain from a statistical perspective.

As of September 27, 2009, Leslie has recorded asbestos liabilities of \$23.7 million (\$11.6 million short-term and \$12.1 million long-term) compared to \$19.2 million as of December 31, 2008. The \$23.7 million liability as of September 27, 2009 is comprised of \$15.5 million for existing claims, \$4.6 million related to adverse verdicts and \$3.6 million for incurred but unpaid legal costs. Asbestos related insurance receivable amounts totaled \$6.5 million (all short-term) as of September 27, 2009 compared to \$10.7 million as of December 31, 2008. The \$6.5 million receivable as of September 27, 2009 is comprised of \$1.5 million for existing claims, \$2.2 million related to adverse verdicts and \$2.8 million for incurred but unpaid legal costs.

Table of Contents

A summary of Leslie's unpaid existing asbestos claims and incurred asbestos defense cost liabilities and the related insurance recoveries is provided below.

In Thousands	September 27, 2009	December 31, 2008
Existing claim indemnity liability	\$ 20,060	\$ 16,661
Incurred defense cost liability	3,615	2,584
Insurance recoveries receivable	(6,485)	(10,765)
Net asbestos liability	\$ 17,190	\$ 8,480

Although Leslie believes its estimates are reasonable, such estimates are also highly uncertain, especially because Leslie's claims history is relatively limited, recent and quite variable. Depending on future events, the actual costs of resolving these pending claims could be substantially higher or lower than the current estimate. Some of the more significant unknown or uncertain factors that will affect these costs going forward include:

the severity of the injuries alleged by each pending claimant;

increases or decreases in Leslie's average settlement costs;

possible adverse or favorable jury verdicts;

rulings on unresolved legal issues in various jurisdictions that bear on Leslie's legal liability;

the numbers of claims that will be dismissed with no indemnity payments;

the impact of potential changes in legislative or judicial standards in different jurisdictions; and

the potential bankruptcies of other companies named as defendants in asbestos-related claims.

As a result of these factors, Leslie is unable to estimate a range of additional losses that may be reasonably possible in the event that actual indemnity costs of resolving pending claims are higher than our estimate. In addition, while the likelihood of future claims is probable, Leslie's management cannot estimate the amount of future claims or any range of losses that may be reasonably possible arising from such claims. With respect to current claims, critical information is known regarding such factors as disease mix, jurisdiction and identity of plaintiff's counsel. Such information is of course unknown with respect to any future claims, and Leslie's management believes that the disease mix, jurisdictional information and plaintiff counsel identity associated with its current case experience, which has been both limited and variable, cannot reasonably be extrapolated to any future filings. Moreover, Leslie management believes that appellate actions recently commenced and currently pending in certain jurisdictions such as California, together with movements toward legislative and judicial reform in such jurisdictions, may significantly alter the litigation landscape, thus affecting both the rate at which claims may be filed as well as the likelihood of incurring indemnity amounts on account of such future claims and the level of indemnity that may be incurred to resolve such claims.

Q3 and YTD 2009 Experience and Financial Statement Impact

The following tables provide information regarding Leslie's claim activity during the three months ended September 27, 2009 as well as the financial impact on the Company of the asbestos litigation for the three and nine months ended September 27, 2009 and September 28, 2008

Edgar Filing: CIRCOR INTERNATIONAL INC - Form 10-Q

(excluding open Mississippi claims for which we anticipate dismissal of such claims for the reasons described above)

	Three Months Ended September 27, 2009
Beginning open claims	1,158
Claims filed	131
Claims resolved and dismissed	(146)
Ending open claims	1,143
Ending open mesothelioma claims	612

Table of Contents

(In Thousands)	Three Months Ended		Nine Months Ended	
	September 27, 2009	September 28, 2008	September 27, 2009	September 28, 2008
Indemnity costs accrued	\$ 1,140	\$ 3,182	\$ 7,851	\$ 7,041
Adverse verdict interest costs (verdicts appealed)	95	316	283	406
Defense cost incurred	3,009	2,650	9,450	7,805
Insurance recoveries adjustment			2,069	
Insurance recoveries accrued	(2,267)	(2,340)	(5,971)	(8,359)
Net pre-tax asbestos expense	\$ 1,977	\$ 3,808	\$ 13,682	\$ 6,893

Insurance**Historical**

To date, Leslie's insurers have paid the majority of the costs associated with its defense and settlement of asbestos-related actions. Under Leslie's cost-sharing arrangements with its insurers, Leslie's insurers historically paid 71% of defense and settlement costs associated with asbestos-related claims and Leslie was responsible for the remaining 29% of all such defense and indemnity costs. The amount of indemnity available under Leslie's primary layer of insurance coverage was therefore reduced by 71% of any amounts paid through settlement or verdict.

Recent Developments

During the third quarter of 2008, Zurich, an insurer that paid 8% of Leslie's historical asbestos defense and indemnity costs, informed Leslie that it had reached its maximum indemnity obligation under the applicable insurance policy and that Leslie, therefore, was now responsible for the 8% share previously paid by Zurich. More recently, however, Zurich acknowledged that its calculations concerning policy exhaustion were incorrect and that such policy exhaustion actually occurred on January 30, 2009. As a result, Zurich is obligated to reimburse Leslie for a portion of the additional indemnity and defense costs incurred by Leslie from Zurich's original notification until the end of January 2009. Nonetheless, upon making such reimbursement, Zurich will have completed its obligations to Leslie under the policy and Leslie is now responsible for the 8% share previously paid by Zurich.

During the first quarter of 2009, one of Leslie's other primary insurers, Continental Casualty, a CNA company (Continental), informed Leslie that indemnity payments had exhausted a three-year policy covering Leslie from 1967 through 1970. In so claiming, Continental expressed its belief that the policy in question contained a single aggregate limit of \$1 million for the three-year period rather than annual limits of \$1 million for each of the three years. As a result of the revised claimed coverage limit, Continental believes that its allocation under the cost sharing arrangement is now 15.44% compared to the 27% historically paid by Continental. Leslie strongly disagrees with Continental's position and intends to vigorously dispute Continental's position. Leslie has reaffirmed its position that there are two additional years of insurance coverage with \$1 million policy limits. However, in light of the uncertainty surrounding this dispute, Leslie reduced its insurance recovery receivable by \$2.1 million in the first quarter of 2009.

Remaining Insurance

As of September 27, 2009, we believe that the aggregate amount of indemnity (on a cash basis) remaining on Leslie's primary layer of insurance was approximately \$3.2 million. After giving effect to our accrual for the adverse verdicts currently on appeal, the remaining amount of Leslie's primary layer of insurance is \$1.5 million. From a financial statement perspective, however, after giving effect to our accrual for the estimated indemnity cost of resolving pending claims, Leslie recorded the maximum amount of available primary layer insurance as of September 2008. As a result, asbestos related indemnity costs are no longer partially offset by a corresponding insurance recovery. However, defense costs, which are recognized as incurred, will continue to be partially offset by insurance until such time as the aggregate amount of indemnity claims paid out (on a cash basis) by the remaining two primary layer insurance carriers exceeds policy limits. The amount of this partial insurance recovery may vary depending upon the outcome of the disagreement with Continental within an anticipated range of 51.4% and 63% of such defense costs. While we cannot reasonably predict when Leslie's primary layer will be fully exhausted, if Leslie's rate of settlements were to continue at a pace consistent with the past two years, and, assuming no payments on account of the adverse verdicts, policy limits would be reached within approximately one year. If, however, Leslie were to be required to make payments on account of any adverse verdicts, the time period within which such policy limits would be reached could be significantly shorter than one year.

In addition to its primary layer of insurance, Leslie does have limited available excess insurance coverage. However, some of this excess insurance lies above layers of excess insurance written by insolvent insurers, which could affect when Leslie may be able to recover this excess

insurance. Moreover, unlike primary policies under which defense costs do not erode policy limits, the terms of excess policies typically provide that covered defense costs do erode policy limits. As a result, upon exhaustion of its primary layer of insurance, Leslie will become responsible for a substantial majority of any indemnity and defense costs, which could have a material adverse effect on our financial condition, results of operations, and cash flows.

Expected Limitations and Other Matters

We believe that payment of any litigation-related asbestos liabilities of Leslie (Leslie currently constitutes approximately 6% of the Company's consolidated revenues and 1% of the Company's shareholders' equity) is legally limited to the net assets of that subsidiary. This belief is based on the principle of American law that a shareholder (including a parent corporation) is generally not liable for an incorporated entity's obligations.

Smaller numbers of asbestos-related claims have also been filed against two of our other subsidiaries: Spence Engineering Company, Inc. (Spence), the stock of which we acquired in 1984; and Hoke, Inc. (Hoke), the stock of which we acquired in 1998. Due to the nature of the products supplied by these entities, the markets they serve and our historical experience in resolving these claims, we do not believe that asbestos-related claims will have a material adverse effect on the financial condition, results of operations or liquidity of Spence or Hoke, or the financial condition, consolidated results of operations or liquidity of the Company.

ITEM 1A. RISK FACTORS

We have not identified any material changes from the risk factors as previously disclosed in Item 1A. to Part I of our Annual Report on Form 10-K for the year ended December 31, 2008.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Working Capital Restrictions and Limitations upon Payment of Dividends

Certain of our loan agreements contain covenants that require, among other items, maintenance of certain financial ratios and also limit our ability to: enter into secured and unsecured borrowing arrangements; pay dividends to shareholders; acquire and dispose of businesses; invest in capital equipment; participate in certain higher yielding long-term investment vehicles; and issue additional shares of our stock. We were in compliance with all covenants related to our existing debt obligations as of September 27, 2009 and December 31, 2008.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

None.

ITEM 5. OTHER INFORMATION

None.

ITEM 6. EXHIBITS

Exhibit No.	Description and Location
2	Plan of Acquisition, Reorganization, Arrangement, Liquidation or Succession:
2.1	Distribution Agreement by and between Watts Industries, Inc. and CIRCOR International, Inc., dated as of October 1, 1999, is incorporated herein by reference to Exhibit 2.1 to Amendment No. 2 to CIRCOR International, Inc.'s Registration Statement on Form 10-12B, File No. 000-26961, filed with the Securities and Exchange Commission on October 6, 1999.
3	Articles of Incorporation and By-Laws:
3.1*	Amended and Restated Certificate of Incorporation of CIRCOR International, Inc.
3.2	Amended and Restated By-Laws of CIRCOR International, Inc. are incorporated herein by reference to Exhibit 3.2 to CIRCOR International, Inc.'s Annual Report on Form 10-K, File No. 001-14962, filed with the Securities and Exchange Commission on February 26, 2009 (Form 10-K).
3.3	Certificate of Amendment to the Amended and Restated By-Laws of CIRCOR International, Inc. is incorporated herein by reference to Exhibit 3.3 to the Form 10-K.
3.4*	Amended and Restated Certificate of Designations of Series A Junior Participating Cumulative Preferred Stock of CIRCOR International, Inc.
4	Instruments Defining the Rights of Security Holders, Including Indentures:
4.1	Shareholder Rights Agreement, dated as of September 23, 2009, between CIRCOR International, Inc. and American Stock Transfer and Trust Company, LLC, as Rights Agent, is incorporated herein by reference to Exhibit 4.1 to CIRCOR International, Inc.'s Registration Statement on Form 8-A12B, File No. 001-14962, filed with the Securities and Exchange Commission on September 28, 2009.
4.2	Specimen certificate representing the Common Stock of CIRCOR International, Inc. is incorporated herein by reference to Exhibit 4.1 to Amendment No. 1 to CIRCOR International, Inc.'s Registration Statement on Form 10-12B, File No. 000-26961, filed with the Securities and Exchange Commission on September 22, 1999.
10.1	Credit Agreement, dated July 29, 2009, among CIRCOR International, Inc., as borrower, certain subsidiaries of CIRCOR International, Inc., as guarantors, the lenders from time to time party thereto and Keybank National Association, as joint-lead arranger, co-bookrunner and administrative agent, swing line lender and a letter of credit issuer, is incorporated herein by reference to Exhibit 10.13 to CIRCOR International, Inc.'s Quarterly Report on Form 10-Q, File No. 001-14962, filed with the Securities and Exchange Commission on July 30, 2009.
10.2*	Executive Change of Control Agreement between Circor, Inc. and A.J. Sharma, dated September 1, 2009.
31.1*	Certification of Chief Executive Officer Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
31.2*	Certification of Chief Financial Officer Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.
32*	Certification of Chief Executive Officer and Chief Financial Officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
