GOL Ranked Second in Latin American Corporate Governance Study

GOL is the only airline ranked in study by Spanish consulting group

São Paulo, June 12, 2008 GOL Linhas Aéreas Inteligentes S.A. (NYSE: GOL and Bovespa: GOLL4), the parent company of Brazilian airlines GOL Transportes Aéreos S.A. and VRG Linhas Aéreas S.A., announces that the Company was ranked second among non-bank companies in a Latin American corporate governance study (*The Best Governed Major Latin Corporations 2008*), conducted by Spanish sustainability consulting group Management & Excellence (M&E). According to the study, conducted in partnership with *LatinFinance* magazine, GOL employs 90.2% of the required positive corporate governance practices included in the analysis, compared to an average score of 62.34% by the 50 companies included in the research. GOL is the only airline named in the M&E report.

The study analyzed how companies' corporate governance programs perform against 41 accepted standards of corporate governance used worldwide by both institutional and private investors. The report speaks to the Brazilian market's strong emphasis on corporate governance, as 18 of the first 25 companies are based in Brazil.

Recognition as having one of the best corporate governance programs among all Latin American companies is proof that the Company remains committed to transparency and equality among all shareholders and the public, says Constantino de Oliveira Júnior, GOL Linhas Aéreas Inteligentes' CEO.

Listed on the Bovespa and New York Stock Exchange since 2004, GOL is recognized as a company focused on maintaining high standards of corporate governance. The Company's corporate governance committee is charged with monitoring the company's internal procedures and advising the Board of Directors on best practices in both the Brazilian and global aviation industries. Additionally, while GOL operates in compliance with its listing as a Level 2 company on the Bovespa, the Company also grants its shareholders additional rights not required of Level 2 companies, such as tag-along rights, which offers preferred shareholders 100% of the price paid per common share of controlling block shareholders.
