Statement Regarding Forward-Looking Disclosure

This Annual Report on Form 10-K, including the sections entitled Risk Factors, Management's Discussion and Analysis of Financial Condition and Results of Operations and Business, contains forward-looking statements. We may, in some cases, use words such as project, predict, believe, anticipate, plan, expect, estimate, intend, should, would, could, potentially, or may or other words that convey uncertainty to identify these forward-looking statements. Forward-looking statements in this Annual Report on Form 10-K are subject to a number of risks and uncertainties, some of which are beyond our control, including, among other things:

our ability to successfully operate our businesses on a combined basis, and to effectively integrate and improve any future acquisitions;

our ability to remove our Manager and our Manager's right to resign;

our trust and organizational structure, which may limit our ability to meet our dividend and distribution policy;

our ability to service and comply with the terms of our indebtedness;

our cash flow available for distribution and our ability to make distributions in the future to our shareholders;

our ability to pay the management fee, and profit allocation when due;

our ability to make and finance future acquisitions;

our ability to implement our acquisition and management strategies;

the regulatory environment in which our businesses operate;

trends in the industries in which our businesses operate;

changes in general economic or business conditions or economic or demographic trends in the United States and other countries in which we have a presence, including changes in interest rates and inflation;

environmental risks affecting the business or operations of our businesses;

our and our Manager's ability to retain or replace qualified employees of our businesses and our Manager;

costs and effects of legal and administrative proceedings, settlements, investigations and claims; and

Edgar Filing: Compass Diversified Holdings - Form 10-K

extraordinary or force majeure events affecting the business or operations of our businesses.

Our actual results, performance, prospects or opportunities could differ materially from those expressed in or implied by the forward-looking statements. A description of some of the risks that could cause our actual results to differ appears under the section "Risk Factors". Additional risks of which we are not currently aware or which we currently deem immaterial could also cause our actual results to differ.

In light of these risks, uncertainties and assumptions, you should not place undue reliance on any forward-looking statements. The forward-looking events discussed in this Annual Report on Form 10-K may not occur. These forward-looking statements are made as of the date of this Annual Report. We undertake no obligation to publicly update or revise any forward-looking statements to reflect subsequent events or circumstances, whether as a result of new information, future events or otherwise, except as required by law.

Table of Contents

PART I

ITEM 1. BUSINESS

Compass Diversified Holdings, a Delaware statutory trust (Holdings), or the Trust), was incorporated in Delaware on November 18, 2005. Compass Group Diversified Holdings, LLC, a Delaware limited liability Company (the Company), was also formed on November 18, 2005. The Trust and the Company (collectively CODI) were formed to acquire and manage a group of small and middle-market businesses headquartered in North America. The Trust is the sole owner of 100% of the Trust Interests, as defined in our LLC Agreement, of the Company. Pursuant to the LLC Agreement, the Trust owns an identical number of Trust Interests in the Company as exist for the number of outstanding shares of the Trust. Accordingly, our shareholders are treated as beneficial owners of Trust Interests in the Company and, as such, are subject to tax under partnership income tax provisions.

The Company is the operating entity with a board of directors whose corporate governance responsibilities are similar to that of a Delaware corporation. The Company's board of directors oversees the management of the Company and our businesses and the performance of Compass Group Management LLC (CGM or our Manager). Certain members of our Manager receive a profit allocation as owners of 53.6% of the Allocation Interests in us, as defined in our LLC Agreement.

Overview

We acquire controlling interests in and actively manage businesses that we believe (i) operate in industries with long-term macroeconomic growth opportunities, (ii) have positive and stable cash flows, (iii) face minimal threats of technological or competitive obsolescence and, (iv) have strong management teams largely in place.

Our unique public structure provides investors with an opportunity to participate in the ownership and growth of companies which have historically been owned by private equity firms, wealthy individuals or families. Through the acquisition of a diversified group of businesses with these characteristics, we believe we offer investors an opportunity to diversify their own portfolio risk while participating in the ongoing cash flows of those businesses through the receipt of quarterly distributions.

Our disciplined approach to our target market provides opportunities to methodically purchase attractive businesses at values that are accretive to our shareholders. For sellers of businesses, our unique financial structure allows us to acquire businesses efficiently with little or no third party financing contingencies and, following acquisition, to provide our businesses with substantial access to growth capital.

We believe that private company operators and corporate parents looking to sell their business units may consider us an attractive purchaser because of our ability to:

provide ongoing strategic and financial support for their businesses;

maintain a long-term outlook as to the ownership of those businesses where such an outlook is required for maximization of our shareholders' return on investment; and

consummate transactions efficiently without being dependent on third-party transaction financing.

In particular, we believe that our outlook on length of ownership and active management on our part may alleviate the concern that many private company operators and parent companies may have with regard to their businesses going through multiple sale processes in a short period of time. We believe this outlook reduces both the risk that businesses may be sold at unfavorable points in the overall market cycle and enhances our ability to develop a comprehensive strategy to grow the earnings and cash flows of each of our businesses, which we expect will better enable us to meet our long-term objective of continuing to pay distributions to our shareholders while increasing shareholder value. Finally, it has been our experience, that our ability to acquire businesses without the cumbersome delays and conditions typical of third party transactional financing is appealing to sellers of businesses who are interested in confidentiality and certainty to close.

Table of Contents

We believe our management team's strong relationships with industry executives, accountants, attorneys, business brokers, commercial and investment bankers, and other potential sources of acquisition opportunities offer us substantial opportunities to assess small to middle market businesses available for acquisition. In addition, the flexibility, creativity, experience and expertise of our management team in structuring transactions allows us to consider non-traditional and complex transactions tailored to fit a specific acquisition target.

In terms of the businesses in which we have a controlling interest as of December 31, 2013, we believe that these businesses have strong management teams, operate in strong markets with defensible market niches and maintain long standing customer relationships. We believe that the strength of this model, which provides for significant industry, customer and geographic diversity, has become even more apparent in the recent challenging economic environment.

2013 Highlights

Debt Re-pricing

On April 3, 2013, we exercised an option to increase our Term Loan Facility by \$30 million. Net proceeds from this incremental term loan were used to reduce outstanding loans on our Revolving Credit Facility. In connection with the increase, we amended the pricing of our Credit Facility so that borrowings under the Term Loan Facility now bear interest at LIBOR plus 4.0% with a floor of 1.0% and borrowings under the Revolving Credit Facility now bear interest at LIBOR plus 2.5% - 3.5%. In addition, the amendment provided for a reduction in commitment fees on revolving loan availability to 0.75% and extended the maturity date on our Revolving Credit Facility to April 2017.

On August 6, 2013, we exercised an option under our Credit Facility to expand our Revolving Credit Facility by \$30 million, increasing the total amount available under the facility to \$320 million subject to borrowing base restrictions. We intend to utilize the incremental borrowing capacity under the Revolving Credit Facility to fund future growth opportunities and provide for working capital and general corporate purposes.

FOX IPO

On August 13, 2013 Fox Factory Holding Corp. (FOX) completed an initial public offering of its common stock pursuant to a registration statement on Form S-1 (the FOX IPO). In the FOX IPO, FOX sold 2,857,143 shares and certain of its shareholders sold 7,000,000 shares (including 5,800,238 shares held by CODI) at an initial offering price of \$15.00 per share. FOX trades on The NASDAQ Stock Market LLC (the NASDAQ) stock market under the ticker FOXF . We received approximately \$80.9 million in net proceeds from the sale of our FOX shares. FOX used a portion of their net proceeds received from the sale of their shares as well as proceeds from a new credit facility with a third party lender to repay \$61.5 million in outstanding indebtedness to us under their credit facility.

As a result of the FOX IPO, we currently own approximately 53.9% of the outstanding shares of FOX common stock.

2013 Distributions

For the 2013 fiscal year we declared and paid distributions to our shareholders totaling \$1.44 per share.

The following is a brief summary of the businesses in which we own a controlling interest at December 31, 2013:

Branded Products Businesses

CamelBak

CamelBak Products LLC (CamelBak), headquartered in Petaluma, California, is a diversified hydration and personal protection platform offering products for outdoor, recreation and military applications. CamelBak offers a broad range of recreational / military hydration packs, reusable water bottles, specialized military gloves and performance accessories. We made loans to, and purchased a controlling interest in, CamelBak on August 24, 2011 for approximately \$211.6 million. We currently own 89.9% of the outstanding stock of CamelBak on a primary basis and 79.7% on a fully diluted basis.

Table of Contents

Ergobaby

Ergobaby Carrier, Inc. (*Ergobaby*), headquartered in Los Angeles, California, is a premier designer, manufacturer and distributor of wearable baby carriers and related baby wearing products, as well as stroller travel systems and accessories. Ergobaby's reputation for product innovation, reliability and safety has led to numerous awards and accolades from consumers, industry experts and publications. Ergobaby offers a broad range of wearable baby carriers, stroller travel systems and related products that are sold through more than 450 retailers and web shops in the United States and internationally. We made loans to, and purchased a controlling interest in, Ergobaby on September 16, 2010 for approximately \$85.2 million. We currently own 81.0% of the outstanding stock of Ergobaby on a primary basis and 75.0% on a fully diluted basis.

FOX

FOX headquartered in Scotts Valley, California, is a designer, manufacturer and marketer of high-performance suspension products used primarily on mountain bikes, side-by-side vehicles, on-road vehicles with off-road capabilities, off-road vehicles and trucks, all-terrain vehicles, or ATVs, snowmobiles, specialty vehicles and applications, and motorcycles. FOX's products offer innovative design, performance, durability and reliability that enhance ride dynamics by improving performance and control. The FOX brand is associated with high-performance and technologically advanced products. We made loans to and purchased a controlling interest in FOX on January 4, 2008, for approximately \$80.4 million. We currently own 53.9% of the outstanding common stock on a primary basis and 49.8% on a fully diluted basis.

Liberty Safe

Liberty Safe and Security Products, Inc. (*Liberty Safe* or *Liberty*), headquartered in Payson, Utah, is a designer, manufacturer and marketer of premium home and gun safes in North America. From its over 200,000 square foot manufacturing facility, Liberty produces a wide range of home and gun safe models in a broad assortment of sizes, features and styles. We made loans to and purchased a controlling interest in Liberty Safe on March 31, 2010 for approximately \$70.2 million. We currently own 96.2% of the outstanding stock of Liberty Safe on a primary basis and 84.8% on a fully diluted basis.

Niche Industrial Businesses

Advanced Circuits

Compass AC Holdings, Inc. (*Advanced Circuits* or *ACI*), headquartered in Aurora, Colorado, is a provider of prototype, quick-turn and volume production rigid printed circuit boards, or PCBs, throughout the United States. PCBs are a vital component of virtually all electronic products. The prototype and quick-turn portions of the PCB industry are characterized by customers requiring high levels of responsiveness, technical support and timely delivery. We made loans to and purchased a controlling interest in Advanced Circuits, on May 16, 2006, for approximately \$81.0 million. We currently own 69.4% of the outstanding stock of Advanced Circuits on a primary and fully diluted basis.

American Furniture

AFM Holding Corporation (*American Furniture* or *AFM*) headquartered in Ecu, Mississippi, is a leader in the manufacturing of low-cost upholstered stationary and motion furniture, including sofas, loveseats, sectionals, recliners and complementary products to the promotional furniture market. We made loans to and purchased a controlling interest in AFM on August 31, 2007 for approximately \$97.0 million. We currently own approximately 99.9% of AFM's outstanding stock on a primary basis and fully diluted basis.

Arnold

AMT Acquisition Corporation (*Arnold* or *Arnold Magnetics*), headquartered in Rochester, NY, with nine additional facilities worldwide, is a manufacturer of engineered, application specific permanent magnets. Arnold Magnetics products are used in applications such as general industrial, reprographic systems, aerospace and defense, advertising and promotional, consumer and appliance, energy, automotive and medical technology. Arnold Magnetics is the largest U.S. manufacturer of engineered magnets as well as only one of two domestic producers to design, engineer and manufacture rare earth magnetic solutions. We made loans to, and purchased a controlling interest in Arnold on March 5, 2012 for approximately \$128.8 million. We currently own 96.7% of the outstanding stock of Arnold on a primary basis and 87.2% on a fully diluted basis.

Table of Contents

Tridien

Anodyne Medical Device, Inc. (Anodyne, which was rebranded as Tridien in September 2010) headquartered in Coral Springs, Florida, is a leading designer and manufacturer of powered and non-powered medical therapeutic support services and patient positioning devices serving the acute care, long-term care and home health care markets. Tridien is one of the nation's leading designers and manufacturers of specialty therapeutic support surfaces and is able to manufacture products in multiple locations to better serve a national customer base. We made loans to and purchased a controlling interest in Tridien from CGI on August 1, 2006 for approximately \$31.0 million. We currently own 81.3% of the outstanding capital stock on a primary basis and 66.5% on a fully diluted basis.

Our businesses also represent our operating segments. See **Our Businesses** and **Note F Operating Segment Data** to our Consolidated Financial Statements for further discussion of our businesses as our operating segments.

Tax Reporting

Information returns will be filed by the Trust and the Company with the IRS, as required, with respect to income, gain, loss, deduction and other items derived from the Company's activities. The Company has and will file a partnership return with the IRS and intends to issue a Schedule K-1 to the trustee. The trustee intends to provide information to each holder of shares using a monthly convention as the calculation period. For 2013, and future years, the Trust has, and will continue to file a Form 1065 and issue Schedule K-1 to shareholders. For 2013, we delivered the Schedule K-1 to shareholders within the same time frame as we delivered the schedule to shareholders for the 2012 and 2011 taxable year. The relevant and necessary information for tax purposes is readily available electronically through our website. Each holder will be deemed to have consented to provide relevant information, and if the shares are held through a broker or other nominee, to allow such broker or other nominee to provide such information as is reasonably requested by us for purposes of complying with our tax reporting obligations.

WHERE YOU CAN FIND ADDITIONAL INFORMATION

We have filed with the SEC Forms S-1 and S-3 under the Securities Act, and Forms 10-Q, 10-K, and 8-K under the Exchange Act, which include exhibits, schedules and amendments. In addition, copies of such reports are available free of charge that can be accessed indirectly through our website <http://www.compassdiversifiedholdings.com> and are available as soon as reasonably practicable after such documents are electronically filed or furnished with the SEC.

Table of Contents

- 1) CGI and its affiliates beneficially own approximately 16.4% of the Trust shares and is our single largest holder. Mr. Offenberg is not a director, officer or member of CGI or any of its affiliates.
- 2) 53.6% owned by certain members of our Manager. Mr. Day and CGI are non-managing members.
- 3) Mr. Offenberg is a partner of this entity.
- 4) The Allocation Interests, which carry the right to receive a profit allocation, represent less than 0.1% equity interest in the Company.

Table of Contents

Our Manager

Our Manager, CGM, has been engaged to manage the day-to-day operations and affairs of the Company and to execute our strategy, as discussed below. Our management team has worked together since 1998. Collectively, our management team has extensive experience in acquiring and managing small and middle market businesses. We believe our Manager is unique in the marketplace in terms of the success and experience of its employees in acquiring and managing diverse businesses of the size and general nature of our businesses. We believe this experience will provide us with an advantage in executing our overall strategy. Our management team devotes a majority of its time to the affairs of the Company.

We have entered into a management services agreement, (the Management Services Agreement or MSA) pursuant to which our Manager manages the day-to-day operations and affairs of the Company and oversees the management and operations of our businesses. We pay our Manager a quarterly management fee for the services it performs on our behalf. In addition, certain members of our Manager receive a profit allocation with respect to its Allocation Interests in us. All of the Allocation Interests in us are owned by Sostratus LLC. See Part III, Item 13 Certain Relationships and Related Transactions for further descriptions of the management fees and profit allocations.

The Company's Chief Executive Officer and Chief Financial Officer are employees of our Manager and have been seconded to us. Neither the Trust nor the Company has any other employees. Although our Chief Executive Officer and Chief Financial Officer are employees of our Manager, they report directly to the Company's board of directors. The management fee paid to our Manager covers all expenses related to the services performed by our Manager, including the compensation of our Chief Executive Officer and other personnel providing services to us. The Company reimburses our Manager for the salary and related costs and expenses of our Chief Financial Officer and his staff, who dedicate substantially all of their time to the affairs of the Company.

See Part III, Item 13, Certain Relationships and Related Party Transactions and Director Independence.

Market Opportunity

We acquire and actively manage small and middle market businesses. We characterize small to middle market businesses as those that generate annual cash flows of up to \$60 million. We believe that the merger and acquisition market for small to middle market businesses is highly fragmented and provides opportunities to purchase businesses at attractive prices. We believe that the following factors contribute to lower acquisition multiples for small and middle market businesses:

there are fewer potential acquirers for these businesses;

third-party financing generally is less available for these acquisitions;

sellers of these businesses frequently consider non-economic factors, such as continuing board membership or the effect of the sale on their employees; and

these businesses are less frequently sold pursuant to an auction process.

Frequently opportunities exist to augment existing management at such businesses and improve the performance of these businesses upon their acquisition. In the past, our management team has acquired businesses that were owned by entrepreneurs or large corporate parents. In these cases, our management team has frequently found that there have been opportunities to further build upon the management teams of acquired businesses beyond those that existed at the time of acquisition. In addition, our management team has frequently found that financial reporting and management information systems of acquired businesses may be improved, both of which can lead to improvements in earnings and cash flow. Finally, because these businesses tend to be too small to have their own corporate development efforts, opportunities frequently exist to assist these businesses as they pursue organic or external growth strategies that were often not pursued by their previous owners.

Our Strategy

Edgar Filing: Compass Diversified Holdings - Form 10-K

We have two primary strategies that we use in order to provide distributions to our shareholders and increase shareholder value. First, we focus on growing the earnings and cash flow from our acquired businesses. We believe that the scale and scope of our businesses give us a diverse base of cash flow upon which to further build. Second, we identify, perform due diligence on, negotiate and consummate additional platform acquisitions of small to middle market businesses in attractive industry sectors in accordance with acquisition criteria established by the board of directors

Table of Contents

Management Strategy

Our management strategy involves the proactive financial and operational management of the businesses we own in order to increase cash flow, pay distributions to our shareholders and increase shareholder value. Our Manager oversees and supports the management teams of each of our businesses by, among other things:

recruiting and retaining talented managers to operate our businesses using structured incentive compensation programs, including non-controlling equity ownership, tailored to each business;

regularly monitoring financial and operational performance, instilling consistent financial discipline, and supporting management in the development and implementation of information systems to effectively achieve these goals;

assisting management in their analysis and pursuit of prudent organic growth strategies;

identifying and working with management to execute attractive external growth and acquisition opportunities;

assisting management in controlling and right-sizing overhead costs, particularly in the current challenging economic environment; and

forming strong subsidiary level boards of directors to supplement management in their development and implementation of strategic goals and objectives.

Specifically, while our businesses have different growth opportunities and potential rates of growth, we expect our Manager to work with the management teams of each of our businesses to increase the value of, and cash generated by, each business through various initiatives, including:

making selective capital investments to expand geographic reach, increase capacity, or reduce manufacturing costs of our businesses;

investing in product research and development for new products, processes or services for customers;

improving and expanding existing sales and marketing programs;

pursuing reductions in operating costs through improved operational efficiency or outsourcing of certain processes and products; and

consolidating or improving management of certain overhead functions.

Our businesses typically acquire and integrate complementary businesses. We believe that complementary add-on acquisitions improve our overall financial and operational performance by allowing us to:

Edgar Filing: Compass Diversified Holdings - Form 10-K

leverage manufacturing and distribution operations;

leverage branding and marketing programs, as well as customer relationships;

add experienced management or management expertise;

increase market share and penetrate new markets; and

realize cost synergies by allocating the corporate overhead expenses of our businesses across a larger number of businesses and by implementing and coordinating improved management practices.

Table of Contents

We incur third party debt financing almost entirely at the Company level, which we use, in combination with our equity capital, to provide debt financing to each of our businesses and to acquire additional businesses. FOX maintains its own credit facility. Refer to [Liquidity and Capital Resources](#) [FOX Credit Facility](#). We believe this financing structure is beneficial to the financial and operational activities of each of our businesses by aligning our interests as both equity holders of, and lenders to, our businesses, in a manner that we believe is more efficient than each of our businesses borrowing from third-party lenders.

Acquisition Strategy

Our acquisition strategy involves the acquisition of businesses that we expect to produce stable and growing earnings and cash flow. In this respect, we expect to make acquisitions in industries other than those in which our businesses currently operate if we believe an acquisition presents an attractive opportunity. We believe that attractive opportunities will continue to present themselves, as private sector owners seek to monetize their interests in longstanding and privately-held businesses and large corporate parents seek to dispose of their non-core operations.

Our ideal acquisition candidate has the following characteristics:

is an established North American based company;

maintains a significant market share in defensible industry niche (i.e., has a reason to exist);

has a solid and proven management team with meaningful incentives;

has low technological and/or product obsolescence risk; and

maintains a diversified customer and supplier base.

We benefit from our Manager's ability to identify potential diverse acquisition opportunities in a variety of industries. In addition, we rely upon our management team's experience and expertise in researching and valuing prospective target businesses, as well as negotiating the ultimate acquisition of such target businesses. In particular, because there may be a lack of information available about these target businesses, which may make it more difficult to understand or appropriately value such target businesses, on our behalf, our Manager:

engages in a substantial level of internal and third-party due diligence;

critically evaluates the target management team;

identifies and assesses any financial and operational strengths and weaknesses of the target business;

analyzes comparable businesses to assess financial and operational performances relative to industry competitors;

actively researches and evaluates information on the relevant industry; and

Edgar Filing: Compass Diversified Holdings - Form 10-K

thoroughly negotiates appropriate terms and conditions of any acquisition.

The process of acquiring new businesses is both time-consuming and complex. Our management team historically has taken from two to twenty-four months to perform due diligence, negotiate and close acquisitions. Although our management team is always at various stages of evaluating several transactions at any given time, there may be periods of time during which our management team does not recommend any new acquisitions to us. Even if an acquisition is recommended by our management team, our board of director s may not approve it.

Table of Contents

A component of our acquisition financing strategy that we utilize in acquiring the businesses we own and manage is to provide both equity capital and debt capital, raised at the parent company level largely through our existing credit facility, to close acquisitions. We believe, and it has been our experience, that having the ability to finance our acquisitions with capital resources raised by us, rather than negotiating separate third party financing, provides us with an advantage in successfully acquiring attractive businesses by minimizing delay and closing conditions that are often related to acquisition-specific financings. In addition, our strategy of providing this intercompany debt financing within the capital structure of the businesses we acquire and manage allows us the ability to distribute cash to the parent company through monthly interest payments and amortization of principle on these intercompany loans.

Upon acquisition of a new business, we rely on our Manager's experience and expertise to work efficiently and effectively with the management of the new business to jointly develop and execute a successful business plan.

We believe our financing structure, in which both equity and debt capital are raised at the Company level, allows us to acquire businesses without transaction specific financing and is conducive to our ability to consummate transactions that may be attractive in both the short- and long-term.

In addition to acquiring businesses, we sell those businesses that we own from time to time when attractive opportunities arise that outweigh the value that we believe we will be able to bring such businesses consistent with our long-term investment strategy. As such, our decision to sell a business is based on our belief that doing so will increase shareholder value to a greater extent than through our continued ownership of that business. Upon the sale of a business, we may use the proceeds to retire debt or retain proceeds for acquisitions or general corporate purposes. We do not expect to make special distributions at the time of a sale of one of our businesses; instead, we expect to pay shareholder distributions over time solely through the earnings and cash flows of our businesses.

Since our inception in May 2006, we have recorded gains on sales of our businesses of approximately \$198 million. We sold Crosman Acquisition Company (Crosman) in January 2007, Aeroglide Company (Aeroglide) and Silvue Technologies Group, Inc. (Silvue) in June 2008, Staffmark Holdings Inc. (Staffmark) in 2011 and HALO Branded Solutions (HALO) in 2012. We sold Crosman, our majority owned recreational products company for approximately \$143 million and our net proceeds and gain on sale were approximately \$110 million and \$36 million, respectively. We sold Aeroglide, our majority owned designer and manufacturer of industrial drying and cooling equipment for approximately \$95 million and our net proceeds and gain on sale were approximately \$78 million and \$34 million, respectively. We sold Silvue, our majority owned developer and producer of proprietary, high performance liquid coating systems for approximately \$95 million and our net proceeds and gain on sale were approximately \$64 million and \$39 million, respectively. We sold Staffmark, our majority-owned provider of temporary staffing solutions subsidiary for approximately \$295 million and our net proceeds and gain on sale were approximately \$217 million and \$89 million, respectively. We sold HALO, our majority owned fulfillment provider of promotional items for \$76.5 million and our net proceeds upon sale were approximately \$66.0 million and our loss on sale was approximately \$0.5 million.

On August 13, 2013 FOX completed an initial public offering of its common stock. We sold a portion of our shares of common stock in FOX in this offering and received net proceeds totaling \$80.9 million. Our ownership position was diluted as a result of the offering. We currently own 53.9% of FOX on a primary basis and 48.9% on a fully diluted basis. No gain was reflected as a result of the sale of our FOX shares because our majority ownership classification of FOX did not change.

Strategic Advantages

Based on the experience of our management team and its ability to identify and negotiate acquisitions, we believe we are well-positioned to acquire additional businesses. Our management team has strong relationships with business brokers, investment and commercial bankers, accountants, attorneys and other potential sources of acquisition opportunities. In addition, our management team also has a successful track record of acquiring and managing small to middle market businesses in various industries. In negotiating these acquisitions, we believe our management team has been able to successfully navigate complex situations surrounding acquisitions, including corporate spin-offs, transitions of family-owned businesses, management buy-outs and reorganizations.

Table of Contents

Our management team has a large network of approximately 2,000 deal intermediaries who we expect to expose us to potential acquisitions. Through this network, as well as our management team's proprietary transaction sourcing efforts, we have a substantial pipeline of potential acquisition targets. Our management team also has a well-established network of contacts, including professional managers, attorneys, accountants and other third-party consultants and advisors, who may be available to assist us in the performance of due diligence and the negotiation of acquisitions, as well as the management and operation of our acquired businesses.

Finally, because we intend to fund acquisitions through the utilization of our Revolving Credit Facility, we expect to minimize the delays and closing conditions typically associated with transaction specific financing, as is typically the case in such acquisitions. We believe this advantage can be a powerful one, especially in a tight credit environment, and is highly unusual in the marketplace for acquisitions in which we operate.

Valuation and Due Diligence

When evaluating businesses or assets for acquisition, our management team performs a rigorous due diligence and financial evaluation process. In doing so, we evaluate the operations of the target business as well as the outlook for the industry in which the target business operates. While valuation of a business is, by definition, a subjective process, we define valuations under a variety of analyses, including:

discounted cash flow analyses;

evaluation of trading values of comparable companies;

expected value matrices; and

examination of comparable recent transactions.

One outcome of this process is a projection of the expected cash flows from the target business. A further outcome is an understanding of the types and levels of risk associated with those projections. While future performance and projections are always uncertain, we believe that with detailed due diligence, future cash flows will be better estimated and the prospects for operating the business in the future better evaluated. To assist us in identifying material risks and validating key assumptions in our financial and operational analysis, in addition to our own analysis, we engage third-party experts to review key risk areas, including legal, tax, regulatory, accounting, insurance and environmental. We also engage technical, operational or industry consultants, as necessary.

A further critical component of the evaluation of potential target businesses is the assessment of the capability of the existing management team, including recent performance, expertise, experience, culture and incentives to perform. Where necessary, and consistent with our management strategy, we actively seek to augment, supplement or replace existing members of management who we believe are not likely to execute our business plan for the target business. Similarly, we analyze and evaluate the financial and operational information systems of target businesses and, where necessary, we enhance and improve those existing systems that are deemed to be inadequate or insufficient to support our business plan for the target business.

Financing

We have a Credit Facility with a group of lenders led by TD Securities that we entered into on October 27, 2011 and further amended on April 2, 2012, April 3 and August 6, 2013. The Credit Facility provides for a Revolving Credit Facility totaling \$320 million, subject to borrowing base restrictions, and a Term Loan Facility totaling \$279.8 million at December 31, 2013. The Term Loan Facility requires quarterly payments of \$0.7 million, with a final payment of the outstanding principal balance in October 2017. The Revolving Credit Facility matures in April 2017.

The Credit Facility provides for letters of credit under the Revolving Credit Facility in an aggregate face amount not to exceed \$100 million outstanding at any time. At no time may the (i) aggregate principal amount of all amounts outstanding under the Revolving Credit Facility, plus (ii) the aggregate amount of all outstanding letters of credit, exceed the borrowing availability under the Credit Facility. At December 31, 2013, we had outstanding letters of credit totaling approximately \$1.6 million. The borrowing availability under the Revolving Credit Facility at December 31, 2013 was approximately \$318 million.

Table of Contents

The Credit Facility is secured by all of the assets of the Company, including all of its equity interests in, and loans to, its subsidiaries. (See Note I to the consolidated financial statements for more detail regarding our Credit Facility).

We intend to finance future acquisitions through our Revolving Credit Facility, cash on hand and, if necessary, additional equity and debt financings. We believe, and it has been our experience, that having the ability to finance our acquisitions with the capital resources raised by us, rather than negotiating separate third party financing specifically related to the acquisition of individual businesses, provides us with an advantage in acquiring attractive businesses by minimizing delay and closing conditions that are often related to acquisition-specific financings. In this respect, we believe that in the future, we may need to pursue additional debt or equity financings, or offer equity in Holdings or target businesses to the sellers of such target businesses, in order to fund multiple future acquisitions.

Our Businesses

We categorize the businesses we own into two separate groups of businesses (i) branded products businesses and, (ii) niche industrial businesses. Branded products businesses are characterized as those businesses that we believe capitalize on a valuable brand name in their respective market sector. We believe that our branded products businesses are leaders in their particular product category. Niche industrial businesses are characterized as those businesses that focus on manufacturing and selling particular products within a specific market sector. We believe that our niche industrial businesses are leaders in their specific market sector.

During the three years ended December 31, 2013, 2012 and 2011, 61.5%, 62.1% and 60.5% of net sales are attributable to our branded products businesses with the remaining net sales attributable to our niche industrial businesses.

Branded Products Businesses

CamelBak

Overview

CamelBak, headquartered in Petaluma, California, is a diversified hydration and personal protection platform, offering products for outdoor, recreation and military applications. CamelBak offers a broad range of recreational / military hydration packs, reusable water bottles, specialized military gloves and performance accessories. As the leading supplier of hydration products to specialty outdoor, cycling and military retailers, CamelBak maintains the leading market share position in recreational markets for hands-free hydration packs and the leading market share position for reusable water bottles in specialty channels. CamelBak is also dominant supplier of hydration systems to the military, with a leading market share in post-issue hydration systems. Over its more than 20-year history, CamelBak has developed a reputation as the preferred supplier for the hydration needs of the most demanding athletes and warfighters. Across its markets, CamelBak is respected for its innovation, leadership and authenticity.

For the fiscal years ended December 31, 2013, 2012 and 2011, CamelBak contributed net sales of approximately \$139.9 million, \$157.6 million and \$42.7 million (from date of acquisition), respectively, and operating income of \$17.9 million and \$25.5 million in 2013 and 2012, respectively, and an operating loss of \$6.8 million in 2011. CamelBak had total assets of \$241.0 million, \$259.1 million and \$262.0 million at December 31, 2013, 2012 and 2011, respectively. Net sales from CamelBak represented 14.2%, and 17.8% of our consolidated net sales in the years ended December 31, 2013 and 2012, respectively, and 7.0% of our consolidated net sales in 2011.

Table of Contents

History of CamelBak

Founded in 1989, CamelBak initially gained a following among mountain bikers in the early 1990 s through its first product, the ThermoBak . As CamelBak grew among this base of users, its products continued to gain acceptance within other arenas where participants needed easy access to water to achieve optimal performance in their activity.

The hands-free feature of CamelBak s products proved to be appealing to outdoor sports enthusiasts and critical to others, including the U.S. Military. After successfully developing the hands-free hydration category, CamelBak in 2006, recruited new management, including industry veteran and Board member Sally McCoy in the role of CEO, and acquired Southwest Motorsports (since rebranded CamelBak Gloves). With a strong market presence in hydration packs, the management team focused on continued expansion into adjacent markets and developing and executing on a consistent strategy of innovation. Since this time, CamelBak has steadily grown sales and earnings and has enhanced its relationships with suppliers to strengthen its supply chain, reengineered its product distribution capabilities and tightly controlled operating expenses to match the needs of the business.

In 2006, CamelBak expanded its recreational business into the fast growing bottle category. CamelBak s initial launch of the innovative Better Bottle was followed by numerous successful bottle product introductions for everyday users, road cyclists, kids and recreational enthusiasts, including eddy and the podium collection . CamelBak was first to market with an entirely BPA-free plastic bottle product line.

We purchased a majority interest in CamelBak on August 24, 2011.

Industry

Recreation Market With over 100 million participants, the outdoor recreational activity market represents a large, attractive and stable group of consumers. CamelBak s legacy products have historically been focused on a subset of this group, consisting of cyclists, mountain bikers and other passionate outdoor enthusiasts who tend to be loyal and consistent buyers of premium and performance-enhancing offerings. CamelBak s core customers are typically outdoor enthusiasts who exhibit very high participation rates and frequent purchasing behavior. In addition to CamelBak s legacy consumer group, CamelBak has increasingly used its brand authenticity, credibility and broadening product portfolio to reach athletes in adjacent sporting activities.

Long-term growth in the hydration and personal protection industry is driven by a number of factors. Consumer recognition of personal hydration s importance to health and well-being has been a growing and enduring trend, reflected by the proliferation of bottled water and functional beverages. The importance of water as a healthy choice has become even more prominent as a key component to healthy living. Further, people are increasingly aware of the effects of even minimal dehydration on multiple functions of the body, including brain function, digestion, metabolism and skin health. CamelBak s products have proven their ability to provide greater hydration. An independent study conducted by Pepperdine University found that people utilizing CamelBak s Bite Valve technology consume 24% more than those using single serving disposable bottled water or less innovative products. Recently there has been a reduction in disposable bottled water consumption in the U.S., primarily as a result of price and the wide-spread awareness of the negative environmental impact of disposable water bottles. With respect to the environment, the disposable water bottle s environmentally harmful lifecycle is generating significant backlash. We believe the reliance on oil in the production and transportation of the bottles and the fact that over two-thirds of bottles are not recycled is driving consumers to seek alternatives to disposable bottles. Further, there are a number of government mandates forcing the elimination of disposable bottles. Nationwide, local governments are enacting these curbs to combat the cost and waste of disposable bottles. In recent years, governments of all levels have received scrutiny for fiscal irresponsibility and a number of municipalities have launched initiatives focused on curbing disposable water bottles in their communities. In 2006, a San Francisco investigation revealed that the city spent over \$500,000 per year on bottled water. This revelation triggered a nationwide analysis of government spending on bottled water with public funds. In 2013 Concord, Massachusetts prohibited the sale of plastic water bottles.

Table of Contents

U.S. Government & Military Market The military acquisition process has responded to the demands of modern warfare which require forces to be more agile and flexible than ever before. This trend has been highlighted by the increased use of multiple funding and procurement mechanisms such as Rapid Fielding Initiatives (RFI) and Joint Urgent Operational Needs Statement (JUONS). These programs provide funding for mission critical operational needs such as IED detection and defeat and lifesaving warfighter equipment purchases without the normal bid and proposal process that can take months and even years to get equipment in the hands of the end user. In addition to responsive procurement contracts such as the RFI, the military has continued a gradual decentralization of purchasing which allows decision makers closer to the front line to select what specific items need to be acquired for a unit. Unit and individual equipment purchases are made primarily through U.S. Government Services Administration (GSA) contracts or at military exchange and supply locations. Warfighters and their families frequently purchase supplemental gear that is superior to standard issue products. CamelBak is well positioned to benefit from continued decentralized purchasing.

Products and Services

CamelBak focuses on offering high quality, industry leading hydration and performance equipment. CamelBak s products fall into four key categories:

Hydration Packs CamelBak s heritage and legacy is in hydration packs and CamelBak maintains the broadest and deepest line of packs in the industry. CamelBak s core hydration product consists primarily of an easily cleaned and filled polyurethane reservoir, a connecting tube and a self-sealing mouthpiece, or bite-valve, which facilitates simple and intuitive drinking. The CamelBak hydration system allows users to conveniently carry one to three liters of water, which can be easily accessed without interruption of the user s task or activity. The system is most often sold as an integrated backpack or waist-pack, which is uniquely designed for a specific use, such as biking, running or military applications. Hydration packs represented 44%, 50% and 44% of CamelBak s gross sales in the twelve months ended December 31, 2013, 2012 and 2011, respectively.

Recreation Packs

Having created the hands-free hydration category, CamelBak continues to be the dominant market leader in the recreational sector since its inception. After starting with a mountain biking product, CamelBak developed a host of other types of biking hydration packs that are designed to match specific types of biking. CamelBak sells classic cycling packs that are lightweight and streamlined. CamelBak also sells larger more durable packs designed for long off-road rides and a Downhill/Freeride line designed for specific types of mountain biking activities. By starting with a focused line and expanding it to cover many different types of biking activities, CamelBak has created the deepest, broadest line of hydration packs in the industry.

As CamelBak extended its packs to cover different biking niches, top athletes from other outdoor sports began to clamor for product. To meet this demand, CamelBak has created lines that cater to the diverse set of outdoor athletes:

Hike / Alpine consists of lightweight packs with extra back panel padding and air flow for breathability

Ski / Snowboard has attachments for helmets, boards and shovels

Multi-sport are ultra-light and include wearable hydration units for use in almost any athletic activity

Run includes hip packs designed to hold as many as four water bottles in a remarkably stable set up. These customized solutions have all been developed with an eye towards enhancing the performance of each activity s respective athletes. That customization is part of the innovative difference that allows CamelBak to differentiate itself in a competitive market.

Table of Contents

Military Packs

CamelBak sells a wide selection of category leading military packs. Management estimates CamelBak has in excess of 85% market share in post-issue military hydration packs. It is also one of only a few brands sold to U.S. Military personnel that is allowed to prominently display the brand name on the outside of the product. The packs include features such as easy armor integration and extreme durability appropriate for use in the harshest conditions.

Bottles In 2006, CamelBak parlayed its credibility in hands-free hydration and expanded into bottles. CamelBak introduced the Better Bottle , subsequently replaced by eddy , which incorporated a number of features that quickly established it as a best-in-class hydration solution. These features include: (i) the patented spill-proof Bite Valve, (ii) the first insulated stainless steel water bottle and (iii) in 2008, the first all BPA-free line of plastic water bottles.

The success of the Better Bottle led CamelBak to design a complete line of bottles that would mirror the pack line s legacy of customization. CamelBak developed a line for children, which included bite valves that have to be removed from the inside of the bottle to prevent choking. CamelBak also released the Podium® insulated and non-insulated line, which includes features such as the patented Jet Valve .

CamelBak s bottle offering has continued to evolve to meet the specific demands of consumers. These demands have included activity-based needs such as customized cycling bottles. They have also included health concerns, including the consumer backlash against BPA. CamelBak recognized this concern early and became the first to offer an entire line of BPA-free hard plastic bottles in May of 2008.

CamelBak s bottle offering Groove , provides users the ability to filter water in any place at any time through its integrated straw assembly. Users simply fill the bottle with tap water, screw the cap on and start sipping. The integrated plant-based carbon filter reduces chlorine taste and odors found in tap water thus improving taste and eliminating the desire to purchase disposable bottles of water.

In 2013 CamelBak introduced Chute . Chute is a BPA-Free reusable bottle that is durable for the outdoor conditions, leak proof for safe transport and features an ergonomic, high flow spout that provides rapid hydration.

Bottles represented approximately 42%, 34% and 31% of CamelBak s gross sales for the twelve months ended December 31, 2013, 2012 and 2011, respectively.

Gloves The evolution of CamelBak gloves parallels that of the pack business in the Government / Military channel. Initially created for pit crews in the auto racing market, members of elite squads who became aware of the product were impressed with its dexterity and durability. Following this unofficial endorsement, members of the U.S. Armed Forces began requesting CamelBak gloves. The gloves are highly-technical and difficult to produce, with some styles requiring 44 individual pieces for the assembly of the final product. Today, CamelBak gloves are exclusively a Government / Military product, as their technical characteristics exceed that which a non-military user would desire. Gloves represented approximately 3%, 6% and 14% of CamelBak s gross sales for the twelve months ended December 31, 2013, 2012 and 2011, respectively. The reduction in Glove sales over the past three years is consistent with the reduction of deployed U.S. troops.

Accessories CamelBak offers various accessories to complement its hydration systems. Accessories are available for each product line and include items that are made to enhance hydration performance and others for maintenance or replacement parts.

CamelBak s goal is to reinvent the way that individual athletes, warfighters and every day users hydrate and perform. To that aim, CamelBak has developed a number of new products that help to further enhance the already innovative way that its products deliver water:

Elixir is a flavored electrolyte supplement for performance athletes. It s sugar free and works well with reusable reservoirs and bottles as it helps athletes with their hydration needs.

Table of Contents

All Clear is a portable microbiological UV water purifier. It is easy to use with UV light built into the cap that attaches to the bottle. It is fast, completing a cycle in 60 seconds. And it is proven effective to U.S. EPA guide standards.

Mantra is a naturally flavored powdered drink pack that enhances your water with electrolytes, antioxidants and vitamins. It is sweetened with Stevia and colored with vegetables and fruit juices. It is designed to be used with reusable bottles.

CamelBak products are known for their high quality and durability. CamelBak provides products to help maintain this durability and offers replacement parts in the rare instance that the products cease to perform at optimal levels:

Reservoir cleaning kits are designed to optimally clean the reservoirs that are inside of each pack. Properly cleaning and drying the reservoirs promotes longevity.

Replacement reservoirs are made for each pack. This ensures that in the rare case that a reservoir must be replaced, the athlete or warfighter does not need to replace the entire pack but can easily swap out the necessary components. Many users also like to have multiple reservoirs.

In addition to recreational accessories, CamelBak offers a specialized line associated with its military products. These accessories help enhance the performance of military products by adding resistance to chemical and biological agents or allowing connection to standard issue gas masks. For example, the HydroLink allows warfighters to replace their bite valve with a connector, allowing them to hydrate while wearing their gas mask. Accessories accounted for approximately 11%, 10% and 11% of CamelBak's gross sales for the twelve months ended December 31, 2013, 2012 and 2011, respectively.

Competitive Strengths

Leading Brand Recognition & Market Share CamelBak believes it has a #1 market share in each of the following areas: (i) recreational hands-free hydration packs, (ii) reusable water bottles for specialty channels and (iii) post-issue hydration packs for the U.S. military. CamelBak enjoys outstanding awareness and a reputation for superior performance with consumers, retailers and warfighters. For example, within the Armed Forces, CamelBak is one of only a few companies allowed to prominently display its brand name on active military products.

Preferred Partner CamelBak is a preferred partner to leading retailers and the military. CamelBak is a supplier to leading national specialty and sporting goods retailers, including REI, EMS, Dick's Sporting Goods and The Sports Authority. In addition, CamelBak does business in over 400 military retail exchanges and is an official military supplier which requires a rigorous application and certification process.

Business Strategies

Introducing Technically Superior Products in Core Categories CamelBak's core categories include hydration packs, bottles and warfighter protection products, and CamelBak's mission is to continuously reinvent the way people hydrate and perform. To meet this goal, CamelBak will continue to create innovative, technical solutions that exceed the demands of its customers. CamelBak's product pipeline for its core customers remains robust.

Expanding Product Suite in Everyday Hydration to Reach New Customers and Channels The CamelBak brand is synonymous with personal hydration, and this credibility grants CamelBak permission to enter broader aspects of hydration. CamelBak is committed to continuing to broaden its portfolio of personal hydration solutions to reach new customers, and, under the leadership of its CEO, has proven that it can extend its brand beyond hard-core athletes. For example, CamelBak has successfully reached new consumers and channels through its water bottle product line, which offers the features desired by its core customer base of performance athletes to the everyday customer shopping at Target. As CamelBak continues to expand its relevance to everyday users, its authenticity will allow it to enter other areas such as purification and other products.

Table of Contents

Broadening International Opportunities Management believes there is significant potential to expand its international sales in the consumer market. Currently, CamelBak's recreational business is sold through a network of approximately 82 foreign distributors. With improved distribution in the recreational market, CamelBak would have a number of opportunities to expand throughout Europe, Asia and South America.

Penetrating Select Areas of Specialty Retail CamelBak aspires to build a product portfolio that shapes the way consumers and warfighters perform across all activities. CamelBak has made significant strides introducing new products that target activities outside of its core biking and hiking audience. Past examples include multi-sport enthusiasts and runners. CamelBak targeted the multi-sport category with highly functional wearable hydration, which consists of a wearable shirt with built in hydration pack that allows enthusiasts to hydrate hands-free without a traditional pack.

CamelBak keeps an open dialogue with the athletes it endorses and is thus able to gain real-time feedback on the products it produces. By learning the needs of these consumers and others, CamelBak is able to identify other areas to develop ground-breaking hydration solutions. As CamelBak continues to innovate and create new products to serve the needs of more diverse consumers, it will further grow sales to these retailers. As a sports subculture brand, CamelBak is able to migrate to different activities without losing the authenticity and credibility it has developed as a leading product innovator. As examples, skiers and kayakers alike have adopted the brand as their own without even realizing that other sports enthusiasts have done the same.

CamelBak launched its own direct to consumer E-Commerce site during the fourth quarter of 2012. The site initially offered bottles and accessories along with water packs. In 2013, the site expanded to offer more hydration packs as well as purification (All-Clear), and drink (Elixir) and (Mantra) items.

Research and Development

CamelBak's hydration products are among the most technically advanced and rigorously engineered in their markets. They are specifically designed to function and perform under diverse and extreme conditions. CamelBak's research and development effort is at the core of its strategy of product innovation and market leadership. CamelBak's products feature a combination of innovative design, high-quality materials, and superb functionality and performance elements and are recognized as being the leaders or among the leaders in all of the market segments in which they participate.

CamelBak has a robust core research and development team, which has collectively over 36 years of combined industry experience. In addition to the core engineering group, a large number of other CamelBak staff members, who also use CamelBak's products, contribute to the research and development effort at various stages. Product development also includes collaborating with customers and field testing. This feedback helps ensure products will meet CamelBak's demanding standards of excellence as well as the constantly changing needs of end users.

CamelBak's research and development activities are supported by state-of-the-art engineering software design tools, integrated manufacturing facilities and a performance testing center equipped to ensure product safety, durability and superior performance. The testing center collects data and tests products prior to and after commercial introduction. Research and development costs (from the date of acquisition) totaled \$3.2 million, \$3.0 million and \$0.8 million during the years 2013, 2012 and 2011, respectively.

Table of Contents

Customers and Distribution channels

CamelBak offers a unique value proposition for its customers. As an innovative subculture sports brand, CamelBak has the authenticity and credibility to defend market share, command premium prices and leverage into new categories. The brand strength allows retailers to hold prices and thus protect margins. Further, CamelBak's "Got Your Back" lifetime warranty speaks to the level of quality and customer service offered. CamelBak's products, which are sold domestically and internationally, are segmented into two major end markets: Recreational and Government/Military. CamelBak's powerful product distribution network is comprised of long-standing, entrenched relationships with a diversified set of customers. CamelBak's top ten non-military customers comprised approximately 38%, 30% and 31% of gross sales in the year ended December 31, 2013, 2012 and 2011, respectively. CamelBak's largest recreational customer accounted for approximately 12% of gross sales in 2013 and approximately 8% of gross sales in 2012 and 2011. International sales were approximately 22% of gross sales for the year ended December 31, 2013 and 19% for the same period in 2012 and 2011.

Recreational Distribution CamelBak markets its hydration and performance products to several channels in the recreational market. Management estimates that it currently holds in excess of 85% of the market share of the hands-free hydration market. A share this large demonstrates the strength of the brand and the credibility that the products have with consumers. CamelBak invented the category in 1989 and although competitors have introduced a number of similar products, CamelBak has held on to its base.

Recreational Domestic Distribution: The Recreational Domestic Division is focused on product distribution through a variety of retail accounts in the United States. Particular emphasis is placed on premium active lifestyle retailers across a broad spectrum of channels, including camping/outdoor, bike, natural foods, housewares, hunting/fishing, paddle sports and surf/skate.

The division manages approximately 2,600 retail customers with over 10,000 retail storefronts. Current distribution channels range from specialty bicycle, outdoor, paddle sports, hunting stores and catalogs to large outdoor and sporting goods chains that reach the broader market. Importantly, CamelBak has selectively expanded and diversified its distribution channels over time. Today, notable customers include REI, Dick's Sporting Goods, EMS, Target, Whole Foods Market, Academy and The Sports Authority.

CamelBak's entrance into the reusable bottle category in 2006 resulted in a notable broadening of distribution, as CamelBak made the decision to strategically expand into new channels. CamelBak felt it was important to reach an even broader consumer base to further its vision of obsoleting bottled water as the most common way to hydrate. The bottle business has also enabled CamelBak to achieve penetration in the college and corporate sponsorship markets.

Recreational International Distribution: The Recreational International division is focused on product distribution through outdoor, sporting goods and specialty retailers that are managed through local distributors focused on premier retail accounts. CamelBak maintains an office in Europe to provide oversight of distributor performance, market intelligence and limited supplemental marketing support, including event staffing, trade show management, athlete sponsorships, public relations and market/product intelligence gathering. Order scheduling, fulfillment and logistics support for CamelBak's international operations are provided from CamelBak's Petaluma headquarters.

Key international markets include the United Kingdom, Germany, France, Australia, Japan, Canada, Norway and Korea. As is the case in the United States, the CamelBak brand is widely recognized and respected by enthusiasts and maintains a dominant market share.

Military Retail Exchange Distribution Military retail exchanges, including the Army and Air Force Exchange Service (AAFES), the Navy Exchange Service Command (NEXCOM) and the Marine Corps Exchange (MXC), are essentially large retail chains serving the military community. Military personnel, veterans and their families are strongly incentivized to shop at exchanges given that the store markup is typically less than the off base markup from other retailers, exchanges do not charge sales tax and a portion of the exchanges' earnings often go towards funding expenditures related to the military's morale, welfare and recreation. Furthermore, the exchanges provide an added benefit to consumers, given the convenience they provide to troops deployed in nearby locations.

Table of Contents

The military retail exchanges represent large distribution platforms extending across many different countries. CamelBak sells through over 400 locations. CamelBak pioneered the adoption of hands-free hydration systems by U.S. and foreign militaries and is today, we believe, the preferred brand of warfighters. As a result, CamelBak has dominant market share throughout the military retail channel. CamelBak is one of AAFES largest vendors and has a strong, long-term relationship with the retailer.

Government / Military Distribution In the Government / Military division, CamelBak sells products and accessories related to both hydration and performance. CamelBak continues to expand its Government / Military market by increasing penetration into foreign governments and militaries. A key component of U.S. foreign policy is the replacement of some deployed troops with those of foreign militaries. CamelBak's success in the U.S. Military carries tremendous credibility abroad, which has enabled CamelBak to achieve meaningful adoption outside the U.S.

CamelBak sells its products through a range of domestic Government / Military channels:

GSA: The Government Services Administration (GSA) provides a channel for all federal government agencies and government end-users to procure items easily. All products sold through the GSA must be pre-approved to get listed on GSA schedules. Once products are listed, thousands of Government / Military units and agencies purchase through this channel knowing that all pricing and legal obligations have already been negotiated and approved.

Direct Department of Defense Procurement: The U.S. Military will, from time to time, request for proposal a large amount of a given product. In addition, this request can oftentimes require that the product be manufactured with domestic content and other various specific rules. As it relates to CamelBak's business, CamelBak calls such direct contracts DFAR business. This is patterned after the Defense Federal Acquisition Regulation (DFAR) set of rules used by the government. Selling through the direct government channel entails abiding by specific sourcing guidelines and responding to a solicitation. Typically, a branch of the military will identify a need, issue a solicitation and multiple parties will bid to win the contract. While these orders are intermittent and often large, CamelBak has developed a strong supply chain to deal with these types of orders.

International Government / Military Distribution International Sales in the Government / Military is driven by ordinary replenishment and large solicitations that occur on an irregular basis to meet the equipment needs of each individual country. CamelBak has consistently participated in these solicitations in the past with significant success.

Sales and Marketing

CamelBak approaches marketing from a unique point of view that is meant to inspire customers. CamelBak is engaged in small endorsement deals that provide gear to actual users as well as athletes who bike, climb and hike professionally as opposed to entering into large multi-year contracts. Second, CamelBak's marketing campaign uses photographs and videos shot from a user's perspective. This photographic style encourages the consumers viewing the ad to imagine they are engaging in the activity shown. This experience serves to promote the inspirational nature of CamelBak's brand by liberating people to go further. CamelBak's sales are typically higher in the spring and summer months as this corresponds with warmer weather in the Northern Hemisphere and an increase in hydration related activities.

Marketing CamelBak uses a two pronged approach to marketing:

CamelBak has set out to aggressively pursue new users and expand its customer base while remaining true to its authentic, innovative ideals. Given the customization that has occurred across its product lines, CamelBak created a unique, highly targeted marketing plan to acquire new users for specific products. In the case of Groove, CamelBak set out to expand its customer base of 25-45 year old women. To that end, CamelBak designed print and web ads with a message that appeals more directly to this group and placed these advertisements in the appropriate women's lifestyle magazines. CamelBak also has a strong presence on the internet and uses instructional videos and direct marketing through social media sites such as Facebook.

Table of Contents

CamelBak makes a point to continue cultivating the passionate consumer base that already admires and respects CamelBak and its products. A recent example is the release of the Antidote Reservoir. CamelBak uses a unique marketing approach for different target users. Since these products are geared towards passionate outdoor athletes, CamelBak placed ads in forums including: (i) bicycling and mountain bike magazines, (ii) backpacking and hiking magazines and (iii) internet and social media sites that cater to active men and women.

Sales Organization CamelBak’s in-house sales team consists of dedicated sales people and customer service employees. The sales organization is strategically aligned by product category/sales channel. The sales managers split coverage for major national accounts with one team responsible for maintaining and growing sales to established channels and the other for business to larger national retailers and natural foods stores. With an average tenure of over 5 years, CamelBak’s sales team maintains enduring and entrenched relationships with each of its customers.

The Recreational Domestic division manages customers through both an in-house sales management staff and a network of sales agencies consisting of a number of independent sales representatives. The Recreational International division manages its international customers through local distributors focused on premier retail accounts. CamelBak maintains an office in Europe with two employees to provide oversight.

CamelBak had firm sales backorders totaling \$21.6 million and \$29.3 million At December 31, 2013 and 2012, respectively.

Competition

CamelBak pioneered the hydration category with the introduction of the hydration pack more than 20 years ago. CamelBak’s brand admiration and customer loyalty, which are driven by its innovative products, have allowed it to continuously defend its market position in packs. These traits have also allowed CamelBak to successfully enter the bottle category where it holds a leading market position.

A summary of CamelBak’s competitors in hydration packs, bottles and reservoirs is listed below:

CamelBak Recreational Competitors

Hydration Packs	Bottles	Reservoirs
Osprey	Nalgene	Platypus
The North Face	SIGG	Hydrapak
DaKine	Nathan Performance Gear	Source
	Polar	
	Kleen Kanteen	
	Contigo	

Across its military product set, CamelBak competes against a wide variety of industry players which include large prime and tier two defense companies, small and mid-sized companies specializing in warfighter equipment and companies focused predominantly on the consumer or materials market with a limited number of defense product offerings. CamelBak is recognized as a high-end supplier in each of its product categories (hydration and gloves). Management believes CamelBak is the leading supplier of post-issue hydration packs with over 85% of the market share and among the leading providers of specialized tactical gloves which are worn by some of the most elite warfighters in the world.

Table of Contents

Suppliers

CamelBak's product manufacturing is based on a dual strategy of in-house manufacturing and strategic alliances with select sub-contractors and vendors. CamelBak operates a scalable, low-cost supply chain, sourcing materials and employing contract manufacturers from across the Asia-Pacific region, the U.S. and Puerto Rico. Once manufactured, products are shipped directly from overseas manufacturers to CamelBak's distribution center in San Diego for receiving and stocking and thereafter distributed to retail locations or third-party distributors.

CamelBak has developed an efficient and low-cost supply chain. CamelBak's deep understanding of military procurement requirements has allowed it to build a flexible network of vendors to reliably meet large military orders on short notice and to shift orders to vendors to be compliant with military requirements for its products. While striving to maximize the profitability of its products, CamelBak is also keenly aware of its corporate responsibility and, thus, holds itself and its vendors to the highest supply chain practices. As a result of CamelBak's dedication to superior supply chain and manufacturing practices, the U.S. Military's GSA named CamelBak the Green Contractor of the Year in 2009 and MAS Contractor of the year in 2011.

In recent years, CamelBak has streamlined its operating expenses, tightening cost controls and maintaining a cost structure more in line with the size of its platform. Additionally, CamelBak has driven cost improvements by negotiating prices with vendors using an open book policy, in which each vendor's profit margins, labor rates and material costs are agreed to upfront. This allows CamelBak's operations group to negotiate reductions in component prices from raw material manufacturers resulting in cost savings.

CamelBak's primary raw materials are fabric, resin, polyurethane film and various resins for which CamelBak and/or its supplier partners receive multiple shipments per week. CamelBak purchases its materials from a combination of domestic and foreign suppliers.

Intellectual Property

Hydration priorities include easy cleaning and filling, freshness and taste, durability, temperature, water purity, leak-proof products and sustainability, all of which improve a customer's overall hydration experience or enable the customer to perform at high levels. As a reflection of this focus, CamelBak holds 51 active patents and 33 pending patent applications.

Regulatory Environment

Management is not aware of any existing, pending or contingent liabilities that could have a material adverse effect on CamelBak's business. CamelBak is proactive regarding regulatory issues and is in compliance with all relevant regulations. Management is not aware of any potential environmental issues.

Employees

As of December 31, 2013, CamelBak employed approximately 252 persons. None of CamelBak's employees are subject to collective bargaining agreements. CamelBak believes its relationship with its employees is good.

Ergobaby

Overview

Ergobaby, headquartered in Los Angeles, California, is a premier designer, marketer and distributor of wearable baby carriers and related baby wearing products as well as stroller travel systems and accessories. Ergobaby offers a broad range of wearable baby carriers, stroller travel systems and related products that are sold through more than 450 retailers and web shops in the United States and throughout the world.

Ergobaby's reputation for product innovation, reliability and safety has led to numerous awards and accolades from consumer surveys and publications, including babycenter, theBump, SheKnows Parenting, Parenting Magazine, Pregnancy magazine and Wired magazine.

Table of Contents

For the fiscal years ended December 31, 2013, 2012 and 2011, Ergobaby had net sales of approximately \$67.3 million, \$64.0 million, and \$44.3 million (from date of acquisition), respectively. Ergobaby had operating income totaling \$12.6 million, \$10.9 million and \$7.9 million (from date of acquisition) in the years ended December 31, 2013, 2012 and 2011, respectively. Ergobaby had total assets of \$115.3 million, \$117.7 million and \$118.4 million at December 31, 2013, 2012 and 2011, respectively. Ergobaby's net sales represented 6.8%, 7.2% and 7.3% of our consolidated net sales for the year ended December 31, 2013, 2012 and 2011, respectively.

History of Ergobaby

Ergobaby was founded in 2003 by Karin Frost, who designed baby carriers following the birth of her son. The baby carrier product line has since expanded into five key categories: the Original, Designer, Organic, Performance, and Travel carriers with multiple style variations. In its second year of operations, Ergobaby sold 10,500 baby carriers and by 2013 sold over 1,039,000 in the year. In order to support the rapid growth, in 2007, Ergobaby made a strategic decision to establish an operating subsidiary (EBEU) in Hamburg, Germany. We purchased a majority interest in Ergobaby on September 16, 2010.

On November 18, 2011 Ergobaby acquired Orbit Baby for approximately \$17.5 million. Founded in 2004 and based in Newark, California, Orbit Baby produces and markets a premium line of stroller travel systems that utilize a patented hub ring to allow parents to easily move car seats from car seat bases to stroller frames in an instant without the need for any additional components. The product offering has increased to a full line of mix-and-match seats and bases.

In 2013, Ergobaby expanded its portfolio into the swaddling category. The launch of the Ergobaby Swaddler which focused on healthy hip and arm positioning for newborns is the first significant category expansion outside of baby carriers for the Ergobaby brand.

Both brands are well regarded in the infant and juvenile industry. Ergobaby was named to the "20 Best Products in the Last 20 Years" by Parenting Magazine (2007), and continues to be recognized for its quality evident by recently being named babycenters' 2012 "Moms Pick" for Best Baby Carrier. The Orbit Baby Infant System has received vast honors, including, 2007 iParenting Media Award for Best Product, Baby Gizmo's Editor's Choice 2012, babble.com favorite Car Seats 2012, She Knows Parenting Stroller Award 2011, and Lilsugar Best Stroller of 2010.

Industry

Ergobaby competes in the large and expanding infant and juvenile products industry. The industry exhibits little seasonality and is somewhat insulated from overall economic trends, as parents view spending on children as largely non-discretionary in nature. Consequently, parents spend consistently on their children, particularly on durable items, such as car seats, strollers, baby carriers, and related items that are viewed as necessities. Further, an emotional component is often a factor in parents' purchasing decisions, as parents desire to purchase the best and safest products for their children. As a result, according to the USDA's most recent report on Expenditures on Children by Families 2012 (released in June 2013), parents on average, spend between \$8,990 and \$25,180 on their child on an annual basis for related housing, food, transportation, clothes, healthcare, daycare and other items, depending on age of the child & annual income. The amount spent by parents in the highest income group (before tax income greater than \$105,000) was more than twice the amounts spent by parents in the lowest income group (before tax income of less than \$60,640). On average, households spent between 12-25% of their before-tax income on a child. Similar patterns are seen in other countries around the world. According to a Mintel Group Ltd. report published in March 2010, estimated 2010 retail dollars spent on baby durables reached approximately \$10.3 billion in the U.S. in 2010, up approximately \$9.5 billion from 2004, with a considerably larger market worldwide. The U.S. retail market is expected to continue its growth trajectory through 2014 with an anticipated market size of approximately \$12.0 billion.

Demand drivers fueling the growing spending on infant and juvenile products include favorable demographic trends, such as (i) an increasing number of births worldwide; (ii) a high percentage of first time births; (iii) an increasing age of first time mothers and a large percentage of working mothers with increased disposable income; and (iv) an increasing percentage of single child households and two-family households.

Table of Contents

Given that the child’s safety is paramount, many parents do not want to compromise a baby or child’s safety by purchasing secondhand products to save money. In many cases, when purchasing secondhand, the parent does not know key facts about the product they are buying, such as the age of the product, history of the item, or potential recalls by the manufacturer. Furthermore, the safety standards for the product may have changed since the version being resold, resulting in a product that does not meet the most rigorous safety standards. Consequently, as parents consider purchases of important necessities such as baby durables, they typically favor new products. According to Mintel Research, approximately 83% of baby carrier purchases were first-time purchases, with the remainder being either purchased second hand or borrowed.

Safety influences not only whether parents purchase new or used products, but also which brands parents choose, which consequently impacts pricing and competition within the infant and juvenile products market. In purchases of baby durables, parents often seek well-known and trusted brands that offer a sense of comfort regarding a product’s reliability and safety. As a result, brand name and safety certifications can serve as a barrier to entry for competition in the market, as well as allow well-known brands such as Ergobaby to charge a premium.

Wearable Carriers and Baby Wearing Trends

Within the broader market for infant and juvenile products, Ergobaby operates specifically within the market for child mobility and transport products. According to the Juvenile Products Manufacturers Association (JPMA), reported child mobility and transport manufacturer dollar sales, which includes sales of carriers, strollers, travel systems, and related products, totaled approximately \$1.1 billion in the U.S. in 2012. Penetration of baby carriers currently trails that of strollers, car seats, and other infant and juvenile products. JPMA manufacturer sales growth from 2011 to 2012 suggests that the soft carrier segment is growing more rapidly than other infant and juvenile product categories, with 21.3% unit growth and dollar growth. Comparatively, stroller shipments and convertible car seat shipments increased 10.3% and 11.2%, respectively, over the same period

Management believes that continued growth within the market for wearable baby carriers is driven by several trends, including (i) lower relative penetration of baby carriers versus other infant and juvenile products; (ii) favorable demographics; (iii) increasing focus on the popularity of baby wearing; and (iv) convenience and mobility of wearable products.

Products and Services

Ergobaby Baby Carriers

Ergobaby has two main baby carrier product lines: baby carriers and related carrier accessories. Ergobaby’s baby carrier design supports a natural sitting position for babies, eliminating compression of the spine and hips that can be caused by unsupported suspension. The baby carrier also balances the baby’s weight to parents’ hips and shoulders, and alleviates physical stress for the parent. Additional accessories are provided to complement the baby carriers including the increasingly popular Infant Insert.

Within the Baby Carrier product line, Ergobaby sells five key categories or collections: the Original, Designer, Organic, Performance, and Travel carriers and; within each line, Ergobaby offers multiple styles and color variations. Original carriers represented 64%, 55% and 39% of 2013, 2012 and 2011 carrier sales, respectively, and Organic carriers represented 19%, 21% and 37%, of 2013, 2012 and 2011 carrier sales, respectively, with all other carriers representing the remaining sales in each year. Baby Carrier sales were approximately \$53.8 million, \$44.6 million and \$37.8 million in the years ended December 31, 2013, 2012 and 2011, respectively, and represented approximately 79.9% of total sales in 2013, 70% of total sales in 2012, and 86% of total sales in 2011.

Within the accessories category, the Infant Insert is the largest sales component of the accessory category, representing more than half of total accessory sales for 2011, 2012, and 2013. Accessory sales were \$6.9 million, \$6.0 million, and \$6.5 million in 2013, 2012 and 2011, respectively and represented approximately 12% in 2013, and 13% of total sales in each of 2012, and 2011.

Ergobaby’s core Baby Carrier product offerings with average retail prices are summarized below:

5 styles of baby carriers \$115 \$195

3 styles of Infant Inserts \$25 \$38

Table of Contents

Orbit Baby Infant Systems

The Orbit Baby Infant System has three main product groups: stroller travel systems, product extensions and accessories.

The Orbit Baby Stroller Travel System is a three-piece kit that includes an infant car seat, car seat base, and stroller. Unlike traditional infant travel systems, the Orbit Stroller Travel System’s unique docking technology, or SmartHub™, allows for easy interchange of four different seats, including the Infant Car Seat, Stroller Seat, Bassinet, and Toddler Car Seat.

The Orbit Baby car seat base (which stays in the car when not in use) is touted as the easiest, quickest base to safely install. The base’s patent-pending StrongArm™ technology allows a secure installation in 60 seconds and easily docks the car seat from almost any angle, allowing the parent to ergonomically transport the child.

The Orbit Baby Infant Car Seat is the common plug-in for the three-in-one system and can be moved effortlessly from the car seat base to the stroller. As a result of the SmartHub technology, Orbit is the only infant car seat that ergonomically rotates for simple docking and undocking to and from the car and stroller.

The third member of the Stroller Travel System is Orbit’s modern and easy-to-use stroller. As is the case with the car seat base, the circular SmartHub allows the infant car seat to dock on the stroller from any angle without adaptors, and with 360 degree rotation and recline, the baby can face rear, forward, or sideways to view the world from different perspectives.

Orbit Baby offers product extensions including additional seats and strollers, including the Double Helix Stroller for multiple children, to accommodate growing families.

Orbit Baby also offers a wide range of accessories including the Sidekick Stroller Board, Stroller Panniers, Weather Pack, Color Pack, Footmuffs, Stroller Travel Bag and Baby Gear Spa Kit.

Orbit Baby’s core product offerings, extensions and accessories and suggested retail prices are below:

Stroller Travel System (includes Infant Car Seat, Car Seat Base, Stroller) \$980

Stroller \$660-\$1,150

Car Seats and Car Seat Base \$380 \$440

Bassinet Cradle \$295

Accessories \$25-\$195

Competitive Strengths

Ergobaby innovation Ergobaby Carriers are known for their unsurpassed comfort. Ergobaby’s superior design results in improved comfort for both parent and baby. Parents are comfortable because baby’s weight is evenly distributed between the hips and shoulders while baby sits ergonomically in a natural sitting position. The concept of baby carrying has increased in popularity in the U.S. as parents recognize the emotional and functional benefits of carrying their baby. Consumers continually cite the comfort, design, and convenient hands free mobility the Ergobaby carrier offers as key purchasing criteria.

Orbit Baby Innovation With 17 patents and 5 patents pending, Orbit Baby offers a complete child travel system, from stroller to car seat and beyond. A favorite with moms and dads alike, the integrated Orbit Baby system is designed to take your children everywhere with unprecedented ease and style. With an emphasis on advanced safety and engineering, Orbit Baby is continually recognized for its innovation,

Edgar Filing: Compass Diversified Holdings - Form 10-K

ergonomic design and environmentally friendly focus. Orbit Baby applies hands-on experience and extensive research to create products that are elegantly simple, intuitive to use, and unsurpassed in real-world safety.

Business Strategy

Increase Penetration of Current U.S. Distribution Channels Ergobaby continues to benefit from steady expansion of the market for wearable baby carriers and related accessories in the U.S. and internationally. Going forward, Ergobaby will continue to leverage and expand the awareness of its outstanding brands (both Ergobaby and Orbit Baby) in order to capture additional market share in the U.S., as parents increasingly recognize the enhanced mobility, convenience, and the ability to remain close to the

Table of Contents

child that Ergobaby carriers enable. Ergobaby currently markets its products to consumers in the U.S. through brick-and-mortar retailers, including specialty boutiques; online web shops; and directly through its website. Management has developed a targeted strategy to increase its penetration of these currently underpenetrated distribution channels that includes: (i) improved retail presence, including new packaging and in-store support materials; (ii) improving the effectiveness of marketing programs including utilization of social sites, digital marketing, and improved consumer engagement, and (iii) development of new products and designs.

Cultivate Attractive New Distribution Channels In addition to its existing retail customer base, comprised primarily of small specialty retail stores and boutiques, there are numerous other retail channels that offer tremendous growth opportunities for Ergobaby products. Specifically, management recently began targeting several types of retailers as Ergobaby continues its growth trajectory, including (i) multi-store maternity and infant and juvenile products chains; (ii) on-line retailers; (iii) department stores; and (iv) mass retailers.

International Market Expansion Testimony to the global strength of its lifestyle brand, Ergobaby derives approximately 60% of its sales from international markets. Similar to the U.S., Ergobaby can continue to leverage its brand equity in the international markets it currently serves to aggressively drive future growth, as well as expand its international presence into new regions. The market for Ergobaby's products abroad continues to grow rapidly, in part due to the growth in the number of births worldwide and the fact that in many parts of Europe and Asia, the concept of baby wearing is a culturally entrenched form of infant and child transport.

New Product Development Management believes Ergobaby has an opportunity to leverage its unique, authentic lifestyle brand and expand its product line. Since its founding in 2003, Ergobaby has successfully introduced new carrier products to maintain innovation, uniqueness, and freshness within its baby carrier and travel system product lines. The newest product category introduction has been the Ergobaby Swaddler focused on ergonomically swaddling newborns in a healthy hip and arm position. The product launched in July 2013 in specialty stores only in the US and in international markets. Management anticipates continued distribution expansion and new offerings in this category. At the end of 2013, Ergobaby announced the upcoming launch of G3 which was available for sale in January 2014 and represents the third generation of the Orbit Baby travel system. Still focused on interchangeable seats and bases, the G3 has improved the functionality of the stroller for an easier fold, improved brake system and ultimate ease in push.

Customers

Ergobaby primarily sells its products through brick-and-mortar retailers, online retailers and distributors and derives approximately 60% of its sales from outside of the U.S. Within the U.S., Ergobaby sells its products through over 450 brick-and-mortar retail customers and small infant and juvenile products chains, representing an estimated 2,900 retail doors. Ergobaby products are sold through its German based subsidiary, Ergobaby Europe, which services brick-and-mortar retailers and online retailers in Germany and France as well as services a network of distributors located in the United Kingdom, Austria, Finland, Russia, Switzerland, Belgium, the Netherlands, Sweden, Norway, Spain, Denmark, Italy, Turkey and the Ukraine. Sales to customers outside of the U.S. and European markets are predominantly serviced through distributors granted rights, though not necessarily exclusive, to sell within a specific geographic region.

Sales & Marketing

Within the U.S., Ergobaby directly employ sales professionals and utilizes independent sales representatives assigned to differing U.S. territories managed by in-house sales professionals. Independent salespeople in the U.S. are paid on a commission basis based on customer type and sales territory.

In Europe, Ergobaby directly employs its salespeople. In Europe, salespeople are paid a base salary and a commission on their sales, which is standard in that territory. Ergobaby Europe handles all Ergobaby distributor orders within the European countries including Russia and Ukraine; all other orders are handled through Ergobaby's U.S. offices.

Table of Contents

Ergobaby has implemented a multi-faceted marketing plan which includes (i) targeted print advertising; (ii) online marketing efforts, including online advertisement, search engine optimization and social networking efforts; (iii) increasing tradeshow attendance; and (iv) increasing promotional activities.

Ergobaby had approximately \$13.2 million and \$10.0 million in firm backlog orders at December 31, 2013 and 2012, respectively.

Competition

The infant and juvenile products market is fragmented, with a few larger manufacturers and marketers with portfolios of brands and a multitude of smaller, private companies with relatively targeted product offerings.

Within the infant and juvenile products market, Ergobaby's Carriers primarily compete with companies that market wearable baby carriers. Within the wearable baby carrier market, several distinct segments exist, including (i) slings and wraps; (ii) soft-structured baby carriers; and (iii) hard frame baby carriers.

The primary global competitors in this segment are Baby Bjorn, Chicco, Britax and Manduca, which also market products in the premium price range. Especially in the US, Ergobaby also competes with several smaller companies that have developed wearable carriers, such as Beco, Boba, and Lil' Baby. Within the soft-structured baby carrier segment, Ergobaby benefits from strong distribution, good word of mouth, and the functionality of the design.

The Orbit Baby Infant System principally competes with other premium stroller systems including Stokke, Bugaboo, UppaBaby and Quinny.

Suppliers

During 2013, Ergobaby sourced its carrier and carrier accessory products from China, Vietnam and India and manufactures its stroller systems and accessory products in China. In 2012, Ergobaby began sourcing non-organic carriers and accessories from a manufacturing facility in Vietnam. China and Vietnam accounted for approximately 76.1% of Ergobaby's purchases in 2013. Ergobaby partnered with a manufacturer located in India in 2009, which manufactures Ergobaby's organic carriers and accessories, and represented approximately 23.9% of Ergobaby's purchases in 2013. Ergobaby's manufacturers in China, Vietnam and India have the additional capacity to accommodate Ergobaby's projected growth.

Intellectual Property

Ergobaby maintains a utility patent on its standard carrier, which was filed in 2003 and issued January 29, 2009. Notwithstanding this patent, Ergobaby primarily depends on brand name recognition and premium product offering to differentiate itself from competition. Ergobaby also has 17 patents and 5 patents pending for its Orbit Baby technology including Smart Hub.

Regulatory Environment

Management is not aware of any existing, pending, or contingent liabilities that could have a material adverse effect on Ergobaby's business. Ergobaby is proactive regarding regulatory issues and is in compliance with all relevant regulations. Ergobaby maintains adequate product liability insurance coverage and to date has not incurred any losses. Management is not aware of any potential environmental issues.

Employees

As of December 31, 2013 Ergobaby employed 98 persons in 5 locations. None of Ergobaby's employees are subject to collective bargaining agreements. We believe that Ergobaby's relationship with its employees is good.

Table of Contents

FOX

Overview

FOX, headquartered in Scott's Valley, California is a designer, manufacturer and marketer of high-performance suspension products used primarily on mountain bikes, side-by-side vehicles, on-road vehicles with off-road capabilities, off-road vehicles and trucks, all-terrain vehicles, or ATVs, snowmobiles, specialty vehicles and applications, and motorcycles. FOX's products offer innovative design, performance, durability and reliability that enhance ride dynamics (the interplay between the rider, the vehicle and the terrain), by improving performance and control. The FOX brand is associated with high-performance and technologically advanced products that provide users with improved control and a smoother ride while riding over rough terrain in varied environments.

FOX designs its products for, and markets its products to, some of the world's leading original equipment manufacturers, or OEMs, in its markets, and to consumers through the Aftermarket channel. Management believes that OEMs often prominently display and incorporate FOX products to improve the marketability and consumer demand for their high-performance models, which reinforces the FOX brand image. In addition, consumers purchase select FOX products in the Aftermarket channel where FOX markets through a global network of dealers and distributors.

For the fiscal years ended December 31, 2013, 2012 and 2011, Fox had net sales of approximately \$272.7 million, \$235.9 million, and \$197.7 million and operating income of \$38.8 million, \$26.2 million and \$22.6 million, respectively. Fox had total assets of \$159.4 million, \$142.8 million and \$130 million at December 31, 2013, 2012 and 2011, respectively. Fox's net sales represented 27.7%, 26.7%, and 32.6% of our consolidated net sales for the years ended December 31, 2013, 2012 and 2011, respectively.

Recent Developments

On March 5, 2014, FOX entered into a definitive agreement to acquire the business of Sport Truck USA (Sport Truck) a full service, globally recognized distributor, primarily of its own branded aftermarket suspension solutions and a reseller of FOX products. Sport Truck also designs, markets, and distributes high quality lift kit solutions through their wholly owned subsidiaries BDS Suspension and Zone Offroad Products. FOX will acquire Sport Truck in an asset purchase transaction for approximately \$44 million due at closing. The transaction is being financed with debt and includes a potential earn-out opportunity of up to a maximum of \$29.3 million payable over the next three years contingent upon the achievement of certain performance based financial targets. The transaction is subject to approval by the employee stock ownership plan shareholders of Sport Truck and is expected to close by the end of March 2014.

History of Fox

Robert C. Fox, Jr. began developing suspension products in 1974 when, having participated in motocross racing, he sought to create a racing suspension shock that performed better than existing coil spring shocks. Working in a friend's garage, Mr. Fox created the Fox AirShox. The product was successful, and went into production in 1975. The next year, in 1976, Fox AirShox was used by the rider who won the AMA 500cc National Motocross Championship.

FOX suspension users have won numerous major races including 500cc Grand Prix races (motocross), Baja 1000 races (off-road), AMA SuperBike races (motorcycle road racing), and the Indianapolis 500 race (auto racing), generating greater market awareness of the FOX brand among enthusiasts.

FOX applied many of the same core suspension technologies developed for motocross racing to other categories. For example, in 1987 FOX started selling high-performance suspension products for snowmobiles. By 1991, FOX began supplying the mountain bike industry with rear shocks, FOX entered the ATV and other off-road vehicle markets in the mid-1990s and in 2001 FOX began offering front fork suspension products for mountain bikes.

We purchased a majority interest in FOX on January 4, 2008.

On August 13, 2013 FOX completed an initial public offering of its common stock. FOX sold 2,857,143 of its shares and certain of its shareholders, including us, sold 7,000,000 shares at an initial offering price of \$15.00 per share. FOX currently trades on the NASDAQ exchange under the symbol FOXF. Subsequent to the initial public offering we currently own 53.9% of FOX.

Industry

Edgar Filing: Compass Diversified Holdings - Form 10-K

FOX participates in markets that are diverse, both geographically and by product type. FOX manufactures and markets high performance; premium priced (high-end) suspension products in the large global markets for mountain bikes and powered vehicles used by recreational and professional users. FOX products for powered vehicles are used primarily on Side-by-Sides, on-road vehicles with off-road capabilities, off-road vehicles and trucks, ATVs, snowmobiles, specialty vehicles and applications, and motorcycles.

Suspension systems are critical to the performance of the mountain bikes and powered vehicles in the markets and product categories in which FOX participates. Technical features, component performance, product design, durability, reliability and brand recognition can strongly influence the purchasing decisions of consumers. Over the past decade, there have been significant technological advances in materials and features that have increased product functionality and performance, allowing high-end suspension products to be adapted for use in additional end-markets and mountain bike and powered vehicle categories.

Table of Contents

Products and Services

FOX designs and manufactures high-performance suspension products that dissipate the energy and force generated by mountain bikes and powered vehicles while they are in motion. A suspension product allows wheels or skis (in the case of snowmobiles) to move up and down to absorb bumps and shocks while maintaining contact with the ground for better control. FOX products use adjustable suspension, position sensitive damping, multiple air spring technologies, low weight and structural rigidity, all of which improve user control for greater performance.

FOX uses high-grade materials in their products and have developed a number of sophisticated assembly machines to maintain quality across all product lines. FOX suspension products are assembled according to precise specifications throughout the assembly process to create consistently high-performance levels and customer satisfaction.

Mountain bikes In the mountain bike product category, FOX offers high performance front fork and rear suspension products designed for cross-country, trail, all-mountain, free-ride and downhill riding. FOX also offers a ride-height adjustable seat post product (D.O.S.S.), which was introduced in 2012 to allow a rider to adjust his or her seat position for uphill, rolling trail or downhill riding without having to stop the mountain bike to adjust the seat. Mountain bike products are sold in three series: (i) Evolution series, designed for demanding, yet value-minded, enthusiasts; (ii) Performance series, designed for experienced enthusiasts and expert riders; and (iii) Factory series, which is designed for maximum performance at a professional level.

Powered vehicles FOX designs and manufactures high performance suspension products for Side-by-Sides, on-road vehicles with off-road capabilities, off-road vehicles and trucks, ATVs, snowmobiles, specialty vehicles and applications, and motorcycles. Products for these vehicles are designed for trail riding, racing and performance. FOX suspension products have also been used on limited quantities of off-road military vehicles and other small-scale select military applications. Products in the powered vehicle category range from two inch aluminum bolt-on shocks to patented position sensitive internal bypass shocks.

Competitive Strengths

Broad offering of high-performance products across multiple consumer markets Through the use of adjustable suspension, position sensitive damping, multiple air spring technologies, lightweight and rigid materials, and other technologies and methods, FOX suspension products improve the performance and control of the vehicles used by its consumers. FOX management believes that its reputation for high-performance products is reinforced by the successful finishes in world class competitive events by athletes incorporating FOX products in their vehicles, including the following examples in 2013:

Three out of four Union Cycliste Internationale World Cup Mountain Bike Series titles;

World Off Road Championship Series Side x Side Production 1000 Class Championship;

American Motorcyclist Association, or AMA, Pro ATV Championship and first place finishes in 10 out of 10 races;

International Series of Champions National Pro Open Championship for snowmobiles and first place finishes in 16 out of 16 races;
and

Two out of two overall Pro 2 Championships and first place finishes in 21 out of 29 Pro 2 races in the TORC and LOORRS off-road short course racing series

Strategic brand for OEMs, dealers and distributors Through its strategic relationships, FOX is often sought out by OEM customers and works closely with them to develop and design new products and product enhancements. Management believes this collaborative approach and product development processes strengthen FOX's relationships with its OEM customers. Management further believes that consumers value FOX branded suspension products when selecting high-performance mountain bikes and powered vehicles, and as a result, OEMs purchase and incorporate FOX premium suspension products in their mountain bikes and powered vehicles in order to increase the sales of their premium

Edgar Filing: Compass Diversified Holdings - Form 10-K

priced products. In addition, the inclusion of FOX products on high-end mountain bikes and powered vehicles reinforces the premium brand image which helps to drive sales in the Aftermarket channel.

Table of Contents

Premium brand with strong consumer loyalty FOX has developed a reputation for high-performance products resulting in a premium brand of high-performance suspension products that are generally sold at premium prices. The FOX logo is prominently displayed on each of its products used on mountain bikes and powered vehicles sold by OEM customers, which helps further reinforce its brand image. FOX management believes the FOX brand has achieved strong loyalty from its consumers.

Track record of innovation and new product introductions FOX's experience in suspension engineering and design in multiple markets and with a variety of vehicles, enables them to bring unique ride dynamics solutions to its customers. These ride dynamics often developed for use in one market may ultimately be deployed across multiple markets. For example, FOX's success in the high-end ATV category led to the widespread adoption of the same suspension technology in the Side-by-Side market, which became the second largest product category by sales for FOX in 2012.

During 2013, FOX launched more than 20 new products and generated more than 70% of its sales from products it introduced during the last three years. The following are examples of recent new development.

Podium RC3 provides external adjustment that allows the shock to easily be tuned for different rider skill, terrain, and racing type without having to be disassembled;

Float X Evol allows the rider to tune the spring characteristics of the shock via an air pump without having to remove the shock;

ECS Shock an external cooling system that significantly lowers shock temperatures, allowing powered vehicles to operate at higher speeds for extended periods without sacrificing driver control, particularly in extreme environments;

Float iCD provides riders the ability to adjust modes for different skills, terrains and activity levels on mountain bikes, resulting in increased utilization of the modes and an overall more efficient ride dynamics experience

Business Strategies

Continue to develop new and innovative products in current end-markets FOX intends to continue to develop and introduce new and innovative products in its current end-markets to improve ride dynamics for its consumers. Management believes that high-performance and control are important to a large portion of Fox's consumer base, and that the frequent introduction of products with innovative and improved technologies increases both OEM and aftermarket demand as consumers seek out products for their vehicles that can deliver these characteristics. Evolving market trends, such as changing mountain bike wheel sizes and increasing adoption rates of Side-by-Side vehicles, may increase demand for vehicles in FOX's end-markets in the future, which, in turn, should increase demand for its suspension products.

Leverage technology and brand to expand into new categories and end-markets FOX has a reputation as a leader in ride dynamics due to its ability to improve the performance of vehicles by incorporating high-performance suspension products. As a result FOX is often approached by OEM product development teams, athletes and others looking to improve the performance of their vehicles, including in end-markets in which where FOX may have not previously offered products. Management believes that its premium ride dynamics technologies may have applications in end-markets in which it does not currently participate in a meaningful way, and intends to selectively develop products for and forge relationships with customers in additional end-markets. These markets may include military, recreational vehicles (RVs), on-road motorcycles, commercial trucks and performance street cars. FOX also intends to evaluate selective potential acquisition opportunities for high-performance products and technologies that may help extend its ride dynamics platform.

Table of Contents

Increase Aftermarket penetration FOX has an Aftermarket distribution network of more than 2,500 retail dealers and distributors worldwide. FOX intends to increase this network by selectively adding dealers and distributors in certain geographic markets, in order to strategically expand Aftermarket-specific products and services to existing vehicle platforms.

Accelerate international growth A significant percentage of FOX current sales are to OEMs and dealers and distributors of Aftermarket products located outside the United States. FOX believes international expansion represents a significant opportunity and intends to selectively increase infrastructure investments and focus on select geographic regions. FOX intends to leverage its brand recognition to capitalize on positive consumer trends by increasing its sales to both OEMs and dealers and distributors globally, particularly in markets perceived as significant opportunities, including Asia-Pacific (particularly China, South Korea and Australia) and South America (particularly Brazil, Argentina and Chile).

Improve operating and supply chain efficiencies By enhancing design and production processes to increase efficiencies, reducing new product time to market and lowering production costs. Specifically, FOX has begun the process of moving a majority of the manufacturing of mountain bike products to Taiwan and intends to complete this process in 2015. This transition to Taiwan, once completed, will shorten production lead times to its mountain bike OEM customers in Asia, improve supply chain efficiencies and reduce manufacturing costs.

Research and Development

FOX employs full-time engineers focused on product development and employs numerous other technicians and employees who spend at least part of their time testing and using FOX products and helping develop engineering-based solutions to enhance product offerings. In addition, a large number of its employees, many of whom use FOX's suspension products in their recreational activities, contribute to research and development and product innovation initiatives. Their involvement in the development of new products ranges from participating in initial brainstorming sessions to ride testing products in development. Product development also includes collaborating with OEM customers across end-markets, field testing by professional athletes and sponsored race teams and working with enthusiasts and other users of FOX products. This feedback helps to develop innovative products which meet FOX's demanding standards as well as the evolving needs of professional and recreational end users and to quickly commercialize these products.

FOX's research and development activities are supported by state-of-the-art engineering software design tools, integrated manufacturing facilities and a performance testing center equipped to enhance product safety, durability and high-performance. The testing center collects data and tests products prior to and after commercial introduction. Suspension products undergo a variety of rigorous performance and accelerated life tests before they are introduced into the market. The research and development portion of FOX's total engineering costs totaled approximately \$10.4 million, \$9.7 million and \$9.8 million in 2013, 2012 and 2011, respectively.

Customers

FOX currently sells its product to more than 150 OEMs and distributes its products to more than 2,500 retail dealers and distributors of Aftermarket product worldwide. In 2013, 81% of sales resulted from sales to OEMs and 19% resulted from sales to dealers and distributors for resale in the Aftermarket channel.

Sales attributable to FOX's 10 largest OEM customers, accounted for approximately 57%, 56% and 53% of sales in 2013, 2012 and 2011, respectively.

Sales to FOX's largest customer accounted for approximately 17%, 13% and 12% of its sales in 2013, 2012 and 2011, respectively.

Domestic sales totaled \$96.1 million, \$84.3 million and \$65.8 million, or 35%, 36% and 33% of total sales in 2013, 2012 and 2011, respectively. International sales totaled \$176.6 million, \$151.6 million and \$132.0 million or 65%, 64% and 67% of total sales in 2013, 2012 and 2011, respectively. Sales attributable to countries outside the United States are based on shipment location. International sales, however, do not necessarily reflect the location of the end users of FOX products, as many of these products are incorporated into mountain bikes that are assembled at international locations and then shipped back to the United States.

Table of Contents

Mountain bikes FOX mountain bike suspension products are sold to more than 150 domestic and international bike OEMs, including Giant, Scott, Specialized and Trek. FOX has long-standing relationships with many of the top mountain bike OEMs. After incorporating FOX products on their mountain bikes, OEMs typically sell their mountain bikes to independent dealers, which then sell directly to consumers.

In the Aftermarket, FOX typically sells to dealers in the U.S. and through distributors internationally. These dealers then sell directly to aftermarket consumers. FOX's overseas distributors sell to independent dealers, which then sell directly to consumers.

Powered vehicles - Suspension products for the powered vehicles industry are sold to a number of OEMs, including BRP, Ford and Polaris. FOX is currently developing relationships with new OEMs, as the powered vehicles market continues to grow. After incorporating FOX products on their powered vehicles, OEMs typically sell their powered vehicles to independent dealers, which then sell directly to consumers.

In the Aftermarket, FOX typically sells its product through dealers and distributors, both in the U.S. and internationally. FOX dealers typically sell directly to Aftermarket consumers. FOX distributors, typically sell to independent dealers, which then sell directly to consumers.

Current FOX product offerings currently target high-performance suspension products for Side-by-Sides, on-road vehicles with off-road capabilities, off-road vehicles and trucks, ATVs, snowmobiles, specialty vehicles and applications, and motorcycles. In the past, FOX products have also been used on limited quantities of off-road military vehicles and other small-scale select military applications.

Sales and Marketing

FOX employs a number of specialized and dedicated sales professionals. Each sales professional is fully committed to servicing their customers within our product categories, ensuring that FOX customers are in contact with capable and knowledgeable sales professionals to address their specific needs. FOX sales professionals receive training on the latest FOX products and technologies and attend trade shows to increase their market knowledge.

FOX's marketing strategy focuses on strengthening and promoting the FOX brand in the marketplace. FOX strategically focuses its marketing efforts on enthusiasts seeking high-end suspension systems through promotions at destination riding locations and individual and team sponsorships and the success of professional athletes who use FOX products. This strategic focus on the performance and racing segments in FOX's markets influences many aspiring and enthusiast consumers to purchase FOX suspension products and enables FOX products to be sold at premium price points.

FOX's sales are seasonal. In each of the last three fiscal years, quarterly sales have been the lowest in the first fiscal quarter and the highest during the third fiscal quarter of the year.

In addition to the FOX website and traditional marketing channels, such as print advertising and tradeshow, FOX maintain an active social media presence, including a Facebook page, YouTube channel, a Vimeo page and a Twitter feed to increase brand awareness, foster loyalty and build a community of users.

Fox had approximately \$22.4 million and \$30.6 million in firm backlog orders at December 31, 2013 and 2012, respectively.

Competition

The markets for FOX suspension products are highly competitive. FOX competes with other companies that produce suspension products for sale to OEMs, dealers and distributors, as well as with OEMs that produce their own line of suspension products for their own use. Competition in the high-end segment of the suspension products market revolves around technical features, performance, product design, innovation, reliability and durability, brand, time to market, customer service and reliable order execution. While the pricing of competing products is always a factor, management believes the high-performance of its products justifies its premium pricing. FOX competes with several large suspension providers and numerous small manufacturers that provide branded and unbranded products across all of FOX's product lines. These competitors can be divided into the following categories:

Mountain bikes Within the market for mountain bike suspension products, FOX compete with several companies that manufacture front and rear suspension products, including RockShox (a subsidiary of SRAM Corporation), X-Fusion Shox (a wholly-owned subsidiary of A-Pro), Manitou (a subsidiary of HB Performance Systems), SR Suntour, DT Swiss (a subsidiary of Vereinigte Drahtwerke AG) and Marzocchi (Tenneco).

Table of Contents

Powered vehicles Within the market for powered vehicle suspension products, FOX competes with several companies in different submarkets. A significant competitor for suspension products in the snowmobile market is KYB (Kayaba Industry Co., Ltd.). Other suppliers of suspension products for snowmobiles include Öhlins Racing AB, Walker Evans Racing, Works Performance Products, Inc. and Penske Racing Shocks / Custom Axis, Inc. In the ATV and Side-by-Side markets, outside of captive OEM suppliers, FOX competes with ZF Sachs (ZF Friedrichshafen AG) and Walker Evans Racing for OEM business and Elka Suspension Inc., Öhlins Racing AB, Works Performance Products and Penske Racing Shocks / Custom Axis, Inc. for aftermarket business. In the market for off-road and specialty vehicle suspension products, FOX's two biggest competitors are ThyssenKrupp Bilstein Suspension GmbH (commonly known as Bilstein) and King Shock Technology, Inc. (commonly known as King Shock). Other competitors include Icon Vehicle Dynamics, Sway-A-Way, Pro Comp USA Suspension and Rancho (Tenneco).

Competition in the high-end performance segment of the suspension market revolves around technical features, performance and durability, customer service, price and reliable order execution. While pricing of competing products is always a factor, FOX management believes that the high-performance of their products helps justify their premium pricing.

Suppliers

FOX's primary raw materials used in the production of its products are aluminum, magnesium and steel. FOX uses multiple suppliers for these raw materials and believe that these raw materials are in adequate supply and available from many suppliers at competitive prices. Prices for these raw materials fluctuate from time to time, but historically, price fluctuations have not had a material impact on production costs.

FOX works closely with its supply base, and depends upon certain suppliers to provide raw inputs, such as forgings, castings and molded polymers that have been optimized for weight, structural integrity, wear and cost. In certain circumstances, FOX depends upon a limited number of suppliers for such raw inputs. FOX typically has no firm contractual sourcing agreements with these suppliers other than purchase orders.

Miyaki is the exclusive producer of the Kashima coating for our suspension component tubes. As part of our agreement with Miyaki, which we entered into in 2009, or the Kashima Agreement, we have been granted the exclusive right to use the trademark KASHIMACOAT on products comprising the aluminum finished parts for suspension components (e.g., tubes) and on related sales and marketing material worldwide, subject to a minimum model year order and certain other exclusions. The Kashima Agreement does not contain minimum purchase obligations.

Manufacturing

FOX manufactures and completes final assembly on its products. By controlling the manufacturing process of its products, FOX is able to maintain strict quality standards, customize machines and processes for the specific requirements of a product, and quickly respond to feedback receive on products in development. Furthermore, manufacturing its own products enables FOX to adjust labor and production inputs to meet seasonal demands and the customized requirements of some of its customers.

FOX currently manufactures the majority of its suspension products at its California facilities. FOX is currently in the process of transitioning the majority of its mountain bike products manufacturing operations to a new facility in Taichung, Taiwan over the next three years, with the final completion of the transition scheduled for 2015. In

Table of Contents

connection with this transition, FOX anticipates using suppliers who are located closer to the Taichung facility for a number of materials and components. As of December 31, 2013 manufacturing operations at its Taiwan facility are limited. During the transition period, FOX will manufacture mountain bike suspension products at both the manufacturing facility in Watsonville, California and in Taichung, Taiwan, thereby providing dual manufacturing facilities and reducing the risk of interruptions. Management believes that the orderly transition of the majority of the mountain bike manufacturing operations from California to Taiwan should enable them to maintain FOX's strict quality control standards, meet product demand requirements and relocate the majority of the manufacturing of its mountain bike products to a location (Taiwan) that is geographically close to a number of its mountain bike OEMs. It is estimated that sales to mountain bike OEMs located in Taiwan represented approximately 50% of total FOX sales to mountain bike OEMs in the year ended December 31, 2013.

Intellectual Property

FOX relies upon a combination of patents, trademarks, trade names, licensing arrangements, trade secrets, know-how and proprietary technology in order to secure and protect its intellectual property rights.

FOX diligently protects new technologies with patents and trademarks and defend against patent infringement allegations. As of December 31, 2013, FOX owned 37 patents on proprietary technologies related to vehicle suspension and other products and had approximately 82 patent pending applications on file in the U.S. and European Patent Offices. FOX's principal intellectual property also includes its trademarks. FOX has more than 50 pending or registered trademarks in the U.S. and a number of international jurisdictions.

Regulatory Environment

Environmental FOX's manufacturing operations, facilities and properties in the United States and Taiwan are subject to evolving foreign, international, federal, state and local environmental and occupational health and safety laws and regulations, including those governing air emissions, wastewater discharge and the storage and handling of chemicals and hazardous substances. Failure to comply with such laws and regulations could subject FOX to significant fines, penalties, costs, liabilities or restrictions on operations.

FOX management believes that its operations are in compliance, in all material respects, with applicable environmental and occupational health and safety laws and regulations, and compliance with such laws and regulations has not had, nor is it expected to have, a material impact on earnings or competitive position. However, new requirements, more stringent application of existing requirements or the discovery of previously unknown environmental conditions could result in material environmental related expenditures in the future.

Consumer safety FOX is subject to the jurisdiction of the United States Consumer Product Safety Commission, or the CPSC, and other federal, state and foreign regulatory bodies. Under CPSC regulations, a manufacturer of consumer goods is obligated to notify the CPSC, if, among other things, the manufacturer becomes aware that one of its products has a defect that could create a substantial risk of injury. If the manufacturer has not already undertaken to do so, the CPSC may require a manufacturer to recall a product, which may involve product repair, replacement or refund.

Employment FOX is subject to numerous foreign, federal, state and local government laws and regulations governing its relationships with its employees, including those relating to minimum wage, overtime, working conditions, hiring and firing, non-discrimination, work permits and employee benefits. Management believes that FOX's operations are conducted in compliance, in all material respects, with such laws and regulations.

Employees

As of December 31, 2013, FOX employed approximately 670 full-time employees in the United States, Europe and Taiwan. FOX also hires part-time employees at its manufacturing facilities to help meet seasonal demands. None of FOX's employees are subject to collective bargaining agreements. FOX has never experienced a material work stoppage or disruption to its business relating to employee matters and believe that relationships with their employees is good.

Table of Contents

Liberty Safe

Overview

Liberty Safe, headquartered in Payson, Utah and founded in 1988, is the premier designer, manufacturer and marketer of home, gun and office safes in North America. From its over 204,000 square foot manufacturing facility, Liberty Safe produces a wide range of home, office and gun safe models in a broad assortment of sizes, features and styles ranging from an entry level product to good, better and best products. Products are marketed under the Liberty Safe brand, as well as a portfolio of licensed and private label brands, including Remington, Cabela's and John Deere. Liberty Safe's products are the market share leader and are sold through an independent dealer network (Dealer sales) in addition to various sporting goods and home improvement retail outlets (Non-Dealer sales or National sales). Liberty Safe has the largest independent dealer network in the industry.

Historically approximately 60% of Liberty Safe's sales are Non-Dealer sales and 40% are Dealer sales.

For the fiscal years ended December 31, 2013, 2012 and 2011, Liberty Safe had net sales of approximately \$126.5 million, \$91.6 million and \$82.2 million (from date of acquisition), respectively, and operating income of \$12.5 million, \$6.0 million and \$4.3 million in the years ended December 31, 2013, 2012 and 2011 respectively. Liberty Safe had total assets of \$94.8 million, \$82.4 million and \$85.9 million at December 31, 2013, 2012 and 2011, respectively. Net sales from Liberty Safe represented 12.8%, 10.4% and 13.6% of our consolidated net sales for the year ended December 31, 2013, 2012 and 2011, respectively.

History of Liberty Safe

The Liberty Safe brand and its leading market share has been built over a 24 year history of superior product quality, engineering and design innovation, and leading customer service and sales support. Liberty Safe has a long history of continuous improvement and innovative approaches to sales and marketing, product development and manufacturing processes. Significant investments over the last five years have solidified Liberty Safe's reputation for providing substantial value to retailers and enhanced its long-standing position as the leading producer of premium home, office and gun safes.

Liberty Safe commenced operations in 1988 and throughout 1991 and 1992, increased its distribution capabilities, establishing a regional sales force model to better serve the Dealer channel. This expanded sales coverage gave Liberty Safe the needed organizational structure to provide ready support and products nationwide, helping to establish its reputation for service to its customers. On the strength of its growing reputation and national sales presence, Liberty Safe achieved the status of the #1 selling safe company in America in 1994, according to Sargent and Greenleaf data, the major lock supplier to the industry, a position that it has maintained to this day. In 2001, Liberty Safe opened its current 204,000 square foot state-of-the-art facility in Payson, UT and consolidated all of its manufacturing and distribution operations to a centralized location. As the only facility in the industry utilizing significant automation and a streamlined roll-form manufacturing process, it represented a significant step forward when compared to the production capabilities of its competitors. Incremental investments following the consolidation have solidified Liberty Safe's position as the pre-eminent low-cost and most efficient domestic manufacturer.

Beginning in 2007, Liberty Safe reorganized its manufacturing process, retooled its product line for increased standardization throughout the production process and realigned employee incentives to increase labor efficiency. These improvements enabled Liberty Safe to shift from build-to-stock production to build-to-order with shorter lead time requirements, greater labor efficiency and reduced working capital.

Table of Contents

During 2011 Liberty Safe constructed a new production line that has allowed Liberty to build entry level safe products in-house. This production line produces home and gun safe models that were previously completely sourced through foreign manufacturers. The production line began operations in February 2012 and Liberty is currently manufacturing two different models of safes on this line which translates into five new SKUs. Liberty invested over \$9.0 million to build the line. This investment in production capacity now makes Liberty Safe the largest manufacturer of home, office and gun safes in the world. This added investment in capacity in the U.S. will allow Liberty Safe to provide shorter lead times and more competitive pricing to its North American customer base. This will allow Liberty safe to capture additional market share, growing its revenue base and adding more margin dollars to the bottom line. In addition, Liberty Safe will be able to reduce its investment in inventory by no longer having to rely entirely upon long lead times associated with importing safes and the risk inherent in forecasting.

We purchased a majority interest in Liberty Safe on March 31, 2010.

Industry

Liberty Safe competes in the broadly defined North American safe industry which includes fire and document safes, media and data safes, depository safes, gun safes and cabinets, home safes and hotel safes. According to Global Industry Analysts, (GIA) March 2008 report, the global safe industry was estimated to be approximately \$2.9 billion of wholesale sales in 2008, and grew consistently at an estimated CAGR of 4.3% from 2000 to 2009. Consistent growth has been one of the defining characteristics of this industry, and GIA anticipates it will continue at a rate of 4.4% from 2009 through 2015

Products & Services

Liberty Safe offers home, office and gun safes with retail prices ranging from \$400 to \$8,000.

Liberty Safe produces 39 home and gun safe models with the most varied assortment of sizes, feature upgrades, accessories and styling options in the industry. Liberty Safe's premium home and gun safe product line covers sizes from 12 cu. ft. to 50 cu. ft. with smaller sizes available for its personal home safe. Liberty also imports over 40 home and gun safe models primarily for sales to Non-Dealer accounts. Liberty Safe markets its products under Company-owned brands and a portfolio of licensed and private label brands, including Remington, Cabela's, John Deere and others. Liberty Safe also sells commercial safes, vault doors and a number of accessories and options. The overwhelming majority of revenue is derived from the sales of safes.

Competitive Strengths

#1 Premium Home and Gun Safe Brand with Strong Momentum in the Market Liberty Safe achieved the status of #1 selling safe company in America in 1994 (per statistics provided by Sargent & Greenleaf, the primary lock supplier to the industry) and maintains this prominent position today. Management estimates that Liberty Safe's net sales are over twice those of its next largest competitor in the category. Liberty Safe continues to gain market share from the various smaller participants who lack the distribution and sales and marketing capabilities of Liberty Safe.

State-of-the-Art and Scalable Operations Over the past five years, management has constructed a highly scalable operational platform and infrastructure that has positioned Liberty Safe for substantial sales growth and enhanced profitability in the coming years. Liberty Safe transitioned itself from a manufacturing oriented operating culture to a demand-based, sales-oriented organization. Its strategic transition required the implementation of a demand-based sales and operating platform, which included (i) new equipment to drive automation and capacity

Table of Contents

improvements; (ii) reengineered product lines and production processes to drive efficiency through greater standardization in production; and (iii) new employee incentives tied to labor efficiency, which has improved worker performance as well as employee attitude. These initiatives are enhanced by an experienced senior executive team, a balanced sourcing and in-house manufacturing production strategy, advanced distribution capabilities and sophisticated IT systems. Liberty has combined its demand-based sales and operating initiatives with upgraded production equipment to drive multiple operational improvements. Since 2007, Liberty has reduced its lead times from 4 – 6 weeks to approximately seven days. These shorter production cycles coupled with better demand forecasting have significantly reduced working capital needs for the business by reducing domestic inventory from approximately 7,000 units to 3,000 units since 2007. During a period of 2013 lead times actually increased due to a significant spike in demand for safes from its customers. That demand spike subsided towards the end of fiscal 2013 where again, shorter lead times were experienced. Improved automation and workflow organization have decreased labor hours over 20% per safe from 8.3 in 2005 to 6.3 in 2012 for rolled steel safes. These recent initiatives combined with Liberty’s cumulative historical investments in operational capabilities have created a lasting competitive advantage over its smaller competitors, who utilize labor-intensive operations and lack the company’s lean manufacturing culture.

Historically, Liberty Safe maintained an optimal mix of in-house and Asian-sourced manufacturing in order to improve its ability to meet customer inventory needs. Beginning in 2012 Liberty Safe began manufacturing entry level safes that were previously completely sourced from an Asian manufacturer, on its new production line. In 2013, the market enjoyed unprecedented heightened demand related to gun sales resulting from threats of additional gun legislation. This caused Liberty Safe to reinstitute its import channel of safes. In 2013, approximately 82% of safes were made in the United States while the balance came from imported product. This was necessary as demand exceeded Liberty’s manufacturing capacity.

Liberty Safe has leased for the past ten years a manufacturing and distribution facility in Payson, Utah that management believes represents the most scalable domestic facility in the industry. Liberty Safe’s multi-faceted production capabilities allow for substantial flexibility and scalable capacity, thus assuring a level of supply chain execution far superior to any of its competitors.

Reputation for High Quality Products Liberty Safe offers only the highest quality products on a consistent basis, which over the years has gained it an enviable reputation and a key point of differentiation from its competitors. Liberty Safe distinguishes its products through tested security and fire protection features and industry leading design focused on functionality and aesthetics. The design of its safes meet rigorous internal benchmarks for security and fire protection, with most receiving certification from Underwriters Laboratory, Inc. (UL), the leading product safety standard certification, for its security capabilities. Additionally, Liberty Safe’s investment in accessories and feature options have made Liberty safes the most visually appealing and functional in the industry, while providing more customized solutions for retailers and consumers.

Trusted Supplier to National Retailer and Dealer Accounts Liberty Safe’s comprehensive, high-quality product offering and sophisticated sales and marketing programs have made it a critical supplier to a diverse group of national accounts and dealers. Initially a key supplier primarily to the dealer channel, it has expanded its business with national accounts, such as Gander Mountain, Cabela’s and True Value Hardware. Liberty Safe provides a superior value proposition as a supplier for its national retailers and dealers via its well-recognized brands, lifetime product warranty, tailored merchandising, category management solutions and superior supply chain execution. Further, Liberty Safe’s products generate more profitable floor-space, with both high absolute gross profit and retail margins over 30%. High retail profitability plus increased inventory turns has entrenched Liberty Safe as a key partner in customers’ success in the safe category. As a core element of building its relationships, Liberty Safe has invested significantly in making its retailers better salespeople through a proprietary suite of training tools, including in-store training, new product demonstrations, online education programs and sales strategy literature.

Table of Contents

Business Strategies

Liberty Safe has experienced strong historical growth while executing on multiple new sales and operational initiatives, positioning it to continue to increase its scale and improve profitability. Liberty’s growth strategy is rooted in the sales and marketing and operational initiatives that have spurred its expansion into new accounts and increased penetration of existing accounts. Liberty has significant opportunity in its existing channels to continue to build upon its already strong market share. In addition to growth within its current channels, Liberty’s core competencies can be successfully applied to ventures in the broader security equipment market. Liberty has explored certain of these opportunities, but due to the prioritization of operational initiatives and expansion opportunities within existing channels, they have not been aggressively pursued. Potential near-to-medium term areas for expansion of Liberty’s platform include:

Expand Liberty’s product line into the broader home and office safe market through current customers or new distribution strategies;

Further develop international distribution by entering new countries and expanding current limited presence in Canada, Mexico and Europe;

Enter the residential security market through a strategic partnership with a provider of residential security service solutions to provide a more complete physical and electronic security solution; and

Acquire businesses within the premium home and gun safe industry and/or leverage Liberty’s platform into new products or channels

Offer additional accessory products to existing distribution networks

Research and Development

Liberty Safe is the engineering and design leader in its sector, due to a history of first-to-market features and standard-setting design improvements. Liberty’s proactive solicitation of feedback and constant interaction with consumers and retail customers across diverse channels and geographies enables Liberty Safe to stay at the forefront of customer demands. Liberty’s approach to product development increases the likelihood of market acceptance by creating products that are more relevant to consumers’ demands. Research and development costs were \$0.7 million in 2013 and \$0.8 million in each of the years 2012 and 2011.

The below charts represents some of the recent innovations in product design (and functionality) that have come about from Liberty’s dedication to R&D:

Product	Function/Benefit
Cool Pocket™	Keeps documents 50% cooler than rest of safe
Integrated lighting system	Automatic on/off interior lights
Palusol Heat activated door	Seal expands seven times its size in fire
Liberty Tough Doors	Enhanced protection against side bolt prying
Marble gloss powder coat paint	Provides smooth glass finish
4 in 1 Flex storage system	Adjustable shelving configurations
Door panels	Pocket variety to store handguns and other items
Magnetic magazine mount	Ammunition storage that adhere to any surface
Bright view wand light kit	Provides better lighting solution.
Bow hanger	Allows bow to hang in safe
Safe Alert sensor	Monitors and alerts owners of temperatures inside the safe

Table of Contents

In addition to product enhancements, new products, such as the *Fatboy*[®] *Series*, have been launched from Liberty's commitment to R&D.

Based on consumer feedback, Liberty saw demand for safes that were capable of holding more valuables within the safe but at a lower price point than Liberty's current large safe models. Within 3 months of conception, Liberty introduced the successful *Fatboy*[®] series in February 2010. The *Fatboy*[®] and *Fatboy Jr.*[®] models, which are wider and deeper than traditional safes, were a natural complement to Liberty's current products, targeted at a specific customer need. The introduction and success of the *Fatboy*[®] series demonstrates Liberty's proven ability to recognize market opportunities, engineer a responsive product and execute market delivery. Beginning in 2012 Liberty Safe introduced five new SKUs, manufactured on its new production line, with a unique locking system to service the entry level safe market. This line was responsible for approximately \$15 million in 2013 sales.

Customers

Liberty Safe has fostered long-term relationships with leading national retailers (National or Non-Dealer) as well as numerous Dealers, enabling Liberty Safe to achieve considerable brand awareness and channel exposure. Traditionally, the Dealer channel has accounted for the majority of the Liberty Safe's sales, but through significant investment in its national accounts sales and marketing efforts, Liberty Safe has also become the leading supplier to National accounts. Expansion into National accounts is part of Liberty Safe's strategy to reach a broader customer base and more varied demographics. National account customers include sporting goods retailers, farm & fleet retailers, home improvement retailers and club retailers. As of December 31, 2013, 2012 and 2011, Liberty Safe had 15, 16 and 16 Non-Dealer account customers, respectively, that are estimated to have accounted for approximately 59%, 57% and 61% of net sales, respectively.

Dealer customers include local hunting and fishing stores, hardware stores and numerous other local, independent store models. As of December 31, 2013, 2012 and 2011, there were 306, 343 and 325 Dealers that accounted for 41%, 43% and 39% of net sales, respectively.

Liberty Safe's largest customer accounted for approximately 18.0%, 15.0% and 13.2% of net sales in 2013, 2012 and 2011, respectively.

Sales & Marketing

Liberty Safe possesses robust sales and marketing capabilities in the safe industry. Liberty Safe utilizes separate sales teams for National accounts and Dealers, which enables it to provide more focused and effective strategies to manage and develop relationships within different channels. Liberty Safe has made significant recent investments in the development of a comprehensive sales and marketing program including merchandising, sales training and tools, promotions and supply chain management. Through these various initiatives, Liberty Safe offers highly adaptable programs to suit the varying needs of its retailers. This has enabled Liberty Safe to become a key supplier across diverse channels. Liberty Safe began advertising nationally on the Glenn Beck radio show in the second half of 2010. This advertising has been highly successful and Liberty has continued this advertising in each of the following years and intends on continuing this advertisement in the future.

Table of Contents

Liberty Safe's comprehensive service offering makes it uniquely suited to service national retailers in a variety of channels. Liberty Safe has designed a Store-within-a-Store program and a more comprehensive Safe Category Management program to build relationships and increase its importance to retailers. Primarily utilized with sporting goods retailers, the Store-within-a-Store concept successfully integrates the effective sales strategies of its dealers for selling a high-price point, niche product into a larger store format. Centered on communicating the benefits of its products to customers, the program enables retailers to more effectively up-sell customers through a good-better-best merchandising platform, increasing margin and inventory turns for its retailers. Liberty's Safe Category Management program builds on the Store-within-a-Store concept to provide greater sales and marketing control and more complete inventory management solutions. This program facilitates Liberty Safe becoming the sole supplier to retailers, providing large incremental expansion and stronger relationships at accounts. No other market participant has the capabilities to provide a comprehensive suite of customer service solutions to national retailers, such as customized SKU programs, a Store-within-a-Store program and a Safe Category Management program. Liberty's sales are typically lowest in the second fiscal quarter due to lower demand for safes at the onset of summer, although this was not the case in 2013 due to significant sales backlog experienced throughout the year.

Competition

Liberty Safe is the premier brand in the premium home and gun safe industry, with an estimated 34% market share in the category. Liberty is in a class by itself when it comes to manufacturing technology and efficiency and supply chain capabilities. Competitors are generally more heavily focused on either smaller, sourced safes or large, domestically produced safes. Competitive domestic manufacturers run blacksmith type factories that are small, inefficient and require a tremendous amount of manual labor that produces inconsistent product. In addition, many of Liberty's competitors are directly tied to a third-party brand, such as Browning, Winchester or RedHead / Bass Pro.

Liberty competes with other safe manufacturers based on price, breadth of product line, technology, product supply chain capabilities and marketing capabilities.

Channel diversity in the premium home and gun safe industry is rare, with most companies having greater concentration in either the dealer channel or national accounts, but rarely having the supply chain capabilities or sales and marketing programs to service both channels effectively such as Liberty Safe does. Major competitors have limited sales and marketing departments and programs, making it difficult for them to expand sales and gain market share.

Suppliers

Liberty's primary raw materials are steel, sheetrock, wood, locks, handles and fabric, for which it receives multiple shipments per week. Materials, on average, account for approximately 65% of the total cost of a safe, with steel accounting for approximately 55% of material costs. Liberty purchases its materials from a combination of domestic and foreign suppliers. Historically, Liberty Safe has been able to pass on raw material price increases to its customers.

Liberty purchased over 39 million pounds of steel in 2013 primarily from domestic suppliers, using contracts that lock in prices two to three fiscal quarters in advance. Liberty Safe purchases coiled and flat steel in gauges from four to 14. Liberty Safe specifies rigorous requirements related to surface and edge finish and grain direction. All steel products are checked to ASTM specification and dimensional tolerances before entering the production process.

Table of Contents

In 2013 Liberty Safe re-established its relationship with its former Asian supplier of safes due to unprecedented demand for product from its customers. Liberty's manufacturing facility could not keep up with the demand. As a result approximately 18% of 2013 safe sales were from import product. Management expects this to decrease in the future as overall demand is expected to decrease.

Liberty Safe had approximately \$9.1 million and \$13.2 million in firm backlog orders at December 31, 2013 and 2012, respectively.

Intellectual Property

Liberty Safe relies upon a combination of patents and trademarks in order to secure and protect its intellectual property rights.

Liberty Safe currently owns 25 trademarks and 2 patents on proprietary technologies for safe products.

Regulatory Environment

Liberty Safe's management believes that Liberty Safe is in compliance with applicable environmental and occupational health and safety laws and regulations. Liberty Safe has recently moved to a powder paint application in order to reduce hazardous VOC emissions.

Employees

As of December 31, 2013, Liberty Safe had over 400 full-time employees and 112 temporary employees. Liberty's labor force is non-union. Management believes that Liberty Safe has an excellent relationship with its employees.

Niche Industrial Businesses

Advanced Circuits

Overview

Advanced Circuits, headquartered in Aurora, Colorado, is a provider of prototype, quick-turn and production rigid PCBs, throughout the United States. Advanced Circuits also provides its customers with assembly services in order to meet its customers' complete PCB needs. The prototype and quick-turn portions of the PCB industry are characterized by customers requiring high levels of responsiveness, technical support and timely delivery. Due to the critical roles that PCBs play in the research and development process of electronics, customers often place more emphasis on the turnaround time and quality of a customized PCB than on the price. Advanced Circuits meets this market need by manufacturing and delivering custom PCBs in as little as 24 hours, providing customers with over 98% error-free production and real-time customer service and product tracking 24 hours per day. In each of the years 2013, 2012 and 2011, over 60% of Advanced Circuits' sales were derived from highly profitable prototype and quick-turn production PCBs. Advanced Circuits' success is demonstrated by its broad base of over 11,000 customers with which it does business throughout the year.

For the full fiscal years ended December 31, 2013, 2012 and 2011, Advanced Circuits had net sales of approximately \$87.4 million, \$84.1 million and \$78.5 million, respectively and operating income of \$22.9 million, \$24.0 million and \$26.6 million, respectively. Advanced Circuits had total assets of \$84.7 million, \$91.4 million and \$88.7 million at December 31, 2013, 2012 and 2011, respectively. Net sales from Advanced Circuits represented 8.9%, 9.5%, and 12.9% of our consolidated net sales for the years 2013, 2012 and 2011, respectively.

Table of Contents

History of Advanced Circuits

Advanced Circuits commenced operations in 1989 through the acquisition of a small Denver based PCB manufacturer, Seiko Circuits. During its first years of operations, Advanced Circuits focused exclusively on manufacturing high volume, production run PCBs with a small group of proportionately large customers. In 1992, after the loss of a significant customer, Advanced Circuits made a strategic shift to limit its dependence on any one customer. As a result, Advanced Circuits began focusing on developing a diverse customer base, and in particular, on providing research and development professionals at equipment manufacturers and academic institutions with low volume, high margin, customized prototype and quick-turn PCBs.

In 1997, Advanced Circuits increased its capacity and consolidated its facilities into its current headquarters in Aurora, Colorado. In 2003, to support its growth, Advanced Circuits expanded its PCB manufacturing facility by approximately 37,000 square feet or approximately 150%. In 2013 Advanced Circuits added approximately 50,000 square feet and moved its administrative and engineering group next door to its production facilities.

In March 2010, Advanced Circuits acquired Circuit Express, Inc. (CEI) for approximately \$16.1 million. Based in Tempe, Arizona and founded in 1987, CEI focuses on quick-turn and prototype manufacturing of rigid PCBs primarily for aerospace and defense related industry customers. CEI also specializes in expedited delivery in as fast as 24 hours. CEI reported net sales of approximately \$16.4 million in 2010 and \$18.7 million for the full fiscal 2011 year.

On May 23, 2012, Advanced Circuits acquired Universal Circuits, Inc. (UCI) for approximately \$2.3 million. UCI supplies PCBs to major military, aerospace, and medical original equipment manufacturers and contract manufacturers. UCI 's Minnesota facility meets certain Department of Defense clearance requirements and is noted for custom and advanced technologies. Universal Circuits ' sales are primarily in the long-lead sector.

We purchased a controlling interest in Advanced Circuits on May 16, 2006.

Industry

The PCB industry, which consists of both large global PCB manufacturers and small regional PCB manufacturers, is a vital component to all electronic equipment supply chains, as PCBs serve as the foundation for virtually all electronic products, including cellular telephones, appliances, personal computers, routers, switches and network servers. PCBs are used by manufacturers of these types of electronic products, as well as by persons and teams engaged in research and development of new types of equipment and technologies.

Production of PCBs in North America has declined since 2000 and is expected to show flat to modest growth in fiscal 2014 according to the IPC 2013 Analysis. The rapid decline in United States production was caused by (i) reduced demand for and spending on PCBs following the technology and telecom industry decline in early 2000; and (ii) increased competition for volume production of PCBs from Asian competitors benefiting from both lower labor costs and less restrictive waste and environmental regulations. While Asian manufacturers have made large market share gains in the PCB industry overall, prototype and quick-turn production, some of the more complex volume production and military production have remained strong in the United States.

Table of Contents

Both globally and domestically, the PCB market can be separated into three categories based on required lead time and order volume:

Prototype PCBs These PCBs are typically manufactured for customers in research and development departments of original equipment manufacturers, or OEMs, and academic institutions. Prototype PCBs are manufactured to the specifications of the customer, within certain manufacturing guidelines designed to increase speed and reduce production costs. Prototyping is a critical stage in the research and development of new products. These prototypes are used in the design and launch of new electronic equipment and are typically ordered in volumes of 1 to 50 PCBs. Because the prototype is used primarily in the research and development phase of a new electronic product, the life cycle is relatively short and requires accelerated delivery time frames of usually less than five days and very high, error-free quality. Order, production and delivery time, as well as responsiveness with respect to each, are key factors for customers as PCBs are indispensable to their research and development activities.

Quick-Turn Production PCBs These PCBs are used for intermediate stages of testing for new products prior to full scale production. After a new product has successfully completed the prototype phase, customers undergo test marketing and other technical testing. This stage requires production of larger quantities of PCBs in a short period of time, generally 10 days or less, while it does not yet require high production volumes. This transition stage between low-volume prototype production and volume production is known as quick-turn production. Manufacturing specifications conform strictly to end product requirements and order quantities are typically in volumes of 10 to 500. Similar to prototype PCBs, response time remains crucial as the delivery of quick-turn PCBs can be a gating item in the development of electronic products. Orders for quick-turn production PCBs conform specifically to the customer's exact end product requirements.

Volume Production PCBs These PCBs, which we sometimes refer to as long lead and sub-contract are used in the full scale production of electronic equipment and specifications conform strictly to end product requirements. Volume Production PCBs are ordered in large quantities, usually over 100 units, and response time is less important, ranging between 15 days to 10 weeks or more.

These categories can be further distinguished based on board complexity, with each portion facing different competitive threats. Advanced Circuits competes largely in the prototype and quick-turn production portions of the North American market, which have not been significantly impacted by Asian based manufacturers due to the quick response time required for these products. Management believes the North American PCB market is estimated to be approximately \$3.5 billion in 2014.

Several significant trends are present within the PCB manufacturing industry, including:

Increasing Customer Demand for Quick-Turn Production Services Rapid advances in technology are significantly shortening product life-cycles and placing increased pressure on OEMs to develop new products in shorter periods of time. In response to these pressures, OEMs invest heavily in research and development, which results in a demand for PCB companies that can offer engineering support and quick-turn production services to minimize the product development process.

Increasing Complexity of Electronic Equipment OEMs are continually designing more complex and higher performance electronic equipment, requiring sophisticated PCBs. To satisfy the demand for more advanced electronic products, PCBs are produced using exotic materials and increasingly have higher layer counts and greater component densities. Maintaining the production infrastructure necessary to manufacture PCBs of increasing complexity often requires significant capital expenditures and has acted to reduce the competitiveness of local and regional PCB manufacturers lacking the scale to make such investments.

Shifting of High Volume Production to Asia Asian based manufacturers of PCBs are capitalizing on their lower labor costs and are increasing their market share of volume production of PCBs used, for example, in high-volume consumer electronics applications, such as personal computers and cell phones. Asian based manufacturers have been generally unable to meet the lead time requirements for prototype or quick-turn PCB production or the volume production of the most complex PCBs. This off shoring of

Table of Contents

high-volume production orders has placed increased pricing pressure and margin compression on many small domestic manufacturers that are no longer operating at full capacity. Many of these small producers are choosing to cease operations, rather than operate at a loss, as their scale, plant design and customer relationships do not allow them to focus profitably on the prototype and quick-turn sectors of the market.

Products and Services

A PCB is comprised of layers of laminate and contains patterns of electrical circuitry to connect electronic components. Advanced Circuits typically manufactures 2 to 20 layer PCBs, and has the capability to manufacture up even higher layer PCBs. The level of PCB complexity is determined by several characteristics, including size, layer count, density (line width and spacing), materials and functionality. Beyond complexity, a PCB's unit cost is determined by the quantity of identical units ordered, as engineering and production setup costs per unit decrease with order volume, and required production time, as longer times often allow increased efficiencies and better production management. Advanced Circuits primarily manufactures lower complexity PCBs.

To manufacture PCBs, Advanced Circuits generally receives circuit designs from its customers in the form of computer data files emailed to one of its sales representatives or uploaded on its interactive website. These files are then reviewed to ensure data accuracy and product manufacturability. While processing these computer files, Advanced Circuits generates images of the circuit patterns that are then physically developed on individual layers, using advanced photographic processes. Through a variety of plating and etching processes, conductive materials are selectively added and removed to form horizontal layers of thin circuits, called traces, which are separated by insulating material. A finished multilayer PCB laminates together a number of layers of circuitry. Vertical connections between layers are achieved by metallic plating through small holes, called vias. Vias are made by highly specialized drilling equipment capable of achieving extremely fine tolerances with high accuracy.

Advanced Circuits assists its customers throughout the life-cycle of their products, from product conception through volume production. Advanced Circuits works closely with customers throughout each phase of the PCB development process, beginning with the PCB design verification stage using its unique online FreeDFM.com tool, FreeDFM.com™, which was launched in 2002, enables customers to receive a free manufacturability assessment report within minutes, resolving design problems that would prohibit manufacturability before the order process is completed and manufacturing begins. The combination of Advanced Circuits' user-friendly website and its design verification tool reduces the amount of human labor involved in the manufacture of each order as PCBs move from Advanced Circuits' website directly to its computer numerical control, or CNC, machines for production, saving Advanced Circuits and customers cost and time. As a result of its ability to rapidly and reliably respond to the critical customer requirements, Advanced Circuits receives a premium for their prototype and quick-turn PCBs as compared to volume production PCBs.

Advanced Circuits manufactures all high margin prototypes and quick-turn orders internally but often utilizes external partners to manufacture production orders that do not fit within its capabilities or capacity constraints at a given time. As a result, Advanced Circuits constantly adjusts the portion of volume production PCBs produced internally to both maximize profitability and ensure that internal capacity is fully utilized.

Table of Contents

The following table shows Advanced Circuits' gross revenue by products and services for the periods indicated:

	Year Ended December 31,		
	2013	2012	2011
Gross Sales by Products and Services⁽¹⁾			
Prototype Production	24.3%	28.4%	29.3%
Quick-Turn Production	30.6%	31.9%	33.6%
Volume Production (including assembly)	44.7%	38.1%	35.5%
Third Party	0.4%	1.6%	1.6%
Total	100.0%	100.0%	100.0%

⁽¹⁾ As a percentage of gross sales, exclusive of sale discounts.

Competitive Strengths

Advanced Circuits has established itself as a leading provider of prototype and quick-turn PCBs in North America and focuses on satisfying customer demand for on-time delivery of high-quality PCBs. Advanced Circuits' management believes the following factors differentiate it from many industry competitors:

Numerous Unique Orders Per Day For the year ended December 31, 2013, Advanced Circuits received on average over 300 customer orders per day. Due to the large quantity of orders received, Advanced Circuits is able to combine multiple orders in a single panel design prior to production. Through this process, Advanced Circuits is able to reduce the number of costly, labor intensive equipment set-ups required to complete several manufacturing orders. As labor represents the single largest cost of production, management believes this capability gives Advanced Circuits a unique advantage over other industry participants. Advanced Circuits maintains proprietary software that maximizes the number of units placed on any one panel design. A single panel set-up typically accommodates 1 to 12 orders. Further, as a critical mass of like orders is required to maximize the efficiency of this process, management believes Advanced Circuits is uniquely positioned as an efficient manufacturer of prototype and quick-turn PCBs.

Diverse Customer Base Advanced Circuits possesses a customer base with little industry or customer concentration exposure. During fiscal year ended December 31, 2013, Advanced Circuits did business with over 11,000 customers and added over 180 new customers per month. For each of the years ended December 31, 2013, 2012 and 2011, no customer represented over 2% of net sales.

Highly Responsive Culture and Organization A key strength of Advanced Circuits is its ability to quickly respond to customer orders and complete the production process. In contrast to many competitors that require a day or more to offer price quotes on prototype or quick-turn production, Advanced Circuits offers its customers quotes within seconds and the ability to place or track orders any time of day. In addition, Advanced Circuits' production facility operates three shifts per day and is able to ship a customer's product within 24 hours of receiving its order.

Proprietary FreeDFM.com Software Advanced Circuits offers its customers unique design verification services through its online FreeDFM.com tool. This tool, which was launched in 2002, enables customers to receive a free manufacturability assessment report, within minutes, resolving design problems before customers place their orders. The service is relied upon by many of Advanced Circuits' customers to reduce design errors and minimize production costs. Beyond improved customer service, FreeDFM.com has the added benefit of improving the efficiency of Advanced Circuits' engineers, as many routine design problems, which typically require an engineer's time and attention to identify, are identified and sent back to customers automatically.

Edgar Filing: Compass Diversified Holdings - Form 10-K

Established Partner Network Advanced Circuits has established third party production relationships with PCB manufacturers in North America and Asia. Through these relationships, Advanced Circuits is able to offer its customers a complete suite of products including those outside of its core production capabilities. Additionally, these relationships allow Advanced Circuits to outsource orders for volume production and focus internal capacity on higher margin, short lead time, production and quick-turn manufacturing.

Table of Contents

Business Strategies

Advanced Circuits management is focused on strategies to increase market share and further improve operating efficiencies. The following is a discussion of these strategies:

Increase Portion of Revenue from Prototype and Quick-Turn Production Advanced Circuits management believes it can grow revenues and cash flow by continuing to leverage its core prototype and quick-turn capabilities. Over its history, Advanced Circuits has developed a suite of capabilities that management believes allow it to offer a combination of price and customer service unequaled in the market. Though reductions in military spending have created headwinds recently, Advanced Circuits intends to leverage this factor, as well as its core skill set, to increase net sales derived from higher margin prototype and quick-turn production PCBs. In this respect, marketing and advertising efforts focus on attracting and acquiring customers that are likely to require these premium services. And while production composition may shift, growth in these products and services is not expected to come at the expense of declining sales in volume production PCBs, as Advanced Circuits intends to leverage its extensive network of third-party manufacturing partners to continue to meet customers demand for these services.

Acquire Customers from Local and Regional Competitors Advanced Circuits management believes the majority of its competition for prototype and quick-turn PCB orders comes from smaller scale local and regional PCB manufacturers. As an early mover in the prototype and quick-turn sector of the PCB market, Advanced Circuits has been able to grow faster and achieve greater production efficiencies than many industry participants. Management believes Advanced Circuits can continue to use these advantages to gain market share. Further, Advanced Circuits continues to enter into prototype and quick-turn manufacturing relationships with several subscale local and regional PCB manufacturers. Management believes that while many of these manufacturers maintain strong, longstanding customer relationships, they are unable to produce PCBs with short turn-around times at competitive prices. As a result, Advanced Circuits sees an opportunity for growth by providing production support to these manufacturers or direct support to the customers of these manufacturers, whereby the manufacturers act more as a broker for the relationship.

Remain Committed to Customers and Employees Advanced Circuits has remained focused on providing the highest quality products and services to its customers. We believe this focus has allowed Advanced Circuits to achieve its outstanding delivery and quality record. Advanced Circuits management believes this reputation is a key competitive differentiator and is focused on maintaining and building upon it. Similarly, management believes its committed base of employees is a key differentiating factor. Advanced Circuits currently has a profit sharing program and tri-annual bonuses for all of its employees. Management also occasionally sets additional performance targets for individuals and departments and establishes rewards, such as lunch celebrations or paid vacations, if these goals are met. Management believes that Advanced Circuits emphasis on sharing rewards and creating a positive work environment has led to increased loyalty. Advanced Circuits plans to continue to focus on similar programs to maintain this competitive advantage.

Opportunistically Acquire Smaller PCB Manufacturers Historically Advanced Circuits has selectively made tuck-in acquisitions of regional PCB manufacturers, including the acquisitions of Circuit Express, Inc. in 2010 and Universal Circuits, Inc. in 2012. Management will continue to seek tuck-in acquisitions of smaller PCB manufacturers where sales and operational efficiencies can be realized, or strategic technical capabilities expanded.

Table of Contents***Research and Development***

Advanced Circuits engages in continual research and development activities in the ordinary course of business to update or strengthen its order processing, production and delivery systems. By engaging in these activities, Advanced Circuits expects to maintain and build upon the competitive strengths from which it benefits currently. Research and development expenses were not material in each of the last three years.

Customers

Advanced Circuits' focus on customer service and product quality has resulted in a broad base of customers in a variety of end markets, including industrial, consumer, telecommunications, aerospace/defense, biotechnology and electronics manufacturing. These customers range in size from large, blue-chip manufacturers to small, not-for-profit university engineering departments. The following table sets forth management's estimate of Advanced Circuits' approximate customer breakdown by industry sector for the fiscal years ended December 31, 2013, 2012 and 2011:

Industry Sector	2013 Customer Distribution	2012 Customer Distribution	2011 Customer Distribution
Electrical Equipment and Components	24%	28%	30%
Measuring Instruments	7%	8%	8%
Electronics Manufacturing Services	22%	20%	19%
Engineer Services	4%	5%	8%
Industrial and Commercial Machinery	12%	12%	10%
Business Services	1%	1%	1%
Wholesale Trade-Durable Goods	1%	1%	1%
Educational Institutions	12%	10%	8%
Transportation Equipment	10%	9%	9%
All Other Sectors Combined	7%	6%	6%
Total	100%	100%	100%

Table of Contents

Management estimates that over 90% of its orders are generated from existing customers. Moreover, more than half of Advanced Circuits' orders in each of the years 2013, 2012 and 2011 were delivered within five days (not including CEI orders.) One customer represented approximately 4.5% of Advanced Circuits sales in 2013. No other customer represents more than 2% of Advanced Circuits' sales.

Sales and Marketing

Advanced Circuits has established a consumer products marketing strategy to both acquire new customers and retain existing customers. Advanced Circuits uses initiatives such as direct mail postcards, web banners, aggressive pricing specials and proactive outbound customer call programs as part of this strategy. Advanced Circuits spends approximately 1% of net sales each year on its marketing initiatives and advertising and has 59 employees dedicated to its marketing and sales efforts. These individuals are organized geographically and each is responsible for a region of North America. The sales team takes a systematic approach to placing sales calls and receiving inquiries and, on average, will place over 200 outbound sales calls and receive approximately 140 inbound phone inquiries per day. Beyond proactive customer acquisition initiatives, management believes a substantial portion of new customers are acquired through referrals from existing customers. In addition, other customers are acquired on-line where Advanced Circuits generates over 90% of its orders from its website.

Once a new client is acquired, Advanced Circuits offers an easy to use customer-oriented website and proprietary online design and review tools to ensure high levels of retention. By maintaining contact with its customers to ensure satisfaction with each order, Advanced Circuits believes it has developed strong customer loyalty, as demonstrated by over 90% of its orders being received from existing customers. Included in each customer order is an Advanced Circuits pre-paid bounce-back card on which a customer can evaluate Advanced Circuits' services and send back any comments or recommendations. Each of these cards is read by senior members of management, and Advanced Circuits adjusts its services to respond to the requests of its customer base.

Substantially all revenue is derived from sales within the United States.

Advanced Circuits, due to the volume of prototype and quick turn sales, had a negligible amount in firm backlog orders at December 31, 2013 and 2012.

Competition

There are currently an estimated 238 active domestic PCB manufacturers. Advanced Circuits' competitors differ amongst its products and services.

Competitors in the prototype and quick-turn PCBs production industry include larger companies as well as small domestic manufacturers. The two largest independent domestic prototype and quick-turn PCB manufacturers in North America are TTM Technologies, Inc. and Viasystems Group, Inc. Though each of these companies produces prototype PCBs to varying degrees, in many ways they are not direct competitors with Advanced Circuits. In recent years, each of these firms has primarily focused on producing boards with greater complexity in response to the off shoring of low and medium layer count technology to Asia. Compared to Advanced Circuits, prototype and quick-turn PCB production accounts for much smaller portions of each of these firms' revenues. Further, these competitors often have much greater customer concentrations and a greater portion of sales through large electronics manufacturing services intermediaries. Beyond large, public companies, Advanced Circuits competitors include numerous small, local and regional manufacturers, often with revenues under \$20 million that have long-term customer relationships and typically produce both prototype and quick-turn PCBs and production PCBs for small OEMs and EMS companies. The competitive factors in prototype and quick-turn production PCBs are response time, quality, error-free production and customer service. Competitors in the long lead-time production PCBs generally include large companies, including Asian manufacturers, where price is the key competitive factor.

Table of Contents

New market entrants into prototype and quick-turn production PCBs confront substantial barriers including significant investments in equipment, highly skilled workforce with extensive engineering knowledge and compliance with environmental regulations. Beyond these tangible barriers, Advanced Circuits' management believes that its network of customers, established over the last two decades, would be very difficult for a competitor to replicate.

Suppliers

Advanced Circuits' raw materials inventory is small relative to sales and must be regularly and rapidly replenished. Advanced Circuits uses a just-in-time procurement practice to maintain raw materials inventory at low levels. Additionally, Advanced Circuits has established consignment relationships with several vendors allowing it to pay for raw materials as used. Because it provides primarily lower-volume quick-turn services, this inventory policy does not hamper its ability to complete customer orders. Raw material costs constituted approximately 21%, 20% and 18% of net sales for each of the fiscal years ended December 31, 2013, 2012 and 2011, respectively.

The primary raw materials that are used in production are core materials, such as copper clad layers of glass and chemical solutions, and copper and gold for plating operations, photographic film and carbide drill bits. Multiple suppliers and sources exist for all materials. Adequate amounts of all raw materials have been available in the past, and Advanced Circuits' management believes this will continue in the foreseeable future. Advanced Circuits works closely with its suppliers to incorporate technological advances in the raw materials they purchase. Advanced Circuits does not believe that it has significant exposure to fluctuations in raw material prices. The fact that price is not the primary factor affecting the purchase decision of many of Advanced Circuits' customers has allowed management to historically pass along a portion of raw material price increases to its customers. Advanced Circuits does not knowingly purchase material originating in the Democratic Republic of the Congo or adjoining countries.

Intellectual Property

Advanced Circuits seeks to protect certain proprietary technology by entering into confidentiality and non-disclosure agreements with its employees, consultants and customers, as needed, and generally limits access to and distribution of its proprietary information and processes. Advanced Circuits' management does not believe that patents are critical to protecting Advanced Circuits' core intellectual property, but, rather, its effective and quick execution of fabrication techniques, its website *FreeDFM.com*TM and its highly skilled workforce are the primary factors in maintaining its competitive position.

Advanced Circuits uses the following brand names: *FreeDFM.com*TM, *4pcb.com*TM, *4PCB.com*TM, *33each.com*TM, *barebonespcb.com*TM and *Advanced Circuits*TM. These trade names have strong brand equity and are material to Advanced Circuits' business.

Regulatory Environment

Advanced Circuits' manufacturing operations and facilities are subject to evolving federal, state and local environmental and occupational health and safety laws and regulations. These include laws and regulations governing air emissions, wastewater discharge and the storage and handling of chemicals and hazardous substances. Management believes that Advanced Circuits is in compliance, in all material respects, with applicable environmental and occupational health and safety laws and regulations. New requirements, more stringent application of existing requirements, or discovery of previously unknown environmental conditions may result in material environmental expenditures in the future. Advanced Circuits has been recognized three times for exemplary environmental compliance as it was awarded the Denver Metro Wastewater Reclamation District Gold Award for the seven of the last ten years.

Table of Contents

Employees

As of December 31, 2013, Advanced Circuits employed 519 persons. Of these employees, there were 59 in sales and marketing. None of Advanced Circuits' employees are subject to collective bargaining agreements. Advanced Circuits believes its relationship with its employees is good.

American Furniture

Overview

American Furniture, headquartered in Ecu, Mississippi, is a low cost manufacturer of upholstered furniture sold to major and mid-sized retailers. American Furniture operates in the promotional-to-moderate priced upholstered segment of the furniture industry, which is characterized by affordable prices, fresh designs and fast delivery to the retailers. American Furniture was founded in 1998 and focuses on three product categories: (i) stationary, (ii) motion (reclining sofas/loveseats) and (iii) recliners.

For the full fiscal years ended December 31, 2013, 2012 and 2011, American Furniture had net sales of approximately \$104.9 million, \$91.5 million and \$105.3 million, respectively, and operating income of \$0.2 million, and operating losses of \$1.5 million and \$35.2 million, respectively. American Furniture had total assets of \$43.8 million, \$32.3 million and \$30 million at December 31, 2013, 2012 and 2011, respectively. Net sales from American Furniture represented 10.6%, 10.3% and 17.4% of our consolidated net sales for the years ended December 31, 2013, 2012 and 2011, respectively.

For the year ended December 31, 2011 net sales at American Furniture declined \$31.6 million, which represents a 23% decline over 2010 sales. In addition, write downs to goodwill, other intangible assets and property, and equipment totaled \$27.8 million and \$38.8 million in the years 2011 and 2010, respectively. In all cases, the write downs were triggered by a significant deterioration in American Furniture's operations and profitability caused by the unprecedented drop in the promotional furniture market and demand for its product. The combination of increased unemployment, together with significant decreases in home purchases, availability of consumer credit and rising fuel costs has created a depressed market for promotional furniture sales over the last several years than has been experienced over the last two decades.

History of American Furniture

American Furniture was founded in 1998 with a focus on promotional upholstered furniture, offering a unique value proposition combining consistent high-quality, attractively priced products and quick delivery/service to its customers. AFM began operations with four assembly lines housed in a 60,000 sq. ft. facility. By 2002, American Furniture had achieved revenues in excess of \$120 million and grew operations into a 600,000 sq. ft. facility in Houlka, MS. In 2004, American Furniture was sold by its founder to a group of private investors who installed a new management structure and hired a new executive team and grew American Furniture's administrative infrastructure in order to build a solid foundation to support future growth. In 2005, American Furniture aggressively pursued Asian sourcing for fabrics and other assorted materials. Today American Furniture is a leading manufacturer of promotional upholstered furniture operating from an approximately 1.1 million sq. ft. manufacturing and warehouse facility.

During 2011, American Furniture implemented a revised standard costing system which required American Furniture to reclassify certain costs between cost of sales and selling, general and administrative expenses. The change in format consists of reclassifying the trucking fleet expenses from selling, general and administrative expenses into cost of sales, as well as re-classifying certain manufacturing related expenses included in rent, insurance, utilities and workers comp from selling, general and administrative costs to cost of sales. Management believes that the format of reporting cost of sales together with the revised standard costing system and the revaluation of standard costs allows management to react timely to changes in supply costs, product demand and overall price structure going forward, which in turn eliminated the accumulation of lower margin product and allowed for more advantageous product procurement and the proper utilization of available assets. In addition, American Furniture enlisted the assistance of an outside consulting firm in 2011 to assist them in right-sizing its operations in order to operate more efficiently and respond to the significantly changed promotional furniture marketplace. To that end, American Furniture has outsourced delivery and its trucking operations as well as sub-contracted its frame cutting process.

Table of Contents

We acquired a controlling interest in American Furniture on August 31, 2007.

Industry

AFM is a manufacturer of upholstered furniture serving the promotional segment of the U.S. furniture industry. Overall conditions for the furniture industry have been difficult over the past several years. New housing starts are down significantly and consumers continue to be faced with general economic uncertainty fueled by deteriorating consumer credit markets, rising fuel costs and lagging consumer confidence as a result of erratic financial markets. All of this has significantly impacted big ticket consumer purchases such as furniture over the last several years.

AFM participates exclusively in the promotional to moderate priced upholstered furniture industry. Within the U.S. residential retail furniture marketplace, products are typically positioned in the promotional, good, better, or best category. The scale of the categories is intended to reflect an increasing level of quality, appearance and corresponding price. At the wholesale level, the promotional to moderate priced segment of the upholstered furniture industry we believe accounts for over \$5.0 billion in sales. Promotional to moderate priced upholstered furniture manufacturers typically offer a limited range of products in a discrete number of styles and/or designs, allowing immediate delivery to retail customers at well-established retail price points. Specifically, promotional upholstered furniture is generally priced by product at the retail level from \$199 for recliners and up to \$1,500 for motion sectionals.

The popularity of promotional furniture is attributable to (i) the segment's consistent product quality (based on focused manufacturing of a few key furniture pieces), and (ii) its value pricing, which appeals to the broadest cross-section of the furniture consumers.

AFM competes exclusively in the promotional to moderate priced segment, selling upholstered furniture in both the stationary and motion categories. In the retail furniture landscape, promotional furniture can be a growing catalyst of floor traffic and sales volumes for mass market furniture retailers. The moderate category allows for adding additional floor space on current dealer floors with better margins. Recurring promotional programs have often become core to retailer strategies given its immediate availability to customers and just-in-time strategies employed within the industry which limit retailer inventory requirements.

Within the wholesale market, wholesale shipments from Asian suppliers, we believe, have grown steadily as a percent of total wholesale shipments. Asian upholstered imports have grown significantly in the past ten years. We believe their impact on AFM has been far less than the industry as a whole within the promotional upholstered furniture, due to the low price points and resulting shipping costs as a percent of a piece's total value.

Off-shore Imports

Furniture manufactured in Asia emerged as an important driver of the U.S. residential furniture market beginning in the mid-1990s. While off-shore manufacturers, particularly Chinese and Vietnamese manufacturers, have affected the entire industry, the import trend, has impacted different segments of the industry at varying levels.

Case-goods and metal furniture have proven to be more susceptible to Asian competition than upholstered furniture, due to the stack ability and assembly characteristics, resulting in efficient freight consolidation. Upholstered furniture cannot be broken down and shipped efficiently to the U.S. such that the resulting freight costs tend to outweigh the labor and material savings achieved through offshore manufacturing. As a result, domestic upholstered manufacturers have largely managed to compete effectively against Asian competitors when compared to other segments of the furniture industry. In addition, manufacturers in the promotional segment of the upholstered industry are even further insulated from offshore competition due not only to overall freight costs but also freight costs when compared to wholesale price of the product together with the prolonged lead-times to retailers and end customers in a market segment characterized by very short lead-times and immediate delivery to the end consumer.

Table of Contents

Retail price points in the promotional segment of the upholstered industry range from \$199 - \$1,500, whereas shipping costs from Asia on a per piece basis are generally in excess of \$100 per piece (\$3,000 - \$4,000) per standard 40 foot container not including domestic shipping and insurance costs.

Lead times also hinder Asian manufacturers' ability to effectively compete in the promotional upholstered industry. As mentioned previously, Retailers use promotional furniture to drive store traffic and provide immediate delivery to the end-user of value-priced, quality upholstered furniture products. AFM aims to ship customer orders on time following receipt of an order and has the ability to deliver product within a customer's requested ship date depending on the customer's location within the U.S. Asian manufacturers typically require at least 50 days (or 7-8 weeks depending on business days) from order receipt to customer delivery, resulting in a significant amount of increased inventory management and advertising planning in order to effectively source upholstered product from overseas manufacturers.

Products and Services

AFM manufactures two basic categories of promotional and moderate priced upholstered products, stationary and motion. Stationary products include sofas, loveseats and sectionals, these products accounted for approximately 68%, 72% and 75% of sales in fiscal 2013, 2012 and 2011, respectively. Motion products include single rocking recliner chairs, sofas with reclining end seats, loveseats with seats that rock together or separately and reclining sectionals with storage compartments. Motion and reclining products contributed approximately 28%, 27% and 23% of fiscal 2013, 2012 and 2011 gross sales, respectively. Beginning in 2005, AFM added a line of imported rugs and accent tables to its product mix to provide customers with complimentary accessory offerings to AFM's core furniture lines. For 2013, 2012 and 2011, accent tables and other miscellaneous revenue accounted for less than 2% of gross sales. AFM's core product offerings with average retail prices are summarized below:

25 styles of stationary sofas, loveseats and chairs - \$299 - \$599

10 styles of recliners - \$199 - \$399

5 styles of motion sofas - \$599 - \$899

6 styles of stationary sectionals - Up to \$999

1 style of motion sectional - \$999 - \$1,399

AFM's products utilize common components and frames with limited fabric options, allowing AFM to reproduce established styles at value prices. Since its inception, AFM has continuously introduced new styles which typically replace older designs and are primarily slight variations to existing products. AFM builds its products to stock and maintains adequate inventory levels to facilitate shipment to customers on time. AFM's quick-ship strategy allows customers to better manage inventory and product promotions, yet maintain the ability to provide immediate availability to retail customers, a key attribute within the promotional furniture segment of the furniture industry.

Product Development

AFM can re-engineer a new design, create a prototype and begin to solicit customer feedback within two weeks. AFM carefully controls its product line such that new styles typically replace older designs. As a result, AFM requires up to 120 days wind-down a discontinued line and beginning shipping truckload quantities of new designs to customers.

Manufacturing

AFM utilizes an assembly-line manufacturing process with a four day production cycle divided into four functions, cutting, sewing, backfill and upholstery. Employees are specialized by function and are compensated on a piece-rate basis. The limited number of styles and designs minimizes scheduling and line changes and each function is simplified by the use of common components. AFM uses one standard seat spring, one standard back spring and one standard cushion in each category of upholstery. AFM's piece-rate compensation plan and streamlined

Edgar Filing: Compass Diversified Holdings - Form 10-K

manufacturing process combine to give AFM a low cost structure. Prior to 2009, American Furniture utilized pre-assembled cut and sewn fabric kits for approximately 20% of its upholstered furniture. These fabric kits replace the cutting and sewing function in the manufacturing process. Over the past several years AFM has increased the use of these fabric kits and as of December 31, 2013 virtually all of the upholstered furniture that it manufactures used the imported cut and sewn fabric kit. The use of these fabric kits reduces the labor component related to the cutting and sewing process in-house. These fabric kits are imported from Asia. American Furniture also eliminated its in-house frame cutting operations in 2012 and currently 100% of the frames for upholstered furniture are cut by third party providers.

Table of Contents

AFM currently delivers its products through third-party freight service providers. Freight costs are generally paid by the customer, including fuel surcharges. AFM utilized third-party freight providers for approximately 80% of its customer shipments over the last three years compared to approximately 50% or lower in prior years. We estimate that this saved approximately \$1.0 million in 2010 and 2011 in overall freight costs when this strategy was first instituted. American Furniture eliminated its in-house trucking operations in 2012.

Competitive Strengths

Management believes that AFM is among the lowest-cost domestic manufacturers of promotional to moderate priced upholstered furniture. AFM maintains a competitive cost basis through an assembly-line production model and build-to-stock strategy. Specifically, AFM generates economies of scale through:

Long runs of a limited number of standardized frames;

The application of common components throughout the entire production line; and

A standard offering of only two to four fabric options per frame.

Management has aligned AFM's high-volume manufacturing strategy with a piece-rate incentive structure for its direct labor force. This structure drives workforce productivity. The incentive system also provides floor personnel with the opportunity to earn annual compensation at or above local standards, thereby facilitating AFM's recruiting and retention efforts.

AFM's efficient build-to-stock manufacturing operation facilitates AFM's strategy of offering its customers on-time shipment of product. In turn, AFM's customers are able to offer their retail customers quality, value-priced, upholstered furniture for immediate delivery upon the day of sale, while only maintaining limited quantities of product inventory.

AFM serves a diverse base of approximately 700 customers. Within its broader customer base, AFM specifically targets independent furniture retailers at the national, multi-regional and regional levels. AFM's value proposition and the ability to ship most products within their customers time frame, is highly valued by this segment of the marketplace that focuses broadly on demographic segments that demand immediate delivery of popular styles at competitive prices.

Barriers to Significant Asian Competition

The availability of low-cost Asian products has had a far-reaching impact on the broader home furnishings market in the United States over the past ten years, contrasted to manufacturers serving other segments. Until recently, AFM has had minimal exposure to off-shore competition due to the following:

AFM's efficient, low-cost production model;

Mass retailers' short lead-time demands and unwillingness to accept excess inventory risk; and

High costs (e.g., freight, damage, shrink) of shipping upholstered furniture direct from Asia.

Recently, AFM has begun to see more competition in the motion product category from imported Asian product. These products typically offer customers better value in terms of construction and price when compared to our motion product. AFM's margin for motion product has typically been less than stationary.

Table of Contents

Business Strategies

Increase profit with new and existing customers While AFM currently supplies many of the top furniture retailers, AFM believes it can further augment its customer base and is pursuing new business opportunities with selected national and regional furniture retailers, as well as in other channels, including Rent-To-Own (RTO) and mass merchandisers. In addition, many existing customers currently purchase only a portion of AFM s product line, representing an opportunity for AFM to increase sales to existing customers by augmenting customers entire promotional product line. In order to focus additional attention to major customers and expand product line sell-through to these customers, AFM added significant infrastructure to its sales and marketing organization since 2005, increasing its sales representative network while also subdividing sales territories to allow representatives to focus more closely on the expansion of existing relationships and the addition of new customers.

Product development AFM s merchandising strategy focuses on satisfying the changing needs of retailers and consumers in a manner that meets AFM s production strategy. AFM s management and sales staff monitor the furniture market to identify new trends and popular styles at higher price points. AFM subsequently ensures that it can cost effectively replicate a new style with standardized components and limited cover options, after which AFM will build a prototype to determine if the product can be reproduced at acceptable margin levels.

Pursue cost savings initiatives Aggressively pursue expense reduction in the manufacturing process and overhead areas, cost cutting programs and cash preservation initiatives throughout all parts of its business.

Limit the number of SKUs American Furniture manufactures a limited number of SKUs in three categories: stationary, recliners and motion. The strategy has been to continually manage the number of groups or styles in each category so that American Furniture can mitigate the costs associated with slow moving and outdated styles.

Revise kit purchasing American Furniture, with the help of an outside consultant, has revised the manner in which it orders fabric kits to provide a more efficient flow of kits and reduce the possibility of obsolescence. A process has been developed taking into account rate of sale, sales order rate, customer projections, current inventory levels, delivery lead times and safety stock for each individual SKU. A review is completed no less than weekly by SKU and orders are placed accordingly. Managing this process ties kit acquisition more closely to actual production needs and either increases or decreases the quantity of kits based on demand for the particular SKU.

Monetize excess stock During 2013, American Furniture aggressively moved to reduce excess levels of finished goods and raw materials. This has been done through a series of product promotions that have been successful while not impairing the sales of the current product line. American Furniture developed a new system to monitor each category on an ongoing basis to more quickly identify potential slow-down in specific SKU activity. This process has been integrated with the kit purchasing procedure mentioned above.

Customers

AFM serves a base of approximately 700 customers comprised of retailers and distributors at the regional, multi-regional and national levels. In 2013, 2012 and 2011, AFM s top 20 customers accounted for approximately 70%, 67% and 66%, respectively, of AFM s total sales.

Table of Contents

Sales and Marketing

AFM has a sales force consisting of independent, outside representatives that exclusively sell AFM's products in an assigned geographic territory of up to six states. Sales representatives are compensated on a 100% commission basis. AFM maintains two permanent showrooms in High Point, NC and Las Vegas, NV, host cities for furniture industry trade shows (High Point in April and October and Las Vegas in January and July).

American Furniture's business is seasonal. Net sales have historically been higher in the period of January through April of each fiscal year. We believe this seasonality is due in part to consumer demand increasing resulting from income tax refunds. Substantially all revenue is derived from sales within the United States.

Marketing at the retail level is typically handled by AFM's customers. AFM does not advertise specific products on its own, but provides product information and pictures for retailers to include in newspaper and various insert advertisements. AFM's products are typically included in retailers' recurring promotional programs as the products drive floor traffic and sales volume due to low price points.

American Furniture had approximately \$11.2 million and \$5.4 million in firm backlog orders at December 31, 2013 and 2012, respectively.

Competition

AFM competes with selected large national manufacturers that produce and sell promotional products. However, promotional upholstered furniture often represents only a small percentage of revenue for these participants. Also, large diversified manufacturers tend not to place specific emphasis on developing quick-ship capabilities specifically for their promotional offerings. Therefore, AFM competes primarily with several smaller manufacturers that are typically thinly-capitalized, family owned businesses that we believe do not have the capacity, manufacturing capabilities, sourcing expertise or access to capital in order to build critical production volumes. Competition within the segment is largely based on value and delivery lead times, as opposed to product differentiation, providing AFM and its quick-ship capabilities with a key competitive advantage within the industry. AFM's primary competitors include United Furniture Industries, Albany Industries and Hughes Furniture, Ashley Furniture and Affordable Furniture.

Suppliers

A majority of AFM's domestic suppliers are located near AFM due to a concentration of furniture manufacturers in northeastern Mississippi. Several of AFM's key raw materials, including wood and polyfoam, are sourced locally with alternative suppliers available at competitive prices, if necessary. In order to continually manage material costs, AFM actively sources products from Asia. AFM imports legs, show wood, accent tables and the majority of its fabric from China-based suppliers. The prices charged by manufacturers of products such as petro-chemicals and wire rod, which are the primary materials purchased by our suppliers of foam and drawn wire effect the ongoing cost of our raw materials. Raw material cost as a percentage of sales was approximately 67% in 2013 and 2012 and 69% in 2011, respectively.

Regulatory Environment

AFM's manufacturing operations, facilities and operations are subject to evolving federal, state and local environmental and occupational health and safety laws and regulations. Such laws and regulations govern air emissions, wastewater discharge and the storage and handling of chemicals and hazardous substances. AFM believes that it is in compliance, in all material respects, with applicable environmental and occupational health and safety laws and regulations. New requirements, more stringent application of existing requirements, or discovery of previously unknown environmental conditions could result in material environmental expenditures in the future.

Employees

As of December 31, 2013, American Furniture employed 565 persons. Of these employees, 491 were in production, shipping and purchasing with the remainder serving in executive, administrative office and other capacities. None of AFM's employees are subject to collective bargaining agreements. We believe that AFM's relationship with its employees is good.

Table of Contents

Arnold

Overview

Founded in 1895 and now headquartered in Rochester, New York, Arnold Magnetic Technologies Corporation is a manufacturer of engineered, application specific magnet solutions. Arnold manufactures a wide range of permanent magnets and precision magnetic assemblies with facilities in the United States, the United Kingdom, Switzerland and China. Arnold has hundreds of customers in its primary markets including aerospace and defense, consumer, industrial, medical, automotive as well as oil and gas exploration. Arnold is the largest and, we believe, most technically advanced U.S. manufacturer of engineered magnets. Arnold is one of two domestic producers to design, engineer and manufacture rare earth magnetic solutions. Arnold serves customers and generates revenues via three business units:

PMAG Permanent Magnet and Assemblies Group- High performance magnets and assemblies for precision motors/generators, Hall Effect sensor and beam focusing applications. PMAG also manufactures assemblies for the reprographic industry used in printing and copying systems.

Precision Thin Metals - Ultra thin gauge metal strip and foil products utilizing magnetic and non-magnetic alloys

Flexmag - Flexible bonded magnets for specialty advertising, industrial and medical applications.

Arnold operates a 70,000 sq. ft. manufacturing assembly and distribution facility in Rochester, New York with nine additional facilities worldwide in countries including the UK, Switzerland and China. Arnold employs a total of approximately 730 people.

For the fiscal year ended December 31, 2013 and 2012, (from date of acquisition), Arnold had net sales of approximately \$126.6 million and \$104.2 million, respectively, with operating income of \$8.9 million in 2013 and operating loss of \$0.5 million in 2012. Arnold had total assets of \$156.4 million and \$155.9 million at December 31, 2013 and 2012, respectively. Net sales from Arnold represented 12.8% of our consolidated net sales for the year ended December 31, 2013 and 11.8% of our consolidated net sales from acquisition date to December 31, 2012.

History of Arnold

Arnold was founded in 1895 as the Arnold Electric Power Station Company. Arnold began producing AlNiCo permanent magnets in its Marengo, Illinois facility in the mid-1930s. In 1946, Allegheny Ludlum Steel Corporation (Allegheny) purchased Arnold, and over the next few years began production of several additional magnetic product lines under license agreement with the Western Electric Company. In 1970, Arnold acquired Ogallala Electronics, which manufactured high power coils and electromagnets.

SPS Technologies (SPS), at the time a publicly traded company, purchased Arnold Engineering Company from Allegheny in 1986. Under SPS, Arnold made a series of acquisitions and partnerships to expand its portfolio and geographic reach. At the end of 2003, Precision Castparts, also a publicly traded company acquired SPS. In January 2005, Audax, a Boston-based private equity firm acquired Arnold from Precision Castparts.

In February 2007, Arnold Magnetic Technologies completed the acquisition of Precision Magnetics with operations in Sheffield, England; Lupfig, Switzerland; and Wayne, New Jersey. The Wayne, New Jersey facility was relocated to Rochester, NY later that year. In addition, Arnold's Lupfig, Switzerland operation is a joint venture partner with a Chinese rare earth producer. The joint venture manufactures RECOM[®] Samarium Cobalt blocks for the Asian market.

We purchased a majority interest in Arnold on March 5, 2012.

Table of Contents

Industry

Permanent Magnets

There exists a broad range of permanent magnets which include Rare Earth Magnets and magnets made from specialty magnetic alloys. Magnets produced from these materials may be sliced, ground, coated and magnetized to customer requirements. Those industry players with the broadest portfolio of these magnets, such as Arnold, maintain a significant competitive advantage over competitors as they are able to offer one-stop shop capabilities to customers.

Rare Earth Magnets

Samarium Cobalt (SmCo) SmCo magnets are typically used in critical applications that require corrosion resistance or high temperature stability, such as motors, generators, actuators and sensors. Arnold markets its SmCo magnets under the trade name of RECOMA[®].

Neodymium (Neo) Neo magnets offer the highest magnetic energy level of any material in the market. Applications include motors and generators, VCMs, magnetic resonance imaging, sensors and loudspeakers.

Other Permanent Magnet Types

AlNiCo The AlNiCo family of magnets remains a preferred material for many mission critical applications. Its favorable linear temperature characteristics, high magnetic flux density and good corrosion resistance are ideally suited for use in applications requiring magnetic stability.

Hard Ferrite Hard ferrite (ceramic) magnets were developed as a low cost alternative to metallic magnets (steel and AlNiCo). Although they exhibit lower energy when compared to other materials available today and are relatively brittle, ferrite magnets have gained acceptance due to their low price per magnetic output.

Injection Molded Injection molded magnets are a composite of various types of resin and magnetic powders. The physical and magnetic properties of the product depend on the raw materials, but are generally lower in magnetic strength and resemble plastics in their physical properties. However, a major benefit of the injection molding process is that magnet material can be injection or over-molded, eliminating subsequent manufacturing steps.

Magnetic Assemblies- Arnold offers complex, customized value added magnetic assemblies. These assemblies are used in devices such as motors, generators, beam focusing arrays, sensors, and solenoid actuators. Magnetic assembly production capabilities include magnet fabrication, machining, encapsulation or sleeving, balancing, and field mapping.

Precision Strip and Foil

Precision rolled thin metal foil products are manufactured from a wide range of materials for use in applications such as transformers, motor laminations, honeycomb structures, shielding, and composite structures. These products are commonly found in security tags, medical implants, aerospace structures, batteries and speaker domes. Arnold has the expertise and capability to roll, anneal, slit and coat a wide range of materials to extremely thin gauges (2.5 microns) and exacting tolerances.

Flexible Magnets

Flexible magnet products span the range of applications from advertising (refrigerator magnets) to medical applications (surgical drapes) to sealing and holding applications (door gaskets).

Products and Services

PMAG

Arnold's Precision Magnets and Assemblies (PMAG) segment is a leading global manufacturer of precision magnetic assemblies and high-performance magnets. The segment's products include tight tolerance assemblies consisting of many dozens of components and employing RECOMA® SmCo, Neo, and AlNiCo magnets. These products are sold to a wide range of industries including aerospace and defense, alternative energy (hybrids/wind), automotive, medical, oil and gas, and general industrial.

PMAG is Arnold's largest business unit representing approximately 75% of Arnold sales on an annualized basis (including Reprographics) with a global footprint including manufacturing facilities in the U.S., U.K., Switzerland, and China.

Table of Contents

PMAG Products and Applications:

High precision magnetic rotors for use in electric motors and generators. Typically used in demanding applications such as aerospace, oil and gas exploration, energy recovery systems and under the hood automotive

Sealed pump couplings

Beam focusing assemblies such as traveling wave tubes

Oil & Gas NMR tools as well as pipeline inspection and down hole power generation

Hall affect sensor systems

Arnold's reprographics unit, which is part of the PMAG segment, produces systems and components for copier systems. The business unit's state-of-the-art, high-volume precision magnetic assembly facility produces over 150,000 assemblies per year. The reprographics unit utilizes components produced by the Flexmag segment.

Reprographics products and applications:

Complex, multi-component, high-accuracy copier assemblies

Toner rolls

Toner and fuser assemblies

Precision Thin Metals

Arnold's precision thin metals segment manufactures precision thin strip and foil products from an array of materials and represents approximately 5% of Arnold sales on an annualized basis. The precision thin metals segment serves the aerospace & defense, power transmission, alternative energy (hybrids, wind, battery, solar), medical, security, and general industrial end-markets. With top-of-the-line equipment (Sendzimir mills) and superior engineering, precision thin metals has developed unique processing capabilities that allow it to produce foils and strip with precision and quality that are unmatched in the industry (down to 1/10th thickness of a human hair). In addition, the segment's facility is capable of increasing production from current levels with its existing equipment and is, we believe, well-positioned to realize future growth with little incremental investment required.

Precision Thin Metals Products and Applications:

Electrical steels for hybrid propulsion systems, electric motors, and micro turbines

Security and product ID tags

Edgar Filing: Compass Diversified Holdings - Form 10-K

Honeycomb structures for aerospace applications

Irradiation windows

Batteries

Military countermeasures

Flexmag

Arnold is one of two North American manufacturers of flexible rubber magnets for specialty advertising, medical, and reprographic applications. Flexmag represents approximately 20% of Arnold sales on an annualized basis. It primarily sells its products to specialty advertisers and original equipment manufacturers. With highly automated manufacturing processes, Flexmag can accommodate customer's required short lead times. Flexmag benefits from a loyal customer base and significant barriers to entry in the industry. Flexmag's success is driven by superior customer service, and proprietary formulations offering enhanced product performance.

Flexmag products and applications:

Extruded and calendared flexible rubber magnets with optional laminated printable substrates

Retail displays

Seals and enclosures

Signage for various advertising and promotions

Table of Contents

Competitive Strengths

Competitive Landscape

The specialty magnets industry is highly fragmented, creating a competitive landscape with a variety of magnetic component manufacturers. However, few have the breadth of capabilities that Arnold possesses. Manufacturers compete on the basis of technical innovation, co-development capabilities, time-to-market, quality, geographic reach and total cost of ownership. Industry competitors relevant to Arnold's served markets range from large multinational manufacturers to small, regional participants. Given these dynamics, we believe the industry will likely favor players that are able to achieve vertical integration and a diversification of offerings across a breadth of products along with magnet engineering and design expertise.

Barriers to Entry

Low Substitution Risk Arnold's solutions are typically specified into its customers' program designs through a co-development and qualification process that often takes 6-18 months. Arnold's customers are typically contractors and component manufacturers whose products are integrated into end-customers' applications. The high cost of failure, relatively low proportionate cost of magnets to the final product, sometimes lengthy testing and qualification process, and substantial upfront co-engineering investment required, represent significant barriers to customers changing solution providers such as Arnold.

Equipment and Processing Arnold's existing base of production equipment has a significant estimated replacement cost. A new entrant could require as much as 2-3 years of lead time to match the process performance requirements, customization of equipment and material formulations necessary to effectively compete in the specialty magnet industry. Further, given the program nature of a majority of Arnold's sales, management estimates that it could take 5-10 years to build a sufficient book of business and base of institutional knowledge to generate positive cash flow out of a new manufacturing plant.

Business Strategies

Engineering and Product Development

Arnold's engineers work closely with the customer to co-develop a product or process to provide system solutions, representing a significant competitive advantage. Arnold's engineering expertise is leveraged by the state-of-the-art Technology Center working together with the various business units located in North America, Europe and Asia Pacific. This cooperative engineering effort allows Arnold to support customers and projects on a global basis. Arnold's engineers work with customers on a global basis to optimize designs, guide material choices, and create magnetic models resulting in Arnold's products being specified into customer designs.

Arnold has a talented and experienced engineering staff of design and application experts, quality personnel and technicians. Included in this team are engineers with backgrounds in materials science, physics, and metallurgical engineering. Other members of the team bring backgrounds in ceramics, mechanical engineering, chemical engineering and electrical engineering.

Arnold continues to be an industry leader with regard to new product formulations and innovations. As evidence of this, Arnold currently relies on a deep portfolio of trade secrets and internal intellectual property. Arnold continuously endeavors to introduce magnet solutions that exceed the performance of current offerings and meet customer design specifications.

Growth in Arnold's business is primarily focused in three areas:

- (i) Growing market share in existing end-markets and geographies
- (ii) Developing new products and technologies
- (iii) Completing opportunistic acquisitions

Existing End-Markets and Geographies

Oil & Gas

Arnold currently provides magnets and precision assemblies for use in oil and gas exploration and production, applications which typically require exceptional collaboration and co-development with its customers. Arnold supplies products used in applications such as a new oil well shutoff valve, a new down-hole logging while drilling tool, and a down-hole magnetic transfer coupling. Other applications for which Arnold is actively involved include pipeline inspection, wireless tomography tools, and chip collection.

Table of Contents

Power Transmission

Arnold's Precision Thin Metals segment supplies grain-oriented silicon steel produced with proprietary methods for use in transformers and inductors. These cores allow for the production of very efficient transformers and inductors while minimizing size. In addition, Arnold's magnet solutions can be found in advanced automatic circuit re-closer solutions that substantially reduce the stress on system components on the grid. Arnold's solutions are also present in new power storage systems. The permanent magnet bearings used in new designs improve the efficiency of the flywheel energy storage system.

Automotive

In the automotive sector, Arnold is selling magnets and magnetic assemblies primarily to Tier 1 and 2 companies. It is estimated that the current automobile contains over 50 magnetic systems, and this number is expected to grow due to vehicle electrification initiatives in order to meet increasing fuel efficiency standards. Typical applications include magnets for Hall Effect sensors that are used in braking, passenger restraint, and steering and engine control systems. Emerging magnetic applications include electric traction drives, regenerative braking systems, starter generators, and electric turbo charging. The auto industry continues to adopt increasingly sophisticated technology to reduce vehicle weight and improve fuel efficiency. As much of this technology utilizes magnetic systems, Arnold expects to benefit from this trend.

Aerospace and Defense

In the aerospace and defense sector, Arnold is selling magnets, magnetic assemblies and ultra-thin foil solutions. Specifically, in the aerospace industry, Arnold's assemblies have been designed into products, which enables Arnold to benefit from the market growth and a healthy flow of business based on current airframe orders. Through its OEM customers, essentially all new commercial aircraft placed in service contain assemblies produced by Arnold. Arnold's sales to large aerospace and defense manufacturers includes magnetic assemblies used in applications such as motors and generators, actuators, trigger mechanisms, and guidance systems, as well as magnets for these and other uses. In addition it sells its ultra-thin foil for use in military countermeasures, honeycomb structures, brazing alloys, and motor laminations.

General Industrial

Within the industrial sector Arnold provides magnet assemblies as well as magnets for custom made motor systems. These include stepper motors, pick and place robotic systems, and new designs that are increasingly being required by regulation to meet energy efficiency standards. An example is a motor utilizing Arnold's bonded magnets for use in commercial refrigeration systems. Arnold also produces magnetic couplings for seal-less pumps used in chemical and oil & gas applications that allow chemical companies to meet environmental requirements.

Medical

Within the medical sector, Arnold provides magnetic assemblies, magnets, flexible magnets, and ultrathin foils. Its magnet assemblies and magnets are critical parts of motor systems for dental instruments as well as saws and grinders. Magnet assemblies are also provided for skin expansion systems, shunt valves, and position sensors. In addition, its Precision Thin Metals business unit is providing a specialty alloy for advanced breast cancer treatment.

New Products & Technologies

Flexcoat EZ is a patent pending technology launched in April 2010. The product was engineered to eliminate the issues associated with the conventional flexible magnetic product laminated with a printable surface. The solution is a printable coating that is applied to the magnet, which replaces substrates such as vinyl and paper that are currently adhered to the base magnet material. This results in a printed magnet that is now completely recyclable and is easier to process.

Research and Development

Arnold has a core research and development team, which has collectively over 30 years of combined industry experience. In addition to the core engineering group, a large number of other Arnold staff members assigned to the business units contribute to the research and development effort at various stages. Product development also includes collaborating with customers and field testing. This feedback helps ensure products will meet Arnold's demanding standards of excellence as well as the constantly changing needs of end users. Arnold's research and development activities are supported by state-of-the-art engineering software design tools, integrated manufacturing facilities and a performance testing center equipped to ensure product safety, durability and superior performance. Arnold spent approximately \$0.9 million and \$0.2 million in research and development activities in each of the years ended December 31, 2013 and 2012.

Table of Contents**Customers**

Arnold's focus on customer service and product quality has resulted in a broad base of customers in a variety of end markets. Products are used in applications such as general industrial, reprographic systems, aerospace & defense, advertising and promotion, consumer and appliance, energy, automotive and medical.

The following table sets forth management's estimate of Arnold's approximate customer breakdown by industry sector for the fiscal year ended December 31, 2013, 2012 and 2011:

Industry Sector	2013 Customer Distribution	2012 Customer Distribution	2011 Customer Distribution
General industrial	30%	30%	25%
Aerospace and defense	18%	15%	15%
Advertising and promotion	13%	12%	14%
Consumer and appliance	2%	5%	5%
Energy	5%	7%	5%
Automotive	8%	4%	4%
Medical	2%	3%	4%
Reprographic	19%	21%	26%
All Other Sectors Combined	3%	3%	2%
Total	100%	100%	100%

Arnold has a large and diverse, blue-chip customer base. No customer represented greater than 10% of Arnold's annual revenue in 2013. Sales to Arnold's top ten customers were 33%, 31% and 35% of total sales for the years ended December 31, 2013, 2012 and 2011, respectively.

Competition

Management believes the following companies represent Arnold's top competitors:

Thomas & Skinner

Magnum Magnetics

Electron Energy

Vacuumschmelze Gruner, Germany-based

Sales and Marketing

PMAG - Arnold's PMAG segment supports a global team of direct sales and marketing professionals and critical design and application engineers. The PMAG sales force is organized for regional coverage with a focus on sales in U.S., Europe, and South East Asia. Arnold serves over 850 active customers globally. As the majority of revenues are project based in the PMAG business unit, technical sales are critical to the segment's success. Arnold's highly-qualified application engineers are often integrated into its customers' product design, planning, and implementation phases, offering the most cost effective solution for demanding clients. The resulting intimate customer relationships yield a high close rate, with revenue achieved primarily after the prototype phase.

Edgar Filing: Compass Diversified Holdings - Form 10-K

Precision Thin Metals Similar to Arnold's PMAG segment, the vast majority of Precision Thin Metals' sales are technically driven engineered solutions. These teams communicate closely in order to take advantage of potential cross-selling opportunities. Approximately 70% of sales are domestic, with the balance of sales to Western Europe.

Flexmag Products - The Flexmag business segment services over 650 customers globally. Its sales force is comprised of seven total sales professionals and supported by seven design and application engineers. This segment is primarily book/bill and has limited revenue subject to long-term purchase commitments.

Table of Contents

The following table sets forth Arnold's net sales by geographic location for the fiscal years ended December 31, 2013, 2012 and 2011:

Geographic location	2013	2012	2011
North America	54%	56%	55%
Europe	34%	34%	35%
Asia Pacific	12%	8%	8%
All Other Locations Combined	0%	2%	2%
Total	100%	100%	100%

Arnold had firm backlog orders totaling approximately \$35 million at December 31, 2013 and 2012.

Suppliers

Raw materials utilized by Arnold include nickel and cobalt, stainless steel shafts, Inconel sleeves, adhesives, laminates, aluminum extrusions and binders. Although Arnold considers its relationships with vendors to be strong, Arnold's management team also maintains a variety of alternative sources of comparable quality, quantity and price. The management team therefore believes that it is not dependent upon any single vendor to meet its sourcing needs. Arnold is generally able to pass through material costs to its customers and believes that in the event of significant price increases by vendors that it could pass the increases to its customers.

Intellectual Property

Arnold currently relies on a deep portfolio of trade secrets and internal intellectual property.

Patents

Arnold currently has thirteen patents and seven in process; over half of the patents were granted in the U.S. with the remaining patents granted in European countries such as Germany, Great Britain, France and the Netherlands. Ten of the patents are related to methods of making magnetic strips. In 2004, Arnold was granted a patent related to a thermally-stable, high-temperature, SmCo molding compound. The most recent pending patents are related to the methods of production involving flexible magnets having a printable surface as well as shaped field magnets

Trademarks

Arnold currently has 86 trademarks, 12 of which are in the U.S. The most notable trademarked items are the following: RECOMA, PLASTIFORM, FLEXMAG & ARNOLD. Application dates for various trademarks date back to as early as 1961.

Regulatory Environment

Arnold's domestic manufacturing and assembly operations and its facilities are subject to evolving Federal, state and local environmental and occupational health and safety laws and regulations. These include laws and regulations governing air emissions, wastewater discharge and the storage and handling of chemicals and hazardous substances. Arnold's foreign manufacturing and assembly operations are also subject to local environmental and occupational health and safety laws and regulations. Management believes that Arnold is in compliance, in all material respects, with applicable environmental and occupational health and safety laws and regulations. New requirements, more stringent application of existing requirements, or discovery of previously unknown environmental conditions could result in material environmental expenditures in the future.

Arnold is a major producer of both Samarium Cobalt permanent magnets under its brand name RECOMA® and Alnico (in both cast and sintered forms). Both materials from Arnold meet the current Berry Amendment or Defense Acquisition Regulations Systems (DFARS) requirements per clauses 252.225.7014 further described under 10 U.S.C. 2533b. This provision covers the protection of strategic materials critical to national security. These magnet types are considered specialty metals under these regulations.

Table of Contents

Employees

Arnold is led by a capable management team of industry veterans that possess a balanced combination of industry experience and operational expertise. The current senior management team has approximately 100 years of cumulative experience with an average tenure of approximately 16 years at Arnold. Current management has implemented numerous operational, strategic, and financial initiatives over the past several years, including almost 100 unique lean initiatives and kaizen events.

Arnold employs approximately 730 hourly and salaried employees located throughout North America, Europe and Asia. Arnold's employees are compensated at levels commensurate with industry standards, based on their respective position and job grade.

Arnold's workforce is non-union except for approximately 66 hourly employees at its Marengo, Illinois facilities, which are represented by the International Association of Machinists (IAM). Arnold enjoys good labor relations with its employees and union and has a three year contract in place with the IAM, which will expire in June of 2016.

Tridien

Overview

Tridien, headquartered in Coral Springs, Florida, is a leading designer and manufacturer of powered and non-powered medical therapeutic support surfaces and patient positioning devices serving the acute care, long-term care and home health care markets. Tridien is one of the nation's leading designers and manufacturers of specialty therapeutic support surfaces with manufacturing operations in multiple locations to better serve a national customer base.

Tridien, together with its subsidiary companies, provides customers the opportunity to source leading surface technologies from the designer and manufacturer.

Tridien develops products both independently and in partnership with large distribution intermediaries. Medical distribution companies then sell or rent the therapeutic support surfaces, sometimes in conjunction with bed frames and accessories to one of three end markets: (i) acute care, (ii) long term care and (iii) home health care. The level of sophistication largely varies for each product, as some patients require simple foam mattresses (non-powered support surfaces) while others may require electronically controlled, low air loss, lateral rotation, pulmonary therapy or alternating pressure surfaces (powered support surfaces). The design, engineering and manufacturing of all products are completed in-house (with the exception of a select group of products, which are manufactured in Taiwan) and are FDA compliant.

For the fiscal years ended December 31, 2013, 2012 and 2011, Tridien had net sales of approximately \$60.1 million, \$55.9 million and \$55.9 million, respectively, and an operating loss of \$10.2 million in 2013 and operating income of \$3.7 million and \$5.0 million for the years ended December 31, 2012 and 2011, respectively. Tridien had total assets of \$39.2 million, \$44.5 million and \$42.8 million at December 31, 2013, 2012 and 2011, respectively. Net sales from Tridien represented 6.1%, 6.3% and 9.2% of our consolidated net sales for fiscal years 2013, 2012 and 2011, respectively.

During the second quarter of 2013, one of Tridien's largest customers lost a large contract program that was being serviced substantially with Tridien product. The expected lost sales and net income were significant enough to trigger an interim goodwill and indefinite-lived asset impairment analysis. The result of these analyses supported the carrying value of goodwill but indicated that sales of product, reliant on trade names, could not fully support the carrying value of Tridien's trade names. As such we wrote down the value of the trade names by \$0.9 million to a carrying value of approximately \$0.6 million at that time. At December 31, 2013, further revenue decreases together with a revised 2014 forecast that indicated little to no growth prompted an additional interim impairment analysis as of December 31, 2013. The result of the year end goodwill impairment analysis (step 1) indicated that goodwill was impaired. Further testing (step 2) resulted in the following; (i) goodwill was written down \$11.5 million to a balance of \$16.8 million; (ii) trade names were written down \$0.4 million to a balance of \$0.2 million

Table of Contents

and; (iii) technology assets were written down \$0.1 million to a balance of \$0.8 million. The result of the Step 2 analyses is preliminary and based on various selected market data and comparable company's results. To the extent that the final analysis contains revised and/or updated assumptions the impairment charge will change.

History

Tridien was initially formed in February 2006 by CGI and Hollywood Capital, Inc., a private investment management firm led by Tridien's former Chief Executive Officer, to acquire AMF and SenTech, located in Corona, CA and Coral Springs, FL, respectively. AMF Support Surfaces, Inc. is a leading manufacturer of non-powered mattress systems, seating cushions and patient positioning devices. SenTech is a leading designer and manufacturer of advanced electronically controlled, powered, alternating pressure, pulmonary therapy, low air loss and lateral rotation specialty support surfaces for the wound care industry. Prior to its acquisition, SenTech had established a premium brand as a result of its proprietary technologies, in the less price sensitive therapeutic market while AMF competed primarily in the preventive care market.

On October 5, 2006, Tridien acquired the patient positioning device business of Anatomic Concepts. The acquired operations were merged into Tridien's operations. Anatomic is a leading supplier of operating suite patient positioning devices and support surfaces focused on the price sensitive long term care and home healthcare markets.

On June 27, 2007, Tridien purchased PrimaTech, a lower price-point distributor of powered medical support surfaces to the long term care and home healthcare markets. PrimaTech's products are predominately designed in the U.S. and manufactured pursuant to a manufacturing agreement with an FDA registered manufacturing partner located in Taiwan.

In October 2009, Tridien and Hollywood Capital, Inc. terminated their management services agreement which provided for, among other things, two principals of Hollywood Capital, Inc., resigning from their roles of Chief Executive Officer and Chief Financial Officer of Tridien. Upon termination of the agreement, Tridien appointed a new Chief Executive Officer and a new Chief Financial Officer.

We purchased a controlling interest in Tridien from CGI on August 1, 2006.

Industry

The medical support surfaces industry is fragmented and comprised of many small participants and niche manufacturers. Tridien's consolidation platform allows customers to source all leading support surface technologies for the acute care, long term care and home health care from a single source. Tridien is a vertically integrated company with engineering, design and research, manufacturing and support performed in house to quickly bring new, innovative products and technologies to market while maintaining high quality standards in its manufacturing process.

Immobility caused by injury, old age, chronic illness or obesity is the main cause for the development of pressure ulcers. In these cases, the person lying in the same position for a long period of time puts pressure on the bony prominence of the body surface. This pressure, if continued for a sustained period, can close blood capillaries that provide oxygen and nutrition to the skin. Over a period of time, these cells deprived of oxygen, begin to break down and form sores. In addition to constant or excessive pressure, other contributing factors to the development of pressure ulcers include heat, moisture, friction and sheer, or pull on the skin due to the underlying fabric.

The prevalence rate of pressure ulcers in acute care facilities has been seen as high as 34%, with costs of treatment as high as \$70,000 per ulcer, causing an estimated burden of an additional 22 million Medicare hospital days. Further it has been reported that another 2% to 28% of all nursing home patients suffer from pressure ulcers. We believe that providing the right therapeutic support surfaces is a necessary intervention for these ulcers. Management believes the need for medical support surfaces will continue to grow due to several favorable demographic and industry trends including the increasing incidence of obesity in the United States, increasing life expectancies and an increasing emphasis on prevention of pressure ulcers by hospitals and long term care facilities.

Table of Contents

According to the Centers for Disease Control and Prevention, between the years 1980 and 2000, obesity rates more than doubled among adults in the United States. Studies have shown that this increase in obesity has been a key factor in rising medical costs over the last 15 years. According to one study done at Emory University, increases in obesity rates have accounted for 27% of the increase in health care spending between 1987 and 2001. As an individual's weight increases, so too does the probability that the individual will become immobile and, according to studies performed at the University of North Carolina, greater than 40% of obese adults aged 54 to 73 were at least partially immobile. As individuals become less mobile, they are more likely to require either preventative mattresses to better disperse weight and reduce pressure areas or therapeutic mattresses to shift weight and pressure. Similar to how obesity increases the occurrence of immobility, so too does an aging society. As life expectancy expands in the U.S. due to improved health care and nutrition, so too does the probability that an individual will be immobile for a portion of their lives. In addition, as individual's age, skin becomes more susceptible to breakdown increasing the likelihood of developing pressure ulcers.

Beyond favorable demographic trends, Tridien's management believes healthcare institutions are placing an increased emphasis on the prevention of pressure ulcers. According to Medicare guidelines, hospitals are no longer able to be reimbursed for the treatment of in-house acquired pressure ulcers, resulting in continued focus by hospitals in preventing and treating such wounds. The end result is that if an at-risk patient develops pressure ulcers while at the hospital; the hospital is required to bear the cost of treating that condition. As a result of increasing litigation and the high cost of healing pressure ulcers, healthcare institutions have focused on increasing the care process to prevent pressure ulcer development for which use of pressure relieving equipment is an integral facet. Although some advanced pressure relieving equipment offerings employ key differentiated technologies, other less advanced offerings use more basic technologies. Reduced reimbursement rates from healthcare reform combined with increased imports from low cost global competitors have accelerated commoditization and pricing pressures in the less advanced categories and in some cases a migration towards the less advanced products.

Products and Services

Specialty beds, mattress replacements and mattress overlays (i.e. therapeutic surfaces) are the primary products currently available for pressure relief and pressure reduction to treat and prevent decubitus ulcers. The market for specialty beds and therapeutic surfaces include the acute care centers, long-term care centers, nursing home centers and home healthcare settings. Medical therapeutic surfaces are designed to have preventative and/or therapeutic uses. The basic product categories are as follows:

Powered Support Surfaces Mattresses which can be used for therapy or prevention and are typically manufactured using an electronic power source with air cylinders or a combination of air cylinders and foam and provide Alternating Pressure, Low Air Loss, or Lateral Rotation. Alternating Pressure Systems are designed to inflate alternate cylinders while contiguous cylinders deflate in an alternating pattern. The alternating inflation and deflation prevents sustained pressure on an area of skin by shifting pressure from one area to another. This type of therapy provides movement under the patient's skin to eliminate both excessive and constant pressure, the leading cause of pressure ulcers. The powered control unit provides automatic changes in the distribution of air pressure. Tridien's Alternating Pressure Systems in the SenTech line incorporate its intellectual property in the way these automatic changes take place. This patented technology allows for a more comfortable surface with aggressive therapeutic alternating pressure. Another typical type of powered surface is Lateral Rotation which can aid in laterally turning a patient to reduce risks associated with fluid building up in a patient's lungs. A feature often found in Powered Surfaces is Low Air Loss that allows air to flow from the mattress to address the moisture and temperature environment on the patient's skin, contributing factors to pressure ulcers. Tridien currently produces patented designs for the performance of both Alternating Pressure and Low Air Loss mattress systems which management believes provides the optimum healing therapy for the patient. Powered support surfaces are typically used in acute care settings and when more aggressive therapy is needed. Powered Support Surfaces represented approximately 21.4% in 2013, 18.7% of net sales in 2012 and 19.6% of net sales in 2011.

Table of Contents

Non-Powered Support Surfaces Consists of mattresses which have no powered elements. Their support material can be composed of foam, air, water, gel or a combination of these. In the case of water, air or gel materials, they are held in place with containment bladders. Non-powered mattress replacement systems help redistribute a patient's body weight to lessen forces on pressure points by envelopment into the surface. These products address the excessive pressure under a patient, but do not address the constant pressure applied to an area. Non-powered surfaces are generally used for prevention rather than treatment and currently comprise the majority of support surfaces. Currently Tridien manufactures a broad range of non-powered mattress systems using air, foam and gel. Non-powered support surfaces represented 53.7%, 53.6% and 53.1% of net sales in each of the years ended December 31, 2013, 2012 and 2011, respectively.

Positioning devices are used to position patients for procedures as well as to minimize the likelihood of developing a pressure ulcer during those procedures. Tridien offers a complete range of foam positioning devices. Patient positioning devices represented 24.9%, 27.7% and 27.3% of net sales in each of the years ended December 31, 2013, 2012 and 2011, respectively.

Business Strategies

Tridien's management is focused on strategies to grow revenues, improve operating efficiency and improving gross margins. Of particular note, Tridien has completed four acquisitions since its inception and has achieved numerous benefits to this consolidation within the support surfaces industry. The following is a discussion of these strategies:

Offer customers high quality, consistent product, on a national basis Products produced by Tridien and its competitors are typically bulky in nature and may not be conducive to shipping. Management believes that many of its competitors do not have the scale or resources required to produce support surfaces for national distributors and believes that customers value manufacturers with the scale and sophistication required to meet these needs. Tridien offers its customers the highest standards of quality through its robust Quality Management Systems. All Tridien facilities are ISO 13485 registered.

Leverage scale to provide industry leading research and development Higher acuity medical therapeutic surfaces are becoming increasingly technologically advanced. Tridien's management believes that many smaller competitors do not have the resources required to effectively meet the increasing needs of the industry and believes that increased scale and investments in engineering and technology will allow it to better serve its customers through industry leading research, technology and development.

Pursue cost savings through scale purchasing and operational improvements Many of the products used to manufacture medical support surfaces are standard in nature and management believes that increased scale achieved through acquisitions will allow it to benefit from lower cost of materials and therefore lower cost of sales.

Research and Development

Tridien develops surfaces both independently and in partnership with large distribution intermediaries. Initial steps of product development are typically made independently. Larger distribution market participants will typically require further product development testing to ensure mattress systems have the desired properties while smaller distributors will tend to buy more standardized products, especially on the non-powered products. Tridien has dedicated professionals, including individuals focused on process engineering, design engineering, and electrical engineering, working on the development of Tridien's next generation of therapeutic surfaces and is currently investing in its future focus of advanced wound care technologies.

Tridien is working to develop the next generation of products in surfaces. The new product development process often requires 2 to 6 months for non-powered products and 12 to 24 months for powered products, of research, engineering and testing cooperation. Tridien will provide technical support and repair services for its products as well, a differentiating characteristic valued by its customers. The expected increase in spending will allow Tridien to focus on the next generation products. During the years ended December 31, 2013, and 2012 and 2011, Tridien incurred \$2.4 million, \$2.1 million and \$1.8 million, respectively, in research and development costs.

Table of Contents

Customers

Tridien's largest customer accounted for 26.3%, 33.4% and 38.2% of gross sales in 2013, 2012 and 2011, respectively. Another customer accounted for 23.5%, 26.0% and 25.2% of sales in 2013, 2012 and 2011, respectively. Approximately 68.4%, 66.6% and 64.1% of Tridien's sales have been to its three largest customers in 2013, 2012 and 2011, respectively. Tridien's top ten customers accounted for 85.1%, 79.7% and 84.5% of gross sales in 2013, 2012 and 2011, respectively.

Substantially all revenue is derived from sales within the United States.

Tridien had approximately \$3.4 million and \$2.4 million in firm backlog orders at December 31, 2013 and 2012, respectively.

Sales and Marketing

Support surfaces are primarily sold through distributors, who either rent or sell to acute care (hospitals) facilities, long term care facilities and home health care organizations. The acute care distribution market for support surfaces is dominated by large suppliers such as Stryker Corporation and Hill-Rom Holdings Inc. Other national distributors usually provide specific types of support surface technology. Beyond national distribution intermediaries there are numerous smaller more regional distributors who will purchase support surfaces developed by Tridien as certain brand lines are known in the market as providing proven therapy.

Tridien has developed a full range of support surface products that are sold or rented to healthcare distributors and occasionally sold directly to the end customer. Tridien also provides technical support and repair services for its products, an offering valued by customers.

Competition

The competition in the medical support surfaces market is based predominantly on product performance, features, price and durability. Other factors may include the technological ability of a manufacturer to customize their product offering to meet the needs of large distributors. Tridien competes with manufacturers of varying sizes who then sell predominantly through distributors to the acute care, long term care and home health care markets. Specific competitors include, Span America and other smaller competitors. Tridien differentiates itself from these competitors based on its patented technologies, quality of the products it manufactures as well as its design and engineering capabilities to produce a full spectrum of surfaces that provide the greatest therapeutic outcome for every price point. While many competitors specialize in the production of a single type of support surface, and often outsource certain manufacturing skills required to develop and manufacture products vary by materials used, Tridien is able to offer its customers a full spectrum of support surfaces nationwide.

Span America Medical Systems (NASDAQ: SPAN): (\$74 million in fiscal 2013 sales) Span America's medical division includes the sales of skin care products, bedside mats, and foam mattress overlays and replacement mattresses, including the PressureGuard therapeutic mattress, Span-Aid patient positioners (used to elevate and support body parts) and Dish pressure-relief seat cushions to aid wound healing. Span America reported that approximately 34% of their revenue in 2013 was attributed to their therapeutic support surface segment. Span America also supplies bed frames, other medical and consumer bedding products.

Suppliers

Tridien's two primary raw materials used in manufacturing are polyurethane foam and fabric (primarily nylon and polycarbonate fabrics). Among Tridien's largest raw material suppliers are Foamex International, Inc., Dartex Coatings, Inc. and Uretek, LLC. Tridien uses multiple suppliers for foam and fabric and believes that these raw materials are in adequate supply and are available from many suppliers at competitive prices. We expect these costs, particularly those related to polyurethane foam to increase during fiscal 2014 due to recent trends in related commodity prices. Actions taken by manufacturers of petro-chemical commodities such as capacity reductions could influence price changes from our supplier. The cost of raw materials as a percentage of sales was approximately 51% of gross sales in fiscal 2013, 48% of gross sales in fiscal 2012 and 48% of gross sales in fiscal 2011.

Table of Contents

Intellectual Property

Tridien has 12 patents issued, filed from 1996 to 2005, and has 12 filed and pending patents.

Regulatory Environment

The FDCA, and regulations issued or proposed there under, provide for regulation by the Food and Drug Administration (FDA) of the marketing, manufacture, labeling, packaging and distribution of medical devices, including Tridien's products. These regulations require, among other things that medical device manufacturers register with the FDA, list devices manufactured by them, and file various inspections by regulatory authorities and must comply with good manufacturing practices as required by the FDA and state regulatory authorities. Tridien's management believes that Tridien is in substantial compliance with all applicable regulations.

Employees

As of December 31, 2013, Tridien employed 282 persons in all its locations together with 103 temporary employees. None of Tridien's employees are subject to collective bargaining agreements. We believe that Tridien's relationship with its employees is good.

Table of Contents

ITEM 1A RISK FACTORS

Risks Related to Our Business and Structure

We are a Company with limited history and may not be able to continue to successfully manage our businesses on a combined basis.

We were formed on November 18, 2005 and have conducted operations since May 16, 2006. Although our management team has extensive experience in acquiring and managing small and middle market businesses, our failure to continue to develop and maintain effective systems and procedures, including accounting and financial reporting systems, to manage our operations as a consolidated public company, may negatively impact our ability to optimize the performance of our Company, which could adversely affect our ability to pay distributions to our shareholders. In addition, in that case, our consolidated financial statements might not be indicative of our financial condition, business and results of operations.

Our future success is dependent on the employees of our Manager and the management teams of our businesses, the loss of any of whom could materially adversely affect our financial condition, business and results of operations.

Our future success depends, to a significant extent, on the continued services of the employees of our Manager, most of whom have worked together for a number of years. While our Manager will have employment agreements with certain of its employees, including our Chief Financial Officer, these employment agreements may not prevent our Manager's employees from leaving or from competing with us in the future. Our Manager does not have an employment agreement with our Chief Executive Officer.

The future success of our businesses also depends on their respective management teams because we operate our businesses on a stand-alone basis, primarily relying on existing management teams for management of their day-to-day operations. Consequently, their operational success, as well as the success of our internal growth strategy, will be dependent on the continued efforts of the management teams of the businesses. We provide such persons with equity incentives in their respective businesses and have employment agreements and/or non-competition agreements with certain persons we have identified as key to their businesses. However, these measures may not prevent the departure of these managers. The loss of services of one or more members of our management team or the management team at one of our businesses could materially adversely affect our financial condition, business and results of operations.

We face risks with respect to the evaluation and management of future platform or add-on acquisitions.

A component of our strategy is to continue to acquire additional platform subsidiaries, as well as add-on businesses for our existing businesses. Generally, because such acquisition targets are held privately, we may experience difficulty in evaluating potential target businesses as the information concerning these businesses is not publicly available. In addition, we and our subsidiary companies may have difficulty effectively managing or integrating acquisitions. We may experience greater than expected costs or difficulties relating to such acquisition, in which case, we might not achieve the anticipated returns from any particular acquisition, which may have a material adverse effect on our financial condition, business and results of operations.

We may not be able to successfully fund future acquisitions of new businesses due to the lack of availability of debt or equity financing at the Company level on acceptable terms, which could impede the implementation of our acquisition strategy and materially adversely impact our financial condition, business and results of operations.

In order to make future acquisitions, we intend to raise capital primarily through debt financing at the Company level, additional equity offerings, the sale of stock or assets of our businesses, and by offering equity in the Trust or our businesses to the sellers of target businesses or by undertaking a combination of any of the above. Since the timing and size of acquisitions cannot be readily predicted, we may need to be able to obtain funding on short notice to benefit fully from attractive acquisition opportunities. Such funding may not be available on acceptable terms. In

Table of Contents

addition, the level of our indebtedness may impact our ability to borrow at the Company level. Another source of capital for us may be the sale of additional shares, subject to market conditions and investor demand for the shares at prices that we consider to be in the interests of our shareholders. These risks may materially adversely affect our ability to pursue our acquisition strategy successfully and materially adversely affect our financial condition, business and results of operations.

While we intend to make regular cash distributions to our shareholders, the Company's board of directors has full authority and discretion over the distributions of the Company, other than the profit allocation, and it may decide to reduce or eliminate distributions at any time, which may materially adversely affect the market price for our shares.

To date, we have declared and paid quarterly distributions, and although we intend to pursue a policy of paying regular distributions, the Company's board of directors has full authority and discretion to determine whether or not a distribution by the Company should be declared and paid to the Trust and in turn to our shareholders, as well as the amount and timing of any distribution. In addition, the management fee and profit allocation will be payment obligations of the Company and, as a result, will be paid, along with other Company obligations, prior to the payment of distributions to our shareholders. The Company's board of directors may, based on their review of our financial condition and results of operations and pending acquisitions, determine to reduce or eliminate distributions, which may have a material adverse effect on the market price of our shares.

We will rely entirely on receipts from our businesses to make distributions to our shareholders.

The Trust's sole asset is its interest in the Company, which holds controlling interests in our businesses. Therefore, we are dependent upon the ability of our businesses to generate earnings and cash flow and distribute them to us in the form of interest and principal payments on indebtedness and, from time to time, dividends on equity to enable us, first, to satisfy our financial obligations and, second to make distributions to our shareholders. This ability may be subject to limitations under laws of the jurisdictions in which they are incorporated or organized. If, as a consequence of these various restrictions, we are unable to generate sufficient receipts from our businesses, we may not be able to declare, or may have to delay or cancel payment of, distributions to our shareholders.

We do not own 100% of our businesses. While we receive cash payments from our businesses which are in the form of interest payments, debt repayment and dividends, if any dividends were to be paid by our businesses, they would be shared pro rata with the minority shareholders of our businesses and the amounts of dividends made to minority shareholders would not be available to us for any purpose, including Company debt service or distributions to our shareholders. Any proceeds from the sale of a business will be allocated among us and the non-controlling shareholders of the business that is sold.

The Company's board of directors has the power to change the terms of our shares in its sole discretion in ways with which you may disagree.

As an owner of our shares, you may disagree with changes made to the terms of our shares, and you may disagree with the Company's board of directors' decision that the changes made to the terms of the shares are not materially adverse to you as a shareholder or that they do not alter the characterization of the Trust. Your recourse, if you disagree, will be limited because our Trust Agreement gives broad authority and discretion to our board of directors. However, the Trust Agreement does not relieve the Company's board of directors from any fiduciary obligation that is imposed on them pursuant to applicable law. In addition, we may change the nature of the shares to be issued to raise additional equity and remain a fixed-investment trust for tax purposes.

Certain provisions of the LLC Agreement of the Company and the Trust Agreement make it difficult for third parties to acquire control of the Trust and the Company and could deprive you of the opportunity to obtain a takeover premium for your shares.

The amended and restated LLC Agreement of the Company, which we refer to as the LLC Agreement, and the amended and restated Trust Agreement of the Trust, which we refer to as the Trust Agreement, contain a number of

Table of Contents

provisions that could make it more difficult for a third party to acquire, or may discourage a third party from acquiring, control of the Trust and the Company. These provisions include, among others:

restrictions on the Company's ability to enter into certain transactions with our major shareholders, with the exception of our Manager, modeled on the limitation contained in Section 203 of the Delaware General Corporation Law, or DGCL;

allowing only the Company's board of directors to fill newly created directorships, for those directors who are elected by our shareholders, and allowing only our Manager, as holder of a portion of the Allocation Interests, to fill vacancies with respect to the class of directors appointed by our Manager;

requiring that directors elected by our shareholders be removed, with or without cause, only by a vote of 85% of our shareholders;

requiring advance notice for nominations of candidates for election to the Company's board of directors or for proposing matters that can be acted upon by our shareholders at a shareholders' meeting;

having a substantial number of additional authorized but unissued shares that may be issued without shareholder action;

providing the Company's board of directors with certain authority to amend the LLC Agreement and the Trust Agreement, subject to certain voting and consent rights of the holders of trust interests and Allocation Interests;

providing for a staggered board of directors of the Company, the effect of which could be to deter a proxy contest for control of the Company's board of directors or a hostile takeover; and

limitations regarding calling special meetings and written consents of our shareholders.

These provisions, as well as other provisions in the LLC Agreement and Trust Agreement may delay, defer or prevent a transaction or a change in control that might otherwise result in you obtaining a takeover premium for your shares.

We may have conflicts of interest with the noncontrolling shareholders of our businesses.

The boards of directors of our respective businesses have fiduciary duties to all their shareholders, including the Company and noncontrolling shareholders. As a result, they may make decisions that are in the best interests of their shareholders generally but which are not necessarily in the best interest of the Company or our shareholders. In dealings with the Company, the directors of our businesses may have conflicts of interest and decisions may have to be made without the participation of directors appointed by the Company, and such decisions may be different from those that we would make.

Our third party credit facility exposes us to additional risks associated with leverage and inhibits our operating flexibility and reduces cash flow available for distributions to our shareholders.

At December 31, 2013, we had approximately \$279.8 million outstanding under our Term Loan Facility and \$1.6 million outstanding under our Revolving Credit Facility (representing outstanding letters of credit). We expect to increase our level of debt in the future. The terms of our Revolving Credit Facility contains a number of affirmative and restrictive covenants that, among other things, require us to:

Edgar Filing: Compass Diversified Holdings - Form 10-K

maintain a minimum level of cash flow;

leverage new businesses we acquire to a minimum specified level at the time of acquisition;

keep our total debt to cash flow at or below a ratio of 3.5 to 1; and

make acquisitions that satisfy certain specified minimum criteria.

Table of Contents

If we violate any of these covenants, our lender may accelerate the maturity of any debt outstanding and we may be prohibited from making any distributions to our shareholders. Such debt is secured by all of our assets, including the stock we own in our businesses and the rights we have under the loan agreements with our businesses. Our ability to meet our debt service obligations may be affected by events beyond our control and will depend primarily upon cash produced by our businesses. Any failure to comply with the terms of our indebtedness could materially adversely affect us.

Changes in interest rates could materially adversely affect us.

Our Credit Facility bears interest at floating rates which will generally change as interest rates change. We bear the risk that the rates we are charged by our lender will increase faster than the earnings and cash flow of our businesses, which could reduce profitability, adversely affect our ability to service our debt, cause us to breach covenants contained in our Revolving Credit Facility and reduce cash flow available for distribution, any of which could materially adversely affect us.

We may engage in a business transaction with one or more target businesses that have relationships with our officers, our directors, our Manager or CGI, which may create potential conflicts of interest.

We may decide to acquire one or more businesses with which our officers, our directors, our Manager or CGI have a relationship. While we might obtain a fairness opinion from an independent investment banking firm, potential conflicts of interest may still exist with respect to a particular acquisition, and, as a result, the terms of the acquisition of a target business may not be as advantageous to our shareholders as it would have been absent any conflicts of interest.

We are exposed to risks relating to evaluations of controls required by Section 404 of the Sarbanes-Oxley Act of 2002.

We are required to comply with Section 404 of the Sarbanes-Oxley Act of 2002. While we have concluded that at December 31, 2013, we have no material weaknesses in our internal controls over financial reporting we cannot assure you that we will not have a material weakness in the future. A material weakness is a control deficiency, or combination of significant deficiencies that results in more than a remote likelihood that a material misstatement of the annual or interim financial statements will not be prevented or detected. If we fail to maintain a system of internal controls over financial reporting that meets the requirements of Section 404, we might be subject to sanctions or investigation by regulatory authorities such as the SEC or by the New York Stock Exchange. Additionally, failure to comply with Section 404 or the report by us of a material weakness may cause investors to lose confidence in our financial statements and our stock price may be adversely affected. If we fail to remedy any material weakness, our financial statements may be inaccurate, we may not have access to the capital markets, and our stock price may be adversely affected.

CGI may exercise significant influence over the Company.

CGI, through a wholly owned subsidiary, owns 7,931,000 or approximately 16.4% of our shares and may have significant influence over the election of directors in the future.

If, in the future, we cease to control and operate our businesses, we may be deemed to be an investment company under the Investment Company Act of 1940, as amended.

Under the terms of the LLC Agreement, we have the latitude to make investments in businesses that we will not operate or control. If we make significant investments in businesses that we do not operate or control or cease to operate and control our businesses, we may be deemed to be an investment company under the Investment Company Act of 1940, as amended, or the Investment Company Act. If we were deemed to be an investment company, we would either have to register as an investment company under the Investment Company Act, obtain

Table of Contents

exemptive relief from the SEC or modify our investments or organizational structure or our contract rights to fall outside the definition of an investment company. Registering as an investment company could, among other things, materially adversely affect our financial condition, business and results of operations, materially limit our ability to borrow funds or engage in other transactions involving leverage and require us to add directors who are independent of us or our Manager and otherwise will subject us to additional regulation that will be costly and time-consuming.

Risks Relating to Our Manager

Our Chief Executive Officer, directors, Manager and management team may allocate some of their time to other businesses, thereby causing conflicts of interest in their determination as to how much time to devote to our affairs, which may materially adversely affect our operations.

While the members of our management team anticipate devoting a substantial amount of their time to the affairs of the Company, only Mr. Ryan Faulkingham, our Chief Financial Officer, devotes substantially all of his time to our affairs. Our Chief Executive Officer, directors, Manager and members of our management team may engage in other business activities. This may result in a conflict of interest in allocating their time between our operations and our management and operations of other businesses. Their other business endeavors may be related to CGI, which will continue to own several businesses that were managed by our management team prior to our initial public offering, or affiliates of CGI as well as other parties. Conflicts of interest that arise over the allocation of time may not always be resolved in our favor and may materially adversely affect our operations. See the section entitled **Certain Relationships and Related Party Transactions** for the potential conflicts of interest of which you should be aware.

Our Manager and its affiliates, including members of our management team, may engage in activities that compete with us or our businesses.

While our management team intends to devote a substantial majority of their time to the affairs of the Company, and while our Manager and its affiliates currently do not manage any other businesses that are in similar lines of business as our businesses, and while our Manager must present all opportunities that meet the Company's acquisition and disposition criteria to the Company's board of directors, neither our management team nor our Manager is expressly prohibited from investing in or managing other entities, including those that are in the same or similar line of business as our businesses. In this regard, the management services agreement and the obligation to provide management services will not create a mutually exclusive relationship between our Manager and its affiliates, on the one hand, and the Company, on the other.

Our Manager need not present an acquisition or disposition opportunity to us if our Manager determines on its own that such acquisition or disposition opportunity does not meet the Company's acquisition or disposition criteria.

Our Manager will review any acquisition or disposition opportunity presented to the Manager to determine if it satisfies the Company's acquisition or disposition criteria, as established by the Company's board of directors from time to time. If our Manager determines, in its sole discretion, that an opportunity fits our criteria, our Manager will refer the opportunity to the Company's board of directors for its authorization and approval prior to the consummation thereof; opportunities that our Manager determines do not fit our criteria do not need to be presented to the Company's board of directors for consideration. If such an opportunity is ultimately profitable, we will have not participated in such opportunity. Upon a determination by the Company's board of directors not to promptly pursue an opportunity presented to it by our Manager in whole or in part, our Manager will be unrestricted in its ability to pursue such opportunity, or any part that we do not promptly pursue, on its own or refer such opportunity to other entities, including its affiliates.

Table of Contents

We cannot remove our Manager solely for poor performance, which could limit our ability to improve our performance and could materially adversely affect the market price of our shares.

Under the terms of the management services agreement, our Manager cannot be removed as a result of underperformance. Instead, the Company's board of directors can only remove our Manager in certain limited circumstances or upon a vote by the majority of the Company's board of directors and the majority of our shareholders to terminate the management services agreement. This limitation could materially adversely affect the market price of our shares.

Our Manager can resign on 180 days' notice and we may not be able to find a suitable replacement within that time, resulting in a disruption in our operations that could materially adversely affect our financial condition, business and results of operations as well as the market price of our shares.

Our Manager has the right, under the management services agreement, to resign at any time on 180 days' written notice, whether we have found a replacement or not. If our Manager resigns, we may not be able to contract with a new manager or hire internal management with similar expertise and ability to provide the same or equivalent services on acceptable terms within 90 days, or at all, in which case our operations are likely to experience a disruption, our financial condition, business and results of operations as well as our ability to pay distributions are likely to be adversely affected and the market price of our shares may decline. In addition, the coordination of our internal management, acquisition activities and supervision of our businesses is likely to suffer if we are unable to identify and reach an agreement with a single institution or group of executives having the expertise possessed by our Manager and its affiliates. Even if we are able to retain comparable management, whether internal or external, the integration of such management and their lack of familiarity with our businesses may result in additional costs and time delays that could materially adversely affect our financial condition, business and results of operations.

We must pay our Manager the management fee regardless of our performance.

Our Manager is entitled to receive a management fee that is based on our adjusted consolidated net assets, as defined in the management services agreement, regardless of the performance of our businesses. The calculation of the management fee is unrelated to the Company's net income. As a result, the management fee may incentivize our Manager to increase the amount of our assets, for example, the acquisition of additional assets or the incurrence of third party debt rather than increase the performance of our businesses.

We cannot determine the amount of the management fee that will be paid over time with any certainty.

The management fee paid to CGM for the year ended December 31, 2013, was \$18.6 million. The management fee is calculated by reference to the Company's adjusted net assets, which will be impacted by the acquisition or disposition of businesses, which can be significantly influenced by our Manager, as well as the performance of our businesses and other businesses we may acquire in the future. Changes in adjusted net assets and in the resulting management fee could be significant, resulting in a material adverse effect on the Company's results of operations. In addition, if the performance of the Company declines, assuming adjusted net assets remains the same, management fees will increase as a percentage of the Company's net income.

We cannot determine the amount of profit allocation that will be paid over time with any certainty.

We cannot determine the amount of profit allocation that will be paid over time with any certainty. Such determination would be dependent on the potential sale proceeds received for any of our businesses and the performance of the Company and its businesses over a multi-year period of time, among other factors that cannot be predicted with certainty at this time. Such factors may have a significant impact on the amount of any profit allocation to be paid. Likewise, such determination would be dependent on whether certain hurdles were surpassed giving rise to a payment of profit allocation. Any amounts paid in respect of the profit allocation are unrelated to the management fee earned for performance of services under the management services agreement.

Table of Contents

The fees to be paid to our Manager pursuant to the management services agreement, the offsetting management services agreements and integration services agreements and the profit allocation to be paid to certain members of our Manager, as holders of the Allocation Interests, pursuant to the LLC Agreement may significantly reduce the amount of cash available for distribution to our shareholders.

Under the management services agreement, the Company will be obligated to pay a management fee to and, subject to certain conditions, reimburse the costs and out-of-pocket expenses of our Manager incurred on behalf of the Company in connection with the provision of services to the Company. Similarly, our businesses will be obligated to pay fees to and reimburse the costs and expenses of our Manager pursuant to any offsetting management services agreements entered into between our Manager and one of our businesses, or any integration services agreements to which such businesses are a party. In addition, Sostratus LLC, as holder of the Allocation Interests, will be entitled to receive profit allocations. While it is difficult to quantify with any certainty the actual amount of any such payments in the future, we do expect that such amounts could be substantial. See the section entitled "Certain Relationships and Related Party Transactions" for more information about these payment obligations of the Company. The management fee and profit allocation and will be payment obligations of the Company and, as a result, will be paid, along with other Company obligations, prior to the payment of distributions to shareholders. As a result, the payment of these amounts may significantly reduce the amount of cash flow available for distribution to our shareholders.

Our Manager's influence on conducting our operations, including on our conducting of transactions, gives it the ability to increase its fees, which may reduce the amount of cash flow available for distribution to our shareholders.

Under the terms of the management services agreement, our Manager is paid a management fee calculated as a percentage of the Company's adjusted net assets for certain items and is unrelated to net income or any other performance base or measure. Our Manager, controls, may advise us to consummate transactions, incur third party debt or conduct our operations in a manner that, in our Manager's reasonable discretion, are necessary to the future growth of our businesses and are in the best interests of our shareholders. These transactions, however, may increase the amount of fees paid to our Manager. Our Manager's ability to increase its fees, through the influence it has over our operations, may increase the compensation paid by our Manager. Our Manager's ability to influence the management fee paid to it by us could reduce the amount of cash flow available for distribution to our shareholders.

Fees paid by the Company and our businesses pursuant to integration services agreements do not offset fees payable under the management services agreement and will be in addition to the management fee payable by the Company under the management services agreement.

The management services agreement provides that our businesses may enter into integration services agreements with our Manager pursuant to which our businesses will pay fees to our Manager for services provided by our Manager relating to the integration of a business's financial reporting, computer systems and decision making and management processes into our operations following an acquisition of such business. See the section entitled "Certain Relationships and Related Party Transactions" for more information about these agreements. Unlike fees paid under the offsetting management services agreements, fees that are paid pursuant to such integration services agreements will not reduce the management fee payable by the Company. Therefore, such fees will be in excess of the management fee payable by the Company.

The fees to be paid to our Manager pursuant to these integration service agreements will be paid prior to any principal, interest or dividend payments to be paid to the Company by our businesses, which will reduce the amount of cash flow available for distributions to shareholders.

Our profit allocation may induce our Manager to make suboptimal decisions regarding our operations.

Sostratus LLC, as holder of our Allocation Interests, will receive a profit allocation based on ongoing cash flows and capital gains in excess of a hurdle rate. Certain members of our Manager are owners of Sostratus LLC. In this respect, a calculation and payment of profit allocation may be triggered upon the sale of one of our businesses. As a result, our Manager may be incentivized to recommend the sale of one or more of our businesses to the Company's board of directors at a time that may not be optimal for our shareholders.

Table of Contents

The obligations to pay the management fee and profit allocation may cause the Company to liquidate assets or incur debt.

If we do not have sufficient liquid assets to pay the management fee and profit allocation when such payments are due, we may be required to liquidate assets or incur debt in order to make such payments. This circumstance could materially adversely affect our liquidity and ability to make distributions to our shareholders.

Risks Related to Taxation

Our shareholders will be subject to tax on their share of the Company's taxable income, which taxes or taxable income could exceed the cash distributions they receive from the Trust.

For so long as the Company or the Trust (if it is treated as a tax partnership) would not be required to register as an investment company under the Investment Company Act of 1940 and at least 90% of our gross income for each taxable year constitutes qualifying income within the meaning of Section 7704(d) of the Internal Revenue Code of 1986, as amended (the Code), on a continuing basis, we will be treated, for U.S. federal income tax purposes, as a partnership and not as an association or a publicly traded partnership taxable as a corporation. In that case our shareholders will be subject to U.S. federal income tax and, possibly, state, local and foreign income tax, on their share of the Company's taxable income, which taxes or taxable income could exceed the cash distributions they receive from the Trust. There is, accordingly, a risk that our shareholders may not receive cash distributions equal to their portion of our taxable income or sufficient in amount even to satisfy their personal tax liability those results from that income. This may result from gains on the sale or exchange of stock or debt of subsidiaries that will be allocated to shareholders who hold (or are deemed to hold) shares on the day such gains were realized if there is no corresponding distribution of the proceeds from such sales, or where a shareholder disposes of shares after an allocation of gain but before proceeds (if any) are distributed by the Company. Shareholders may also realize income in excess of distributions due to the Company's use of cash from operations or sales proceeds for uses other than to make distributions to shareholders, including funding acquisitions, satisfying short- and long-term working capital needs of our businesses, or satisfying known or unknown liabilities. In addition, certain financial covenants with the Company's lenders may limit or prohibit the distribution of cash to shareholders. The Company's board of directors is also free to change the Company's distribution policy. The Company is under no obligation to make distributions to shareholders equal to or in excess of their portion of our taxable income or sufficient in amount even to satisfy the tax liability that results from that income.

All of the Company's income could be subject to an entity-level tax in the United States, which could result in a material reduction in cash flow available for distribution to holders of shares of the Trust and thus could result in a substantial reduction in the value of the shares.

We do not expect the Company to be characterized as a corporation so long as it would not be required to register as an investment company under the Investment Company Act of 1940 and 90% or more of its gross income for each taxable year constitutes qualifying income. The Company expects to receive more than 90% of its gross income each year from dividends, interest and gains on sales of stock or debt instruments, including principally from or with respect to stock or debt of corporations in which the Company holds a majority interest. The Company intends to treat all such dividends, interest and gains as qualifying income.

If the Company fails to satisfy this qualifying income exception, the Company will be treated as a corporation for U.S. federal (and certain state and local) income tax purposes, and would be required to pay income tax at regular corporate rates on its income. Taxation of the Company as a corporation could result in a material reduction in distributions to our shareholders and after-tax return and, thus, could likely result in a reduction in the value of, or materially adversely affect the market price of, the shares of the Trust.

A shareholder may recognize a greater taxable gain (or a smaller tax loss) on a disposition of shares than expected because of the treatment of debt under the partnership tax accounting rules.

We may incur debt for a variety of reasons, including for acquisitions as well as other purposes. Under partnership tax accounting principles (which apply to the Company), debt of the Company generally will be allocable to our shareholders, who will realize the benefit of including their allocable share of the debt in the tax basis of their investment in shares. At the time a shareholder later sells shares, the selling shareholder's amount realized on the sale will include not only the sales price of the shares but also the shareholder's portion of the Company's debt

Table of Contents

allocable to his shares (which is treated as proceeds from the sale of those shares). Depending on the nature of the Company's activities after having incurred the debt, and the utilization of the borrowed funds, a later sale of shares could result in a larger taxable gain (or a smaller tax loss) than anticipated.

Our structure involves complex provisions of U.S. federal income tax law for which no clear precedent or authority may be available. Our structure also is subject to potential legislative, judicial or administrative change and differing interpretations, possibly on a retroactive basis.

The U.S. federal income tax treatment of holders of the Shares depends in some instances on determinations of fact and interpretations of complex provisions of U.S. federal income tax law for which no clear precedent or authority may be available. You should be aware that the U.S. federal income tax rules are constantly under review by persons involved in the legislative process, the IRS, and the U.S. Treasury Department, frequently resulting in revised interpretations of established concepts, statutory changes, revisions to regulations and other modifications and interpretations. The IRS pays close attention to the proper application of tax laws to partnerships. The present U.S. federal income tax treatment of an investment in the Shares may be modified by administrative, legislative or judicial interpretation at any time, and any such action may affect investments and commitments previously made. For example, changes to the U.S. federal tax laws and interpretations thereof could make it more difficult or impossible to meet the qualifying income exception for us to be treated as a partnership for U.S. federal income tax purposes that is not taxable as a corporation, affect or cause us to change our investments and commitments, affect the tax considerations of an investment in us and adversely affect an investment in our Shares. Our organizational documents and agreements permit the Board of Directors to modify our operating agreement from time to time, without the consent of the holders of Shares, in order to address certain changes in U.S. federal income tax regulations, legislation or interpretation. In some circumstances, such revisions could have a material adverse impact on some or all of the holders of our Shares. Moreover, we will apply certain assumptions and conventions in an attempt to comply with applicable rules and to report income, gain, deduction, loss and credit to holders in a manner that reflects such holders' beneficial ownership of partnership items, taking into account variation in ownership interests during each taxable year because of trading activity. However, these assumptions and conventions may not be in compliance with all aspects of applicable tax requirements. It is possible that the IRS will assert successfully that the conventions and assumptions used by us do not satisfy the technical requirements of the Code and/or Treasury regulations and could require that items of income, gain, deductions, loss or credit, including interest deductions, be adjusted, reallocated, or disallowed, in a manner that adversely affects holders of the Shares.

Risks Relating Generally to Our Businesses

The recent disruption in the overall economy and the financial markets will adversely impact our business.

Many industries, including our businesses, have been affected by current economic factors, including the significant deterioration of global economic conditions, declines in employment levels, and shifts in consumer spending patterns. The recent disruptions in the overall economy and volatility in the financial markets have greatly reduced, and may continue to reduce, consumer confidence in the economy, negatively affecting consumer spending, which could be harmful to our financial position. Disruptions in the overall economy may also lead to a lower collection rate on billings as consumers or businesses are unable to pay their bills in a timely fashion. Decreased cash flow generated from our products may adversely affect our financial position and our ability to fund our operations. In addition, macro-economic disruptions, as well as the restructuring of various commercial and investment banking organizations, could adversely affect our ability to access the credit markets. The disruption in the credit markets may also adversely affect the availability of financing to support our strategy for growth through future acquisitions. There is a risk that government responses to the disruptions in the financial markets will not restore consumer confidence, stabilize the markets, or increase liquidity and the availability of credit.

Impairment of our intangible assets could result in significant charges that would adversely impact our future operating results.

We have significant intangible assets, including goodwill with an indefinite life, which are susceptible to valuation adjustments as a result of changes in various factors or conditions. The most significant intangible assets on our balance sheet are goodwill, technologies, customer relationships and trademarks we acquired when we acquired our

Table of Contents

businesses. Customer relationships are amortized on a straight line basis based upon the pattern in which the economic benefits of customer relationships are being utilized. Other identifiable intangible assets are amortized on a straight-line basis over their estimated useful lives. We assess the potential impairment of goodwill and indefinite lived intangible assets on an annual basis, as well as whenever events or changes in circumstances indicate that the carrying value may not be recoverable. We assess definite lived intangible assets whenever events or changes in circumstances indicate that the carrying value may not be recoverable.

Factors that could trigger impairment include the following:

significant underperformance relative to historical or projected future operating results;

significant changes in the manner of or use of the acquired assets or the strategy for our overall business;

significant negative industry or economic trends;

significant decline in our stock price for a sustained period;

changes in our organization or management reporting structure could result in additional reporting units, which may require alternative methods of estimating fair values or greater desegregation or aggregation in our analysis by reporting unit; and

a decline in our market capitalization below net book value.

As of December 31, 2013, we had identified indefinite lived intangible assets with a carrying value in our financial statements of \$131.3 million, and goodwill of \$246.6 million.

At Tridien we wrote down approximately \$12.9 million in goodwill and intangible assets during 2013 as a result of lower than anticipated sales and sales growth. Further adverse changes in the operations of our businesses or other unforeseeable factors could result in an additional impairment charge in future periods that would impact our results of operations and financial position in that period.

Our businesses are subject to unplanned business interruptions which may adversely affect our performance.

Operational interruptions and unplanned events at one or more of our production facilities, such as explosions, fires, inclement weather, natural disasters, accidents, transportation interruptions and supply could cause substantial losses in our production capacity. Furthermore, because customers may be dependent on planned deliveries from us, customers that have to reschedule their own operations due to our delivery delays may be able to pursue financial claims against us, and we may incur costs to correct such problems in addition to any liability resulting from such claims. Such interruptions may also harm our reputation among actual and potential customers, potentially resulting in a loss of business. To the extent these losses are not covered by insurance, our financial position, results of operations and cash flows may be adversely affected by such events.

Our businesses rely and may rely on their intellectual property and licenses to use others' intellectual property, for competitive advantage. If our businesses are unable to protect their intellectual property, are unable to obtain or retain licenses to use other's intellectual property, or if they infringe upon or are alleged to have infringed upon others' intellectual property, it could have a material adverse effect on their financial condition, business and results of operations.

Each businesses' success depends in part on their, or licenses to use others', brand names, proprietary technology and manufacturing techniques. These businesses rely on a combination of patents, trademarks, copyrights, trade secrets, confidentiality procedures and contractual provisions to protect their intellectual property rights. The steps they have taken to protect their intellectual property rights may not prevent third parties from using their intellectual property and other proprietary information without their authorization or independently developing intellectual property and other proprietary information that is similar. In addition, the laws of foreign countries may not protect our businesses' intellectual property

rights effectively or to the same extent as the laws of the United States.

Table of Contents

Stopping unauthorized use of their proprietary information and intellectual property, and defending claims that they have made unauthorized use of others' proprietary information or intellectual property, may be difficult, time-consuming and costly. The use of their intellectual property and other proprietary information by others, and the use by others of their intellectual property and proprietary information, could reduce or eliminate any competitive advantage they have developed, cause them to lose sales or otherwise harm their business.

Our businesses may become involved in legal proceedings and claims in the future either to protect their intellectual property or to defend allegations that they have infringed upon others' intellectual property rights. These claims and any resulting litigation could subject them to significant liability for damages and invalidate their property rights. In addition, these lawsuits, regardless of their merits, could be time consuming and expensive to resolve and could divert management's time and attention. The costs associated with any of these actions could be substantial and could have a material adverse effect on their financial condition, business and results of operations.

The operations and research and development of some of our businesses' services and technology depend on the collective experience of their technical employees. If these employees were to leave our businesses and take this knowledge, our businesses' operations and their ability to compete effectively could be materially adversely impacted.

The future success of some of our businesses depends upon the continued service of their technical personnel who have developed and continue to develop their technology and products. If any of these employees leave our businesses, the loss of their technical knowledge and experience may materially adversely affect the operations and research and development of current and future services. We may also be unable to attract technical individuals with comparable experience because competition for such technical personnel is intense. If our businesses are not able to replace their technical personnel with new employees or attract additional technical individuals, their operations may suffer as they may be unable to keep up with innovations in their respective industries. As a result, their ability to continue to compete effectively and their operations may be materially adversely affected.

If our businesses are unable to continue the technological innovation and successful commercial introduction of new products and services, their financial condition, business and results of operations could be materially adversely affected.

The industries in which our businesses operate, or may operate, experience periodic technological changes and ongoing product improvements. Their results of operations depend significantly on the development of commercially viable new products, product grades and applications, as well as production technologies and their ability to integrate new technologies. Our future growth will depend on their ability to gauge the direction of the commercial and technological progress in all key end-use markets and upon their ability to successfully develop, manufacture and market products in such changing end-use markets. In this regard, they must make ongoing capital investments.

In addition, their customers may introduce new generations of their own products, which may require new or increased technological and performance specifications, requiring our businesses to develop customized products. Our businesses may not be successful in developing new products and technology that satisfy their customers' demand and their customers may not accept any of their new products. If our businesses fail to keep pace with evolving technological innovations or fail to modify their products in response to their customers' needs in a timely manner, then their financial condition, business and results of operations could be materially adversely affected as a result of reduced sales of their products and sunk developmental costs. These developments may require our personnel staffing business to seek better educated and trained workers, who may not be available in sufficient numbers.

Table of Contents

Our businesses could experience fluctuations in the costs of raw materials as a result of inflation and other economic conditions, which fluctuations could have a material adverse effect on their financial condition, business and results of operations.

Changes in inflation could materially adversely affect the costs and availability of raw materials used in our manufacturing businesses, and changes in fuel costs likely will affect the costs of transporting materials from our suppliers and shipping goods to our customers, as well as the effective areas from which we can recruit temporary staffing personnel. For example, for Advanced Circuits, the principal raw materials consist of copper and glass and represent approximately 20% of net sales in 2013. Prices for these key raw materials may fluctuate during periods of high demand. The ability by these businesses to offset the effect of increases in raw material prices by increasing their prices is uncertain. If these businesses are unable to cover price increases of these raw materials, their financial condition, business and results of operations could be materially adversely affected.

Our businesses do not have and may not have long-term contracts with their customers and clients and the loss of customers and clients could materially adversely affect their financial condition, business and results of operations.

Our businesses are and may be, based primarily upon individual orders and sales with their customers and clients. Our businesses historically have not entered into long-term supply contracts with their customers and clients. As such, their customers and clients could cease using their services or buying their products from them at any time and for any reason. The fact that they do not enter into long-term contracts with their customers and clients means that they have no recourse in the event a customer or client no longer wants to use their services or purchase products from them. If a significant number of their customers or clients elect not to use their services or purchase their products, it could materially adversely affect their financial condition, business and results of operations.

Our businesses are and may be subject to federal, state and foreign environmental laws and regulations that expose them to potential financial liability. Complying with applicable environmental laws requires significant resources, and if our businesses fail to comply, they could be subject to substantial liability.

Some of the facilities and operations of our businesses are and may be subject to a variety of federal, state and foreign environmental laws and regulations including laws and regulations pertaining to the handling, storage and transportation of raw materials, products and wastes, which require and will continue to require significant expenditures to remain in compliance with such laws and regulations currently in place and in the future. Compliance with current and future environmental laws is a major consideration for our businesses as any material violations of these laws can lead to substantial liability, revocations of discharge permits, fines or penalties. Because some of our businesses use hazardous materials and generate hazardous wastes in their operations, they may be subject to potential financial liability for costs associated with the investigation and remediation of their own sites, or sites at which they have arranged for the disposal of hazardous wastes, if such sites become contaminated. Even if they fully comply with applicable environmental laws and are not directly at fault for the contamination, our businesses may still be liable. Costs associated with these risks could have a material adverse effect on our financial condition, business and results of operations.

Defects in the products provided by our companies could result in financial or other damages to their customers, which could result in reduced demand for our companies' products and/or liability claims against our companies.

As manufacturers and distributors of consumer products, certain of our companies are subject to various laws, rules and regulations, which may empower governmental agencies and authorities to exclude from the market products that are found to be unsafe or hazardous. Under certain circumstances, a governmental authority could require our companies to repurchase or recall one or more of their products. Additionally, laws regulating certain consumer products exist in some cities and states, as well as in other countries in which they sell their products, where more restrictive laws and regulations exist or may be adopted in the future. Any repurchase or recall of such products could be costly and could damage the reputation of our companies. If any of our companies were required to remove, or voluntarily remove, their products from the market, their reputation may be tarnished and they may have large quantities of finished products that they cannot sell. Additionally, our companies may be subject to regulatory actions that could harm their reputations, adversely impact the values of their brands and/or increase the cost of production.

Our companies also face exposure to product liability claims in the event that one of their products is alleged to have resulted in property damage, bodily injury or other adverse effects. Defects in products could result in customer dissatisfaction or a reduction in, or cancellation of, future purchases or liability claims against our

Table of Contents

companies. If these defects occur frequently, our reputation may be impaired permanently. Defects in products could also result in financial or other damages to customers, for which our companies may be asked or required to compensate their customers, in the form of substantial monetary judgments or otherwise. While our companies take the steps deemed necessary to comply with all laws and regulations, there can be no assurance that rapidly changing safety standards will not render unsaleable products that complied with previously-applicable safety standards. As a result, these types of claims could have a material adverse effect on our businesses, results of operations and financial condition.

Some of our businesses are subject to certain risks associated with the movement of businesses offshore.

Some of our businesses are potentially at risk of losing business to competitors operating in lower cost countries. An additional risk is the movement offshore of some of our businesses' customers, leading them to procure products or services from more closely located companies. Either of these factors could negatively impact our financial condition, business and results of operations.

Loss of key customers of some of our businesses could negatively impact financial condition.

Some of our businesses have significant exposure to certain key customers, the loss of which could negatively impact our financial condition, business and results of operations.

Our businesses are subject to certain risks associated with their foreign operations or business they conduct in foreign jurisdictions.

Some of our businesses have and may have operations or conduct business outside the United States. Certain risks are inherent in operating or conducting business in foreign jurisdictions, including exposure to local economic conditions; difficulties in enforcing agreements and collecting receivables through certain foreign legal systems; longer payment cycles for foreign customers; adverse currency exchange controls; exposure to risks associated with changes in foreign exchange rates; potential adverse changes in political environments; withholding taxes and restrictions on the withdrawal of foreign investments and earnings; export and import restrictions; difficulties in enforcing intellectual property rights; and required compliance with a variety of foreign laws and regulations. These risks individually and collectively have the potential to negatively impact our financial condition, business and results of operations.

New regulations related to conflict minerals may force certain of our businesses to incur additional expenses, may make the supply chain of such businesses more complex and may result in damage to the customer relationships of such businesses.

In August 2012, as mandated by the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010, the Securities and Exchange Commission promulgated final rules regarding disclosure of the use of certain minerals and their derivatives, including tin, tantalum, tungsten and gold, known as conflict minerals, if these minerals are necessary to the functionality or production of the company's products. These regulations require such issuers to report annually whether or not such minerals originate from the Democratic Republic of Congo (DRC) and adjoining countries and in some cases to perform extensive due diligence on their supply chains for such minerals.

The implementation of these new requirements could adversely affect the sourcing, availability and pricing of conflict minerals used in the manufacturing processes for certain products of our businesses. In addition, some of our businesses may incur additional costs to comply with the disclosure requirements, including costs related to determining the source of any of the relevant minerals used in the products of certain of our businesses. Since the supply chain of certain of our businesses is complex, the due diligence procedures implemented may not enable such businesses to ascertain the origins for these minerals or determine that these minerals are DRC conflict-free, which may harm the reputation of some of our businesses. Some of our businesses may also face difficulties in satisfying customers who may require that our products be certified as DRC conflict-free, which could harm relationships with such customers and lead to a loss of revenue. These new requirements also could have the effect of limiting the pool of suppliers from which some of our businesses source these minerals, and we may be unable to obtain conflict-free minerals at competitive prices, which could increase costs and adversely affect the manufacturing operations and profitability of certain of our businesses. Any one or a combination of these various factors could negatively impact our financial condition, business and results of operations.

Table of Contents

The proposed spending cuts imposed by the Budget Control Act of 2011 (BCA) could impact the operating results and profit of our businesses.

The U.S. government continues to focus on developing and implementing spending, tax, and other initiatives to stimulate the economy, create jobs, and reduce the deficit. One of these initiatives, the BCA, imposes greater constraints on government spending. In an attempt to balance decisions regarding defense, homeland security, and other federal spending priorities, the BCA immediately imposed spending caps that contain reductions to the Department of Defense (DoD) base budgets over a ten-year period ending in 2021. The BCA also provides for an automatic sequestration process, which commenced March 1, 2013, that imposed additional cuts of approximately \$37 billion to the DoD base budget for fiscal 2013 and approximately \$34 billion to the proposed DoD base budget for fiscal 2014. Although we cannot predict whether the automatic sequestration process will be allowed to proceed as set forth, or whether it will be further modified by new or additional legislation, a significant decline in overall U.S. government or DoD spending, a substantial reduction or elimination of particular defense-related programs or significant delays in contract or task order awards could have a material adverse effect on our businesses, result of operations and financial condition.

Risks Related to FOX

Growth in popularity of alternative recreational activities may reduce demand for mountain bikes and off road products which would reduce demand for FOX s products.

Mountain biking and other off-road sports compete against numerous recreational activities for share of time and spend of enthusiasts. Any growth in popularity of other outdoor activities at the expense of mountain biking and off-road sports could lead to a decrease in demand for the company s products and could materially adversely affect FOX s financial condition, business and results of operations.

Risks Related to Advanced Circuits

Unless Advanced Circuits is able to respond to technological change at least as quickly as its competitors, its services could be rendered obsolete, which could materially adversely affect its financial condition, business and results of operations.

The market for Advanced Circuits services is characterized by rapidly changing technology and continuing process development. The future success of its business will depend in large part upon its ability to maintain and enhance its technological capabilities, retain qualified engineering and technical personnel, develop and market services that meet evolving customer needs and successfully anticipate and respond to technological changes on a cost-effective and timely basis. Advanced Circuits core manufacturing capabilities are for 2 to 12 layer printed circuit boards. Trends towards miniaturization and increased performance of electronic products are dictating the use of printed circuit boards with increased layer counts. If this trend continues Advanced Circuits may not be able to effectively respond to the technological requirements of the changing market. If it determines that new technologies and equipment are required to remain competitive, the development, acquisition and implementation of these technologies may require significant capital investments. It may be unable to obtain capital for these purposes in the future, and investments in new technologies may not result in commercially viable technological processes. Any failure to anticipate and adapt to its customers changing technological needs and requirements or retain qualified engineering and technical personnel could materially adversely affect its financial condition, business and results of operations.

Table of Contents

Advanced Circuits customers operate in industries that experience rapid technological change resulting in short product life cycles and as a result, if the product life cycles of its customers slow materially, and research and development expenditures are reduced, its financial condition, business and results of operations will be materially adversely affected.

Advanced Circuits customers compete in markets that are characterized by rapidly changing technology, evolving industry standards and continuous improvement in products and services. These conditions frequently result in short product life cycles. As professionals operating in research and development departments represent the majority of Advanced Circuits net sales, the rapid development of electronic products is a key driver of Advanced Circuits sales and operating performance. Any decline in the development and introduction of new electronic products could slow the demand for Advanced Circuits services and could have a material adverse effect on its financial condition, business and results of operations.

Electronics manufacturing services corporations are increasingly acting as intermediaries, positioning themselves between PCB manufacturers and OEMS, which could reduce operating margins.

Advanced Circuits OEM customers are increasingly outsourcing the assembly of equipment to third party manufacturers. These third party manufacturers typically assemble products for multiple customers and often purchase circuit boards from Advanced Circuits in larger quantities than OEM manufacturers. The ability of Advanced Circuits to sell products to these customers at margins comparable to historical averages is uncertain. Any material erosion in margins could have a material adverse effect on Advanced Circuits financial condition, business and results of operations.

Risks Related to American Furniture Manufacturing

Competition from larger furniture manufacturers may adversely affect American Furniture Manufacturing s business and operating results.

The residential upholstered furniture industry is highly competitive. Certain of American Furniture Manufacturing s competitors are larger, have broader product lines and offer widely-advertised, well-known, branded products. If such larger competitors introduce additional products in the promotional segment of the upholstered furniture market, the segment in which American Furniture Manufacturing primarily participates, it may negatively impact American Furniture Manufacturing s market share and financial performance.

The recent economic downturn has impacted AFM s ability to meet the financial covenant requirements of its credit facility pursuant to which we are the lender. We are both the majority shareholder and lender to AFM and further deterioration in the business environment in which AFM operates could affect our relationship with AFM.

AFM s results of operations are affected by many economic factors, including the level of economic activity in the markets in which AFM operates. The retail promotional furniture business has been impacted by a variety of factors relating to the recent economic downturn, including high unemployment, lack of consumer credit, increased fuel costs and the depressed housing market. To ensure on-going compliance with the financial covenants of AFM s credit facility, we, in our capacity as the majority shareholder of AFM, contributed equity proceeds of approximately \$1.6 million in 2013. While we continue to be confident in AFM s ability to execute on its business strategy, if unfavourable economic conditions continue to challenge the furniture industry we may seek strategic alternatives with respect to our investment in AFM.

Table of Contents

Risks Related to Arnold

Changes in the cost and availability of certain rare earth minerals and magnets could materially harm Arnold's business, financial condition and results of operations.

Arnold manufactures precision magnetic assemblies and high-performance rare earth magnets including Samarium Cobalt magnets. Arnold is especially susceptible to changes in the price and availability of certain rare earth materials. The price of these materials has fluctuated significantly in recent years and we believe price fluctuations are likely to occur in the future. Arnold's need to maintain a continuing supply of rare earth materials makes it difficult to resist price increases and surcharges imposed by its suppliers. Arnold's ability to pass increases in costs for such materials through to its customers by increasing the selling prices of its products is an important factor in Arnold's business. We cannot guarantee that Arnold will be able to maintain an appropriate differential at all times. If costs for rare earth materials increase, and if Arnold is unable to pass along, or is delayed in passing along, those increases to its customers, Arnold will experience reduced profitability. Rare earth minerals and magnets are available from a limited number of suppliers, primarily in China. Political and civil instability and unexpected adverse changes in laws or regulatory requirements, including with respect to export duties, quotas or embargoes, may affect the market price and availability of rare earth materials, particularly from China. If a substantial interruption should occur in the supply of rare earth materials, Arnold may not be able to obtain other sources of supply in a timely fashion, at a reasonable price or as would be necessary to satisfy its requirements. Accordingly, a change in the supply of, or price for, rare earth minerals and magnets could materially harm Arnold's business, financial condition and results of operations.

Risks Related to Tridien

Certain of Tridien's products are subject to regulation by the FDA.

Certain of Tridien's mattress products are Class II devices within Section 201(h) of the Federal FDCA (21 USC §321(h)), and, as such, are subject to the requirements of the FDCA and certain rules and regulations of the FDA. Prior to our acquisition of Tridien, one of its subsidiaries received a warning letter from the FDA in connection with certain deficiencies identified during a regular FDA audit, including noncompliance with certain design control requirements, certain of the good manufacturing practice regulations defined in 21 C.F.R. 820 and certain record keeping requirements. Tridien's subsidiary has undertaken corrective measures to address the deficiencies and continues to fully cooperate with the FDA. Tridien is vulnerable to actions that may be taken by the FDA which have a material adverse effect on Tridien and/or its business. The FDA has the authority to inspect without notice, and to take any disciplinary action that it sees fit.

A change in Medicare Reimbursement Guidelines may reduce demand for Tridien's products.

Certain changes in Medicare Reimbursement Guidelines may reduce demand for medical support surfaces and have a material effect on Tridien's operating performance.

Two of Tridien's largest customers represented approximately 50% of its gross sales in 2013.

Tridien has significant exposure to two key customers. The loss of either customer could negatively impact Tridien's financial condition, business and results of operations.

Section 4191 of the Internal Revenue Code imposes a 2.3% excise tax on the sale of certain medical devices (MDET) by the manufacturer or importer of the device beginning January 1, 2013.

The majority of Tridien's customers either qualify for the retail exemption under the MDET or are considered the manufacturers of the product, with Tridien acting as the subcontractor, in which case Tridien's customer is responsible for the MDET. If Tridien is unable to continue to pass the MDET on to its customers, such tax may have a material adverse effect on gross profit, operating income and cash flow.

Table of Contents

ITEM 1B. UNRESOLVED STAFF COMMENTS

NONE

Table of Contents

ITEM 2. PROPERTIES

CamelBak

CamelBak's headquarters is located in Petaluma, California where they lease approximately 33,000 square feet of office space and an additional 1,000 square feet of storage space. CamelBak also leases manufacturing and warehouse facilities in San Diego, California (124,000 square feet) and Tijuana, Mexico (53,000 square feet), and office space in Mareveles, Phillipines (10,000 square feet) and in Bassano, Italy (1,400 square feet).

Ergobaby

Ergobaby operates out of five offices. Its corporate headquarters is in Los Angeles, California where it leases 8,800 square feet. Ergobaby's European headquarters is located in Hamburg, Germany where it leases approximately 2,411 square feet and a sales office in Paris, France. Ergobaby also leases 2,426 square feet of office space in Pukalani, Hawaii. Orbit Baby leases 41,400 square feet of office, manufacturing and warehouse space in Newark, California.

FOX

FOX leases its corporate headquarters which is located in a 51,000 square foot facility in Scotts Valley, California and leases the main manufacturing facility which is located in an 86,000 square foot facility in Watsonville, California. In addition, FOX leases three other smaller facilities totaling approximately 86,000 square feet in the surrounding Santa Cruz California area and approximately 9,300 feet of office space in Baxter, Minnesota. Internationally, FOX leases a 28,000 square foot sales and manufacturing facility in Taichung, Taiwan and approximately 10,000 square feet for a sales and service facility in Rodalben, Germany

Liberty Safe

Liberty Safe leases offices and warehouse facilities at two locations in Payson, Utah. The corporate headquarters and manufacturing facility are located in a 204,000 square foot building. Liberty leases two additional warehouse facilities totaling approximately 105,900 square feet.

Advanced Circuits

Advanced Circuits operations are located in an 113,000 square foot building in Aurora, Colorado, a 30,000 square foot building in Tempe, Arizona, and a 50,000 square foot building in Maple Grove, Minnesota. These facilities are leased and comprise both the factory and office space. The lease terms are for approximately 15 years with a renewal option at the Aurora, Colorado location for an additional 10 years.

American Furniture

American Furniture operates primarily from a manufacturing and warehousing facility located in Ecu, MS, of which approximately 750,000 square feet was refurbished in 2008 as a result of damage caused by a fire in 2008. This 1.1 million square foot facility includes 350,000 square feet of manufacturing space, 750,000 square feet of warehouse space and 82 shipping docks. AFM also leases approximately 19,000 square feet of showroom space in High Point, North Carolina, and Las Vegas Nevada allowing it to showcase its products to buyers during trade shows held in those cities.

Arnold

Arnold is headquartered in Rochester, New York and has nine manufacturing facilities. The summary below outlines Arnold's property locations. Arnold owns the Ogallala, NE location and the others are leased.

Table of Contents

Location	Sq. Ft.	Use
Marengo, IL	94,220	Office/Warehouse
Marietta, OH	81,000	Office/Warehouse
Marietta, OH	22,646	Warehouse
Marengo, IL	55,200	Office/Warehouse
Norfolk, NE	109,000	Office/Warehouse
Rochester, NY	73,000	Office/Warehouse
Ogallala, NE	25,000	Office/Warehouse
Guangdong Province, Peoples Republic of China	154,210	Office/Warehouse
Sheffield, England	25,000	Office/Warehouse
Lupfig, Switzerland	58,405	Office/Warehouse
Hanau, Germany	1,092	Office
Crolles, France	538	Office

Tridien

Tridien leases a 33,000 square foot facility in Coral Springs, Florida, which houses its manufacturing and distribution operations for the east coast and an 81,000 square foot facility in Corona, California, which houses the manufacturing and distribution facilities for the west coast. Tridien also leases a 105,000 square foot manufacturing facility and warehouse facility in Fishers, Indiana.

Our corporate offices are located in Westport, Connecticut, where we lease approximately 1,500 square feet from our Manager.

We believe that our properties and the terms of their leases at each of our businesses are sufficient to meet our present needs and we do not anticipate any difficulty in securing additional space, as needed, on acceptable terms.

Table of Contents**Part II****Item 5. Market for Registrants' Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities****Market Information**

Our Trust stock has traded on the New York Stock Exchange (the "NYSE") under the symbol "CODI" since November 1, 2011. Previously, our stock was traded on the NASDAQ Global Select Market under the symbol "CODI." The following table sets forth the high and low sales prices per share as reported NYSE, and thereafter on the NYSE. The highest and lowest sales prices per share of Trust stock were \$12.12 and \$19.64, respectively, for the periods presented below:

Quarter Ended	High	Low	Distribution Declared
December 31, 2013	\$ 19.64	\$ 16.97	\$ 0.36
September 30, 2013	18.94	16.92	0.36
June 30, 2013	17.99	15.68	0.36
March 31, 2013	16.21	14.81	0.36
December 31, 2012	15.70	13.49	0.36
September 30, 2012	15.31	13.72	0.36
June 30, 2012	15.16	12.12	0.36
March 31, 2012	15.58	12.58	0.36

Common Stock Holders

On December 31, 2013 there were 14 registered holders of our common stock. The number of registered holders includes banks and brokers who act as nominees, each of whom may represent more than one shareholder

Table of Contents**COMPARATIVE PERFORMANCE OF SHARES OF TRUST STOCK**

The performance graph shown below compares the change in cumulative total shareholder return on shares of Trust stock with the NASDAQ Stock Market Index, the NASDAQ Other Finance Index, the NYSE Composite Index and the NYSE Financial Sector Index from May 16, 2006, when we completed our initial public offering, through the quarter ended December 31, 2013. The graph sets the beginning value of shares of Trust stock and the indices at \$100, and assumes that all quarterly dividends were reinvested at the time of payment. This graph does not forecast future performance of shares of Trust stock.

Table of Contents**Distributions**

For the years 2013 and 2012 we have declared and paid quarterly cash distributions to holders of record as follows:

Quarter Ended	Declaration Date	Payment Date	Distribution Per Share
December 31, 2013	January 9, 2014	January 30, 2014	\$ 0.36
September 30, 2013	October 10, 2013	October 30, 2013	\$ 0.36
June 30, 2013	July 10, 2013	July 30, 2013	\$ 0.36
March 31, 2013	April 9, 2013	April 30, 2013	\$ 0.36
December 31, 2012	January 10, 2013	January 31, 2013	\$ 0.36
September 30, 2012	October 9, 2012	October 31, 2012	\$ 0.36
June 30, 2012	July 10, 2012	July 31, 2012	\$ 0.36
March 31, 2012	April 10, 2012	April 30, 2012	\$ 0.36

We currently intend to continue to declare and pay regular quarterly cash distributions on all outstanding shares through fiscal 2014. See Management's Discussion and Analysis of Financial Condition and Results of Operations Liquidity and Capital Resources in Part II, Item 7.

Table of Contents**ITEM 6. SELECTED FINANCIAL DATA**

The following table sets forth selected historical and other data of the Company and should be read in conjunction with the more detailed consolidated financial statements included elsewhere in this report. Selected financial data below includes the results of operations, cash flow and balance sheet data of the Company for the years ended December 31, 2013, 2012, 2011, 2010 and 2009. We completed our IPO on May 16, 2006 and used the proceeds of the IPO and separate private placement transactions that closed in conjunction with our IPO, and from our Prior Credit Agreement, to purchase controlling interests in four of our initial operating subsidiaries. The following table details our acquisitions and dispositions subsequent to our IPO.

Acquisitions:	Acquisition Date	Disposition Date
Advanced Circuits ⁽¹⁾	May 16, 2006	n/a
Staffmark ⁽¹⁾	May 16, 2006	October 17, 2011
Crosman ⁽¹⁾	May 16, 2006	January 5, 2007
Silvue ⁽¹⁾	May 16, 2006	June 25, 2008
Tridien	August 1, 2006	n/a
Aeroglide	February 28, 2007	June 24, 2008
HALO	February 28, 2007	May 1, 2012
American Furniture	August 31, 2007	n/a
FOX	January 4, 2008	n/a
Liberty	March 31, 2010	n/a
Ergobaby	September 16, 2010	n/a
CamelBak	August 24, 2011	n/a
Arnold Magnetics	March 5, 2012	n/a

⁽¹⁾ Represent initial operating subsidiaries.

Table of Contents

The operating results for HALO are reflected as discontinued operations in 2012, 2011, 2010 and 2009 and are not included in the continuing operations data below. The operating results for Staffmark are reflected as discontinued operations in 2011, 2010 and 2009 and are not included in the continuing operations data below. Data included below only includes activity in our operating subsidiaries from their respective dates of acquisition.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

*This Item 7 contains forward-looking statements. Forward-looking statements in this Annual Report on Form 10-K are subject to a number of risks and uncertainties, some of which are beyond our control. Our actual results, performance, prospects or opportunities could differ materially from those expressed in or implied by the forward-looking statements. Additional risks of which we are not currently aware or which we currently deem immaterial could also cause our actual results to differ, including those discussed in the sections entitled **Forward-Looking Statements** and **Risk Factors** included elsewhere in this Annual Report.*

Overview

Compass Diversified Holdings, a Delaware statutory trust, was incorporated in Delaware on November 18, 2005. Compass Group Diversified Holdings, LLC, a Delaware limited liability Company, was also formed on November 18, 2005. In accordance with the Trust Agreement, the Trust is sole owner of 100% of the Trust Interests (as defined in the LLC Agreement) of the Company and, pursuant to the LLC Agreement, the Company has outstanding, the identical number of Trust Interests as the number of outstanding shares of the Trust. Sostratus LLC owns all of our Allocation Interests. The Company is the operating entity with a board of directors and other corporate governance responsibilities, similar to that of a Delaware corporation.

The Trust and the Company were formed to acquire and manage a group of small and middle-market businesses headquartered in North America. We characterize small and middle market businesses as those that generate annual cash flows of up to \$60 million. We focus on companies of this size because we believe that these companies are more able to achieve growth rates above those of their relevant industries and are also frequently more susceptible to efforts to improve earnings and cash flow.

In pursuing new acquisitions, we seek businesses with the following characteristics:

North American base of operations;

stable and growing earnings and cash flow;

maintains a significant market share in defensible industry niche (i.e., has a reason to exist);

solid and proven management team with meaningful incentives;

low technological and/or product obsolescence risk; and

a diversified customer and supplier base.

Our management team's strategy for our subsidiaries involves:

utilizing structured incentive compensation programs tailored to each business in order to attract, recruit and retain talented managers to operate our businesses;

regularly monitoring financial and operational performance, instilling consistent financial discipline, and supporting management in the development and implementation of information systems to effectively achieve these goals;

Edgar Filing: Compass Diversified Holdings - Form 10-K

assisting management in their analysis and pursuit of prudent organic cash flow growth strategies (both revenue and cost related);

identifying and working with management to execute attractive external growth and acquisition opportunities; and

forming strong subsidiary level boards of directors, including independent directors, to supplement management in their development and implementation of strategic goals and objectives.

Table of Contents

Based on the experience of our management team and its ability to identify and negotiate acquisitions, we believe we are well positioned to acquire additional attractive businesses. Our management team has a large network of approximately 2,000 deal intermediaries to whom it actively markets and who we expect to expose us to potential acquisitions. Through this network, as well as our management team's active proprietary transaction sourcing efforts, we typically have a substantial pipeline of potential acquisition targets. In consummating transactions, our management team has, in the past, been able to successfully navigate complex situations surrounding acquisitions, including corporate spin-offs, transitions of family-owned businesses, management buy-outs and reorganizations. We believe the flexibility, creativity, experience and expertise of our management team in structuring transactions provides us with a strategic advantage by allowing us to consider non-traditional and complex transactions tailored to fit a specific acquisition target.

In addition, because we intend to fund acquisitions through the utilization of our Revolving Credit Facility, we do not expect to be subject to delays in or conditions by closing acquisitions that would be typically associated with transaction specific financing, as is typically the case in such acquisitions. We believe this advantage is a powerful one and is highly unusual in the marketplace for acquisitions in which we operate.

Initial public offering and Company formation

On May 16, 2006, we completed our initial public offering of 13,500,000 shares of the Trust at an offering price of \$15.00 per share (the "IPO"). Subsequent to the IPO the Company's board of directors engaged our Manager to externally manage the day-to-day operations and affairs of the Company, oversee the management and operations of the businesses and to perform those services customarily performed by executive officers of a public company.

From May 16, 2006 through December 31, 2013, we purchased thirteen businesses (each of our businesses is treated as a separate operating segment) and disposed of five as follows:

Acquisitions

On May 16, 2006, we made loans to and purchased a controlling interest in CBS Personnel Holdings for \$55 million and later Staffmark Holdings, Inc., which we refer to as Staffmark, for approximately \$129 million.

On May 16, 2006, we made loans to and purchased a controlling interest in Crosman for approximately \$73 million.

On May 16, 2006, we made loans to and purchased a controlling interest in Advanced Circuits for approximately \$81 million. As of December 31, 2013, we own approximately 69.4% of the common stock on a primary basis and 69.4% on a fully diluted basis.

On May 16, 2006, we made loans to and purchased a controlling interest in Silvue for approximately \$36 million.

On August 1, 2006, we made loans to and purchased a controlling interest in Tridien for approximately \$31 million. As of December 31, 2013, we own approximately 81.3% of the common stock on a primary basis and 66.5% on a fully diluted basis.

On February 28, 2007, we made loans to and purchased a controlling interest in Aeroglide for approximately \$58 million.

On February 28, 2007, we made loans to and purchased a controlling interest in HALO for approximately \$62 million.

On August 31, 2007, we made loans to and purchased a controlling interest in American Furniture for approximately \$97 million. As of December 31, 2013, we own approximately 99.9% of the common stock on a primary basis and 99.9% on a fully diluted basis.

Edgar Filing: Compass Diversified Holdings - Form 10-K

On January 4, 2008, we made loans to and purchased a controlling interest in FOX for approximately \$80.4 million. As of December 31, 2013, we own approximately 53.9% of the common stock on a primary basis and 49.8% on a fully diluted basis.

On March 31, 2010, we made loans to and purchased a controlling interest in Liberty Safe for approximately \$70.2 million. As of December 31, 2013 we own approximately 96.2% on a primary basis and 84.8% on a fully diluted basis.

Table of Contents

On September 16, 2010, we made loans to and purchased a controlling interest in *Ergobaby* for approximately \$85.2 million. As of December 31, 2013, we own approximately 81.0% on a primary basis and 75.0% on a fully diluted basis.

On August 24, 2011, we made loans to and purchased a controlling interest in *CamelBak* for approximately \$211.6 million. As of December 31, 2013, we own approximately 89.9% on a primary basis and 79.7% on a fully diluted basis.

On March 5, 2012, we made loans to and purchased a controlling interest in *Arnold Magnetics* for approximately \$128.8 million. As of December 31, 2013, we own approximately 96.7% on a primary basis and 87.2% on a fully diluted basis.

Dispositions

On January 5, 2007, we sold all of our interest in Crosman, for approximately \$143 million. We recorded a gain on the sale in the first quarter of 2007 of approximately \$36 million.

On June 24, 2008, we sold all of our interest in Aeroglide, for approximately \$95 million. We recorded a gain on the sale in the second quarter of 2008 of approximately \$34 million.

On June 25, 2008, we sold all of our interest in Silvue, for approximately \$95 million. We recorded a gain on the sale in the second quarter of 2008 of approximately \$39 million.

On October 17, 2011, we sold our interest in Staffmark for approximately \$217.2 million. We recorded a gain on the sale in the fourth quarter of 2011 of approximately \$89 million.

On May 1, 2012, we sold our interest in HALO for approximately \$66.0 million. We recorded a loss on the sale of \$0.5 million in 2012.

In addition, FOX completed an IPO of its common stock in August 2013 in which we sold a 22% interest in FOX receiving net proceeds totaling \$80.9 million.

We are dependent on the earnings of, and cash receipts from, the businesses that we own in order to meet our corporate overhead and management fee expenses and to pay distributions. These earnings and distributions, net of any non-controlling interest in these businesses, are available to:

meet capital expenditure requirements, management fees and corporate overhead charges;

fund distributions from the businesses to the Company; and

be distributed by the Trust to shareholders.

2013 Highlights

Debt Re-pricings

Edgar Filing: Compass Diversified Holdings - Form 10-K

On April 3, 2013, we exercised an option to increase the Term Loan Facility by \$30 million. Net proceeds from this incremental term loan were used to reduce outstanding loans on the Revolving Credit Facility. In connection with the increase, we amended the pricing of the Credit Facility wherein borrowings under the Term Loan Facility now bear interest at LIBOR plus 4.0% with a floor of 1.0% and borrowings under the Revolving Credit Facility now bear interest at LIBOR plus 2.5% 3.5%. In addition, the amendment provides for a reduction in commitment fees on revolving loan availability to 0.75% and extended the maturity date on the Revolving Credit Facility to April 2017. All other material terms of the Credit Facility remain unchanged. We incurred fees of approximately \$1.9 million.

On August 6, 2013, we exercised an option under our credit agreement to expand our Revolving Credit Facility by \$30 million, increasing the total amount available under the facility to \$320 million subject to borrowing base restrictions. We intend to utilize the incremental borrowing capacity under the Revolving Credit Facility to fund future growth opportunities and provide for working capital and general corporate purposes.

FOX IPO

On August 13, 2013 FOX completed an initial public offering of its common stock pursuant to a registration statement on Form S-1. In the FOX IPO, FOX sold 2,857,143 shares and certain of its shareholders sold 7,000,000 shares (including 5,800,238 shares held by CODI) at an initial offering price of \$15.00 per share. FOX trades on the NASDAQ stock market under the ticker FOXF . We received approximately \$80.9 million in net proceeds from the sale of our FOX shares. FOX used a portion of their net proceeds received from the sale of their shares as well as proceeds from a new credit facility with a third party lender to repay \$61.5 million in outstanding indebtedness to us under their existing credit facility.

Table of Contents

As a result of the FOX IPO, we currently own approximately 53.9% of the outstanding shares of FOX common stock.

2013 Distributions

For the 2013 fiscal year we declared distributions to our shareholders totaling \$1.44 per share.

Areas of focus in 2014

The areas of focus for 2014, which are generally applicable to each of our businesses, include:

Taking advantage, where possible to increase market share in each of our market niche leading companies at the expense of less well capitalized competitors;

Achieving sales growth, technological excellence and manufacturing capability through global expansion;

Continuing to grow through disciplined, strategic acquisitions and rigorous integration processes;

Continuing to pursue expense reduction and cost savings through contraction in discretionary spending, and reductions in workforce and production levels in response to lower production volume; and

Driving free cash flow through increased net income and effective working capital management enabling continued investment in our businesses, strategic acquisitions, and enabling us to return value to our shareholders.

Middle market deal flow decreased during 2013 relative to 2012, with tax considerations driving activity in 2012 and in some cases accelerating the timing of transactions that otherwise may have occurred in 2013. Valuation levels for high quality acquisitions remain robust due to well capitalized strategic and financial buyers seeking to deploy equity capital coupled with the availability of debt financing with attractive terms. We are cautiously optimistic that our deal flow will increase in 2014 given generally high valuations for sellers, coupled with certain marketing initiatives we are currently undertaking.

Results of Operations

We were formed on November 18, 2005 and acquired our existing businesses (segments) as follows:

May 16, 2006 Advanced Circuits	August 1, 2006 Tridien	August 31, 2007 American Furniture	January 4, 2008 Fox	March 31, 2010 Liberty Safe	September 16, 2010 Ergobaby
August 24, 2011 CamelBak	March 5, 2012 Arnold				

Fiscal 2013, 2012 and 2011 each represent a full year of operating results included in our consolidated results of operations for six of our businesses. The remaining two businesses were acquired during fiscal 2012 and 2011 (see table above). As a result, we cannot provide a meaningful comparison of our actual historical consolidated results of operations for the year ended December 31, 2013 with the prior pre-acquisition years. In the following results of operations, we provide (i) our actual Consolidated Results of Operations for the years ended December 31, 2013, 2012 and 2011, which includes the historical results of operations of each of our businesses (operating segments) from the date of acquisition and (ii) comparative historical results of operations for each of our businesses on a stand-alone basis (Results of Operations Our Businesses), for each of the years ended December 31, 2013, 2012 and 2011, where all years presented include relevant pro-forma adjustments for pre-acquisition periods and explanations where applicable.

Table of Contents**Consolidated Results of Operations Compass Diversified Holdings**

<i>(in thousands)</i>	Years Ended December 31,		
	2013	2012	2011
Net sales	\$ 985,539	\$ 884,721	\$ 606,644
Cost of sales (1)	679,708	605,867	427,500
Gross profit	305,831	278,854	179,144
Selling, general and administrative expense (1)	167,738	161,141	110,031
Management fees	18,632	17,633	16,283
Supplemental put expense (reversal) (2)	(45,995)	15,995	11,783
Amortization of intangibles	29,632	30,268	22,072
Impairment expense	12,918		27,769
Operating income (loss)	\$ 122,906	\$ 53,817	\$ (8,794)

- (1) We reclassified certain costs from selling, general and administrative expense to cost of sales totaling \$6.6 million in 2011 which are related to AFM's revaluation of its standard costing system. Refer to AFM's Results of Operations discussion that follows for more information.
- (2) Refer to Liquidity and Capital Resources Termination of Supplemental Put Agreement for more detail surrounding this transaction.

Net sales

On a consolidated basis, net sales increased by approximately \$100.8 million or 11.4% for the year ended December 31, 2013 when compared to 2012. Meaningful sales increases at American Furniture (\$13.4 million), FOX (\$36.9 million) and Liberty (\$34.9 million) together with incremental 2013 sales at Arnold, our 2012 acquisition (\$20.3 million), were offset in part by a decrease in sales at CamelBak (\$17.7 million). The increase in sales at our three other businesses account for the remaining increase in sales for the year ended December 31, 2013 compared to the same period in 2012. Refer to Results of Operations Our Businesses for a more detailed analysis of net sales by business segment.

On a consolidated basis, net sales increased \$278.1 million for the year ended December 31, 2012 compared to 2011. The increase is due principally to increased revenues (and in the case of Arnold Magnetics and CamelBak, incremental revenues) at each of our segments with the exception of American Furniture and Tridien. We realized revenues in the year ended December 31, 2012 totaling approximately \$104.2 million and \$157.6 million at Arnold Magnetics and CamelBak, respectively, which we acquired in March 2012 and August 2011, respectively, compared to \$42.6 million in revenues recognized at CamelBak over the last four months of 2011. Refer to Results of Operations Our Businesses for a more detailed analysis of net sales for each business segment.

We do not generate any revenues apart from those generated by the businesses we own. We may generate interest income on the investment of available funds, but expect such earnings to be minimal. Our investment in our businesses is typically in the form of loans from the Company to such businesses, as well as equity interests in those businesses. Cash flows coming to the Trust and the Company are the result of interest payments on those loans, amortization of those loans and, in some cases, dividends on our equity ownership. However, on a consolidated basis these items will be eliminated.

Cost of sales

On a consolidated basis, cost of sales increased approximately \$73.8 million during the year ended December 31, 2013 compared to the corresponding period in 2012. This increase is due almost entirely to the corresponding increase in net sales referred to above. Gross profit as a percentage of sales decreased approximately 50 basis points in the twelve months ended December 31, 2013 compared to the same period in 2012 which is principally the result of the decrease in CamelBak's sales in 2013, which carry a higher margin than each of those businesses which showed meaningful sales increases in 2013.

Table of Contents

On a consolidated basis, cost of sales increased approximately \$178.4 million for the year ended December 31, 2012, compared to 2011. This increase is due almost entirely to the corresponding increase in net sales. Gross profit as a percentage of net sales increased approximately 110 basis points in the year ended December 31, 2012 compared to 2011. The increase in gross profit as a percentage of sales for the year ended December 31, 2012 compared to the same period in 2011 is principally attributable to the inclusion of the incremental CamelBak net sales in 2012. CamelBak gross profit margin during the year ended December 31, 2012 was approximately 46%. Refer to Results of Operations Our Businesses for a more detailed analysis of cost of sales for each business segment.

Selling, general and administrative expense

On a consolidated basis, selling, general and administrative expense increased approximately \$6.6 million during the year ended December 31, 2013 compared to the corresponding period in 2012. This increase is principally due to increased costs at those businesses which experienced the most significant top line sales growth during the twelve months ended December 31, 2013 compared to 2012 (FOX and Liberty). Refer to Results of Operations Our Businesses for a more detailed analysis of selling, general and administrative expense by business segment. At the corporate level, general and administrative expense increased \$1.2 million during year ended December 31, 2013 compared to the same period in 2012 principally as a result of increases in legal and professional fees (\$0.8 million) and unsuccessful acquisition transaction costs (\$0.4 million).

On a consolidated basis, selling, general and administrative expense increased approximately \$51.1 million for the year ended December 31, 2012, compared to the same period in 2011. The majority of the increase is due to increases in costs directly tied to sales, such as commissions and direct customer support services, and incremental selling, general and administrative costs over the prior year at Ergobaby's Orbit Baby segment, Arnold Magnetics and CamelBak during 2012 (\$44.6 million). At the corporate level, general and administrative costs increased approximately \$2.3 million for the year ended December 31, 2012 compared to the same period in 2011. The year over year increase in 2012 is due principally to (i) a non-cash charge totaling approximately \$1.2 million related to the decrease in the fair value of a call option granted to the former CEO of Tridien which was written down in 2011; (ii) increased audit fees in connection with the Arnold acquisition (\$0.7 million); and increased salaries and wages (\$0.3 million). Refer to Results of Operations Our Businesses, for a more detailed analysis of selling, general and administrative expense by segment.

Management fees

Pursuant to the Management Services Agreement, we pay CGM a quarterly management fee equal to 0.5% (2.0% annually) of our consolidated adjusted net assets. We accrue for the management fee on a quarterly basis. For the year ended December 31, 2013 and 2012 these costs increased by \$1.0 million and \$1.3 million, respectively.

For the years ended December 31, 2013, 2012 and 2011 we incurred approximately \$18.6 million, \$17.6 million and \$16.3 million respectively, in expense for these fees. The increase in management fees for the year ended December 31, 2013 compared to the same period in 2012 is principally due to proceeds from the FOX IPO. The increase in management fees for the year ended December 31, 2012 compared to the same period in 2011 is due principally to the increase in consolidated net assets as of December 31, 2012 in connection with the Arnold Magnetics acquisition in March 2012.

Refer to Related Party Transactions and Certain Transactions Involving our Businesses for more information about the MSA.

Supplemental put expense

On July 1, 2013, we terminated the Supplemental Put Agreement with our Manager. As a result of the termination of the Supplemental Put Agreement, we derecognized the supplemental put liability associated with the Manager's put right, reversing the entire \$61.3 million liability at July 1, 2013 through supplemental put expense on the consolidated statement of operations during the year ended December 31, 2013.

Table of Contents

Refer to **Related Party Transactions and Certain Transactions Involving our Businesses** and **Critical Accounting Estimates** for more information about the Supplemental Put Agreement.

Impairment expense

During the second fiscal quarter of 2013, one of Tridien's largest customers lost a large contract program that was being serviced substantially with Tridien product. The expected lost sales and net income were significant enough to trigger an interim goodwill and indefinite-lived asset impairment analysis. The result of these analyses supported the carrying value of goodwill but indicated that sales of product, reliant on trade names, could not fully support the carrying value of Tridien's trade names. As such we wrote down the value of the trade names by \$0.9 million to a carrying value of approximately \$0.6 million at that time. At December 31, 2013, further revenue decreases together with a revised 2014 forecast that indicated little to no growth prompted an additional interim impairment analysis as of December 31, 2013. The result of the year end goodwill impairment analysis (step 1) indicated that goodwill was impaired. Further testing (step 2) resulted in the following; (i) goodwill was written down \$11.5 million to a balance of \$16.8 million; (ii) trade names were written down \$0.4 million to a balance of \$0.2 million and; (iii) technology assets were written down \$0.1 million to a balance of \$0.8 million. The result of the Step 2 analyses is preliminary and based on various selected market data and comparable company's results. To the extent that the final analysis contains revised and/or updated assumptions the impairment charge will change.

We incurred an impairment charge at American Furniture in the years ended December 31, 2011 totaling approximately \$27.8 million. American Furniture incurred an impairment charge to its goodwill (\$5.9 million), trade name (\$2.4 million), and long-lived assets (\$18.4 million) aggregating \$26.7 million during the year ended December 31, 2011, which was triggered based on results of operations which had deteriorated significantly during the year. In addition, in connection with the cessation and outsourcing of AFM's internal trucking operations we reclassified a number of trucks, trailers and a warehouse from property, plant and equipment to assets held for sale. In connection with this we wrote these assets down from their net book value to an amount equal to their net realizable value less disposal costs with the difference, aggregating approximately \$1.1 million, being charged to impairment expense.

Results of Operations Our Businesses

As previously discussed, we acquired our businesses on various acquisition dates beginning May 16, 2006 (see table above). As a result, our consolidated operating results only include the results of operations since the acquisition date associated with each of our businesses in accordance with Generally Accepted Accounting Principles. The following discussion reflects a comparison of the historical results of operations for each of our initial businesses (segments), together with the 2007, 2008, 2010 and 2011 and 2012 acquisitions for the complete fiscal years ending December 31, 2013, 2012 and 2011. For the 2011 and 2012 acquisitions, the following discussion reflects comparative pro-forma results of operations for the entire fiscal years ending December 31, 2012 and 2011 as if we had acquired the businesses on January 1, 2011. Where appropriate, relevant pro-forma adjustments are reflected as part of the historical operating results. Adjustments to depreciation and amortization resulting from purchase allocation step ups that are not pushed down to a business are not included as a component of operating results. We believe this presentation enhances the discussion and provides a more meaningful comparison of operating results. The following operating results of our businesses are not necessarily indicative of the results to be expected for a full year, going forward.

We categorize the businesses we own into two separate groups of businesses (i) branded product businesses and, (ii) niche industrial businesses. Branded product businesses are characterized as those businesses that we believe capitalize on a valuable brand name in their respective market sector. We believe that our branded product businesses are leaders in their particular product category. Niche industrial businesses are characterized as those businesses that focus on manufacturing and selling particular products within a specific market sector. We believe that our niche industrial businesses are leaders in their specific market sector.

Table of Contents**Branded Products Businesses****CamelBak****Overview**

CamelBak, headquartered in Petaluma, California, is a premier designer and manufacturer of personal hydration products for outdoor, recreation and military applications. CamelBak offers a broad range of recreational and military personal hydration packs, reusable water bottles, specialty military gloves and performance accessories.

As the leading supplier of hydration products to specialty outdoor, cycling and military retailers, CamelBak maintains the leading market share position in recreational markets for hands-free hydration packs and the leading market share position for reusable water bottles in specialty channels. CamelBak is also the dominant supplier of hydration packs to the military, with a leading market share in post-issue hydration packs. Over its more than 20-year history, CamelBak has developed a reputation as the preferred supplier for the hydration needs of the most demanding athletes and warfighters. Across its markets, CamelBak is respected for its innovation, leadership and authenticity.

On August 24, 2011, we made loans to, and purchased a controlling interest in, CamelBak for approximately \$258.6 million, representing approximately 90% of the equity in CamelBak.

Results of Operations

The table below summarizes the results of operations for CamelBak for the full fiscal years ended December 31, 2013, 2012 and the pro-forma results of operations for 2011. We acquired CamelBak on August 24, 2011. The following operating results are reported as if we acquired CamelBak on January 1, 2011.

<i>(in thousands)</i>	Year ended December 31,		
	2013	2012	2011 (Pro-forma)
Net sales	\$ 139,943	\$ 157,632	\$ 141,286
Cost of sales (a)	78,588	85,424	82,999
Gross profit	61,355	72,208	58,287
Selling, general and administrative expenses (b)	33,958	36,829	30,475
Management fees (c)	500	500	500
Amortization of intangibles (d)	8,978	9,378	9,313
Income from operations	\$ 17,919	\$ 25,501	\$ 17,999

Pro-forma results of operations of CamelBak for the annual period ended December 31, 2011 includes the following pro-forma adjustments applied to historical results:

- Cost of sales for the year ended December 31, 2011 does not include \$6.1 million of amortization expense associated with the inventory fair value step-up recorded in 2011 as a result of and derived from the purchase price allocation in connection with our purchase of CamelBak.
- Selling, general and administrative costs were reduced by approximately \$7.0 million in the year ended December 31, 2011, representing an adjustment for one-time transaction costs incurred as a result of our purchase.
- Represents management fees that would have been payable to the Manager.
- Reflects an increase in amortization of intangible assets totaling \$5.6 million in 2011. This adjustment is a result of and was derived from the purchase price allocation in connection with our acquisition of CamelBak.

Table of Contents

Year Ended December 31, 2013 Compared to the Year Ended December 31, 2012

Net sales

Net sales for the year ended December 31, 2013 were approximately \$139.9 million, a decrease of \$17.7 million, or 11.2%, compared to the same period in 2012. The decrease in gross sales is a result of decreased sales in Hydration Systems (\$17.2 million) and Gloves (\$5.5 million), offset in part by an increase in Bottle sales (\$4.6 million) and Accessories (\$0.2 million). The increase in Bottle sales during the year ended December 31, 2013 compared to the same period in 2012 is attributable to the expansion of offerings in Bottles, such as eddy™, Chute and the re-design Podium line of insulated bottles, and the continued expansion in its customer base, including new and existing customers. The decrease in sales in Hydration Systems in the year ended December 31, 2013 compared to the same period of 2012 is primarily due to substantial sales to the United States Marine Corps (the Marine Corps) as part of their pack program during the year ended December 31, 2012. The Marine Corps contract was substantially fulfilled in the first quarter of 2013. Sales attributable to the Marine Corps contract were \$13.2 million higher in 2012 than they were in 2013. To a lesser extent, cooler weather patterns during the second quarter of 2013, we believe, may have had a negative impact on sales to recreational Hydration System customers during that period that were not replaced by sales in subsequent quarters. The decrease in Glove sales in the year ended December 31, 2013 compared to the same period in 2012 is principally due to continuing decreased demand from the U.S. Military as a result of the drawdown of U.S. combat troops.

Sales of Hydration Systems and Bottles represented approximately 86% of gross sales for the year ended December 31, 2013 compared to 84% for the same period in 2012. Military sales were approximately 29% of gross sales for the year ended December 31, 2013 compared to 38% for the same period in 2012. International sales were approximately 22% of gross sales for the year ended December 31, 2013 compared to 19% for the same period in 2012.

Cost of sales

Cost of sales for the year ended December 31, 2013 were approximately \$78.6 million compared to approximately \$85.4 million in the same period of 2012. The decrease of \$6.8 million is due principally to the corresponding decrease in net sales. Gross profit as a percentage of sales decreased to 43.8% for the year ended December 31, 2013 compared to 45.8% in the comparable period ended December 31, 2012. The decrease is attributable to: (i) an unfavorable sales mix in Hydration Systems and Accessories offset in part by a favorable sales mix in Bottle sales during the year ended December 31, 2013 compared to the same period in 2012, and (ii) discounted Glove sales in 2013.

Selling, general and administrative expense

Selling, general and administrative expense for the year ended December 31, 2013 decreased \$2.9 million to approximately \$34.0 million or 24.3% of net sales compared to \$36.8 million or 23.4% of net sales for the same period of 2012 due primarily to a decrease in incentive compensation expense and sales commissions.

Income from operations

Income from operations for the year ended December 31, 2013 was approximately \$17.9 million, a decrease of \$7.6 million when compared to the same period in 2012, based primarily on the decrease in net sales and other factors described above.

Year Ended December 31, 2012 Compared to the Pro Forma Year Ended December 31, 2011

Net sales

Net sales for the year ended December 31, 2012 were approximately \$157.6 million, an increase of \$16.3 million, or 11.6%, when compared to the same period in 2011. The increase in net sales is a result of increased gross sales in Hydration Systems (\$17.3 million) and Bottles (\$10.7 million) offset in part by a decrease in sales of Gloves (\$10.3 million) and Accessories (\$0.5 million). The increased Bottle and Hydration Systems sales during the year ended December 31, 2012 compared to the same period in 2011 is attributable to the continued success of

Table of Contents

Antidote™, CamelBak's new reservoir for the recreational Hydration Systems line, introduced in 2010, the expansion of offerings in Bottles, such as eddy™, the introduction of the Podium line of insulated bottles, and the continued expansion in its customer base, including new and existing customers, for all product lines. CamelBak began providing Hydration Systems as a subcontractor as part of the Marine Corps pack program beginning at the end of 2011 which accounted for a substantial portion of the increase in Hydration Systems sales in the year ended December 31, 2012 compared to the same period in 2011. CamelBak anticipates completion of this contract during the first quarter of 2013. The decrease in Glove sales during the year ended December 31, 2012 compared to the same period in 2011 is due to decreased demand from the U.S. military, resulting principally from a drawdown of U.S. combat troops during the period and the absence of sales from a direct contract with the U.S. Military that was not in effect in 2012 and 2013.

Sales of Hydration Systems and Bottles represented approximately 84% of gross sales for the year ended December 31, 2012 compared to 75% for the same period in 2011. Military sales represented approximately 38% of gross sales for the year ended December 31, 2012 compared to 41% for the same period in 2011. International sales represented approximately 19% of gross sales for each of the years ended December 31, 2012 and 2011.

Cost of sales

Cost of sales for the year ended December 31, 2012 were approximately \$85.4 million compared to approximately \$83.0 million in the same period of 2011. The increase of \$2.4 million is due principally to the corresponding increase in net sales. Gross profit as a percentage of sales increased to 45.8% for the year ended December 31, 2012 compared to 41.3% for the same period in 2011. The increase is attributable to a favorable sales mix in Bottles and Hydration Systems during the year ended December 31, 2012 compared to the same period last year, and the decrease in Glove sales as a percentage of total sales.

Selling, general and administrative expense

Selling, general and administrative expense for the year ended December 31, 2012 increased to approximately \$36.8 million or 23.4% of net sales compared to \$30.5 million or 21.6% of net sales for the same period of 2011. The \$6.4 million increase in selling, general and administrative expenses incurred is attributable to: (i) increases in sales commissions (\$1.0 million); (ii) increases in marketing and promotion costs (\$0.8 million), (iii) increases in professional fees (\$0.8 million); and, (iv) increases in compensation expense (\$2.7 million). The balance of the increase is due principally to increased infrastructure costs and general overhead, which together with the increases noted above were necessary to support expansion in connection with growth initiatives.

Income from operations

Income from operations for the year ended December 31, 2012 was approximately \$25.5 million, an increase of \$7.5 million when compared to the same period in 2011, based on the factors described above.

Ergobaby**Overview**

Ergobaby, headquartered in Los Angeles, California, is a premier designer, marketer and distributor of wearable baby carriers and related baby wearing products, as well as stroller travel systems and accessories. Ergobaby offers a broad range of wearable baby carriers, stroller travel systems and related products that are sold through more than 450 retailers and web shops in the United States and throughout the world. Ergobaby has two main product lines: baby carriers (baby carriers and accessories) and infant travel systems (strollers and accessories).

On September 16, 2010, we made loans to and purchased a controlling interest in Ergobaby for approximately \$85.2 million, representing approximately 84% of the equity in Ergobaby. Ergobaby's reputation for product innovation, reliability and safety has led to numerous awards and accolades from consumer surveys and publications, including Parenting Magazine, Pregnancy Magazine and Wired Magazine.

Table of Contents

On November 18, 2011, Ergobaby acquired all the outstanding stock of Orbit Baby for \$17.5 million. Orbit Baby produces and markets a premium line of stroller travel systems. Orbit Baby's high-quality products include car seats, strollers and bassinets that are interchangeable using a patented hub ring.

Pro Forma Results of Operations

The table below summarizes the results of operations for Ergobaby for the full fiscal years ended December 31, 2013, 2012 and the pro-forma results of operations for the year ended December 31, 2011. We acquired Ergobaby on September 16, 2010.

<i>(in thousands)</i>	Year ended December 31,		
	2013	2012	2011 (Pro-forma)
Net sales	\$ 67,340	\$ 64,032	\$ 44,327
Cost of sales (a)	25,692	25,091	15,645
Gross profit	41,648	38,941	28,682
Selling, general and administrative expenses	25,561	24,476	17,998
Management fees	500	500	500
Amortization of intangibles	2,972	3,037	1,828
Income from operations	\$ 12,616	\$ 10,928	\$ 8,356

Pro-forma results of operations of Ergobaby for the annual period ended December 31, 2011 includes the following pro-forma adjustment applied to historical results:

- (a) Cost of sales for the year ended December 31, 2011 does not include \$0.5 million of amortization expense recorded associated with the inventory fair value step-ups as a result of and derived from the purchase price allocation in connection with our purchase of Ergobaby.

Year Ended December 31, 2013 Compared to the Year Ended December 31, 2012**Net sales**

Net sales for the year ended December 31, 2013 were \$67.3 million, an increase of \$3.3 million or 5.2% compared to the same period in 2012. During the year ended December 31, 2013 domestic sales were approximately \$27.0 million, representing an increase of \$0.4 million or 1.6% over the corresponding period in 2012. Domestic baby carrier and accessory sales increased by approximately \$1.4 million, and domestic stroller and accessory sales decreased by approximately \$1.0 million. The increase in baby carrier sales are primarily due to expanded domestic distribution to national retail (Chain) channels and discounted sales of old logo baby carrier product and accessory product during the year ended December 31, 2013 compared to 2012. The decrease in stroller sales is principally tied to reduced orders in 2013 in anticipation of the new G3 stroller launch in January 2014. International sales were approximately \$40.3 million in the year ended December 31, 2013 compared to approximately \$37.4 million in the same period in 2012, an increase of \$2.9 million or 7.7%. International baby carrier and accessory sales increased by approximately \$4.9 million and stroller sales decreased by approximately \$2.0 million. The increase in international baby carrier and accessory sales during 2013 are due to expanded distribution channels. International stroller sales were negatively impacted in the year ended December 31, 2013 due to reductions in shipments to international distributors in anticipation of Orbit Baby's 2014 product launch.

Baby carriers and accessories represented 85% and 79% of net sales in the year ended December 31, 2013 and 2012, respectively.

Table of ContentsCost of sales

Cost of sales for the year ended December 31, 2013 were approximately \$25.7 million compared to \$25.1 million in the same period of 2012. The increase of \$0.6 million is due principally to the increase in sales in the same period. Gross profit as a percentage of sales increased from 60.8% for the year ended December 31, 2012 to 61.8% in 2013. The cost of sales for the year ended December 31, 2012 includes approximately \$0.6 million of amortization expense related to an inventory fair value step-up as part of the Orbit Baby purchase price allocation. Excluding the inventory step-up amortization expense reflected in 2012, gross profit as a percentage of sales was 61.8% in the 2012 period. Increases in gross profit as a percentage of sales in 2013 due to a greater proportion of baby carrier sales to total sales during the year ended December 31, 2013 compared to 2012 was offset by discounts provided to domestic baby carrier and accessory customers as Ergobaby transitioned to a new logo for its baby carrier products in 2013. Baby carrier sales carry a higher gross profit margin than stroller sales.

Selling, general and administrative expense

Selling, general and administrative expense for the year ended December 31, 2013 increased to approximately \$25.6 million or 38.0% of net sales compared to \$24.5 million or 38.2% of net sales for the same period of 2012. The \$1.1 million increase is almost entirely attributable to increases in employee related costs due to increased headcount to support business growth.

Income from operations

Income from operations for the year ended December 31, 2013 increased approximately \$1.7 million to \$12.6 million compared to the same period in 2012 due principally to increased net sales offset in part by the increases in selling, general and administrative expenses and other factors as described above.

Year Ended December 31, 2012 Compared to the Pro forma Year Ended December 31, 2011Net sales

Net sales for the year ended December 31, 2012 were \$64.0 million, an increase of \$19.7 million or 44.4% compared to the same period in 2011. The increase is primarily attributable to the increase in Orbit Baby sales (\$12.5 million) and international baby carrier and accessory sales (\$5.2 million) during the year ended December 31, 2012 compared to the same period in 2011 with the remaining 2012 increase attributable to domestic baby carrier and accessory sales. We acquired Orbit Baby in November 2011 and recorded approximately \$0.8 million in sales of Orbit Baby products in 2011. Domestic baby carrier sales were approximately \$17.6 million in the year ended December 31, 2012 compared to approximately \$15.5 million in the same period for 2011. The increase of \$2.1 million or 13.1% is primarily attributable to increased sales to national retail accounts. International sales of baby carriers and accessories were approximately \$33.2 million in the year ended December 31, 2012 compared to \$28.0 million in 2011, an increase of \$5.2 million. The increase of \$5.2 million is principally attributable in large part to increased sales in Japan and Korea. Our market share throughout Asia has grown considerably by means of enforcing our presence in key department stores through customized products as well as expanding our distribution into southeast Asia region which has reinforced our overall brand presence.

Baby carriers and accessories represented 79% and 98% of net sales in the year ended December 31, 2012 and 2011, respectively.

Cost of sales

Cost of sales for the year ended December 31, 2012 were approximately \$25.1 million compared to \$15.6 million in the same period of 2011. The increase of \$9.4 million is due principally to the increase in sales in the same period. Gross profit as a percentage of sales decreased from 64.7% for the year ended December 31, 2011 to 60.8% in 2012. The 3.9% decrease is primarily attributable to lower margin Orbit Baby product sales in the December 31, 2012 period (1.6%) and a larger proportion of international baby carriers in fiscal 2012 compared to 2011. International baby carrier sales generate a lower gross profit margin on average than domestic baby carrier sales. In addition, increases in domestic sales promotional discounts to national retail accounts contributed to lower margins in domestic baby carrier sales.

Table of Contents

Selling, general and administrative expense

Selling, general and administrative expense for the year ended December 31, 2012 increased to approximately \$24.5 million or 38.2% of net sales compared to \$18.0 million or 40.6% of net sales for the same period of 2011. The increase of \$6.5 million is primarily attributable to the selling, general and administrative expenses of Orbit Baby (\$5.4 million) and to a lesser extent, an increase in marketing costs (\$1.1 million) and personnel costs (\$1.1 million) to support growth initiatives, offset in part by a decrease in bad debt expense (\$0.3 million) and professional fees (\$0.3 million), all at the baby carrier level, during the year ended December 31, 2012 compared to the same period in 2011.

Amortization of intangibles

Amortization expense increased \$1.2 million in the year ended December 31, 2012 compared to the same period in 2011 as a result of amortizing intangible assets acquired as part of the purchase of Orbit Baby for a full year in fiscal 2012.

Income from operations

Income from operations for the year ended December 31, 2012 increased approximately \$2.6 million to \$10.9 million compared to the same period in 2011, due principally to those factors described above.

FOX

Overview

FOX, headquartered in Scotts Valley, California, is a branded action sports company that designs, manufactures and markets high-performance suspension products for mountain bikes and power sports, which include: snowmobiles, motorcycles, all-terrain vehicles (ATVs), and other off-road vehicles.

FOX's products are recognized by manufacturers and consumers as being among the most technically advanced suspension products currently available in the marketplace in their respective product categories. FOX's technical success is demonstrated by its large number of award winning performances by professional athletes who use its suspension products. As a result, FOX's suspension components are incorporated by original equipment manufacturer (OEM) customers on their high-performance models product categories in the mountain bike and powered vehicle sector. OEMs seek to capitalize on the strength of FOX's brand to maintain and expand their own sales and margins. In the Aftermarket channel, consumers seeking higher performance select FOX's suspension components to enhance their existing equipment.

FOX sells to more than 150 OEM and 2,500 retail dealers and distributors across its market product categories worldwide. In each of the years 2013, 2012 and 2011, approximately 80% of sales were to OEM customers. The remaining sales were to Aftermarket customers. In each of the years 2013, 2012 and 2011, approximately two-thirds of sales were attributable to mountain bike product the remaining sales were attributable to powered vehicles product.

On August 13, 2013, FOX completed an initial public offering (IPO) of its common stock pursuant to a registration statement on Form S-1. FOX received net proceeds of approximately \$36.1 million from its sale of shares of common stock after deducting underwriting discounts and commissions and estimated offering expenses. FOX used the net proceeds it received in the IPO to pay down indebtedness under its prior credit facility with us and entered into a new credit facility with SunTrust Bank and the other lenders, and borrowed \$28.5 million. Of such borrowings, \$21.6 million was used to pay down FOX's remaining indebtedness with us. Refer to Liquidity and Capital Resources

As a result of the IPO we currently own approximately 53.9% of the outstanding shares of FOX common stock.

Table of Contents**Results of Operations**

The table below summarizes the results of operations of FOX for the fiscal years ending December 31, 2013, 2012 and 2011. We purchased a controlling interest in FOX on January 4, 2008.

<i>(in thousands)</i>	Year Ended December 31,		
	2013	2012	2011
Net sales	\$ 272,746	\$ 235,869	\$ 197,740
Cost of sales	192,617	173,040	140,850
Gross profit	80,129	62,829	56,890
Selling, general and administrative expenses	35,662	30,862	28,587
Management fees	308	500	500
Amortization of intangibles	5,378	5,315	5,217
Income from operations	\$ 38,781	\$ 26,152	\$ 22,586

Fiscal Year Ended December 31, 2013 Compared to Fiscal Year Ended December 31, 2012**Net sales**

Net sales for the year ended December 31, 2013 increased approximately \$36.9 million, or 15.6%, compared to the corresponding period in 2012. Net sales of mountain bikes and powered vehicles product increased 14.4% and 18.2%, respectively, during the year ended December 31, 2013 compared to the same period in 2012. Sales growth was primarily driven by sales to OEMs, which increased \$30.0 million to \$219.9 million during the year ended December 31, 2013 compared to \$189.9 million for the same period in 2012. The increase in net sales to OEMs is largely driven by increased specification, or spec, with our customers. The remaining increase in sales reflects increased sales to Aftermarket customers in the year ended December 31, 2013 compared to the same period in 2012. The increase in sales to Aftermarket customers is due to higher end user demand for FOX products.

Cost of sales

Cost of sales for the year ended December 31, 2013 increased approximately \$19.6 million, or 11.3%, compared to the corresponding period in 2012. The increase in cost of sales is primarily due to increased net sales. Gross profit as a percentage of net sales was approximately 29.4% for the year ended December 31, 2013 compared to 26.6% for the same period in 2012. The 2.8 % increase in gross profit as a percentage of sales is primarily the result of savings from cost initiatives designed to improve operating efficiencies realized in the 2013 period (1.6%) and additional warranty reserves recorded during the year ended December 31, 2012 in connection with upgrading certain suspension product dampers (1.2%), which costs did not recur in 2013.

Selling, general and administrative expenses

Selling, general and administrative expenses for the year ended December 31, 2013 increased \$4.8 million to approximately \$35.7 million or 13.1% of net sales, compared to \$30.9 million or 13.1% of net sales for the same period of 2012. The increase in expenses of \$4.8 million in 2013 compared to 2012 is principally the result of increases in the following costs: (i) sales and marketing personnel related expenses (\$1.0 million); (ii) overhead personnel (\$1.5 million); (iii) other marketing expenses (\$0.6 million); (iv) research and development (\$0.7 million), (v) acquisition related costs (\$0.3 million) and (vi) employee stock compensation expense (\$0.4 million). The increase in personnel related costs are largely due to the increase in sales and overall business growth. The increase in other marketing expenses results from costs related to expanding FOX's brand through additional race sponsorships and corporate media. General and administrative costs may increase in the future as FOX incurs additional expenses commensurate with their growth and incremental costs associated with being a public company.

Fees to manager

Effective August 13, 2013, in connection with its IPO, FOX terminated its Management Services Agreement with our Manager. Annual management fees totaling \$0.5 million were paid in 2012. Management fees totaling \$0.3 million in 2013 reflects the pro-rata portion of

management fees through August 13, 2013.

Table of Contents

Income from operations

Income from operations for the year ended December 31, 2013 increased approximately \$12.6 million to \$38.8 million compared to \$26.2 million in the corresponding period of 2012, principally as a result of the increase in net sales, and margins offset in part by increases in selling, general and administrative expenses, and other factors, as described above.

Fiscal Year Ended December 31, 2012 Compared to Fiscal Year Ended December 31, 2011

Net sales

Net sales for the year ended December 31, 2012 increased approximately \$38.1 million, or 19.3%, compared to the corresponding period in 2011. Sales growth was driven by sales to OEM which increased \$32.0 million to \$189.9 million during the year ended December 31, 2012 compared to \$157.9 million for the same period in 2011. The increase in net sales is largely driven by increased spec with our customers and to a lesser degree by increased demand for carryover product. The remaining increase in net sales totaling \$6.1 million reflects increased sales to Aftermarket customers in the year ended December 31, 2012. The increase in sales to Aftermarket customers is due to higher end user demand.

Cost of sales

Cost of sales for the year ended December 31, 2012 increased approximately \$32.2 million compared to the corresponding period in 2011. The increase in cost of sales is primarily due to increased net sales during 2012. Gross profit as a percentage of sales was approximately 26.6% for the year ended December 31, 2012 compared to 28.8% for the same period in 2011. The 2.2% decrease in gross profit as a percentage of sales during 2012 is largely attributable to the increased overhead costs associated with consolidating our Watsonville operations, increased costs associated with expanding our Taiwanese operations, increased expedited freight due to supply chain constraints caused by the increase in orders, warranty costs and changes in product / customer mix.

Selling, general and administrative expense

Selling, general and administrative expenses for the year ended December 31, 2012 increased approximately \$2.3 million over the corresponding period in 2011. This increase is primarily the result of increases in employee related expenses and other costs, principally to support company growth (\$1.5 million) and costs incurred in connection with an equity distribution and associated debt recapitalization (\$0.8 million) which occurred during June 2012. Selling, general and administrative costs were 13.1% of net sales for the year ended December 31, 2012 compared to 14.5% of net sales in 2011.

Income from operations

Income from operations for the year ended December 31, 2012 increased approximately \$3.6 million to \$26.2 million compared to \$22.6 million in corresponding period in 2011, principally as a result of the increase in net sales, offset in part by the increases in selling, general and administrative costs, all as described above.

Liberty Safe

Overview

Based in Payson, Utah and founded in 1988, Liberty Safe is the premier designer, manufacturer and marketer of home and gun safes in North America. From its over 204,000 square foot manufacturing facility, Liberty Safe produces a wide range of home and gun safe models in a broad assortment of sizes, features and styles ranging from an entry level product to good, better and best products. Products are marketed under the Liberty brand, as well as a portfolio of licensed and private label brands, including Remington, Cabela's and John Deere. Liberty Safe's products are the market share leader and are sold through an independent dealer network (Dealer sales) in addition to various sporting goods, farm and fleet and home improvement retail outlets (Non-Dealer, National sales). Liberty has the largest independent dealer network in the industry.

Historically, approximately 60% of Liberty Safe's net sales are Non-Dealer sales and 40% are Dealer sales.

Table of Contents**Results of Operations**

The table below summarizes the results of operations for Liberty Safe for the full fiscal years ended December 31, 2013, and 2012 and 2011. We acquired Liberty Safe on March 31, 2010.

<i>(in thousands)</i>	Year ended December 31,		
	2013	2012	2011
Net sales	\$ 126,541	\$ 91,622	\$ 82,222
Cost of sales	95,866	68,050	61,563
Gross profit	30,675	23,572	20,659
Selling, general and administrative expenses	13,623	12,103	10,646
Management fees	500	500	500
Amortization of intangibles	4,094	4,984	5,177
Income from operations	\$ 12,458	\$ 5,985	\$ 4,336

Year Ended December 31, 2013 Compared to the Year Ended December 31, 2012**Net sales**

Net sales for the year ended December 31, 2013 increased approximately \$34.9 million or 38.1% compared to the same period in 2012. Non-Dealer sales were approximately \$75.2 million in the year ended December 31, 2013 compared to \$52.2 million for the year ended December 31, 2012, representing an increase of \$22.9 million or 43.9%. Dealer sales totaled approximately \$51.4 million in the year ended December 31, 2013 compared to \$39.4 million in the same period in 2012, representing an increase of \$12.0 million or 30.5%. The increase in Non-Dealer sales in the year ended December 31, 2013 is due in large part to increased sales to Liberty's two largest Non-Dealer accounts in connection with their expansion of new stores. Liberty is the sole provider of safes to these two accounts. In addition, the significant increase in net sales at both the Dealer and Non-Dealer level is the result of (i) strong demand for Liberty branded product by many gun owners due to increased gun and ammunition sales resulting from expected challenges by Federal and state government to the second amendment, (ii) increased availability of import safes and safes manufactured in-house, on Liberty's new production line and (iii) Non-Dealer price increases.

A large National retail account recently decided to exit the safe category. This will have a negative impact on future sales. Gross sales attributable to this customer were approximately \$5.0 million in 2013. In addition, Liberty Safe expects a softer overall safe market in 2014 as a result of an overheated market in 2013.

Cost of sales

Cost of sales for the year ended December 31, 2013 increased approximately \$27.8 million compared to the same period in 2012. This increase is primarily due to the increase in net sales. Gross profit as a percentage of net sales totaled approximately 24.2% and 25.7% of net sales for each of the twelve month periods ended December 31, 2013 and December 31, 2012, respectively. The decrease in gross profit as a percentage of sales during the year ended December 31, 2013 compared to the same period in 2012 is principally attributable to increased sales of import safes that carry a lower margin and unfavorable manufacturing labor and overhead spending variances experienced during 2013 resulting from increased costs to keep pace with customer demand, offset in part by Non-Dealer price increases enacted during the first quarter of 2013.

Selling, general and administrative expense

Selling, general and administrative expense for the year ended December 31, 2013, increased approximately \$1.5 million compared to the same period in 2012. This increase is principally the result of increases in the following costs: (i) commissions for the increase in sales, and compensation expense (\$0.5 million), (ii) co-op advertising and national advertising (\$0.9 million), and (iii) other miscellaneous costs (\$0.1 million), including depreciation, travel, legal, and other costs.

Table of Contents

Amortization of intangibles

Intangible asset amortization decreased \$0.9 million for the year ended December 31, 2013 compared to 2012 due to fully amortizing some intangible assets recorded as part of the 2010 purchase price allocation.

Income from operations

Income from operations increased \$6.5 million during the year ended December 31, 2013 compared to the same period in 2012, principally as a result of the significant increase in net sales, offset in part by other factors, as described above.

Year Ended December 31, 2012 Compared to the Year Ended December 31, 2011

Net sales

Net sales for the year ended December 31, 2012 increased approximately \$9.4 million, or 11.4%, over the corresponding year ended December 31, 2011. Non-Dealer sales were approximately \$52.2 million in the year ended December 31, 2012 compared to \$49.9 million in the same period in 2011, representing an increase of \$2.3 million or 4.7%. Dealer sales totaled approximately \$39.4 million in the year ended December 31, 2012 compared to \$32.3 million in the same period in 2011, representing an increase of \$7.1 million or 21.8%. The increase in Non-Dealer sales in 2012 is due in large part to increased sales to Liberty's two largest Non-Dealer accounts in connection with their expansion of new stores in 2012. Liberty is the sole provider of safes to these two accounts. These increases were offset in part by the absence of sales in the second half of fiscal 2012, in connection with a large National retail account's holiday program which generated approximately \$5.0 million in sales during 2011. The significant increase in net sales at both the Dealer and Non-Dealer level is the result of (i) strong demand for Liberty branded product by many gun owners due to increased gun and ammunition sales resulting from expected challenges by Federal and state government to the second amendment, (ii) Liberty's ongoing national radio advertising campaign in conjunction with those accounts that maintain consistent Liberty Safe product advertising at the local level through its co-op advertising program and (iii) increased availability of safes manufactured in-house on Liberty's new production line. Dealer sales were more favorably impacted by national advertising campaign due to co-op advertising offered to Dealers.

Cost of sales

Cost of sales for the year ended December 31, 2012 increased approximately \$6.5 million. The increase in cost of sales is primarily attributable to the increase in net sales for the same period. Gross profit as a percentage of net sales totaled approximately 25.7% and 25.1% for the year ended December 31, 2012 and December 31, 2011, respectively. The increase in gross profit as a percentage of sales for the year ended December 31, 2012 compared to 2011 is principally attributable to Dealer and Non-Dealer price increases enacted during the second and third quarter of 2012, and a favorable sales mix.

Selling, general and administrative expense

Selling, general and administrative expense for the year ended December 31, 2012, increased approximately \$1.5 million compared to the same period in 2011. This increase is principally the result of increases in costs to support the significant increase in sales, particularly commission expense and advertising and promotion expense (\$0.9 million), and personnel costs (\$0.2 million) all to support growth initiatives and the resultant increase in net sales.

Income from operations

Income from operations was approximately \$6.0 million for the year ended December 31, 2012 representing an increase of \$1.7 million compared to the same period in 2011, which reflected operating income of \$4.3 million. The improved operating results are principally due to the factors described above, particularly the increase in net sales.

Table of Contents**Niche Industrial Businesses****Advanced Circuits****Overview**

Advanced Circuits is a provider of prototype, quick-turn and volume production PCBs to customers throughout the United States. Collectively, prototype and quick-turn PCBs represent approximately 55% of Advanced Circuits' gross revenues in 2013. Prototype and quick-turn PCBs typically command higher margins than volume production PCBs given that customers require high levels of responsiveness, technical support and timely delivery of prototype and quick-turn PCBs and are willing to pay a premium for them. Advanced Circuits is able to meet its customers' demands by manufacturing custom PCBs in as little as 24 hours, while maintaining over 98.0% error-free production rates and real-time customer service and product tracking 24 hours per day.

We purchased a controlling interest in Advanced Circuits on May 16, 2006.

On May 23, 2012 Advanced Circuits acquired Universal Circuits for approximately \$2.3 million. Universal Circuits supplies PCBs to major military, aerospace, and medical original equipment manufacturers and contract manufacturers. Universal Circuits' Minnesota facility meets certain Department of Defense clearance requirements and is noted for custom and advanced technologies. Universal Circuits' sales are primarily in the long-lead sector. For the year ended December 31, 2012, the consolidated results of operations of Advanced Circuits includes net sales of Universal Circuits aggregating \$8.5 million and gross profit of Universal Circuits aggregating \$2.0 million, respectively. The following Results of Operations does not include any operating results from Universal Circuits prior to the date of acquisition.

Results of Operations

The table below summarizes the statement of operations for Advanced Circuits for the fiscal years ending December 31, 2013, 2012 and 2011.

<i>(in thousands)</i>	Year Ended December 31,		
	2013	2012	2011
Net sales	\$ 87,406	\$ 84,071	\$ 78,506
Cost of sales	46,954	42,575	35,564
Gross profit	40,452	41,496	42,942
Selling, general and administrative expenses	13,943	13,975	12,855
Management fees	500	500	500
Amortization of intangibles	3,064	3,054	3,026
Income from operations	\$ 22,945	\$ 23,967	\$ 26,561

Fiscal Year Ended December 31, 2013 Compared to Fiscal Year Ended December 31, 2012**Net sales**

Net sales for the year ended December 31, 2013 increased approximately \$3.3 million or 4.0% over the corresponding period ended December 31, 2012. The increase in net sales is the result of an increase in gross sales in long-lead time PCBs (\$5.6 million) and assembly sales (\$1.1 million) and a decrease in sales promotions and discounts (\$1.3 million) in the year ended December 31, 2013 compared to the same period in 2012, offset in part by a decrease in sales of quick-turn production and prototype PCBs (\$3.9 million) and sub-contract production (\$0.7 million). The increase in long-lead sales for the year ended December 31, 2013 compared to the same period in 2012 is primarily the result of incremental sales in 2013 attributable to the Universal Circuits operation acquired in May 2012. The decrease in sales of quick-turn and prototype PCBs for the year ended December 31, 2013 compared to the same period in 2012 is primarily the result of an overall decline in the business due to the state of the economy as a whole, decline in orders from Department of Defense and aerospace contractors, and pricing. Sales from quick-turn and prototype PCBs represented approximately 54.9% of gross sales in the year ended December 31, 2013 compared to 60.3% during the same period of 2012.

Table of Contents

Cost of sales

Cost of sales for the year ended December 31, 2013 increased approximately \$4.4 million compared to the same period in 2012. Gross profit as a percentage of sales decreased to 46.3% for the year ended December 31, 2013 compared to 49.4% for the year ended December 31, 2012. This decrease in gross margin is principally the result of a greater proportion of long-lead sales to total sales in the 2013 period compared to 2012. Long lead PCB sales carry a significantly lower gross margin when compared to prototype or quick-turn PCB sales.

Selling, general and administrative expense

Selling, general and administrative expense decreased less than \$0.1 million during the year ended December 31, 2013 compared to the same period in 2012. There were no notable increases or decreases in cost categories.

Income from operations

Income from operations for the year ended December 31, 2013 was approximately \$22.9 million compared to \$24.0 million earned in the same period in 2012, a decrease of approximately \$1.0 million, principally as a result of those factors described above.

Fiscal Year Ended December 31, 2012 Compared to Fiscal Year Ended December 31, 2011

Net sales

Net sales for the year ended December 31, 2012 increased approximately \$5.6 million or 7.1%, over the corresponding year ended December 31, 2011. The increase in net sales is a result of an increase in gross sales of prototype and quick-turn production PCBs (\$2.6 million), long-lead PCBs (\$3.5 million) and assembly revenue (\$2.0 million) during the year ended December 31, 2012 compared to the same period of 2011, offset in part by an increase in promotion and discount charges (\$2.3 million). The increase in sales in all sectors, with the exception of assembly sales, is attributable to incremental sales associated with Universal Circuits during the year ended December 31, 2012. The increase in promotion and discount charges in 2012 compared to the same period of 2011 are principally the result of increased discounting and price promotions incurred during 2012 in response to competitor's pricing in the long-lead sector. Assembly sales increased approximately \$2.1 million in the year ended December 31, 2012 compared to the same period in 2011 and represented 9.2% of gross sales in 2012 compared to 7.6% in 2011.

Sales of quick-turn and prototype PCBs represented approximately 60.3% of net sales in 2012 compared to 62.9% in 2011.

Cost of sales

Cost of sales for the year ended December 31, 2012 increased approximately \$7.0 million from the comparable period in 2011 due principally to the increase in sales. Gross profit as a percentage of sales decreased during the year ended December 31, 2012 (49.4% at December 31, 2012 compared to 54.7% at December 31, 2011). This decrease in margin is principally the result of: (i) the promotional pricing in long-lead PCB sales during the year ended December 31, 2012 noted above (1.3% impact); (ii) sales attributable to Universal Circuits (2.8% impact); and a larger proportion of assembly sales during the year ended December 31, 2012, compared to 2011, each which carry lower margins.

Selling, general and administrative expense

Selling, general and administrative expense increased approximately \$1.1 million during the year ended December 31, 2012 compared to the same period in 2011 due principally to costs incurred at Universal Circuits for the year ended December 31, 2012. Selling, general and administrative costs were 16.6% of net sales in the year ended December 31, 2012 compared to 16.4% during the same period in 2011.

Income from operations

Operating income for the year ended December 31, 2012 was approximately \$24.0 million compared to \$26.6 million earned in the same period in 2011, a decrease of approximately \$2.6 million, principally as a result of those factors described above.

Table of Contents**American Furniture****Overview**

Founded in 1998 and headquartered in Ecu, Mississippi, American Furniture is a leading U.S. manufacturer of upholstered furniture, focused exclusively on the promotional segment of the furniture industry. American Furniture offers a broad product line of stationary and motion furniture, including sofas, loveseats, sectionals, recliners and complementary products, sold primarily at retail price points ranging between \$199 and \$1,399. American Furniture is a low-cost manufacturer and is able to ship most products in its line to in a short period of time to meet its customer's demands.

American Furniture's products are adapted from established designs in the following categories: (i) motion and recliner; (ii) stationary and ; (iii) occasional chair and accent tables.

American Furniture incurred an impairment charge to its goodwill (\$5.9 million), trade name (\$2.4 million) and long-lived assets (\$18.4 million) aggregating \$26.7 million during the year ended December 31, 2011, which was triggered based on results of operations which had deteriorated significantly during the year. In addition, in connection with the cessation and outsourcing of AFM's internal trucking operations we reclassified a number of trucks, trailers and a warehouse from property, plant and equipment to assets held for sale. In connection with this, we wrote these assets down from their net book value to an amount equal to their net realizable value less disposal costs with the difference, aggregating approximately \$1.1 million, being charged to impairment expense. In all cases the write downs were triggered by a significant deterioration in American Furniture's operations and profitability caused by an unprecedented drop in the promotional furniture market and demand for its product. The combination of increased unemployment, together with significant decreases in new home purchases and availability of consumer credit has created a depressed for promotional furniture sales over the last several years than has been experienced over the last two decades.

Results of Operations

The table below summarizes the results of operations for American Furniture for the fiscal years ending December 31, 2013, 2012 and 2011. We purchased a controlling interest in American Furniture on August 31, 2007.

<i>(in thousands)</i>	Year Ended December 31,		
	2013	2012	2011
Net sales	\$ 104,885	\$ 91,455	\$ 105,345
Cost of sales	96,571	85,530	101,030
Gross profit	8,314	5,925	4,315
Selling, general and administrative expenses	8,086	7,393	9,549
Management fees			125
Amortization of intangibles	53	52	2,108
Impairment expense			27,769
Income (loss) from operations	\$ 175	\$ (1,520)	\$ (35,236)

Fiscal Year Ended December 31, 2013 Compared to Fiscal Year Ended December 31, 2012**Net sales**

Net sales for the year ended December 31, 2013 increased approximately \$13.4 million, or 14.7% over the corresponding year ended December 31, 2012. Stationary product sales increased approximately \$7.5 million, recliner product sales increased approximately \$5.2 million, and motion product sales increased approximately \$0.5 million. Sales of other products and freight/fuel surcharges increased \$0.1 million during the twelve months ended December 31, 2013 compared to 2012. The increase in sales of stationary product is the result of a strong 2013 third and fourth quarter, driven by new product introductions and increased placements with several key retail accounts. The increase in motion and recliner sales is the result of increased orders from one key account, product line improvements in the merchandising area and pricing.

Table of Contents**Cost of sales**

Cost of sales increased approximately \$11.0 million in the year ended December 31, 2013 compared to the same period of 2012 and is principally due to the corresponding increase in sales. Gross profit as a percentage of sales was 7.9% in the year ended December 31, 2013 compared to 6.5% in 2012. The increase in gross profit as a percentage of sales of approximately 1.4% during the year ended December 31, 2013 is principally attributable to: (i) increased pricing and (ii) continued improvements in freight expense and trucking costs through outsourcing and fleet elimination.

Selling, general and administrative expense

Selling, general and administrative expense totaled approximately \$8.1 million or 7.7% of net sales during the twelve month period ended December 31, 2013 compared to \$7.4 million or 8.1% of net sales in the same period of 2012. The increase in costs are principally attributable to costs associated with increased staffing in the sales and merchandising group.

Income (loss) from operations

Income from operations totaled approximately \$0.2 million for the year ended December 31, 2013 compared to a loss from operations of approximately \$1.5 million in the year ended December 31, 2012, principally due the factors described above.

Fiscal Year Ended December 31, 2012 Compared to Fiscal Year Ended December 31, 2011**Net sales**

Net sales for the year ended December 31, 2012 decreased approximately \$13.9 million, or 13.2%, over the corresponding year ended December 31, 2011. Stationary product gross sales decreased approximately \$13.4 million, and motion product sales decreased approximately \$1.0 million during the year ended December 31, 2012 compared to the same period of 2011. Sales of other products and a reduction in fuel surcharges are responsible for the remaining decrease in net sales during the year ended December 31, 2012 compared to 2011. Recliner sales increased approximately \$1.7 million during this same period. The decrease in gross sales in the stationary and motion product categories and other products is principally the result of a continued soft current retail environment which has caused increasing competition in pricing in the promotional furniture category during the year ended December 31, 2012. In addition, our inability to ship certain products during the first quarter 2012, due to a delay in receiving fabric kits that we outsource to China which we were not able to replace, contributed approximately \$1.0 million to the decline in sales. Sales to a large national retailer decreased approximately \$8.1 million in 2012 compared to 2011. The increase in recliner product sales is the result of supplying product to one of our largest customers for their recliner promotion event.

Cost of sales

Cost of sales decreased approximately \$15.5 million in the year ended December 31, 2012 compared to the same period of 2011 and is due primarily to the corresponding decrease in sales. Gross profit as a percentage of sales was 6.5% in the year ended December 31, 2012 compared to 4.1% in 2011. The increase in gross profit as a percentage of sales of approximately 2.4% during the year ended December 31, 2012 is principally attributable to (i) a \$1.6 million write off to adjust overhead absorption in inventory resulting from adjustments to its standard costs in July 2011; (ii) lower direct labor costs, primarily due to increased efficiencies in stationary and recliner production, and; (iii) increased selling prices on products and fewer closeout offerings over the course of the year due to the improvement of our inventory management. A number of cost saving initiatives were implemented throughout 2012, including facility consolidation and outsourcing frame cutting that contributed to the increase in gross profit margins in 2012 compared to 2011.

Selling, general and administrative expense

Selling, general and administrative expense for the year ended December 31, 2012, decreased approximately \$2.2 million compared to the same period of 2011. This decrease is primarily due to decreased costs of advertising and marketing (\$0.6 million) and salaries and benefits (\$1.3 million) during the year ended December 31, 2012 compared to the same period of 2011.

Table of Contents

Impairment expense

American Furniture incurred an impairment charge to its goodwill (\$5.9 million), trade name (\$2.4 million) and long-lived assets (\$18.4 million) aggregating \$26.7 million during the year ended December 31, 2011, which was triggered based on results of operations which had deteriorated significantly during the year. In addition, in connection with the cessation and outsourcing of AFM's internal trucking operations, we reclassified a number of trucks, trailers and a warehouse from property, plant and equipment to assets held for sale. In connection with this, we wrote these assets down from their net book value to an amount equal to their net realizable value less disposal costs with the difference, aggregating approximately \$1.1 million, being charged to impairment expense.

Loss from operations

Loss from operations totaled approximately \$1.5 million for the year ended December 31, 2012 compared to a loss from operations of approximately \$35.2 million in the year ended December 31, 2011. The significant decline in operating loss was principally due the factors described above, particularly the impairment charge in 2011.

Arnold

Overview

Founded in 1895 and headquartered in Rochester, New York, Arnold Magnetics (or Arnold) is a manufacturer of engineered, application specific permanent magnets. Arnold products are used in applications such as general industrial, reprographic systems, aerospace and defense, advertising and promotional, consumer and appliance, energy, automotive and medical technology. Arnold is the largest U.S. manufacturer of engineered magnets as well as only one of two domestic producers to design, engineer and manufacture rare earth magnetic solutions. Arnold operates a 70,000 sq. ft. manufacturing assembly and distribution facility in Rochester, New York with nine additional facilities worldwide, in countries including the United Kingdom, Switzerland and China. Arnold serves customers via three primary product sectors:

Permanent Magnet and Assemblies and Reprographics (PMAG) (approximately 75% of sales) High performance magnets for precision motor/generator sensors as well as beam focusing applications and reprographic applications;

Flexmag (approximately 20% of net sales) Flexible bonded magnets for advertising, consumer and industrial applications; and

Precision Thin Metals (approximately 5% of net sales) Ultra thin metal foil products utilizing magnetic and non- magnetic alloys. Arnold is also a 50% partner in a China rare earth mine-to-magnet joint venture. Arnold accounts for its activity in the joint venture utilizing the equity method of accounting. Gains and losses from the joint venture are not material during the years ended December 31, 2013 or 2012.

On March 5, 2012, we made loans to and purchased a controlling interest in Arnold for approximately \$131 million, representing approximately 96.6% of the equity in Arnold Magnetics.

Table of Contents**Results of Operations**

The table below summarizes the results of operations for Arnold for the fiscal year ended December 31, 2013 and the pro-forma results of operations for the full fiscal years ended December 31, 2012 and 2011. We acquired Arnold on March 5, 2012. The following operating results are reported as if we acquired Arnold on January 1, 2011.

<i>(in thousands)</i>	Year ended December 31,		
	2013	2012 (Pro-forma)	2011 (Pro-forma)
Net sales	\$ 126,606	\$ 127,433	\$ 136,348
Cost of sales (a)	96,784	98,769	106,325
Gross profit	29,822	28,664	30,023
Selling, general and administrative expenses (b)	16,820	15,821	15,943
Management fees (c)	500	500	500
Amortization of intangibles (d)	3,588	3,499	3,498
Income from operations	\$ 8,914	\$ 8,844	\$ 10,082

Pro-forma results of operations of Arnold for the annual periods ended December 31, 2012 and 2011 include the following pro-forma adjustments applied to historical results:

- (a) Cost of sales for the year ended December 31, 2012 does not include \$3.1 million of amortization expense associated with the inventory fair value step-up recorded in 2012 as a result of and derived from the purchase price allocation in connection with our purchase of Arnold.
- (b) Selling, general and administrative costs were reduced by approximately \$12.4 million and \$0.4 million in the years ended December 31, 2012 and 2011, respectively, representing an adjustment for one-time transaction costs incurred as a result of our purchase.
- (c) Represents management fees that would have been payable to the Manager.
- (d) An increase in amortization of intangible assets totaling \$0.6 million in 2012 and \$2.7 million in 2011. This adjustment is a result of and was derived from the purchase price allocation in connection with our acquisition of Arnold.

Year Ended December 31, 2013 Compared to the Pro Forma Year Ended December 31, 2012

Net sales

Net sales for the year ended December 31, 2013 were approximately \$126.6 million, a decrease of \$0.8 million, or 0.6%, compared to the same period in 2012. The decrease in net sales is a result of decreased sales in Precision Thin Metals (\$2.7 million), offset in part by sales increases in PMAG (\$1.7 million) and Flexmag (\$0.2 million) product sectors. The increase in PMAG sales during the year ended December 31, 2013 compared to the same period in 2012 is principally attributable to strong order flow in North America and Europe offset in part by lower reprographic application sales, a component of PMAG. The increase in Flexmag sales is due to a large non-recurring project order. PMAG sales represented approximately 74.8% of net sales for the year ended December 31, 2013 compared to 73.0% for the same period in 2012. The decrease in Precision Thin Metals sales during the current period is principally attributable to market softness in the U.S. defense market and the European energy market.

International sales, reflecting sales to geographic locations outside the United States, were \$61 million during the year ended December 31, 2013 compared to \$57 million during the same period in 2012, an increase of \$4 million or 7.0%.

Table of Contents

Cost of sales

Cost of sales for the year ended December 31, 2013 were approximately \$96.8 million compared to approximately \$98.8 million in the same period of 2012. Gross profit as a percentage of sales increased from 22.5% for the year ended December 31, 2012 to 23.6% in the corresponding period of December 31, 2013. The increase is attributable to an increase in margins at its PMAG and Flexmag product sectors, offset in part by decreased margin in the Precision Thin Metals sector due to higher material costs and unfavorable customer / product sales mixes. The increase in margins in the PMAG sector are due to a more favorable customer/product sales mix, due in part to the decrease in reprographic application sales during the year ended December 31, 2013 compared to the same period in 2012.

Selling, general and administrative expense

Selling, general and administrative expense for the year ended December 31, 2013 increased \$1.0 million to approximately \$16.8 million or 13.3% of net sales compared to \$15.8 million or 12.4% of net sales for the same period in 2012, due principally to higher outside service costs and costs associated with hiring additional technical personnel during 2013.

Income from operations

Income from operations for the year ended December 31, 2013 was approximately \$8.9 million, an increase of \$0.1 million when compared to the same period in 2012, based principally on the factors described above.

Pro Forma Year Ended December 31, 2012 Compared to the Pro Forma Year Ended December 31, 2011

Net sales

Net sales for the year ended December 31, 2012 were approximately \$127.4 million, a decrease of \$8.9 million, or 6.5%, compared to the same period in 2011. The decrease in net sales is a result of decreased sales in the PMAG product sector (\$6.2 million) and decreases in sales in the Flexmag (\$0.7 million) and Precision Thin Metals (\$2.0 million) sectors. PMAG sales represented approximately 73.0% of net sales for the year ended December 31, 2012 compared to 72.8% for the same period in 2011. The decrease in PMAG sales during the year ended December 31, 2012 compared to the same period in 2011 is principally attributable to lower reprographic application sales, a component of PMAG. The decrease in Precision Thin Metals sales is attributable to market softness in the U.S. defense market and the European energy market.

International sales were \$57.0 million during the year ended December 31, 2012 compared to \$62.0 million during the same period in 2011, a decrease of \$5 million or 8.0%.

Cost of sales

Cost of sales for the year ended December 31, 2012 were approximately \$98.8 million compared to approximately \$106.3 million in the same period of 2011. The decrease of \$7.6 million is due principally to the corresponding decrease in sales. Gross profit as a percentage of sales increased from 22.0% for the year ended December 31, 2011 to 22.5% in the year ended December 31, 2012. The increase is attributable to increased margins in the PMAG sector due to a more favorable customer/product sales mix, due in part to the decrease in reprographic application sales during the year ended December 31, 2012 compared to the same period in 2011, offset in part by a decrease in margins at its Rolled Product sector due to an unfavorable customer/product sales mix.

Selling, general and administrative expense

Selling, general and administrative expense for the year ended December 31, 2012 were approximately \$15.8 million or 12.4% of net sales compared to \$15.9 million or 11.7% of net sales for the same period in 2011. There were no significant changes in the components of these costs during the year.

Income from operations

Income from operations for the year ended December 31, 2012 was approximately \$8.8 million compared to \$10.1 million in income from operations recognized during the year ended December 31, 2011, a decrease of \$1.2 million.

Table of Contents**Tridien****Overview**

Tridien, headquartered in Coral Springs, Florida, is a leading designer and manufacturer of powered and non-powered medical therapeutic support services and patient positioning devices serving the acute care, long-term care and home health care markets. Tridien is one of the nation's leading designers and manufacturers of specialty therapeutic support surfaces with manufacturing operations in multiple locations to better serve a national customer base.

Tridien, together with its subsidiary companies, provides customers the opportunity to source leading surface technologies from the designer and manufacturer.

Tridien develops products both independently and in partnership with large distribution intermediaries. Medical distribution companies then sell or rent the therapeutic support surfaces, sometimes in conjunction with bed frames and accessories to one of three end markets: (i) acute care, (ii) long term care and (iii) home health care. The level of sophistication largely varies for each product, as some patients require simple foam mattress beds (non-powered support surfaces) while others may require electronically controlled, low air loss, lateral rotation, pulmonary therapy or alternating pressure surfaces (powered support surfaces). The design, engineering and manufacturing of all products are completed in-house (with the exception of PrimaTech products, which are manufactured in Taiwan) and are FDA compliant. Tridien historically receives approximately two-thirds of its revenues from its three largest customers.

Results of Operations

The table below summarizes the results of operations for Tridien for the fiscal years ending December 31, 2013, 2012 and 2011.

<i>(in thousands)</i>	Year Ended December 31,		
	2013	2012	2011
Net sales	\$ 60,072	\$ 55,855	\$ 55,854
Cost of sales	46,636	42,031	41,216
Gross profit	13,436	13,824	14,638
Selling, general and administrative expenses	9,145	8,502	7,958
Management fees	350	350	350
Amortization of intangibles	1,250	1,305	1,315
Impairment expense	12,918		
Income (loss) from operations	\$ (10,227)	\$ 3,667	\$ 5,015

Fiscal Year Ended December 31, 2013 Compared to Fiscal Year Ended December 31, 2012**Net sales**

Net sales for the year ended December 31, 2013, were approximately \$60.1 million compared to approximately \$55.9 million for the same period in 2012, an increase of \$4.2 million or 7.5%. Sales of non-powered products (including patient positioning devices) totaled \$47.2 million during the year ended December 31, 2013 representing an increase of \$1.8 million compared to the same period in 2012. Sales of powered products totaled \$12.8 million during the year ended December 31, 2013 representing an increase of \$2.4 million compared to the same period in 2012. These increases were driven primarily by \$5.5 million of new product sales combined with higher capital purchases from other customers during the period, offset in part by price concessions and reduced volumes from two large customers. One large customer has been purchasing reduced volumes of Tridien exclusively manufactured products and another large customer experienced the loss of a contract program that represented approximately \$3.0 million in non-powered annual sales for Tridien.

Table of Contents**Cost of sales**

Cost of sales increased approximately \$4.6 million for the year ended December 31, 2013 compared to the same period in 2012. Gross profit as a percentage of sales was 22.4% for the year ended December 31, 2013 compared to 24.8% in the corresponding period in 2012. The decrease in gross profit as a percentage of sales totaling 2.4% was primarily due to: (i) operational inefficiencies resulting from ramping up for new product releases, (ii) increased warranty costs, (iii) an unfavorable product sales mix and (iv) price concessions granted to major customers during the year ended December 31, 2013 compared to the same period in 2012.

Selling, general and administrative expenses

Selling, general and administrative expenses for the year ended December 31, 2013 increased \$0.6 million to \$9.1 million compared to the same period in 2012, principally as a result of increased research and development spending for products expected to launch in 2014 and cost associated with expansion of the management team.

Impairment expense

During the second quarter of 2013, one of Tridien's largest customers lost a large contract program that was being serviced substantially with Tridien product. The expected lost sales and net income were significant enough to trigger an interim goodwill and indefinite-lived asset impairment analysis. The result of these analyses supported the carrying value of goodwill but indicated that sales of product, reliant on trade names, could not fully support the carrying value of Tridien's trade names. As such we wrote down the value of the trade names by \$0.9 million to a carrying value of approximately \$0.6 million at that time. At December 31 2013 further revenue decreases together with a revised 2014 forecast that indicated little to no growth prompted an additional interim impairment analysis as of December 31, 2013. The result of the year end goodwill impairment analysis (step 1) indicated that goodwill was impaired. Further testing (step 2) resulted in the following preliminary results; (i) goodwill was written down \$11.5 million to a balance of \$16.8 million; (ii) trade names were written down \$0.4 million to a balance of \$0.2 million and; (iii) technology assets were written down \$0.1 million to a balance of \$0.8 million.

Income (loss) from operations

Income from operations decreased approximately \$13.9 million to an operating loss of \$10.2 million for the year ended December 31, 2013 compared to operating income of \$3.7 million in the same period in 2012 based on those factors described above, particularly the impairment expense.

Fiscal Year Ended December 31, 2012 Compared to Fiscal Year Ended December 31, 2011**Net sales**

Net sales for the year ended December 31, 2012 were unchanged when compared to the corresponding year ended December 31, 2011. Net sales of non-powered support surfaces and patient positioning devices totaled approximately \$45.5 million in 2012 compared to \$44.9 million during the same period in 2011, an increase of \$0.6 million or 1.0%. Non-powered sales represented approximately 80% of net sales in 2012 and 2011. Net sales of powered products totaled \$10.4 million during the year ended December 31, 2012 compared to \$11.0 million in 2011, a decrease of \$0.6 million or 5.5%.

Cost of sales

Cost of sales increased approximately \$0.8 million for the year ended December 31, 2012 compared to the same period in 2011. Gross profit as a percentage of sales was 24.7% for the year ended December 31, 2012 compared to 26.2% in the corresponding period in 2011. The decrease in gross profit as a percentage of sales was primarily due to unfavorable product mix in 2012 as compared to 2011 which had a 1.0% unfavorable impact on gross profit margins. Tridien opened a manufacturing facility in April 2011 which has allowed them to expand capacity while reducing freight costs and manufacturing lead times. This investment had a net 0.5% unfavorable impact on gross profit margin in 2012.

Selling, general and administrative expense

Selling, general and administrative expense for the year ended December 31, 2012 increased approximately \$0.5 million compared to the same period in 2011. The increase is due to an increase in research and development spending (\$0.3 million) and spending on growth initiatives. Tridien spent \$2.1 million on research and development costs in 2012 compared to \$1.8 million in 2011.

Income from operations

Income from operations decreased approximately \$1.3 million to \$3.7 million for the year ended December 31, 2012 compared to \$5.0 million in the year ended December 31, 2011, due principally to those factors described above.

Table of Contents**Liquidity and Capital Resources**

For the year ended December 31, 2013, on a consolidated basis, cash flows provided by operating activities totaled approximately \$72.4 million, which reflects the results of operations of all eight of our existing businesses during the year ended December 31, 2013 compared to \$52.6 million provided by operating activities for the same period in 2012, an increase of \$19.8 million. This increase is the result of (i) an increase in net income at our businesses during 2013 compared to 2012, adjusted for non-cash operating charges in each year for impairment expense, derivative mark-to-market losses and loss on debt extinguishment (\$18.9 million); (ii) a decrease in payments of allocation interests during the year ended December 31, 2013, as reflected in operating activities compared to 2012 (\$8.3 million); offset in part by the increase in cash absorbed through working capital needs at December 31, 2013 compared to 2012 (\$5.5 million). The major working capital investments include investment in inventory (\$24.5 million) and accounts receivable (\$11.0 million) offset in part by increases in accrued expenses that provided short-term, temporary working capital at December 31, 2013. The investment in inventory is principally at American Furniture, Liberty and FOX. The inventory buildup at American Furniture is for tax season sales at AFM which typically occur January through April. The inventory buildup at Liberty and FOX is the result of steadily increasing sales during 2013 compared to a year ago. The increased balance in accounts receivable is principally attributable to FOX which recognized a considerable increase in sales in the fourth fiscal quarter of 2013 compared to 2012. The excess cash used for these working capital needs was offset in part by increases in trade accounts payable and accrued expenses that provided short-term, temporary working capital at December 31, 2013.

For the year ended December 31, 2013, on a consolidated basis, cash flows provided by investing activities totaled approximately \$66.3 million, which reflects the net proceeds from the sale of subsidiary stock (FOX \$80.9 million), and sale leaseback proceeds at Advanced Circuits (\$4.4 million), offset in part by capital expenditures (\$20.4 million). We expect 2014 capital expenditures to approximate the amount spent in 2013.

For the year ended December 31, 2013, on a consolidated basis, cash flows used in financing activities totaled approximately \$44.1 million, principally reflecting distributions to majority and non-controlling shareholders (\$88.6 million), offset in part by net proceeds from the sale of IPO stock at the subsidiary level (\$36.1 million) and borrowings on our long-term debt, net of loan origination costs (\$8.5 million).

For the year ended December 31, 2012, on a consolidated basis, cash flows provided by operating activities totaled approximately \$52.6 million, which reflects the results of operations of all eight of our existing businesses and four months of Halo activity, during the year ended December 31, 2012 compared to \$91.4 million provided by operating activities for the same period in 2011, a decrease of \$38.8 million. The increase in cash provided by operating income of \$13.2 million in 2012 over the prior year was offset by cash used for working capital investments of \$27.0 million during 2012. The major working capital investments include pay down of the supplemental put liability (\$13.9 million) and investment in inventory (\$13.7 million) offset in part by increases in accrued expenses that provided short-term, temporary working capital at December 31, 2012. The investment in inventory is principally at American Furniture, CamelBak and FOX. The inventory buildup at American Furniture is for tax season sales at AFM which typically occur January through April. The inventory buildup at CamelBak and FOX is the result of steadily increasing sales compared to a year ago.

Cash flows used in investing activities totaled approximately \$84.4 million for the year ended December 31, 2012, which reflects (i) cash used for both platform and add-on acquisitions made during 2012 (\$126.4 million); (ii) capital expenditures at our businesses (\$18.5 million); and, (iii) additional investment made by us in our existing businesses (\$15.4 million) offset in part by proceeds from the sale of our businesses in 2012 (\$75.1 million).

Cash flows used in financing activities totaled approximately \$82.2 million for the year ended December 31, 2012, principally reflecting: (i) net proceeds from our Credit Facility (\$51.0 million), and (ii) net proceeds from non-controlling interests (\$12.1 million). These inflows were more than offset by distributions to shareholders (\$99.6 million) and redemption of CamelBak's preferred stock (\$48.0 million).

For the year ended December 31, 2011, on a consolidated basis, cash flows provided by operating activities totaled approximately \$91.4 million, which reflects the results of operations of all eight of our businesses (including Staffmark) during the year ended December 31, 2011. Consolidated net income of \$72.8 million in 2011 coupled with \$25.0 million in positive cash flow attributable to working capital was offset by non-cash charges aggregating approximately \$5.9 million included in consolidated net income for the year. Significant non-cash charges in 2011 include (i) depreciation and amortization \$49.1 million; (ii) supplemental put expense \$11.8 million and; (iii) impairment charges at American Furniture \$27.8 million offset by the gain recorded on the sale of Staffmark of \$88.6 million. Cash flows provided by operations in 2010 totaled approximately \$44.8 million. The \$46.5 million increase in operating cash flow is attributable to an increase in sales and operating income at our subsidiary operating segments with the exception of American Furniture.

Cash flows used in investing activities totaled approximately \$86.6 million for the year ended December 31, 2011, which reflects cash used for both platform and add-on acquisitions made during 2011 totaling \$278.0 million together with capital expenditures at our businesses totaling \$21.9 million, offset in part by proceeds from the sale of Staffmark totaling approximately \$217.2 million.

Edgar Filing: Compass Diversified Holdings - Form 10-K

Cash flows provided by financing activities in 2011 totaled approximately \$114.1 million for the year ended December 31, 2011, principally reflecting: (i) \$208.3 million of net proceeds from the new Term Loan Facility after payment of fees and the original issue discount (ii) \$19.6 million in net proceeds from a private placement of our common stock, and (iii) net proceeds from non-controlling interests totaling \$49.5 million in connection with the acquisitions of CamelBak and Orbit Baby. These inflows were offset in part by distributions to shareholders totaling \$66.9 million and repayment of amounts outstanding under our Prior Credit Agreement totaling \$96.0 million.

Table of Contents

At December 31, 2013, we had approximately \$113.2 million of cash and cash equivalents on hand. The majority of our cash is invested in short-term securities and corporate debt securities and is maintained in accordance with the Company's investment policy, which identifies allowable investments and specifies credit quality standards. The primary objective of our investment activities is the preservation of principal and minimizing risk. We do not hold any investments for trading purposes.

Intercompany loans to our businesses

At December 31, 2013 we had the following outstanding loans due from our businesses:

CamelBak \$115.6 million;

Ergobaby \$42.4 million;

FOX \$0 million;

Liberty \$44.3 million.

Advanced Circuits \$85.8 million;

American Furniture \$23.0 million;

Arnold \$77.2 million; and

Tridien \$14.5 million.

Each loan has a scheduled maturity and each business is entitled to repay all or a portion of the principal amount of the outstanding loans, without penalty, prior to maturity. As of December 31, 2013, American Furniture was not in compliance with its Maintenance Fixed Charge Coverage Ratio requirement included in the amended credit agreement with us dated December 31, 2010. We are required to fund, in the form of an additional equity investment, any shortfall in the difference between Adjusted EBITDA and Fixed Charges as defined in American Furniture's credit agreement with us. Per the maintenance agreement, the shortfall that we are required to fund, American Furniture is in turn required to pay down its term debt with us. The amount of the shortfall at December 31, 2013, 2012 and 2011 was approximately \$1.6 million, \$3.5 million and \$5.8 million, respectively. All of our businesses are in compliance with their financial covenants with us as of December 31, 2013.

FOX has long-term debt outstanding totaling \$8.0 million as of December 31, 2013 in connection with a separate third-party revolving credit agreement.

Our primary source of cash is from the receipt of interest and principal on our outstanding loans to our businesses. Accordingly, we are dependent upon the earnings and cash flow of these businesses, which are available for (i) operating expenses; (ii) payment of principal and interest under our Credit Facility; (iii) payments to CGM due or potentially due pursuant to the revised MSA, the LLC Agreement; (iv) cash distributions to our shareholders and; (v) investments in future acquisitions. Payments made under (i) through (iii) above are required to be paid before distributions to shareholders and may be significant and exceed the funds held by us, which may require us to dispose of assets or incur debt to fund such expenditures.

Credit Facility

Edgar Filing: Compass Diversified Holdings - Form 10-K

Our Credit Facility provides for a Revolving Credit Facility totaling \$320 million which matures in April 2017 and a Term Loan Facility totaling approximately \$279.8 million, which matures in October 2017.

The Term Loan Facility requires quarterly payments of \$0.7 million which commenced March 31, 2012, with a final payment of the outstanding principal balance due in October 2017.

On April 3, 2013, we exercised an option to increase the Term Loan Facility by \$30 million. In connection with the increase, we amended the pricing of the Credit Facility wherein borrowings under the Term Loan Facility now bear interest at LIBOR plus 4.0% with a LIBOR floor of 1.0% and borrowings under the Revolving Credit Facility now bear interest at LIBOR plus 2.5% 3.5%. In addition, the amendment provided for a reduction in commitment fees on revolving loan availability to 0.75% and extended the maturity date on the Revolving Credit Facility to April 2017. All other material terms of the Credit Facility remain unchanged. We incurred fees and expenses of approximately \$1.9 million in connection with this Amendment.

On August 6, 2013, we exercised an option to increase our Revolving Credit Facility by \$30 million to a total of \$320 million, subject to borrowing base restrictions. The Credit Facility provides for a sub-facility under the Revolving Credit Facility pursuant to which letters of credit may be issued in an aggregate amount not to exceed

Table of Contents

\$100 million outstanding at any time. At no time may the (i) aggregate principal amount of all amounts outstanding under the Revolving Credit Facility, plus (ii) the aggregate amount of all outstanding letters of credit, exceed the Revolving Loan Commitment. At December 31, 2013, we had \$1.6 million in outstanding letters of credit.

At December 31, 2013, we had no outstanding borrowings under the Revolving Credit Facility.

We had approximately \$318.4 million in borrowing base availability under this facility at December 31, 2013. Letters of credit totaling \$1.6 million were outstanding at December 31, 2013. We currently have no exposure to failed financial institutions.

The following table reflects required and actual financial ratios as of December 31, 2013 included as part of the affirmative covenants in our Credit Facility:

Description of Required Covenant Ratio	Covenant Ratio Requirement	Actual Ratio
Fixed Charge Coverage Ratio	greater than or equal to 1.5:1.0	2.70:1.0
Total Debt to EBITDA Ratio	less than or equal to 3.5:1.0	1.62:1.0

We intend to use the availability under our Credit Facility and cash on hand to pursue acquisitions of additional businesses, to fund distributions and to provide for other working capital needs. We have considered the impact of recent market instability and credit availability in assessing the adequacy of our liquidity and capital resources.

The Credit Facility requires us to hedge the interest exposure on 50% of outstanding debt under the Term Loan Facility. On October 31, 2011, we purchased a three-year interest rate swap (Swap) with a notional amount of \$200 million effective January 1, 2014 through December 31, 2016. The agreement requires us to pay interest on the notional amount at the rate of 2.49% in exchange for the three-month LIBOR rate, with a floor of 1.5%. At December 31, 2013, this Swap had a fair value of negative \$4.1 million and is reflected as a component of other non-current liabilities (\$2.1 million) with the remaining balance included as a component of current liabilities.

FOX Credit Facility

On August 7, 2013, FOX entered into a \$60 million revolving credit facility with SunTrust Bank and other lenders (the FOX Credit Facility). The FOX Credit Facility expires on August 7, 2018 and provides a revolving loan facility of \$60 million which includes up to \$10 million in letters of credit and up to \$5 million in swingline loans. The facility is secured by substantially all of FOX s tangible and intangible personal property. Advances under the FOX Credit Facility bear interest at either the LIBOR or the Prime Rate, plus an applicable margin ranging from 0.50% to 1.50% based upon the Consolidated Net Leverage Ratio. At December 31, 2013, the interest rate on outstanding amounts under the facility was 2.13%. In addition to interest on amounts borrowed under the FOX Credit Facility, FOX will pay a quarterly commitment fee on the unused portion of the commitment as defined in the FOX Credit Facility, which can range from 0.20% to 0.30% based on its Consolidated Net Leverage Ratio. FOX paid approximately \$0.8 million in fees upon entering into the FOX Credit Facility. FOX is subject to certain customary affirmative and restrictive covenants arising under the FOX Credit Facility. In addition, FOX is required to maintain certain financial covenants, including a Leverage Ratio and a Fixed Charge Coverage Ratio. FOX was in compliance with applicable covenants as of December 31, 2013.

FOX IPO

On August 13, 2013 FOX completed an initial public offering of its common stock pursuant to a registration statement on Form S-1. FOX sold 2,857,143 shares and certain of its shareholders sold 7,000,000 shares (including 5,800,238 shares held by us) at an initial offering price of \$15.00 per share. FOX trades on the NASDAQ stock market under the ticker FOXF . We received approximately \$80.9 million in net proceeds from the sale of our FOX shares. FOX used a portion of their net proceeds received from the sale of their shares as well as proceeds from the FOX credit facility to repay \$61.5 million in outstanding indebtedness to us under their existing credit facility with the us.

As a result of the IPO we currently own approximately 53.9% of the outstanding shares of FOX.

Table of Contents

On May 30, 2013, Advanced Circuits entered into a sale leaseback transaction for a 50,664 square foot office and manufacturing facility, land, and machinery and equipment located in Aurora CO. The net proceeds from the sale were approximately \$4.1 million, paid at closing. The initial lease term is for 13.5 years with automatic ten year renewals. Rent is approximately \$0.4 million per year, subject to Consumer Price Index increases.

Supplemental Put Agreement Termination

On July 1, 2013, we amended the MSA with our Manager to provide for certain modifications related to our Manager's registration as an investment adviser under the Investment Advisers Act of 1940 (*Adviser's Act*), as amended. In connection with the amendment resulting from the Manager's registration as an investment adviser under the *Adviser's Act*, we and our Manager agreed to terminate the Supplemental Put Agreement, which had the effect of eliminating the Manager's right to require us to purchase the Allocation Interests upon termination of the MSA. Pursuant to the MSA, as amended, our Manager will continue to manage the day-to-day operations and affairs of the Company, oversee the management and operations of our businesses, perform certain other services for which it will continue to receive management fees, and the holders of the Allocation Interests will continue to receive the profit allocation upon the occurrence of a Sale Event or a Holding Event.

As a result of the termination of the Supplemental Put Agreement, we derecognized the supplemental put liability associated with our Manager's put right, reversing the entire \$61.3 million liability during the year ended December 31, 2013 through supplemental put expense on the consolidated statement of operations. We will record future Holding Events and Sale Events as dividends declared on Allocations Interests to stockholders' equity when they are approved by our board of directors. As a result of the FOX IPO, our board of directors approved and declared on October 30, 2013 a profit allocation payment totaling \$16.0 million which was paid to holders of Allocation Interests in November of 2013. In addition, profit allocations totaling \$5.6 million were disbursed to holders of Allocation Interests as a result of FOX's five-year Holding Event.

We believe that we currently have sufficient liquidity and capital resources, which include amounts available under our Revolving Credit Facility, to meet our existing obligations, including quarterly distributions to our shareholders, as approved by our board of directors, over the next twelve months.

Interest Expense

We incurred interest expense totaling \$19.4 million in the year ended December 31, 2013, as compared to \$25.1 million in the year ended December 31, 2012 and \$12.6 million for the year ended December 31, 2011. The components of interest expense in each of the years ended December 31, 2013, 2012 and 2011 are as follows (in thousands):

	Years ended December 31,		
	2013	2012	2011
Interest on credit facilities	\$ 15,625	\$ 17,643	\$ 7,509
Unused fee on Revolving Credit Facility	2,349	2,666	2,706
Amortization of original issue discount	1,243	2,312	250
Realized losses on interest rate hedges		166	143
Unrealized losses on interest rate derivatives	130	2,175	1,933
Letter of credit fees	53	63	60
Other	15	30	42
Interest expense	\$ 19,415	\$ 25,055	\$ 12,643
Average daily balance of debt outstanding	\$ 294,056	\$ 271,776	\$ 151,781
Effective interest rate	6.6%	9.2%	8.3%

Table of Contents

Income Taxes

We incurred income tax expense of \$20.7 million with an annual effective rate of 20.8% during the year ended December 31, 2013, \$21.1 million in income tax expense with an annual effective tax rate of 78.6% during the year ended 2012, and \$6.9 million with an effective tax rate of 26.4% during the year ended 2011. The reversal of the supplemental put expense during 2013 was not taxable as it was incurred at the LLC level. In addition, other gains and losses incurred at the Company, which is an LLC, are not tax deductible as those costs are passed through to the shareholders. A portion of the acquisition costs expensed in the year ended December 31, 2012 in connection with the Arnold and Universal Circuits acquisitions are not tax deductible, and our losses incurred at the Company, which is an LLC, are not tax deductible at the corporate level as those costs are passed through to the shareholders. For the year ended 2012, these two items accounted for 3.0% and 31.1%, respectively, of the increased effective tax rate compared to the Federal statutory rate at December 31, 2012. Goodwill impairment charges expensed in the year ended December 31, 2011 in connection with the American Furniture write-offs are not tax deductible and our losses incurred at the Company, which is an LLC, are not tax deductible at the corporate level as those costs are passed through to the shareholders. For the year ended 2011, these two items accounted for 8.0% and 30.7%, respectively, of the increased effective tax rate compared to the Federal statutory rate at December 31, 2011. The components of income tax expense as a percentage of income from continuing operations before income taxes for the years ended December 31, 2013, 2012 and 2011 are as follows:

	Year ended December 31,		
	2013	2012	2011
United States Federal Statutory Rate	35.0%	35.0%	(35.0%)
Foreign and State income taxes (net of Federal benefits)	1.9	11.7	3.5
Expenses of Compass Group Diversified Holdings, LLC representing a pass through to shareholders (1)	1.5	10.2	14.8
Effect of supplemental put expense (reversal)	(16.2)	20.9	15.9
Impact of subsidiary employee stock options	0.4	(1.8)	1.7
Domestic production activities deduction	(1.8)	(4.1)	(5.3)
Non-deductible acquisition costs		3.0	
Impairment expense			8.0
Non-recognition of NOL carryforwards at subsidiaries	3.1	4.8	24.2
Other	(3.1)	(1.1)	(1.4)
Effective income tax rate	20.8%	78.6%	26.4%

Reconciliation of Non-GAAP Financial Measures

From time to time we may publicly disclose certain non-GAAP financial measures in the course of our investor presentations, earnings releases, earnings conference calls or other venues. A non-GAAP financial measure is a numerical measure of historical or future performance, financial position or cash flow that excludes amounts, or is subject to adjustments that effectively exclude amounts, included in the most directly comparable measure calculated and presented in accordance with GAAP in our financial statements, and vice versa for measures that include amounts, or are subject to adjustments that effectively include amounts, that are excluded from the most directly comparable measure as calculated and presented. GAAP refers to generally accepted accounting principles in the United States.

Non-GAAP financial measures are provided as additional information to investors in order to provide them with an alternative method for assessing our financial condition and operating results. These measures are not meant to be a substitute for GAAP, and may be different from or otherwise inconsistent with non-GAAP financial measures used by other companies.

The tables below reconcile the most directly comparable GAAP financial measures to EBITDA, Adjusted EBITDA and Cash Flow Available for Distribution and Reinvestment (CAD).

Table of Contents

Reconciliation of Net income (loss) to EBITDA and Adjusted EBITDA

EBITDA Earnings before Interest, Income Taxes, Depreciation and Amortization (EBITDA) is calculated as net income (loss) before interest expense, income tax expense (benefit), depreciation expense and amortization expense. Amortization expenses consist of amortization of intangibles and debt charges, including debt issuance costs, discounts, etc.

Adjusted EBITDA Is calculated utilizing the same calculation as described above in arriving at EBITDA further adjusted by: (i) non-controlling stockholder compensation, which generally consists of non-cash stock option expense; (ii) successful acquisition costs, which consist of transaction costs (legal, accounting , due diligences, etc.) incurred in connection with the successful acquisition of a business expensed during the period in compliance with ASC 805; (iii) increases or decreases in supplemental put charges for periods prior to July 1, 2013, which reflected the estimated potential liability due to our Manager that required us to acquire their Allocation Interests in the Company at a price based on a percentage of the fair value in our businesses over their original basis plus a hurdle rate. ; (iv) management fees, which reflect fees due quarterly to our Manager in connection with our MSA; (v) impairment charges, which reflect write downs to goodwill or other intangible assets and (vi) gains or losses recorded in connection with the sale of fixed assets.

We believe that *EBITDA* and *Adjusted EBITDA* provide useful information to investors and reflect important financial measures as they exclude the effects of items which reflect the impact of long-term investment decisions, rather than the performance of near term operations. When compared to net income (loss) these financial measures are limited in that they do not reflect the periodic costs of certain capital assets used in generating revenues of our businesses or the non-cash charges associated with impairments. This presentation also allows investors to view the performance of our businesses in a manner similar to the methods used by us and the management of our businesses, provides additional insight into our operating results and provides a measure for evaluating targeted businesses for acquisition.

We believe these measurements are also useful in measuring our ability to service debt and other payment obligations. *EBITDA* and *Adjusted EBITDA* are not meant to be a substitute for GAAP, and may be different from or otherwise inconsistent with non-GAAP financial measures used by other companies.

Table of Contents

The following table reconciles *EBITDA* and *Adjusted EBITDA* to net income (loss), which we consider to be the most comparable GAAP financial measure (*in thousands*):

(a) As a result of the sale of our HALO subsidiary in May 2012, Adjusted EBITDA does not include EBITDA from HALO for the period January 1, 2011 through December 31, 2011 of \$12.9 million.

(b) As a result of the sale of our Staffmark subsidiary in October 2011, Adjusted EBITDA does not include EBITDA from Staffmark for the period January 1, 2011 through October 17, 2011 of \$25.6 million.

Table of Contents

The table below details cash receipts and payments that are not reflected on our income statement in order to provide an additional measure of management's estimate of cash CAD. CAD is a non-GAAP measure that we believe provides additional information to our shareholders in order to enable them to evaluate our ability to make anticipated quarterly distributions. Because other entities do not necessarily calculate CAD the same way we do, our presentation of CAD may not be comparable to similarly titled measures provided by other entities. We believe that our historic and future CAD, together with our cash balances and access to cash via our debt facilities, will be sufficient to meet our anticipated distributions over the next twelve months. The table below reconciles CAD to net income and to cash flow provided by operating activities, which we consider to be the most directly comparable financial measure calculated and presented in accordance with GAAP.

Table of Contents

- (1) Represents the commitment fees on the unused portion of our Prior Revolving Credit Facility and Revolving Credit Facility.
(2) Represents successful acquisition transaction costs.
(3) Represents transaction costs incurred related to the sale of Staffmark and HALO, net of the related income tax benefit.

Edgar Filing: Compass Diversified Holdings - Form 10-K

- (4) Represents maintenance capital expenditures that were funded from operating cash flow, net of proceeds from sales of property, plant and equipment, and excludes growth capital expenditures of approximately \$6.2 million, \$7.5 million and \$10.6 million incurred during the year ended December 31, 2013, 2012 and 2011, respectively.
- (5) Represents FOX CAD subsequent to the IPO date. Includes approximately \$20.9 million of EBITDA, less: \$6.7 million of cash taxes, \$0.9 million of management fees and \$1.8 million of maintenance capital expenditures.

Table of Contents

Cash flows of certain of our businesses are seasonal in nature. Cash flows from American Furniture are typically highest in the months of January through April of each year, coinciding with homeowners' tax refunds. Revenue and earnings from FOX are typically highest in the third quarter, coinciding with the delivery of product for the new bike year. Earnings from CamelBak are typically higher in the spring and summer months than other months as this corresponds with warmer weather in the Northern Hemisphere and an increase in hydration related activities.

Related Party Transactions and Certain Transactions Involving our Businesses

We have entered into the following related party transactions with our Manager, CGM:

Management Services Agreement

LLC Agreement

Cost Reimbursement and Fees

Management Services Agreement

We entered into the MSA with CGM effective May 16, 2006. The MSA provides for, among other things, CGM to perform services for us in exchange for a management fee paid quarterly and equal to 0.5% of our adjusted net assets. The management fee is required to be paid prior to the payment of any distributions to shareholders. For the year ended December 31, 2013, 2012 and 2011, we incurred \$18.6 million, \$17.6 million and \$16.3 million, respectively, in management fees to CGM (excludes offsetting fees paid by Staffmark and HALO).

Pursuant to the MSA, CGM is entitled to enter into off-setting management service agreements with each of our segments. The amount of the fee is negotiated between CGM and the operating management of each segment and is based upon the value of the services to be provided. The fees paid directly to CGM by the segments offset on a dollar for dollar basis the amount due to CGM by the Company under the MSA.

On July 1, 2013, we and our Manager amended the MSA to provide for certain modifications related to our Manager's registration as an investment adviser under the Investment Advisers Act of 1940 ("Advisors Act"), as amended. In connection with the amendment we and our Manager agreed to terminate the Supplemental Put Agreement, which had the effect of eliminating the Manager's right to require us to purchase the Allocation Interests upon termination of the MSA. Pursuant to the MSA, as amended, our Manager will continue to manage the day-to-day operations and affairs and oversee the management and operations of the Company's businesses, perform certain other services for which it will receive management fees, and the holders of the Allocation Interests will continue to receive the profit allocation upon the occurrence of a Sale Event or a Holding Event.

LLC Agreement

As distinguished from its provision of providing management services to us, pursuant to the amended MSA, members of CGM are owners of 53.6% of the Allocation Interests in us through their ownership in Sostratus LLC. The LLC agreement gives the holders of Allocation Interests the right to distributions pursuant to a profit allocation formula upon the occurrence of a Sale Event or a Holding Event. The Allocation Interest Holders are entitled to receive and as such can elect to receive the positive contribution-based profit allocation payment for each of the business acquisitions during the 30-day period following the fifth anniversary of the date upon which we acquired a controlling interest in that business (Holding Event) and upon the sale of the business (Sale Event). During the year ended December 31, 2013, we paid \$5.6 million to the holders of Allocation Interests related to FOX's positive contribution-based profit (Holding Event) and \$16.0 million as a result of FOX's sale of common stock to the public (Sale Event).

Cost Reimbursement and Fees

We reimbursed CGM approximately \$3.5 million, \$3.5 million and \$3.1 million, principally for occupancy and staffing costs incurred by CGM on our behalf during the years ended December 31, 2013, 2012 and 2011, respectively.

We have entered into the following significant transactions with our businesses during 2013:

FOX

On August 13, 2013 FOX completed an initial public offering of its common stock pursuant to a registration statement on Form S-1. In the FOX IPO, FOX sold 2,857,143 shares and certain of its shareholders sold 7,000,000 shares (including 5,800,238 shares held by CODI) at an initial offering price of \$15.00 per share. FOX trades on the NASDAQ stock market under the ticker FOXF. We received approximately \$80.9 million in net proceeds from the sale of our FOX shares. FOX used a portion of their net proceeds received from the sale of their shares as well as proceeds from a new credit facility with a third party lender to repay \$61.5 million in outstanding indebtedness to us under their existing credit facility.

Table of Contents

As a result of the FOX IPO, we currently own approximately 53.9% of the outstanding shares of FOX common stock.

FOX leases manufacturing facilities in Watsonville, California from Robert Fox, a founder and noncontrolling shareholder of FOX. The term of the lease is through July of 2018 and the rental payments can be adjusted annually for a cost-of-living increase based upon the consumer price index. FOX is responsible for all real estate taxes, insurance and maintenance related to this property. The leased facilities are 86,000 square feet and FOX paid rent under this lease of approximately \$1.1 million for each of the years ended December 31, 2013, 2012 and 2011.

In January 2014, FOX hired the son-in-law of our Chairman, to be its Vice-President of Business Development.

Tridien

On February 4, 2013, Tridien redeemed 175,000 shares of its Redeemable Preferred Stock at a redemption price of \$100 per share, aggregating \$17.5 million. We received \$14.4 million of the redemption payout and non-controlling shareholders of Tridien received the remaining \$3.1 million. In connection with this redemption, Tridien amended its inter-company loan agreement (the *Loan Agreement*). The *Loan Agreement* was amended to (i) provide for additional term loan borrowings of \$16.5 million and an increase in the revolving loan commitment of \$4.0 million and to permit the proceeds thereof to fund the preferred stock redemption totaling \$17.5 million, (ii) extend the maturity dates of the term loans and revolving loan commitment under the *Loan Agreement*, and (iii) modify borrowing rates under the *Loan Agreement*. All other material terms and conditions of the *Loan Agreement* were unchanged.

Tridien leased a facility from an affiliate of a noncontrolling shareholder of Tridien during the year ended December 31, 2013. The terms of the lease are through February of 2014. Tridien paid rent under this leases of approximately \$0.7 million for the year ended December 31, 2013.

American Furniture

American Furniture was not in compliance with its Maintenance Fixed Charge Coverage Ratio requirement included in the amended credit agreement with us dated December 31, 2010. We are required to fund, in the form of an additional equity investment, any shortfall in the difference between Adjusted EBITDA and Fixed Charges as defined in American Furniture's credit agreement with us. Per the maintenance agreement, the shortfall that we are required to fund, American Furniture is in turn required to pay down its term debt with us. The amount of the shortfall at December 31, 2013 was approximately \$1.6 million.

Contractual Obligations and Off-Balance Sheet Arrangements

We have no special purpose entities or off balance sheet arrangements, other than operating leases entered into in the ordinary course of business.

Long-term contractual obligations, except for our long-term debt obligations, are generally not recognized in our consolidated balance sheet. Non-cancelable purchase obligations are obligations we incur during the normal course of business, based on projected needs.

The table below summarizes the payment schedule of our contractual obligations at December 31, 2013 (in thousands):

	Total	Less than 1 Year	1-3 Years	3-5 Years	More than 5 Years
Long-term debt obligations (a)	\$ 349,944	\$ 19,924	\$ 38,992	\$ 291,028	\$
Operating lease obligations (b)	79,023	13,038	22,129	13,455	30,401
Purchase obligations (c)	242,885	164,101	40,234	38,550	
Total (d)	\$ 671,852	\$ 197,063	\$ 101,355	\$ 343,033	\$ 30,401

(a) Reflects commitment fees and letter of credit fees under our Revolving Credit Facility and amounts due, together with interest on our Revolving Credit Facility and Term Loan Facility.

Edgar Filing: Compass Diversified Holdings - Form 10-K

- (b) Reflects various operating leases for office space, manufacturing facilities and equipment from third parties.
- (c) Reflects non-cancelable commitments as of December 31, 2013, including: (i) shareholder distributions of \$69.6 million, (ii) estimated management fees of \$18.8 million per year over the next five years and; (iii) other obligations, including amounts due under employment agreements. Distributions to our shareholders are approved by our board of directors each fiscal quarter. The amount approved for future quarters may differ from the amount included in this schedule.
- (d) The contractual obligation table does not include approximately \$8.1 million in liabilities associated with unrecognized tax benefits as of December 31, 2013 as the timing of the recognition of this liability is not certain. The amount of the liability is not expected to significantly change in the next twelve months.

Table of Contents

Critical Accounting Estimates

The following discussion relates to critical accounting estimates for the Company, the Trust and each of our businesses at December 31, 2013.

The preparation of our financial statements in conformity with GAAP will require management to adopt accounting policies and make estimates and judgments that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from these estimates under different assumptions and judgments and uncertainties, and potentially could result in materially different results under different conditions. Our critical accounting estimates are discussed below. These critical accounting estimates are reviewed by our independent auditors and the audit committee of our board of directors.

Supplemental Put Agreement

Supplemental Put Agreement Termination

In connection with the Management Service Agreement (MSA), we entered into a Supplemental Put Agreement with the Manager at the time of our Initial Public Offering. Pursuant to the Supplemental Put Agreement, the Manager had the right to cause us to purchase the Allocation Interests then owned by the Manager upon termination of the MSA for a price to be determined in accordance with the Supplemental Put Agreement. The Allocation Interests entitle the holders to receive distributions pursuant to a profit allocation formula upon the occurrence of certain events. The distributions of profit allocation will be paid only upon the occurrence of the sale of a material amount of capital stock or assets of one of our businesses (Sale Event) or, at the option of the Manager, at each five year anniversary date of the acquisition of our businesses (Holding Event). We historically recorded the Supplemental Put obligation at the fair value of the profit allocation amount. This amount has been determined using a model that multiplies the trailing twelve-month EBITDA for each business unit by an estimated enterprise value multiple to determine an estimated selling price of the business unit. This amount represented our obligation to physically settle the purchase of the Allocation Interest at the option of the Manager upon the termination of the MSA. We recorded increases or decreases in the obligation under the Supplemental Put obligation through the consolidated statement of operations.

On July 1, 2013, the Company and the Manager amended the MSA to provide for certain modifications related to the Manager s registration as an investment adviser under the Investment Advisers Act of 1940 (Advisor s Act), as amended. In connection with the amendment resulting from the Manager s registration as an investment adviser under the Adviser s Act, the Company and the Manager agreed to terminate the Supplemental Put Agreement, which had the effect of eliminating the Manager s right to require us to purchase the Allocation Interests upon termination of the MSA. Pursuant to the MSA, as amended, the Manager will continue to manage the day-to-day operations and affairs of the Company, oversee the management and operations of our businesses, perform certain other services for us and receive management fees, and the holders of the Allocation Interests will continue to receive the profit allocation upon the occurrence of a Sale Event or a Holding Event.

As a result of the termination of the Supplemental Put Agreement, we derecognized the supplemental put liability associated with the Manager s put right, reversing the accumulated \$61.3 million liability through supplemental put expense on the condensed consolidated statement of operations during the year ended December 31, 2013. We will record future Holding Events and Sale Events as liabilities when dividends declared on Allocations Interests are approved by our board of directors. In addition we will include the estimated allocation interests due for Holding Events as a component of basic and diluted earnings per share under the two-class method. The determination of distributions due to allocation interests requires significant judgment both by our management team and by outside experts engaged to assist in this process. This judgment could result in either a higher or lower value assigned to the estimated distribution. The impact could result in either higher or lower basic and diluted earnings per share.

Revenue Recognition

We recognize revenue when it is realized or realizable and earned. We consider revenue realized or realizable and earned when it has persuasive evidence of an arrangement, the product has been shipped or the services have been provided to the customer, the sales price is fixed or determinable and collectability is reasonably assured. Provisions for customer returns and other allowances based on historical experience are recognized at the time the related sale is recognized.

Table of Contents

Business Combinations

The acquisitions of our businesses are accounted for under the acquisition method of accounting. The amounts assigned to the identifiable assets acquired and liabilities assumed in connection with acquisitions are based on estimated fair values as of the date of the acquisition, with the remainder, if any, to be recorded as identifiable intangibles or goodwill. The fair values are determined by our management team, taking into consideration information supplied by the management of the acquired entities and other relevant information. Such information typically includes valuations supplied by independent appraisal experts for significant business combinations. The valuations are generally based upon future cash flow projections for the acquired assets, discounted to present value. The determination of fair values requires significant judgment both by our management team and by outside experts engaged to assist in this process. This judgment could result in either a higher or lower value assigned to amortizable or depreciable assets. The impact could result in either higher or lower amortization and/or depreciation expense.

Goodwill and Intangible Assets

Goodwill represents the excess of the purchase price over the fair value of the assets acquired. We are required to perform impairment reviews at least annually and more frequently in certain circumstances. The estimates of future earnings and other market assumptions used to derive and test the fair value at each of our reporting units requires judgment on the part of management. Even minor adjustments to those values used and assumptions made can lead to significantly different results.

Annual goodwill and intangible assets impairment testing

Goodwill represents the excess amount of the purchase price over the fair value of the assets acquired. We are required to perform impairment reviews of goodwill balances at each of our Reporting Units (RU) at least annually and more frequently in certain circumstances. Each of our businesses represents a RU and Arnold is comprised of three RU. Each of our RU is subject to impairment review at March 31, 2013, which represents our annual date for impairment testing, with the exception of American Furniture. The balance of American Furniture's goodwill was completely written off in 2011.

The Financial Accounting Standards Board issued an accounting Standards Update 2011-08 (ASU) in September 2011 that permits companies to make a qualitative assessment of whether it is more likely than not that a RU fair value is less than its carrying amount before applying the two-step goodwill impairment test. If a company concludes that it is not more likely than not that the fair value of a reporting unit is less than its carrying amount it is not required to perform the two-step impairment test for that reporting unit. This ASU is effective for fiscal years beginning after December 15, 2011. At March 31, 2013 we elected to use the qualitative assessment alternative to test goodwill for impairment for each of our RU that maintain a goodwill carrying value with the exception of Arnold which has three RU. We performed a step 1 valuation of each of Arnolds three RU as of March 31, 2013 and in each case it was determined that the fair value of each RU exceeded its carrying value.

As prescribed by the ASU, factors to consider when making the qualitative assessment prior to performing Step 1 of the goodwill impairment test are as follows:

Macroeconomic conditions such as deterioration in general economic conditions, limitations on accessing capital, fluctuations in foreign exchange rates, or other developments in equity and credit markets;

Industry and market considerations such as deterioration in the environment in which an entity operates, an increased competitive environment, a decline (both absolute and relative to its peers) in market-dependent multiples or metrics, a change in the market for an entity's products or services, or a regulatory or political development;

Cost factor, such as increases in raw materials, labor, or other costs that have a negative effect on earnings and cash flows;

Overall financial performance such as negative or declining cash flows or a decline in actual or planned revenue or earnings compared with actual or planned revenue or earnings compared with actual and projected results of relevant prior periods;

Edgar Filing: Compass Diversified Holdings - Form 10-K

Other relevant entity-specific events such as litigation, contemplation of bankruptcy, or changes in management, key personnel, strategy, or customers;

Events affecting a RU such as change in the composition or carrying amount of its net assets, a more-likely-than-not expectation of selling or disposing of all or a portion, of a RU, the testing for recoverability of a significant asset group within a reporting unit, or a recognition of a goodwill impairment loss in the financial statements of a subsidiary that is a component of a reporting unit; and

Sustained decrease (both absolute and relative to its peers) in share price, if applicable.

Table of Contents

In addition to considering the above factors we performed the following procedures as of March 31, 2013 for each of our RU except Arnold;

Compared and assessed Trailing Twelve month (TTM) net sales as of March 31, 2013 to TTM nets sales as of March 31, 2013:

Compared and assessed TTM operating income as of March 31, 2013 to TTM operating income as of March 31, 2012;

Compared and assessed TTM Adjusted EBITDA as of March 31, 2013 to Adjusted EBITDA as of March 31, 2012;

Compared and assessed Adjusted EBITDA for the year-ended December 31, 2012 to Budget;

Compared and assessed Adjusted EBITDA for the three-months ended March 31, 2013 to Budget;

Compared the fair value of each of our RU to its carrying amount using the same metrics as those used in determining the value of the supplemental put as of March, 31 2013 and concluded that in each case the fair value of the RU was in excess of its carrying amount; and

Performed Market Cap reconciliation for CODI and determined that CODI 's public market cap was significantly in excess of the fair value of its consolidated equity (as derived from the aforementioned supplemental put analysis).

Based on our qualitative assessment as outlined above we believe that it is not more likely than not that the fair value of each of our RU is less than its carrying amount at March 31, 2013. The following triggering events occurred at Tridien during the twelve months ended December 31, 2013 which required us to reassess our March 31, 2013 conclusion for Tridien.

During the second quarter of 2013, one of Tridien 's largest customers lost a large contract program that was being serviced substantially with Tridien product. The expected lost sales and net income were significant enough to trigger an interim goodwill and indefinite-lived asset impairment analysis. The result of these analyses supported the carrying value of goodwill but indicated that sales of product, reliant on trade names, could not fully support the carrying value of Tridien 's trade names. As such we wrote down the value of the trade names by \$0.9 million to a carrying value of approximately \$0.6 million at that time.

At December 31, 2013, further revenue decreases together with a revised 2014 forecast that indicated little to no growth prompted an additional interim impairment analysis as of December 31, 2013. The result of the year end goodwill impairment analysis (step 1) indicated that goodwill was impaired. Further testing (step 2) resulted in the following; (i) goodwill was written down \$11.5 million to a balance of \$16.8 million; (ii) trade names were written down \$0.4 million to a balance of \$0.2 million and; (iii) technology assets were written down \$0.1 million to a balance of \$0.8 million.

The result of the Step 2 analyses is preliminary and based on various selected market data and comparable company 's results. To the extent that the final analysis contains revised and/or updated assumptions the impairment charge will change.

In connection with the annual goodwill impairment testing, we test other indefinite-lived intangible assets (trade names) at our RU. The Financial Accounting Standards Board issued an accounting Standards Update 2012-12 (ASU) in January 2012, that permits companies to make a qualitative assessment of whether it is more likely than not that the fair value of an individual RU 's indefinite lived assets is not less than its carrying amount before applying a quantitative analysis. If a company concludes that it is not more likely than not that the fair value of a reporting unit 's indefinite-lived assets is not less than its carrying amount it is not required to perform a quantitative test for that reporting unit. This ASU is effective for fiscal years beginning after September 15, 2012. At March 31, 2013 we elected to use the qualitative assessment alternative to test indefinite-lived assets for impairment for each of our RU that record indefinite lived assets. At that time it was determined that

Edgar Filing: Compass Diversified Holdings - Form 10-K

the fair value of indefinite lived assets at each of our RU exceeded its carrying amount. During the second and fourth fiscal quarter of 2013 triggering events required us to perform interim quantitative impairment analysis for Tridien s indefinite lived assets.

We test the fair value of trade names by applying the relief from royalty technique to forecasted revenues at those reporting units that do not amortize their trade name. In 2013 we determined that the carrying value of Tridien s trade names exceeded their carrying value by \$1.2 million.

Long-lived intangible assets subject to amortization, including customer relationships, non-compete agreements and technology are amortized using the straight-line method over the estimated useful lives of the intangible assets, which we determine based on the consideration of several factors including the period of time the asset is expected to remain in

Table of Contents

service. We evaluate long-lived assets for potential impairment whenever events occur or circumstances indicate that the carrying amount of the assets may not be recoverable. The carrying amount of a long-lived asset is not recoverable if it exceeds the sum of the undiscounted cash flows expected to result from the use and eventual disposition of the asset. If the carrying amount of a long-lived asset is not recoverable and is greater than its fair value, the asset is impaired and an impairment loss must be recognized. During the fourth quarter of 2013 we tested the long-lived assets at Tridien and recorded an impairment charge of \$0.1 million.

The determination of fair values and estimated useful lives requires significant judgment both by our management team and by outside experts engaged to assist in this process. This judgment could result in either a higher or lower value assigned to our reporting units and intangible assets. The impact could result in either higher or lower amortization and/or the incurrence of an impairment charge

Allowance for Doubtful Accounts

We record an allowance for doubtful accounts on an entity-by-entity basis with consideration for historical loss experience, customer payment patterns and current economic trends. The Company reviews the adequacy of the allowance for doubtful accounts on a periodic basis and adjusts the balance, if necessary. The determination of the adequacy of the allowance for doubtful accounts requires significant judgment by management. The impact of either over or under estimating the allowance could have a material effect on future operating results. The consolidated allowance for doubtful accounts is approximately \$3.4 million at December 31, 2013.

Deferred Tax Assets

Several of our majority owned subsidiaries have deferred tax assets recorded at December 31, 2013 which in total amount to approximately \$17.4 million. This deferred tax asset is net of \$12.0 million of valuation allowance primarily associated with AFM and Tridien's inability to utilize loss carryforwards associated with impairments in 2010, 2011, and 2013. These deferred tax assets are comprised primarily of reserves not currently deductible for tax purposes. The temporary differences that have resulted in the recording of these tax assets may be used to offset taxable income in future periods, reducing the amount of taxes we might otherwise be required to pay. Realization of the deferred tax assets is dependent on generating sufficient future taxable income. Based upon the expected future results of operations, we believe it is more likely than not that we will generate sufficient future taxable income to realize the benefit of existing temporary differences, although there can be no assurance of this. The impact of not realizing these deferred tax assets would result in an increase in income tax expense for such period when the determination was made that the assets are not realizable. (See Note K Income taxes in the Notes to consolidated financial statements)

Recent Accounting Pronouncements

Refer to footnote B to our consolidated financial statements.

Table of Contents

ITEM 7A. Quantitative and Qualitative Disclosures about Market Risk

Interest Rate Sensitivity

At December 31, 2013, we were exposed to interest rate risk primarily through borrowings under our Credit Facility because borrowings under this agreement are subject to variable interest rates. We had outstanding \$279.8 million under the Term Loan Facility at December 31, 2013. Our exposure to fluctuation in variable interest on \$200 million in outstanding Term Loan Facility is hedged with an interest rate cap effective December 30, 2011 with a term of two years. This cap fixed the future LIBOR rate on \$200 million of debt at a maximum of 2.5%.

Interest on our Term Loan is subject to a LIBOR floor of 1.0% and three-month LIBOR is currently 24 basis points. We currently estimate that a 100 basis point increase in LIBOR would not have a material impact on our results of operations, cash flows or financial condition.

We expect to borrow under our Revolving Credit Facility in the future in order to finance our short term working capital needs and future acquisitions. These borrowings will be subject to variable interest rates.

Exchange Rate Sensitivity

At December 31, 2013, we were not exposed to significant foreign currency exchange rate risks that could have a material effect on our financial condition or results of operations.

Credit Risk

We are exposed to credit risk associated with cash equivalents, investments, and trade receivables. We do not believe that our cash equivalents or investments present significant credit risks because the counterparties to the instruments consist of major financial institutions and we manage the notional amount of contracts entered into with any one counterparty. Our cash and cash equivalents at December 31, 2013 consists principally of (i) treasury backed securities, (ii) insured prime money market funds, (iii) FDIC insured Certificates of Deposit, and (iv) cash balances in several non-interest bearing checking accounts. Substantially all trade receivable balances of our businesses are unsecured. The concentration of credit risk with respect to trade receivables is limited by the large number of customers in our customer base and their dispersion across various industries and geographic areas. Although we have a large number of customers who are dispersed across different industries and geographic areas, a prolonged economic downturn could increase our exposure to credit risk on our trade receivables. We perform ongoing credit evaluations of our customers and maintain an allowance for potential credit losses.

REPORT OF MANAGEMENT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

Management of Compass Diversified Holdings is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934. Compass' internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation and fair presentation of financial statements issued for external purposes in accordance with accounting principles generally accepted in the United States of America (US GAAP). Compass' internal control over financial reporting includes those policies and procedures that:

pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of assets of the company;

provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with U.S. GAAP, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and

provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of assets of the company that could have a material effect on the consolidated financial statements.

Internal control over financial reporting includes the entity level environment, controls activities, monitoring and internal auditing practices and actions taken by management to correct deficiencies as identified.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect all misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management assessed the effectiveness of Compass' internal control over financial reporting as of December 31, 2013. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control-Integrated Framework (1992)*. Based on this assessment, management determined that Compass maintained effective internal control over financial reporting as of December 31, 2013.

The effectiveness of our internal control over financial reporting has been audited by Grant Thornton, LLP an independent registered public accounting firm, as stated in their report which appears on page F-3.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Directors and Shareholders

Compass Diversified Holdings

We have audited the internal control over financial reporting of Compass Diversified Holdings (a Delaware Trust) and subsidiaries (the Company) as of December 31, 2013, based on criteria established in the 1992 *Internal Control Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Report of Management on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2013, based on criteria established in the 1992 *Internal Control Integrated Framework* issued by COSO.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements of the Company as of and for the year ended December 31, 2013, and our report dated March 11, 2014 expressed an unqualified opinion on those financial statements.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Directors and Shareholders

Compass Diversified Holdings

We have audited the accompanying consolidated balance sheets of Compass Diversified Holdings (a Delaware Trust) and subsidiaries (the Company) as of December 31, 2013 and 2012, and the related consolidated statements of operations, comprehensive income, stockholders equity, and cash flows for each of the three years in the period ended December 31, 2013. Our audits of the basic financial statements include the financial statement schedule listed in the index appearing under Item 15(a)(2). These financial statements and financial schedule are the responsibility of the Company s management. Our responsibility is to express an opinion on these financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Compass Diversified Holdings and subsidiaries as of December 31, 2013 and 2012, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2013 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the related financial statement schedule when considered in relation to the basic consolidated financial statements taken as a whole, present fairly, in all material respects, the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company s internal control over financial reporting as of December 31, 2013, based on criteria established in the 1992 *Internal Control Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated March 11, 2014 expressed an unqualified opinion thereon.

Compass Diversified Holdings

Notes to Consolidated Financial Statements

December 31, 2013

Note A Organization and Business Operations

Compass Diversified Holdings, a Delaware statutory trust (the Trust), was incorporated in Delaware on November 18, 2005. Compass Group Diversified Holdings, LLC, a Delaware limited liability Company (the Company), was also formed on November 18, 2005 with equity interests which were subsequently reclassified as the Allocation Interests . The Trust and the Company were formed to acquire and manage a group of small and middle-market businesses headquartered in North America. In accordance with the amended and restated Trust Agreement, dated as of April 25, 2006 (the Trust Agreement), the Trust is sole owner of 100% of the Trust Interests (as defined in the Company s amended and restated operating agreement, dated as of April 25, 2006 (as amended and restated, the LLC Agreement)) of the Company and, pursuant to the LLC Agreement, the Company has, outstanding, the identical number of Trust Interests as the number of outstanding shares of the Trust. Compass Group Diversified Holdings, LLC, a Delaware limited liability company is the operating entity with a board of directors and other corporate governance responsibilities, similar to that of a Delaware corporation.

The Company is a controlling owner of eight businesses, or operating segments, at December 31, 2013. The segments are as follows: CamelBak Products LLC. (CamelBak), The Ergo Baby Carrier, Inc. (Ergobaby), Fox Factory, Inc. (FOX), Liberty Safe and Security Products, Inc. (Liberty Safe or Liberty), Compass AC Holdings, Inc. (ACI or Advanced Circuits), American Furniture Manufacturing, Inc. (AFM or American Furniture), AMT Acquisition Corporation (Arnold or Arnold Magnetics) and Tridien Medical, Inc. (Tridien). The segments are referred to interchangeably as businesses , operating segments or subsidiaries throughout the financial statements. Refer to Note F for further discussion of the operating segments. Compass Group Management LLC, a Delaware limited liability Company (CGM or the Manager), manages the day to day operations of the Company and oversees the management and operations of our businesses pursuant to a management services agreement (MSA).

Note B Summary of Significant Accounting Policies

Accounting principles

The Company s consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States of America (US GAAP).

Basis of presentation

The results of operations for the years ended December 31, 2013, 2012 and 2011 represent the results of operations of the Company s acquired businesses from the date of their acquisition by the Company, and therefore are not indicative of the results to be expected for the full year.

Principles of consolidation

The consolidated financial statements include the accounts of the Trust and the Company, as well as the businesses acquired as of their respective acquisition date. All significant intercompany accounts and transactions have been eliminated in consolidation. Discontinued operating entities are reflected as discontinued operations in the Company s results of operations and statements of financial position.

The acquisition of businesses that the Company owns or controls more than a 50% share of the voting interest are accounted for under the acquisition method of accounting. The amount assigned to the identifiable assets acquired and the liabilities assumed is based on the estimated fair values as of the date of acquisition, with the remainder, if any, recorded as goodwill.

Reclassification

Certain amounts in the historical consolidated financial statements have been reclassified to conform to the current period presentation. American Furniture implemented a revised standard costing system during 2011 which required American Furniture to reclassify certain costs between cost of sales and selling, general and administrative expenses. The change in format consists of reclassifying the trucking fleet expenses from selling, general and administrative expenses into cost of sales, as well as reclassifying certain manufacturing related expenses including

Edgar Filing: Compass Diversified Holdings - Form 10-K

rent, insurance, utilities and workers compensation from selling, general and administrative costs to cost of sales. Management believes that the format of reporting cost of sales together with the revised standard costing system and the revaluation of standard costs has allowed management to more timely react to changes in supply costs, product demand and overall price structure which in turn has

F-10

Table of Contents

helped eliminate the accumulation of lower margin product and allow for more advantageous product procurement and the proper utilization of available assets. The reclassification from selling, general and administrative expense to cost of sales during the year ended December 31, 2011 was \$6.6 million. This reclassification lowered the historical gross profit recorded in these periods but had no net impact on operating income (loss) or net income (loss). In addition, this reclassification had no impact on the financial position or cash flows during these periods.

Discontinued Operations

On May 1, 2012, the Company sold its majority owned subsidiary, HALO. As a result, HALO's net income for the periods from January 1, 2012 through the date of sale and the year ended December 31, 2011 have been reclassified to income from discontinued operations for those periods in accordance with accounting guidelines.

On October 17, 2011, the Company sold its majority owned subsidiary, Staffmark. As a result, Staffmark's net income for the period from January 1, 2011 through the date of sale has been reclassified to income from discontinued operations for this period in accordance with accounting guidelines.

Use of estimates

The preparation of financial statements in conformity with US GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. These estimates are based on management's best knowledge of current events and actions the Company may undertake in the future. It is possible that in 2014 actual conditions could be better or worse than anticipated when the Company developed the estimates and assumptions, which could materially affect the results of operations and financial position in the future. Such changes could result in future impairment of goodwill, intangibles and long-lived assets, inventory obsolescence, establishment of valuation allowances on deferred tax assets and increased tax liabilities, among other things. Actual results could differ from those estimates.

Termination of Supplemental Put Agreement

The Company entered into a Supplemental Put Agreement with the Manager at the time of the Company's Initial Public Offering (IPO) in connection with the MSA. Pursuant to the Supplemental Put Agreement, the Manager had the right to cause the Company to purchase the Allocation Interests then owned by the Manager upon termination of the MSA for a price to be determined in accordance with the Supplemental Put Agreement. The holders of the Allocation Interests (Holders) are entitled to receive distributions pursuant to a profit allocation formula upon the occurrence of certain events. The distributions of the profit allocation will be paid only upon the occurrence of the sale of a material amount of capital stock or assets of one of the Company's businesses (Sale Event) or, at the option of the Holders, at each five year anniversary date of the acquisition of one of the Company's businesses (Holding Event). The Company historically recorded the Supplemental Put obligation at an amount equal to the fair value of the profit allocation. This amount was determined using a model that multiplies the trailing twelve-month EBITDA for each business unit by an estimated enterprise value multiple to determine an estimated selling price of the business unit. This amount represented the obligation of the Company to physically settle the purchase of the Allocation Interest at the option of the Holders upon the termination of the MSA.

On July 1, 2013, the Company and the Manager amended the MSA to provide for certain modifications related to the Manager's registration as an investment adviser under the Investment Advisers Act of 1940 (Adviser's Act), as amended. In connection with the amendment resulting from the Manager's registration as an investment adviser under the Adviser's Act, the Company and the Manager agreed to terminate the Supplemental Put Agreement, which had the effect of eliminating the Manager's right to require the Company to purchase the Allocation Interests upon termination of the MSA. Pursuant to the MSA, as amended, the Manager will continue to manage the day-to-day operations and affairs of the Company, oversee the management and operations of the Company's businesses, perform certain other services for the Company and receive management fees, and the Holders will continue to receive the profit allocation upon the occurrence of a Sale Event or a Holding Event.

Prior to July 1, 2013 the Company recorded increases or decreases in the supplemental put obligation as well as payments made upon the occurrence of a Sale Event or Holding Event, through the consolidated statement of operations. For the years ended December 31, 2012 and 2011, the Company recognized approximately \$16.0 million and \$11.8 million, respectively in expense related to the Supplemental Put Agreement. During 2012, the Company paid \$13.7 million and \$0.2 million, respectively, of the supplemental put liability due to the sale of Staffmark in October 2011, and Halo in May 2012, which qualified as Sale Events. Additionally, the Company paid \$5.6 million in 2013 related to a Holding Event of the FOX business, and \$6.9 million in 2011 related to a Holding Event of the ACI business. The FOX Holding Event in 2013 occurred prior to the termination of the Supplemental Put Agreement and was therefore accounted for as an expense in the consolidated statement of operations.

Table of Contents

As a result of the termination of the Supplemental Put Agreement, the Company has derecognized the supplemental put liability associated with the Manager's put right, reversing the entire \$61.3 million liability at June 30, 2013 through supplemental put expense on the consolidated statement of operations. The Company will record future Holding Events and Sale Events as dividends declared on Allocations Interests to stockholders' equity when they are approved by the Company's board of directors. In connection with the initial public offering of Fox Factory Holding Corp. (FOX IPO), the Company's board of directors approved and declared in October 2013 a profit allocation payment totaling \$16.0 million that was made to Holders in November of 2013.

Revenue recognition

In accordance with authoritative guidance on revenue recognition, the Company recognizes revenue when persuasive evidence of an arrangement exists, delivery has occurred, the seller's price to the buyer is fixed and determinable, and collection is reasonably assured. Shipping and handling costs are charged to operations when incurred and are classified as a component of cost of sales.

Revenue is recognized upon shipment of product to the customer, net of sales returns and allowances. Appropriate reserves are established for anticipated returns and allowances based on past experience. Revenue is typically recorded at F.O.B. shipping point for all our businesses with the exception being American Furniture which reports revenues F.O.B. destination.

Cash equivalents

The Company considers all highly liquid investments with original maturities of three months or less to be cash equivalents.

Allowance for doubtful accounts

The Company uses estimates to determine the amount of the allowance for doubtful accounts in order to reduce accounts receivable to their estimated net realizable value. The Company estimates the amount of the required allowance by reviewing the status of past-due receivables and analyzing historical bad debt trends. The Company's estimate also includes analyzing existing economic conditions. When the Company becomes aware of circumstances that may impair a specific customer's ability to meet its financial obligations subsequent to the original sale, the Company will record an allowance against amounts due, and thereby reduce the net receivable to the amount it reasonably believes will be collectible.

Inventories

Inventories consist of raw materials, WIP, manufactured goods and purchased goods acquired for resale. Inventories are stated at the lower of cost or market, determined on the first-in, first-out method. Cost includes raw materials, direct labor, manufacturing overhead and indirect overhead. Market value is based on current replacement cost for raw materials and supplies and on net realizable value for finished goods.

Inventory is comprised of the following (*in thousands*):

	December 31, 2013	December 31, 2012
Raw materials and supplies	\$ 74,325	\$ 62,905
Work-in-process	13,579	12,989
Finished goods	73,664	60,565
Less: obsolescence reserve	(8,620)	(9,176)
Total	\$ 152,948	\$ 127,283

Property, plant and equipment

Property, plant and equipment is recorded at cost. The cost of major additions or betterments is capitalized, while maintenance and repairs that do not improve or extend the useful lives of the related assets are expensed as incurred.

Edgar Filing: Compass Diversified Holdings - Form 10-K

Depreciation is provided principally on the straight-line method over estimated useful lives. Leasehold improvements are amortized over the life of the lease or the life of the improvement, whichever is shorter.

F-12

Table of Contents

The ranges of useful lives are as follows:

Machinery and equipment	2 to 25 years
Office furniture, computers and software	2 to 8 years
Leasehold improvements	Shorter of useful life or lease term

Property, plant and equipment and other long-lived assets, that have definitive lives, are evaluated for impairment when events or changes in circumstances indicate that the carrying value of the assets may not be recoverable (triggering event). Upon the occurrence of a triggering event, the asset is reviewed to assess whether the estimated undiscounted cash flows expected from the use of the asset plus residual value from the ultimate disposal exceeds the carrying value of the asset. If the carrying value exceeds the estimated recoverable amounts, the asset is written down to its fair value.

Property, plant and equipment is comprised of the following (*in thousands*):

	December 31, 2013	December 31, 2012
Machinery and equipment	\$ 90,717	\$ 79,088
Office furniture, computers and software	11,385	6,548
Leasehold improvements	15,354	11,915
Buildings and land	425	4,517
	117,881	102,068
Less: accumulated depreciation	(49,822)	(33,580)
Total	\$ 68,059	\$ 68,488

Depreciation expense was approximately \$16.6 million, \$14.8 million and \$7.3 million for the years ended December 31, 2013, 2012 and 2011, respectively.

Fair value of financial instruments

The carrying value of the Company's financial instruments, including cash and cash equivalents, accounts receivable and accounts payable approximate their fair value due to their short term nature. Term Debt with a carrying value of \$275.2 million, net of original issue discount, at December 31, 2013 approximated fair value. The fair value is based on interest rates that are currently available to the Company for issuance of debt with similar terms and remaining maturities. If measured at fair value in the financial statements, the Term Debt would be classified as Level 2 in the fair value hierarchy.

Business combinations

The Company allocates the amount it pays for each acquisition to the assets acquired and liabilities assumed based on their fair values at the date of acquisition, including identifiable intangible assets which arise from a contractual or legal right or are separable from goodwill. The Company bases the fair value of identifiable intangible assets acquired in a business combination on detailed valuations that use information and assumptions provided by management, which consider management's best estimates of inputs and assumptions that a market participant would use. The Company allocates any excess purchase price that exceeds the fair value of the net tangible and identifiable intangible assets acquired to goodwill. The use of alternative valuation assumptions, including estimated growth rates, cash flows, discount rates and estimated useful lives could result in different purchase price allocations and amortization expense in current and future periods. Transaction costs associated with these acquisitions are expensed as incurred through selling, general and administrative expense on the consolidated statement of operations. In those circumstances where an acquisition involves a contingent consideration arrangement, the Company recognizes a liability equal to the fair value of the contingent payments expected to be made as of the acquisition date. The Company re-measures this liability each reporting period and records changes in the fair value through a separate line item within the consolidated statements of operations.

Goodwill

Edgar Filing: Compass Diversified Holdings - Form 10-K

Goodwill represents the excess of the purchase price over the fair value of the assets acquired and liabilities assumed. The Company is required to perform impairment reviews at each of its reporting units annually and more frequently in certain circumstances.

In accordance with accounting guidelines, the Company is able to make a qualitative assessment of whether it is more likely than not that a reporting unit's fair value is less than its carrying amount before applying the two-step goodwill impairment test. If a company concludes that it is more likely than not that the fair value of a reporting unit is not less than its carrying amount it is not required to perform the two-step impairment test for that reporting unit.

F-13

Table of Contents

The first step of the process after the qualitative assessment fails is estimating the fair value of each of its reporting units based on a discounted cash flow (DCF) model using revenue and profit forecast and a market approach which compares peer data and earnings multiples. The Company then compares those estimated fair values with the carrying values, which include allocated goodwill. If the estimated fair value is less than the carrying value, a second step is performed to compute the amount of the impairment by determining an implied fair value of goodwill. The determination of a reporting unit s implied fair value of goodwill requires the allocation of the estimated fair value of the reporting unit to the assets and liabilities of the reporting unit. Any unallocated fair value represents the implied fair value of goodwill, which is then compared to its corresponding carrying value. The Company cannot predict the occurrence of certain future events that might adversely affect the implied value of goodwill and/or the fair value of intangible assets. Such events include, but are not limited to, strategic decisions made in response to economic and competitive conditions, the impact of the economic environment on its customer base, and material adverse effects in relationships with significant customers.

The impact of over-estimating or under-estimating the implied fair value of goodwill at any of the reporting units could have a material effect on the results of operations and financial position. In addition, the value of the implied goodwill is subject to the volatility of the Company s operations which may result in significant fluctuation in the value assigned at any point in time.

Refer to Note G for the results of the annual impairment tests.

Deferred debt issuance costs

Deferred debt issuance costs represent the costs associated with the issuance of debt instruments and are amortized over the life of the related debt instrument.

Warranties

The Company s CamelBak, Ergobaby, FOX, Liberty and Tridien operating segments estimate the exposure to warranty claims based on both current and historical product sales data and warranty costs incurred. The Company assesses the adequacy of its recorded warranty liability quarterly and adjusts the amount as necessary.

Foreign currency

For the Company s segments with certain operations outside the United States, the local currency is the functional currency, and the financial statements are translated into U.S. dollars using exchange rates in effect at year-end for assets and liabilities and average exchange rates during the year for results of operations. The resulting translation gain or loss is included in stockholder s equity as other comprehensive income or loss.

Derivatives and hedging

The Company had utilized an interest rate swap (derivative) to manage risks related to interest rates on the last \$70.0 million of its Prior Term Loan Facility (swap) under the Prior Credit Agreement. The Company had elected hedge accounting treatment to account for its swap and had designated the swap as a cash flow hedge and as a result, unrealized changes in fair value of the hedge were reflected in comprehensive income (loss). The swap expired January 22, 2011. The Company has not elected hedge accounting treatment for its most recent interest rate derivatives entered into as part of the new Credit Facility. Refer to Note I for more information on the Company s Credit Facility.

Noncontrolling interest

Noncontrolling interest represents the portion of a majority-owned subsidiary s net income that is owned by noncontrolling shareholders. Noncontrolling interest on the balance sheet represents the portion of equity in a consolidated subsidiary owned by noncontrolling shareholders.

Deferred income taxes

Deferred income taxes are calculated under the asset and liability method. Deferred income taxes are provided for the differences between the basis of assets and liabilities for financial reporting and income tax purposes at the enacted tax rates. A valuation allowance is established when necessary to reduce deferred tax assets to the amount that is expected to more likely than not be realized. Several of the Company s majority owned subsidiaries have deferred tax assets recorded at December 31, 2013 which in total amount to approximately \$17.5 million. This deferred tax asset is net of \$12.0 million of valuation allowance primarily associated with AFM s inability to utilize loss carryforwards associated with impairments in 2010 and 2011 and losses in 2012 and 2013. These deferred tax assets are comprised primarily of reserves not currently

Edgar Filing: Compass Diversified Holdings - Form 10-K

deductible for tax purposes. The temporary differences that have resulted in the recording of these tax assets may be used to offset taxable income in future periods, reducing the amount of taxes required to be paid. Realization of the deferred tax assets is dependent on generating sufficient future taxable income at those subsidiaries with deferred tax assets. Based upon the expected future results of operations, the Company believes it is more likely than not that those subsidiaries with

F-14

Table of Contents

deferred tax assets will generate sufficient future taxable income to realize the benefit of existing temporary differences, although there can be no assurance of this. The impact of not realizing these deferred tax assets would result in an increase in income tax expense for such period when the determination was made that the assets are not realizable.

Earnings per share

Prior to the termination of the Supplemental Put Agreement, basic and diluted earnings per share attributable to Holdings was computed on a weighted average basis. Effective July 1, 2013, basic and fully diluted earnings per share is computed using the two-class method which requires companies to allocate participating securities that have rights to earnings that otherwise would have been available only to common shareholders as a separate class of securities in calculating earnings per share. The Company has granted Allocation Interests that contain participating rights to receive profit allocations upon the occurrence of a Holding Event or a Sale Event.

The calculation of basic and fully diluted earnings per share reflects the effect of dividends that were declared and paid to the Holders subsequent to the termination of the Supplemental Put Agreement during 2013 and the incremental increase in the profit allocation distribution to the Holders related to Holding Events during the period. The calculation of basic and fully diluted earnings per share during 2013 reflects increases in the estimated profit allocation related to Holding Events for the period July 1, 2013 through December 31, 2013.

Basic and diluted earnings per share for the fiscal year ended December 31, 2013 is calculated as follows:

	2013
Net income attributable to Holdings	\$ 68,064
Less: Profit Allocation paid to Holders	15,990
Less: Effect of contribution based profit Holding Event	1,480
Net income from Holdings attributable to Trust shares	\$ 50,594
Basic and diluted weighted average shares outstanding	48,300
Income from operations Basic and fully diluted	\$ 1.05

The weighted average number of Trust shares outstanding for fiscal 2013 and 2012 was computed based on 48,300,000 shares outstanding for the period from January 1st through December 31st in both years. The weighted average number of Trust shares outstanding for fiscal 2011 was computed based on 46,725,000 shares outstanding for the period from January 1, 2011 through December 31, 2011 and 1,575,000 shares issued in connection with the acquisition of CamelBak outstanding for the period from August 24, 2011 through December 31, 2011.

The Company did not have any stock option plans or any other potentially dilutive securities outstanding during the years ended December 31, 2013, 2012 and 2011.

Advertising costs

Advertising costs are expensed as incurred and included in selling, general and administrative expense in the consolidated statements of operations. Advertising costs were \$13.5 million, \$12.9 million and \$8.4 million during the years ended December 31, 2013, 2012 and 2011, respectively.

Research and development

Research and development costs are expensed as incurred and included in selling, general and administrative expense in the consolidated statements of operations. The Company incurred research and development expense of \$16.0 million, \$11.8 million and \$8.4 million during the years ended December 31, 2013, 2012 and 2011, respectively.

Table of Contents

Employee retirement plans

The Company and many of its segments sponsor defined contribution retirement plans, such as 401(k) plans. Employee contributions to the plan are subject to regulatory limitations and the specific plan provisions. The Company and its segments may match these contributions up to levels specified in the plans and may make additional discretionary contributions as determined by management. The total employer contributions to these plans were \$1.4 million, \$1.2 million and \$0.8 million for the years ended December 31, 2013, 2012 and 2011, respectively.

The Company's Arnold Magnetics subsidiary maintains a defined benefit plan for certain of its employees which is more fully described in Note Q. Accounting guidelines require employers to recognize the overfunded or underfunded status of defined benefit pension and postretirement plans as assets or liabilities in their consolidated balance sheets and to recognize changes in that funded status in the year in which the changes occur as a component of comprehensive income.

Seasonality

Earnings of certain of the Company's operating segments are seasonal in nature. Earnings from AFM are typically highest in the months of January through April of each year, coinciding with homeowners' tax refunds. Revenue and earnings from FOX are typically highest in the third quarter, coinciding with the delivery of product for the new bike year. Earnings from Liberty are typically lowest in the second quarter due to lower demand for safes at the onset of summer. Earnings from CamelBak are typically higher in the spring and summer months as this corresponds with warmer weather in the Northern Hemisphere and an increase in hydration related activities.

Stock based compensation

The Company does not have a stock based compensation plan; however, certain of the Company's subsidiaries maintain stock based compensation plans. During the years ended December 31, 2013, 2012 and 2011, \$4.7 million, \$4.2 million, and \$2.1 million of stock based compensation expense was recorded to each expense category that included related salary expense in the consolidated statements of operations. As of December 31, 2013, the amount to be recorded for stock-based compensation expense in future years for unvested options is approximately \$8.4 million.

Recent accounting pronouncements

In July 2013, the FASB issued amended guidance for the presentation of an unrecognized tax benefit when a net operating loss carry forward exists, which is effective for the Company January 1, 2014. This amended guidance requires an entity to present an unrecognized tax benefit as a reduction of a deferred tax asset for a net operating loss carry forward, a similar tax loss or a tax credit carry forward. If an applicable deferred tax asset is not available or a company does not expect to use the applicable deferred tax asset, the unrecognized tax benefit should be presented as a liability in the financial statements and should not be combined with an unrelated deferred tax asset. The Company does not expect the adoption of this amended guidance to have a significant impact on the consolidated financial statements.

In March 2013, the FASB issued amended guidance for a parent's accounting for the cumulative translation adjustment upon derecognition of certain subsidiaries or groups of assets within a foreign entity or of an investment in a foreign entity, which is effective for the Company January 1, 2014. This amended guidance was issued to resolve diversity in practice as it relates to the release of the cumulative translation adjustment into net income upon derecognition of a subsidiary or group of assets within a foreign entity. The Company does not expect the adoption of this amended guidance to have a significant impact on the consolidated financial statements.

In February 2013, the Financial Accounting Standards Board (FASB) issued amended guidance for presenting comprehensive income, which was effective for the Company January 1, 2013, and applied prospectively. This amended guidance requires an entity to disclose significant amounts reclassified out of accumulated other comprehensive income by component and their corresponding effect on the respective line items in net income. The adoption of this amended guidance did not have a significant impact on the consolidated financial statements.

Note C Initial Public Offering

FOX Initial Public Offering

On August 13, 2013, the Company's FOX operating segment completed an initial public offering of its common stock pursuant to a registration statement on Form S-1. In the FOX IPO, FOX sold 2,857,143 shares and certain of its shareholders sold 7,000,000 shares (including 5,800,238 shares held by the Company) at an initial offering price of \$15.00 per share. FOX trades on the NASDAQ stock market under the ticker FOXF . The Company received approximately

Table of Contents

\$80.9 million in net proceeds from the sale of their shares. Upon completion of the FOX IPO, FOX used a portion of the proceeds received from the sale of their shares as well as proceeds from a new credit facility with a third party lender to repay \$61.5 million in outstanding indebtedness under their existing credit facility with the Company.

The Company's ownership interest in FOX was reduced from 75.8% to 53.9% on a primary basis and from 70.6% to 49.8% on a fully diluted basis as a result of the FOX IPO. In connection with the FOX IPO, CGM's Management Services Agreement with FOX (FOX MSA) under which the Manager provided various management services, was terminated. FOX paid \$0.5 million in each of the years ended December 2012 and 2011, and \$0.3 million in 2013 through the effective date of the FOX IPO under the FOX MSA.

The following table details the amounts recorded in the consolidated statement of stockholders' equity as a result of the FOX IPO (*in thousands*):

	Trust Shares	NCI	Total
Effect of FOX IPO proceeds	\$ 73,421	\$ 36,125	\$ 109,546
Effect of FOX IPO proceeds on NCI (1)		7,492	7,492
Effect of FOX IPO on majority trust shares (2)	1,989	(1,989)	
	\$ 75,410	\$ 41,628	\$ 117,038

(1) Represents the effect on noncontrolling shareholders resulting from the Company's proceeds from the FOX IPO.

(2) Represents the majority ownership effect on the Company resulting from the FOX IPO.

Profit Allocation Payment

As a result of the FOX IPO, the Company declared and paid approximately \$16.0 million of profit allocation as a dividend to Holders in the fourth quarter of 2013. The \$16.0 million is included in the cash flows from financing activities on the consolidated statement of cash flows.

Note D Acquisition of Businesses2012 AcquisitionAcquisition of Arnold Magnetics

On March 5, 2012, AMT Acquisition Corp. (Arnold Acquisition), a subsidiary of the Company, entered into a stock purchase agreement with Arnold Magnetic Technologies, LLC, and Arnold Magnetics pursuant to which Arnold Acquisition acquired all of the issued and outstanding equity of Arnold Magnetics.

Based in Rochester, NY with an operating history of more than 100 years, Arnold is a leading global manufacturer of engineered magnetic solutions for a wide range of specialty applications and end-markets, including energy, medical, aerospace and defense, consumer electronics, general industrial and automotive. From its nine manufacturing facilities located in the United States, the United Kingdom, Switzerland and China, Arnold produces high performance permanent magnets, flexible magnets and precision foil products that are mission critical in motors, generators, sensors and other systems and components. Based on its long-term relationships, Arnold has built a diverse and blue-chip customer base totaling more than 2,000 clients worldwide.

The Company made loans to and purchased a 96.6% controlling interest in Arnold on a primary and fully diluted basis. The purchase price, including proceeds from noncontrolling interests, was approximately \$130.5 million (excluding acquisition-related costs). Acquisition related costs were approximately \$4.8 million and were recorded to selling, general and administrative expense during the year ended December 31, 2012. The Company funded the acquisition through available cash on its balance sheet and a draw of \$25 million on its Revolving Credit Facility. Arnold's management and certain other investors invested in the transaction alongside the Company, collectively representing 3.4% initial noncontrolling interest on a primary and fully diluted basis. CGM acted as an advisor to the Company in the transaction and received fees and expense payments totaling approximately \$1.2 million.

Table of Contents

Joint Venture

Arnold Magnetics is a 50% partner in a China rare earth mine-to-magnet joint venture. Arnold Magnetics accounts for its activity in the joint venture utilizing the equity method of accounting. Gains and losses from the joint venture were not material for the years ended December 31, 2013 and 2012.

Other acquisitions

On October 31, 2013, the Company's FOX subsidiary completed the acquisition of certain assets of its Germany based distributor and service center. The acquisition was accounted for as a business combination. The total consideration transferred for the acquisition was \$2.5 million and consisted of cash paid at closing of \$1.1 million and \$1.2 million of cash to be paid in 2014. The total consideration was reduced by the effective settlement of trade receivables and payables in the amount of \$0.2 million, resulting in a net purchase price of \$2.3 million. In allocating the purchase consideration based on fair values, the Company recorded approximately \$0.5 million of acquired intangible assets with a useful life of six years, \$0.6 million to goodwill and \$1.1 million to net assets assumed. The goodwill balance is deductible for tax purposes.

On May 23, 2012, the Company's subsidiary, Advanced Circuits, completed the acquisition of Universal Circuits, Inc. a manufacturer of printed circuit boards, for approximately \$2.3 million. The manufacturing facility is located in Maple Grove, Minnesota. This acquisition expands ACI's capabilities and provides immediate access to manufacturing capabilities of more advanced higher tech PCBs.

Note E Discontinued Operations

HALO sale

On May 1, 2012, the Company sold its majority owned subsidiary HALO, to Candlelight Investment Holdings, Inc., for a total enterprise value of \$76.5 million. The transaction is subject to customary escrow requirements and adjustment for certain changes in the working capital of HALO. The HALO purchase agreement contains customary representations, warranties, covenants and indemnification provisions.

At the closing, the Company received approximately \$66.0 million in cash in respect of its debt and equity interests in HALO and for the payment of accrued interest and fees after payments to non-controlling shareholders and payment of all transaction expenses. The Company also subsequently received approximately \$0.8 million of proceeds that were held in escrow. In addition, the Company expects to receive a tax refund of approximately \$1.0 million resulting from the tax benefit of the transaction expenses incurred in connection with the transaction. The net proceeds were used to repay outstanding debt under the Company's Revolving Credit Facility. The Company recognized a loss of \$0.5 million for the year ended December 31, 2012 as a result of the sale of HALO. The Company paid profit allocation of \$0.2 million to Holders in the fourth quarter of 2012.

Table of Contents

Summarized operating results for HALO for the period from January 1, 2012 through the date of disposition and the year ended December 31, 2011, were as follows (*in thousands*):

	For the period Jan. 1, 2012 through disposition	Year ended Dec. 31, 2011
Net sales	\$ 51,253	\$ 170,894
Operating income (loss)	(2,141)	9,034
Income (loss) from continuing operations before income taxes	(2,141)	9,091
Provision (benefit) for income taxes	(973)	2,264
Income (loss) from discontinued operations (1)	\$ (1,168)	\$ 6,827

⁽¹⁾ The results of for the periods from January 1, 2012 through disposition and the year ended December 31, 2011 exclude \$0.7 million and \$2.2 million of intercompany interest expense, respectively.

Staffmark Sale

On October 17, 2011, the Company sold its majority owned subsidiary, Staffmark, for a total enterprise value of \$295 million. The Company's share of the net proceeds, after accounting for the redemption of Staffmark's noncontrolling holders and the payment of transaction expenses totaled approximately \$229.7 million, of which \$217.2 was received at closing and \$12.5 million was held in escrow to be released at various times from 2012 through 2014. The profit allocation paid to Holders was \$13.7 million and was paid in the first quarter of 2012. The Company recorded a gain on the sale of Staffmark of \$88.6 million during the quarter ended December 31, 2011. The Company recorded additional gain on the sale of Staffmark during 2012 of \$0.2 million.

Summarized operating results for Staffmark through the date of disposition were as follows (*in thousands*):

	For the period January 1, 2011 through disposition
Net sales	\$ 831,028
Operating income	4,503
Income from operations before income taxes	3,853
Provision (benefit) for income taxes	(6,341)
Income from discontinued operations (1)	\$ 10,194

⁽¹⁾ The results for the periods from January 1, 2011 through disposition exclude \$3.0 million of intercompany interest expense.

Note F Operating Segment Data

At December 31, 2013, the Company had eight reportable operating segments. Each operating segment represents a platform acquisition. The Company's operating segments are strategic business units that offer different products and services. They are managed separately because each business requires different technology and marketing strategies. A description of each of the reportable segments and the types of products from which each segment derives its revenues is as follows:

Edgar Filing: Compass Diversified Holdings - Form 10-K

CamelBak is a diversified hydration and personal protection platform, offering products for outdoor, recreation and military applications. CamelBak offers a broad range of recreational / military hydration packs, reusable water bottles, specialized military gloves and performance accessories. Through its global distribution network, CamelBak products are available in more than 65 countries worldwide. CamelBak is headquartered in Petaluma, California.

Ergobaby, headquartered in Los Angeles, California, is a premier designer, marketer and distributor of wearable baby carriers and related baby wearing products, as well as stroller travel systems and accessories. Ergobaby offers a broad range of wearable baby carriers, stroller travel systems and related products that are sold through more than 450 retailers and web shops in the United States and throughout the world. Ergobaby has two main product lines: baby carriers (baby carriers and accessories) and infant travel systems (strollers and accessories).

F-19

Table of Contents

FOX is a designer, manufacturer and marketer of high-performance suspension products used primarily on mountain bikes, side-by-side vehicles, on-road vehicles with off-road capabilities, off-road vehicles and trucks, all-terrain vehicles, or ATVs, snowmobiles, specialty vehicles and applications, and motorcycles. FOX's products offer innovative design, performance, durability and reliability that enhance ride dynamics by improving performance and control.

Liberty Safe is a designer, manufacturer and marketer of premium home and gun safes in North America. From its over 204,000 square foot manufacturing facility, Liberty produces a wide range of home and gun safe models in a broad assortment of sizes, features and styles. Liberty is headquartered in Payson, Utah.

Advanced Circuits, an electronic components manufacturing company, is a provider of prototype, quick-turn and volume production rigid printed circuit boards. ACI manufactures and delivers custom printed circuit boards to customers primarily in North America. ACI is headquartered in Aurora, Colorado.

American Furniture is a low cost manufacturer of upholstered furniture sold to major and mid-sized retailers. American Furniture operates in the promotional-to-moderate priced upholstered segment of the furniture industry, which is characterized by affordable prices, fresh designs and fast delivery to the retailers. American Furniture was founded in 1998 and focuses on 3 product categories: (i) stationary, (ii) motion (reclining sofas/loveseats.) and (iii) recliners. AFM is headquartered in Ecru, Mississippi and its products are sold in the United States.

Arnold Magnetics is a leading global manufacturer of engineered magnetic solutions for a wide range of specialty applications and end-markets, including energy, medical, aerospace and defense, consumer electronics, general industrial and automotive. Arnold Magnetics produces high performance permanent magnets (PMAG), flexible magnets (FlexMag) and precision foil products (Precision Thin Metals) that are mission critical in motors, generators, sensors and other systems and components. Based on its long-term relationships, the company has built a diverse and blue-chip customer base totaling more than 2,000 clients worldwide. Arnold Magnetics is headquartered in Rochester, New York.

Tridien is a leading designer and manufacturer of powered and non-powered medical therapeutic support surfaces and patient positioning devices serving the acute care, long-term care and home health care markets. Tridien is headquartered in Coral Springs, Florida and its products are sold primarily in North America.

The tabular information that follows shows data for each of the operating segments reconciled to amounts reflected in the consolidated financial statements. The operations of each of the operating segments are included in consolidated operating results as of their date of acquisition. Segment profit is determined based on internal performance measures used by the Chief Executive Officer to assess the performance of each business. All our operating segments are deemed reporting units for purposes of annual or event-driven goodwill impairment testing, with the exception of Arnold Magnetics which has three reporting units (PMAG, FlexMag and Precision Thin Metals). Segment profit excludes certain charges from the acquisitions of the Company's initial businesses not pushed down to the segments which are reflected in the Corporate and other line item. There were no significant inter-segment transactions.
