Drilling Activity Recap – 2006 Year To Date

**Includes cured non-consent* properties.

Sacramento Basin

Ø

167 producing wells and over 62,000 net
acres in the Rio Vista Field.

Ø

Current average net production 33 MMcfe/d*.

Ø

143 currently shut-in or idle wells, over 50
potential drilling locations, 33 other potential
development drilling locations, and
numerous workover and recompletion
projects.

Ø

Over 50 leads and prospects in the
Sacramento Basin Extension have been
catalogued to date, with numerous wells
identified and believed to contain bypassed
pay.

Ø

Began a drilling program in early November
2005, drilled 16 wells to date, all successful.
7 of these wells currently on production, 5 to
6 additional wells to be producing by the
end of August 2006.

Ø

Expect to drill an additional 12 to 14 wells in
2006. One drilling rig active in field. May get
deep rig in September.

Ø

Two completion rigs currently working on Rosetta properties in the Rio Vista Field area. Performed 20 recompletions since
June 30, 2005. Expect to get 1 more completion rig by the end of August 2006.

Rio Vista Wells (*November 5, 2005 – July 26, 2006*)

Ø

Over 1.1 Tcf of gas produced to the
North, East and South of Rio Vista
field.

Ø

Only 5 penetrations to date in this
90-square mile field area.

Ø

Welch 13 well, completed in the
Winters with initial producing rate of
3 MMcfe/d.

Ø

Wilcox 14 well has reached total
depth with good mud log shows and
calculated pay on open hole logs.
The well is currently testing.

Ø

Identification of additional locations
is currently underway.

Rio Vista Unit

Sacramento Basin Winters Play

Sacramento Basin – Bradford Island 3D Shoot

Ø

Acquiring 12.0 sq. mi. (~7700 acres)

proprietary 3D seismic data over the
Southern Rio Vista Gas Unit.

Approximately 70% (~ 5400 acres) of
the 3D covers acreage with no seismic
coverage.

Ø

Prospective zones include the

Nortonville, Capay, Hamilton, Martinez,
and McCormick.

Ø

Low risk 20 BCF reserve potential –

shallow zones only.

Ø

Established Upper Capay production in 2000.

Ø

**Determined lower limit to gas at or near -4510
ss.**

Ø

**In Feb. 2006 drilled RVGU 263 and
established new lower limit to gas.**

Ø

**Followed by the drilling of RVGU 265, 266,
and 270 which established the lower limit
-4560 ss.**

Ø

**This additional gas column in the Upper
Capay Southern Extension alone has added
18 Bcf of proved and probable reserves to
date.**

Ø

**In addition, the north east faultblock has
shown additional potential with shows in
Welch #12 and RVGU 237.

South Texas Trends

S. Callaghan and El Corazon Ranch (42,000 est. of the total) acreage

Ø

The Company has approximately
70,000 net acres (est.) square miles of 3-D seismic.

Ø

225 active operated and 100
non-operated wells.

Ø

Current net production is 28
MMcfe/day*.

Ø

95 proved and probable locations.

Ø

Drilled 7 successful wells to date.
Net production for the first 5 wells is
currently 10 MMcfe/d.

Ø

Plan to drill 15 additional wells in
2006.

Ø

Two rigs under contract.

2006 New Wells

Lobo Wells

Ø

Company owns a 50% non-operated working interest in approximately 18,000 net acres (*est.*) in the Perdido Sand Trend.

Ø

Horizontal drilling has been very successful in developing these sands at 9,500 to 12,000 feet.

Ø

Currently have 28 producing wells of which 8 are horizontal.

Ø

Last three infill horizontal wells are averaging a total of 11 MMcfe/d gross.

Ø

Current net production is 9 MMcfe/d*.

Ø

All 48 future locations will be horizontal.

Ø

3 new wells drilled in 2006 to date. First two wells are producing 5 MMcfe/d (gross) each. The third well is being fracture stimulated and is scheduled to be producing by mid August 2006.

Ø

Currently drilling 1 well with 4 additional wells planned for 2006.

**Includes non-consent properties.*

Future horizontal locations

South Texas – Perdido

Gulf of Mexico Activity Areas

Ø

Working interest in 11 blocks
ranging from 20% to 100% (NRI
of 15% - 79%).

Ø

Current net production is 9
MMcfe/day from 7 producing
wells.

Ø

22,000 net acres (est.) under
lease.

Ø

A recent discovery at Main
Pass 118 tested 12.4 MMcf/day
and 512 Bbls/day, gross.

Ø

Successful bidder in 2006
offshore lease sale with 50%
working interest in S.
Timbalier Block 293 and Block
226 and 25% in East Cameron
Block 178.

Gulf Coast Offshore Exploration

Texas State Waters

Ø

The Company is exploring in the Vicksburg and Frio trends in Galveston Bay, Texas, pursuing sands that exhibit strong hydrocarbon indicators on 3-D seismic.

Ø

Current net production is 3.5 MMcfe/day.

Ø

Three successful wells drilled to date.

Ø

Five additional locations are planned, with working interest of 28.9% to 40%. Two will be drilled in 2006.

Rocky Mountain Focus Areas

Ø

Producing formation – Niobrara chalk at
2,500 feet.

Ø

Company owns 72,000 net acres in this
shallow gas play.

Ø

21 wells drilled to date.

Ø

Expect to drill approximately 208 additional
locations, majority 80-acre spacing, on our
existing leases and leases being finalized
with 70 planned in 2006.

Ø

This 3-D supported play has been
approved for 40-acre spacing. 61 square
miles of 3-D survey acquired in 2006.

Ø

Drilling and completion cost per well is
\$225,000.

Forward-Looking Statements

This presentation may contain “forward-looking statements” within the meaning of the US Private Securities Litigation Reform Act of 1995. Forward-looking statements are based on current expectations, estimates and projections that involve a number of risks and uncertainties, which could cause actual results to differ materially from those reflected in these statements. These risks include, but are not limited to: the risks inherent and specific to, the oil and gas industry and risk that effect business’ in general. Additional information on these and other factors which could affect the Company’s operations or financial result are included in the Company’s other reports on file with the United States Securities and Exchange Commission. Forward-looking statements are based on the estimate and opinion of the Company’s management at the time the statements are made. The Company assumes no obligation to update forward-looking statements should circumstance or management’s estimates or opinions change.
