COLLINS INDUSTRIES, INC. AND SUBSIDIARIES

Notes to Consolidated Condensed Financial Statements

(Unaudited)

(1) General

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

In the opinion of management, the accompanying unaudited consolidated condensed financial statements contain all adjustments (consisting of only normal recurring items) necessary to summarize fairly the Company's financial position at April 30, 2002 and the results of operations for the three and six months ended April 30, 2002 and 2001, and the cash flows for the six months ended April 30, 2002 and 2001.

The Company suggests that the unaudited Consolidated Condensed Financial Statements for the three and six months ended April 30, 2002 be read in conjunction with the Company's Annual Report on Form 10-K for the year ended October 31, 2001.

(2) Goodwill

Other assets include unamortized goodwill related to acquisitions in prior years of a bus company and certain assets of a road construction product line. These acquisitions were not material and did not require pro forma disclosures of

their operating results. Both acquisitions were accounted for as purchases and the results of their operations have been consolidated with those of the Company since the date of acquisition. Accordingly, other assets include unamortized goodwill related to the bus segment of \$3.1 and \$3.3 million at April 30, 2002 and 2001, respectively. Other assets also include unamortized goodwill related to the terminal trucks/road construction segment of \$2.1 and \$2.3 million, at April 30, 2002 and 2001, respectively. The excess cost over the fair value of net assets acquired is being amortized on a straight-line basis over 20 years for the bus segment and 15 years for the terminal trucks/road construction segment. Goodwill amortization reflected in the consolidated statements of income, totaled \$85,929 and \$81,611 for the three months ended April 30, 2002 and 2001, respectively. Goodwill amortization reflected in the consolidated statements of income, totaled \$171,858 and \$162,387 for the six months ended April 30, 2002 and 2001, respectively.

The Company periodically evaluates whether events and circumstances have occurred that indicate the remaining estimated useful life of goodwill may warrant revisions or that the remaining balance of goodwill may not be recoverable. When factors indicate that the goodwill should be evaluated for possible impairment, the Company uses an estimate of undiscounted cash flows over the remaining life of the goodwill in measuring whether the goodwill is recoverable.

(3) Inventories

Inventories, which include material, labor, and manufacturing overhead, are stated at the lower of cost (FIFO) or market.

Major classes of inventories as of April 30, 2002 and October 31, 2001, consisted of the following:

	-	-
	<u>April 30, 2002</u>	<u>October 31, 2001</u>
Chassis	\$ 7,313,940	\$ 6,334,882
Raw materials & components	15,009,335	12,163,394
Work-in-process	7,175,836	6,021,652
Finished goods	<u>9,283,822</u>	<u>10,849,372</u>
	<u>\$38,782,933</u>	<u>\$35,369,300</u>

(4) Earnings per Share

Dilutive securities, consisting of options to purchase the Company's common stock and restricted stock awards, included in the calculation of diluted weighted average common shares were 387,548 and 159,788 for the three months ended April 30, 2002 and 2001, respectively. Due to a net loss, there were no dilutive securities for the six month period ended April 30, 2002. The effect of dilutive stock options and restricted stock awards on weighted average shares outstanding was an increase of 175,452 shares for the six months ended April 30, 2001.

(5) Contingencies and Litigation

Edgar Filing: COLLINS INDUSTRIES INC - Form 10-Q

At April 30, 2002, the Company had contingencies and pending litigation which arose in the ordinary course of business. Litigation is subject to many uncertainties and the outcome of the individual matters is not presently determinable. It is management's opinion that this litigation would not result in liabilities that would have a material adverse effect on the Company's consolidated financial position.

(6) Segment Information

Collins Industries, Inc. has three reportable segments: Ambulances, buses and terminal trucks/road construction equipment. The ambulance segment produces modular and van type ambulances for sale to hospitals, ambulance services, fire departments and other governmental agencies. The bus segment produces small school buses, commercial buses and shuttle buses for sale to schools, hotel shuttle services, airports, and other governmental agencies. Terminal truck and road construction equipment products were initially disclosed as separate segments. In the second quarter of fiscal 2001, terminal truck and road construction equipment segments were combined. This combination resulted from consolidation of many of their operations and common management. The terminal trucks/road construction equipment segment produces off-road trucks designed to move trailers and containers for warehouses, truck terminals, rail yards, rail terminals and shipping ports and produces a line of road construction equipment

Consolidated Total	<u>\$71,264</u>	<u>\$69,826</u>

(7)

Comprehensive Income

Comprehensive income consists of net income and other gains and losses affecting shareholders' investments that, under generally accepted accounting principles, are excluded from net income. Accumulated other comprehensive income (loss) as of April 30, 2002, includes unrealized losses on interest rate swaps of \$213,470, reduced by \$80,000 of deferred tax benefit. Comprehensive income (loss) for the three and six months ended April 30, 2002, was \$187,035 and (\$627,456), respectively.

(8) New Accounting Standards

In June 2001, the Financial Accounting Standards Board finalized FASB Statements No. 141, Business Combinations (SFAS 141), and No. 142, Goodwill and Other Intangible Assets (SFAS 142). SFAS 141 requires the use of the

purchase method of accounting and prohibits the use of the pooling-of-interests method of accounting for business combinations initiated after June 30, 2001. SFAS 141 also requires that the Company recognize acquired intangible assets apart from goodwill if the acquired intangible assets meet certain criteria. SFAS 141 applies to all business combinations initiated after June 30, 2001 and for purchase business combinations completed on or after July 1, 2001.

SFAS 142 requires, among other things, that companies no longer amortize goodwill, but instead test goodwill for impairment at least annually. In addition, SFAS 142 requires that the Company identify reporting units for the purposes of assessing potential future impairments of goodwill, reassess the useful lives of other existing recognized intangible assets, and cease amortization of intangible assets with an indefinite useful life. SFAS 142 is required to be applied in fiscal years beginning after December 15, 2001 to all goodwill and other intangible assets recognized at that date, regardless of when those assets were initially recognized. SFAS 142 requires the Company to complete a transitional goodwill impairment test six months from the date of adoption.

The Company's previous business combinations were accounted for using the purchase method. As of April 30, 2002, the net carrying amount of goodwill was \$5.2 million. Amortization expense during the three and six month periods ended April 30, 2002 was \$0.1 and \$0.2 million respectively. The Company has adopted SFAS 141 and will adopt SFAS 142 beginning in fiscal year 2003. Management does not anticipate the adoption of SFAS 142 will have a material impact on its financial position or results of operations.

(9) Subsequent Event

On May 17, 2002 the Company entered into an agreement with Fleet Capital Corporation to replace its existing credit facility with Bank of America. The new agreement provides a \$38.2 million senior secured credit facility. The facility will be used to refinance existing debt, finance new capital expenditures, and provide ongoing working capital. The agreement provides for a revolving credit facility of \$25.0 million and long-term facilities of \$13.2 million. The credit facilities bear interest based on a combination of Eurodollar (LIBOR plus 1.75%) and the prime rate.

The other terms contained in the new agreement with Fleet Capital Corporation are similar to those in the agreement existing with Bank of America at April 30, 2002.

Item 2

- Management's Discussion and Analysis of Financial Condition and Results of Operations

GENERAL:

Collins Industries, Inc. has three reportable segments: ambulances, buses and terminal trucks/road construction equipment. The ambulance segment produces modular and van type ambulances for sale to hospitals, ambulance services, fire departments and other governmental agencies. The bus segment produces small school buses, commercial buses and shuttle buses for sale to schools, hotel shuttle services, airports, and other governmental agencies. Terminal trucks and road construction equipment products were initially disclosed as separate segments. In the second quarter of fiscal 2001, terminal trucks and road construction equipment segments were combined. This combination resulted from consolidation of many of their operations and common management. The terminal trucks/road construction equipment segment produces off road trucks designed to move trailers and containers for warehouses, truck terminals, rail yards, rail terminals and shipping ports and produces a line of road construction equipment.

The accounting policies of the segments are the same as those described in the summary of significant accounting policies of the "Notes to Consolidated Financial Statements" in the Company's 2001 Form 10-K. The Company evaluates its performance based on profit or loss from operations before income taxes not including nonrecurring gains and losses. For the three and six months ended April 30, 2002 and 2001 nonrecurring gains or losses were not incurred and as such have no impact on this analysis. The Company accounts for intersegment sales and transfers as if the sales or transfers were to third parties, with all intercompany sales eliminated in consolidation.

The Company's reportable segments are strategic business units that offer different products and services. They are managed separately because each business requires different technology and marketing strategies.

See "Note 6 to the Consolidated Financial Statements" for quantitative segment information.

RESULTS OF OPERATIONS:

Sales

Sales for the three months ended April 30, 2002 decreased 7% compared to the same period in fiscal 2001. This decrease was principally due to a 26% decrease in unit volume sales of terminal trucks/road construction equipment products, partially offset by a 19% increase in unit volume sales of bus products. The sales increase from bus products principally resulted from increased sales through dealer networks. Additionally, certain customers of the ambulance and bus segments made changes to their production orders late in the second fiscal quarter. As a result, the production of these units could not be completed and the revenue and profit from these orders was not recognized in the quarter ended April 30, 2002. The sales decline in terminal trucks/road construction equipment products primarily resulted from an overall economic decline in the rail, trucking and port sectors of the domestic market. Compared to the same period in fiscal 2001, the average unit selling prices of terminal trucks/road construction equipment, ambulance, and bus products decreased by 11%, 4% and 4%, respectively. Average selling price of terminal trucks/road construction equipment products decreased primarily as a result of changes in product mix. The average selling price of ambulance and bus products decreased principally as a result of competitive price pressure.

Sales for the six months ended April 30, 2002 decreased 7% compared to the same period in fiscal 2001. This decrease was principally due to 28% and 4% decreases in unit volume sales of terminal trucks/road construction equipment products and ambulance products, respectively. These decreases were partially offset by an 18% increase in unit volume sales of bus products. Compared to the same period in fiscal 2001, the average unit selling prices of ambulance, and bus products decreased by 2% and 2%, respectively. The principal reasons for the unit volume and selling price changes for the six months ended April 30, 2002 are the same as discussed in the immediately preceding paragraph.

The Company's consolidated sales backlog at April 30, 2002 was \$62.2 million compared to \$38.8 million at October 31, 2001 and \$67.4 million at April 30, 2001.

Cost of Sales

Cost of sales for the three months ended April 30, 2002 was 89% of sales compared to 87% for the same period in fiscal 2001. The increase in cost of sales as a percent of sales for the three months ended April 30, 2002 was principally due to the impact of fixed overhead costs associated with lower sales volumes of terminal trucks/road construction equipment and competitive selling price pressures of the ambulance products.

Cost of sales for the six months ended April 30, 2002 was 90% of sales compared to 88% for the same period in fiscal 2001. This increase was principally due to the same reasons discussed in the immediately preceding paragraph and the manufacturing overhead associated with lower sales volumes of ambulance products in the first quarter of fiscal 2002.

Selling, General and Administrative Expense

Selling, general and administrative expense, as a percent of sales, for the three months ended April 30, 2002 and 2001 was 9% and 10%, respectively. This decrease principally resulted from a change in the distribution network of ambulance products and was partially offset by a decrease in sales. The dealer network for ambulance products has been expanded and its direct sales force has been reduced.

Selling, general and administrative expense, as a percent of sales, for the six months ended April 30, 2002 and 2001 was 10% and 11%, respectively. This decrease was principally due to the same reasons discussed in the immediately preceding paragraph.

Other Income (Expense)

Other income (expense) decreased for the three months and six months ended April 30, 2002 principally as a result of the Company's decrease in interest expense resulting from a reduction of debt combined with an overall decrease of the Company's effective interest rates.

Net Income (Loss)

The Company's net income for the three months ended April 30, 2002 was \$.2 million (\$.02 per share-diluted) compared to \$.8 million (\$.11 per share-diluted) for the same period in fiscal 2001. The decrease in the Company's net income was principally attributable to the impact of lower profit contributions from terminal trucks/road construction equipment and ambulance products.

The Company's net loss for the six months ended April 30, 2002 was \$.5 million (\$.07 per share-diluted) compared to net income of \$.2 million (\$.02 per share - diluted) for the comparable period in fiscal 2001. The decrease in net income was principally attributable to the reasons discussed in the immediately preceding paragraph, the repurchase of company common stock in the first quarter of fiscal 2002 and was offset by lower interest expense.

LIQUIDITY AND CAPITAL RESOURCES:

The Company used existing credit lines, internally generated funds and supplier financing to fund its operations and capital expenditures for the six months ended April 30, 2002.

Cash provided by operations was \$.1 million for the six months ended April 30, 2002, compared to cash used in operations of \$4.0 million for the same period in fiscal 2001. Cash provided by operations principally resulted from depreciation and amortization of \$1.7 million, a decrease in prepaid expenses and other current assets of \$1.2 million, a decrease in accounts receivable of \$.7 million, an increase in accounts payable of \$.5 million and was offset by an increase in inventory of \$3.4 million and a net loss of \$.5 million.

Cash used in investing activities was \$1.2 million for the six months ended April 30, 2002 compared to \$.8 million for the same period in fiscal 2001. The increase was principally due to higher capital expenditures for the six months ended April 30, 2002.

Cash flow provided by financing activities was \$1.0 million for the six months ended April 30, 2002, compared to \$4.8 million for the same period in fiscal 2001. This change principally resulted from decreased borrowings to finance working capital needs and was partially offset by an increase in the purchase and retirement of common stock.

Effective November 1, 2000 the Company adopted Statement of Financial Accounting Standards (SFAS) No. 133, "Accounting for Derivative Investments and Hedging Activities" as amended by (SFAS) No. 137. On July 24, 2001, the Company entered into an interest rate swap agreement in order to limit the effect of increases in the interest rates

on \$10 million of its floating rate debt. The agreement provides two \$5 million swaps running until December 2002, and July 2003. The effect of this agreement was to convert underlying variable-rate debt based on LIBOR to fixed rate debt with an interest rate between 4.42% and 4.65% plus a margin of 175 basis points. This agreement reduces the Company's risk with respect to variable-rate debt. The unrealized loss on the outstanding swaps at April 30, 2002 was \$.1 million net of taxes and is included in other comprehensive income (loss).

The Company believes that its cash flows from operations and bank credit lines will be sufficient to satisfy its future working capital and capital expenditure requirements.

Cautionary Statement Regarding Risks and Uncertainties That May Affect Future Results

This report and other written reports and oral statements made from time to time by the Company may contain so-called "forward-looking statements" about the business, financial condition and prospects of the Company, all of which are subject to risks and uncertainties. One can identify these forward-looking statements by their use of words such as "expects", "plans", "will", "estimates", "forecasts", "projects", and other words of similar meaning. One can also identify them by the fact that they do not relate strictly to historical or current facts. One should understand that it is not possible to predict or identify all factors, which involve risks and uncertainties. Consequently, the reader should not consider any such list or listing to be a complete statement of all potential risks or uncertainties.

No forward-looking statement can be guaranteed and actual future results may vary materially. The actual results of the Company could differ materially from those indicated by the forward-looking statements because of various risks and uncertainties including, without limitation, reliability and timely fulfillment of orders, development of new products, adequate direct labor pools, interest rate fluctuations, various inventory risks due to changes in market conditions, substantial dependence on third parties for product quality, changes in product demand, changes in budgeted funds by Federal, state and local governments, changes in competition, changes in tax and other governmental rules and regulations applicable to the Company, and other risks indicated in the Company's filings with the Securities and Exchange Commission.

The Company does not assume the obligation to update any forward-looking statement. One should carefully evaluate such statements in light of factors described in the Company's filings with the Securities and Exchange Commission, especially on Forms 10-K, 10-Q and 8-K (if any).
