Coeur Mining, Inc.
Form 10-Q
October 31, 2018
UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, DC 20549

FORM 10-Q

☒ Quarterly Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934
For the quarterly period ended September 30, 2018

OR

☐ Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934
For the transition period from _____ to _____
Commission file number 001-08641

COEUR MINING, INC.
(Exact name of registrant as specified in its charter)

Delaware	82-0109423
(State or other jurisdiction of incorporation or organization)	(I.R.S. Employer Identification No.)

104 S. Michigan Ave., Suite 900 Chicago, Illinois	60603
(Address of principal executive offices)	(Zip Code)

(312) 489-5800

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days: Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files.) Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer ☒ Accelerated filer ☐

Non-accelerated filer ☐ Smaller reporting company ☐

Emerging growth company ☐

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ☐ No ☒

The Company has 300,000,000 shares of common stock, par value of \$0.01, authorized of which 199,125,817 shares were issued and outstanding as of October 29, 2018.

Coeur Mining, Inc. and Subsidiaries
Notes to Condensed Consolidated Financial Statements

NOTE 1 - BASIS OF PRESENTATION

The interim condensed consolidated financial statements of Coeur Mining, Inc. and its subsidiaries (collectively, “Coeur” or the “Company”) are unaudited. In the opinion of management, all adjustments and disclosures necessary for the fair presentation of these interim statements have been included. The results reported in these interim statements may not be indicative of the results which will be reported for the year ending December 31, 2018. The condensed consolidated December 31, 2017 balance sheet data was derived from audited consolidated financial statements. Accordingly, these unaudited interim condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2017 (the “2017 10-K”).

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Revenue Recognition

On January 1, 2018, the Company adopted the updated revenue guidance applicable under ASC 606, - “Revenue from Contracts with Customers”. The new guidance creates a five-step framework to determine revenue recognition:

1. Identify the contract with the customer
2. Identify the performance obligations
3. Determine the transaction price
4. Allocate the transaction price to the performance obligations
5. Recognize revenue when (or as) the entity satisfies a performance obligation

The Company produces doré and concentrate that is shipped to third-party refiners and smelters, respectively, for processing. The Company enters into contracts to sell its metal to various third-party customers which may include the refiners and smelters that process the doré and concentrate. The Company’s performance obligation in these transactions is generally the transfer of metal to the customer.

In the case of doré shipments, the Company generally sells refined metal at market prices agreed upon by both parties. The Company also has the right, but not the obligation, to sell a portion of the anticipated refined metal in advance of being fully refined. When the Company sells refined metal or advanced metal, the performance obligation is satisfied when the metal is delivered to the customer. Revenue and Costs Applicable to Sales are recorded on a gross basis under these contracts at the time the performance obligation is satisfied.

Under the Company’s concentrate sales contracts with third-party smelters, metal prices are set on a specified future quotational period, typically one to three months, after the shipment date based on market prices. When the Company sells gold concentrate to the third-party smelters, the performance obligation is satisfied when the concentrate is loaded onto the third-party shipping vessel. The contracts, in general, provide for provisional payment based upon provisional assays and historical metal prices. Final settlement is based on the applicable price for the specified future quotational period and generally occurs three to six months after shipment. The Company’s provisionally priced sales contain an embedded derivative that is required to be separated from the host contract for accounting purposes. The host contract is the receivable from the sale of concentrates measured at the forward price at the time of sale. The embedded derivative does not qualify for hedge accounting and is adjusted to fair value through revenue each period until the date of final metal settlement.

The Company also sells concentrate under off-take agreements to third-party customers that are responsible for arranging the smelting of the concentrate. Prices can be either be fixed or based on a quotational period. The quotational period varies by contract, but is generally a one-month period following the shipment of the concentrate. The performance obligation is satisfied when the concentrate is loaded onto the third-party shipping vessel. The

off-take agreement allows for the Company to sell concentrate in advance of shipment and results in the customer taking ownership of the concentrate prior to shipment.

The Company recognizes revenue from concentrate sales, net of treatment and refining charges, when it satisfies the performance obligation of transferring control of the concentrate to the customer.

For doré and off-take sales, the Company may incur a finance charge related to advance sales that is not considered significant and, as such, is not considered a separate performance obligation. In addition, the Company has elected to treat freight costs as a fulfillment cost under ASC 606 and not as a separate performance obligation.

The Company's gold stream agreement with a subsidiary of Franco-Nevada Corporation ("Franco-Nevada") provided for a \$20.0 million deposit paid by Franco-Nevada in exchange for the right and obligation, commencing in 2016, to purchase

Coeur Mining, Inc. and Subsidiaries
Notes to Condensed Consolidated Financial Statements

50% of a portion of Palmarejo gold production at the lesser of \$800 or market price per ounce. Because there is no minimum obligation associated with the deposit, it is not considered financing, and each shipment is considered to be a separate performance obligation. The streaming agreement represents a contract liability under ASC 606, which requires the Company to ratably recognize a portion of the deposit as revenue for each gold ounce delivered to Franco-Nevada.

The following table presents a rollforward of the Franco-Nevada contract liability balance:

	Three months ended September 30,		Nine months ended September 30,

Recent Accounting Standards

In January 2017, the FASB issued ASU 2017-01, “Business Combinations (Topic 805) - Clarifying the Definition of a Business,” which clarifies the definition of a business to assist entities in the evaluation of acquisitions and disposals of assets or businesses. These changes became effective for the Company’s fiscal year beginning January 1, 2018 and did not materially impact the Company’s consolidated net income, financial position or cash flows.

In November 2016, the FASB issued ASU 2016-18, “Statement of Cash Flows (Topic 230) - Restricted Cash,” which will require entities to show the changes in the total of cash, cash equivalents, restricted cash and restricted cash equivalents in the statement of cash flows. These changes became effective for the Company’s fiscal year beginning January 1, 2018 and resulted in the inclusion of restricted cash equivalents on the Consolidated Statements of Cash Flows of \$12.5 million and \$11.4 million at September 30, 2018 and 2017, respectively.

In August 2016, the FASB issued ASU 2016-15, “Statement of Cash Flows (Topic 230) - Classification of Certain Cash Receipts and Cash Payments,” which provides guidance on presentation and classification of certain cash receipts and payments in the statement of cash flows. These changes became effective for the Company’s fiscal year beginning January 1, 2018 and did not materially impact the Company’s consolidated net income, financial position or cash flows.

In February 2016, the FASB issued ASU 2016-02, “Leases,” which will require lessees to recognize assets and liabilities for the rights and obligations created by most leases on the balance sheet. These changes become effective for the Company’s fiscal year beginning January 1, 2019 and the Company plans to adopt it using the cumulative-effect adjustment transition method approved by the FASB in July 2018. The Company is currently evaluating the potential impact of implementing these changes on the Company’s consolidated financial position, results of operations, and cash flows.

In January 2016, the FASB issued ASU 2016-01, “Recognition and Measurement of Financial Assets and Financial Liabilities,” which requires entities to measure equity investments that do not result in consolidation and are not accounted for under the equity method at fair value and recognize any changes in fair value in net income. This new guidance also updates certain disclosure requirements for these investments. These changes became effective for the Company’s fiscal year beginning January 1, 2018, and resulted in a reclassification of \$2.6 million of unrealized holding gains and losses and deferred income taxes related to investments in equity securities from Accumulated other comprehensive income (loss) to Accumulated deficit in the Consolidated Balance Sheets on that date. Unrealized holding gains and losses related to investments in equity securities are now recognized in Fair value adjustments, net in the Consolidated Statements of Comprehensive Income (Loss).

In July 2015, the FASB issued ASU 2015-11, “Simplifying the Measurement of Inventory,” which provides a revised, simpler measurement for inventory to be measured at the lower of cost and net realizable value. These changes became effective for the Company’s fiscal year beginning January 1, 2018 and did not materially impact the Company’s

consolidated net income, financial position or cash flows.

In May 2014, the FASB issued ASU 2014-09, “Revenue from Contracts with Customers”, which has subsequently been amended several times, to update revenue guidance under the newly-created ASC 606. The new standard provides a five-step approach to be applied to all contracts with customers and also requires expanded disclosures about revenue recognition. These changes became effective under the modified retrospective method of adoption for the Company’s fiscal year beginning January 1, 2018 and did not materially impact the Company’s consolidated net income, financial position or cash flows.

Coeur Mining, Inc. and Subsidiaries
Notes to Condensed Consolidated Financial Statements

NOTE 3 – SEGMENT REPORTING

The Company's operating segments include the Palmarejo complex, and the Rochester, Kensington, Wharf and Silvertip mines. Except for the Silvertip mine, which was acquired in the fourth quarter of 2017, all operating segments are engaged in the discovery, mining, and production of gold and/or silver. Silvertip is engaged in the discovery, mining, and production of silver, zinc and lead. Silvertip commenced commercial production on September 1, 2018. Other includes the La Preciosa project, other mineral interests, strategic equity investments, corporate office, elimination of intersegment transactions, and other items necessary to reconcile to consolidated amounts.

The Company determined that the disposition in the first quarter of 2018 of Empresa Minera Manquiri S.A., a Bolivian Sociedad anonima ("Manquiri"), which operates the San Bartolomé mine, represented a strategic shift to a North America-focused mining portfolio and had significant effect on the entity's results and operations; therefore, the results of operations are presented as discontinued operations in Other for all periods presented.

Financial information relating to the Company's segments is as follows (in thousands):

Three months ended September 30, 2018	Palmarejo	Rochester	Silvertip	Kensington	Wharf	Other	Total

NOTE 4 – RECLAMATION

Reclamation and mine closure costs are based principally on legal and regulatory requirements. Management estimates costs associated with reclamation of mining properties. On an ongoing basis, management evaluates its estimates and assumptions, and future expenditures could differ from current estimates.

Changes to the Company's asset retirement obligations for its operating sites are as follows:

In thousands	Three months ended		Nine months ended	
	September 30,	September 30,	September 30,	September 30,
	2018	2017	2018	2017
Asset retirement obligation - Beginning	\$122,907	\$90,002	\$118,799	\$86,754
Accretion	2,830	2,167	8,141	6,347
Additions and changes in estimates	—	3,116	—	3,116
Settlements	(1,171)	(656)	(2,374)	(1,588)
Asset retirement obligation - Ending	\$124,566	\$94,629	\$124,566	\$94,629

The Company accrued \$2.2 million and \$2.0 million at September 30, 2018 and December 31, 2017, respectively, for reclamation liabilities related to former mining activities, which are included in Reclamation.

NOTE 5 – STOCK-BASED COMPENSATION

The Company has stock incentive plans for executives and eligible employees. Stock awards include performance shares, restricted stock and stock options. Stock-based compensation expense for the three and nine months ended September 30, 2018 was \$2.0 million and \$6.6 million, respectively, compared to \$2.6 million and \$8.1 million for the three and nine months ended September 30, 2017, respectively. At September 30, 2018, there was \$8.6 million of unrecognized stock-based compensation cost which is expected to be recognized over a weighted-average remaining vesting period of 1.5 years.

The performance shares issued in 2018 vest at the end of a three-year service period if internal performance metrics are met. The number of shares that vest is also impacted by the inclusion of a modifier that is based upon a relative stockholder return metric. The relative stockholder return metric is included in the determination of the grant date fair value of the performance shares however the recognition of compensation cost for performance share awards is based on the results of the internal performance metrics. The performance shares issued prior to 2018 vest at the end of a three-year service period if relative stockholder return and internal performance metrics are met and the existence of a market condition requires recognition of compensation cost for the relative stockholder return portion of the performance share awards over the requisite period regardless of whether the relative stockholder return metric is met. All other stock-based compensation awards are consistent with prior years.

The following table summarizes the grants awarded during the nine months ended September 30, 2018:

Grant date	Restricted stock	Grant date fair value of restricted stock	Stock options	Grant date fair value of stock options	Performance shares	Grant date fair value of performance shares
March 5, 2018	31,887	\$ 7.84	—	\$ —	—	\$ —
May 9, 2018	868,134	\$ 7.90	14,310	\$ 4.09	408,179	\$ 7.39

The following options and stock appreciation rights were exercisable during the nine months ended September 30, 2018:

Award Type	Number of Exercised Units	Weighted Average Exercised Price	Number of Exercisable Units	Weighted Average Exercisable Price
Stock options	159,069	\$ 3.35	315,032	\$ 15.06
Stock appreciation rights	—	\$ —	42,152	\$ 14.14

NOTE 6 – RETIREMENT SAVINGS PLAN

The Company has a 401(k) retirement savings plan that covers all eligible U.S. employees. Eligible employees may elect to contribute up to 75% of base salary, subject to ERISA limitations. The Company generally makes matching contributions equal to the employee's contribution up to 4% of the employee's salary. The Company may also provide an additional contribution based on an eligible employee's salary. Total plan expenses recognized for the three and nine months ended September 30, 2018 were \$0.8 million and \$2.5 million, respectively, compared to \$1.8 million and \$5.7 million for the three and nine months ended September 30, 2017, respectively. In addition, the Company has a deferred compensation plan for employees whose benefits under the 401(k) plan are limited by federal regulations.

Coeur Mining, Inc. and Subsidiaries
Notes to Consolidated Financial Statements

NOTE 7 - OTHER, NET

Other, net consists of the following:

Other	828	350	3,581	1,213
Other, net	\$(20,903)	\$2,361	\$(19,846)	\$27,134

In September 2018, the Company entered into a Letter Agreement with Ag-Mining Investments, AB, a privately-held Swedish company, the purchaser of Manquiri (the “Buyer”), pursuant to which the total aggregate principal amount of the Manquiri Notes Receivable received as partial consideration in the Manquiri Divestiture (as defined below) was reduced from \$28.5 million to \$25.0 million (as defined below) and the Buyer made a concurrent cash payment of \$15.0 million to the Company in respect of the Manquiri Notes Receivable (as defined below). In addition, the Company also agreed to suspend the quarterly payments in respect of the 2.0% net smelter returns royalty on all metals processed through the San Bartolomé mine’s processing facility (the “NSR”) received as partial consideration in the Manquiri Divestiture until October 15, 2019 and to forgo any rights the Company retained in the transaction to any value added tax (“VAT”) refunds collected or received by Manquiri. Based on the Company’s evaluation of the terms of the Letter Agreement, the Company recorded an \$18.6 million write-down that is made up of \$13.1 million on the VAT refunds, \$3.6 million on the Manquiri Notes Receivable and \$1.9 million on the NSR, See Note 10 -- Fair Value Measurements and 21 -- Discontinued Operations for additional detail.

NOTE 8 - INCOME AND MINING TAXES

The following table summarizes the components of Income and mining tax (expense) benefit for the three and nine months ended September 30, 2018 and 2017 by significant jurisdiction:

In thousands	Three months ended September 30,				Nine months ended September 30,			
	2018		2017		2018		2017	
	Income (loss) before tax	Tax (expense) benefit	Income (loss) before tax	Tax (expense) benefit	Income (loss) before tax	Tax (expense) benefit	Income (loss) before tax	Tax (expense) benefit
United States	\$(35,250)	\$(908)	\$(6,055)	\$(2,892)	\$(45,397)	\$(2,700)	\$8,036	\$(4,072)
Argentina	(2,058)	(75)	738	(366)	(1,985)	(172)	281	1,704
Canada	(13,194)	4,432	—	—	(17,103)	6,476	—	—
Mexico	1,419	(7,234)	3,210	(9,057)	35,088	(23,055)	9,665	(23,745)
Other jurisdictions	(176)	—	4,668	(1,974)	(575)	—	2,634	2,073
	\$(49,259)	\$(3,785)	\$2,561	\$(14,289)	\$(29,972)	\$(19,451)	\$20,616	\$(24,040)

The Company’s effective income and mining tax rate is a function of the combined effective tax rates and foreign exchange rates in the jurisdictions in which it operates. Variations in the jurisdictional mix of income and loss and

foreign exchange rates result in significant fluctuations in the consolidated effective tax rate, along with mining taxes, uncertain tax positions, and a full valuation allowance on deferred tax assets related to losses in the United States and certain foreign jurisdictions. Fluctuations in foreign exchange rates on deferred tax balances increased income and mining tax expense by \$3.0 million and decreased income and mining tax expense by \$1.4 million for the three months ended September 30, 2018 and 2017, respectively. Fluctuations in foreign exchange rates on deferred tax balances increased income and mining tax expense by \$2.1 million and \$7.2 million for the nine months ended September 30, 2018 and 2017, respectively. The impact of foreign exchange rates on deferred tax balances is predominately due to the Mexican Peso and Canadian Dollar.

Coeur Mining, Inc. and Subsidiaries
Notes to Condensed Consolidated Financial Statements

A valuation allowance is provided for deferred tax assets for which it is more likely than not that the related tax benefits will not be realized. The Company analyzes its deferred tax assets and, if it is determined that the Company will not realize all or a portion of its deferred tax assets, it will record or increase a valuation allowance. Conversely, if it is determined that the Company ultimately will be more likely than not able to realize all or a portion of the related benefits for which a valuation allowance has been provided, all or a portion of the related valuation allowance will be reduced. There are a number of factors that impact the Company's ability to realize its deferred tax assets. For additional information, please see the section titled "Risk Factors" in the 2017 10-K.

The Company or one of its subsidiaries files income tax returns in the U.S. federal jurisdiction, and various state and foreign jurisdictions. The statute of limitations remains open from 2015 forward for the U.S. federal jurisdiction and from 2011 forward for certain other foreign jurisdictions. As a result of statutes of limitation that will begin to expire within the next twelve months in various jurisdictions and possible settlements of audit-related issues with taxing authorities in various jurisdictions with respect to which none of the issues are individually significant, the Company believes that it is reasonably possible that the total amount of its net unrecognized income tax benefits will decrease between \$1.5 million and \$2.5 million in the next twelve months.

At September 30, 2018 and December 31, 2017, the Company had \$3.7 million and \$4.3 million of total gross unrecognized tax benefits, respectively that, if recognized, would positively impact the Company's effective income tax rate. The Company's continuing practice is to recognize potential interest and/or penalties related to unrecognized tax benefits as part of its income tax expense. At September 30, 2018 and December 31, 2017, the amount of accrued income-tax-related interest and penalties was \$3.5 million and \$4.8 million, respectively.

Coeur Mining, Inc. and Subsidiaries
Notes to Condensed Consolidated Financial Statements

NOTE 9 – NET INCOME (LOSS) PER SHARE

Basic net income (loss) per share is computed by dividing net income (loss) available to common stockholders by the weighted average number of common shares outstanding during the period. Diluted net income (loss) per share reflects the potential dilution that would occur if securities or other contracts to issue common stock were exercised or converted into common stock.

For the three and nine months ended September 30, 2018, 672,399 and 1,526,109 common stock equivalents, respectively, related to equity-based awards were not included in the diluted earnings per share calculation as the shares would be antidilutive. Similarly, 633,391 and 851,254 common stock equivalents were excluded from the diluted earnings per share calculation for the three and nine months ended September 30, 2017, respectively.

Realized gain (loss) on equity securities	(3)	—	5,199	—
Zinc options	226	—	588	—
Fair value adjustments, net	\$ 715	\$ —	\$ 2,907	\$ (864)

Accounting standards establish a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical

assets or liabilities (Level 1), secondary priority to quoted prices in inactive markets or observable inputs (Level 2), and the lowest priority to unobservable inputs (Level 3).

Coeur Mining, Inc. and Subsidiaries
Notes to Condensed Consolidated Financial Statements

The following table presents the Company's financial assets and liabilities measured at fair value on a recurring basis (at least annually) by level within the fair value hierarchy. Assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement:

Fair Value at September 30, 2018				
In thousands	Total	Level 1	Level 2	Level 3
Assets:				
Equity and debt securities	\$24,232	\$19,665	\$—	\$4,567
Other derivative instruments, net	507	—	507	—
	\$24,739	\$19,665	\$507	\$4,567
Liabilities:				
Silvertip contingent consideration	\$48,945	\$—	\$—	\$48,945
Other derivative instruments, net	267	—	267	—
	\$49,212	\$—	\$267	\$48,945

Fair Value at December 31, 2017				
In thousands	Total	Level 1	Level 2	Level 3
Assets:				
Equity and debt securities	\$34,837	\$27,946	\$—	\$6,891
Other derivative instruments, net	251	—	251	—
	\$35,088	\$27,946	\$251	\$6,891
Liabilities:				
Silvertip contingent consideration	\$47,965	\$—	\$—	\$47,965
Other derivative instruments, net	222	—	222	—
	\$48,187	\$—	\$222	\$47,965

The Company's investments in equity securities are recorded at fair market value in the financial statements based primarily on quoted market prices. Such instruments are classified within Level 1 of the fair value hierarchy. Quoted market prices are not available for certain debt securities; these securities are valued using pricing models, which require the use of observable and unobservable inputs, and are classified within Level 3 of the fair value hierarchy. The Company's other derivative instruments, net, include concentrate and certain doré sales contracts, zinc hedges, and an interest rate swap which are valued using pricing models with inputs derived from observable market data, including contractual terms, forward market prices, yield curves, credit spreads, and other unobservable inputs. The model inputs can generally be verified and do not involve significant management judgment. Such instruments are classified within Level 2 of the fair value hierarchy.

In July 2017, the Company sold the Endeavor Silver Stream and remaining non-core royalties to Metalla Royalty & Streaming Ltd. ("Metalla") for total consideration of \$13.0 million, including a \$6.7 million convertible debenture. The convertible debenture matures June 30, 2027, bears interest at a rate of 5% payable semi-annually, and is convertible into Metalla shares in connection with future equity financings or asset acquisitions by Metalla at the then-current price to maintain the Company's approximate 19.9% ownership of Metalla. In July 2018, Metalla completed an asset acquisition through the issuance of additional common stock, triggering the top-up clause in the convertible debenture, resulting in the conversion of \$1.9 million of debt into Metalla common stock. The fair value of the convertible debenture is estimated based on observable and unobservable data including yield curves and credit spreads. Therefore, the Company classifies the convertible debenture in Level 3 of the fair value hierarchy.

In October 2017, the Company acquired the Silvertip mine from shareholders of JDS Silver Holdings Ltd. The consideration for the Silvertip mine includes two \$25.0 million contingent payments, which are payable in cash and common stock upon reaching a future permitting milestone and resource declaration milestone, respectively. The fair value of the Silvertip contingent consideration is estimated based on an estimated discount rate of 2.5% for the

contingent permitting payment and 2.9% for the contingent resource declaration payment and is classified within Level 3 of the fair value hierarchy.

Edgar Filing: Coeur Mining, Inc. - Form 10-Q

Coeur Mining, Inc. and Subsidiaries
Notes to Condensed Consolidated Financial Statements

No assets or liabilities were transferred between fair value levels in the nine months ended September 30, 2018. The following tables present the changes in the fair value of the Company's Level 3 financial assets and liabilities for the three and nine months ended September 30, 2018:

Three Months Ended September 30, 2018					
In thousands	Balance at the beginning of the period	Revaluation	Settlements	Accretion	Balance at the end of the period
Assets:					
Equity and debt securities	\$6,227	\$ 193	\$ (1,853)	\$ —	\$4,567
Liabilities:					
Silvertip contingent consideration	\$48,616	\$ —	\$ —	\$ 329	\$48,945
Nine Months Ended September 30, 2018					
In thousands	Balance at the beginning of the period	Revaluation	Settlements	Accretion	Balance at the end of the period
Assets:

December 31, 2017					
In thousands	Book Value	Fair Value	Level 1	Level 2	Level 3
Liabilities:					
5.875% Senior Notes due 2024 ⁽¹⁾	\$245,088	\$243,913	\$ —	—\$243,913	\$ —
Revolving Credit Facility ⁽²⁾	\$100,000	\$100,000	\$ —	—\$100,000	\$ —

⁽¹⁾ Net of unamortized debt issuance costs of \$4.9 million.

⁽²⁾ Unamortized debt issuance costs of \$1.9 million included in Other Non-Current Assets.

In September 2018, the Company entered into a Letter Agreement with the Buyer, pursuant to which the total aggregate principal amount of the Manquiri Notes Receivable received as partial consideration in the Manquiri Divestiture was reduced from \$28.5 million to \$25.0 million, and the Buyer made a concurrent cash payment of \$15.0 million to the Company in respect of the Manquiri Notes Receivable. In addition, the Company also agreed to suspend the quarterly payments in respect of the NSR on all metals processed through the San Bartolomé mine's processing

facility received as partial consideration in the Manquiri Divestiture until October 15, 2019 and to forgo any rights the Company retained in the transaction to any VAT refunds collected or received by Manquiri. Based on the Company's evaluation of the terms of the Letter Agreement, the Company recorded an \$18.6 million write-down that is made up of \$13.1 million on the VAT refunds, \$3.6 million on the Manquiri Notes Receivable and \$1.9 million on the NSR, which is included in Other, net.. The fair value of the Manquiri Notes Receivable was determined using a discounted cash flow model using a 12% discount rate which takes into consideration the increased credit risk and short duration of the Manquiri Notes Receivable.

Coeur Mining, Inc. and Subsidiaries
Notes to Condensed Consolidated Financial Statements

The fair value is estimated based on observable and unobservable data including yield curves and credit spreads, therefore, the Company classifies the Manquiri Notes Receivable in Level 3 of the fair value hierarchy; see Note 21 -- Discontinued Operations for additional detail.

The fair value of the 5.875% Senior Notes due 2024 (the "2024 Senior Notes") was estimated using quoted market prices. The fair value of the Revolving Credit Facility approximates book value as the liability is secured, has a variable interest rate, and lacks significant credit concerns.

NOTE 11 – DERIVATIVE FINANCIAL INSTRUMENTS

Provisional Metal Sales

The Company enters into sales contracts with third-party smelters and refiners which, in some cases, provide for a provisional payment based upon preliminary assays and quoted metal prices. The provisionally priced sales contracts contain an embedded derivative that is required to be separated from the host contract for accounting purposes. The host contract is the receivable recorded at the forward price at the time of sale. The embedded derivatives do not qualify for hedge accounting and are marked to market through earnings each period until final settlement.

Zinc Options

At September 30, 2018, the Company has outstanding Asian (or average value) put and call option contracts in net-zero-cost collar arrangements on a volume of 300 metric tons of zinc per month commencing in April 2018 and ending in December 2018. The weighted average strike prices on the put and call contracts are \$3,000 and \$4,050 per metric ton, respectively. The contracts are generally net cash settled and, if the price of zinc at the time of the expiration is between the put and call prices, would expire at no cost to the Company.

Interest Rate Swap

The Company is a party to an interest rate swap contract in which it will receive variable-rate interest and pay fixed-rate interest. The Company uses this instrument to manage its exposure to changes in interest rates related to its Revolving Credit Facility (see Note 18 -- Debt). The interest rate swap derivative instrument is not designated as a hedge from an accounting standpoint and hedge accounting is not applied. The notional amount is used to measure interest to be paid or received. The interest rate swap derivative instrument became effective June 2018 with a contractual term of twelve months and net settles monthly.

Revenue	Provisional metal sales contracts	\$34	\$147	\$15	\$596
Fair value adjustments, net	Zinc options	225	—	588	—
Fair value adjustments, net	Interest rate swaps	206	—	18	—
		\$465	\$147	\$621	\$596

Credit Risk

The credit risk exposure related to any derivative instrument is limited to the unrealized gains, if any, on outstanding contracts based on current market prices. To reduce counter-party credit exposure, the Company enters into contracts with institutions management deems credit-worthy and limits credit exposure to each institution. The Company does not anticipate non-performance by any of its counterparties.

NOTE 12 – ACQUISITIONS

In October 2017, the Company completed the acquisition of JDS Silver Holdings Ltd. and its wholly-owned subsidiary JDS Silver Inc. (together, “JDS Silver”) which, following the closing of the acquisition, were amalgamated with a subsidiary of Coeur to form Coeur Silvertip Holdings Ltd., which owns the underground Silvertip silver-zinc-lead mine in northern British Columbia, Canada. JDS Silver was purchased for approximately \$153.2 million in cash and \$36.0 million in Coeur common stock. In addition, the Company recorded \$47.7 million of contingent consideration payable in cash and common stock upon reaching future permitting and resource declaration milestones. The cash consideration was funded with \$100.0 million of borrowing under the Facility (as defined in Note 18 -- Debt) and cash on hand. Upon closing, the Company issued approximately 4.2 million Coeur shares to former shareholders of JDS Silver Holdings Ltd. The acquisition aligns with the Company’s strategic shift to a North America-focused mining portfolio.

The transaction was accounted for as a business combination, which requires that assets acquired and liabilities assumed be recognized at their respective fair values at the acquisition date. The acquisition was not significant to the Company’s results of operations, individually or in the aggregate, because the Silvertip mine was in in pre-production. As there were no significant differences from the Company’s historical results of operations, no pro forma financial information was provided.

The allocation of purchase price to the acquired assets and liabilities assumed is preliminary as of September 30, 2018 and subsequent adjustments may result in changes to mineral interest and other carrying amounts initially assigned based on the preliminary fair value analysis. The principal remaining items to be valued are property, plant and equipment and mining properties, which will be finalized within one year of the acquisition date and recorded in the fourth quarter of 2018, as management completes the review of the valuation methodologies used to estimate the fair value of these assets. The preliminary purchase price allocation is as follows (in thousands):

Coeur Mining, Inc. and Subsidiaries

Notes to Condensed Consolidated Financial Statements

Less: Realized (gain) loss	3	32	(5,199)	1,300
Unrealized gain (loss)	\$286	\$—	\$(2,898)	\$—

The Company performs a quarterly assessment on its debt securities with unrealized losses to determine if the securities are other than temporarily impaired. The following table summarizes unrealized losses on debt securities for which other-than-temporary impairments have not been recognized and the fair values of those securities, aggregated by the length of time the individual securities have been in a continuous unrealized loss position, at September 30, 2018:

In thousands	Less than twelve months		Twelve months or more		Total
	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	
Debt securities	—	—	257	4,568	257 4,568
Restricted Assets					

The Company, under the terms of its self-insurance and bonding agreements with certain banks, lending institutions and regulatory agencies, is required to collateralize certain portions of its asset retirement obligations. The Company has collateralized these obligations by assigning certificates of deposit that have maturity dates ranging from three months to a year to the applicable institutions or agencies. At September 30, 2018 and December 31, 2017, the

Company held certificates of deposit and cash equivalents under these agreements of \$21.4 million and \$20.8 million, respectively. The ultimate timing of the release of the collateralized amounts is dependent on the timing and closure of each mine and repayment of the obligation. In order to release the collateral, the Company must seek approval from certain government agencies responsible for monitoring the mine closure status. Collateral could also be released to the extent the Company is able to secure alternative financial assurance satisfactory to the regulatory agencies. The Company believes the collateral will remain in place beyond a twelve-month period and has therefore classified these investments as long-term.

Coeur Mining, Inc. and Subsidiaries
Notes to Condensed Consolidated Financial Statements

NOTE 14 – RECEIVABLES

Receivables consist of the following:

In thousands	September 30, 2018	December 31, 2017
Current receivables:		
Trade receivables	\$ 5,965	\$ 5,883
Value added tax receivable	13,406	10,982
Manquiri Notes Receivable	9,207	—
Other	1,902	2,204
	\$ 30,480	\$ 19,069
Non-current receivables:		
Value added tax receivable	\$ 28,035	\$ 28,750
	28,035	28,750
Total receivables	\$ 58,515	\$ 47,819

The increase in receivables is due to the recognition of the Manquiri Notes Receivable as consideration for the sale of San Bartolomé. See Note 10 -- Fair Value Measurements and 21 -- Discontinued Operations for additional detail.

NOTE 15 – INVENTORY AND ORE ON LEACH PADS

Inventory consists of the following:

In thousands	September 30, 2018	December 31, 2017
Inventory:		
Concentrate	\$ 8,778	\$ 6,831
Precious metals	20,116	18,803
Supplies	33,675	32,596
	62,569	58,230
Ore on leach pads:		
Current	77,515	73,752
Non-current	67,420	65,393
	144,935	139,145
Total inventory and ore on leach pads	\$ 207,504	\$ 197,375

Upon commencement of commercial production, Silvertip recognized a \$8.7 million write-down of metal inventory as a result of lower than expected production levels, grades and recovery rates as well as reduced process plant availability and unfavorable changes in metal prices. It is possible that additional write-downs will be required as the Company works to optimize operations at Silvertip.

NOTE 16 – PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment consist of the following:

In thousands	September 30, 2018	December 31, 2017
Land	\$ 9,082	\$ 9,408
Facilities and equipment	583,459	554,160
Assets under capital leases	109,042	82,753

In February 2018, the Company completed the sale of the Manquiri Divestiture. Pursuant to the terms of the agreement, the Company received, among other consideration, the NSR. Coeur estimates the value of this net smelter returns royalty to be approximately \$7.1 million, which is included in Other. In September 2018, the Company entered into the Letter Agreement, pursuant to which the Company agreed to suspend the quarterly payments in respect of the NSR until October 15, 2019. Based on the Company's evaluation of the terms of the Letter Agreement, the Company recorded a write-down of \$1.9 million on the NSR. See Note 10 -- Fair Value Measurements and 21 -- Discontinued Operations for additional detail.

The Silvertip mine reached commercial production on September 1, 2018. The determination of commercial production (or ready for intended use) was based on many factors requiring the exercise of judgment. Factors that were considered when determining if intended use had been achieved included achievement of continuous production or other output, mineral recoveries at or near expected levels, the absence of routine take-downs of the plant to address commissioning issues and fix problems, and the release of the commissioning team.

Prior to commercial production, costs related to mine development, construction of long-lived assets, and inventory were capitalized; all other costs were expensed in the period incurred. Amortization of mining properties commenced when the mine reached commercial production.

Coeur Mining, Inc. and Subsidiaries
Notes to Condensed Consolidated Financial Statements

5.875% Senior Notes due 2024

In May 2017, the Company completed an offering of \$250.0 million in aggregate principal amount of 2024 Senior Notes in a private placement conducted pursuant to Rule 144A and Regulation S under the Securities Act of 1933, as amended, for net proceeds of approximately \$245.0 million. The 2024 Senior Notes bear interest at a rate of 5.875% per year from the date of issuance. Interest on the 2024 Senior Notes is payable semi-annually in arrears on June 1 and December 1 of each year. The 2024 Senior Notes will mature on June 1, 2024 and are fully and unconditionally guaranteed by the Guarantors.

Revolving Credit Facility

In September 2017, the Company, as borrower, and certain subsidiaries of the Company, as guarantors, entered into a Credit Agreement (the "Credit Agreement") with Bank of America, N.A, Royal Bank of Canada, Bank of Montreal, and the Bank of Nova Scotia. The Credit Agreement provides for a \$200.0 million senior secured revolving credit facility (the "Facility"), which may be increased by up to \$50.0 million in incremental loans and commitments subject to the terms of the Credit Agreement. The Facility has a term of four years. Loans under the Facility will bear interest at a rate equal to either a base rate plus a margin ranging from 1.00% to 1.75% or an adjusted LIBOR rate plus a margin ranging from 2.00% to 2.75%, as selected by the Company, in each case, with such margin determined in accordance with a pricing grid based upon the Company's consolidated net leverage ratio as of the end of the applicable period.

At September 30, 2018, the Company had \$68.0 million available under the Facility; \$25.0 million was drawn in the third quarter of 2018 to finance working capital and general corporate purposes, \$15.0 million was drawn to repay the third-party debt obligation at Silvertip as described below, \$100.0 million was drawn to partially fund the Silvertip acquisition in 2017, and \$12.0 million was drawn to support outstanding letters of credit. In September 2018, the company repaid \$20.0 million of the outstanding balance. At September 30, 2018, the interest rate of the Facility was 4.415%. The Company has swapped \$50,000,000 of variable rate debt on the Facility to fixed rate debt through an interest rate swap.

Silvertip Debt Obligation

The Company assumed an existing third-party debt obligation as part of the Silvertip acquisition. In February 2018, the Company voluntarily terminated and repaid the remaining debt obligation of \$12.6 million.

Capital Lease Obligations

From time to time, the Company acquires mining equipment under capital lease agreements. In the nine months ended September 30, 2018, the Company entered into new lease financing arrangements primarily for mining equipment at Rochester, Palmarejo, Silvertip and Kensington. All capital lease obligations are recorded, upon lease inception, at the present value of future minimum lease payments.

Coeur Mining, Inc. and Subsidiaries
Notes to Condensed Consolidated Financial Statements

NOTE 19 - SUPPLEMENTAL GUARANTOR INFORMATION

The following Consolidating Financial Statements are presented to satisfy disclosure requirements of Rule 3-10 of Regulation S-X resulting from the guarantees by Coeur Alaska, Inc., Coeur Explorations, Inc., Coeur Rochester, Inc., Coeur South America Corp., Wharf Resources (U.S.A.), Inc. and its subsidiaries, and Coeur Capital, Inc. (collectively, the “Subsidiary Guarantors”) of the 2024 Senior Notes. The following schedules present Consolidating Financial Statements of (a) Coeur, the parent company; (b) the Subsidiary Guarantors; and (c) certain wholly-owned domestic and foreign subsidiaries of the Company (collectively, the “Non-Guarantor Subsidiaries”). Each of the Subsidiary Guarantors is 100% owned by Coeur and the guarantees are full and unconditional and joint and several obligations. There are no restrictions on the ability of Coeur to obtain funds from the Subsidiary Guarantors by dividend or loan.

Coeur Mining, Inc. and Subsidiaries
Notes to Condensed Consolidated Financial Statements

NOTE 20 – COMMITMENTS AND CONTINGENCIES

Palmarejo Gold Stream

Coeur Mexicana, S.A. de C.V. (“Coeur Mexicana”), a subsidiary of Coeur, sells 50% of Palmarejo gold production (excluding production from the Paramount properties acquired in 2015) to Franco-Nevada under a gold stream agreement for the lesser of \$800 or spot price per ounce. In 2015, Coeur Mexicana received a \$22.0 million deposit toward future deliveries under the gold stream agreement. In accordance with generally accepted accounting principles, although Coeur has satisfied its contractual obligation to repay the deposit to Franco-Nevada, the deposit is accounted for as deferred revenue and is recognized as revenue on a units of production basis as ounces are sold to Franco-Nevada. As of September 30, 2018, the remaining unamortized balance was \$13.2 million.

Silvertip Contingent Consideration

A total of up to \$50.0 million of contingent consideration, payable in cash and common stock, is payable in conjunction with the October 2017 Silvertip acquisition. The contingent consideration is based on the achievement of two milestones, which the Company has determined to be probable at September 30, 2018. The first milestone payment of \$25.0 million is contingent upon receipt of a permit expansion for a sustained mining and milling rate of 1,000 tonnes per day. The permit application was required to be submitted to the British Columbia Ministry of Energy and Mining no later than June 2018 and was submitted on April 30, 2018. The second milestone payment of up to \$25.0 million is contingent upon the amount of resource tonnes added as of December 31, 2019. The former JDS Silver Holdings Ltd. shareholders will receive \$5.0 million for a total resource of at least 2.5 million tonnes and \$5.0 million for every 0.3 million tonnes over 2.5 million tonnes, up to 3.7 million tonnes. The maximum payment of \$25.0 million can be earned if the total resource reaches 3.7 million tonnes. The Silvertip mine had total mineralized material of approximately 2.6 million tonnes at December 31, 2017.

NOTE 21 – DISCONTINUED OPERATIONS

In December 2017, the Company and certain of its subsidiaries entered into a definitive agreement (as amended, the “Manquiri Agreement”) to sell all of the outstanding capital stock of Manquiri, which is the operator of the San Bartolomé mine and processing facility (the “Manquiri Divestiture”). On February 28, 2018, the Manquiri Divestiture was completed, and, in accordance with the Agreement, Manquiri was sold to Ag-Mining Investments, AB, a privately-held Swedish company. See below for a discussion of the Letter Agreement, which amended certain terms of the Manquiri Agreement.

Coeur and its subsidiaries received the following consideration:

- The NSR commencing immediately upon the closing of the Transaction, valued at \$7.1 million.
- Pre-closing VAT refunds valued at \$12.7 million that will be collected or received by Manquiri in the future will be paid to Coeur (net of collection costs).
- The Manquiri Notes Receivable valued at \$26.9 million payable to Coeur and certain of its subsidiaries representing Manquiri’s cash and cash equivalents on the date of closing of the Manquiri Divestiture, and providing for repayment beginning in October 2018.
- The Company recognized a liability of approximately \$5.7 million for certain post-closing covenants, guaranties and indemnification obligations on the part of the Company pursuant to the Agreement

The sale of Manquiri resulted in a gain of \$1.5 million, which is included in Income (loss) from discontinued operations.

Coeur Mining, Inc. and Subsidiaries
Notes to Condensed Consolidated Financial Statements

The sale of Manquiri and San Bartolomé had a significant effect on the Company's results and operations. Accordingly, San Bartolomé's operations for the three and nine months ended September 30, 2018 and 2017 are classified on the consolidated statements of operations and comprehensive income (loss) as Income (loss) from discontinued operations. The major classes of line items constituting the pretax profit or loss for the three and nine months ended September 30, 2018 and 2017 are as follows (in thousands):

	Three months ended September 30, 2018	2017	Nine months ended September 30, 2018	2017
Revenue	\$16,043		\$12,346	\$60,441

Other, net	804	(260)		1,305
Pretax profit (loss) on discontinued operations related to major classes of pretax profit (loss)	(4,980)	(492)	(6,380)	()
Pretax gain on the disposal of the discontinued operation	—	1,525	—	
Total pretax gain or loss on discontinued operations	(4,980)	1,033	(6,380)	()
Income and mining tax (expense) benefit	56	(483)	860	
Income (loss) from discontinued operations	\$(4,924)	\$550		\$(5,520)

(1) Excludes amortization.

Net cash used by operating activities was \$7.9 million for the three months ended September 30, 2017. Net cash used in operating activities from San Bartolomé was \$2.7 million for the nine months ended September 30, 2018 compared to net cash provided by operating activities of \$8.6 million for the nine months ended September 30, 2017, respectively. Net cash used in investing activities from San Bartolomé was \$0.4 million for the three months ended September 30, 2017. Net cash used in investing activities from San Bartolomé were \$28.5 million and \$1.2 million for the nine months ended September 30, 2018 and 2017, respectively.

In September 2018, the Company entered into a Letter Agreement with the Buyer pursuant to which the total aggregate principal amount of the Manquiri Notes Receivable was reduced to \$25.0 million and the Buyer made a concurrent cash payment of \$15.0 million to the Sellers in respect of the Manquiri Notes Receivable. In addition, the Company also agreed to suspend the quarterly payments in respect of the NSR on all metals processed through the San Bartolomé mine's processing facility until October 15, 2019 and to forgo any rights to any value added tax refunds collected or received by Manquiri. Based on the Company's evaluation of the terms of the Letter Agreement, the Company recorded an \$18.6 million write-down that is made up of \$13.1 million on the value added tax refunds, \$3.6 million on the Manquiri Notes Receivable and \$1.9 million on the NSR, which is included in Other, net. See Note 10 -- Fair Value Measurements for additional detail.

NOTE 22 – ADDITIONAL BALANCE SHEET DETAIL AND SUPPLEMENTAL CASH FLOW INFORMATION

Accrued liabilities and other consist of the following:

In thousands	September 30, December 31,	
	2018	2017
Accrued salaries and wages	\$ 18,677	\$ 26,559
Income and mining taxes	1,252	25,788
Silvertip contingent consideration	24,847	24,393
Accrued operating costs	11,883	12,323
Taxes other than income and mining	3,378	4,354
Accrued interest payable	5,363	1,513
Accrued liabilities and other	\$ 65,400	\$ 94,930

The following table provides a reconciliation of cash, cash equivalents, and restricted cash reported within the statement of financial position that sum to the total of the same such amounts shown in the statement of cash flows for the three and nine months ended September 30, 2018 and 2017:

In thousands	September 30, September	
	2018	30, 2017
Cash and cash equivalents	\$ 104,746	\$ 195,654
Restricted cash equivalents	12,534	11,360
Total cash, cash equivalents and restricted cash shown in the statement of cash flows	117,280	207,014

NOTE 23 – SUBSEQUENT EVENTS

On October 1, 2018 the Company completed its acquisition of Northern Empire Resources Corp. (“Northern Empire”). Upon completion of the acquisition, each share of Northern Empire common stock issued and outstanding immediately prior to the effective time of the Plan of Arrangement, excluding shares owned by the Company, was exchanged for shares of the Company’s common stock at a ratio of 0.1850 shares of Company common stock for each Northern Empire common share. Approximately 12.1 million Coeur shares were issued to Northern Empire shareholders (other than the Company) upon closing of the acquisition, representing aggregate value of approximately \$63.9 million as of the closing date. Prior to the acquisition, the Company had an existing investment valued at \$4.5 million in Northern Empire. See Note 13 -- Investments for additional detail.

On October 15, 2018 the Company entered into an Asset Purchase Agreement among the Company, Coeur Rochester, Inc. (“CRI”), Rye Patch Gold US Inc., a Nevada corporation (“RPG”), and Alio Gold Inc., a British Columbia corporation, pursuant to which CRI will acquire all of RPG’s rights, titles, and interests in and to certain real property assets and patented and unpatented mining claims located in Pershing County, Nevada (collectively, the “RPG Assets”). In consideration for the RPG Assets, the Company will pay RPG consideration of \$19.0 million in shares of Company common stock calculated using a five-day volume-weighted average price of Company common stock for a five-trading day period ending on the third trading day immediately preceding the closing (the “Shares”). Closing of the acquisition is anticipated in the fourth quarter of 2018, subject to customary regulatory approvals and other conditions. On October 29, 2018, the Company and Bank of America, N.A., as administrative agent for the Facility lenders, entered into the First Amendment to Credit Agreement (the “Amendment”). Pursuant to the Amendment, the Facility was increased by \$50.0 million to \$250.0 million, and the term was extended by approximately one year and now has a maturity date of October 29, 2022.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following Management's Discussion and Analysis ("MD&A") provides information that management believes is relevant to an assessment and understanding of the consolidated financial condition and results of operations of Coeur Mining, Inc. and its subsidiaries (collectively the "Company", "our", or "we"). We use certain non-GAAP financial performance measures in our MD&A. For a detailed description of these measures, please see "Non-GAAP Financial Performance Measures" at the end of this item. We provide certain operational and financial data on a silver equivalent basis, converting gold to silver at a historical 60:1 ratio of silver ounces to gold ounces, zinc is converted at a historical 0.06:1 ratio of silver ounces to zinc pounds and lead is converted at a historical 0.05:1 ratio of silver ounces to lead pounds, unless otherwise noted. We also provide realized silver equivalent data determined by average spot silver, gold, zinc and lead prices during the relevant period.

Overview

We are a gold, silver, zinc and lead producer with mines located in the United States, Mexico and Canada and exploration projects in the United States and Mexico. The Palmarejo complex, Rochester, Silvertip, Kensington and Wharf mines constitute our principal sources of revenue.

In October 2017, the Company added a new mine to Coeur's North America-focused platform with the acquisition of the high-grade silver-zinc-lead Silvertip mine located in northern British Columbia, Canada. The Silvertip mine commenced milling in the first quarter of 2018 and commenced commercial production on September 1, 2018. Upon commencement of commercial production, Silvertip recognized a \$8.7 million write-down of metal inventory as a result of lower than expected production levels, grades and recovery rates as well as reduced process plant availability and unfavorable changes in metal prices.

In February 2018, the Company completed the Manquiri Divestiture, which we determined to represent a strategic shift to a North America-focused mining portfolio with a significant effect on the Company's results and operations; therefore, San Bartolomé's results of operations are reported as discontinued operations for all periods presented. In the following discussion and analysis, the operating statistics, results of operations, cash flows and financial condition that we present and discuss are those of our continuing operations unless otherwise indicated. In September 2018, the Company entered into a letter agreement ("Letter Agreement") with Ag-Mining Investments, AB, a privately-held Swedish company, (the "Buyer") pursuant to which the total aggregate principal amount of the Manquiri Notes Receivable was reduced to \$25.0 million and the Buyer made a concurrent cash payment of \$15.0 million to the Company in respect of the Manquiri Notes Receivable. In addition, the Company also agreed to suspend the quarterly payments in respect of NSR on all metals processed through the San Bartolomé mine's processing facility until October 15, 2019 and to forgo any rights to any value added tax refunds collected or received by Manquiri. Based on the Company's evaluation of the terms of the Letter Agreement, the Company recorded an \$18.6 million write-down comprised of a \$13.1 million write-down on the value added tax refunds, a \$3.6 million write-down on the Manquiri Notes Receivable and a \$1.9 million write-down on the NSR.

In August 2018, the Company entered into a definitive agreement to acquire all of the issued and outstanding securities of Northern Empire Resources Corp. ("Northern Empire") not owned by the Company. Northern Empire's principal asset is the Sterling Gold Project located in Nevada. The transaction closed on October 1, 2018 for total consideration valued at approximately \$63.9 million based on the issuance of approximately 12.1 million shares of Coeur common stock at \$5.27 per share.

In October 2018, the Company and its wholly-owned subsidiary, Coeur Rochester, Inc. entered into a definitive agreement to acquire a property package adjacent to the Rochester mine consisting of the Lincoln Hill Project, Wilco Project, Gold Ridge Property and other nearby claims from a subsidiary of Alio Gold Inc. ("Alio Gold") for total consideration of \$19.0 million, payable in the form of Company common stock. The transaction is expected to close in the fourth quarter of 2018.

On October 29, 2018, the Company and Bank of America, N.A., as administrative agent for the Facility lenders, entered into the First Amendment to Credit Agreement (the "Amendment"). Pursuant to the Amendment, the Facility was increased by \$50.0 million to \$250.0 million, and the term was extended by approximately one year and now has a maturity date of October 29, 2022.

The Company's strategy is to discover, acquire, develop and operate low-cost silver and gold mines, which may include base metals such as zinc and lead, that produce long-term cash flow, provide opportunities for growth through

continued exploration, and generate superior and sustainable returns for stockholders. Management focuses on maximizing net cash flow through identifying and implementing revenue enhancement opportunities, reducing operating and non-operating costs, exercising consistent capital discipline, and managing working capital efficiently.

Third Quarter Highlights

• Average realized prices of \$14.68 per silver ounce, \$1,150 per gold ounce, \$0.94 per zinc pound and \$0.85 per lead pound

• Production from continuing operations of 8.2 million silver equivalent ounces (10.1 million silver equivalent ounces produced (average spot)), consisting of 2.9 million silver ounces, 87,539 gold ounces, 1.1 million zinc pounds and 0.4 million lead pounds

• Sales from continuing operations of 8.5 million silver equivalent ounces (10.4 million silver equivalent ounces sold (average spot)), consisting of 2.9 million silver ounces, 89,609 gold ounces, 1.8 million zinc pounds and 1.2 million lead pounds

• Net loss from continuing operations of \$53.0 million, or \$0.29 per share, and adjusted net loss of \$19.7 million, or \$0.11 per share, (see “Non-GAAP Financial Performance Measures”)

• Costs applicable to sales from continuing operations were \$10.55 per average spot silver equivalent ounce (\$12.32 per silver equivalent ounce) and \$1,011 per gold equivalent ounce (see “Non-GAAP Financial Performance Measures”)

• All-in sustaining costs from continuing operations were \$15.33 per average spot silver equivalent ounce (\$18.78 per silver equivalent ounce) (see “Non-GAAP Financial Performance Measures”)

• Operating cash flow used in continuing operations of \$5.8 million and adjusted EBITDA from continuing operations of \$24.7 million (see “Non-GAAP Financial Performance Measures”)

• Cash and cash equivalents of \$104.7 million at September 30, 2018

• Silvertip commenced commercial production on September 1, 2018

• Acquired Northern Empire for total consideration valued at approximately \$63.9 million (closed October 1, 2018) as more fully discussed above.

• Announced agreement to acquire assets from Alio Gold located adjacent to Rochester including the Lincoln Hill Project as more fully discussed above.

• Expanded the Facility capacity to provide additional balance sheet flexibility as more fully discussed above.

(1) See “Non-GAAP Financial Performance Measures.”

(2) Reported production and financial results include operations through February 28, 2018.

Prior to September 1, 2018 commercial production date the Silvertip mine produced 0.2 million ounces of silver, 2.6 million pounds of zinc, and 1.8 million pounds of lead which are excluded from production numbers presented, unless otherwise noted.

Consolidated Financial Results

Three Months Ended September 30, 2018 compared to Three Months Ended September 30, 2017

Net Loss from Continuing Operations

Net loss from continuing operations was \$53.0 million, or \$0.29 per share, compared to net loss of \$11.7 million, or \$0.07 per share. The decrease in net income from continuing operations is due to a lower operating margin per consolidated silver equivalent ounce, a write-down of \$18.6 million on the consideration received from the Manquiri Divestiture, a write-down of \$3.4 million of property, plant and equipment at Rochester and higher interest expense.

Revenue

Revenue was lower due to a decrease in average realized silver and gold prices of 13% and 7%, respectively, partially offset by sales from Silvertip, which commenced commercial production in September 2018. The Company sold 2.9 million silver ounces, 89,609 gold ounces, 1.8 million zinc pounds and 1.2 million lead pounds compared to 2.9 million silver ounces and 89,972 gold ounces in the prior year. Gold contributed 69% of sales, silver contributed 29%, zinc and lead each contributed 1% , compared to 70% of sales from gold and 30% from silver.

Costs Applicable to Sales

Costs applicable to sales increased as a result of higher costs applicable to sales per silver equivalent ounce and a write-down of inventory at Silvertip. For a complete discussion of costs applicable to sales, see Results of Operations below.

Amortization

Amortization decreased \$1.2 million, or 4%, due to fewer ounces sold by Palmarejo, Kensington and Wharf.

Expenses

General and administrative expenses increased \$0.4 million, or 5%, primarily due to higher compensation costs.

Exploration expense decreased \$1.6 million, or 17%, as a result of lower exploration costs at Palmarejo, Rochester, Kensington and La Preciosa.

Pre-development, reclamation, and other expenses increased \$3.1 million, or 61%, of which \$3.4 million is attributable to the write-down of property, plant and equipment at Rochester.

Other Income and Expenses

Fair value adjustments, net, were a gain of \$0.7 million due to favorable fair value adjustments of \$0.3 million, \$0.2 million and \$0.2 million on equity securities, interest rate swap and zinc options, respectively. Effective January 1, 2018, as a result of ASU 2016-01, changes in the fair value of equity investments are recognized as fair value adjustments instead of other comprehensive income (loss) in the Condensed Consolidated Statements of Comprehensive Income (Loss).

Interest expense (net of capitalized interest of \$0.7 million) increased to \$5.8 million from \$3.6 million, due to higher average debt levels related to the 2024 Senior Notes and the Facility..

Other, net was an expense of \$20.9 million, as a result of the \$18.6 million write-down of the consideration received from the Manquiri Divestiture, unfavorable foreign exchange rate movements and gains on the sale of non-core assets and investments in 2017.

Income and Mining Taxes

During the third quarter of 2018, the Company reported estimated income and mining tax expense of approximately \$3.8 million resulting in an effective tax rate of 7.7%. This compares to estimated income tax expense of \$14.3 million for an effective tax rate of 557.9% during the third quarter of 2017.

The following table summarizes the components of the Company's income (loss) before tax and income and mining tax (expense) benefit:

In thousands	Three months ended September 30, 2018		2017	
	Income (loss) before tax benefit	Tax (expense)	Income (loss) before tax	Tax (expense) benefit
United States	\$(35,250)	\$(908)	\$(6,055)	\$(2,892)
Argentina	(2,058)	(75)	738	(366)
Canada	(13,194)	4,432	—	—
Mexico	1,419	(7,234)	3,210	(9,057)
Other jurisdictions	(176)	—	4,668	(1,974)
	\$(49,259)	\$(3,785)	\$2,561	\$(14,289)

The Company's effective income and mining tax rate is a function of the combined effective tax rates and foreign exchange rates in the jurisdictions in which it operates. Variations in the jurisdictional mix of income and loss and foreign exchange rates result in significant fluctuations in the consolidated effective tax rate, along with mining taxes, uncertain tax positions, and a full valuation allowance on deferred tax assets related to losses in the United States and certain foreign jurisdictions. Fluctuations in foreign exchange rates on deferred tax balances increased income and mining tax expense by \$3.0 million and decreased income and mining tax expense by \$1.4 million for the three months ended September 30, 2018 and 2017, respectively. The impact of foreign exchange rates on deferred tax balances is predominately due to the Mexican Peso and Canadian Dollar.

A valuation allowance is provided for deferred tax assets for which it is more likely than not that the related tax benefits will not be realized. The Company analyzes its deferred tax assets and, if it is determined that the Company will not realize all or a portion of its deferred tax assets, it will record or increase a valuation allowance. Conversely, if it is determined that the Company will ultimately be more likely than not able to realize all or a portion of the related benefits for which a valuation allowance has been provided, all or a portion of the related valuation allowance will be reduced. There are a number of factors that impact the Company's ability to realize its deferred tax assets. For additional information, please see the section titled "Risk Factors" in the Company's Form 10-K for the year ended December 31, 2017 (the "2017 10-K")

Nine Months Ended September 30, 2018 compared to Nine Months Ended September 30, 2017

Net Loss from Continuing Operations

Net loss from continuing operations was \$49.4 million, or \$0.27 per share, compared to net loss of \$3.4 million, or \$0.02 per share. The decrease in net income from continuing operations is due to a lower operating margin per consolidated silver equivalent ounce, a write-down of \$18.6 million on the consideration received from the Manquiri Divestiture, a write-down of \$3.4 million of property, plant and equipment at Rochester and higher interest expense as well as a \$21.1 million gain on the sale of the Joaquin project in 2017.

Revenue

Revenue was lower resulting from a reduction of gold inventories carried over from 2016 that were sold in the first quarter of 2017 and a decrease in average realized silver prices of 7%, partially offset by an increase in average realized gold prices of 2%. The Company sold 9.3 million silver ounces, 271,217 gold ounces, 1.8 million zinc pounds and 1.2 million lead pounds, compared to sales of 8.9 million silver ounces and 287,040 gold ounces. Gold contributed 68% of sales and silver contributed 31% compared to 69% of sales from gold and 31% from silver.

Costs Applicable to Sales

Costs applicable to sales increased as a result of higher costs applicable to sales per silver equivalent ounce and a write-down of inventory at Silvertip. For a complete discussion of costs applicable to sales, see Results of Operations below.

Amortization

Amortization decreased \$10.4 million or 10%, due to lower ounces sold at Kensington and Wharf.

Expenses

General and administrative expenses remained comparable at \$24.2 million.

Exploration decreased \$1.6 million or 7%, as a result of lower exploration costs at Palmarejo, Rochester, Kensington and La Preciosa.

Pre-development, reclamation, and other expenses increased \$3.0 million or 23%, of which \$3.4 million is attributable to the write-down of property, plant and equipment at Rochester.

Other Income and Expenses

In 2017, the Company incurred a \$9.3 million loss in connection with the repurchase of the 7.875% Senior Notes due 2021 (the “2021 Senior Notes”) concurrent with the completed offering of the 5.875% Senior Notes due 2024 (the “2024 Senior Notes”).

Fair value adjustments, net, were a gain of \$2.9 million compared to a loss of \$0.9 million due to unrealized losses of \$2.9 million and realized gains of \$5.2 million on equity securities and a favorable fair value adjustment on zinc hedges. Effective January 1, 2018, as a result of ASU 2016-01, changes in the fair value of equity investments are recognized as fair value adjustments instead of other comprehensive income (loss) in the Condensed Consolidated Statements of Comprehensive Income (Loss).

Interest expense (net of capitalized interest of \$1.1 million) increased to \$17.8 million from \$10.9 million, due to higher average debt levels related to the 2024 Senior Notes and the Facility (as defined below).

Other, net was an expense of \$19.8 million, primarily due to the write-down of \$18.6 million on the consideration received from the Manquiri Divestiture in 2018 compared to \$21.1 million gain on the sale of the Joaquin project and a \$2.3 million gain on the repurchase of the Rochester royalty obligation in 2017.

Income and Mining Taxes

During the first three quarters of 2018, the Company reported estimated income and mining tax expense of approximately \$19.5 million resulting in an effective tax rate of 64.9%. This compares to estimated income tax expense of \$24.0 million for an effective tax rate of 116.6% during the first three quarters of 2017.

The following table summarizes the components of the Company’s income (loss) before tax and income and mining tax (expense) benefit:

	Nine months ended September 30,			
	2018		2017	
In thousands	Income (loss) before tax	Tax (expense) benefit	Income (loss) before tax	Tax (expense) benefit
United States	\$(45,397)	\$(2,700)	\$8,036	\$(4,072)
Argentina	(1,985)	(172)	281	1,704
Canada	(17,103)	6,476	—	—
Mexico	35,088	(23,055)	9,665	(23,745)
Other jurisdictions	(575)	—	2,634	2,073
	\$(29,972)	\$(19,451)	\$20,616	\$(24,040)

The Company’s effective income and mining tax rate is a function of the combined effective tax rates and foreign exchange rates in the jurisdictions in which it operates. Variations in the jurisdictional mix of income and loss and foreign exchange rates result in significant fluctuations in the consolidated effective tax rate, along with income and mining taxes, uncertain tax positions, and a full valuation allowance on deferred tax assets related to losses in the United States and certain foreign jurisdictions. Fluctuations in foreign exchange rates on deferred tax balances increased income and mining tax expense by \$2.1 million and \$7.2 million for the three months ended September 30, 2018 and 2017, respectively. The impact of foreign exchange rates on deferred tax balances is predominately due to the Mexican Peso and Canadian Dollar.

A valuation allowance is provided for deferred tax assets for which it is more likely than not that the related tax benefits will not be realized. The Company analyzes its deferred tax assets and, if it is determined that the Company will not realize all or a portion of its deferred tax assets, it will record or increase a valuation allowance. Conversely, if it is determined that the Company will ultimately be more likely than not able to realize all or a portion of the related benefits for which a valuation allowance has been provided, all or a portion of the related valuation allowance will be reduced. There are a number of factors that impact the Company’s ability to realize its deferred tax assets.

Income (loss) from Discontinued Operations

In respect of San Bartolomé's operating results, income increased \$6.1 million, due to a \$1.5 million gain on the sale of San Bartolomé in 2018, partially offset by lower production and higher unit costs.

2018 Outlook

Coeur's 2018 production guidance was revised on September 4, 2018 to reflect improved visibility of Silvertip's production following the commencement of commercial production as well as stronger than expected performance at Rochester during the first half of the year. The Company's cost guidance remains unchanged from the revised guidance published in the second quarter.

2018 Production Outlook

	Silver (K oz)	Gold (oz)	Zinc (K lbs)	Lead (K lbs)	Silver Equivalent ¹ (K oz)
Palmarejo	7,500 - 7,900	115,000 - 120,000	—	—	14,400 - 15,100
Rochester	4,800 - 5,200	48,000 - 52,000	—	—	7,680 - 8,320
Kensington	—	115,000 - 120,000	—	—	6,900 - 7,200
Wharf	—	85,000 - 90,000	—	—	5,100 - 5,400
Silvertip	700 - 1,200	—	13,000 - 23,000	11,000 - 18,000	2,030 - 3,480
Total	13,000 - 14,300	363,000 - 382,000	13,000 - 23,000	11,000 - 18,000	36,110 - 39,500

Results of Continuing Operations

The Company produced 2.9 million ounces of silver, 87,539 ounces of gold, 1.1 million pounds of zinc and 0.4 million pounds of lead in the three months ended September 30, 2018, compared to 3.0 million ounces of silver and 93,293 ounces of gold in the three months ended September 30, 2017. Silver production decreased 4%, due to a temporary suspension of mining activities after an underground mining accident at the Guadalupe mine and supply chain disruptions due to a local road blockade at Palmarejo, partially offset by leaching activities on the periphery of the pad at Rochester and the commencement of commercial production at Silvertip. Gold production decreased 6% due to the aforementioned events at Palmarejo and unplanned weather-related downtime and timing of leach pad recoveries at Wharf. The Silvertip mine reached commercial production on September 1, 2018 and produced 1.1 million pounds of zinc and 0.4 million pounds of lead.

The Company produced 9.3 million ounces of silver, 266,974 ounces of gold, 1.1 million pounds of zinc and 0.4 million pounds of lead in the nine months ended September 30, 2018, compared to 8.4 million ounces of silver and 264,330 ounces of gold in the nine months ended September 30, 2017. Silver production increased 10% due to higher grade at Palmarejo and Rochester and higher placed tons at Rochester. Gold production increased 1% due to higher grades at Palmarejo and Rochester, partially offset by lower mill throughput at Kensington and unplanned weather-related downtime, lower grade and timing of leach pad recoveries at Wharf. The Silvertip mine reached commercial production on September 1, 2018 and produced 1.1 million pounds of zinc and 0.4 million pounds of lead. Costs applicable to sales were \$10.55 per average spot silver equivalent ounce (\$12.32 per silver equivalent ounce) and \$1,011 per gold equivalent ounce in the three months ended September 30, 2018 compared to \$10.00 per average spot silver equivalent ounce (\$11.16 per silver equivalent ounce) and \$845 per gold equivalent ounce in the three months ended September 30, 2017. Costs applicable to sales per silver equivalent ounce increased 10% as a result of a higher initial unit costs at Silvertip. Costs applicable to sales per gold equivalent ounce increased 20% in the three months ended September 30, 2018 due to higher unit costs at Kensington and Wharf.

Costs applicable to sales were \$9.13 per average spot silver equivalent ounce (\$10.52 per silver equivalent ounce) and \$1,008 per gold equivalent ounce in the nine months ended September 30, 2018 compared to \$10.20 per average spot silver equivalent ounce (\$11.22 per silver equivalent ounce) and \$831 per gold equivalent ounce in the nine months ended September 30, 2017. Costs applicable to sales per silver equivalent ounce decreased 6% due to lower unit costs at Palmarejo while costs applicable to sales per gold equivalent ounce increased 21% in the nine months ended September 30, 2018 due to higher unit costs at Kensington and Wharf.

All-in sustaining costs were \$15.33 per average spot silver equivalent ounce (\$18.78 per silver equivalent ounce) in the three months ended September 30, 2018, compared to \$14.86 per average spot silver equivalent ounce (\$17.43 per silver equivalent ounce) in the three months ended September 30, 2017. The 8% increase was primarily due to higher costs applicable to sales per consolidated silver equivalent ounce and higher general administrative costs and higher sustaining capital related to underground development at Palmarejo and Kensington, partially offset by lower exploration costs.

All-in sustaining costs were \$14.83 per average spot silver equivalent ounce (\$17.94 per silver equivalent ounce) in the nine months ended September 30, 2018, compared to \$14.51 per average spot silver equivalent ounce (\$16.55 per silver equivalent ounce) in the nine months ended September 30, 2017. The 8% increase was primarily due to higher costs applicable to sales per consolidated silver equivalent ounce and higher sustaining capital related to underground development at Palmarejo and Kensington.

Palmarejo

	Three months ended September 30, 2018		Nine months ended September 30, 2017

(1) See Non-GAAP Financial Performance Measures.

Three Months Ended September 30, 2018 compared to Three Months Ended September 30, 2017

Silver equivalent production decreased 12% due to the temporary suspension of mining activities relating to fatalities that occurred during the quarter in addition to supply chain disruptions stemming from local road blockades that temporarily interrupted the delivery of certain mining consumables, and a weather-related interruption that impacted the process plant. Normal operating activities have resumed. Metal sales were \$55.5 million, or 37% of Coeur's metal sales, compared with \$60.7 million, or 38% of Coeur's metal sales. Costs applicable to sales per ounce decreased 4% as a result of higher silver and gold grades coupled with lower mining and processing costs. Amortization decreased to \$14.8 million primarily due to lower ounces sold. Capital expenditures decreased to \$4.7 million due to the timing of capital expenditures. Capital expenditures focused on underground development and conversion drilling.

Nine Months Ended September 30, 2018 compared to Nine Months Ended September 30, 2017

Silver equivalent production increased 12% due to higher silver and gold grade, partially offset by the temporary suspension of mining activities relating to fatalities that occurred during the quarter in addition to supply chain disruptions stemming from local road blockades that temporarily interrupted the delivery of certain mining consumables, and a weather-related interruption that impacted the process plant. Metal sales were \$196.2 million, or 41% of Coeur's metal sales, compared with \$191.6 million, or 39% of Coeur's metal sales. Costs applicable to sales per ounce decreased 19% as a result of higher production. Amortization decreased to \$45.8 million compared to \$51.0 million, primarily due to higher life of mine reserves, partially offset by higher ounces sold. Capital expenditures remained comparable at \$23.5 million. Capital expenditures focused on underground development, conversion drilling and the implementation of the new on-site absorption, desorption, and recovery plant.

Rochester

	Three months ended September 30, 2018		Nine months ended September 30, 2017

(1) See Non-GAAP Financial Performance Measures.

Three Months Ended September 30, 2018 compared to Three Months Ended September 30, 2017

Silver equivalent production increased 26% driven by the leaching of placed ounces from the periphery of the pad that had not been leached previously, partially offset by lower tons placed. Metal sales were \$35.5 million, or 24% of Coeur's metal sales, compared with \$31.2 million, or 19% of Coeur's metal sales. Costs applicable to sales per ounce decreased 6% due to higher production. Amortization increased to \$5.3 million due to higher ounces sold. Capital expenditures decreased to \$3.6 million from \$9.7 million due to the completion of the Stage IV leach pad expansion in 2017.

Nine Months Ended September 30, 2018 compared to Nine Months Ended September 30, 2017

Silver equivalent production increased 11% due to higher tons placed and the leaching of placed ounces from the periphery of the pad that had not been leached previously, partially offset by lower silver grade. Metal sales were \$102.7 million, or 21% of Coeur's metal sales, compared with \$102.9 million, or 21% of Coeur's metal sales. Costs applicable to sales per silver equivalent ounce remained comparable at \$13.36. Amortization remained comparable at \$14.9 million. Capital expenditures decreased to \$6.9 million compared to \$34.1 million due to the completion of the Stage IV leach pad expansion in 2017.

(1) See Non-GAAP Financial Performance Measures.

Prior to September 1, 2018 commercial production date the Silvertip mine produced 0.2 million ounces of silver, (2) 2.6 million pounds of zinc, and 1.8 million pounds of lead which are excluded from production numbers presented, unless otherwise noted.

Three Months Ended September 30, 2018 compared to Three Months Ended September 30, 2017

The Company acquired Silvertip in the October 2017 and on September 1, 2018, Silvertip commenced commercial production. Metal sales were \$4.1 million, or 3% of Coeur's metal sales compared to none in the prior year. Costs applicable to sales per ounce was higher than anticipated due to a \$8.7 million write-down of metal inventory as a result of lower than expected production levels, grades and recovery rates as well as reduced process plant availability and unfavorable changes in metal prices. Amortization was \$1.1 million. Capital expenditures were \$17.9 million primarily related to pre-production capital, underground mine development and capitalized exploration spending.

Nine Months Ended September 30, 2018 compared to Nine Months Ended September 30, 2017

Metal sales, costs applicable to sales per ounce and amortization were the same for both periods in 2018 as Silvertip commenced commercial production on September 1, 2018. Capital expenditures were \$55.6 million primarily related to pre-production capital, underground mine development and capitalized exploration spending.

Wharf

(1) See Non-GAAP Financial Performance Measures.

Three Months Ended September 30, 2018 compared to Three Months Ended September 30, 2017

Gold equivalent production decreased 25% due to unplanned weather-related events and timing of leach pad recoveries. In the fourth quarter 2018, Wharf plans to increase mining and crushing rates to offset the shortfall in production. Metal sales were \$24.0 million, or 16% of Coeur's metal sales, compared to \$31.3 million, or 20% of Coeur's metal sales. Costs applicable to sales per gold equivalent ounce increased 24% due to lower production resulting from the completion of mining at the higher-grade Golden Reward deposit in 2017 and higher equipment rental and diesel costs. Amortization decreased to \$2.9 million due to lower ounces sold. Capital expenditures decreased to \$1.2 million due to lower process plant capital expenditures.

Nine Months Ended September 30, 2018 compared to Nine Months Ended September 30, 2017

Gold equivalent production decreased 12% due to unplanned weather-related events and timing of leach pad recoveries. In the fourth quarter 2018, Wharf plans to increase crushing rates to offset this shortfall in production. Metal sales were \$77.3 million, or 16% of Coeur's metal sales, compared to \$88.6 million, or 18% of Coeur's metal sales. Costs applicable to sales per gold equivalent ounce increased 23% due to lower production resulting from the completion of mining at the higher-grade Golden Reward deposit in 2017, higher pad unloading costs, and higher equipment rental and diesel costs. Amortization remained comparable at \$8.9 million. Capital expenditures decreased to \$2.7 million due to lower process plant capital expenditures.

Kensington

	Three months ended		Nine months ended	
	September 30, 2018		September 30, 2017	
Tons milled	163,603	172,038	491,060	501,096
Gold ounces produced	25,515	27,541	77,149	80,162
Costs applicable to sales/oz ⁽¹⁾	\$ 1,101	\$ 948	\$ 1,117	\$ 931

(1) See Non-GAAP Financial Performance Measures.

Three Months Ended September 30, 2018 compared to Three Months Ended September 30, 2017

Gold production decreased 7% due to lower mill throughput resulting from lower mine ore production, partially offset by higher gold grade. Metal sales were \$29.8 million, or 20% of Coeur's metal sales, compared to \$36.6 million, or 23% of Coeur's metal sales. Costs applicable to sales per ounce were 16% higher, primarily due to lower production and higher diesel costs. Amortization decreased to \$6.9 million from \$7.9 million due to higher life of mine reserves and lower ounces sold. Capital expenditures increased to \$12.0 million resulting from higher underground development at Raven.

Nine Months Ended September 30, 2018 compared to Nine Months Ended September 30, 2017

Gold production decreased 4% due to lower mill throughput resulting from lower mine ore production, partially offset by higher gold grade. Metal sales were \$101.8 million, or 21% of Coeur's metal sales, compared to \$110.1 million, or 22% of Coeur's metal sales. Costs applicable to sales per ounce were 20% higher, primarily due to lower production, higher diesel costs, and higher contract mining costs. Amortization decreased to \$20.1 million from \$25.4 million due to higher life of mine reserves and lower ounces sold. Capital expenditures increased to \$34.0 million due to the expansion of the site power plant and higher underground development at Raven.

Endeavor Silver Stream

	Three months ended		Nine months ended	
	September 30, 2018		September 30, 2017	
Tons milled	—	—	—	133,905
Silver ounces produced	—	2,413	—	107,026
Costs applicable to sales/oz ⁽¹⁾	\$ —	\$ 4.86	\$ —	\$ 6.95

(1) See Non-GAAP Financial Performance Measures.

In July 2017, the Company sold the Endeavor Silver Stream and its remaining portfolio of royalties for total consideration of \$13.0 million to Metalla Royalty & Streaming Ltd. Reported production and financial results include operations through May 2017 in accordance with the terms of the sale agreement.

Liquidity and Capital Resources

Cash and cash equivalents decreased \$87.3 million in the nine months ended September 30, 2018. This was the result of lower silver prices, pre-production capital expenditures to advance Silvertip toward commercial production, income and mining tax payments at Palmarejo and an increase in inventories, partially offset by a higher operating margin per consolidated silver equivalent ounce at Palmarejo and Rochester.

Cash Provided by Operating Activities from Continuing Operations

Net cash provided by operating activities for the three months ended September 30, 2018 was \$5.8 million compared to net cash provided by operating activities of \$37.3 million for the three months ended September 30, 2017. Net cash provided by operating activities for the nine months ended September 30, 2018 was \$20.0 million compared to \$105.3 million for the nine months ended September 30, 2017. Net cash provided by operating activities was impacted by the following key factors for the applicable periods:

	Three months ended September 30,		Nine months ended September 30,	
	2018	2017	2018	2017
Consolidated silver equivalent ounces sold	8,475,883	8,264,174	25,736,076	26,102,711
Average realized price per consolidated silver equivalent ounce ⁽¹⁾	\$17.56	\$19.35	\$18.73	\$18.96
Costs applicable to sales per consolidated silver equivalent ounce ⁽²⁾	(13.79)	(12.29)	(12.61)	(12.19)
Operating margin per consolidated silver equivalent ounce	\$3.77	\$7.06	\$6.12	\$6.77

Calculated by dividing the Company's total metal sales by total silver equivalent ounces (based on a historical 60:1

(1) ratio of silver ounces to gold ounces, 0.06:1 ratio of silver ounces to zinc pounds and 0.05:1 ratio of silver ounces to lead pounds).

(2) See Non-GAAP Financial Performance Measures.

	Three months ended September 30,		Nine months ended September 30,	
In thousands	2018	2017	2018	2017
Cash flow before changes in operating assets and liabilities	\$12,933	\$25,150	\$87,869	\$95,674
Changes in operating assets and liabilities:				
Receivables	(5,930)	6,289	(16,509)	9,754
Prepaid expenses and other	1,377	(1,332)	3,868	(2,177)
Inventories	(8,156)	(2,282)	(19,630)	8,080
Accounts payable and accrued liabilities	5,565	9,484	(35,562)	(5,982)
Cash provided by continuing operating activities	\$5,789	\$37,309	\$20,036	\$105,349

Cash provided by operating activities decreased \$31.5 million for the three months ended September 30, 2018 compared to the three months ended September 30, 2017, primarily due to a decrease in silver and gold prices, an increase in inventories and a lower operating margin per consolidated silver equivalent ounce, partially offset by higher silver equivalent ounces sold. Revenue for the three months ended September 30, 2018 decreased \$11.1 million, \$14.4 million of which was due to lower average realized prices, partially offset by an increase of \$3.3 million due to higher silver equivalent ounces sold. The \$7.1 million working capital increase in the three months ended September 30, 2018 was primarily due to an increase in accrued interest, timing of accounts receivable and VAT collections and an inventory buildup at Silvertip, compared to the \$12.2 million working capital decrease in the three months ended September 30, 2017, was primarily due to an increase in accounts payable partially offset by an increase in inventories and prepaid assets.

Cash provided by operating activities decreased \$85.3 million for the nine months ended September 30, 2018 compared to the nine months ended September 30, 2017, primarily due to lower silver prices, income and mining tax payments at Palmarejo, lower silver equivalent ounces sold, a lower operating margin per consolidated silver equivalent ounce and an increase in inventories. Revenue for the nine months ended September 30, 2018 decreased \$13.0 million, \$10.0 million of which was due to lower silver equivalent ounces sold and \$3.0 million due to lower average realized prices. The \$67.8 million working capital increase in the nine months ended September 30, 2018 was

primarily due to the timing of income and mining tax payments at Palmarejo, an increase in inventories and the timing on accounts receivable and VAT collections, compared to the \$9.7 million working capital decrease in the nine months ended September 30, 2017, which was primarily due to a reduction of inventories carried over from the fourth quarter of 2016 and the collection of accounts receivable, partially offset by the timing of payments.

Cash Used in Investing Activities from Continuing Operations

Net cash used in investing activities in the three months ended September 30, 2018 was \$24.1 million compared to net cash used in investing activities of \$35.5 million in the three months ended September 30, 2017, primarily due to the \$15.0 million payment received as part of the Manquiri Letter Agreement, and the acquisition of strategic equity investments in 2017. The Company had capital expenditures of \$39.5 million in the three months ended September 30, 2018 compared with \$29.0 million in the three months ended September 30, 2017. Capital expenditures in the three months ended September 30, 2018 were primarily related to pre-production capital spending at Silvertip and underground development at Silvertip, Palmarejo, and Kensington. Capital expenditures in the three months ended September 30, 2017 were primarily related to underground development at Palmarejo and Kensington, capitalized conversion drilling, and the Stage IV leach pad expansion and commissioning at Rochester.

Net cash used in investing activities in the nine months ended September 30, 2018 was \$95.2 million compared to net cash used in investing activities of \$79.8 million in the nine months ended September 30, 2017, primarily due to pre-production capital expenditures at Silvertip and the proceeds from the sale of the Joaquin project in the first quarter of 2017, partially offset by the \$15.0 million payment received as part of the Manquiri Letter Agreement. The Company had capital expenditures of \$123.0 million in the nine months ended September 30, 2018 compared with \$89.7 million in the nine months ended September 30, 2017. Capital expenditures in the nine months ended September 30, 2018 were primarily related to pre-production capital spending at Silvertip and underground development at Silvertip, Palmarejo, and Kensington. Capital expenditures in the nine months ended September 30, 2017 were primarily related to underground development at Palmarejo and Kensington, capitalized conversion drilling, and the Stage IV leach pad expansion and commissioning at Rochester.

Cash Provided by (Used in) Financing Activities from Continuing Operations

Net cash used in financing activities in the three months ended September 30, 2018 was \$0.6 million compared to net cash used in financing activities of \$5.6 million in the three months ended September 30, 2017. During the three months ended September 30, 2018, the Company drew \$5.0 million, net from the Facility.

Net cash used in financing activities in the nine months ended September 30, 2018 was \$13.3 million compared to net cash provided by financing activities of \$43.5 million in the nine months ended September 30, 2017. During the nine months ended September 30, 2018, the Company drew \$20.0 million, net from the Facility to repay Silvertip's debt obligation and to finance working capital and general corporate purposes. The Company also had higher cash remittances to tax authorities in respect of tax withholdings on vested stock-based compensation awards. During the nine months ended September 30, 2017, the Company received net proceeds of approximately \$245.0 million from the issuance of the 2024 Senior Notes, partially offset by the repurchase of the 2021 Senior Notes for \$185.5 million, including premiums.

Critical Accounting Policies and Accounting Developments

Please see Note 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES contained in the 2017 10-K and in Note 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES contain in this Report for the Company's critical accounting policies and estimates.

Revenue Recognition

On January 1, 2018, the Company adopted the updated revenue guidance applicable under ASC 606 - "Revenue from Contracts with Customers". The new guidance creates a five-step framework to determine revenue recognition:

1. Identify the contract with the customer
2. Identify the performance obligations
3. Determine the transaction price
4. Allocate the transaction price to the performance obligations
5. Recognize revenue when (or as) the entity satisfies a performance obligation

The Company produces doré and concentrate that is shipped to third-party refiners and smelters, respectively, for processing. The Company enters into contracts to sell its metal to various third-party customers which may include the

refiners and smelters that process the doré and concentrate. The Company's performance obligation in these transactions is generally the transfer of metal to the customer.

In the case of doré shipments, the Company generally sells refined metal at market prices agreed upon by both parties. The Company also has the right, but not the obligation, to sell a portion of the anticipated refined metal in advance of being fully refined. When the Company sells refined metal or advanced metal, the performance obligation is satisfied when the metal is

delivered to the customer. Revenue and Costs Applicable to Sales are recorded on a gross basis under these contracts at the time the performance obligation is satisfied.

Under the Company's concentrate sales contracts with third-party smelters, metal prices are set on a specified future quotational period, typically one to three months, after the shipment date based on market prices. When the Company sells gold concentrate to the third-party smelters, the performance obligation is satisfied when the concentrate is loaded onto the third-party shipping vessel. The contracts, in general, provide for provisional payment based upon provisional assays and historical metal prices. Final settlement is based on the applicable price for the specified future quotational period and generally occurs three to six months after shipment. The Company's provisionally priced sales contain an embedded derivative that is required to be separated from the host contract for accounting purposes. The host contract is the receivable from the sale of concentrates measured at the forward price at the time of sale. The embedded derivative does not qualify for hedge accounting and is adjusted to fair value through revenue each period until the date of final metal settlement.

The Company also sells concentrate under off-take agreements to third-party customers that are responsible for arranging the smelting of the concentrate. Prices can be either be fixed or based on a quotational period. The quotational period varies by contract, but is generally a one-month period following the shipment of the concentrate. The performance obligation is satisfied when the concentrate is loaded onto the third-party shipping vessel. The off-take agreement allows for the Company to sell concentrate in advance of shipment and results in the customer taking ownership of the concentrate prior to shipment.

The Company recognizes revenue from concentrate sales, net of treatment and refining charges, when it satisfies the performance obligation of transferring control of the concentrate to the customer.

For doré and off-take sales, the Company may incur a finance charge related to advance sales that is not considered significant and, as such, is not considered a separate performance obligation. In addition, the Company has elected to treat freight costs as a fulfillment cost under ASC 606 and not as a separate performance obligation.

The Company's gold stream agreement with a subsidiary of Franco-Nevada commenced in 2016 with a \$20.0 million deposit paid by Franco-Nevada in exchange for the right and obligation to purchase 50% of a portion of Palmarejo gold production at the lesser of \$800 or market price per ounce. Because there is no minimum obligation associated with this deposit, it is not considered financing, and each shipment is considered to be a separate performance obligation. The streaming agreement represents a contract liability under ASC 606, which requires the Company to ratably recognize a portion of the deposit as revenue for each gold ounce delivered to Franco-Nevada.

Other Liquidity Matters

We believe that our liquidity and capital resources from U.S. operations are adequate to fund our U.S. operations and corporate activities. The Company has asserted indefinite reinvestment of earnings from its Mexican operations as determined by management's judgment about and intentions concerning the future operations of the Company. The Company does not believe that the amounts reinvested will have a material impact on liquidity.

In order to reduce future cash interest payments and/or amounts due at maturity or upon redemption, from time to time we may repurchase certain of our debt securities for cash or in exchange for other securities, which may include secured or unsecured notes or equity, in each case in open market or privately negotiated transactions. We regularly engage in conversations with our bondholders and evaluate any such transactions in light of prevailing market conditions, liquidity requirements, contractual restrictions, and other factors. The amounts involved may be significant and any such transactions may occur at a substantial discount to the debt securities' face amount.

Non-GAAP Financial Performance Measures

Non-GAAP financial measures are intended to provide additional information only and do not have any standard meaning prescribed by generally accepted accounting principles ("GAAP"). Unless otherwise noted, we present the Non-GAAP financial measures of our continuing operations in the tables below. For additional information regarding our discontinued operations, see Note 21 -- to the Condensed Consolidated Financial Statements. These measures should not be considered in isolation or as a substitute for performance measures prepared in accordance with GAAP.

Adjusted Net Income (Loss)

Management uses Adjusted net income (loss) to evaluate the Company's operating performance, and to plan and forecast its operations. The Company believes the use of Adjusted net income (loss) reflects the underlying operating performance of our core mining business and allows investors and analysts to compare results of the Company to similar results of other mining companies. Management's determination of the components of Adjusted net income (loss) are evaluated periodically and is based, in part, on a review of non-GAAP financial measures used by mining industry analysts. The tax effect of adjustments are based on statutory tax rates and the Company's tax attributes, including the impact through the Company's valuation allowance. The combined effective rate of tax adjustments may not be consistent with the statutory tax rates or the Company's effective tax rate due to jurisdictional tax attributes and related valuation allowance impacts which may minimize the tax effect of certain adjustments and may not apply to gains and losses equally. Adjusted net income (loss) is reconciled to Net income (loss) in the table below:

In thousands except per share amounts	Three months ended		Nine months ended	
	September 30,	September 30,	September 30,	September 30,
	2018	2017	2018	2017

Adjusted net income (loss) per share - Diluted \$(0.11) \$(0.09) \$(0.10) \$(0.06)

(1) For the three months ended September 30, 2018, tax effect of adjustments of \$3.2 million (10%) is primarily related to the write-down of Silvertip start-up costs.

For the three months ended September 30, 2017, tax effect of adjustments of \$1.0 million (80%) is primarily related to deferred taxes on the Metalla transaction.

(2) For the nine months ended September 30, 2018, tax effect of adjustments of \$3.2 million (13%) is primarily related to the write-down of Silvertip start-up costs.

For the nine months ended September 30, 2017, tax effect of adjustments of \$0.8 million (-7%) is primarily related to a taxable gain on the sale of the Joaquin project and deferred taxes on the Metalla transaction.

EBITDA and Adjusted EBITDA

Management uses EBITDA to evaluate the Company's operating performance, to plan and forecast its operations, and assess leverage levels and liquidity measures. The Company believes the use of EBITDA reflects the underlying operating performance of our core mining business and allows investors and analysts to compare results of the Company to similar results of other mining companies. Adjusted EBITDA is a measure used in the 2024 Senior Notes Indenture and the Facility to determine our ability to make certain payments and incur additional indebtedness. EBITDA and Adjusted EBITDA do not represent, and should not be considered an alternative to, Net income (Loss) or Cash Flow from Operations as determined under GAAP. Other companies may calculate Adjusted EBITDA differently and those calculations may not be comparable to our presentation. Adjusted EBITDA is reconciled to Net income (loss) in the table below:

	Three months ended September 30,		Nine months ended September 30,	
In thousands except per share amounts	2018	2017	2018	2017

Costs Applicable to Sales and All-in Sustaining Costs

Management uses Costs applicable to sales ("CAS") and All-in sustaining costs ("AISC") to evaluate the Company's current operating performance and life of mine performance from discovery through reclamation. We believe these measures assist analysts, investors and other stakeholders in understanding the costs associated with producing silver and gold, assessing our operating performance and ability to generate free cash flow from operations and sustaining production. These measures may not be indicative of operating profit or cash flow from operations as determined under GAAP. Management believes converting the benefit from selling gold into silver equivalent ounces best allows management, analysts, investors and other stakeholders to evaluate the operating performance of the Company. Other companies may calculate CAS and AISC differently as a result of reflecting the benefit from selling non-silver metals as a by-product credit rather than converting to silver equivalent ounces, differences in the determination of sustaining capital expenditures, and differences in underlying accounting principles and accounting frameworks such as in International Financial Reporting Standards.

Cautionary Statement Concerning Forward-Looking Statements

This report contains numerous forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended (the “Exchange Act”) relating to the Company’s gold, silver, zinc and lead mining business, including statements regarding, estimated production, costs, capital expenditures, mining and crushing rates at Wharf, contingent payments for the Silvertip acquisition, expenses, metals prices, sufficiency of assets, ability to discharge liabilities, liquidity management, financing needs, environmental compliance expenditures, risk management strategies, cost reduction initiatives, capital discipline, and initiatives to maximize net cash flow, enhance revenues, reduce operating and non-operating costs, and manage working capital efficiently. Such forward-looking statements are identified by the use of words such as “believes,” “intends,” “expects,” “hopes,” “may,” “should,” “plan,” “project,” “contemplates,” “anticipates” or similar words. Actual results could differ materially from those projected in the forward-looking statements. The factors that could cause actual results to differ materially from those projected in the forward-looking statements include (i) the risk factors set forth in the “Risk Factors” section of the 2017 10-K, the Company’s Form 10-Q for the quarterly period ended March 31, 2018 and in this Management’s Discussion and Analysis of Financial Condition and Results of Operations, (ii) the risks and hazards inherent in the mining business (including risks inherent in developing large-scale mining projects, environmental hazards, industrial accidents, weather or geologically related conditions), (iii) changes in the market prices of gold, silver, zinc and lead and a sustained lower price environment, (iv) the uncertainties inherent in the Company’s production, exploratory and developmental activities, including risks relating to permitting and regulatory delays, ground conditions and grade variability, (v) any future labor disputes or work stoppages (involving the Company and its subsidiaries or third parties), (vi) the uncertainties inherent in the estimation of gold, silver, zinc and lead reserves and mineralized material, (vii) changes that could result from the Company’s future acquisition of new mining properties or businesses, (viii) the loss of access to any third-party smelter to whom the Company markets silver and gold, (ix) the effects of environmental and other governmental regulations, (x) the risks inherent in the ownership or operation of or investment in mining properties or businesses in foreign countries, and (xi) the Company’s ability to raise additional financing necessary to conduct its business, make payments or refinance its debt. Readers are cautioned not to put undue reliance on forward-looking statements. The Company disclaims any intent or obligation to update publicly these forward-looking statements, whether as a result of new information, future events or otherwise.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The Company is exposed to various market risks as a part of its operations and engages in risk management strategies to mitigate these risks. The Company continually evaluates the potential benefits of engaging in these strategies based on current market conditions. The Company does not actively engage in the practice of trading derivative instruments for profit. Additional information about the Company’s derivative financial instruments may be found in Note 11 -- Derivative Financial Instruments in the notes to the condensed consolidated financial statements. This discussion of the Company’s market risk assessments contains “forward looking statements”. For additional information regarding forward-looking statements and risks and uncertainties that could impact the Company, please refer to Item 2 of this Report - Cautionary Statement Concerning Forward-Looking Statements. Actual results and actions could differ materially from those discussed below.

Gold, Silver, Zinc and Lead Prices

Gold, silver, zinc, and lead prices may fluctuate widely due to numerous factors, such as U.S. dollar strength or weakness, demand, investor sentiment, inflation or deflation, and global mine production. The Company’s profitability and cash flow may be significantly impacted by changes in the market price of gold, silver, zinc, and lead.

Gold, Silver, Zinc and Lead Hedging

To mitigate the risks associated with gold, silver, zinc and lead price fluctuations, the Company may enter into option contracts to hedge future production. The Company had outstanding Asian put and call option contracts in net-zero-cost collar contracts on zinc at September 30, 2018. The weighted average strike prices on the put and call contracts are \$3,000 and \$4,050 per metric ton, respectively. The contracts are generally net cash settled and, if the price of zinc at the time of the expiration is between the put and call prices, would expire at no cost to the Company. At September 30, 2018, the fair market value of the put and call zero cost collar contracts was a net asset of \$0.3 million. During the nine months ended September 30, 2018, the Company recorded unrealized gains of \$0.6 million

related to outstanding options which were included in Fair value adjustments, net. A 10% increase or decrease in the price of zinc at September 30, 2018 would result in gains of \$0.1 million and \$0.5 million, respectively, on settlement.

Provisional Silver and Gold Sales

The Company enters into sales contracts with third-party smelters and refiners which, in some cases, provide for a provisional payment based upon preliminary assays and quoted metal prices. The provisionally priced sales contracts contain an embedded derivative that is required to be separated from the host contract. Depending on the difference between the price at the

time of sale and the final settlement price, embedded derivatives are recorded as either a derivative asset or liability. The embedded derivatives do not qualify for hedge accounting and, as a result, are marked to the market gold and silver price at the end of each period from the provisional sale date to the date of final settlement. The mark-to-market gains and losses are recorded in earnings. Changes in silver, gold, zinc and lead prices resulted in provisional pricing mark-to-market gains of \$34 thousand and \$15 thousand in the three and nine months ended September 30, 2018, respectively.

At September 30, 2018, the Company had outstanding provisionally priced sales of 12,089 ounces of gold at an average price of \$1,224, 98,832 ounces of silver at an average price of \$14.61, 1.8 million pounds of zinc at an average price of \$1.20 and 1.2 million pounds of lead at an average price of \$0.92. A 10% change in realized silver, gold, zinc and lead prices would cause revenue to vary by \$2.0 million.

Foreign Currency

The Company operates, or has mineral interests, in several foreign countries including Canada, Mexico, and New Zealand, which exposes it to foreign currency exchange rate risks. Foreign currency exchange rates are influenced by world market factors beyond the Company's control such as supply and demand for U.S. and foreign currencies and related monetary and fiscal policies. Fluctuations in local currency exchange rates in relation to the U.S. dollar may significantly impact profitability and cash flow.

Foreign Exchange Hedging

To manage foreign currency risk, the Company may enter into foreign exchange forward and/or option contracts when the Company believes such contracts would be beneficial. The Company had no outstanding foreign exchange contracts at September 30, 2018.

Interest Rates

Interest Rate Hedging

We may use financial instruments to manage exposures to changes in interest rates on loans, which exposes us to credit risk and market risk. Credit risk is the failure of the counterparty to perform under the terms of the derivative contract. When the fair value of a derivative contract is positive, the counterparty owes us, which creates credit risk for us. When the fair value of a derivative contract is negative, we owe the counterparty and, therefore, it does not pose credit risk. We seek to minimize the credit risk in derivative instruments by entering into transactions with what we believe are high-quality counterparties. Market risk is the adverse effect on the value of a financial instrument that results from a change in interest rates. The Company had an outstanding interest rate swap whereby the Company receives a variable rate in exchange for a floating rate at September 30, 2018. A 10% change in the 1-month LIBOR would cause Fair value adjustments, net to vary by \$0.1 million.

Item 4. Controls and Procedures

(a) Disclosure Controls and Procedures

As of the end of the period covered by this quarterly report, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including its Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), and management necessarily applied its judgment in assessing the costs and benefits of such controls and procedures, which by their nature, can provide only reasonable assurance regarding management's control objectives. The design of any system of controls is based in part upon certain assumptions about the likelihood of future events. Based upon the foregoing, the Company's Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective and operating to provide reasonable assurance that information required to be disclosed by it in the reports it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and to provide reasonable assurance that such information is accumulated and communicated to the Company's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

(b) Management's Report on Internal Control Over Financial Reporting

Based on an evaluation by the Company's Chief Executive Officer and Chief Financial Officer, such officers concluded

that there was no change in the Company's internal control over financial reporting during the three months ended September 30, 2018 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II

Item 1. Legal Proceedings

See Note 20 -- Commitments and Contingencies in the notes to the Consolidated Financial Statements included herein.

Item 1A. Risk Factors

Item 1A -- Risk Factors of the 2017 10-K and the Company's Quarterly Report on Form 10-Q filed on April 25, 2018 set forth information relating to important risks and uncertainties that could materially adversely affect the Company's business, financial condition or operating results. Additional risks and uncertainties that the Company does not presently know or that it currently deems immaterial also may impair our business operations.

Item 4. Mine Safety Disclosures

Information pertaining to mine safety matters is reported in accordance with Section 1503(a) of the Dodd-Frank Wall Street Reform and Consumer Protection Act in Exhibit 95.1 attached to this Form 10-Q.

Item 5. Other Information

On October 29, 2018, the Company entered into the Amendment to, among other things, increase the maximum principal amount of the Facility by \$50.0 million in incremental loans and commitments to an aggregate of \$250.0 million and to extend the maturity date of the Facility to be four years after the effective date of the Amendment. A copy of the Amendment is attached hereto as Exhibit 10.3 and is incorporated herein by reference. The description of the Amendment is a summary only and is qualified in its entirety by the terms of the Credit Agreement as amended by the Amendment.

Item 6. Exhibits

- 2.1 Arrangement Agreement, dated August 2, 2018, by and among Coeur Mining, Inc., and Northern Empire Resources Corp. (incorporated herein by reference to Exhibit 2.1 to the Registrant's Current Report on Form 8-K filed on August 2, 2018 (File No. 001-08641))
- 10.1 Form of Voting Agreement (incorporated herein by reference to Exhibit 2.1 to the Registrant's Current Report on Form 8-K filed on August 2, 2018 (File No. 001-08641))
- 10.2 Letter Agreement, dated September 25, 2018, by and among Coeur Mining, Inc., a Delaware corporation, Coeur South America Corp., a Delaware corporation, Coeur Explorations, Inc., an Idaho corporation, Empresa Minera Manquiri S.A., a Bolivian sociedad anónima, and Ag-Mining Investments, AB (formerly NewCo 4714 Sweden AB under change of name to Argentum Investment AB) (incorporated herein by reference to Exhibit 10.1 to the Registrant's Current Report on Form 8-K filed on September 25, 2018 (File No. 001-08641)).
- 10.3 First Amendment to Credit Agreement, dated October 29, 2018, by and among Coeur Mining, Inc., certain subsidiaries of Coeur Mining, Inc., as guarantors, the lenders party thereto and Bank of America, N.A., as administrative agent (filed herewith).
- 31.1 Certification of the CEO (Filed herewith).
- 31.2 Certification of the CFO (Filed herewith).
- 32.1 CEO Section 1350 Certification (Filed herewith).
- 32.2 CFO Section 1350 Certification (Filed herewith).
- 95.1 Mine Safety Disclosure (Filed herewith).
