Consolidated Financial Results

April 1, 2016 – September 30, 2016

October 26, 2016

In preparing its consolidated financial information, ORIX Corporation and its subsidiaries have complied with generally accepted accounting principles in the United States of America.

These documents may contain forward-looking statements about expected future events and financial results that involve risks and uncertainties. Such statements are based on our current expectations and are subject to uncertainties and risks that could cause actual results to differ materially from those described in the forward-looking statements. Factors that could cause such a difference include, but are not limited to, those described under "Risk Factors" in the Company's annual report on Form 20-F filed with the United States Securities and Exchange Commission.

The Company believes that it will be considered a "passive foreign investment company" for United States Federal income tax purposes in the year to which these consolidated financial results relate and for the foreseeable future by reason of the composition of its assets and the nature of its income. A U.S. holder of the shares or ADSs of the Company is therefore subject to special rules generally intended to eliminate any benefits from the deferral of U.S. Federal income tax that a holder could derive from investing in a foreign corporation that does not distribute all of its earnings on a current basis. Investors should consult their tax advisors with respect to such rules, which are summarized in the Company's annual report.

Economic Environment

While the economy of the United States has been recovering moderately and the economy of Europe remains at flat area, the economies of emerging and resource-rich countries have bottomed out and the world economy as a whole has been unstable. Against the backdrop of monetary easing measures in several countries, interest rates remain low worldwide. In addition, there are political and geopolitical tensions in certain regions that need to be monitored carefully.

The Japanese economy remains at a standstill due primarily to low corporate earnings caused in part by the appreciation of the yen and weakening personal consumption.

Overview of Business Performance (April 1, 2016 to September 30, 2016)

Total revenues for the six months ended September 30, 2016 (hereinafter, the second consolidated period) increased 4% to ¥1,221,125 million compared to ¥1,170,194 million during the same period of the previous fiscal year. Life insurance premiums and related investment income increased mainly due to increases in insurance premiums and investment income in ORIX Life Insurance Corporation (hereinafter, ORIX Life Insurance), and an improvement in investment income from assets under variable annuity and variable life insurance contracts originally held by Hartford Life Insurance K.K. (hereinafter, HLIKK) compared to the same period of the previous fiscal year during which the investment income decreased with deterioration of market environment. HLIKK was merged into ORIX Life Insurance on July 1, 2015. In addition, sales of goods and real estate increased due primarily to revenues generated by subsidiaries in the principal investment business. On the other hand, gains on investment securities and dividends decreased due to a decrease in gains on investment securities. In addition, services income decreased due to the partial divestment of Houlihan Lokey Inc. (hereinafter, HL) shares in connection with its initial public offering in the United States and its becoming an equity method affiliate in the previous fiscal year.

Total expenses increased 7% to ¥1,054,776 million compared to ¥987,714 million during the same period of the previous fiscal year. Life insurance costs increased due to a provision of liability reserve in line with the aforementioned improvement in investment income from assets under variable annuity and variable life insurance contracts. Costs of goods and real estate sold increased in line with the aforementioned revenue increase. On the other hand, selling, general and administrative expenses decreased compared to the same period of the previous fiscal year in line with HL becoming an equity method affiliate in the previous fiscal year as mentioned above.

Table of Contents

Gains on sales of subsidiaries and affiliates and liquidation losses, net decreased compared to the same period of the previous fiscal year due to a gain from the aforementioned partial divestment of HL shares and its becoming an equity method affiliate in the previous fiscal year.

As a result of the foregoing, income before income taxes for the second consolidated period decreased 13% to ¥219,235 million compared to ¥250,745 million during the same period of the previous fiscal year, and net income attributable to ORIX Corporation shareholders decreased 12% to ¥142,150 million compared to ¥161,298 million during the same period of the previous fiscal year.

Segment Information

Total segment profits for the second consolidated period decreased 13% to ¥214,034 million compared to ¥244,791 million during the same period of the previous fiscal year. While segment profits increased significantly in the Investment and Operation segment and secondarily in the Real Estate and Retail segments, segment profits for each of the other segments decreased.

Segment information for the second consolidated period is as follows:

Corporate Financial Services Segment: Lending, leasing and fee business

	Six months ended	Six months ended	Change	
	September 30, 2015 (millions of yen)	September 30, 2016 (millions of yen)	Amount (millions of yen)	Percent (%)
Segment Revenues	52,712	51,995	(717)	(1)
Segment Profits	21,564	19,874	(1,690)	(8)

	As of	As of	Change

Segment Assets	1,049,867	1,034,377	(15,490)	(1)

The Japanese economy remains at a standstill due to low corporate earnings caused in part by the appreciation of the yen and weakening personal consumption. The balance of outstanding loans at financial institutions continues to increase and interest rates on loans remain low levels.

Segment revenues decreased 1% to ¥51,995 million compared to ¥52,712 million during the same period of the previous fiscal year due to a decrease in gains on investment securities, and a decrease in finance revenues in line with the decreased average investment, despite an increase in services income resulting primarily from revenue generated by Yayoi Co., Ltd. and stable fee business to domestic small-and medium-sized enterprise customers.

Segment expenses increased due primarily to an increase in selling, general and administrative expenses compared to the same period of the previous fiscal year. As a result, segment profits decreased 8% to ¥19,874 million compared to ¥21,564 million during the same period of the previous fiscal year.

Segment assets decreased 1% to ¥1,034,377 million compared to the end of the previous fiscal year due primarily to decreases in installment loans and investment in securities.

Segment Assets	731,329	724,168	(7,161)	(1)

While demand in corporate capital investment is gradually increasing, concerns about decreasing profitability and uncertainty in the economic outlook interfere with new investment. The volume of new auto leases in Japan decreased slightly compared to the previous fiscal year.

Segment revenues decreased 1% to ¥134,820 million from ¥135,924 million during the same period of the previous fiscal year due to less gains on sales in operating leases revenues, despite an increase in rental revenues, which are also included in operating leases revenues.

Segment expenses increased due primarily to increases in costs of operating leases in line with increased average investment asset balance in the auto-business and selling, general and administrative expenses. Segment profits decreased 15% to ¥19,655 million compared to ¥23,117 million during the same period of the previous fiscal year.

Segment assets decreased 1% to ¥724,168 million compared to the end of the previous fiscal year primarily due to a decrease in leasing assets in line with the securitization, despite an increase in new auto-leases in the auto-business.

Real Estate Segment: Real estate development, rental facility operation, REIT asset management; and real estate investment and advisory services

	Six months ended	Six months ended	Change

The real estate market has remained active due primarily to the quantitative easing policies implemented by the Bank of Japan, including the adoption of negative interest rates. Land prices remain high and vacancy rates in the Japanese office building market continue to show improvements especially in the Greater Tokyo Area. Furthermore, we are seeing increases in the occupancy rates and average daily rates of hotels and Japanese inns. Meanwhile, we are also seeing a trend where by sales prices of condominiums are no longer raising.

Segment revenues decreased 5% to ¥104,084 million compared to ¥109,047 million during the same period of the previous fiscal year primarily due to a decrease in financial revenues compared to the same period of the previous fiscal year during which the sale of large scale rental properties was recognized in finance revenues and also due to a decrease in sales of real estate, despite an increase in gains on sales of rental properties, which are included in operating leases revenues.

Segment expenses decreased compared to the same period of the previous fiscal year primarily due to decreases in costs of operating leases in line with a decrease in assets and the cost of sales of real estate.

As a result of the foregoing, segment profits increased 5% to ¥35,447 million compared to ¥33,717 million during the same period of the previous fiscal year.

Segment assets decreased 5% to ¥705,062 million compared to the end of the previous fiscal year primarily due to a decrease in investment in operating leases, which resulted from sales of rental properties.

Investment and Operation Segment: Environment and energy-related business, principal investment, loan servicing (asset recovery), and concession business

While the Japanese government is reassessing its renewable energy purchase program, the significance of renewable energy in the mid- to long-term is on the rise with investment targets expanding beyond solar power generation projects to include wind and geothermal power generation projects. In the capital markets, overseas markets for mergers and acquisitions (hereinafter M&A) have been sluggish, but the number of outbound cross-border M&A transactions by Japanese companies has increased.

Segment revenues increased 9% to ¥539,042 million compared to ¥493,525 million during the same period of the previous fiscal year due to increases in sales of goods and services income generated by subsidiaries in the principal investment business and environment and energy-related business.

Segment expenses increased compared to the same period of the previous fiscal year due to an increase in expenses in line with the aforementioned revenues expansion and recognition of write-downs of securities.

As a result of the foregoing and the recognition of gains on sales of shares of subsidiaries and affiliates and the recognition of a bargain purchase gain from the acquisition of a subsidiary, segment profits increased 43% to ¥52,041 million compared to ¥36,450 million during the same period of the previous fiscal year.

Table of Contents

Segment assets decreased 1% to ¥695,780 million compared to the end of the previous fiscal year primarily due to a decrease in investment in affiliates, despite increases in inventories and property under facility operations in the environment and energy-related business.

The life insurance business in Japan is currently affected by macroeconomic factors such as domestic population decline, we are seeing increasing numbers of companies develop new products in response to the rising demand for medical insurance. On the other hand, we are seeing suspensions of the sales of certain products and an increase in insurance premiums on new contracts due to the Bank of Japan's adoption of negative interest rate policy. In the consumer finance sector, banks and other lenders are expanding their assets to further secure new revenue streams, and competition in the lending business continues to intensify in the current low interest rate environment.

Segment revenues increased 48% to ¥151,095 million compared to ¥102,401 million during the same period of the previous fiscal year due to increases in insurance premiums and investment income in ORIX Life Insurance, and an improvement in investment income from assets under variable annuity and variable life insurance contracts originally held by HLIKK compared to the same period of the previous fiscal year during which the investment income decreased with deterioration of market environment.

Segment expenses increased compared to the same period of the previous fiscal year due to a provision of liability reserve in line with the aforementioned improvement in investment income from assets under variable annuity and variable life insurance contracts.

As a result of the foregoing, segment profits increased 11% to ¥35,507 million compared to ¥32,062 million during the same period of the previous fiscal year.

Segment assets decreased 4% to ¥3,325,370 million compared to the end of the previous fiscal year due primarily to a large decrease in investment in securities held by HLIKK, offsetting an increase in installment loans in the banking business.

Against the backdrop of monetary easing measures in several countries, interest rates remain low worldwide. In addition, there are political and geopolitical tensions in certain regions that need to be monitored carefully.

Segment revenues decreased 13% to ¥240,643 million compared to ¥277,843 million during the same period of the previous fiscal year due to decreases in gains on investment securities and services income resulting primarily from the deconsolidation of HL as well as the recent appreciation of the yen, despite an increase in sales of goods in the Americas.

Segment expenses decreased compared to the same period of the previous fiscal year primarily due to the deconsolidation of HL and the recent appreciation of the yen.

As a result of the foregoing and due to the recognition of a gain on the partial divestment of HL shares during the same period of previous fiscal year, segment profits decreased 47% to ¥51,510 million compared to ¥97,881 million during the same period of the previous fiscal year.

Segment assets decreased 10% to ¥2,051,463 million compared to the end of the previous fiscal year due to a decrease in investment in operating leases of aircraft-related operations and yen appreciation.

Note 1: Shareholders' Equity refers to ORIX Corporation Shareholders' Equity based on US-GAAP. Shareholders' Equity Per Share is calculated using total ORIX Corporation Shareholders' Equity.

Note 2: Prior-year amounts have been adjusted for the retrospective application of Accounting Standards Update 2015-03 (Simplifying the Presentation of Debt Issuance Costs -ASC 835-30 (Interest-Imputation of Interest)) on April 1, 2016.

Total assets decreased 2% to ¥10,782,692 million compared to ¥10,992,918 million at the end of the previous fiscal year. In addition to the recent appreciation of the yen, investment in operating leases decreased primarily due to sales of aircraft in the Overseas Business segment and sales of real estate in Japan, and investment in securities decreased primarily due to sales of assets held by HLIKK. In addition, investment in affiliates decreased primarily due to sales of shares of affiliates in the Investment and Operation segment. Segment assets decreased 5% to ¥8,536,220 million compared to the end of the previous fiscal year.

We manage the balance of interest-bearing liabilities at an appropriate level taking into account the condition of assets and liquidity on-hand as well as the domestic and overseas financial environment. As a result, long- and short-term debt decreased and deposits increased compared to the end of the previous fiscal year. In addition, policy liabilities and policy account balances decreased due to the surrender of variable annuity and variable life insurance contracts held by HLIKK.

Shareholders' equity increased 2% to ¥2,364,960 million compared to the end of the previous fiscal year primarily due to an increase in retained earnings, despite a decrease in foreign currency translation adjustments included in accumulated other comprehensive income in line with the appreciation of the yen.

(3) Medium-Term Management Targets

In addition to sustainable growth of our existing business operations, we believe that there are new growth opportunities in all business segments and we strive to achieve sustainable profit growth by capitalizing on these profit opportunities going forward.

Our mid-term strategy Expansion in Non-Finance Business consists of Organic growth and Investment in key areas. With these principles, we will pursue new business opportunities arising from the changing business environment.

Organic growth : Deepen our strengths and expertise to further expand our existing operations both in Japan and abroad. Those in Japan include fee business, automobile-related business, facility operation business, and life insurance business. Those abroad include automobile-related business, and further diversification towards non-finance business.

New investment in key areas : Continue to pursue new investment opportunities in key areas identified as the environment and energy-related business and principal investment in Japan and abroad, the network in Asia, global asset management, and the concession business.

The Company aims to achieve ¥300 billion in net income and ROE around 11% to 12% for the fiscal year ending March 31, 2018.

Note 1: The Company evaluates the performance of segments based on income before income taxes, adjusted for net income attributable to the noncontrolling interests and net income attributable to the redeemable noncontrolling interests before applicable tax effect. Tax expenses are not included in segment profits.

Note 2: For those VIEs that are used for securitization and are consolidated in accordance with ASC 810 (Consolidation), for which the VIE s assets can be used only to settle related obligations of those VIEs and the creditors (or beneficial interest holders) do not have recourse to other assets of the Company or its subsidiaries, segment assets are measured based on the amount of the Company and its subsidiaries net investments in the VIEs, which is different from the amount of total assets of the VIEs, and accordingly, segment revenues are also measured at a net amount representing the revenues earned on the net investments in the VIEs. Certain gains or losses related to assets and liabilities of consolidated VIEs, which are not ultimately attributable to the Company and its subsidiaries, are excluded from segment profits.

Note 3: Inter-segment transactions are included in segment revenues, and eliminations of inter-segment transactions are included in difference between segment total and consolidated amounts.

Note 4: Prior-year amounts have been adjusted for the retrospective application of Accounting Standards Update 2015-03 (Simplifying the Presentation of Debt Issuance Costs -ASC 835-30 (Interest-Imputation of Interest)) on April 1, 2016.
