INFORMATION ABOUT BLACKROCK FLOATING RATE INCOME STRATEGIES FUND, INC.

Item 1. Outside Front Cover

- 1.a. The registrant's name is BlackRock Floating Rate Income Strategies Fund, Inc. (the "Fund").
- 1.b. The Fund is registered under the Investment Company Act of 1940, as amended (the "1940 Act"), as a diversified, closed-end management investment company. The Fund's investment objective is to provide shareholders with high current income and such preservation of capital as is consistent with investment in a diversified, leveraged portfolio consisting primarily of floating rate debt securities and instruments ("floating rate debt securities"). The Fund's investment objective is a fundamental policy and may not be changed without stockholder approval. No assurance can be given that the Fund's investment objective will be achieved.

The Fund seeks to achieve its investment objective by investing, under normal market conditions, at least 80% of its Managed Assets (as defined herein on page I-5) in floating rate debt securities, including floating or variable rate debt securities that pay interest at rates that adjust whenever a specified interest rate changes and/or which reset on predetermined dates (such as the last day of a month or calendar quarter). The Fund invests a substantial portion of its investments in floating rate debt securities consisting of secured or unsecured senior floating rate loans that are rated below investment grade. Debt securities rated below investment grade commonly are referred to as "junk bonds." Secured loans may be either fully or partially secured at the time of investment. In addition to senior loans, floating rate debt securities may include, without limitation, instruments such as catastrophe and other event linked bonds, bank capital securities, corporate bonds, notes, money market instruments and certain types of mortgage related and other asset backed securities. Due to their floating or variable rate features, these instruments will generally pay higher levels of income in a rising interest rate environment and lower levels of income as interest rates decline. For the same reason, the market value of a floating rate debt security is generally expected to have less sensitivity to fluctuations in market interest rates than a fixed rate debt instrument, although the value of a floating rate debt security may nonetheless decline as interest rates rise and due to other factors, such as real or perceived changes in credit quality or financial condition of the issuer or borrower, volatility in the capital markets or other adverse market conditions.

The Fund may invest directly in floating rate debt securities or synthetically through the use of derivatives.

- 1.c. The Fund is offering up to 3,050,000 shares of common stock.
- 1.d. You should read this Prospectus, which concisely sets forth information about the Fund, before deciding whether to invest in the Fund's common stock and retain it for future reference. Additional information about the Fund and materials incorporated by reference have been filed with the Securities and Exchange

Table of Contents

Commission (the SEC) and are available upon either written or oral request, free of charge, by calling 1-800-882-0052, by writing to the Fund, or may be found on the SEC's website at www.sec.gov. You may also request a copy of this Prospectus, annual and semi-annual reports, other information about the Fund, and/or make investor inquiries by calling 1-800-882-0052, or by writing to the Fund. The Fund's annual and semi-annual reports are also available on the Fund's website at www.blackrock.com free of charge. This reference to BlackRock's website is intended to allow public access to information regarding the Fund and does not, and is not intended to, incorporate BlackRock's website into this Prospectus.

You should not construe the contents of this Prospectus as legal, tax or financial advice. You should consult with your own professional advisors as to the legal, tax, financial or other matters relevant to the suitability of an investment in the Fund.

The Fund's common stock does not represent a deposit or an obligation of, and are not guaranteed or endorsed by, any bank or other insured depository institution, and are not federally insured by the Federal Deposit Insurance Corporation, the Federal Reserve Board or any other government agency.

- 1.e. This Prospectus is dated [], 2016.
- 1.f. Not applicable.
- 1.g. The Fund's common stock is listed on the New York Stock Exchange (NYSE) under the symbol FRA. Sales of the Fund's common stock, if any, under this Prospectus may be made in transactions that are deemed to be at the market as defined in Rule 415 under the Securities Act of 1933, as amended (the Securities Act), which currently would only include sales made directly on the NYSE. The minimum price on any day at which Fund common stock may be sold will not be less than the current net asset value (NAV) per share plus the per share amount of the commission to be paid to the Fund's distributor (the Minimum Price), BlackRock Investments, LLC (the Distributor). The Fund and the Distributor will determine whether any sales of the Fund's common stock will be authorized on a particular day; the Fund and the Distributor, however, will not authorize sales of the Fund's common stock if the per share price of the shares is less than the Minimum Price. The Fund and the Distributor may also not authorize sales of the Fund's common stock on a particular day even if the per share price of the shares is equal to or greater than the Minimum Price, or may only authorize a fixed number of shares to be sold on any particular day. The Fund and the Distributor will have full discretion regarding whether sales of shares of the Fund's common stock will be authorized on a particular day and, if so, in what amounts. As of November 8, 2016, the last reported sale price for the Fund's common stock on the NYSE was \$13.62 per share.

The Distributor has entered into a sub-placement agent agreement, dated May 2, 2014 (the Sub-Placement Agent Agreement), with UBS Securities LLC (the Sub-Placement Agent) with respect to the Fund relating to the common stock offered by this Prospectus. In accordance with the terms of the Sub-Placement Agent Agreement, the Fund may offer and sell its common stock from time to time through the Sub-Placement Agent as sub-placement agent for the offer and sale of its common stock. The Fund will compensate the Distributor with respect to sales of common stock at a commission rate of 1.00% of the gross proceeds of the

sale of the Fund's common stock. Out of this commission, the Distributor will compensate broker-dealers at a rate of up to 0.80% of the gross sales proceeds of the sale of the Fund's common stock sold by that broker-dealer.

- 1.h. **The information in this preliminary prospectus is not complete and may be changed. We may not sell these securities until the Registration Statement filed with the SEC is effective. This preliminary prospectus is not an offer to sell these securities and is not soliciting an offer to buy these securities in any jurisdiction where the offer or sale is not permitted.**

Neither the SEC nor any state securities commission has approved or disapproved of these securities or determined if this Prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

Table of Contents

- 1.i. **The Fund’s common stock has traded both at a premium and a discount to NAV. The Fund cannot predict whether its common stock will trade at a premium or discount to NAV in the future. The provisions of the 1940 Act generally require that the public offering price of common stock (less any underwriting commissions and discounts) must equal or exceed the NAV per share of a company’s common stock (calculated within 48 hours of pricing). The Fund’s issuance of common stock may have an adverse effect on prices for the Fund’s common stock in the secondary market by increasing the number of shares of common stock available in the market, which may put downward pressure on the market price for the Fund’s common stock. Shares of common stock of closed-end investment companies frequently trade at a discount from NAV, which may increase investors’ risk of loss.**
- 1.j. **Investing in the Fund’s common stock involves certain risks that are described in Item 8.3 beginning on page I-20 of Part I of this Prospectus, and under Item 8 in Part II of this Prospectus under Risk Factors, beginning on page II-37 of Part II. Certain of these risks are summarized in Item 3.2 beginning on page I-6 of Part I of this Prospectus.**
- 1.k. Not applicable.
- 2. Not applicable.

Item 2. Cover Pages; Other Offering Information

- 1. Exchange listing: see Item 1.g.
- 2. Not applicable.
- 3. Not applicable.

Item 3. Fee Table and Synopsis

1. Shareholder Transaction Expenses

Sales load paid by you (as a percentage of offering price)	1.00% ⁽¹⁾
Offering expenses borne by the Fund (as a percentage of offering price)	0.02% ⁽²⁾
Dividend reinvestment plan fees	\$0.02 per share for open-market purchases of common stock ⁽³⁾

**Percentage
of net assets
attributable
to common
shares**

Annual Expenses

Management Fee ⁽⁴⁾	1.01%
Interest Expense ⁽⁵⁾	0.40%
Other Expenses ⁽⁶⁾	0.13%
Total Annual Fund Operating Expenses ⁽⁷⁾	1.54%

(1) Represents the estimated commission with respect to the Fund's common stock being sold in this offering. There is no guarantee that there will be any sales of the Fund's common stock pursuant to this Prospectus. Actual sales of the Fund's common stock under this Prospectus, if any, may be less than as set forth under "Capitalization" below. In addition, the price per share of any such sale may be greater or less than the price set forth under "Capitalization" below, depending on market price of the Fund's common stock at the time of any such sale.

Table of Contents

- (2) Based on a sales price per share of \$13.56, which represents a discount to the Minimum Price, i.e. NAV plus sales load of the Fund's common stock on November 3, 2016. Offering expenses generally include, but are not limited to, the preparation, review and filing with the SEC of the Fund's registration statement (including this Prospectus), the preparation, review and filing of any associated marketing or similar materials, costs associated with the printing, mailing or other distribution of the Prospectus and/or marketing materials, associated filing fees, NYSE listing fees, and legal and auditing fees associated with the offering.
- (3) The Reinvestment Plan Agent's (as defined under Item 10 Dividend Reinvestment Plan in Part II) fees for the handling of the reinvestment of dividends will be paid by the Fund. However, you will pay a \$0.02 per share fee incurred in connection with open-market purchases, which will be deducted from the value of the dividend. You will also be charged a \$2.50 sales fee and pay a \$0.15 per share fee if you direct the Reinvestment Plan Agent to sell your shares of common stock held in a dividend reinvestment account. Per share fees include any applicable brokerage commissions the Reinvestment Plan Agent is required to pay.
- (4) The Fund currently pays BlackRock Advisors, LLC, its investment adviser (the Investment Advisor), a contractual management fee at an annual rate of 0.75% based on an aggregate of (i) the Fund's average daily net assets and (ii) the proceeds of any outstanding borrowings used for leverage (together, average daily Managed Assets). The Fund uses leverage, in the form of a credit facility, which as of August 31, 2016 amounted to approximately 29% of the Fund's Managed Assets (approximately 41% of the Fund's net assets). Managed Assets means the total assets of the Fund (including any assets attributable to money borrowed for investment purposes) minus the sum of the Fund's accrued liabilities (other than money borrowed for investment purposes). The Fund's net assets attributable to common stock are the Fund's Managed Assets minus the value of the Fund's assets attributable to money borrowed for investment purposes. Thus, when the Fund uses leverage, its net assets attributable to common stock are less than its Managed Assets and its expenses (including the management fee) stated as a percentage of its net assets attributable to common stock are greater than they would be if stated as a percentage of its Managed Assets. This table reflects the fact that you, as a common shareholder, bear the expenses of the Fund's use of leverage in the form of higher fees as a percentage of the Fund's net assets attributable to common stock than if the Fund did not use leverage.
- (5) Reflects leverage, in the form of a credit facility, in an amount equal to approximately 29% of the Fund's Managed Assets (approximately 41% of the Fund's net assets) as of August 31, 2016. The interest expense borne by the Fund will vary over time in accordance with the level of the Fund's use of leverage and variations in market interest rates. Interest expense is required to be treated as an expense of the Fund for accounting purposes.
- (6) Based on the fiscal year ended August 31, 2016.
- (7) Represents total annual expense including interest. The total annual expense excluding interest expense is 1.14%. The total annual expense after giving effect to fee waivers (including interest expense) is 1.54%. The purpose of the foregoing table and the example below is to help you understand all fees and expenses that you, as a holder of common stock of the Fund, bear directly or indirectly. The foregoing table should not be considered a representation of the Fund's future expenses. Actual future expenses may be greater or less than shown. Except where the context suggests otherwise, whenever this Prospectus contains a reference to fees or expenses paid by you or us or that we will pay fees or expenses, shareholders will indirectly bear such fees or expenses as investors in the Fund.

The following example illustrates the expenses (including the sales load of \$10.00 and offering costs of \$[]) that you would pay on a \$1,000 investment in common stock, assuming (i) total net annual expenses of []% of net assets attributable to common stock in years 1 through 10, and (ii) a 5% annual return:

	1 Year	3 Years	5 Years	10 Years
Total expenses incurred	\$[]	\$[]	\$[]	\$[]

The example should not be considered a representation of future expenses. The example assumes that the Other expenses set forth in the Annual Expenses table are accurate and that all dividends and distributions are reinvested at NAV. Actual expenses may be greater or less than those assumed. Moreover, the Fund's actual rate of return may be greater or less than the hypothetical 5% return shown in the example.

Capitalization

The Fund may offer and sell up to 3,050,000 shares of its common stock, \$0.10 par value per share, from time to time through the Sub-Placement Agent as sub-placement agent under this Prospectus. There is no guarantee that there will be any sales of the Fund's common stock pursuant to this Prospectus. The table below assumes that the Fund will sell 3,050,000 shares of its common stock at a price of \$13.56 per share (which represents a discount to

Table of Contents

the Minimum Price (i.e., NAV plus sales load of the Fund's common stock on November 3, 2016). Actual sales, if any, of the Fund's common stock under this Prospectus may be greater or less than \$13.56 per share, depending on the market price of the Fund's common stock at the time of any such sale and/or the Fund's NAV for purposes of calculating the Minimum Price. The Fund and the Distributor will determine whether any sales of the Fund's common stock will be authorized on a particular day; the Fund and the Distributor, however, will not authorize sales of the Fund's common stock if the per share price of the shares is less than the Minimum Price. The Fund and the Distributor may also not authorize sales of the Fund's common stock on a particular day even if the per share price of the shares is equal to or greater than the Minimum Price, or may only authorize a fixed number of shares to be sold on any particular day. The Fund and the Distributor will have full discretion regarding whether sales of shares of the Fund's common stock will be authorized on a particular day and, if so, in what amounts.

The following table sets forth the Fund's capitalization (1) on a historical basis as of August 31, 2016 ([]); and (2) on a pro forma as adjusted basis to reflect the assumed sale of 3,050,000 shares of common stock at \$13.56 per share, in an offering under this Prospectus, after deducting the assumed commission of \$[] (representing an estimated commission to the Distributor of 1.00% of the gross proceeds of the sale of shares of common stock, out of which the Distributor will compensate broker-dealers at a rate of up to 0.80% of the gross sales proceeds of the sale of the Fund's common stock sold by that broker-dealer).

	As of August 31, 2016 ([])	Pro Forma ([]) As adjusted
Common shares outstanding, \$0.10 par value per share	37,232,488	[]
Paid-in capital	\$ 659,688,373	\$ []
Undistributed net investment income	\$ 3,653,152	\$ []
Accumulated net realized loss	\$ (105,600,349)	\$ ([])

Net Assets	\$ 550,270,813	\$ []
Net asset value per share	\$ 14.78	\$ []

- A summary of this Prospectus is set forth below. This is only a summary of certain information contained in this Prospectus relating to the Fund. This summary may not contain all of the information that you should consider before investing in the Fund's common stock. You should review the more detailed information contained in this Prospectus.

The Fund

BlackRock Floating Rate Income Strategies Fund, Inc. is registered under the 1940 Act, as a diversified, closed-end management investment company and has been operational since 2003. The Fund was known as Floating Rate Income Strategies Fund, Inc. prior to September 29, 2006.

The Offering

The Fund is offering up to 3,050,000 shares of common stock in transactions that are deemed to be at the market as defined in Rule 415 under the Securities Act, which currently would only include sales made directly on the NYSE. The minimum price on any day at which Fund common stock may be sold will not be less than the current NAV per share plus the per share amount of the commission to be paid to the Distributor. The Fund and the Distributor will

determine whether any sales of the Fund's common stock will be authorized on a particular day; the Fund and the Distributor, however, will not authorize sales of the Fund's common stock if the per share price of the shares is less than the Minimum Price. The Fund and the Distributor may also not authorize sales of the Fund's common stock on a particular day even if the per share price of the shares is equal to or greater than the Minimum Price, or may only authorize a fixed number of shares to be sold on any particular day. The Fund and the Distributor will have full discretion regarding whether sales of shares of the Fund's common stock will be authorized on a particular day and, if so, in what amounts. As of November 8, 2016, the last reported sale price for the Fund's common stock on the NYSE was \$13.62 per share.

Table of Contents

The Distributor has entered into the Sub-Placement Agent Agreement with the Sub-Placement Agent with respect to the Fund relating to the common stock offered by this Prospectus. In accordance with the terms of the Sub-Placement Agent Agreement, the Fund may offer and sell its common stock from time to time through the Sub-Placement Agent as sub-placement agent for the offer and sale of its common stock. The Fund will compensate the Distributor with respect to sales of common stock at a commission rate of 1.00% of the gross proceeds of the sale of the Fund's common stock. Out of this commission, the Distributor will compensate broker-dealers at a rate of up to 0.80% of the gross sales proceeds of the sale of the Fund's common stock sold by that broker-dealer.

The Fund's common stock has traded both at a premium and a discount to NAV. The Fund cannot predict whether its common stock will trade at a premium or discount to NAV in the future. The provisions of the 1940 Act generally require that the public offering price of common stock (less any underwriting commissions and discounts) must equal or exceed the NAV per share of a company's common stock (calculated within 48 hours of pricing). The Fund's issuance of common stock may have an adverse effect on prices for the Fund's common stock in the secondary market by increasing the number of shares of common stock available in the market, which may put downward pressure on the market price for the Fund's common stock. Shares of common stock of closed-end investment companies frequently trade at a discount from NAV, which may increase investors' risk of loss.

Investment Objective The Fund's investment objective is to provide shareholders with high current income and such preservation of capital as is consistent with investment in a diversified, leveraged portfolio consisting primarily of floating rate debt securities and instruments (floating rate debt securities). The Fund's investment objective is a fundamental policy and may not be changed without stockholder approval. No assurance can be given that the Fund's investment objective will be achieved.

Investment Strategy BlackRock Advisors, LLC is the Fund's investment adviser (the Investment Advisor).

In selecting floating rate loans or debt and other securities for the Fund, BlackRock will seek to identify issuers and industries that BlackRock believes are likely to experience stable or improving financial conditions. BlackRock's analysis will include:

credit research on the issuers' financial strength;

assessment of the issuers' ability to meet principal and interest payments;

general industry trends;

the issuers' managerial strength;

analysis of deal structure and covenants;

changing financial conditions;

borrowing requirements or debt maturity schedules; and

the issuers' responsiveness to changes in business conditions and interest rates.

BlackRock will consider relative values among issuers based on anticipated cash flow, interest or dividend coverage, asset coverage and earnings prospects. Using these tools, BlackRock will seek to add consistent value and control performance volatility consistent with the Fund's investment objectives and policies. BlackRock believes this strategy should enhance the Fund's ability to achieve its investment objective.

I-7

Table of Contents

BlackRock's analysis continues on an ongoing basis for any floating rate loan or debt or other securities in which the Fund has invested. Although BlackRock uses due care in making such analysis, there can be no assurance that such analysis will reveal factors that may impair the value of the floating rate loan or debt.

**Investment
Policies**

The Fund seeks to achieve its investment objective by investing, under normal market conditions, at least 80% of its Managed Assets in floating rate debt securities, including floating or variable rate debt securities that pay interest at rates that adjust whenever a specified interest rate changes and/or which reset on predetermined dates (such as the last day of a month or calendar quarter). The Fund invests a substantial portion of its investments in floating rate debt securities consisting of secured or unsecured senior floating rate loans that are rated below investment grade. Secured loans may be either fully or partially secured at the time of investment. In addition to senior loans, floating rate debt securities may include, without limitation, instruments such as catastrophe and other event linked bonds, bank capital securities, corporate bonds, notes, money market instruments and certain types of mortgage related and other asset backed securities. Due to their floating or variable rate features, these instruments will generally pay higher levels of income in a rising interest rate environment and lower levels of income as interest rates decline. For the same reason, the market value of a floating rate debt security is generally expected to have less sensitivity to fluctuations in market interest rates than a fixed rate debt instrument, although the value of a floating rate debt security may nonetheless decline as interest rates rise and due to other factors, such as real or perceived changes in credit quality or financial condition of the issuer or borrower, volatility in the capital markets or other adverse market conditions.

The Fund may invest directly in floating rate debt securities or synthetically through the use of derivatives.

The Fund may invest up to 20% of its total assets in securities other than floating rate debt securities, including, but not limited to, fixed rate debt securities such as convertible securities, bonds, notes, fixed rate loans and mortgage related and other asset backed securities issued on a public or private basis, collateralized debt obligations, preferred securities, commercial paper, U.S. government securities, structured notes, credit linked notes, credit linked trust certificates and other hybrid instruments.

To a limited extent, incidental to and in connection with its investment activities or pursuant to a convertible feature in a security, the Fund may acquire warrants and other debt and equity securities. The Fund may also acquire other debt and equity securities of a borrower or issuer in connection with an amendment, waiver, conversion or exchange of a senior loan or other debt security or in connection with a bankruptcy or workout of the borrower or issuer.

The Fund may invest without limit, and generally intends to invest a substantial portion of its assets, in high yield securities, including senior loans and other floating or fixed rate debt securities, that are rated below investment grade by the established rating services (Ba or lower by Moody's Investor's Service, Inc. (Moody's) or BB or lower by Standard & Poor's Corporation Ratings Services, a division of The McGraw-Hill Companies, Inc. (S&P)) or, if unrated, are considered by the Investment Advisor to be of comparable quality. The Fund may not, however, invest more than 10% of its total assets (at the time of investment) in securities that are rated Caa1 or lower (if rated by Moody's) or CCC+ or lower (if rated by S&P) by each agency rating such security or, if unrated, are considered by the Investment Advisor to be of comparable quality or are otherwise considered to be distressed securities.

The Fund may invest without limitation in debt securities of issuers domiciled outside the United States. The Fund, however, will not invest more than 10% of its total assets in debt

Table of Contents

securities of issuers located in emerging market countries. The Fund will invest primarily in U.S. dollar denominated debt securities. The Fund will not invest more than 10% of its total assets in debt securities denominated in currencies other than the U.S. dollar or that do not provide for payment to the Fund in U.S. dollars, including obligations of non-U.S. governments and their respective subdivisions, agencies and government sponsored enterprises. The Investment Advisor generally considers emerging market countries to be any country that is defined as having an emerging or developing economy by the World Bank or its related organizations or the United Nations or its subsidiaries.

The Fund may invest without limit in illiquid securities, which are floating rate debt securities, senior loans, high yield securities and other securities that lack a secondary trading market or are otherwise considered illiquid.

For a discussion of risk factors that may affect the Fund's ability to achieve its investment objective, see Risk Factors under Item 8 in Part II.

Leverage

The Fund currently utilizes leverage for investment purposes in the form of a bank credit facility. As of August 31, 2016, this leverage represented approximately 29% of the Fund's Managed Assets (approximately 41% of the Fund's net assets). At times, the Fund could utilize leverage through borrowings, the issuance of short term debt securities, the issuance of shares of preferred stock or a combination thereof. The Fund has the ability to utilize leverage through borrowings or the issuance of short term debt securities in an amount up to 33 1/3% of the value of its Managed Assets (which includes the amount obtained from such borrowings or debt issuance). The Fund also has the ability to utilize leverage through the issuance of shares of preferred stock in an amount up to 50% of the value of its Managed Assets (which includes the amount obtained from such issuance). The Fund may also leverage through the use of reverse repurchase agreements. There can be no assurance that the Fund will borrow in order to leverage its assets or, if it does, what percentage of the Fund's assets such borrowings will represent. The Fund does not currently anticipate issuing any preferred stock.

See Leverage under Item 8 in Part II and the discussion of the Fund's capital structure under Item 10 in Part II.

The use of leverage is subject to numerous risks. When leverage is employed, the NAV and market price of the common stock and the yield to holders of common stock will be more volatile than if leverage were not used. For example, a rise in short-term interest rates, which currently are near historically low levels, will cause the Fund's NAV to decline more than if the Fund had not used leverage. A reduction in the Fund's NAV may cause a reduction in the market price of its common stock. The Fund cannot assure you that the use of leverage will result in a

higher yield on the common stock. When the Fund uses leverage, the management fee payable to the Investment Advisor will be higher than if the Fund did not use leverage because these fees are calculated on the basis of the Fund's Managed Assets, which include the proceeds of leverage. The Fund's leveraging strategy may not be successful.

See Risk Factors Leverage Risk under Item 8 in Part II.

**Investment
Advisor**

BlackRock Advisors, LLC is the Fund's investment adviser. The Investment Advisor receives an annual fee, payable monthly, in an amount equal to 0.75% of the average daily value of the Fund's Managed Assets.

Distributions

The Fund intends to make regular monthly cash distributions of all or a portion of its net investment income to holders of the Fund's shares of common stock. The Fund intends to pay any capital gains distributions at least annually. A return of capital distribution may involve a return of the shareholder's original investment. Though not currently taxable, such a distribution may lower a shareholder's basis in the Fund, thus potentially subjecting the shareholder to future tax consequences in connection with the sale of Fund shares, even if sold

Table of Contents

at a loss to the shareholder's original investment. When total distributions exceed total return performance for the period, the difference will reduce the Fund's total assets and NAV and, therefore, could have the effect of increasing the Fund's expense ratio and reducing the amount of assets the Fund has available for long term investment.

Shareholders will automatically have all dividends and distributions reinvested in common stock of the Fund in accordance with the Fund's dividend reinvestment plan, unless an election is made to receive cash by contacting the Reinvestment Plan Agent (as defined herein), at (800) 699-1236. See "Dividend Reinvestment Plan" under Item 10 in Part II.

The Fund reserves the right to change its distribution policy and the basis for establishing the rate of its monthly distributions at any time and may do so without prior notice to common shareholders. See Item 10.1 in Part I and "Distributions" under Item 10 in Part II.

Listing	The Fund's common stock is listed on the NYSE under the symbol FRA.
Custodian and Transfer Agent	State Street Bank and Trust Company serves as the Fund's custodian, and Computershare Trust Company, N.A. serves as the Fund's transfer agent.
Administrator	State Street Bank and Trust Company serves as the Fund's administrator and fund accountant.
Market Price of Shares	Common shares of closed-end investment companies frequently trade at prices lower than their NAV. The Fund cannot assure you that its common stock will trade at a price higher than or equal to NAV. The Fund's common stock trades in the open market at market prices that are a function of several factors, including dividend levels (which are in turn affected by expenses), NAV, call protection for portfolio securities, portfolio credit quality, liquidity, dividend stability, relative demand for and supply of the common stock in the market, general market and economic conditions and other factors. The Fund's common stock is designed primarily for long-term investors and you should not purchase common shares of the Fund if you intend to sell it shortly after purchase. The issuance of additional common stock pursuant to this Prospectus may also have an adverse effect on prices for the Fund's common stock in the secondary market by increasing the supply of common stock available for sale.
Special Risk Considerations	An investment in the Fund's common stock involves risk. You should consider carefully the risks identified below, which are described in detail under "Risk Factors" beginning on page II-35 of Part II of this Prospectus.

Principal risks of investing in the Fund include:

Interest Rate Risk. Interest rate risk is the risk that prices of bonds and other fixed-income securities will increase as interest rates fall and decrease as interest rates rise. This risk is heightened given that certain interest rates are at historical lows.

Issuer Risk. The value of fixed income securities may decline for a number of reasons which directly relate to the issuer, such as management performance, financial leverage, reduced demand for the issuer's goods and services, historical and prospective earnings of the issuer and the value of the assets of the issuer.

Credit Risk. Credit risk is the risk that one or more fixed income securities in the Fund's portfolio will decline in price or fail to pay interest or principal when due because the issuer of the security experiences a decline in its financial status.

Prepayment Risk. During periods of declining interest rates, borrowers may exercise their option to prepay principal earlier than scheduled.

Table of Contents

Reinvestment Risk. Reinvestment risk is the risk that income from the Fund's portfolio will decline if the Fund invests the proceeds from matured, traded or called fixed income securities at market interest rates that are below the Fund portfolio's current earnings rate.

Duration and Maturity Risk. The Fund may incur costs in seeking to adjust the portfolio average duration or maturity. There can be no assurance that the Investment Advisor's assessment of current and projected market conditions will be correct or that any strategy to adjust the portfolio's duration or maturity will be successful at any given time.

Corporate Bonds Risk. The market value of a corporate bond generally may be expected to rise and fall inversely with interest rates. The market value of intermediate and longer-term corporate bonds is generally more sensitive to changes in interest rates than is the market value of shorter-term corporate bonds. The market value of a corporate bond also may be affected by factors directly related to the issuer, such as investors' perceptions of the creditworthiness of the issuer, the issuer's financial performance, perceptions of the issuer in the market place, performance of management of the issuer, the issuer's capital structure and use of financial leverage and demand for the issuer's goods and services.

Mortgage Related Securities Risks. The risks associated with MBS include: credit risk associated with the performance of the underlying mortgage properties and of the borrowers owning these properties; risks associated with their structure and execution (including the collateral, the process by which principal and interest payments are allocated and distributed to investors and how credit losses affect the issuing vehicles and the return to investors in such MBS); whether the collateral represents a fixed set of specific assets or accounts, whether the underlying collateral assets are revolving or closed-end, under what terms (including maturity of the MBS) any remaining balance in the accounts may revert to the issuing entity and the extent to which the entity that is the actual source of the collateral assets is obligated to provide support to the issuing vehicles or to the investors in such MBS; risks associated with the servicer of the underlying mortgages; adverse changes in economic conditions and circumstances, which are more likely to have an adverse impact on MBS secured by loans on certain types of commercial properties than on those secured by loans on residential properties; prepayment risk, which can lead to significant fluctuations in the value of the MBS; loss of all or part of the premium, if any, paid; and decline in the market value of the security, whether resulting from changes in interest rates, prepayments on the underlying mortgage collateral or perceptions of the credit risk associated with the underlying mortgage collateral.

Below Investment Grade Securities (Junk Bonds) Risk. The Fund may invest in securities that are rated, at the time of investment, below investment grade quality (rated Ba/BB or below, or unrated but judged to be of comparable quality by the

Investment Advisor), which are commonly referred to as high yield or junk bonds and are regarded as predominantly speculative with respect to the issuer's capacity to pay interest and repay principal. Issuers of high yield bonds are not perceived to be as strong financially as those with higher credit ratings. These issuers are more vulnerable to financial setbacks and recession than more creditworthy issuers, which may impair their ability to make interest and principal payments.

I-11

Table of Contents

Senior Loans Risk. Senior loans typically hold the most senior position in the capital structure of the issuing entity, are typically secured with specific collateral and typically have a claim on the assets and/or stock of the borrower that is senior to that held by subordinated debt holders and stockholders of the borrower. The Fund's investments in senior loans are typically below investment grade and are considered speculative because of the credit risk of their issuer.

3. Not applicable.

Item 4. Financial Highlights

1. The following table includes selected data for a common share outstanding throughout the period and other performance information derived from the Fund's financial statements. It should be read in conjunction with the Fund's financial statements and notes thereto, which are incorporated by reference into this Prospectus. The following information with respect to the fiscal years ended August 31, 2012, August 31, 2013, August 31, 2014, August 31, 2015 and August 31, 2016 has been audited by [], independent registered public accountants, whose report thereon is []. See Item 24.
