Notes to Unaudited Interim Consolidated Financial Statements

Note 1 - Significant Accounting Policies

Business Operations

The accompanying unaudited interim consolidated financial statements of Synovus include the accounts of the Parent Company and its consolidated subsidiaries. Synovus provides integrated financial services, including commercial and retail banking, financial management, insurance, and mortgage services to its customers through locally-branded divisions of its wholly-owned subsidiary bank, Synovus Bank, in offices located throughout Georgia, Alabama, South Carolina, Florida, and Tennessee.

In addition to our banking operations, we also provide various other financial services to our customers through the following direct and indirect wholly-owned non-bank subsidiaries, including: Synovus Securities, Inc., headquartered in Columbus, Georgia, which specializes in professional portfolio management for fixed-income securities, investment banking, the execution of securities transactions as a broker/dealer and the provision of individual investment advice on equity and other securities; Synovus Trust Company, N.A., headquartered in Columbus, Georgia, which provides trust, asset management and financial planning services; and Synovus Mortgage Corp., headquartered in Birmingham, Alabama, which offers mortgage services.

Basis of Presentation

The accompanying unaudited interim consolidated financial statements have been prepared in accordance with the instructions to the SEC Form 10-Q and Article 10 of Regulation S-X; therefore, they do not include all information and footnotes necessary for a fair presentation of financial position, results of operations, comprehensive income, and cash flows in conformity with GAAP. All adjustments consisting of normally recurring accruals that, in the opinion of management, are necessary for a fair presentation of the consolidated financial position and results of operations for the periods covered by this Report have been included. The accompanying unaudited interim consolidated financial statements should be read in conjunction with the consolidated financial statements and related notes appearing in Synovus' 2012 Form 10-K. There have been no significant changes to the accounting policies as disclosed in Synovus' 2012 Form 10-K.

In preparing the unaudited interim consolidated financial statements in accordance with GAAP, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities as of the date of the respective consolidated balance sheets and the reported amounts of revenues and expenses for the periods presented. Actual results could differ significantly from those estimates.

Material estimates that are particularly susceptible to significant change relate to the determination of the allowance for loan losses; the valuation of other real estate; the fair value of investment securities; the fair value of private equity investments; and the valuation of deferred tax assets. In connection with the determination of the allowance for loan losses and the valuation of certain impaired loans and other real estate, management obtains independent appraisals for significant properties and properties collateralizing impaired loans. In making this determination, management also considers other factors or recent developments, such as changes in absorption rates or market conditions at the time of valuation and anticipated sales values based on management's plans for disposition.

Allowance for Loan Losses - Commercial Loans

During the three months ended September 30, 2013, Synovus began implementation of a Dual Risk Rating (DRR) methodology for certain components of its commercial loan portfolio. The DRR includes sixteen probabilities of default grade categories and nine grade categories for estimating losses given an event of default. The result is an expected loss (EL) rate established for each borrower. The DRR results were utilized to determine the allowance for loan losses for selected components of the loan portfolio effective September 30, 2013, as it is considered to be a more refined estimate of loss. The DRR was primarily applied to commercial and industrial loans with outstanding balances greater than \$1.0 million and total relationships above \$2.5 million, which comprises approximately \$2.4 billion of the total loan portfolio at September 30, 2013. The remaining commercial loan portfolio continues to have the single rating system applied and during 2014, the scope of DRR will expand to include C&I loans from \$500 thousand to \$1.0 million with total relationships above \$2.5 million and Income Producing Real Estate (IPRE) loans initially

above \$2.5 million, with no relationship threshold, and expanding to include loans above \$1.0 million later in the year. Implementation of the DRR methodology during the three months ended September 30, 2013 resulted in a reduction to the total allowance for loan losses of approximately \$2.5 million, which was not significant and was due to the more refined estimates of losses, as well as positive migration due to updated financial data resulting from improvements in the economy, which was not related to the DRR implementation. The initial phase of IPRE will be implemented during the first quarter of 2014 and will consist of loans above \$2.5 million, which comprises approximately \$2.0 billion of the total loan portfolio at September 30, 2013. Based on information currently available, the impact to the total allowance for loan losses from the IPRE implementation during the first quarter of 2014 is not expected to be material.

Table of Contents

Cash and Cash Equivalents

Cash and cash equivalents consist of cash and due from banks. At September 30, 2013 and December 31, 2012, cash and cash equivalents included \$94.4 million and \$68.4 million, respectively, on deposit to meet Federal Reserve Bank requirements. At September 30, 2013 and December 31, 2012, \$15.4 million and \$15.5 million, respectively, of the due from banks balance was restricted as to withdrawal, including \$15.0 million at those dates on deposit pursuant to a payment network arrangement.

Short-term Investments

Short-term investments consist of interest bearing funds with the Federal Reserve Bank, interest earning deposits with banks, and Federal funds sold and securities purchased under resale agreements. Interest earning deposits with banks include \$12.1 million at September 30, 2013 and \$14.2 million at December 31, 2012, which is pledged as collateral in connection with certain letters of credit. Federal funds sold include \$76.6 million at September 30, 2013, and \$110.0 million at December 31, 2012, which are pledged to collateralize certain derivative instruments. Federal funds sold and securities purchased under resale agreements, and Federal funds purchased and securities sold under repurchase agreements, generally mature in one day.

Recently Adopted Accounting Standards Updates

During 2013, Synovus adopted the provisions of the following ASUs:

ASU 2012-02, Testing Indefinite-Lived Intangible Assets for Impairment. This ASU relates to testing intangibles other than goodwill for impairment, and was adopted on January 1, 2013. If certain conditions are met, the ASU provides for a qualitative impairment assessment instead of a quantitative assessment. For Synovus, the ASU primarily applies to core deposit intangibles, which have a carrying value of \$2.8 million at September 30, 2013. The ASU did not have an impact on Synovus' unaudited interim consolidated financial statements.

ASU 2011-11, Disclosures about Offsetting Assets and Liabilities and ASU 2013-01, Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities. ASU 2011-11 requires additional disclosures about financial instruments and derivative instruments that are offset or subject to an enforceable master netting arrangement or similar agreement. ASU 2013-01 clarifies that the disclosure requirements of ASU 2011-11 do not apply to trade receivables. The ASU also clarifies that the disclosure requirements in ASU 2011-11 apply to repurchase and reverse repurchase agreements, securities borrowing and lending agreements that are either offset on the balance sheet or subject to an enforceable master netting arrangement or similar agreement, and derivatives accounted for in accordance with ASC 815-Derivatives and Hedging. Synovus adopted the provisions of ASU 2013-02 effective January 1, 2013 and does not have financial instruments that are subject to the new requirements of ASU 2011-11; therefore, the clarifying ASU did not affect Synovus' unaudited interim consolidated financial statements. ASU 2013-02, Reporting of Amount Reclassified Out of Accumulated Other Comprehensive Income. The FASB issued this ASU to improve the transparency of reporting reclassifications out of accumulated other comprehensive income by requiring entities to present in one place information about significant amounts reclassified and, in some cases, to provide cross-references to related footnote disclosures, ASU 2013-02 does not amend existing requirements for reporting net income or other comprehensive income in the financial statements. ASU 2013-02 requires an entity to disaggregate the total change of each component of other comprehensive income and separately present reclassification adjustments and current period other comprehensive income. The provisions of ASU 2013-02 also require that entities present either in a single footnote or parenthetically on the face of the financial statements, the effect of significant amounts reclassified from each component of accumulated other comprehensive income based on its source and the income statement line item affected by the reclassification. If a component is not required to be reclassified to net income in its entirety, entities would instead cross reference to the related footnote to the financial statements for additional information. Synovus adopted the provisions of ASU 2013-02 effective January 1, 2013. See "Note 8 - Other Comprehensive Income" to the unaudited interim consolidated financial statements for the disclosures required by ASU 2013-02.

ASU 2013-10, Derivatives and Hedging (Topic 815): Inclusion of the Fed Funds Effective Swap Rate (or Overnight Index Swap Rate) as a Benchmark Interest Rate for Hedge Accounting Purposes. This ASU permits the Fed Funds Effective Swap Rate (also referred to as the Overnight Index Swap Rate) to be used as a U.S. benchmark interest rate for hedge accounting purposes under FASB Topic 815, in addition to interest rates on direct Treasury obligations of

the U.S. government and LIBOR. The amendments also remove the restriction on using different benchmark rates for similar hedges. The final guidance, issued on July 17, 2013, was effective immediately. Synovus will consider the provisions of this new guidance when developing new hedging strategies.

Reclassifications

Prior periods' consolidated financial statements are reclassified whenever necessary to conform to the current periods' presentation.

Table of Contents

Subsequent Events

Synovus has evaluated for consideration, or disclosure, all transactions, events, and circumstances, subsequent to the date of the consolidated balance sheet and through the date the accompanying unaudited interim consolidated financial statements were issued, and has reflected, or disclosed, those items deemed appropriate within the unaudited interim consolidated financial statements.

Note 2 - Acquisition

On May 10, 2013, Synovus Bank entered into a purchase and assumption agreement with the FDIC, as receiver of Sunrise Bank, an affiliate of Capitol Bancorp Limited, to assume \$56.8 million in deposits, including all uninsured deposits. As part of this transaction, Synovus Bank also acquired \$0.5 million in loans. Other assets and liabilities acquired in connection with this transaction were insignificant. Sunrise Bank operated in three locations, including Valdosta, Jeffersonville, and Atlanta, Georgia. Acquisitions are accounted for under the acquisition method of accounting in accordance with FASB ASC 805, "Business Combinations". Both the purchased assets and assumed liabilities are recorded at their respective acquisition date fair values.

Note 3 - Investment Securities

The following table summarizes Synovus' investment securities available for sale as of September 30, 2013 and December 31, 2012.

⁽¹⁾ Amortized cost is adjusted for other-than-temporary impairment charges, which have been recognized in the consolidated statements of income.

At September 30, 2013 and December 31, 2012, investment securities with a fair value of \$2.30 billion and \$2.28 billion respectively, were pledged to secure certain deposits, securities sold under repurchase agreements, and payment network arrangements as required by law and contractual agreements.

Table of Contents

Synovus has reviewed investment securities that are in an unrealized loss position as of September 30, 2013 and December 31, 2012 for OTTI and does not consider any securities in an unrealized loss position to be other-than-temporarily impaired. If Synovus intended to sell a security in an unrealized loss position, the entire unrealized loss would be reflected in income. Synovus does not intend to sell any of these investment securities prior to the recovery of the unrealized loss, which may be until maturity, and has the ability and intent to hold those securities for that period of time. Additionally, Synovus is not currently aware of any circumstances which will require it to sell any of the securities that are in an unrealized loss position.

Declines in the fair value of available for sale securities below their cost that are deemed to have OTTI are reflected in earnings as realized losses to the extent the impairment is related to credit losses. The amount of the impairment related to other factors is recognized in other comprehensive income. Currently, unrealized losses on debt securities are attributable to increases in interest rates on comparable securities from the date of purchase. Synovus regularly evaluates its investment securities portfolio to ensure that there are no conditions that would indicate that unrealized losses represent OTTI. These factors include the length of time the security has been in a loss position, the extent that the fair value is below amortized cost, and the credit standing of the issuer. As of September 30, 2013 there were 66 securities in a loss position for less than twelve months and 3 securities in a loss position for more than 12 months. Gross unrealized losses on investment securities and the fair value of the related securities, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position, at September 30, 2013 and December 31, 2012, are presented below.

Table of Contents

The amortized cost and fair value by contractual maturity of investment securities available for sale at September 30, 2013 are shown below. The expected life of mortgage-backed securities or CMOs may differ from contractual maturities because issuers may have the right to call or prepay obligations with or without call or prepayment penalties. For purposes of the maturity table, mortgage-backed securities and CMOs, which are not due at a single maturity date, have been classified based on the final contractual maturity date.

Gain on sale of assets held for sale, n	et(55) (452) (30) (288		
Professional fees and other charges	39	177	16	21		
Total restructuring charges	\$7,295	3,444	687	1,192		

In January 2013, Synovus announced new efficiency initiatives to reduce expenses by approximately \$30 million during 2013. The implementation of these initiatives is underway and on track to be completed during 2013. During the nine and three months ended September 30, 2013, Synovus recognized restructuring charges of \$7.3 million and \$687 thousand, respectively, related to these efficiency initiatives. During the nine and three months ended September 30, 2012, Synovus recognized \$3.4 million and \$1.2 million, respectively, in restructuring charges related to previously announced efficiency initiatives.

The liability for restructuring activities was \$1.8 million at September 30, 2013 and consists primarily of future severance payments. Cash payments associated with this liability are expected to occur over the next three months. Note 5 - Other Loans Held for Sale

Loans are transferred to other loans held for sale at fair value when Synovus makes the determination to sell specifically identified loans. The fair value of the loans is primarily determined by analyzing the underlying collateral of the loan and the anticipated market prices of similar assets less estimated costs to sell. At the time of transfer, if the fair value is less than the carrying amount, the difference is recorded as a charge-off against the ALL. Decreases in the fair value subsequent to the transfer, as well as gains/losses realized from sale of these loans, are recognized as (gains) losses on other loans held for sale, net as a component of non-interest expense on the consolidated statements of income. During the nine months ended September 30, 2013 and 2012, Synovus sold loans with carrying values of \$117.8 million and \$256.2 million, respectively.

Table of Contents

Note 6 - Loans and Allowance for Loan Losses

Small business loans were previously reported as a component of retail loans. Effective September 30, 2013, small business loans are reported as a component of C&I loans. All prior periods presented have been reclassified to conform to the current presentation. As a result of reclassifying small business loans to C&I loans, there are now three loan classes within C&I loans.

The following is a summary of current, accruing past due, and non-accrual loans by portfolio class as of September 30, 2013 and December 31, 2012.

Current, Accruing Past Due, and Non-accrual Loans

The credit quality of the loan portfolio is summarized no less frequently than quarterly using the standard asset classification system utilized by the federal banking agencies. These classifications are divided into three groups – Not Criticized (Pass), Special Mention, and Classified or Adverse rating (Substandard, Doubtful, and Loss) and are defined as follows:

⁽¹⁾Total before net deferred fees and costs of \$25.0 million.

⁽²⁾Total before net deferred fees and costs of \$20.4 million.

Table of Contents

Pass - loans which are well protected by the current net worth and paying capacity of the obligor (or guarantors, if any) or by the fair value, less cost to acquire and sell in a timely manner, of any underlying collateral. Special Mention - loans which have potential weaknesses that deserve management's close attention. These loans are not adversely classified and do not expose an institution to sufficient risk to warrant an adverse classification. Substandard - loans which are inadequately protected by the current net worth and paying capacity of the obligor or by the collateral pledged, if any. Loans with this classification are characterized by the distinct possibility that the institution will sustain some loss if the deficiencies are not corrected.

Doubtful - loans which have all the weaknesses inherent in loans classified as Substandard with the added characteristic that the weaknesses make collection or liquidation in full highly questionable and improbable on the basis of currently known facts, conditions, and values.

Loss - loans which are considered by management to be uncollectible and of such little value that their continuance on the institution's books as an asset, without establishment of a specific valuation allowance or charge-off is not warranted.

Table of Contents

Total loans

In the following tables, retail loans and small business loans are classified as Pass except when they reach 90 days past due, or are downgraded to Substandard. Upon reaching 120 days past due, retail loans and small business loans are generally downgraded to Loss and charged off, in accordance with the FFIEC Uniform Retail Credit Classification and Account Management Policy. The risk grade classifications of retail loans secured by junior liens on 1-4 family residential properties also consider available information on the payment status of the associated senior lien with other financial institutions.
