

Workhorse Group Inc.
Form 10-K
March 14, 2018

UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2017

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE EXCHANGE ACT

Commission file number: 000-53704

WORKHORSE GROUP INC.

(Name of registrant as specified in its charter)

Nevada	26-1394771
(State or other jurisdiction of incorporation or organization)	(I.R.S. Employer Identification No.)

**100 Commerce Drive
Loveland, Ohio 45140**

513-360-4704

(Address of principal executive offices) (Registrant's telephone number)

SECURITIES REGISTERED PURSUANT TO SECTION 12(b) OF THE EXCHANGE ACT:

Title of each Class:	Name of Each Exchange
Common Stock, \$0.001 par value per share	The NASDAQ Stock Market LLC

SECURITIES REGISTERED PURSUANT TO SECTION 12(g) OF THE EXCHANGE ACT:

None.

Indicate by check mark if the Registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.
Yes No

Indicate by check mark if the Registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).
Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405 of this chapter) is not contained herein, and will not be contained, to the best of Registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated

Edgar Filing: Workhorse Group Inc. - Form 10-K

filer,” “smaller reporting company,” and “emerging growth company” in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer

Smaller reporting company

Non-accelerated filer (Do not check if a smaller reporting company)

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

As of June 30, 2017, the last business day of the Registrant’s most recently completed second fiscal quarter, the market value of our common stock held by non-affiliates was \$134,353,896.

The number of shares of the Registrant’s common stock, \$0.001 par value per share, outstanding as of March 8, 2018, was 41,828,474.

Forward-Looking Statements

The discussions in this Annual Report contain forward-looking statements reflecting our current expectations that involve risks and uncertainties. When used in this Report, the words “anticipate”, “expect”, “plan”, “believe”, “seek”, “estimate” and similar expressions are intended to identify forward-looking statements. These are statements that relate to future periods and include, but are not limited to, statements about the features, benefits and performance of our products, our ability to introduce new product offerings and increase revenue from existing products, expected expenses including those related to selling and marketing, product development and general and administrative, our beliefs regarding the health and growth of the market for our products, anticipated increase in our customer base, expansion of our products functionalities, expected revenue levels and sources of revenue, expected impact, if any, of legal proceedings, the adequacy of liquidity and capital resource, and expected growth in business. Forward-looking statements are subject to risks and uncertainties that could cause actual results to differ materially from those projected. These risks and uncertainties include, but are not limited to, market acceptance for our products, our ability to attract and retain customers for existing and new products, our ability to control our expenses, our ability to recruit and retain employees, legislation and government regulation, shifts in technology, global and local business conditions, our ability to effectively maintain and update our product and service portfolio, the strength of competitive offerings, the prices being charged by those competitors and the risks discussed elsewhere herein and our ability to raise capital under acceptable terms. These forward-looking statements speak only as of the date hereof. We expressly disclaim any obligation or undertaking to release publicly any updates or revisions to any forward-looking statements contained herein to reflect any change in our expectations with regard thereto or any change in events, conditions or circumstances on which any such statement is based.

All references in this Form 10-K that refer to the “Company”, “WORKHORSE GROUP”, “Workhorse”, “we,” “us” or “our” a WORKHORSE GROUP INC. and unless otherwise differentiated, its wholly-owned subsidiaries, Workhorse Technologies Inc., Workhorse Motor Works Inc and Workhorse Properties Inc.

PART I

ITEM 1. BUSINESS

Overview

We are a technology company focused on providing sustainable and cost-effective solutions to the commercial transportation sector. As an American manufacturer we design and build high performance battery-electric vehicles and aircraft that make movement of people and goods more efficient and less harmful to the environment. As part of our solution, we also develop cloud-based, real-time telematics performance monitoring systems that enable fleet operators to optimize energy and route efficiency. Although we operate as a single unit through our subsidiaries, we approach our development through two divisions, Automotive and Aviation.

Automotive

In March of 2013, we purchased the former Workhorse Custom Chassis assembly plant in Union City, Indiana from Navistar International (NAV: NYSE). With this acquisition, we acquired the capability to be an Original Equipment Manufacturer (OEM) of Class 3-6 commercial-grade, medium-duty truck chassis, to be marketed under the Workhorse® brand. All Workhorse last mile delivery vans are assembled in the Union City assembly facility. We believe that we are the only medium-duty battery-electric OEM in the U.S. and we will be expanding our product portfolio through introduction of the N-GEN electric cargo van, as well as the W-15 range-extended electric pickup truck in late 2018 and 2019.

We believe our battery-electric and range-extended battery electric commercial vehicles offer fleet operators significant benefits, which include:

Low Total Cost-of-Ownership vs. conventional gas/diesel vehicles

Competitive advantage to increase brand loyalty and last mile delivery market share

Improved profitability through:

o Lower maintenance costs

oReduced fuel expenses

Increased package deliveries per day through use of more efficient delivery methods

Decreased vehicle emissions and reduction in carbon footprint

Improved vehicle safety and driver experience

The Company currently sells and leases its vehicles to fleet customers directly and through its primary distributor Ryder System, Inc. Ryder also is the exclusive maintenance provider for Workhorse, which provides fleet operators with access to Ryder's network of 800 maintenance facilities and nearly 6,000 trained service technicians across North America.

Cargo Vans for Last Mile Delivery and Commercial Work Use

Workhorse E-100 battery-electric and E-GEN range-extended delivery vans are currently in production at our Union City, Indiana plant and are in use by our customers on daily routes across the United States. To date, we have built and delivered over 360 electric and range extended medium-duty delivery trucks to our customers. To our knowledge, we are the only American commercial electric vehicle OEM to achieve such a milestone. Our delivery customers include companies such as UPS, FedEx Express, Alpha Baking and Ryder System.

Data from our in-house developed Metron telematics system demonstrates our vehicles have logged more than 2,000,000 customer miles on the road and are averaging a 500% increase in fuel economy as compared to conventional gasoline-based trucks of the same size and duty cycle. In addition to improved fuel economy, we anticipate that the performance of our vehicles on-route will reduce long-term vehicle maintenance expense by approximately 50% as compared to fossil-fueled trucks. Over a 20-year vehicle life, we estimate that our E-GEN Range-Extended Electric delivery vans will save over \$150,000 in fuel and maintenance savings. Due to this positive return-on-investment, we charge a premium price for our vehicles when selling to major fleet operators. We expect that fleet operators will be able to achieve a four-year or better total cost of ownership breakeven (without government incentives), which we believe justifies the higher acquisition cost of our vehicles.

Our goal is to continue to increase sales and production of our existing vehicle portfolio, while executing on a cost-down strategy in order to achieve sustained gross margin profitability of the last mile-delivery van platform. It is our intention that this strategy in combination with the development and launch of the N-GEN cargo van and W-15 pickup truck platforms, which target high-volume market segments, will drive further cost-down volume synergies across our supply chain.

U.S. Post Office Replenishment Program / Next Generation Delivery Vehicle Project

Workhorse, with our partner VT Hackney, is one of five awardees that the United States Postal Service selected to build prototype vehicles for the USPS Next Generation Delivery Vehicle (NGDV) project. The Post Office has stated that the number of vehicles to be replaced in the project is approximately 180,000. In September 2017, Workhorse delivered six vehicles for prototype testing under the NGDV Acquisition Program in compliance with the terms set forth in their USPS prototype contract. These vehicles continue to undergo testing in the field and at testing facilities. The Post Office has stated that they intend to test the prototypes and select a winning bid(s) following the testing process.

1

N-GEN Electric Cargo Van

In 2017, Workhorse announced the development of its N-GEN electric cargo van, which leverages the existing ultra-low floor, long-life commercial delivery vehicle platform that was developed for the USPS, as well as our extensive customer experience gained from working with our E-GEN and E-100 customers. The N-GEN incorporates lightweight materials, all-wheel drive, best in class turning radius, 360° cameras, collision avoidance systems and an optional roof mounted HorseFly delivery drone.

The Workhorse N-Gen electric cargo van platform will be available in 450, 700 and 1,000 cubic feet configurations. We intend to initially launch the 450 cubic foot and 1,000 cubic foot configurations with the goal of competing with conventional market leaders, including the Mercedes Sprinter, Ford Transit and Dodge Promaster gasoline/diesel vans for both last-mile delivery and other service-oriented applications such as telecommunications. We expect these vehicles to achieve a fuel economy of approximately 60 miles per gallon equivalent (MPGe), and offer fleet operators the most favorable total cost-of-ownership of any comparable conventional van utilizing an internal combustion engine that is available today.

W-15 Range-Extended Electric Pickup Truck

In May 2017, we unveiled a working prototype of our W-15 range-extended electric pickup truck to address the specific needs of commercial fleet work truck operators, including utilities, municipalities, construction, airports and service businesses. We believe that the W-15 has the potential to transform the pickup truck market for fleet operators in the United States, estimated at 250,000 new vehicle purchases per year. The performance specifications of the Workhorse W-15 pickup include a true all-wheel drivetrain and two electric engines that generate up to 460 horsepower and provide a top acceleration time from 0 to 60 MPH of 5.6 seconds. The W-15 also has a fuel-economy rating of 75 MPGe and a range of 80 miles in all-electric operation. A gasoline-powered range extender also comes standard on the truck to extend the driving range to 300 miles on a single tank of gas by continuously charging the batteries during operation.

We have secured letters-of-intent for more than 5,500 trucks, amounting to nearly \$300 million from corporate fleets representing the utility, municipality and automotive logistics sectors. We have established a Leadership Council comprised of seasoned fleet experts from our LOI partners, who will be piloting our production intent vehicles prior to launch in late 2018.

We intend to produce the W-15 at our existing 250,000 square foot facility in Union City, Indiana. This plant has the capability to produce more than 60,000 vehicles per year. The battery packs for all Workhorse vehicles will be built in our Loveland, Ohio battery pack plant using Panasonic cells produced in Japan.

Delivery As A Service (DAAS) and Future Platform Development

Last mile delivery is considered the most expensive, inefficient, and pollution generating segment of transport, in addition to being the largest growing segment of the trucking market, according to Datex Corp. and NTEA (2018). Driven by the growth in e-commerce, this is expected to double to 26 billion parcels over the next 10 years. McKinsey & Company estimates that 80% of all home deliveries will transition to driver assisted and autonomous models, driven by driver labor shortages, urban congestion, and consumer demand.

As part of continued efforts to advance our last mile delivery platform technologies, in the fourth quarter of 2017, Workhorse initiated a pilot of its Delivery As A Service offering, which provides turn-key electric last mile delivery for conventional brick and mortar and e-commerce businesses. Through our DAAS program, Workhorse electric vehicles, drivers and dispatchers as well as potentially drones provide an asset-light opportunity for businesses to offer zero-emission last mile delivery services to their customers. Workhorse's DAAS is currently operating in one major metropolitan market, with plans to expand to additional cities in conjunction with our pilot customers, in 2018.

Aviation

Delivery Drones

Our HorseFly™ Delivery Drone is a custom-designed, purpose-built drone that is fully integrated with our electric trucks. We have a patent pending on this architecture and we believe we are the only company in the world with a working drone/truck system. The HorseFly delivery drone and truck system is designed to work within the FAA Rule 107 that permits the use of commercial drones in U.S. airspace under certain conditions.

To date, we have conducted two demonstration deliveries with large multi-national corporations, including UPS. UPS conducted a successful real-world test with us in February 2017 and it received worldwide news coverage. The knowledge we have gained in building electric delivery trucks for last-mile delivery has led us to believe that a drone/truck delivery system can have significant cost savings in the growing last mile delivery market.

UPS has estimated in a press release dated February 21, 2017 that a reduction of just one mile per driver per day over one year can save UPS up to \$50 million. Rural delivery routes are the most expensive to serve due to the time and vehicle expenses required to complete each delivery. In this test, the drone made one delivery while the driver continued down the road to make another. We believe that this truck/drone architecture represents significant cost savings for delivery fleets and that we are first to market with such a system. We continue to work closely with the FAA as we strive to bring the system to the point of daily drone deliveries across rural America.

SureFly™ Multicopter

SureFly is our entry into the emerging vertical take-off and landing (VTOL) market. It is designed to be a two-person, 400-pound payload aircraft with on a hybrid internal combustion/electric power generation system. Our approach in the design is to build the safest and simplest to fly rotary wing aircraft in the world. We believe it is a practical answer to personal flight, and has additional applications in the commercial transportation segments, including air taxi services, agriculture and others.

The FAA to date has granted three separate Experimental Airworthiness Certifications, registered as N834LW, for the aircraft. These certifications come after an extensive design review and inspection of the aircraft with each renewed certificate.

Our SureFly Aerospace team continues to further develop the SureFly platform and routinely performs test cards, including testing the aircraft's power systems, executing tethered high-power ground tests and manned flights.

In December 2017, we initiated the process of spinning off our SureFly operations into a separate publicly traded company, Surefly, Inc.

Surefly, Inc. will encompass all of SureFly's aerial technology and expertise, including property related to the personal helicopter, but it will not own the assets related to the package express-related HorseFly drone, which will be retained by Workhorse. Workhorse granted SureFly a royalty-free, perpetual license to utilize the HorseFly drone except with respect to deliveries implemented from a ground-based vehicle focused on package express.

The initial steps of the spin-off, which we took in December 2017, provided for a capital infusion of \$5 million into Workhorse in the form of a Senior Secured Note which is expected, although not guaranteed, to be exchanged into equity of SureFly concurrent with the spin-off.

At the spin-off date, Workhorse expects to retain a portion of SureFly's common stock and distribute a portion as a dividend to existing Workhorse shareholders. After the spin-off, expected during 2018, we intend to evaluate all of our options relating to the SureFly equity we have retained.

To facilitate the spin-off, Workhorse expects to enter into, among other things, a transition services agreement with SureFly to provide certain services not anticipated to be provided immediately by employees of SureFly.

The completion of the spin-off will enable us to focus all of our resources on our core automotive business. We believe the decision to spin-off SureFly into a separate entity will better position both companies for sustained long-term growth. The spin-off will improve the operational focus and financial outlook for Workhorse's core business while creating new opportunities for SureFly.

The spin-off transaction will be subject to the receipt of regulatory approvals, the execution of inter-company agreements, arrangement of adequate debt and/or equity financing, the effectiveness of a registration statement, final approval by Workhorse's board of directors, and certain other customary conditions. The spin-off will not require a shareholder vote and is expected to be completed by the end of 2018, but there can be no assurance regarding the ultimate timing of the spin-off or that the spin-off will ultimately occur.

Technology

Batteries Are Key

The battery pack is key to the design, development, and manufacture of advanced electric-vehicle powertrains. Where some other electric vehicle (EV) manufacturers purchase their batteries in a plug-and-play pack, we build our own battery packs. This keeps the intellectual property related to the design and production of the pack in-house and avoids the issues that occur when a battery supplier fails. It also enables us to pay less for our battery packs than our competitors, thus our all-electric truck is less expensive than competitive vehicles. We use the Panasonic 18650 cells and design the pack around these commodity cells.

In-House Software Development is Essential

Our powertrains encompass the complete motor assemblies, computers, and software required for vehicle electrification. We use off-the-shelf proven components and combine them with our proprietary software.

Innovation is the Future

Additionally, we have developed a cloud-based, remote management system to manage and track the performance of all of the vehicles that we deploy in order to provide a 21st Century solution for fleet managers.

The telematics system and associated hardware installed in the Workhorse vehicles is designed to monitor the controller area network (CAN) traffic for specific signals. These signals are uploaded along with GPS data to a Workhorse server facility where the data signals are tracked at ten second intervals while driving and during the electricity generating process and at sixty seconds during a plug-in charge. The real-time data is stored in a database as it arrives and delivers updates to clients connected through the web interface.

Clients are given login credentials (username and password) to the telematics website where they can monitor the performance and location of the vehicles. Group privileges can be configured to limit access to client-specific vehicles securing the vehicle data so clients can only view their vehicle data. Administrator privileges allow all data for all clients to be monitored and viewed.

As a parameter-based system, we can set route-specific parameters to better manage the battery-provided power with the additional power generated through the E-GEN process (not applicable to E-100). In an upcoming release, we will add the ability to integrate Metron Telematics with the client's internal telematics system and automatically update the parameters each day with information about the route. This enhancement will result in a "SMART-GEN" vehicle that will maximize efficiency by automating the process to determine the ideal times and locations to use the E-GEN to add electricity to the batteries.

Locations and Facilities

Our company headquarters and R & D facility is located at 100 Commerce Drive, Loveland, Ohio, a Cincinnati suburb. We occupy a 45,000 sq. ft. facility that allows for the manufacture of 5,000 electric powertrain kits per year. Powertrains are delivered to the Workhorse facility in Indiana or shipped to our dealer network for onsite installation in conversion vehicles. On October 28, 2016 the Company purchased its operating facilities in Loveland, Ohio. The total purchase price was \$2.5 million with \$1.7 million financed with a financial institution. The note carries an interest rate of 6.5% accruing monthly with a maturity date of November 1, 2026.

Our truck assembly facility is located in Union City, Indiana. This facility consists of three buildings with 250,000 square feet of manufacturing and office space on 47 acres.

In March of 2013, we purchased the former Workhorse Custom Chassis assembly plant in Union City, Indiana. With this acquisition, we became an Original Equipment Manufacturer (OEM) of Class 3-6 commercial-grade, medium-duty truck chassis marketed under the Workhorse® brand.

Ownership and operation of this plant enables us to build new chassis with gross vehicle weight capacity of between 10,000 and 26,000 pounds.

At the same time, the Company intends to partner with engine suppliers and body fabricators to offer fleet-specific, custom, purpose-built chassis that provide total cost of ownership solutions that are superior to the competition.

In addition to building our own chassis, we design and produce battery-electric powertrains that can be installed in new Workhorse chassis or installed as repower packages to convert used Class 3-6 medium-duty vehicles from diesel or gasoline power to electric power. Our approach is to provide battery-electric powertrains utilizes proven, automotive-grade, mass-produced parts in its architecture coupled with in-house control software that it has developed over the last five years.

The Workhorse Custom Chassis acquisition included other important assets including the Workhorse brand and logo, intellectual property, schematics, logistical support from UpTime Parts (a Navistar subsidiary).

Marketing

Our sales team is focused on the goal of securing purchase orders from commercial transportation companies. These purchases will give us additional data toward chassis demand related to electric and extended range electric vehicles.

Our priority is to establish the commercial delivery van as our core business. We intend to be the best choice for a vehicle in this segment regardless of the fuel type that the customer chooses. Our sales plan is to meet with the top potential customers and obtain purchase orders for new electric and extended range electric vehicles for their production vehicle requirements.

As the last mile delivery service space expands and non-traditional customers enter, Workhorse is reaching to those potential new customers as part of their supply chain enhancement. This market is comprised of a higher quantity of smaller delivery vehicles, such as the Workhorse N-GEN platform.

Finally, since our competitive advantage in the marketplace is our ability to provide purpose-built solutions to customers that have unique requirements at relatively low-volume, we have submitted proposals to companies for purpose-built vehicle applications.

Strategic Relationships

Panasonic: Workhorse Group has signed an agreement with the rechargeable battery division of Panasonic Industrial Devices Sales Co. of America for the supply of 18650 cylindrical Panasonic lithium-ion batteries for Workhorse's battery-electric, medium-duty trucks.

Ryder: On April 27, 2017, the Company entered into an agreement with Ryder to serve as the primary distributor, except with respect to certain exclusive accounts, in the United States, Mexico and Canada. Ryder will also serve as the sole and exclusive provider of certain repair services and the sole and exclusive distributor of certain vehicle parts in the United States, Canada and Mexico.

BMW: Workhorse has partnered with BMW where BMW provides the internal combustion engine used in the range extended vehicle applications as a source for on board battery recharging. BMW provides the engine, service support and technical advice necessary for vehicle certification. The engine currently used in production is the same engine used in the i3 passenger car.

Prefix: Michigan-based Prefix Corporation began in 1979 developing innovative design and engineering solutions for the automotive industry. Workhorse relies on Prefix's complementary capabilities in the areas of complete prototype design, build and finishing to more rapidly advance product development.

Research and Development

The majority of our research and development is conducted in-house at our facilities near Cincinnati, Ohio. Additionally, we contract with engineering firms to assist with validation and certification requirements as well as specific vehicle integration tasks.

Competitive Companies

The commercial vehicle market, specifically in the last mile delivery segment, is highly competitive and we expect it to become even more so in the future as additional companies launch competing vehicle offerings. The commercial alternative fueled vehicle market, however, is less developed and less competitive. There are two primary competitors in the medium-duty vehicle segment in the US market: Ford and Freightliner. Neither has disclosed any plans to offer 100% EVs or electric range extended vehicles (EREV) in this segment. Ford is vertically integrated building a

complete vehicle or chassis including Ford engine and transmission. They provide a chassis as a strip-chassis (which is similar to the Workhorse product) or they provide it with a cab. Freightliner provides a chassis as a strip-chassis, which is similar to the Workhorse Truck chassis.

We believe the most dramatic difference between Workhorse and the other competitors in the medium duty truck market is our ability to offer customers purpose-built solutions that meet the needs of their unique requirements at a competitive price. While there are many electric car companies from abroad, there are only a few foreign companies that have vehicles in the category of medium-duty trucks.

We believe that the primary competitive factors within the medium-duty commercial vehicle market are:

the difference in the initial purchase prices of electric vehicles and comparable vehicles powered by internal combustion engines, both including and excluding the impact of government and other subsidies and incentives designed to promote the purchase of electric vehicles;

the total cost of vehicle ownership over the vehicle's expected life, which includes the initial purchase price and ongoing operational and maintenance costs;

vehicle quality, performance and safety;

government regulations and economic incentives promoting fuel efficiency and alternate forms of energy;

the quality and availability of service for the vehicle, including the availability of replacement parts.

GOVERNMENT REGULATION

Our electric vehicles are designed to comply with a significant number of governmental regulations and industry standards, some of which are evolving as new technologies are deployed. Government regulations regarding the manufacture, sale and implementation of products and systems similar to our electric vehicles are subject to future change. We cannot predict what impact, if any, such changes may have upon our business.

Emission and fuel economy standards

Government regulation related to climate change is in effect at the U.S. federal and state levels. The U.S. Environmental Protection Agency (“EPA”) and the National Highway Traffic Safety Administration, or NHTSA, issued a final rule for greenhouse gas emissions and fuel economy requirements for trucks and heavy-duty engines on August 9, 2011, which is applicable in model years 2018 through 2020. NHTSA and EPA also issued a final rule on August 16, 2016 increasing the stringency of these standards for model years 2021 through 2027.

The rules provide emission standards for CO₂ and fuel consumption standards for three main categories of vehicles: (i) combination tractors, (ii) heavy-duty pickup trucks and vans and (iii) vocational vehicles. We believe that the Workhorse vehicles would be considered “vocational vehicles” and “heavy-duty pickup trucks and vans” under the rules. According to the EPA and NHTSA, vocational vehicles consist of a wide variety of truck and bus types, including delivery, refuse, utility, dump, cement, transit bus, shuttle bus, school bus, emergency vehicles, motor homes and tow trucks, and are characterized by a complex build process, with an incomplete chassis often built with an engine and transmission purchased from other manufacturers, then sold to a body manufacturer.

The EPA and NHTSA rule also establishes multiple flexibility and incentive programs for manufacturers of alternatively fueled vehicles, such as the Workhorse vehicles, including an engine averaging, banking and trading, or ABT, program, a vehicle ABT program and additional credit programs for early adoption of standards or deployment of advanced or innovative technologies. The ABT programs will allow for emission and/or fuel consumption credits to be averaged, banked or traded within defined groupings of the regulatory subcategories. The additional credit programs will allow manufacturers of engines and vehicles to be eligible to generate credits if they demonstrate improvements in excess of the standards established in the rule prior to the model year the standards become effective or if they introduce advanced or innovative technology engines or vehicles.

The Clean Air Act requires that we obtain a Certificate of Conformity issued by the EPA and a California Executive Order issued by CARB with respect to emissions for our vehicles. The Certificate of Conformity is required for vehicles sold in states covered by the Clean Air Act’s standards and the Executive Order is required for vehicles sold in states that have sought and received a waiver from the EPA to utilize California standards. The California standards for emissions control for certain regulated pollutants for new vehicles and engines sold in California are set by CARB.

States that have adopted the California standards as approved by EPA also recognize the Executive Order for sales of vehicles.

Manufacturers who sell vehicles in states covered by federal requirements under the Clean Air Act without a Certificate of Conformity may be subject to penalties of up to \$44,539 per violation and be required to recall and remedy any vehicles sold with emissions in excess of Clean Air Act standards. In 2013, we received approval from CARB to sell the E-100 in California based on our own emissions tests.

Vehicle safety and testing

The National Traffic and Motor Vehicle Safety Act of 1966, or the Safety Act, regulates motor vehicles and motor vehicle equipment in the United States in two primary ways. First, the Safety Act prohibits the sale in the United States of any new vehicle or equipment that does not conform to applicable motor vehicle safety standards established by NHTSA. Meeting or exceeding many safety standards is costly, in part because the standards tend to conflict with the need to reduce vehicle weight in order to meet emissions and fuel economy standards. Second, the Safety Act requires that defects related to motor vehicle safety be remedied through safety recall campaigns. A manufacturer is obligated to recall vehicles if it determines that the vehicles do not comply with a safety standard. Should we or NHTSA determine that either a safety defect or noncompliance exists with respect to any of our vehicles, the cost of such recall campaigns could be substantial.

Battery safety and testing

Our battery pack configurations are designed to conform to mandatory regulations that govern transport of “dangerous goods,” which includes lithium-ion batteries, which may present a risk in transportation. The governing regulations, which are issued by PHMSA, are based on the UN Recommendations on the Safe Transport of Dangerous Goods Model Regulations, and related UN Manual of Tests and Criteria. The requirements for shipments of these goods vary by mode of transportation, such as ocean vessel, rail, truck and air.

Our battery suppliers have completed the applicable transportation test for our prototype and production battery packs demonstrating our compliance with the UN Manual of Tests and Criteria, including:

altitude simulation, which involves simulating air transport;

thermal cycling, which involves assessing cell and battery seal integrity;

vibration, which involves simulating vibration during transport;

shock, which involves simulating possible impacts during transport;

external short circuit, which involves simulating an external short circuit; and

overcharge, which involves evaluating the ability of a rechargeable battery to withstand overcharging.

Vehicle dealer and distribution regulation

Certain states’ laws require motor vehicle manufacturers and dealers to be licensed in such states in order to conduct manufacturing and sales activities. To date, we are registered as both a motor vehicle manufacturer and dealer in Indiana and Ohio as well as a dealer in California, New York and Chicago. We have not yet sought formal clarification of our ability to manufacture or sell our vehicles in any other states.

Intellectual Property

We have two pending trademark applications and ten issued trademark registrations (US and foreign). We also intend to pursue additional foreign trademark registrations. We have two pending (one non-provisional and one provisional) U.S. patent applications, and seven existing patents, two of which are design patents. We also plan to pursue appropriate foreign patent protection on those inventions, if available. The following is a summary of our patents:

Country	Status	Serial Number	Application Date	Patent Number	Issue/Grant Date	Expiration Date	Title
United States	G	13/283,663	10/28/2011	8,541,915	9/24/2013	12/16/2031	DRIVE MODULE AND MANIFOLD FOR ELECTRIC MOTOR DRIVE ASSEMBLY
Canada	G	2523653	10/17/2005	2523653	12/22/2009	10/17/2025	VEHICLE CHASSIS ASSEMBLY

Employees

We currently have 83 full-time and 9 part-time employees located in Loveland, Ohio and 26 full-time employees located in Union City, Indiana. We also contract for hire with approximately three outside consultants and contractors.

ITEM 1A. RISK FACTORS

Our results of operations have not resulted in profitability and we may not be able to achieve profitability going forward.

We have incurred net losses amounting to \$105.3 million for the period from inception (February 20, 2007) through December 31, 2017. We have had net losses in each quarter since our inception. We expect that we will continue to incur net losses for the foreseeable future. We may incur significant losses in the future for a number of reasons, including the other risks described in this report, and we may encounter unforeseen expenses, difficulties, complications, delays and other unknown events. Accordingly, we may not be able to achieve or maintain profitability. Our management is developing plans to alleviate the negative trends and conditions described above and there is no guarantee that such plans will be successfully implemented. Our business plan is focused on providing sustainable and cost-effective solutions to the commercial transportation sector, but is still unproven. There is no assurance that even if we successfully implement our business plan, that we will be able to curtail our losses. If we incur additional significant operating losses, our stock price may decline, perhaps significantly.

We have yet to achieve positive cash flow and, given our projected funding needs, our ability to generate positive cash flow is uncertain.

We have had negative cash flow from operating activities of \$38.7 million and \$19.0 million for the years ended December 31, 2017 and 2016, respectively. We anticipate that we will continue to have negative cash flow from operating and investing activities for the foreseeable future as we expect to incur increased research and development, sales and marketing, and general and administrative expenses and make significant capital expenditures in our efforts to increase sales and ramp up operations at our Union City facility. Our business also will at times require significant amounts of working capital to support our growth, particularly as we acquire inventory to support our existing production as well as an anticipated increase in production. An inability to generate positive cash flow for the foreseeable future may adversely affect our ability to raise needed capital for our business on reasonable terms, diminish supplier or customer willingness to enter into transactions with us, and have other adverse effects that may decrease our long-term viability. There can be no assurance we will achieve positive cash flow in the foreseeable future.

We need access to additional financing in 2018 and beyond, which may not be available to us on acceptable terms or at all. If we cannot access additional financing when we need it and on acceptable terms, our business may fail.

Our business plan to design, produce, sell and service commercial electric vehicles through our Union City facility will require substantial continued capital investment. Our research and development activities will also require substantial continued investment. For the year ended December 31, 2017, our independent registered public accounting firm issued a report on our 2017 financial statements that contained an explanatory paragraph stating that the lack of sales, negative working capital and stockholders' deficit, raise substantial doubt about our ability to continue as a going concern. For example, our existing capital resources will be insufficient to fund our operations through the first half of 2018. Through December 31, 2018, we expect that we will need funding to be used in our research and development activities, inventory funding and working capital. The additional funding will allow us to continue to deliver vehicles associated with existing and expected orders, further develop our N-GEN platform resulting in a "production ready vehicle" and further develop our W-15 Pickup Truck resulting in a "production intent vehicle". Unless and until we are able to generate a sufficient amount of revenue, reduce our costs and/or enter a strategic relationship, we expect to finance future cash needs through public and/or private offerings of equity securities and/or debt financings. We do not currently have any committed future funding. If we are not able to obtain additional financing and/or substantially increase revenue from sales, we will be unable to continue as a going concern. As a result, we may have to liquidate our assets and may receive less than the value at which those assets are carried on our consolidated financial statements, and investors will likely lose a substantial part or all of their investment. We cannot be certain that additional financing will be available to us on favorable terms when required, or at all, particularly given that we do not now have a committed credit facility with any government or financial institution. Further, if there remains doubt about our ability to continue as a going concern, investors or other financing sources may be unwilling to provide additional funding on acceptable terms or at all. If we cannot obtain additional financing when we need it and on terms acceptable to us, we will not be able to continue as a going concern.

The development of our business in the near future is contingent upon the implementation of orders from UPS and other key customers for the purchase of Workhorse vehicles and if we are unable to perform under these orders, our business may fail.

On June 4, 2014, the Company entered into a Vehicle Purchase Agreement with United Parcel Service Inc. ("UPS") which outlined the relationship by which the Company would sell vehicles to UPS. To date, we have received six separate orders totaling up to 1,405 vehicles from UPS. The sixth and most recent order is from Q1 2018. We have entered into various purchase orders with UPS relating to the delivery of the vehicles ordered. There is no guarantee that the Company will be able to perform under these orders and if it does perform, that UPS will purchase additional vehicles from the Company. Also, there is no assurance that UPS will not terminate its agreement with the Company pursuant to the termination provisions therein. Further, if the Company is not able to raise the required capital to purchase required parts and pay certain vendors, the Company may not be able to comply with UPS's deadlines. Accordingly, despite the receipt of the orders from UPS, there is no assurance, due to the Company's financial constraints and status as a development stage company, that the Company will be able to deliver such vehicles or that it will receive additional orders whether from UPS or other potential customers.

If we are unable to perform under our orders with UPS, the Company business will be significantly negatively impacted.

Our limited operating history makes it difficult for us to evaluate our future business prospects and make decisions based on those estimates of our future performance.

While our revenue has increased from \$6.4 million in 2016 to \$10.8 million in 2017, a significant portion of our activities are still focused on research and development. We have a limited operating history and have generated limited, but improving, revenue. As we begin to fully implement our manufacturing capabilities, it is difficult, if not impossible, to forecast our future results based upon our historical data. Because of the uncertainties related to our lack of historical operations, we may be hindered in our ability to anticipate and timely adapt to increases or decreases in revenues or expenses. If we make poor budgetary decisions as a result of unreliable historical data, we could be less profitable or incur losses, which may result in a decline in our stock price.

We offer no financing on our vehicles. As such, our business is dependent on cash sales, which may adversely affect our growth prospects.

While most of our current customers are well-established companies with significant purchasing power, many of our potential smaller and medium-sized customers may need to rely on credit or leasing arrangements to gain access to our vehicles. Unlike some of our competitors who provide credit or leasing services for the purchase of their vehicles, we do not provide, and currently do not have commercial arrangements with a third party that provides, such financial services. We believe the current limited availability of credit or leasing solutions for our vehicles could adversely affect our revenues and market share in the commercial electric vehicle market.

Our business, prospects, financial condition and operating results will be adversely affected if we cannot reduce and adequately control the costs and expenses associated with operating our business, including our material and production costs.

We incur significant costs and expenses related to procuring the materials, components and services required to develop and produce our electric vehicles. We have secured supply agreements for our critical components including our batteries. However, these are dependent on volume to ensure that they are available at a competitive price. Thus, our current cost projections are higher than the projected revenue stream that such vehicles will produce, excluding vehicles purchased under voucher programs, such as the Hybrid and Zero-Emission Truck and Bus Voucher Incentive Project (HVIP) offered in California. As a result, we currently lose money on each medium-duty vehicle sold without an associated voucher. We continually work on cost-down initiatives to reduce our cost structure so that we may effectively compete. If we do not reduce our costs and expenses, our net losses will continue which will negatively impact our business and stock price.

Increases in costs, disruption of supply or shortage of lithium-ion cells could harm our business.

We may experience increases in the cost or a sustained interruption in the supply or shortage of lithium-ion cells. Any such increase, supply interruption or shortage could materially and negatively impact our business, prospects, financial condition and operating results. The prices for these lithium-ion cells can fluctuate depending on market conditions and global demand for these materials and could adversely affect our business and operating results. We are exposed to multiple risks relating to lithium-ion cells including:

the inability or unwillingness of current battery manufacturers to build or operate battery cell manufacturing plants to supply the numbers of lithium-ion cells we may require going forward;

disruption in the supply of cells due to quality issues or recalls by battery cell manufacturers;

an increase in the cost of raw materials used in the cells; and

fluctuations in the value of the Japanese yen against the U.S. dollar in the event our purchasers of lithium-ion cells are denominated in Japanese yen.

Our business is dependent on the continued supply of battery cells for the battery packs used in our vehicles. While we believe several sources of the battery cells are available for such battery cells, we have fully qualified only Panasonic for the supply of the cells used in such battery packs and have very limited flexibility in changing cell suppliers. Any disruption in the supply of battery cells could disrupt production of our vehicles until such time as a different supplier is fully qualified. Furthermore, fluctuations or shortages in petroleum, tariff or trade issues and other economic or tax conditions may cause us to experience significant increases in freight charges. Substantial increases in the prices for the battery cells or prices charged to us, would increase our operating costs, and could reduce our margins if we cannot recoup the increased costs through increased vehicle prices. Any attempts to increase vehicle prices in response to increased costs in our battery cells could result in cancellations of vehicle orders and therefore materially and adversely affect our brand, image, business, prospects and operating results.

The demand for commercial electric vehicles depends, in part, on the continuation of current trends resulting from dependence on fossil fuels. Extended periods of low diesel or other petroleum-based fuel prices could adversely affect demand for our vehicles, which would adversely affect our business, prospects, financial condition and operating results.

We believe that much of the present and projected demand for commercial electric vehicles results from concerns about volatility in the cost of petroleum-based fuel, the dependency of the United States on oil from unstable or hostile countries, government regulations and economic incentives promoting fuel efficiency and alternative forms of energy, as well as the belief that climate change results in part from the burning of fossil fuels. If the cost of petroleum-based fuel decreased significantly, the outlook for the long-term supply of oil to the United States improved, the government eliminated or modified its regulations or economic incentives related to fuel efficiency and alternative forms of energy, or if there is a change in the perception that the burning of fossil fuels negatively impacts the environment, the demand for commercial electric vehicles could be reduced, and our business and revenue may be harmed.

Diesel and other petroleum-based fuel prices have been extremely volatile, and we believe this continuing volatility will persist. Lower diesel or other petroleum-based fuel prices over extended periods of time may lower the perception in government and the private sector that cheaper, more readily available energy alternatives should be developed and produced. If diesel or other petroleum-based fuel prices remain at deflated levels for extended periods of time, the demand for commercial electric vehicles may decrease, which would have an adverse effect on our business, prospects, financial condition and operating results.

Our future growth is dependent upon the willingness of operators of commercial vehicle fleets to adopt electric vehicles and on our ability to produce, sell and service vehicles that meet their needs. This often depends upon the cost for an operator adopting electric vehicle technology as compared to the cost of traditional internal combustion technology. When the price of oil is low, as it recently has been, it is difficult to convince commercial fleet operations to change to more expensive electric vehicles.

Our growth is dependent upon the adoption of electric vehicles by operators of commercial vehicle fleets and on our ability to produce, sell and service vehicles that meet their needs. The entry of commercial electric vehicles into the medium-duty commercial vehicle market is a relatively new development, particularly in the United States, and is characterized by rapidly changing technologies and evolving government regulation, industry standards and customer views of the merits of using electric vehicles in their businesses. This process has been slow as without including the impact of government or other subsidies and incentives, the purchase prices for our commercial electric vehicles currently is higher than the purchase prices for diesel-fueled vehicles. Our growth has also been negatively impacted by the relatively low price of oil over the last few years.

If the market for commercial electric vehicles does not develop as we expect or develops more slowly than we expect, our business, prospects, financial condition and operating results will be adversely affected.

As part of our sales efforts, we must educate fleet managers as to the economical savings we believe they will benefit from during the life of the vehicle. As such, we believe that operators of commercial vehicle fleets should consider a number of factors when deciding whether to purchase our commercial electric vehicles (or commercial electric vehicles generally) or vehicles powered by internal combustion engines, particularly diesel-fueled or natural gas-fueled vehicles. We believe these factors include:

the difference in the initial purchase prices of commercial electric vehicles and vehicles with comparable GVWs powered by internal combustion engines, both including and excluding the impact of government and other subsidies and incentives designed to promote the purchase of electric vehicles;

the total cost of ownership of the vehicle over its expected life, which includes the initial purchase price and ongoing operating and maintenance costs;

the availability and terms of financing options for purchases of vehicles and, for commercial electric vehicles, financing options for battery systems;

the availability of tax and other governmental incentives to purchase and operate electric vehicles and future regulations requiring increased use of nonpolluting vehicles;

government regulations and economic incentives promoting fuel efficiency and alternate forms of energy;

fuel prices, including volatility in the cost of diesel;

the cost and availability of other alternatives to diesel fueled vehicles, such as vehicles powered by natural gas;

corporate sustainability initiatives;

commercial electric vehicle quality, performance and safety (particularly with respect to lithium-ion battery packs);

the quality and availability of service for the vehicle, including the availability of replacement parts;

the limited range over which commercial electric vehicles may be driven on a single battery charge;

access to charging stations and related infrastructure costs, and standardization of electric vehicle charging systems;

electric grid capacity and reliability; and

macroeconomic factors.

If, in weighing these factors, operators of commercial vehicle fleets determine that there is not a compelling business justification for purchasing commercial electric vehicles, particularly those that we produce and sell, then the market

for commercial electric vehicles may not develop as we expect or may develop more slowly than we expect, which would adversely affect our business, prospects, financial condition and operating results.

If our customers are unable to efficiently and effectively integrate our electric vehicles into their existing commercial fleets our sales may suffer and our business, prospects, financial condition and operating results may be adversely affected.

Our sales strategy involves a comprehensive plan for the pilot and roll-out of our electric vehicles, as well as the ongoing replacement of existing commercial vehicles with our electric vehicles, that is tailored to the individual needs of our customers. If we are unable to develop and execute fleet integration strategies or fleet management support services that meet our customers' unique circumstances with minimal disruption to their businesses, our customers may not realize the economic benefits they expect from our electric vehicles. If this were to occur, our customers may not order additional vehicles from us, which could adversely affect our business, prospects, financial condition and operating results.

We currently do not have long-term supply contracts with guaranteed pricing which exposes us to fluctuations in component, materials and equipment prices. Substantial increases in these prices would increase our operating costs and could adversely affect our business, prospects, financial condition and operating results.

Because we currently do not have long-term supply contracts with guaranteed pricing, we are subject to fluctuations in the prices of the raw materials, parts and components and equipment we use in the production of our vehicles. Substantial increases in the prices for such raw materials, components and equipment would increase our operating costs and could reduce our margins if we cannot recoup the increased costs through increased vehicle prices. Any attempts to increase the announced or expected prices of our vehicles in response to increased costs could be viewed negatively by our customers and could adversely affect our business, prospects, financial condition and operating results.

If we are unable to scale our operations at our Union City facility in an expedited manner from our limited low volume production to high volume production, our business, prospects, financial condition and operating results will be adversely affected.

We are currently assembling our orders at our Union City facility which has been acceptable for our historical orders. To satisfy increased demand, we will need to quickly scale operations in our Union City facility as well as scale our supply chain including access to batteries. Such a substantial and rapid increase in operations will be extremely difficult and will strain our management capabilities. Our business, prospects, financial condition and operating results could be adversely affected if we experience disruptions in our supply chain, if we cannot obtain materials of sufficient quality at reasonable prices or if we are unable to scale our Union City facility.

We depend upon key personnel and need additional personnel. The loss of key personnel or the inability to attract additional personnel may adversely affect our business and results of operations.

Our success depends on the continuing services of our CEO, Stephen Burns and top management. On May 19, 2017, Mr. Burns and the Company entered into an Executive Retention Agreement whereby Mr. Burns was retained as Chief Executive Officer in consideration of an annual salary of \$325,000. Further, the Company entered Executive Retention Agreements with Duane Hughes as President and Chief Operating Officer, Paul Gaitan as Chief Financial Officer and Julio Rodriguez as Chief Information Officer. The loss of any of these individuals could have a material and adverse effect on our business operations. Additionally, the success of our operations will largely depend upon our ability to successfully attract and maintain competent and qualified key management personnel. As with any company with limited resources, there can be no guarantee that we will be able to attract such individuals or that the presence of such individuals will necessarily translate into profitability for our company. Our inability to attract and retain key personnel may materially and adversely affect our business operations. Any failure by our management to effectively anticipate, implement, and manage the changes required to sustain our growth would have a material adverse effect on our business, financial condition, and results of operations.

We face intense competition. Some of our competitors have substantially greater financial or other resources, longer operating histories and greater name recognition than we do and could use their greater resources and/or name recognition to gain market share at our expense or could make it very difficult for us to establish market share.

Companies currently competing in the fleet logistics market offering alternative fuel medium-duty trucks include Ford Motor Company and Freightliner. Ford and Freightliner are currently selling alternative fuel fleet vehicles including hybrids. Ford and Freightliner have substantially more financial resources, established market positions, long-standing relationships with customers and dealers, and who have more significant name recognition, technical, marketing, sales, financial and other resources than we do. Although we believe that HorseFly, our unmanned aerial system (UAS), is unique in the marketplace in that it currently does not have any competitors when it comes to a UAS that works in combination with a truck, there are better financed competitors in this emerging industry, including Google and Amazon. While we are seeking to partner with existing delivery companies to improve their efficiencies in the last mile of delivery, our competitors are seeking to redefine the delivery model using drones from a central location requiring extended flight patterns. Our competitors' new aerial delivery model would essentially eliminate traditional package delivery companies. Our model is focused on coupling our delivery drone with delivery trucks supplementing the existing model and providing shorter term flight patterns. Google and Amazon have more significant financial resources, established market positions, long-standing relationships with customers, more significant name recognition and a larger scope of resources including technical, marketing and sales than we do.

The market for personal VTOL (vertical takeoff and landing) aircraft is new, rapidly evolving, characterized by rapidly changing technologies, price competition, additional competitors, evolving government regulation and industry standards, frequent new vehicle announcements and changing consumer demands and behaviors. The market is highly competitive, and the SureFly design is competing with experimental aircraft from large original equipment manufacturers, or OEMs, small OEMs, other aviation related companies, technology companies and entrepreneurs. Currently, there are several VTOL aircraft being developed that have some similarity to SureFly, including eHang and Volocopter. Many of our competitors are, in some ways, more advanced than we are.

The resources available to our competitors to develop new products and introduce them into the marketplace exceed the resources currently available to us. As a result, our competitors may be able to compete more aggressively and sustain that competition over a longer period than we can. This intense competitive environment may require us to make changes in our products, pricing, licensing, services, distribution, or marketing to develop a market position. Each of these competitors has the potential to capture significant market share in our target markets which could have an adverse effect on our position in our industry and on our business and operating results.

If we are unable to keep up with advances in electric vehicle technology, we may suffer a decline in our competitive position.

There are companies in the electric vehicle industry that have developed or are developing vehicles and technologies that compete or will compete with our vehicles. We cannot assure that our competitors will not be able to duplicate our technology or provide products and services similar to ours more efficiently. If for any reason we are unable to keep pace with changes in electric vehicle technology, particularly battery technology, our competitive position may be adversely affected. We plan to upgrade or adapt our vehicles and introduce new models to continue to provide electric vehicles that incorporate the latest technology. However, there is no assurance that our research and development efforts will keep pace with those of our competitors.

Our electric vehicles compete for market share with vehicles powered by other vehicle technologies that may prove to be more attractive than ours.

Our target market currently is serviced by manufacturers with existing customers and suppliers using proven and widely accepted fuel technologies. Additionally, our competitors are working on developing technologies that may be introduced in our target market. If any of these alternative technology vehicles can provide lower fuel costs, greater efficiencies, greater reliability or otherwise benefit from other factors resulting in an overall lower total cost of ownership, this may negatively affect the commercial success of our vehicles or make our vehicles uncompetitive or obsolete.

We currently have a limited number of customers, with whom we do not have long-term agreements, and expect that a significant portion of our future sales will be from a limited number of customers. The loss of any of these customers could materially harm our business.

A significant portion of our projected future revenue is expected to be generated from a limited number of fleet customers. Additionally, much of our business model is focused on building relationships with a few large fleet customers. Currently, we have no contracts with customers that include long-term commitments or minimum volumes that ensure future sales of vehicles. As such, a customer may take actions that negatively affect us for reasons that we cannot anticipate or control, such as reasons related to the customer's financial condition, changes in the customer's business strategy or operations or as the result of the perceived performance or cost-effectiveness of our vehicles. The loss of or a reduction in sales or anticipated sales to our most significant customers would have a material adverse effect on our business, prospects, financial condition and operating results.

Changes in the market for electric vehicles could cause our products to become obsolete or lose popularity.

The modern electric vehicle industry is in its infancy and has experienced substantial change in the last few years. To date, demand for electric vehicles has been slower than forecasted by industry experts. As a result, growth in the electric vehicle industry depends on many factors outside our control, including, but not limited to:

continued development of product technology, especially batteries;

the environmental consciousness of customers;

the ability of electric vehicles to successfully compete with vehicles powered by internal combustion; engines

limitation of widespread electricity shortages; and

whether future regulation and legislation requiring increased use of non-polluting vehicles is enacted.

We cannot assume that growth in the electric vehicle industry will continue. Our business will suffer if the electric vehicle industry does not grow or grows more slowly than it has in recent years or if we are unable to maintain the pace of industry demands.

President Trump's administration may create regulatory uncertainty for the alternative energy sector and may materially harm our business, financial condition and operating results.

President Trump's administration, may create regulatory uncertainty in the alternative energy sector. During the election campaign, President Trump made comments suggesting that he was not supportive of various clean energy programs and initiatives designed to curtail global warming. Since taking office, President Trump has released his America First Energy Plan which relies on fossil fuels, cancelled U.S. participation in the Paris Climate Agreement and signed several executive orders relating to oil pipelines. It remains unclear what specifically President Trump would or would not do with respect to these programs and initiatives, and what support he would have for any potential changes to such legislative programs and initiatives in the United States Congress, regardless of the fact that both the House of Representatives and Senate are controlled by the Republican Party. If President Trump and/or the United States Congress take action or publicly speak out about the need to eliminate or further reduce legislation, regulations and incentives supporting alternative energy or take action to further support the use of fossil fuels, such actions may result in a decrease in demand for alternative energy in the United States and may materially harm our business, financial condition and operating results.

The unavailability, reduction, elimination or adverse application of government subsidies, incentives and regulations could have an adverse effect on our business, prospects, financial condition and operating results.

We believe that, currently, the availability of government subsidies and incentives including those available in New York, California and Chicago is an important factor considered by our customers when purchasing our vehicles, and that our growth depends in part on the availability and amounts of these subsidies and incentives. Any reduction, elimination or discriminatory application of government subsidies and incentives because of budgetary challenges, policy changes, the reduced need for such subsidies and incentives due to the perceived success of electric vehicles or other reasons may result in the diminished price competitiveness of the alternative fuel vehicle industry.

Certain regulations and programs that encourage sales of electric vehicles could be eliminated or applied in a way that adversely impacts sales of our commercial electric vehicles, either currently or at any time in the future. For example, the U.S. federal government and many state governments are experiencing political change and facing fiscal crises, which could result in the elimination of programs, subsidies and incentives that encourage the purchase of electric vehicles. If government subsidies and incentives to produce and purchase electric vehicles were no longer available to us or to our customers, or the amounts of such subsidies and incentives were reduced, our business and results of operations would be adversely affected.

We may be unable to keep up with changes in electric vehicle technology and, as a result, may suffer a decline in our competitive position.

Our current products are designed for use with, and are dependent upon, existing electric vehicle technology. As technologies change, we plan to upgrade or adapt our products to continue to provide products with the latest technology. However, our products may become obsolete or our research and development efforts may not be sufficient to adapt to changes in or to create the necessary technology. Thus, our potential inability to adapt and develop the necessary technology may harm our competitive position.

The failure of certain key suppliers to provide us with components could have a severe and negative impact upon our business.

We have secured supply agreements for our critical components, including our batteries. However, the agreements are dependent on volume to ensure that they are available at a competitive price. Further, we rely on a small group of suppliers to provide us with components for our products. If these suppliers become unwilling or unable to provide components or if we are unable to meet certain volume requirements in our existing supply agreements, there are a limited number of alternative suppliers who could provide them and the price for them could be substantially higher. Changes in business conditions, wars, governmental changes, and other factors beyond our control or which we do not presently anticipate could negatively affect our ability to receive components from our suppliers. Further, it could be difficult to find replacement components if our current suppliers fail to provide the parts needed for these products. A failure by our major suppliers to provide these components could severely restrict our ability to manufacture our products and prevent us from fulfilling customer orders in a timely fashion.

Product liability or other claims could have a material adverse effect on our business.

The risk of product liability claims, product recalls, and associated adverse publicity is inherent in the manufacturing, marketing, and sale of electrical vehicles. Although we have product liability insurance for our consumer and commercial products, that insurance may be inadequate to cover all potential product claims. We also carry liability insurance on our products. Any product recall or lawsuit seeking significant monetary damages either in excess of our

coverage, or outside of our coverage, may have a material adverse effect on our business and financial condition. We may not be able to secure additional product liability insurance coverage on acceptable terms or at reasonable costs when needed. A successful product liability claim against us could require us to pay a substantial monetary award. Moreover, a product recall could generate substantial negative publicity about our products and business and inhibit or prevent commercialization of other future product candidates. We cannot provide assurance that such claims and/or recalls will not be made in the future.

We may have to devote substantial resources to implementing a retail product distribution network.

Dealers are often hesitant to provide their own financing to contribute to our product distribution network. Thus, we anticipate that we may have to provide financing or other consignment sale arrangements for dealers. A capital investment such as this presents many risks, foremost among them being that we may not realize a significant return on our investment if the network is not profitable. Our inability to collect receivables from dealers could cause us to suffer losses. Additionally, the amount of time that our management will need to devote to this project may divert them from performing other functions necessary to assure the success of our business. We recently established a non-exclusive distribution agreement with Ryder to lower this risk.

Regulatory requirements may have a negative impact upon our business.

While our vehicles are subject to substantial regulation under federal, state, and local laws, we believe that our vehicles are or will be materially in compliance with all applicable laws. However, to the extent the laws change, or if we introduce new vehicles in the future, some or all of our vehicles may not comply with applicable federal, state, or local laws. Further, certain federal, state, and local laws and industrial standards currently regulate electrical and electronics equipment. Although standards for electric vehicles are not yet generally available or accepted as industry standards, our products may become subject to federal, state, and local regulation in the future. Compliance with these regulations could be burdensome, time consuming, and expensive.

Our products are subject to environmental and safety compliance with various federal and state regulations, including regulations promulgated by the EPA, NHTSA, FAA and various state boards, and compliance certification is required for each new model year. The cost of these compliance activities and the delays and risks associated with obtaining approval can be substantial. The risks, delays, and expenses incurred in connection with such compliance could be substantial.

Our success may be dependent on protecting our intellectual property rights.

We rely on trade secret protections to protect our proprietary technology as well as several registered patents and one patent application. Our patents relate to the vehicle chassis assembly, vehicle header and drive module and manifold for electric motor drive assembly. Our existing patent applications relates to the onboard generator drive system for electric vehicles, the delivery drone, and the manned multicopter. Our success will, in part, depend on our ability to obtain additional trademarks and patents. We are working on obtaining patents and trademarks registered with the United States Patent and Trademark Office but have not finalized any as of this date. Although we have entered into confidentiality agreements with our employees and consultants, we cannot be certain that others will not gain access to these trade secrets. Others may independently develop substantially equivalent proprietary information and techniques or otherwise gain access to our trade secrets.

Our business may be adversely affected by union activities.

Although none of our employees are currently represented by a labor union, it is common throughout the automotive industry for many employees at automotive companies to belong to a union, which can result in higher employee costs and increased risk of work stoppages. Our employees may join or seek recognition to form a labor union, or we may be required to become a union signatory. Our production facility in Union City, Indiana was purchased from Navistar. Prior employees of Navistar were union members and our future work force at this facility may be inclined to vote in favor of forming a labor union. Furthermore, we are directly or indirectly dependent upon companies with unionized work forces, such as parts suppliers and trucking and freight companies, and work stoppages or strikes organized by

such unions could have a material adverse impact on our business, financial condition or operating results. If a work stoppage occurs, it could delay the manufacture and sale of our trucks and have a material adverse effect on our business, prospects, operating results or financial condition. The mere fact that our labor force could be unionized may harm our reputation in the eyes of some investors and thereby negatively affect our stock price. Consequently, the unionization of our labor force could negatively impact our company's health.

We may be exposed to liability for infringing upon the intellectual property rights of other companies.

Our success will, in part, depend on our ability to operate without infringing on the proprietary rights of others. Although we have conducted searches and are not aware of any patents and trademarks which our products or their use might infringe, we cannot be certain that infringement has not or will not occur. We could incur substantial costs, in addition to the great amount of time lost, in defending any patent or trademark infringement suits or in asserting any patent or trademark rights, in a suit with another party.

Our electric vehicles make use of lithium-ion battery cells, which, if not appropriately managed and controlled, have occasionally been observed to catch fire or vent smoke and flames. If such events occur in our electric vehicles, we could face liability for damage or injury, adverse publicity and a potential safety recall, any of which would adversely affect our business, prospects, financial condition and operating results.

The battery packs in our electric vehicles use lithium-ion cells, which have been used for years in laptop computers and cell phones. On occasion, if not appropriately managed and controlled, lithium-ion cells can rapidly release the energy they contain by venting smoke and flames in a manner that can ignite nearby materials. Highly publicized incidents of laptop computers and cell phones bursting into flames have focused consumer attention on the safety of these cells. These events also have raised questions about the suitability of these lithium-ion cells for automotive applications. There can be no assurance that a field failure of our battery packs will not occur, which would damage the vehicle or lead to personal injury or death and may subject us to lawsuits. Furthermore, there is some risk of electrocution if individuals who attempt to repair battery packs on our vehicles do not follow applicable maintenance and repair protocols. Any such damage or injury would likely lead to adverse publicity and potentially a safety recall. Any such adverse publicity could adversely affect our business, prospects, financial condition and operating results.

Our facilities could be damaged or adversely affected as a result of disasters or other unpredictable events. Any prolonged disruption in the operations of our facility would adversely affect our business, prospects, financial condition and operating results.

We engineer and perform subassembly of our electric vehicles in a facility in Loveland, Ohio and do final assembly at our facility in Union City, Indiana. Any prolonged disruption in the operations of either facility, whether due to technical, information systems, communication networks, accidents, weather conditions or other natural disaster, or otherwise, whether short or long-term, would adversely affect our business, prospects, financial condition and operating results.

We are subject to significant corporate regulation as a public company and failure to comply with all applicable regulations could subject us to liability or negatively affect our stock price.

As a publicly traded company, we are subject to a significant body of regulation, including the Sarbanes-Oxley Act of 2002. While we have developed and instituted a corporate compliance program based on what we believe are the current best practices in corporate governance and continue to update this program in response to newly implemented or changing regulatory requirements, we cannot provide assurance that we are or will be in compliance with all potentially applicable corporate regulations. In connection with management's assessment of our internal control over financial reporting as required under Section 404 of the Sarbanes-Oxley Act of 2002, we identified material weaknesses pertaining to the lack of established adequate financial reporting activities and the lack of established proper accounting and financing reporting oversight. We cannot provide assurance that, in the future, our management will not find additional material weakness in connection with its annual review of our internal control over financial reporting pursuant to Section 404 of the Sarbanes-Oxley Act. We also cannot provide assurance that we will be able to

remediate existing weaknesses and any such additional weakness identified; our failure to do so would prevent our management from concluding that our internal control over financial reporting as of the end of our fiscal year is effective. If we fail to comply with any of these regulations, we could be subject to a range of regulatory actions, fines or other sanctions or litigation. If we must disclose any material weakness in our internal control over financial reporting, our stock price could decline.

Risks Related to Owning Our Common Stock

If we fail to continue to meet the listing standards of NASDAQ, our common stock may be delisted, which could have a material adverse effect on the liquidity of our common stock.

Our common stock is currently listed on the Nasdaq Capital Market. The NASDAQ Stock Market LLC has requirements that a company must meet in order to remain listed on NASDAQ. In particular, NASDAQ rules require us to maintain a minimum bid price of \$1.00 per share of our common stock. If the closing bid price of our common stock were to fall below \$1.00 per share for 30 consecutive trading days or we do not meet other listing requirements, we would fail to be in compliance with NASDAQ's listing standards. There can be no assurance that we will continue to meet the minimum bid price requirement, or any other requirement in the future. If we fail to meet the minimum bid price requirement, The NASDAQ Stock Market LLC may initiate the delisting process with a notification letter. If we were to receive such a notification, we would be afforded a grace period of 180 calendar days to regain compliance with the minimum bid price requirement. In order to regain compliance, shares of our common stock would need to maintain a minimum closing bid price of at least \$1.00 per share for a minimum of 10 consecutive trading days. In addition, we may be unable to meet other applicable NASDAQ listing requirements, including maintaining minimum levels of stockholders' equity or market values of our common stock in which case, our common stock could be delisted. If our common stock were to be delisted, the liquidity of our common stock would be adversely affected and the market price of our common stock could decrease.

The trading of our shares of common has been relatively thin and there is no assurance that a liquid market for our shares of common stock will develop.

Our common stock has traded on the Nasdaq Capital Market, under the symbol "WKHS", since January 2016. Since that date, our common stock has been relatively thinly traded. There can be no assurance that we will be able to successfully develop a liquid market for our common shares. The stock market in general, and early stage public companies in particular, has experienced extreme price and volume fluctuations that have often been unrelated or disproportionate to the operating performance of such companies. If we are unable to develop a market for our common shares, you may not be able to sell your common shares at prices you consider to be fair or at times that are convenient for you, or at all.

Our stock price and trading volume may be volatile, which could result in substantial losses for our stockholders.

The equity trading markets may experience periods of volatility, which could result in highly variable and unpredictable pricing of equity securities. The market price of our common stock could change in ways that may or may not be related to our business, our industry or our operating performance and financial condition. In addition, the

trading volume in our common stock has been low and may fluctuate and cause significant price variations to occur. We have experienced significant volatility in the price of our stock. In addition, the stock markets in general can experience considerable price and volume fluctuations.

We have not paid dividends in the past and have no immediate plans to pay dividends.

We plan to reinvest all of our earnings, to the extent we have earnings, in order to develop our products, deliver on our orders and cover operating costs and to otherwise become and remain competitive. We do not plan to pay any cash dividends with respect to our securities in the foreseeable future. We cannot assure you that we would, at any time, generate sufficient surplus cash that would be available for distribution to the holders of our common stock as a dividend. Therefore, you should not expect to receive cash dividends on our common stock.

Shares eligible for future sale may adversely affect the market for our common stock.

Of the 41,828,474 shares of our common stock outstanding as of March 8, 2018, approximately 33.3 million shares are held by “non-affiliates” and are freely tradable without restriction pursuant to Rule 144. In addition, our Registration Statement on Form S-3 for purposes of registering the resale of 1,033,717 shares of common stock and 1,833,193 shares of common stock issuable upon exercise of stock purchase warrants has been declared effective. Any substantial sale of our common stock pursuant to Rule 144 or pursuant to any resale prospectus may have a material adverse effect on the market price of our common stock.

Shareholders may experience future dilution as a result of future equity offerings.

In order to raise additional capital, we may in the future offer additional shares of our common stock or other securities convertible into or exchangeable for our common stock at prices that may not be the same as the price per share in our prior offerings. We may sell shares or other securities in any future offering at a price per share that is lower than the price per share paid by historical investors, which would result in those newly issued shares being dilutive. In addition, investors purchasing shares or other securities in the future could have rights superior to existing stockholders, which could impair the value of existing shareholders. The price per share at which we sell additional shares of our common stock, or securities convertible or exchangeable into common stock, in future transactions may be higher or lower than the price per share paid by our historical investors.

Our charter documents and Nevada law may inhibit a takeover that stockholders consider favorable.

Provisions of our certificate of incorporation and bylaws and applicable provisions of Nevada law may delay or discourage transactions involving an actual or potential change in control or change in our management, including transactions in which stockholders might otherwise receive a premium for their shares, or transactions that our stockholders might otherwise deem to be in their best interests. The provisions in our certificate of incorporation and bylaws:

limit who may call stockholder meetings;

do not provide for cumulative voting rights; and

provide that all vacancies may be filled by the affirmative vote of a majority of directors then in office, even if less than a quorum.

There are limitations on director/officer liability.

As permitted by Nevada law, our certificate of incorporation limits the liability of our directors for monetary damages for breach of a director's fiduciary duty except for liability in certain instances. As a result of our charter provision and Nevada law, shareholders may have limited rights to recover against directors for breach of fiduciary duty. In addition, our certificate of incorporation provides that we shall indemnify our directors and officers to the fullest extent permitted by law.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

22

ITEM 2. PROPERTIES

Our principal offices are located at 100 Commerce Drive, Loveland, Ohio 45140, which include 7,500 square feet in office space and 37,500 square feet in manufacturing/development space. We pay \$11,951 in monthly mortgage and our loan is for 10 years with a balloon payment.

We are currently leasing office space at 119 Northeast Drive, Loveland, Ohio 45140. The leased office space is 5,810 square feet of office space in a 255,392 square foot building. We pay \$4,500 per month and the agreement is for 12 months, commencing July 10, 2017. After 12 months, the agreement is renewable monthly.

The following table sets forth the location, approximate size and primary use of our principal owned, leased and licensed facilities:

Location	Approximate Size (Building) in Square Feet	Primary Use	Owned, Lease or Licensed	Lease/License Expiration Date (if applicable)
Loveland, Ohio	45,000	Administration, Research and Development, Manufacturing	Owned	N/A
Union City, Indiana	250,000	Manufacturing	Owned	N/A
Loveland, Ohio	5,810	Administration	Lease	July, 2018

We believe our facilities are in good operating condition and that our facilities are adequate for all present and near term uses.

ITEM 3. LEGAL PROCEEDINGS

In May 2017, Autokinetics, Inc. (“AK”) filed a complaint against the Company in the Circuit Court for the County of Oakland, State of Michigan (File No. 2017-158748-CB). AK claims Breach of Contract and Unjust Enrichment/Quantum Meruit and is seeking damages in the amount of \$2,098,550. In June 2017, the Company filed an Answer as well as a Counterclaim against AK and J. Bruce Emmons, President of AK, for Breach of Contract,

Unjust Enrichment, Promissory Estoppel, Conversion and Statutory Conversion. The Company intends to vigorously defend against this action and pursue all available legal remedies. The Company believes it has substantial legal and factual defenses to the plaintiff's claims.

In November 2017, Jeffrey Esfeld filed a complaint against the Company in the Superior Court of the State of Washington, County of King seeking unpaid wages and commissions. The case has been removed to the Federal District Court for the Western District of Washington (File No. 17-2-29157-9 SEA). The Company intends to vigorously defend against this action and pursue all available legal remedies. The Company believes it has substantial legal and factual defenses to the plaintiff's claims.

ITEM 4. MINE SAFETY DISCLOSURES

None.

PART II**ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES****Market Information**

On January 4, 2016 the Company was approved by Nasdaq Capital Market and our common stock is now quoted on Nasdaq under the symbol "WKHS". Our common stock was previously quoted on the OTCQB under the symbol "TTSO" from July 14, 2009 through May 24, 2010 and then under the symbol "AMPD" from May 24, 2010 to April 16, 2015 when the Company was renamed Workhorse Group Inc. The following table sets forth the range of high and low prices per share of our common stock for each period indicated.

Quarter Ended		2017	2016	2015
March 31	High	\$7.29	\$10.73	\$1.40
	Low	\$1.90	\$4.43	\$1.09
June 30	High	\$4.89	\$11.41	\$3.90
	Low	\$1.90	\$6.40	\$1.90
September 30	High	\$3.82	\$9.34	\$6.10
	Low	\$2.60	\$5.79	\$1.75
December 31	High	\$3.24	\$8.52	\$9.35
	Low	\$2.43	\$6.37	\$3.40

On December 9, 2015, the Company filed a Certificate of Change with the State of Nevada to effect a reverse stock split of its outstanding and authorized shares of common stock at a ratio of 1 for 10 (the "Reverse Stock Split"). Fractional shares that resulted from the Reverse Stock Split were rounded up to the next highest number. The Reverse Stock Split was approved by the Board of Directors of the Company. The effective date of the Reverse Stock Split was December 11, 2015. At the effective time, every ten shares of common stock issued and outstanding were automatically combined into one share of issued and outstanding common stock, without any change in the par value. In addition, the authorized shares of common stock were reduced from 500,000,000 to 50,000,000. The above market prices reflect such Reverse Stock Split. On August 7, 2017, the shareholders of the Company voted to increase the authorized shares of common stock to 100,000,000 and the Certificate of Amendment amending the Articles of Incorporation was filed with the State of Nevada on August 8, 2017.

Holder of our Common Stock

As of March 8, 2018, there were approximately 327 stockholders of record of our common stock. This number does not include shares held by brokerage clearing houses, depositories or others in unregistered form. The stock transfer agent for our securities is Empire Stock Transfer, Inc., 1859 Whitney Mesa Drive, Henderson, Nevada 89014.

Dividends

The Company has never declared or paid any cash dividends on its common stock. The Company currently intends to retain future earnings, if any, to finance the expansion of its business. As a result, the Company does not anticipate paying any cash dividends in the foreseeable future.

Stock Performance Graph

This performance graph shall not be deemed “filed” for purposes of Section 18 of the Securities Exchange Act of 1934, as amended (the Exchange Act), or incorporated by reference into any filing of Workhorse under the Securities Act of 1933, as amended, or the Exchange Act, except as shall be expressly set forth by specific reference in such filing.

The following graph shows a comparison from January 1, 2012 through December 31, 2017, of the cumulative total return for our common stock, the NASDAQ Composite Index, and a group of peer group companies similarly situated. Such returns are based on historical results and are not intended to suggest future performance. Data for The NASDAQ Composite Index and the peer group assumes an investment of \$100 on January 1, 2011 and reinvestment of dividends. We have never declared or paid cash dividends on our capital stock nor do we anticipate paying any such cash dividends in the foreseeable future.

Securities Authorized for Issuance Under Equity Compensation Plans

The following table sets forth the aggregate information of our equity compensation plans in effect as of December 31, 2017:

Plan	Number of Securities to be Issued upon Exercise of Outstanding Options and Rights	Weighted Average Exercise Price of Outstanding Options and Rights	Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans (excluding securities reflected in first column)
Equity Compensation Plans approved by security holders - 2010 Stock Incentive Plan	158,200	\$ 4.20	-
Equity Compensation Plans approved by security holders - 2011 Stock Incentive Plan	22,500	\$ 7.00	-
Equity Compensation Plans approved by security holders - 2012	2,175,357	\$ 7.70	-

Stock Incentive Plan

Equity Compensation Plans approved by security holders - 2013 Stock Incentive Plan	500,000	\$ 2.81	-
Equity Compensation Plans approved by security holders - 2014 Stock Incentive Plan	3,700,000	\$ 2.50	-
Equity Compensation Plans approved by security holders - 2016 Stock Incentive Plan	500,000	\$ 6.37	0
Equity Compensation Plans approved by security holders - 2017 Stock Incentive Plan	5,000,000	\$ 5.01	3,562,971
	12,056,057		3,562,971

Unregistered Sales of Equity Securities

On January 10, 2017, the Company entered into a Securities Purchase Agreement with Joseph T. Lukens (“Lukens”) providing for the sale by the Company to Lukens of a 6% Convertible Debenture in the aggregate amount of \$2,000,000 (the “Lukens Debenture”) in consideration of \$2,000,000. The financing closed on January 10, 2017. On January 27, 2017, the Company and Lukens entered into a Conversion Agreement pursuant to which Lukens agreed to convert his outstanding 6% Convertible Debenture in the principal amount of \$2,000,000 plus interest into shares of common stock of the Company at the offering price of the Company’s public offering.

During the year ending December 31, 2017, no warrants were exercised.

During the year ended December 31, 2017, employees and members of the Board of Directors exercised options into 964,525 shares of common stock of the Company. During the year ended December 31, 2017, the Company granted options to acquire 1,900,000 shares of common stock to employees and members of the Board of Directors.

In November 2017, Prefix Corporation converted an existing Accounts Payable Liability of \$1,034,539 into 272,247 shares of Common Stock at a price per share of \$3.80. In addition, the Company issued Prefix Corporation 130,000 shares of common stock valued at \$3.80 per share for modeling and mule services as well as consulting services associated with USPS support, component sourcing and integration services needed for the chassis sub-assembly contractor.

The offers, sales, and issuances of the securities described above were deemed to be exempt from registration under the Securities Act in reliance on Section 4(a)(2) of the Securities Act or Regulation D promulgated thereunder as transactions by an issuer not involving a public offering. The recipients of securities in each of these transactions acquired the securities for investment only and not with a view to or for sale in connection with any distribution thereof and appropriate legends were affixed to the securities issued in these transactions. Each of the recipients of securities in these transactions was an accredited or sophisticated person and had adequate access, through employment, business or other relationships, to information about us.

ITEM 6. SELECTED FINANCIAL DATA

YEARS ENDED DECEMBER 31, OPERATING SUMMARY	2017	2016	2015
Sales	\$10,846,460	\$6,414,800	\$139,980
Net loss	\$(42,239,231)	\$(19,555,868)	\$(9,426,853)

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis should be read in conjunction with our consolidated financial statements and the related notes that appear elsewhere in this Annual Report on Form 10-K

Overview and 2017 Highlights

We are a technology company focused on providing sustainable and cost-effective solutions to the commercial transportation sector. As an American manufacturer, we design and build high performance battery-electric vehicles and aircraft that make movement of people and goods more efficient and less harmful to the environment. As part of our solution, we also develop cloud-based, real-time telematics performance monitoring systems that enable fleet operators to optimize energy and route efficiency. Although we operate as a single unit through our subsidiaries, we approach our development through two divisions, Automotive and Aviation. Our core products, under development and/or in manufacture, are the last mile step and cargo vans, the W-15 pickup truck, the delivery drone and the manned multicopter, SureFly.

Workhorse electric delivery vans are currently in production and are in use by our customers on U.S. roads. Our delivery customers include companies such as UPS, FedEx Express, Alpha Baking and WB Mason. Data from our in-house developed telematics system demonstrates our vehicles on the road are averaging approximately a 500% increase in fuel economy as compared to conventional gasoline-based trucks of the same size and duty cycle.

In addition to improved fuel economy, we anticipate that the performance of our vehicles on-route will reduce long-term vehicle maintenance expense by approximately 50% as compared to fossil-fueled trucks.

In March of 2013, we purchased the former Workhorse Custom Chassis assembly plant in Union City, Indiana from Navistar International (NAV: NYSE). With this acquisition, we acquired the capability to be an Original Equipment Manufacturer (OEM) of Class 3-6 commercial-grade, medium-duty truck chassis, to be marketed under the Workhorse® brand. All Workhorse last mile delivery vans are assembled in the Union City assembly facility.

From our development modeling and the existing performance of our electric vehicles on American roads, we estimate that our E-GEN Range-Extended Electric delivery vans will save over \$150,000 in fuel and maintenance savings over the 20-year life of the vehicle. Due to the positive return-on-investment, we place a premium price for our vehicles when selling to major fleet buyers. We expect that fleet buyers will be able to achieve a four-year or better return-on-investment (without government incentives), which we believe justifies the higher acquisition cost of

our vehicles.

We believe that we are the only medium-duty battery-electric OEM in the U.S. and we will be introducing additional light-duty electric and range-extended electric vehicles in late 2018 and 2019.

Our goal is to continue to increase sales and production, while executing on our cost-down strategy to a point that will enable us to achieve gross margin profitability of the last mile-delivery van platform. As a key strategy, we have begun development of the Workhorse N-GEN platform, which has been accelerated from our development efforts on the USPS NGDV program.

The Workhorse N-GEN electric cargo van platform will be available in multiple size configurations, 500, 700 and 1,000 cubic feet. We intend to initiate the launch with the 500 cubic foot configuration where it is designed to compete with the Sprinter, Transit and RAM gasoline/diesel trucks in the commercial sector with an emphasis on last-mile delivery and other service-oriented businesses, such as telecom. This ultra-low floor platform incorporates state-of-the-art safety features, economy and performance: we expect these vehicles to achieve a fuel economy of approximately 60 MPGe, and offer fleet operators the most favorable total cost-of-ownership of any comparable vehicle available today. We believe we are the first American OEM to market a U.S. built electric cargo van, and early indications of fleet interest are significant. We expect the N-GEN trucks will be supported by our Ryder Systems partnership.

As a direct result of the USPS award and development efforts, Workhorse has begun development on the Workhorse W-15, a medium- and light-duty pickup truck platform aimed at commercial fleets. The W-15 pickup truck powertrain is a smaller version of its sister vehicle, the medium-duty battery electric powertrain, and will have two purpose-built variants, a W-15 work truck (pickup) and an N-GEN cargo van. Either of these two variants will appeal to delivery fleets, utility companies, telecom companies, municipalities and more.

Our HorseFly Delivery Drone is a custom designed, purpose-built drone that is fully integrated in our electric trucks. HorseFly is an octocopter designed with a maximum gross weight of 30 lbs., a 10 lb. payload and a maximum air speed of 50 mph. It is designed and built to be rugged and consisting of redundant systems to further meet the FAA's required rules and regulations.

SureFly is our entry into the emerging VTOL market. It is designed to be a two-person, 400-pound payload aircraft with a hybrid internal combustion/electric power generation system. Our approach in the design is to build the safest and simplest way to fly rotary wing aircraft in the world. We believe it is a practical answer to personal flight, as well as, commercial transportation segments, including air taxi series, agriculture and beyond.

The FAA to-date has granted three separate Workhorse Inc. Aerospace team an Experimental Airworthiness Certifications, registered as N834LW, for the aircraft. These certifications come after an extensive design review and inspection of the aircraft with each renewed certificate.

We continue to leverage our knowledge of high-voltage battery packs, electric motor controls, software and range extending generators to design a multicopter that can carry a pilot and passenger.

Results of Operations

Our condensed consolidated statement of operations data for the period presented follows:

	Years Ended December 31,	
	2017	2016
Sales	\$ 10,846,460	6,414,800
Cost of Sales	24,516,863	13,578,262
Gross loss	(13,670,403)	(7,163,462)
Operating Expenses		
Selling, general and administrative	10,328,211	6,202,569
Research and development	18,060,180	6,145,801
Total operating expenses	28,388,391	12,348,370
Interest expense, net	180,437	44,036
Net loss	\$(42,239,231)	\$(19,555,868)
Basic and diluted loss per share	\$(1.09)	\$(0.78)
Weighted average number of common shares outstanding	38,755,796	25,201,261

Revenue

Sales for the years ended December 31, 2017 and 2016 were \$10.8 million and \$6.4 million, respectively, were related to delivery of the production vehicles for UPS and other customers.

Selling, General and Administrative Expenses

Selling, general and administrative (“SG&A”) expenses consist primarily of personnel and facilities costs related to our development including, marketing, sales, executive, finance, human resources, information technology and professional, legal and contract services.

SG&A expenses during year ended December 31, 2017 were \$10.3 million, an increase from \$6.2 million for the year ended December 31, 2016. The increase in our SG&A expenses consisted primarily of employee salaries and benefits, consulting and investor relations, due to the increased activity in the period.

Research and Development Expenses

Research and development (“R&D”) expenses consist primarily of personnel costs for our teams in engineering and research, prototyping expense, and contract and professional services.

R&D expenses during the year ended December 31, 2017 were \$18.1 million, an increase from \$6.1 million for the year ended December 31, 2016. The R&D expenses consisted primarily in employee salaries and benefits, consulting and materials related to the start of the Next Generation Delivery Vehicles (NGDVs), and Pick-up truck projects and the manned Multicopter.

Interest Expenses

Our interest expense is incurred primarily from our mortgage on the 100 Commerce Drive, Loveland, Ohio property mentioned before in the Long-Term Debt note to the financial statements.

Interest expenses during the year ended December 31, 2017 were \$180 thousand, an increase from \$44 thousand for year ended December 31, 2016.

Liquidity and Capital Resources

Cash Requirements

From inception, we have financed our operations primarily through sales of equity securities. We have utilized this capital to date in our research and development of five truck-based platforms (i.e., E-GEN, E-100, W-15 Pickup Truck, USPS Prototype and N-GEN) and two aviation platforms (HorseFly and SureFly) designing building and delivering our vehicles to our customer base and for working capital purposes.

As of December 31, 2017, we had approximately \$4.1 million in cash, cash equivalents and short-term investments, as compared to approximately \$0.5 million as of December 31, 2016, an increase of \$3.6 million. The change was primarily attributable to increased financing activity. On January 10, 2017, the Company entered into a Securities Purchase Agreement with Joseph T. Lukens (“Lukens”) providing for the sale by the Company to Lukens of a 6% Convertible Debenture in the aggregate amount of \$2,000,000 (the “Lukens Debenture”) in consideration of \$2,000,000. The financing closed on January 10, 2017. On January 27, 2017, the Company and Lukens entered into a Conversion Agreement pursuant to which Lukens agreed to convert his outstanding 6% Convertible Debenture in the principal amount of \$2,000,000 plus interest into shares of common stock of the Company at the offering price of the Company’s public offering. In February 2017, the Company completed an underwritten public offering of 6,500,000 shares of its common stock at a public offering price of \$3.00 per share. In addition, the underwriters have exercised an option to purchase an additional 975,000 shares of common stock at the public offering price, less the underwriting discounts and commissions. The net proceeds were \$20.5 million. On June 22, 2017, the Company entered into an at the market issuance sales agreement with Cowen and Company, LLC under which the Company may offer and sell, from time to time at its sole discretion, shares of its common stock having an aggregate offering price of up to \$25,000,000 through Cowen as its sales agent. The net proceeds from the activity in 2017 under the sale agreement was \$3.5 million. On December 26, 2017, as part of its initial efforts to spin-off SureFly, the Company entered into a Securities Purchase Agreement with several existing institutional investors pursuant to which the company issued original issue discount Senior Secured Notes in the aggregate principal amount of \$5,750,000 in consideration of gross proceeds of \$5,000,000 paid by the Spin-Off Investors.

We believe that our existing capital resources and access to capital through our sales agreement with Cowen will be sufficient to support our current and projected funding requirements, into the second quarter of 2018. We have based this estimate on assumptions that may prove to be wrong, and we could utilize our available capital resources sooner than we currently expect. Because of the numerous risks and uncertainties associated with the development of our business and research and development activities, including risks and uncertainties that could impact the rate of progress of our development activities, we are unable to estimate with certainty the amounts of increased capital outlays and operating expenditures.

Through December 31, 2018, we expect that we will need funding to be used in our research and development activities, inventory funding and working capital. The additional funding will allow us to continue to deliver vehicles associated with existing and expected orders, further develop our N-GEN platform resulting in a “production ready vehicle” and further develop our W-15 Pickup Truck resulting in a “production intent vehicle”. Unless and until we are able to generate a sufficient amount of revenue, reduce our costs and/or enter a strategic relationship, we expect to finance future cash needs through public and/or private offerings of equity securities and/or debt financings. We do not currently have any committed future funding. To the extent we raise additional capital by issuing equity securities, our stockholders could at that time experience substantial dilution. Any debt financing that we are able to obtain may involve operating covenants that restrict our business.

Our future funding requirements will depend upon many factors, including, but not limited to:

- our ability to acquire or license other technologies or compounds that we may seek to pursue;

our ability to manage our growth;
 competing technological and market developments;
 the costs and timing of obtaining, enforcing and defending our patent and other intellectual property rights; and
 expenses associated with any unforeseen litigation.

Insufficient funds may require us to delay, scale back or eliminate some or all of our research or development programs, limit our sales activities, limit or cease production or negatively impact our operations.

For the years ended December 31, 2017 and 2016, we maintained an investment portfolio primarily in money market funds, U. S. treasury bills, government-sponsored enterprise securities, and corporate bonds and commercial paper. Cash in excess of immediate requirements is invested with regard to liquidity and capital preservation. Wherever possible, we seek to minimize the potential effects of concentration and degrees of risk. We will continue to monitor the impact of the changes in the conditions of the credit and financial markets to our investment portfolio and assess if future changes in our investment strategy are necessary.

Summary of Cash Flows

	2017	2016
Net cash used in operating activities	\$(38,662,541)	\$(19,034,163)
Net cash used in investing activities	\$(143,355)	\$(528,095)
Net cash provided by financing activities	\$42,405,803	\$12,354,665

Cash Flows from Operating Activities

Our cash flows from operating activities are affected by our cash investments to support the business in research and development, manufacturing, selling, general and administration. Our operating cash flows are also affected by our working capital needs to support fluctuations in inventory, personnel expenses, accounts payable and other current assets and liabilities.

During the year ended December 31, 2017 and 2016, cash used in operating activities was \$38.7 million and \$19.0 million, respectively. The decrease in operating cash flows in 2017 as compared to 2016 was mainly due to an increase in net losses.

Cash Flows from Investing Activities

Cash flow from investing activities primarily relates to capital expenditures to support our future growth in operations.

During the years ended December 31, 2017 and 2016, cash used by investing activities was \$143 thousand and \$528 thousand, respectively. The decrease in cash used by investing activities during the year is mainly due to reduced capital spending.

Cash Flows from Financing Activities

During the years ended December 31, 2017 and 2016, net cash provided by financing activities was \$42.4 million and \$12.4 million, respectively. Cash flows from financing activities during the year ended December 31, 2017 consisted mainly of \$37.0 million of proceeds from the issuance of common stock and \$4.8 million of senior secured notes as part of the initial efforts to spin-off SureFly.

Credit Facility

Presently we have no revolving Credit Facility established. There is no guarantee that we will be able to enter into an agreement to establish a line of credit or that if we do enter into such agreement that it will be on favorable terms.

Off-Balance Sheet Arrangements

The Company does not have any off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on the Company's financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that are material to investors.

Federal Tax Credit Qualification by the IRS

The Company has been qualified by the IRS for a vehicle federal tax credit of up to \$7,500. The Company joins a list of plug-in electric drive motor vehicle manufacturers, including Ford Motor Company, General Motors Corporation, Tesla, Toyota, and 13 EV manufacturers in all, qualifying purchasers for up to a \$7,500 tax credit when purchasing an electric vehicle.

Additionally, many states offer additional sales tax exemptions and zero emission tax credits of up to \$5,000 that can also be applied to the purchase.

California Air Resources Board Approval

On February 20, 2013 the California Air Resource Board (CARB) approved the Company's E-100 all-electric commercial truck for sale in the state of California. Most other states use this approval for sale of vehicles in their state.

Critical Accounting Policies and Estimates

The following accounting principles and practices of the Company are set forth to facilitate the understanding of data presented in the consolidated financial statements:

Nature of operations

We are a technology company focused on providing sustainable and cost-effective solutions to the commercial transportation sector. As an American manufacturer we design and build high performance battery-electric electric vehicles and aircraft that make movement of people and goods more efficient and less harmful to the environment. As part of our solution, we also develop cloud-based, real-time telematics performance monitoring systems that enable fleet operators to optimize energy and route efficiency. Although we operate as a single unit through our subsidiaries, we approach our development through two divisions, Automotive and Aviation. Our core products, under development and/or in manufacture, are the medium duty step van, the light duty pickup, the delivery drone and the manned multicopter.

Use of estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

Property and depreciation

Property and equipment is recorded at cost. Depreciation is provided on the straight-line and accelerated methods over the estimated useful lives of the respective assets.

Income taxes

Edgar Filing: Workhorse Group Inc. - Form 10-K

As no taxable income has occurred from the date of this merger to December 31, 2017 cumulative deferred tax assets of approximately \$19.6 million are fully reserved, and no provision or liability for federal or state income taxes has been included in the financial statements. Carryover amounts are:

Approximate net operating loss (\$ millions)	Carryover to be used against taxable income generated through year
3.6	2030
6.7	2031
3.9	2032
4.7	2033
6.1	2034
9.0	2035
18.7	2036
40.8	2037

Research and development costs

Research and development costs are expensed as they are incurred. Research and development expense incurred was approximately \$18.1 million and \$6.1 million for the years ended December 31, 2017 and 2016, respectively, consisting of consulting, payroll and payroll taxes, engineering, purchased supplies, legal fees, parts and small tools.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The primary objective of our investment activities is to preserve principal while at the same time maximizing the income we receive from our investments without significantly increasing risk. Some of the securities in which we invest may have market risk. This means that a change in prevailing interest rates may cause the fair value amount of the investment to fluctuate. For example, if we hold a security that was issued with a fixed interest rate at the then-prevailing rate and the prevailing interest rate later rises, the market value amount of our investment will decline. To minimize this risk, we maintain our portfolio of cash equivalents and short-term investments in a variety of securities, including money market funds and government and non-government debt securities and the maturities of each of these instruments is less than one year. In 2017, we maintained an investment portfolio primarily in money market funds, U. S. treasury bills, government-sponsored enterprise securities, and corporate bonds and commercial paper. Due to the primarily short-term nature and low interest rate yields of these investments, we believe we do not have a material exposure to interest rate risk and market risk arising from our investments. Therefore, no quantitative tabular disclosure is provided.

We have operated primarily in the United States. Accordingly, we have not had any significant exposure to foreign currency rate fluctuations.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and
Stockholders of Workhorse Group, Inc.

Adverse Opinion on Internal Control over Financial Reporting

We have audited Workhorse Group, Inc.'s (the Company's) internal control over financial reporting as of December 31, 2017, based on criteria established in *Internal Control—Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). In our opinion, because of the effect of the material weaknesses described in the following paragraph on the achievement of the objectives of the control criteria, the Company has not maintained effective internal control over financial reporting as of December 31, 2017, based on criteria established in *Internal Control—Integrated Framework (2013)* issued by COSO.

A material weakness is a control deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the Company's annual or interim financial statements will not be prevented or detected on a timely basis. The following material weaknesses have been identified and included in management's assessment:

The Company has not established adequate financial reporting monitoring activities to mitigate the risk of accounting errors.

The lack of a fully implemented automated financial reporting system caused over reliance on manual entries.

These material weaknesses were considered in determining the nature, timing, and extent of audit tests applied in our audit of the 2017 financial statements, and this report does not affect our report dated March 14, 2018, on those financial statements.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated balance sheets and the related consolidated statements of operations, stockholders' equity (deficit), and cash flows of the Company, and our report dated March 14, 2018, expressed an unqualified opinion, with an emphasis of a matter paragraph due to substantial doubt about the Company's ability to continue as a going concern.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

F-2

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and
Stockholders of Workhorse Group, Inc.

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of Workhorse Group, Inc. (the Company) as of December 31, 2017 and 2016, and the related consolidated statements of operations, stockholders' equity (deficit), and cash flows for each of the years in the two-year period ended December 31, 2017, and the related notes (collectively referred to as the financial statements). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2017 and 2016, and the results of its operations and its cash flows for each of the years in the two-year period ended December 31, 2017, in conformity with accounting principles generally accepted in the United States of America.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of December 31, 2017, based on criteria established in *Internal Control-Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated March 14, 2018, expressed an adverse opinion.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material

misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

The accompanying consolidated financial statements have been prepared assuming the Company will continue as a going concern. As described in Note 1 to the consolidated financial statements, the Company has not had positive cash flows from operations and has incurred significant net losses which have caused a significant accumulated deficit. These conditions raise substantial doubt about its ability to continue as a going concern. Management's plans regarding those matters are also described in Note 1. The consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty. Our opinion is not modified with respect to that matter.

We have served as the Company's auditor since 2007.

During the year ended December 31, 2017, a vendor converted an existing accounts payable liability of \$1,034,539 into common stock. In addition, the company issued \$494,000 in common stock in exchange for future services with modeling and mule services as well as future consulting services.

During the year ended December 31, 2017, converted \$256,504 of shareholder advances into common stock.

See accompanying notes to the consolidated financial statements.

F-7

Workhorse Group, Inc.

Notes to Consolidated Financial Statements

1. SUMMARY OF SIGNIFICANT ACCOUNTING PRINCIPLES

The following accounting principles and practices are set forth to facilitate the understanding of data presented in the financial statements:

Nature of operations and principles of consolidation

Workhorse Group Inc. (Workhorse, the Company, we, us or our) is a technology company focused on providing sustainable and cost-effective solutions to the commercial transportation sector. As an American manufacturer we design and build high performance battery-electric electric vehicles and aircraft that make movement of people and goods more efficient and less harmful to the environment. As part of the Company's solution, it also develops cloud-based, real-time telematics performance monitoring systems that enable fleet operators to optimize energy and route efficiency. Although the Company operates as a single unit through its subsidiaries, it approaches its development through two divisions, Automotive and Aviation. The Company's core products, under development and/or in manufacture, are the medium duty step van, the light duty pickup, the delivery drone and the manned multicopter.

Workhorse, formerly known as Title Starts Online, Inc. and AMP Holding Inc., was incorporated in the State of Nevada in 2007 with \$3,100 of capital from the issuance of common shares to the founding shareholder. On August 11, 2008 the Company received a Notice of Effectiveness from the U.S. Securities and Exchange Commission, and on September 18, 2008, the Company closed a public offering in which it accepted subscriptions for an aggregate of 200,000 shares of its common stock, raising \$50,000 less offering costs of \$46,234. With this limited capital the Company did not commence operations and remained a "shell company" (as defined in Rule 12b-2 under the Securities Exchange Act of 1934, as amended).

On December 28, 2009, the Company entered into and closed a Share Exchange Agreement with the Shareholders of Advanced Mechanical Products, Inc. (n/k/a AMP Electric Vehicles, Inc.) (AMP) pursuant to which the Company acquired 100% of the outstanding securities of AMP in exchange for 14,890,904 shares of the Company's common stock. Considering that, following the merger, the AMP Shareholders control the majority of the outstanding voting common stock of the Company, and effectively succeeded the Company's otherwise minimal operations to those that are AMP. AMP is considered the accounting acquirer in this reverse-merger transaction. A reverse-merger transaction is considered and accounted for as a capital transaction in substance; it is equivalent to the issuance of

AMP securities for net monetary assets of the Company, which are de minimus, accompanied by a recapitalization. Accordingly, goodwill or other intangible assets have not been recognized in connection with this reverse merger transaction. AMP is the surviving entity and the historical financials following the reverse merger transaction will be those of AMP. The Company was a shell company immediately prior to the acquisition of AMP pursuant to the terms of the Share Exchange Agreement. As a result of such acquisition, the Company operations are now focused on the design, marketing and sale of vehicles with an all-electric powertrain and battery systems. Consequently, we believe that acquisition has caused the Company to cease to be a shell company as it now has operations. The Company formally changed its name to AMP Holding Inc. on May 24, 2010.

Since the acquisition, the Company has devoted the majority of its resources to the development of an all-electric drive system capable of moving heavy large vehicles ranging from full size SUV's up to and including Medium Duty Commercial trucks. Additionally, in February 2013, the Company formed a new wholly owned subsidiary, AMP Trucks Inc., an Indiana corporation. On March 13, 2013 AMP Trucks Inc. closed on the acquisition of an asset purchase of Workhorse Custom Chassis, LLC. The assets included in this transaction included: the Workhorse brand, access to the dealer network of 440 dealers nationwide, intellectual property, and all physical assets which included the approximately 250,000 sq. ft. of facilities on 47 acres of land in Union City, Indiana. This acquisition allows the Company to position itself as a medium duty OEM capable of producing new chassis with electric, propane, compressed natural gas, and hybrid configurations, as well as gasoline drive systems.

On April 16, 2015 the Company filed Articles of Merger with the Secretary of State of the State of Nevada to change the name from "AMP Holding Inc." to "Workhorse Group Inc.". The Company believed that this change will allow investors, customers and suppliers to better associate the Company with the Workhorse brand, which is well known in the market.

The consolidated financial statements include Workhorse Group Inc. and its wholly owned subsidiaries, together referred as "The Company". Intercompany transactions and balances are eliminated in consolidation.

The Company's wholly owned subsidiaries include Workhorse Technologies Inc., Workhorse Motor Works Inc, Workhorse Properties Inc., and Surefly, Inc. which held no assets or liabilities at year end December 31, 2017.

Basis of presentation

The consolidated financial statements have been prepared on a going concern basis, which contemplates the realization of assets and liquidation of liabilities in the normal course of business. However, the Company has limited revenues and has negative working capital and stockholders' deficits. These conditions raise substantial doubt about the ability of the Company to continue as a going concern.

In view of these matters, continuation as a going concern is dependent upon the continued operations of the Company, which, in turn, is dependent upon the Company's ability to meet its financial requirements, raise additional capital, and successfully carry out its future operations. The financial statements do not include any adjustments to the amount and classification of assets and liabilities that may be necessary, should the Company not continue as a going concern.

The Company has continued to raise capital. Management believes the proceeds from these offerings, future offerings, and the Company's anticipated revenue, provides an opportunity to continue as a going concern. If additional funding is required, the Company plans to obtain working capital from either debt or equity financing from the sale of common, preferred stock, and/or convertible debentures. Obtaining such working capital is not assured. The Company is currently in a production ramp up mode and placing greater emphasis on manufacturing capability.

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from these estimates.

Certain reclassifications were made to the prior year financial statements to conform to the current year presentation. These reclassifications had no effect on previously reported results of operation or stockholders' deficit.

Financial instruments

The carrying amounts of financial instruments including cash, inventory, accounts payable and short-term debt approximate fair value because of the relatively short maturity of these instruments.

Accounts receivable

Accounts receivable consist of collectible amounts for products and services rendered. The Company carries its accounts receivable at invoice amount less an allowance for doubtful accounts. On a periodic basis, the Company evaluates its accounts receivable and establishes an allowance for doubtful accounts based on a history of past write-offs and collections and current credit conditions. The Company generally does not require collateral for accounts receivable. During 2017 and 2016, sales to one customer approximated 98% and 91% of net sales, respectively.

Lease Receivable

The Company's leasing activities consist of the leasing of trucks which are classified as direct financing leases. Revenue is recognized at the inception of the lease. The leases have a term of eight years. Future payments to be received on the leases are as follows:

2018	\$45,300
2019	36,240
2020	36,240
2021	36,240
2022	36,240
Thereafter	67,044
	\$257,304

Inventory

Inventory is stated at the lower of cost or market. Manufactured inventories are valued at standard cost, and consist of raw materials, work in process and finished goods.

Property, plant and equipment, net

Property, plant and equipment, net is stated at cost less accumulated depreciation. Major renewals and improvements are capitalized while replacements, maintenance and repairs, which do not improve or extend the lives of the respective assets, are expensed. When property, plant and equipment is retired or otherwise disposed of, a gain or loss is realized for the difference between the net book value of the asset and the proceeds realized thereon. Depreciation is calculated using the straight-line method, based upon the following estimated useful lives:

Edgar Filing: Workhorse Group Inc. - Form 10-K

Buildings:	15 - 30 years
Leasehold improvements:	7 years
Software:	3 - 6 years
Equipment:	5 years
Vehicles and prototypes:	3 - 5 years

F-9

Common stock

On April 22, 2010, the directors of the Company approved a forward stock split of the common stock of the Company on a 14:1 basis. On May 12, 2010, the stockholders of the Company voted to approve the amendment of the certificate of incorporation resulting in a decrease of the number of shares of common stock. Management filed the certificate of amendment decreasing the authorized shares of common stock with the State of Nevada on September 8, 2010. On February 11, 2015, the Company filed a certificate of amendment to its articles of incorporation to increase the authorized shares of common stock to 50,000,000.

On December 9, 2015, the Company filed a Certificate of Amendment to its Certificate of Incorporation to implement a one-for-ten reverse split of the Corporation's issued and outstanding common stock (the "Reverse Stock Split"), as authorized by the stockholders of the Company. The Reverse Stock Split became effective at the open of trading on December 11, 2015 (the "Effective Date"). As of the Effective Date, every ten shares of issued and outstanding common stock were combined into one newly issued share of common stock. No fractional shares were issued in connection with the Reverse Stock Split. Total cash payments made by the Company to stockholders in lieu of fractional shares was not material.

On August 7, 2017, the shareholders of the Company voted to increase the authorized shares of common stock to 100,000,000 and the Certificate of Amendment amending the Articles of Incorporation was filed with the State of Nevada on August 8, 2018.

All references in the financial statements and MD&A to number of common shares, price per share and weighted average shares of common stock have been adjusted to reflect the Reverse Stock Split on a retroactive basis for all prior periods presented, unless otherwise noted, including reclassifying an amount equal to the reduction in par value of common stock to additional paid in capital.

The capital stock of the Company is as follows:

Preferred Stock - The Company has authorized 75,000,000 shares of preferred stock with a par value of \$.001 per share. These shares may be issued in series with such rights and preferences as may be determined by the Board of Directors. There are no shares of preferred stock outstanding.

Edgar Filing: Workhorse Group Inc. - Form 10-K

Common Stock - The Company has authorized 100,000,000 shares of common stock with a par value of \$0.001 per share as of December 31, 2017.

Revenue recognition / customer deposits

It is the Company's policy that revenues will be recognized in accordance with SEC Staff Bulletin (SAB) No. 104, "Revenue Recognition". Under SAB 104, product revenues (or service revenues) are recognized when persuasive evidence of an arrangement exists, delivery has occurred (or service has been performed), the sales price is fixed and determinable, and collectability is reasonably assured.

Income taxes

As no taxable income has occurred from the date of this merger to December 31, 2017 cumulative deferred tax assets of approximately \$19.6 million are fully reserved, and no provision or liability for federal or state income taxes has been included in the financial statements. Carryover amount are:

Approximate net operating loss (\$ millions)	Carryover to be used against taxable income generated through year
3.6	2030
6.7	2031
3.9	2032
4.7	2033
6.1	2034
9.0	2035
18.7	2036
40.8	2037

Research and development costs

The Company expenses research and development costs as they are incurred. Research and Development costs were approximately \$18.1 million and \$6.1 million for the years ended December 31, 2017 and 2016, respectively, consisting primarily of personnel costs for our teams in engineering and research, prototyping expense, and contract and professional services.

Basic and diluted loss per share

Basic loss per share is computed by dividing net loss available to common shareholders (numerator) by the weighted average number of shares outstanding (denominator) during the period. For all periods, all of the Company's common stock equivalents were excluded from the calculation of diluted loss per common share because they were anti-dilutive, due to the Company's net losses.

Stock based compensation

The Company accounts for its stock-based compensation in accordance with "Share-Based Payments" (codified in FASB ASC Topic 718 and 505). The Company recognizes in its statement of operations the grant-date fair value of stock options and warrants issued to employees and non-employees. The fair value is estimated on the date of grant using a lattice-based valuation model that uses assumptions concerning expected volatility, expected term, and the expected risk-free rate of return. For the awards granted, the expected volatility was estimated by management as 50% based on a range of forecasted results. The expected term of the awards granted was assumed to be the contract life of the option or warrant (one, two, three, five or ten years as determined in the specific arrangement). The risk-free rate of return was based on market yields in effect on the date of each grant for United States Treasury debt securities with a maturity equal to the expected term of the award.

Related party transactions

Certain stockholders and stockholder family members have advanced funds or performed services for the Company. These services are believed to be at market rates for similar services from non-related parties. Related party accounts payable are segregated in the balance sheet.

Subsequent events

The Company evaluates events and transactions occurring subsequent to the date of the consolidated financial statements for matters requiring recognition or disclosure in the consolidated financial statements. The accompanying consolidated financial statements consider events through March 14, 2018, the date on which the consolidated financial statements were available to be issued.

2. INVENTORY

As of December 31, 2017 and 2016, inventory consisted of the following:

	2017	2016
Finished Goods	\$-	\$212,884
Work in Process	1,416,324	987,665
Parts	2,820,182	1,264,286
	\$4,236,506	\$2,464,835

F-11

3. PROPERTY, PLANT AND EQUIPMENT, NET

As of December 31, 2017 and 2016, property, plant and equipment consisted of the following:

	2017	2016
Land	\$700,000	\$700,000
Buildings	5,900,000	5,900,000
Leasehold Improvements	19,225	19,225
Software	86,050	57,587
Equipment	829,742	808,512
Vehicles and prototypes	156,567	62,905
	7,691,584	7,548,229
Less accumulated depreciation	(2,095,571)	(1,545,598)
	\$5,596,013	\$6,002,631

4. DEBT

Notes payable at December 31, 2017 consisted of the following:

	Principal	Unamortized Discount and Debt Issuance Costs
Senior Secured Notes, due June 30, 2018 (discount is based on imputed interest rate of 26%)	\$5,750,000	\$ 987,500

The debt issuance costs of \$237,500 and the unamortized discount of \$750,000 will be amortized into interest expense over the life of the loan. As the debt matures on June 30, 2018, the entire amount will be expensed as interest expense in 2018.

As of December 31, 2017 long-term debt consisted of the following:

2017	2016
------	------

Edgar Filing: Workhorse Group Inc. - Form 10-K

Secured mortgage payable to Bank for the purchase of the 100 Commerce Drive Building due in monthly installments of \$11,951. The interest rate is 6.5% and the maturity date is November 1, 2026.	\$1,741,379	\$1,767,950
Note payable, former building owner interest payment only due in monthly installments of \$1,604 interest at 5.5%. A balloon payment of \$350 thousand plus unpaid interest due August 2018.	350,000	350,000
Note payable to the City of Loveland paid off in May 2017	-	50,000
	2,091,379	2,167,950
Less current portion	381,497	79,521
Long term debt	\$1,709,881	\$2,088,429

Aggregate maturities of long-term debt are as follows:

2019	33,607
2020	35,857
2021	38,259
2022	44,344
2023	43,791
Thereafter	1,514,023
	1,709,881

5. SHAREHOLDER AND RELATED PARTY ADVANCES

As of December 31, 2017, the Company had no deposits that were not yet issued as common stock. As of December 31, 2016, the Company had deposits for \$229,772 that were not yet issued as common stock.

6. LEASE OBLIGATIONS

The Company has a one-year lease on 119 Northeast Drive, Loveland, Ohio 45140. The monthly payment is \$4,500 and the lease expires July 10, 2018.

On October 1, 2011, the Company began leasing operating facilities under an agreement expiring on September 30, 2018. The Building subject to the lease was purchased in October 2016.

Rent expense was \$25,694 and \$151,412 for the years ended December 31, 2017 and 2016, respectively.

7. STOCK BASED COMPENSATION

Options to directors, officers and employees

The Company maintains, as adopted by the board of directors, the 2017 Stock Incentive Plan, the 2016 Stock Incentive Plan, the 2014 Stock Incentive Plan, the 2014 Stock Compensation Plan, 2013 Incentive Stock Plan, the 2012 Incentive Stock Plan, the 2011 Incentive Stock Plan and the 2010 Stock Incentive Plan (the plans) providing for the issuance of options to employees, officers, directors or consultants of the Company. Incentive stock options granted under the plans may only be granted with an exercise price of not less than fair market value of the Company's common stock on the date of grant (110% of fair market value for incentive stock options granted to principal stockholders). Non-qualified stock options granted under the plans may only be granted with an exercise price of not less than 85% of the fair market value of the Company's common stock on the date of grant. Awards under the plans may be either vested or unvested options. The 2017 Stock Incentive Plan authorized 5,000,000 shares with vesting in sixteen equal quarterly tranches.

In addition to the plans, the Company has granted, on various dates, stock options to directors, officers and employees to purchase common stock of the Company. The terms, exercise prices and vesting of these awards vary.

Edgar Filing: Workhorse Group Inc. - Form 10-K

The following table summarizes option activity for directors, officers and employees:

	Options Available for Grant	Outstanding Stock Options			
		Number of Options	Weighted Average Exercise Price per Option	Weighted Average Grant Date Fair Value per Option	Weighted Average Remaining Exercise Term in Months
Balance December 31, 2015	757,471	1,980,434	\$ 2.21	\$ 1.46	49
Additional stock reserved	500,000	-	-	-	-
Granted	(794,500)	794,500	6.38	2.82	58
Exercised	-	(138,113)	1.79	0.49	-
Forfeited	-	-	-	-	-
Expired	492,500	(492,500)	3.83	1.65	-
Balance December 31, 2016	955,471	2,144,321	2.46	1.53	43
Additional stock reserved	5,000,000	-	-	-	-
Granted	(1,900,000)	1,900,000	5.01	3.41	72
Exercised	-	(69,109)	1.10	0.96	-
Forfeited	-	-	-	-	-
Expired	-	-	-	-	-
Balance December 31, 2017	4,055,471	3,975,212	\$ 3.17	\$ 1.84	43

The Company recorded \$1,428,226 and \$768,196 compensation expense for stock options to directors, officers and employees for the years ended December 31, 2017 and 2016, respectively. As of December 31, 2017, unrecognized compensation expense of \$3,403,675 is related to non-vested options granted to directors, officers and employees which is anticipated to be recognized over the next 46 months, commensurate with the vesting schedules.

Options to consultants

The Company has also granted, on various dates, stock options to purchase common stock of the Company to consultants for services previously provided to the Company. The terms, exercise prices and vesting of these awards vary.

The following table summarizes option activity for consultants:

	Options Available for Grant	Number of Options	Outstanding Stock Options		
			Weighted Average Exercise Price per Option	Weighted Average Grant Date Fair Value per Option	Weighted Average Remaining Exercise Term in Months
Balance December 31, 2015	99,303	306,773	\$ 0.36	\$ 1.01	50
Additional stock reserved	-	-	-	-	-
Granted	(9,000)	9,000	4.99	0.44	-
Exercised	-	(138,312)	0.34	0.81	-
Forfeited	-	-	-	-	-
Expired	-	-	-	-	-
Balance December 31, 2016	90,303	177,461	0.49	1.05	41
Additional stock reserved	-	-	-	-	-
Granted	-	-	-	-	-
Exercised	-	(5,000)	1.50	0.83	-
Forfeited	-	-	-	-	-
Expired	-	-	-	-	-
Balance December 31, 2017	90,303	172,461	\$ 0.57	\$ 1.11	32

The Company recorded \$4,966 and \$31,356 compensation expense for stock options to consultants for the years ended December 31, 2017 and 2016, respectively. As of December 31, 2017, there was no unrecognized compensation expense related to non-vested options granted to consultants which is anticipated to be recognized over the next 31 months, commensurate with the vesting schedules.

Warrants to placement agent and consultants

Edgar Filing: Workhorse Group Inc. - Form 10-K

Through December 2011, the Company compensated the placement agent for assisting in the sale of the Company's securities by paying the placement agent commissions and issuing the placement agent common stock purchase warrants to purchase shares of the Company's common stock. The warrants have a five-year term and various exercise prices.

The Company has also granted, on various dates, stock warrants to purchase common stock of the Company to consultants for services previously provided to the Company. The terms, exercise prices and vesting of these awards vary.

F-14

The following table summarizes warrant activity for the placement agent and consultants:

	Warrants Available for Grant	Outstanding Warrants			
		Number of Warrants	Weighted Average Exercise Price per Warrant	Weighted Average Grant Date Fair Value per Warrant	Weighted Average Remaining Exercise Term in Months
Balance December 31, 2015	210,227	306,823	\$ 2.79	\$ 1.26	9
Additional stock reserved	-	-	-	-	-
Granted	-	-	-	-	-
Exercised	-	(60,160)	2.69	0.43	-
Forfeited	-	-	-	-	-
Expired	-	(87,458)	6.00	2.70	-
Balance December 31, 2016	210,227	159,205	2.56	1.16	17
Additional stock reserved	-	-	-	-	-
Granted	-	-	-	-	-
Exercised	-	-	-	-	-
Forfeited	-	-	-	-	-
Expired	-	-	-	-	-
Balance December 31, 2017	210,227	159,205	\$ 1.38	\$ 0.68	21

The Company recorded no compensation expense for stock warrants to the placement agent and consultants for the years ended December 31, 2017 and 2016, respectively. There is no unrecognized compensation expense for the placement agent warrants because they are fully vested at date of grant.

Warrants to directors and officers

In December 2010 and May 2011, the Company issued to certain directors and officers common stock purchase warrants to acquire shares of common stock at an exercise price of \$2.00 per share for a period of five years. In November 2011, under the terms of a Promissory Note issued to a director and officer, common stock purchase warrants were issued to acquire 10,000 shares of common stock at an exercise price of \$5.00 per share for a period of one year. In May 2012, a director and officer received 10,000 2012 Warrants to acquire common stock of the Company at an exercise price of \$5.00 for a period of three years. In June 2012, a director and officer converted secured and unsecured loans provided to the Company from September 2011 to June 2012 in the aggregate amount of \$389,250 into 2012 Notes and 2012 Warrants. In November 2012, the Company entered into a Note and Warrant Amendment and Conversion Agreement whereby the holders and 2012 Investors converted all principal and interest under the 2012 Notes into shares of common stock. Further, the exercise price of the 2012 Warrants was reduced to \$2.50 per share. The \$7,388 cost of the reduction in the exercise price is included in stock-based compensation expense for the year ended December 31, 2012.

F-15

The following table summarizes warrant activity for directors and officers:

	Warrants Available for Grant	Outstanding Warrants			
		Number of Warrants	Weighted Average Exercise Price per Warrant	Weighted Average Grant Date Fair Value per Warrant	Weighted Average Remaining Exercise Term in Months
Balance December 31, 2015	348,925	338,925	\$ 20.00	\$ 1.02	4
Additional stock reserved	-	-	-	-	-
Granted	-	-	-	-	-
Exercised	-	-	-	-	-
Forfeited	-	-	-	-	-
Expired	-	(150,000)	20.00	0.15	-
Balance December 31, 2016	348,925	188,925	20.00	1.02	4
Additional stock reserved	-	-	-	-	-
Granted	-	-	-	-	-
Exercised	-	-	-	-	-
Forfeited	-	-	-	-	-
Expired	-	-	-	-	-
Balance December 31, 2017	348,925	188,925	\$ 20.00	\$ 1.30	4

The Company recorded no compensation expense for stock warrants to directors and officers for the years ended December 31, 2017 and 2016, respectively. There is no unrecognized compensation expense for these warrants because they are fully vested at date of grant.

8. RECENT PRONOUNCEMENTS

In April 2016, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2016-10, Revenue from Contracts with Customers (Topic 606): Identifying Performance Obligations and Licensing, and affects the guidance in ASU No. 2014-09, Revenue from Contracts with Customers (Topic 606), which is not yet effective. ASU No. 2016-10 clarifies the following two aspects of Topic 606: evaluating whether promised goods and services are separately identifiable and determining whether an entity's promise to grant a license provides a customer with either a right to use the entity's intellectual property, which is satisfied at a point in time, or a right to access the entity's intellectual property, which is satisfied over time. ASU No. 2016-10 is effective for public companies for annual reporting periods beginning after December 15, 2017, including interim periods within that reporting period. Transitional guidance is included in the update. Earlier adoption is permitted only as of annual reporting periods beginning after December 15, 2016, including interim reporting periods within that reporting period. Adoption of ASU No. 2016-10 is not expected to have a material impact on the Company's consolidated financial statements.

In March 2016, the FASB issued ASU No. 2016-09, Compensation—Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting, and affects all entities that issue share-based payment awards to their employees. The new guidance involves several aspects of the accounting for share-based payment transactions, including income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. Under ASU No. 2016-09, any excess tax benefits or tax deficiencies should be recognized as income tax expense or benefit in the income statement. Excess tax benefits are to be classified as an operating activity in the statement of cash flows. In accruing compensation cost, an entity can make an entity-wide accounting policy election to either estimate the number of awards that are expected to vest, as required under current guidance, or account for forfeitures when they occur. For an award to qualify for equity classification, an entity cannot partially settle the award in excess of the employer's maximum statutory withholding requirements. Such cash paid by an employer when directly withholding shares for tax withholding purposes should be classified as a financing activity in the statement of cash flows. The amendments in ASU No. 2016-09 are effective for public business entities for fiscal years, and for interim periods within those fiscal years, beginning after December 15, 2016. Early adoption is permitted. Adoption of ASU No. 2016-07 is not expected to have a material impact on the Company's consolidated financial statements.

In March 2016, the FASB issued ASU No. 2016-08, Revenue from Contracts with Customers (Topic 606): Principal versus Agent Considerations (Reporting Revenue Gross versus Net), and affects the guidance in ASU No. 2014-09, "Revenue from Contracts with Customers (Topic 606)," which is not yet effective. When another party is involved in providing goods or services to a customer, ASU No. 2014-09 requires an entity to determine whether the nature of its promise is to provide the specified good or service itself (that is, the entity is a principal) or to arrange for that good or service to be provided by the other party (that is, the entity is an agent). The amendments in ASU No. 2016-08 are intended to improve the operability and understandability of the implementation guidance in ASU No. 2014-09 on principal versus agent considerations by offering additional guidance to be considered in making the determination. ASU No. 2016-08 is effective for public companies for annual reporting periods beginning after December 15, 2017, including interim periods within that reporting period. Transitional guidance is included in the update. Earlier adoption is permitted only as of annual reporting periods beginning after December 15, 2016, including interim reporting periods within that reporting period. Adoption of ASU No. 2016-08 is not expected to have a material impact on the Company's consolidated financial statements.

F-17

In February 2016, the FASB issued ASU No. 2016-02, Leases (Topic 842), and requires a lessee to recognize in the statement of financial position a liability to make lease payments (“the lease liability”) and a right-of-use asset representing its right to use the underlying asset for the lease term, initially measured at the present value of the lease payments. When measuring assets and liabilities arising from a lease, the lessee should include payments to be made in optional periods only if the lessee is reasonably certain, as defined, to exercise an option to the lease or not to exercise an option to terminate the lease. Optional payments to purchase the underlying asset should be included if the lessee is reasonably certain it will exercise the purchase option. Most variable lease payments should be excluded except for those that depend on an index or a rate or are in substance fixed payments. A lessee shall classify a lease as a finance lease if it meets any of five listed criteria: 1) The lease transfers ownership of the underlying asset to the lessee by the end of the lease term. 2) The lease grants the lessee and option to purchase the underlying asset that the lessee is reasonably certain to exercise. 3) The lease term is for the major part of the remaining economic life of the underlying asset. 4) The present value of the sum of the lease payments and any residual value guaranteed by the lessee equals or exceeds substantially all of the fair value of the underlying asset. 5) The underlying asset is of such a specialized nature that it is expected to have no alternative use to the lessor at the end of the lease term. For finance leases, a lessee shall recognize in the statement of comprehensive income interest on the lease liability separately from amortization of the right-of-use asset. Amortization of the right-of-use asset shall be on a straight-line basis, unless another basis is more representative of the pattern in which the lessee expects to consume the right-of-use asset’s future economic benefits. If the lease does not meet any of the five criteria, the lessee shall classify it as an operating lease and shall recognize a single lease cost on a straight-line basis over the lease term. For leases with a term of 12 months or less, a lessee is permitted to make an accounting policy election by class of underlying asset not to recognize lease assets and lease liabilities. If a lessee makes this election, it should recognize lease expense for such leases generally on a straight-line basis over the lease term. The amendments in this update are to be applied using a modified retrospective approach, as defined, and are effective for public business entities for fiscal years, and for interim periods within those fiscal years, beginning after December 15, 2018. Early application is permitted. The Company is currently evaluating the financial statement impact of adopting the new guidance.

In August 2015, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2015-14, Revenue from Contracts with Customers (Topic 606): Deferral of the Effective Date. The amendments in this update defer the effective date of Update 2014-09 for all entities by one year. Public companies should apply the guidance in Update 2014-09 to annual reporting periods beginning after December 31, 2017, including interim reporting periods within that reporting period. Early adoption is permitted only as of annual reporting periods beginning after December 15, 2016, including interim reporting periods within that reporting period.

9. PRIVATE PLACEMENT MEMORANDUM

On February 1, 2017, the Company announced the completion of its underwritten public offering of 6,500,000 shares of its common stock at a public offering price of \$3.00 per share. In addition, the underwriters exercised an option to purchase an additional 975,000 shares of common stock at the public offering price, less the underwriting discounts and commissions.

All of the shares in the offering were sold by Workhorse Group, with gross proceeds to Workhorse Group of approximately \$22.4 million and net proceeds of approximately \$20.5 million, after deducting underwriting discounts

and commissions and estimated offering expenses.

On June 22, 2017, Workhorse entered into an at the market issuance sales agreement (the “Cowen Agreement”) with Cowen and Company, LLC (“Cowen”) under which the Company may offer and sell, from time to time at its sole discretion, shares of its Common Stock having an aggregate offering price of up to \$25,000,000 through Cowen as its sales agent. As of December 31, 2017, the Company issued 1,060,783 shares from this facility.

On September 14, 2017, the Company entered into an underwriting agreement (the “Underwriting Agreement”) with Cowen relating to the public offering and sale (the “Offering”) of 3,749,996 shares of the Company’s common stock, and five-year warrants (exercisable beginning on the date of issuance) to purchase up to an aggregate of 2,812,497 shares of the Company’s common stock. Each investor received a warrant to purchase 0.75 shares of the Company’s common stock at an exercise price of \$3.80 per share, for each share of common stock purchased.

Pursuant to the Underwriting Agreement, Cowen purchased 3,749,996 shares of the Company’s common stock and accompanying warrants at a price per share of \$3.20. The net proceeds to the Company were approximately \$10.9 million after deducting underwriting discounts and commissions and offering expenses. The sale of such shares and accompanying warrants closed on September 18, 2017. The warrants contain full ratchet anti-dilution protection upon the issuance of any common stock, securities convertible into common stock or certain other issuances at a price below the then existing exercise price of the warrants, with certain exceptions.

10. QUARTERLY FINANCIAL DATA (UNAUDITED)

	Sales	Gross Loss	Net Loss	Basic and diluted loss per share
2017				
First Quarter	\$1,778,037	\$(2,534,051)	\$(7,920,606)	\$(0.24)
Second Quarter	270,000	(725,925)	(9,199,700)	(0.26)
Third Quarter	3,285,000	(4,273,082)	(12,663,222)	(0.35)
Fourth Quarter	5,513,423	(6,137,345)	(12,455,703)	(0.32)
2016				
First Quarter	236,000	(228,377)	(4,380,012)	(0.23)
Second Quarter	1,234,600	(1,060,075)	(2,935,830)	(0.14)
Third Quarter	1,906,000	(2,267,364)	(5,262,859)	(0.25)
Fourth Quarter	3,038,200	(3,607,646)	(6,977,167)	(0.28)

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

(a) Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our Principal Executive Officer and Principal Financial Officer, has evaluated the effectiveness of our disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act), as of the end of the period covered by this Annual Report. Based on such evaluation, our Principal Executive Officer and Principal Financial Officer have concluded that, as of the end of the period covered by this Annual Report, our disclosure controls and procedures were not effective because of a material weakness in our internal control over financial reporting as discussed below.

Notwithstanding this material weakness, our Chief Executive Officer and Chief Financial Officer have concluded that the Consolidated Financial Statements included in this Annual Report on Form 10-K present fairly, in all material respects, the financial position of the Company at December 31, 2017 and 2016 and the consolidated results of operations and cash flows for each of the fiscal years presented herein in conformity with U.S. generally accepted accounting principles.

(b) Management's Annual Report on Internal Control Over Financial Reporting

The management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting, as required by Sarbanes-Oxley (SOX) Section 404(a). The Company's internal control over financial reporting is a process designed under the supervision of the Company's Principal Executive Officer and Principal Financial Officer and effected by the Company's Board of Directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of the Company's consolidated financial statements for external purposes in accordance with United States generally accepted accounting principles.

Management is responsible for establishing and maintaining adequate internal control over financial reporting, as defined in Rules 13a-15(f) and 15d-15(f) of the Exchange Act. Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements in accordance with US GAAP. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projection of any evaluation of effectiveness to future periods is subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the Company's annual or interim financial statements will not be prevented or detected on a timely basis. In connection with management's assessment of our internal control over financial reporting as required under Section 404 of the Sarbanes-Oxley Act of 2002, we identified the following material weaknesses in our internal control over financial reporting as of December 31, 2017:

The Company has not established adequate financial reporting monitoring activities to mitigate the risk of accounting errors, specifically because there are few employees and turnover in the finance function had been high.

The Company expanded significantly in 2016 and 2017 and as a result of its organic growth it has not been able to establish the proper accounting and financial reporting oversight of its increased activity. In addition, resources were redirected toward the support of the SureFly spin-off in late 2017 and in early 2018.

The lack of a fully implemented enterprise resource planning (ERP) system to handle prepayments contributed to the situation.

Because of the material weaknesses noted above, management has concluded that it did not maintain effective internal control over financial reporting as of December 31, 2017, based on Internal Control over Financial Reporting - Guidance for Smaller Public Companies issued by COSO.

Remediation of Material Weaknesses in Internal Control over Financial Reporting

As a company with limited capital resources, the Company does not have the resources to install a dedicated staff with deep expertise in all facets of SEC disclosure and US GAAP compliance. As a response, the company believes the following measures will adequately address the weakness:

Complete implementation of the ERP system modules covering purchase orders and inventory

Review and implement adequate account reconciliation processes to improve the end of period closing process

As a company with limited resources, the Company does not have the resources to fund sufficient staff to ensure a complete segregation of responsibilities within the accounting function. However, Company management does review, and will increase the review of the financial statements. This action, in addition to the improvements

identified above, will minimize any risk of a potential material misstatement occurring.

The independent registered public accounting firm that audited the consolidated financial statements included in this Annual Report has issued an attestation report on the Company's internal control over financial reporting attestation report which appears herein.

(c) Changes in Internal Control over Financial Reporting

There have been no changes in our internal control over financial reporting that occurred during the fourth fiscal quarter of the year ended December 31, 2017 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

The officers and director of the Company are as follows:

Name	Age	Position
Raymond J. Chess	59	Director, Chairman
Harry DeMott	50	Director
H. Benjamin Samuels	51	Director
Gerald B. Budde	56	Director
Stephen S. Burns	57	Director, Chief Executive Officer, Secretary and Treasurer
Duane Hughes	54	President and Chief Operating Officer
Paul Gaitan	58	Chief Financial Officer

Officers are elected annually by the Board of Directors (subject to the terms of any employment agreement) to hold such office until an officer's successor has been duly appointed and qualified, unless an officer sooner dies, resigns or is removed by the Board.

Our officers and directors have not been the subject of any order, judgment, or decree of any court of competent jurisdiction, or any regulatory agency permanently or temporarily enjoining, barring, suspending or otherwise limiting them from acting as an investment advisor, underwriter, broker or dealer in the securities industry, or as an affiliated person, director or employee of an investment company, bank, savings and loan association, or insurance company or from engaging in or continuing any conduct or practice in connection with any such activity or in connection with the purchase or sale of any securities.

Our officers and directors have not been convicted in any criminal proceeding (excluding traffic violations) and are not the subject of any criminal proceedings which are currently pending.

Background of Executive Officers and Directors

Raymond J. Chess, Director Chairman

Prior to joining the Company, Mr. Chess served as a Global Vehicle Line Executive for General Motors Co. (“GM”), where he was responsible for global, cross functional general management of the GM crossover market segment from May 2009 through December 2012. Prior to this, from August 2001 until April 2009, Mr. Chess was responsible for GM’s commercial truck segment. Previous GM assignments included leadership roles in the full size truck segment, metal fabrication and body assembly. Mr. Chess’s background includes broad, hands-on manufacturing leadership roles with manufacturing, engineering and manufacturing floor operations. Mr. Chess holds a Bachelor’s of Science degree in Mechanical Engineering from Kettering University and an MBA from Indiana University.

Stephen S. Burns, Director, Chief Executive Officer, Treasurer and Secretary

Mr. Burns is a Co-Founder in the Company and has served as the Company’s CEO since inception. Mr. Burns was appointed as CEO, and Secretary of the Company on December 28, 2009. Mr. Burns had founded several companies, most recently iTookThisOnMyPhone.com, a mobile photo and video-sharing technology company, MobileVoiceControl, Inc. a developer of high-end speech recognition software for smartphones sold to Nuance Communications (NASDAQ:NUAN), Inc. in 2006, AskMeNow [OTC:AKMN] a mobile search and information delivery system sold to Ocean West Holdings in 2005, PocketScript, the leading mobile electronic prescription system in the world which was sold to ZixCorp [NASDAQ:ZIXI] in 2002, Over The Line/AdLink, sold to Gannett Co. Inc. (NYSE:GCI) in 1994 and the design and development of Suspension Parameter Measurement Machines.

H. Benjamin Samuels, Director

Mr. Samuels served as CEO of Victory Packaging from May 2007 through 2015, during which time he led an executive team which currently manages more than 1,500 employees. In 2015, Mr. Samuels was appointed as Co-President after Victory Packaging was acquired by KapStone Paper and Packaging Corporation. From 1997 through 2007, Mr. Samuels served as Vice Chairman and leader of Victory Packaging's national accounts group, real estate, finance and legal departments, achieving a period of unprecedented growth in sales and revenues. Mr. Samuels joined Victory Packaging in 1995 as its regional operating manager of Texas. Mr. Samuels is an active member in the community, where he recently served as the Chairman of the Houston Food Bank. Mr. Samuels also served as the President of the Houston Chapter of the American Jewish Committee before joining its National Board of Governors. Mr. Samuels served on the boards of and held leadership positions with American Leadership Forum, Serve Houston, Holocaust Museum Houston, Jewish Federation of Greater Houston and Jewish Family Service. Mr. Samuels received a Bachelor's degree in American studies and economics from Amherst College in Massachusetts well as an MBA from the Harvard Graduate School of Business Administration.

Gerald Budde, Director

From September 2011 through the present, Mr. Budde serves as the Chief Financial Officer of AssuredPartners NL, LLC. and maintains titles for other affiliated companies. Mr. Budde was previously the Chief Financial Officer and shareholder of Neace Lukens Holding Company and Subsidiaries from July 2003 through September 2011, when it was acquired by Assured Partners Capital, Inc. AssuredPartners was founded in 2011 and is a national partnership of leading independent property and casualty and employee benefits brokerage firms. Mr. Budde was the Machine Tool Group Controller of Cincinnati Milacron Inc. from April 1994 to October 1998, at which time he was appointed as Vice President of Finance after Cincinnati Milacron's machine tool group was acquired by UNOVA Industrial Automation Systems, Inc. Mr. Budde remained in that role prior to joining Neace Lukens in 2003. Mr. Budde was a Certified Public Accountant until he left public accounting Ernst & Young after 11 years of service in 1994. Mr. Budde is currently a member of the Board of Trustees and the Finance Committee of Mt. Notre Dame high school and is also a member of the Finance Commission of St. Margaret of York parish and school. Mr. Budde received a Bachelor's degree in Accounting from the University of Dayton.

Harry DeMott, Director

Mr. DeMott, has more than 25 years experience in the investment community, having worked as an analyst and portfolio manager at leading brokerage firms and investment management firms. He has also served on the boards of several companies. He is a long-time operator and investor in the media, sports and entertainment industries. He is the co-founder of Raptor Ventures I LP, where he has been a General Partner since February 2011. In addition, Mr. DeMott is a member of the Board of Directors of Fan Manager, SecurityPoint Media, Signal360 and Ticket Evolution.

He also serves as founder and managing partner for Hamerle Investments, a family investment company. Prior to co-founding Raptor Ventures, Mr. DeMott served on the Board of Directors of Pandora Media, Inc. from 2006 through 2011. Earlier, he served as senior analyst at Knighthead Capital Management, analyst at King Street Capital Management, portfolio manager at Bourgeon Capital Management and managing member and founder at Gothic Capital Management. During this 16-year period, Mr. DeMott focused on finding, fostering and investing in disruptive technology companies. He previously spent nine years at First Boston (now Credit Suisse), where he was a director in the equity research division specializing in radio, TV, outdoor advertising and cell towers. He earned a bachelor of arts in economics from Princeton University in 1988 and a MBA in finance from New York University in 1991.

Duane Hughes, President and Chief Operating Officer

Mr. Hughes is a senior-level executive with more than 20 years experience including direct business relationships in the automotive, advertising, and technology segments. Prior to joining Workhorse/AMP Electric Vehicles, Duane served as Chief Operating Officer for Cumulus Interactive Technologies Group. As COO, Duane was responsible for managing the company's day-to-day sales and operations. He was responsible for all operations of the business unit. Prior to Cumulus ITG, Duane spent nearly fifteen years in senior management positions with Gannett Co., Inc., including his duties as Vice President of Sales and Operations for Gannett Media Technologies International.

Paul Gaitan, Chief Financial Officer

Mr. Gaitan is a finance executive with over 30 years of experience working for manufacturing companies in the automotive, building products and consumer products space. Paul has led business integrations, developed strategy, and implemented advanced product costing approaches. He has held roles such as Production Manager, Controller, VP of Finance and CFO driving change by addressing both systems and personnel. Paul works collaboratively to design and deliver insightful information that leads to high quality decisions by the executive team. He earned a bachelor of science degree in finance from the University of Southern California and an MBA from the Stanford Graduate School of Business.

Family Relationships

There are no family relationships among our directors and executive officers. There is no arrangement or understanding between or among our executive officers and directors pursuant to which any director or officer was or is to be selected as a director or officer.

Involvement in Certain Legal Proceedings

To our knowledge, during the last ten years, none of our directors and executive officers has:

Had a bankruptcy petition filed by or against any business of which such person was a general partner or executive officer either at the time of the bankruptcy or within two years prior to that time.

Been convicted in a criminal proceeding or been subject to a pending criminal proceeding, excluding traffic violations and other minor offenses.

Been subject to any order, judgment or decree, not subsequently reversed, suspended or vacated, of any court of competent jurisdiction, permanently or temporarily enjoining, barring, suspending or otherwise limiting his involvement in any type of business, securities or banking activities.

Been found by a court of competent jurisdiction (in a civil action), the SEC, or the Commodities Futures Trading Commission to have violated a federal or state securities or commodities law, and the judgment has not been reversed, suspended or vacated.

Edgar Filing: Workhorse Group Inc. - Form 10-K

Been the subject to, or a party to, any sanction or order, not subsequently reverse, suspended or vacated, of any self-regulatory organization, any registered entity, or any equivalent exchange, association, entity or organization that has disciplinary authority over its members or persons associated with a member.

CORPORATE GOVERNANCE

Governance Policies of the Board of Directors

The Board of Directors has adopted Governance Policies of the Board of Directors to assist the Board in the exercise of its duties and responsibilities and to serve the best interests of the Company and its stockholders. These policies provide a framework for the conduct of the Board's business.

Committees

Establishment of Board Committees and Adoption of Charters

On December 17, 2015, the Company established a Nominating and Corporate Governance Committee, a Compensation Committee and an Audit Committee (collectively, the "Committees") and approved and adopted charters to govern each of the Committees.

In connection with the establishment of the Nominating and Corporate Governance Committee, Compensation Committee and Audit Committee, the Board of Directors of the Company appointed members to each such committee. Currently, all three committees are comprised of three (3) directors meeting the requirements set forth in each applicable charter. The membership of these three standing committees of the Board of Directors of the Company is as follows:

Nominating and Corporate Governance Committee	Compensation Committee	Audit Committee
Raymond Chess (Chairman)	Harry DeMott (Chairman)	Gerald Budde (Chairman)
Gerald Budde	Gerald Budde	Raymond Chess
Harry DeMott	Benjamin Samuels	Benjamin Samuels

Nominating and Corporate Governance Committee.

Our board of directors has determined that each of the members of the Governance Committee is an “independent director” as defined by the rules of The NASDAQ Stock Market, Inc. The Governance Committee is generally responsible for recommending to our full board of directors policies, procedures, and practices designed to help ensure that our corporate governance policies, procedures, and practices continue to assist the board of directors and our management in effectively and efficiently promoting the best interests of our stockholders. The Governance Committee is also responsible for selecting and recommending for approval by our board of directors and our stockholders a slate of director nominees for election at each of our annual meetings of stockholders, and otherwise for determining the board committee members and chairmen, subject to board of directors ratification, as well as recommending to the board director nominees to fill vacancies or new positions on the board of directors or its committees that may occur or be created from time to time, all in accordance with our bylaws and applicable law. The Governance Committee’s principal functions include:

developing and maintaining our corporate governance policy guidelines;

developing and maintaining our codes of conduct and ethics;

overseeing the interpretation and enforcement of our Code of Conduct and our Code of Ethics for Chief Executive Officer and Senior Financial and Accounting Officers;

evaluating the performance of our board of directors, its committees, and committee chairmen and our directors; and

selecting and recommending a slate of director nominees for election at each of our annual meetings of the stockholders and recommending to the board director nominees to fill vacancies or new positions on the board of directors or its committees that may occur from time to time.

During 2017, the Governance Committee met one time. The Governance Committee is governed by a written charter approved by our board of directors. A copy of the Governance Committee’s charter is posted on the Company’s website at www.workhorse.com in the “Investors” section of the website. In identifying potential independent board of directors candidates with significant senior-level professional experience, the Governance Committee solicits candidates from the board of directors, senior management and others and may engage a search firm in the process. The Governance Committee reviews and narrows the list of candidates and interviews potential nominees. The final candidate is also introduced and interviewed by the board of directors and the lead director if one has been appointed. In general, in considering whether to recommend any particular candidate for inclusion in our board of directors’ slate of recommended director nominees, the Governance Committee will apply the criteria set forth in our corporate governance guidelines. These criteria include the candidate’s integrity, business acumen, commitment to understanding our business and industry, experience, conflicts of interest and the ability to act in the interests of our stockholders.

Further, specific consideration is given to, among other things, diversity of background and experience that a candidate would bring to our board of directors. The Governance Committee does not assign specific weights to particular criteria and no particular criterion is a prerequisite for each prospective nominee. We believe that the backgrounds and qualifications of our directors, considered as a group, should provide a composite mix of experience, knowledge and abilities that will allow our board of directors to fulfill its responsibilities. Stockholders may recommend individuals to the Governance Committee for consideration as potential director candidates by submitting their names, together with appropriate biographical information and background materials to our Governance Committee. Assuming that appropriate biographical and background material has been provided on a timely basis, the Governance Committee will evaluate stockholder recommended candidates by following substantially the same process, and applying substantially the same criteria, as it follows for candidates submitted by others.

Audit Committee.

We have a separately-designated standing Audit Committee established in accordance with Section 3(a)(58)(A) of the Securities Exchange Act of 1934, as amended (the “Exchange Act”). Our board of directors has determined that the members are all “independent directors” as defined by the rules of The NASDAQ Stock Market, Inc. applicable to members of an audit committee and Rule 10A-3(b)(i) under the Exchange Act. In addition, Mr. Budde is an “audit committee financial expert” as defined in Item 407(d)(5) of Regulation S-K and demonstrates “financial sophistication” as defined by the rules of The NASDAQ Stock Market, Inc. The Audit Committee is appointed by our board of directors to assist our board of directors in monitoring (1) the integrity of our financial statements, (2) our compliance with legal and regulatory requirements, and (3) the independence and performance of our internal and external auditors. The Audit Committee’s principal functions include:

reviewing our annual audited financial statements with management and our independent auditors, including major issues regarding accounting and auditing principles and practices and financial reporting that could significantly affect our financial statements;

reviewing our quarterly financial statements with management and our independent auditor prior to the filing of our Quarterly Reports on Form 10-Q, including the results of the independent auditors’ reviews of the quarterly financial statements;

recommending to the board of directors the appointment of, and continued evaluation of the performance of, our independent auditor;

approving the fees to be paid to our independent auditor for audit services and approving the retention of our independent auditor for non-audit services and all fees for such services;

reviewing periodic reports from our independent auditor regarding our auditor’s independence, including discussion of such reports with the auditor;

reviewing the adequacy of our overall control environment, including internal financial controls and disclosure controls and procedures; and

reviewing with our management and legal counsel legal matters that may have a material impact on our financial statements or our compliance policies and any material reports or inquiries received from regulators or governmental agencies.

During 2017, the audit committee met four times. A copy of the Audit Committee’s charter is posted on the Company’s website at www.workhorse.com in the “Investors” section of the website.

Meetings may be held from time to time to consider matters for which approval of our Board of Directors is desirable or is required by law.

Compensation Committee.

A full discussion of our compensation committee can be found under Item 11 – Executive Compensation.

Code of Ethics

We have adopted a Code of Business Conduct and Ethics Policy (the “Code of Ethics”) that applies to all directors and officers. The Code of Ethics describes the legal, ethical and regulatory standards that must be followed by the directors and officers of the Company and sets forth high standards of business conduct applicable to each director and officer. As adopted, the Code of Ethics sets forth written standards that are designed to deter wrongdoing and to promote, among other things:

honest and ethical conduct, including the ethical handling of actual or apparent conflicts of interest between personal and professional relationships;

compliance with applicable governmental laws, rules and regulations;

the prompt internal reporting of violations of the Code of Ethics to the appropriate person or persons identified in the code; and

accountability for adherence to the Code of Ethics.

Company Policies

The Company has established the following written policies that have been distributed and reviewed with all Company employees: Approval policy, Purchase Requisition policy, Conflict of Interest policy, “Do the Right Thing” (ethics) policy and a Travel and Expense policy.

Section 16(a) Beneficial Ownership Reporting Compliance

Section 16(a) of the Securities Exchange Act of 1934, as amended, requires our directors and executive officers and persons who own more than 10% of the issued and outstanding shares of our common stock to file reports of initial ownership of common stock and other equity securities and subsequent changes in that ownership with the SEC. Officers, directors and greater than ten percent stockholders are required by SEC regulation to furnish us with copies of all Section 16(a) forms they file. To our knowledge, based solely on a review of the copies of such reports furnished to us and written representations that no other reports were required, during the fiscal year ended December 31, 2016 all Section 16(a) filing requirements applicable to our officers, directors and greater than 10% beneficial owners were complied with.

ITEM 11. EXECUTIVE COMPENSATION

Compensation Discussion and Analysis

Oversight of Executive Compensation Program

Compensation Committee.

Our compensation committee consists of Harry DeMott, Gerald Budde and Benjamin Samuels. Our board of directors has determined that each of the members are an “independent director” as defined by the rules of The NASDAQ Stock Market, Inc. applicable to members of a compensation committee. The Compensation Committee is responsible for establishing the compensation of our senior management, including salaries, bonuses, termination arrangements, and other executive officer benefits as well as director compensation. The Compensation Committee also administers our equity incentive plans. During 2017, the Compensation Committee meet one time. The Compensation Committee is governed by a written charter approved by the board of directors. A copy of the Compensation Committee’s charter is posted on the Company’s website at www.workhorse.com in the “Investors” section of the website. The Compensation Committee works with the Chairman of the Board and Chief Executive Officer and reviews and approves compensation decisions regarding senior management including compensation levels and equity incentive awards. The Compensation Committee also approves employment and compensation agreements with our key personnel and directors. The Compensation Committee has the power and authority to conduct or authorize studies, retain independent consultants, accountants or others, and obtain unrestricted access to management, our internal auditors, human resources and accounting employees and all information relevant to its responsibilities.

The responsibilities of the Compensation Committee, as stated in its charter, include the following:

- review and approve the Company’s compensation guidelines and structure;

- review and approve on an annual basis the corporate goals and objectives with respect to compensation for the Chief Executive Officer;

- review and approve on an annual basis the evaluation process and compensation structure for the Company’s other officers, including salary, bonus, incentive and equity compensation; and

- periodically review and make recommendations to the Board of Directors regarding the compensation of non-management directors.

The Compensation Committee is responsible for developing the executive compensation philosophy and reviewing and recommending to the Board of Directors for approval all compensation policies and compensation programs for the executive team.

Overview of Executive Compensation

The Company recognizes that people are our primary asset and our principal source of competitive advantage. In order to recruit, motivate and retain the most qualified individuals as senior executive officers, the Company strives to maintain an executive compensation program that is competitive in the commercial transportation industry, which is a competitive, global labor market.

The Compensation Committee's compensation objective is designed to attract and retain the best available talent while efficiently utilizing available resources. The Compensation Committee compensates executive management primarily through base salary and equity compensation designed to be competitive with comparable companies, and to align management's compensation with the long-term interests of shareholders. In determining executive management's compensation, the Compensation Committee also takes into consideration the financial condition of the Company and discussions with the executive.

In order to accomplish our goals and to ensure that the Company's executive compensation program is consistent with its direction and business strategy, the compensation program for our senior executive officers is based on the following objectives:

to attract, motivate, retain and reward a knowledgeable and driven management team and to encourage them to attain and exceed performance expectations within a calculated risk framework; and

to reward each executive based on individual and corporate performance and to incentivize such executives to drive the organization's current growth and sustainability objectives.

The following key principles guide the Company's overall compensation philosophy:

compensation is designed to align executives to the critical business issues facing the Company;

compensation should be fair and reasonable to shareholders and be set with reference to the local market and similar positions in comparable companies;

an appropriate portion of total compensation should be equity-based, aligning the interests of executives with shareholders; and

compensation should be transparent to the Board of Directors, executives and shareholders.

Compensation Elements and Rationale

There are two basic components to the Company's executive compensation program: base salary and long-term incentive equity compensation. The Compensation Committee determined that it would continue evaluating and evolving the compensation program design against best market practices as the Company experiences further growth. We intend to add short-term incentive cash awards in the near future.

Base Salary

Base salary is the foundation of the compensation program and is intended to compensate competitively relative to comparable companies within our industry and the marketplace where we compete for talent. Base salary is a fixed component of the compensation program and is used as the base to determine elements of incentive compensation and benefits.

Long-Term Incentive (Equity)

The Company's long-term incentive program provides for the granting of stock options to executive officers to both motivate executive performance and retention, as well as to align executive officer performance to shareholder value creation. In awarding long-term incentives, the Company compares the long-term incentive program to that of comparable companies within our industry and evaluates such factors as the number of options available under its Stock Incentive Plan and the number of options outstanding relative to the number of shares outstanding. The Company has historically sought to award stock options on a competitive basis based on a comparison with comparable companies.

Each long-term incentive grant is based on the level of the position held and overall market competitiveness. The Compensation Committee takes into consideration previous grants when it considers new grants of options.

The Board of Directors fixes the exercise price of stock options at the time of the grant based on the market price on the Nasdaq.

During the year ended December 2017, long-term equity incentive plan awards were awarded to the executive officers in the form of stock options.

Our Board of Directors adopted the Company's 2017 Stock Incentive Plan. On August 7, 2017 our shareholders ratified the 2017 Stock Incentive Plan.

The following table summarizes the pay mix for the executive officers and illustrates the percentage of fixed versus at-risk pay for the fiscal year ended December 31, 2017:

Name and Principal Position	Base Salary		Stock Options (LTIP)	
Stephen S. Burns CEO and Director	15	%	85	%
Duane Hughes President and Chief Operating Officer	24	%	76	%
Paul Gaitan Chief Financial Officer	38	%	62	%

Non-Cash Compensation

The Company provides standard health benefits to its executives, including medical, dental and disability insurance.

The Company's non-cash compensation is intended to provide a similar level of benefits as those provided by comparable companies within our industry.

Review of Executive Officer Performance

On an annual basis, the Compensation Committee reviews the overall compensation package for our executive officers and evaluates executive officer performance relative to corporate goals. The Compensation Committee has the opportunity to meet with the executive officers at various times throughout the year, which assists the Compensation Committee in forming its own assessment of each individual's performance. The executive officers are not present during voting or deliberations of the Compensation Committee relating to executive compensation.

In determining the compensation for the executive officers, the Compensation Committee considers compensation paid to executive officers of other companies within the industry, the executive's performance in meeting goals, the complexity of the management position and the experience of the individual. During 2017, the Company's operations were still in development and no significant portion of the executive's pay was linked to performance goals.

Executive and Director Compensation

Director Compensation

On October 24, 2013, Raymond J. Chess was appointed as a director of the Company. Prior to joining the Board of Directors, Mr. Chess served on our advisory board pursuant to which he received a stock option to acquire 10,000 shares of common stock at an exercise price of \$2.50 per share. On October 24, 2013, Mr. Chess entered into a letter agreement with the Company pursuant to which he was appointed as a director of the Company in consideration of an annual fee of \$40,000. Additionally, the Company granted Mr. Chess options to purchase 50,000 shares of the Company's common stock at \$2.60 per share. The options will expire five years from the vesting period with 10,000 options vesting upon the signing of the agreement and 4,000 every six months thereafter for a total of 50,000 shares.

On December 17, 2015, Messrs. Budde and Samuels entered into letter agreements with the Company pursuant to which they were each appointed as directors of the Company in consideration of an annual fee of \$40,000. Additionally, the Company granted Messrs. Budde and Samuels options to purchase 50,000 shares of the Company's common stock at \$7.01 per share. The options will expire five years from the vesting period with 10,000 options vesting upon the signing of the agreement and 4,000 every June 30 and December 31 thereafter for a total of 50,000 shares.

On September 14, 2016, Mr. DeMott entered into a letter agreement with the Company pursuant to which he was appointed as a director of the Company in consideration of an annual fee of \$40,000. Additionally, the Company granted Mr. DeMott an option to purchase 50,000 shares of the Company's common stock at \$8.20 per share. The option will expire five (5) years from the vesting period with 10,000 options vesting upon the signing of the agreement and 4,000 every June 30 and December 31 thereafter for a total of 50,000 shares.

The Company's compensation policy for the above directors was based on comparisons of other companies' remunerations made to their Chairman and other directors and the value of their expertise to the Company.

Executive Compensation

Messrs. Burns, Hughes and Gaitan are retained according to employment agreements with our Company, and each individuals' compensation for serving as an executive officer of the Company is disclosed below in the "Summary Compensation Table". The compensation committee is presently contemplating amending and/or restating the employment agreements to provide for a uniform structure and in order to appropriately update such agreements.

The Company's compensation policy for each of the above parties is based on comparisons of other companies' remunerations made to each of the respective positions and the value of each executive's expertise to the Company.

Pension Benefits

None.

Non-Qualified Deferred Compensation

None.

Retirement, Resignation or Termination Plans

Each of the Company's executive employment agreements with Messrs. Burns, Hughes and Gaitan contemplates the case of termination due to various provisions whereby the named executive officers will receive severance payments, as described below.

Compensation and Risk

We do not believe that our compensation policies and practices are reasonably likely to have a material adverse effect on us. We have taken steps to ensure our executive compensation program does not incentivize risk outside the Company's risk appetite. Some of the key ways that we currently manage compensation risk are as follows:

appointed a Compensation Committee which is composed entirely of independent directors to oversee the executive compensation program;

the use of deferred equity compensation in the form of stock options to encourage a focus on long-term corporate performance versus short-term results; and

disclosure of executive compensation to stakeholders;

Consideration of Most Recent Shareholder Advisory Vote on Executive Compensation

As required by Section 14A of the Exchange Act, at our 2017 Annual Meeting of Stockholders our stockholders voted, in an advisory manner, on a proposal to approve our named executive officer compensation. This was our most recent stockholder advisory vote to approve named executive officer compensation. The proposal was approved by our stockholders, receiving approximately 72% of the vote of the stockholders present in person or represented by proxy and voting at the meeting. We considered this vote to be a ratification of our current executive compensation policies and decisions and, therefore, did not make any significant changes to our executive compensation policies and decisions based on the vote.

Compensation Committee Interlocks and Insider Participation

No person who served as a member of our Compensation Committee during Fiscal 2017 was a current or former officer or employee of our Company or engaged in certain transactions with our Company required to be disclosed by regulations of the SEC. Additionally, during Fiscal 2017 there were no Compensation Committee "interlocks," which generally means that no executive officer of our Company served: (a) as a member of the compensation committee (or other board committee performing equivalent functions or, in the absence of any such committee, the entire board of directors) of another entity which had an executive officer serving as a member of our Company's Compensation Committee; (b) as a director of another entity which had an executive officer serving as a member of our Company's Compensation Committee; or (c) as a member of the compensation committee (or other board committee performing equivalent functions or, in the absence of any such committee, the entire board of directors) of another entity which had an executive officer serving as a director of our Company.

Compensation Committee Report

The Compensation Committee has reviewed and discussed the foregoing compensation discussion and analysis with Company management. Based on that review and those discussions, the Compensation Committee recommended to the Board of Directors that the compensation discussion and analysis be included in this Annual Report. This report is provided by the following independent directors, who comprise the Compensation Committee: Harry DeMott, Benjamin Samuels and Gerald Budde.

The following summary compensation table sets out details of compensation paid to (a) our principal executive officer; (b) each of our two most highly compensated executive officers who served as executive officers during the fiscal year ended December 31, 2017; and (c) up to two additional individuals for whom disclosure would have been provided under (b) but for the fact that the individual was not serving as our executive officer at the end of the fiscal year ended December 31, 2017, except that no disclosure is provided for any named executive officer, other than our principal executive officer, whose total compensation did not exceed \$100,000 for the fiscal year ended December 31, 2017:

Summary Compensation Table

Name and Principal Position	Year	Salary (\$)	Bonus (\$)	Stock Awards (\$)	Option Awards (\$)	Non-equity Incentive Plan Compensation	Change in Pension Value and Non- Qualified Preferred Compensation Earnings (\$)	All Other Compensation (\$)	Total (\$)
Stephen S. Burns CEO and Director	2017	343,750			1,991,000				2,334,750
	2016	275,000			231,231				506,231
	2015	275,000			111,900				386,900
Duane Hughes President and Chief Operating Officer	2017	253,750			796,400				1,050,150
	2016	144,000			125,063				269,063
	2015	138,000			44,760				182,760
Paul Gaitan	2017	200,000			322,200				522,200

Chief Financial Officer

-

Employment Agreements

On May 19, 2017, Stephen S. Burns and the Company entered into an Executive Retention Agreement whereby Mr. Burns was retained as Chief Executive Officer in consideration of an annual salary of \$325,000. Further, the Company entered Executive Retention Agreements with Duane Hughes as President and Chief Operating Officer at an annual salary of \$275,000. The Company also granted stock options exercisable at \$5.28 per share to Mr. Burns and Mr. Hughes to acquire 1,000,000 and 400,000 shares of common stock of the Company, respectively, which are exercisable for a period of ten years. The Stock Options vest in 16 equal quarterly tranches. On August 9, 2017, the Company and Mr. Rodriguez entered a letter agreement amending certain terms of his Executive Retention Agreement dated May 19, 2017, pursuant to which Mr. Rodriguez agreed to serve as the Chief Information Officer at a salary of \$250,000 per year with stock options exercisable at \$5.28 per share to acquire 300,000 shares of common stock of the Company, which are exercisable for a period of ten years vesting over four years in instalments of 18,750 shares. On August 9, 2017, Paul Gaitan and the Company entered into an Executive Retention Agreement whereby Mr. Gaitan was retained as Chief Financial Officer in consideration of an annual salary of \$200,000. The Company also granted stock options exercisable at \$2.74 per share to Mr. Gaitan to acquire 200,000 shares of common stock of the Company, which are exercisable for a period of ten years. The Stock Options vest in 16 equal quarterly tranches.

For each executive, the Company has agreed to provide a bonus of 25% of their base salary upon the Company achieving 75% of annual revenue targets established by the Board of Directors and management. The cash bonus will be increased to 37.5% and 50% of the base salary in the event that 100% or 125% of the revenue target is achieved, respectively. The Company and the executives also each entered into an Indemnification Agreement. The employment of each of the executives is at will and may be terminated at any time, with or without formal cause.

Pursuant to the terms of the executive retention agreements in certain circumstances, the Company has agreed to provide specified severance and bonus amounts and to accelerate the vesting on their equity awards upon termination upon a change of control or an involuntary termination, as each term is defined in the agreements. In the event of a termination upon a change of control or an involuntary termination, the executives are entitled to receive an amount equal to 12 months of their base salary and the target bonus then in effect for the executive officer for the year in which such termination occurs, such bonus payment to be pro-rated to reflect the full number of months the executive remained in the Company's employ. In addition, the vesting on any equity award held by the executive officer will be accelerated in full upon a change of control or an involuntary termination. In the event the executive is terminated for cause, then the vesting of all equity awards shall cease and such equity awards will be terminated. In the event the executive leaves for any reason that is not considered a good reason, then the vesting of equity award shall cease. At the election of the executive officer, the Company will also continue to provide health related employee insurance coverage for twelve months, at the Company's expense upon termination upon a change of control or an involuntary termination.

Grants of Plan Based Awards

We granted awards to the Named Executive Officers in the fiscal year ended December 31, 2017, as follows:

Name	Grant date	Threshold	Target	Maximum	All Other Stock Awards: Number of Shares of Stock or Units	All Other Stock Awards: Number of Securities Underlying	Exercise Price of Options Awards	Grant Data Fair Value of Stock and Options Awards
Stephen S. Burns CEO and Director	5/22/2017		1,000,000		1,000,000		5.28	1.99
Duane Hughes President and Chief Operating Officer	5/19/2017		400,000		400,000		5.28	1.99

Edgar Filing: Workhorse Group Inc. - Form 10-K

Julio Rodriguez Chief Information Officer	5/16/2017	300,000	300,000	5.28	1.99
Paul Gaitan Chief Financial Officer	8/6/2017	200,000	200,000	2.74	1.61

Option Exercises and Stock Vested

For the year ended December 31, 2017, 581,358 options were exercised for \$906,599.

Outstanding Equity Awards

The following table sets forth information with respect to the outstanding equity awards of our principal executive officers and principal financial officer during 2017, and each person who served as an executive officer of the Company as of December 31, 2017:

Outstanding Equity Awards at Fiscal Year-End

Name and Principal Position	Option Awards			Stock Awards					
	Number of Securities underlying unexercised options (#) Exercisable	Number of securities underlying unexercised options (#) Unexercisable	Equity Incentive Plan awards: Number of securities underlying unexercised options (3)	Options exercise price (\$)	Option Expiration date	Number of shares or units of stock that have not vested (#)	Market value of shares or units of stock that have not vested (\$)	Equity incentive awards: Number if unearned shares other rights that have not vested (#)	Equity incentive awards: Market payout value of unearned shares, units or other rights that have not vested

No Pension Benefits

The Company does not maintain any plan that provides for payments or other benefits to its executive officers at, following or in connection with retirement and including, without limitation, any tax-qualified defined benefit plans or supplemental executive retirement plans.

No Deferred Compensation

The Company does not maintain any defined contribution or other plan that provides for the deferral of compensation on a basis that is not tax-qualified.

Director Compensation

Name	Fees Earned or Paid in Cash \$	Stock Awards \$	Non-equity Incentive Plan Compensation \$	Change in Pension Value and Non-Qualified Deferred Compensation Earnings \$	All Other Compensation \$	Total \$

Directors' and Officers' Insurance

The Company has purchased directors and officers liability insurance (“**D&O Liability Insurance**”) for the benefit of its directors and officers, and the directors and officers of its subsidiaries, against liability incurred by them in the performance of their duties as directors and officers of the Company, or its subsidiaries, as the case may be. The amount of premium paid with respect to D&O Liability Insurance for the fiscal year ended December 31, 2017, was \$110 thousand. The entire premium is paid by the Company. The Company’s D&O Liability Insurance is comprised of the following policies:

D&O Liability Insurance	Annual Limit	Deductible
Primary and Excess Policy	\$5,000,000	\$ 750,000 (1)

Not applicable to non-indemnifiable loss, crisis loss or derivative investigation costs. There is a \$250,000 (1) deductible for Corporate Claims, \$750,000 deductible for Securities Claims and a \$1,000,000 deductible for Indemnifiable M&A Claims

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

Edgar Filing: Workhorse Group Inc. - Form 10-K

The following table sets forth certain information, as of March 2, 2018 with respect to the beneficial ownership of the outstanding common stock by (i) any holder of more than five (5%) percent; (ii) each of the Company's executive officers and directors; and (iii) the Company's directors and executive officers as a group. Except as otherwise indicated, each of the stockholders listed below has sole voting and investment power over the shares beneficially owned.

Name of Beneficial Owner (1)		Common Stock Beneficially Owned	Percentage of Common stock (2)	
Joseph T. Lukens	(3)	6,695,335	16.1	%
Stephen D. Baksa	(4)	3,389,442	8.2	%
Stephen S. Burns	(5)	2,552,476	6.1	%
Benjamin Samuels	(6)	1,202,856	2.9	%
Julio Rodriguez	(10)	490,433	1.2	%
Duane Hughes	(9)	467,000	1.1	%
Paul Gaitan	(11)	200,000	0.5	%
Raymond Chess	(7)	180,000	0.4	%
Gerald Budde	(8)	135,000	0.3	%

(1) Except as otherwise indicated, the address of each beneficial owner is c/o Workhorse Group Inc, 100 Commerce Drive, Loveland, Ohio 45140

- Applicable percentage ownership is based on 41,529,181 shares of common stock outstanding as of March 2, 2018. Beneficial ownership is determined in accordance with the rules of the Securities and Exchange Commission and generally includes voting or investment power with respect to securities. Shares of common stock that are currently exercisable or exercisable within 60 days of March 12, 2018 are deemed to be beneficially owned by the person holding such securities for the purpose of computing the percentage of ownership of such person, but are not treated as outstanding for the purpose of computing the percentage ownership of any other person.
- (2) Represents (i) 3,491,888 shares of common stock held directly by Mr. Lukens; (ii) 154,871 shares of common stock held by The Joe & Kim Lukens Foundation; (iii) 2,697,147 shares of common stock held by the US Trust Company of Delaware Administrative Trustee of the Joe & Kim Lukens Dynasty Trust; (iv) 25,000 shares of common stock held by the Joseph T Lukens, Jr. and Gerald Budde, Co-Trustee of the Joseph T. Lukens, Jr. Irrevocable Trust for Nathan J. Lukens U/T/A Dated 2/23/2016; (v) 25,000 shares of common stock held by the Joseph T Lukens, Jr. and Gerald Budde, Co-Trustee of the Joseph T. Lukens, Jr. Irrevocable Trust for Roman E. Lukens U/T/A Dated 2/23/2016; and (vi) a common stock purchase warrant to acquire 571,429 shares of common stock at \$5.28 per share. On February 10, 2017, the Reporting Person resigned from all positions with Our Lady of America Ministries Inc., an Ohio 501(c)(3) charity which holds 570,000 shares of common stock of the Company
- (3) Represents (i) 3,358,421 shares of common stock held directly by the Mr. Baksa; and (ii) 31,000 shares of common stock held by the Stephen D. Baksa 2012 Trust F/B/O Sarah E. Marra, F/B/O Brian S. Baksa. Represents (i) 767,337 shares of common stock held by Mr. Burns, (ii) 50,000 shares of common stock held by Mr. Burns' wife, (iii) a stock option to acquire 35,000 shares of common stock at \$7.21 per share, (iv) a stock option to acquire 10,000 shares of common stock at \$7.21 per share, (v) a stock option to acquire 40,000 shares of common stock at \$4.99 per share, (vi) a stock option to acquire 50,000 shares of common stock at \$1.75 per share, (vii) a stock option to acquire 50,000 shares of common stock at \$1.40 per share, (viii) a stock option to acquire 281,440 shares of common stock at \$0.10 per share, (ix) a stock option to acquire 50,000 shares of common stock at \$1.75 per share, (x) a stock option to acquire 40,000 shares of common stock at \$2.90 per share, (xi) a stock option to acquire 50,000 shares of common stock at \$6.00 per share, (xii) a stock option to acquire 30,000 shares of common stock at \$1.10 per share, (xiii) a stock option to acquire 30,000 shares of common stock at \$7.20 per share, (xiv) a common stock purchase to acquire 29,350 shares of common stock at \$1.50 per share and (xv) a common stock purchase to acquire 1,000,000 shares of common stock at \$5.28 per share.
- (4) Represents (i) 762,532 shares of common stock held by Samuel 2012 Children's Trust UAD 10/28/12 (the "Trust"), (ii) a common stock purchase warrant to acquire 237,467 shares of common stock at an exercise price of \$5.28 per share held by the Trust, (iii) a common stock purchase warrant to acquire 142,857 shares of common stock at an exercise price of \$5.28 per share held by the Trust, and (iv) a stock option to acquire 50,000 shares of common stock at \$7.01 per share and (v) a stock option to acquire 10,000 shares of common stock at \$7.21 per share. Mr. Samuels is a trustee of the Trust.
- (5) Represents a stock option to acquire 180,000 shares of common stock at \$1.89 per share.
- (6) Represents (i) 75,000 shares of common stock, (ii) stock option to acquire 50,000 shares of common stock at an exercise price of \$7.01 per share and (iii) a common stock purchase warrant to acquire 10,000 shares of common stock at \$7.21 per share.
- (7) Represents (i) 67,000 shares of common stock at \$4.75 per share and (ii) a common stock purchase to acquire 300,000 shares of common stock at \$5.28 per share.
- (8) Represents (i) a stock option to acquire 190,433 shares of common stock at \$2.50 per share and (ii) a common stock purchase to acquire 300,000 shares of common stock at \$5.28 per share.
- (9) Represents a common stock purchase to acquire 200,000 shares of common stock at \$2.74 per share.
- (10) Represents a common stock purchase to acquire 200,000 shares of common stock at \$2.74 per share.
- (11) Represents a common stock purchase to acquire 200,000 shares of common stock at \$2.74 per share.

Changes in Control

We have no knowledge of any arrangements, including any pledge by any person of our securities, the operation of which may, at a subsequent date, result in a change in our control.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

Transactions with Related Persons

At no time during the last two fiscal years has any executive officer, director or any member of these individuals' immediate families, any corporation or organization with whom any of these individuals is an affiliate or any trust or estate in which any of these individuals serves as a trustee or in a similar capacity or has a substantial beneficial interest been indebted to the Company or was involved in any transaction in which the amount exceeded \$120,000 and such person had a direct or indirect material interest.

Procedures for Approval of Related Party Transactions

Our Board of Directors is charged with reviewing and approving all potential related party transactions. All such related party transactions must then be reported under applicable SEC rules. We have not adopted other procedures for review, or standards for approval, of such transactions, but instead review them on a case-by-case basis.

Director Independence

The Board of Directors has determined that Ray Chess, Gerald Budde, H. Benjamin Samuels and Harry DeMott each qualify as independent directors under the listing standards of the Nasdaq.

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

The total fees charged to the Company by Clark Schaefer Hackett & Company, the Company's independent registered public accounting firm, are as follows (\$ thousands):

	Audit	Taxes	Other	Total
2017	93.3	5.7	60.0	159.2

2016 47.0 6.10 47.2 100.4

The current policy of the directors, acting as the audit committee, is to approve the appointment of the principal auditing firm and any permissible audit-related services. The audit and audit related fees include fees for the annual audit of the financial statements and review of financial statements included in 10Q filings. Fees charged by Clark, Schaefer Hackett & Company were approved by the Board with engagement letters signed by Stephen S. Burns, Chief Executive Officer.

The Audit Committee is responsible for the pre-approval of audit and permitted non-audit services to be performed by the Company's independent auditor. The Audit Committee will, on an annual basis, consider and, if appropriate, approve the provision of audit and non-audit services by the auditor. Thereafter, the Audit Committee will, as necessary, consider and, if appropriate, approve the provision of additional audit and non-audit services by the auditor which are not encompassed by the Audit Committee's annual pre-approval and are not prohibited by law. The Audit Committee has delegated to the Chair of the Audit Committee the authority to pre-approve, on a case-by-case basis, non-audit services to be performed by the auditor. The Audit Committee has approved all audit and permitted non-audit services performed by the auditor for the year ended December 31, 2017.

PART IV
