BLACKROCK TAXABLE MUNICIPAL BOND TRUST

The Markets in Review

Dear Shareholder.

Uneven economic outlooks and the divergence of monetary policies across regions have been the overarching themes driving financial markets over the past couple of years. In the latter half of 2015, as U.S. growth outpaced other developed markets, investors were focused largely on the timing of the Federal Reserve s (the Fed) decision to end its near-zero interest rate policy. The Fed ultimately hiked rates in December, whereas the European Central Bank and the Bank of Japan took additional steps to stimulate growth, even introducing negative interest rates. The U.S. dollar had strengthened considerably ahead of these developments, causing profit challenges for U.S. companies that generate revenues overseas, and pressuring emerging market currencies and commodities prices.

Also during this time period, oil prices collapsed due to excess global supply. China, one of the world slargest consumers of oil, was another notable source of stress for financial markets as the country showed signs of slowing economic growth and took measures to devalue its currency. Declining confidence in the country spolicymakers stoked investors worries about the potential impact of China s weakness on the global economy. Global market volatility increased and risk assets (such as equities and high yield bonds) suffered in this environment.

The elevated market volatility spilled over into 2016, but as the first quarter wore on, fears of a global recession began to fade, allowing markets to calm and risk assets to rebound. Central bank stimulus in Europe and Japan, combined with a more tempered outlook for rate hikes in the United States, helped bolster financial markets. A softening in U.S. dollar strength brought relief to U.S. exporters and emerging market economies. Oil prices rebounded as the world s largest producers agreed to reduce supply.

Volatility spiked again in late June when the United Kingdom shocked investors with its vote to leave the European Union. Uncertainty around how the British exit might affect the global economy and political landscape drove investors to high-quality assets, pushing already low global yields to even lower levels. But markets recovered swiftly in July as economic data suggested that the negative impact had thus far been contained to the United Kingdom and investors returned to risk assets.

At BlackRock, we believe investors need to think globally, extend their scope across a broad array of asset classes and be prepared to adjust accordingly as market conditions change over time. We encourage you to talk with your financial advisor and visit blackrock.com for further insight about investing in today s markets.

Sincerely,

Rob Kapito

The Benefits and Risks of Leveraging

The Trust may utilize leverage to seek to enhance the distribution rate on, and net asset value (NAV) of, its common shares (Common Shares). However, these objectives cannot be achieved in all interest rate environments.

In general, the concept of leveraging is based on the premise that the financing cost of leverage, which is based on short-term interest rates, is normally lower than the income earned by the Trust on its longer-term portfolio investments purchased with the proceeds from leverage. To the extent that the total assets of the Trust (including the assets obtained from leverage) are invested in higher-yielding portfolio investments, the Trust shareholders benefit from the incremental net income. The interest earned on securities purchased with the proceeds from leverage is paid to shareholders in the form of dividends, and the value of these portfolio holdings is reflected in the per share NAV.

To illustrate these concepts, assume the Trust s Common Shares capitalization is \$100 million and it utilizes leverage for an additional \$30 million, creating a total value of \$130 million available for investment in longer-term income securities. If prevailing short-term interest rates are 3% and longer-term interest rates are 6%, the yield curve has a strongly positive slope. In this case, the Trust s financing costs on the \$30 million of proceeds obtained from leverage are based on the lower short-term interest rates. At the same time, the securities purchased by the Trust with the proceeds from leverage earn income based on longer-term interest rates. In this case, the Trust s financing cost of leverage is significantly lower than the income earned on the Trust s longer-term investments acquired from leverage proceeds, and therefore the holders of Common Shares (Common Shareholders) are the beneficiaries of the incremental net income.

However, in order to benefit Common Shareholders, the return on assets purchased with leverage proceeds must exceed the ongoing costs associated with the leverage. If interest and other costs of leverage exceed the Trust s return on assets purchased with leverage proceeds, income to shareholders is lower than if the Trust had not used leverage. Furthermore, the value of the Trust s portfolio investments generally varies inversely with the direction of long-term interest rates, although other factors can influence the value of portfolio investments. In contrast, the value of the Trust s obligations under its

respective leverage arrangements generally does not fluctuate in relation to interest rates. As a result, changes in interest rates can influence the Trust s NAV positively or negatively. Changes in the future direction of interest rates are very difficult to predict accurately, and there is no assurance that the Trust s intended leveraging strategy will be successful.

The use of leverage also generally causes greater changes in the Trust s NAV, market price and dividend rates than comparable portfolios without leverage. In a declining market, leverage is likely to cause a greater decline in the NAV and market price of the Trust s Common Shares than if the Trust were not leveraged. In addition, the Trust may be required to sell portfolio securities at inopportune times or at distressed values in order to comply with regulatory requirements applicable to the use of leverage or as required by the terms of leverage instruments, which may cause the Trust to incur losses. The use of leverage may limit the Trust s ability to invest in certain types of securities or use certain types of hedging strategies. The Trust incurs expenses in connection with the use of leverage, all of which are borne by Common Shareholders and may reduce income to the Common Shares. Moreover, to the extent the calculation of the Trust s investment advisory fees includes assets purchased with the proceeds of leverage, the investment advisory fees payable to the Trust s investment advisor will be higher than if the Trust did not use leverage.

The Trust may utilize leverage through reverse repurchase agreements as described in the Notes to Financial Statements.

Under the Investment Company Act of 1940, as amended (the 1940 Act), the Trust is permitted to issue debt up to $\frac{93}{9}$ % of its total managed assets. The Trust may voluntarily elect to limit its leverage to less than the maximum amount permitted under the 1940 Act.

If the Trust segregates or designates on its books and records cash or liquid assets having a value not less than the value of the Trust sobligations under the reverse repurchase agreement (including accrued interest), then such transaction is not considered a senior security and is not subject to the foregoing limitations and requirements under the 1940 Act. The Trust may use combined economic leverage of up to 100% of its net assets (50% of its Managed Assets).

BLACKROCK TAXABLE MUNICIPAL BOND TRUST

Derivative Financial Instruments

The Trust may invest in various derivative financial instruments. These instruments are used to obtain exposure to a security, commodity, index, market, and/or other asset without owning or taking physical custody of securities, commodities and/or other referenced assets or to manage market, equity, credit, interest rate, foreign currency exchange rate, commodity and/or other risks. Derivative financial instruments may give rise to a form of economic leverage and involve risks, including the imperfect correlation between the value of a derivative financial instrument and the underlying asset, possible default of the counterparty to the transaction or illiquidity of the instrument. The Trust

may use combined economic leverage of up to 100% of its net assets (50% of its Managed Assets). The Trust successful use of a derivative financial instrument depends on the investment adviser sability to predict pertinent market movements accurately, which cannot be assured. The use of these instruments may result in losses greater than if they had not been used, may limit the amount of appreciation the Trust can realize on an investment and/or may result in lower distributions paid to shareholders. The Trust s investments in these instruments, if any, are discussed in detail in the Notes to Financial Statements.

BLACKROCK TAXABLE MUNICIPAL BOND TRUST

JULY 31, 2016

5

Trust Summary as of July 31, 2016

Trust Overview

6

BlackRock Taxable Municipal Bond Trust s (BBN) (the Trust) investment objective is to seek high current income, with a secondary objective of capital appreciation. The Trust seeks to achieve its investment objectives by investing primarily in a portfolio of taxable municipal securities, including Build America Bonds (BABs), issued by state and local governments to finance capital projects such as public schools, roads, transportation infrastructure, bridges, ports and public buildings.

The Trust originally sought to achieve its investment objectives by investing primarily in a portfolio of BABs, which are taxable municipal securities issued pursuant to the American Recovery and Reinvestment Act of 2009. Given the uncertainty around the BABs program at the time of the Trust s launch in 2010, the Trust s initial public offering prospectus included a Contingent Review Provision. For any 24-month period, if there were no new issuances of BABs or other analogous taxable municipal securities, the Board of Trustees (the Board) would undertake an evaluation of potential actions with respect to the Trust. Under the Contingent Review Provision, such potential action may include changes to the Trust s non-fundamental investment policies to broaden its primary investment focus to include taxable municipal securities generally. The BABs program expired on December 31, 2010 and was not renewed. Accordingly, there have been no new issuances of BABs since that date.

Pursuant to the Contingent Review Provision, on June 12, 2015, the Board approved a proposal to amend the Trust s investment policy from Under normal market conditions, the Trust invests at least 80% of its managed assets in BABs to Under normal market conditions, the Trust invests at least 80% of its managed assets in taxable municipal securities, which include BABs, and to change the name of the Trust from BlackRock Build America Bond Trust to BlackRock Taxable Municipal Bond Trust. These changes became effective on August 25, 2015.

The Trust continues to maintain its other investment policies, including its ability to invest up to 20% of its managed assets in securities other than taxable municipal securities. Such other securities include tax-exempt securities, U.S. Treasury securities, obligations of the U.S. Government, its agencies and instrumentalities and corporate bonds issued by issuers that have, in the Manager s view, typically been associated with or sold in the municipal market. Bonds issued by private universities and hospitals, or bonds sold to finance military housing developments are examples of such securities. The Trust also continues to invest at least 80% of its managed assets in securities that at the time of purchase are investment grade quality.

As used herein, managed assets means the total assets of the Trust (including any assets attributable to money borrowed for investment purposes) minus the sum of the Trust s accrued liabilities (other than money borrowed for investment purposes).

As of July 31, 2016, 80% of the Trust s portfolio are BABs. Like other taxable municipal securities, interest received on BABs is subject to federal income tax and may be subject to state income tax. Issuers of direct pay BABs, however, are eligible to receive a subsidy from the U.S. Treasury of up to 35% of the interest paid on the BABs. This allowed such issuers to issue bonds that pay interest rates that were expected to be competitive with the rates typically paid by private bond issuers in the taxable fixed income market. While the U.S. Treasury subsidizes the interest paid on BABs, it does not guarantee the principal or interest payments on BABs, and there is no guarantee that the U.S. Treasury will not reduce or eliminate the subsidy for BABs in the future. As of the date of this report, the subsidy that issuers of direct pay BABs receive from the U.S. Treasury has been reduced from original level as the result of budgetary sequestration, which has resulted, and which may continue to result, in early redemptions of BABs at par value. Such early redemptions at par value may result in a potential loss in value for investors of such BABs, including the Trust, who may have purchased the securities at prices above par, and may require the Trust to reinvest redemption proceeds in lower-yielding securities, which could reduce the Trust s income and distributions.

No assurance can be given that the Trust s investment objectives will be achieved.

BLACKROCK TAXABLE MUNICIPAL BOND TRUST

Trust Information	
Symbol on New York Stock Exchange (NYSE)	BBN
Initial Offering Date	August 27, 2010
Current Distribution Rate on Closing Market Price as of July 31, 2016 (\$24.43) ¹	6.47%
Current Monthly Distribution per Common Share ²	\$0.1318
Current Annualized Distribution per Common Share ²	\$1.5816
Economic Leverage as of July 31, 2016 ³	35%

- 1 Current Distribution Rate on closing market price is calculated by dividing the current annualized distribution per share by the closing market price. The current distribution rate may consist of income, net realized gains and/or a return of capital. Past performance does not guarantee future results.
- ² The distribution rate is not constant and is subject to change.
- Represents reverse repurchase agreements as a percentage of total managed assets, which is the total assets of the Trust, including any assets attributable to reverse repurchase agreements, minus the sum of accrued liabilities. For a discussion of leveraging techniques utilized by the Trust, please see The Benefits and Risks of Leveraging on page 4.

Taxable Municipal Bond Overview

Taxable municipal bonds typically trade at a spread (or extra yield) relative to U.S. Treasury bonds with similar maturities. During the period, yields on Treasuries fell (as prices rose), which led to a general improvement in the prices of taxable municipal bonds. Treasuries with maturities of ten years and above typically outpaced their short-term counterparts, which fueled corresponding strength in longer-term municipal issues. Given this positive interest rate backdrop, the Barclays Taxable Municipal: U.S. Aggregate Eligible Index returned 15.63% for the 12-month period ended July 31, 2016.

Although the market experienced periodic bouts of volatility, yield spreads on taxable municipals (including Build America Bonds) generally tightened. The overall supply of taxable municipals was about average despite the availability of low rates, but demand strengthened due to increased buying from investors not specifically focused on the asset class. Nevertheless, certain bonds in the taxable municipal sector experienced more meaningful changes in their individual yield spreads. For example, Illinois and Chicago general obligation bonds ended the period with wider spreads a notable divergence from the rest of the market. Illinois debt generally underperformed after being downgraded by rating agencies in June 2016, while Chicago suffered from ongoing concerns about pension funding.

Past performance is no guarantee of future results. Index performance is shown for illustrative purposes. You cannot invest directly in an index.

Performance

Returns for the 12 months ended July 31, 2016 were as follows:

	Returns Ba	sed On
	Market Price	NAV
BBN ^{1,2}	28.89%	19.55%
Lipper General Bond Funds ³	15.04%	4.04%
Barclays Taxable Municipal: U.S. Aggregate Eligible Index ⁴	N/A	15.63%

¹ All returns reflect reinvestment of dividends and/or distributions.

2	The Trust s discount to NAV, which narrowed during the period, accounts for the difference between performance based on price and performance based on NAV.
3	Average return.
4	An unleveraged index.
Th	N/A Not applicable as the index does not have a market price. e following discussion relates to the Trust s absolute performance based on NAV:
	The Trust s duration exposure made the largest contribution to absolute performance. (Duration is a measure of interest-rate sensitivity.)
	The Trust benefited from the robust performance of its investments in the tax-backed (local), transportation, utilities and tobacco sectors. The use of leverage also contributed to results.
The	The Trust utilized U.S. Treasury futures contracts to manage exposure to a rise in interest rates, which had a negative impact on performance due to the strength in the Treasury market. e views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other ditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

Notes to Schedule of Investments

- (a) Security exempt from registration pursuant to Rule 144A under the Securities Act of 1933, as amended. These securities may be resold in transactions exempt from registration to qualified institutional investors.
- (b) All or a portion of security has been pledged as collateral in connection with outstanding reverse repurchase agreements.

- (c) When-issued security.
- (d) During the year ended July 31, 2016, investments in issuers considered to be an affiliate of the Trust for purposes of Section 2(a)(3) of the Investment Company Act of 1940, as amended, were as follows:

	Shares Held		Shares Held		
	at July 31,	Net	at July 31,	Value at	
Affiliate	2015	Activity	2016	July 31, 2016	Income
BlackRock Liquidity Funds, TempFund, Institutional Class	8,076,047	1,991,307	10,067,354	\$ 10,067,354	\$ 49,529

(e) Current yield as of period end.

For Trust compliance purposes, the Trust s sector classifications refer to one or more of the sector sub-classifications used by one or more widely recognized market indexes or rating group indexes, and/or as defined by the investment adviser. These definitions may not apply for purposes of this report, which may combine such sector sub-classifications for reporting ease.
