MESSAGE FROM MANAGEMENT

In 1Q13, the Company recorded operating result (EBIT) of R\$101.2 million, accompanied by a margin of 4.9%, an increase of 4.6 percentage points in relation to 1Q12. This upturn was achieved despite a scenario of pressure on operating expenses when compared to the same period last year, represented by the 14% increase in fuel prices (a record high in a quarter), the 12% depreciation of the real against the dollar, and the more than 10% upturn in airport and connection fees.

This performance reflects GOL's efficiency in adjusting its structure to the Brazilian market's new cost level. Its focus on the domestic supply rationalization strategy, combined with the adjustment to its costs structure, played an essential role in recovering positive operating margins in this period. In 1Q13, the Company reduced seat supply in the domestic market by 15.7% and achieved a growth of 12.4% in net revenue per available seat-kilometer (PRASK) in relation to 1Q12.

The measures taken in 2012 aimed at reducing costs maintained operating cost per available seat-kilometer excluding fuel costs (CASK ex-fuel) at the same level of the previous year. This reduction took place despite a scenario of reduction in supply. The Company closed the quarter with CASK ex-fuel at R\$8.71.

At the close of the first quarter, GOL maintained its solid cash position, with total cash (which includes cash, cash equivalents, financial investments, and short and long-term restricted cash) representing around 20% of LTM revenue, or R\$1.6 billion. Furthermore, in February 2013, the Company priced an issue of Senior Notes abroad at US\$200 million, and in April 2013 Smiles S.A, a Company subsidiary, announced an anticipated mileage sales to banks totaling around R\$400 million.

Also in 1Q13, the Board of Directors of GOL approved the initial public offering (IPO) of Smiles S.A.. On May 10, Smiles S.A. established the offering's price at approximately R\$1.1 billion, representing the conclusion of an important stage to strengthen the Company's strategy. The proceeds were used for the advance purchase of tickets of VRG, a Company subsidiary. The result of this operation shows the capital market's confidence in the potential for growth of the loyalty program industry in the coming years, as well as reiterates GOL's commitment to maintaining its strong liquidity.

Due to the 1Q13 results, GOL's leverage ratio (gross debt/EBITDAR) declined by approximately 25% in relation to 4Q12, thus beginning the gradual process of reduction in leverage. The driver for this recovery will be the recomposition of EBITDAR in 2013, which reached R\$367 million in 1Q13, above the R\$258 million recorded in the entire year of 2012.

In the first quarter, GOL continued to focus on operational efficiency and, once again, was the most punctual airline in the Brazilian market. In 1Q13, 95% of the Company's flights departed on time (93% in 1Q12). In addition, the share of remote check-in use reached around 60% in March 2013.

In line with its focus on operational efficiency, GOL expanded the fast travel concept into the major Brazilian airports and implemented a new route network, bringing more benefits to passengers. Additionally, on May 2013, GOL announced the expansion of its codeshare agreement with Delta, maximizing the connectivity between the airlines and in the Brazil – United States corridor. By the end of August, all destinations operated by Delta in Brazil will be integrated into GOL's route network and available at the Company's sales channels. The Brasília – Atlanta stretch is already available for purchase, with its first flight scheduled for May 20.

Represented by the Brazilian Airline Association (ABEAR), the civil aviation industry has made important advancements. On April 10, the federal government announced a reduction in the ICMS tax ratio from 25% to 12% for operations within the state. This is another step towards a better economic and regulatory framework in the Brazilian civil aviation industry.

GOL appreciate the efforts and motivation of our employees (the “Team of Eagles”), and we thank them for their commitment in this challenging period for the civil aviation industry.

Paulo Sérgio Kakinoff

CEO of GOL Linhas Aéreas Inteligentes S.A.

National Civil Aviation Agency (ANAC) figures;

In the first quarter of 2013, Domestic aviation industry supply and demand fell by 7.9% and 1.3%, respectively, in relation to 1Q12. Due to the reduction in supply, the load factor climbed by 5.0 p.p. in the period.

As the graph below shows, the reduction in supply is becoming more accentuated, depicting a new moment for the Brazilian civil industry. The fall is a response to the new costs levels, and to the sluggish economic growth.

ANAC data; Consolidates GOL+Webjet data for 1Q12 and 4Q12.

Domestic Market

In 1Q13, supply on GOL's domestic route network fell by 15.7% over 1Q12, chiefly due to the discontinuation of Boeing 737-300 related to the shutting down of Webjet's operating activities at the end of 2012.

Domestic demand dropped by 15.5%, due to the above-mentioned reduction in supply. The domestic load factor remained flat, standing at 68.1% in 1Q13 (68.0% in 1Q12).

International Market

In 1Q13, international supply grew by 34.0% year-over-year, chiefly due to the new daily flights to Santo Domingo, Miami and Orlando, which began in December 2012.

International demand moved up by 21.1%, also due to the creation of new international routes.

Load Factor

As a result of the above, the total load factor came to 67.3% in 1Q13, a slight drop of 0.6 p.p. (67.9% in 1Q12).

The graph below shows the evolution of the Company's strategy to maximize net revenue per available seat-kilometer (PRASK) since its adoption in March 2012.

Based on our review, nothing has come to our attention that causes us to believe that the accompanying individual interim financial information included in the Interim Financial Information (ITR) referred to above is not prepared, in all material respects, in accordance with CPC 21 (R1) applicable to the preparation of Interim Financial Information (ITR) and presented in accordance with the standards issued by the CVM.

| | Individual (GLAI) | | Direct subsidiary (VRG) | | Indirect subsidiary (Webjet) | |

The tax credits arising from tax loss carryforwards and negative social contribution basis were valued based on the reasonably expected generation of future taxable income of the parent company and its subsidiaries, subject to legal limitations.

Estimates of deferred tax asset recovery were based on projections of taxable profits when taking into consideration the above assumptions, in addition to several financial, business assumptions and internal and external factors, all based on considerations at the end of the financial year. Consequently, the estimates may not materialize in the future due to the uncertainties inherent in these predictions.

GOL LINHAS AÉREAS INTELIGENTES S.A.**NOTES TO THE CONSOLIDATED INTERIM FINANCIAL INFORMATION RELATED TO THE FIRST QUARTER ENDED ON MARCH 31, 2013**

The Individual and Consolidated Interim Financial Information as of March 31, 2013 were reviewed by Independent Auditors on the extent described on the Report on Review of Interim Financial Information dated on May 13, 2013.

(In thousands of Brazilian reais - R\$, except when indicated otherwise)

The Company and its subsidiaries have the total amount of tax credits of R\$1,163,316, of which R\$85,764 are from the parent company GLAI and R\$1,077,552 are from the operating subsidiaries VRG and Webjet. On December 31, 2012, the projections for GLAI and its indirect subsidiary Webjet do not result in sufficient taxable profits to compensate all available tax credits over the next 10 years and, as a result, there has been recorded a provision for tax credit losses of R\$41,245 for GLAI and R\$202,015 for Webjet. For the direct subsidiary VRG, such projections indicate the existence of sufficient taxable profits for realization of all deferred tax credits recognized in up to 10 years. However, due to tax losses reported in the last years, the Administration conducted a sensitivity analysis on the results and projections and significant changes in the macro-economic scenario, which resulted in recognition of deferred assets on the tax losses and the negative basis at the lowest value derived from this analysis. As a result, the Company and its subsidiaries recognized a provision for loss of R\$339,635 related to the subsidiary VRG.

The Company's management considers that the deferred assets recognized on March 31, 2013 arising from temporary differences will be realized when the provisions are settled and the related future events are resolved.

As result of the payment of rescissions occurred in March 2013, the Company paid the amount of R\$16,917, concluding the termination process of Webjet's employees.

Assets Held for Sale

Due to not representing a component according to IFRS 5 "Non-current assets held for sale and discontinued operation", with operations and cash flows that could be clearly distinguished, operationally and for disclosure purposes in the financial statements of the company, Webjet was not considered a "discontinued Operation". This understanding is supported by the fact that the routes previously operated by Webjet will continue to be operated by the Company. b) Restricted Shares

During the Extraordinary General Meeting held on October 19, 2012, the Company approved the Restricted Shares Plan. The first grants were approved at the Board of Directors' meeting on November 13, 2012. The transfer of restricted shares will be held at the end of third year from the date of grant, assuming as an acquisition condition the employee relationship up to the end of this period. The fair value of the restricted shares granted was estimated on the grant date using the Black-Scholes pricing model, and the assumptions are listed below:

15. Investments

Due to the changes in Law 6404/76 introduced by Law 11,638/07, investments in foreign subsidiaries, GAC and Finance were considered as an extension of the controller GLAI and consolidated on a line by line basis, only the subsidiaries Smiles and VRG were considered as an investment.

| Balance as of December 31, 2011 | 2,103,325 |

Accordingly, as of December 31, 2012, the net balance to be deferred of R\$28,445 (R\$28,877 for the year ended December 31, 2012) is basically a part of the parent's net investment in the VRG. 16. Result per Share

Although there are differences between common and preferred shares in terms of voting rights and priority in case of liquidation, the Company's preferred shares are not entitled to receive any fixed dividends. Rather, preferred shareholders are entitled to receive dividends per share in the same amount of the dividends per share paid to common shareholders. Therefore, the Company understands that, substantially, there is no difference between preferred shares and common shares, and, accordingly, basic and diluted earnings or loss per share are calculated equally for both shares.

Consequently, basic earnings or loss per share are computed by dividing income or losses by the weighted average number of all classes of shares outstanding during the period. Diluted earnings or loss per share are computed including stock options granted to key management and employees using the treasury stock method when the effect is dilutive. The antidilutive effect of all potential shares is disregarded in calculating diluted earnings or loss per share.

Diluted earnings or loss per share are calculated by considering the instruments that may have a potential dilutive effect in the future, such as share-based payment transactions, discussed in Note 14. However, due to the losses reported for the three-month period ended on March 31, 2013, these instruments have anti-dilutive effect and, therefore, are not considered in the total number of outstanding shares.

The balance corresponds to advances for acquisition of aircraft, related to prepayments made based on the contracts with Boeing Company to acquire 68 aircraft 737-800 Next Generation (95 aircraft as of 31 December 2012) and 82 aircraft 737-MAX in the amount of R\$516,162 (R\$475,335 as of December 31, 2012) and the right on the residual value of aircraft in the amount of R\$417,163 (R\$417,163 as of December 31, 2012), both held by the subsidiary GAC.

a) Provision for Anticipated Return of Aircraft

In 2011, according to the strategic planning of Webjet, a provision for the anticipated return of aircraft was recorded. This provision was calculated based on the expected return of 14 aircraft Boeing 737-300 with operating leases contracts, as part of the Company's fleet renewal. The anticipated returns of aircraft are scheduled to occur between 2012 and 2013 and the original termination of leases was between 2012 and 2014. For the period ended March 31, 2013, the Company completed 4 aircraft returns with prefixes PR-WJS, PR-WJT, PR-WJM and PR-WJR.

b) Return of Aircraft and Engines

The return provision considers the costs that meet the contractual conditions for the return of engines maintained under operating leases, as well as the costs to reconfigure the aircraft without purchase option, as prescribed in the

return conditions of the lease contracts, and which is capitalized in fixed assets (aircraft reconfigurations/overhauling), as described in note 17.

c) Provision for Restructuring

In December 2012, Webjet recognized a provision for restructuring costs due to the closure of the activities and the discontinuation of its brand. The first step of the restructuring plan was the extinction of flight operations and discontinuity of the Boeing 737-300 fleet, announced on November 23, 2012. The reduction of R\$21.544 is related to the settlement of obligations on March 31, 2013. For more details, see note 12.

d) Lawsuits

As of March 31, 2013, the Company and its subsidiaries are parties to 21,398 (6,191 labor and 15,207 civil) lawsuits and administrative proceedings. The lawsuits and administrative proceedings are classified into Operation (those arising from the Company's normal course of operations), and Succession (those arising from the succession of former Varig S.A. obligations). Under this classification, the number of proceedings is as follows:

| | Operation | Succession | Total |
|-------------------|------------------|-------------------|---------------|
| Civil Lawsuits | 12,734 | 466 | 13,200 |
| Civil Proceedings | 1,993 | 14 | 2,007 |

| Labor Proceedings | 160 | 2 | 162 |
| | 17,373 | 4,025 | 21,398 |

The civil lawsuits are primarily related to compensation claims generally related to flight delays, flight cancellations, baggage loss and damages. The labor claims primarily consist of discussions related to overtime, hazard pay, and wage differences.

The provisions related to civil and labor suits, whose likelihood of loss is assessed as probable are as follows:

| | 03/31/2013 | 12/31/2012 |
|-------|-------------------|-------------------|
| Civil | 53,651 | 38,484 |
| Labor | 40,264 | 54,456 |
| | 93,915 | 92,940 |

Provisions are reviewed based on the progress of the proceedings and history of losses based on the best current estimate for labor and civil lawsuits.

There are other lawsuits assessed by management and its legal counsel as possible risks, in the estimated amount as of March 31, 2013 of R\$21,558 for civil claims and R\$5,408 for labor claims (R\$37,250 and R\$16,354 as of December 31, 2012 respectively), for which no provisions are recognized.

GLAI has been challenging in the courts the taxation of PIS and COFINS in respect of revenue associated with interest on capital in the amount of R\$37,750, received in the period between 2006 and 2008 from its subsidiary GTA Transportes Aéreos S.A., succeeded by VRG on September 25, 2008. According to the opinion of the legal counsel and based on the recent precedents, the Company classified this process as possible loss, with no provision for the amount involved. Additionally, the Company maintains with the Bic Banco a letter of credit with a partial guarantee on the value of the process as described in note 6.

The Company and its subsidiaries are challenging in the court the ICMS levied on aircraft and engines imported under aircraft lease transactions without purchase options in transactions carried out with lessors headquartered in foreign countries. The Company and its subsidiaries' management understand that these transactions represent simple leases in view of the contractual obligation to return the assets that are the subject matter of the contract.

Management believes there is no evidence of goods circulation and so, there are no legal events to generate the ICMS taxation. Based on the legal counsel opinion and supported by similar lawsuits with favorable decisions to taxpayers by the Superior Court of Justice (STJ) and Supreme Federal Court (STF) in the second quarter of 2007, the Company understands that the likelihood of loss is remote, and thus did not recognize provisions for these amounts. As of March 31, 2013 the estimated aggregated amount of the ongoing lawsuits related to the non-levy of ICMS tax on said imports is R\$222,087 (R\$217,279 as of December 31, 2012) adjusted for inflation, not including late payment charges.

29. Information by Segment

Operating segments are defined as business activities from which it may earn revenues and incur expenses, whose operating results are regularly reviewed by the chief operating decision maker to allocate resources and evaluate the segments' performance.

As a result of Smiles Program operations as an independent entity, which only started on January 1, 2013, the structure of presentation of segment information has been broken down into two operating segments. The information of these segments presented to chief operating decision maker in order to allocate the resources and evaluate the segment performance emphasizes on the two types of services as below:

- Flight transportation segment
- Customer's loyalty program segment

This note has not been presented with comparative figures for March 31, 2012 because the business model used by the Smiles Program until December 31, 2012 was an extension of the Flight transportation segment, for example, the costs of services provided were embedded and diluted in the operating costs of the Flight transportation segment. With the separation of the operations from January 1, 2013, operating agreements for sale tickets and purchase of miles were signed between the segments and these transactions represent a significant portion of revenues and costs of the "Smiles Loyalty Program". Therefore, any comparisons with prior period information would be inappropriate because the comparative figures would not reflect the current business model. The information below presents the summarized financial position related to reportable segments for the period ended on March 31, 2013. The amounts provided to the chief operating decision maker related to the income and the total assets are consistent with the balances recorded in the financial statements and the accounting policies applied.

On the individual financial statements of the subsidiary Smiles S.A., which represents the segment "Smiles Loyalty Program" and in the information provided to the chief operating decision maker, the revenue recognition occurs upon redemption of the miles by the participants. Under the perspective "Smiles Loyalty Program" segment, this measurement is appropriate given that this is when the revenue recognition cycle is complete. At this point, Smiles has transferred to his suppliers the obligation to provide services or deliver products to its customers.

However, as detailed in Note 2.2, from a consolidated perspective, the revenue recognition cycle related to miles exchanged for flight tickets is only complete when the passengers are effectively transported. Therefore, for purposes of reconciliation with the income/loss, consolidated assets and liabilities, as well as for purposes of equity method of accounting and for consolidation purposes, the Company performed, besides eliminations entries, consolidating adjustments to conform the accounting practices of Smiles' revenues. In this case, under the perspective of the consolidated financial statements, the miles that were used to redeem airline tickets are only recognized as revenue when passengers are transported, in accordance with accounting practices and policies adopted by the Company.

30. Commitments

As of March 31, 2013 the Company had 150 firm orders with Boeing. These aircraft purchase commitments include estimates for the contractual price increase during the construction phase. The approximate amount of firm orders, not including the contractual discount is R\$31,169,028 (corresponding to US\$15,447,718 at the reporting date) and are segregated according to the following periods:

| | 03/31/2013 | 12/31/2012 |

The installments financed by Long-term debt, collateralized by the aircraft through the U.S. Ex-Im Bank (“Exim”) corresponds approximately to 85% of total cost of the aircraft. Other agents finance the acquisitions with equal or higher percentages, reaching up to the limit of 100%.

The Company makes payments related to the acquisition of aircraft using its own funds, short and long term debt, cash provided by operating activities, short- and medium-term credit facilities, and supplier financing.

As of March 31, 2013, the total leased fleet was comprised of 133 aircrafts, of which 88 were operating leases and 45 were recorded as finance leases. The Company has 39 financial aircraft with purchase options. During the period ended on March 31, 2013, the Company received 5 aircraft based on operating lease contracts. There was no aircraft return during the period.

a) Operating Leases

Future payments of non-cancelable operating lease contracts are denominated in U.S. Dollars, and are as follows:

| | 03/31/2013 | 12/31/2012 |
|------------------------------|-------------------|-------------------|
| 2013 | 449,433 | 720,708 |

| After 2016 | 1,152,133 | 1,141,234 |
| Total Minimum Lease Payments | 2,623,011 | 3,033,742 |

b) Sale-leaseback Transactions

As of March 31, 2013, the Company recognized R\$7,564 and R\$6,476, as 'Other payables' in current and non-current liabilities, respectively (R\$7,564 and R\$8,367 as of December 31, 2012), related to gains on sale-leaseback transactions performed by its subsidiary GAC Inc in 2006, related to 8 aircraft 737-800 Next Generation. These gains were deferred and are being amortized proportionally to the monthly payments of the related lease agreements over the contractual term of 124 months.

On the same date, the Company recorded R\$9,373 and R\$33,112, as 'Prepaid expenses', in current and non-current assets, respectively (R\$9,373 and R\$35,456 as of December 31, 2012), related to losses on sale-leaseback transactions performed by its subsidiary GAC Inc of nine aircraft. During the years 2007, 2008 and 2009, these losses were deferred and are being amortized proportionally to the payments of the operational lease agreements over the contractual term of 120 months.

Additionally, during the three-month period ended on March 31, 2013, the Company recorded a gain of R\$37,791 directly in profit and loss. This gain results from five aircraft received during the quarter that were subject to sale-leaseback transactions and resulted in operating leases. Given that the calculation of gains and losses on sale-leaseback will not be offset against future lease payments and the sale-leasebacks were all negotiated at fair value, the gains were recognized in profit or loss.

31. Financial Instruments

The Company and its subsidiaries have financial asset and financial liability transactions, which consist in part of derivative financial instruments.

The financial derivative instruments are used to hedge against the inherent risks relating to the operation. The Company and its subsidiaries consider as most relevant risks: fuel price, exchange rate and interest rate. These risks are mitigated by using exchange swap derivatives, futures and options contracts in the oil, U.S. Dollar and interest markets.

Management follows a documented guideline when managing its financial instruments, set out in its Risk Management Policy, which is periodically revised by the Risk Committee (CPR), after approved by the Board of Directors. The Committee sets the guidelines and limits, monitors controls, including the mathematical models adopted for a continuous monitoring of exposures and possible financial effects and also prevents the execution of speculative financial instruments transactions.

The gains or losses on these transactions and the application of risk management controls are part of the Committee's monitoring and have been satisfactory when considering the objectives proposed.

The fair values of financial assets and liabilities of the Company and its subsidiaries are established through information available on the market and according to valuation methodologies.

Most of the derivative financial instruments are contracted with the purpose of hedging against fuel and exchange rates risks based on scenarios with low probability of occurrence, and thus have lower costs compared to other instruments with higher probability of occurrence. Consequently, despite the high correlation between the hedged item and the derivative financial instruments contracted, a significant portion of the transactions presents ineffective positions for hedge accounting purposes upon settlement, which are presented in the tables below.

The description of the consolidated account balances and the categories of financial instruments included in the balance sheet as of March 31, 2013 and December 31, 2012 is as follows:

Risks

The operating activities expose the Company and its subsidiaries to the following financial risks: market (especially currency risk, interest rate risk, and fuel price risk), credit and liquidity risks.

The Company's risk management policy aims at mitigating potential adverse effects from transactions that could affect its financial performance.

The Company's and its subsidiaries' decisions on the exposure portion to be hedged against financial risk, both for fuel consumption and currency and interest rate exposures, consider the risks and hedge costs.

The Company and its subsidiaries do not usually contract hedging instruments for its total exposure, and thus they are subject to the portion of risks resulting from market fluctuations. The portion of exposure to be hedged is determined and reviewed at least quarterly in compliance with the strategies determined in the Risk Policies Committees.

The relevant information on the main risks affecting the Company's and its subsidiaries' operation is as follows:

a) Fuel Price Risk

As of March 31, 2013, fuel expenses accounted for 45.6% of the costs and operating expenses of the Company and its subsidiaries. The aircraft fuel price fluctuates both in the short and in the long term, in line with crude oil and oil byproduct price fluctuations.

To mitigate the risk of fuel price, the company and its subsidiaries employ derivative financial instruments referenced mainly crude oil and, eventually, to their derivatives; are also contracted, directly with the local supplier, future fuel deliveries of aircraft to predetermined prices.

b) Exchange Rate Risk

The exchange rate risk derives from the possibility of unfavorable fluctuation of foreign currencies to which the Company's liabilities or cash flows are exposed. The exposure of the Company's and its subsidiaries' assets and liabilities to the foreign currency risk mainly derives from foreign currency-denominated leases and financing.

The Company's and its subsidiaries' revenues are mainly denominated in *Reais*, except for a small portion in U.S. Dollars, Argentinean pesos, Bolivian bolivianos, Chilean peso, Colombian peso, Paraguay Guarani, Uruguayan peso, Venezuela bolivar, etc..

To mitigate the risk of exchange rate, the company and its subsidiaries employ derivative financial instruments that are referenced to the U.S Dollar.

The currency exposure of the company in March 31, 2013 and December 31, 2012 are shown below:

c) Interest Rate Risk

The Company and its subsidiaries are exposed to fluctuations in domestic and foreign interest rates, substantially the CDI and Libor, respectively. The highest exposure is in lease transactions, indexed to the Libor and local debt.

To mitigate the interest rate risk, the Company and its subsidiaries held swap transactions with counterparties rated as investment grade.

d) Credit Risk

The credit risk is inherent in the Company's and its subsidiaries' operating and financing activities, mainly represented by trade receivables, cash and cash equivalents, including bank deposits.

GOL LINHAS AÉREAS INTELIGENTES S.A.**NOTES TO THE CONSOLIDATED INTERIM FINANCIAL INFORMATION RELATED TO THE FIRST QUARTER ENDED ON MARCH 31, 2013**

The Individual and Consolidated Interim Financial Information as of March 31, 2013 were reviewed by Independent Auditors on the extent described on the Report on Review of Interim Financial Information dated on May 13, 2013.

(In thousands of Brazilian reais - R\$, except when indicated otherwise)

The trade receivable credit risk consists of amounts falling due of the largest credit card companies, with credit risk better than or equal to those of the Company and its subsidiaries, and receivables from travel agencies, installment sales, and government sales, with a small portion exposed to risks from individuals or other entities.

As defined in the Risk Management Policy, the Company and its subsidiaries are required to evaluate the counterparty risks in financial instruments and diversify the exposure. Financial instruments are performed with counterparties rated at least as investment grade by S&P and Moody's. The financial instruments are mostly contracted on commodities and futures exchanges (BM&FBOVESPA and NYMEX), which substantially mitigates the credit risk. The Company's and its subsidiaries' Risk Management Policy establishes a maximum limit of 20% per counterparty for short-term investments.

e) Liquidity Risk

Liquidity risk takes on two distinct forms: market liquidity risk and cash flow liquidity risk. The first is related to current market prices and varies in accordance with the types of assets and the markets where they are traded. Cash flow liquidity risk, however, is related to difficulties in meeting the contracted operating obligations at the agreed dates.

As a way of managing the liquidity risk, the Company and its subsidiaries invest its funds in liquid assets (governmental bonds, CDBs, and investment funds with daily liquidity), and the Cash Management Policy establishes that the Company's and its subsidiaries' weighted average debt maturity should be higher than the weighted average maturity of the investment portfolio. As of March 31, 2013, the weighted average maturity of the Company's and its subsidiaries' financial assets was 21 days and of financial debt, excluding perpetual bonds, was 4.8 years.

The Company and its subsidiaries adopt hedge accounting. On March 31, 2013, the derivatives contracted to hedge interest rate risk and fuel price risk were classified as "cash flow hedge", according to the parameters described in the Brazilian accounting standard CPC 38, and 40, technical guidance OCPC03 and International Accounting Standard IAS 39.

Classification of Derivatives Financial Instruments

i. Cash Flow Hedges

The Company and its subsidiaries use cash flow hedges to hedge against future revenue or expense fluctuations resulting from changes in the exchange rates, interest rates or fuel price, and accounts for actual fluctuations of the fair value of derivative financial instruments in shareholders' equity until the hedged revenue or expense is recognized.

The Company and its subsidiaries estimates the effectiveness based on statistical correlation methods and the ratio between gains and losses on the financial instruments used as hedge, and the cost and expense fluctuation of the hedged items.

The instruments are considered as effective when the fluctuation in the value of derivatives offsets between 80 % to 125% the impact of the price fluctuation on the cost or expense of the hedged item.

The balance of the actual fluctuations in the fair values of the derivatives designated as cash flow hedges is transferred from shareholders' equity to profit or loss for the period in which the hedged costs or expenses impacts profit or loss. Gains or losses on effective cash flow hedges are recorded in balancing accounts of the hedged expenses, by reducing or increasing the operating cost, and the ineffective gains or losses are recognized as financial income or financial expenses for the period.

ii. Derivative financial instruments not designated as hedges

The Company and its subsidiaries contracts derivative financial instruments that are not formally designated for hedge accounting. This occurs when transactions are in the short term and the control and disclosure complexity make them unfeasible, or when the change in a derivative's fair value must be recognized in profit or loss for the same period of the effects of the hedged risk.

Designation of Hedged Item**a) Fuel Hedge**

Due to the low liquidity of jet fuel derivatives traded in commodities exchanges, the Company and its subsidiaries contracts crude oil derivatives (WTI, Brent) and its byproducts (Heating Oil) to hedge against fluctuations in jet fuel prices. Historically, oil prices are highly correlated with jet fuel prices.

As of March 31, 2013, the company and its subsidiaries have contracts of options and collar, Brent and WTI, designated as cash flow hedge accounting of fuel.

Oil derivative contracts, designated as fuel hedges of the Company and its subsidiaries, are summarized below:
