Notes to Condensed Consolidated Financial Statements
(Dollars in Millions Except Share and Per Share Amounts)
(Unaudited)

1. Basis of Presentation

The Condensed Consolidated Financial Statements reflect all normal recurring adjustments which, in management's opinion, are necessary for a fair statement of the results for interim periods. Results of operations for interim periods may not be representative of results to be expected for a full year. Certain prior year amounts have been reclassified to conform to the current year presentation.

For a complete set of financial statement notes, including the significant accounting policies of Colgate-Palmolive Company (together with its subsidiaries, the "Company" or "Colgate"), refer to the Company's Annual Report on Form 10-K for the year ended December 31, 2014, filed with the Securities and Exchange Commission.

2. Use of Estimates

Provisions for certain expenses, including income taxes, media advertising and consumer promotion, are based on full year assumptions and are included in the accompanying Condensed Consolidated Financial Statements in proportion with estimated annual tax rates, the passage of time or estimated annual sales.

3. Recent Accounting Pronouncements

On April 7, 2015, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2015-03 "Simplifying the Presentation of Debt Issuance Costs," which requires that debt issuance costs be presented in the balance sheet as a direct deduction from the carrying amount of related debt liability, consistent with debt discounts. Under current accounting standards, such costs are recorded as an asset. The new guidance is effective for the Company beginning January 1, 2016, with early adoption permitted. This new guidance is not expected to have a material impact on the Company's Consolidated Financial Statements.

On February 18, 2015, the FASB issued ASU No. 2015-02 "Consolidation (Topic 810): Amendments to the Consolidation Analysis" that amends the current consolidation guidance. The amendments affect both the variable interest entity and voting interest entity consolidation models. The new guidance is effective for the Company beginning January 1, 2016, with early adoption permitted. This new guidance is not expected to have a material impact on the Company's Consolidated Financial Statements.

On May 28, 2014, the FASB and the International Accounting Standards Board ("IASB") issued their final converged standard on revenue recognition. The standard, issued as ASU No. 2014-09 "Revenue from Contracts with Customers" by the FASB, provides a single, comprehensive revenue recognition model for all contracts with customers and supersedes current revenue recognition guidance. The revenue standard contains principles that an entity will apply to determine the measurement of revenue and timing of when it is recognized. The underlying principle is that an entity will recognize revenue to depict the transfer of goods or services to customers at an amount that the entity expects to be entitled to in exchange for those goods or services. The new standard also includes enhanced disclosures which are significantly more comprehensive than those in existing revenue standards. ASU No. 2014-09 was to be effective for the Company beginning January 1, 2017. However, on July 9, 2015, the FASB voted to approve a one-year deferral of the effective date. This new guidance is now expected to be effective for the Company beginning January 1, 2018. The standard allows for either "full retrospective" adoption, meaning the standard is applied to all of the periods presented, or "modified retrospective" adoption, meaning the standard is applied only to the most current period presented in the financial statements. While the Company is currently assessing the impact of the new standard, it does not expect this

new guidance to have a material impact on its Consolidated Financial Statements.

4. Acquisitions and Divestitures

Acquisition

On October 3, 2014, the Company acquired an oral care business in Myanmar for \$62 in cash plus additional consideration contingent upon achievement of performance targets under a distribution services agreement.

Sale of Land in Mexico

On September 13, 2011, the Company's Mexican subsidiary entered into an agreement to sell to the United States of America (the "Purchaser") the Mexico City site on which its commercial operations, technology center and soap production facility were located. The sale price is payable in three installments. During the third quarter of 2011, the Company received the first installment of \$24 upon signing the agreement. During the third quarter of 2012, the Company received the second installment of \$36. The parties have subsequently amended that agreement to extend the closing date. Under the existing agreement, the final installment of the purchase price is due upon the transfer of the property, which is subject to the Company's satisfaction of certain closing conditions relating to site preparation by September 15, 2015. While these conditions are not expected to be fully satisfied by September 15, 2015, in which case the Purchaser has several options under the agreement (including termination and the return to it of the first two installments of the purchase price), based on the discussions to date, the Company believes that an additional amendment will be negotiated and the transfer of the property is likely to occur in the first half of 2016. The Company has reinvested the first two installments to relocate its soap production to a new state-of-the-art facility at its Mission Hills, Mexico site, to relocate its commercial and technology operations within Mexico City and to prepare the existing site for transfer. Exit costs incurred during the project primarily relate to staff leaving indemnities, accelerated depreciation and demolition to make the site building-ready. During the three months ended June 30, 2015 and 2014, the Company recorded \$0 and \$2 of pretax costs (\$0 and \$1 of aftertax costs), respectively, related to the sale. During the six months ended June 30, 2015 and 2014, the Company recorded \$0 and \$3 of pretax costs (\$0 and \$2 of aftertax costs), respectively, related to the sale.

5. Restructuring and Related Implementation Charges

In the fourth quarter of 2012, the Company commenced a four-year Global Growth and Efficiency Program for sustained growth. The program's initiatives are expected to help Colgate ensure continued solid worldwide growth in unit volume, organic sales and earnings per share and enhance its global leadership positions in its core businesses.

On October 23, 2014, the Company's Board of Directors approved an expansion of the Global Growth and Efficiency Program (as expanded, the "2012 Restructuring Program") to take advantage of additional savings opportunities.

Cumulative pretax charges related to the 2012 Restructuring Program, once all phases are approved and implemented, are estimated to be \$1,285 to \$1,435 (\$950 to \$1,050 aftertax). Implementation of the 2012 Restructuring Program is expected to be substantially completed by December 31, 2016. These pretax charges are currently estimated to be comprised of the following categories: Employee-Related Costs, including severance, pension and other termination benefits (50%); asset-related costs, primarily Incremental Depreciation and Asset Impairments (10%); and Other charges, which include contract termination costs, consisting primarily of implementation-related charges resulting directly from exit activities (20%) and the implementation of new strategies (20%). Anticipated pretax charges for 2015 are expected to amount to approximately \$330 to \$385 (\$245 to \$285 aftertax). Over the course of the 2012 Restructuring Program, it is currently estimated that approximately 75% of the charges will result in cash

expenditures.

It is expected that the cumulative pretax charges, once all projects are approved and implemented, will relate to initiatives undertaken in North America (15%), Europe/South Pacific (20%), Latin America (5%), Asia (5%), Africa/Eurasia (5%), Hill's Pet Nutrition (10%) and Corporate (40%), which includes substantially all of the costs related to the implementation of new strategies, noted above, on a global basis. It is expected that, by the end of 2016, the 2012 Restructuring Program will contribute a net reduction of approximately 2,000-2,500 positions from the Company's global employee workforce.

Total 2012 Restructuring Program charges, aftertax	\$40	\$53	\$107	\$126

Restructuring and related implementation charges in the preceding table are recorded in the Corporate segment as these initiatives are predominantly centrally directed and controlled and are not included in internal measures of segment operating performance.

Total charges incurred for the 2012 Restructuring Program relate to initiatives undertaken by the following reportable operating segments:

	Three Months Ended		Six Months Ended		Program-to-date	
	June 30,		June 30,		Accumulated Charges	
	2015	2014	2015	2014

Corporate	34	% 55	% 56	% 56	% 46	%

Since the inception of the 2012 Restructuring Program in the fourth quarter of 2012, the Company has incurred pretax cumulative charges of \$898 (\$663 aftertax) in connection with the implementation of various projects as follows:

	Cumulative Charges as of June 30, 2015
Employee-Related Costs	\$362
Incremental Depreciation	60
Asset Impairments	3
Other	473
Total	\$898

The majority of costs incurred since inception relate to the following projects: the implementation of the Company's overall hubbing strategy; the consolidation of facilities; the extension of shared business services and streamlining of global functions; the simplification and streamlining of the Company's research and development capabilities and oral care supply chain, both in Europe; restructuring how the Company will provide future retirement benefits to substantially all of its U.S.-based employees participating in the Company's defined benefit retirement plan by shifting them to the Company's defined contribution plan; and the closing of the Morristown, New Jersey personal care facility.

Foreign exchange	(5) —	—	(1) (6)
Balance at June 30, 2015	\$94	\$—	\$—	\$137	\$231	

Employee-Related Costs primarily include severance and other termination benefits and are calculated based on long-standing benefit practices, local statutory requirements and, in certain cases, voluntary termination arrangements. Employee-Related Costs also include pension and other retiree benefit enhancements amounting to \$9 for the six months ended June 30, 2015, which are reflected as Charges against assets within Employee-Related Costs in the preceding tables as the corresponding balance sheet amounts are reflected as a reduction of pension assets or an increase in pension and other retiree benefit liabilities (see Note 10, Retirement Plans and Other Retiree Benefits).

Incremental Depreciation is recorded to reflect changes in useful lives and estimated residual values for long-lived assets that will be taken out of service prior to the end of their normal service period. Asset Impairments are recorded to write down assets held for sale or disposal to their fair value based on amounts expected to be realized. Charges against assets within Asset Impairments are net of cash proceeds pertaining to the sale of certain assets.

Other charges consist primarily of charges resulting directly from exit activities and the implementation of new strategies as a result of the 2012 Restructuring Program. These charges for the three and six months ended June 30, 2015 include third-party incremental costs related to the development and implementation of new business and strategic initiatives of \$14 and \$26, respectively, and contract termination costs and charges resulting directly from exit activities of \$1 and \$4, respectively, directly related to the 2012 Restructuring Program. These charges were expensed as incurred. Also included in Other charges for the three and six months ended June 30, 2015 are other exit costs related to the consolidation of facilities of \$1 and \$45, respectively.

11. Income Taxes

At December 31, 2014, the Company had unrecognized tax benefits of \$218. In May 2015, the Company became aware of several Supreme Court rulings in a foreign jurisdiction disallowing certain tax deductions which had the effect of reversing prior decisions. The Company had taken deductions in prior years similar to those now disallowed by the Court. As a result, as required, the Company reassessed its tax position in light of the recent rulings and concluded it needed to increase its unrecognized tax benefits by \$15. The Company recorded this \$15 income tax charge in the quarter ended June 30, 2015.

Although it is possible that the amount of unrecognized tax benefits with respect to the Company's uncertain tax positions will further increase or decrease during the remainder of 2015, the Company does not expect material changes.

12. Contingencies

As a global company serving consumers in more than 200 countries and territories, the Company is routinely subject to a wide variety of legal proceedings. These include disputes relating to intellectual property, contracts, product liability, marketing, advertising, foreign exchange controls, antitrust and trade regulation, as well as labor and employment, environmental and tax matters and consumer class actions. Management proactively reviews and monitors the Company's exposure to, and the impact of, environmental matters. The Company is party to various environmental matters and, as such, may be responsible for all or a portion of the cleanup, restoration and post-closure monitoring of several sites.

The Company establishes accruals for loss contingencies when it has determined that a loss is probable and that the amount of loss, or range of loss, can be reasonably estimated. Any such accruals are adjusted thereafter as appropriate to reflect changes in circumstances.

The Company also determines estimates of reasonably possible losses or ranges of reasonably possible losses in excess of related accrued liabilities, if any, when it has determined that a loss is reasonably possible and it is able to determine such estimates. For those matters disclosed below, the Company currently estimates that the aggregate range of reasonably possible losses in excess of any accrued liabilities is \$0 to approximately \$200 (based on current exchange rates). The estimates included in this amount are based on the Company's analysis of currently available information and, as new information is obtained, these estimates may change. Due to the inherent subjectivity of the assessments and the unpredictability of outcomes of legal proceedings, any amounts accrued or included in this aggregate amount may not represent the ultimate loss to the Company. Thus, the Company's exposure and ultimate losses may be higher or lower, and possibly significantly so, than the amounts accrued or the range disclosed above.

Based on current knowledge, management does not believe that the ultimate resolution of loss contingencies arising from the matters discussed herein will have a material effect on the Company's consolidated financial position or its ongoing results of operations or cash flows. However, in light of the inherent uncertainties noted above, an adverse outcome in one or more matters could be material to the Company's results of operations or cash flows for any particular quarter or year.

Brazilian Matters

There are certain tax and civil proceedings outstanding, as described below, related to the Company's 1995 acquisition of the Kolynos oral care business from Wyeth (the "Seller").

The Brazilian internal revenue authority has disallowed interest deductions and foreign exchange losses taken by the Company's Brazilian subsidiary for certain years in connection with the financing of the Kolynos acquisition. The tax assessments with interest, at the current exchange rate, are approximately \$94. The Company has been disputing the disallowances by appealing the assessments within the internal revenue authority's appellate process since October 2001. Numerous appeals are currently pending at the administrative level.

In the event the Company is ultimately unsuccessful, further appeals are available within the Brazilian federal courts. Although there can be no assurances, management believes, based on the opinion of its Brazilian legal counsel, that the disallowances are without merit and that the Company should ultimately prevail on appeal, if necessary, in the Brazilian federal courts. The Company intends to challenge these assessments vigorously.

In July 2002, the Brazilian Federal Public Attorney filed a civil action against the federal government of Brazil, Laboratorios Wyeth-Whitehall Ltda. (the Brazilian subsidiary of the Seller) and the Company, as represented by its Brazilian subsidiary, in the 6th. Lower Federal Court in the City of São Paulo, seeking to annul an April 2000 decision by the Brazilian Board of Tax Appeals that found in favor of the Seller's Brazilian subsidiary on the issue of whether it had incurred taxable capital gains as a result of the divestiture of Kolynos. The action seeks to make the Company's Brazilian subsidiary jointly and severally liable for any tax due from the Seller's Brazilian subsidiary. The case has been pending since 2002, and the Lower Federal Court has not issued a decision. Although there can be no assurances, management believes, based on the opinion of its Brazilian legal counsel, that the Company should ultimately prevail in this action. The Company intends to challenge this action vigorously.

In December 2005, the Brazilian internal revenue authority issued to the Company's Brazilian subsidiary a tax assessment with interest and penalties of approximately \$58, at the current exchange rate, based on a claim that certain purchases of U.S. Treasury bills by the subsidiary and their subsequent disposition during the period 2000 to 2001 were subject to a tax on foreign exchange transactions. The Company has been disputing the assessment within the internal revenue authority's administrative appeals process. In November 2014, the Superior Chamber of Administrative Tax Appeals denied the Company's most recent appeal. Further appeals are available both at the administrative level and within the Brazilian federal courts. Although there can be no assurances, management believes, based on the opinion of its Brazilian legal counsel, that the tax assessment is without merit and that the Company should ultimately prevail on appeal, if not at the administrative level, in the Brazilian federal courts. The Company intends to challenge this assessment vigorously.

Competition Matters

The Company's policy is to comply with antitrust and competition laws and, if a violation of any such laws is found, to take appropriate remedial action and to cooperate fully with any related governmental inquiry. Competition and antitrust law investigations often continue for several years and can result in substantial fines for violations that are found. While the Company cannot predict the final financial impact of these competition law issues, as these matters may change, the Company evaluates developments in these matters quarterly and accrues liabilities as and when appropriate.

European Competition Matters

Certain of the Company's subsidiaries in Europe are subject to investigations, and in some cases fines, by governmental authorities in a number of European countries related to potential competition law violations. The Company understands that substantially all of these matters also involve other consumer goods companies and/or retail customers. The status of the various pending matters is discussed below.

Fines have been imposed on the Company in the following matters, although, as noted below, the Company has appealed each of these fines:

In December 2009, the Swiss competition law authority imposed a fine of \$6 on the Company's GABA subsidiary for alleged violations of restrictions on parallel imports into Switzerland, which the Company appealed. In January 2014, this appeal was denied. The Company is appealing before the Swiss Supreme Court.

In December 2010, the Italian competition law authority found that 16 consumer goods companies, including the Company's Italian subsidiary, exchanged competitively sensitive information in the cosmetics sector, for which the Company's Italian subsidiary was fined \$3. The Company is appealing the fine in the Italian courts.

In December 2014, the French competition law authority found that 13 consumer goods companies, including the Company's French subsidiary, exchanged competitively sensitive information related to the French home care and personal care sectors, for which the Company's French subsidiary was fined \$57. In addition, as a result of the Company's acquisition of the Sanex personal care business in 2011 from Unilever N.V. and Unilever PLC (together with Unilever N.V., "Unilever") pursuant to a Business and Share Sale and Purchase Agreement (the "Sale and Purchase Agreement"), the French competition law authority found that the Company's French subsidiary, along with Hillshire Brands Company (formerly Sara Lee Corporation ("Sara Lee")), were jointly and severally liable for fines of \$25 assessed against Sara Lee's French subsidiary. The Company is entitled to indemnification for this fine from Unilever as provided in the Sale and Purchase Agreement. The Company is appealing both fines in the French courts.

As of June 30, 2015, the following formal claim of violations is pending against the Company:

In July 2014, the Greek competition law authority issued a statement of objections alleging the Company and its Greek subsidiary restricted parallel imports into Greece. The Company has responded to this statement of objections.

Since December 31, 2014, the following matters have been resolved:

In March 2015, the French Supreme Court confirmed the French competition law authority's March 2012 fine of the Company's Hill's French subsidiary in the amount of \$7.

In June 2015, the Spanish Supreme Court confirmed the annulment of the Spanish competition law authority's January 2010 fine of the Company's Spanish subsidiary.

In June 2015, the Belgian competition law authority issued a final settlement decision related to price coordination involving 11 branded goods companies, including the Company's Belgian subsidiary, and a number of retailers in Belgium. As the Company was an immunity applicant, the Company's Belgian subsidiary was not fined.

Australian Competition Matter

In December 2013, the Australian competition law authority instituted civil proceedings in the Sydney registry of the Federal Court of Australia alleging that three consumer goods companies, including the Company's Australian subsidiary, a retailer and a former employee of the Company's Australian subsidiary violated the Australian competition law by coordinating the launching and pricing of ultra concentrated laundry detergents. The Company is defending these proceedings. Since the amount of any potential losses from these proceedings currently cannot be estimated, the range of reasonably possible losses in excess of accrued liabilities disclosed above does not include any amount relating to these proceedings.

Talcum Powder Matters

The Company is a defendant in a number of civil actions alleging that certain talc products it sold prior to 1996 were contaminated with asbestos. The Company is challenging these cases vigorously. Twenty-one cases filed against the Company have been voluntarily dismissed and/or had final judgment entered in favor of the Company. In April 2015, an agreement in principle was reached to settle four individual cases following a trial and jury verdict in one of the cases in California against the Company and others and the settlements were finalized in June 2015. The amount of the settlements is not material to the Company's results of operations.

There are 23 additional individual cases pending against the Company in state and federal courts in California, Delaware, the District of Columbia, Illinois, Maryland, New Jersey, New York, South Carolina and Wisconsin. Eleven of these cases have been filed against the Company since the quarter ended March 31, 2015; all but one of these cases have multiple defendants named in addition to the Company. Some of these cases are expected to go to trial in 2015, although the Company may succeed in dismissing or otherwise resolving them. While the Company and its legal counsel believe these cases are without merit and intend to challenge them vigorously, there can be no assurances of the outcome at trial. Since the amount of any potential losses from these additional cases currently cannot be estimated, the range of reasonably possible losses in excess of accrued liabilities disclosed above does not include any amount relating to these cases.

13. Segment Information

The Company operates in two product segments: Oral, Personal and Home Care; and Pet Nutrition. The operations of the Oral, Personal and Home Care product segment are managed geographically in five reportable operating segments: North America, Latin America, Europe/South Pacific, Asia and Africa/Eurasia.

The Company evaluates segment performance based on several factors, including Operating profit. The Company uses Operating profit as a measure of operating segment performance because it excludes the impact of corporate-driven decisions related to interest expense and income taxes.

The accounting policies of the operating segments are generally the same as those described in Note 2, Summary of Significant Accounting Policies to the Company's Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2014. Intercompany sales have been eliminated. Corporate operations include costs related to stock options and restricted stock units, research and development costs, Corporate overhead costs, restructuring and related implementation costs, and gains and losses on sales of non-core product lines and assets. The Company reports these items within Corporate operations as they relate to Corporate-based responsibilities and decisions and are not included in the internal measures of segment operating performance used by the Company to measure the underlying performance of the operating segments.

Net sales and Operating profit by segment were as follows:

14. Fair Value Measurements and Financial Instruments

The Company uses available market information and other valuation methodologies in assessing the fair value of financial instruments. Judgment is required in interpreting market data to develop the estimates of fair value and, accordingly, changes in assumptions or the estimation methodologies may affect the fair value estimates. The Company is exposed to the risk of credit loss in the event of nonperformance by counterparties to financial instrument contracts; however, nonperformance is considered unlikely and any nonperformance is unlikely to be material, as it is the Company's policy to contract only with diverse, credit-worthy counterparties based upon both strong credit ratings and other credit considerations.

The Company is exposed to market risk from foreign currency exchange rates, interest rates and commodity price fluctuations. Volatility relating to these exposures is managed on a global basis by utilizing a number of techniques, including working capital management, sourcing strategies, selling price increases, selective borrowings in local currencies and entering into selective derivative instrument transactions, issued with standard features, in accordance with the Company's treasury and risk management policies, which prohibit the use of derivatives for speculative purposes and leveraged derivatives for any purpose. It is the Company's policy to enter into derivative instrument contracts with terms that match the underlying exposure being hedged. Hedge ineffectiveness, if any, is not material for any period presented.

The Company's derivative instruments include interest rate swap contracts, foreign currency contracts and commodity contracts. The Company utilizes interest rate swap contracts to manage its targeted mix of fixed and floating rate debt, and these swaps are valued using observable benchmark rates (Level 2 valuation). The Company utilizes foreign currency contracts, including forward and swap contracts, option contracts, local currency deposits and local currency borrowings to hedge portions of its foreign currency purchases, assets and liabilities arising in the normal course of business and the net investment in certain foreign subsidiaries. These contracts are valued using observable market rates (Level 2 valuation). Commodity futures contracts are utilized to hedge the purchases of raw materials used in production. These contracts are measured using quoted commodity exchange prices (Level 1 valuation). The duration of foreign currency and commodity contracts generally does not exceed 12 months.

Fair Value Hedges

The Company has designated all interest rate swap contracts and certain foreign currency forward and option contracts as fair value hedges, for which the gain or loss on the derivative and the offsetting gain or loss on the hedged item are recognized in current earnings. The impact of foreign currency contracts is primarily recognized in Selling, general and administrative expenses and the impact of interest rate swap contracts is recognized in Interest (income) expense, net.

Activity related to fair value hedges recorded during the three and six months ended June 30, 2015 and 2014 was as follows:

	2015			2014		
	Foreign Currency Contracts	Interest Rate Swaps	Total	Foreign Currency Contracts	Interest Rate Swaps	Total
Notional Value at June 30,	\$1,136	\$1,438	\$2,574	\$1,210	\$1,438	\$2,648

Cash Flow Hedges

All of the Company's commodity contracts and certain foreign currency forward contracts have been designated as cash flow hedges, for which the effective portion of the gain or loss is reported as a component of Other comprehensive income ("OCI") and reclassified into earnings in the same period or periods during which the hedged transaction affects earnings.

Activity related to cash flow hedges recorded during the three and six months ended June 30, 2015 and 2014 was as follows:

	2015			2014		
	Foreign Currency Contracts	Commodity Contracts	Total	Foreign Currency Contracts	Commodity Contracts	Total

Derivatives Not Designated as Hedging Instruments

Derivatives not designated as hedging instruments for each period consist of a cross-currency swap that serves as an economic hedge of a foreign currency deposit, for which the gain or loss on the instrument and the offsetting gain or loss on the hedged item are recognized in Other (income) expense, net for each period. Derivatives not designated as hedging instruments as of June 30, 2015 also include a foreign currency option contract for which the gain or loss on the instrument is recognized in Other (income) expense, net for the six months ended June 30, 2015.

Activity related to these contracts during the three and six months ended June 30, 2015 and 2014 was as follows:

Other Financial Instruments

Other financial instruments are classified as Other current assets or Other assets.

Other financial instruments classified as Other current assets include marketable securities and a fixed interest rate note receivable. Marketable securities consist of bank deposits of \$218 with original maturities greater than 90 days (Level 1 valuation) and the current portion of bonds issued by the Venezuelan government (Level 2 valuation) in the amount of \$30. As more fully discussed below, the long-term portion of these bonds in the amount of \$391 is included in Other assets. The fixed interest rate note receivable of \$38 is carried at cost, which approximated fair value as of June 30, 2015.

Through its subsidiary in Venezuela, the Company is invested in U.S. dollar-linked, devaluation-protected bonds and bolivar-denominated fixed interest rate bonds, both of which are issued by the Venezuelan government. These bonds are actively traded and, therefore, are considered Level 2 investments as their values are determined based upon observable market-based inputs or unobservable inputs that are corroborated by market data. As of June 30, 2015, the fair market value of the Company's U.S. dollar-linked devaluation-protected bonds and bolivar-denominated fixed interest rate bonds was \$73 and \$348, respectively. These bonds are considered available-for-sale securities and, as noted above, the long-term portion in the amount of \$391 is included in Other assets.

The following table presents a reconciliation of the Venezuelan bonds at fair value for the six months ended June 30, 2015 and 2014:

	2015	2014
Beginning balance as of January 1,	\$399	\$685
Unrealized gain (loss) on investment	(20) (292
Purchases and sales during the period	42	54
Ending balance as of June 30,	\$421	\$447

Unrealized loss on investment for the six months ended June 30, 2015 consisted primarily of a loss in the amount of \$28 related to the remeasurement of the bolivar-denominated fixed interest rate bonds and the devaluation-protected bonds in Venezuela as a result of the effective devaluation in the second quarter of 2015. Unrealized loss on investment for the six months ended June 30, 2014 consisted primarily of a loss in the amount of \$272 related to the remeasurement of the bolivar-denominated fixed interest rate bonds and the devaluation-protected bonds in Venezuela as a result of the effective devaluation in the first quarter of 2014. For further information regarding Venezuela, refer to Note 15, Venezuela.

Other assets also include \$35 of fixed income securities maturing in 2016. These securities are considered held-to-maturity and are carried at amortized cost, which approximated fair value as of June 30, 2015.

15. Venezuela

Venezuela has been designated hyper-inflationary and, therefore, the functional currency for the Company's Venezuelan subsidiary ("CP Venezuela") is the U.S. dollar and Venezuelan currency fluctuations are reported in income.

In February 2015, the Venezuelan government implemented changes in Venezuela's foreign exchange regime. While the official exchange rate, as determined by the National Center for Foreign Commerce ("CENCOEX"), remained at 6.30 bolivares per dollar, and the SICAD I (Supplementary System for the Administration of Foreign Currency) currency market, now known as SICAD, was unchanged, the SICAD II market was eliminated and a new, alternative currency market, the Foreign Exchange Marginal System ("SIMADI"), was created and became operational with a floating exchange rate determined by market participants.

The Company remeasures the financial statements of CP Venezuela at the end of each month at the rate at which it expects to remit future dividends which, based on the advice of legal counsel, is currently the SICAD rate. During the second quarter of 2015, the SICAD rate devalued to 12.80 bolivares per dollar as of June 30, 2015 from 12.00 bolivares per dollar as of March 31, 2015. The Company remeasured CP Venezuela's local currency-denominated net monetary assets at June 30, 2015 at the rate of 12.80 bolivares per dollar and, as a result, incurred a pretax loss of \$16 (\$10 aftertax loss or \$0.01 per diluted common share).

During the second quarter of 2014, the SICAD I rate revalued slightly and the Company remeasured CP Venezuela's local currency-denominated net monetary assets at the quarter-end SICAD I rate of 10.60 bolivares per dollar. The impact of the remeasurement during the quarter was insignificant in relation to the Company's consolidated Net income. During the first quarter of 2014, the Company incurred pretax losses of \$266 (\$174 aftertax losses or \$0.19 per diluted common share) related to the remeasurement of CP Venezuela's local currency-denominated net monetary assets at the quarter-end SICAD I rate of 10.70 bolivares per dollar.

Included in the remeasurement losses during the second quarter of 2015 and the first quarter of 2014 were charges related to the devaluation-protected bonds issued by the Venezuelan government and held by CP Venezuela. Because the official exchange rate remained at 6.30 bolivares per dollar, the devaluation-protected bonds did not revalue at the rate available on the SICAD currency market but remained at the official exchange rate, resulting in an impairment in the fair value of the bonds.

CP Venezuela funds its requirements for imported goods through a combination of U.S. dollars obtained from CENCOEX and intercompany borrowings. Because most of the products in CP Venezuela's portfolio have been designated as "essential" by the Venezuelan government, historically CP Venezuela's access to U.S. dollars at the official rate of 6.30 bolivares per dollar has generally been sufficient to settle most of its U.S. dollar obligations for imported materials and the gains related to such transactions are recorded when the funds are authorized by CENCOEX and the liabilities are paid. The decline in the price of oil has contributed to a reduced availability of U.S. dollars in Venezuela and, recently, CP Venezuela's supply of U.S. dollars to fund imports has become even more limited and sporadic.

Although the SIMADI market was accessible to CP Venezuela, it did not participate in that market through June 30, 2015. Since its inception, the volume of transactions in the SIMADI market has been very limited and the exchange rate at June 30, 2015 was 197.30 bolivares per dollar.

For the six months ended June 30, 2015, CP Venezuela represented approximately 4% of the Company's consolidated Net sales. At June 30, 2015, CP Venezuela's local currency-denominated net monetary asset position, which would be subject to remeasurement in the event of further changes in the SICAD rate, was \$602. This amount includes the devaluation-protected bonds issued by the Venezuelan government. CP Venezuela's net non-monetary assets were \$296 at June 30, 2015, including \$231 of fixed assets, that could be subject to impairment if CP Venezuela is not able to implement further price increases to offset the impacts of continued high inflation or further devaluations, or if it does not have sufficient access to U.S. dollars from CENCOEX or the SICAD market to fund imports. At June 30, 2015, the Company's total investment in CP Venezuela was \$1,009, which included intercompany payables of CP Venezuela.

Executive Overview and Outlook

Colgate-Palmolive Company (together with its subsidiaries, the "Company" or "Colgate") seeks to deliver strong, consistent business results and superior shareholder returns by providing consumers globally with products that make their lives healthier and more enjoyable.

To this end, the Company is tightly focused on two product segments: Oral, Personal and Home Care; and Pet Nutrition. Within these segments, the Company follows a closely defined business strategy to develop and increase market leadership positions in key product categories. These product categories are prioritized based on their capacity to maximize the use of the organization's core competencies and strong global equities and to deliver sustainable long-term growth.

Operationally, the Company is organized along geographic lines with management teams having responsibility for the business and financial results in each region. The Company competes in more than 200 countries and territories worldwide with established businesses in all regions contributing to the Company's sales and profitability. Approximately 80% of the Company's Net sales are generated from markets outside the U.S., with over 50% of the Company's Net sales coming from emerging markets (which consist of Latin America, Asia (excluding Japan), Africa/Eurasia and Central Europe). This geographic diversity and balance help to reduce the Company's exposure to business and other risks in any one country or part of the world.

The Oral, Personal and Home Care product segment is operated through five reportable operating segments: North America, Latin America, Europe/South Pacific, Asia and Africa/Eurasia, all of which sell to a variety of retail and wholesale customers and distributors. The Company, through Hill's Pet Nutrition, also competes on a worldwide basis in the pet nutrition market, selling its products principally through authorized pet supply retailers and veterinarians.

On an ongoing basis, management focuses on a variety of key indicators to monitor business health and performance. These indicators include market share, net sales (including volume, pricing and foreign exchange components), organic sales growth (net sales growth excluding the impact of foreign exchange, acquisitions and divestments), gross profit margin, operating profit, net income and earnings per share, as well as measures used to optimize the management of working capital, capital expenditures, cash flow and return on capital. The monitoring of these indicators and the Company's Code of Conduct and corporate governance practices help to maintain business health and strong internal controls.

To achieve its business and financial objectives, the Company focuses the organization on initiatives to drive and fund growth. The Company seeks to capture significant opportunities for growth by identifying and meeting consumer needs within its core categories, through its focus on innovation and the deployment of valuable consumer and shopper insights in the development of successful new products regionally, which are then rolled out on a global basis. To enhance these efforts, the Company has developed key initiatives to build strong relationships with consumers, dental and veterinary professionals and retail customers. Growth opportunities are greater in those areas of the world in which economic development and rising consumer incomes expand the size and number of markets for the Company's products.

The investments needed to support growth are developed through continuous, Company-wide initiatives to lower costs and increase effective asset utilization. Through these initiatives, which are referred to as the Company's funding-the-growth initiatives, the Company seeks to become even more effective and efficient throughout its

businesses. These initiatives are designed to reduce costs associated with direct materials, indirect expenses and distribution and logistics, and encompass a wide range of projects, examples of which include raw material substitution, reduction of packaging materials, consolidating suppliers to leverage volumes and increasing manufacturing efficiency through SKU reductions and formulation simplification. The Company also continues to prioritize its investments toward its higher margin businesses, specifically Oral Care, Personal Care and Pet Nutrition.

Management's Discussion and Analysis of Financial

Condition and Results of Operations

(Dollars in Millions Except Share and Per Share Amounts)

With approximately 80% of its Net sales generated outside the United States, the Company is exposed to changes in economic conditions and foreign currency exchange rates, as well as political uncertainty in some countries, all of which could impact future operating results. For example, as discussed in detail below, the operating environment in Venezuela is challenging, with economic uncertainty fueled by currency devaluations in 2010 and 2013 and effective devaluations in 2014 and 2015, high inflation and the decline in the price of oil, and governmental restrictions in the form of import authorization controls, currency exchange and payment controls, price and profit controls and the possibility of expropriation of property or other resources. In addition, at times, the Company's production in Venezuela has also been negatively impacted by labor issues within the country as well as material shortages caused by limited access to U.S. dollars for imported materials and delays in the importation process due to regulations and controls imposed by the Venezuelan government. Price controls, which became effective in April 2012, affect most products in the portfolio of the Company's Venezuelan subsidiary ("CP Venezuela") and restrict the Company's ability to implement price increases without government approval, which has limited the Company's ability to offset the effects of continuing high inflation and the impact of currency devaluations. In addition, during the first quarter of 2014, the Venezuelan government issued the Law on Fair Pricing, establishing a maximum profit margin of 30% for products and services. The Company's business in Venezuela and the Company's ability to repatriate its earnings continue to be negatively affected by these difficult conditions.

In February 2015, the Venezuelan government implemented changes in Venezuela's foreign exchange regime. While the official exchange rate, as determined by the National Center for Foreign Commerce ("CENCOEX"), remained at 6.30 bolivares per dollar and the SICAD I (Supplementary System for the Administration of Foreign Currency) currency market, now known as SICAD, was unchanged, the SICAD II market was eliminated and a new, alternative currency market, the Foreign Exchange Marginal System ("SIMADI"), was created and became operational with a floating exchange rate determined by market participants. The Company remeasures the financial statements of CP Venezuela at the end of each month at the rate at which it expects to remit future dividends which, based on the advice of legal counsel, is currently the SICAD rate.

During the second quarter of 2015, the SICAD rate devalued to 12.80 bolivares per dollar as of June 30, 2015 from 12.00 bolivares per dollar as of March 31, 2015. The Company remeasured CP Venezuela's local currency-denominated net monetary assets at June 30, 2015 at the rate of 12.80 bolivares per dollar and, as a result, incurred a pretax loss of \$16 (\$10 aftertax loss or \$0.01 per diluted common share). Included in the remeasurement loss is a charge related to the devaluation-protected bonds issued by the Venezuelan government and held by CP Venezuela. Because the official exchange rate remained at 6.30 bolivares per dollar, the devaluation-protected bonds did not revalue at the SICAD rate but remained at the official exchange rate, resulting in an impairment in the fair value of the bonds. The remeasurement loss incurred in the second quarter of 2015 is referred to as the "2015 Venezuela Remeasurement."

There continue to be ongoing impacts primarily related to the translation of the local financial statements and, to a lesser degree, the import of materials at the SICAD exchange rate as most imports still qualify for the official rate. Because the SICAD market is auction-based and auctions are held periodically during the year, the exchange rate available through SICAD may vary throughout the year which would cause additional remeasurements of CP Venezuela's local currency-denominated net monetary assets and further impact CP Venezuela's ongoing results.

During the second quarter of 2014, the SICAD I rate revalued slightly and the Company remeasured CP Venezuela's local currency-denominated net monetary assets at the quarter-end SICAD I rate of 10.60 bolivares per dollar. The impact of the remeasurement during the quarter was insignificant in relation to the Company's consolidated Net

income. During the first quarter of 2014, the Company incurred pretax losses of \$266 (\$174 aftertax losses or \$0.19 per diluted common share) related to the remeasurement of CP Venezuela's local currency-denominated net monetary assets at the quarter-end SICAD rate of 10.70 bolivares per dollar. Included in the remeasurement losses during the first quarter of 2014 were charges related to the devaluation-protected bonds issued by the Venezuelan government and held by CP Venezuela. The net remeasurement losses incurred during the first and second quarters of 2014 are referred to as the "2014 Venezuela Remeasurements." The 2015 Venezuela Remeasurement and the 2014 Venezuela Remeasurements are referred to together as the "Venezuela Remeasurements."

Management's Discussion and Analysis of Financial

Condition and Results of Operations

(Dollars in Millions Except Share and Per Share Amounts)

During the third quarter of 2014, the Venezuelan government approved price increases for the majority of CP Venezuela's product portfolio, which were implemented in the fourth quarter of 2014.

CP Venezuela funds its requirements for imported goods through a combination of U.S. dollars obtained from CENCOEX and intercompany borrowings. Because most of the products in CP Venezuela's portfolio have been designated as "essential" by the Venezuelan government, historically CP Venezuela's access to U.S. dollars at the official rate of 6.30 bolivares per dollar has generally been sufficient to settle most of its U.S. dollar obligations for imported materials and the gains related to such transactions are recorded when the funds are authorized by CENCOEX and the liabilities are paid. CP Venezuela did not participate in the SICAD currency market during either the first or second quarter of 2015. Although the SIMADI market was accessible to CP Venezuela, it did not participate in that market through June 30, 2015. Since its inception, the volume of transactions in the SIMADI market as a whole has been very limited, and the exchange rate at June 30, 2015 was 197.30 bolivares per dollar. In 2014, CP Venezuela was invited to participate in the SICAD currency market during the second and fourth quarters and received less than \$1 in each of those quarters at rates of 10.50 bolivares per dollar and 12.00 bolivares per dollar, respectively.

CP Venezuela's difficulty in accessing U.S. dollars to support its operations has had and is expected to continue to have an adverse effect on the business. The decline in the price of oil has contributed to the reduced availability of U.S. dollars in Venezuela and, recently, CP Venezuela's supply of U.S. dollars to fund imports has become even more limited and sporadic. If CP Venezuela is unable to obtain sufficient U.S. dollars from CENCOEX or the SICAD market to fund its requirements for imported goods and instead needs to access the SIMADI market, which may not have sufficient liquidity to cover CP Venezuela's need for U.S. dollars, it could significantly impact the Company's operations in Venezuela.

For the six months ended June 30, 2015, CP Venezuela represented approximately 4% of the Company's consolidated Net sales and approximately 2% of the Company's consolidated Operating profit excluding the impacts of the 2015 Venezuela Remeasurement, charges related to the 2012 Restructuring Program and a foreign tax matter (as described below). At June 30, 2015, CP Venezuela's local currency-denominated net monetary asset position, which would be subject to remeasurement in the event of further changes in the SICAD rate, was \$602. This amount includes the devaluation-protected bonds issued by the Venezuelan government. If the Company had to use the SIMADI rate to remeasure CP Venezuela's local currency-denominated net monetary asset position at June 30, 2015, which could occur if CP Venezuela were unable to obtain sufficient U.S. dollars from CENCOEX or the SICAD market to fund its requirements for imported goods, the Company would have incurred a remeasurement loss related to CP Venezuela's local currency-denominated net monetary assets of approximately \$528 (\$336 aftertax loss, or \$0.37 per diluted common share). CP Venezuela's net non-monetary assets were \$296 at June 30, 2015, including \$231 of fixed assets, that could be subject to impairment if CP Venezuela is not able to implement further price increases to offset the impacts of continued high inflation or further devaluations, or if it does not have sufficient access to U.S. dollars from CENCOEX or the SICAD market to fund imports.

The Company continuously monitors factors such as CP Venezuela's ability to access and transact in the various exchange mechanisms currently in place and the current political and economic environment in Venezuela. Additional devaluations or the imposition of additional or more stringent controls on foreign currency exchange, pricing, payments, profits or imports or other governmental actions or continued or increased labor unrest would further negatively affect the Company's business in Venezuela and the Company's ability to effectively make key operational decisions in regard to its Venezuelan operations. This could result in an impairment of the Company's investment in CP Venezuela or a decision by the Company to deconsolidate its Venezuelan operations. A decision by the Company

to deconsolidate its operations in Venezuela would be driven by the inability, on an ongoing basis, of CP Venezuela to exchange bolivares for U.S. dollars and the imposition of significant additional restrictions on the Company's ability to make key operational decisions regarding its business in Venezuela, such as its ability to manage CP Venezuela's capital structure, material sourcing, product pricing and labor relations. Based on the Company's evaluation of such factors as of June 30, 2015, it continued to consolidate CP Venezuela. At June 30, 2015, the Company's total investment in CP Venezuela was \$1,009, which included intercompany payables of CP Venezuela. The Company continues to actively manage its investment in and limit its exposure to Venezuela.

Condition and Results of Operations

(Dollars in Millions Except Share and Per Share Amounts)

In the fourth quarter of 2012, the Company commenced a four-year Global Growth and Efficiency Program for sustained growth. The program's initiatives are expected to help the Company ensure continued solid worldwide growth in unit volume, organic sales and earnings per share and enhance its global leadership positions in its core businesses.

On October 23, 2014, the Company's Board of Directors (the "Board") approved an expansion of the Global Growth and Efficiency Program (as expanded, the "2012 Restructuring Program"). The initiatives under the 2012 Restructuring Program continue to be focused on the following areas:

Expanding Commercial Hubs

Extending Shared Business Services and Streamlining Global Functions

Optimizing Global Supply Chain and Facilities

The Board authorized the expansion of the 2012 Restructuring Program to take advantage of additional savings opportunities identified in all three areas.

Cumulative pretax charges related to the 2012 Restructuring Program, once all phases are approved and implemented, are estimated to be \$1,285 to \$1,435 (\$950 to \$1,050 aftertax). Implementation of the 2012 Restructuring Program is expected to be substantially completed by December 31, 2016. Savings, substantially all of which are expected to increase future cash flows, are projected to be approximately \$405 to \$475 pretax (\$340 to \$390 aftertax) annually by the fourth year of the program. For more information regarding the 2012 Restructuring Program, see "Restructuring and Related Implementation Charges" below.

In the three and six months ended June 30, 2015, the Company incurred aftertax costs of \$40 and \$107, respectively, associated with the 2012 Restructuring Program.

On September 13, 2011, the Company's Mexican subsidiary entered into an agreement to sell to the United States of America (the "Purchaser") the Mexico City site on which its commercial operations, technology center and soap production facility were located. The parties have subsequently amended that agreement to extend the closing date. Under the existing agreement, the final installment of the purchase price is due upon the transfer of the property, which is subject to the Company's satisfaction of certain closing conditions relating to site preparation by September 15, 2015. While these conditions are not expected to be fully satisfied by September 15, 2015, in which case the Purchaser has several options under the agreement (including termination and the return to it of the first two installments of the purchase price), based on the discussions to date, the Company believes that an additional amendment will be negotiated and the transfer of the property is likely to occur in the first half of 2016. The Company has reinvested the first two installments to relocate its soap production to a new state-of-the-art facility at its Mission Hills, Mexico site, to relocate its commercial and technology operations within Mexico City and to prepare the existing site for transfer. Exit costs incurred during the project primarily relate to staff leaving indemnities, accelerated depreciation and demolition to make the site building-ready.

Looking forward, the Company expects global macroeconomic and market conditions to remain highly challenging. While the global marketplace in which the Company operates has always been highly competitive, the Company continues to experience heightened competitive activity in certain markets from local competitors and other large multinational companies, some of which have greater resources than the Company does. Such activities have included more aggressive product claims and marketing challenges, as well as increased promotional spending and geographic expansion. Additionally, the Company continues to experience volatile foreign currency fluctuations and

high raw and packaging material costs, driven by foreign exchange transaction costs. While the Company has taken, and will continue to take, measures to mitigate the effect of these conditions, should they persist, they could adversely affect the Company's future results.

The Company believes it is well prepared to meet the challenges ahead due to its strong financial condition, experience operating in challenging environments and continued focus on the Company's strategic initiatives: engaging to build our brands; innovation for growth; effectiveness and efficiency; and leading to win. This focus, together with the strength of the Company's global brand names, its broad international presence in both mature and emerging markets and initiatives, such as the 2012 Restructuring Program, should position the Company well to increase shareholder value over the long term.

Worldwide Net sales were \$4,066 in the second quarter of 2015, down 6.5% from the second quarter of 2014, as volume growth of 3.0% and net selling price increases of 2.5% were more than offset by negative foreign exchange of 12.0%. Organic sales (Net sales excluding the impact of foreign exchange, acquisitions and divestments), a non-GAAP financial measure as discussed below, increased 5.5% in the second quarter of 2015.

Net sales in the Oral, Personal and Home Care product segment were \$3,514 in the second quarter of 2015, down 7.5% from the second quarter of 2014, as volume growth of 2.5% and net selling price increases of 2.5% were more than offset by negative foreign exchange of 12.5%. Organic sales in the Oral, Personal and Home Care product segment increased 5.0% in the second quarter of 2015.

The Company's share of the global toothpaste market was 45.0% on a year-to-date basis, up 0.5 share points from the year ago period, and its share of the global manual toothbrush market was 34.1% on a year-to-date basis, up 0.2 share points from the year ago period. Year-to-date market shares in toothpaste were up in North America, Latin America, Europe/South Pacific and Africa/Eurasia and down in Asia versus the comparable 2014 period. In the manual toothbrush category, year-to-date market shares were up in North America and Europe/South Pacific, flat in Latin America and down in Asia and Africa/Eurasia versus the comparable 2014 period. For additional information regarding market shares, see "Market Share Information" below.

Net sales for Hill's Pet Nutrition were \$552 in the second quarter of 2015, down 1.5% from the second quarter of 2014, as volume growth of 5.5% and net selling price increases of 1.5% were more than offset by negative foreign exchange of 8.5%. Gross Profit/Margin

Worldwide Gross profit decreased 7% to \$2,367 in the second quarter of 2015 from \$2,552 in the second quarter of 2014. Gross profit in both periods included charges related to the 2012 Restructuring Program. Gross profit in the second quarter of 2014 also included costs related to the sale of land in Mexico. Excluding these items in both periods as applicable, Gross profit decreased to \$2,371 in the second quarter of 2015 from \$2,560 in the second quarter of 2014 due to lower Net sales (\$168), as the growth in organic sales was more than offset by the impact of negative foreign exchange, and lower Gross profit margin (\$21).

Worldwide Gross profit margin decreased to 58.2% in the second quarter of 2015 from 58.6% in the second quarter of 2014. Excluding the items described above in both periods as applicable, Gross profit margin decreased by 50 basis points (bps) to 58.3% in the second quarter of 2015 from 58.8% in the second quarter of 2014, as higher pricing (100 bps) and cost savings from the Company's funding-the-growth initiatives (200 bps) and the 2012 Restructuring Program (20 bps) were more than offset by higher raw and packaging material costs (350 bps), driven by significant foreign exchange transaction costs.

Selling, general and administrative expenses decreased 8% to \$1,381 in the second quarter of 2015 from \$1,507 in the second quarter of 2014. Selling, general and administrative expenses in both periods included charges related to the 2012 Restructuring Program. Excluding these charges, Selling, general and administrative expenses decreased to \$1,370 in the second quarter of 2015 from \$1,495 in the second quarter of 2014, reflecting decreased advertising investment of \$58 and lower overhead expenses of \$67.

Selling, general and administrative expenses as a percentage of Net sales decreased to 34.0% in the second quarter of 2015 from 34.6% in the second quarter of 2014. Excluding charges related to the 2012 Restructuring Program, Selling, general and administrative expenses as a percentage of Net sales were 33.7% in the second quarter of 2015, a decrease of 70 bps as compared to the second quarter of 2014. This decrease was a result of decreased advertising investment as percentage of Net sales (70 bps). In the second quarter of 2015, advertising investment decreased 12.4% to \$410, as compared with \$468 in the second quarter of 2014, and decreased as a percentage of Net sales to 10.1% in the second quarter of 2015 from 10.8% in the second quarter of 2014.

Net sales	\$780	\$770	1.5	%
Operating profit	\$223	\$231	(3)%
% of Net sales	28.6	% 30.0	% (140) bps

Net sales in North America increased 1.5% in the second quarter of 2015 to \$780, driven by volume growth of 3.0%, which was partially offset by net selling price decreases of 0.5%, due to increased promotional activities, and negative foreign exchange of 1%. Organic sales in North America increased 2.5% in the second quarter of 2015.

The increase in organic sales in North America in the second quarter of 2015 versus the second quarter of 2014 was due to increases in Oral Care, Personal Care as well as Home Care organic sales. The increase in Oral Care organic sales was driven by strong organic sales growth in the toothpaste category. Personal Care organic sales growth was driven by gains in the shower gel and underarm protection categories. Home Care organic sales growth was due to strong organic sales in the fabric softener category.

Operating profit in North America decreased 3% in the second quarter of 2015 to \$223, or 140 bps to 28.6% of Net sales. This decrease in Operating profit as a percentage of Net sales was due to an increase in Selling, general and administrative expenses (120 bps) and an increase in Other (income) expense, net (100 bps), which were partially offset by an increase in Gross profit (80 bps), all as a percentage of Net sales. This increase in Gross profit was primarily driven by cost savings from the Company's funding-the-growth initiatives (180 bps), which were partially offset by higher costs (80 bps), which included higher raw and packaging material costs, and lower pricing due to increased promotional activities. This increase in Selling, general and administrative expenses was due to higher overhead expenses (60 bps) and increased advertising investment (60 bps). This increase in Other (income) expense, net was in part due to higher intercompany expense from purchases of inventory from the Latin America reportable operating segment.

Net sales in Latin America decreased 8.5% to \$1,126 in the second quarter of 2015. Volume growth of 0.5% and net selling price increases of 9.0% were more than offset by negative foreign exchange of 18.0%. Acquisitions contributed 0.5% to volume. Organic sales in Latin America increased 9.0% in the second quarter of 2015. Volume gains were led by Mexico, Argentina and Brazil and were partially offset by volume declines in Venezuela.

The increase in organic sales in Latin America in the second quarter of 2015 versus the second quarter of 2014 was driven by Oral Care with strong organic sales in the toothpaste, manual toothbrush and mouthwash categories. Personal Care and Home Care also contributed to organic sales growth. Personal Care organic sales growth was driven by gains in the shampoo, underarm protection and shower gel categories. The increase in Home Care organic sales was due to strong growth in the liquid cleaners and hand dish categories.

Operating profit in Latin America increased 3% in the second quarter of 2015 to \$321, or 320 bps to 28.5% of Net sales. This increase in Operating profit as a percentage of Net sales was due to a decrease in Selling, general and administrative expenses (300 bps) and a decrease in Other (income) expense, net (150 bps), partially offset by a decrease in Gross profit (130 bps), all as a percentage of Net sales. This decrease in Gross profit was due to higher raw and packaging material costs (730 bps), driven by foreign exchange transaction costs, partially offset by cost savings from the Company's funding-the-growth initiatives (190 bps) and the 2012 Restructuring Program (30 bps) and higher pricing. This decrease in Selling, general and administrative expenses was due to decreased advertising investment (250 bps), reflecting in part a shift from advertising investment to in-store promotional activities, and lower overhead expenses (50 bps). This decrease in Other (income) expense, net was in part due to higher intercompany income from sales of inventory to the North America reportable operating segment.

Operating profit increased 11% to \$1,792 in the first six months of 2015 from \$1,614 in the first six months of 2014. Operating profit in both periods included charges related to the 2012 Restructuring Program and charges related to the Venezuela Remeasurements. Operating profit in the first six months of 2014 also included costs related to the sale of land in Mexico. Excluding these items in both periods as applicable, Operating profit for the first six months of 2015 decreased 5% to \$1,960 from \$2,059 in the first six months of 2014, primarily due to lower Gross profit, partially offset by a decrease in Selling, general and administrative expenses.

Operating profit margin was 22.0% in the first six months of 2015, an increase of 340 bps compared to 18.6% in the first six months of 2014. Excluding the items described above in both periods as applicable, Operating profit margin was 24.1%, an increase of 40 bps from 23.7% in the first six months of 2014. This increase was due to a decrease in Selling, general and administrative expenses as a percentage of Net sales (40 bps).

Interest (Income) Expense, Net

Interest (income) expense, net was \$14 in the first six months of 2015 as compared to \$16 in the first six months of 2014. The decrease was primarily due to lower interest expense as a result of lower average interest rates on debt, partially offset by lower interest income on investments held outside the United States.

Income Taxes

The tax rate was 33.5% for the second quarter of 2015 as compared to 31.9% for the second quarter of 2014. The quarterly provision for income taxes is determined based on the Company's estimated full year effective tax rate adjusted by the amount of tax attributable to infrequent or unusual items that are separately recognized on a discrete basis in the income tax provision in the quarter in which they occur. The Company's current estimate of its full year effective income tax rate before discrete period items is 31.5%, compared to 31.7% in the second quarter of 2014. As reflected in the table below, the non-GAAP income tax rate was 31.5% for each of the three-month and six-month periods ended June 30, 2015, as compared to 31.7% in the comparable periods of 2014.

At December 31, 2014, the Company had unrecognized tax benefits of \$218. In May 2015, the Company became aware of several Supreme Court rulings in a foreign jurisdiction disallowing certain tax deductions which had the effect of reversing prior decisions. The Company had taken deductions in prior years similar to those now disallowed by the Court. As a result, as required, the Company reassessed its tax position in light of the recent rulings and concluded it needed to increase its unrecognized tax benefits by \$15. The Company recorded this \$15 income tax charge in the quarter ended June 30, 2015.

Restructuring and Related Implementation Charges

2012 Restructuring Program

In the fourth quarter of 2012, the Company commenced the 2012 Restructuring Program. The program's initiatives are expected to help Colgate ensure continued solid worldwide growth in unit volume, organic sales and earnings per share and enhance its global leadership positions in its core businesses.

The 2012 Restructuring Program is expected to produce significant benefits in the Company's long-term business performance. The major objectives of the program include:

Becoming even stronger on the ground through the continued evolution and expansion of proven global and regional commercial capabilities, which have already been successfully implemented in a number of the Company's operations around the world.

Simplifying and standardizing how work gets done by increasing technology-enabled collaboration and taking advantage of global data and analytic capabilities, leading to smarter and faster decisions.

Reducing structural costs to continue to increase the Company's gross and operating profit.

Building on Colgate's current position of strength to enhance its leading market share positions worldwide and ensure sustained sales and earnings growth.

On October 23, 2014, the Company's Board approved an expansion of the 2012 Restructuring Program. The initiatives under the 2012 Restructuring Program continue to be focused on the following areas:

Expanding Commercial Hubs - Building on the success of this structure already implemented in several divisions, continuing to cluster single-country subsidiaries into more efficient regional hubs, in order to drive smarter and faster decision making, strengthen capabilities available on the ground and improve cost structure.

Extending Shared Business Services and Streamlining Global Functions - Implementing the Company's shared service organizational model, already successful in Europe, in all regions of the world. Initially focused on finance and accounting, these shared services will be expanded to additional functional areas to streamline global functions.

Optimizing Global Supply Chain and Facilities - Continuing to optimize manufacturing efficiencies, global warehouse networks and office locations for greater efficiency, lower cost and speed to bring innovation to market.

The Board authorized the expansion of the 2012 Restructuring Program to take advantage of additional savings opportunities identified in all three areas.

Cumulative pretax charges related to the 2012 Restructuring Program, once all phases are approved and implemented, are estimated to be \$1,285 to \$1,435 (\$950 to \$1,050 aftertax). Implementation of the 2012 Restructuring Program is expected to be substantially completed by December 31, 2016.

These pretax charges are currently estimated to be comprised of the following categories: Employee-Related Costs, including severance, pension and other termination benefits (50%); asset-related costs, primarily Incremental Depreciation and Asset Impairments (10%); and Other charges, which include contract termination costs, consisting primarily of implementation-related charges resulting directly from exit activities (20%) and the implementation of new strategies (20%). Anticipated pretax charges for 2015 are expected to amount to approximately \$330 to \$385 (\$245 to \$285 aftertax). Over the course of the 2012 Restructuring Program, it is currently estimated that approximately 75% of the charges will result in cash expenditures.

It is expected that the cumulative pretax charges, once all projects are approved and implemented, will relate to initiatives undertaken in North America (15%), Europe/South Pacific (20%), Latin America (5%), Asia (5%), Africa/Eurasia (5%), Hill's Pet Nutrition (10%) and Corporate (40%), which includes substantially all of the costs related to the implementation of new strategies, noted above, on a global basis. It is expected that, by the end of 2016, the 2012 Restructuring Program will contribute a net reduction of approximately 2,000-2,500 positions from the Company's global employee workforce.

Savings from the 2012 Restructuring Program, substantially all of which are expected to increase future cash flows, are projected to be in the range of \$405 to \$475 pretax (\$340 to \$390 aftertax) annually by the fourth year of the program. Savings in 2015 are expected to amount to approximately \$80 to \$100 pretax (\$60 to \$75 aftertax).

For the three and six months ended June 30, 2015 and 2014, restructuring and implementation-related charges are reflected in the Condensed Consolidated Statements of Income as follows:

	Three Months Ended		Six Months Ended	
	June 30,		June 30,

Since the inception of the 2012 Restructuring Program in the fourth quarter of 2012, the Company has incurred pretax cumulative charges of \$898 (\$663 aftertax) in connection with the implementation of various projects as follows:

	Cumulative Charges as of June 30, 2015
Employee-Related Costs	\$362
Incremental Depreciation	60
Asset Impairments	3
Other	473
Total	\$898

The majority of costs incurred since inception relate to the following projects: the implementation of the Company's overall hubbing strategy; the consolidation of facilities; the extension of shared business services and streamlining of global functions; the simplification and streamlining of the Company's research and development capabilities and oral care supply chain, both in Europe; restructuring how the Company will provide future retirement benefits to substantially all of its U.S.-based employees participating in the Company's defined benefit retirement plan by shifting them to the Company's defined contribution plan; and the closing of the Morristown, New Jersey personal care facility.

Employee-Related Costs primarily include severance and other termination benefits and are calculated based on long-standing benefit practices, local statutory requirements and, in certain cases, voluntary termination arrangements. Employee-Related Costs also include pension and other retiree benefit enhancements amounting to \$9 for the six months ended June 30, 2015, which are reflected as Charges against assets within Employee-Related Costs in the preceding tables as the corresponding balance sheet amounts are reflected as a reduction of pension assets or an increase in pension and other retiree benefit liabilities (see Note 10, Retirement Plans and Other Retiree Benefits to the Condensed Consolidated Financial Statements).

Incremental Depreciation is recorded to reflect changes in useful lives and estimated residual values for long-lived assets that will be taken out of service prior to the end of their normal service period. Asset Impairments are recorded to write down assets held for sale or disposal to their fair value based on amounts expected to be realized. Charges against assets within Asset Impairments are net of cash proceeds pertaining to the sale of certain assets.

Other charges consist primarily of charges resulting directly from exit activities and the implementation of new strategies as a result of the 2012 Restructuring Program. These charges for the three and six months ended June 30, 2015 include third-party incremental costs related to the development and implementation of new business and strategic initiatives of \$14 and \$26, respectively, and contract termination costs and charges resulting directly from exit activities of \$1 and \$4, respectively, directly related to the 2012 Restructuring Program. These charges were expensed as incurred. Also included in Other charges for the three and six months ended June 30, 2015 are other exit costs related to the consolidation of facilities of \$1 and \$45, respectively.

Non-GAAP Financial Measures

This Quarterly Report on Form 10-Q discusses organic sales growth (Net sales growth excluding the impact of foreign exchange, acquisitions and divestments) (non-GAAP). Management believes this measure provides investors with useful supplemental information regarding the Company's underlying sales trends by presenting sales growth excluding the external factor of foreign exchange, as well as the impact of acquisitions and divestments. A reconciliation of organic sales growth to Net sales growth for the three and six months ended June 30, 2015 is provided below.

Worldwide Gross profit, Gross profit margin, Selling, general and administrative expenses, Selling, general and administrative expenses as a percentage of Net sales, Other (income) expense, net, Operating profit, Operating profit margin, tax rate, Net income attributable to Colgate-Palmolive Company and Earnings per share on a diluted basis are discussed in this Quarterly Report on Form 10-Q both on a GAAP basis and, as applicable, excluding charges related to the 2012 Restructuring Program, charges related to the Venezuela Remeasurements, a charge for a foreign tax matter and costs related to the sale of land in Mexico (non-GAAP). Management believes these non-GAAP financial measures provide investors with useful supplemental information regarding the performance of the Company's ongoing operations. A reconciliation of each of these non-GAAP financial measures to the most directly comparable GAAP financial measures for the three and six months ended June 30, 2015 and 2014 is presented within the applicable section of Results of Operations.

The Company uses the above financial measures internally in its budgeting process and as a factor in determining compensation. While the Company believes that these non-GAAP financial measures are useful in evaluating the Company's business, this information should be considered as supplemental in nature and is not meant to be considered in isolation or as a substitute for the related financial information prepared in accordance with GAAP. In addition, these non-GAAP financial measures may not be the same as similar measures presented by other companies.

The following table provides a quantitative reconciliation of organic sales growth to Net sales growth for the three months ended June 30, 2015.

Liquidity and Capital Resources

The Company expects cash flow from operations and debt issuances will be sufficient to meet foreseeable business operating and recurring cash needs (including for debt service, dividends, capital expenditures, costs related to the 2012 Restructuring Program and stock repurchases). The Company believes its strong cash generation and financial position should continue to allow it broad access to global credit and capital markets.

Net cash provided by operations decreased 12% to \$1,223 in the first six months of 2015, compared with \$1,389 in the comparable period of 2014, due to a decrease in Operating profit excluding charges related to the Venezuela Remeasurements, charges related to the 2012 Restructuring Program and costs related to the sale of land in Mexico in both periods, as applicable, higher income tax payments and payments for a previously disclosed European competition law matter.

The Company defines working capital as the difference between current assets (excluding Cash and cash equivalents and marketable securities, the latter of which is reported in Other current assets) and current liabilities (excluding short-term debt). Overall, the Company's working capital decreased to (0.2%) of Net sales in the first six months of 2015 as compared to 0.7% in the first six months of 2014, primarily due to a decrease in inventories and accounts receivable, reflecting the Company's tight focus on working capital.

Approximately 75% of total program charges related to the 2012 Restructuring Program, estimated to be \$1,285 to \$1,435 (\$950 to \$1,050 aftertax), are expected to result in cash expenditures. Savings from the 2012 Restructuring Program are projected to be in the range of \$405 to \$475 pretax (\$340 to \$390 aftertax) annually by the fourth year of the program, substantially all of which are expected to increase future cash flows. The anticipated pretax charges for 2015 are expected to amount to approximately \$330 to \$385 (\$245 to \$285 aftertax) and savings in 2015 are expected to amount to approximately \$80 to \$100 pretax (\$60 to \$75 aftertax). It is anticipated that cash requirements for the 2012 Restructuring Program will be funded from operating cash flows. Approximately 50% of the restructuring accrual at June 30, 2015 is expected to be paid in the next twelve months.

Investing activities used \$438 of cash in the first six months of 2015, compared with \$314 in the comparable period of 2014. Purchases of marketable securities and investments increased in the first six months of 2015 to \$365 from \$165 in the comparable period of 2014 partially due to an increase in the Company's investments through its subsidiary in Venezuela in local currency-denominated fixed interest rate bonds issued by the Venezuelan government and an increase in bank deposits with original maturities greater than 90 days.

In 2011, the Company's Mexican subsidiary entered into an agreement to sell the Mexico City site on which its commercial operations, technology center and soap production facility were located. During 2011 and 2012, the Company received the first and second installments of \$24 and \$36, respectively, related to the sale of land in Mexico. The parties have subsequently amended that agreement to extend the closing date. Under the existing agreement, the final installment of the purchase price is due upon the transfer of the property, which is subject to the Company's satisfaction of certain closing conditions relating to site preparation by September 15, 2015. While these conditions are not expected to be fully satisfied by September 15, 2015, in which case the Purchaser has several options under the agreement (including termination and the return to it of the first two installments of the purchase price), based on the discussions to date, the Company believes that an additional amendment will be negotiated and the transfer of the property is likely to occur in the first half of 2016.

On May 11, 2015, the Company and Henkel AG & Co. KGaA (“Henkel”), together with certain of their respective subsidiaries, entered into an asset sale agreement that provides for, among other things, the sale of the Company’s laundry detergent business in Australia, New Zealand and Fiji to Henkel for an aggregate purchase price of approximately 310 Australian dollars, approximately \$230 at the current exchange rate. The Company currently expects the sale to be completed during the third quarter of 2015. The sale is subject to customary closing conditions.

Capital spending decreased in the first six months of 2015 to \$280 from \$314 in the comparable period of 2014. The Company continues to focus its capital spending on projects that are expected to yield high aftertax returns. Capital expenditures for 2015 are expected to remain at an annual rate of approximately 4.5% of Net sales, which is higher than the historical rate of approximately 3.5%, primarily due to the 2012 Restructuring Program.

Management's Discussion and Analysis of Financial

Condition and Results of Operations

(Dollars in Millions Except Share and Per Share Amounts)

Financing activities used \$756 of cash during the first six months of 2015 compared with \$830 in the comparable period of 2014, reflecting lower principal payments on debt, partially offset by higher dividend payments in the first six months of 2015 compared to the first six months of 2014.

Long-term debt, including the current portion, increased to \$6,674 as of June 30, 2015 as compared to \$6,132 as of December 31, 2014 and total debt increased to \$6,683 as of June 30, 2015 as compared to \$6,148 as of December 31, 2014. The Company's debt issuances support its capital structure strategy objectives of funding its business and growth initiatives while minimizing its risk-adjusted cost of capital. During the second quarter of 2015, the Company issued €500 of euro-denominated four-year notes at a variable rate. During the first quarter of 2014, the Company issued \$500 of five-year notes at a fixed rate of 1.75% and \$500 of ten-year notes at a fixed rate of 3.25%. The debt issuances during the first quarter of 2014 were U.S. dollar-denominated. The debt issuances during the second quarter of 2015 and first quarter of 2014 were under the Company's shelf registration statement. Proceeds from the debt issuances in the second quarter of 2015 and first quarter of 2014 were used for general corporate purposes which included the retirement of commercial paper borrowings. Proceeds from the debt issuances in the first quarter of 2014 were also used to repay and retire \$250 of U.S. dollar-denominated notes and €250 of euro-denominated notes, both of which became due in the second quarter of 2014.

As of June 30, 2015, domestic and foreign commercial paper outstanding was \$236. As of June 30, 2014, the Company had no commercial paper outstanding. The average daily balances outstanding for commercial paper in the first six months of 2015 and 2014 were \$2,036 and \$1,261, respectively. The Company classifies commercial paper and certain current maturities of notes payable as long-term debt when it has the intent and ability to refinance such obligations on a long-term basis, including, if necessary, by utilizing its line of credit that expires in 2019.

Certain of the agreements with respect to the Company's bank borrowings contain financial and other covenants as well as cross-default provisions. Noncompliance with these requirements could ultimately result in the acceleration of amounts owed. The Company is in full compliance with all such requirements and believes the likelihood of noncompliance is remote.

In the first quarter of 2015, the Company increased the annualized common stock dividend by 6% to \$1.52 per share, effective in the second quarter of 2015. On February 19, 2015, the Board authorized the repurchase of shares of the Company's common stock having an aggregate purchase price of up to \$5,000 under a new share repurchase program (the "2015 Program"), which replaced a previously authorized share repurchase program. The Company commenced the repurchase of shares of the Company's common stock under the 2015 Program beginning February 19, 2015.

Cash and cash equivalents decreased \$30 during the first six months of 2015 to \$1,059 at June 30, 2015, compared to \$1,089 at December 31, 2014, most of which (\$1,029 and \$1,034, respectively) were held by the Company's foreign subsidiaries. These amounts include \$136 and \$64 at June 30, 2015 and December 31, 2014, respectively, which are subject to currency exchange controls in Venezuela, limiting the total amount of Cash and cash equivalents held by the Company's foreign subsidiaries that can be repatriated at any particular point in time. The Company regularly assesses its cash needs and the available sources to fund these needs and, as part of this assessment, the Company determines the amount of foreign earnings it intends to repatriate to help fund its domestic cash needs and provides applicable U.S. income and foreign withholding taxes on such earnings.

As of December 31, 2014, the Company had approximately \$4,900 of undistributed earnings of foreign subsidiaries for which no U.S. income or foreign withholding taxes have been provided as the Company does not currently

anticipate a need to repatriate these earnings. These earnings have been and currently are considered to be indefinitely reinvested outside of the U.S. and, therefore, are not subject to such taxes. Should these earnings be repatriated in the future, they would be subject to applicable U.S. income and foreign withholding taxes. As the Company operates in over 200 countries and territories throughout the world, and due to the complexities in the tax laws and the assumptions that would have to be made, it is not practicable to determine the tax liability that would arise if these earnings were repatriated.

For additional information regarding liquidity and capital resources, please refer to the Company's Annual Report on Form 10-K for the year ended December 31, 2014.

Management's Discussion and Analysis of Financial

Condition and Results of Operations

(Dollars in Millions Except Share and Per Share Amounts)

Market Share Information

Management uses market share information as a key indicator to monitor business health and performance. References to market share in this Quarterly Report on Form 10-Q are based on a combination of consumption and market share data provided by third-party vendors, primarily Nielsen, and internal estimates. All market share references represent the percentage of the dollar value of sales of our products, relative to all product sales in the category in the countries in which the Company competes and purchases data.

Market share data is subject to limitations on the availability of up-to-date information. We believe that the third-party vendors we use to provide data are reliable, but we have not verified the accuracy or completeness of the data or any assumptions underlying the data. In addition, market share information calculated by the Company may be different from market share information calculated by other companies due to differences in category definitions, the use of data from different countries, internal estimates and other factors.

Cautionary Statement on Forward-Looking Statements

This Quarterly Report on Form 10-Q may contain forward-looking statements as that term is defined in the Private Securities Litigation Reform Act of 1995 or by the Securities and Exchange Commission in its rules, regulations and releases. Such statements may relate, for example, to sales or volume growth, organic sales growth, profit or profit margin growth, earnings growth, financial goals, the impact of currency devaluations and exchange controls, price or profit controls and labor unrest, including in Venezuela, cost-reduction plans including the 2012 Restructuring Program, tax rates, new product introductions, commercial investment levels, acquisitions and divestitures, including the Mexico land sale and the South Pacific detergent divestiture, or legal proceedings, among other matters. These statements are made on the basis of the Company's views and assumptions as of this time and the Company undertakes no obligation to update these statements, except as required by law. Moreover, the Company does not, nor does any other person, assume responsibility for the accuracy and completeness of those statements. The Company cautions investors that any such forward-looking statements are not guarantees of future performance and that actual events or results may differ materially from those statements. Actual events or results may differ materially because of factors that affect international businesses and global economic conditions, as well as matters specific to the Company and the markets it serves, including the uncertain economic environment in different countries and its effect on consumer spending habits, increased competition and evolving competitive practices, currency rate fluctuations, exchange controls, price or profit controls, labor relations, changes in foreign or domestic laws or regulations or their interpretation, political and fiscal developments, the availability and cost of raw and packaging materials, the ability to maintain or increase selling prices as needed, the ability to implement the 2012 Restructuring Program as planned or differences between the actual and the estimated costs or savings under such program, changes in the policies of retail trade customers, the ability to continue lowering costs, the ability to complete acquisitions and divestitures as planned and the uncertainty of the outcome of legal proceedings, whether or not the Company believes they have merit. For information about these and other factors that could impact the Company's business and cause actual results to differ materially from forward-looking statements, refer to the Company's Annual Report on Form 10-K for the year ended December 31, 2014, including the information set forth under the captions "Item 1A. Risk Factors" and "Cautionary Statement on Forward-Looking Statements."

Controls and Procedures

Evaluation of Disclosure Controls and Procedures

The Company's management, under the supervision and with the participation of the Company's Chairman of the Board, President and Chief Executive Officer and its Chief Financial Officer, carried out an evaluation of the effectiveness of the design and operation of the Company's disclosure controls and procedures as of June 30, 2015 (the "Evaluation"). Based upon the Evaluation, the Company's Chairman of the Board, President and Chief Executive Officer and its Chief Financial Officer concluded that the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) of the Securities Exchange Act of 1934) are effective.

Changes in Internal Control over Financial Reporting

There were no changes in the Company's internal control over financial reporting that occurred during the Company's most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting. As part of the 2012 Restructuring Program, the Company is implementing a shared business service organization model in all regions of the world. This implementation is expected to continue in a phased approach in future years. At this time, certain financial transaction processing activities have been transitioned to these newly established shared business services centers. The Company does not expect this transition to materially affect its internal control over financial reporting.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

On February 19, 2015, the Board authorized the repurchase of shares of the Company's common stock having an aggregate purchase price of up to \$5 billion under a new share repurchase program (the "2015 Program"), which replaced a previously authorized share repurchase program. The Board also has authorized share repurchases on an ongoing basis to fulfill certain requirements of the Company's compensation and benefit programs. The shares are repurchased from time to time in open market or privately negotiated transactions at the Company's discretion, subject to market conditions, customary blackout periods and other factors.

The following table shows the stock repurchase activity for the three months in the quarter ended June 30, 2015:

Month	Total Number of Shares Purchased ⁽¹⁾	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs ⁽²⁾	Approximate Dollar Value of Shares That May Yet Be Purchased Under the Plans or Programs ⁽³⁾ (in millions)
April 1 through 30, 2015	670,377	\$69.29	609,641	\$4,737
May 1 through 31, 2015	1,900,593	\$68.03	1,860,000	\$4,610
June 1 through 30, 2015	3,204,931	\$66.38	3,164,994	\$4,400
Total	5,775,901	\$67.26	5,634,635	

(1) Includes share repurchases under the 2015 Program and those associated with certain employee elections under the Company's compensation and benefit programs.

(2) The difference between the total number of shares purchased and the total number of shares purchased as part of publicly announced plans or programs is 141,266 shares, all of which relate to shares deemed surrendered to the Company to satisfy certain employee elections under the Company's compensation and benefit programs.

(3) Includes approximate dollar value of shares that were available to be purchased under the publicly announced plans or programs that were in effect as of June 30, 2015.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Mine Safety Disclosures

Not Applicable.
