Alameda, California 94502

(Address of principal executive offices) (Zip code)

(510) 522-9600

(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Units of United States Heating Oil Fund, LP

(Title of each class)

NYSE Arca, Inc.

(Name of exchange on which registered)

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Website, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Edgar Filing: United States Heating Oil Fund, LP - Form 10-K

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The aggregate market value of the registrant's units held by non-affiliates of the registrant as of June 30, 2011 was: \$6,732,000.

The registrant had 300,000 outstanding units as of March 26, 2012.

DOCUMENTS INCORPORATED BY REFERENCE:

None.

Part I

Item 1. Business. What is USHO?

The United States Heating Oil Fund, LP (USHO) is a Delaware limited partnership organized on April 12, 2007. USHO maintains its main business office at 1320 Harbor Bay Parkway, Suite 145, Alameda, California 94502. USHO is a commodity pool that issues limited partnership interests (units) traded on the NYSE Arca, Inc. (the NYSE Arca). It operates pursuant to the terms of the Amended and Restated Agreement of Limited Partnership dated as of March 7, 2008, (as amended from time to time, the LP Agreement), which grants full management control to its general partner, United States Commodity Funds LLC (USCF).

The investment objective of USHO is for the daily changes in percentage terms of its units per unit net asset value (NAV) to reflect the daily changes in percentage terms of the spot price of heating oil (also known as No. 2 fuel oil) for delivery to the New York harbor, as measured by the daily changes in the price of the futures contract for heating oil traded on the New York Mercantile Exchange (the NYMEX), that is the near month contract to expire, except when the near month contract is within two weeks of expiration, in which case it will be measured by the futures contract that is the next month contract to expire (the Benchmark Futures Contract), less USHO s expenses. USCF does not intend to operate USHO in a fashion such that its per unit NAV will equal, in dollar terms, the spot price of heating oil or any particular futures contract based on heating oil. It is not the intent of USHO to be operated in a fashion such that its per unit NAV will reflect the percentage change of the price of any particular futures contract as measured over a time period greater than one day. USCF believes that it is not practical to manage the portfolio to achieve such an investment goal when investing in Futures Contracts (as defined below) and Other Heating Oil-Related Investments (as defined below). USHO s units began trading on April 9, 2008. USCF is the general partner of USHO and is responsible for the management of USHO.

Who is USCF?

USCF is a single member limited liability company that was formed in the state of Delaware on May 10, 2005. Prior to June 13, 2008, USCF was known as Victoria Bay Asset Management, LLC. It maintains its main business office at 1320 Harbor Bay Parkway, Suite 145, Alameda, California 94502. USCF is a wholly owned subsidiary of Wainwright Holdings, Inc., a Delaware corporation (Wainwright). Mr. Nicholas Gerber (discussed below) controls Wainwright by virtue of his ownership of Wainwright s shares. Wainwright is a holding company that previously owned an insurance company organized under Bermuda law (which has been liquidated) and a registered investment adviser firm named Ameristock Corporation, which has been distributed to the Wainwright shareholders. USCF is a member of the National Futures Association (the NFA) and registered as a commodity pool operator (CPO) with the Commodity Futures Trading Commission (the CFTC) on December 1, 2005.

USCF also serves as general partner or sponsor of the United States Oil Fund, LP (USOF), United States Natural Gas Fund, LP (USNG), the United States 12 Month Oil Fund, LP (US12OF), the United States Gasoline Fund, LP (UGA), the United States Short Oil Fund, LP (USSO), the United States 12 Month Natural Gas Fund, LP (US12NG), the United States Brent Oil Fund, LP (USBO), the United States Commodity Index Fund (USCI), the United States Copper Index Fund (CPER), the United States Metals Index Fund (USMI) and the United States Agriculture Index Fund (USAG). All funds listed previously are referred to collectively herein as the Related Public Funds. USOF, USNG, US12OF, UGA, USSO, US12NG, USBO, USCI and CPER are actively operating funds and all are listed on the NYSE Arca. The Related Public Funds are subject to reporting requirements under the Securities Exchange Act of 1934, as amended (the Exchange Act). For more information about each of the Related Public Funds, investors in USHO may call 1.800.920.0259 or visit www.unitedstatescommodityfunds.com or the SEC s website at www.sec.gov.

USCF has also filed registration statements to register units of the United States Sugar Fund (USSF), the United States Natural Gas Double Inverse Fund (UNGD), the United States Gasoil Fund (USGO) and the United States Asian Commodities Basket Fund (USABF), each of which is a series of the United States Commodity Funds Trust I. USSF, UNGD, USGO, USABF are currently not available to the public, as such funds are still in the process of review by various regulatory agencies which have regulatory authority over USCF and such funds.

Table of Contents

USCF is required to evaluate the credit risk of USHO to the futures commission merchant, oversee the purchase and sale of USHO's units by certain authorized purchasers (Authorized Purchasers), review daily positions and margin requirements of USHO and manage USHO's investments. USCF also pays the fees of ALPS Distributors, Inc., which serves as the marketing agent for USHO (the Marketing Agent), and Brown Brothers Harriman & Co. (BBH&Co.), which serves as the administrator (the Administrator) and the custodian (the Custodian) for USHO.

Limited partners have no right to elect USCF as the general partner on an annual or any other continuing basis. If USCF voluntarily withdraws as general partner, however, the holders of a majority of USHO's outstanding units (excluding for purposes of such determination units owned, if any, by the withdrawing USCF and its affiliates) may elect its successor. USCF may not be removed as general partner except upon approval by the affirmative vote of the holders of at least 66 and 2/3 percent of USHO's outstanding units (excluding units owned, if any, by USCF and its affiliates), subject to the satisfaction of certain conditions set forth in the LP Agreement.

The business and affairs of USCF are managed by a board of directors (the Board), which is comprised of four management directors (the Management Directors), some of whom are also its executive officers, and three independent directors who meet the independent director requirements established by the NYSE Arca Equities Rules and the Sarbanes-Oxley Act of 2002. The Management Directors have the authority to manage USCF pursuant to its LLC Agreement, as amended from time to time. Through its Management Directors, USCF manages the day-to-day operations of USHO. The Board has an audit committee which is made up of the three independent directors (Peter M. Robinson, Gordon L. Ellis and Malcolm R. Fobes III). For additional information relating to the audit committee, please see *Item 10. Directors, Executive Officers and Corporate Governance - Audit Committee* in this annual report on Form 10-K.

How Does USHO Operate?

An investment in the units provides a means for diversifying an investor's portfolio or hedging exposure to changes in heating oil prices. An investment in the units allows both retail and institutional investors to easily gain this exposure to the heating oil market in a transparent, cost-effective manner.

The net assets of USHO consist primarily of investments in futures contracts for heating oil, but may also consist of investment contracts for crude oil, gasoline, natural gas and other petroleum-based fuels that are traded on the NYMEX, ICE Futures or other U.S. and foreign exchanges (collectively, Futures Contracts). USHO may also invest in other heating oil-related investments such as cash-settled options on Futures Contracts, forward contracts for heating oil, cleared swap contracts and non-exchange traded (over-the-counter) transactions that are based on the price of heating oil, crude oil and other petroleum-based fuels, Futures Contracts and indices based on the foregoing (collectively, Other Heating Oil-Related Investments). Market conditions that USCF currently anticipates could cause USHO to invest in Other Heating Oil-Related Investments include those allowing USHO to obtain greater liquidity or to execute transactions with more favorable pricing. For convenience and unless otherwise specified, Futures Contracts and Other Heating Oil-Related Investments collectively are referred to as Heating Oil Interests in this annual report on Form 10-K. USHO invests substantially the entire amount of its assets in Futures Contracts while supporting such investments by holding the amounts of its margin, collateral and other requirements relating to these obligations in short-term obligations of the United States of two years or less (Treasuries), cash and cash equivalents. The daily holdings of USHO are available on USHO's website at www.unitedstatesheatingoilfund.com.

The investment objective of USHO is for the daily changes in percentage terms of its units' per unit NAV to reflect the daily changes in percentage terms of the spot price of heating oil, for delivery to the New York harbor (also known as No. 2 fuel), as measured by the daily changes in the price of the futures contract for heating oil, traded on the NYMEX that is the near month contract to expire, except when the near month contract is within two weeks of expiration, in which case it will be measured by the futures contract that is the next month contract to expire (the Benchmark Futures Contract), less USHO's expenses. USCF does not intend to operate USHO in a fashion such that its per unit NAV will equal, in dollar terms, the spot price of heating oil or any particular futures contract based on heating oil. It is not the intent of USHO to be operated in a fashion such that its per unit NAV will reflect the percentage change of the price of any particular futures contract as measured over a time period greater than one day. USHO may invest in interests other than the Benchmark Futures Contract to comply with accountability levels and position limits. For a detailed discussion of accountability levels and position limits, see *Item 1. Business - What are Futures Contracts?* below in this annual report on Form 10-K.

Table of Contents

USCF employs a neutral investment strategy in order to track changes in the price of the Benchmark Futures Contract regardless of whether the price goes up or goes down. USHO's neutral investment strategy is designed to permit investors generally to purchase and sell USHO's units for the purpose of investing indirectly in heating oil in a cost-effective manner, and/or to permit participants in the heating oil or other industries to hedge the risk of losses in their heating oil-related transactions. Accordingly, depending on the investment objective of an individual investor, the risks generally associated with investing in heating oil and/or the risks involved in hedging may exist. In addition, an investment in USHO involves the risk that the changes in the price of USHO's units will not accurately track the changes in the Benchmark Futures Contract, and that changes in the Benchmark Futures Contract will not closely correlate with changes in the spot prices of heating oil.

The Benchmark Futures Contract is changed from the near month contract to expire to the next month contract to expire during one day each month. On that day, USCF closes or sells USHO's Heating Oil Interests and also reinvests or rolls in new Heating Oil Interests.

The anticipated monthly dates on which the Benchmark Futures Contract will be changed and USHO's Heating Oil Interests will be rolled in 2012 are posted on USHO's website at www.unitedstatesheatingoilfund.com, and are subject to change without notice.

USHO's total portfolio composition is disclosed on its website each business day that the NYSE Arca is open for trading. The website disclosure of portfolio holdings is made daily and includes, as applicable, the name and value of each heating oil interest, the specific types of Other Heating Oil-Related Investments and characteristics of such Other Heating Oil-Related Investments, the name and value of each Treasury and cash equivalent, and the amount of cash held in USHO's portfolio. USHO's website is publicly accessible at no charge. USHO's assets used for margin and collateral are held in segregated accounts pursuant to the Commodity Exchange Act (the "CEA") and CFTC regulations.

Effective February 29, 2012, the units issued by USHO may only be purchased by Authorized Purchasers and only in blocks of 50,000 units called Creation Baskets. The amount of the purchase payment for a Creation Basket is equal to the aggregate NAV of the units in the Creation Basket. Similarly, only Authorized Purchasers may redeem units and only in blocks of 50,000 units called Redemption Baskets. Prior to February 29, 2012, Authorized Purchasers could only purchase or redeem units in blocks of 100,000 units. The amount of the redemption proceeds for a Redemption Basket is equal to the aggregate NAV of units in the Redemption Basket. The purchase price for Creation Baskets and the redemption price for Redemption Baskets are the actual NAV calculated at the end of the business day when a request for a purchase or redemption is received by USHO. The NYSE Arca publishes an approximate per unit NAV intra-day based on the prior day's per unit NAV and the current price of the Benchmark Futures Contract, but the price of Creation Baskets and Redemption Baskets is determined based on the actual per unit NAV calculated at the end of the day.

While USHO issues units only in Creation Baskets, units are listed on the NYSE Arca and investors may purchase and sell units at market prices like any listed security.

What is USHO's Investment Strategy?

In managing USHO's assets, USCF does not use a technical trading system that issues buy and sell orders. USCF instead employs a quantitative methodology whereby each time a Creation Basket is sold, USCF purchases Heating Oil Interests, such as the Benchmark Futures Contract, that have an aggregate market value that approximates the amount of Treasuries and/or cash received upon the issuance of the Creation Basket.

By remaining invested as fully as possible in Futures Contracts or Other Heating Oil-Related Investments, USCF believes that the daily changes in percentage terms in USHO's per unit NAV will continue to closely track the daily changes in percentage terms in the price of the Benchmark Futures Contract. USCF believes that certain arbitrage opportunities result in the price of the units traded on the NYSE Arca closely tracking the per unit NAV of USHO. Additionally, Benchmark Futures Contracts traded on the NYMEX have closely tracked the daily spot price of heating oil for delivery to the New York harbor. Based on these expected interrelationships, USCF believes that the changes in the price of USHO's units traded on the NYSE Arca have closely tracked and will continue to closely track the daily changes in the spot price of heating oil. For performance data relating to USHO's ability to track its benchmark, see *Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations - Tracking USHO's Benchmark* in this annual report on Form 10-K.

Table of Contents

USCF endeavors to place USHO's trades in Futures Contracts and Other Heating Oil-Related Investments and otherwise manage USHO's investments so that A will be within plus/minus 10 percent of B , where:

A is the average daily change in USHO's per unit NAV for any period of 30 successive valuation days; *i.e.*, any NYSE Arca trading day as of which USHO calculates its per unit NAV; and

B is the average daily percentage change in the price of the Benchmark Futures Contract over the same period.

USCF believes that market arbitrage opportunities will cause the daily changes in USHO's unit price on the NYSE Arca to closely track the daily changes in USHO's per unit NAV. USCF believes that the net effect of these two expected relationships and the relationships described above between USHO's per unit NAV and the Benchmark Futures Contract, will be that the daily changes in the price of USHO's units on the NYSE Arca will closely track, in percentage terms, the daily changes in the spot price of a gallon of heating oil, less USCF's expenses. For performance data relating to USHO's ability to track its benchmark, see *Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations - Tracking USHO's Benchmark* in this annual report on Form 10-K.

The specific Futures Contracts purchased depend on various factors, including a judgment by USCF as to the appropriate diversification of USHO's investments in futures contracts with respect to the month of expiration, and the prevailing price volatility of particular contracts. While USCF has made significant investments in NYMEX Futures Contracts, for various reasons, including the ability to enter into the precise amount of exposure to the heating oil market, position limits or other regulatory requirements limiting USHO's holdings, and market conditions, it may invest in Futures Contracts traded on other exchanges or invest in Other Heating Oil-Related Investments. To the extent that USHO invests in Other Heating Oil-Related Investments, it would prioritize investments in contracts and instruments that are economically equivalent to the Benchmark Futures Contract, including cleared swaps that satisfy such criteria, and then, to a lesser extent, it would invest in other types of cleared swaps and other contracts, instruments and swaps, including swaps in the over-the-counter market. If USHO is required by law or regulation, or by one of its regulators, including a futures exchange, to reduce its position in the Futures Contract to the applicable position limit or to a specified accountability level or if market conditions dictate it would be more appropriate to invest in Other Heating Oil-Related Investments, a substantial portion of USHO's assets could be invested in accordance with such priority in Other Heating Oil-Related Investments that are intended to replicate the return on the Benchmark Futures Contract. As USHO's assets reach higher levels, it is more likely to exceed position limits, accountability levels or other regulatory limits and, as a result, it is more likely that it will invest in accordance with such priority in Other Heating Oil-Related Investments at such higher levels. In addition, market conditions that USCF currently anticipates could cause USHO to invest in Other Heating Oil-Related Investments include those allowing USHO to obtain greater liquidity or to execute transactions with more favorable pricing. See *Item 1. Business - Regulation* in this annual report on Form 10-K for a discussion of the potential impact of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act) on USHO's ability to invest in over-the-counter transactions and cleared swaps.

USCF may not be able to fully invest USHO's assets in Futures Contracts having an aggregate notional amount exactly equal to USHO's NAV. For example, as standardized contracts, the Futures Contracts are for a specified amount of a particular commodity, and USHO's NAV and the proceeds from the sale of a Creation Basket are unlikely to be an exact multiple of the amounts of those contracts. As a result, in such circumstances, USHO may be better able to achieve the exact amount of exposure to changes in price of the Benchmark Futures Contract through the use of Other Heating Oil-Related Investments, such as over-the-counter contracts that have better correlation with changes in price of the Benchmark Futures Contract.

USHO anticipates that to the extent it invests in Futures Contracts other than heating oil contracts (such as futures contracts for crude oil, natural gas, and other petroleum-based fuels) and Other Heating Oil-Related Investments, it will enter into various non-exchange-traded derivative contracts to hedge the short-term price movements of such Futures Contracts and Other Heating Oil-Related Investments against the current Benchmark Futures Contract.

Table of Contents

USCF does not anticipate letting USHO's Futures Contracts expire and taking delivery of the underlying commodity. Instead, USCF closes existing positions, *e.g.*, when it changes the Benchmark Futures Contract or Other Heating Oil-Related Investments or it otherwise determines it would be appropriate to do so and reinvests the proceeds in new Futures Contracts or Other Heating Oil-Related Investments. Positions may also be closed out to meet orders for Redemption Baskets and in such case proceeds for such baskets will not be reinvested.

What is the Heating Oil Market and the Petroleum-Based Fuel Market?

USHO may purchase Futures Contracts traded on the NYMEX that are based on heating oil. The ICE Futures also offers a heating oil futures contract which trades in units of 42,000 U.S. gallons (1,000 barrels). The heating oil futures contract is cash settled against the prevailing market price for heating oil delivered to the New York harbor. It may also purchase contracts on other exchanges, including the ICE Futures, the Singapore Exchange and the Dubai Mercantile Exchange.

Heating Oil. Heating oil, also known as No. 2 fuel oil, accounts for 25% of the yield of a barrel of crude oil, the second largest cut from oil after gasoline. The heating oil futures contract listed and traded on the NYMEX trades in units of 42,000 gallons (1,000 barrels) and is based on delivery in the New York harbor, the principal cash market center. The ICE Futures also offers a Futures Contract which trades in units of 42,000 U.S. gallons (1,000 barrels). The Futures Contract is cash-settled against the prevailing market price for Heating Oil delivered to the New York Harbor.

Light, Sweet Crude Oil. Crude oil is the world's most actively traded commodity. The futures contracts for light, sweet crude oil that are traded on the NYMEX are the world's most liquid forum for crude oil trading, as well as the world's largest volume futures contract trading on a physical commodity. Due to the liquidity and price transparency of oil futures contracts, they are used as a principal international pricing benchmark. The futures contracts for light, sweet crude oil trade on the NYMEX in units of 1,000 U.S. barrels (42,000 gallons) and, if not closed out before maturity, will result in delivery of oil to Cushing, Oklahoma, which is also accessible to the international spot markets by two major interstate petroleum pipeline systems. In Europe, Brent crude oil is the standard for futures contracts and is primarily traded on the ICE Futures. Brent crude oil is the price reference for two-thirds of the world's traded oil. The ICE Brent Futures is a deliverable contract with an option to cash settle which trades in units of 1,000 barrels (42,000 U.S. gallons). The ICE Futures also offers a WTI crude oil futures contract which trades in units of 1,000 barrels. The WTI crude oil futures contract is cash settled against the prevailing market price for U.S. light sweet crude oil.

Demand for petroleum products by consumers, as well as agricultural, manufacturing and transportation industries, determines demand for crude oil by refiners. Since the precursors of product demand are linked to economic activity, crude oil demand will tend to reflect economic conditions. However, other factors such as weather also influence product and crude oil demand.

Crude oil supply is determined by both economic and political factors. Oil prices (along with drilling costs, availability of attractive prospects for drilling, taxes and technology, among other factors) determine exploration and development spending, which influence output capacity with a lag. In the short run, production decisions by the Organization of Petroleum Exporting Countries (OPEC) also affect supply and prices. Oil export embargoes and the current conflict in the Middle East represent other routes through which political developments move the market. It is not possible to predict the aggregate effect of all or any combination of these factors. The price of crude oil has historically been volatile.

Gasoline. Gasoline is the largest single volume refined product sold in the U.S. and accounts for almost half of national oil consumption. The gasoline futures contract listed and traded on the NYMEX trades in units of 42,000 gallons (1,000 barrels) and is based on delivery at petroleum products terminals in the New York harbor, the major East Coast trading center for imports and domestic shipments from refineries in the New York harbor area or from the Gulf Coast refining centers. The price of gasoline has historically been volatile.

Table of Contents

Natural Gas. Natural gas accounts for almost a quarter of U.S. energy consumption. The natural gas futures contract listed and traded on the NYMEX trades in units of 10,000 million British thermal units and is based on delivery at the Henry Hub in Louisiana, the nexus of 16 intra- and interstate natural gas pipeline systems that draw supplies from the region's prolific gas deposits. The pipelines serve markets throughout the U.S. East Coast, the Gulf Coast, the Midwest, and up to the Canadian border. The price of natural gas has historically been volatile.

What are Futures Contracts?

Futures Contracts are agreements between two parties. One party agrees to buy a commodity such as heating oil from the other party at a later date at a price and quantity agreed-upon when the contract is made. Futures Contracts are traded on futures exchanges, including the NYMEX. For example, the Benchmark Futures Contract is traded on the NYMEX in units of 42,000 gallons (1,000 barrels). Futures Contracts traded on the NYMEX are priced by floor brokers and other exchange members both through an open outcry of offers to purchase or sell the contracts and through an electronic, screen-based system that determines the price by matching electronically offers to purchase and sell. Additional risks of investing in Futures Contracts are included in *Item 1A. Risk Factors* in this annual report on Form 10-K.

Impact of Accountability Levels, Position Limits and Price Fluctuation Limits. Futures contracts include typical and significant characteristics. Most significantly, the CFTC and U.S. designated contract markets such as the NYMEX have established accountability levels and position limits on the maximum net long or net short futures contracts in commodity interests that any person or group of persons under common trading control (other than as a hedge, which an investment by USHO is not) may hold, own or control. The net position is the difference between an individual or firm's open long contracts and open short contracts in any one commodity. In addition, most U.S.-based futures exchanges, such as the NYMEX, limit the daily price fluctuation for futures contracts. Currently, the ICE Futures imposes position and accountability limits that are similar to those imposed by U.S.-based futures exchanges but does not limit the maximum daily price fluctuation, while some other non-U.S. futures exchanges have not adopted such limits.

The accountability levels for the Benchmark Futures Contract and other Futures Contracts traded on the NYMEX are not a fixed ceiling, but rather a threshold above which the NYMEX may exercise greater scrutiny and control over an investor's positions. The current accountability level for any one-month in the Benchmark Futures Contract is 5,000 net contracts. In addition, the NYMEX imposes an accountability level for all months of 7,000 net futures contracts for investments in futures contracts for heating oil. If USHO and the Related Public Funds exceed these accountability levels for investments in the futures contract for heating oil, the NYMEX will monitor USHO's and the Related Public Funds exposure and ask for further information on their activities, including the total size of all positions, investment and trading strategy, and the extent of liquidity resources of USHO and the Related Public Funds. If deemed necessary by the NYMEX, it could also order USHO and the Related Public Funds to reduce their aggregate net position back to the accountability level. In addition, the ICE Futures maintains the same accountability levels, position limits and monitoring authority for its heating oil contract as the NYMEX. As of December 31, 2011, USHO and the Related Public Funds held a net of 289 Heating Oil Futures HO Contracts traded on the NYMEX.

Position limits differ from accountability levels in that they represent fixed limits on the maximum number of futures contracts that any person may hold and cannot allow such limits to be exceeded without express CFTC authority to do so. In addition to accountability levels and position limits that may apply at any time, the NYMEX and the ICE Futures impose position limits on contracts held in the last few days of trading in the near month contract to expire. It is unlikely that USHO will run up against such position limits because USHO's investment strategy is to close out its positions and roll from the near month contract to expire to the next month contract beginning two weeks from expiration of the contract.

On October 18, 2011, the CFTC adopted new rules, which establish position limits and limit formulas for certain physical commodity futures including Futures Contracts and options on Futures Contracts, executed pursuant to the rules of designated contract markets (*i.e.*, certain regulated exchanges) and commodity swaps that are economically equivalent to such futures and options contracts. See *Commodity Interest Markets Regulation* in this annual report on Form 10-K for information regarding the Dodd-Frank Act.

Table of Contents

Price Volatility. The price volatility of Futures Contracts generally has been historically greater than that for traditional securities such as stocks and bonds. Price volatility often is greater day-to-day as opposed to intra-day. Futures Contracts tend to be more volatile than stocks and bonds because price movements for heating oil are more currently and directly influenced by economic factors for which current data is available and are traded by heating oil futures traders throughout the day. Because USHO invests a significant portion of its assets in Futures Contracts, the assets of USHO, and therefore the prices of USHO units, may be subject to greater volatility than traditional securities.

Marking-to-Market Futures Positions. Futures Contracts are marked to market at the end of each trading day and the margin required with respect to such contracts is adjusted accordingly. This process of marking-to-market is designed to prevent losses from accumulating in any futures account. Therefore, if USHO's futures positions have declined in value, USHO may be required to post variation margin to cover this decline. Alternatively, if USHO's futures positions have increased in value, this increase will be credited to USHO's account.

Why Does USHO Purchase and Sell Futures Contracts?

USHO's investment objective is for the daily changes in percentage terms of its units' per unit NAV to reflect the daily changes in percentage terms of the Benchmark Futures Contract, less USHO's expenses. USHO invests primarily in Futures Contracts. USHO seeks to have its aggregate NAV approximate at all times the aggregate market value of the Futures Contracts and Other Heating Oil-Related Investments it holds.

In connection with investing in Futures Contracts and Other Heating Oil-Related Investments, USHO holds Treasuries, cash and/or cash equivalents that serve as segregated assets supporting USHO's positions in Futures Contracts and Other Heating Oil-Related Investments. For example, the purchase of a Futures Contract with a stated value of \$10 million would not require USHO to pay \$10 million upon entering into the contract; rather, only a margin deposit, generally of 5% to 30% of the stated value of the Futures Contract, would be required. To secure its Futures Contract obligations, USHO would deposit the required margin with the futures commission merchant and would separately hold, through its Custodian or futures commission merchant, Treasuries, cash and/or cash equivalents in an amount equal to the balance of the current market value of the contract, which at the contract's inception would be \$10 million minus the amount of the margin deposit, or \$9.5 million (assuming a 5% margin).

As a result of the foregoing, typically 5% to 30% of USHO's assets are held as margin in segregated accounts with a futures commission merchant. In addition to the Treasuries and cash it posts with the futures commission merchant for the Futures Contracts it owns, USHO may hold, through the Custodian, Treasuries, cash and/or cash equivalents that can be posted as additional margin or as other collateral to support its over-the-counter contracts. USHO earns income from the Treasuries and/or cash equivalents that it purchases, and on the cash it holds through the Custodian or futures commission merchant. USHO anticipates that the earned income will increase the NAV and limited partners' capital contribution accounts. USHO reinvests the earned income, holds it in cash, or uses it to pay its expenses. If USHO reinvests the earned income, it makes investments that are consistent with its investment objective.

What are the Trading Policies of USHO?

Liquidity

USHO invests only in Futures Contracts and Other Heating Oil-Related Investments that, in the opinion of USCF, are traded in sufficient volume to permit the ready taking and liquidation of positions in these financial interests and Other Heating Oil-Related Investments that, in the opinion of USCF, may be readily liquidated with the original counterparty or through a third party assuming the position of USHO.

Spot Commodities

While the Futures Contracts traded on the NYMEX can be physically settled, USHO does not intend to take or make physical delivery. USHO may from time to time trade in Other Heating Oil-Related Investments, including contracts based on the spot price of heating oil.

Table of Contents

Leverage

USCF endeavors to have the value of USHO's Treasuries, cash and cash equivalents, whether held by USHO or posted as margin or other collateral, at all times approximate the aggregate market value of its obligations under its Futures Contracts and Other Heating Oil-Related Investments. Commodity pools' trading positions in futures contracts or other related investments are typically required to be secured by the deposit of margin funds that represent only a small percentage of a futures contract's (or other commodity interest's) entire market value. While USCF has not and does not intend to leverage USHO's assets, it is not prohibited from doing so under the LP Agreement.

Borrowings

Borrowings are not used by USHO unless USHO is required to borrow money in the event of physical delivery, if USHO trades in cash commodities, or for short-term needs created by unexpected redemptions.

Over-the-Counter Derivatives (Including Spreads and Straddles)

In addition to Futures Contracts, there are also a number of listed options on the Futures Contracts on the principal futures exchanges. These contracts offer investors and hedgers another set of financial vehicles to use in managing exposure to the heating oil market. Consequently, USHO may purchase options on Futures Contracts on these exchanges in pursuing its investment objective.

In addition to the Futures Contracts and options on the Futures Contracts, there also exists an active non-exchange-traded market in derivatives tied to heating oil. These derivatives transactions (also known as over-the-counter contracts) are usually entered into between two parties in private contracts. Unlike most of the exchange-traded Futures Contracts or exchange-traded options on the Futures Contracts, each party to such contract bears the credit risk of the other party, *i.e.*, the risk that the other party may not be able to perform its obligations under its contract.

To reduce the credit risk that arises in connection with such contracts, USHO will generally enter into an agreement with each counterparty based on the Master Agreement published by the International Swaps and Derivatives Association, Inc. that provides for the netting of its overall exposure to its counterparty.

USCF assesses or reviews, as appropriate, the creditworthiness of each potential or existing counterparty to an over-the-counter contract pursuant to guidelines approved by USCF's Board.

USHO may employ spreads or straddles in its trading to mitigate the differences in its investment portfolio and its goal of tracking the price of the Benchmark Futures Contract. USHO would use a spread when it chooses to take simultaneous long and short positions in futures written on the same underlying asset, but with different delivery months.

USHO has not employed any hedging methods since all of its investments have been made over an exchange. Therefore, USHO has not been exposed to counterparty risk.

Pyramiding

USHO has not and will not employ the technique, commonly known as pyramiding, in which the speculator uses unrealized profits on existing positions as variation margin for the purchase or sale of additional positions in the same or another commodity interest.

Who are the Service Providers?

In its capacity as the Custodian for USHO, BBH&Co. holds USHO's Treasuries, cash and/or cash equivalents pursuant to a custodial agreement. BBH&Co. is also the registrar and transfer agent for the units. In addition, in its capacity as Administrator for USHO, BBH&Co. performs certain administrative and accounting services for USHO and prepares certain SEC, NFA and CFTC reports on behalf of USHO. USCF pays BBH&Co.'s fees for these services.

Table of Contents

BBH&Co.'s principal business address is 50 Milk Street, Boston, MA 02109-3661. BBH&Co., a private bank founded in 1818, is not a publicly held company nor is it insured by the Federal Deposit Insurance Corporation. BBH&Co. is authorized to conduct a commercial banking business in accordance with the provisions of Article IV of the New York State Banking Law, New York Banking Law §§160-181, and is subject to regulation, supervision, and examination by the New York State Banking Department. BBH&Co. is also licensed to conduct a commercial banking business by the Commonwealths of Massachusetts and Pennsylvania and is subject to supervision and examination by the banking supervisors of those states.

USHO also employs ALPS Distributors, Inc. as the Marketing Agent. USCF pays the Marketing Agent an annual fee. In no event may the aggregate compensation paid to the Marketing Agent and any affiliate of USCF for distribution-related services in connection with the offering of units exceed ten percent (10%) of the gross proceeds of the offering.

ALPS's principal business address is 1290 Broadway, Suite 1100, Denver, CO 80203. ALPS is the marketing agent for USHO. ALPS is a broker-dealer registered with the Financial Industry Regulatory Authority (FINRA) and a member of the Securities Investor Protection Corporation.

UBS Securities LLC (UBS Securities) is USHO's futures commission merchant. USHO and UBS have entered into an Institutional Futures Client Account Agreement. This agreement requires UBS Securities to provide services to USHO in connection with the purchase and sale of Heating Oil Interests that may be purchased or sold by or through UBS Securities for USHO's account. USHO pays UBS Securities commissions for executing and clearing trades on behalf of USHO.

UBS Securities' principal business address is 677 Washington Blvd, Stamford, CT 06901. UBS Securities is a futures clearing broker for USHO. UBS Securities is registered in the U.S. with FINRA as a broker-dealer and with the CFTC as a futures commission merchant. UBS Securities is a member of various U.S. futures and securities exchanges.

UBS is and has been a defendant in numerous legal proceedings, including actions brought by regulatory organizations and government agencies, relating to its securities and commodities business that allege various violations of federal and state securities laws. UBS AG, the ultimate parent company to UBS Securities LLC, files annual reports and quarterly reports to the SEC in which it discloses material information about UBS matters, including information about any material litigation or regulatory investigations (https://www.ubs.com/global/en/about_ubs/investor_relations/quarterly_reporting/2011.html). Actions with respect to UBS Securities' futures commission merchant business are publicly available on the website of the National Futures Association (<http://www.nfa.futures.org/>).

On April 29, 2010, the CFTC issued an order with respect to UBS Securities LLC and levied a fine of \$200,000. The Order stated that on February 6, 2009, UBS Securities' employee broker aided and abetted UBS Securities' customer's concealment of material facts from the NYMEX in violation of Section 9(a)(4) of the CEA, 7 U.S.C. § 13(a)(4) (2006). Pursuant to NYMEX Rules, a block trade must be reported to NYMEX within five minutes of the time of execution consistent with the requirements of NYMEX Rule 6.21C(A)(6). Although the block trade in question was executed earlier in the day, UBS Securities' employee broker allegedly aided and abetted its customer's concealment of facts when, in response to the customer's request to delay reporting the trade until after the close of trading, UBS Securities' employee did not report the trade until after the close. The fine has been paid and the matter is now closed.

On August 14, 2008, the New Hampshire Bureau of Securities Regulation filed an administrative action against UBS Securities relating to a student loan issuer, the New Hampshire Higher Education Loan Corp. (NHHELCO). The complaint alleged fraudulent and unethical conduct in violation of New Hampshire state statutes. On April 14, 2010, UBS entered into a Consent Order resolving all of the Bureau's claims. UBS paid \$750,000 to the Bureau for all costs associated with the Bureau's investigation. UBS entered a separate civil settlement with NHHELCO and provided a total financial benefit of \$20M to NHHELCO.

In the summer of 2008, the Massachusetts Securities Division, Texas State Securities Board, and the New York Attorney General all brought actions against UBS and UBS Financial Services, Inc. (UBS Financial), alleging violations of various state law anti-fraud provisions in connection with the marketing and sale of auction rate securities.

Table of Contents

On August 8, 2008, UBS Securities and UBS Financial Services reached agreements with the SEC, the NYAG, the Massachusetts Securities Division and other state regulatory agencies represented by the North American Securities Administrators Association (NASAA) to restore liquidity to all remaining client s holdings of auction rate securities by June 30, 2012. On October 2, 2008, UBS Securities and UBS Financial entered into a final consent agreement with the Massachusetts Securities Division settling all allegations in the Massachusetts Securities Division s administrative proceeding against UBS Securities and UBS Financial with regards to the auction rate securities matter. On December 11, 2008, UBS Securities and UBS Financial executed an Assurance of Discontinuance in the auction rate securities settlement with the NYAG. On the same day, UBS Securities and UBS Financial finalized settlements with the SEC. UBS paid penalties of \$75M to NYAG and an additional \$75M to be apportioned among the participating NASAA states. In March 2010, UBS and NASAA agreed on final settlement terms, pursuant to which, UBS agreed to provide client liquidity up to an additional \$200 million.

The Jerome F. Sheldon Trust, et al. v. UBS Securities LLC, et al. is one of a series of consolidated actions filed beginning in 2008 in the Superior Court of California, County of San Francisco relating to Solidus Networks, Inc., d/b/a Pay by Touch (PBT), for which UBS served as a placement agent in several offerings by PBT securities. Plaintiffs in the consolidated actions allege, among other things, that UBS and executives of PBT misrepresented the financial condition of PBT and failed to disclose certain legal difficulties of John Rogers (the initial founder and CEO of PBT) including alleged drug use. Plaintiffs complaint asserts that these alleged misrepresentations and omissions constituted fraud against certain investors in PBT and violated provisions of California securities law. Plaintiff claims \$95 million in damages, plus interest and punitive damages. Trial is scheduled to begin the week of November 21, 2011.

On June 27, 2007, the Securities Division of the Secretary of the Commonwealth of Massachusetts (Massachusetts Securities Division) filed an administrative complaint (the Complaint) and notice of adjudicatory proceeding against UBS Securities LLC, captioned In The Matter of UBS Securities, LLC, Docket No. E-2007-0049, which alleged that UBS Securities violated the Massachusetts Uniform Securities Act (the Act) and related regulations by providing the advisers for certain hedge funds with gifts and gratuities in the form of below market office rents, personal loans with below market interest rates, event tickets, and other perks, in order to induce those hedge fund advisers to increase or retain their level of prime brokerage fees paid to UBS Securities. On November 22, 2010, UBS entered into a Consent Order and Settlement with the Massachusetts Securities Division, pursuant to which UBS agreed to implementing a disclosure policy and retaining an independent consultant to monitor the policy. UBS also paid a \$100,000 fine.

UBS Securities will act only as clearing broker for USHO and as such will be paid commissions for executing and clearing trades on behalf of USHO. UBS Securities has not passed upon the adequacy or accuracy of this annual report on Form 10-K. UBS Securities neither will act in any supervisory capacity with respect to USCF nor participate in the management of USCF or USHO.

UBS Securities is not affiliated with USHO or USCF. Therefore, USHO does not believe that USHO has any conflicts of interest with UBS Securities or their trading principals arising from their acting as USHO s futures commission merchant.

Currently, USCF does not employ commodity trading advisors for trading of USHO contracts. USCF currently does, however, employ a trading advisor for USCI and CPER, SummerHaven Investment Management, LLC (SummerHaven). If, in the future, USCF does employ commodity trading advisors for USHO, it will choose each advisor based on arm s-length negotiations and will consider the advisor s experience, fees and reputation.

Table of Contents

Fees of USHO

Fees and Compensation Arrangements with USCF and Non-Affiliated Service Providers⁽¹⁾

Service Provider	Compensation Paid by USCF
BBH&Co., Custodian and Administrator	Minimum amount of \$75,000 annually for its custody, fund accounting and fund administration services rendered to all funds, as well as a \$20,000 annual fee for its transfer agency services. In addition, an asset-based charge of (a) 0.06% for the first \$500 million of USHO s and the Related Public Funds combined net assets, (b) 0.0465% for USHO s and the Related Public Funds combined net assets greater than \$500 million but less than \$1 billion, and (c) 0.035% once USHO s and the Related Public Funds combined net assets exceed \$1 billion. ⁽²⁾
ALPS Distributors, Inc., Marketing Agent	0.06% on USHO s assets up to \$3 billion; and 0.04% on USHO s assets in excess of \$3 billion.

⁽¹⁾ USCF pays this compensation.

⁽²⁾ The annual minimum amount will not apply if the asset-based charge for all accounts in the aggregate exceeds \$75,000. USCF also will pay transaction charge fees to BBH&Co., ranging from \$7.00 to \$15.00 per transaction for the funds.

Compensation to USCF

USHO is contractually obligated to pay USCF a management fee based on 0.60% per annum on its average net assets. Fees are calculated on a daily basis (accrued at 1/365 of the applicable percentage of NAV on that day) and paid on a monthly basis. NAV is calculated by taking the current market value of USHO s total assets and subtracting any liabilities.

Fees and Compensation Arrangements between USHO and Non-Affiliated Service Providers⁽³⁾

Service Provider	Compensation Paid by USHO
UBS Securities LLC, Futures Commission Merchant	Approximately \$3.50 per buy or sell; charges may vary

⁽³⁾ USHO pays this compensation.

New York Mercantile Exchange Licensing Fee⁽⁴⁾

Assets	Licensing Fee
Prior to October 19, 2011:	
First \$1,000,000,000	0.04% of NAV
After the first \$1,000,000,000	0.02% of NAV
On and after October 20, 2011:	0.015% on all net assets

⁽⁴⁾ Fees are calculated on a daily basis (accrued at 1/365 of the applicable percentage of NAV on that day) and paid on a monthly basis. USHO is responsible for its pro rata share of the assets held by USHO and the Related Public Funds, other than USBO, USCI, CPER, USMI and USAG.

Table of Contents**Expenses Paid or Accrued by USHO through December 31, 2011 in dollar terms:**

Expenses:	Amount in Dollar Terms
Amount Paid or Accrued to USCF:	\$ 229,244
Amount Paid or Accrued in Portfolio Brokerage Commissions:	\$ 33,936
Other Amounts Paid or Accrued ⁽⁵⁾ :	\$ 693,543
Total Expenses Paid or Accrued:	\$ 956,723
Expenses Waived ⁽⁶⁾ :	\$ (614,278)
Total Expenses Paid or Accrued Including Expenses Waived ⁽⁶⁾ :	\$ 342,445

⁽⁵⁾ Includes expenses relating to the registration of additional units, legal fees, auditing fees, printing expenses, licensing fees, tax reporting fees, prepaid insurance expenses and miscellaneous expenses and fees and expenses paid to the independent directors of USCF.

⁽⁶⁾ USCF, though under no obligation to do so, agreed to pay certain expenses, to the extent that such expenses exceeded 0.15% (15 basis points) of USHO's NAV, on an annualized basis, through at least June 30, 2012. USCF has no obligation to continue such payments into subsequent periods.

Expenses Paid or Accrued by USHO through December 31, 2011 as a Percentage of Average Daily Net Assets:

Expenses:	Amount as a Percentage of Average Daily Net Assets
Amount Paid or Accrued to USCF:	0.60% annualized
Amount Paid or Accrued in Portfolio Brokerage Commissions:	0.09% annualized
Other Amounts Paid or Accrued ⁽⁷⁾ :	1.82% annualized
Total Expenses Paid or Accrued:	2.51% annualized
Expenses Waived ⁽⁸⁾ :	(1.61)% annualized
Total Expenses Paid or Accrued Including Expenses Waived ⁽⁸⁾ :	0.90% annualized

⁽⁷⁾ Includes expenses relating to the registration of additional units, legal fees, auditing fees, printing expenses, licensing fees, tax reporting fees, prepaid insurance expenses and miscellaneous expenses and fees and expenses paid to the independent directors of USCF.

⁽⁸⁾ USCF, though under no obligation to do so, agreed to pay certain expenses, to the extent that such expenses exceeded 0.15% (15 basis points) of USHO's NAV, on an annualized basis, through at least June 30, 2012. USCF has no obligation to continue such payments into subsequent periods.

Other Fees. USHO also pays the fees and expenses associated with its tax accounting and reporting requirements. These fees were approximately \$45,000 for the fiscal year ended December 31, 2011. In addition, USHO is responsible for paying its portion of the directors' and officers' liability insurance for USHO and the Related Public Funds and the fees and expenses of the independent directors who also serve as audit committee members of USHO and the Related Public Funds organized as limited partnerships and, as of July 8, 2011, those Related Public Funds organized as a series of a Delaware statutory trust. USHO shares the fees and expenses with each Related Public Fund, as described above, based on the relative assets of each fund computed on a daily basis. These fees and expenses for the year ended December 31, 2011 were \$607,582 for USHO and the Related Public Funds. USHO's portion of such fees and expenses was \$1,383.

Form of Units

Registered Form. Units are issued in registered form in accordance with the LP Agreement. The Administrator has been appointed registrar and transfer agent for the purpose of transferring units in certificated form. The Administrator keeps a record of all limited partners and holders of the units in certificated form in the registry (the Register). USCF recognizes transfers of units in certificated form only if done in accordance with the LP Agreement. The beneficial interests in such units are held in book-entry form through participants and/or accountholders in the Depository Trust Company (DTC).

Book Entry. Individual certificates are not issued for the units. Instead, units are represented by one or more global certificates, which are deposited by the Administrator with DTC and registered in the name of Cede & Co., as nominee for DTC. The global certificates evidence all of the units outstanding at any time. Unitholders are limited to: (1) participants in DTC such as banks, brokers, dealers and trust companies (DTC

Edgar Filing: United States Heating Oil Fund, LP - Form 10-K

Participants), (2) those who maintain, either directly or indirectly, a custodial relationship with a DTC Participant (Indirect Participants), and (3) those banks, brokers, dealers, trust companies and others who hold interests in the units through DTC Participants or Indirect Participants, in each case who satisfy the requirements for transfers of units. DTC Participants acting on behalf of investors holding units through such participants' accounts in DTC will follow the delivery practice applicable to securities eligible for DTC's Same-Day Funds Settlement System. Units are credited to DTC Participants' securities accounts following confirmation of receipt of payment.

Table of Contents

DTC. DTC has advised USHO as follows: It is a limited purpose trust company organized under the laws of the State of New York and is a member of the Federal Reserve System, a clearing corporation within the meaning of the New York Uniform Commercial Code and a clearing agency registered pursuant to the provisions of Section 17A of the Exchange Act. DTC holds securities for DTC Participants and facilitates the clearance and settlement of transactions between DTC Participants through electronic book-entry changes in accounts of DTC Participants.

Calculating Per Unit NAV

USHO's per unit NAV is calculated by:

Taking the current market value of its total assets;

Subtracting any liabilities; and

Dividing that total by the total number of outstanding units.

The Administrator calculates the per unit NAV of USHO once each NYSE Arca trading day. The per unit NAV for a particular trading day is released after 4:00 p.m. New York time. Trading during the core trading session on the NYSE Arca typically closes at 4:00 p.m. New York time. The Administrator uses the NYMEX closing price (determined at the earlier of the close of the NYMEX or 2:30 p.m. New York time) for the Futures Contracts traded on the NYMEX, but calculates or determines the value of all other USHO investments (including Futures Contracts not traded on the NYMEX, Other Heating Oil-Related Investments and Treasuries), using market quotations, if available, or other information customarily used to determine the fair value of such investments as of the earlier of the close of the NYSE Arca or 4:00 p.m. New York time, in accordance with the current Administrative Agency Agreement among BBH&Co., USHO and USCF. Other information customarily used in determining fair value includes information consisting of market data in the relevant market supplied by one or more third parties including, without limitation, relevant rates, prices, yields, yield curves, volatilities, spreads, correlations or other market data in the relevant market; or information of the types described above from internal sources if that information is of the same type used by USHO in the regular course of its business for the valuation of similar transactions. The information may include costs of funding, to the extent costs of funding are not and would not be a component of the other information being utilized. Third parties supplying quotations or market data may include, without limitation, dealers in the relevant markets, end-users of the relevant product, information vendors, brokers and other sources of market information.

In addition, in order to provide updated information relating to USHO for use by investors and market professionals, the NYSE Arca calculates and disseminates throughout the core trading session on each trading day an updated indicative fund value. The indicative fund value is calculated by using the prior day's closing per unit NAV of USHO as a base and updating that value throughout the trading day to reflect changes in the most recently reported trade price for the active Futures Contracts on the NYMEX. The prices reported for those Futures Contract months are adjusted based on the prior day's spread differential between settlement values for the relevant contract and the spot month contract. In the event that the spot month contract is also the Benchmark Futures Contract, the last sale price for that contract is not adjusted. The indicative fund value unit basis disseminated during NYSE Arca core trading session hours should not be viewed as an actual real time update of the per unit NAV, because the per unit NAV is calculated only once at the end of each trading day based upon the relevant end of day values of USHO's investments.

Table of Contents

The indicative fund value is disseminated on a per unit basis every 15 seconds during regular NYSE Arca core trading session hours of 9:30 a.m. New York time to 4:00 p.m. New York time. The normal trading hours of the NYMEX are 10:00 a.m. New York time to 2:30 p.m. New York time. This means that there is a gap in time at the beginning and the end of each day during which USHO's units are traded on the NYSE Arca, but real-time NYMEX trading prices for Futures Contracts traded on the NYMEX are not available. As a result, during those gaps there will be no update to the indicative fund value.

The NYSE Arca disseminates the indicative fund value through the facilities of CTA/CQ High Speed Lines. In addition, the indicative fund value is published on the NYSE Arca's website and is available through on-line information services such as Bloomberg and Reuters.

Dissemination of the indicative fund value provides additional information that is not otherwise available to the public and is useful to investors and market professionals in connection with the trading of USHO's units on the NYSE Arca. Investors and market professionals are able throughout the trading day to compare the market price of USHO and the indicative fund value. If the market price of USHO's units diverges significantly from the indicative fund value, market professionals will have an incentive to execute arbitrage trades. For example, if USHO appears to be trading at a discount compared to the indicative fund value, a market professional could buy USHO's units on the NYSE Arca and sell short Futures Contracts. Such arbitrage trades can tighten the tracking between the market price of USHO and the indicative fund value and thus can be beneficial to all market participants.

In addition, other Futures Contracts, Other Heating Oil-Related Investments and Treasuries held by USHO are valued by the Administrator, using rates and points received from client-approved third party vendors (such as Reuters and WM Company) and advisor quotes. These investments are not included in the indicative value. The indicative fund value is based on the prior day's per unit NAV and moves up and down solely according to changes in the price of the Benchmark Futures Contract.

Creation and Redemption of Units

USHO creates and redeems units from time to time, but only in one or more Creation Baskets or Redemption Baskets. The creation and redemption of baskets are only made in exchange for delivery to USHO or the distribution by USHO of the amount of Treasuries and any cash represented by the baskets being created or redeemed, the amount of which is based on the combined NAV of the number of units included in the baskets being created or redeemed determined after 4:00 p.m. New York time on the day the order to create or redeem baskets is properly received.

Authorized Purchasers are the only persons that may place orders to create and redeem baskets. Authorized Purchasers must be (1) registered broker-dealers or other securities market participants, such as banks and other financial institutions, that are not required to register as broker-dealers to engage in securities transactions as described below, and (2) DTC Participants. To become an Authorized Purchaser, a person must enter into an Authorized Purchaser Agreement with USCF on behalf of USHO. The Authorized Purchaser Agreement provides the procedures for the creation and redemption of baskets and for the delivery of the Treasuries and any cash required for such creations and redemptions. The Authorized Purchaser Agreement and the related procedures attached thereto may be amended by USHO, without the consent of any limited partner or unitholder or Authorized Purchaser. From July 1, 2011 through December 31, 2011 (and continuing at least through May 1, 2012), the applicable transaction fee paid by Authorized Purchasers is \$350 to USHO for each order they place to create or redeem one or more baskets; prior to July 1, 2011, this fee was \$1,000. Authorized Purchasers who make deposits with USHO in exchange for baskets receive no fees, commissions or other form of compensation or inducement of any kind from either USHO or USCF, and no such person will have any obligation or responsibility to USCF or USHO to effect any sale or resale of units. As of December 31, 2011, 12 Authorized Purchasers had entered into agreements with USCF on behalf of USHO. During the year ended December 31, 2011, USHO issued 1 Creation Basket and redeemed 2 Redemption Baskets.

Certain Authorized Purchasers are expected to be capable of participating directly in the physical heating oil market and the heating oil futures market. In some cases, Authorized Purchasers or their affiliates may from time to time buy heating oil or sell heating oil or Heating Oil Interests and may profit in these instances. USCF believes that the size and operation of the heating oil market make it unlikely that an Authorized Purchaser's direct activities in the heating oil or securities markets will significantly affect the price of heating oil, Heating Oil Interests, or the price of the units.

Table of Contents

Each Authorized Purchaser is required to be registered as a broker-dealer under the Exchange Act and is a member in good standing with FINRA, or exempt from being or otherwise not required to be registered as a broker-dealer or a member of FINRA, and qualified to act as a broker or dealer in the states or other jurisdictions where the nature of its business so requires. Certain Authorized Purchasers may also be regulated under federal and state banking laws and regulations. Each Authorized Purchaser has its own set of rules and procedures, internal controls and information barriers as it determines is appropriate in light of its own regulatory regime.

Under the Authorized Purchaser Agreement, USCF has agreed to indemnify the Authorized Purchasers against certain liabilities, including liabilities under the Securities Act of 1933, as amended (the Securities Act), and to contribute to the payments the Authorized Purchasers may be required to make in respect of those liabilities.

The following description of the procedures for the creation and redemption of baskets is only a summary and an investor should refer to the relevant provisions of the LP Agreement and the form of Authorized Purchaser Agreement for more detail, each of which is incorporated by reference into this annual report on Form 10-K.

Creation Procedures

On any business day, an Authorized Purchaser may place an order with the Marketing Agent to create one or more baskets. For purposes of processing purchase and redemption orders, a business day means any day other than a day when any of the NYSE Arca, the NYMEX or the NYSE is closed for regular trading. Purchase orders must be placed by 12:00 p.m. New York time or the close of regular trading on the NYSE Arca, whichever is earlier. The day on which the Marketing Agent receives a valid purchase order is referred to as the purchase order date.

By placing a purchase order, an Authorized Purchaser agrees to deposit Treasuries, cash, or a combination of Treasuries and cash, as described below. Prior to the delivery of baskets for a purchase order, the Authorized Purchaser must also have wired to the Custodian the non-refundable transaction fee due for the purchase order. Authorized Purchasers may not withdraw a creation request.

The manner by which creations are made is dictated by the terms of the Authorized Purchaser Agreement. By placing a purchase order, an Authorized Purchaser agrees to: (1) deposit Treasuries, cash, or a combination of Treasuries and cash with the Custodian, and (2) if required by USCF in its sole discretion, enter into or arrange for a block trade, an exchange for physical or exchange for swap, or any other over-the-counter energy transaction (through itself or a designated acceptable broker) with USHO for the purchase of a number and type of futures contracts at the closing settlement price for such contracts on the purchase order date. If an Authorized Purchaser fails to consummate (1) and (2), the order shall be cancelled. The number and type of contracts specified shall be determined by USCF, in its sole discretion, to meet USHO's investment objective and shall be purchased as a result of the Authorized Purchaser's purchase of units.

Determination of Required Deposits

The total deposit required to create each basket (Creation Basket Deposit) is the amount of Treasuries and/or cash that is in the same proportion to the total assets of USHO (net of estimated accrued but unpaid fees, expenses and other liabilities) on the purchase order date as the number of units to be created under the purchase order is in proportion to the total number of units outstanding on the purchase order dates. USCF determines, directly in its sole discretion or in consultation with the Administrator, the requirements for Treasuries and the amount of cash, including the maximum permitted remaining maturity of a Treasury and proportions of Treasury and cash that may be included in deposits to create baskets. The Marketing Agent will publish such requirements at the beginning of each business day. The amount of cash deposit required is the difference between the aggregate market value of the Treasuries required to be included in a Creation Basket Deposit as of 4:00 p.m. New York time on the date the order to purchase is properly received and the total required deposit.

Table of Contents

Delivery of Required Deposits

An Authorized Purchaser who places a purchase order is responsible for transferring to USHO's account with the Custodian the required amount of Treasuries and cash by the end of the third business day following the purchase order date. Upon receipt of the deposit amount, the Administrator directs DTC to credit the number of baskets ordered to the Authorized Purchaser's DTC account on the third business day following the purchase order date. The expense and risk of delivery and ownership of Treasuries until such Treasuries have been received by the Custodian on behalf of USHO shall be borne solely by the Authorized Purchaser.

Because orders to purchase baskets must be placed by 12:00 p.m., New York time, but the total payment required to create a basket during the continuous offering period will not be determined until after 4:00 p.m. New York time on the date the purchase order is received, Authorized Purchasers will not know the total amount of the payment required to create a basket at the time they submit an irrevocable purchase order for the basket. USHO's per unit NAV and the total amount of the payment required to create a basket could rise or fall substantially between the time an irrevocable purchase order is submitted and the time the amount of the purchase price in respect thereof is determined.

Rejection of Purchase Orders

USCF acting by itself or through the Marketing Agent shall have the absolute right but no obligation to reject a purchase order or a Creation Basket Deposit if:

it determines that the investment alternative available to USHO at that time will not enable it to meet its investment objective;

it determines that the purchase order or the Creation Basket Deposit is not in proper form;

it believes that the purchase order or the Creation Basket Deposit would have adverse tax consequences to USHO, the limited partners or its unitholders;

the acceptance or receipt of the Creation Basket Deposit would, in the opinion of counsel to USCF, be unlawful; or

circumstances outside the control of USCF, Marketing Agent or Custodian make it, for all practical purposes, not feasible to process creations of baskets.

None of USCF, the Marketing Agent or the Custodian will be liable for the rejection of any purchase order or Creation Basket Deposit.

Redemption Procedures

The procedures by which an Authorized Purchaser can redeem one or more baskets mirror the procedures for the creation of baskets. On any business day, an Authorized Purchaser may place an order with the Marketing Agent to redeem one or more baskets. Redemption orders must be placed by 12:00 p.m. New York time or the close of regular trading on the NYSE Arca, whichever is earlier. A redemption order so received will be effective on the date it is received in satisfactory form by the Marketing Agent. The redemption procedures allow Authorized Purchasers to redeem baskets and do not entitle an individual unitholder to redeem any units in an amount less than a Redemption Basket, or to redeem baskets other than through an Authorized Purchaser.

By placing a redemption order, an Authorized Purchaser agrees to deliver the baskets to be redeemed through DTC's book-entry system to USHO, as described below. Prior to the delivery of the redemption distribution for a redemption order, the Authorized Purchaser must also have wired to USHO's account at the Custodian the non-refundable transaction fee due for the redemption order. An Authorized Purchaser may not withdraw a redemption order.

The manner by which redemptions are made is dictated by the terms of the Authorized Purchaser Agreement. By placing a redemption order, an Authorized Purchaser agrees to (1) deliver the Redemption Basket to be redeemed through DTC's book-entry system to USHO's account with the

Edgar Filing: United States Heating Oil Fund, LP - Form 10-K

Custodian not later than 3:00 p.m. New York time on the third business day following the effective date of the redemption order (Redemption Distribution Date), and (2) if required by USCF in its sole discretion, enter into or arrange for a block trade, an exchange for physical or exchange for swap, or any other over-the-counter energy transaction (through itself or a designated acceptable broker) with USHO for the sale of a number and type of futures contracts at the closing settlement price for such contracts on the Redemption Order Date. If an Authorized Purchaser fails to consummate (1) and (2) above, the order shall be cancelled. The number and type of contracts specified shall be determined by USCF, in its sole discretion, to meet USHO's investment objective and shall be sold as a result of the Authorized Purchaser's sale of units.

Table of Contents

Determination of Redemption Distribution

The redemption distribution from USHO consists of a transfer to the redeeming Authorized Purchaser of an amount of Treasuries and/or cash that is in the same proportion to the total assets of USHO (net of estimated accrued but unpaid fees, expenses and other liabilities) on the date the order to redeem is properly received as the number of units to be redeemed under the redemption order is in proportion to the total number of units outstanding on the date the order is received. USCF, directly or in consultation with the Administrator, determines the requirements for Treasuries and the amounts of cash, including the maximum permitted remaining maturity of a Treasury, and the proportions of Treasuries and cash that may be included in distributions to redeem baskets. The Marketing Agent will publish an estimate of the redemption distribution per basket as of the beginning of each business day.

Delivery of Redemption Distribution

The redemption distribution due from USHO will be delivered to the Authorized Purchaser by 3:00 p.m. New York time on the third business day following the redemption order date if, by 3:00 p.m. New York time on such third business day, USHO's DTC account has been credited with the baskets to be redeemed. If USHO's DTC account has not been credited with all of the baskets to be redeemed by such time, the redemption distribution will be delivered to the extent of whole baskets received. Any remainder of the redemption distribution will be delivered on the next business day to the extent of remaining whole baskets received if USHO receives the fee applicable to the extension of the redemption distribution date which USCF may, from time to time, determine and the remaining baskets to be redeemed are credited to USHO's DTC account by 3:00 p.m. New York time on such next business day. Any further outstanding amount of the redemption order shall be cancelled. Pursuant to information from USCF, the Custodian will also be authorized to deliver the redemption distribution notwithstanding that the baskets to be redeemed are not credited to USHO's DTC account by 3:00 p.m. New York time on the third business day following the redemption order date if the Authorized Purchaser has collateralized its obligation to deliver the baskets through DTC's book entry-system on such terms as USCF may from time to time determine.

Suspension or Rejection of Redemption Orders

USCF may, in its discretion, suspend the right of redemption, or postpone the redemption settlement date: (1) for any period during which the NYSE Arca or the NYMEX is closed other than customary weekend or holiday closings, or trading on the NYSE Arca or the NYMEX is suspended or restricted, (2) for any period during which an emergency exists as a result of which delivery, disposal or evaluation of Treasuries is not reasonably practicable, or (3) for such other period as USCF determines to be necessary for the protection of the limited partners or unitholders. For example, USCF may determine that it is necessary to suspend redemptions to allow for the orderly liquidation of USHO's assets at an appropriate value to fund a redemption. If USCF has difficulty liquidating its positions, *e.g.*, because of a market disruption event in the futures markets, a suspension of trading by the exchange where the futures contracts are listed or an unanticipated delay in the liquidation of a position in an over-the-counter contract, it may be appropriate to suspend redemptions until such time as such circumstances are rectified. None of USCF, the Marketing Agent, the Administrator, or the Custodian will be liable to any person or in any way for any loss or damages that may result from any such suspension or postponement.

Redemption orders must be made in whole baskets. USCF will reject a redemption order if the order is not in proper form as described in the Authorized Purchaser Agreement or if the fulfillment of the order, in the opinion of its counsel, might be unlawful. USCF may also reject a redemption order if the number of units being redeemed would reduce the remaining outstanding units to 100,000 units (*i.e.*, two baskets) or less.

Table of Contents

Creation and Redemption Transaction Fee

To compensate USHO for its expenses in connection with the creation and redemption of baskets, an Authorized Purchaser is required to pay a transaction fee to USHO per order to create or redeem baskets, regardless of the number of baskets in such order. From July 1, 2011 through December 31, 2011 (and continuing at least through May 1, 2012), the applicable transaction fee paid by Authorized Purchasers is \$350 to USHO for each order they place to create or redeem one or more baskets; prior to July 1, 2011, this fee was \$1,000. The transaction fee may be reduced, increased or otherwise changed by USCF. USCF shall notify DTC of any change in the transaction fee and will not implement any increase in the fee for the redemption of baskets until 30 days after the date of the notice.

Tax Responsibility

Authorized Purchasers are responsible for any transfer tax, sales or use tax, stamp tax, recording tax, value added tax or similar tax or governmental charge applicable to the creation or redemption of baskets, regardless of whether or not such tax or charge is imposed directly on the Authorized Purchaser, and agree to indemnify USCF and USHO if they are required by law to pay any such tax, together with any applicable penalties, additions to tax and interest thereon.

Secondary Market Transactions

As noted, USHO creates and redeems units from time to time, but only in one or more Creation Baskets or Redemption Baskets. The creation and redemption of baskets are only made in exchange for delivery to USHO or the distribution by USHO of the amount of Treasuries and cash represented by the baskets being created or redeemed, the amount of which will be based on the aggregate NAV of the number of units included in the baskets being created or redeemed determined on the day the order to create or redeem baskets is properly received.

As discussed above, Authorized Purchasers are the only persons that may place orders to create and redeem baskets. Authorized Purchasers must be registered broker-dealers or other securities market participants, such as banks and other financial institutions that are not required to register as broker-dealers to engage in securities transactions. An Authorized Purchaser is under no obligation to create or redeem baskets, and an Authorized Purchaser is under no obligation to offer to the public units of any baskets it does create. Authorized Purchasers that do offer to the public units from the baskets they create will do so at per-unit offering prices that are expected to reflect, among other factors, the trading price of the units on the NYSE Arca, the NAV of USHO at the time the Authorized Purchaser purchased the Creation Baskets and the per unit NAV of the units at the time of the offer of the units to the public, the supply of and demand for units at the time of sale, and the liquidity of the Futures Contract market and the market for Other Heating Oil-Related Investments. The prices of units offered by Authorized Purchasers are expected to fall between USHO's per unit NAV and the trading price of the units on the NYSE Arca at the time of sale. Units initially comprising the same basket but offered by Authorized Purchasers to the public at different times may have different offering prices. An order for one or more baskets may be placed by an Authorized Purchaser on behalf of multiple clients. Authorized Purchasers who make deposits with USHO in exchange for baskets receive no fees, commissions or other form of compensation or inducement of any kind from either USHO or USCF, and no such person has any obligation or responsibility to USCF or USHO to effect any sale or resale of units. Units trade in the secondary market on the NYSE Arca. Units may trade in the secondary market at prices that are lower or higher relative to their per unit NAV. The amount of the discount or premium in the trading price relative to the per unit NAV may be influenced by various factors, including the number of investors who seek to purchase or sell units in the secondary market and the liquidity of the Futures Contracts market and the market for Other Heating Oil-Related Investments. While the units trade during the core trading session on the NYSE Arca until 4:00 p.m. New York time, liquidity in the market for Futures Contracts and Other Heating Oil-Related Investments may be reduced after the close of the NYMEX at 2:30 p.m. New York time. As a result, during this time, trading spreads, and the resulting premium or discount, on the units may widen.

Table of Contents

Investments

USCF causes USHO to transfer the proceeds from the sale of Creation Baskets to the Custodian or other custodian for trading activities. USCF will invest USHO's assets in Futures Contracts and Other Heating Oil-Related Investments and investments in Treasuries, cash and/or cash equivalents. When USHO purchases a Futures Contract and certain exchange-traded Other Heating Oil-Related Investments, USHO is required to deposit 5% to 30% with the selling futures commission merchant on behalf of the exchange a portion of the value of the contract or other interest as security to ensure payment for the obligation under Heating Oil Interests at maturity. This deposit is known as initial margin. Counterparties in transactions in over-the-counter Heating Oil Interests will generally impose similar collateral requirements on USHO. USCF will invest the assets that remain after margin and collateral are posted in Treasuries, cash and/or cash equivalents subject to these margin and collateral requirements. USCF has sole authority to determine the percentage of assets that are:

held on deposit with the futures commission merchant or other custodian

used for other investments, and

held in bank accounts to pay current obligations and as reserves.

Ongoing margin and collateral payments will generally be required for both exchange-traded and over-the-counter Heating Oil Interests based on changes in the value of the Heating Oil Interests. Furthermore, ongoing collateral requirements with respect to over-the-counter Heating Oil Interests are negotiated by the parties, and may be affected by overall market volatility, volatility of the underlying commodity or index, the ability of the counterparty to hedge its exposure under a Heating Oil Interest, and each party's creditworthiness. In light of the differing requirements for initial payments under exchange-traded and over-the-counter Heating Oil Interests and the fluctuating nature of ongoing margin and collateral payments, it is not possible to estimate what portion of USHO's assets will be posted as margin or collateral at any given time. The Treasuries, cash and cash equivalents held by USHO will constitute reserves that will be available to meet ongoing margin and collateral requirements. All interest income will be used for USHO's benefit.

A futures commission merchant, counterparty, government agency or commodity exchange could increase margin or collateral requirements applicable to USHO to hold trading positions at any time. Moreover, margin is merely a security deposit and has no bearing on the profit or loss potential for any positions held.

The assets of USHO posted as margin for Futures Contracts are held in segregated accounts pursuant to the Commodity Exchange Act and CFTC regulations.

The Commodity Interest Markets

General

The CEA governs the regulation of commodity interest transactions, markets and intermediaries. The CEA provides for varying degrees of regulation of commodity interest transactions depending upon: (1) the type of instrument being traded (*e.g.*, contracts for future delivery, options, swaps or spot contracts), (2) the type of commodity underlying the instrument (distinctions are made between instruments based on agricultural commodities, energy and metals commodities and financial commodities), (3) the nature of the parties to the transaction (retail, eligible contract participant, or eligible commercial entity), (4) whether the transaction is entered into on a principal-to-principal or intermediated basis, (5) the type of market on which the transaction occurs, and (6) whether the transaction is subject to clearing through a clearing organization.

The offer and sale of units of USHO, as well as units of each of the Related Public Funds, is registered under the Securities Act. USHO and the Related Public Funds are subject to the requirements of the Securities Act, the Exchange Act and the rules and regulations adopted thereunder as administered by the Securities and Exchange Commission (the "SEC"). Firms' participation in the distribution of units are regulated as described above, as well as by the self regulatory association, FINRA.

Futures Contracts

Edgar Filing: United States Heating Oil Fund, LP - Form 10-K

A futures contract is a standardized contract traded on, or subject to the rules of, an exchange that calls for the future delivery of a specified quantity and type of a commodity at a specified time and place. Futures contracts are traded on a wide variety of commodities, including agricultural products, bonds, stock indices, interest rates, currencies, energy and metals. The size and terms of futures contracts on a particular commodity are identical and are not subject to any negotiation, other than with respect to price and the number of contracts traded between the buyer and seller.

Table of Contents

The contractual obligations of a buyer or seller may generally be satisfied by taking or making physical delivery of the underlying commodity or by making an offsetting sale or purchase of an identical futures contract on the same or linked exchange before the designated date of delivery. The difference between the price at which the futures contract is purchased or sold and the price paid for the offsetting sale or purchase, after allowance for brokerage commissions, constitutes the profit or loss to the trader. Some futures contracts, such as stock index contracts, settle in cash (reflecting the difference between the contract purchase/sale price and the contract settlement price) rather than by delivery of the underlying commodity.

In market terminology, a trader who purchases a futures contract is long in the market and a trader who sells a futures contract is short in the market. Before a trader closes out his long or short position by an offsetting sale or purchase, his outstanding contracts are known as open trades or open positions. The aggregate amount of open positions held by traders in a particular contract is referred to as the open interest in such contract.

Forward Contracts

A forward contract is a contractual obligation to purchase or sell a specified quantity of a commodity at or before a specified date in the future at a specified price and, therefore, is economically similar to a futures contract. Unlike futures contracts, however, forward contracts are typically traded in the over-the-counter markets and are not standardized contracts. Forward contracts for a given commodity are generally available for various amounts and maturities and are subject to individual negotiation between the parties involved. Moreover, generally there is no direct means of offsetting or closing out a forward contract by taking an offsetting position as one would a futures contract on a U.S. exchange. If a trader desires to close out a forward contract position, he generally will establish an opposite position in the contract but will settle and recognize the profit or loss on both positions simultaneously on the delivery date. Thus, unlike in the futures contract market where a trader who has offset positions will recognize profit or loss immediately, in the forward market a trader with a position that has been offset at a profit will generally not receive such profit until the delivery date, and likewise a trader with a position that has been offset at a loss will generally not have to pay money until the delivery date. In recent years, however, the terms of forward contracts have become more standardized, and in some instances such contracts now provide a right of offset or cash settlement as an alternative to making or taking delivery of the underlying commodity.

To date, the forward markets have been largely unregulated, forward contracts have been executed bilaterally and, in general, forward contracts have not been cleared or guaranteed by a third party. While recently adopted laws and regulations may require certain forward contracts to be cleared through regulated clearing organizations, absent such clearing organizations, USHO's trading in forward contracts will be exposed to the creditworthiness of the counterparties on the other side of the trade.

Options on Futures Contracts

Options on futures contracts are standardized contracts traded on an exchange. An option on a futures contract gives the buyer of the option the right, but not the obligation, to take a position at a specified price (the striking, strike, or exercise price) in the underlying futures contract or underlying interest. The buyer of a call option acquires the right, but not the obligation, to purchase or take a long position in the underlying interest, and the buyer of a put option acquires the right, but not the obligation, to sell or take a short position in the underlying interest.

The seller, or writer, of an option is obligated to take a position in the underlying interest at a specified price opposite to the option buyer if the option is exercised. The seller of a call option must stand ready to take a short position in the underlying interest at the strike price if the buyer should exercise the option. The seller of a put option, on the other hand, must stand ready to take a long position in the underlying interest at the strike price.

A call option is said to be in-the-money if the strike price is below current market levels and out-of-the-money if the strike price is above current market levels. Conversely, a put option is said to be in-the-money if the strike price is above the current market levels and out-of-the-money if the strike price is below current market levels.

Table of Contents

Options have limited life spans, usually tied to the delivery or settlement date of the underlying interest. Some options, however, expire significantly in advance of such date. The purchase price of an option is referred to as its premium, which consists of its intrinsic value (which is related to the underlying market value) plus its time value. As an option nears its expiration date, the time value shrinks and the market and intrinsic values move into parity. An option that is out-of-the-money and not offset by the time it expires becomes worthless. On certain exchanges, in-the-money options are automatically exercised on their expiration date, but on others unexercised options simply become worthless after their expiration date.

Regardless of how much the market swings, the most an option buyer can lose is the option premium. The option buyer deposits his premium with his broker, and the money goes to the option seller. Option sellers, on the other hand, face risks similar to participants in the futures markets. For example, since the seller of a call option is assigned a short futures position if the option is exercised, his risk is the same as someone who initially sold a futures contract. Because no one can predict exactly how the market will move, the option seller posts margin to demonstrate his ability to meet any potential contractual obligations.

Options on Forward Contracts or Commodities

Options on forward contracts or commodities operate in a manner similar to options on futures contracts. An option on a forward contract or commodity gives the buyer of the option the right, but not the obligation, to take a position at a specified price in the underlying forward contract or commodity. However, unlike options on futures contracts, options on forward contracts or on commodities are individually negotiated contracts between counterparties and are typically traded in the over-the-counter market. Therefore, options on forward contracts and physical commodities possess many of the same characteristics of forward contracts with respect to offsetting positions and credit risk that are described above.

Swap Contracts

Swap transactions generally involve contracts between two parties to exchange a stream of payments computed by reference to a notional amount and the price of the asset that is the subject of the swap. Swap contracts are principally traded off-exchange, although certain swap contracts are also being traded in electronic trading facilities and cleared through clearing organizations.

Swaps are usually entered into on a net basis, that is, the two payment streams are netted out in a cash settlement on the payment date or dates specified in the agreement, with the parties receiving or paying, as the case may be, only the net amount of the two payments. Swaps do not generally involve the delivery of underlying assets or principal. Accordingly, the risk of loss with respect to swaps is generally limited to the net amount of payments that the party is contractually obligated to make. In some swap transactions one or both parties may require collateral deposits from the counterparty to support that counterparty's obligation under the swap agreement. If the counterparty to such a swap defaults, the risk of loss consists of the net amount of payments that the party is contractually entitled to receive less any collateral deposits it is holding.

Some swap transactions are cleared through central counterparties. These transactions, known as cleared swaps, involve two counterparties first agreeing to the terms of a swap transaction, then submitting the transaction to a clearing house that acts as the central counterparty. Once accepted by the clearing house, the original swap transaction is novated and the central counterparty becomes the counterparty to a trade with each of the original parties based upon the trade terms determined in the original transaction. In this manner each individual swap counterparty reduces its risk of loss due to counterparty nonperformance because the clearing house acts as the counterparty to each transaction.

Regulation

Futures exchanges in the United States are subject to varying degrees of regulation under the CEA depending on whether such exchange is a designated contract market, exempt board of trade or electronic trading facility. Clearing organizations are also subject to the CEA and the rules and regulations adopted thereunder and administered by the CFTC. The CFTC is the governmental agency charged with responsibility for regulation of futures exchanges and commodity interest trading conducted on those exchanges. The CFTC's function is to implement the CEA's objectives of preventing price manipulation and excessive speculation and promoting orderly and efficient commodity interest markets. In addition, the various exchanges and clearing organizations themselves exercise regulatory and supervisory authority over their member firms.

Table of Contents

The CFTC also regulates the activities of commodity trading advisors and commodity pool operators and the CFTC has adopted regulations with respect to certain of such persons' activities. Pursuant to its authority, the CFTC requires a CPO, such as USCF, to keep accurate, current and orderly records with respect to each pool it operates. The CFTC may suspend, modify or terminate the registration of any registrant for failure to comply with CFTC rules or regulations. Suspension, restriction or termination of USCF's registration as a CPO would prevent it, until such time (if any) as such registration were to be reinstated, from managing, and might result in the termination of, USHO or the Related Public Funds.

The CEA also gives the states certain powers to enforce its provisions and the regulations of the CFTC.

Under certain circumstances, the CEA grants unitholders the right to institute a reparations proceeding before the CFTC against USCF (as a registered commodity pool operator), as well as those of their respective employees who are required to be registered under the CEA. Unitholders may also be able to maintain a private right of action for certain violations of the CEA.

Pursuant to authority in the CEA, the NFA has been formed and registered with the CFTC as a registered futures association. The NFA is the only self regulatory association for commodities professionals other than the exchanges. As such, the NFA promulgates rules governing the conduct of commodity professionals and disciplines those professionals that do not comply with such standards. The CFTC has delegated to the NFA responsibility for the registration of commodity pool operation. USCF is a member of the NFA. As a member of the NFA, USCF is subject to NFA standards relating to fair trade practices, financial condition, and consumer protection. The CFTC is prohibited by statute from regulating trading on foreign commodity exchanges and markets.

The CEA requires all futures commission merchants, such as USHO's clearing brokers, to meet and maintain specified fitness and financial requirements, to segregate customer funds from proprietary funds and account separately for all customers' funds and positions, and to maintain specified books and records open to inspection by the staff of the CFTC. The CFTC has similar authority over introducing brokers, or persons who solicit or accept orders for commodity interest trades but who do not accept margin deposits for the execution of trades. The CEA authorizes the CFTC to regulate trading by futures commission merchants and by their officers and directors, permits the CFTC to require action by exchanges in the event of market emergencies, and establishes an administrative procedure under which customers may institute complaints for damages arising from alleged violations of the CEA. The CEA also gives the states powers to enforce its provisions and the regulations of the CFTC.

The regulations of the CFTC and the NFA prohibit any representation by a person registered with the CFTC or by any member of the NFA, that registration with the CFTC, or membership in the NFA, in any respect indicates that the CFTC or the NFA, as the case may be, has approved or endorsed that person or that person's trading program or objectives. The registrations and memberships of the parties described in this summary must not be considered as constituting any such approval or endorsement. Likewise, no futures exchange has given or will give any similar approval or endorsement.

The regulation of commodity interest trading in the United States and other countries is an evolving area of the law. The various statements made in this summary are subject to modification by legislative action and changes in the rules and regulations of the CFTC, the NFA, the futures exchanges, clearing organizations and other regulatory bodies.

On July 21, 2010, a broad financial regulatory reform bill, the Dodd-Frank Act, was signed into law. All of the Dodd-Frank Act's provisions became effective on July 16, 2011, but the actual implementation of some of the provisions is subject to continuing uncertainty because implementing rules and regulations have not been completely finalized and have been challenged in court. Pending final resolution of all applicable regulatory requirements, some specific examples of how the new Dodd-Frank Act provisions and rules adopted thereunder could impact USHO are discussed below.

Table of Contents

Futures Contracts and Position Limits

Provisions in the Dodd-Frank Act include the requirement that position limits be established on a wide range of commodity interests including energy-based and other commodity futures contracts, certain cleared commodity swaps and certain over-the-counter commodity contracts; new registration, recordkeeping, capital and margin requirements for swap dealers and major swap participants as determined by the new law and applicable regulations; and the forced use of clearinghouse mechanisms for most swap transactions that are currently entered into in the over-the-counter market. The new law and the rules thereunder may negatively impact USHO's ability to meet its investment objective either through limits or requirements imposed on it or upon its counterparties. Further, increased regulation of, and the imposition of additional costs on, swap transactions under the new legislation and implementing regulations could cause a reduction in the swap market and the overall derivatives markets, which could restrict liquidity and adversely affect USHO. In particular, new position limits imposed on USHO or its counterparties may impact USHO's ability to invest in a manner that most efficiently meets its investment objective, and new requirements, including capital and mandatory clearing, may increase the cost of USHO's investments and doing business, which could adversely impact the ability of USHO to achieve its investment objective.

On October 18, 2011, the CFTC adopted regulations implementing position limits and limit formulas for 28 core physical commodity futures contracts, including the Futures Contracts and options on Futures Contracts executed pursuant to the rules of designated contract markets (*i.e.*, certain regulated exchanges) and commodity swaps that are economically equivalent to such futures and options contracts (collectively, Referenced Contracts). The new regulations require, among other things, aggregation of position limits that would apply across different trading venues to contracts based on the same underlying commodity. However, the regulations do not appear to require aggregation of Referenced Contracts held by separate Related Public Funds.

Although the regulations are effective on January 17, 2012, the position limit rules will be implemented in two phases: spot-month position limits and non-spot-month position limits. Spot-month limits will be effective sixty days after the term swap is defined under the Dodd-Frank Act (see below). The limits adopted will be based on the spot-month position limit levels currently in place at applicable futures exchanges (or designated contract market or DCM). Thereafter, the spot-month limits will be adjusted annually for energy contracts. These subsequent limits will be based on the CFTC's determination of deliverable supply in consultation with the futures exchanges. Spot-month position limit levels will be set generally at 25% of estimated deliverable supply, and limits will be applied separately for physical-delivery and cash-settled contracts in the same commodity.

Non-spot-month position limits will go into effect by CFTC order after the CFTC has received one year of open interest data on physical commodity cleared and uncleared swaps under the swaps large trader reporting rule. The non-spot month limits will be adjusted biennially based on Referenced Contract open interest. Non-spot-month position limits (*i.e.*, limits applied to positions in all contract months combined or in a single contract month) will be set using the 10/2.5 percent formula: 10 percent of the contract's first 25,000 of open interest and 2.5 percent thereafter. These limits will be reset biennially based on two years of open interest data.

On December 2, 2011, the Securities Industry and Financial Markets Association (SIFMA) and the International Swaps and Derivatives Association (ISDA) filed a lawsuit challenging the CFTC's position limits rule. The lawsuit asserts that the position limits rule inadequately fulfills the required cost-benefit analysis. It is not known at this time what effect this lawsuit will have on the implementation of the new position limits rule.

Based on its current understanding of the final position limit regulations, USCF does not anticipate significant negative impact on the ability of USHO to achieve its investment objective. However, as of the filing of this annual report on Form 10-K, additional studies are required to be conducted before all requirements of the final rules are implemented, and therefore, it cannot be determined with certainty what impact such regulations will have on USHO.

Swap Transactions

The Dodd-Frank Act imposes new regulatory requirements on certain swap transactions that USHO is authorized to engage in that may ultimately impact the ability of USHO to meet its investment objective. On April 27, 2011, the CFTC and the SEC proposed joint rules defining the term swap and thus providing more clarity regarding which transactions will be regulated as such under the Dodd-Frank Act. However, the CFTC and SEC have not implemented final regulations on this issue and it is therefore still uncertain which types of transactions will be ultimately regulated as swaps. The proposed rule defining swap and security-based swap has not been finalized as of the filing of this annual report on Form 10-K.

Table of Contents

The Dodd-Frank Act requires that certain transactions ultimately falling within the definition of “swap” be executed on organized exchanges or swap execution facilities and cleared through regulated clearing organizations (which are referred to in the Dodd-Frank Act as “derivative clearing organizations”). However, as described above, it is currently unknown which swaps will be subject to such trading and clearing requirements. If a swap is required to be cleared, the initial margin will be set by the clearing organization, subject to certain regulatory requirements and guidelines. Initial and variation margin requirements for swap dealers and major swap participants who enter into uncleared swaps and capital requirements for swap dealers and major swap participants who enter into both cleared and uncleared trades will be set by the CFTC, the SEC or the applicable Prudential Regulator. On July 25, 2011, the CFTC adopted final regulations to determine which entities will be regulated as swap dealers and major swap participants and thus have to comply with these capital and margin requirements (as well as a multitude of other requirements under the Dodd-Frank Act). In general, increased regulation of, and the imposition of additional costs on, swap transactions could have an adverse effect on USHO by, for example, reducing the size of and therefore liquidity in the derivatives market, increasing transaction costs and decreasing the ability to customize derivative transactions. The final rule regarding review of swaps for mandatory clearing went effective September 26, 2011.

On July 14, 2011, the CFTC issued an order providing temporary relief from certain swaps-related provisions of Title VII that would have automatically taken effect on July 16, 2011. The final order granted temporary exemptive relief that, by its terms, expires upon the earlier of the effective date of the required final rulemaking or December 31, 2011. On October 18, 2011, the CFTC issued an order, which modifies the July 14, 2011 order by extending the temporary exemptive relief to the earlier of the effective date of the required final rulemaking or July 16, 2012.

On January 11, 2012, the CFTC adopted a rule requiring futures commission merchants and derivative clearing organizations to segregate customer collateral supporting cleared swaps. This rule is scheduled to become effective on November 8, 2012. USHO does not anticipate any impact to its operations in order to meet the requirements of the new rule.

Commodity Margin

Original or initial margin is the minimum amount of funds that must be deposited by a commodity interest trader with the trader’s broker to initiate and maintain an open position in futures contracts. Maintenance margin is the amount (generally less than the original margin) to which a trader’s account may decline before he must deliver additional margin. A margin deposit is like a cash performance bond. It helps assure the trader’s performance of the futures contracts that he or she purchases or sells. Futures contracts are customarily bought and sold on initial margin that represents a very small percentage (ranging upward from 5%) of the aggregate purchase or sales price of the contract. Because of such low margin requirements, price fluctuations occurring in the futures markets may create profits and losses that, in relation to the amount invested, are greater than are customary in other forms of investment or speculation. As discussed below, adverse price changes in the futures contract may result in margin requirements that greatly exceed the initial margin. In addition, the amount of margin required in connection with a particular futures contract is set from time to time by the exchange on which the contract is traded and may be modified from time to time by the exchange during the term of the contract.

Brokerage firms, such as USHO’s clearing brokers, carrying accounts for traders in commodity interest contracts may not accept lower, and generally require higher, amounts of margin as a matter of policy to further protect themselves. The clearing brokers require USHO to make margin deposits equal to exchange minimum levels for all commodity interest contracts. This requirement may be altered from time to time in the clearing brokers’ discretion.

Trading in the over-the-counter markets where no clearing facility is provided generally does not require margin but generally does require the extension of credit between counterparties. This extension of credit is generally secured by transfers of collateral and/or independent amounts. Collateral is transferred between counterparties during the term of an over-the-counter transaction based upon the changing value of the transaction, while independent amounts are fixed amounts posted by one or both counterparties at the start of an over-the-counter transaction.

When a trader purchases an option, there is no margin requirement; however, the option premium must be paid in full. When a trader sells an option, on the other hand, he or she is required to deposit margin in an amount determined by the margin requirements established for the underlying interest and, in addition, an amount substantially equal to the current premium for the option. The margin requirements imposed on the selling of options, although adjusted to reflect the probability that out-of-the-money options will not be exercised, can in fact be higher than those imposed in dealing in the futures markets directly. Complicated margin requirements apply to spreads and conversions, which are complex trading strategies in which a trader acquires a mixture of options positions and positions in the underlying interest.

Table of Contents

Margin requirements are computed each day by a trader's clearing broker. When the market value of a particular open commodity interest position changes to a point where the margin on deposit does not satisfy maintenance margin requirements, a margin call is made by the broker. If the margin call is not met within a reasonable time, the broker may close out the trader's position. With respect to USHO's trading, USHO (and not its investors personally) is subject to margin calls.

Finally, many major U.S. exchanges have passed certain cross margining arrangements involving procedures pursuant to which the futures and options positions held in an account would, in the case of some accounts, be aggregated and margin requirements would be assessed on a portfolio basis, measuring the total risk of the combined positions.

SEC Reports

USHO makes available, free of charge, on its website, its annual reports on Form 10-K, its quarterly reports on Form 10-Q, its current reports on Form 8-K and amendments to these reports filed or furnished pursuant to Section 13(a) or 15(d) of the Exchange Act as soon as reasonably practicable after these forms are filed with, or furnished to, the SEC. These reports are also available from the SEC through its website at: www.sec.gov.

CFTC Reports

USHO also makes available its monthly reports and its annual reports required to be prepared and filed with the NFA under the CFTC regulations.

Intellectual Property

USCF owns trademark registrations for UNITED STATES HEATING OIL FUND (U.S. Reg. No. 3490750) for fund investment services in the field of heating oil futures contracts, cash-settled options on heating oil futures contracts, forward contracts for heating oil, over-the-counter transactions based on the price of heating oil, and indices based on the foregoing, in use since April 8, 2008, and UHN UNITED STATES HEATING OIL FUND, LP (and House Design) (U.S. Reg. No. 3638986) for investment services in the field of heating oil futures contracts and other heating oil related investments, in use since April 8, 2008. USHO relies upon these trademarks through which it markets its services and strives to build and maintain brand recognition in the market and among current and potential investors. So long as USHO continues to use these trademarks to identify its services, without challenge from any third party, and properly maintains and renews the trademark registrations under applicable laws, rules and regulations, it will continue to have indefinite protection for these trademarks under current laws, rules and regulations. USCF has been granted two patents Nos. 7,739,186 and 8,019,675, for systems and methods for an exchange traded fund (ETF) that tracks the price of one or more commodities.

Table of Contents

Item 1A. Risk Factors.

The risk factors should be read in connection with the other information included in this annual report on Form 10-K, including Management's Discussion and Analysis of Financial Condition and Results of Operations and USHO's financial statements and the related notes.

Risks Associated With Investing Directly or Indirectly in Heating Oil

Investing in Heating Oil Interests subjects USHO to the risks of the heating oil industry and this could result in large fluctuations in the price of USHO's units.

USHO is subject to the risks and hazards of the heating oil industry because it invests in Heating Oil Interests. The risks and hazards that are inherent in the heating oil industry may cause the price of heating oil to widely fluctuate. If the changes in percentage terms of USHO's units accurately track the changes in percentage terms of the Benchmark Futures Contract or the spot price of heating oil, then the price of its units may also fluctuate. The exploration for crude oil, the raw material used in the production of heating oil, and production of heating oil are uncertain processes with many risks. The cost of drilling, completing and operating wells for crude oil is often uncertain, and a number of factors can delay or prevent drilling operations or production of heating oil, including:

unexpected drilling conditions;

pressure or irregularities in formations;

equipment failures or repairs;

fires or other accidents;

adverse weather conditions;

pipeline ruptures, spills or other supply disruptions; and

shortages or delays in the availability of drilling rigs and the delivery of equipment.

Heating oil transmission, distribution, gathering, and processing activities involve numerous risks that may affect the price of heating oil.

There are a variety of hazards inherent in heating oil transmission, distribution, gathering, and processing, such as leaks, explosions, pollution, release of toxic substances, adverse weather conditions (such as hurricanes and flooding), pipeline failure, abnormal pressures, uncontrollable flows of heating oil, scheduled and unscheduled maintenance, physical damage to the gathering or transportation system, and other hazards which could affect the price of heating oil. To the extent these hazards limit the supply or delivery of heating oil, heating oil prices will increase.

The price of heating oil fluctuates on a seasonal basis and this would result in fluctuations in the price of USHO's units.

Heating oil prices fluctuate seasonally. For example, in some parts of the United States and other markets, the heating oil demand for power peaks during the cold winter months, with market prices peaking at that time. As a result, in the future, the overall price of heating oil may fluctuate substantially on a seasonal basis, which may make consecutive period to period comparisons less relevant. Cold weather increases demand and prices follow. Extremely cold and hazardous weather can make energy transportation more difficult, as oil trucks may have to wait for roads to be plowed and oil barges may be delayed due to frozen rivers and harbors.

Changes in the political climate could have negative consequences for heating oil prices.

Edgar Filing: United States Heating Oil Fund, LP - Form 10-K

Tensions with Iran, the world's fourth largest oil exporter, could put oil exports in jeopardy. Other global concerns include civil unrest and sabotage affecting the flow of oil from Nigeria, a large oil exporter. Meanwhile, friction continues between the governments of the United States and Venezuela, a major exporter of oil to the United States. Additionally, a series of production cuts by members of OPEC followed by a refusal to subsequently increase oil production have tightened world oil markets.

Table of Contents

Limitations on ability to develop additional sources of heating oil could impact future prices

In the past, a supply disruption in one area of the world was softened by the ability of major oil-producing nations such as Saudi Arabia to increase output to make up the difference. Now, much of that spare reserve capacity has been absorbed by increased demand. The current global economic downturn, however, has led to a decrease in the demand for oil that lasted through 2009 and a corresponding increase in spare capacities. According to the United States Government's Energy Information Administration, global oil demand is expected to rise by 2 million barrels a day in 2012, to a total global consumption of 90 million barrels per day, up from 88 million barrels per day in 2011.

Daily changes in USHO's per unit NAV may not correlate with daily changes in the price of the Benchmark Futures Contract. If this were to occur, investors may not be able to effectively use USHO as a way to hedge against heating oil-related losses or as a way to indirectly invest in heating oil.

USCF endeavors to invest USHO's assets as fully as possible in Futures Contracts and Other Heating Oil-Related Investments so that the daily changes in percentage terms of the per unit NAV closely correlate with the daily changes in percentage terms in the price of the Benchmark Futures Contract. However, daily changes in USHO's per unit NAV may not correlate with the daily changes in the price of the Benchmark Futures Contract for several reasons as set forth below:

USHO: (i) may not be able to buy/sell the exact amount of Futures Contracts and Other Heating Oil-Related Investments to have a perfect correlation with the per unit NAV; (ii) may not always be able to buy and sell Futures Contracts or Other Heating Oil-Related Investments at the market price; and (iii) is required to pay fees, including brokerage fees and the management fee, which will have an effect on the correlation.

Short-term supply and demand for heating oil may cause the changes in the market price of the Benchmark Futures Contract to vary from the changes in USHO's per unit NAV if USHO has fully invested in Futures Contracts that do not reflect such supply and demand and it is unable to replace such contracts with Futures Contracts that do reflect such supply and demand.

USHO sells and buys only as many Futures Contracts and Other Heating Oil-Related Investments that it can to get the daily changes in percentage terms of the per unit NAV as close as possible to the daily changes in percentage terms in the price of the Benchmark Futures Contract. The remainder of its assets are invested in Treasuries, cash and/or cash equivalents and are used to satisfy initial margin and additional margin requirements, if any, and to otherwise support its investments in Heating Oil Interests. Investments in Treasuries, cash and/or cash equivalents, both directly and as margin, provide rates of return that vary from changes in the price of the Benchmark Futures Contract.

Because USHO incurs certain expenses in connection with its investment activities, and holds most of its assets in more liquid short-term securities for margin and other liquidity purposes and for redemptions that may be necessary on an ongoing basis, USCF is generally not able to fully invest USHO's assets in Futures Contracts or Other Heating Oil-Related Investments and there cannot be perfect correlation between changes in USHO's per unit NAV and changes in the price of the Benchmark Futures Contract.

As USHO grows, there may be more or less correlation. For example, if USHO only has enough money to buy three Futures Contracts and it needs to buy four contracts to track the price of heating oil, then the correlation will be lower, but if it buys 20,000 Futures Contracts and it needs to buy 20,001 contracts, then the correlation will be higher. At certain asset levels, USHO may be limited in its ability to purchase the Benchmark Futures Contract or other Futures Contracts due to accountability levels imposed by the relevant exchanges. To the extent that USHO invests in these other Futures Contracts or other Heating Oil-Related Investments, the correlation with the Benchmark Futures Contract may be lower. If USHO is required to invest in other Futures Contracts and Other Heating Oil-Related Investments that are less correlated with the Benchmark Futures Contract, USHO would likely invest in over-the-counter contracts to increase the level of correlation of USHO's assets. Over-the-counter contracts entail certain risks described below under **Over-the-Counter Contract Risk**.

Table of Contents

USHO may not be able to buy the exact number of Futures Contracts and Other Heating Oil-Related Investments to have a perfect correlation with the Benchmark Futures Contract if the purchase price of Futures Contracts required to be fully invested in such contracts is higher than the proceeds received for the sale of a Creation Basket on the day the basket was sold. In such case, USHO could not invest the entire proceeds from the purchase of the Creation Basket in such futures contracts (for example, assume USHO receives \$5,000,000 for the sale of a Creation Basket and assume that the price of a Futures Contract for heating oil is \$105,000 based on a price of \$2.50 per gallon, then USHO could only invest in 47 Futures Contracts with an aggregate value of \$4,935,000). USHO would be required to invest a percentage of the proceeds in cash, Treasuries or other liquid securities to be deposited as margin with the futures commission merchant through which the contracts were purchased. The remainder of the purchase price for the Creation Basket would remain invested in Treasuries, cash and/or cash equivalents or other liquid securities as determined by USCF from time to time based on factors such as potential calls for margin or anticipated redemptions. If the trading market for Futures Contracts is suspended or closed, USHO may not be able to purchase these investments at the last reported price.

If daily changes in USHO's per unit NAV do not correlate with daily changes in the price of the Benchmark Futures Contract, then investing in USHO may not be an effective way to hedge against heating oil-related losses or indirectly invest in heating oil.

The Benchmark Futures Contract may not correlate with the spot price of heating oil and this could cause changes in the price of the units to substantially vary from the changes in the spot price of heating oil. If this were to occur, then investors may not be able to effectively use USHO as a way to hedge against heating oil-related losses or as a way to indirectly invest in heating oil. In addition, the price relationship between the near month contract and the next month contract that compose the Benchmark Futures Contract will vary and may impact both the total return over time of USHO's per unit NAV, as well as the degree to which its total return tracks other heating oil price indices' total returns.

When using the Benchmark Futures Contract as a strategy to track the spot price of heating oil, at best the correlation between changes in prices of such Heating Oil Interests and the spot price of heating oil can be only approximate. The degree of imperfection of correlation depends upon circumstances such as variations in the speculative heating oil market, supply of and demand for such Heating Oil Interests and technical influences in oil futures trading. If there is a weak correlation between the Heating Oil Interests and the spot price of heating oil, then even in situations where there is also tracking among the price of units, the per unit NAV of such units and Heating Oil Interests, the price of units may not accurately track the spot price of heating oil and investors may not be able to effectively use USHO as a way to hedge the risk of losses in their heating oil-related transactions or as a way to indirectly invest in heating oil.

Backwardation and contango may increase USHO's tracking error and/or negatively impact total return.

The design of USHO's Benchmark Futures Contract is such that every month it begins by using the near month contract to expire until the near month contract is within two weeks of expiration, when it transitions to the next month contract to expire. In the event of a heating oil futures market where near month contracts trade at a higher price than next month to expire contracts, a situation described as "backwardation" in the futures market, then absent the impact of the overall movement in heating oil prices the value of the benchmark contract would tend to rise as it approaches expiration. As a result, the total return of the Benchmark Futures Contract would tend to track higher. Conversely, in the event of a heating oil futures market where near month contracts trade at a lower price than next month contracts, a situation described as "contango" in the futures market, then absent the impact of the overall movement in heating oil prices the value of the benchmark contract would tend to decline as it approaches expiration. As a result the total return of the Benchmark Futures Contract would tend to track lower. When compared to total return of other price indices, such as the spot price of heating oil, the impact of backwardation and contango may lead the total return of USHO's per unit NAV to vary significantly. In the event of a prolonged period of contango, and absent the impact of rising or falling heating oil prices, this could have a significant negative impact on USHO's per unit NAV and total return. See *Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations* in this annual report on Form 10-K for a discussion of the potential effects of contango and backwardation.

Table of Contents

USHO may experience a loss if it is required to sell Treasuries at a price lower than the price at which they were acquired.

The value of Treasuries generally moves inversely with movements in interest rates. If USHO is required to sell Treasuries at a price lower than the price at which they were acquired, USHO will experience a loss. This loss may adversely impact the price of the units and may decrease the correlation among the price of units, the NAV of units, the price of the Benchmark Futures Contract and Other Heating Oil-Related Investments, and the spot price of heating oil.

Certain of USHO's investments could be illiquid which could cause large losses to investors at any time or from time to time.

USHO may not always be able to liquidate its positions in its investments at the desired price. It is difficult to execute a trade at a specific price when there is a relatively small volume of buy and sell orders in a market. A market disruption, such as a foreign government taking political actions that disrupt the market in its currency, its heating oil production or exports, or in another major export, can also make it difficult to liquidate a position. Alternatively, limits imposed by futures exchanges or other regulatory organizations, such as accountability levels, position limits and daily price fluctuation limits, may contribute to a lack of liquidity with respect to some commodity interests.

Unexpected market illiquidity may cause major losses to investors at any time or from time to time. In addition, USHO has not and does not intend at this time to establish a credit facility, which would provide an additional source of liquidity and instead relies only on the Treasuries, cash and/or cash equivalents that it holds. The anticipated large value of the positions in Futures Contracts that USCF will acquire or enter into for USHO increases the risk of illiquidity. The Other Heating Oil-Related Investments that USHO invests in, such as negotiated over-the-counter contracts, may have a greater likelihood of being illiquid since they are contracts between two parties that take into account not only market risk, but also the relative credit, tax, and settlement risks under such contracts. Such contracts also have limited transferability that results from such risks and from the contract's express limitations.

Because both Futures Contracts and Other Heating Oil-Related Investments may be illiquid, USHO's Heating Oil Interests may be more difficult to liquidate at favorable prices in periods of illiquid markets and losses may be incurred during the period in which positions are being liquidated.

If the nature of hedgers and speculators in futures markets has shifted such that heating oil purchasers are the predominant hedgers in the market, USHO might have to reinvest at higher futures prices or choose Other Heating Oil-Related Investments.

The changing nature of the hedgers and speculators in the heating oil market influences whether futures prices are above or below the expected future spot price. In order to induce speculators to take the corresponding long side of the same futures contract, heating oil producers must generally be willing to sell futures contracts at prices that are below expected future spot prices. Conversely, if the predominant hedgers in the futures market are the purchasers of the heating oil who purchase futures contracts to hedge against a rise in prices, then speculators will only take the short side of the futures contract if the futures price is greater than the expected future spot price of heating oil. This can have significant implications for USHO when it is time to reinvest the proceeds from a maturing Futures Contract into a new Futures Contract.

While USHO does not intend to take physical delivery of heating oil under its Futures Contracts, physical delivery under such contracts impacts the value of the contracts.

While it is not the current intention of USHO to take physical delivery of heating oil under any of its Futures Contracts, futures contracts are not required to be cash-settled and it is possible to take delivery under some of these contracts. Storage costs associated with purchasing heating oil could result in costs and other liabilities that could impact the value of Futures Contracts or Other Heating Oil-Related Investments. Storage costs include the time value of money invested in heating oil as a physical commodity plus the actual costs of storing the heating oil less any benefits from ownership of heating oil that are not obtained by the holder of a futures contract. In general, Futures Contracts have a one-month delay for contract delivery and the back month (the back month is any future delivery month other than the spot month) includes storage costs. To the extent that these storage costs change for heating oil while USHO holds Futures Contracts or Other Heating Oil-Related Investments, the value of the Futures Contracts or Other Heating Oil-Related Investments, and therefore USHO's NAV, may change as well.

Table of Contents

Regulation of the commodity interests and energy markets is extensive and constantly changing; future regulatory developments are impossible to predict but may significantly and adversely affect USHO.

The futures markets are subject to comprehensive statutes, regulations, and margin requirements. In addition, the CFTC and the exchanges are authorized to take extraordinary actions in the event of a market emergency, including, for example, the retroactive implementation of speculative position limits or higher margin requirements, the establishment of daily price limits and the suspension of trading.

The regulation of commodity interest transactions in the United States is a rapidly changing area of law and is subject to ongoing modification by governmental and judicial action. Considerable regulatory attention has been focused on non-traditional investment pools that are publicly distributed in the United States. Under the Dodd-Frank Act and otherwise, there is a possibility of future regulatory changes within the United States altering, perhaps to a material extent, the nature of an investment in USHO or the ability of USHO to continue to implement its investment strategy. In addition, various national governments outside of the United States have expressed concern regarding the disruptive effects of speculative trading in the energy markets and the need to regulate the derivatives markets in general. The effect of any future regulatory change on USHO is impossible to predict, but it could be substantial and adverse.

For a more detailed discussion of the regulations to be imposed by the CFTC and the SEC and the potential impacts thereof on USHO, please see *Item 1. Business Regulation* in this annual report on Form 10-K.

Investing in USHO for purposes of hedging may be subject to several risks including the possibility of losing the benefit of favorable market movement.

Participants in the heating oil or in other industries may use USHO as a vehicle to hedge the risk of losses in their heating oil-related transactions. There are several risks in connection with using USHO as a hedging device. While hedging can provide protection against an adverse movement in market prices, it can also preclude a hedger's opportunity to benefit from a favorable market movement. In a hedging transaction, the hedger may be concerned that the hedged item will increase in price, but must recognize the risk that the price may instead decline and if this happens he will have lost his opportunity to profit from the change in price because the hedging transaction will result in a loss rather than a gain. Thus, the hedger foregoes the opportunity to profit from favorable price movements.

An investment in USHO may provide little or no diversification benefits. Thus, in a declining market, USHO may have no gains to offset losses from other investments, and an investor may suffer losses on an investment in USHO while incurring losses with respect to other asset classes.

Historically, Futures Contracts and Other Heating Oil-Related Investments have generally been non-correlated to the performance of other asset classes such as stocks and bonds. Non-correlation means that there is a low statistically valid relationship between the performance of futures and other commodity interest transactions, on the one hand, and stocks or bonds, on the other hand. However, there can be no assurance that such non-correlation will continue during future periods. If, contrary to historic patterns, USHO's performance were to move in the same general direction as the financial markets, investors will obtain little or no diversification benefits from an investment in the units. In such a case, USHO may have no gains to offset losses from other investments, and investors may suffer losses on their investment in USHO at the same time they incur losses with respect to other investments.

Variables such as drought, floods, weather, embargoes, tariffs and other political events may have a larger impact on heating oil prices and heating oil-linked instruments, including Futures Contracts and Other Heating Oil-Related Investments, than on traditional securities. These additional variables may create additional investment risks that subject USHO's investments to greater volatility than investments in traditional securities.

Table of Contents

Non-correlation should not be confused with negative correlation, where the performance of two asset classes would be opposite of each other. There is no historic evidence that the spot price of heating oil and prices of other financial assets, such as stocks and bonds, are negatively correlated. In the absence of negative correlation, USHO cannot be expected to be automatically profitable during unfavorable periods for the stock market, or vice versa.

USHO's Operating Risks

USHO is not a registered investment company so unitholders do not have the protections of the 1940 Act.

USHO is not an investment company subject to the 1940 Act. Accordingly, investors do not have the protections afforded by that statute which, for example, requires investment companies to have a majority of disinterested directors and regulates the relationship between the investment company and its investment manager.

USCF is leanly staffed and relies heavily on key personnel to manage trading activities.

In managing and directing the day-to-day activities and affairs of USHO, USCF relies heavily on Messrs. Howard Mah and John Hyland. If Messrs. Mah or Hyland were to leave or be unable to carry out their present responsibilities, it may have an adverse effect on the management of USHO. Furthermore, Messrs. Mah and Hyland are currently involved in the management of the Related Public Funds. USCF has also filed registration statements to register units of USSF, UNGD, USGO and USABF, each a series of the United States Commodity Funds Trust I. Mr. Mah is also employed by Ameristock Corporation, a registered investment adviser that manages a public mutual fund. It is estimated that Mr. Mah will spend approximately 90% of his time on USHO and Related Public Fund matters. Mr. Hyland will spend approximately 100% of his time on USHO and Related Public Fund matters. To the extent that USCF establishes additional funds, even greater demands will be placed on Messrs. Mah and Hyland, as well as the other officers of USCF and its Board.

Accountability levels, position limits, and daily price fluctuation limits set by the exchanges have the potential to cause a tracking error, which could cause the price of units to substantially vary from the price of the Benchmark Futures Contract and prevent investors from being able to effectively use USHO as a way to hedge against heating oil-related losses or as a way to indirectly invest in heating oil.

U.S. designated contract markets such as the NYMEX have established accountability levels and position limits on the maximum net long or net short futures contracts in commodity interests that any person or group of persons under common trading control (other than as a hedge, which an investment by USHO is not) may hold, own or control.

In addition to accountability levels and position limits, the NYMEX also sets daily price fluctuation limits on futures contracts. The daily price fluctuation limit establishes the maximum amount that the price of a futures contract may vary either up or down from the previous day's settlement price. Once the daily price fluctuation limit has been reached in a particular futures contract, no trades may be made at a price beyond that limit.

Additionally, on October 18, 2011, the CFTC adopted new rules, which establish position limits and limit formulas for certain physical commodity futures contracts including Futures Contracts and options on Futures Contracts, executed pursuant to the rules of designated contract markets (*i.e.*, certain regulated exchanges) and commodity swaps that are economically equivalent to such futures and options contracts. The CFTC also adopted aggregate position limits that would apply across different trading venues to contracts based on the same underlying commodity. For a more detailed discussion of the position limits to be imposed by the CFTC under the Dodd-Frank Act and the potential impacts thereof on USHO, please see *Item 1. Business* *What are Futures Contracts?* and *- Regulation* in this annual report on Form 10-K.

All of these limits may potentially cause a tracking error between the price of the units and the price of the Benchmark Futures Contract. This may in turn prevent investors from being able to effectively use USHO as a way to hedge against heating oil-related losses or as a way to indirectly invest in heating oil.

USHO has not limited the size of its offering and is committed to utilizing substantially all of its proceeds to purchase Futures Contracts and Other Heating Oil-Related Investments. If USHO encounters accountability levels, position limits, or price fluctuation limits for Futures Contracts on the NYMEX, it may then, if permitted under applicable regulatory requirements, purchase Futures Contracts on the ICE Futures or other exchanges that trade listed heating oil futures. The Futures Contracts available on the ICE Futures are comparable to the contracts on the NYMEX, but they may have different underlying commodities, sizes, deliveries, and prices. In addition, certain of the Futures Contracts available on the ICE Futures are subject to accountability levels and position limits.

Table of Contents

To the extent that USCF uses spreads and straddles as part of its trading strategy, there is the risk that the per unit NAV may not closely track the changes in the Benchmark Futures Contract.

If USCF were to utilize a spread or straddle position and the spread performed differently than expected, the results could impact USHO's tracking error. This could affect USHO's investment objective of having its per unit NAV closely track the changes in the Benchmark Futures Contract. Additionally, a loss on a spread position would negatively impact USHO's absolute return. For a more detailed discussion regarding spreads and straddles, please see *Item 1. Business - Spreads and Straddles* in this annual report on Form 10-K.

USHO and USCF may have conflicts of interest, which may permit them to favor their own interests to the detriment of unitholders.

USHO and USCF may have inherent conflicts to the extent USCF attempts to maintain USHO's asset size in order to preserve its fee income and this may not always be consistent with USHO's objective of having the value of its units' per unit NAV track the changes in the Benchmark Futures Contract. USCF's officers, directors and employees do not devote their time exclusively to USHO. These persons are directors, officers or employees of other entities that may compete with USHO for their services. They could have a conflict between their responsibilities to USHO and to those other entities.

In addition, USCF's principals, officers, directors or employees may trade futures and related contracts for their own account. A conflict of interest may exist if their trades are in the same markets and at the same time as USHO trades using the clearing broker to be used by USHO. A potential conflict also may occur if USCF's principals, officers, directors or employees trade their accounts more aggressively or take positions in their accounts which are opposite, or ahead of, the positions taken by USHO.

USCF has sole current authority to manage the investments and operations of USHO, and this may allow it to act in a way that furthers its own interests which may create a conflict with the best interests of investors. Limited partners have limited voting control, which will limit the ability to influence matters such as amendment of the LP Agreement, change in USHO's basic investment policy, dissolution of this fund, or the sale or distribution of USHO's assets.

USCF serves as the general partner to each of USHO, USOF, USNG, US12OF, UGA, USSO, US12NG and USBO and the sponsor for USCI and CPER, and will serve as the sponsor for USMI, USAG, USSF, UNGD, USGO and USABF if such funds offer their securities to the public or begin operations. USCF may have a conflict to the extent that its trading decisions for USHO may be influenced by the effect they would have on the other funds it manages. These trading decisions may be influenced since USCF also serves as the general partner or sponsor for all of the funds and is required to meet all of the funds' investment objectives as well as USHO's. If USCF believes that a trading decision it made on behalf of USHO might (i) impede its other funds from reaching their investment objectives, or (ii) improve the likelihood of meeting its other funds' objectives, then USCF may choose to change its trading decision for USHO, which could either impede or improve the opportunity for USHO to meet its investment objective. In addition, USCF is required to indemnify the officers and directors of its other funds if the need for indemnification arises. This potential indemnification will cause USCF's assets to decrease. If USCF's other sources of income are not sufficient to compensate for the indemnification, then USCF may terminate and investors could lose their investment.

Table of Contents

Unitholders may only vote on the removal of USCF and limited partners have only limited voting rights. Unitholders and limited partners will not participate in the management of USHO and do not control USCF so they will not have influence over basic matters that affect USHO. In addition, USHO could terminate at any time and cause the liquidation and potential loss of an investor's investment and could upset the overall maturity and timing of an investor's investment portfolio.

Limited partners will have limited voting rights with respect to USHO's affairs. Unitholders must apply to become limited partners, and unitholders that have not applied to become limited partners have no voting rights, other than to remove USCF as the general partner of USHO. Even then, unitholders may remove USCF only if 66 2/3% of the unitholders elect to do so. Unitholders and limited partners will not be permitted to participate in the management or control of USHO or the conduct of its business. Unitholders and limited partners must therefore rely upon the duties and judgment of USCF to manage USHO's affairs.

USHO may terminate at any time, regardless of whether USHO has incurred losses, subject to the terms of the LP Agreement. In particular, unforeseen circumstances, including the death, adjudication of incompetence, bankruptcy, dissolution, or removal of USCF as the general partner of USHO could cause USHO to terminate unless a majority interest of the limited partners within 90 days of the event elects to continue the partnership and appoints a successor general partner, or the affirmative vote of a majority in interest of the limited partners subject to certain conditions. However, no level of losses will require USCF to terminate USHO. USHO's termination would cause the liquidation and potential loss of an investor's investment. Termination could also negatively affect the overall maturity and timing of an investor's investment portfolio.

USCF may manage a large amount of assets and this could affect USHO's ability to trade profitably.

Increases in assets under management may affect trading decisions. In general, USCF does not intend to limit the amount of assets of USHO that it may manage. The more assets USCF manages, the more difficult it may be for it to trade profitably because of the difficulty of trading larger positions without adversely affecting prices and performance and of managing risk associated with larger positions.

Limited partners may have limited liability in certain circumstances, including potentially having liability for the return of wrongful distributions.

Under Delaware law, a limited partner might be held liable for USHO's obligations as if it were a general partner if the limited partner participates in the control of the partnership's business and the persons who transact business with the partnership think the limited partner is the general partner.

A limited partner will not be liable for assessments in addition to its initial capital investment in any of USHO's capital securities representing units. However, a limited partner may be required to repay to USHO any amounts wrongfully returned or distributed to it under some circumstances. Under Delaware law, USHO may not make a distribution to limited partners if the distribution causes USHO's liabilities (other than liabilities to partners on account of their partnership interests and nonrecourse liabilities) to exceed the fair value of USHO's assets. Delaware law provides that a limited partner who receives such a distribution and knew at the time of the distribution that the distribution violated the law will be liable to the limited partnership for the amount of the distribution for three years from the date of the distribution.

With adequate notice, a limited partner may be required to withdraw from the partnership for any reason.

If USCF gives at least fifteen (15) days' written notice to a limited partner, then USCF may for any reason, in its sole discretion, require any such limited partner to withdraw entirely from the partnership or to withdraw a portion of its partner capital account. USCF may require withdrawal even in situations where the limited partner has complied completely with the provisions of the LP Agreement.

Table of Contents

USHO does not expect to make cash distributions.

USHO has not previously made any cash distributions and intends to re-invest any realized gains in additional Heating Oil Interests rather than distributing cash to limited partners. Therefore, unlike mutual funds, commodity pools or other investment pools that actively manage their investments in an attempt to realize income and gains from their investing activities and distribute such income and gains to their investors, USHO generally does not expect to distribute cash to limited partners. An investor should not invest in USHO if it will need cash distributions from USHO to pay taxes on its share of income and gains of USHO, if any, or for any other reason. Although USHO does not intend to make cash distributions, the income earned from its investments held directly or posted as margin may reach levels that merit distribution, *e.g.*, at levels where such income is not necessary to support its underlying investments in Heating Oil Interests and investors adversely react to being taxed on such income without receiving distributions that could be used to pay such tax. If this income becomes significant then cash distributions may be made.

There is a risk that USHO will not earn trading gains sufficient to compensate for the fees and expenses that it must pay and as such USHO may not earn any profit.

USHO pays brokerage charges of approximately 0.06% of average total net assets based on futures commission merchant fees of \$3.50 per buy or sell, management fees of 0.60% of NAV on its average total net assets, and over-the-counter spreads and extraordinary expenses (*e.g.*, subsequent offering expenses, other expenses not in the ordinary course of business, including the indemnification of any person against liabilities and obligations to the extent permitted by law and required under the LP Agreement and under agreements entered into by USCF on USHO's behalf and the bringing and defending of actions at law or in equity and otherwise engaging in the conduct of litigation and the incurring of legal expenses and the settlement of claims and litigation) that cannot be quantified.

These fees and expenses must be paid in all cases regardless of whether USHO's activities are profitable. Accordingly, USHO must earn trading gains sufficient to compensate for these fees and expenses before it can earn any profit.

If offerings of the units do not raise sufficient funds to pay USHO's future expenses and no other source of funding of expenses is found, USHO may be forced to terminate and investors may lose all or part of their investment.

Prior to the offering of units that commenced on April 9, 2008, all of USHO's expenses were funded by USCF and its affiliates. These payments by USCF and its affiliates were designed to allow USHO the ability to commence the public offering of its units. USHO now directly pays certain of these fees and expenses. USCF will continue to pay other fees and expenses, as set forth in the LP Agreement. If USCF and USHO are unable to raise sufficient funds to cover their expenses or locate any other source of funding, USHO may be forced to terminate and investors may lose all or part of their investment.

USHO may incur higher fees and expenses upon renewing existing or entering into new contractual relationships.

The clearing arrangements between the clearing brokers and USHO generally are terminable by the clearing brokers once the clearing broker has given USHO notice. Upon termination, USCF may be required to renegotiate or make other arrangements for obtaining similar services if USHO intends to continue trading in Futures Contracts or Other Heating Oil-Related Investments at its present level of capacity. The services of any clearing broker may not be available, or even if available, these services may not be available on the terms as favorable as those of the expired or terminated clearing arrangements.

USHO may miss certain trading opportunities because it will not receive the benefit of the expertise of independent trading advisors.

USCF does not employ trading advisors for USHO; however, it reserves the right to employ them in the future. The only advisor to USHO is USCF. A lack of independent trading advisors may be disadvantageous to USHO because it will not receive the benefit of a trading advisor's expertise.

Table of Contents

An unanticipated number of redemption requests during a short period of time could have an adverse effect on the NAV of USHO.

If a substantial number of requests for redemption of Redemption Baskets are received by USHO during a relatively short period of time, USHO may not be able to satisfy the requests from USHO's assets not committed to trading. As a consequence, it could be necessary to liquidate positions in USHO's trading positions before the time that the trading strategies would otherwise dictate liquidation.

The financial markets are currently in a period of disruption and USHO does not expect these conditions to improve in the near future.

Since 2008, the financial markets have experienced very difficult conditions and volatility as well as significant adverse trends. The conditions in these markets have resulted in a decrease in availability of corporate credit and liquidity and have led indirectly to the insolvency, closure or acquisition of a number of major financial institutions and have contributed to further consolidation within the financial services industry. In addition, the Administration and Congress have periodically been reaching impasses in passing a fiscal budget which could create long-term concerns regarding the credit of the United States and interest earned, as well as the United States Government's ability to pay its obligations to holders of Treasuries. If low interest rates on Treasuries continues or if USHO is not able to redeem its investments in Treasuries prior to maturity and the U.S. Government cannot pay its obligations, USHO would be negatively impacted. In addition, USHO might also be negatively impacted by its use of money market mutual funds to the extent those funds might themselves be using Treasuries. Although the financial markets saw signs of recovery beginning in late 2010, economic growth in 2011 and early 2012 has been slow and the financial markets are still fragile and could fall into another recession. Another recession could adversely affect the financial condition and results of operations of USHO's service providers and Authorized Purchasers, which would impact the ability of USCF to achieve USHO's investment objective.

The failure or bankruptcy of a clearing broker or USHO's Custodian could result in a substantial loss of USHO's assets and could impair USHO in its ability to execute trades.

Under CFTC regulations, a clearing broker maintains customers' assets in a bulk segregated account. If a clearing broker fails to do so, or even if the customers' funds are segregated by the clearing broker but the clearing broker is unable to satisfy a substantial deficit in a customer account, the clearing broker's other customers may be subject to risk of a substantial loss of their funds in the event of that clearing broker's bankruptcy. In that event, the clearing broker's customers, such as USHO, are entitled to recover, even in respect of property specifically traceable to them, only a proportional share of all property available for distribution to all of that clearing broker's customers. The bankruptcy of a clearing broker could result in the complete loss of USHO's assets posted with the clearing broker; though the majority of USHO's assets are held in Treasuries, cash and/or cash equivalents with the Custodian and would not be impacted by the bankruptcy of a clearing broker. USHO also may be subject to the risk of the failure of, or delay in performance by, any exchanges and markets and their clearing organizations, if any, on which commodity interest contracts are traded.

In addition, to the extent USHO's clearing broker is required to post USHO's assets as margin to a clearinghouse, the margin will be maintained in an omnibus account containing the margin of all the clearing broker's customers. If USHO's clearing broker defaults to a clearinghouse because of a default by one of the clearing broker's other customers or otherwise, then the clearinghouse can look to all of the margin in the omnibus account, including margin posted by USHO and any other non-defaulting customers of the clearing broker to satisfy the obligations of the clearing broker.

From time to time, the clearing brokers may be subject to legal or regulatory proceedings in the ordinary course of their business. A clearing broker's involvement in costly or time-consuming legal proceedings may divert financial resources or personnel away from the clearing broker's trading operations, which could impair the clearing broker's ability to successfully execute and clear USHO's trades.

In addition, the majority of USHO's assets are held in Treasuries, cash and/or cash equivalents with the Custodian. The insolvency of the Custodian could result in a complete loss of USHO's assets held by that Custodian, which, at any given time, would likely comprise a substantial portion of USHO's total assets.

Table of Contents

Third parties may infringe upon or otherwise violate intellectual property rights or assert that USCF has infringed or otherwise violated their intellectual property rights, which may result in significant costs and diverted attention.

Third parties may utilize USHO's intellectual property or technology, including the use of its business methods, trademarks and trading program software, without permission. USCF has a patent for USHO's business method and has registered its trademarks. USHO does not currently have any proprietary software. However, if it obtains proprietary software in the future, then any unauthorized use of USHO's proprietary software and other technology could also adversely affect its competitive advantage. USHO may not have adequate resources to implement procedures for monitoring unauthorized uses of its patents, trademarks, proprietary software and other technology. Also, third parties may independently develop business methods, trademarks or proprietary software and other technology similar to that of USCF or claim that USCF has violated their intellectual property rights, including their copyrights, trademark rights, trade names, trade secrets and patent rights. As a result, USCF may have to litigate in the future to protect its trade secrets, determine the validity and scope of other parties' proprietary rights, defend itself against claims that it has infringed or otherwise violated other parties' rights, or defend itself against claims that its rights are invalid. Any litigation of this type, even if USCF is successful and regardless of the merits, may result in significant costs, divert its resources from USHO, or require it to change its proprietary software and other technology or enter into royalty or licensing agreements.

The success of USHO depends on the ability of USCF to accurately implement trading systems, and any failure to do so could subject USHO to losses on such transactions.

USCF uses mathematical formulas built into a generally available spreadsheet program to decide whether it should buy or sell Heating Oil Interests each day. Specifically, USCF uses the spreadsheet to make mathematical calculations and to monitor positions in Heating Oil Interests and Treasuries and correlations to the Benchmark Futures Contract. USCF must accurately process the spreadsheets' outputs and execute the transactions called for by the formulas. In addition, USHO relies on USCF to properly operate and maintain its computer and communications systems.

Extraordinary transaction volume, hardware or software failure, power or telecommunications failure, a natural disaster or other catastrophe could cause the computer systems to operate at an unacceptably slow speed or even fail. Any significant degradation or failure of the systems that USCF uses to gather and analyze information, enter orders, process data, monitor risk levels and otherwise engage in trading activities may result in substantial losses on transactions, liability to other parties, lost profit opportunities, damages to USCF's and USHO's reputations, increased operational expenses and diversion of technical resources. Any failure, inaccuracy or delay in implementing any of the formulas or systems, including implementing upgrades and compatibility with the computer systems of third parties, and executing USHO's transactions could impair its ability to achieve USHO's investment objective. It could also result in decisions to undertake transactions based on inaccurate or incomplete information. This could cause substantial losses on transactions.

The occurrence of a terrorist attack, or the outbreak, continuation or expansion of war or other hostilities could disrupt USHO's trading activity and materially affect USHO's profitability.

The operations of USHO, the exchanges, brokers and counterparties with which USHO does business, and the markets in which USHO does business could be severely disrupted in the event of a major terrorist attack or the outbreak, continuation or expansion of war or other hostilities. Global anti-terrorism initiatives, political unrest in the Middle East and Southeast Asia, as well as political hostility towards the United States continue to fuel this concern.

Risk of Leverage and Volatility

If USCF permits USHO to become leveraged, investors could lose all or substantially all of their investment if USHO's trading positions suddenly turn unprofitable.

Commodity pools' trading positions in futures contracts or other commodity interests are typically required to be secured by the deposit of margin funds that represent only a small percentage of a futures contract's (or other commodity interests') entire market value. This feature permits commodity pools to leverage their assets by purchasing or selling futures contracts (or other commodity interests) with an aggregate value in excess of the commodity pool's assets. While this leverage can increase the pool's profits, relatively small adverse movements in the price of the pool's futures contracts can cause significant losses to the pool. While USCF has not and does not currently intend to leverage USHO's assets, it is not prohibited from doing so under the LP Agreement or otherwise.

Table of Contents

The price of heating oil is volatile which could cause large fluctuations in the price of units.

Movements in the price of heating oil may be the result of factors outside of USCF's control and may not be anticipated by USCF. Among the factors that can cause volatility in the price of heating oil are:

worldwide or regional demand for energy, which is affected by economic conditions;

the domestic and foreign supply and inventories of oil and gas;

weather conditions, including abnormally mild winter or summer weather, and abnormally harsh winter or summer weather;

availability and adequacy of pipeline and other transportation facilities;

availability of storage facilities;

domestic and foreign governmental regulations and taxes;

political conditions in gas or oil producing regions;

technological advances relating to energy usage or relating to technology for exploration, production, refining and petrochemical manufacturing;

the ability of members of OPEC to agree upon and maintain oil prices and production levels;

the price and availability of alternative fuels;

the impact of energy conservation efforts; and

the impact of environmental and other governmental regulations.

Over-the-Counter Contract Risk

Currently, over-the-counter transactions are subject to little regulation.

A portion of USHO's assets may be used to trade over-the-counter contracts, such as forward contracts or swap or spot contracts. Currently, over-the-counter contracts are typically contracts traded on a principal-to-principal basis through dealer markets that are dominated by major money center and investment banks and other institutions and that prior to the passage of the Dodd-Frank Act had been essentially unregulated by the CFTC. The markets for over-the-counter contracts have relied upon the integrity of market participants in lieu of the additional regulation imposed by the CFTC on participants in the futures markets. While the Dodd-Frank Act and certain regulations adopted thereunder are intended to provide additional protections to participants in the over-the-counter market, the current regulation of the over-the-counter contracts could

Edgar Filing: United States Heating Oil Fund, LP - Form 10-K

expose USHO in certain circumstances to significant losses in the event of trading abuses or financial failure by participants. See *Item 1. Business Regulation* for a discussion of how the over-the-counter market will be subject to much more extensive CFTC oversight and regulation after the implementation of the Dodd-Frank Act.

USHO will be subject to credit risk with respect to counterparties to over-the-counter contracts entered into by USHO or held by special purpose or structured vehicles.

USHO faces the risk of non-performance by the counterparties to the over-the-counter contracts. Unlike in futures contracts, the counterparty to these contracts is generally a single bank or other financial institution, rather than a clearing organization backed by a group of financial institutions. As a result, there will be greater counterparty credit risk in these transactions. A counterparty may not be able to meet its obligations to USHO, in which case USHO could suffer significant losses on these contracts.

Table of Contents

If a counterparty becomes bankrupt or otherwise fails to perform its obligations due to financial difficulties, USHO may experience significant delays in obtaining any recovery in a bankruptcy or other reorganization proceeding. USHO may obtain only limited recovery or may obtain no recovery in such circumstances.

USHO may be subject to liquidity risk with respect to its over-the-counter contracts.

Over-the-counter contracts are less marketable because they are not traded on an exchange, do not have uniform terms and conditions, and are entered into based upon the creditworthiness of the parties and the availability of credit support, such as collateral, and in general, they are not transferable without the consent of the counterparty. These conditions make such contracts less liquid than standardized futures contracts traded on a commodities exchange and could adversely impact USHO's ability to realize the full value of such contracts. In addition, even if collateral is used to reduce counterparty credit risk, sudden changes in the value of over-the-counter transactions may leave a party open to financial risk due to a counterparty default since the collateral held may not cover a party's exposure on the transaction in such situations.

In general, valuing over-the-counter derivatives is less certain than valuing actively traded financial instruments such as exchange traded futures contracts and securities or cleared swaps because the price and terms on which such over-the-counter derivatives are entered into or can be terminated are individually negotiated, and those prices and terms may not reflect the best price or terms available from other sources. In addition, while market makers and dealers generally quote indicative prices or terms for entering into or terminating over-the-counter contracts, they typically are not contractually obligated to do so, particularly if they are not a party to the transaction. As a result, it may be difficult to obtain an independent value for an outstanding over-the-counter derivatives transaction.

Risk of Trading in International Markets

Trading in international markets could expose USHO to credit and regulatory risk.

USHO invests primarily in Futures Contracts, a significant portion of which are traded on United States exchanges, including the NYMEX. However, a portion of USHO's trades may take place on markets and exchanges outside the United States. Some non-U.S. markets present risks because they are not subject to the same degree of regulation as their U.S. counterparts. The CFTC, NFA and the domestic exchanges have little, if any, regulatory authority over the activities of any foreign boards of trade or exchanges, including the execution, delivery and clearing of transactions, and have little, if any, power to compel enforcement of the rules of a foreign board of trade or exchange or of any applicable non-U.S. laws. Similarly, the rights of market participants, such as USHO, in the event of the insolvency or bankruptcy of a non-U.S. market or broker are also likely to be more limited than in the case of U.S. markets or brokers. As a result, in these markets, USHO has less legal and regulatory protection than it does when it trades domestically.

In some of these non-U.S. markets, the performance on a contract is the responsibility of the counterparty and is not backed by an exchange or clearing corporation and therefore exposes USHO to credit risk. Trading in non-U.S. markets also leaves USHO susceptible to swings in the value of the local currency against the U.S. dollar. Additionally, trading on non-U.S. exchanges is subject to the risks presented by exchange controls, expropriation, increased tax burdens and exposure to local economic declines and political instability. An adverse development with respect to any of these variables could reduce the profit or increase the loss earned on trades in the affected international markets.

USHO's international trading could expose it to losses resulting from non-U.S. exchanges that are less developed or less reliable than United States exchanges.

Some non-U.S. exchanges may be in a more developmental stage so that prior price histories may not be indicative of current price dynamics. In addition, USHO may not have the same access to certain positions on foreign trading exchanges as do local traders, and the historical market data on which USCF bases its strategies may not be as reliable or accessible as it is for U.S. exchanges.

Table of Contents

Tax Risk

An investor's tax liability may exceed the amount of distributions, if any, on its units.

Cash or property will be distributed at the sole discretion of USCF. USCF has not and does not currently intend to make cash or other distributions with respect to units. Investors will be required to pay U.S. federal income tax and, in some cases, state, local or foreign income tax, on their allocable share of USHO's taxable income, without regard to whether they receive distributions or the amount of any distributions. Therefore, the tax liability of an investor with respect to its units may exceed the amount of cash or value of property (if any) distributed.

An investor's allocable share of taxable income or loss may differ from its economic income or loss on its units.

Due to the application of the assumptions and conventions applied by USHO in making allocations for tax purposes and other factors, an investor's allocable share of USHO's income, gain, deduction or loss may be different than its economic profit or loss from its units for a taxable year. This difference could be temporary or permanent and, if permanent, could result in it being taxed on amounts in excess of its economic income.

Items of income, gain, deduction, loss and credit with respect to units could be reallocated if the IRS does not accept the assumptions and conventions applied by USHO in allocating those items, with potential adverse consequences for an investor.

The U.S. tax rules pertaining to partnerships are complex and their application to large, publicly traded partnerships such as USHO is in many respects uncertain. USHO applies certain assumptions and conventions in an attempt to comply with the intent of the applicable rules and to report taxable income, gains, deductions, losses and credits in a manner that properly reflects unitholders' economic gains and losses. These assumptions and conventions may not fully comply with all aspects of the Internal Revenue Code (the Code) and applicable Treasury Regulations, however, and it is possible that the U.S. Internal Revenue Service, will successfully challenge USHO's allocation methods and require USHO to reallocate items of income, gain, deduction, loss or credit in a manner that adversely affects investors. If this occurs, investors may be required to file an amended tax return and to pay additional taxes plus deficiency interest.

USHO could be treated as a corporation for federal income tax purposes, which may substantially reduce the value of the units.

USHO has received an opinion of counsel that, under current U.S. federal income tax laws, USHO will be treated as a partnership that is not taxable as a corporation for U.S. federal income tax purposes, provided that: (i) at least 90 percent of USHO's annual gross income consists of qualifying income as defined in the Code, (ii) USHO is organized and operated in accordance with its governing agreements and applicable law and (iii) USHO does not elect to be taxed as a corporation for federal income tax purposes. Although USCF anticipates that USHO has satisfied and will continue to satisfy the qualifying income requirement for all of its taxable years, that result cannot be assured. USHO has not requested and will not request any ruling from the IRS with respect to its classification as a partnership not taxable as a corporation for federal income tax purposes. If the IRS were to successfully assert that USHO is taxable as a corporation for federal income tax purposes in any taxable year, rather than passing through its income, gains, losses and deductions proportionately to unitholders, USHO would be subject to tax on its net income for the year at corporate tax rates. In addition, although USCF does not currently intend to make distributions with respect to units, any distributions would be taxable to unitholders as dividend income. Taxation of USHO as a corporation could materially reduce the after-tax return on an investment in units and could substantially reduce the value of the units.

Part II**Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities. Price Range of Units**

USHO's units have traded on the NYSE Arca under the symbol UHN since November 25, 2008. Prior to trading on the NYSE Arca, USHO's units traded on the AMEX under the symbol UHN since its initial public offering on April 9, 2008. The following table sets forth the range of reported high and low sales prices of the units as reported on the AMEX and NYSE Arca, as applicable, for the periods indicated below.

	High	Low
<u>Fiscal year 2011</u>		
First quarter	\$ 36.12	\$ 29.33
Second quarter	\$ 37.90	\$ 31.95
Third quarter	\$ 35.91	\$ 31.51
Fourth quarter	\$ 36.11	\$ 30.91
	High	Low
<u>Fiscal year 2010</u>		
First quarter	\$ 28.71	\$ 24.26
Second quarter	\$ 29.65	\$ 23.73
Third quarter	\$ 27.89	\$ 23.69
Fourth quarter	\$ 29.97	\$ 26.31

As of December 31, 2011, USHO had approximately 2,256 holders of units.

Dividends

USHO has not made and does not currently intend to make cash distributions to its unitholders.

Issuer Purchases of Equity Securities

USHO does not purchase units directly from its unitholders; however, in connection with its redemption of baskets held by Authorized Purchasers, USHO redeemed 2 baskets (comprising 200,000 units) during the year ended December 31, 2011.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The following discussion should be read in conjunction with the financial statements and the notes thereto of USHO included elsewhere in this annual report on Form 10-K.

Forward-Looking Information

This annual report on Form 10-K, including this Management's Discussion and Analysis of Financial Condition and Results of Operations, contains forward-looking statements regarding the plans and objectives of management for future operations. This information may involve known and unknown risks, uncertainties and other factors that may cause USHO's actual results, performance or achievements to be materially different from future results, performance or achievements expressed or implied by any forward-looking statements. Forward-looking statements, which involve assumptions and describe USHO's future plans, strategies and expectations, are generally identifiable by use of the words may, will, should, expect, anticipate, estimate, believe, intend or project, the negative of these words, other variations of comparable terminology. These forward-looking statements are based on assumptions that may be incorrect, and USHO cannot assure investors that the projections included in these forward-looking statements will come to pass. USHO's actual results could differ materially from those expressed or implied by the forward-looking statements as a result of various factors.

USHO has based the forward-looking statements included in this annual report on Form 10-K on information available to it on the date of this annual report on Form 10-K, and USHO assumes no obligation to update any such forward-looking statements. Although USHO undertakes no obligation to revise or update any forward-looking statements, whether as a result of new information, future events or otherwise, investors are advised to consult any additional disclosures that USHO may make directly to them or through reports that USHO in the future files with the SEC, including annual reports on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K.

Table of Contents

Introduction

USHO, a Delaware limited partnership, is a commodity pool that issues units that may be purchased and sold on the NYSE Arca. The investment objective of USHO is for the daily changes in percentage terms of its units' per unit NAV to reflect the daily changes in percentage terms of the spot price of heating oil, as measured by the daily changes in the price of the futures contract for heating oil (also known as No. 2 fuel oil) for delivery to the New York harbor, traded on the NYMEX that is the near month contract to expire, except when the near month contract is within two weeks of expiration, in which case it will be measured by the futures contract that is the next month contract to expire (the Benchmark Futures Contract), less USHO's expenses. Near month contract means the next contract traded on the NYMEX due to expire. Next month contract means the first contract traded on the NYMEX due to expire after the near month contract. It is not the intent of USHO to be operated in a fashion such that the per unit NAV will equal, in dollar terms, the spot price of heating oil or any particular futures contract based on heating oil. It is not the intent of USHO to be operated in a fashion such that its per unit NAV will reflect the percentage change of the price of any particular futures contract as measured over a time period greater than one day. USCF believes that it is not practical to manage the portfolio to achieve such an investment goal when investing in Futures Contracts and Other Heating Oil-Related Investments.

USHO seeks to achieve its investment objective by investing in a combination of Futures Contracts and Other Heating Oil-Related Investments such that changes in its per unit NAV, measured in percentage terms, will closely track the changes in the price of the Benchmark Futures Contract, also measured in percentage terms. USCF believes the daily changes in the price of the Benchmark Futures Contract have historically exhibited a close correlation with the daily changes in the spot price of heating oil. It is not the intent of USHO to be operated in a fashion such that the per unit NAV will equal, in dollar terms, the spot price of heating oil or any particular futures contract based on heating oil. It is not the intent of USHO to be operated in a fashion such that its per unit NAV will reflect the percentage change of the price of any particular futures contract as measured over a time period greater than one day. USCF believes that it is not practical to manage the portfolio to achieve such an investment goal when investing in Futures Contracts and Other Heating Oil-Related Investments.

The regulation of commodity interests in the United States is subject to ongoing modification by governmental and judicial action. On July 21, 2010, a broad financial regulatory reform bill, the Dodd-Frank Act, was signed into law. All of the Dodd-Frank Act's provisions became effective on July 16, 2011. However, some new rules implementing, and in many cases, interpreting and clarifying, the Dodd-Frank Act's new requirements have not been completely finalized and have been challenged in court. Pending final resolution of all applicable regulatory requirements, some specific examples of how the new Dodd-Frank Act provisions and rules adopted thereunder could impact USHO are discussed in *Item 1. Business* and *Item 1A. Risk Factors* in this annual report on Form 10-K.

Price Movements

Heating oil futures prices were volatile during the year ended December 31, 2011 with a general upward trend through the year ended December 31, 2011. The price of the Benchmark Futures Contract started the year at \$2.54 per gallon. It hit a peak on April 8, 2011 at a price of \$3.32 per gallon. The low of the year was on January 7, 2011, when the price dropped to \$2.49 per gallon. The year ended with the Benchmark Futures Contract at \$2.91 per gallon, an increase of approximately 14.62% over the year. USHO's per unit NAV began the year at \$29.82 and reached its high for the year on April 8, 2011 at \$38.60. USHO's per unit NAV reached its low for the year on January 7, 2011 at \$29.16. USHO's per unit NAV on December 31, 2011 was \$32.79, up approximately 9.96% for the year. The Benchmark Futures Contract prices listed above began with the February 2011 contract and ended with the February 2012 contract. The return of approximately 14.62% on the Benchmark Futures Contract listed above is a hypothetical return only and could not actually be achieved by an investor holding Futures Contracts. An investment in Futures Contracts would need to be rolled forward during the time period described in order to achieve such a result. Furthermore, the change in the nominal price of these differing Futures Contracts, measured from the start of the year to the end of the year, does not represent the actual benchmark results that USHO seeks to track, which are more fully described below in the section titled *Tracking USHO's Benchmark*.

During the year ended December 31, 2011, the heating oil futures market was in a state of contango for the majority of the year, with notable exceptions in October and November 2011, meaning that the price of the near month Futures Contract was typically lower than the price of the next month Futures Contract, or contracts further away from expiration. A backwardation market is one in which the price of the near month heating oil futures contract is higher than the price of the next month heating oil futures contract, or contracts further away from expiration. For a discussion of the impact of backwardation and contango on total returns, see *Term Structure of Heating Oil Futures Prices and the Impact on Total Returns* below.

Table of Contents

Valuation of Futures Contracts and the Computation of the NAV

The NAV of USHO's units is calculated once each NYSE Arca trading day. The per unit NAV for a particular trading day is released after 4:00 p.m. New York time. Trading during the core trading session on the NYSE Arca typically closes at 4:00 p.m. New York time. The Administrator uses the NYMEX closing price (determined at the earlier of the close of the NYMEX or 2:30 p.m. New York time) for the contracts held on the NYMEX, but calculates or determines the value of all other USHO investments, including ICE Futures contracts or other futures contracts, as of the earlier of the close of the NYSE Arca or 4:00 p.m. New York time.

Results of Operations and the Heating Oil Market

Results of Operations. On April 9, 2008, USHO listed its units on the AMEX under the ticker symbol UHN. On that day, USHO established its initial offering price at \$50.00 per unit and issued 200,000 units to the initial authorized purchaser, Merrill Lynch Professional Clearing Group., in exchange for \$10,001,000 in cash. As a result of the acquisition of the AMEX by NYSE Euronext, USHO's units no longer trade on the AMEX and commenced trading on the NYSE Arca on November 25, 2008.

Since its initial offering of 10,000,000 units, USHO has registered one subsequent offering of its units: 50,000,000 units which were registered with the SEC on April 30, 2010. Units offered by USHO in the subsequent offering were sold by it for cash at the units' per unit NAV as described in the applicable prospectus. As of December 31, 2011, USHO had issued 1,000,000 units, 300,000 of which were outstanding. As of December 31, 2011, there were 59,000,000 units registered but not yet issued.

More units may have been issued by USHO than are outstanding due to the redemption of units. Unlike funds that are registered under the 1940 Act, units that have been redeemed by USHO cannot be resold by USHO. As a result, USHO contemplates that additional offerings of its units will be registered with the SEC in the future in anticipation of additional issuances and redemptions.

For the Year Ended December 31, 2011 Compared to the Years Ended December 31, 2010 and 2009

As of December 31, 2011, the total unrealized gain on Futures Contracts owned or held on that day was \$348,096 and USHO established cash deposits and investments in Treasuries and money market funds that were equal to \$9,273,987. USHO held 93.05% of its cash assets in overnight deposits and money market funds at the Custodian, while 6.95% of the cash balance was held as margin deposits for the Futures Contracts purchased. The ending per unit NAV on December 31, 2011 was \$32.79.

By comparison, as of December 31, 2010, the total unrealized gain on Futures Contracts owned or held on that day was \$267,658 and USHO established cash deposits and investments in money market funds that were equal to \$11,445,529. USHO held 90.91% of its cash assets in overnight deposits and money market funds at the Custodian, while 9.09% of the cash balance was held as margin deposits for the Futures Contracts purchased. The decrease in cash assets in overnight deposits, Treasuries and money market funds for December 31, 2011, as compared to December 31, 2010, was the result of USHO's smaller size in the current period as measured by total net assets. The ending per unit NAV on December 31, 2010 was \$29.82. The increase in the per unit NAV for December 31, 2011, as compared to December 31, 2010, was primarily a result of higher prices for heating oil and the related increase in the value of the Futures Contracts that USHO had invested in between the year ended December 31, 2010 and the year ended December 31, 2011.

By comparison, as of December 31, 2009, the total unrealized gain on Futures Contracts owned or held on that day was \$1,088,212 and USHO established cash deposits and investments in money market funds that were equal to \$15,278,523. USHO held 88.50% of its cash assets in overnight deposits and money market funds at the Custodian, while 11.50% of the cash balance was held as margin deposits for the Futures Contracts purchased. The decrease in cash assets in overnight deposits and money market funds for December 31, 2010, as compared to December 31, 2009, was the result of USHO's smaller size for the year ended December 31, 2010 as measured by total net assets. The ending per unit NAV on December 31, 2009 was \$27.54. The increase in the per unit NAV for December 31, 2010, as compared to December 31, 2009, was primarily a result of higher prices for heating oil and the related increase in the value of the Futures Contracts that USHO had invested in between the year ended December 31, 2009 and the year ended December 31, 2010.

Table of Contents

Portfolio Expenses. USHO's expenses consist of investment management fees, brokerage fees and commissions, certain offering costs, licensing fees, the fees and expenses of the independent directors of USCF and expenses relating to tax accounting and reporting requirements. The management fee that USHO pays to USCF is calculated as a percentage of the total net assets of USHO. USHO pays USCF a management fee of 0.60% of its average net assets. The fee is accrued daily and paid monthly.

During the year ended December 31, 2011, the average total net assets of USHO were \$8,800,419. The management fee incurred by USHO during the year amounted to \$52,803. By comparison, during the year ended December 31, 2010, the average total net assets of USHO were \$11,126,672. The management fee paid by USHO during the year amounted to \$66,760. By comparison, during the year ended December 31, 2009, the average total net assets of USHO were \$9,481,712. The management fee paid by USHO amounted to \$56,890.

In addition to the management fee, USHO pays all brokerage fees and other expenses, including tax reporting costs, licensing fees for the use of intellectual property, ongoing registration or other fees paid to the SEC, FINRA and any other regulatory agency in connection with offers and sales of its units subsequent to the initial offering and all legal, accounting, printing and other expenses associated therewith. The gross total of these fees and expenses for the year ended December 31, 2011 was \$158,465, as compared to \$216,692 for the year ended December 31, 2010 and \$239,633 for the year ended December 31, 2009. The decrease in gross total expenses excluding management fees for the year ended December 31, 2011, as compared to the years ended December 31, 2010 and 2009, was primarily due to the relative size of USHO and activity that resulted from its decreased size, including decreased brokerage fees and tax reporting costs during the year ended December 31, 2011. For the year ended December 31, 2011, USHO incurred \$7,300 in ongoing registration fees and other expenses relating to the registration and offering of additional units. By comparison, for the years ended December 31, 2010 and 2009, USHO incurred \$1,571 and \$288, respectively, in ongoing registration fees and other expenses relating to the registration and offering of additional units. The increase in registration fees and expenses incurred by USHO for the year ended December 31, 2011, as compared to the years ended December 31, 2010 and 2009, was primarily due to an increase in creation and redemption activity during the year ended December 31, 2011. During the years ended December 31, 2011, 2010 and 2009, an expense waiver was in effect which offset certain of the expenses incurred by USHO. The total amount of the expense waiver was \$132,085 for the year ended December 31, 2011, \$182,968 for the year ended December 31, 2010 and \$211,527 for the year ended December 31, 2009. For the years ended December 31, 2011, 2010 and 2009, the expenses of USHO, including management fees, commissions, and all other expenses, before allowance for the expense waiver, totaled \$211,268, \$283,452 and \$296,523, respectively, and after allowance for the expense waiver totaled, \$79,183, \$100,484 and \$84,996, respectively.

USHO is responsible for paying its portion of the directors' and officers' liability insurance of USHO and the Related Public Funds and the fees and expenses of the independent directors who also serve as audit committee members of USHO and the Related Public Funds organized as limited partnerships and, as of July 8, 2011, the Related Public Funds organized as a series of a Delaware statutory trust. USHO shares the fees and expenses with each Related Public Fund, as described above, based on the relative assets of each fund computed on a daily basis. These fees and expenses for the year ended December 31, 2011 amounted to a total of \$607,582 for USHO and the Related Public Funds. USHO's portion of such fees and expenses was \$1,383. By comparison, for the year ended December 31, 2010, these fees and expenses amounted to a total of \$1,107,140 for USHO and the Related Public Funds, except USCI, USAG, CPER and USMI. USHO's portion of such fees and expenses was \$2,864. The decrease in directors' fees and expenses for the year ended December 31, 2011, as compared to the year ended December 31, 2010 was due to the non-incurrence of the independent directors' deferred compensation expense for the year ended December 31, 2011. Effective as of April 1, 2010, USHO became responsible for paying its portion of any payments that may become due to the independent directors pursuant to the deferred compensation agreements entered into between the independent directors, USCF, USHO and the Related Public Funds, except USCI, USAG, CPER and USMI. By comparison, for the year ended December 31, 2009, these fees and expenses amounted to a total of \$433,046 for USHO and the Related Public Funds, except USCI, USAG, CPER and USMI. USHO's portion of such fees and expenses was \$645. The increase in directors' fees and expenses for the year ended December 31, 2010, as compared to the year ended December 31, 2009, was primarily due to an increase in the amount of directors' and officers' liability insurance coverage and the incurrence of the independent directors' deferred compensation expense in 2010. Effective as of March 3, 2009, USCF obtained directors' and officers' liability insurance covering all of the directors and officers of USCF. Previously, USCF did not have liability insurance for its directors and officers; instead, the independent directors received a payment in lieu of directors' and officers' liability insurance coverage.

Table of Contents

USHO also incurs commissions to brokers for the purchase and sale of Futures Contracts, Other Heating Oil-Related Investments or Treasuries. During the year ended December 31, 2011, total commissions paid to brokers amounted to \$5,568. By comparison, during the years ended December 31, 2010 and 2009, total commissions paid to brokers amounted to \$9,950 and \$10,718, respectively. The decrease in the total commissions paid to brokers for the year ended December 31, 2011 as compared to the year ended December 31, 2010 was primarily a function of fewer Futures Contracts traded due to USHO's smaller size and fewer creations and redemptions during the year ended December 31, 2011. The decrease in assets required USHO to purchase fewer Futures Contracts and incur a smaller amount of brokerage commissions. The decrease in the total commissions paid to brokers for the year ended December 31, 2010, as compared to the year ended December 31, 2009, was primarily a function of fewer Futures Contracts traded during the year ended December 31, 2010. As an annualized percentage of average total net assets, the figure for the year ended December 31, 2011 represents approximately 0.06% of average total net assets. By comparison, the figure for the year ended December 31, 2010 represented approximately 0.09% of average total net assets and the figure for the year ended December 31, 2009 represented approximately 0.11% of average total net assets. However, there can be no assurance that commission costs and portfolio turnover will not cause commission expenses to rise in future quarters.

The fees and expenses associated with USHO's audit expenses and tax accounting and reporting requirements are paid by USHO. These costs are estimated to be \$45,000 for the year ended December 31, 2011. USCF, though under no obligation to do so, agreed to pay certain expenses normally borne by USHO to the extent that such expenses exceeded 0.15% (15 basis points) of USHO's NAV, on an annualized basis, through at least June 30, 2012. USCF has no obligation to continue such payments into subsequent periods.

Dividend and Interest Income. USHO seeks to invest its assets such that it holds Futures Contracts and Other Heating Oil-Related Investments in an amount equal to the total net assets of its portfolio. Typically, such investments do not require USHO to pay the full amount of the contract value at the time of purchase, but rather require USHO to post an amount as a margin deposit against the eventual settlement of the contract. As a result, USHO retains an amount that is approximately equal to its total net assets, which USHO invests in Treasuries, cash and/or cash equivalents. This includes both the amount on deposit with the futures commission merchant as margin, as well as unrestricted cash and cash equivalents held with USHO's Custodian. The Treasuries, cash and/or cash equivalents earn income that accrues on a daily basis. For the year ended December 31, 2011, USHO earned \$1,838 in dividend and interest income on such cash and/or cash equivalents. Based on USHO's average total net assets, this was equivalent to an annualized yield of 0.02%. USHO purchased Treasuries during the year ended December 31, 2011 and also held cash and/or cash equivalents during this time period. By comparison, for the years ended December 31, 2010 and 2009, USHO earned \$4,212 and \$12,180, respectively, in dividend and interest income on such cash and/or cash equivalents. Based on USHO's average total net assets, this was equivalent to an annualized yield of 0.04% and 0.13%, respectively. USHO did not purchase Treasuries during the years ended December 31, 2010 or 2009 and held only cash and/or cash equivalents during these time periods. Interest rates on short-term investments, including cash, cash equivalents and Treasuries, were lower during the year ended December 31, 2011 compared to the years ended December 31, 2010 and 2009. As a result, the amount of income earned by USHO as a percentage of average total net assets was lower during the year ended December 31, 2011 compared to the years ended December 31, 2010 and 2009.

For the Three Months Ended December 31, 2011 Compared to the Three Months Ended December 31, 2010 and 2009

Portfolio Expenses. During the three months ended December 31, 2011, the average total net assets of USHO were \$8,016,105. The management fee incurred by USHO during the period amounted to \$12,123. By comparison, during the three months ended December 31, 2010, the average total net assets of USHO were \$9,787,332. The management fee paid by USHO during the period amounted to \$14,802. By comparison, during the three months ended December 31, 2009, the average total net assets of USHO were \$15,930,467. The management fee paid by USHO during the period amounted to \$24,092.

Table of Contents

In addition to the management fee, USHO pays all brokerage fees and other expenses, including tax reporting costs, licensing fees for the use of intellectual property, ongoing registration or other fees paid to the SEC, FINRA and any other regulatory agency in connection with offers and sales of its units subsequent to the initial offering and all legal, accounting, printing and other expenses associated therewith. The gross total of these fees and expenses for the three months ended December 31, 2011 was \$3,810, as compared to \$44,169 for the three months ended December 31, 2010 and \$155,788 for the three months ended December 31, 2009. The decrease in gross total expenses excluding management fees for the three months ended December 31, 2011, as compared to the three months ended December 31, 2010 and December 31, 2009 was primarily due to the relative size of USHO and activity that resulted from its decreased size, including decreased brokerage fees, decreased licensing fees and decreased tax reporting costs during the three months ended December 31, 2011. The decrease in gross total expenses excluding management fees was especially impacted by a lower revised estimate for tax reporting costs for the three months ended December 31, 2011 as compared to the three months ended December 31, 2010 and December 31, 2009. For the three months ended December 31, 2011, USHO incurred \$1,840 in ongoing registration fees and other expenses relating to the registration and offering of additional units. By comparison, for the three months ended December 31, 2010 and 2009, USHO incurred \$368 and \$288, respectively, in ongoing registration fees and other expenses relating to the registration and offering of additional units. The increase in registration fees and expenses incurred by USHO for the three months ended December 31, 2011, as compared to the three months ended December 31, 2010 and 2009, was primarily due to an increase in creation and redemption activity during the three months ended December 31, 2011. During the three months ended December 31, 2011, 2010 and 2009, an expense waiver was in effect which offset certain of the expenses incurred by USHO. During the three months ended December 31, 2011, USHO's expenses did not exceed 0.15% (15 basis points) of its NAV; therefore, no expenses were waived by USCF. During the three months ended December 31, 2010 and 2009, the total amount of the expense waiver was \$36,988 and \$144,652, respectively. For the three months ended December 31, 2010 and 2009, the expenses of USHO, including management fees, commissions, and all other expenses, before allowance for the expense waiver, totaled \$58,971 and \$179,880, respectively, and after allowance for the expense waiver, totaled \$21,983 and \$35,228, respectively.

USHO is responsible for paying its portion of the directors' and officers' liability insurance of USHO and the Related Public Funds and the fees and expenses of the independent directors who also serve as audit committee members of USHO and the Related Public Funds organized as limited partnerships and, as of July 8, 2011, the Related Public Funds organized as a series of a Delaware statutory trust. USHO shares the fees and expenses with each Related Public Fund, as described above, based on the relative assets of each fund computed on a daily basis. These fees and expenses for the year ended December 31, 2011 amounted to a total of \$607,582 for USHO and the Related Public Funds. USHO's portion of such fees and expenses was \$1,383.

USHO also incurs commissions to brokers for the purchase and sale of Futures Contracts, Other Heating Oil-Related Investments or Treasuries. During the three months ended December 31, 2011, total commissions paid to brokers amounted to \$1,328. By comparison, during the three months ended December 31, 2010 and 2009, total commissions paid to brokers amounted to \$2,027 and \$3,663, respectively. The decrease in the total commissions paid to brokers for the three months ended December 31, 2011, as compared to the three months ended December 31, 2010 and 2009, was primarily a function of fewer Futures Contracts traded due to USHO's smaller size during the three months ended December 31, 2011. As an annualized percentage of average total net assets, the figure for the three months ended December 31, 2011 represents approximately 0.07% of average total net assets. By comparison, the figure for the three months ended December 31, 2010 represented approximately 0.08% of average total net assets and the figure for the three months ended December 31, 2009 represented approximately 0.09% of average total net assets. However, there can be no assurance that commission costs and portfolio turnover will not cause commission expenses to rise in future quarters.

The fees and expenses associated with USHO's audit expenses and tax accounting and reporting requirements are paid by USHO.

Table of Contents

Dividend and Interest Income. USHO seeks to invest its assets such that it holds Futures Contracts and Other Heating Oil-Related Investments in an amount equal to the total net assets of its portfolio. Typically, such investments do not require USHO to pay the full amount of the contract value at the time of purchase, but rather require USHO to post an amount as a margin deposit against the eventual settlement of the contract. As a result, USHO retains an amount that is approximately equal to its total net assets, which USHO invests in Treasuries, cash and/or cash equivalents. This includes both the amount on deposit with the futures commission merchant as margin, as well as unrestricted cash and cash equivalents held with USHO's Custodian. The Treasuries, cash and/or cash equivalents earn income that accrues on a daily basis. For the three months ended December 31, 2011, USHO earned \$495 in dividend and interest income on such cash and/or cash equivalents. Based on USHO's average total net assets, this was equivalent to an annualized yield of 0.02%. USHO purchased Treasuries during the three months ended December 31, 2011 and also held cash and/or cash equivalents during this time period. By comparison, for the three months ended December 31, 2010 and 2009, USHO earned \$1,158 and \$2,153, respectively, in dividend and interest income on such cash and/or cash equivalents. Based on USHO's average total net assets, this was equivalent to an annualized yield of 0.05% and 0.05%, respectively. USHO did not purchase Treasuries during the three months ended December 31, 2010 or 2009 and held only cash and/or cash equivalents during these time periods. Interest rates on short-term investments, including cash, cash equivalents and Treasuries, were lower during the three months ended December 31, 2011 compared to the three months ended December 31, 2010 and 2009. As a result, the amount of income earned by USHO as a percentage of average total net assets was lower during the three months ended December 31, 2011 compared to the three months ended December 31, 2010 and 2009.

Tracking USHO's Benchmark. USCF seeks to manage USHO's portfolio such that changes in its average daily per unit NAV, on a percentage basis, closely track the changes in the average daily price of the Benchmark Futures Contract, also on a percentage basis. Specifically, USCF seeks to manage the portfolio such that over any rolling period of 30 valuation days, the average daily change in USHO's per unit NAV is within a range of 90% to 110% (0.9 to 1.1) of the average daily change in the price of the Benchmark Futures Contract. As an example, if the average daily movement of the price of the Benchmark Futures Contract for a particular 30-valuation day time period was 0.5% per day, USCF would attempt to manage the portfolio such that the average daily movement of the per unit NAV during that same time period fell between 0.45% and 0.55% (*i.e.*, between 0.9 and 1.1 of the benchmark's results). USHO's portfolio management goals do not include trying to make the nominal price of USHO's per unit NAV equal to the nominal price of the current Benchmark Futures Contract or the spot price for heating oil. USCF believes that it is not practical to manage the portfolio to achieve such an investment goal when investing in listed Futures Contracts.

For the 30 valuation days ended December 31, 2011, the simple average daily change in the Benchmark Futures Contract was (0.252)%, while the simple average daily change in the per unit NAV of USHO over the same time period was (0.257)%. The average daily difference was (0.005)% (or (0.5) basis points, where 1 basis point equals 1/100 of 1%). As a percentage of the daily movement of the Benchmark Futures Contract, the average error in daily tracking by the per unit NAV was (2.295)%, meaning that over this time period USHO's tracking error was within the plus or minus 10% range established as its benchmark tracking goal. The first chart below shows the daily movement of USHO's per unit NAV versus the daily movement of the Benchmark Futures Contract for the 30-valuation day period ended December 31, 2011. The second chart below shows the monthly total returns of USHO as compared to the monthly value of the Benchmark Futures Contract since inception.

Since the commencement of the offering of USHO's units to the public on April 9, 2008 to December 31, 2011, the simple average daily change in the Benchmark Futures Contract was (0.0157)%, while the simple average daily change in the per unit NAV of USHO over the same time period was (0.0174)%. The average daily difference was (0.0017)% (or (0.17) basis points, where 1 basis point equals 1/100 of 1%). As a percentage of the daily movement of the Benchmark Futures Contract, the average error in daily tracking by the per unit NAV was (0.807)%, meaning that over this time period USHO's tracking error was within the plus or minus 10% range established as its benchmark tracking goal.

Table of Contents

**PAST PERFORMANCE IS NOT NECESSARILY INDICATIVE OF FUTURE RESULTS*

Table of Contents****PAST PERFORMANCE IS NOT NECESSARILY INDICATIVE OF FUTURE RESULTS***

An alternative tracking measurement of the return performance of USHO versus the return of its Benchmark Futures Contract can be calculated by comparing the actual return of USHO, measured by changes in its per unit NAV, versus the *expected* changes in its per unit NAV under the assumption that USHO's returns had been exactly the same as the daily changes in its Benchmark Futures Contract.

For the year ended December 31, 2011, the actual total return of USHO as measured by changes in its per unit NAV was 9.96%. This is based on an initial per unit NAV of \$29.82 on December 31, 2010 and an ending per unit NAV as of December 31, 2011 of \$32.79. During this time period, USHO made no distributions to its unitholders. However, if USHO's daily changes in its per unit NAV had instead exactly tracked the changes in the daily total return of the Benchmark Futures Contract, USHO would have had an estimated per unit NAV of \$33.07 as of December 31, 2011, for a total return over the relevant time period of 10.90%. The difference between the actual per unit NAV total return of USHO of 9.96% and the expected total return based on the Benchmark Futures Contract of 10.90% was an error over the time period of (0.94)%, which is to say that USHO's actual total return underperformed the benchmark result by that percentage. USCF believes that a portion of the difference between the actual total return and the expected benchmark total return can be attributed to the net impact of the expenses that USHO pays, offset in part by the income that USHO collects on its cash and cash equivalent holdings. During the year ended December 31, 2011, USHO received dividend and interest income of \$1,838 which is equivalent to a weighted average income rate of 0.02% for such period. In addition, during the year ended December 31, 2011, USHO also collected \$2,350 from its Authorized Purchasers for creating or redeeming baskets of units. This income also contributed to USHO's actual total return. During the year ended December 31, 2011, USHO incurred net expenses of \$79,183. Income from dividends and interest and Authorized Purchaser collections net of expenses was \$(74,995), which is equivalent to a weighted average net income rate of (0.85)% for the year ended December 31, 2011.

By comparison, for the year ended December 31, 2010, the actual total return of USHO as measured by changes in its per unit NAV was 8.28%. This was based on an initial per unit NAV of \$27.54 on December 31, 2009 and an ending per unit NAV as of December 31, 2010 of \$29.82. During this time period, USHO made no distributions to its unitholders. However, if USHO's daily changes in its per unit NAV had instead exactly tracked the changes in the daily total return of the Benchmark Futures Contract, USHO would have had an estimated per unit NAV of \$29.88 as of December 31, 2010, for a total return over the relevant time period of 8.49%. The difference between the actual per unit NAV total return of USHO of 8.28% and the expected total return based on the Benchmark Futures Contract of 8.49% was an error over the time period of (0.21)%, which is to say that USHO's actual total return underperformed the benchmark result by that percentage. USCF believes that a portion of the difference between the actual total return and the expected benchmark total return can be attributed to the net impact of the expenses that USHO paid, offset in part by the income that USHO collected on its cash and cash equivalent holdings. During the year ended December 31, 2010, USHO received dividend and interest income of \$4,212, which is equivalent to a weighted average income rate of 0.04% for such period. In addition, during the year ended December 31, 2010, USHO also collected \$4,000 from its Authorized Purchasers for creating or redeeming baskets of units. This income also contributed to USHO's actual total return. During the year ended December 31, 2010, USHO incurred net expenses of \$100,484. Income from dividends and interest and Authorized Purchaser collections net of expenses was \$(92,272) which is equivalent to a weighted average net income rate of (0.83)% for the year ended December 31, 2010.

Table of Contents

By comparison, for the year ended December 31, 2009, the actual total return of USHO as measured by changes in its per unit NAV was 25.52%. This was based on an initial per unit NAV of \$21.94 on December 31, 2008 and an ending per unit NAV as of December 31, 2009 of \$27.54. During this time period, USHO made no distributions to its unitholders. However, if USHO's daily changes in its per unit NAV had instead exactly tracked the changes in the daily total return of the Benchmark Futures Contract, USHO would have had an estimated per unit NAV of \$27.64 as of December 31, 2009, for a total return over the relevant time period of 25.99%. The difference between the actual per unit NAV total return of USHO of 25.52% and the expected total return based on the Benchmark Oil Futures Contract of 25.99% was an error over the time period of (0.47)%, which is to say that USHO's actual total return underperformed the benchmark result by that percentage. USCF believes that a portion of the difference between the actual total return and the expected benchmark total return can be attributed to the net impact of the expenses that USHO paid, offset in part by the income that USHO collected on its cash and cash equivalent holdings. During the year ended December 31, 2009, USHO received dividend and interest income of \$12,180, which is equivalent to a weighted average income rate of 0.13% for such period. In addition, during the year ended December 31, 2009, USHO also collected \$3,000 from its Authorized Purchasers for creating or redeeming baskets of units. This income also contributed to USHO's actual total return. During the year ended December 31, 2009, USHO incurred net expenses of \$84,996. Income from dividends and interest and Authorized Purchaser collections net of expenses was \$(69,816), which is equivalent to a weighted average net income rate of (0.73)% for the year ended December 31, 2009.

There are currently three factors that have impacted or are most likely to impact USHO's ability to accurately track its Benchmark Futures Contract.

First, USHO may buy or sell its holdings in the then current Benchmark Futures Contract at a price other than the closing settlement price of that contract on the day during which USHO executes the trade. In that case, USHO may pay a price that is higher, or lower, than that of the Benchmark Futures Contract, which could cause the changes in the daily per unit NAV of USHO to either be too high or too low relative to the changes in the Benchmark Futures Contract. During the year ended December 31, 2011, USCF attempted to minimize the effect of these transactions by seeking to execute its purchase or sale of the Benchmark Futures Contract at, or as close as possible to, the end of the day settlement price. However, it may not always be possible for USHO to obtain the closing settlement price and there is no assurance that failure to obtain the closing settlement price in the future will not adversely impact USHO's attempt to track the Benchmark Futures Contract over time.

Second, USHO earns dividend and interest income on its cash and cash equivalents. USHO is not required to distribute any portion of its income to its unitholders and did not make any distributions to unitholders during the year ended December 31, 2011. Interest payments, and any other income, were retained within the portfolio and added to USHO's NAV. When this income exceeds the level of USHO's expenses for its management fee, brokerage commissions and other expenses (including ongoing registration fees, licensing fees and the fees and expenses of the independent directors of USCF), USHO will realize a net yield that will tend to cause daily changes in the per unit NAV of USHO to track slightly higher than daily changes in the Benchmark Futures Contract. During the year ended December 31, 2011, USHO earned, on an annualized basis, approximately 0.02% on its cash and cash equivalent holdings. It also incurred cash expenses on an annualized basis of 0.60% for management fees, approximately 0.06% in brokerage commission costs related to the purchase and sale of futures contracts, and 0.24% for other expenses. The foregoing fees and expenses resulted in a net yield on an annualized basis of approximately (0.88)% and affected USHO's ability to track its benchmark. If short-term interest rates rise above the current levels, the level of deviation created by the yield would decrease. Conversely, if short-term interest rates were to decline, the amount of error created by the yield would increase. When short-term yields drop to a level lower than the combined expenses of the management fee and the brokerage commissions, then the tracking error becomes a negative number and would tend to cause the daily returns of the per unit NAV to underperform the daily returns of the Benchmark Futures Contract.

Table of Contents

Third, USHO may hold Other Heating Oil-Related Investments in its portfolio that may fail to closely track the Benchmark Futures Contract's total return movements. In that case, the error in tracking the Benchmark Futures Contract could result in daily changes in the per unit NAV of USHO that are either too high, or too low, relative to the daily changes in the Benchmark Futures Contract. During the year ended December 31, 2011, USHO did not hold any Other Heating Oil-Related Investments. If USHO increases in size, and due to its obligations to comply with regulatory limits, USHO may invest in Other Heating Oil-Related Investments which may have the effect of increasing transaction related expenses and may result in increased tracking error.

Term Structure of Heating Oil Futures Prices and the Impact on Total Returns. Several factors determine the total return from investing in a futures contract position. One factor that impacts the total return that will result from investing in near month Futures Contracts and rolling those contracts forward each month is the price relationship between the current near month contract and the next month contract. For example, if the price of the near month contract is higher than the next month contract (a situation referred to as backwardation in the futures market), then absent any other change there is a tendency for the price of a next month contract to rise in value as it becomes the near month contract and approaches expiration. Conversely, if the price of a near month contract is lower than the next month contract (a situation referred to as contango in the futures market), then absent any other change there is a tendency for the price of a next month contract to decline in value as it becomes the near month contract and approaches expiration.

As an example, assume that the price of heating oil for immediate delivery (the spot price), was \$2 per gallon, and the value of a position in the near month futures contract was also \$2. Over time, the price of a gallon of heating oil will fluctuate based on a number of market factors, including demand for heating oil relative to its supply. The value of the near month contract will likewise fluctuate in reaction to a number of market factors. If investors seek to maintain their position in a near month contract and not take delivery of the heating oil, every month they must sell their current near month contract as it approaches expiration and invest in the next month contract.

If the futures market is in backwardation, *e.g.*, when the expected price of heating oil in the future would be less, the investor would be buying a next month contract for a lower price than the current near month contract. Using the \$2 per barrel price above to represent the front month price, the price of the next month contract could be \$1.96 per barrel, that is, 2% cheaper than the front month contract. Hypothetically, and assuming no other changes to either prevailing heating oil prices or the price relationship between the spot price, the near month contract and the next month contract (and ignoring the impact of commission costs and the income earned on cash and/or cash equivalents), the value of the \$1.96 next month contract would rise as it approaches expiration and becomes the new near month contract with a price of \$2. In this example, the value of an investment in the second month contract would tend to rise faster than the spot price of heating oil, or fall slower. As a result, it would be possible in this hypothetical example for the spot price of heating oil to have risen 10% after some period of time, while the value of the investment in the second month futures contract would have risen 12%, assuming backwardation is large enough or enough time has elapsed. Similarly, the spot price of heating oil could have fallen 10% while the value of an investment in the futures contract could have fallen only 8%. Over time, if backwardation remained constant, the difference would continue to increase.

If the futures market is in contango, the investor would be buying a next month contract for a higher price than the current near month contract. Using again the \$2 per barrel price above to represent the front month price, the price of the next month contract could be \$2.04 per barrel, that is, 2% more expensive than the front month contract. Hypothetically, and assuming no other changes to either prevailing heating oil prices or the price relationship between the spot price, the near month contract and the next month contract (and ignoring the impact of commission costs and the income earned on cash and/or cash equivalents), the value of the next month contract would fall as it approaches expiration and becomes the new near month contract with a price of \$2. In this example, it would mean that the value of an investment in the second month would tend to rise slower than the spot price of heating oil, or fall faster. As a result, it would be possible in this hypothetical example for the spot price of heating oil to have risen 10% after some period of time, while the value of the investment in the second month futures contract will have risen only 8%, assuming contango is large enough or enough time has elapsed. Similarly, the spot price of heating oil could have fallen 10% while the value of an investment in the second month futures contract could have fallen 12%. Over time, if contango remained constant, the difference would continue to increase.

Table of Contents

The chart below compares the price of the near month contract to the price of the next month contract over the last 10 years (2002-2011). When the price of the near month contract is higher than the price of the next month contract, the market would be described as being in backwardation. When the price of the near month contract is lower than the price of the next month contract, the market would be described as being in contango. Although the prices of the near month contract and the price of the next month contract do tend to move up or down together, it can be seen that at times the near month prices are clearly higher than the price of the next month contract (backwardation), and other times they are below the price of the next month contract (contango). In addition, investors can observe that heating oil prices, both near month and next month, often display a seasonal pattern in which the price of heating oil tends to decline in the summer months and increase in the winter months. This mirrors the physical demand for heating oil, which typically peaks in the winter.

****PAST PERFORMANCE IS NOT NECESSARILY INDICATIVE OF FUTURE RESULTS***

An alternative way to view backwardation and contango data over time is to subtract the dollar price of the next month heating oil futures contract from the dollar price of the near month heating oil futures contract. If the resulting number is a positive number, then the price of the near month contract is higher than the price of the next month and the market could be described as being in backwardation. If the resulting number is a negative number, then the near month price is lower than the price of the next month and the market could be described as being in contango. The chart below shows the results from subtracting the next month contract price from the price of the near month contract for the 10-year period between 2002 and 2011. Investors will note that the near month heating oil futures contract spent time in both backwardation and contango. Investors will further note that the markets display a very seasonal pattern that corresponds to the seasonal demand patterns for heating oil mentioned above. That is, in many, but not all cases, the price of the near month is higher than the next month during the middle of the winter months as the price of heating oil for delivery in those winter months rises to meet peak demand. At the same time, the price of the near month contract, when that month is just before the onset of fall, does not rise as far or as fast as the price of a next month contract whose delivery falls closer to the start of the winter season.

Table of Contents

****PAST PERFORMANCE IS NOT NECESSARILY INDICATIVE OF FUTURE RESULTS***

While the investment objective of USHO is not to have the market price of its units match, dollar for dollar, changes in the spot price of heating oil, contango and backwardation have impacted the total return on an investment in USHO units during the past year relative to a hypothetical direct investment in heating oil. For example, an investment in USHO units made on December 31, 2010 and held to December 31, 2011 increased, based upon the changes in the NAV for USHO units on those days, by 9.96%, while the spot price of heating oil for immediate delivery during the same period increased by 14.62%. By comparison, an investment in USHO units made on December 31, 2009 and held to December 31, 2010 increased, based upon the changes in the NAV for USHO units on those days, by 8.28%, while the spot price of heating oil for immediate delivery during the same period increased by 20.17% (note: this comparison ignores the potential costs associated with physically owning and storing heating oil, which could be substantial).

Periods of contango or backwardation do not materially impact USHO's investment objective of having the percentage changes in its per unit NAV track the percentage changes in the price of the Benchmark Futures Contract since the impact of backwardation and contango tend to equally impact the percentage changes in price of both USHO's units and the Benchmark Futures Contract. It is impossible to predict with any degree of certainty whether backwardation or contango will occur in the future. It is likely that both conditions will occur during different periods.

Table of Contents

Heating Oil Market. During the year ended December 31, 2011, the price of heating oil in the United States, as measured by changes in the price of the futures contract traded on the NYMEX that was closest to expiration, rose by approximately 14.62% from \$2.54 per gallon to \$2.91 per gallon. Investors are cautioned that these represent prices for heating oil on a wholesale basis and should not be directly compared to retail prices.

Crude Oil Market. During the year ended December 31, 2011, prices of crude oil, the raw material from which heating oil is refined, were impacted by several factors. On the consumption side, demand increased inside and outside the United States as global economic growth, including emerging economies such as China and India, continued to improve during 2011. On the supply side, efforts to reduce production by OPEC to more closely match global consumption were partially successful. In the summer of 2011, production was also disrupted by political unrest in the Middle East, particularly Libya, which reduced global supply by approximately 1.8 million barrels per day. On June 23, 2011, the United States and other industrial nations announced the release of 60 million barrels of crude oil from strategic stockpiles in an effort to reduce the price of fuel. This announcement briefly lowered the price of heating oil, but the release of oil from strategic stockpiles did not in and of itself have an impact on the price of heating oil as of December 31, 2011. Crude oil prices finished 2011 approximately 8.15% higher than at the beginning of the year, as the global economy continues to adjust to periods of slow recovery and economic growth. USCF believes that should the global economic situation cease to improve, or decline, there is a meaningful possibility that crude oil prices could further retreat from their current levels.

Heating Oil Price Movements in Comparison to Other Energy Commodities and Investment Categories. USCF believes that investors frequently measure the degree to which prices or total returns of one investment or asset class move up or down in value in concert with another investment or asset class. Statistically, such a measure is usually done by measuring the correlation of the price movements of the two different investments or asset classes over some period of time. The correlation is scaled between 1 and -1, where 1 indicates that the two investment options move up or down in price or value together, known as positive correlation, and -1 indicates that they move in completely opposite directions, known as negative correlation. A correlation of 0 would mean that the movements of the two are neither positively nor negatively correlated, known as non-correlation. That is, the investment options sometimes move up and down together and other times move in opposite directions.

For the ten-year time period between 2002 and 2011, the chart below compares the monthly movements of heating oil prices versus the monthly movements of the prices of several other energy commodities, such as natural gas, crude oil and unleaded gasoline, as well as several major non-commodity investment asset classes, such as large cap U.S. equities, U.S. government bonds and global equities. It can be seen that over this particular time period, the movement of heating oil on a monthly basis was not strongly correlated, positively or negatively, with the movements of large cap U.S. equities, global equities or U.S. government bonds. However, movements in heating oil had a strong positive correlation to movements in crude oil and unleaded gasoline. Heating oil also had a positive, but moderate, correlation with natural gas.

Table of Contents

	Large Cap U.S. Equities (S&P 500)	U.S. Gov t. Bonds (EFFAS U.S. Gov t. Bond Index)	Global Equities (FTSE World Index)	Crude Oil	Unleaded Gasoline	Natural Gas	Heating Oil
Correlation Matrix December 31, 2002-2011							
Large Cap U.S. Equities (S&P 500)	1.000	(0.337)	0.968	0.269	0.189	0.059	0.224

PAST PERFORMANCE IS NOT NECESSARILY INDICATIVE OF FUTURE RESULTS

The chart below covers a more recent, but much shorter, range of dates than the above chart. Over the one-year period ended December 31, 2011, heating oil continued to have a strong positive correlation with unleaded gasoline and crude oil. During this period, heating oil also had a similar positive correlation with the movements of natural gas compared to what it had displayed over the ten-year period ended December 31, 2011. The correlation between heating oil and both large cap U.S. equities and global equities, which had been essentially non-correlated over the ten-year period ended December 31, 2011, displayed results that indicated that they had a positive correlation over this shorter time period particularly due to the recent recovery in the U.S. and global economies. Finally, the results showed that heating oil and U.S. government bonds, which had essentially been non-correlated for the ten-year period ended December 31, 2011, were negatively correlated over this more recent time period.

	Large Cap U.S. Equities (S&P 500)	U.S. Gov t. Bonds (EFFAS U.S. Gov t. Bond Index)	Global Equities (FTSE World Index)	Crude Oil	Unleaded Gasoline	Natural Gas	Heating Oil

PAST PERFORMANCE IS NOT NECESSARILY INDICATIVE OF FUTURE RESULTS

Investors are cautioned that the historical price relationships between heating oil and various other energy commodities, as well as other investment asset classes, as measured by correlation may not be reliable predictors of future price movements and correlation results. The results pictured above would have been different if a different range of dates had been selected. USCF believes that heating oil has historically not demonstrated a strong correlation with equities or bonds over long periods of time. However, USCF also believes that in the future it is possible that heating oil could have long-term correlation results that indicate prices of heating oil more closely track the movements of equities or bonds. In addition, USCF believes that, when measured over time periods shorter than ten years, there will always be some periods where the correlation of heating oil to equities and bonds will be either more strongly positively correlated or more strongly negatively correlated than the long term historical results suggest.

Table of Contents

The correlations between heating oil, crude oil, natural gas and gasoline are relevant because USCF endeavors to invest USHO's assets in Futures Contracts and Other Heating Oil-Related Investments so that daily changes in percentage terms in USHO's per unit NAV correlate as closely as possible with daily changes in percentage terms in the price of the Benchmark Futures Contract. If certain other fuel-based commodity futures contracts do not closely correlate with the heating oil Futures Contract, then their use could lead to greater tracking error. As noted above, USCF also believes that the changes in percentage terms in the price of the Benchmark Futures Contract will closely correlate with changes in percentage terms in the spot price of heating oil.

Critical Accounting Policies

Preparation of the financial statements and related disclosures in compliance with accounting principles generally accepted in the United States of America requires the application of appropriate accounting rules and guidance, as well as the use of estimates. USHO's application of these policies involves judgments and actual results may differ from the estimates used.

USCF has evaluated the nature and types of estimates that it makes in preparing USHO's financial statements and related disclosures and has determined that the valuation of its investments, which are not traded on a United States or internationally recognized futures exchange (such as forward contracts and over-the-counter contracts) involves a critical accounting policy. The values which are used by USHO for its Futures Contracts are provided by its commodity broker who uses market prices when available, while over-the-counter contracts are valued based on the present value of estimated future cash flows that would be received from or paid to a third party in settlement of these derivative contracts prior to their delivery date and valued on a daily basis. In addition, USHO estimates interest and dividend income on a daily basis using prevailing rates earned on its cash and cash equivalents. These estimates are adjusted to the actual amount received on a monthly basis and the difference, if any, is not considered material.

Liquidity and Capital Resources

USHO has not made, and does not anticipate making, use of borrowings or other lines of credit to meet its obligations. USHO has met, and it is anticipated that USHO will continue to meet, its liquidity needs in the normal course of business from the proceeds of the sale of its investments or from the Treasuries, cash and/or cash equivalents that it intends to hold at all times. USHO's liquidity needs include: redeeming units, providing margin deposits for its existing Futures Contracts or the purchase of additional Futures Contracts and posting collateral for its over-the-counter contracts and payment of its expenses, summarized below under Contractual Obligations.

USHO currently generates cash primarily from: (i) the sale of Creation Baskets and (ii) income earned on cash and/or cash equivalents. USHO has allocated substantially all of its net assets to trading in Heating Oil Interests. USHO invests in Heating Oil Interests to the fullest extent possible without being leveraged or unable to satisfy its current or potential margin or collateral obligations with respect to its investments in Futures Contracts and Other Heating Oil-Related Investments. A significant portion of USHO's NAV is held in cash and cash equivalents that are used as margin and as collateral for its trading in Heating Oil Interests. The balance of the net assets is held in USHO's account at the Custodian and in Treasuries at the futures commission merchant. Income received from USHO's money market funds and Treasuries is paid to USHO. During the years ended December 31, 2011 and 2010, USHO's expenses exceeded the income USHO earned and the cash earned from the sale of Creation Baskets. During the years ended December 31, 2011 and 2010, USHO was forced to use other assets to pay expenses, which could cause a drop in USHO's NAV over time. To the extent expenses exceed income, USHO's NAV will be negatively impacted.

USHO's investments in Heating Oil Interests may be subject to periods of illiquidity because of market conditions, regulatory considerations and other reasons. For example, most commodity exchanges limit the fluctuations in futures contracts prices during a single day by regulations referred to as daily limits. During a single day, no trades may be executed at prices beyond the daily limit. Once the price of a futures contract has increased or decreased by an amount equal to the daily limit, positions in the contracts can neither be taken nor liquidated unless the traders are willing to effect trades at or within the specified daily limit. Such market conditions could prevent USHO from promptly liquidating its positions in Futures Contracts. During the year ended December 31, 2011, USHO was not forced to purchase or liquidate any of its positions while daily limits were in effect; however, USHO cannot predict whether such an event may occur in the future.

Table of Contents

Prior to the initial offering of USHO, all payments with respect to USHO's expenses were paid by USCF. USHO does not have an obligation or intention to refund such payments by USCF. USCF is under no obligation to pay USHO's current or future expenses. Since the initial offering of units, USHO has been responsible for expenses relating to: (i) management fees, (ii) brokerage fees and commissions, (iii) licensing fees for the use of intellectual property, (iv) ongoing registration expenses in connection with offers and sales of its units subsequent to the initial offering, (v) other expenses, including tax reporting costs, (vi) fees and expenses of the independent directors of USCF and (vii) other extraordinary expenses not in the ordinary course of business, while USCF has been responsible for expenses relating to the fees of USHO's Marketing Agent, Administrator and Custodian and registration expenses relating to the initial offering of units. If USCF and USHO are unsuccessful in raising sufficient funds to cover these respective expenses or in locating any other source of funding, USHO will terminate and investors may lose all or part of their investment.

Market Risk

Trading in Futures Contracts and Other Heating Oil-Related Investments, such as forwards, involves USHO entering into contractual commitments to purchase or sell heating oil at a specified date in the future. The aggregate market value of the contracts will significantly exceed USHO's future cash requirements since USHO intends to close out its open positions prior to settlement. As a result, USHO is generally only subject to the risk of loss arising from the change in value of the contracts. USHO considers the fair value of its derivative instruments to be the unrealized gain or loss on the contracts. The market risk associated with USHO's commitments to purchase heating oil is limited to the aggregate market value of the contracts held. However, should USHO enter into a contractual commitment to sell heating oil, it would be required to make delivery of the heating oil at the contract price, repurchase the contract at prevailing prices or settle in cash. Since there are no limits on the future price of heating oil, the market risk to USHO could be unlimited.

USHO's exposure to market risk depends on a number of factors, including the markets for heating oil, the volatility of interest rates and foreign exchange rates, the liquidity of the Futures Contracts and Other Heating Oil-Related Investments markets and the relationships among the contracts held by USHO. Drastic market occurrences could ultimately lead to the loss of all or substantially all of an investor's capital.

Credit Risk

When USHO enters into Futures Contracts and Other Heating Oil-Related Investments, it is exposed to the credit risk that the counterparty will not be able to meet its obligations. The counterparty for the Futures Contracts traded on the NYMEX and on most other futures exchanges is the clearinghouse associated with the particular exchange. In general, in addition to margin required to be posted by the clearinghouse in connection with cleared trades, clearinghouses are backed by their members who may be required to share in the financial burden resulting from the nonperformance of one of their members and, therefore, this additional member support should significantly reduce credit risk. Some foreign exchanges are not backed by their clearinghouse members but may be backed by a consortium of banks or other financial institutions. There can be no assurance that any counterparty, clearinghouse, or their members or their financial backers will satisfy their obligations to USHO in such circumstances.

USCF attempts to manage the credit risk of USHO by following various trading limitations and policies. In particular, USHO generally posts margin and/or holds liquid assets that are approximately equal to the market value of its obligations to counterparties under the Futures Contracts and Other Heating Oil-Related Investments it holds. USCF has implemented procedures that include, but are not limited to, executing and clearing trades only with creditworthy parties and/or requiring the posting of collateral or margin by such parties for the benefit of USHO to limit its credit exposure. UBS Securities, USHO's commodity broker, or any other broker that may be retained by USHO in the future, when acting as USHO's futures commission merchant in accepting orders to purchase or sell Futures Contracts on United States exchanges, is required by CFTC regulations to separately account for and segregate as belonging to USHO, all assets of USHO relating to domestic Futures Contracts trading. These futures commission merchants are not allowed to commingle USHO's assets with their other assets. In addition, the CFTC requires commodity brokers to hold in a secure account USHO's assets related to foreign Futures Contracts trading.

Table of Contents

If, in the future, USHO purchases over-the-counter contracts, see *Item 7A. Quantitative and Qualitative Disclosures About Market Risk* in this annual report on Form 10-K for a discussion of over-the-counter contracts.

As of December 31, 2011, USHO held cash deposits and investments in Treasuries and money market funds in the amount of \$9,273,987. This amount may be subject to loss should the Custodian cease operations.

Off Balance Sheet Financing

As of December 31, 2011, USHO had no loan guarantee, credit support or other off-balance sheet arrangements of any kind other than agreements entered into in the normal course of business, which may include indemnification provisions relating to certain risks that service providers undertake in performing services which are in the best interests of USHO. While USHO's exposure under these indemnification provisions cannot be estimated, they are not expected to have a material impact on USHO's financial position.

European Sovereign Debt

USHO had no direct exposure to European sovereign debt as of December 31, 2011 and has no direct exposure to European sovereign debt as of the filing of this annual report on Form 10-K.

Redemption Basket Obligation

In order to meet its investment objective and pay its contractual obligations described below, USHO requires liquidity to redeem units, which redemptions must be in blocks of 50,000 units as of February 29, 2012 called Redemption Baskets. (Prior to February 29, 2012, the size of the Redemption Basket was 100,000 units). USHO has to date satisfied this obligation by paying from the cash or cash equivalents it holds or through the sale of its Treasuries in an amount proportionate to the number of units being redeemed.

Contractual Obligations

USHO's primary contractual obligations are with USCF. In return for its services, USCF is entitled to a management fee calculated monthly as a fixed percentage of USHO's NAV, currently 0.60% of NAV on its average daily net assets.

USCF agreed to pay the start-up costs associated with the formation of USHO, primarily its legal, accounting and other costs in connection with USCF's registration with the CFTC as a CPO and the registration and listing of USHO and its units with the SEC, FINRA and NYSE Arca (formerly, AMEX), respectively. However, since USHO's initial offering of units, offering costs incurred in connection with registering and listing additional units of USHO have been directly borne on an ongoing basis by USHO, and not by USCF.

USCF pays the fees of the Marketing Agent and the fees of the Custodian and Transfer Agent, BBH&Co., as well as BBH&Co.'s fees for performing administrative services, including those in connection with the preparation of USHO's financial statements and its SEC, NFA and CFTC reports. USCF and USHO have also entered into a licensing agreement with the NYMEX pursuant to which USHO and the Related Public Funds, other than USBO, USCI, CPER, USAG and USMI, pay a licensing fee to the NYMEX. USHO also pays the fees and expenses associated with its tax accounting and reporting requirements. USCF, though under no obligation to do so, agreed to pay certain expenses normally borne by USHO to the extent that such expenses exceeded 0.15% (15 basis points) of USHO's NAV, on an annualized basis, through at least June 30, 2012. USCF has no obligation to continue such payments into subsequent periods.

Table of Contents

In addition to USCF's management fee, USHO pays its brokerage fees (including fees to a futures commission merchant), over-the-counter dealer spreads, any licensing fees for the use of intellectual property, and, subsequent to the initial offering, registration and other fees paid to the SEC, FINRA, or other regulatory agencies in connection with the offer and sale of units, as well as legal, printing, accounting and other expenses associated therewith, and extraordinary expenses. The latter are expenses not incurred in the ordinary course of USHO's business, including expenses relating to the indemnification of any person against liabilities and obligations to the extent permitted by law and under the LP Agreement, the bringing or defending of actions in law or in equity or otherwise conducting litigation and incurring legal expenses and the settlement of claims and litigation. Commission payments to a futures commission merchant are on a contract-by-contract, or round turn, basis. USHO also pays a portion of the fees and expenses of the independent directors of USCF. See *Note 3 to the Notes to Financial Statements in Item 8* of this annual report on Form 10-K.

The parties cannot anticipate the amount of payments that will be required under these arrangements for future periods, as USHO's per unit NAVs and trading levels to meet its investment objective will not be known until a future date. These agreements are effective for a specific term agreed upon by the parties with an option to renew, or, in some cases, are in effect for the duration of USHO's existence. Either party may terminate these agreements earlier for certain reasons described in the agreements. As of December 31, 2011, USHO's portfolio consisted of 80 Heating Oil Futures HO Contracts traded on the NYMEX. For a list of USHO's current holdings, please see USHO's website at www.unitedstatesheatingoil.com.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk. *Over-the-Counter Derivatives (Including Spreads and Straddles)*

In the future, USHO may purchase over-the-counter contracts (OTC Contracts). Unlike most exchange-traded futures contracts or exchange-traded options on such futures, each party to an OTC Contract bears the credit risk that the other party may not be able to perform its obligations under its contract.

To reduce the credit risk that arises in connection with such contracts, USHO will generally enter into an agreement with each counterparty based on the Master Agreement published by the International Swaps and Derivatives Association, Inc. that provides for the netting of its overall exposure to its counterparty.

USCF assesses or reviews, as appropriate, the creditworthiness of each potential or existing counterparty to an OTC Contract pursuant to guidelines approved by USCF's Board. Furthermore, USCF on behalf of USHO only enters into OTC Contracts with counterparties who are, or are affiliates of, (a) banks regulated by a United States federal bank regulator, (b) broker-dealers regulated by the SEC, (c) insurance companies domiciled in the United States, or (d) producers, users or traders of energy, whether or not regulated by the CFTC. Any entity acting as a counterparty shall be regulated in either the United States or the United Kingdom unless otherwise approved by the Board after consultation with its legal counsel. Existing counterparties are also reviewed periodically by USCF. USHO will also require that the counterparty be highly rated and/or provide collateral or other credit support. Even if collateral is used to reduce counterparty credit risk, sudden changes in the value of OTC transactions may leave a party open to financial risk due to a counterparty default since the collateral held may not cover a party's exposure on the transaction in such situations.

In general, valuing OTC derivatives is less certain than valuing actively traded financial instruments such as exchange-traded futures contracts and securities or cleared swaps because the price and terms on which such OTC derivatives are entered into or can be terminated are individually negotiated, and those prices and terms may not reflect the best price or terms available from other sources. In addition, while market makers and dealers generally quote indicative prices or terms for entering into or terminating OTC Contracts, they typically are not contractually obligated to do so, particularly if they are not a party to the transaction. As a result, it may be difficult to obtain an independent value for an outstanding OTC derivatives transaction.

During the year ended December 31, 2011, USHO did not employ any hedging methods such as those described above since all of its investments were made over an exchange. Therefore, during such period, USHO was not exposed to counterparty risk.

USHO anticipates that the use of Other Heating Oil-Related Investments together with its investments in Futures Contracts will produce price and total return results that closely track the investment goals of USHO. However, there can be no assurance of this. OTC Contracts may result in higher transaction-related expenses than the brokerage commissions paid in connection with the purchase of Futures Contracts, which may impact USHO's ability to successfully track the Benchmark Futures Contract.

Management's Annual Report on Internal Control Over Financial Reporting.

USCF assessed the effectiveness of USHO's internal control over financial reporting as of December 31, 2011. In making this assessment, it used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission in *Internal Control Integrated Framework*. Based on the assessment, USCF believes that, as of December 31, 2011, USHO's internal control over financial reporting is effective.

Report of Independent Registered Public Accounting Firm

To the Partners of

United States Heating Oil Fund, LP

We have audited the accompanying statements of financial condition of the United States Heating Oil Fund, LP (the Fund) as of December 31, 2011 and 2010, including the schedule of investments as of December 31, 2011 and 2010, and the related statements of operations, changes in partners' capital and cash flows for the years ended December 31, 2011, 2010 and 2009. These financial statements are the responsibility of the Fund's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Fund is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the United States Heating Oil Fund, LP as of December 31, 2011 and 2010, and the results of its operations and its cash flows for the years ended December 31, 2011, 2010 and 2009, in conformity with accounting principles generally accepted in the United States of America.

See accompanying notes to financial statements.

Table of Contents**United States Heating Oil Fund, LP****Notes to Financial Statements****For the years ended December 31, 2011, 2010 and 2009****NOTE 1 - ORGANIZATION AND BUSINESS**

The United States Heating Oil Fund, LP (USHO) was organized as a limited partnership under the laws of the state of Delaware on April 13, 2007. USHO is a commodity pool that issues limited partnership units (units) that may be purchased and sold on the NYSE Arca, Inc. (the NYSE Arca). Prior to November 25, 2008, USHO s units traded on the American Stock Exchange (the AMEX). USHO will continue in perpetuity, unless terminated sooner upon the occurrence of one or more events as described in its Amended and Restated Agreement of Limited Partnership dated as of March 7, 2008 (the LP Agreement). The investment objective of USHO is for the daily changes in percentage terms of its units per unit net asset value (NAV) to reflect the daily changes in percentage terms of the spot price of heating oil (also known as No. 2 fuel oil) for delivery to the New York harbor, as measured by the changes in the price of the futures contract for heating oil traded on the New York Mercantile Exchange (the NYMEX) that is the near month contract to expire, except when the near month contract is within two weeks of expiration, in which case the futures contract will be the next month contract to expire (the Benchmark Futures Contract), less USHO s expenses. It is not the intent of USHO to be operated in a fashion such that the per unit NAV will equal, in dollar terms, the spot price of heating oil or any particular futures contract based on heating oil. It is not the intent of USHO to be operated in a fashion such that its per unit NAV will reflect the percentage change of the price of any particular futures contract as measured over a time period greater than one day. United States Commodity Funds LLC (USCF) believes that it is not practical to manage the portfolio to achieve such an investment goal when investing in Futures Contracts (as defined below) and Other Heating Oil-Related Investments (as defined below). USHO accomplishes its objective through investments in futures contracts for heating oil, crude oil, gasoline, natural gas and other petroleum-based fuels that are traded on the NYMEX, ICE Futures or other U.S. and foreign exchanges (collectively, Futures Contracts) and other heating oil-related investments such as cash-settled options on Futures Contracts, forward contracts for heating oil and over-the-counter transactions that are based on the price of heating oil, crude oil and other petroleum-based fuels, Futures Contracts and indices based on the foregoing (collectively, Other Heating Oil-Related Investments). As of December 31, 2011, USHO held 80 Futures Contracts for heating oil traded on the NYMEX.

USHO commenced investment operations on April 9, 2008 and has a fiscal year ending on December 31. USCF is responsible for the management of USHO. USCF is a member of the National Futures Association (the NFA) and became a commodity pool operator registered with the Commodity Futures Trading Commission (the CFTC) effective December 1, 2005. USCF is also the general partner of the United States Oil Fund, LP (USOF), the United States Natural Gas Fund, LP (USNG), the United States 12 Month Oil Fund, LP (US12OF) and the United States Gasoline Fund, LP (UGA), which listed their limited partnership units on the AMEX under the ticker symbols USO on April 10, 2006, UNG on April 18, 2007, USL on December 6, 2007 and UGA on February 26, 2008, respectively. As a result of the acquisition of the AMEX by NYSE Euronext, each of USOF s, USNG s, US12OF s and UGA s units commenced trading on the NYSE Arca on November 25, 2008. USCF is also the general partner of the United States Short Oil Fund, LP (USSO), the United States 12 Month Natural Gas Fund, LP (US12NG) and the United States Brent Oil Fund, LP (USBO), which listed their limited partnership units on the NYSE Arca under the ticker symbols DNO on September 24, 2009, UNL on November 18, 2009 and BNO on June 2, 2010, respectively. USCF is also the sponsor of the United States Commodity Index Fund (USCI), the United States Agriculture Index Fund (USAG), the United States Copper Index Fund (CPER) and the United States Metals Index Fund (USMI), each a series of the United States Commodity Index Funds Trust. USCI and CPER listed their units on the NYSE Arca under the ticker symbol USCI on August 10, 2010 and CPER on November 15, 2011, respectively. USAG and USMI are not listed on the NYSE Arca as of the filing of this annual report on Form 10-K. All funds listed previously are referred to collectively herein as the Related Public Funds. USCF has also filed registration statements to register units of the United States Sugar Fund (USSF), the United States Natural Gas Double Inverse Fund (UNGD), the United States Gasoil Fund (USGO) and the United States Asian Commodities Basket Fund (USABF), each a series of the United States Commodity Funds Trust I.

Effective February 29, 2012, USHO issues units to certain authorized purchasers (Authorized Purchasers) by offering baskets consisting of 50,000 units (Creation Baskets) through ALPS Distributors, Inc., as the marketing agent (the Marketing Agent). Prior to February 29, 2012, USHO issued units to Authorized Purchasers by offering baskets consisting of 100,000 units through the Marketing Agent. The purchase price for a Creation Basket is based upon the NAV of a unit calculated shortly after the close of the core trading session on the NYSE Arca on the day the order to create the basket is properly received.

Table of Contents

From July 1, 2011 through December 31, 2011 (and continuing through at least May 1, 2012), the applicable transaction fee paid by Authorized Purchasers is \$350 to USHO for each order they place to create or redeem one or more baskets (Redemption Baskets); prior to July 1, 2011, this fee was \$1,000. Units may be purchased or sold on a nationally recognized securities exchange in smaller increments than a Creation Basket or Redemption Basket. Units purchased or sold on a nationally recognized securities exchange are not purchased or sold at the per unit NAV of USHO but rather at market prices quoted on such exchange.

In April 2008, USHO initially registered 10,000,000 units on Form S-1 with the U.S. Securities and Exchange Commission (the SEC). On April 9, 2008, USHO listed its units on the AMEX under the ticker symbol UHN . On that day, USHO established its initial per unit NAV by setting the price at \$50.00 and issued 200,000 units in exchange for \$10,000,000. USHO also commenced investment operations on April 9, 2008 by purchasing Futures Contracts traded on the NYMEX based on heating oil. As of December 31, 2011, USHO had registered a total of 60,000,000 units.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Revenue Recognition

Commodity futures contracts, forward contracts, physical commodities, and related options are recorded on the trade date. All such transactions are recorded on the identified cost basis and marked to market daily. Unrealized gains or losses on open contracts are reflected in the statements of financial condition and represent the difference between the original contract amount and the market value (as determined by exchange settlement prices for futures contracts and related options and cash dealer prices at a predetermined time for forward contracts, physical commodities, and their related options) as of the last business day of the year or as of the last date of the financial statements. Changes in the unrealized gains or losses between periods are reflected in the statements of operations. USHO earns interest on its assets denominated in U.S. dollars on deposit with the futures commission merchant at the overnight Federal Funds Rate less 32 basis points. In addition, USHO earns income on funds held at the custodian or futures commission merchant at prevailing market rates earned on such investments.

Brokerage Commissions

Brokerage commissions on all open commodity futures contracts are accrued on a full-turn basis.

Income Taxes

USHO is not subject to federal income taxes; each partner reports his/her allocable share of income, gain, loss deductions or credits on his/her own income tax return.

In accordance with accounting principles generally accepted in the United States of America (GAAP), USHO is required to determine whether a tax position is more likely than not to be sustained upon examination by the applicable taxing authority, including resolution of any tax related appeals or litigation processes, based on the technical merits of the position. USHO files an income tax return in the U.S. federal jurisdiction, and may file income tax returns in various U.S. states. USHO is not subject to income tax return examinations by major taxing authorities for years before 2008. The tax benefit recognized is measured as the largest amount of benefit that has a greater than fifty percent likelihood of being realized upon ultimate settlement. De-recognition of a tax benefit previously recognized results in USHO recording a tax liability that reduces net assets. However, USHO's conclusions regarding this policy may be subject to review and adjustment at a later date based on factors including, but not limited to, on-going analysis of and changes to tax laws, regulations and interpretations thereof. USHO recognizes interest accrued related to unrecognized tax benefits and penalties related to unrecognized tax benefits in income tax fees payable, if assessed. No interest expense or penalties have been recognized as of and for the year ended December 31, 2011.

Table of Contents

Creations and Redemptions

Effective February 29, 2012, Authorized Purchasers may purchase Creation Baskets or redeem Redemption Baskets only in blocks of 50,000 units at a price equal to the NAV of the units calculated shortly after the close of the core trading session on the NYSE Arca on the day the order is placed. Prior to February 29, 2012, Authorized Purchasers could only purchase Creation Baskets or redeem Redemption Baskets in blocks of 100,000 units.

USHO receives or pays the proceeds from units sold or redeemed within three business days after the trade date of the purchase or redemption. The amounts due from Authorized Purchasers are reflected in USHO's statements of financial condition as receivable for units sold, and amounts payable to Authorized Purchasers upon redemption are reflected as payable for units redeemed.

Partnership Capital and Allocation of Partnership Income and Losses

Profit or loss shall be allocated among the partners of USHO in proportion to the number of units each partner holds as of the close of each month. USCF may revise, alter or otherwise modify this method of allocation as described in the LP Agreement.

Calculation of Net Asset Value Per Unit

USHO's per unit NAV is calculated on each NYSE Arca trading day by taking the current market value of its total assets, subtracting any liabilities and dividing the amount by the total number of units issued and outstanding. USHO uses the closing price for the contracts on the relevant exchange on that day to determine the value of contracts held on such exchange.

Net Income (Loss) Per Unit

Net income (loss) per unit is the difference between the per unit NAV at the beginning of each period and at the end of each period. The weighted average number of units outstanding was computed for purposes of disclosing net income (loss) per weighted average unit. The weighted average units are equal to the number of units outstanding at the end of the period, adjusted proportionately for units added and redeemed based on the amount of time the units were outstanding during such period. There were no units held by USCF at December 31, 2011.

Offering Costs

Offering costs incurred in connection with the registration of additional units after the initial registration of units are borne by USHO. These costs include registration fees paid to regulatory agencies and all legal, accounting, printing and other expenses associated with such offerings. These costs are accounted for as a deferred charge and thereafter amortized to expense over twelve months on a straight-line basis or a shorter period if warranted.

Cash Equivalents

Cash equivalents include money market funds and overnight deposits or time deposits with original maturity dates of six months or less.

Reclassification

Certain amounts in the accompanying financial statements were reclassified to conform to the current presentation.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires USCF to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of the revenue and expenses during the reporting period. Actual results may differ from those estimates and assumptions.

Table of Contents

NOTE 3 - FEES PAID BY THE FUND AND RELATED PARTY TRANSACTIONS

USCF Management Fee

Under the LP Agreement, USCF is responsible for investing the assets of USHO in accordance with the objectives and policies of USHO. In addition, USCF has arranged for one or more third parties to provide administrative, custody, accounting, transfer agency and other necessary services to USHO. For these services, USHO is contractually obligated to pay USCF a fee, which is paid monthly, equal to 0.60% per annum of average daily net assets.

Ongoing Registration Fees and Other Offering Expenses

USHO pays all costs and expenses associated with the ongoing registration of its units subsequent to the initial offering. These costs include registration or other fees paid to regulatory agencies in connection with the offer and sale of units, and all legal, accounting, printing and other expenses associated with such offer and sale. For the years ended December 31, 2011, 2010 and 2009, USHO incurred \$7,300, \$1,571 and \$288, respectively, in registration fees and other offering expenses.

Directors Fees and Expenses

USHO is responsible for paying its portion of the directors and officers liability insurance for USHO and the Related Public Funds and the fees and expenses of the independent directors who also serve as audit committee members of USHO and the Related Public Funds organized as limited partnerships and, as of July 8, 2011, the Related Public Funds organized as a series of a Delaware statutory trust. USHO shares the fees and expenses with each Related Public Fund, as described above, based on the relative assets of each fund computed on a daily basis. These fees and expenses for the year ended December 31, 2011 were \$607,582 for USHO and the Related Public Funds. USHO's portion of such fees and expenses was \$1,382. For the years ended December 31, 2010 and 2009, these fees and expenses were \$1,107,140 and \$433,046, respectively, for USHO and the Related Public Funds, other than USCI, USAG, CPER and USMI. USHO's portion of such fees and expenses was \$2,864 and \$645, respectively. Effective as of April 1, 2010, USHO became responsible for paying its portion of any payments that may become due to the independent directors pursuant to the deferred compensation agreements entered into between the independent directors, USCF, USHO and the Related Public Funds, except USCI, USAG, CPER and USMI.

Licensing Fees

As discussed in Note 4 below, USHO entered into a licensing agreement with the NYMEX on May 30, 2007, as amended on October 20, 2011. Pursuant to the agreement, up to October 19, 2011, USHO and the Related Public Funds, other than USBO, USCI, CPER, USAG and USMI, paid a licensing fee that was equal to 0.04% for the first \$1,000,000,000 of combined net assets of the funds and 0.02% for combined net assets above \$1,000,000,000. On and after October 20, 2011, USHO and the Related Public Funds, other than USBO, USCI, CPER, USAG and USMI, pay a licensing fee that is equal to 0.015% on all net assets. During the years ended December 31, 2011, 2010 and 2009, USHO incurred \$2,040, \$2,648 and \$2,232, respectively, under this arrangement.

Investor Tax Reporting Cost

The fees and expenses associated with USHO's audit expenses and tax accounting and reporting requirements are paid by USHO. These costs were approximately \$45,000 for the year ended December 31, 2011.

Other Expenses and Fees and Expense Waivers

In addition to the fees described above, USHO pays all brokerage fees and other expenses in connection with the operation of USHO, excluding costs and expenses paid by USCF as outlined in Note 4 below. USCF, though under no obligation to do so, agreed to pay certain expenses normally borne by USHO, to the extent that such expenses exceed 0.15% (15 basis points) of USHO's NAV, on an annualized basis, through at least June 30, 2012. USCF has no obligation to continue such payments into subsequent periods.

Table of Contents

NOTE 4 - CONTRACTS AND AGREEMENTS

USHO is party to a marketing agent agreement, dated as of March 10, 2008, as amended from time to time, with the Marketing Agent and USCF, whereby the Marketing Agent provides certain marketing services for USHO as outlined in the agreement. The fee of the Marketing Agent, which is borne by USCF, is equal to 0.06% on USHO's assets up to \$3 billion and 0.04% on USHO's assets in excess of \$3 billion.

The above fee does not include the following expenses, which are also borne by USCF: the cost of placing advertisements in various periodicals; web construction and development; or the printing and production of various marketing materials.

USHO is also party to a custodian agreement, dated March 13, 2008, as amended from time to time, with Brown Brothers Harriman & Co. (BBH&Co.) and USCF, whereby BBH&Co. holds investments on behalf of USHO. USCF pays the fees of the custodian, which are determined by the parties from time to time. In addition, USHO is party to an administrative agency agreement, dated February 7, 2008, as amended from time to time, with USCF and BBH&Co., whereby BBH&Co. acts as the administrative agent, transfer agent and registrar for USHO. USCF also pays the fees of BBH&Co. for its services under such agreement and such fees are determined by the parties from time to time.

Currently, USCF pays BBH&Co. for its services, in the foregoing capacities, a minimum amount of \$75,000 annually for its custody, fund accounting and fund administration services rendered to USHO and each of the Related Public Funds, as well as a \$20,000 annual fee for its transfer agency services. In addition, USCF pays BBH&Co. an asset-based charge of: (a) 0.06% for the first \$500 million of USHO's, USOF's, USNG's, US12OF's, UGA's, USSO's, US12NG's, USBO's, USCI's, USMI's, USAG's and CPER's combined net assets, (b) 0.0465% for USHO's, USOF's, USNG's, US12OF's, UGA's, USSO's, US12NG's, USBO's, USCI's, USMI's, USAG's and CPER's combined net assets greater than \$500 million but less than \$1 billion, and (c) 0.035% once USHO's, USOF's, USNG's, US12OF's, UGA's, USSO's, US12NG's, USBO's, USCI's, USMI's, USAG's and CPER's combined net assets exceed \$1 billion. The annual minimum amount will not apply if the asset-based charge for all accounts in the aggregate exceeds \$75,000. USCF also pays transaction fees ranging from \$7 to \$15 per transaction.

USHO has entered into a brokerage agreement with UBS Securities LLC (UBS Securities). The agreement requires UBS Securities to provide services to USHO in connection with the purchase and sale of Futures Contracts and Other Heating Oil-Related Investments that may be purchased and sold by or through UBS Securities for USHO's account. In accordance with the agreement, UBS Securities charges USHO commissions of approximately \$7 to 15 per round-turn trade, including applicable exchange and NFA fees for Futures Contracts and options on Futures Contracts.

USHO and the NYMEX entered into a licensing agreement on May 30, 2007, as amended on October 20, 2011, whereby USHO was granted a non-exclusive license to use certain of the NYMEX's settlement prices and service marks. Under the licensing agreement, USHO and the Related Public Funds, other than USBO, USCI, CPER, USAG and USMI, pay the NYMEX an asset-based fee for the license, the terms of which are described in Note 3. USHO expressly disclaims any association with the NYMEX or endorsement of USHO by the NYMEX and acknowledges that NYMEX and New York Mercantile Exchange are registered trademarks of the NYMEX.

NOTE 5 - FINANCIAL INSTRUMENTS, OFF-BALANCE SHEET RISKS AND CONTINGENCIES

USHO engages in the trading of futures contracts and options on futures contracts (collectively, derivatives). USHO is exposed to both market risk, which is the risk arising from changes in the market value of the contracts, and credit risk, which is the risk of failure by another party to perform according to the terms of a contract.

USHO may enter into futures contracts and options on futures contracts to gain exposure to changes in the value of an underlying commodity. A futures contract obligates the seller to deliver (and the purchaser to accept) the future delivery of a specified quantity and type of a commodity at a specified time and place. Some futures contracts may call for physical delivery of the asset, while others are settled in cash. The contractual obligations of a buyer or seller may generally be satisfied by taking or making physical delivery of the underlying commodity or by making an offsetting sale or purchase of an identical futures contract on the same or linked exchange before the designated date of delivery.

Table of Contents

The purchase and sale of futures contracts and options on futures contracts require margin deposits with a futures commission merchant. Additional deposits may be necessary for any loss on contract value. The Commodity Exchange Act requires a futures commission merchant to segregate all customer transactions and assets from the futures commission merchant's proprietary activities.

Futures contracts involve, to varying degrees, elements of market risk (specifically commodity price risk) and exposure to loss in excess of the amount of variation margin. The face or contract amounts reflect the extent of the total exposure USHO has in the particular classes of instruments. Additional risks associated with the use of futures contracts are an imperfect correlation between movements in the price of the futures contracts and the market value of the underlying securities and the possibility of an illiquid market for a futures contract.

All of the futures contracts held by USHO were exchange-traded through December 31, 2011. The risks associated with exchange-traded contracts are generally perceived to be less than those associated with over-the-counter transactions since, in over-the-counter transactions, a party must rely solely on the credit of its respective individual counterparties. However, in the future, if USHO were to enter into non-exchange traded contracts, it would be subject to the credit risk associated with counterparty non-performance. The credit risk from counterparty non-performance associated with such instruments is the net unrealized gain, if any, on the transaction. USHO has credit risk under its futures contracts since the sole counterparty to all domestic and foreign futures contracts is the clearinghouse for the exchange on which the relevant contracts are traded. In addition, USHO bears the risk of financial failure by the clearing broker.

USHO's cash and other property, such as Treasuries, deposited with a futures commission merchant are considered commingled with all other customer funds, subject to the futures commission merchant's segregation requirements. In the event of a futures commission merchant's insolvency, recovery may be limited to a pro rata share of segregated funds available. It is possible that the recovered amount could be less than the total of cash and other property deposited. The insolvency of a futures commission merchant could result in the complete loss of USHO's assets posted with that futures commission merchant; however, the majority of USHO's assets are held in Treasuries, cash and/or cash equivalents with USHO's custodian and would not be impacted by the insolvency of a futures commission merchant. Also, the failure or insolvency of USHO's custodian could result in a substantial loss of USHO's assets.

USCF invests a portion of USHO's cash in money market funds that seek to maintain a stable per unit NAV. USHO is exposed to any risk of loss associated with an investment in such money market funds. As of December 31, 2011 and December 31, 2010, USHO held investments in money market funds in the amounts of \$1,801,145 and \$9,307,152, respectively. USCF holds cash deposits with its custodian. Pursuant to a written agreement with BBH&Co., uninvested overnight cash balances are swept to offshore branches of U.S. regulated and domiciled banks located in Toronto, Canada, London, United Kingdom, Grand Cayman, Cayman Islands and Nassau, Bahamas, which are subject to U.S. regulation and regulatory oversight. As of December 31, 2011 and December 31, 2010, USHO held cash deposits and investments in Treasuries in the amounts of \$7,472,842 and \$2,138,377 respectively. This amount may be subject to loss should USHO's custodian cease operations.

For derivatives, risks arise from changes in the market value of the contracts. Theoretically, USHO is exposed to market risk equal to the value of futures contracts purchased and unlimited liability on such contracts sold short. As both a buyer and a seller of options, USHO pays or receives a premium at the outset and then bears the risk of unfavorable changes in the price of the contract underlying the option.

USHO's policy is to continuously monitor its exposure to market and counterparty risk through the use of a variety of financial, position and credit exposure reporting controls and procedures. In addition, USHO has a policy of requiring review of the credit standing of each broker or counterparty with which it conducts business.

Table of Contents

The financial instruments held by USHO are reported in its statement of financial condition at market or fair value, or at carrying amounts that approximate fair value, because of their highly liquid nature and short-term maturity.

NOTE 6 - FINANCIAL HIGHLIGHTS

The following table presents per unit performance data and other supplemental financial data for the years ended December 31, 2011, 2010 and 2009. This information has been derived from information presented in the financial statements.

	Year ended December 31, 2011	Year ended December 31, 2010	Year ended December 31, 2009
Per Unit Operating Performance:			
Net asset value, beginning of year	\$ 29.82	\$ 27.54	\$ 21.94
Total income	3.27	2.52	5.82
Net expenses	(0.30)	(0.24)	(0.22)
Net increase in net asset value	2.97	2.28	5.60
Net asset value, end of year	\$ 32.79	\$ 29.82	\$ 27.54
Total Return	9.96%	8.28%	25.52%
Ratios to Average Net Assets			
Total income	12.76%	4.75%	21.39%
Management fees	0.60%	0.60%	0.60%
Total expenses excluding management fees	1.80%	1.95%	2.53%
Expenses waived	(1.50)%	(1.65)%	(2.23)%
Net expenses excluding management fees	0.30%	0.30%	0.30%
Net income	11.86%	3.85%	20.49%

Total returns are calculated based on the change in value during the period. An individual unitholder's total return and ratio may vary from the above total returns and ratios based on the timing of contributions to and withdrawals from USHO.

NOTE 7 - QUARTERLY FINANCIAL DATA (Unaudited)

The following summarized (unaudited) quarterly financial information presents the results of operations and other data for three-month periods ended March 31, June 30, September 30 and December 31, 2011 and 2010.

First Quarter 2011	Second Quarter 2011	Third Quarter 2011	Fourth Quarter 2011

NOTE 8 - FAIR VALUE OF FINANCIAL INSTRUMENTS

USHO values its investments in accordance with Accounting Standards Codification 820 Fair Value Measurements and Disclosures (ASC 820). ASC 820 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurement. The changes to past practice resulting from the application of ASC 820 relate to the definition of fair value, the methods used to measure fair value, and the expanded disclosures about fair value measurement. ASC 820 establishes a fair value hierarchy that distinguishes between: (1) market participant assumptions developed based on market data obtained from sources independent of USHO (observable inputs) and (2) USHO's own assumptions about market participant assumptions developed based on the best information available under the circumstances (unobservable inputs). The three levels defined by the ASC 820 hierarchy are as follows:

Level I Quoted prices (unadjusted) in active markets for *identical* assets or liabilities that the reporting entity has the ability to access at the measurement date.

Level II Inputs other than quoted prices included within Level I that are observable for the asset or liability, either directly or indirectly. Level II assets include the following: quoted prices for *similar* assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability, and inputs that are derived principally from or corroborated by observable market data by correlation or other means (market-corroborated inputs).

Level III Unobservable pricing input at the measurement date for the asset or liability. Unobservable inputs shall be used to measure fair value to the extent that observable inputs are not available.

In some instances, the inputs used to measure fair value might fall within different levels of the fair value hierarchy. The level in the fair value hierarchy within which the fair value measurement in its entirety falls shall be determined based on the lowest input level that is significant to the fair value measurement in its entirety.

The following table summarizes the valuation of USHO's securities at December 31, 2011 using the fair value hierarchy:

At December 31, 2011	\$2,531,040 Total	\$2,531,040 Level I	\$2,531,040 Level II	\$2,531,040 Level III
Short-Term Investments	\$ 2,531,040	\$ 2,531,040	\$	\$
Exchange-Traded Futures Contracts				
United States Contracts	348,096	348,096		

During the year ended December 31, 2011, there were no significant transfers between Level I and Level II.

Table of Contents

The following table summarizes the valuation of USHO's securities at December 31, 2010 using the fair value hierarchy:

At December 31, 2010	\$9,307,152 Total	\$9,307,152 Level I	\$9,307,152 Level II	\$9,307,152 Level III
Short-Term Investments	\$ 9,307,152	\$ 9,307,152	\$	\$
Exchange-Traded Futures Contracts				
United States Contracts	267,658	267,658		

During the year ended December 31, 2010, there were no significant transfers between Level I and Level II.

Effective January 1, 2009, USHO adopted the provisions of Accounting Standards Codification 815 - Derivatives and Hedging, which require presentation of qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair value amounts and gains and losses on derivatives.

Fair Value of Derivative Instruments

Derivatives not Accounted for as Hedging Instruments	Statements of Financial Condition Location	Fair Value at December 31, 2011	Fair Value at December 31, 2010
Futures - Commodity Contracts	Assets	\$ 348,096	\$ 267,658

The Effect of Derivative Instruments on the Statements of Operations

Derivatives not Accounted for as Hedging Instruments	For the year ended December 31, 2011	Change in	For the year ended December 31, 2010	For the year ended December 31, 2009

Futures - Commodity Contracts	Realized gain on closed positions \$ 1,037,887		\$ 1,341,182	\$ 855,423
	Change in unrealized gain (loss) on open positions	\$ 80,438	\$ (820,554)	\$ 1,157,462

NOTE 9 - RECENT ACCOUNTING PRONOUNCEMENTS

In December 2011, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2011-11, Balance Sheet (Topic 210): Disclosures about Offsetting Assets and Liabilities. The amendments in ASU No. 2011-11 require an entity to disclose information about offsetting and related arrangements to enable users of its financial statements to understand the effect of those arrangements on its financial position. ASU No. 2011-11 is effective for annual reporting periods beginning on or after January 1, 2013, and interim periods within those annual periods. The guidance requires retrospective application for all comparative periods presented. USCF is currently evaluating the impact ASU No. 2011-11 will have on USHO's financial statements.

Edgar Filing: United States Heating Oil Fund, LP - Form 10-K

In May 2011, FASB issued ASU No. 2011-04, Fair Value Measurement (Topic 820): Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRS. ASU No. 2011-04 clarifies existing requirements for measuring fair value and for disclosure about fair value measurements in converged guidance of the FASB and the International Accounting Standards Board. The amendments are to be applied prospectively. For public entities, the amendments are effective during interim and annual periods beginning after December 15, 2011. For nonpublic entities, the amendments are effective for annual periods beginning after December 15, 2011. Early application by public entities is not permitted. Nonpublic entities may apply the amendments early, but no earlier than for interim periods beginning after December 15, 2011. The implementation of ASU No. 2011-04 is not expected to have a material impact on USHO's financial statements.

Table of Contents

NOTE 10 - SUBSEQUENT EVENTS

USHO has performed an evaluation of subsequent events through the date the financial statements were issued. The subsequent events were as follows:

Effective as of February 29, 2012, the size of the Creation Basket and Redemption Basket was reduced from 100,000 units to 50,000 units.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Member of

United States Commodity Funds LLC and Subsidiaries

We have audited the accompanying consolidated statements of financial condition of United States Commodity Funds LLC and Subsidiaries (the Company) as of December 31, 2011 and 2010. These financial statements are the responsibility of the Company s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the statements of financial condition are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company s internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the statements of financial condition, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall statement of financial condition presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of United States Commodity Funds LLC and Subsidiaries as of December 31, 2011 and 2010 in conformity with accounting principles generally accepted in the United States of America.

UNITED STATES COMMODITY FUNDS LLC AND SUBSIDIARIES

NOTES TO CONSOLIDATED STATEMENTS OF FINANCIAL CONDITION

NOTE 1 - ORGANIZATION AND OPERATION

Victoria Bay Asset Management, LLC was formed as a single-member limited liability company in the State of Delaware on May 10, 2005. On June 13, 2008, Victoria Bay Asset Management, LLC changed its name to United States Commodity Funds LLC (the "Company"). The Company is the General Partner (the "General Partner") of United States Oil Fund, LP ("USOF"), United States Natural Gas Fund, LP ("USNG"), United States Heating Oil Fund, LP ("USHO"), United States Gasoline Fund, LP ("USG"), United States 12 Month Oil Fund, LP ("US12OF"), United States 12 Month Natural Gas Fund, LP ("US12NG"), United States Short Oil Fund, LP ("USSO"), United States Brent Oil Fund, LP ("USBO"), United States Short Natural Gas Fund, LP ("USSNG"), and is the Sponsor ("Sponsor") of United States Commodity Index Fund ("USCI") and United States Copper Index Fund ("CPER"), both of which is a series of the United States Commodity Index Funds Trust ("Trust"). The Company is registered as a commodity pool operator with the Commodity Futures Trading Commission ("CFTC") and is a member of the National Futures Association ("NFA"). USOF, USNG, USHO, USG, US12OF, US12NG, USSO, USBO, USCI and CPER (collectively, the "Funds") are commodity pools registered with the CFTC and members of the NFA that issue units that may be purchased and sold on the NYSE Arca, Inc. ("NYSE Arca") under the ticker symbols USO, UNG, UHN, UGA, USL, UNL, DNO, BNO, USCI, and CPER. The United States Metals Index Fund ("USMIF") and United States Agriculture Index Fund ("USAG"), also each a series of the Trust, will also be commodity pools and are in the process of registering their units to be purchased and sold on the NYSE ARCA. USSNG is a commodity pool that has been formed but has not yet begun the process of registering its units.

USOF began trading on April 10, 2006 by purchasing futures contracts for light, sweet crude oil that are traded on the New York Mercantile Exchange (the "Exchange"). The investment objective of USOF is for the changes in percentage terms of its units' net asset value to reflect the changes in percentage terms of the spot price of light, sweet crude oil delivered to Cushing, Oklahoma, as measured by the changes in the price of the futures contract on light sweet crude oil traded on the Exchange, that is the near month contract to expire, except when the near month contract is within two weeks of expiration, in which case it will be measured by the futures contract that is the next month contract to expire, less USOF's expenses. USOF seeks to accomplish its objective through investments in futures contracts for light, sweet crude oil, other types of crude oil, heating oil, gasoline, natural gas and other petroleum-based fuels that are traded on the Exchange and other U.S. and foreign exchanges and other oil interests such as cash-settled options on futures contracts, forward contracts for crude oil, cleared swap contracts and over-the-counter transactions that are based on the price of crude oil, heating oil, gasoline, natural gas and other petroleum-based fuels, futures contracts and indices based on the foregoing.

USNG began trading on April 18, 2007 by purchasing futures contracts for natural gas that are traded on the Exchange. The investment objective of USNG is for the changes in percentage terms of its units' net asset value to reflect the changes in percentage terms of the spot price of natural gas delivered to the Henry Hub, Louisiana, as measured by the changes in the price of the futures contract on natural gas traded on the Exchange that is the near month contract to expire, except when the near month contract is within two weeks of expiration, in which case it will be measured by the futures contract that is the next month contract to expire, less USNG's expenses. USNG seeks to accomplish its objective through investments in futures contracts for natural gas, crude oil, heating oil, gasoline, and other petroleum-based fuels that are traded on the Exchange and other U.S. and foreign exchanges and other natural gas-related investments such as cash-settled options on futures contracts, forward contracts for natural gas, cleared swap contracts and over-the-counter transactions that are based on the price of natural gas, crude oil and other petroleum-based fuels, futures contracts and indices based on the foregoing.

NOTES TO CONSOLIDATED STATEMENTS OF FINANCIAL CONDITION

NOTE 1 - ORGANIZATION AND OPERATION (continued)

US12OF began trading on December 6, 2007 by purchasing futures contracts for light, sweet crude oil that are traded on the Exchange. The investment objective of US12OF is for the changes in percentage terms of its units' net asset value to reflect the changes in percentage terms of the spot price of light, sweet crude oil delivered to Cushing, Oklahoma, as measured by the changes in the average of the prices of 12 futures contracts on crude oil traded on the Exchange, consisting of the near month contract to expire and the contracts for the following eleven months, for a total of 12 consecutive months' contracts, except when the near month contract is within two weeks of expiration, in which case it will be measured by the futures contracts that are the next month contract to expire and the contracts for the following eleven consecutive months, less US12OF's expenses. When calculating the daily movement of the average price of the 12 contracts each contract month will be equally weighted. US12OF seeks to accomplish its objective through investments in futures contracts for light, sweet crude oil, other types of crude oil, heating oil, gasoline, natural gas, and other petroleum-based fuels that are traded on the Exchange and or other U.S. and foreign exchanges and other oil interests such as cash-settled options on futures contracts, forward contracts for oil, cleared swap contracts and over-the-counter transactions that are based on the price of crude oil, other petroleum-based fuels, futures contracts and indices based on the foregoing.

USG began trading on February 26, 2008 by purchasing futures contracts on gasoline that are traded on the Exchange. The investment objective of USG is for the changes in percentage terms of its units' net asset value to reflect the changes in percentage terms of the spot price of unleaded gasoline, as measured by the changes in the price of the futures contract on gasoline traded on the Exchange that is the near month contract to expire, except when the near month contract is within two weeks of expiration, in which case it will be measured by the futures contract that is the next month contract to expire, less USG's expenses. USG seeks to accomplish its objective through investments in futures contracts for gasoline, crude oil, natural gas, heating oil and other petroleum-based fuels that are traded on the Exchange and other U.S. and foreign exchanges and other gasoline-related investments such as cash-settled options on futures contracts, forward contracts for gasoline, cleared swap contracts and over-the-counter transactions that are based on the price of gasoline, crude oil and other petroleum-based fuels, futures contracts and indices based on the foregoing.

USHO began trading on April 9, 2008 by purchasing futures contracts on heating oil that are traded on the Exchange. The investment objective of USHO is for the changes in percentage terms of its units' net asset value to reflect the changes in percentage terms of the spot price of heating oil, as measured by the changes in the price of the futures contract on heating oil traded on the Exchange that is the near month contract to expire, except when the near month contract is within two weeks of expiration, in which case it will be measured by the futures contract that is the next month contract to expire, less USHO's expenses. USHO seeks to accomplish its objective through investments in futures contracts for heating oil, crude oil, gasoline, natural gas and other petroleum-based fuels that are traded on the Exchange and other U.S. and foreign exchanges and other heating oil-related investments such as cash-settled options on futures contracts, forward contracts for heating oil, cleared swap contracts and over-the-counter transactions that are based on the price of heating oil, crude oil and other petroleum-based fuels, futures contracts and indices based on the foregoing.

NOTE 1 - ORGANIZATION AND OPERATION (continued)

USSO began trading on September 24, 2009 by selling futures contracts on light, sweet crude oil that are traded on the Exchange. The investment objective of USSO is for the changes in percentage terms of its units' net asset value to inversely reflect the changes in percentage terms of the spot price of light, sweet crude oil delivered to Cushing, Oklahoma, as measured by the changes in the price of the futures contract on light, sweet crude oil as traded on the Exchange that is the near month contract to expire, except when the near month contract is within two weeks of expiration, in which case the futures contract will be the next month contract to expire, less USSO's expenses. USSO accomplishes its objective through taking short positions in futures contracts for light, sweet crude oil and other types of crude oil, heating oil, gasoline, natural gas and other petroleum-based fuels that are traded on the Exchange and other crude oil-related investments such as cash-settled options on Futures Contracts, forward contracts for crude oil, cleared swap contracts and over-the-counter transactions that are based on the price of crude oil, heating oil, gasoline, natural gas and other petroleum-based fuels, futures contracts and indices based on the foregoing.

US12NG began trading on November 18, 2009 by purchasing futures contracts for natural gas that are traded on the Exchange. The investment objective of US12NG is for the changes in percentage terms of its units' net asset value to reflect the changes in percentage terms of the spot price of natural gas delivered at the Henry Hub, Louisiana, as measured by the changes in the average of the prices of 12 futures contracts on natural gas traded on the Exchange, consisting of the near month contract to expire and the contracts for the following 11 months for a total of 12 consecutive months' contracts, except when the near month contract is within two weeks of expiration, in which case it will be measured by the futures contracts that are the next month contract to expire and the contracts for the following 11 consecutive months, less US12NG's expenses. When calculating the daily movement of the average price of the 12 contracts each contract month will be equally weighted. US12NG seeks to accomplish its objective through investments in futures contracts for natural gas, crude oil, heating oil, gasoline and other petroleum-based fuels that are traded on the Exchange and other U.S. and foreign exchanges and other natural gas-related investments such as cash-settled options on futures contracts, forward contracts for natural gas, cleared swap contracts and over-the-counter transactions that are based on the price of natural gas, crude oil and other petroleum-based fuels, futures contracts and indices based on the foregoing.

USBO began trading on June 2, 2010 by purchasing futures contracts for Brent oil that are traded on the Exchange. The investment objective of USBO is for the daily changes in percentage terms of its units' net asset value to reflect the daily changes in percentage terms of the spot price of Brent crude oil as measured by the changes in the price of the futures contract on Brent crude oil as traded on the ICE Futures Exchange (the ICE Futures) that is the near month contract to expire, except when the near month contract is within two weeks of expiration, in which case the futures contract will be the next month contract to expire, less USBO's expenses. USBO accomplishes its objective through investments in futures contracts for crude oil, heating oil, gasoline, natural gas and other petroleum-based fuels that are traded on the ICE Futures, NYMEX, or other U.S. and foreign exchanges, and other crude oil-related investments such as cash-settled options on Futures Contracts, forward contracts for crude oil, cleared swap contracts and over-the-counter transactions that are based on the price of crude oil and other petroleum-based fuels, Futures Contracts and indices based on the foregoing.

USCI began trading on August 10, 2010 by purchasing futures contracts traded on the New York Mercantile Exchange (NYMEX), ICE Futures Exchange (ICE Futures), Chicago Board of Trade (CBOT), Chicago Mercantile Exchange (CME), London Metal Exchange (LME) and the Commodity Exchange, Inc. (COMEX). The investment objective of USCI is for the daily changes in percentage terms of its units' net asset value (NAV) to reflect the daily changes in percentage terms of the SummerHaven Dynamic Commodity Index Total Return (the Commodity Index), less USCI's expenses. The Commodity Index is comprised of 14

Futures Contracts that are selected on a monthly basis from a list of 27 possible Futures Contracts. The Futures Contracts that at any given time make up the Commodity Index are referred to herein as Benchmark Component Futures Contracts. USCI invests first in the current Benchmark Component Futures Contracts and other Futures Contracts intended to replicate the return on the current Benchmark Component Futures Contracts and, thereafter, to comply with regulatory requirements or in view of market conditions, in Other Commodity-Related Investments intended to replicate the return on the Benchmark Component Futures Contracts, including cleared swap contracts and other over-the-counter transactions, and in other Futures Contracts.

UNITED STATES COMMODITY FUNDS LLC AND SUBSIDIARIES

NOTES TO CONSOLIDATED STATEMENTS OF FINANCIAL CONDITION

NOTE 1 - ORGANIZATION AND OPERATION (concluded)

CPER began trading on November 15, 2011 by purchasing futures contracts traded on the COMEX. The investment objective of CPER is for the daily changes in percentage terms of its units' NAV to reflect the daily changes in percentage terms of the SummerHaven Copper Index Total ReturnSM (the Copper Index), less CPER's expenses. The Copper Index is designed to reflect the performance of the investment returns from a portfolio of copper futures contracts. The Copper Index is owned and maintained by SummerHaven Index Management LLC (SummerHaven Indexing) and calculated and published by the NYSE Arca. The Copper Index is comprised of either two or three Eligible Copper Futures Contracts that are selected on a monthly basis based on quantitative formulas relating to the prices of the Eligible Copper Futures Contracts developed by SummerHaven Indexing. The Eligible Copper Futures Contracts that at any given time make up the Copper Index are referred to herein as Benchmark Component Copper Futures Contracts. CPER seeks to achieve its investment objective by investing to the fullest extent possible in the Benchmark Component Copper Futures Contracts. Then, if constrained by regulatory requirements or in view of market conditions, CPER will invest next in other Eligible Copper Futures Contracts, and finally to a lesser extent, in other exchange traded futures contracts that are economically identical or substantially similar to the Benchmark Component Copper Futures Contracts if one or more other Eligible Copper Futures Contracts is not available. When CPER has invested to the fullest extent possible in exchange-traded futures contracts, CPER may then invest in other contracts and instruments based on the Benchmark Component Copper Futures Contracts, other Eligible Copper Futures Contracts or copper, such as cash-settled options, forward contracts, cleared swap contracts and swap contracts other than cleared swap contracts.

As of December 31 2011, USSNG had not formally begun operations.

The Company is a wholly owned subsidiary of Wainwright Holdings, Inc. (Wainwright), a Delaware corporation. Wainwright is a holding company that is controlled by the president of the Company and served as the initial limited partner of the Funds, except for USCI and CPER. It also serves as the initial limited partner for USSNG.

As the General Partner or Sponsor of the Funds, the Company is required to evaluate the credit risk of the Funds to their futures commission merchant, oversee the purchases and sales of the Funds' units by certain authorized purchasers, review the daily positions and margin requirements of the Funds, and manage the Funds' investments. The Company also pays continuing service fees to the marketing agent for communicating with the authorized purchasers.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Principles of consolidation

The Company, as General Partner or Sponsor of the Funds and USSNG, has included the accounts of USSNG since its inception in the consolidated financial statements. The Company has recorded a noncontrolling interest for the amount directly owned by the limited partner (representing the limited partner interest owned by Wainwright). Subsequent to the Funds commencing operations, the Company and Wainwright redeemed their interests. Therefore, as of December 31, 2011, the accounts of each of the Funds were no longer included in the accompanying consolidated statement of financial condition. All intercompany accounts and balances have been eliminated in consolidation.

UNITED STATES COMMODITY FUNDS LLC AND SUBSIDIARIES

NOTES TO CONSOLIDATED STATEMENTS OF FINANCIAL CONDITION

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

In December 2007, the FASB issued FASB ASC Topic 810-10-65, *Non-controlling Interests in Consolidated Financial Statements*, an amendment of ARB No. 51. FASB ASC Topic 810-10-65 requires all entities to report noncontrolling (minority) interests in subsidiaries as equity in the consolidated financial statements. Additionally, FASB ASC Topic 810-10-65 requires that transactions between an entity and noncontrolling interests be treated as equity transactions. FASB ASC Topic 810-10-65 is effective for fiscal years beginning after December 15, 2008. Adoption on January 1, 2009, as required, did not have a material effect on the Company's financial condition, results of operations or liquidity. The minority interests previously reflected in the Company's financial statements have been reclassified to conform to the current presentation.

Revenue recognition

The Company recognizes revenue in the period earned under the terms of the Funds' respective Limited Partnership Agreements, as amended from time to time (the "Limited Partnership Agreements") and the Trust Agreement, as amended from time to time (the "Trust Agreement"). These Agreements provide for fees based upon a percentage of the daily average net asset value of the Funds. In connection with the Funds' trading activities, commodity futures contracts, cleared swap contracts, forward contracts, physical commodities, and related options are recorded on the trade-date basis. All such transactions are recorded on the identified cost basis and marked to market daily. Unrealized gains and losses on open contracts are reflected in the statement of financial condition and represent the difference between original contract amount and market value (as determined by exchange settlement prices for futures contracts and related options and cash dealer prices at a predetermined time for forward contracts, physical commodities, and their related options) as of the last business day of the year or as of the last date of the financial statements. Changes in the unrealized gains or losses between periods are reflected in the statement of operations.

The Company earns interest on its assets on deposit at the broker at the 90-day Treasury bill rate for deposits denominated in U.S. dollars. In addition, the Funds earn interest on funds held with their custodian at prevailing market rates earned on such investments.

Management fee

Under the Funds' respective Agreements, the Company is responsible for investing the assets of the Funds in accordance with the objectives and policies of the Funds. In addition, the Company has arranged for one or more third parties to provide administrative, custody, accounting, transfer agency and other necessary services to the Funds. For these services, the Funds are contractually obligated to pay the Company a management fee, which is paid monthly, based on the average daily net assets of the Funds. USOF pays a management fee of 0.45% per annum on its average daily net assets. USNG pays a fee equal to 0.60% per annum on average daily net assets of \$1,000,000,000 or less and 0.50% of average daily net assets that are greater than \$1,000,000,000. US12OF, USHO, USG and USSO each pay a fee of 0.60% per annum on their average daily net assets. Since inception through April 30, 2010 the Company has been charging US12NG a management fee at a reduced rate of 0.60% per annum of average daily net assets. Effective May 1, 2010, the Company resumed charging US12NG its standard rate of 0.75% per annum of average daily net assets. The difference of 0.15% per annum of average daily net assets since inception through April 30, 2010 has been waived by the Company and will not be recouped from US12NG. USBO pays a management fee of 0.75% per annum on its average daily net assets. Each of USCI and CPER pays a management fee of 0.95% per annum on its average daily net assets.

Table of Contents

UNITED STATES COMMODITY FUNDS LLC AND SUBSIDIARIES

NOTES TO CONSOLIDATED STATEMENTS OF FINANCIAL CONDITION

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

The Funds pay for all brokerage fees, taxes and other expenses, including registration or other fees paid to the SEC, the Financial Industry Regulatory Authority (FINRA) formerly the National Association of Securities Dealers, or any other regulatory agency in connection with the offer and sale of subsequent units after their initial registration and all legal, accounting, printing and other expenses associated therewith. The Funds, except for USBO, USCI and CPER, also pay licensing fees for the use of intellectual property. The Funds also pay the fees and expenses of the independent directors.

Investments and Valuation of Investments

The Company's investments in common stock are classified as available-for-sale-securities and are considered to be held for an indefinite period. Securities investments not classified as either held-to-maturity or trading securities are classified as available-for-sale securities. Available-for-sale-securities are recorded at fair value on the statement of financial condition, with the change in fair value excluded from earnings and recorded as a component of other comprehensive income (loss) included in member's equity. Unrealized holding gains or losses on such securities, which were added to or subtracted from member's equity was \$(1,085) and \$16,133, for the years ended December 31, 2011 and 2010 (see Note 7).

Realized gains or losses are recorded upon disposition of investments calculated based upon the difference between the proceeds and the cost basis determined using the specific identification method.

The Company values its investments in accordance with FASB Accounting Standards Codification Topic 820, *Fair Value Measurements and Disclosures* (FASB ASC Topic 820). FASB ASC Topic 820 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurement. The changes to past practice resulting from the application of FASB ASC Topic 820 relate to the definition of fair value, the methods used to measure fair value, and the expanded disclosures about fair value measurement. FASB ASC Topic 820 establishes a fair value hierarchy that distinguishes between (1) market participant assumptions developed based on market data obtained from sources independent of the Company (observable inputs) and (2) the Company's own assumptions about market participant assumptions developed based on the best information available under the circumstances (unobservable inputs). The three levels defined by the FASB ASC Topic 820 hierarchy are as follows:

Level I - Quoted prices (unadjusted) in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.

Level II - Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. Level II assets include the following: quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability, and inputs that are derived principally from or corroborated by observable market data by correlation or other means (market-corroborated inputs).

Level III - Unobservable pricing input at the measurement date for the asset or liability. Unobservable inputs shall be used to measure fair value to the extent that observable inputs are not available. In some instances, the inputs used to measure fair value might fall in different levels of the fair value hierarchy. The level in the fair value hierarchy within which the fair value measurement in its entirety falls shall be determined based on the lowest input level that is significant to the fair value measurement in its entirety. The Company's adoption of FASB ASC Topic 820 did not have a material effect on its consolidated financial position, results of operations or liquidity.

Table of Contents

UNITED STATES COMMODITY FUNDS LLC AND SUBSIDIARIES

NOTES TO CONSOLIDATED STATEMENTS OF FINANCIAL CONDITION

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

In March 2008, the FASB released FASB ASC Topic 815-10, *Disclosures about Derivative Instruments and Hedging Activities*. FASB ASC Topic 815-10 requires qualitative disclosures about objectives and strategies for using derivatives, quantitative disclosures about fair value amounts of and gains and losses on derivative instruments, and disclosures about credit-risk-related contingent features in derivative agreements.

Brokerage commissions

Brokerage commissions on all open commodity futures contracts are accrued on a full-turn basis.

Additions and redemptions

Authorized purchasers may purchase creation baskets of the Funds only in blocks of 100,000 units at a price equal to the net asset value of the units calculated shortly after the close of the core trading session on the NYSE Arca on the day the order is placed. Authorized purchasers may redeem units from the Funds only in blocks of 100,000 units called Redemption Baskets. Effective as of February 29, 2012, the size of the Creation Basket and Redemption Basket was reduced from 100,000 units to 50,000 units for US12OF, USG, USHO, USSO, US12NG and USBO. The amount of the redemption proceeds for a Redemption Basket will be equal to the net asset value of the Funds' units in the Redemption Basket as of the end of each business day.

The Funds receive or pay the proceeds from units sold or redeemed within three business days after the trade-date of the purchase or redemption. The amounts due from authorized purchasers are reflected in the Funds' statement of financial condition as receivables for units sold, and amounts payable to authorized purchasers upon redemption are reflected as payable for units redeemed.

Capital and allocation of income and losses

Profit or loss shall be allocated among the unitholders of the Funds in proportion to the number of units each unitholder holds as of the close of each month. The Company, when it serves in a capacity as a General Partner or Sponsor, may revise, alter or otherwise modify this method of allocation as described in the Limited Partnership Agreements or Trust Agreement.

Calculation of net asset value

The Funds calculate their net asset value on each NYSE Arca trading day by taking the current market value of their total assets, subtracting any liabilities and dividing the amount by the total number of units issued and outstanding. The Funds use the closing price for the contracts on the relevant exchange on that day to determine the value of contracts held on such exchange.

Cash equivalents

Cash equivalents are highly liquid investments with original maturity dates of three months or less.

Table of Contents

UNITED STATES COMMODITY FUNDS LLC AND SUBSIDIARIES
NOTES TO CONSOLIDATED STATEMENTS OF FINANCIAL CONDITION

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Accounting estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Income taxes

The Company has filed an election with the Internal Revenue Service to be treated as an association taxable as a corporation. The Company files a consolidated federal income tax return with Wainwright and provides for income taxes as if the Company filed separately. The Company, however, does not file on a consolidated basis for state income tax purposes. The Company accounts for income taxes in accordance with Financial Accounting Standards Board (FASB) Accounting Standards Classification (ASC) Topic 740-10, *Accounting for Income Taxes* (FASB ASC Topic 740-10). Under the asset and liability method of FASB ASC Topic 740-10, deferred tax assets and liabilities are recognized for the estimated future tax consequences or benefits attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis. Deferred tax assets and liabilities are measured using the enacted tax rates in effect for the year in which those temporary differences are expected to be recovered or settled.

Effective January 1, 2008, the Company adopted FASB ASC Topic 740-10, *Accounting for Uncertainty in Income Taxes* (FASB ASC Topic 740-10), which establishes that a tax position taken or expected to be taken in a tax return is to be recognized in the consolidated financial statements when it is more likely than not, based on the technical merits, that the position will be sustained upon examination. FASB ASC Topic 740-10 is effective for private companies for fiscal years beginning after December 15, 2008. The Company's adoption of FASB ASC Topic 740-10 did not have a material effect on its consolidated financial position, results of operations or liquidity.

Fund startup expenses

The Company expenses all startup expenses associated with the registration of each fund. Fund startup expenses include offering costs relating to the initial registration of units and include, but are not limited to, legal fees pertaining to the initial registration of units, SEC and FINRA registration fees, initial fees paid to be listed on an exchange and other similar costs.

Recent accounting pronouncements

In December 2009, the FASB issued ASU 2009-17, *Consolidations* (Topic 810) Improvements to Financial Reporting by Enterprises Involved with Variable Interest Entities. This ASU changes how a reporting entity determines when an entity that is insufficiently capitalized or is not controlled through voting (or similar rights) should be consolidated. ASU 2009-17 also requires a reporting entity to provide additional disclosures about its involvement with variable interest entities and any significant changes in risk exposure due to that involvement. ASU 2009-17 is effective at the start of a reporting entity's first fiscal year beginning after November 15, 2009.

Table of Contents**UNITED STATES COMMODITY FUNDS LLC AND SUBSIDIARIES****NOTES TO CONSOLIDATED STATEMENTS OF FINANCIAL CONDITION*****NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (concluded)***

In February 2010, the FASB issued ASU 2010-10, *Consolidation* (Topic 810) - Amendments for Certain Investments Funds. This ASU amends certain provisions of ASC 810 pertaining to investments in variable interest entities to defer the effective date of ASU 2009-17 for certain investment entities and changes how decision makers and service providers determine whether their fees are variable interests. The amendments in ASU 2010-10 are effective as of the beginning of a reporting entity's first annual period that begins after November 15, 2009, and for interim periods within that first annual reporting period. The adoption of ASU 2010-10 did not have a material impact on the Company's financial position.

In January 2010, the FASB issued ASU 2010-06, *Fair Value Measurements and Disclosures* (Topic 820) - Improving Disclosures about Fair Value Measurements. This ASU requires new disclosures and clarifies certain existing disclosure requirements about fair value measurements. ASU 2010-06 requires a reporting entity to disclose significant transfers in and out of Level 1 and Level 2 fair value measurements, to describe the reasons for the transfers, and to present separately information about purchases, sales, issuances, and settlements for fair value measurements using significant unobservable inputs. ASU 2010-06 is effective for interim and annual reporting periods beginning after December 15, 2009, except for the disclosures about purchases, sales, issuances, and settlements in the roll forward of activity in Level 3 fair value measurements, which is effective for interim and annual reporting periods beginning after December 15, 2010; early adoption is permitted.

NOTE 3 - CAPITALIZATION AND RELATED PARTY TRANSACTIONS

During the years ended December 31, 2011 and 2010, the Company paid approximately \$9,900,000 and \$8,100,000 in distributions to its member.

The Funds (except for USCI and CPER) and USSNG were each capitalized with \$1,000, of which the Company contributed \$20 and Wainwright contributed \$980. The Trust was capitalized with \$4,000, which was contributed solely by the Company, which is included in cash and cash equivalents in the accompanying statement of financial condition.

In addition, the Company, as General Partner or Sponsor, through no obligation to do so, has agreed to pay certain expenses, including those relating to audit expenses and tax accounting and reporting requirements normally borne by USHO, USG, USSO, US12NG, USBO, USCI and CPER to the extent that such expenses exceed 0.15% (15 basis points) of their NAV, on an annualized basis. The Company, as General Partner or Sponsor, has no obligation to continue such payments in subsequent years.

The Company's consolidated statements of financial condition reflects noncontrolling interests in its subsidiaries as of December 31, 2011 and 2010. A schedule of the noncontrolling interests is presented below:

	December 31,	
	2011	2010
Limited partner interest in United States Short Natural Gas Fund, LP	\$ 980	\$ 980

NOTE 4 - FAIR VALUE MEASUREMENTS

The following table summarizes the valuation of the Company's investments at December 31, 2011 and 2010 using the fair value hierarchy:

At December 31, 2011:	Total	Level I	Level II	Level III
Investments	\$ 1,321	\$ 1,321	\$	\$
At December 31, 2010:	Total	Level I	Level II	Level III
Investments	\$ 4,985	\$ 4,985	\$	\$

NOTE 5 - INCOME TAXES

The Company has filed an election with the Internal Revenue Service to be treated as an association taxable as a corporation. The Company files a consolidated federal income tax return with Wainwright and provides for income taxes as if the Company filed separately. The Company, however, does not file on a consolidated basis for state income tax purposes. In connection with filing a consolidated federal income tax return, the Company has recorded federal income tax expense (benefit) and has recorded a corresponding due from parent and due to parent for its federal tax liability (benefit).

Deferred tax assets and liabilities reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Significant components of the Company's deferred tax liabilities and assets as of December 31, 2011 and 2010 are as follows:

	December 31,	
	2011	2010
Deferred tax liabilities	\$	\$
Deferred tax assets:		
Funds' startup expenses (offering costs)	\$ 981,000	\$ 915,000
Unrealized losses on investments	169,000	169,000
Valuation allowance for deferred tax assets	(1,150,000)	(1,084,000)
	\$	\$

The valuation allowance increased by \$66,000 and \$346,000 for the years ended December 31, 2011 and 2010. The portion of the deferred tax asset shown relating to the Company's unrealized losses on investments reported above relates to the unrealized losses on investments and is accounted for as other comprehensive loss (see Note 7).

UNITED STATES COMMODITY FUNDS LLC AND SUBSIDIARIES

NOTES TO CONSOLIDATED STATEMENTS OF FINANCIAL CONDITION

NOTE 6 - CONTRACTS AND AGREEMENTS

The Company, together with each of the Funds, is a party to marketing agent agreements with ALPS Distributors, Inc. (ALPS), a Colorado corporation, whereby ALPS provides certain marketing services for the Funds as outlined in their respective marketing agent agreements. Under the agreement dated as of March 13, 2006, as amended, whereby ALPS provides certain marketing services for USOF, the Company pays ALPS a marketing fee of \$425,000 per annum plus the following incentive fee: 0.00% on USOF s assets from \$0 - \$500 million; 0.04% on USOF s assets from \$500 million - \$4 billion; and 0.03% on USOF s assets in excess of \$4 billion. Under the agreement dated as of April 17, 2007, whereby ALPS provides certain marketing services for USNG, and the agreement dated as of November 13, 2007, whereby ALPS provides certain marketing services for US12OF, the Company pays ALPS fees equal to 0.06% on each of USNG s and US12OF s assets up to \$3 billion and 0.04% on each of USNG s and US12OF s assets in excess of \$3 billion. Under the agreement dated as of February 15, 2008, whereby ALPS provides certain marketing services for USG, and the agreement dated March 10, 2008 whereby ALPS provides certain marketing services for USHO, the Company pays ALPS fees equal to 0.06% on each of USG s and USHO s assets up to \$3 billion and 0.04% on each of USG s and USHO s assets in excess of \$3 billion. Under the agreement dated as of June 8, 2009, whereby ALPS provides certain marketing services for USSO and the agreement dated October 30, 2009, whereby ALPS provides certain marketing services for US12NG, the Company pays ALPS fees equal to 0.06% on each of USSO s and US12NG s assets up to \$3 billion; and 0.04% on each of USSO s and US12NG s assets in excess of \$3 billion. Under the agreement dated as of March 31, 2010, whereby ALPS provides certain marketing services for USBO and the agreement dated July 22, 2010, whereby ALPS provides certain marketing services for each of USCI and CPER, the Company pays ALPS fees equal to 0.06% on each of USBO s, USCI s and CPER s assets up to \$3 billion; and 0.04% on each of USBO s, USCI s and CPER s assets in excess of \$3 billion.

The above fees do not include the following expenses, which are also borne by the Company: the cost of placing advertisements in various periodicals, web construction and development, and the printing and production of various marketing materials.

The Company, each of the Funds and Trust are parties to custodian agreements with Brown Brothers Harriman & Co. (Brown Brothers), whereby Brown Brothers holds investments on behalf of the Funds. The Company pays the fees of the custodian, which shall be determined by the parties from time to time. In addition, the Company, with each of the Funds and the Trust, are parties to administrative agency agreements with Brown Brothers, whereby Brown Brothers acts as the administrative agent, transfer agent and registrar for each of the Funds. The Company also pays the fees of Brown Brothers for its services under these agreements and such fees will be determined by the parties from time to time.

Currently, the Company pays Brown Brothers for its services, in the foregoing capacities, the greater of a minimum amount of \$75,000 annually or an asset-based charge of (a) 0.06% for the first \$500 million of combined net assets, (b) 0.0465% for combined net assets greater than \$500 million but less than \$1 billion, and (c) 0.035% of combined net assets in excess of \$1 billion. The Company also pays a \$20,000 annual fee for transfer agency services and transaction fees ranging from \$7.00 to \$15.00 per transaction.

The Company, as Sponsor to the Trust, has entered into an agreement with SummerHaven Asset Management, LLC (SummerHaven) for their services as a commodity trading advisor to each of USCI and CPER. For their services, the Company pays SummerHaven an advisory fee for USCI equal to a percentage of the average daily assets of USCI that is equal to the percentage paid to USCF by USCI minus 0.14% with that result multiplied by 0.5 minus 0.06%. The Company also pays an advisory fee for CPER equal to a percentage of the average daily assets of CPER that is equal to the percentage paid to USCF by CPER minus 0.18% with that result multiplied by 0.5 minus 0.06%. The Company also pays SummerHaven a sublicense fee for the use of the Commodity Index and the Copper Index. For each of USCI and CPER, the Company paid \$15,000 for the calendar year 2011, plus an annual fee of 0.06% of the average daily assets of each of USCI and CPER.

Table of Contents

UNITED STATES COMMODITY FUNDS LLC AND SUBSIDIARIES
NOTES TO CONSOLIDATED STATEMENTS OF FINANCIAL CONDITION

NOTE 6 - CONTRACTS AND AGREEMENTS (concluded)

Each of the Funds, with the exception of USCI and CPER, has entered into brokerage agreements pursuant to which UBS Securities LLC acts as the futures commission merchant (the "FCM"); NewEdge USA, LLC acts as the FCM for USCI and CPER. The agreements provide that the FCM will charge commissions of approximately \$7 to \$8 per round-turn trade plus applicable exchange and NFA fees for futures contracts and options on futures contracts.

Each of the Funds, other than USBO, USCI and CPER, has invested primarily in futures contracts traded on the Exchange since the commencement of its operations. The Funds, other than USBO, USCI and CPER, have entered into a license agreement with the Exchange whereby the Funds were granted a non-exclusive license to use certain of the Exchange's settlement prices and service marks. Up to October 19, 2011, the Funds, other than USBO, USCI and CPER, paid a licensing fee that was equal to 0.04% for the first \$1,000,000,000 of combined assets of the Funds and 0.02% for combined assets above \$1,000,000,000. On and after October 20, 2011, the Funds, other than USBO, USCI and CPER, pay a licensing fee that is equal to 0.015% on all assets.

The Funds expressly disclaim any association with the Exchange or endorsement of the Funds by the Exchange and acknowledge that "NYMEX" and "New York Mercantile Exchange" are registered trademarks of such Exchange.

The Company has contracted an accounting firm to prepare each of the Funds, USSNG and the Trust's yearly income tax filings with the Internal Revenue Service and various states. The cost associated with any registered new fund is expected to be comparable.

NOTE 7 - ACCUMULATED OTHER COMPREHENSIVE LOSS

Changes in accumulated other comprehensive loss for the years ended December 31, 2011 and 2010 are as follows:

Balance, December 31, 2009	\$ (513,284)
Unrealized holding gains on investments	15,318
Balance, December 31, 2010	(497,966)
Unrealized holding losses on investments	(1,085)
Balance, December 31, 2011	\$ (499,051)

The Company records its other comprehensive loss net of income tax expense (benefit). As of December 31, 2011 and 2010, the Company has not recorded an income tax expense or benefit associated with its accumulated other comprehensive loss (see Note 5).

Table of Contents

UNITED STATES COMMODITY FUNDS LLC AND SUBSIDIARIES

NOTES TO CONSOLIDATED STATEMENTS OF FINANCIAL CONDITION

NOTE 8 - OFF-BALANCE SHEET RISKS AND CONTINGENCIES

The Funds engage in the trading of U.S. futures contracts, options on U.S. contracts, cleared swap contracts and over-the-counter derivative transactions (collectively derivatives). The Funds are exposed to both market risk, the risk arising from changes in the market value of the contracts; and credit risk, the risk of failure by another party to perform according to the terms of a contract.

All of the contracts currently traded by the Funds, with the exception of USNG, are exchange-traded. The risks associated with exchange-traded contracts are generally perceived to be less than those associated with over-the-counter transactions since, in over-the-counter transactions, the Funds must rely solely on the credit of their respective individual counterparties. To the extent the Funds enter into non-exchange traded contracts, they are subject to the credit risk associated with counterparty non-performance. The credit risk from counterparty non-performance associated with such instruments is the net unrealized gain, if any. The Funds also have credit risk since the sole counterparty to all domestic futures contracts is the exchange clearing corporation. In addition, the Funds bear the risk of financial failure by the clearing broker.

The purchase and sale of futures and options on futures contracts require margin deposits with an FCM. Additional deposits may be necessary for any loss on contract value. The Commodity Exchange Act requires an FCM to segregate all customer transactions and assets from the FCM's proprietary activities.

A customer's cash and other property, such as U.S. Treasury Bills, deposited with an FCM are considered commingled with all other customer funds subject to the FCM's segregation requirements. In the event of an FCM's insolvency, recovery may be limited to a pro rata share of segregated funds available. It is possible that the recovered amount could be less than the total of cash and other property deposited.

For derivatives, risks arise from changes in the market value of the contracts. Theoretically, the Funds are exposed to market risk equal to the value of futures and forward contracts purchased and unlimited liability on such contracts sold short. As both buyers and sellers of options, the Funds pay or receive a premium at the outset and then bear the risk of unfavorable changes in the price of the contract underlying the option.

The Company's policy is to continuously monitor its exposure to market and counterparty risk through the use of a variety of financial, position and credit exposure reporting and control procedures. In addition, the Company has a policy of reviewing the credit standing of each clearing broker or counterparty with which it conducts business.

The financial instruments held by the Company are reported in the statement of financial condition at market or fair value, or at carrying amounts that approximate fair value, because of their highly liquid nature and short-term maturities.

The Company has securities for its own account and may incur losses if the market value of the securities decreases subsequent to December 31, 2011.

The Company has a substantial portion of its assets on deposit with banks. Assets deposited with banks are subject to credit risk. In the event of a bank's insolvency, recovery of the Company's assets on deposit may be limited to account insurance or other protection afforded such deposits. As of December 31, 2011, the Company had cash of \$117,792 in excess of the federally insured amount of \$250,000.

NOTE 9 - SUBSEQUENT EVENTS

In accordance with FASB ASC Topic 855-10-05, the Company has performed an evaluation of subsequent events through March 28, 2012 which is the date the financial statements were available to be issued. The evaluation did not result in any items to disclose.

Table of Contents

Item 9. Changes in and Disagreements With Accountants on Accounting and Financial Disclosure.

Not applicable.

Item 9A. Controls and Procedures.

Disclosure Controls and Procedures

USHO maintains disclosure controls and procedures that are designed to ensure that material information required to be disclosed in USHO's periodic reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported within the time period specified in the SEC's rules and forms.

The duly appointed officers of USCF, including its chief executive officer and chief financial officer, who perform functions equivalent to those of a principal executive officer and principal financial officer of USHO if USHO had any officers, have evaluated the effectiveness of USHO's disclosure controls and procedures and have concluded that the disclosure controls and procedures of USHO have been effective as of the end of the period covered by this annual report on Form 10-K.

Management's Annual Report on Internal Control Over Financial Reporting

USHO is responsible for establishing and maintaining adequate internal control over financial reporting. USHO's internal control system is designed to provide reasonable assurance to USCF and the Board of USCF regarding the preparation and fair presentation of published financial statements. All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation. USCF's report on internal control over financial reporting is set forth above under the heading, *Management's Annual Report on Internal Control Over Financial Reporting* in Item 8 of this annual report on Form 10-K.

Change in Internal Control Over Financial Reporting

There were no changes in USHO's internal control over financial reporting during USHO's last fiscal quarter that have materially affected, or are reasonably likely to materially affect, USHO's internal control over financial reporting.

Item 9B. Other Information.

Monthly Account Statements

Pursuant to the requirement under Rule 4.22 under the CEA, each month USHO publishes an account statement for its unitholders, which includes a Statement of Income (Loss) and a Statement of Changes in Net Asset Value. The account statement is furnished to the SEC on a current report on Form 8-K pursuant to Section 13 or 15(d) of the Exchange Act and posted each month on USHO's website at www.unitedstatesheatingoilfund.com.

Part III

Item 10. Directors, Executive Officers and Corporate Governance.

Mr. Nicholas Gerber and Mr. Howard Mah serve as executive officers of USCF. USHO has no executive officers. Its affairs are generally managed by USCF. The following individuals serve as Management Directors of USCF.

Table of Contents

Nicholas Gerber has been the President and CEO of USCF since June 9, 2005 and a Management Director of USCF since May 10, 2005. He maintains his main business office at 1320 Harbor Bay Parkway, Suite 145, Alameda, California 94502. He has been listed with the CFTC as a Principal of USCF since November 29, 2005, as Branch Manager of USCF since May 15, 2009, and registered with the CFTC as an Associated Person of USCF on December 1, 2005. Mr. Gerber also served as Vice President/Chief Investment Officer of Lyon's Gate Reinsurance Company, Ltd., a company formed to reinsure workmen's compensation insurance, from June 2003 to December 2009. Mr. Gerber has an extensive background in securities portfolio management and in developing investment funds that make use of indexing and futures contracts. He is also the founder of Ameristock Corporation, a California-based investment adviser registered under the Investment Advisers Act of 1940, that has been sponsoring and providing portfolio management services to mutual funds since March 1995. Since August 1995, Mr. Gerber has been the portfolio manager of the Ameristock Mutual Fund, Inc. a mutual fund registered under the Investment Company Act of 1940, focused on large cap U.S. equities that, as of December 31, 2011, had \$200,749,014 in assets. He has also been a Trustee for the Ameristock ETF Trust since June 2006, and served as a portfolio manager for the Ameristock/Ryan 1 Year, 2 Year, 5 Year, 10 Year and 20 Year Treasury ETF from June 2007 to June 2008 when such funds were liquidated. In these roles, Mr. Gerber has gained extensive experience in evaluating and retaining third-party service providers, including custodians, accountants, transfer agents, and distributors. Mr. Gerber has passed the Series 3 examination for associated persons. He holds an MBA in finance from the University of San Francisco and a BA from Skidmore College. Mr. Gerber is 49 years old.

In concluding that Mr. Gerber should serve as Management Director of USCF, USCF considered his broad business experiences in the industry including: forming and managing investment companies and commodity pools, raising capital for such entities and founding and managing non-finance related companies.

Howard Mah has been a Management Director of USCF since May 10, 2005, Secretary of USCF since June 9, 2005, and Chief Financial Officer of USCF since May 23, 2006. He has been listed with the CFTC as a Principal of USCF since November 29, 2005. In these roles, Mr. Mah is currently involved in the management of USHO and the Related Public Funds and will be involved in the management of USMI, USAG, USSF, UNGD, USGO and USABF, if such funds commence operations. Mr. Mah also serves as USCF's Chief Compliance Officer. He received a Bachelor of Education from the University of Alberta, in 1986 and an MBA from the University of San Francisco in 1988. He served as Secretary and Chief Compliance Officer of the Ameristock ETF Trust from February 2007 until June 2008 when the trust was liquidated, Chief Compliance Officer of Ameristock Corporation since January 2001; a tax and finance consultant in private practice since January 1995, Secretary of Ameristock Mutual Fund since June 1995 and Ameristock Focused Value Fund from December 2000 to January 2005; Chief Compliance Officer of Ameristock Mutual Fund since August 2004 and the Co-Portfolio Manager of the Ameristock Focused Value Fund from December 2000 to January 2005. Mr. Mah is 47 years old.

In concluding that Mr. Mah should serve as Management Director of USCF, USCF considered his background in accounting and finance, as well as his experience as Chief Compliance Officer for USCF and Ameristock Corporation.

Andrew F. Ngim has been a Management Director of USCF since May 10, 2005 and Treasurer of USCF since June 9, 2005. He has been listed with the CFTC as a Principal of USCF since November 29, 2005. As Treasurer of USCF, Mr. Ngim is currently involved in the management of USHO and the Related Public Funds and will be involved in the management of USMI, USAG, USSF, UNGD, USGO and USABF, if such funds commence operations. He received a Bachelor of Arts from the University of California at Berkeley in 1983. Mr. Ngim has been Ameristock Corporation's Managing Director since January 1999 and co-portfolio manager of Ameristock Corporation since January 2000, Trustee of the Ameristock ETF Trust since February 2007, and served as a portfolio manager for the Ameristock/Ryan 1 Year, 2 Year, 5 Year, 10 Year and 20 Year Treasury ETF from June 2007 to June 2008 when such funds were liquidated. Mr. Ngim is 51 years old.

In concluding that Mr. Ngim should serve as Management Director of USCF, USCF considered his broad career in the financial services industry as well as experience as co-Portfolio Manager of the Ameristock Mutual Fund.

Table of Contents

The following individuals provide significant services to USHO but are employed by USCF.

John P. Love has acted as the Portfolio Operations Manager for USHO since it commenced operations in April 2008 and the Related Public Funds since January 2006 and, effective March 1, 2010, became the Senior Portfolio Manager for USHO and the Related Public Funds. He is expected to be Senior Portfolio Manager for USMI, USAG, USSF, UNGD, USGO and USABF, if such funds commence operations. Mr. Love is also employed by USCF. He has been listed with the CFTC as a Principal of USCF since January 17, 2006. Mr. Love also served as the operations manager of Ameristock Corporation from October 2002 to January 2007, where he was responsible for back office and marketing activities for the Ameristock Mutual Fund and Ameristock Focused Value Fund and for the firm in general. Mr. Love holds a Series 3 license and was registered with the CFTC as an Associated Person of USCF from December 1, 2005 through April 16, 2009. Mr. Love has passed the Level I and Level II Chartered Financial Analyst examinations. He holds a BFA in cinema-television from the University of Southern California. Mr. Love is 40 years old.

John T. Hyland, CFA acts as a Portfolio Manager and as the Chief Investment Officer for USCF. Mr. Hyland is employed by USCF. He registered with the CFTC as an Associated Person of USCF on December 1, 2005, and has been listed with the CFTC as a Principal of USCF since January 17, 2006. Mr. Hyland became the Portfolio Manager for USHO, USOF, USNG, US12OF, UGA, USSO, US12NG, USBO, USCI and CPER in April 2008, April 2006, April 2007, December 2007, February 2008, September 2009, November 2009, June 2010, August 2010 and November 2011, respectively, and as Chief Investment Officer of USCF since January 2008, acts in such capacity on behalf of USHO and the Related Public Funds. He will also be the Portfolio Manager for USMI, USAG, USSF, UNGD, USGO and USABF upon the commencement of such funds' operations. As part of his responsibilities for USHO and the Related Public Funds, Mr. Hyland handles day-to-day trading, helps set investment policies, and oversees USHO's and the Related Public Funds' activities with their futures commission brokers, custodian-administrator, and marketing agent. Mr. Hyland has an extensive background in portfolio management and research with both equity and fixed income securities, as well as in the development of new types of complex investment funds. In July 2001, Mr. Hyland founded Towerhouse Capital Management, LLC, a firm that provided portfolio management and new fund development expertise to non-U.S. institutional investors through December 2009. Since January 2010, Towerhouse Capital Management has been inactive. Mr. Hyland was a Principal for Towerhouse in charge of portfolio research and product development regarding U.S. and non-U.S. real estate related securities. Mr. Hyland received his Chartered Financial Analyst (CFA) designation in 1994. Mr. Hyland is a member of the CFA Institute (formerly AIMR) and is a member and former president of the CFA Society of San Francisco. He is also a member of the National Association of Petroleum Investment Analysts, a not-for-profit organization of investment professionals focused on the oil industry. He is a graduate of the University of California, Berkeley. Mr. Hyland is 52 years old.

Ray W. Allen acts as a Portfolio Operations Manager for USOF, US12OF, USSO and USBO. He has been employed by USCF since January 14, 2008. He holds a Series 3 license and registered with the CFTC as an Associated Person of USCF on March 25, 2008. He has been listed with the CFTC as a Principal of USCF since March 18, 2009. Mr. Allen's responsibilities include daily trading and operations for USOF, US12OF, USSO and USBO. Mr. Allen also acted as a Portfolio Operations Manager for UGA, USHO and US12NG until March 1, 2010. In addition, from February 2002 to October 2007, Mr. Allen was responsible for analyzing and evaluating the creditworthiness of client companies at Marble Bridge Funding Group Inc., in Walnut Creek, CA. Marble Bridge Funding Group Inc. is a commercial finance company providing capital to entrepreneurial companies. For the period from October 2007 to January 14, 2008, Mr. Allen was not employed by USCF and did not engage in any business-related activity. Mr. Allen received a BA in Economics from the University of California at Berkeley in 1980. Mr. Allen is 55 years old.

The following individuals serve as independent directors of USCF.

Peter M. Robinson has been an independent director of USCF since September 30, 2005 and, as such, serves on the Board of USCF, which acts on behalf of USHO and the Related Public Funds. He has been listed with the CFTC as a Principal of USCF since December 2005. Mr. Robinson has been employed as a Research Fellow with the Hoover Institution since 1993. The Hoover Institution is a public policy think tank located on the campus of Stanford University. Mr. Robinson graduated from Dartmouth College in 1979 and Oxford University in 1982. Mr. Robinson received an MBA from the Stanford University Graduate School of Business. Mr. Robinson has also written three books and has been published in the *New York Times*, *Red Herring*, and *Forbes ASAP* and he is the editor of *Can Congress Be Fixed?: Five Essays on Congressional Reform* (Hoover Institution Press, 1995). Mr. Robinson is 54 years old.

Table of Contents

In concluding that Mr. Robinson should serve as independent director of USCF, USCF considered his broad experience in the United States government, including his employment at the SEC, and his knowledge of and insight into public policy.

Gordon L. Ellis has been an independent director of USCF since September 30, 2005 and, as such, serves on the Board of USCF, which acts on behalf of USHO and the Related Public Funds. He has been listed with the CFTC as a Principal of USCF since November 2005. Mr. Ellis has been Chairman of International Absorbents, Inc., a holding company of Absorption Corp., since July 1988, President and Chief Executive Officer since November 1996 and a Class I Director of the company since July 1985. Mr. Ellis is also a director of Absorption Corp., International Absorbents, Inc.'s wholly-owned subsidiary which is engaged in developing, manufacturing and marketing a wide range of animal care and industrial absorbent products. Mr. Ellis is a director/trustee of Polymer Solutions, Inc., a former publicly-held company that sold all of its assets effective as of February 3, 2004 and is currently winding down its operations and liquidating following such sale. Polymer Solutions previously developed and manufactured paints, coatings, stains and primers for wood furniture manufacturers. Mr. Ellis is a professional engineer with an MBA in international finance. Mr. Ellis is 65 years old.

In concluding that Mr. Ellis should serve as independent director of USCF, USCF considered his experience serving as the Chairman and Chief Executive Officer of a former publicly-traded corporation as well as his experience as an entrepreneur.

Malcolm R. Fobes III has been an independent director of USCF since September 30, 2005 and, as such, serves on the Board of USCF, which acts on behalf of USHO and the Related Public Funds. He has been listed with the CFTC as a Principal of USCF since November 2005. Mr. Fobes is the founder, Chairman and Chief Executive Officer of Berkshire Capital Holdings, Inc., a California-based investment adviser registered under the Investment Advisers Act of 1940, that has been sponsoring and providing portfolio management services to mutual funds since June 1997. Since June 1997, Mr. Fobes has been the Chairman and President of The Berkshire Funds, a mutual fund investment company registered under the Investment Company Act of 1940. Mr. Fobes also serves as portfolio manager of the Berkshire Focus Fund, a mutual fund registered under the Investment Company Act of 1940, which concentrates its investments in the electronic technology industry. From April 2000 to July 2006, Mr. Fobes also served as co-portfolio manager of The Wireless Fund, a mutual fund registered under the Investment Company Act of 1940, which concentrates its investments in companies engaged in the development, production, or distribution of wireless-related products or services. In these roles, Mr. Fobes has gained extensive experience in evaluating and retaining third-party service providers, including custodians, accountants, transfer agents, and distributors. Mr. Fobes was also contributing editor of *Start a Successful Mutual Fund: The Step-by-Step Reference Guide to Make It Happen* (JV Books, 1995). Mr. Fobes holds a B.S. degree in Finance and Economics from San Jose State University in California. Mr. Fobes is 47 years old.

In concluding that Mr. Fobes should serve as independent director of USCF, USCF considered his background as founder, Chairman and Chief Executive Officer of a registered investment adviser as well as Chairman, President, Chief Financial Officer and Portfolio Manager of a mutual fund investment company.

The following are individual Principals, as that term is defined in CFTC Rule 3.1, for USCF: Nicholas Gerber, Melinda Gerber, the Nicholas and Melinda Gerber Living Trust, Howard Mah, Andrew Ngim, Robert Nguyen, Peter Robinson, Gordon Ellis, Malcolm Fobes, John Love, John Hyland, Ray Allen and Wainwright Holdings Inc. and Margaret Johnson. These individuals are Principals due to their positions, however, Nicholas Gerber and Melinda Gerber are also Principals due to their controlling stake in Wainwright. None of the Principals owns or has any other beneficial interest in USHO. John Love and John Hyland make trading and investment decisions for USHO. John Love and Ray Allen execute trades on behalf of USHO. In addition, Nicholas Gerber, John Hyland, Robert Nguyen and Ray Allen are registered with the CFTC as Associated Persons of USCF and are NFA Associate Members.

Table of Contents

Audit Committee

The Board of USCF has an audit committee which is made up of the three independent directors (Peter M. Robinson, Gordon L. Ellis, and Malcolm R. Fobes III). The audit committee is governed by an audit committee charter that is posted on USHO's website at www.unitedstatesheatingoilfund.com. Any unitholder of USHO may also obtain a printed copy of the audit committee charter, free of charge, by calling 1-800-920-0259. The Board has determined that each member of the audit committee meets the financial literacy requirements of the NYSE Arca and the audit committee charter. The Board has further determined that each of Messrs. Ellis and Fobes have accounting or related financial management expertise, as required by the NYSE Arca, such that each of them is considered an Audit Committee Financial Expert as such term is defined in Item 407(d)(5) of Regulation S-K.

Other Committees

Since the individuals who perform work on behalf of USHO are not compensated by USHO, but instead by USCF, USHO does not have a compensation committee. Similarly, since the directors noted above serve on the Board of USCF, there is no nominating committee of the Board that acts on behalf of USHO. USCF believes that it is necessary for each member of the Board to possess many qualities and skills. USCF further believes that all directors should possess a considerable amount of business management and educational experience. There have not been any vacancies on USCF's Board since the commencement of operations of USHO in April 2008; however, if such a vacancy were to occur, the members of the Board would consider a candidate's management experience as well as his/her background, stature, conflicts of interest, integrity and ethics. In connection with this, the Board would also consider issues of diversity, such as diversity of gender, race and national origin, education, professional experience and differences in viewpoints and skills. The Board does not have a formal policy with respect to diversity; however, the Board believes that it is essential that the Board members represent diverse viewpoints.

Corporate Governance Policy

The Board of USCF has adopted a Corporate Governance Policy that applies to USHO and the Related Public Funds. USHO has posted the text of the Corporate Governance Policy on its website at www.unitedstatesheatingoilfund.com. Any unitholder of USHO may also obtain a printed copy of the Corporate Governance Policy, free of charge, by calling 1-800-920-0259.

Code of Ethics

USCF has adopted a Code of Business Conduct and Ethics (the "Code of Ethics") that applies to its principal executive officer, principal financial officer, principal accounting officer or controller, or persons performing similar functions, and also to USHO. USHO has posted the text of the Code of Ethics on its website at www.unitedstatesheatingoilfund.com. Any unitholder of USHO may also obtain a printed copy of the Code of Ethics, free of charge, by calling 1-800-920-0259. USHO intends to disclose any amendments or waivers to the Code of Ethics applicable to USCF's principal executive officer, principal financial officer, principal accounting officer or controller, or persons performing similar functions, on its website.

Executive Sessions of the Non-Management Directors

In accordance with the Corporate Governance Policy of USCF, the non-management directors of the Board (who are the same as the independent directors of the Board) meet separately from the other directors in regularly scheduled executive sessions, without the presence of Management Directors or executive officers of USCF. The non-management directors have designated Malcolm R. Fobes III to preside over each such executive session. Interested parties who wish to make their concerns known to the non-management directors may communicate directly with Mr. Fobes by writing to 475 Milan Drive, No. 103, San Jose, CA 95134-2453 or by e-mail at uscf.director@gmail.com.

Table of Contents

Board Leadership Structure and Role in Risk Oversight

The Board of USCF is led by a Chairman, Nicholas Gerber, who is also the President and CEO of USCF. The Board's responsibilities include: (i) the selection, evaluation, retention and succession of the Chief Executive Officer and the oversight of the selection and performance of other executive officers, (ii) understanding, reviewing and monitoring the implementation of strategic plans, annual operating plans and budgets, (iii) the selection and oversight of USHO's independent auditors and the oversight of USHO's financial statements, (iv) advising management on significant issues, (v) the review and approval of significant company actions and certain other matters, (vi) nominating directors and committee members and overseeing effective corporate governance and (vii) the consideration of other constituencies, such as USCF's and USHO's customers, employees, suppliers and the communities impacted by USHO. The non-management directors have designated Malcolm R. Fobes III as the presiding independent director. Mr. Fobes' role as the presiding independent director includes presiding over each executive session of the non-management directors, facilitating communications by shareholders and employees with the non-management directors and may also include representing the non-management directors with respect to certain matters as to which the views of the non-management directors are sought pursuant to USHO's Corporate Governance Policy.

The Board believes that Mr. Gerber is best situated to serve as Chairman of USCF because he is the director most familiar with the business of USCF, including investing in the futures contracts and other commodity interests in order to track the benchmark futures contracts of USHO and the Related Public Funds. Because of his background, he is most capable of effectively leading the discussion and execution of new strategic objectives. The independent directors of USCF are actively involved in the oversight of USCF and, because of their varied backgrounds, provide different perspectives in connection with the oversight of USCF, USHO and the Related Public Funds. USCF's independent directors bring expertise from outside USCF and the commodities industry, while Mr. Gerber brings company-specific and industry-specific experience and expertise. The Board believes that the combined role of Chairman and Chief Executive Officer facilitates information flow between USCF and the Board, including the independent directors, which is essential to effective governance.

Risk Management

The full Board is actively involved in overseeing the management and operation of USCF, including oversight of the risks that face USHO and the Related Public Funds. For example, the Board has adopted an Investment Policy and a Policy for Use of Derivatives. The policies are intended to ensure that USCF takes prudent and careful action while entering into and managing investments taken by USHO, including Futures Contracts or Other Heating Oil-Related Investments such as over-the-counter swap contracts. Additionally, the policies are intended to provide assurance that there is sufficient flexibility in controlling risks and returns associated with the use of investments by USHO. The policies, among other things, limit USHO's ability to have too high of a concentration of its assets in non-exchange traded futures contracts or cleared swap contracts or concentrating its investments in too few counterparties, absent prior approval from the Board. Existing counterparties are reviewed periodically by the Board to ensure that they continue to meet the criteria outlined in the policies. The Board tasks USCF with assessing risks, including market risk, credit risk, liquidity risk, cash flow risk, basis risk, legal and tax risk, settlement risk, and operational risk.

The Board also determines compensation payable to employees of USCF, including the portfolio managers of each of USHO and the Related Public Funds. The compensation of certain employees of USCF is, in part, based on the amount of assets under management by USHO and the Related Public Funds. The Board feels that compensating certain employees, in part, based on the amount of assets under management is appropriate since having more assets in a fund generally reflects that investors perceive the fund's investment objective is being met. There are certain risks that may arise as a result of a growth in assets under management. For example, if position limits are imposed on USHO and the assets under management continue to increase, then USHO may not be able to invest solely in the Benchmark Futures Contract and may have to invest in over-the-counter swap contracts or Other Heating Oil-Related Investments as it seeks to track its benchmark. Other Futures Contracts in which USHO may invest may not track changes in the price of the Benchmark Futures Contract. Other Heating Oil-Related Investments, including over-the-counter swap contracts, may also expose USHO to increased counterparty credit risk and may be less liquid and more difficult to value than Futures Contracts. USHO and the Related Public Funds ameliorate the potential credit, liquidity and valuation risks by fully collateralizing any over-the-counter swap contracts or other investments. In making compensation decisions, the Board considers whether a compensation arrangement would expose USHO or the Related Public Funds to additional risks and whether the risks posed by such arrangement are consistent with the best interests of USHO's investors.

Table of Contents**Other Information**

In addition to the certifications of the Chief Executive Officer and Chief Financial Officer of USCF filed or furnished with this annual report on Form 10-K regarding the quality of USHO's public disclosure, USHO will submit, within 30 days after filing this annual report on Form 10-K, to the NYSE Arca a certification of the Chief Executive Officer of USCF certifying that he is not aware of any violation by USHO of NYSE Arca corporate governance listing standards.

**Item 11. Executive Compensation.
Compensation to USCF and Other Compensation**

USHO does not directly compensate any of the executive officers noted above. The executive officers noted above are compensated by USCF for the work they perform on behalf of USHO and other entities controlled by USCF. USHO does not reimburse USCF for, nor does it set the amount or form of any portion of, the compensation paid to the executive officers by USCF. USHO pays fees to USCF pursuant to the LP Agreement under which it is obligated to pay USCF an annualized fee of 0.60% of its average daily net assets. For 2011, USHO accrued aggregate management fees of \$52,803.

Director Compensation

The following table sets forth compensation earned during the year ended December 31, 2011 by the directors of USCF. USHO's portion of the aggregate fees paid to the directors for the year ended December 31, 2011 was \$701.

Name	Fees Earned or Paid in Cash	Stock Awards	Option Award	Incentive Plan Compensation	Change in Pension Value and Nonqualified Deferred Compensation		All Other Compensation	Total
					Non-Equity	Plan		
Management Directors								
Nicholas Gerber	\$ 0	NA	NA	NA	\$ 0	\$ 0	\$ 0	\$ 0
Andrew F. Ngim	\$ 0	NA	NA	NA	\$ 0	\$ 0	\$ 0	\$ 0
Howard Mah	\$ 0	NA	NA	NA	\$ 0	\$ 0	\$ 0	\$ 0
Robert L. Nguyen ⁽¹⁾	\$ 0	NA	NA	NA	\$ 0	\$ 0	\$ 0	\$ 0
Independent Directors								
Peter M. Robinson	\$ 100,000	NA	NA	NA	\$ 0	\$ 0	\$ 0	\$ 100,000
Gordon L. Ellis	\$ 100,000	NA	NA	NA	\$ 0	\$ 0	\$ 0	\$ 100,000
Malcolm R. Fobes III ⁽²⁾	\$ 120,000	NA	NA	NA	\$ 0	\$ 0	\$ 0	\$ 120,000

⁽¹⁾ Effective March 20, 2012, Robert L. Nguyen resigned as a Management Director of USCF. Mr. Nguyen will continue to serve as Managing Principal of Ameristock Corporation, a California-based investment adviser registered under the Investment Advisers Act of 1940 and an affiliate of USCF through common control.

⁽²⁾ Mr. Fobes serves as chairman of the audit committee of USCF and receives additional compensation in recognition of the additional responsibilities he has undertaken in this role.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.

None of the directors or executive officers of USCF, nor the employees of USHO, own any units of USHO. In addition, USHO is not aware of any 5% holder of its units.

Table of Contents**Item 13. Certain Relationships and Related Transactions, and Director Independence.
Certain Relationships and Related Transactions**

USHO has and will continue to have certain relationships with USCF and its affiliates. However, there have been no direct financial transactions between USHO and the directors or officers of USCF that have not been disclosed herein. See *Item 11. Executive Compensation* and *Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters*. Any transaction with a related person that must be disclosed in accordance with SEC Regulation S-K item 404(a), including financial transactions by USHO with directors or executive officers of USCF or holders of beneficial interests in USCF or USHO of more than 5%, will be subject to the provisions regarding Resolutions of Conflicts of Interest; Standard of Care as set forth in Section 7.7 of the LP Agreement and will be reviewed and approved by the audit committee of the Board of USCF.

Director Independence

In February 2012, the Board undertook a review of the independence of the directors of USCF and considered whether any director has a material relationship or other arrangement with USCF, USHO, or the Related Public Funds that could compromise his ability to exercise independent judgment in carrying out his responsibilities. As a result of this review, the Board determined that each of Messrs. Fobes, Ellis and Robinson is an independent director, as defined under the rules of NYSE Arca.

Item 14. Principal Accountant Fees and Services.

The fees for services billed to USHO by its independent auditors for the last two fiscal years are as follows:

	2011	2010
Audit fees	\$ 25,000	\$ 25,000
Audit-related fees		
Tax fees		
All other fees		
	\$ 25,000	\$ 25,000

Audit fees consist of fees paid to Spicer Jeffries LLP for (i) the audit of USHO's annual financial statements included in the annual report on Form 10-K, and review of financial statements included in the quarterly reports on Form 10-Q and certain of USHO's current reports on Form 8-K and (ii) services that are normally provided by the Independent Registered Public Accountants in connection with statutory and regulatory filings of registration statements.

Tax fees consist of fees paid to Spicer Jeffries LLP for professional services rendered in connection with tax compliance and partnership income tax return filings.

The audit committee has established policies and procedures which are intended to control the services provided by USHO's independent auditors and to monitor their continuing independence. Under these policies and procedures, no audit or permitted non-audit services (including fees and terms thereof), except for the *de minimis* exceptions for non-audit services described in Section 10A(i)(1)(B) of the Exchange Act, may be undertaken by USHO's independent auditors unless the engagement is specifically pre-approved by the audit committee. The audit committee may form and delegate authority to subcommittees consisting of one or more members when appropriate, including the authority to grant pre-approvals of audit and permitted non-audit services, provided that decisions of such subcommittee to grant pre-approvals must be presented to the full audit committee at its next scheduled meeting.
