

WELLS FARGO & COMPANY/MN  
Form 424B2  
April 30, 2019

**Filed Pursuant to Rule 424(b)(2)**

**Registration Nos. 333-221324 and 333-221324-01**

Pricing Supplement No. 72 dated April 26, 2019 (To Market Measure Supplement dated May 18, 2018, Prospectus Supplement dated May 18, 2018 and Prospectus dated April 5, 2019)

Wells Fargo  
Finance LLC

**Medium-Term  
Notes, Series A**

*Fully and  
Unconditionally  
Guaranteed by  
Wells Fargo &  
Company*

**Equity Index  
Linked  
Securities**

**\$23,328,000**

**Buffered  
Enhanced  
Return  
Securities**

**With Capped  
Upside and  
Buffered  
Downside**

(Principal at Risk  
Securities Linked to  
the S&P 500<sup>®</sup> Index)

**Unlike ordinary debt securities, the securities do not pay interest or repay a fixed amount of principal at maturity.** Instead, the securities provide for a payment on the stated maturity date (July 14, 2021) that may be greater than, equal to or less than the \$1,000 face amount per security, depending on the performance of the S&P 500<sup>®</sup> Index

as measured from the trade date to the determination date (July 12, 2021). If the level of the S&P 500<sup>®</sup> Index increases, the securities offer 1.8 times participation in that appreciation, **subject to the maximum settlement amount (\$1,232.20 for each \$1,000 face amount security)**. If the level of the S&P 500<sup>®</sup> Index declines by up to the buffer amount of 15%, you will receive the face amount of your securities. However, if the level of the S&P 500<sup>®</sup> Index declines by more than 15%, you will lose approximately 1.1765% of the face amount of your securities at maturity for every 1% by which the decline is more than 15%. In exchange for the upside leverage and downside buffer features, you must be willing to forgo (i) a return on the face amount of the securities in excess of the maximum return at maturity of 23.22% (which results from the maximum settlement amount of \$1,232.20 per \$1,000 face amount security), (ii) interest on the securities and (iii) dividends paid on the stocks included in the S&P 500<sup>®</sup> Index. **You must also be willing to accept the risk that, if the level of the S&P 500<sup>®</sup> Index declines by more than 15%, you will lose some, and possibly all, of the face amount of your securities at maturity.** All payments on the securities are subject to credit risk, and you will have no ability to pursue any securities included in the S&P 500<sup>®</sup> Index for payment. If Wells Fargo Finance LLC, as issuer, and Wells Fargo & Company, as guarantor, default on their obligations, you could lose some or all of your investment.

To determine your payment at stated maturity, we will calculate the underlier return, which is the percentage increase or decrease in the final underlier level on the determination date from the initial underlier level (set on the trade date). On the stated maturity date, for each \$1,000 face amount security:

if the underlier return is *positive* (the final underlier level is *greater than* the initial underlier level), you will receive an amount in cash equal to the *sum* of (i) \$1,000 *plus* (ii) the *product* of (a) \$1,000 *times* (b) the upside participation rate of 1.8 *times* (c) the underlier return, subject to the maximum settlement amount;

if the underlier return is *zero* or *negative* but *not below* -15% (the final underlier level is *equal to* or *less than* the initial underlier level but not by more than 15%), you will receive \$1,000; or

if the underlier return is *negative* and is *below* -15% (the final underlier level is *less than* the initial underlier level by more than 15%), you will lose approximately 1.1765% of the face amount of your securities for every 1% by which the underlier return is below -15%. In this case, you will receive an amount in cash equal to the *sum* of (i) \$1,000 *plus* (ii) the *product* of (a) approximately 1.1765 *times* (b) the *sum* of the underlier return *plus* 15% *times* (c) \$1,000. **This amount will be less than \$1,000 and may be zero.**

The securities will not be listed on any securities exchange and are designed to be held to maturity.

**On the date of this pricing supplement, the estimated value of the securities is \$996.71 per \$1,000 face amount security. The estimated value of the securities was determined for us by Wells Fargo Securities, LLC using its proprietary pricing models. It is not an indication of actual profit to us or to Wells Fargo Securities, LLC or any of our other affiliates, nor is it an indication of the price, if any, at which Wells Fargo Securities, LLC or any other person may be willing to buy the securities from you at any time after issuance. See “Estimated Value of the Securities” in this pricing supplement.**

**The securities have complex features and investing in the securities involves risks not associated with an investment in conventional debt securities. See “Risk Factors” herein on page PRS-9.**

The securities are the unsecured obligations of Wells Fargo Finance LLC, and, accordingly, all payments are subject to credit risk. If Wells Fargo Finance LLC, as issuer, and Wells Fargo & Company, as guarantor, default on their obligations, you could lose some or all of your investment. The securities are not savings accounts, deposits or other obligations of a depository institution and are not insured by the Federal Deposit Insurance Corporation, the Deposit Insurance Fund or any other governmental agency.

**Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this pricing supplement or the accompanying market measure supplement, prospectus supplement and prospectus is truthful or complete. Any representation to the contrary is a criminal offense.**

**Original Offering Price Agent Discount<sup>(1)</sup> Proceeds to Wells Fargo Finance, LLC**

<b>Per Security</b>	\$1,000.00	\$0.00	\$1,000.00
<b>Total</b>	\$23,328,000.00	\$0.00	\$23,328,000.00

Wells Fargo Securities, LLC, an affiliate of Wells Fargo Finance LLC and a wholly owned subsidiary of Wells Fargo & Company, is the agent for the distribution of the securities and is acting as principal. See “Terms of the Securities—Agent” and “Estimated Value of the Securities” in this pricing supplement for further information.

Wells Fargo Securities

## Terms of the Securities

**Issuer:** Wells Fargo Finance LLC.

**Guarantor:** Wells Fargo & Company.

**Underlier:** S&P 500<sup>®</sup> Index

**Trade Date:** April 26, 2019

**Original Issue Date**  
(settlement date): May 3, 2019

**Original Offering Price:** \$1,000 per security.

**Face Amount:** \$1,000 per security. References in this pricing supplement to a “security” are to a security with a face amount of \$1,000.

On the stated maturity date, you will be entitled to receive a cash payment per security in U.S. dollars equal to the cash settlement amount. The “cash settlement amount” per security will equal:

if the final underlier level is *greater than* or *equal to* the cap level, the maximum settlement amount;

if the final underlier level is *greater than* the initial underlier level but *less than* the cap level, the *sum* of (i) \$1,000 *plus* (ii) the *product* of (a) \$1,000 *times* (b) the upside participation rate *times* (c) the underlier return;

**Cash Settlement Amount:** if the final underlier level is *equal to* or *less than* the initial underlier level but *greater than* or *equal to* the buffer level, \$1,000; or

if the final underlier level is *less than* the buffer level, the *sum* of (i) \$1,000 *plus* (ii) the *product* of (a) the buffer rate *times* (b) the *sum* of the underlier return *plus* the buffer amount *times* (c) \$1,000.

**If the final underlier level is less than the buffer level, you will lose some, and possibly all, of the face amount of your securities at maturity.**

All calculations with respect to the cash settlement amount will be rounded to the nearest one hundred-thousandth, with five one-millionths rounded upward (e.g., 0.000005 would be rounded to 0.00001); and the cash settlement amount will be rounded to the nearest cent, with one-half cent rounded upward.

The “stated maturity date” is July 14, 2021. If the determination date is postponed, the stated maturity date will be postponed to the second business day after the determination date as postponed. See “—Determination Date” and “Additional Terms of the Securities—Market Disruption Events” for information about the circumstances that may result in a postponement of the determination date. If the stated maturity date is not a business day, any payment required to be made on the securities on the stated maturity date will be made on the next succeeding business day with the same force and effect as if it had been made on the stated maturity date. A “business day” means any day, other than a Saturday or Sunday, that is neither a legal holiday nor a day on which banking institutions are authorized or required by law or regulation to close in New York, New York. The securities are not subject to redemption by Wells Fargo Finance LLC or repayment at the option of any holder of the securities prior to the stated maturity date.

**Initial Underlier Level:** 2,939.88, the closing level of the underlier on the trade date.

**Closing Level:** The “closing level” of the underlier on any trading day means the official closing level of the underlier reported by the underlier sponsor (as defined below) on such trading day, as obtained by the calculation agent on such trading day from the licensed third-party market data vendor contracted by the calculation agent at such time; in particular, taking into account the decimal precision and/or rounding convention employed by such licensed third-party market data vendor on such date. Currently, the calculation agent obtains market data

from Thomson Reuters Ltd., but the calculation agent may change its market data vendor at any time without notice. The foregoing provisions of this definition of “closing level” are subject to the provisions set forth herein under “Additional Terms of the Securities—Market Disruption Events,” “—Adjustments to the Underlier” and “—Discontinuance

PRS-2

of the Underlier.”

**Final Underlier Level:** The “final underlier level” will be the closing level of the underlier on the determination date.

**Underlier Return:** The “underlier return” will be the *quotient* of (i) the final underlier level *minus* the initial underlier level *divided* by (ii) the initial underlier level, expressed as a percentage.

**Maximum Settlement Amount:** The “maximum settlement amount” is 123.22% of the face amount per security (\$1,232.20 per security). As a result of the maximum settlement amount, the maximum return on the face amount of the securities at maturity will be 23.22% of the face amount.

**Cap Level:** The “cap level” is 3,319.12452, which is 112.90% of the initial underlier level.

**Buffer Level:** 2,498.898, which is equal to 85% of the initial underlier level.

**Buffer Amount:** 15%

**Buffer Rate:** The “buffer rate” is equal to the initial underlier level divided by the buffer level, or 100% divided by 85%, which is approximately 1.1765.

**Upside Participation Rate:** 1.8

The determination date is July 12, 2021. If the originally scheduled determination date is not a trading day, the determination date will be postponed to the next succeeding trading day. The determination date is also subject to postponement due to the occurrence of a market disruption event. See “Additional Terms of the Securities—Market Disruption Events.”

**Calculation Agent:** Wells Fargo Securities, LLC

**No Listing:** The securities will not be listed on any securities exchange or automated quotation system.

**Material Tax Consequences:** For a discussion of the material U.S. federal income and certain estate tax consequences of the ownership and disposition of the securities, see “United States Federal Tax Considerations.”

Wells Fargo Securities, LLC, an affiliate of Wells Fargo Finance LLC and a wholly owned subsidiary of Wells Fargo & Company. The agent may resell the securities to other securities dealers at the original offering price of the securities.

**Agent:** The agent or another affiliate of ours expects to realize hedging profits projected by its proprietary pricing models to the extent it assumes the risks inherent in hedging our obligations under the securities. If any dealer participating in the distribution of the securities or any of its affiliates conducts hedging activities for us in connection with the securities, that dealer or its affiliate will expect to realize a profit projected by its proprietary pricing models from such hedging activities. Any such projected profit will be in addition to any discount or concession received in connection with the sale of the securities to you.

**Denominations:** \$1,000 and any integral multiple of \$1,000.

**CUSIP:** 95001H4Z1

**Additional Information about the Issuer, the Guarantor and the Securities**

You should read this pricing supplement together with the market measure supplement dated May 18, 2018, the prospectus supplement dated May 18, 2018 and the prospectus dated April 5, 2019 for additional information about the securities. When you read the accompanying market measure supplement and prospectus supplement, please note that all references in such supplements to the prospectus dated April 27, 2018, or to any sections therein, should refer instead to the accompanying prospectus dated April 5, 2019 or to the corresponding sections of such prospectus, as applicable. Information included in this pricing supplement supersedes information in the market measure supplement, prospectus supplement and prospectus to the extent it is different from that information. Certain defined terms used but not defined herein have the meanings set forth in the prospectus supplement.

When we refer to “we,” “us” or “our” in this pricing supplement, we refer only to Wells Fargo Finance LLC and not to any of its affiliates, including Wells Fargo & Company.

You may access the market measure supplement, prospectus supplement and prospectus on the SEC website [www.sec.gov](http://www.sec.gov) as follows (or if such address has changed, by reviewing our filing for the relevant date on the SEC website):

Market Measure Supplement dated May 18, 2018:

## Estimated Value of the Securities

The original offering price of each security includes certain costs that are borne by you. Because of these costs, the estimated value of the securities on the trade date is less than the original offering price. The costs included in the original offering price relate to selling, structuring, hedging and issuing the securities, as well as to our funding considerations for debt of this type.

The costs related to selling, structuring, hedging and issuing the securities include (i) the agent discount (if any), (ii) the projected profit that our hedge counterparty (which may be one of our affiliates or a dealer participating in the distribution of the securities) expects to realize for assuming risks inherent in hedging our obligations under the securities and (iii) hedging and other costs relating to the offering of the securities.

Our funding considerations take into account the higher issuance, operational and ongoing management costs of market-linked debt such as the securities as compared to conventional debt of Wells Fargo & Company of the same maturity, as well as our and our affiliates' liquidity needs and preferences. Our funding considerations are reflected in the fact that we determine the economic terms of the securities based on an assumed rate that is generally lower than our internal funding rate, which is described below and is used in determining the estimated value of the securities.

If the costs relating to selling, structuring, hedging and issuing the securities were lower, or if the assumed rate we use to determine the economic terms of the securities were higher, the economic terms of the securities would be more favorable to you and the estimated value would be higher. The estimated value of the securities as of the trade date is set forth on the cover page of this pricing supplement.

### *Determining the estimated value*

Our affiliate, Wells Fargo Securities, LLC ("WFS"), calculated the estimated value of the securities set forth on the cover page of this pricing supplement based on its proprietary pricing models. Based on these pricing models and related market inputs and assumptions referred to in this section below, WFS determined an estimated value for the securities by estimating the value of the combination of hypothetical financial instruments that would replicate the payout on the securities, which combination consists of a non-interest bearing, fixed-income bond (the "debt component") and one or more derivative instruments underlying the economic terms of the securities (the "derivative component").

The estimated value of the debt component is based on an internal funding rate that reflects, among other things, our and our affiliates' view of the funding value of the securities. This rate is used for purposes of determining the estimated value of the securities since we expect secondary market prices, if any, for the securities that are provided by WFS or any of its affiliates to generally reflect such rate. WFS determined the estimated value of the securities based on this internal funding rate, rather than the assumed rate that we use to determine the economic terms of the securities, for the same reason.

WFS calculated the estimated value of the derivative component based on a proprietary derivative-pricing model, which generated a theoretical price for the derivative instruments that constitute the derivative component based on various inputs, including the "derivative component factors" identified in "Risk Factors—The Value Of The Securities Prior To Stated Maturity Will Be Affected By Numerous Factors, Some Of Which Are Related In Complex Ways." These inputs may be market-observable or may be based on assumptions made by WFS in its discretion.

The estimated value of the securities determined by WFS is subject to important limitations. See "Risk Factors—The Estimated Value Of The Securities Is Determined By Our Affiliate's Pricing Models, Which May Differ From Those Of Other Dealers" and "Risk Factors—Our Economic Interests And Those Of Any Dealer Participating In The Offering Are Potentially Adverse To Your Interests."

*Valuation of the securities after issuance*

The estimated value of the securities is not an indication of the price, if any, at which WFS or any other person may be willing to buy the securities from you in the secondary market. The price, if any, at which WFS or any of its affiliates may purchase the securities in the secondary market will be based upon WFS's proprietary pricing models and will fluctuate over the term of the securities due to changes in market conditions and other relevant factors. However, absent changes in these market conditions and other relevant factors, except as otherwise described in the following paragraph, any secondary market price will be lower than the estimated value on the trade date because the secondary market price will be reduced by a bid-offer spread, which may vary depending on the aggregate face amount of the securities to be purchased in the secondary market transaction, and the expected cost of unwinding any related hedging transactions. Accordingly, unless market conditions and other relevant factors change significantly in your favor, any secondary market price for the securities is likely to be less than the original offering price.

If WFS or any of its affiliates makes a secondary market in the securities at any time up to the original issue date or during the 3-month period following the trade date, the secondary market price offered by WFS or any of its affiliates will be

PRS-5

increased by an amount reflecting a portion of the costs associated with selling, structuring, hedging and issuing the securities that are included in the original offering price. Because this portion of the costs is not fully deducted upon issuance, any secondary market price offered by WFS or any of its affiliates during this period will be higher than it would be if it were based solely on WFS's proprietary pricing models less the bid-offer spread and hedging unwind costs described above. The amount of this increase in the secondary market price will decline steadily to zero over this 3-month period. If you hold the securities through an account at WFS or any of its affiliates, we expect that this increase will also be reflected in the value indicated for the securities on your brokerage account statement.

If WFS or any of its affiliates makes a secondary market in the securities, WFS expects to provide those secondary market prices to any unaffiliated broker-dealers through which the securities are held and to commercial pricing vendors. If you hold your securities through an account at a broker-dealer other than WFS or any of its affiliates, that broker-dealer may obtain market prices for the securities from WFS (directly or indirectly), but could also obtain such market prices from other sources, and may be willing to purchase the securities at any given time at a price that differs from the price at which WFS or any of its affiliates is willing to purchase the securities. As a result, if you hold your securities through an account at a broker-dealer other than WFS or any of its affiliates, the value of the securities on your brokerage account statement may be different than if you held your securities at WFS or any of its affiliates.

The securities will not be listed or displayed on any securities exchange or any automated quotation system. Although WFS and/or its affiliates may buy the securities from investors, they are not obligated to do so and are not required to make a market for the securities. There can be no assurance that a secondary market will develop.

PRS-6

## Investor Considerations

We have designed the securities for investors who:

seek leveraged exposure at the upside participation rate to any upside performance of the underlier, as measured by the extent (if any) to which the final underlier level is greater than the initial underlier level, subject to the maximum settlement amount;

desire payment of the face amount at maturity so long as the final underlier level is not less than the initial underlier level by more than the buffer amount;

desire to moderate any decline from the initial underlier level to the final underlier level in excess of the buffer amount through the buffer feature;

understand that the ability of the buffer feature to moderate any decline in the underlier in excess of the buffer amount is progressively reduced as the final underlier level declines because they will be exposed on a leveraged basis to any decline in the underlier in excess of the buffer amount;

understand that if the final underlier level is less than the initial underlier level by more than the buffer amount, they will be exposed to the decrease in the underlier from the initial underlier level, subject to the buffer feature, and will lose some, and possibly all, of the face amount of the securities;

are willing to forgo interest payments on the securities and dividends on securities included in the underlier; and  
are willing to hold the securities until maturity.

The securities are not designed for, and may not be a suitable investment for, investors who:

seek a liquid investment or are unable or unwilling to hold the securities to maturity;

are unwilling to accept the risk that the final underlier level may decrease from the initial underlier level by more than the buffer amount;

seek uncapped exposure to the upside performance of the underlier;

seek certainty of receiving the face amount of the securities at stated maturity;

are unwilling to purchase securities with an estimated value as of the trade date that is lower than the original offering price, as set forth on the cover page;

seek current income;

are unwilling to accept the risk of exposure to the large-capitalization segment of the United States equity market;

seek exposure to the underlier but are unwilling to accept the risk/return trade-offs inherent in the payment at stated maturity for the securities;

are unwilling to accept the credit risk of Wells Fargo Finance LLC and Wells Fargo & Company to obtain exposure to the underlier generally, or to the exposure to the underlier that the securities provide specifically; or

prefer the lower risk of fixed income investments with comparable maturities issued by companies with comparable credit ratings.

PRS-7

**Hypothetical Payout Profile**

The following profile is based on a maximum settlement amount of 123.22% of the face amount or \$1,232.20 per security, an upside participation rate of 1.8, a buffer level equal to 85% of the initial underlier level, a buffer rate of approximately 1.1765 and a buffer amount of 15%. This graph has been prepared for purposes of illustration only. Your actual return will depend on the actual final underlier level and whether you hold your securities to maturity.

PRS-8

## **Risk Factors**

The securities have complex features and investing in the securities will involve risks not associated with an investment in conventional debt securities. You should carefully consider the risk factors set forth below as well as the other information contained in this pricing supplement and the accompanying market measure supplement, prospectus supplement and prospectus, including the documents they incorporate by reference. As described in more detail below, the value of the securities may vary considerably before the stated maturity date due to events that are difficult to predict and are beyond our control. You should reach an investment decision only after you have carefully considered with your advisors the suitability of an investment in the securities in light of your particular circumstances.

### **You May Lose Up To All Of Your Investment.**

We will not repay you a fixed amount on the securities on the stated maturity date. The cash settlement amount will depend on the direction of and percentage change in the final underlier level relative to the initial underlier level and the other terms of the securities. Because the level of the underlier will be subject to market fluctuations, the cash settlement amount you receive may be more or less, and possibly significantly less, than the original offering price of your securities.

If the final underlier level is less than the initial underlier level by more than the buffer amount, the cash settlement amount will be less than the face amount per security and you will be exposed on a leveraged basis to the decline in the underlier beyond the buffer amount. As a result, you may receive less than, and possibly lose all of, the face amount per security at maturity even if the level of the underlier is greater than or equal to the initial underlier level or the buffer level at certain points during the term of the securities.

Even if the final underlier level is greater than the initial underlier level, the amount you receive at stated maturity may only be slightly greater than the face amount, and your yield on the securities may be less than the yield you would earn if you bought a traditional interest-bearing debt security of Wells Fargo Finance LLC or another issuer with a similar credit rating with the same stated maturity date.

### **Your Return Will Be Limited By The Maximum Settlement Amount And May Be Lower Than The Return On A Direct Investment In The Underlier.**

Your return on the securities will be subject to a maximum settlement amount. The opportunity to participate in the possible increases in the level of the underlier through an investment in the securities will be limited because the cash settlement amount will not exceed the maximum settlement amount. Furthermore, the effect of the upside participation rate will be progressively reduced for all final underlier levels exceeding the final underlier level at which the maximum settlement amount is reached, which we refer to as the cap level.

### **No Periodic Interest Will Be Paid On The Securities.**

No periodic payments of interest will be made on the securities. However, if the agreed-upon tax treatment is successfully challenged by the Internal Revenue Service (the “IRS”), you may be required to recognize taxable income over the term of the securities. You should review the section of this pricing supplement entitled “United States Federal Tax Considerations.”

### **The Securities Are Subject To Credit Risk.**

The securities are our obligations, are fully and unconditionally guaranteed by the Guarantor and are not, either directly or indirectly, an obligation of any other third party. Any amounts payable under the securities are subject to creditworthiness, and you will have no ability to pursue any securities included in the underlier for payment. As a

result, our and the Guarantor's actual and perceived creditworthiness may affect the value of the securities and, in the event we and the Guarantor were to default on the obligations under the securities and the guarantee, you may not receive any amounts owed to you under the terms of the securities.

**As A Finance Subsidiary, We Have No Independent Operations And Will Have No Independent Assets.**

As a finance subsidiary, we have no independent operations beyond the issuance and administration of our securities and will have no independent assets available for distributions to the holders of our securities if they make claims in respect of such securities in a bankruptcy, resolution or similar proceeding. Accordingly, any recoveries by such holders will be limited to those available under the related guarantee by the Guarantor and that guarantee will rank *pari passu* with all other unsecured, unsubordinated obligations of the Guarantor. Holders will have recourse only to a single claim against the Guarantor and its assets under the guarantee. Holders of the securities should accordingly assume that in any such proceedings they would not have any priority over and should be treated *pari passu* with the claims of other unsecured, unsubordinated creditors of the Guarantor, including holders of unsecured, unsubordinated debt securities issued by the Guarantor.

PRS-9

**Holders Of The Securities Have Limited Rights Of Acceleration.**

Payment of principal on the securities may be accelerated only in the case of payment defaults that continue for a period of 30 days, certain events of bankruptcy or insolvency relating to Wells Fargo Finance LLC only, whether voluntary or involuntary, certain situations under which the guarantee ceases to be in full force and effect or if the Guarantor denies or disaffirms its obligations under the guarantee. If you purchase the securities, you will have no right to accelerate the payment of principal on the securities if we fail in the performance of any of our obligations under the securities, other than the obligations to pay principal and interest on the securities. See “Description of Debt Securities of Wells Fargo Finance LLC—Events of Default and Covenant Breaches” in the accompanying prospectus.

**Holders Of The Securities Could Be At Greater Risk For Being Structurally Subordinated If Either We Or The Guarantor Convey, Transfer Or Lease All Or Substantially All Of Our Or Its Assets To One Or More Of The Guarantor’s Subsidiaries.**

Under the indenture, we may convey, transfer or lease all or substantially all of our assets to one or more of the Guarantor’s subsidiaries. Similarly, the Guarantor may convey, transfer or lease all or substantially all of its assets to one or more of its subsidiaries. In either case, third-party creditors of the Guarantor’s subsidiaries would have additional assets from which to recover on their claims while holders of the securities would be structurally subordinated to creditors of the Guarantor’s subsidiaries with respect to such assets. See “Description of Debt Securities of Wells Fargo Finance LLC—Consolidation, Merger or Sale” in the accompanying prospectus.

**The Securities Will Not Have The Benefit Of Any Cross-Default Or Cross-Acceleration With Other Indebtedness Of The Guarantor; Events Of Bankruptcy, Insolvency, Receivership Or Liquidation Relating To The Guarantor And Failure By The Guarantor To Perform Any Of Its Covenants Or Warranties (Other Than A Payment Default Under The Guarantee) Will Not Constitute An Event Of Default With Respect To The Securities.**

The securities will not have the benefit of any cross-default or cross-acceleration with other indebtedness of the Guarantor. In addition, events of bankruptcy, insolvency, receivership or liquidation relating to the Guarantor and failure by the Guarantor to perform any of its covenants or warranties (other than a payment default under the guarantee) will not constitute an event of default with respect to the securities.

**The Estimated Value Of The Securities On The Trade Date, Based On WFS’s Proprietary Pricing Models, Is Less Than The Original Offering Price.**

The original offering price of the securities includes certain costs that are borne by you. Because of these costs, the estimated value of the securities on the trade date is less than the original offering price. The costs included in the original offering price relate to selling, structuring, hedging and issuing the securities, as well as to our funding considerations for debt of this type. The costs related to selling, structuring, hedging and issuing the securities include (i) the agent discount (if any), (ii) the projected profit that our hedge counterparty (which may be one of our affiliates or a dealer participating in the distribution of the securities) expects to realize for assuming risks inherent in hedging our obligations under the securities and (iii) hedging and other costs relating to the offering of the securities. Our funding considerations are reflected in the fact that we determine the economic terms of the securities based on an assumed rate that is generally lower than our internal funding rate, which is described above under “Estimated Value of the Securities—Determining the estimated value.” If the costs relating to selling, structuring, hedging and issuing the securities were lower, or if the assumed rate we use to determine the economic terms of the securities were higher, the economic terms of the securities would be more favorable to you and the estimated value would be higher.

**The Estimated Value Of The Securities Is Determined By Our Affiliate’s Pricing Models, Which May Differ From Those Of Other Dealers.**

The estimated value of the securities was determined for us by WFS using its proprietary pricing models and related market inputs and assumptions referred to above under “Estimated Value of the Securities—Determining the estimated value.” Certain inputs to these models may be determined by WFS in its discretion. WFS’s views on these inputs may differ from other dealers’ views, and WFS’s estimated value of the securities may be higher, and perhaps materially higher, than the estimated value of the securities that would be determined by other dealers in the market. WFS’s models and its inputs and related assumptions may prove to be wrong and therefore not an accurate reflection of the value of the securities.

**The Estimated Value Of The Securities Is Not An Indication Of The Price, If Any, At Which WFS Or Any Other Person May Be Willing To Buy The Securities From You In The Secondary Market.**

The price, if any, at which WFS or any of its affiliates may purchase the securities in the secondary market will be based on WFS’s proprietary pricing models and will fluctuate over the term of the securities as a result of changes in the market and other factors described in the next risk factor. Any such secondary market price for the securities will also be reduced by a bid-offer spread, which may vary depending on the aggregate face amount of the securities to be purchased in the secondary market transaction, and the expected cost of unwinding any related hedging transactions. Unless the factors

PRS-10

described in the next risk factor change significantly in your favor, any such secondary market price for the securities is likely to be less than the original offering price.

If WFS or any of its affiliates makes a secondary market in the securities at any time up to the original issue date or during the 3-month period following the trade date, the secondary market price offered by WFS or any of its affiliates will be increased by an amount reflecting a portion of the costs associated with selling, structuring, hedging and issuing the securities that are included in the original offering price. Because this portion of the costs is not fully deducted upon issuance, any secondary market price offered by WFS or any of its affiliates during this period will be higher than it would be if it were based solely on WFS's proprietary pricing models less the bid-offer spread and hedging unwind costs described above. The amount of this increase in the secondary market price will decline steadily to zero over this 3-month period. If you hold the securities through an account at WFS or any of its affiliates, we expect that this increase will also be reflected in the value indicated for the securities on your brokerage account statement. If you hold your securities through an account at a broker-dealer other than WFS or any of its affiliates, the value of the securities on your brokerage account statement may be different than if you held your securities at WFS or any of its affiliates, as discussed above under "Estimated Value of the Securities—Valuation of the securities after issuance."

**The Value Of The Securities Prior To Stated Maturity Will Be Affected By Numerous Factors, Some Of Which Are Related In Complex Ways.**

The value of the securities prior to stated maturity will be affected by the level of the underlier at that time, interest rates at that time and a number of other factors, some of which are interrelated in complex ways. The effect of any one factor may be offset or magnified by the effect of another factor. The following factors, which we refer to as the "derivative component factors," are expected to affect the value of the securities. When we refer to the "value" of your security, we mean the value that you could receive for your security if you are able to sell it in the open market before the stated maturity date.

**Underlier Performance.** The value of the securities prior to maturity will depend substantially on the then-current level of the underlier. The price at which you may be able to sell the securities before stated maturity may be at a discount, which could be substantial, from their original offering price, if the level of the underlier at such time is less than, equal to or not sufficiently above the initial underlier level.

**Interest Rates.** The value of the securities may be affected by changes in the interest rates in the U.S. markets.

**Volatility Of The Underlier.** Volatility is the term used to describe the size and frequency of market fluctuations. The value of the securities may be affected if the volatility of the underlier changes.

**Time Remaining To Maturity.** The value of the securities at any given time prior to maturity will likely be different from that which would be expected based on the then-current level of the underlier. This difference will most likely reflect a discount due to expectations and uncertainty concerning the level of the underlier during the period of time still remaining to the stated maturity date. In general, as the time remaining to maturity decreases, the value of the securities will approach the amount that could be payable at maturity based on the then-current level of the underlier.

**Dividend Yields On The Securities Included In The Underlier.** The value of the securities may be affected by the dividend yields on securities included in the underlier.

In addition to the derivative component factors, the value of the securities will be affected by actual or anticipated changes in our and the Guarantor's creditworthiness. You should understand that the impact of one of the factors specified above, such as a change in interest rates, may offset some or all of any change in the value of the securities attributable to another factor, such as a change in the level of the underlier. Because several factors are expected to affect the value of the securities, changes in the level of the underlier may not result in a comparable change in the value of the securities. We anticipate that the value of the securities will always be at a discount to the maximum settlement amount.

**The Securities Will Not Be Listed On Any Securities Exchange And We Do Not Expect A Trading Market For The Securities To Develop.**

The securities will not be listed or displayed on any securities exchange or any automated quotation system. Although the agent and/or its affiliates may purchase the securities from holders, they are not obligated to do so and are not required to make a market for the securities. There can be no assurance that a secondary market will develop. Because we do not expect that any market makers will participate in a secondary market for the securities, the price at which you may be able to sell your securities is likely to depend on the price, if any, at which the agent is willing to buy your securities.

If a secondary market does exist, it may be limited. Accordingly, there may be a limited number of buyers if you decide to sell your securities prior to stated maturity. This may affect the price you receive upon such sale. Consequently, you should be willing to hold the securities to stated maturity.

PRS-11

**Your Return On The Securities Could Be Less Than If You Owned Securities Included In The Underlier.**

Your return on the securities will not reflect the return you would realize if you actually owned the securities included in the underlier and received the dividends and other payments paid on those securities. This is in part because the cash settlement amount payable at stated maturity will be determined by reference to the final underlier level, which will be calculated by reference to the prices of the securities in the underlier without taking into consideration the value of dividends and other payments paid on those securities. In addition, the cash settlement amount will not be greater than the maximum settlement amount.

**Historical Levels Of The Underlier Should Not Be Taken As An Indication Of The Future Performance Of The Underlier During The Term Of The Securities.**

The trading prices of the securities included in the underlier will determine the cash settlement amount payable at maturity to you. As a result, it is impossible to predict whether the closing level of the underlier will fall or rise compared to the initial underlier level. Trading prices of the securities included in the underlier will be influenced by complex and interrelated political, economic, financial and other factors that can affect the markets in which those securities are traded and the values of those securities themselves. Accordingly, any historical levels of the underlier do not provide an indication of the future performance of the underlier.

**Changes That Affect The Underlier May Adversely Affect The Value Of The Securities And The Amount You Will Receive At Stated Maturity.**

The policies of the underlier sponsor concerning the calculation of the underlier and the addition, deletion or substitution of securities comprising the underlier and the manner in which the underlier sponsor takes account of certain changes affecting such securities may affect the level of the underlier and, therefore, may affect the value of the securities and the cash settlement amount payable at maturity. The underlier sponsor may discontinue or suspend calculation or dissemination of the underlier or materially alter the methodology by which it calculates the underlier. Any such actions could adversely affect the value of the securities.

**We Cannot Control Actions By Any Of The Unaffiliated Companies Whose Securities Are Included In The Underlier.**

Actions by any company whose securities are included in the underlier may have an adverse effect on the price of its security, the final underlier level and the value of the securities. Our parent company, Wells Fargo & Company, is currently one of the companies included in the underlier, but neither we nor the Guarantor are affiliated with any of the other companies included in the underlier. The unaffiliated companies included in the underlier will have no obligations with respect to the securities, including any obligation to take our or your interests into consideration for any reason. These companies will not receive any of the proceeds of the offering of the securities and will not be responsible for, and will not have participated in, the determination of the timing of, prices for, or quantities of, the securities to be issued. These companies will not be involved with the administration, marketing or trading of the securities and will have no obligations with respect to any amounts to be paid to you on the securities.

**We And Our Affiliates Have No Affiliation With The Underlier Sponsor And Have Not Independently Verified Its Public Disclosure Of Information.**

We and our affiliates are not affiliated in any way with the underlier sponsor and have no ability to control or predict its actions, including any errors in or discontinuation of disclosure regarding the methods or policies relating to the

calculation of the underlier. We have derived the information about the underlier sponsor and the underlier contained in this pricing supplement and the accompanying market measure supplement from publicly available information, without independent verification. You, as an investor in the securities, should make your own investigation into the underlier and the underlier sponsor. The underlier sponsor is not involved in the offering of the securities made hereby in any way and has no obligation to consider your interest as an owner of the securities in taking any actions that might affect the value of the securities.

**The Stated Maturity Date Will Be Postponed If The Determination Date Is Postponed.**

The determination date will be postponed if the calculation agent determines that a market disruption event has occurred or is continuing on the determination date or if the originally scheduled determination date is not a trading day. If such a postponement occurs, the stated maturity date will be postponed until two business days after the postponed determination date.

**Our And The Guarantor's Economic Interests And Those Of Any Dealer Participating In The Offering Are Potentially Adverse To Your Interests.**

PRS-12

You should be aware of the following ways in which our and the Guarantor's economic interests and those of any dealer participating in the distribution of the securities, which we refer to as a "participating dealer," are potentially adverse to your interests as an investor in the securities. In engaging in certain of the activities described below, our affiliates or any participating dealer or its affiliates may take actions that may adversely affect the value of and your return on the securities, and in so doing they will have no obligation to consider your interests as an investor in the securities. Our affiliates or any participating dealer or its affiliates may realize a profit from these activities even if investors do not receive a favorable investment return on the securities.

***The calculation agent is our affiliate and may be required to make discretionary judgments that affect the return you receive on the securities.*** WFS, which is our affiliate, will be the calculation agent for the securities. As calculation agent, WFS will determine the final underlier level and may be required to make other determinations that affect the return you receive on the securities at maturity. In making these determinations, the calculation agent may be required to make discretionary judgments, including determining whether a market disruption event has occurred on the scheduled determination date, which may result in postponement of the determination date; determining the final underlier level if the determination date is postponed to the last day to which it may be postponed and a market disruption event occurs on that day; if the underlier is discontinued, selecting a successor underlier or, if no successor underlier is available, determining the final underlier level; and determining whether to adjust the closing level on the determination date in the event of certain changes in or modifications to the underlier. In making these discretionary judgments, the fact that WFS is our affiliate may cause it to have economic interests that are adverse to your interests as an investor in the securities, and WFS's determinations as calculation agent may adversely affect your return on the securities.

***The estimated value of the securities was calculated by our affiliate and is therefore not an independent third-party valuation.*** WFS calculated the estimated value of the securities set forth on the cover page of this pricing supplement, which involved discretionary judgments by WFS, as described under "Risk Factors—The Estimated Value Of The Securities Is Determined By Our Affiliate's Pricing Models, Which May Differ From Those Of Other Dealers" above. Accordingly, the estimated value of the securities set forth on the cover page of this pricing supplement is not an independent third-party valuation.

***Research reports by our affiliates or any participating dealer or its affiliates may be inconsistent with an investment in the securities and may adversely affect the level of the underlier.*** Our affiliates or any dealer participating in the offering of the securities or its affiliates may, at present or in the future, publish research reports on the underlier or the companies whose securities are included in the underlier. This research is modified from time to time without notice and may, at present or in the future, express opinions or provide recommendations that are inconsistent with purchasing or holding the securities. Any research reports on the underlier or the companies whose securities are included in the underlier could adversely affect the level of the underlier and, therefore, adversely affect the value of and your return on the securities. You are encouraged to derive information concerning the underlier from multiple sources and should not rely on the views expressed by us or our affiliates or any participating dealer or its affiliates. In addition, any research reports on the underlier or the companies whose securities are included in the underlier published on or prior to the trade date could result in an increase in the level of the underlier on the trade date, which would adversely affect investors in the securities by increasing the level at which the underlier must close on the determination date in order for investors in the securities to receive a favorable return.

***Business activities of our affiliates or any participating dealer or its affiliates with the companies whose securities are included in the underlier may adversely affect the level of the underlier.*** Our affiliates or any participating dealer or its affiliates may, at present or in the future, engage in business with the companies whose securities are included in the underlier, including making loans to those companies (including exercising creditors' remedies with respect to such loans), making equity investments in those companies or providing investment banking, asset management or other advisory services to those companies. These business activities could adversely affect the level of the underlier and, therefore, adversely affect the value of and your return on the securities. In addition, in the course of these business activities, our affiliates or any participating dealer or its affiliates may acquire non-public information about one or more of the companies whose securities are included in the underlier. If our affiliates or any participating dealer or its affiliates do acquire such non-public information, we and they are not obligated to disclose such non-public information to you.

***Hedging activities by our affiliates or any participating dealer or its affiliates may adversely affect the level of the underlier.*** We expect to hedge our obligations under the securities through one or more hedge counterparties, which may include our affiliates or any participating dealer or its affiliates. Pursuant to such hedging activities, our hedge counterparties may acquire securities included in the underlier or listed or over-the-counter derivative or synthetic instruments related to the underlier or such securities. Depending on, among other things, future market conditions, the aggregate amount and the composition of such positions are likely to vary over time. To the extent that our hedge counterparties have a long hedge position in any of the securities

PRS-13

included in the underlier, or derivative or synthetic instruments related to the underlier or such securities, they may liquidate a portion of such holdings at or about the time of the determination date or at or about the time of a change in the securities included in the underlier. These hedging activities could potentially adversely affect the level of the underlier and, therefore, adversely affect the value of and your return on the securities.

***Trading activities by our affiliates or any participating dealer or its affiliates may adversely affect the level of the underlier.*** Our affiliates or any participating dealer or its affiliates may engage in trading in the securities included in the underlier and other instruments relating to the underlier or such securities on a regular basis as part of their general broker-dealer and other businesses. Any of these trading activities could potentially adversely affect the level of the underlier and, therefore, adversely affect the value of and your return on the securities.

***A participating dealer or its affiliates may realize hedging profits projected by its proprietary pricing models in addition to any selling concession, creating a further incentive for the participating dealer to sell the securities to you.*** If any participating dealer or any of its affiliates conducts hedging activities for us in connection with the securities, that participating dealer or its affiliates will expect to realize a projected profit from such hedging activities. If a participating dealer receives a concession for the sale of the securities to you, this projected hedging profit will be in addition to the concession, creating a further incentive for the participating dealer to sell the securities to you.

**The U.S. Federal Tax Consequences Of An Investment In The Securities Are Unclear.**

There is no direct legal authority regarding the proper U.S. federal tax treatment of the securities, and we do not plan to request a ruling from the IRS. Consequently, significant aspects of the tax treatment of the securities are uncertain, and the IRS or a court might not agree with the treatment of the securities as prepaid derivative contracts that are “open transactions” for U.S. federal income tax purposes. If the IRS were successful in asserting an alternative treatment of the securities, the tax consequences of the ownership and disposition of the securities might be materially and adversely affected.

Section 871(m) of the Internal Revenue Code of 1986, as amended (the “Code”), imposes a withholding tax of up to 30% on “dividend equivalents” paid or deemed paid to non-U.S. investors in respect of certain financial instruments linked to U.S. equities. In light of Treasury regulations, as modified by an IRS notice, that provide a general exemption for financial instruments issued prior to January 1, 2021 that do not have a “delta” of one, the securities should not be subject to withholding under Section 871(m). However, the IRS could challenge this conclusion. If withholding applies to the securities, we will not be required to pay any additional amounts with respect to amounts withheld.

In addition, in 2007 the U.S. Treasury Department and the IRS released a notice requesting comments on various issues regarding the U.S. federal income tax treatment of “prepaid forward contracts” and similar instruments. Any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the securities, including the character and timing of income or loss and the degree, if any, to which income realized by non-U.S. persons should be subject to withholding tax, possibly with retroactive effect. You should read carefully the discussion under “United States Federal Tax Considerations” in this pricing supplement. You should also consult your tax adviser regarding the U.S. federal tax consequences of an investment in the securities, as well as tax consequences arising under the laws of any state, local or non-U.S. taxing jurisdiction.

**Determining Payment at Stated Maturity**

On the stated maturity date, you will receive a cash payment per security (the cash settlement amount) calculated as follows:

PRS-15

**Hypothetical Returns**

The following table illustrates, for a range of hypothetical final underlier levels:

the hypothetical percentage change from the initial underlier level to the hypothetical final underlier level; and  
the hypothetical pre-tax total return.

<b>Hypothetical underlier return</b>	<b>Hypothetical pre-tax total return</b>
50.00%	23.22%
40.00%	23.22%
30.00%	23.22%
20.00%	23.22%
<b>12.90%</b>	<b>23.22%</b>
10.00%	18.00%
5.00%	9.00%
<b>0.00%</b>	<b>0.00%</b>
-5.00%	0.00%
-10.00%	0.00%
<b>-15.00%</b>	<b>0.00%</b>
-16.00%	-1.18%
-25.00%	-11.76%
-50.00%	-41.18%
-75.00%	-70.59%
<b>-100.00%</b>	<b>-100.00%</b>

The above figures are for purposes of illustration only and may have been rounded for ease of analysis. The actual amount you receive at stated maturity and the resulting pre-tax return will depend on the actual final underlier level.

If, for example, the underlier return were determined to be -75.00%, the pre-tax return on your securities at maturity would be approximately -70.59%, as shown in the table above. As a result, if you purchased your securities on the original issue date at the face amount and held them to the stated maturity date, you would lose approximately 70.59% of your investment. In addition, if the underlier return were determined to be 50.00%, the cash settlement amount that we would deliver on your securities at maturity would be capped at the maximum settlement amount, and the pre-tax return on your securities would therefore be capped at 23.22%, as shown in the table above. As a result, if you held your securities to the stated maturity date, you would not benefit from any underlier return in excess of 12.90%.

## **Additional Terms of the Securities**

Wells Fargo Finance LLC will issue the securities as part of a series of senior unsecured debt securities entitled “Medium-Term Notes, Series A,” which is more fully described in the prospectus supplement. Information included in this pricing supplement supersedes information in the market measure supplement, prospectus supplement and prospectus to the extent that it is different from that information.

## **Certain Definitions**

A “trading day” means a day, as determined by the calculation agent, on which (i) the relevant stock exchanges with respect to each security underlying the underlier are scheduled to be open for trading for their respective regular trading sessions and (ii) each related futures or options exchange is scheduled to be open for trading for its regular trading session.

The “relevant stock exchange” for any security underlying the underlier means the primary exchange or quotation system on which such security is traded, as determined by the calculation agent.

The “related futures or options exchange” for the underlier means an exchange or quotation system where trading has a material effect (as determined by the calculation agent) on the overall market for futures or options contracts relating to the underlier.

## **Calculation Agent**

Wells Fargo Securities, LLC, one of our affiliates and a wholly owned subsidiary of Wells Fargo & Company, will act as initial calculation agent for the securities and may appoint agents to assist it in the performance of its duties. Pursuant to the calculation agent agreement, we may appoint a different calculation agent without your consent and without notifying you.

The calculation agent will determine the cash settlement amount you receive at stated maturity. In addition, the calculation agent will, among other things:

determine whether a market disruption event or non-trading day has occurred;

determine if adjustments are required to the closing level of the underlier under various circumstances; and  
if publication of the underlier is discontinued, select a successor underlier (as defined below) or, if no successor underlier is available, determine the closing level of the underlier.

All determinations made by the calculation agent will be at the sole discretion of the calculation agent and, in the absence of manifest error, will be conclusive for all purp
