STIFEL FINANCIAL CORP.

Notes to Consolidated Financial Statements

(Unaudited)

NOTE 1 – Nature of Operations and Basis of Presentation

Nature of Operations

Stifel Financial Corp. (the "Company"), through its wholly owned subsidiaries, is principally engaged in retail brokerage; securities trading; investment banking; investment advisory; retail, consumer, and commercial banking; and related financial services. We have offices throughout the United States and Europe. Our major geographic area of concentration is throughout the United States, with a growing presence in the United Kingdom and Europe. Our company's principal customers are individual investors, corporations, municipalities, and institutions.

On January 3, 2017, the Company completed the acquisition of City Financial Corporation and its wholly owned subsidiary, City Securities Corporation ("City Securities"), an independent investment bank focused primarily on offering wealth management and public finance services across the Midwest. The acquisition was funded with cash from operations and common stock.

#### **Basis of Presentation**

The consolidated financial statements include Stifel Financial Corp. and its wholly owned subsidiaries, principally Stifel, Nicolaus & Company, Incorporated ("Stifel"), Keefe, Bruyette & Woods, Inc., and Stifel Bank & Trust ("Stifel Bank"). All material intercompany balances and transactions have been eliminated. Unless otherwise indicated, the terms "we," "us," "our," or "our company" in this report refer to Stifel Financial Corp. and its wholly owned subsidiaries.

We have prepared the accompanying unaudited consolidated financial statements pursuant to the rules and regulations of the Securities and Exchange Commission (the "SEC"). Pursuant to these rules and regulations, we have omitted certain information and footnote disclosures we normally include in our annual consolidated financial statements prepared in accordance with U.S. generally accepted accounting principles. In management's opinion, we have made all adjustments (consisting only of normal, recurring adjustments, except as otherwise noted) necessary to fairly present our financial position, results of operations and cash flows. Our interim period operating results do not necessarily indicate the results that may be expected for any other interim period or for the full fiscal year. These financial statements and accompanying notes should be read in conjunction with the consolidated financial statements and the notes thereto in our Annual Report on Form 10-K for the year ended December 31, 2016 on file with the SEC.

Certain amounts from prior periods have been reclassified to conform to the current period's presentation. During the first quarter of 2017, we adopted Accounting Standards Update ("ASU") 2016-09, Compensation - Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting. Amounts previously reported for the three and six months ended June 30, 2016 have been restated as required upon adoption of the ASU. See Note 2 for further discussion.

There have been no material changes in our significant accounting policies, as compared to the significant accounting policies described in our Annual Report on Form 10-K for the year ended December 31, 2016, with the exception of the new guidance on stock-based compensation.

NOTE 2 – New Accounting Pronouncements

Recently Adopted Accounting Guidance

**Share-Based Payments** 

In March 2016, the Financial Accounting Standards Board ("FASB") issued ASU No. 2016-09, "Improvements to Employee Share-Based Payment Accounting" that requires an entity to record all excess tax benefits and tax deficiencies as an income tax benefit or expense in the income statement. The update no longer requires cash flows related to excess tax benefits to be presented as a financing activity separate from other income tax cash flows. The update also clarifies that all cash payments to taxing authorities made on an employee's behalf for withheld shares should be presented as a financing activity on the statement of cash flows and requires an entity to elect an accounting policy to either estimate the number of forfeitures or account for forfeitures when they occur. The guidance is effective for fiscal years beginning after December 15, 2016 (January 1, 2017 for our company).

We adopted the guidance in the update on January 1, 2017, and during the six months ended June 30, 2017 recognized an excess tax benefit from stock-based compensation of \$17.1 million in the provision for income taxes on the accompanying consolidated

statements of operations (adopted prospectively). Excess tax benefits from stock based compensation are now classified in operating activities on the accompanying consolidated statement of cash flows instead of being separately stated in financing activities for the six months ended June 30, 2017 (adopted prospectively). Cash paid to a tax authority by our company when withholding shares from an employee's award for tax-withholding purposes are now classified as a financing activity in the accompanying consolidated statement of cash flows (adopted retrospectively). We reclassified \$38.1 million from operating activities to financing activities in the accompanying consolidated statement of cash flows for the six months ended June 30, 2016 pertaining to shares withheld from employee awards for tax withholding purposes. Following the adoption of ASU 2016-09, we will continue to estimate forfeitures.

### Goodwill Impairment Testing

In January 2017, the FASB issued ASU No. 2017-04, "Intangibles - Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment," which simplifies the subsequent measurement of goodwill and eliminates Step 2 from the goodwill impairment test. Under the new guidance, the annual, or interim, goodwill impairment test is performed by comparing the fair value of a reporting unit with its carrying amount, and an impairment charge should be recognized for the amount by which the carrying amount exceeds the reporting unit's fair value; however, the loss recognized should not exceed the total amount of goodwill allocated to that reporting unit. In addition, income tax effects from any tax deductible goodwill on the carrying amount of the reporting unit should be considered when measuring the goodwill impairment loss, if applicable. The amendments also eliminate the requirements for any reporting unit with a zero or negative carrying amount to perform a qualitative assessment and, if it fails that qualitative test, to perform Step 2 of the goodwill impairment test. An entity still has the option to perform the qualitative assessment for a reporting unit to determine if the quantitative impairment test is necessary. The amendments are to be applied on a prospective basis. The guidance is effective for annual or any interim impairment tests in fiscal years beginning after December 15, 2019 (January 1, 2020 for our company). Early adoption is permitted. We are currently evaluating the effect that the new guidance will have on our consolidated financial statements.

#### Statement of Cash Flow – Restricted Cash

In November 2016, the FASB issued ASU 2016-18, "Statement of Cash Flow - Restricted Cash," which adds or clarifies guidance on the classification and presentation of restricted cash in the statement of cash flows. The ASU is effective for the fiscal year beginning after December 15, 2017 (January 1, 2018 for our Company). Early adoption is permitted. We are currently evaluating the effect that the new guidance will have on our consolidated financial statements.

#### Financial Instruments – Credit Losses

In June 2016, the FASB issued ASU No. 2016-13, "Financial Instruments - Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments." For trade receivables, loans, and held-to-maturity debt securities, the current probable loss recognition methodology is being replaced by an expected credit loss model. For available-for-sale debt securities, the recognition model on credit losses is generally unchanged, except the losses will be presented as an adjustable allowance. The guidance is effective for fiscal years beginning after December 15, 2019 (January 1, 2020 for our Company), including interim periods within that reporting period. Early adoption is permitted for annual periods beginning after December 15, 2018. We have been closely monitoring FASB activity related to the new standard. During the second half of 2016, we began developing a plan regarding the evaluation of the potential changes from adopting the new standard on our future financial reporting and disclosures. We expect to adopt the requirements of the new standard in the first quarter of 2020.

#### Leases

In February 2016, the FASB issued ASU No. 2016-02, "Leases" that requires lessees to recognize a right-of-use asset and a lease liability on the balance sheet for all leases with the exception of short-term leases. For lessees, leases will continue to be classified as either operating or finance leases in the income statement. Lessor accounting is similar to the current model but updated to align with certain changes to the lessee model. Lessors will continue to classify leases as operating, direct financing or sales-type leases. The new standard must be adopted using a modified retrospective transition and requires application of the new guidance at the beginning of the earliest comparative period presented. The guidance is effective for fiscal years beginning after December 15, 2018 (January 1, 2019 for our company). Early adoption is permitted. We have been closely monitoring FASB activity related to the new

standard. During the second half of 2016, we began developing a plan regarding the evaluation of the potential changes from adopting the new standard on our future financial reporting and disclosures. We also made progress on our contract reviews and detailed policy drafting. Based on our evaluation, we expect to adopt the requirements of the new standard in the first quarter of 2019 and anticipate using the modified retrospective approach.

### Financial Assets and Financial Liabilities

In January 2016, the FASB issued ASU No. 2016-01, "Recognition and Measurement of Financial Assets and Financial Liabilities" that will change the income statement impact of equity investments held by an entity, and the recognition of changes in fair value of financial liabilities when the fair value option is elected. The guidance is effective for fiscal years beginning after December 15, 2017 (January 1, 2018 for our company). We are currently evaluating the effect that the new guidance will have on our consolidated financial statements.

Revenue Recognition

In April 2016, the FASB issued ASU No. 2016-10, "Identifying Performance Obligations and Licensing" that amends the revenue guidance in ASU 2014-09 on identifying performance obligations. The effective date of the new guidance will coincide with ASU 2014-09 during the first quarter 2018.

In March 2016, the FASB issued ASU No. 2016-08, "Principal versus Agent Considerations (Reporting Revenue Gross versus Net)" ("ASU 2016-08") that amends the principal versus agent guidance in ASU 2014-09. ASU 2016-08 clarifies that the analysis must focus on whether the entity has control of the goods or services before they are transferred to the customer. ASU 2016-08 also provides additional guidance about how to apply the control principle when services are provided and when goods or services are combined with other goods or services. The effective date of the standard for the Company will coincide with ASU 2014-09 during the first quarter 2018.

In May 2014, the FASB issued ASU No. 2014-09, "Revenue from Contracts with Customers (Topic 606)," ("ASU 2014-09") that supersedes current revenue recognition guidance, including most industry-specific guidance. ASU 2014-09 requires a company to recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods and services. The guidance also requires additional disclosures regarding the nature, amount, timing and uncertainty of revenue that is recognized. The FASB has approved a one year deferral of this standard, and this pronouncement is now effective for annual reporting periods beginning after December 15, 2017, including interim periods within that reporting period and is to be applied using one of two retrospective application methods, with early application not permitted.

We have been closely monitoring FASB activity related to the new standard. Our implementation efforts include the identification of revenue within the scope of the guidance, and the potential impact on its consolidated results of operations and disclosures. The current broker dealer industry treatment of netting deal expenses with investment banking revenues, the timing of performance fee recognition related to consolidated alternative asset management entities, and fees received for equity research may be impacted by the new guidance. We are also evaluating whether certain asset management contract costs can be capitalized on the consolidated statements of financial position. We expect to adopt the requirements of the new standard in the first quarter of 2018 and anticipate using the modified retrospective approach.

#### NOTE 3 – Receivables From and Payables to Brokers, Dealers, and Clearing Organizations

Amounts receivable from brokers, dealers, and clearing organizations at June 30, 2017 and December 31, 2016, included (in thousands):

		December 31,
	June 30,	
	2017	2016
Receivables from clearing organizations	\$153,241	\$568,373
Deposits paid for securities borrowed	145,285	382,691

Securities failed to deliver	60,234	73,688
	\$358 760	\$1 024 752

Amounts payable to brokers, dealers, and clearing organizations at June 30, 2017 and December 31, 2016, included (in thousands):

		December 31,
	June 30,	
	2017	2016
Deposits received from securities loaned	\$352,127	\$478,814
Securities failed to receive	50,315	27,882
Payable to clearing organizations	30,901	16,411
	\$433,343	\$523,107

Deposits paid for securities borrowed approximate the market value of the securities. Securities failed to deliver and receive represent the contract value of securities that have not been delivered or received on settlement date.

### NOTE 4 – Fair Value Measurements

We measure certain financial assets and liabilities at fair value on a recurring basis, including financial instruments owned, available-for-sale securities, investments, financial instruments sold, but not yet purchased, and derivatives.

We generally utilize third-party pricing services to value Level 1 and Level 2 available-for-sale investment securities, as well as certain derivatives designated as cash flow hedges. We review the methodologies and assumptions used by the third-party pricing services and evaluate the values provided, principally by comparison with other available market quotes for similar instruments and/or analysis based on internal models using available third-party market data. We may occasionally adjust certain values provided by the third-party pricing service when we believe, as the result of our review, that the adjusted price most appropriately reflects the fair value of the particular security.

Following are descriptions of the valuation methodologies and key inputs used to measure financial assets and liabilities recorded at fair value. The descriptions include an indication of the level of the fair value hierarchy in which the assets or liabilities are classified.

#### Financial Instruments Owned and Available-For-Sale Securities

When available, the fair value of financial instruments is based on quoted prices in active markets and reported in Level 1. Level 1 financial instruments include highly liquid instruments with quoted prices, such as equity securities listed in active markets, corporate fixed income securities, U.S. government securities, and U.S. government agency securities.

If quoted prices are not available for identical instruments, fair values are obtained from pricing services, broker quotes, or other model-based valuation techniques with observable inputs, such as the present value of estimated cash flows, and reported as Level 2. The nature of these financial instruments include instruments for which quoted prices are available but traded less frequently, instruments whose fair value has been derived using a model where inputs to the model are directly observable in the market, or can be derived principally from or corroborated by observable market data, and instruments that are fair valued using other financial instruments, the parameters of which can be directly observed. Level 2 financial instruments include U.S. government agency securities, mortgage-backed securities, corporate fixed income securities infrequently traded, state and municipal securities, and asset-backed securities, which primarily include collateralized loan obligations.

We have identified Level 3 financial instruments to include certain equity securities with unobservable pricing inputs and certain non-agency mortgage-backed securities. Level 3 financial instruments have little to no pricing observability as of the report date. These financial instruments do not have active two-way markets and are measured using management's best estimate of fair value, where the inputs into the determination of fair value require significant management judgment or estimation.

### Investments

Investments carried at fair value primarily include corporate equity securities, auction-rate securities ("ARS"), and private company investments.

Corporate equity securities are valued based on quoted prices in active markets and reported in Level 1.

ARS are valued based upon our expectations of issuer redemptions and using internal discounted cash flow models that utilize unobservable inputs. ARS are reported as Level 3 assets. ARS for which recent market trades were observed that provided transparency into their valuation were classified as Level 2 at June 30, 2017.

Direct investments in private companies, reported as Level 3 assets, may be valued using the market approach and were valued based on an assessment of each underlying investment, incorporating evaluation of additional significant third-party financing, changes in valuations of comparable peer companies, the business environment of the companies, market indices, assumptions relating to appropriate risk adjustments for nonperformance, and legal

restrictions on disposition, among other factors. The fair value derived from the methods used are evaluated and weighted, as appropriate, considering the reasonableness of the range of values indicated. Under the market approach, fair value may be determined by reference to multiples of market-comparable companies or transactions, including earnings before interest, taxes, depreciation, and amortization ("EBITDA") multiples. For securities utilizing the market comparable companies valuation technique, a significant increase (decrease) in the EBITDA multiple in isolation could result in a significantly higher (lower) fair value measurement.

Investments in Funds That Are Measured at Net Asset Value Per Share

The Company's investments in funds measured at NAV include private company investments, partnership interests, mutual funds, private equity funds, and money market funds. Private equity funds primarily invest in a broad range of industries worldwide in a variety of situations, including leveraged buyouts, recapitalizations, growth investments and distressed investments. The private equity funds are primarily closed-end funds in which the Company's investments are generally not eligible for redemption. Distributions will be received from these funds as the underlying assets are liquidated or distributed.

The general and limited partnership interests in investment partnerships were primarily valued based upon NAVs received from third-party fund managers. The various partnerships are investment companies, which record their underlying investments at fair value based on fair value policies established by management of the underlying fund. Fair value policies at the underlying fund generally require the funds to utilize pricing/valuation information, including independent appraisals, from third-party sources. However, in some instances, current valuation information for illiquid securities or securities in markets that are not active may not be available from any third-party source or fund management may conclude that the valuations that are available from third-party sources are not reliable. In these instances, fund management may perform model-based analytical valuations that may be used as an input to value these investments.

The tables below present the fair value of our investments in, and unfunded commitments to, funds that are measured at NAV (in thousands):

	June 30, 2017		
	Fair		
	value of	Unfunded	
	investme	n <b>t</b> sommitments

Mutual funds	11,301		
Private equity funds	9,310	2,020	
Money market funds	35,637		
Total	\$90,809	\$ 12,368	

Financial Instruments Sold, But Not Yet Purchased

Financial instruments sold, but not purchased, recorded at fair value based on quoted prices in active markets and other observable market data include highly liquid instruments with quoted prices, such as U.S. government securities, corporate fixed income securities, and equity securities listed in active markets, which are reported as Level 1.

If quoted prices are not available, fair values are obtained from pricing services, broker quotes, or other model-based valuation techniques with observable inputs, such as the present value of estimated cash flows, and reported as Level 2. The nature of these financial instruments include instruments for which quoted prices are available but traded less frequently, instruments whose fair value has been derived using a model where inputs to the model are directly observable in the market, or can be derived principally from or corroborated by observable market data, and instruments that are fair valued using other financial instruments, the parameters of which can be directly observed. Level 2 financial instruments include U.S. government agency securities, mortgage-backed securities not actively traded, corporate fixed income securities, and state and municipal securities.

### Derivatives

Derivatives are valued using quoted market prices for identical instruments when available or pricing models based on the net present value of estimated future cash flows. The valuation models used require market observable inputs, including contractual terms, market prices, yield curves, credit curves, and measures of volatility. We manage credit risk for our derivative positions on a counterparty-by-counterparty basis and calculate credit valuation adjustments, included in the fair value of these instruments, on the basis of our relationships at the counterparty portfolio/master netting agreement level. These credit valuation adjustments are determined by applying a credit spread for the counterparty to the total expected exposure of the derivative after considering collateral and other master netting arrangements. We have classified our interest rate swaps as Level 2.

<sup>(1)</sup> Realized and unrealized gains/(losses) related to financial instruments owned and investments are reported in other income in the consolidated statements of operations.

The results included in the tables above are only a component of the overall investment strategies of our company. The tables above do not present Level 1 or Level 2 valued assets or liabilities. The changes to our company's Level 3 classified instruments during the six months ended June 30, 2017 were principally a result of transfers out of Level 3 due to market activity that provided transparency into the valuation of these assets. The changes in unrealized gains/(losses) recorded in earnings for the three and six months ended June 30, 2017, relating to Level 3 assets still held at June 30, 2017, were immaterial.

The following table summarizes quantitative information related to the significant unobservable inputs utilized in our company's Level 3 recurring fair value measurements as of June 30, 2017.

				Weighted
	Valuation technique	Unobservable input	Range	average
Investments:				
Auction rate securities:				
Equity securities	Discounted cash flow	Discount rate	1.2% - 10.5%	5.2%
		Workout period	1 - 3 years	2.2 years
Municipal securities	Discounted cash flow	Discount rate	1.6% - 9.4%	3.9%
_		Workout period	1 - 4 years	1.9 years

<sup>(2)</sup> Unrealized gains/(losses) related to available-for-sale securities are reported in accumulated other comprehensive loss in the consolidated statements of financial.

The fair value of certain Level 3 assets was determined using various methodologies, as appropriate, including third-party pricing vendors and broker quotes. These inputs are evaluated for reasonableness through various procedures, including due diligence reviews of third-party pricing vendors, variance analyses, consideration of current market environment, and other analytical procedures.

The fair value for our auction rate securities was determined using an income approach based on an internally developed discounted cash flow model. The discounted cash flow model utilizes two significant unobservable inputs: discount rate and workout period. The discount rate was calculated using credit spreads of the underlying collateral or similar securities. The workout period was based on an assessment of publicly available information on efforts to re-establish functioning markets for these securities and our company's own redemption

experience. Significant increases in any of these inputs in isolation would result in a significantly lower fair value. On an ongoing basis, management verifies the fair value by reviewing the appropriateness of the discounted cash flow model and its significant inputs.

## Transfers Within the Fair Value Hierarchy

We assess our financial instruments on a quarterly basis to determine the appropriate classification within the fair value hierarchy. Transfers between fair value classifications occur when there are changes in pricing observability levels. Transfers of financial instruments among the levels are deemed to occur at the beginning of the reporting period. There were \$1.0 million and \$1.1 million of transfers of financial assets from Level 2 to Level 1 during the three and six months ended June 30, 2017, respectively, primarily related to corporate fixed income securities for which market trades were observed that provided transparency into the valuation of these assets. There were \$4.0 million and \$4.4 million of transfers of financial assets from Level 1 to Level 2 during the three and six months ended June 30, 2017, respectively, primarily related to corporate fixed income securities for which there were low volumes of recent trade activity observed. There were no transfers into Level 3 during the six months ended June 30, 2017. There were \$18.3 million of transfers of financial assets out of Level 3 during the three and six months ended June 30, 2017, primarily related to ARS and corporate equity securities for which market trades were observed that provided transparency into the valuation of these assets.

### Fair Value of Financial Instruments

The following reflects the fair value of financial instruments as of June 30, 2017 and December 31, 2016, whether or not recognized in the consolidated statements of financial condition at fair value (in thousands).

The following, as supplemented by the discussion above, describes the valuation techniques used in estimating the fair value of our financial instruments as of June 30, 2017 and December 31, 2016.

### Financial Assets

Securities Purchased Under Agreements to Resell

Securities purchased under agreements to resell are collateralized financing transactions that are recorded at their contractual amounts plus accrued interest. The carrying values at June 30, 2017 and December 31, 2016 approximate fair value due to their short-term nature.

#### Held-to-Maturity Securities

Securities held to maturity are recorded at amortized cost based on our company's positive intent and ability to hold these securities to maturity. Securities held to maturity include agency mortgage-backed securities, asset-backed securities, consisting of collateralized loan obligation securities and corporate fixed income securities. The estimated fair value, included in the above table, is determined using several factors; however, primary weight is given to discounted cash flow modeling techniques that incorporated an estimated discount rate based upon recent observable debt security issuances with similar characteristics.

#### Loans Held for Sale

Loans held for sale consist of fixed-rate and adjustable-rate residential real estate mortgage loans intended for sale. Loans held for sale are stated at lower of cost or market value. Market value is determined based on prevailing market prices for loans with similar characteristics or on sale contract prices.

#### Bank Loans

The fair values of mortgage loans and commercial loans were estimated using a discounted cash flow method, a form of the income approach. Discount rates were determined considering rates at which similar portfolios of loans, with similar remaining maturities, would be made and considering liquidity spreads applicable to each loan portfolio based on the secondary market.

#### Financial Liabilities

Securities Sold Under Agreements to Repurchase

Securities sold under agreements to repurchase are collateralized financing transactions that are recorded at their contractual amounts plus accrued interest. The carrying values at June 30, 2017 and December 31, 2016 approximate fair value due to the short-term nature.

## **Bank Deposits**

The fair value of interest-bearing deposits, including certificates of deposits, demand deposits, savings, and checking accounts, was calculated by discounting the future cash flows using discount rates based on the replacement cost of funding of similar structures and terms.

#### **Borrowings**

The carrying amount of borrowings approximates fair value due to the relative short-term nature of such borrowings. In addition, Stifel Bank's FHLB advances reflect terms that approximate current market rates for similar borrowings.

#### Senior Notes

The fair value of our senior notes is estimated based upon quoted market prices.

#### Debentures to Stifel Financial Capital Trusts

The fair value of our trust preferred securities is based on the discounted value of contractual cash flows. We have assumed a discount rate based on the coupon achieved in our 4.250% senior notes due 2024.

These fair value disclosures represent our best estimates based on relevant market information and information about the financial instruments. Fair value estimates are based on judgments regarding future expected losses, current economic conditions, risk characteristics of the various instruments, and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and, therefore, cannot be determined with precision. Changes in the above methodologies and assumptions could significantly affect the estimates.

NOTE 5 - Financial Instruments Owned and Financial Instruments Sold, But Not Yet Purchased

The components of financial instruments owned and financial instruments sold, but not yet purchased, at June 30, 2017 and December 31, 2016 are as follows (in thousands):

		December 31,
	June 30,	2016
	2017	2016
Financial instruments owned:		
U.S. government securities	\$16,924	\$9,951
U.S. government agency securities	119,703	89,833
Mortgage-backed securities:		
Agency	313,463	305,774
Non-agency	54,566	28,402
Corporate securities:		
Fixed income securities	367,866	299,946
Equity securities	43,671	32,044
State and municipal securities	147,458	159,095
·	\$1,063,651	\$925,045
Financial instruments sold, but not yet purchased:

U.S. government agency securities	1,995	20,549
Mortgage-backed securities:		
Agency	118,458	94,552
Non-agency	16	1
Corporate securities:		
Fixed income securities	245,148	202,968
Equity securities	41,091	18,395
State and municipal securities	37	31
•	\$705,577	\$699,032

At June 30, 2017 and December 31, 2016, financial instruments owned in the amount of \$591.6 million and \$992.9 million, respectively, were pledged as collateral for our repurchase agreements and short-term borrowings. Financial instruments owned on a settlement-date basis were \$1.3 billion at December 31, 2016. Our financial instruments owned are presented on a trade-date basis in the consolidated statements of financial condition.

Financial instruments sold, but not yet purchased, represent obligations of our company to deliver the specified security at the contracted price, thereby creating a liability to purchase the security in the market at prevailing prices in future periods. We are obligated to acquire the securities sold short at prevailing market prices in future periods, which may exceed the amount reflected in the consolidated statements of financial condition.

NOTE 6 – Available-for-Sale and Held-to-Maturity Securities

The following tables provide a summary of the amortized cost and fair values of the available-for-sale securities and held-to-maturity securities at June 30, 2017 and December 31, 2016 (in thousands):

<sup>(1)</sup> Unrealized gains/(losses) related to available-for-sale securities are reported in accumulated other comprehensive loss.

For the three and six months ended June 30, 2017, we received proceeds of \$87.3 million from the sale of available-for-sale securities, which resulted in realized gains of \$0.4 million. There were no sales of available-for-sale securities during the three and six months ended June 30, 2016.

<sup>(2)</sup> Held-to-maturity securities are carried in the consolidated statements of financial condition at amortized cost, and the changes in the value of these securities, other than impairment charges, are not reported on the consolidated financial statements.

During the three months ended June 30, 2017 and June 30, 2016, unrealized gains, net of deferred taxes, of \$3.8 million and \$11.4 million were recorded in accumulated other comprehensive loss in the consolidated statements of financial condition. During the six months ended June 30, 2017 and June 30, 2016, unrealized gains, net of deferred taxes, of \$7.5 million and \$10.4 million were recorded in accumulated other comprehensive loss in the consolidated statements of financial condition.

The table below summarizes the amortized cost and fair values of debt securities by contractual maturity. Expected maturities may differ significantly from contractual maturities, as issuers may have the right to call or prepay obligations with or without call or prepayment penalties.

<sup>(1)</sup> Due to the immaterial amount of income recognized on tax-exempt securities, yields were not calculated on a tax-equivalent basis.

At June 30, 2017 and December 31, 2016, securities of \$1.9 billion and \$2.0 billion, respectively, were pledged at the Federal Home Loan Bank as collateral for borrowings and letters of credit obtained to secure public deposits. At June 30, 2017 and December 31, 2016, securities of \$1.9 billion and \$1.7 billion, respectively, were pledged with the Federal Reserve discount window.

At June 30, 2017, the amortized cost of 124 securities classified as available for sale exceeded their fair value by \$12.9 million, of which \$5.0 million related to investment securities that had been in a loss position for 12 months or longer. The total fair value of these investments at June 30, 2017, was \$832.2 million, which was 24.1% of our available-for-sale portfolio.

At June 30, 2017, the carrying value of 45 securities held to maturity exceeded their fair value by \$16.5 million, of which \$1.8 million related to securities held to maturity that have been in a loss position for 12 months or longer. As discussed in more detail below, we conduct periodic reviews of all securities with unrealized losses to assess whether the impairment is other-than-temporary.

#### Other-Than-Temporary Impairment

We evaluate all securities in an unrealized loss position quarterly to assess whether the impairment is other-than-temporary. Our other-than-temporary impairment ("OTTI") assessment is a subjective process requiring the use of judgments and assumptions. There was no credit-related OTTI recognized during the three and six months ended June 30, 2017 and 2016.

We believe the gross unrealized losses of \$29.5 million related to our investment portfolio, as of June 30, 2017, are attributable to issuer-specific credit spreads and changes in market interest rates and asset spreads. We, therefore, do not expect to incur any credit losses related to these securities. In addition, we have no intent to sell these securities with unrealized losses, and it is not more likely than not that we will be required to sell these securities prior to

recovery of the amortized cost. Accordingly, we have concluded that the impairment on these securities is not other-than-temporary.

25

#### NOTE 7 – Bank Loans

Our loan portfolio consists primarily of the following segments:

Real Estate. Real estate loans include commercial real estate, residential real estate non-conforming loans, residential real estate conforming loans and home equity lines of credit. The allowance methodology related to real estate loans considers several factors, including, but not limited to, loan-to-value ratio, FICO score, home price index, delinquency status, credit limits, and utilization rates.

Commercial and industrial (C&I). C&I loans primarily include commercial and industrial lending used for general corporate purposes, working capital and liquidity, and "event-driven." "Event-driven" loans support client merger, acquisition or recapitalization activities. C&I lending is structured as revolving lines of credit, letter of credit facilities, term loans and bridge loans. Risk factors considered in determining the allowance for corporate loans include the borrower's financial strength, seniority of the loan, collateral type, leverage, volatility of collateral value, debt cushion, and covenants.

Securities-based loans. Securities-based loans allow clients to borrow money against the value of qualifying securities for any suitable purpose other than purchasing, trading, or carrying securities or refinancing margin debt. The majority of consumer loans are structured as revolving lines of credit and letter of credit facilities and are primarily offered through Stifel's Pledged Asset ("SPA") program. The allowance methodology for securities-based lending considers the collateral type underlying the loan, including the liquidity and trading volume of the collateral, position concentration and other borrower specific factors such as personal guarantees.

Consumer. Consumer loans allow customers to purchase non-investment goods and services.

Construction and land. Short-term loans used to finance the development of a real estate project.

The following table presents the balance and associated percentage of each major loan category in our bank loan portfolio at June 30, 2017 and December 31, 2016 (in thousands, except percentages):

	June 30, 201	7	December 31, 2016

Bank loans, net	\$6,160,093		\$5,591,190		

At June 30, 2017 and December 31, 2016, Stifel Bank had loans outstanding to its executive officers, directors, and their affiliates in the amount of \$3.9 million and \$3.7 million, respectively, and loans outstanding to other Stifel Financial Corp. executive officers, directors, and their affiliates in the amount of \$7.0 million and \$5.6 million, respectively.

At June 30, 2017 and December 31, 2016, we had loans held for sale of \$139.7 million and \$228.6 million, respectively. For the three months ended June 30, 2017 and 2016, we recognized gains of \$3.4 million and \$4.1 million, respectively, from the sale of originated loans, net of fees and costs. For the six months ended June 30, 2017 and 2016, we recognized gains of \$6.2 million and \$6.9 million, respectively, from the sale of originated loans, net of fees and costs.
