Harmony’s strong cash flows underpin profitable quarter

- Safety parameters improving; working towards zero harm

- 7% increase in underground recovered grade

- 2% increase in production

- All-in sustaining costs down by 7% at R434 834/kg (down 15% to US\$950/oz)

- 84% increase in production profit to R1.29 billion (68% to US\$91 million)

- Headline earnings of R74 million (US\$5 million)

- Net debt reduction of R127 million (US\$29 million)

Harmony Gold Mining Company Limited (“Harmony” and/or “the Company”) is pleased to announce that it recorded another solid set of results for the second quarter of financial year 2016 – three consecutive quarters of increased delivery.

Underground grade was 7% higher, with the majority of Harmony’s operations producing higher kilograms and generating net free operational cash flow. Combined with a 7% increase in the average R/kg gold price received of R507 490/kg, revenue increased by 10% to R4.57 billion (to US\$321 million) during the quarter.

Harmony’s production profit increased by 84% to R1.29 billion (68% to US\$91 million) quarter on quarter, mainly due to a 7% increase in the gold price received and supported by a 2% increase in gold production.

“Higher production means that Harmony’s cash flow is strengthened, our margins are growing, we are able to repay our debt and to fund Golpu. The higher R/kg gold price is simply an added bonus”, said chief executive officer, Peter Steenkamp.

All-in sustaining costs for all operations decreased by 7% to R434 834/kg in the December 2015 quarter, compared to R466 061/kg in the September 2015 quarter (15% decrease to US\$950/oz).

Better production results resulted in Harmony recording headline earnings of R74 million (US\$5 million).
