## NON-GAAP FINANCIAL INFORMATION

Certain statements in this presentation (including statements regarding the company's forecasts, beliefs, estimates and expectations) that are not historical in nature are "forward-looking" statements within the meaning of the Private Securities Litigation Reform Act of 1995. In particular, the statements related to the Timken Company s plans, outlook, future financial performance, targets, projected sales, cash flows, and liquidity, including the information under the headings, Strong Synergistic Relationship Across Timken Businesses, Relational s Valuation Analysis is Flawed. Relational s Proposal Based on Unrealistic Bearings Trading Multiple, Steel Standalone Business Would be Smallest Compared to Other Steel Companies, Significant Synergies Would be Lost in Steel Analysts Median SOTP Analysis Does Not Support Relational s Claim of Break-up Value, Spin-off, Comprehensive Plan to Drive Shareholder Value. Three-Year Targets Reflect Strength of Strategic Plan, and Our Strategy is Working and We Are Committed to Building Shareholder Value are forward-looking. The company cautions that actual results may differ materially from those projected or implied in forward-looking statements due to a variety of important factors, including: the company s ability to respond to the changes in its end markets that could affect demand for the company s products; unanticipated changes in business relationships with customers or their purchases from the company; changes in the financial health of the company s customers, which may have an impact on the company s revenues, earnings and impairment charges; fluctuations in raw-material and energy costs and their impact on the operation of the company s surcharge mechanisms; the impact of the company s last-in, first-out accounting; weakness in global or regional economic conditions and financial markets; changes in the expected costs associated with product warranty claims; the ability to integrate acquired companies to achieve satisfactory operating results; the impact on operations of general economic conditions; higher or lower rawmaterial and energy costs; fluctuations in customer demand; the company s ability to achieve the benefits of its ongoing programs, initiatives & capital investments; the timing and amount of common share repurchases; and retention of CDSOA distributions. Additional factors are discussed in the company s filings with the Securities and Exchange Commission, including the company s annual report on Form 10-K for the year ended Dec. 31, 2012, quarterly reports on Form 10-Q and current reports on Form 8-K. The company undertakes no obligation to update or revise any forward-looking statement.

This presentation includes certain non-GAAP financial measures as defined by the rules and regulations of the Securities and Exchange Commission. A reconciliation of those measures to the most directly comparable GAAP equivalent is provided in the Appendix to this presentation.

```
The California State Teachers
Retirement System ( CalSTRS ) and Relational Investors
( Relational )
have
put
forth
proposal
(1)
separate
the
Steel
Business
(Steel)
and
Bearings
Power Transmission Business ( Bearings )
```

The Timken Company s Board of Directors has carefully reviewed a separation of the businesses, with input from outside advisors, in the past and again in response to Relational s proposal and determined it is not in the best interests of shareholders at this time

#### A Record of Delivering Value

Operational

integration

and

technology

sharing

between

Steel

and

Bearings

create

meaningful

benefits for customers and shareholders

#### Relational s Flawed Analysis

The Timken Company s Comprehensive Plan to Drive Value

(1)

For simplicity, further references in this presentation regarding proposals, assertions, analysis, assumptions, claims and filings be attributed to CalSTRS as appropriate.

3

Timken has a strong track record of delivering shareholder value

with its existing strategy

Timken Steel is one of the Company s highest ROIC businesses; Timken has invested to even

further improve Steel s cost structure and profitability

We believe Relational s break-up valuation analysis has serious flaws

Contrary to Relational s assertion, Timken has strong corporate governance standards, as recognized

by independent proxy advisors

We believe continued execution of our proven strategy is the best path to value creation

SHAREHOLDER BENEFITS

Steel provides enhanced product quality across

Process, Mobile and Aerospace & Defense

Shorter lead times based on steel availability

Enhanced customer service and on-time product

delivery

Lower costs

Faster customization of specialty products

End-market focus facilitates engineering know-how and insights

Product solutions leverage 100+ years of application and engineering expertise, driving product quality and demand

Technical knowledge of materials drives optimization of power transmission solutions

Steel benefits from sale of value-added products that leverage bearings knowledge

Steel production capabilities increase Process, Mobile and Aerospace & Defense competitiveness, given significant customer benefits

Savings on application engineering and R&D

Value-based pricing drives higher margins, as integration across businesses contributes to customer value proposition

Timken gains greater insight into shared customers and common end-markets Supply Chain Synergies Knowledge-Based Synergies Best-in-Class Products and Reliability Increased Demand, Higher Margins

Ability to internally source steel reduces impact of volatile end markets

Control of raw materials supply improves product quality

Reliable steel availability drives shorter lead times enhancing ontime product delivery, especially in peak demand periods

Customers value the Company s reliability yielding increased customer demand and higher margins

Process, Mobile and Aerospace & Defense have Sourced 58% of Steel Needs from Timken Steel over the Past Five Years

Reconciliation of **ROIC** (1) to **GAAP** Operating Income Management believes ROIC is representative of the company s performance and therefore useful to investors. Segment **EBIT** results have been adjusted to include proportional amount

of unallocated corporate expenses in this analysis because management believes it provides a more meaningful representation of segment ROIC. 2010 2011 2012 2010 2011 2012 2010 2011 2012 2010 2011 2012 Segment EBIT, as reported 208 \$ 262 \$ 208 \$ 134 \$ 274 \$ 275 \$ 17 \$ 5 \$
