ALIGN TECHNOLOGY, INC.

(Exact name of registrant as specified in its charter)

Edgar Filing: ALIGN TECHNOLOGY INC - Form 10-Q

Delaware
(State or other jurisdiction of
incorporation or organization)

94-3267295
(I.R.S. Employer
Identification Number)

2560 Orchard Parkway

San Jose, California 95131

(Address of principal executive offices)

(408) 470-1000

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of large accelerated filer, accelerated filer, and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company)

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The number of shares outstanding of the registrant's Common Stock, \$0.0001 par value, as of October 29, 2010 was 76,311,295.

ALIGN TECHNOLOGY, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(unaudited)

Note 1. Summary of Significant Accounting Policies

Basis of presentation

The accompanying unaudited Condensed Consolidated Financial Statements have been prepared by Align Technology, Inc. (we, our, or Align) in accordance with the rules and regulations of the Securities and Exchange Commission (SEC) and contain all adjustments, including normal recurring adjustments, necessary to present fairly our financial position as of September 30, 2010, our results of operations for the three and nine months ended September 30, 2010 and 2009, and our cash flows for the nine months ended September 30, 2010 and 2009. The Condensed Consolidated Balance Sheet as of December 31, 2009 was derived from the December 31, 2009 audited financial statements. Revenues and cost of revenues in prior period amounts have been reclassified to conform with the current period presentation. These reclassifications had no impact on previously reported gross profit or financial position.

The results of operations for the three and nine months ended September 30, 2010 are not necessarily indicative of the results that may be expected for the year ending December 31, 2010 or any other future period, and we make no representations related thereto. The information included in this Quarterly Report on Form 10-Q should be read in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations, Quantitative and Qualitative Disclosures About Market Risk and the Consolidated Financial Statements and notes thereto included in Items 7, 7A and 8, respectively, of our Annual Report on Form 10-K for the year ended December 31, 2009.

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in our Condensed Consolidated Financial Statements and accompanying notes. Actual results could differ materially from those estimates.

Revenue recognition

Invisalign Teen is delivered in a single shipment except for six replacement aligners that are included in the price of the product and may be ordered at any time throughout treatment. We use vendor specific objective evidence of fair value to allocate revenue to the replacement aligners and recognize the residual revenue upon initial shipment. Through the second quarter of 2010, we deferred 100 percent of the fair value for the six replacement aligners. This deferred revenue was subsequently recognized as the replacement aligners were shipped or when the case was completed. Management evaluated the actual usage of replacement aligners since the launch of Invisalign Teen nearly two years ago, and believes that there is sufficient historical evidence to establish an estimated usage rate. As a result, in June 2010, we reduced deferred revenue for Invisalign Teen replacement aligners by \$14.3 million to reflect the estimated usage for in-process cases and starting in July 2010, we began recognizing the fair value of the replacement aligners when they are shipped. We believe that this estimated usage is reasonable and appropriate because of the relative stability of the Invisalign Teen replacement utilization since it was first offered. Although we are not expecting any material changes, we will continue to analyze the usage of replacement aligners and may adjust the estimated usage rate as necessary.

Recent Accounting Pronouncements

In September 2009, the Financial Accounting Standards Board (FASB) amended the Accounting Standards Codification (ASC) as summarized in Accounting Standards Update (ASU) 2009-13, Revenue Recognition (ASC 605): Multiple-Deliverable Revenue Arrangements. Guidance in ASC 605-25 on revenue arrangements with multiple deliverables has been amended to require an entity to allocate revenue to deliverables in an arrangement using its best estimate of selling prices if the vendor does not have vendor-specific objective evidence or third-party evidence of selling prices, and to eliminate the use of the residual method and require the entity to allocate revenue using the relative selling price method. The new guidance also requires expanded quantitative and qualitative disclosures about revenue from arrangements with multiple deliverables. The update is effective for fiscal years beginning on or after June 15, 2010, with early adoption permitted. Adoption may either be on a prospective basis for new revenue arrangements entered into after adoption of the update, or by retrospective application. We are planning to adopt the update effective January 1, 2011 and are assessing the potential impact to our consolidated financial statements.

Table of Contents**ALIGN TECHNOLOGY, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(unaudited)**

In January 2010, the FASB issued ASU 2010-06, Fair Value Measurements and Disclosures (ASC 820): Improving Disclosures about Fair Value Measurements. This update will require (1) an entity to disclose separately the amounts of significant transfers in and out of Levels 1 and 2 fair value measurements and to describe the reasons for the transfers; and (2) information about purchases, sales, issuances and settlements to be presented separately (i.e. present the activity on a gross basis rather than net) in the reconciliation for fair value measurements using significant unobservable inputs (Level 3 inputs). This guidance clarifies existing disclosure requirements for the level of disaggregation used for classes of assets and liabilities measured at fair value and require disclosures about the valuation techniques and inputs used to measure fair value for both recurring and nonrecurring fair value measurements using Level 2 and Level 3 inputs. The new disclosures and clarifications of existing disclosure are effective for fiscal years beginning after December 15, 2009, except for the disclosure requirements related to the purchases, sales, issuances and settlements in the rollforward activity of Level 3 fair value measurements. Those disclosure requirements are effective for fiscal years ending after December 31, 2010. We are still assessing the impact of this guidance and do not believe the adoption of this guidance will have a material impact to our consolidated financial statements.

On February 24, 2010, FASB issued ASU 2010-09, Subsequent Events (ASC 855): Amendments to Certain Recognition and Disclosure Requirements. The amendments in the ASU remove the requirement for a Securities and Exchange Commission (SEC) filer to disclose a date through which subsequent events have been evaluated in both issued and revised financial statements. Revised financial statements include financial statements revised as a result of either correction of an error or retrospective application of U.S. GAAP. We adopted this guidance in the first quarter of 2010.

Note 2. Marketable Securities and Fair Value Measurements

Our short-term and long-term marketable securities as of September 30, 2010 and December 31, 2009 are as follows (in thousands):

Short-term

	Amortized Costs	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
September 30, 2010				
U.S. government notes and bonds	\$ 2,999	\$ 1	\$	\$ 3,000
Corporate bonds and certificate of deposit	2,294		(1)	2,293
Foreign bonds	706			706
Commercial paper	1,398		(1)	1,397
Total	\$ 7,397	\$ 1	\$ (2)	\$ 7,396

Long-term

	Amortized Costs	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
September 30, 2010				

Edgar Filing: ALIGN TECHNOLOGY INC - Form 10-Q

Corporate bonds	\$ 4,464	\$	\$ (11)	\$ 4,453
Foreign bonds	1,321	1	(2)	1,320
Agency bonds	2,055	1		2,056
Total	\$ 7,840	\$ 2	\$ (13)	\$ 7,829

Short-term

December 31, 2009	Amortized Cost	Gross Unrealized Gains	Fair Value
U.S. government notes and bonds	\$ 18,972	\$ 6	\$ 18,978
Corporate bonds	1,000		1,000
Total	\$ 19,972	\$ 6	\$ 19,978

For the nine months ended September 30, 2010 and 2009, no significant gains or losses were realized on the sale of marketable securities.

Table of Contents**ALIGN TECHNOLOGY, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(unaudited)****Fair Value Measurements**

We measure the fair value of our cash equivalents and marketable securities as the price that would be received from selling an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. We use the GAAP fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. This hierarchy requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The three levels of inputs that may be used to measure fair value:

Level 1 Quoted (unadjusted) prices in active markets for identical assets or liabilities.

Our Level 1 assets consist of U.S. government debt securities and money market funds. We did not hold any Level 1 liabilities as of September 30, 2010.

Level 2 Observable inputs other than quoted prices included in Level 1, such as quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the asset or liability.

Our Level 2 assets consist of corporate bonds, certificates of deposits, foreign bonds, agency bonds, and commercial paper. We did not hold any Level 2 liabilities as of September 30, 2010.

Level 3 Unobservable inputs to the valuation methodology that are supported by little or no market activity and that are significant to the measurement of the fair value of the assets or liabilities. Level 3 assets and liabilities include those whose fair value measurements are determined using pricing models, discounted cash flow methodologies or similar valuation techniques, as well as significant management judgment or estimation.

We did not hold any Level 3 assets or liabilities as of September 30, 2010.

The following table summarizes our financial assets measured at fair value on a recurring basis as of September 30, 2010 (in thousands):

Description	Balance as of September 30, 2010	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)
Cash equivalents:			
Money market funds	\$ 183,633	\$ 183,633	\$
Short-term investments:			
U.S. government debt securities	3,000	3,000	
Corporate bonds and certificate of deposit	2,293		2,293
Foreign bonds	706		706
Commercial paper	1,397		1,397

Edgar Filing: ALIGN TECHNOLOGY INC - Form 10-Q

Long-term investments:			
Corporate bonds	4,453		4,453
Foreign bonds	1,320		1,320
Agency bonds	2,057		2,057
	\$ 198,859	\$ 186,633	\$ 12,226

Note 3. Balance Sheet Components

Inventories are comprised of (in thousands):

	September 30, 2010	December 31, 2009
Raw materials	\$ 1,557	\$ 1,079
Work in process	667	746
Finished goods	158	221
	\$ 2,382	\$ 2,046

Work in process includes costs to produce the Invisalign product. Finished goods primarily represent ancillary products that support the Invisalign system.

Table of Contents**ALIGN TECHNOLOGY, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(unaudited)**

Accrued liabilities consist of the following (in thousands):

	September 30, 2010	December 31, 2009
Accrued payroll and benefits	\$ 20,519	\$ 25,847
Accrued litigation settlement	3,310	
Accrued income taxes	2,714	2,920
Accrued sales rebate	2,984	2,610
Accrued sales tax and value added tax	2,788	2,392
Accrued warranty	2,658	2,376
Accrued sales and marketing expenses	2,794	1,954
Other	6,307	4,723
	\$ 44,074	\$ 42,822

Note 4. Intangible Assets

The intangible assets represent non-compete agreements received in conjunction with the October 2006 OrthoClear Agreement at gross value of \$14.0 million. These assets are amortized on a straight-line basis over the expected useful life of five years. As of September 30, 2010 and December 31, 2009, the net carrying value of these non-compete agreements was \$2.9 million (net of \$11.1 million of accumulated amortization) and \$5.0 million (net of \$9.0 million of accumulated amortization), respectively.

We perform an impairment test whenever events or changes in circumstances indicate that the carrying value of such assets may not be recoverable. Examples of such events or circumstances include significant underperformance relative to historical or projected future operating results, significant changes in the manner of use of acquired assets or the strategy for its business, significant negative industry or economic trends, and/or a significant decline in our stock price for a sustained period. Impairments are recognized based on the difference between the fair value of the asset and its carrying value, and fair value is generally measured based on discounted cash flow analyses. There were no impairments of intangible assets during the periods presented.

The total estimated annual future amortization expense for these intangible assets as of September 30, 2010 is as follows (in thousands):

Fiscal Year	
2010 (for the remaining 3 months)	\$ 700
2011	2,188
Total	\$ 2,888

Note 5. Legal Proceedings*Weber*

Edgar Filing: ALIGN TECHNOLOGY INC - Form 10-Q

On May 18, 2007, Debra A. Weber filed a consumer class action lawsuit against us, OrthoClear, Inc. and OrthoClear Holdings, Inc. (d/b/a OrthoClear, Inc.) in Syracuse, New York, U.S. District Court. The complaint alleges two causes of action against the OrthoClear defendants and one cause of action against us for breach of contract. The cause of action against us titled "Breach of Third Party Benefit Contract" references our agreement to make Invisalign treatment available to OrthoClear patients, alleging that we failed to provide the promised treatment to Plaintiff or any of the class members. On June 2, 2010, the Court granted our motion for summary judgment and dismissed us from the action.

On June 29, 2010, Weber requested that the Court enter final judgment as to Align pursuant to Federal Rule of Civil Procedure 54(b) in order to certify Align's dismissal for immediate appeal. We filed an opposition to Weber's request on July 19, 2010, on the grounds that Weber failed to show that exceptional circumstances warranted the entry of a final judgment where fewer than all claims or parties had been dismissed. On August 20, 2010, the Court denied Weber's motion. On October 29, 2010, the Court dismissed the action against OrthoClear and OrthoClear Holdings Inc. with prejudice at the request of the remaining parties pursuant to a settlement. The Stipulation and Order of Dismissal with Prejudice entered by the Court provides that the settlement and dismissal does not affect any rights Weber may have to appeal dismissal of the action as against us. We believe there is no evidence to indicate that a reasonable possibility exists that a loss had been incurred as of September 30, 2010.

Securities Litigation

In August 2009, Plaintiff Charles Wozniak filed a lawsuit against us and our Chief Executive Officer and President, Thomas M. Prescott (Mr. Prescott), in District Court for the Northern District of California on behalf of a claimed class consisting of all persons

Table of Contents**ALIGN TECHNOLOGY, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(unaudited)**

or entities who purchased our common stock between January 30, 2007 and October 24, 2007. The complaint alleges that Align and Mr. Prescott violated Section 10(b) of the Securities Exchange Act of 1934 and that Mr. Prescott violated Section 20(a) of the Securities Exchange Act of 1934. Specifically, the complaint alleges that during the class period, we failed to disclose that we had shifted the focus of our sales force to clearing backlog, causing a significant decrease in the number of new case starts. On November 13, 2009, the Court appointed Plumbers and Pipefitters National Pension Fund as lead plaintiff. The lead plaintiff filed an amended complaint on January 29, 2010. The amended complaint alleges that we and Mr. Prescott issued a number of purportedly false and misleading statements throughout the class period concerning the Patients First program, our production capacity, a purported backlog, and the focus of our sales force. On March 26, 2010, we and Mr. Prescott filed a motion to dismiss the amended complaint. The motion was heard by the Court on July 9, 2010, and the Court has not yet released a ruling on the motion. We believe the lawsuit to be without merit and intend to vigorously defend ourselves. We believe there is not sufficient evidence to conclude that a reasonable possibility exists that a loss had been incurred as of September 30, 2010.

Note 6. Legal Settlements***Ormco***

On August 16, 2009, we entered into three agreements with Ormco Corporation (*Ormco*), an affiliate of Danaher Corporation (*Danaher*): a Settlement Agreement, a Stock Purchase Agreement, and a Joint Development, Marketing and Sales agreement (*Collaboration Agreement*). The Settlement Agreement ended all pending litigations between the parties, and we agreed to (1) make a cash payment of \$13.2 million upon the execution of the agreement and (2) issue a total of 7.6 million non-assessable shares of common stock pursuant to the Stock Purchase Agreement. The settlement value was allocated between past infringement and future use of the patent based on total case shipments during the period of infringement. We attributed \$69.7 million to past infringement claims, based on case shipments from September 9, 2003 through August 16, 2009. This was recorded as litigation settlement costs and included in operating expenses during the period ended September 30, 2009. Additional royalty costs based on case shipments between August 17, 2009 through January 19, 2010 totaling \$7.0 million were recorded as prepaid royalties as of the settlement date. We amortized \$6.2 million of the prepaid royalties to cost of sales for the year ended December 31, 2009 and the remaining \$0.8 million was amortized during first quarter of 2010.

OrthoClear

In June 2010, we received an \$8.7 million insurance settlement over a disputed coverage under our general liability umbrella that was not previously reimbursed by our insurer related to the OrthoClear litigation.

Leiszler

On May 10, 2010, Christopher J. Leiszler filed a complaint against us in the United States District Court for the Northern District of California. The complaint alleges that we implemented unfair and fraudulent requirements for the prescription of Invisalign through the Invisalign Proficiency Requirements. In January 2010 Dr. Leiszler's Invisalign provider status was suspended for failing to meet the Proficiency Requirements. Dr. Leiszler sued on behalf of himself and all others similarly situated. The complaint seeks a refund of the price paid to us for Invisalign training. On October 19, 2010, we entered into a memorandum of understanding to resolve this litigation. Under terms of the proposed settlement, class members can obtain reinstatement to prescribe Invisalign treatment under certain circumstances (the *Reinstatement Benefit*). Certain class members will have the option to elect a cash remedy instead of the Reinstatement Benefit. The proposed settlement remains subject to the execution of a formal settlement agreement and approval by the Court. We anticipate that a formal settlement agreement will be presented to the Court in December 2010. Under the proposed settlement, we will deposit approximately \$7.5 million into an escrow account which will be used to pay eligible class members who elect the cash remedy, as well as legal fees and other costs. We recorded a litigation settlement charge of \$3.3 million in the third quarter of 2010 for our estimated liability related to this settlement. We will continue to assess and evaluate the matter with our legal counsel and update the estimated settlement charge as appropriate as new information becomes available.

Note 7. Credit Facilities

Edgar Filing: ALIGN TECHNOLOGY INC - Form 10-Q

On December 5, 2008, we renegotiated and amended our existing credit facility with Comerica Bank. Under this revolving line of credit, we have \$25.0 million of available borrowings with a maturity date of December 31, 2010. This credit facility requires a quick ratio covenant and also requires us to maintain a minimum unrestricted cash balance of \$10.0 million. The interest rate on borrowings will range from Libor plus 1.5% to 2.0% depending upon the amount of unrestricted cash we maintain at Comerica Bank above the \$10.0 million minimum.

As of September 30, 2010, we had no outstanding borrowings under this credit facility and are in compliance with the financial covenants.

Table of Contents**ALIGN TECHNOLOGY, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(unaudited)****Note 8. Commitments and Contingencies****Leases**

As of September 30, 2010, minimum future lease payments for non-cancelable leases are as follow (in thousands):

Fiscal Year	
2010 (for the remaining 3 months)	\$ 1,535
2011	5,074
2012	4,010
2013	3,339
2014 and thereafter	9,900
Total	\$ 23,858

On January 26, 2010, we entered into an agreement to lease new corporate headquarters of approximately 129,024 square feet in San Jose, California. The lease agreement commenced on June 28, 2010 and will continue for an initial term of seven years and two months. The agreement for our previous corporate headquarters in Santa Clara, California, expired on June 30, 2010.

Warranty

We warrant our products against material defects until the Invisalign case is complete. We accrue for warranty costs in cost of revenues upon shipment of products. The amount of accrued estimated warranty costs is primarily based on historical experience as to product failures as well as current information on replacement costs. We regularly review the accrued balances and update these balances based on historical warranty trends. Actual warranty costs incurred have not materially differed from those accrued. However, future actual warranty costs could differ from the estimated amounts.

The following table reflects the change in our warranty accrual during the nine months ended September 30, 2010 and 2009, respectively (in thousands):

	Nine Months Ended	
	September 30,	
	2010	2009
Balance at beginning of period	\$ 2,376	\$ 2,031
Charged to cost of revenues	2,212	2,046
Actual warranty expenses	(1,930)	(1,962)
Balance at end of period	\$ 2,658	\$ 2,115

Table of Contents**ALIGN TECHNOLOGY, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(unaudited)****Note 9. Stock-based Compensation***Summary of stock-based compensation expense*

On May 20, 2010 our stockholders voted to approve an amendment to the 2005 Incentive Plan. The amendment increased the plan by 3,300,000 shares for a total reserved for issuance of 13,283,379 shares, plus up to an aggregate of 5,000,000 shares that would have been returned to our 2001 Stock Incentive Plan as a result of termination of options or repurchase of shares on or after March 28, 2005.

The following table summarizes stock-based compensation expense related to all of our stock-based options and employee stock purchases for the three and nine months ended September 30, 2010 and 2009 (in thousands):

	Three Months		Nine Months Ended	
	Ended		September 30,	
	September 30,	September 30,	September 30,	September 30,
	2010	2009	2010	2009
Cost of revenues	\$ 399	\$ 359	\$ 1,237	\$ 1,150
Sales and marketing	1,280	1,243	3,387	3,559
General and administrative	2,141	1,885	5,960	5,839
Research and development	594	500	1,554	1,463
Total stock-based compensation expense	\$ 4,414	\$ 3,987	\$ 12,138	\$ 12,011

Options

The fair value of stock options granted was estimated at the grant date using the Black-Scholes option pricing model with the following weighted average assumptions:

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2010	2009	2010	2009
Stock Options:				
Expected term (in years)	4.4	4.4	4.4	4.4
Expected volatility	63.4%	64.0%	63.3%	61.6%
Risk-free interest rate	1.5%	2.1%	1.9%	1.6%
Expected dividend				
Weighted average fair value per share at grant date	\$ 7.28	\$ 5.42	\$ 9.06	\$ 4.15

Stock option activity for the nine months ended September 30, 2010 under the stock incentive plans is set forth below:

Edgar Filing: ALIGN TECHNOLOGY INC - Form 10-Q

	Number of Shares Underlying Stock Options (in thousands)	Total Shares Underlying Stock Options		
		Weighted Average Exercise Price	Weighted Average Remaining Contractual Term (in years)	Aggregate Intrinsic Value (in thousands)
Outstanding as of December 31, 2009	7,488	\$ 11.49		
Granted	1,458	17.61		
Cancelled or expired	(243)	14.61		
Exercised	(806)	7.77		
Outstanding as of September 30, 2010	7,897	\$ 12.90	5.98	\$ 53,180
Vested and expected to vest at September 30, 2010	7,638	\$ 12.83	5.94	\$ 51,983
Exercisable at September 30, 2010	5,080	\$ 11.97	5.33	\$ 39,086

Table of Contents**ALIGN TECHNOLOGY, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(unaudited)**

As of September 30, 2010, we expect to recognize \$16.1 million of total unamortized compensation cost, net of estimated forfeitures, related to stock options over a weighted average period of 2.4 years.

Restricted Stock Units

In the amended 2005 Incentive Plan any shares subject to an award of restricted stock, restricted stock units, performance shares or performance units will be counted against the authorized share reserve as one and one-half (1 1/2) shares for every one share subject to the award, and any shares cancelled will be returned to the Plan at the same ratio.

A summary of the nonvested shares for the nine months ended September 30, 2010 is as follows:

	Number of Shares Underlying RSUs (in thousands)	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value (in thousands)
Nonvested as of December 31, 2009	876		
Granted	420		
Vested and released	(288)		
Forfeited	(64)		
Nonvested as of September 30, 2010	944	1.35	\$ 18,486

As of September 30, 2010 the total unamortized compensation cost related to restricted stock units, net of estimated forfeitures, was \$9.0 million, which we expect to recognize over a weighted average period of 2.3 years.

Employee Stock Purchase Plan

Our 2005 Employee Stock Purchase Plan consists of overlapping twenty-four month offering periods with four six-month purchase periods in each offering period and will expire on January 31, 2011. In May 2010, our shareholders approved the 2010 Employee Stock Purchase Plan (the 2010 Purchase Plan). The 2010 Purchase Plan consists of overlapping twenty-four month offering periods with four six-month purchase periods in each offering period. The 2010 Purchase Plan will continue until terminated by either the Board or its administrator. Employees purchase shares at 85% of the fair market value of the common stock at either the beginning of the offering period or the end of the purchase period, whichever is lower. The maximum number of shares available under the 2010 Purchase Plan is 2,400,000 shares.

The fair value of the option component of the Purchase Plan shares was estimated at the grant date using the Black-Scholes option pricing model with the following weighted average assumptions:

Three Months Ended	Nine Months Ended September 30,
-----------------------	------------------------------------

Edgar Filing: ALIGN TECHNOLOGY INC - Form 10-Q

	September 30,		2010	2009
	2010	2009	2010	2009
Employee Stock Purchase Plan:				
Expected term (in years)	1.3	1.2	1.3	1.3
Expected volatility	53.4%	72.8%	55.9%	74.6%
Risk-free interest rate	0.4%	0.7%	0.4%	0.6%
Expected dividend				
Weighted average fair value at grant date	\$ 6.87	\$ 5.10	\$ 7.22	\$ 3.78

As of September 30, 2010, we expect to recognize \$0.6 million of the total unamortized compensation cost related to employee purchases over a weighted average period of 0.1 years.

Note 10. Accounting for Income Taxes

The financial statement recognition of the benefit for an uncertain tax position is dependent upon the benefit being more-likely-than-not to be sustainable upon audit by the applicable taxing authority. If this threshold is met, the tax benefit is then measured and recognized at the largest amount that is greater than fifty percent likely of being realized upon ultimate settlement.

During the third quarter of fiscal 2010, the amount of unrecognized tax benefits was increased by approximately \$2.7

million. The total amount of unrecognized tax benefits was \$10.4 million as of September 30, 2010, which would impact our effective tax rate if recognized. We recognize interest and penalties related to unrecognized tax benefits as a component of income

Table of Contents**ALIGN TECHNOLOGY, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(unaudited)**

taxes. Interest and penalties are not significant and are included in the unrecognized tax benefits. We are subject to taxation in the U.S. and various states and foreign jurisdictions. All of our tax years will be open to examination by the U.S. federal and most state tax authorities due to our net operating loss and overall credit carryforward position. With few exceptions, we are no longer subject to examination by foreign tax authorities for years before 2005.

Note 11. Net Profit (Loss) Per Share

Basic net profit (loss) per share is computed using the weighted average number of shares of common stock outstanding during the period. Diluted net profit (loss) per share is computed using the weighted average number of shares of common stock, adjusted for the dilutive effect of potential common stock. Potential common stock, computed using the treasury stock method, include options, restricted stock units, and the dilutive component of Purchase Plan shares.

The following table sets forth the computation of basic and diluted net profit (loss) per share attributable to common stock (in thousands, except per share amounts):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
Net profit (loss)	\$ 16,815	\$ (49,942)	\$ 64,348	\$ (42,761)
Weighted-average common shares outstanding, basic	76,081	69,528	75,653	67,278
Effect of potential dilutive common shares	2,028		2,199	
Total shares, diluted	78,109	69,528	77,852	67,278
Basic net profit (loss) per share	\$ 0.22	\$ (0.72)	\$ 0.85	\$ (0.64)
Diluted net profit (loss) per share	\$ 0.22	\$ (0.72)	\$ 0.83	\$ (0.64)

For the three and nine months ended September 30, 2010, stock options and restricted stock units totaling 3.3 million and 3.0 million, respectively, were excluded from diluted net profit per share because of their anti-dilutive effect. For the three and nine months ended September 30, 2009, stock options and restricted stock units totaling 4.0 million and 5.1 million, respectively, were excluded from diluted net loss per share because of their anti-dilutive effect.

Note 12. Comprehensive Income (Loss)

Comprehensive income includes net profit (loss), foreign currency translation adjustments and unrealized gains (losses) on available-for-sale securities. The components of comprehensive income (loss) are as follows (in thousands):

Edgar Filing: ALIGN TECHNOLOGY INC - Form 10-Q

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
Net profit (loss)	\$ 16,815	\$ (49,942)	\$ 64,348	\$ (42,761)
Foreign currency translation adjustments	585	214	(120)	242
Change in unrealized gains (losses) on available-for-sale securities	(18)		(18)	20
Comprehensive income (loss)	\$ 17,382	\$ (49,728)	\$ 64,210	\$ (42,499)

Note 13. Segments and Geographical Information

Segment

We report segment data based on the internal reporting that is used by management for making operating decisions and assessing performance. During all periods presented, we operated as a single business segment.

Table of Contents**ALIGN TECHNOLOGY, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)****(unaudited)****Geographical Information**

Net revenues and long-lived assets are presented below by geographic area (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
Net revenues:				
North America	\$ 72,555	\$ 60,054	\$ 223,141	\$ 172,577
Europe	22,280	18,206	68,085	50,986
Other international	1,112	1,009	3,007	2,154
Total net revenues	\$ 95,947	\$ 79,269	\$ 294,233	\$ 225,717

	As of September 30, 2010	As of December 31, 2009
Long-lived assets:		
North America	\$ 84,573	\$ 91,548
Europe	872	1,018
Other international	1,848	1,375
Total long-lived assets	\$ 87,293	\$ 93,941

Note 14. Restructuring

In July and October 2008, we announced restructuring plans to increase efficiencies across the organization and lower the overall cost structure. The July 2008 plan reduced full time headcount primarily through a phased-consolidation of order acquisition operations from our corporate headquarters in Santa Clara, California to Juarez, Mexico, which was completed by the end of 2008. In addition to headcount reductions, the October restructuring plan included the phased relocation of our shared services organizations from Santa Clara, California to our facility in Costa Rica, which was completed during the second quarter of 2009.

In 2009, we incurred approximately \$1.3 million of costs related to severance and termination benefits. There were no costs incurred relating to the restructuring plans during 2010.

Table of Contents**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.**

In addition to historical information, this quarterly report on Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. These statements include, among other things, our expectations regarding the elimination of the annual minimum case volume requirement, the anticipated impact of our new products and product enhancements, including Invisalign G3, will have on doctor utilization and our market share, our expectations regarding product mix and product adoption, our expectations regarding the existence and impact of seasonality, our expectations regarding the continued growth of our international markets, including the expected commercial launch of Invisalign in China in the second half of 2011, the anticipated level of our gross margins, and other factors beyond our control, as well as other statements regarding our future operations, financial condition and prospects and business strategies. These statements may contain words such as expects, anticipates, intends, plans, believes, estimates, or other words indicating future results. These forward-looking statements are subject to certain risks and uncertainties that could cause actual results to differ materially from those reflected in the forward-looking statements. Factors that could cause or contribute to such differences include, but are not limited to, those discussed in Item 2 Management's Discussion and Analysis of Financial Condition and Results of Operations, and in particular, the risks discussed below in Part II, Item 1A Risk Factors. We undertake no obligation to revise or update these forward-looking statements. Given these risks and uncertainties, readers are cautioned not to place undue reliance on such forward-looking statements.

The following discussion and analysis of our financial condition and results of operations should be read together with our Condensed Consolidated Financial Statements and related notes included elsewhere in this Quarterly Report on Form 10-Q.

We design, manufacture and market the Invisalign system, a proprietary method for treating malocclusion, or the misalignment of teeth. Invisalign corrects malocclusion using a series of clear, nearly invisible, removable appliances that gently move teeth to a desired final position. Because it does not rely on the use of metal or ceramic brackets and wires, Invisalign significantly reduces the aesthetic and other limitations associated with metal arch wires and brackets, commonly referred to as braces. We received the United States Food and Drug Administration (FDA) clearance to market Invisalign in 1998. The Invisalign system is regulated by the FDA as a Class II medical device.

We distribute the vast majority of our products directly to our customers: the orthodontist and the general practitioner dentist, or GP. Orthodontists and GPs must complete an initial Invisalign training course in order to begin providing the Invisalign treatment solution to their patients. The Invisalign system is sold in North America, Europe, Asia Pacific, Latin America and Japan. We use a distributor model for the sale of our products in parts of the Asia Pacific, Latin American and EMEA (Europe, Middle East and Africa) regions.

Each Invisalign treatment plan is unique to the individual patient. Our Invisalign Full treatment consists of as many aligners as indicated by ClinCheck in order to achieve the doctors' treatment goals. Our Invisalign Express is a dual arch orthodontic treatment for cases that meet certain predetermined clinical criteria and consist of up to ten sets of aligners. Invisalign Express treatment is intended to assist dental professionals to treat a broader range of patients by providing a lower-cost option for adult relapse cases, for minor crowding and spacing, or as a pre-cursor to restorative or cosmetic treatments such as veneers. In April 2010, we replaced Invisalign Express in international markets with the launch of Invisalign Lite. Invisalign Lite offers doctors a new option for less complex orthodontic cases, such as short-term aesthetic cases, relapsed cases and pre-restorative treatments, using up to 14 stages. Invisalign Teen is designed to meet the specific needs of the non-adult comprehensive or teen treatment market particularly younger teenagers aged 11 to 15 years. Invisalign Assist is intended to help newly-trained and lower volume Invisalign GPs accelerate the adoption and frequency of use of Invisalign into their practice. Upon completion of an Invisalign or non-Invisalign treatment, the patient may be prescribed our traditional retainer product, or our Vivera retainers, a clear aligner set designed for ongoing retention. Our goal is to establish Invisalign as the standard method for treating malocclusion ultimately driving increased product adoption by dental professionals by focusing on the four key objectives: driving product innovation and clinical effectiveness, enhancing the customer experience, generating consumer demand and expanding into international markets. Each of these four key objectives is described more fully in *Item 1 Business Strategy* of our 2009 Annual Report on Form 10-K. As we execute on our business strategy, we will continue to deliver significant evolutions in product features and functionality, as well as customer facing systems.

In addition to the successful execution of our business strategy, a number of other factors may affect our results in 2010 and beyond, the most important of which are set forth in our Annual Report in Form 10-K as updated below.

Accelerate product and clinical innovation. In October 2010, we launched Invisalign G3, a collection of new features and innovations that touch every product and virtually every system at Align. Invisalign G3 is engineered to deliver even better clinical results, with new aligner and software features that make it easier to use Invisalign with more complex and challenging cases,

Edgar Filing: ALIGN TECHNOLOGY INC - Form 10-Q

including Precision Cuts designed for use with Class II and Class III patients, new SmartForce features designed for increased predictability of certain tooth movements, and simpler, more intuitive software to streamline treatment planning and review. We believe Invisalign G3 will have a positive impact on utilization and continue to support more widespread adoption into our customers practices.

Table of Contents

Proficiency Program. Our success depends upon increasing acceptance and frequency of use of the Invisalign system by dental professionals (what we refer to as utilization). To achieve this, in June 2009 we introduced the Invisalign Product Proficiency Requirements (Proficiency Program) which mandated that every Invisalign provider in North America must submit a minimum number of case starts and complete a minimum number of continuing education (CE) credits. As the Proficiency Program progressed, many customers became frustrated with minimum case and education requirements. In response to this feedback, in April 2010 we eliminated the case start requirements and in October 2010 we eliminated the annual CE requirements, effectively terminating the Proficiency Program.

With the elimination of the minimum case and annual CE requirements, it is uncertain how case volumes, particularly for lower volume doctors, will be impacted. We expect to experience variability in customer activity over the next several quarters as doctors adjust to the changes to the Proficiency Program requirements. We will continue to emphasize the importance of Invisalign professional education in treatment success and to promote the benefits of Invisalign Preferred Provider status for doctors who start ten or more cases each year.

Number of new doctors trained. In 2009, we trained approximately 2,825 new doctors in North America. In the first three quarters of 2010, we trained approximately 2,100 doctors in North America (including 600 doctors who had their account suspended as a result of the Proficiency Requirements at the end of 2009). Our new doctor training in North America is evolving to identify and focus on practices that are interested in gaining the skills and experience necessary to be successful with Invisalign. As a result, we expect that the number of new and reactivated doctors trained in North America will be slightly lower in 2010 compared to 2009. Internationally, we continue expect that the number of new doctors trained to be comparable to 2009.

Utilization rates. Our goal is to establish Invisalign as the treatment of choice for treating malocclusion ultimately driving increased product adoption and frequency of use by dental professionals, or utilization. Our quarterly utilization rates for the previous ten quarters are as follows:

* Utilization rates = # of cases shipped divided by # of doctors cases were shipped to
Utilization rates in the third quarter of 2010 for the North American Ortho and International channels remained unchanged compared to the second quarter of 2010. Since summer is typically the busiest season for orthodontists with practices that have a high percentage of adolescent and teenage patients, historically, adult appointments, including adult Invisalign patient starts, are often pushed further into late summer or early fall. We believe that the availability of Invisalign Teen helped moderate this historical downward trend from the second quarter compared to the third quarter since we are now able to actively compete for a share of teen patient starts. North American GP dentist utilization decreased from 2.8 to 2.7 cases per GP dentist compared to the second quarter of 2010, reflecting a decline in the number of cases shipped across all levels of GP submitters (high to low). In addition, there were fewer low volume GP submitters than the prior quarter. This is consistent with historical trends during our third quarter when more doctors are out of the office for summer vacation and holidays. We expect to continue to see fluctuation in our utilization rates as practices adjust to the Proficiency Program and our customer base evolves throughout the year. As a result of eliminating the annual case requirements, we expect that the number of doctors we ship to over the next several quarters will fluctuate. We therefore believe that quarter-to-quarter comparisons of utilization rates may not be as meaningful in 2010.

Table of Contents

Release of previously deferred revenue. In the second quarter of 2010, we released \$14.3 million of previously deferred revenue for Invisalign Teen replacement aligners. Invisalign Teen, which was launched in July 2008, includes up to six replacement aligners which may be ordered at any time throughout treatment. Revenue for these replacement aligners was previously deferred based on 100 percent of the fair value of the aligners until the replacement aligners were used or the case completed. Over the past two years, we have evaluated the usage experience of the Invisalign Teen replacement aligners and determined that we have sufficient historical evidence to support an estimated usage rate. Since the deferral rate for estimated usage is significantly lower than our previous rate, we experienced a favorable impact to revenue from the second quarter to the third quarter of 2010.

Seasonal fluctuations. Seasonal fluctuations in the number of doctors in their offices and available to take appointments have affected, and are likely to continue to affect our business. Specifically, our customers often take vacation during the summer months and therefore tend to start fewer cases, especially North American GPs and European doctors.

In 2010, sequential case growth from second quarter to the third quarter in the North American Ortho channel was essentially flat. With the availability of Invisalign Teen, we can actively compete for a share of teen patient starts. Summer is typically the busiest season for orthodontists with practices that have a high percentage of adolescent and teenage patients. Many parents want to get their teens started in treatment before the start of the school year. We believe that Invisalign Teen helped moderate the historical downward trend we have typically seen for our North American orthodontic customers during the summer months.

In the third quarter of 2010, we saw a decline in the number of cases submitted as well as a decline in the number of submitters in our North American GP channel which is consistent with our historical trend during this quarter. In addition, we believe that the elimination of the minimum case requirements announced in the second quarter at 2010 has reduced the number of case submissions across all levels of our GP customers.

Foreign exchange rates. Although the U.S. dollar is our reporting currency, a portion of our revenues and profits are generated in foreign currencies. Revenues and profits generated by subsidiaries operating outside of the United States are translated into U.S. dollars using exchange rates effective during the respective period and as a result are affected by changes in exchange rates. We have generally accepted the exposure to exchange rate movements without using derivative financial instruments to manage this risk. Therefore, both positive and negative movements in currency exchanges rates against the U.S. dollar will continue to affect the reported amount of revenues and profits in our consolidated financial statements.

Impact on consumer spending due to uncertainty in the U.S. economy. Consumer spending habits are affected by, among other things, prevailing economic conditions, levels of employment, salaries and wage rates, gas prices, consumer confidence and consumer perception of economic conditions. During the third quarter of 2010, our North American GP customers reported lower dental visits and reduced demand for premium procedures. As a result, this is one factor that we believe will result in lower case shipments in the fourth quarter of 2010 compared to the third quarter, predominantly among our GP customers.

Growth of international markets. In October 2010, we announced regulatory approval to market and sell Invisalign in China and expect to begin commercial launch in the second half of 2011.

Operating Expenses. In the fourth quarter of 2010, we expect operating expenses to increase reflecting additional spending in international sales and marketing, commercialization activities for Invisalign G3 and pre-commercialization activities in China.

Table of Contents**Results of Operations***Net revenues and case volume by channel and product:*

Invisalign product revenues by channel and other non-case revenues, which represents training, retainer and ancillary products, for the three and nine months ended September 30, 2010 and 2009 are as follows (in millions):

Net revenues	Three Months Ended September 30,				Nine Months Ended September 30,			
	2010	2009	Net Change	% Change	2010	2009	Net Change	% Change
North America:								
Ortho	\$ 31.1	\$ 22.7	\$ 8.4	37.0%	\$ 88.4	\$ 65.4	\$ 23.0	35.2%
GP	36.8	33.9	2.9	8.6%	111.4	96.6	14.8	15.3%

- (1) The nine months ended September 30, 2010 includes a \$14.3 million release of previously deferred revenue for Invisalign Teen replacement aligners.

Table of Contents

Case volume data which represents Invisalign case shipments by product, for the three and nine months ended September 30, 2010 and 2009 are as follows (in thousands):

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2010	2009	Net Change	% Change	2010	2009	Net Change	% Change
Invisalign case volume								
Invisalign Full	44.9	38.7	6.2	16.0%	135.7	113.9	21.8	19.1%
Invisalign Express/Lite	9.8	8.4	1.4	16.7%	28.6	24.4	4.2	17.2%
Invisalign Teen	7.6	7.9	(0.3)	(3.8)%	21.8	17.7	4.1	23.2%
Invisalign Assist	3.9	1.5	2.4	160.0%	11.2	3.5	7.7	220.0%
Total Invisalign case volume	66.2	56.5	9.7	17.2%	197.3	159.5	37.8	23.7%

Total net revenues increased for the three and nine months ended September 30, 2010 as compared to the same periods in 2009 primarily as a result of worldwide volume growth across all customer channels. The release of revenue previously deferred for Invisalign Teen replacement aligners in the second quarter of 2010 contributed an additional \$14.3 million to total net revenues for the nine months ended September 30, 2010. We believe the United States economic downturn adversely impacted consumer spending habits in 2009, and doctors tended to focus on more traditional dental procedures. As a result, we experienced a lower sales growth rate between 2008 and 2009.

In the three months ended September 30, 2010, North America revenue increased 20.0% compared to the same period in 2009 due to case volume growth of 12.6% as well as an increase in our average selling price due to a significant reduction in our revenue deferral rate for Teen replacement aligners and lower discounts and rebates. Our International Invisalign revenue also increased 25.4% for the three months ended September 30, 2010 mainly due to growth in case volumes of 33.9% from all products partially offset by unfavorable foreign exchange rates.

In the nine months ended September 30, 2010, North America revenue increased 23.3% as compared to the same period in 2009 due to case volume growth of 21.2% as well as an increase in our average selling price due to a significant reduction in our revenue deferral rate for Teen replacement aligners and lower discounts and rebates. Our International Invisalign revenue also increased 28.3% for the nine months ended September 30, 2010, as compared to the same periods in 2009, mainly due to growth in case volumes of 33.0% from all products partially offset by unfavorable foreign exchange rates.

Invisalign Teen includes up to six replacement aligners which may be ordered at any time throughout treatment. Through the second quarter of 2010, revenue for these replacement aligners was deferred based on 100 percent of the fair value of the aligners until the replacement aligners were used or the case completed. Since the launch of Invisalign Teen nearly two years ago, we evaluated the usage experience of the replacement aligners and determined that there is sufficient historical experience to establish an estimated usage rate. As a result, in June 2010, we reduced deferred revenue for Invisalign Teen replacement aligners by \$14.3 million to reflect the lower estimated usage for in-process cases.

Other non-case revenues, consisting of training fees and sales of ancillary products, were higher for the three and nine month periods ended September 30, 2010 compared to the same periods in 2009 primarily due to increased sales of our Vivera and retainer products.

Cost of revenues and gross profit (in millions):

	Three Months Ended September 30,			Nine Months Ended September 30,		
	2010	2009	Change	2010	2009	Change
Cost of revenues	\$ 21.0	\$ 20.3	\$ 0.7	\$ 62.6	\$ 56.0	\$ 6.6
% of net revenues	21.9%	25.6%		21.3%	24.8%	
Gross profit	\$ 74.9	\$ 59.0	\$ 15.9	\$ 231.7	\$ 169.7	\$ 62.0
Gross margin	78.1%	74.4%		78.7%	75.2%	

Cost of revenues includes salaries for staff involved in the production process, the cost of materials, packaging, shipping costs, depreciation on capital equipment used in the production process, training costs and stock-based compensation expense. Through April 2009, cost of revenues

Edgar Filing: ALIGN TECHNOLOGY INC - Form 10-Q

also included the cost of our third party shelter service provider in Juarez, Mexico. Royalties related to the Ormco litigation that were fully amortized in the first quarter of 2010 of \$0.8 million are also included in cost of revenues for the nine months ended September 30, 2010.

Table of Contents

Gross margin improved for the three and nine months ended September 30, 2010 compared to the same periods in 2009 primarily due to increased cost absorption because of higher production volumes. Additionally, the gross margin for the nine months ended September 30, 2010 was favorably impacted by the release of teen deferred revenue of \$14.3 million during the second quarter of 2010.

Sales and marketing (in millions):

	Three Months Ended September 30,			Nine Months Ended September 30,		
	2010	2009	Change	2010	2009	Change
Sales and marketing	\$ 26.9	\$ 27.7	\$ (0.8)	\$ 83.8	\$ 84.6	\$ (0.8)
% of net revenues	28.0%	34.9%		28.5%	37.5%	

Sales and marketing expense includes sales force compensation (including travel-related costs), marketing personnel-related costs, media and advertising, clinical education, product marketing and stock-based compensation expense.

Our sales and marketing expense for the three months ended September 30, 2010 decreased compared to the same period in 2009 primarily resulting from lower sales compensation expenses of approximately \$0.8 million during the third quarter of 2010.

Our sales and marketing expense for the nine months ended September 30, 2010 decreased compared to the same period in 2009 primarily due to \$3.0 million of lower clinical education expenses. Of these lower expenses, \$1.6 million was included in gross margin during the first three quarters of 2010 and approximately \$1.2 million was related to North America and European sales summits that took place in the first nine months 2009, whereas a North American summit will occur in fourth quarter of 2010. These reduced costs were partially offset by approximately \$1.2 million associated with the preparation and transition into our new building and by higher marketing, media, advertising, and marketing personnel related costs totaling approximately \$1.0 million.

General and administrative (in millions):

	Three Months Ended September 30,			Nine Months Ended September 30,		
	2010	2009	Change	2010	2009	Change
General and administrative	\$ 16.2	\$ 16.2	\$	\$ 46.2	\$ 46.2	\$
% of net revenues	16.9%	20.5%		15.7%	20.5%	

General and administrative expense includes salaries for administrative personnel, outside consulting services, legal expenses and stock-based compensation expense.

General and administrative expense was consistent for the three months ended September 30, 2010 compared to the same period in 2009 primarily due to factors which offset. We incurred higher stock-based compensation costs of \$0.3 million and higher facility costs associated with the transition into our new building of approximately \$0.6 million during the third quarter of 2010. These increases were offset by \$0.9 million lower legal fees in the third quarter of 2010 due to the settlement of the Ormco litigation in the third quarter of 2009.

General and administrative expense was consistent for the nine months ended September 30, 2010 compared to the same period in 2009 primarily due to factors which offset. Lower bad debt expense of approximately \$1.0 million was offset by higher travel related costs of approximately \$0.3 million and higher expenses of \$0.7 million resulting from the change in the estimated future useful life of equipment and furniture from our former headquarter facilities in Santa Clara, California in 2010.

Research and development (in millions):

	Three Months Ended September 30,			Nine Months Ended September 30,		
	2010	2009	Change	2010	2009	Change
Research and development	\$ 6.6	\$ 5.6	\$ 1.0	\$ 19.1	\$ 16.5	\$ 2.6

% of net revenues

6.9%

7.1%

6.5%

7.3%

Research and development expense includes the personnel-related costs and outside consulting expenses associated with the research and development of new products and enhancements to existing products, conducting clinical and post-marketing trials and stock-based compensation expense.

Table of Contents

Research and development expense increased during the three months ended September 30, 2010 compared to the same period in 2009 primarily due to higher payroll related costs relating to the increase in headcount of \$0.6 million as well a \$0.4 million in higher costs associated with the transition into our new building during the third quarter of 2010.

Research and development expense increased during the nine months ended September 30, 2010 compared to the same period in 2009 primarily due to higher payroll related costs of approximately \$1.5 million relating to increased headcount and other charges of approximately \$1.0 million associated with the transition into our new building.

Restructuring (in millions):

	Three Months Ended September 30,			Nine Months Ended September 30,		
	2010	2009	Change	2010	2009	Change
Restructuring	\$	\$	\$	\$	\$ 1.3	\$ (1.3)
% of net revenues	0.0%	0.0%		0.0%	0.6%	

During 2008, we announced restructuring plans to increase efficiencies across the organization and the overall cost structure by approximately. We incurred approximately \$1.3 million during the first half of 2009 of cost related to severance and termination benefits. There were no restructuring costs during 2010.

Litigation settlement (in millions):

	Three Months Ended September 30,			Nine Months Ended September 30,		
	2010	2009	Change	2010	2009	Change
Litigation settlement	\$ 3.3	\$ 69.7	\$ (66.4)	\$ 3.3	\$ 69.7	\$ (66.4)
% of net revenues	3.4%	87.9%		1.1%	30.9%	

Ormco

On August 16, 2009, we entered into a litigation settlement with Ormco valued at \$76.7 million which was comprised of a cash payment of \$13.2 million and a stock issuance of approximately 7.6 million shares of common stock. We recognized the litigation settlement of \$69.7 million in our operating expenses for the quarter ended September 30, 2009. The remaining \$7.0 million was recorded to prepaid expenses, of which \$1.9 million was recognized in cost of sales during the quarter ended September 30, 2009. The remaining \$5.1 million was amortized to cost of sales based on case shipments during the fourth quarter of 2009 and first quarter of 2010.

Leiszler

On October 19, 2010, we entered into a memorandum of understanding to resolve a complaint filed by Dr. Leiszler. As a result, we recorded a litigation settlement charge of \$3.3 million in the third quarter of 2010 for settlement costs.

See Footnote 6 of the Notes to the Condensed Consolidated Financial Statements *Legal Settlements* for additional information about the settlement accounting.

Insurance settlement (in millions):

	Three Months Ended September 30,			Nine Months Ended September 30,		
	2010	2009	Change	2010	2009	Change
Insurance settlement	\$	\$	\$	\$ (8.7)	\$	\$ (8.7)
% of net revenues	0.0%	0.0%		(2.9)%	0.0%	

Edgar Filing: ALIGN TECHNOLOGY INC - Form 10-Q

In June 2010, we received an \$8.7 million insurance settlement over a disputed coverage under our general liability umbrella that was not previously reimbursed by our insurer related to the OrthoClear litigation.

Table of Contents**Interest and other income (expense), net (in millions):**

	Three Months Ended September 30,			Nine Months Ended September 30,		
	2010	2009	Change	2010	2009	Change
Interest income	\$ 0.2	\$ 0.1	\$ 0.1	\$ 0.4	\$ 0.5	\$ (0.1)
Other income (expense), net	(0.1)	(0.4)	0.3	(0.9)	(0.1)	(0.8)
Total interest income and other (expense), net	\$ 0.1	\$ (0.3)	\$ 0.4	\$ (0.5)	\$ 0.4	\$ (0.9)

Interest and other income (expense), net, includes interest income earned on cash and investment balances, foreign currency translation gains and losses, and other miscellaneous charges.

Interest income for the three and nine months ended September 30, 2010 was comparable to the same periods in 2009.

Other expense, net for the three months ended September 30, 2010 increased as compared with the same period in 2009 reflecting a reduction in foreign exchange losses.

Other expense, net for the nine months ended September 30, 2010 increased as compared with the same period in 2009 reflecting increases in foreign exchange losses.

Income tax (in millions):

	Three Months Ended September 30,			Nine Months Ended September 30,		
	2010	2009	Change	2010	2009	Change
Provision for (benefit from) income taxes	\$ 5.0	\$ (10.5)	\$ 15.5	\$ 23.1	\$ (5.5)	\$ 28.6

We recorded an income tax provision (benefit) of \$5.0 million and (\$10.5) million for the three months ended September 30, 2010 and 2009, respectively, representing effective tax rates of 23.0% and 17.4%. We recorded an income tax provision (benefit) of \$23.1 million and (\$5.5) million for the nine months ended September 30, 2010 and 2009, respectively, representing effective tax rates of 26.5% and 11.3%. Our effective tax rate for the remainder of 2010 may fluctuate based upon our operating results for each taxable jurisdiction in which we operate and the amount of statutory tax that we incur in each jurisdiction.

We exercised significant judgment in regards to estimates of future market growth, forecasted earnings and projected taxable income, in determining the provision for income taxes, and for purposes of assessing our ability to utilize any future benefit from deferred tax assets. As of September 30, 2010, we have recorded a valuation allowance of approximately \$6.2 million related to capital loss and foreign loss carryforwards because we cannot forecast sufficient future capital gains or foreign source income to realize these deferred tax assets. These net operating loss and capital loss carryforwards will result in an income tax benefit if and when we conclude it is more likely than not that the related deferred tax assets will be realized.

In February 2009, the California 2009-2010 budget legislation was signed into law. One of the major components of this legislation is the ability to elect to apply a single sales factor apportionment for years beginning after January 1, 2011. As a result of our anticipated election of the single sales factor, we are required to re-measure our deferred taxes taking into account the reversal pattern and the expected California tax rate under the elective single sales factor. We have determined that by electing a single sales factor apportionment, our deferred tax assets will decrease by approximately \$0.6 million (net of federal benefit). The tax impact of \$0.6 million has been recorded as a discrete item in the first quarter of fiscal year 2009.

Table of Contents**Liquidity and Capital Resources**

We fund our operations from product sales and proceeds from the sale of common stock. As of September 30, 2010 and December 31, 2009 we had the following cash, cash equivalents, and marketable securities (in thousands):

	September 30, 2010	December 31, 2009
Cash and cash equivalents	\$ 264,924	\$ 166,487
Marketable securities, short-term	7,396	19,978
Marketable securities, long-term	7,829	
Total	\$ 280,149	\$ 186,465

Net cash provided by operating activities was \$97.0 million for the nine months ended September 30, 2010 resulting primarily from our net profit of \$64.3 million adjusted for non-cash items, principally deferred income taxes, depreciation, amortization of intangibles and royalties of \$29.3 million and \$12.1 million of stock-based compensation expenses. These non-cash items were partially offset by a combined net increase in account receivable, prepaid expenses, and accrued liabilities of \$6.8 million and a decrease in deferred revenue of \$1.7 million.

Net cash provided by operating activities was \$39.9 million for the nine months ended September 30, 2009 resulting primarily from our net loss of \$42.8 million adjusted by \$81.8 million for non-cash items such as, litigation settlement costs, stock based compensation expense, depreciation, and amortization of intangibles, as well as an \$11.1 million increase in deferred revenue related to our Invisalign Teen and Invisalign Assist products. These changes were offset by a \$10.2 million increase in accounts receivable, prepaids, and other assets.

Net cash used in investing activities was \$8.6 million for the nine month ended September 30, 2010 primarily consisted of \$13.3 million for purchases of property, plant, and equipment and other assets, which were partially offset by net maturities of marketable securities of \$4.7 million.

Net cash provided by investing activities was \$2.9 million for the nine months ended September 30, 2009, consisted largely of \$7.0 million of net maturities of marketable securities partially offset by \$4.1 million for the purchase of property, plant, and equipment.

Net cash provided by financing activities was \$10.0 million for the nine month ended September 30, 2010 primarily resulting from \$10.9 million in proceeds from the issuance of our common stock, which were partially offset by \$0.9 million for taxes paid on the vesting of our restricted stock units related to our employee stock plan.

Net cash provided by financing activities was \$6.0 million for the nine months ended September 30, 2009, which primarily resulted from \$6.4 million in proceeds from the issuance of our common stock for employee stock option exercises.

Contractual Obligations

On January 26, 2010, we entered into an agreement for new corporate headquarters to lease approximately 129,024 square feet in San Jose, California. The lease agreement commenced on June 28, 2010 and will continue for an initial term of seven years and two months. The lease agreement for our previous office headquarters in Santa Clara, California, expired on June 30, 2010.

There were no other material changes to our contractual obligations outside the ordinary course of business from those disclosed in our Annual Report on Form 10-K for the year ended December 31, 2009.

We believe that our current cash and cash equivalents combined with our existing borrowing capacity will be sufficient to fund our operations for at least the next 12 months. If we are unable to generate adequate operating cash flows, we may need to seek additional sources of capital through equity or debt financing, collaborative or other arrangements with other companies, bank financing and other sources in order to realize our objectives and to continue our operations. There can be no assurance that we will be able to obtain additional debt or equity financing on terms acceptable to us, or at all. If adequate funds are not available, we may need to make business decisions that could adversely affect our operating results such as modifications to our pricing policy, business structure or operations. Accordingly, the failure to obtain sufficient funds on acceptable terms when needed could have a material adverse effect on our business, results of operations and financial condition.

Table of Contents

Critical Accounting Policies

Management's discussion and analysis of our financial condition and results of operations is based upon our Condensed Consolidated Financial Statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of financial statements requires our management to make estimates and judgments that affect the reported amounts of assets and liabilities, revenues and expenses and disclosures at the date of the financial statements. We evaluate our estimates on an on-going basis, including those related to revenue recognition, accounts receivable, legal contingencies and income taxes. We use authoritative pronouncements, historical experience and other assumptions as the basis for making estimates. Actual results could differ from those estimates.

We believe the following critical accounting policies reflect our most significant estimates, judgments and assumptions used in the preparation of our consolidated financial statements. These critical accounting policies and related disclosures appear in our Annual Report on Form 10-K for the year ended December 31, 2009.

Revenue recognition;

Stock-based compensation expense;

Long-lived assets, including finite lived purchased intangible assets;

Deferred tax valuation allowance.

Revenue recognition

Invisalign Teen is delivered in a single shipment except for six replacement aligners that are included in the price of the product and may be ordered at any time throughout treatment. We use vendor specific objective evidence of fair value to allocate revenue to the replacement aligners and recognize the residual revenue upon initial shipment. Through the second quarter of 2010, we deferred 100 percent of the fair value for the six replacement aligners. This deferred revenue was subsequently recognized as the replacement aligners were shipped or when the case was completed. Management evaluated the actual usage of replacement aligners since the launch of Invisalign Teen nearly two years ago, and believes that there is sufficient historical evidence to establish an estimated usage rate. As a result, in June 2010, we reduced deferred revenue for Invisalign Teen replacement aligners by \$14.3 million to reflect the estimated usage for in-process cases and starting in July 2010, we began recognizing the fair value of the replacement aligners when they are shipped. We believe that this estimated usage is reasonable and appropriate because of the relative stability of the Invisalign Teen replacement utilization since it was first offered. Although we are not expecting any material changes, we will continue to analyze the usage of replacement aligners and may adjust the estimated usage rate as necessary.

Recent Accounting Pronouncements

See Note 1 Summary of Significant Accounting Policies of the Notes to Condensed Consolidated Financial Statements for a discussion of recent accounting pronouncements.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

For quantitative and qualitative disclosures about market risk affecting us, see Item 7A, Quantitative and Qualitative Disclosures About Market Risk, in our Annual Report on Form 10-K for the year ended December 31, 2009, which is incorporated herein by reference. Our exposure to market risk has not changed materially since December 31, 2009.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of disclosure controls and procedures.

Under the supervision and with the participation of our management, including our Chief Executive Officer and our Chief Financial Officer, we have evaluated the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) as of the end of the period covered by this Quarterly Report on Form 10-Q. Based upon that evaluation, our Chief Executive Officer and our Chief Financial Officer have concluded that our disclosure controls and procedures are effective as of September 30, 2010 to provide reasonable assurance that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is accumulated and communicated to our management, including our Chief Executive Officer and our Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure, and that such information is recorded, processed, summarized and reported within the time periods specified in the SEC rules and forms.

Changes in internal control over financial reporting.

There was no change in our internal control over financial reporting that occurred during the period covered by this Quarterly Report on Form 10-Q that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents**PART II OTHER INFORMATION****ITEM 1. LEGAL PROCEEDINGS*****Weber***

On May 18, 2007, Debra A. Weber filed a consumer class action lawsuit against us, OrthoClear, Inc. and OrthoClear Holdings, Inc. (d/b/a OrthoClear, Inc.) in Syracuse, New York, U.S. District Court. The complaint alleges two causes of action against the OrthoClear defendants and one cause of action against us for breach of contract. The cause of action against us titled "Breach of Third Party Benefit Contract" references our agreement to make Invisalign treatment available to OrthoClear patients, alleging that we failed to provide the promised treatment to Plaintiff or any of the class members. On June 2, 2010, the Court granted our motion for summary judgment and dismissed us from the action.

On June 29, 2010, Weber requested that the Court enter final judgment as to Align pursuant to Federal Rule of Civil Procedure 54(b) in order to certify Align's dismissal for immediate appeal. We filed an opposition to Weber's request on July 19, 2010, on the grounds that Weber failed to show that exceptional circumstances warranted the entry of a final judgment where fewer than all claims or parties had been dismissed. On August 20, 2010, the Court denied Weber's motion. On October 29, 2010, the Court dismissed the action against OrthoClear and OrthoClear Holdings Inc. with prejudice at the request of the remaining parties pursuant to a settlement. The Stipulation and Order of Dismissal with Prejudice entered by the Court provides that the settlement and dismissal does not affect any rights Weber may have to appeal dismissal of the action as against us.

Leiszler

On May 10, 2010, Christopher J. Leiszler filed a complaint against us in the United States District Court for the Northern District of California. The complaint alleges that we implemented unfair and fraudulent requirements for the prescription of Invisalign through the Invisalign Proficiency Requirements. In January 2010 Dr. Leiszler's Invisalign provider status was suspended for failing to meet the Proficiency Requirements. Dr. Leiszler sued on behalf of himself and all others similarly situated. The complaint seeks a refund of the price paid to us for Invisalign training. On October 19, 2010, we entered into a memorandum of understanding to resolve this litigation. Under terms of the proposed settlement, class members can obtain reinstatement to prescribe Invisalign treatment under certain circumstances (the "Reinstatement Benefit"). Certain class members will have the option to elect a cash remedy instead of the Reinstatement Benefit. The proposed settlement remains subject to the execution of a formal settlement agreement and approval by the Court. We anticipate that a formal settlement agreement will be presented to the Court in December 2010. Under the proposed settlement, we will deposit approximately \$7.5 million into an escrow account which will be used to pay eligible class members who elect the cash remedy, as well as legal fees and other costs. We recorded a litigation settlement charge of \$3.3 million in the third quarter of 2010 for our estimated liability related to this settlement. We will continue to assess and evaluate the matter with our legal counsel and update the estimated settlement charge as appropriate as new information becomes available.

Securities Litigation

In August 2009, Plaintiff Charles Wozniak filed a lawsuit against the Company and our Chief Executive Officer and President, Thomas M. Prescott (Mr. Prescott), in District Court for the Northern District of California on behalf of a claimed class consisting of all persons or entities who purchased our common stock of between January 30, 2007 and October 24, 2007. The complaint alleges that Align and Mr. Prescott violated Section 10(b) of the Securities Exchange Act of 1934 and that Mr. Prescott violated Section 20(a) of the Securities Exchange Act of 1934. Specifically, the complaint alleges that during the class period we failed to disclose that we had shifted the focus of our sales force to clearing backlog, causing a significant decrease in the number of new case starts. On November 13, 2009, the Court appointed Plumbers and Pipefitters National Pension Fund as lead plaintiff. The lead plaintiff filed an amended complaint on January 29, 2010. The amended complaint alleges that we and Mr. Prescott issued a number of purportedly false and misleading statements throughout the class period concerning the Patients First program, our production capacity, a purported backlog, and the focus of our sales force. On March 26, 2010, we and Mr. Prescott filed a motion to dismiss the amended complaint. The motion was heard by the Court on July 9, 2010 and the Court has not yet released a ruling on the motion. We believe the lawsuit to be without merit and intend to vigorously defend ourselves.

Table of Contents**ITEM 1A. RISK FACTORS**

We depend on the sale of the Invisalign system for the vast majority of our revenues, and any decline in sales of Invisalign for any reason, including as a result of changes to the proficiency program, a continued weakness in general economic conditions, or a decline in average selling prices would adversely affect revenues, gross margin and net profits.

We expect that revenues from the sale of the Invisalign system will continue to account for the vast majority of our total revenues for the foreseeable future. Continued and widespread market acceptance of Invisalign by orthodontists, GPs and consumers is critical to our future success. If orthodontists and GPs experience a reduction in consumer demand for orthodontic services, if consumers prove unwilling to adopt Invisalign as rapidly as we anticipate or in the volume that we anticipate, if orthodontists or GPs choose to use a competitive product rather than Invisalign or if the average selling price of our product declines, our operating results would be harmed. Factors that could cause the adoption of Invisalign to occur at a lower rate than we expect, as well as the risk related to declining average selling prices are described more fully below.

Consumers may not adopt Invisalign as rapidly as we anticipate due to a variety of factors including a continued weakness in general economic conditions.

Consumer spending habits are affected by, among other things, prevailing economic conditions, levels of employment, salaries and wage rates, gas prices, consumer confidence and consumer perception of economic conditions. A general slowdown in the United States economy and certain international economies or an uncertain economic outlook would adversely affect consumer spending habits which may, among other things, result in a decrease in the number of overall orthodontic case starts or a reduction in the demand for Invisalign generally either of which would have a material adverse effect on our sales and operating results. In addition, Invisalign represents a significant change from traditional orthodontic treatment, and consumers may be reluctant to accept it or may not find it preferable to traditional treatment. We have generally received positive feedback from orthodontists, GPs and consumers regarding Invisalign as both an alternative to braces and as a clinical method for treatment of malocclusion, but a number of dental professionals believe that Invisalign is appropriate for only a limited percentage of their patients. Increased market acceptance will depend in part upon the recommendations of dental professionals, as well as other factors including effectiveness, safety, ease of use, reliability, aesthetics, greater comfort and hygiene compared to traditional orthodontic products and price for Invisalign compared to competing products.

Orthodontists and GPs may not adopt Invisalign in sufficient numbers or as rapidly as we anticipate for a number of reasons, including, changes to the Proficiency Program or as a result of continued weakness in general economic conditions.

Our success depends upon increasing acceptance and frequency of use of the Invisalign system by dental professionals (what we refer to as utilization). On April 22, 2010, we announced significant changes to the Invisalign Proficiency Program in North America. Under the Proficiency Program (as modified), we eliminated the requirement that every Invisalign provider in North America must have 10 Invisalign case starts.

If the elimination of the case start requirements causes customers to slow the pace of case submissions or the number of doctors submitting cases does not increase as anticipated or if GPs and Orthos do not attend our continuing education courses in sufficient numbers for any reason, our revenue may fail to grow as expected. In addition, increased competition from direct competitors could cause us to lose market share and reduce dental professionals' efforts and commitment to expand their Invisalign practice. If adoption and utilization does not increase as we anticipate, our revenues may fail to grow as expected and our operating results may be harmed.

The frequency of use by orthodontists or GPs may not increase at the rate that we anticipate or at all.

One of our key objectives is to continue to increase utilization, or the adoption and frequency of use, of the Invisalign system by new and existing customers. If utilization of Invisalign by our existing and newly trained orthodontists or GPs does not occur or does not occur as quickly as we anticipate, our operating results could be harmed.

Table of Contents

We may experience declines in average selling prices of our products.

In response to challenges in our business, including increased competition, we have in the past reduced the list price of our products. We also provide volume based discount programs to our doctors. In addition, we sell a number of products at different list prices. If we introduce any price reductions, or consumer rebate programs, expand our discount programs in the future, if participation in these programs increases, if our product mix shifts to lower priced products or newer products that have a higher percentage of deferred revenue, or if sales by our international distributors, particularly in the Asia-Pacific region, grows at a faster pace than our direct sales, our average selling price would be adversely affected and our revenues, gross margin and net profits (losses) may be reduced. Furthermore, although the U.S. dollar is our reporting currency, a portion of our revenues and profits are generated in foreign currencies. Revenues and profits generated by subsidiaries operating outside of the United States are translated into U.S. dollars using exchange rates effective during the respective period and are affected by changes in exchange rates. As a result, negative movements in currency exchange rates against the U.S. dollar will adversely affect our average selling price and consequently the amount of revenues and profits in our consolidated financial statements.

If we fail to sustain or increase profitability or revenue growth in future periods, the market price for our common stock may decline.

If we are to sustain or increase profitability in future periods, we will need to continue to increase our revenues, while controlling our expenses. While we generated positive operating cash flow in 2008 and in 2009, we cannot be certain that we will be able to achieve positive cash flow from operations, from period to period, in the future. Because our business is evolving, it is difficult to predict our future operating results or levels of growth, and we have in the past not been and may in the future not be able to sustain our historical growth rates. If we do not increase profitability or revenue growth or otherwise meet the expectations of securities analysts or investors, the market price of our common stock will likely decline.

Our financial results have fluctuated in the past and may fluctuate in the future which may cause volatility in our stock price.

Our operating results have fluctuated in the past and we expect our future quarterly and annual operating results to fluctuate as we focus on increasing doctor and consumer demand for our products. These fluctuations could cause our stock price to decline. Some of the factors that could cause our operating results to fluctuate include:

limited visibility into and difficulty predicting the level of activity in our customers practices from quarter to quarter;

disruptions to our business due to the impact of an epidemic that results in changes in consumer spending habits, consumers unable or unwilling to visit the orthodontist or general practitioners office, as well as any impact on workforce absenteeism;

weakness in consumer spending as a result of the slowdown in the United States economy and global economies;

changes in the timing of receipt of case product orders during a given quarter which, given our cycle time and the delay between case receipts and case shipments, could have an impact on which quarter revenue can be recognized;

fluctuations in currency exchange rates against the U.S. dollar;

changes in product mix;

seasonal fluctuations in the number of doctors in their offices and their availability to take appointments;

Edgar Filing: ALIGN TECHNOLOGY INC - Form 10-Q

success of or changes to our marketing programs from quarter to quarter;

changes in the timing of when revenue is recognized, including as a result of the introduction of new products or promotions or as a result of changes to critical accounting estimates or new accounting pronouncements;

changes to our effective tax rate;

unanticipated delays in production caused by insufficient capacity;

any disruptions in the manufacturing process, including unexpected turnover in the labor force or the introduction of new production processes or natural or other disasters beyond our control;

the development and marketing of directly competitive products by existing and new competitors;

aggressive price competition from competitors;

costs and expenditures in connection with litigation;

inaccurate forecasting of revenues, production and other operating costs; and

investments in research and development to develop new products and enhancements to Invisalign.

Table of Contents

To respond to these and other factors, we may need to make business decisions that could adversely affect our operating results such as modifications to our pricing policy, business structure or operations. Most of our expenses, such as employee compensation and lease payment obligations, are relatively fixed in the short term. Moreover, our expense levels are based, in part, on our expectations regarding future revenue levels. As a result, if our revenues for a particular period fall below our expectations, whether caused by changes in consumer spending, consumer preferences, weakness in the U.S. or global economies, changes in customer behavior related to advertising and prescribing our product, or other factors, we may be unable to adjust spending quickly enough to offset any shortfall in revenues. Due to these and other factors, we believe that quarter-to-quarter comparisons of our operating results may not be meaningful. You should not rely on our results for any one quarter as an indication of our future performance.

Our future success may depend on our ability to develop, successfully introduce and achieve market acceptance of new products.

Our future success may depend on our ability to develop, manufacture, market, and obtain regulatory approval or clearance of new products. We launched Invisalign Teen in July 2008 and Invisalign Assist in October 2008. In October 2010, we introduced Invisalign G3, a collection of new features and innovations that touch every product and virtually every system at Align. There can be no assurance that we will be able to successfully develop, sell and achieve market acceptance of these and other new products and applications and enhanced versions of our existing product. The extent of, and rate at which, market acceptance and penetration are achieved by future products is a function of many variables, which include, among other things, our ability to include functionality and features that address customer requirements, compatibility of our computer operating systems and hardware configurations with customers, the availability of third-party reimbursement of procedures using our new products, the existence of competing products and general economic conditions affecting purchasing patterns. In addition, even if our new products are successfully introduced, it is unlikely that they will rapidly gain market share and acceptance primarily due to the relatively long period of time it takes to successfully treat a patient. Since it takes approximately 12 to 24 months to treat a patient, our customers may be unwilling to rapidly adopt our new products until they successfully complete at least one case or until more historical clinical results are available.

Our ability to market and sell new products may also be subject to government regulation, including approval or clearance by the United States Food and Drug Administration (FDA), and foreign government agencies. Any failure in our ability to successfully develop and introduce or achieve market acceptance of our new products or enhanced versions of existing products could have a material adverse effect on our operating results and could cause our revenues to decline.

A disruption in the operations of our primary freight carrier or higher shipping costs could cause a decline in our revenues or a reduction in our earnings.

We are dependent on commercial freight carriers, primarily UPS, to deliver our products. If the operations of these carriers are disrupted for any reason, we may be unable to deliver our products to our customers on a timely basis. If we cannot deliver our products in an efficient and timely manner, our customers may reduce their orders from us and our revenues and operating profits could materially decline. In a rising fuel cost environment, our freight costs will increase. If freight costs materially increase and we are unable to pass that increase along to our customers for any reason or otherwise offset such increases in our cost of revenues, our gross margin and financial results could be adversely affected.

We are dependent on our international operations, which exposes us to foreign operational, political and other risks that may harm our business.

Our key production steps are performed in operations located outside of the U.S. At our facility in Costa Rica, technicians use a sophisticated, internally developed computer-modeling program to prepare digital treatment plans, which are then transmitted electronically to Juarez, Mexico. These digital files form the basis of ClinCheck and are used to manufacture aligner molds. Our order acquisition, aligner fabrication and shipping operations are conducted in Juarez, Mexico. In addition to the research and development efforts conducted in our Santa Clara, California facility, we also carry out research and development at locations in San Jose, Costa Rica and Moscow, Russia. In addition, our customer-care, accounts receivable, credit and collections and customer event registration organizations are located at our facility in Costa Rica. Our reliance on international operations exposes us to risks and uncertainties that may affect our business or results of operation, including:

difficulties in hiring and retaining employees generally, as well as difficulties in hiring and retaining employees with the necessary skills to perform the more technical aspects of our operations;

difficulties in managing international operations;

fluctuations in currency exchange rates;

import and export license requirements and restrictions;

controlling production volume and quality of the manufacturing process;

political, social and economic instability, including as a result of increased levels of violence in Juarez, Mexico;

acts of terrorism and acts of war;

Table of Contents

interruptions and limitations in telecommunication services;
product or material transportation delays or disruption, including as a result of health epidemics such as the outbreak of the H1N1 virus in the event travel to and from Mexico is restricted or as a result of natural disasters, such as earthquakes or volcanic eruptions;

burdens of complying with a wide variety of local country and regional laws;

trade restrictions and changes in tariffs; and

potential adverse tax consequences.

If any of these risks materialize in the future, we could experience production delays and lost or delayed revenue.

A key step in our manufacturing process relies on sophisticated computer technology that requires new technicians to undergo a relatively long training process. If we are unable to accurately predict our volume growth, and fail to hire a sufficient number of technicians in advance of such demand, the delivery time of our products could be delayed which could adversely affect our results of operations.

Training technicians to use our sophisticated computer modeling program that produces the digital treatment plan that forms the basis of ClinCheck takes approximately 90 to 120 days. As a result, if we are unable to accurately predict our volume growth, we may not have a sufficient number of trained technicians to timely create ClinCheck treatment plans within the timeframe our customers expect. Any delay in ClinCheck processing time could delay the ultimate delivery of finished aligners to our customers. Such a delay could cause us to lose existing customers or fail to attract new customers. This could cause a decline in our revenues and net profits and could adversely affect our results of operations.

Our headquarters, digital dental modeling processes, and other manufacturing processes are all principally located in regions that are subject to earthquakes and other natural disasters.

Our digital dental modeling is processed in our facility located in San Jose, Costa Rica. The operations team in Costa Rica creates ClinCheck treatment plans using sophisticated computer software. In addition, our customer facing operations are located in Costa Rica. Our aligner molds and finished aligners are fabricated in Juarez, Mexico. Both Costa Rica and Mexico are in earthquake zones and may be subject to other natural disasters. If there is a major earthquake or any other natural disaster in a region where one of these facilities is located, our ability to create ClinCheck treatment plans, respond to customer inquiries or manufacture and ship our aligners could be compromised which could result in our customers experiencing a significant delay in receiving their completed aligners and a decrease in service levels for a period of time. In addition, our headquarters facility is located in the San Francisco Bay Area. An earthquake or other natural disaster in this region could result in a disruption in our operations. Any such business interruption could materially and adversely affect our business, financial condition and results of operations.

We experience competition from manufacturers of traditional braces and expect aggressive competition from these and other companies that may introduce new technologies in the future.

Currently, our Invisalign product competes directly against products manufactured and distributed by Ormco Orthodontics, a division of Sybron Dental Specialties (a Danaher Corporation subsidiary), and traditional braces manufactured by 3M's Unitek and Dentsply International. These manufacturers have substantially greater financial resources and manufacturing and marketing experience than we do and may, in the future, attempt to develop an orthodontic system similar to ours or combine technologies that make our product economically unattractive. Large consumer product companies may also enter the orthodontic supply market. Furthermore, we may face competition in the future from new companies that may introduce new technologies. We may be unable to compete with these competitors and one or more of these competitors may render our technology obsolete or economically unattractive. If we are unable to compete effectively with existing products or respond effectively to any products developed by new or existing competitors, our business could be harmed. Increased competition has resulted in the past and may in the future result in volume discounting and price reductions, reduced gross margins, reduced profitability and loss of market share, any of which could have a material adverse effect on our revenues, volume growth, net profit (losses) and stock price. We cannot assure you that we will be able to compete successfully against our current or future competitors or that competitive pressures will not have a material adverse effect on our business, results of operations and financial condition.

Our information technology systems are critical to our business. System integration and implementation issues and system security risks could disrupt our operations, which could have a material adverse impact on our business and operating results.

We rely on the efficient and uninterrupted operation of complex information technology systems. All information technology systems are vulnerable to damage or interruption from a variety of sources. As our business has grown in size and complexity, the growth has placed, and will continue to place, significant demands on our information technology systems. To effectively manage this growth, we will need to continually upgrade and enhance our information systems. In addition, experienced computer programmers and hackers may be able to penetrate our network security and misappropriate our confidential information or that of third parties, create system disruptions or cause shutdowns. Furthermore, sophisticated hardware and operating system software and applications that we either internally develop or procure from third parties may contain defects in design and manufacture, including bugs and other problems that can unexpectedly interfere with the operation of the system. The costs to eliminate or alleviate security problems, viruses and bugs could be significant, and the efforts to address these problems could result in interruptions that may have a material adverse impact on our operations, revenues and operating results.

Table of Contents

We are currently focused on adding more functionality into our business enterprise systems to more efficiently integrate these systems with our other system applications, such as customer facing and manufacturing tools, and intend to continue this effort for the foreseeable future. System upgrades and enhancements, including those upgrades and enhancements associated with the launch in the fall of 2010 of Invisalign G3 that touched every product and virtually each of our systems, require significant expenditures and allocation of valuable employee resources. Delays in integration or disruptions to our business from implementation of these new or upgraded systems could have a material adverse impact on our financial condition and operating results. Furthermore, we continuously upgrade our customer facing software applications, specifically ClinCheck and VIP. Software applications frequently contain errors or defects, especially when they are first introduced or when new versions are released. The discovery of a defect or error or the incompatibility with the computer operating system and hardware configurations of customers in a new upgraded version or the failure of our primary information systems may result in the following consequences, among others: loss of revenue or delay in market acceptance, damage to our reputation or increased service costs, any of which could have a material adverse effect on our business, financial condition or results of operations.

Our success depends in part on our proprietary technology, and if we are unable to successfully enforce our intellectual property rights, our competitive position may be harmed. Litigating claims of this type is costly and could distract our management and cause a decline in our results of operations and stock price.

Our success will depend in part on our ability to maintain existing intellectual property and to obtain and maintain further intellectual property protection for our products, both in the U.S. and in other countries. Our inability to do so could harm our competitive position. As of September 30, 2010, we had 143 issued U.S. patents, 142 pending U.S. patent applications, and 74 issued foreign patents, and 124 pending foreign patent applications.

We intend to rely on our portfolio of issued and pending patent applications in the U.S. and in other countries to protect a large part of our intellectual property and our competitive position. However, our currently pending or future patent filings may not result in the issuance of patents. Additionally, any patents issued to us may be challenged, invalidated, held unenforceable, circumvented, or may not be sufficiently broad to prevent third parties from producing competing products similar in design to our products. In addition, any protection afforded by foreign patents may be more limited than that provided under U.S. patents and intellectual property laws. We also rely on protection of our copyrights, trade secrets, know-how and proprietary information. We generally enter into confidentiality agreements with our employees, consultants and our collaborative partners upon commencement of a relationship with us. However, these agreements may not provide meaningful protection against the unauthorized use or disclosure of our trade secrets or other confidential information, and adequate remedies may not exist if unauthorized use or disclosure were to occur. Our inability to maintain the proprietary nature of our technology through patents, copyrights or trade secrets would impair our competitive advantages and could have a material adverse effect on our operating results, financial condition and future growth prospects. In particular, a failure to protect our proprietary rights might allow competitors to copy our technology, which could adversely affect our pricing and market share. In addition, in an effort to protect our intellectual property we have in the past been and may in the future be involved in litigation. The potential effects on our business operations resulting from litigation that we may participate in the future, whether or not ultimately determined in our favor or settled by us, are costly and divert the efforts and attention of our management and technical personnel from normal business operations.

Litigation is subject to inherent uncertainties and unfavorable rulings could occur. An unfavorable ruling could include monetary damages or, in cases where injunctive relief is sought, an injunction prohibiting us from selling our products. Any of these results from our litigation could adversely affect our results of operations and stock price.

While we believe we currently have adequate internal control over financial reporting, we are required to assess our internal control over financial reporting on an annual basis and any future adverse results from such assessment could result in a loss of investor confidence in our financial reports and have an adverse effect on our stock price.

Pursuant to the Sarbanes-Oxley Act of 2002 and the rules and regulations promulgated by the SEC, we are required to furnish in our Form 10-K an Annual Report by our management regarding the effectiveness of our internal control over financial reporting. The report includes, among other things, an assessment of the effectiveness of our internal control over financial reporting as of the end of our fiscal year, including a statement as to whether or not our internal control over financial reporting is effective. This assessment must include disclosure of any material weaknesses in our internal control over financial reporting identified by management. While we currently believe our internal control over financial reporting is effective, the effectiveness of our internal controls to future periods is subject to the risk that our controls may become inadequate because of changes in conditions, and, as a result, the degree of compliance of our internal control over financial reporting with the policies or procedures may deteriorate. If we are unable to assert that our internal control over financial reporting is effective in any future period (or if our auditors are unable to express an opinion on the effectiveness of our internal controls or conclude that our internal controls are ineffective), we could lose investor confidence in the accuracy and completeness of our financial reports, which could have an adverse effect on

our stock price.

Table of Contents

If we lose our key personnel or are unable to attract and retain key personnel, we may be unable to pursue business opportunities or develop our products.

We are highly dependent on the key employees in our clinical engineering, technology development, sales and marketing personnel and management teams. The loss of the services provided by those individuals may significantly delay or prevent the achievement of our product development and other business objectives and could harm our business. Our future success will also depend on our ability to identify, recruit, train and retain additional qualified personnel, including orthodontists. Few orthodontists are accustomed to working in a manufacturing environment since they are generally trained to work in private practices, universities and other research institutions. Thus, we may be unable to attract and retain personnel with the advanced qualifications necessary for the further development of our business. Furthermore, we may not be successful in retaining our key personnel or their services. If we are unable to attract and retain key personnel, our business could be materially harmed.

If we infringe the patents or proprietary rights of other parties or are subject to a patent infringement claim, our ability to grow our business may be severely limited.

Extensive litigation over patents and other intellectual property rights is common in the medical device industry. We have been sued for infringement of third party's patents in the past and we may be the subject of patent or other litigation in the future. From time to time, we have received and may in the future receive letters from third parties drawing our attention to their patent rights. While we do not believe that we infringe upon any valid and enforceable rights that have been brought to our attention, there may be other more pertinent rights of which we are presently unaware. The defense and prosecution of intellectual property suits, interference proceedings and related legal and administrative proceedings could result in substantial expense to us and significant diversion of effort by our technical and management personnel. An adverse determination of any litigation or interference proceeding to which we may become a party could subject us to significant liabilities. An adverse determination of this nature could also put our patents at risk of being invalidated or interpreted narrowly or require us to seek licenses from third parties. Licenses may not be available on commercially reasonable terms or at all, in which event, our business would be materially adversely affected.

We maintain single supply relationships for certain of our key machines and materials technologies, and our business and operating results could be harmed if supply is restricted or ends or the price of raw materials used in our manufacturing process increases.

We are highly dependent on manufacturers of specialized scanning equipment, rapid prototyping machines, resin and other advanced materials. We maintain single supply relationships for many of these machines and materials technologies. In particular, our scanning and stereolithography equipment are provided by a single supplier. We are also committed to purchasing all of our resin and polymer, the primary raw materials used in our manufacturing process, from a single source. In addition, technology changes by our vendors could disrupt access to required manufacturing capacity or require expensive, time consuming development efforts to adapt and integrate new equipment or processes. Our growth may exceed the capacity of one or more of these manufacturers to produce the needed equipment and materials in sufficient quantities to support our growth. In the event of technology changes, delivery delays, or shortages of or increases in price for these items, our business and growth prospects may be harmed.

We rely on our direct sales force to sell our products, and any failure to maintain our direct sales force could harm our business.

Our ability to sell our products and generate revenues depends upon our direct sales force within our North American and international markets. As of September 30, 2010, our North American sales organization consisted of 169 people, of which 132 were quota carrying sales representatives and 37 were regional sales managers and administration. Internationally, we had 43 people engaged in sales and sales support as of September 30, 2010. We do not have any long-term employment contracts with the members of our direct sales force. The loss of the services provided by these key personnel may harm our business. If we are unable to retain our direct sales force personnel or replace them with individuals of equivalent technical expertise and qualifications, or if we are unable to successfully instill such technical expertise or if we fail to establish strong relationships with our customers within a relatively short period of time, our revenues and our ability to maintain market share could be materially harmed. In addition, due to our large and fragmented customer base, we may not be able to provide all of our customers with product support immediately upon the launch of a new product. As a result, adoption of new products by our customers may be slower than anticipated and our ability to grow market share and increase our revenues may be harmed.

Table of Contents

Complying with regulations enforced by the FDA and other regulatory authorities is an expensive and time-consuming process, and any failure to comply could result in substantial penalties.

Our products are medical devices and are subject to extensive regulation in the U.S. and internationally. FDA regulations are wide ranging and govern, among other things:

product design, development, manufacturing and testing;

product labeling;

product storage;

pre-market clearance or approval;

advertising and promotion; and

product sales and distribution.

Our failure to comply with applicable regulatory requirements could result in enforcement action by the FDA or state agencies, which may include any of the following sanctions:

warning letters, fines, injunctions, consent decrees and civil penalties;

repair, replacement, refunds, recall or seizure of our products;

operating restrictions or partial suspension or total shutdown of production;

refusing our requests for 510(k) clearance or pre-market approval of new products, new intended uses, or modifications to existing products;

withdrawing clearance or pre-market approvals that have already been granted; and

criminal prosecution.

If any of these events were to occur, they could harm our business. We must comply with facility registration and product listing requirements of the FDA and adhere to applicable Quality System regulations. The FDA enforces its Quality System regulations through periodic unannounced inspections. Our failure to take satisfactory corrective action in response to an adverse inspection or the failure to comply with applicable manufacturing regulations could result in enforcement action, and we may be required to find alternative manufacturers, which could

be a long and costly process.

Before we can sell a new medical device in the U.S., or market a new use of or claim for an existing product we must obtain FDA clearance or approval, unless an exemption applies. Obtaining regulatory clearances or approvals can be a lengthy and time-consuming process. Even though the devices we market have obtained the necessary clearances from the FDA, we may be unable to maintain such clearances in the future. Furthermore, we may be unable to obtain the necessary clearances for new devices that we intend to market in the future. Our inability to maintain or obtain regulatory clearances or approvals could materially harm our business.

If the security of our customer and patient information is compromised, patient care could suffer, and we could be liable for related damages, and our reputation could be impaired.

We retain confidential customer and patient information in our processing centers. Therefore, it is critical that our facilities and infrastructure remain secure and that our facilities and infrastructure are perceived by the marketplace and our customers to be secure. Despite the implementation of security measures, our infrastructure may be vulnerable to physical break-ins, computer viruses, programming errors, attacks by third parties or similar disruptive problems. If we fail to meet our clients' expectations regarding the security of healthcare information, we could be liable for damages and our reputation could be impaired. In addition, patient care could suffer, and we could be liable if our systems fail to deliver correct information in a timely manner. Our insurance may not protect us from this risk.

If compliance with healthcare regulations becomes costly and difficult for our customers or for us, we may not be able to grow our business.

Participants in the healthcare industry are subject to extensive and frequently changing regulations under numerous laws administered by governmental entities at the federal, state and local levels, some of which are, and others of which may be, applicable to our business. In response to perceived increases in health care costs in recent years, Congress recently passed health care reform legislation that President Obama signed into law in March 2010. The enacted legislation contains many provisions designed to generate the revenues necessary to fund the coverage expansions. The most relevant of these provisions are those that impose fees or taxes on certain health-related industries, including medical device manufacturers. Beginning in 2013, each medical device manufacturer will have to pay an excise tax in an amount equal to 2.3 percent of the price for which such manufacturer sells its medical devices. This tax applies to all medical devices, including our products. These taxes, will result in a significant increase in the tax burden on our industry, which could have a material, negative impact on our results of operations and our cash flows.

Table of Contents

Furthermore, our healthcare provider customers are also subject to a wide variety of laws and regulations that could affect the nature and scope of their relationships with us. The healthcare market itself is highly regulated and subject to changing political, economic and regulatory influences. Regulations implemented pursuant to the Health Insurance Portability and Accountability Act (HIPAA), including regulations affecting the security and privacy of patient healthcare information held by healthcare providers and their business associates may require us to make significant and unplanned enhancements of software applications or services, result in delays or cancellations of orders, or result in the revocation of endorsement of our products and services by healthcare participants. The effect of HIPAA and newly enforced regulations on our business is difficult to predict, and there can be no assurance that we will adequately address the business risks created by HIPAA and its implementation or that we will be able to take advantage of any resulting business opportunities.

Extensive and changing government regulation of the healthcare industry may be expensive to comply with and exposes us to the risk of substantial government penalties.

In addition to medical device laws and regulations, numerous state and federal healthcare-related laws regulate our business, covering areas such as:

storage, transmission and disclosure of medical information and healthcare records;

prohibitions against the offer, payment or receipt of remuneration to induce referrals to entities providing healthcare services or goods or to induce the order, purchase or recommendation of our products; and

the marketing and advertising of our products.

Complying with these laws and regulations could be expensive and time-consuming, and could increase our operating costs or reduce or eliminate certain of our sales and marketing activities or our revenues.

We face risks related to our international sales, including the need to obtain necessary foreign regulatory clearance or approvals.

We currently sell our products in Europe, Asia Pacific, Latin America and Japan and may expand into other countries from time to time. We do not know whether orthodontists, GPs and consumers outside our North American market will adopt Invisalign in sufficient numbers or as rapidly as we anticipate. In addition, sales of our products outside the U.S. are subject to foreign regulatory requirements that vary widely from country to country. The time required to obtain clearances or approvals required by other countries may be longer than that required for FDA clearance or approval, and requirements for such approvals may differ from FDA requirements. We may be unable to obtain regulatory approvals in one or more of the other countries in which we do business or in which we may do business in the future. We may also incur significant costs in attempting to obtain and maintain foreign regulatory approvals. If we experience delays in receipt of approvals to market our products outside of the U.S., or if we fail to receive these approvals, we may be unable to market our products or enhancements in international markets in a timely manner, if at all.

Our business exposes us to potential product liability claims, and we may incur substantial expenses if we are subject to product liability claims or litigation.

Medical devices involve an inherent risk of product liability claims and associated adverse publicity. We may be held liable if any product we develop or any product that uses or incorporates any of our technologies causes injury or is otherwise found unsuitable. Although we intend to continue to maintain product liability insurance, adequate insurance may not be available on acceptable terms, if at all, and may not provide adequate coverage against potential liabilities. A product liability claim, regardless of its merit or eventual outcome, could result in significant legal defense costs. These costs would have the effect of increasing our expenses and diverting management's attention away from the operation of our business, and could harm our business.

Historically, the market price for our common stock has been volatile.

Edgar Filing: ALIGN TECHNOLOGY INC - Form 10-Q

The market price of our common stock could be subject to wide price fluctuations in response to various factors, many of which are beyond our control. The factors include:

quarterly variations in our results of operations and liquidity;

changes in recommendations by the investment community or in their estimates of our revenues or operating results;

speculation in the press or investment community concerning our business and results of operations;

strategic actions by our competitors, such as product announcements or acquisitions;

announcements of technological innovations or new products by us, our customers or competitors; and

general economic market conditions.

Table of Contents

In addition, the stock market in general, and the market for technology and medical device companies in particular, have experienced extreme price and volume fluctuations that have often been unrelated to or disproportionate to the operating performance of those companies. These broad market and industry factors may seriously harm the market price of our common stock, regardless of our operating performance. Historically, class action litigation is often brought against an issuing company following periods of volatility in the market price of a company's securities. Recently, a securities class action suit was filed against us on behalf of all persons or entities who purchased our common stock between January 30, 2007 and October 24, 2007. While we believe the lawsuit is without merit and intend to vigorously defend ourselves, we could incur substantial legal fees, and our management's attention and resources may be diverted from operating our business in order to respond to the litigation.

Future sales of significant amounts of our common stock may depress our stock price.

A large percentage of our outstanding common stock is currently owned by a small number of significant stockholders. These stockholders have sold in the past, and may sell in the future, large amounts of common stock over relatively short periods of time. Sales of substantial amounts of our common stock in the public market by our existing stockholders may adversely affect the market price of our common stock. Such sales could create public perception of difficulties or problems with our business and may depress our stock price.

Changes in, or interpretations of, accounting rules and regulations, could result in unfavorable accounting charges.

We prepare our consolidated financial statements in conformity with accounting principles generally accepted in the United States of America. These principles are subject to interpretation by the SEC and various bodies formed to interpret and create appropriate accounting policies. A change in these policies can have a significant effect on our reported results and may even retroactively affect previously reported transactions. Our accounting policies that recently have been or may be affected by changes in the accounting rules are as follows:

revenue recognition;

accounting for share-based payments; and

accounting for income taxes.

If we fail to manage our exposure to global financial and securities market risk successfully, our operating results and financial statements could be materially impacted.

The primary objective of most of our investment activities is to preserve principal. To achieve this objective, a majority of our marketable investments are investment grade, liquid, short-term fixed-income securities and money market instruments denominated in U.S. dollars. If the carrying value of our investments exceeds the fair value, and the decline in fair value is deemed to be other-than-temporary, we will be required to write down the value of our investments, which could materially harm our results of operations and financial condition. Moreover, the performance of certain securities in our investment portfolio correlates with the credit condition of the U.S. financial sector. With the current unstable credit environment, we might incur significant realized, unrealized or impairment losses associated with these investments.

We have adopted a shareholders rights plan to limit the possibility that we are acquired, which may mean that a transaction that shareholders are in favor of or are benefited by may be prevented.

Our board of directors has the authority to issue up to 5,000,000 shares of preferred stock and to determine the rights, preferences, privileges and restrictions of such shares without any further vote or action by our shareholders. To date, our board of directors has designated 200,000 shares as Series A participating preferred stock in connection with our shareholder rights plan. The issuance of preferred stock under certain circumstances could have the effect of delaying or preventing an acquisition of the company or otherwise adversely affecting the rights of the holders of our stock. The shareholder rights plan may have the effect of rendering more difficult or discouraging an acquisition of our company which is deemed undesirable by our board of directors. The shareholder rights plan may cause substantial dilution to a person or group attempting to acquire us on terms or in a manner not approved by our board of directors, except pursuant to an offer conditioned on the negotiation, purchase or redemption of the rights issued under the shareholder rights plan.

Table of Contents

Our effective tax rate may vary significantly from period to period.

Various internal and external factors may have favorable or unfavorable effects on our future effective tax rate. These factors include, but are not limited to, changes in tax laws, regulations and/or rates, changing interpretations of existing tax laws or regulations, the future levels of tax benefits of stock option deductions relating to incentive stock options and employee stock purchase plans and changes in overall levels of pretax earnings. In June 2009, the Costa Rica Ministry of Foreign Trade, an agency of the Government of Costa Rica, granted a twelve year extension of the tax incentives which were previously granted in 2002. Under these incentives, all of the income we earn in Costa Rica during these twelve year incentive periods is subject to reduced rates of Costa Rica income tax. The incentive tax rates will expire in various years beginning in 2017. The Costa Rica corporate income tax rate that would apply, absent the incentives, is 30% for 2010. Because Costa Rica incurred a net loss in 2009, no tax benefit was realized from these incentives in 2009. In order to receive the benefit of the incentives, we must hire specified numbers of employees and maintain minimum levels of fixed asset investment in Costa Rica. If we do not fulfill these conditions for any reason, our incentive could lapse and our income in Costa Rica would be subject to taxation at higher rates, which could have a negative impact on our operating results.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Not applicable.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

Not applicable.
