Wells Fargo Funds

The U.S. Federal Reserve (Fed) embarked on a tightening cycle and raised the target federal funds rate to between 0.25% and 0.50% in December 2015.

Dear Valued Shareholder:

We are pleased to offer you this semi-annual report for the Wells Fargo Multi-Sector Income Fund for the six-month period that ended April 30, 2016. The period was marked by low interest rates, weakness in commodity prices, and moderate U.S. economic growth.

Accommodative monetary policies stole the headlines.

The U.S. Federal Reserve (Fed) embarked on a tightening cycle and raised the target federal funds rate to between 0.25% and 0.50% in December 2015. However, Fed Chair Janet Yellen has emphasized that the Fed expects to raise rates only gradually, depending on economic data. In addition, the Fed is maintaining its existing policy of reinvesting principal payments from its holdings of agency debt and agency mortgage-backed securities in agency mortgage-backed securities and of rolling over maturing Treasury securities at auction, and it anticipates doing so until normalization of the level of the federal funds rate is well underway.

The European Central Bank cut all three of its short-term rates during the reporting period, increased its asset-purchase program from 60 billion euros per month to 80 billion, expanded the list of eligible securities to include investment-grade nonbank debt, and created a fund-to-lend program where banks could be paid to lend money. In Japan, the Bank of Japan (BOJ) maintained an aggressive monetary program aimed at combating deflation. The BOJ set a negative deposit rate at the end of January 2016, its latest effort to encourage banks to lend rather than hold deposits.

Global economic growth was below trend, and oil prices plummeted.

Developed countries experienced subtrend growth and subdued inflation. In the U.S., however, economic growth advanced, the unemployment rate was 5.0% as of April 2016, and inflation remained below the Fed's longer-run objective of a 2% pace. Oil prices continued to fall dramatically, reaching a secular low of \$26 per barrel in February before increasing later in the reporting period.

Positive results masked intra-period volatility.

The Barclays U.S. Aggregate Bond Index,¹ a broad measure of U.S. investment-grade bonds, finished the reporting period with a return of 2.82% and masked intra-period volatility. Corporate bond spreads widened in early 2016 due to investors' fears about falling commodity prices and a slowing Chinese economy and then retraced their path as investor worries eased. Utilities were the best-performing subsector within investment-grade corporates, while industrials outperformed financials. The energy subsector, however, lagged as Moody's downgraded a vast array of energy names in response to lower oil prices and a change in its rating methodology. Within the securitized sector, commercial mortgage-backed securities benefited from positive investor sentiment later in the period. Spreads in mortgage-backed securities (MBS) remained narrow, supported by the Fed's reinvesting principal payments from its holdings of agency MBS that were acquired under quantitative easing.

Meanwhile, the Barclays Global Aggregate Bond Index² posted a 6.09% return during the six-month period that ended April 30, 2016, and the Barclays U.S. Corporate High Yield Bond Index³ returned 2.37%. Emerging markets debt yields declined and prices rose, dramatically in some cases, and emerging markets currencies also appreciated. For example, certain emerging markets currencies, such as the Brazilian real, appreciated by approximately 10% during the reporting period.

¹ The Barclays U.S. Aggregate Bond Index is a broad-based benchmark that measures the investment-grade, U.S. dollar-denominated, fixed-rate taxable bond market, including Treasuries, government-related and corporate securities, MBS (agency fixed-rate and hybrid ARM pass-throughs), ABS, and CMBS. You cannot invest directly in an index.

Table of Contents

Letter to shareholders (unaudited) Wells Fargo Multi-Sector Income Fund 3
Since the end of the financial crisis, structural changes in the fixed-income markets have reduced trading liquidity (the degree to which assets can be bought or sold without affecting the price). New regulations and capital requirements have caused traditional liquidity suppliers (banks and broker/dealers) to be more risk averse and hold less inventory. Meanwhile, corporate debt issuance has spiked as companies finance themselves at record-low yields, bond mutual funds hold larger amounts of this new debt supply, trading volumes are lower, and large-size trades are more difficult to execute. However, fixed-income markets appeared to function well over the past year with sufficient liquidity.

Don't let short-term uncertainty derail long-term investment goals.

Periods of uncertainty can present challenges, but experience has taught us that maintaining long-term investment goals can be an effective way to plan for the future. Although diversification cannot guarantee an investment profit or prevent losses, we believe it can be an effective way to manage investment risk and potentially smooth out overall portfolio performance. We encourage investors to know their investments and to understand that appropriate levels of risk-taking may unlock opportunities.

Thank you for choosing to invest in Wells Fargo Funds. We appreciate your confidence in us and remain committed to helping you meet your financial needs.

Sincerely,

Karla M. Rabusch

President

Wells Fargo Funds

Periods of uncertainty can present challenges, but experience has taught us that maintaining long-term investment goals can be an effective way to plan for the future.

Notice to shareholders

On December 17, 2015, the Fund announced an open-market share repurchase program (the Buyback Program). Under the Buyback Program, the Fund may repurchase up to 10% of its outstanding shares within one year of December 17, 2015. The Fund's Board of Trustees has delegated to Wells Fargo Funds Management, LLC, the Fund's adviser, full discretion to administer the Buyback Program including the determination of the amount and timing of repurchases in accordance with the best interests of the Fund and subject to applicable legal limitations.

Notice to shareholders

Effective May 25, 2016, the Fund's Board of Trustees approved a change to the investment strategy guidelines of the Fund's high-yield sleeve. As of this date, the Fund will be allowed to hold more than 20% of its assets in securities rated CCC or lower. However, additional securities rated CCC or lower cannot be added to the Fund if, at the time of purchase, more than 20% of the sleeve's assets are rated CCC or lower.

For further information about your Fund, contact your investment professional, visit our website at wellsfargofunds.com, or call us directly at **1-800-222-8222**. We are available 24 hours a day, 7 days a week.

² The Barclays Global Aggregate Bond Index measures global investment grade debt from twenty-four local currency markets. This multi-currency benchmark includes treasury, government-related, corporate and securitized fixed-rate bonds from both developed and emerging markets issuers. You cannot invest directly in an index.

³ The Barclays U.S. Corporate High Yield Bond Index is an unmanaged, U.S. dollar denominated, nonconvertible, non-investment-grade debt index. The index consists of domestic and corporate bonds rated Ba and below with a minimum outstanding amount of \$150 million. You cannot invest directly in an index.

Average annual total returns (%) as of April 30, 2016¹

	6 Months	1 Year	5 Year	10 Year
Based on market value	9.89	1.88	4.74	7.33
Based on net asset value (NAV)	3.22	(1.79)	4.52	6.73

Figures quoted represent past performance, which is no guarantee of future results, and do not reflect taxes that a shareholder may pay on fund distributions or the sales of fund shares. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted, which assumes the reinvestment of dividends and capital gains. Performance figures of the Fund do not reflect brokerage commissions that a shareholder would pay on the purchase and sale of shares. If taxes and such brokerage commissions had been reflected, performance would have been lower. To obtain performance information current to the most recent month-end, please call 1-800-222-8222.

The Fund's expense ratio for the six month ended April 30, 2016, was 1.36% which includes 0.43% of interest expense.

Comparison of NAV vs. market value²

The Fund is leveraged through a revolving credit facility and also may incur leverage by issuing preferred shares in the future. The use of leverage results in certain risks including, among others, the likelihood of greater volatility of net asset value and the market value of common shares. Foreign investments are especially volatile and can rise or fall dramatically due to differences in the political and economic conditions of the host country. These risks are generally intensified in emerging markets. Derivatives involve additional risks including interest rate risk, credit risk, the risk of improper valuation, and the risk of non-correlation to the relevant instruments that they are designed to hedge or to closely track. Bond values fluctuate in response to the financial condition of individual issuers, general market and economic conditions, and changes in interest rates. Changes in market conditions and government policies may lead to periods of heightened volatility in the bond market and reduced liquidity for certain bonds held by the Fund. In general, when interest rates rise, bond values fall and investors may lose principal value. Interest rate changes and their impact on the Fund and its share price can be sudden and unpredictable. High-yield securities have a greater risk of default and tend to be more volatile than higher-rated debt securities. The Fund is exposed to mortgage- and asset-backed securities risk. This closed-end fund is no longer offered as an initial public offering and is only available through broker/dealers on the secondary market. A closed-end fund is not required to buy its shares back from investors upon request.

¹Total returns based on market value are calculated assuming a purchase of common stock on the first day and sale on the last day of the period reported. Total returns based on NAV are calculated based on the NAV at the beginning of the period and end of period. Dividends and distributions, if any, are assumed for the purposes of these calculations to be reinvested at prices obtained under the Fund's Automatic Dividend Reinvestment Plan.

²This chart does not reflect any brokerage commissions charged on the purchase and sale of the Fund's common stock. Dividends and distributions paid by the Fund are included in the Fund's average annual total returns but have the effect of reducing the Fund's NAV.

Republic of South Africa, 8.00%, 12-21-2018	1.55
Brazil, 10.00%, 1-1-2025	1.45

Overview

While returns were positive for the reporting period, the period can be broken down into two subperiods. The prices of riskier assets fell from the beginning of the reporting period through February 2016 as investors feared falling commodity prices and weakness in China. These prices then rebounded as investors regained confidence. In the meantime, perceived safe-haven assets such as U.S. Treasury bonds performed strongly in the first, risk-averse time frame and then lagged as other assets rebounded.

U.S. investment-grade corporate bonds did well, particularly during the final two months of the period. Within the securitized-bond market, higher-quality AAA-rated and AA-rated tranches bested lower-quality A-rated and BBB-rated bonds. In general, lower-rated segments within commercial mortgage-backed securities (CMBS) and residential mortgage-backed securities (MBS) also lagged higher-rated counterparts.

The high-yield market, as measured by the BofA Merrill Lynch U.S. High Yield Master II Constrained Index,⁵ declined 9.6% for the first part of the reporting period that ended February 11, 2016, before returning 13.2% for the remainder of the period. Energy and other commodity-related issues drove this volatility. The fall in commodity prices as well as technical pressure from large investment-grade issuers being downgraded into high yield aggravated this decline. Once the downgrades were absorbed by the high-yield market and commodity prices began to stabilize or rebound, the high-yield market rebounded. Non-U.S. bonds also had positive returns despite significant volatility in prices during the reporting period. Emerging markets debt yields declined and prices rose, and emerging markets currencies also appreciated.

Contributors to performance

Sector allocation added to results. An allocation to investment-grade long-term industrial bonds helped, particularly exposure to the tobacco, metals and mining, and media/entertainment subsectors. Highly rated MBS also contributed to performance because its incremental yield was more than enough to compensate for wider spreads. While high-yield bonds had more modest returns than the BBB-rated credit tier, it still was additive to results. The Fund's exposure to smaller and emerging markets economies added value during the period. Bond market exposure to Brazil, Indonesia, and South Africa was increased over the reporting period and performed particularly well. On the currency front, the allocation to emerging markets currencies (and a reduced position in the U.S. dollar) was beneficial.

Detractors from performance

Certain CMBS detracted from results because they only partially recovered from their sell-off in early 2016. Exposure to the oil-field services and insurance sectors hampered results in the investment-grade credit sector. Within the Fund's allocation to high yield, its exposure to the oil-field services, cable and satellite, and technology sectors detracted from results. Issue selection within the oil-field services sector also hurt results but was offset by solid security selection in the energy exploration and production sector and the pipeline sector. The Fund's shorter duration positioning within its non-U.S. bonds detracted from performance over the reporting period. In particular, an allocation to securities with less-than-one-year maturities in Indonesia did not perform as well as longer-dated bonds. Select corporate positions (TES Global Limited;* America Movil, S.A.B. de C.V., ADS; and Petroleos Mexicanos) also detracted from performance.

³ Source: Wells Fargo Funds Management, LLC. The ERC Blended Index consists of the Barclays Credit Bond Index (7.5%), the Barclays U.S. Securitized Index (7.5%), the BofA Merrill Lynch High Yield U.S. Corporates, Cash Pay Index (60%), the J.P. Morgan GBI-EM Global Diversified Composite Index (18%), and the J.P. Morgan Global Government Bond ex U.S. Index (7%). You cannot invest directly in an index.

⁴ The ten largest holdings, excluding cash and cash equivalents, are calculated based on the value of the investments divided by total net assets of the Fund. Holdings are subject to change and may have changed since the date specified.

⁵ The BofA Merrill Lynch U.S. High Yield Master II Constrained Index is a market-value-weighted index of all domestic and Yankee high-yield bonds, including deferred interest bonds and payment-in-kind securities. Issues included in the index have maturities of one year or more and have a credit rating lower than BBB-/Baa3 but are not in default. The BofA Merrill Lynch U.S. High Yield Master II Constrained Index limits any individual issuer to a maximum of 2% benchmark exposure. You cannot invest directly in an index.

6 Wells Fargo Multi-Sector Income Fund	Performance highlights (unaudited)
Credit quality as of April 30, 2016⁶	

Effective maturity distribution as of April 30, 2016⁷

Country allocation as of April 30, 2016⁸

Management outlook

As we look ahead, we expect global growth to be mixed, with stable growth rates in the U.S. and emerging markets alongside continued weakness in Europe and Japan. Central banks continue to add liquidity, particularly the European Central Bank, which took additional steps to ease monetary policy, and the People's Bank of China, where declines in its balance sheet appear to be ending. Meanwhile, the U.S. Federal Reserve is expected to move gradually in raising rates in order to help protect economic growth and full employment. This expansion of central-bank liquidity should help support non-Treasury sectors.

In terms of our investment strategies, we expect U.S. mortgages and investment-grade corporate bonds will continue to provide investors with attractive coupon income. Our strategy focuses on A-rated and BBB-rated securities as compelling sources of yield, and our investment-grade credit exposure remains centered on industrials and financials, particularly the communications and insurance sectors. We believe overall credit fundamentals also remain sound due to continued economic growth. Lower energy and commodity prices are likely to be positive for the high-yield sector with the exception of energy exploration and development as well as metals and mining companies.

Outside the U.S., we continue to see value in the higher-yielding and smaller economies as opposed to bonds in either Japan or core Europe. We have increased the Fund's exposure to the bond markets of Latin America. We expect to add emerging markets debt to the Fund, focusing on countries where central banks can remain on hold or ease as well as where we believe currencies can appreciate. Furthermore, we see more opportunities in emerging markets currencies than in the U.S. dollar.

⁶ The credit quality distribution of portfolio holdings reflected in the chart is based on ratings from Standard & Poor's, Moody's Investors Service, and/or Fitch Ratings Ltd. Credit quality ratings apply to the underlying holdings of the Fund and not to the Fund itself. The percentages of the Fund's portfolio with the ratings depicted in the chart are calculated based on the total market value of fixed income securities held by the Fund. If a security was rated by all three rating agencies, the middle rating was utilized. If rated by two of three rating agencies, the lower rating was utilized, and if rated by one of the rating agencies, that rating was utilized. Standard & Poor's rates the creditworthiness of bonds, ranging from AAA (highest) to D (lowest). Ratings from A to CCC may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the rating categories. Standard & Poor's rates the creditworthiness of short-term notes from SP-1 (highest) to SP-3 (lowest). Moody's rates the

creditworthiness of bonds, ranging from Aaa (highest) to C (lowest). Ratings Aa to B may be modified by the addition of a number 1 (highest) to 3 (lowest) to show relative standing within the ratings categories. Moody's rates the creditworthiness of short-term U.S. tax-exempt municipal securities from MIG 1/VMIG 1 (highest) to SG (lowest). Fitch rates the creditworthiness of bonds, ranging from AAA (highest) to D (lowest). Credit quality distribution is subject to change and may have changed since the date specified.

⁷ Effective maturity distribution is subject to change and is calculated based on the total long-term investments of the Fund.

⁸ Amounts are calculated based on the total long-term investments of the Fund. These amounts are subject to change and may have changed since the date specified.

*This security was not held in the Fund at the end of the reporting period.

¹ Calculated based upon average shares outstanding

² Amount is less than \$0.005.

³ Total return is calculated assuming a purchase of common stock on the first day and sale on the last day of the period reported. Dividends and distributions, if any, are assumed for purposes of these calculations to be reinvested at prices obtained under the Fund's Automatic Dividend Reinvestment Plan. Total return does not reflect brokerage commissions that a shareholder would pay on the purchase and sale of shares. Returns for periods of less than one year are not annualized.

⁴ Ratios include interest expense relating to interest associated with borrowings and/or leverage transactions as follows:

Notes to financial statements (unaudited)

Wells Fargo Multi-Sector Income Fund 23

1. ORGANIZATION

The Wells Fargo Multi-Sector Income Fund (the Fund) was organized as a statutory trust under the laws of the state of Delaware on April 10, 2003 and is registered as a diversified closed-end management investment company under the Investment Company Act of 1940, as amended. As an investment company, the Fund follows the accounting and reporting guidance in Financial Accounting Standards Board (FASB) Accounting Standards Codification Topic 946, *Financial Services - Investment Companies*.

2. SIGNIFICANT ACCOUNTING POLICIES

The following significant accounting policies, which are consistently followed in the preparation of the financial statements of the Fund, are in conformity with U.S. generally accepted accounting principles which require management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Securities valuation

All investments are valued each business day as of the close of regular trading on the New York Stock Exchange (generally 4 p.m. Eastern Time), although the Fund may deviate from this calculation time under unusual or unexpected circumstances.

Debt securities are valued at the evaluated bid price provided by an independent pricing service or, if a reliable price is not available, the quoted bid price from an independent broker-dealer.

Equity securities that are listed on a foreign or domestic exchange or market are valued at the official closing price or, if none, the last sales price. If no sale occurs on the principal exchange or market that day, the prior day's price will be deemed stale and a fair value price will be determined in accordance with the Fund's Valuation Procedures.

The values of securities denominated in foreign currencies are translated into U.S. dollars at rates provided by an independent foreign currency pricing source at a time each business day specified by the Management Valuation Team of Wells Fargo Funds Management, LLC (Funds Management).

Investments in registered open-end investment companies are valued at net asset value.

Investments which are not valued using any of the methods discussed above are valued at their fair value, as determined in good faith by the Board of Trustees of the Fund. The Board of Trustees has established a Valuation Committee comprised of the Trustees and has delegated to it the authority to take any actions regarding the valuation of portfolio securities that the Valuation Committee deems necessary or appropriate, including determining the fair value of portfolio securities, unless the determination has been delegated to the Management Valuation Team. The Board of Trustees retains the authority to make or ratify any valuation decisions or approve any changes to the Valuation Procedures as it deems appropriate. On a quarterly basis, the Board of Trustees receives reports on any valuation actions taken by the Valuation Committee or the Management Valuation Team which may include items for ratification.

Valuations of fair valued securities are compared to the next actual sales price when available, or other appropriate market values, to assess the continued appropriateness of the fair valuation methodologies used. These securities are fair valued on a day-to-day basis, taking into consideration changes to appropriate market information and any significant changes to the inputs considered in the valuation process until there is a readily available price provided on an exchange or by an independent pricing service. Valuations received from an independent pricing service or independent broker-dealer quotes are periodically validated by comparisons to most recent trades and valuations provided by other independent pricing services in addition to the review of prices by the adviser and/or subadviser. Unobservable inputs used in determining fair valuations are identified based on the type of security, taking into consideration factors utilized by market participants in valuing the investment, knowledge about the issuer and the current market environment.

Foreign currency translation

The accounting records of the Fund are maintained in U.S. dollars. The values of other assets and liabilities denominated in foreign currencies are translated into U.S. dollars at rates provided by an independent foreign currency pricing source at a time each business day specified by the Management Valuation Team. Purchases and sales of securities, and income and expenses are converted at the rate of exchange on the respective dates of such transactions. Net realized foreign exchange gains or losses arise from sales of foreign currencies, currency gains or losses realized between the trade and settlement dates on securities transactions, and the difference between the amounts of dividends, interest and foreign withholding taxes recorded and the U.S. dollar equivalent of the amounts actually paid or received. Net unrealized

Table of Contents

24 Wells Fargo Multi-Sector Income Fund Notes to financial statements (unaudited)
foreign exchange gains and losses arise from changes in the fair value of assets and liabilities other than investments in securities resulting from changes in exchange rates. The changes in net assets arising from changes in exchange rates and the changes in net assets resulting from changes in market prices of securities are not separately presented. Such changes are included in with net realized and unrealized gains or losses from investments.

Forward foreign currency contracts

The Fund is subject to foreign currency exchange rate risk in the normal course of pursuing its investment objectives. A forward foreign currency contract is an agreement between two parties to purchase or sell a specific currency for an agreed-upon price at a future date. The Fund enters into forward foreign currency contracts to facilitate transactions in foreign-denominated securities and to attempt to minimize the risk to the Fund from adverse changes in the relationship between currencies. Forward foreign currency contracts are recorded at the forward rate and marked-to-market daily. When the contracts are closed, realized gains and losses arising from such transactions are recorded as realized gains or losses on forward foreign currency contract transactions. The Fund could be exposed to risks if the counterparties to the contracts are unable to meet the terms of their contracts or if the value of the foreign currency changes unfavorably. The Fund's maximum risk of loss from counterparty credit risk is the unrealized gains or losses on the contracts. This risk may be mitigated if there is a master netting arrangement between the Fund and the counterparty.

When-issued transactions

The Fund may purchase securities on a forward commitment or when-issued basis. The Fund records a when-issued transaction on the trade date and will segregate assets in an amount at least equal in value to the Fund's commitment to purchase when-issued securities. Securities purchased on a when-issued basis are marked-to-market daily and the Fund begins earning interest on the settlement date. Losses may arise due to changes in the market value of the underlying securities or if the counterparty does not perform under the contract.

Loans

The Fund may invest in direct debt instruments which are interests in amounts owed to lenders by corporate or other borrowers. The loans pay interest at rates which are periodically reset by reference to a base lending rate plus a spread. Investments in loans may be in the form of participations in loans or assignments of all or a portion of loans from third parties. When the Fund purchases participations, it generally has no rights to enforce compliance with terms of the loan agreement with the borrower. As a result, the Fund assumes the credit risk of both the borrower and the lender that is selling the participation. When the Fund purchases assignments from lenders, it acquires direct rights against the borrower on the loan and may enforce compliance by the borrower with the terms of the loan agreement. Loans may include fully funded term loans or unfunded loan commitments, which are contractual obligations for future funding.

Security transactions and income recognition

Securities transactions are recorded on a trade date basis. Realized gains or losses are recorded on the basis of identified cost.

Interest income is accrued daily and bond discounts are accreted and premiums are amortized daily based on the effective interest method. To the extent debt obligations are placed on non-accrual status, any related interest income may be reduced by writing off interest receivables when the collection of all or a portion of interest has become doubtful based on consistently applied procedures. If the issuer subsequently resumes interest payments or when the collectability of interest is reasonably assured, the debt obligation is removed from non-accrual status.

Dividend income is recognized on the ex-dividend date.

Income from foreign securities is recorded net of foreign taxes withheld where recovery of such taxes is not assured.

Distributions to shareholders

Distributions to shareholders from net investment income and net realized gains, if any, are recorded on the ex-dividend date. Such distributions are determined in conformity with federal income tax regulations, which may differ in amount or character from net investment income and realized gains recognized for purposes of U.S. generally accepted accounting principles.

Federal and other taxes

The Fund intends to continue to qualify as a regulated investment company by distributing substantially all of its investment company taxable income and any net realized capital gains (after reduction for capital loss carryforwards) sufficient to relieve it from all, or substantially all, federal income taxes. Accordingly, no provision for federal income taxes was required.

Table of Contents

Notes to financial statements (unaudited) Wells Fargo Multi-Sector Income Fund 25
 The Fund's income and federal excise tax returns and all financial records supporting those returns for the prior three fiscal years are subject to examination by the federal and Delaware revenue authorities. Management has analyzed the Fund's tax positions taken on federal, state, and foreign tax returns for all open tax years and does not believe that there are any uncertain tax positions that require recognition of a tax liability.

Capital loss carryforwards that do not expire are required to be utilized prior to capital loss carryforwards that expire. As of October 31, 2015, capital loss carryforwards available to offset future net realized capital gains were as follows through the indicated expiration dates:

2018	Short-term	No expiration	Long-term
\$86,701,155	\$4,490,558		\$1,934,103

3. FAIR VALUATION MEASUREMENTS

Fair value measurements of investments are determined within a framework that has established a fair value hierarchy based upon the various data inputs utilized in determining the value of the Fund's investments. The three-level hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to significant unobservable inputs (Level 3). The Fund's investments are classified within the fair value hierarchy based on the lowest level of input that is significant to the fair value measurement. The inputs are summarized into three broad levels as follows:

n Level 1 quoted prices in active markets for identical securities

n Level 2 other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, use of amortized cost, etc.)

n Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The inputs or methodologies used for valuing investments in securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used in valuing the Fund's assets and liabilities as of April 30, 2016:

Quoted prices (Level 1)	Other significant observable inputs (Level 2)	Significant unobservable inputs (Level 3)	Total

Assets					
Investments in:					
Agency securities	\$	0	\$ 14,463,740	\$ 0	\$ 14,463,740

Table of Contents

26 Wells Fargo Multi-Sector Income Fund Notes to financial statements (unaudited)
 The Fund recognizes transfers between levels within the fair value hierarchy at the end of the reporting period. At April 30, 2016, the Fund did not have any transfers into/out of Level 1 or Level 2.

The following is a reconciliation of assets in which significant unobservable inputs (Level 3) were used in determining fair value:

	Loans	Yankee corporate bonds and notes	Total
Balance as of October 31, 2015	\$ 16,654,991	\$ 729,281	\$ 17,384,272
Accrued discounts (premiums)	22,561	95,094	117,655
Realized gains (losses)	9,160	0	9,160
Change in unrealized gains (losses)	(172,922)	(95,094)	(268,016)
Purchases	1,844,238	0	1,844,238
Sales	(1,390,063)	0	(1,390,063)
Transfers into Level 3	2,488,206	0	2,488,206
Transfers out of Level 3	(1,864,533)	0	(1,864,533)
Balance as of April 30, 2016	\$ 17,591,638	\$ 729,281	\$ 18,320,919
Change in unrealized gains (losses) relating to securities still held at April 30, 2016	\$ (161,082)	\$ (95,094)	\$ (256,176)

The investment types categorized above were valued using indicative broker quotes. These indicative broker quotes are considered Level 3 inputs. Quantitative unobservable inputs used by the brokers are often proprietary and not provided to the Fund and therefore the disclosure that would address these inputs is not included above.

4. TRANSACTIONS WITH AFFILIATES**Advisory fee**

Funds Management, an indirect wholly owned subsidiary of Wells Fargo & Company (Wells Fargo) is the adviser to the Fund and is entitled to receive a fee at an annual rate of 0.55% of the Fund's average daily total assets. Total assets consist of net assets of the Fund plus borrowings or other leverage for investment purposes to the extent excluded in calculating net assets.

Funds Management has retained the services of certain subadvisers to provide daily portfolio management to the Fund. The fees for subadvisory services are borne by Funds Management. Wells Capital Management Incorporated, an affiliate of Funds Management and an indirect wholly owned subsidiary of Wells Fargo, is a subadviser to the Fund and is entitled to receive a fee from Funds Management at an annual rate of 0.30% of the Fund's average daily total assets. First International Advisors, LLC, an affiliate of Funds Management and an indirect wholly owned subsidiary of Wells Fargo, is also a subadviser to the Fund and is entitled to receive a fee from Funds Management at an annual rate of 0.10% of the Fund's average daily total assets.

Administration fee

Funds Management also serves as the administrator to the Fund, providing the Fund with a wide range of administrative services necessary to the operation of the Fund. Funds Management is entitled to receive an annual administration fee from the Fund equal to 0.05% of the Fund's average daily total assets.

5. CAPITAL SHARE TRANSACTIONS

The Fund has authorized capital of 100,000,000 shares with no par value. For the six months ended April 30, 2016 and the year ended October 31, 2015, the Fund did not issue any shares.

On December 17, 2015, the Fund announced an open-market share repurchase program (the Buyback Program). Under the Buyback Program, the Fund may repurchase up to 10% of its outstanding shares within one year of December 17, 2015. The Fund's Board of Trustees has delegated to Funds Management full discretion to administer the Buyback Program including the determination of the amount and timing of repurchases in accordance with the best interests of the Fund and subject to applicable legal limitations. During the six months ended April 30, 2016, the Fund purchased 36,691 of its shares on the open market at a total cost of \$407,024 (average price per share of \$11.08). The average discount of these repurchased shares was 14.06%.

Notes to financial statements (unaudited)

Wells Fargo Multi-Sector Income Fund 27

6. BORROWINGS

As of April 30, 2016, the Fund has borrowed \$220 million through a revolving credit facility administered by a major financial institution (the Facility). The Facility has a commitment amount of \$230 million with no specific contract expiration date but the Facility can be terminated upon 180 days' notice. The Fund is charged interest at London Interbank Offered Rate (LIBOR) plus 0.70% and a commitment fee of 0.30% of the average daily unutilized amount of the commitment which may be waived if the amount drawn on the Facility is over 75% of the committed amount.

During the six months ended April 30, 2016, the Fund had average borrowings outstanding of \$224,780,220 at an average rate of 1.08% and paid interest in the amount of \$1,201,929, which represents 0.43% of its average daily net assets (on an annualized basis).

7. INVESTMENT PORTFOLIO TRANSACTIONS

Purchases and sales of investments, excluding U.S. government obligations (if any) and short-term securities, for the six months ended April 30, 2016 were \$87,635,109 and \$80,281,002, respectively.

As of April 30, 2016, the Fund had unfunded term loan commitments of \$1,972,531.

8. DERIVATIVE TRANSACTIONS

During the six months ended April 30, 2016, the Fund entered into forward foreign currency contracts for economic hedging purposes.

As of April 30, 2016, the Fund did not have any open forward foreign currency contracts but had average contract amounts of \$1,372,192 and \$7,279,843 in forward foreign currency contracts to buy and forward foreign currency contracts to sell, respectively, during the six months ended April 30, 2016.

The fair value, realized gains or losses and change in unrealized gains or losses, if any, on derivative instruments are reflected in the appropriate financial statements.

9. INDEMNIFICATION

Under the Fund's organizational documents, the officers and Trustees have been granted certain indemnification rights against certain liabilities that may arise out of performance of their duties to the Fund. Additionally, in the normal course of business, the Fund may enter into contracts with service providers that contain a variety of indemnification clauses. The Fund's maximum exposure under these arrangements is dependent on future claims that may be made against the Fund and, therefore, cannot be estimated.

10. SUBSEQUENT DISTRIBUTIONS

The Fund declared the following distributions to shareholders:

Edgar Filing: WELLS FARGO MULTI-SECTOR INCOME FUND - Form N-CSRS

Declaration date	Record date	Payable date	Per share amount
April 29, 2016	May 16, 2016	June 1, 2016	\$0.0967
May 25, 2016	June 15, 2016	July 1, 2016	\$0.0923

These distributions are not reflected in the accompanying financial statements. The final determination of the source of all distributions is subject to change and made after the Fund's tax year-end.

BOARD OF TRUSTEES AND OFFICERS

The following table provides basic information about the Board of Trustees (the Trustees) and Officers of the Fund. Each of the Trustees and Officers¹ listed below acts in identical capacities for each fund in the Wells Fargo family of funds, which consists of 141 mutual funds comprising the Wells Fargo Funds Trust, Wells Fargo Variable Trust, Wells Fargo Master Trust, and four closed-end funds, including the Fund (collectively the Fund Complex). The mailing address of each Trustee and Officer is 525 Market Street, 12th Floor, San Francisco, CA 94105. The Board of Trustees is classified into three classes of which one is elected annually. Each Trustee serves a three-year term concurrent with the class from which the Trustee is elected. Each Officer serves an indefinite term.

Independent Trustees

Automatic dividend reinvestment plan

Wells Fargo Multi-Sector Income Fund 31

AUTOMATIC DIVIDEND REINVESTMENT PLAN

All common shareholders are eligible to participate in the Automatic Dividend Reinvestment Plan (the Plan). Pursuant to the Plan, unless a common shareholder is ineligible or elects otherwise, all cash dividends and capital gains distributions are automatically reinvested by Computershare Trust Company, N.A., as agent for shareholders in administering the Plan (Plan Agent), in additional common shares of the Fund. Whenever the Fund declares an ordinary income dividend or a capital gain dividend (collectively referred to as dividends) payable either in shares or in cash, nonparticipants in the Plan will receive cash, and participants in the Plan will receive the equivalent in common shares. The shares are acquired by the Plan Agent for the participant s account, depending upon the circumstances described below, either (i) through receipt of additional unissued but authorized common shares from the Fund (newly issued common shares) or (ii) by purchase of outstanding common shares on the open-market (open-market purchases) on the NYSE Amex or elsewhere. If, on the payment date for any dividend or distribution, the net asset value per share of the common shares is equal to or less than the market price per common share plus estimated brokerage commissions (market premium), the Plan Agent will invest the amount of such dividend or distribution in newly issued shares on behalf of the participant. The number of newly issued common shares to be credited to the participant s account will be determined by dividing the dollar amount of the dividend by the net asset value per share on the date the shares are issued, provided that the maximum discount from the then current market price per share on the date of issuance may not exceed 5%. If on the dividend payment date the net asset value per share is greater than the market value (market discount), the Plan Agent will invest the dividend amount in shares acquired on behalf of the participant in open-market purchases. There will be no brokerage charges with respect to shares issued directly by the Fund as a result of dividends or capital gains distributions payable either in shares or in cash. However, each participant will pay a pro rata share of brokerage commissions incurred with respect to the Plan Agent s open-market purchases in connection with the reinvestment of dividends. The automatic reinvestment of dividends and distributions will not relieve participants of any federal, state or local income tax that may be payable (or required to be withheld) on such dividends. All correspondence concerning the Plan should be directed to the Plan Agent at P.O. Box 30170, College Station, Texas 77842-3170 or by calling 1-800-730-6001.

± Variable rate investment. The rate shown is the rate in effect at period end.

144A The security may be resold in transactions exempt from registration, normally to qualified institutional buyers, pursuant to Rule 144A under the Securities Act of 1933.

(c) Investment in an interest-only security entitles holders to receive only the interest payments on the underlying mortgages. The principal amount shown is the notional amount of the underlying mortgages. The rate represents the coupon rate.

Non-income-earning security

(i) Illiquid security

¥ A payment-in-kind (PIK) security is a security in which the issuer may make interest or dividend payments in cash or additional securities. These additional securities generally have the same terms as the original holdings.

(s) The security is currently in default with regards to scheduled interest and/or principal payments. The Fund has stopped accruing interest on the security.

(a) The security is fair valued in accordance with procedures approved by the Board of Trustees.

@ Foreign bond principal is denominated in the local currency of the issuer.

%% The security is issued on a when-issued basis.

< All or a portion of the position represents an unfunded loan commitment.

(l) The issuer of the security is an affiliated person of the Fund as defined in the Investment Company Act of 1940.

(u) The rate represents the 7-day annualized yield at period end.

All or a portion of this security is segregated for when-issued securities and unfunded loans.

* Cost for federal income tax purposes is \$858,011,810 and unrealized gains (losses) consists of:

Gross unrealized gains	\$ 18,596,508
Gross unrealized losses	(81,565,272)
Net unrealized losses	\$ (62,968,764)
