or

¨ TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from to

Commission file number 1-06732

COVANTA HOLDING CORPORATION
(Exact name of registrant as specified in its charter)

Delaware	95-6021257
(State or Other Jurisdiction of Incorporation or Organization)	(I.R.S. Employer Identification Number)
445 South Street, Morristown, NJ	07960
(Address of Principal Executive Office)	(Zip Code)

(862) 345-5000
(Registrant's telephone number including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes þ No ¨

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes þ No ¨

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer þ	Accelerated filer ¨	Non-accelerated filer ¨	Smaller reporting company ¨
		(Do not check if a smaller reporting company)	

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes ¨ No þ

Applicable Only to Corporate Issuers:

Indicate the number of shares of the registrant's Common Stock outstanding as of the latest practicable date.

Class	Outstanding at October 16, 2014
Common Stock, $0.10 par value	131,066,483

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

Certain statements in this Quarterly Report on Form 10-Q may constitute “forward-looking” statements as defined in Section 27A of the Securities Act of 1933 (the “Securities Act”), Section 21E of the Securities Exchange Act of 1934 (the “Exchange Act”), the Private Securities Litigation Reform Act of 1995 (the “PSLRA”) or in releases made by the Securities and Exchange Commission (“SEC”), all as may be amended from time to time. Such forward-looking statements involve known and unknown risks, uncertainties and other important factors that could cause the actual results, performance or achievements of Covanta Holding Corporation and its subsidiaries (“Covanta”) or industry results, to differ materially from any future results, performance or achievements expressed or implied by such forward-looking statements. Statements that are not historical fact are forward-looking statements. Forward-looking statements can be identified by, among other things, the use of forward-looking language, such as the words “plan,” “believe,” “expect,” “anticipate,” “intend,” “estimate,” “project,” “may,” “will,” “would,” “could,” “should,” “seeks,” or “sche similar words, or the negative of these terms or other variations of these terms or comparable language, or by discussion of strategy or intentions. These cautionary statements are being made pursuant to the Securities Act, the Exchange Act and the PSLRA with the intention of obtaining the benefits of the “safe harbor” provisions of such laws. Covanta cautions investors that any forward-looking statements made by us are not guarantees or indicative of future performance. Important factors, risks and uncertainties that could cause actual results to differ materially from those forward-looking statements include, but are not limited to:

- seasonal or long-term fluctuations in the prices of energy, waste disposal, scrap metal and commodities;
- our ability to renew or replace expiring contracts at comparable prices and with other acceptable terms;
- adoption of new laws and regulations in the United States and abroad, including energy laws, environmental laws, labor laws and healthcare laws;
- our ability to utilize net operating loss carryforwards;
- failure to maintain historical performance levels at our facilities and our ability to retain the rights to operate facilities we do not own;
- our ability to avoid adverse publicity relating to our business;
- advances in technology;
- difficulties in the operation of our facilities, including fuel supply and energy delivery interruptions, failure to obtain regulatory approvals, equipment failures, labor disputes and work stoppages, and weather interference and catastrophic events;
- difficulties in the financing, development and construction of new projects and expansions, including increased construction costs and delays;
- limits of insurance coverage;
- our ability to avoid defaults under our long-term contracts;
- performance of third parties under our contracts and such third parties' observance of laws and regulations;
- concentration of suppliers and customers;
- geographic concentration of facilities;
- increased competitiveness in the energy and waste industries;
- changes in foreign currency exchange rates;
- limitations imposed by our existing indebtedness and our ability to perform our financial obligations and guarantees and to refinance our existing indebtedness;
- exposure to counterparty credit risk and instability of financial institutions in connection with financing transactions;
- the scalability of our business;
- restrictions in our certificate of incorporation and debt documents regarding strategic alternatives;
- failures of disclosure controls and procedures and internal controls over financial reporting;
- our ability to attract and retain talented people;
- general economic conditions in the United States and abroad, including the availability of credit and debt financing; and
-

other risks and uncertainties affecting our businesses described in Item 1A. Risk Factors of Covanta's Annual Report on Form 10-K for the year ended December 31, 2013 and in other filings by Covanta with the SEC.

Although we believe that our plans, intentions and expectations reflected in or suggested by such forward-looking statements are reasonable, actual results could differ materially from a projection or assumption in any of our forward-looking statements. Our future financial condition and results of operations, as well as any forward-looking statements, are subject to change and inherent risks and uncertainties. The forward-looking statements contained in this Quarterly Report on Form 10-Q are made only as of the date hereof and we do not have, or undertake, any obligation to update or revise any forward-looking statements whether as a result of new information, subsequent events or otherwise, unless otherwise required by law.

COVANTA HOLDING CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

NOTE 1. ORGANIZATION AND BASIS OF PRESENTATION

The terms “we,” “our,” “ours,” “us” and “Company” refer to Covanta Holding Corporation and its subsidiaries; the term “Cova
Energy” refers to our subsidiary Covanta Energy Corporation and its subsidiaries.

Organization

Covanta is one of the world’s largest owners and operators of infrastructure for the conversion of waste to energy (known as “energy-from-waste” or “EfW”), and also owns and operates related waste transport and disposal and other renewable energy production businesses. EfW serves two key markets as both a sustainable waste management solution that is environmentally superior to landfilling and as a source of clean energy that reduces overall greenhouse gas emissions and is considered renewable under the laws of many states and under federal law. Our facilities are critical infrastructure assets that allow our customers, which are principally municipal entities, to provide an essential public service.

Our EfW facilities earn revenue from both the disposal of waste and the generation of electricity and/or steam, generally under contracts, as well as from the sale of metal recovered during the EfW process. We process approximately 20 million tons of solid waste annually. We operate and/or have ownership positions in 45 energy-from-waste facilities, which are primarily located in North America, and 11 other energy generation facilities, primarily consisting of renewable energy production facilities in North America (wood biomass and hydroelectric). In total, these assets produce approximately 10 million megawatt hours (“MWh”) of baseload electricity annually. We also operate a waste management infrastructure that is complementary to our core EfW business.

We have one reportable segment, North America, which is comprised of waste and energy services operations located primarily in the United States and Canada. We own or hold equity interests in EfW facilities in China and Italy. For additional information, see Note 6. Financial Information by Business Segments.

We also have investments in subsidiaries engaged in insurance operations in California, primarily in property and casualty insurance, whose remaining business was transitioned into run-off in 2012, and collectively account for less than 1% of our consolidated revenue. During the third quarter of 2014, we entered into an agreement to sell our insurance business. For additional information, see Note 4. Assets Held for Sale and Discontinued Operations.

Basis of Presentation

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with United States Generally Accepted Accounting Principles (“GAAP”) and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all information and footnotes required by GAAP for complete condensed consolidated financial statements. In the opinion of management, all adjustments (including normal recurring accruals) considered necessary for fair presentation have been included in our condensed consolidated financial statements. All intra-entity accounts and transactions have been eliminated. Operating results for the interim period are not necessarily indicative of the results that may be expected for the fiscal year ending December 31, 2014. This Form 10-Q should be read in conjunction with the Audited Consolidated Financial Statements and accompanying Notes in our Annual Report on Form 10-K for the year ended December 31, 2013 (“Form 10-K”).

We use the equity method to account for our investments for which we have the ability to exercise significant influence over the operating and financial policies of the investee. Consolidated net income includes our proportionate share of the net income or loss of these companies. Such amounts are classified as “equity in net income from unconsolidated investments” in our condensed consolidated financial statements. Investments in companies in which we do not have the ability to exercise significant influence are carried at the lower of cost or estimated realizable value. We monitor investments for other-than-temporary declines in value and make reductions when appropriate.

Reclassification

During the three and nine months ended September 30, 2014, certain amounts have been reclassified in our prior period condensed consolidated statement of operations to conform to current year presentation and such amounts were

not material to current and prior periods.
During the third quarter of 2014, we entered into an agreement to sell our insurance business, subject to regulatory approval, and determined the assets related to our insurance subsidiary met the criteria for classification as Assets Held for Sale. The assets and liabilities associated with this businesses are presented in our condensed consolidated balance sheets as Current "Assets Held for Sale" and Current "Liabilities Held for Sale". For additional information, see Note 4. Assets Held for Sale and Discontinued Operations.

NOTE 2. RECENT ACCOUNTING PRONOUNCEMENTS

In June 2014, the Financial Accounting Standards Board ("FASB") issued guidance for accounting for share-based payments when the terms of an award provide that a performance target could be achieved after the requisite service period. The standard states that a performance target in a share-based payment that affects vesting and that could be achieved after the requisite service period should be accounted for as a performance condition. As such, the performance target should not be reflected in estimating the grant-date fair value of the award. We are required to adopt this standard in the first quarter of fiscal 2016 and early adoption is permitted. This standard will not have an impact on our condensed consolidated financial statements.

In May 2014, the FASB issued amended guidance for recognizing revenue which outlines a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers and supersedes current revenue recognition guidance. The core principle of this update is that an entity should recognize revenue for the transfer of goods or services equal to the amount that it expects to be entitled to receive for those goods or services. Further, the guidance requires disclosures to help users of financial statements better understand the nature, amount, timing, and uncertainty of revenue that is recognized. We are required to adopt this standard in the first quarter of fiscal 2017. Early adoption is not permitted. The amended guidance permits the initial application to be applied either retrospectively to each prior reporting period presented, or retrospectively with a cumulative effect adjustment made at the date of initial application. We are currently evaluating the impact of adopting this guidance on our condensed consolidated financial statements.

In April 2014, the FASB issued an update modifying the criteria under which asset disposal activities qualify for presentation as a discontinued operation. The amendment restricts presentation as a discontinued operation to disposals that represent a strategic shift that has, or will have, a major effect on an entity's operations and financial results. The amendments in this update are to be applied prospectively to all disposals or classifications as held for sale of components of an entity. We are required to adopt this standard for the first quarter of 2015. Early adoption is permitted. We have early adopted this standard in the first quarter of 2014.

In January 2014, the FASB issued an update concerning accounting for service concession arrangements. The amendments apply to an operating entity of a service concession arrangement entered into with a public-sector entity grantor when the arrangement meets both of the following conditions: (i) the grantor controls or has the ability to modify or approve the services that the operating entity must provide with the infrastructure, to whom it must provide them, and at what price; and (ii) the grantor controls, through ownership, beneficial entitlement, or otherwise, any residual interest in the infrastructure at the end of the term of the arrangement. The amendments in this update are to be applied on a modified retrospective basis to service concession arrangements that exist at the beginning of an entity's fiscal year of adoption. We are required to adopt this standard for the first quarter of 2015. Early adoption is permitted. Since many of our agreements are with public-sector entities, we are currently evaluating the requirements of this update to determine the effect on our condensed consolidated financial statements.

NOTE 3. BUSINESS DEVELOPMENT AND ORGANIC GROWTH

Business Development

Fairfax Energy-from-Waste Facility

In April 2014, we entered into a waste disposal agreement with our client at the Fairfax EfW facility, extending our relationship under a tip fee arrangement effective at the end of the current service agreement in February 2016. The initial term of the new agreement will end in 2021, with two additional five year renewal periods upon mutual agreement of the parties. Beginning in 2016, the client will provide approximately 60% of the facility's waste capacity under the new agreement.

York Energy-from-Waste Facility

In May 2014, we extended the service agreement for the York EfW facility from 2015 to 2020 on substantially the same terms as the existing agreement.

Indianapolis Energy-from-Waste Facility and Advanced Recycling Center

In August 2014, we extended our existing waste disposal agreement with the City of Indianapolis from 2018 to 2028, under which it will continue to supply approximately 35% of the facility’s waste capacity. The agreement also contemplates the construction and operation of an Advanced Recycling Center ("ARC") adjacent to our Indianapolis EfW facility, which will recover recyclables from mixed municipal solid waste using state-of-the-art sorting technology. Once necessary permits are received, we expect to invest approximately $45 million to build the ARC facility.

Dublin Energy-from-Waste Facility

In September 2014, we entered into an agreement with the Dublin City Council ("Dublin") to build, own and operate a new 600,000 tonne-per-year, 58 megawatt facility in Dublin, Ireland (the "Dublin Waste-to-Energy Facility"). The project will source residential, commercial and industrial waste from Dublin and the surrounding areas and will sell electricity into the local electricity grid, with over 50% of the facility's generation expected to qualify for preferential pricing under Ireland's renewable feed-in tariff. We have commenced construction of the facility, which will take approximately three years to complete, with operational commencement expected in late 2017. We will operate the facility under a 45-year public-private-partnership, after which ownership of the facility will transfer to Dublin. Our total investment in the project is expected to be approximately €500 million, funded by a combination of third party non-recourse project financing (€375 million) and project equity (approximately €125 million). For additional information related to funding for this project, see Note 7. Consolidated Debt - Dublin Project Financing.

Garco Industrial TSDF Acquisition

In September 2014, we acquired Garco, Inc., a treatment, storage and disposal facility ("TSDF") located in Asheboro, North Carolina, specializing in the treatment, management, transportation and disposal of non-hazardous industrial waste and field/facility remediation projects. This acquisition is not material to our condensed consolidated financial statements and therefore, disclosures of pro forma financial information have not been presented.

Other Ongoing Projects

Durham-York EfW Facility

We are constructing a municipally-owned 140,000 tonne-per-year EfW facility to be built in Clarington, Ontario, located in Durham Region, Canada. The project is expected to begin operations in early 2015, after which we will operate the facility under a 20 year contract.

New York City Waste Transport and Disposal Contract

In 2013, New York City awarded us a contract to handle waste transport and disposal from two marine transfer stations located in Queens and Manhattan. We plan to utilize capacity at existing facilities for the disposal of approximately 800,000 tons per year of New York City's municipal solid waste relating to this contract. Service for the Queens marine transfer station is expected to begin in early 2015, with service for the Manhattan marine transfer station expected to follow pending notice to proceed yet to be issued by New York City. The contract is for 20 years, effective from the date operations commence, with options for New York City to extend the term for two additional five-year periods, and requires waste to be transported using a multi-modal approach. We have begun to purchase equipment, including barges, railcars, containers, and intermodal equipment to support this contract. We expect to invest approximately $140 million in new equipment and enhancements to existing facilities that support service under this contract. These investments commenced in 2013 and will be made over several years. During the nine months ended September 30, 2014 and for the twelve months ended December 31, 2013, we invested $45 million and $23 million, respectively, in property, plant and equipment relating to this contract.

Niagara Energy-from-Waste Facility

At our Niagara EfW facility, we installed a new natural gas package boiler to augment the steam generation from our EfW boilers, as well as a steam line connection to new customers. The improvements, which began in 2012, were essentially complete by the second quarter of 2014 and the boiler became fully operational during the third quarter of 2014. Capital expenditures related to these improvements were approximately $4 million for the nine months ended September 30, 2014 and $13 million for the twelve months ended December 31, 2013.

Essex Energy-from-Waste Facility

We are implementing significant operational improvements at our Essex EfW facility, including a state-of-the-art particulate emissions control system, at a total estimated cost of $90 million. Construction on the system commenced in 2014 and is expected to be completed by 2016. Capital expenditures related to these improvements totaled approximately $12 million during the nine months ended September 30, 2014. The facility's environmental performance is currently compliant with all environmental permits and will be further improved with the installation

of this equipment.

Table of Contents

NOTE 4. ASSETS HELD FOR SALE AND DISCONTINUED OPERATIONS

Assets Held for Sale

During the third quarter of 2014, we entered into an agreement to sell our insurance business, subject to regulatory approval, and determined the assets related to our insurance subsidiary met the criteria for classification as Assets Held for Sale, but does not meet the criteria for classification as Discontinued Operations. During the fourth quarter of 2013, assets related to our development activities in the United Kingdom met the criteria for classification as Assets Held for Sale and Discontinued Operations.

The assets and liabilities associated with these businesses are presented in our condensed consolidated balance sheets as Current "Assets Held for Sale" and Current "Liabilities Held for Sale." All corresponding prior year periods presented in our condensed consolidated balance sheet and related information in the accompanying notes have been reclassified to reflect the Assets Held for Sale presentation. The following table sets forth the assets and liabilities of the Assets Held for Sale included in the condensed consolidated balance sheets as of the dates indicated (in millions):

	As of September 30, 2014			As of December 31, 2013		
	UK Development	Insurance Business	Total	UK Development	Insurance Business	Total
Cash and cash equivalents	$1	$4	$5	$2	$3	$5
Accounts receivable	—	1	1	2	1	3
Prepaid expenses and other current assets	—	6	6	—	10	10
Investments in fixed maturities at market (cost: $32 and $32, respectively)	—	32	32	—	32	32
Other noncurrent assets (1)	3	17	20	3	18	21
Write-down of assets to fair value (2)	—	(12)	(12)	—	—	—
Assets held for sale	$4	$48	$52	$7	$64	$71
Accrued expenses and other	$1	$1	$2	$2	$—	$2
Other liabilities (3)	—	43	43	—	47	47
Liabilities held for sale	$1	$44	$45	$2	$47	$49

(1) Other noncurrent assets of our insurance business primarily include reinsurance recoverables.

(2) We recorded a non-cash write-down of $14 million comprised of the write-down of the carrying amount in excess of the realizable fair value of $12 million, plus $2 million in disposal costs. For additional information see Note 9. Supplementary Information — Net Write-offs.

(3) Other liabilities of our insurance business primarily include unpaid loss and loss adjustment expenses.

Discontinued Operations

The results of operations related to our development activities in the United Kingdom for 2013 are included in the condensed consolidated statements of operations as "Loss from discontinued operations, net of tax" and the related cash flows of these businesses are also presented separately in our condensed consolidated statements of cash flows. The following table summarizes the operating results of the discontinued operations for the periods indicated (in millions):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2014	2013	2014	2013
Revenues	$—	$2	$1	$5
Operating expenses	$—	$2	$1	$59
Loss before income tax expense and equity in net income from unconsolidated investments	$—	$—	$—	$(54)
Loss from discontinued operations, net of income tax benefit of $0, $0, $0 and $1, respectively	$—	$—	$—	$(53)

Write-off of capitalized development costs included in Operating expenses	$—	$—	$—	$47

NOTE 5. EARNINGS PER SHARE ("EPS") AND EQUITY

Earnings Per Share

Per share data is based on the weighted average number of outstanding shares of our common stock, par value $0.10 per share, during the relevant period. Basic earnings per share are calculated using only the weighted average number of outstanding shares of common stock. Diluted earnings per share computations, as calculated under the treasury stock method, include the weighted average number of shares of additional outstanding common stock issuable for stock options, restricted stock awards, restricted stock units and warrants whether or not currently exercisable. Diluted earnings per share for all of the periods presented does not include securities if their effect was anti-dilutive (in millions, except per share amounts).

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2014	2013	2014	2013
Net income (loss) from continuing operations	$6	$28	$(2)	$18
Net loss from discontinued operations	—	—	—	(53)
Net income (loss) attributable to Covanta Holding Corporation	$6	$28	$(2)	$(35)
Basic income (loss) per share:				
Weighted average basic common shares outstanding	130	129	130	129
Continuing operations	$0.05	$0.22	$(0.02)	$0.14
Discontinued operations	—	—	—	(0.41)
Basic income (loss) per share	$0.05	$0.22	$(0.02)	$(0.27)
Diluted income (loss) per share:				
Weighted average basic common shares outstanding	130	129	130	129
Dilutive effect of stock options	—	—	—	—
Dilutive effect of restricted stock	1	1	—	1
Dilutive effect of convertible securities	—	—	—	—
Dilutive effect of warrants	—	—	—	—
Weighted average diluted common shares outstanding	131	130	130	130
Continuing operations	$0.05	$0.22	$(0.02)	$0.14
Discontinued operations	—	—	—	(0.41)
Diluted income (loss) per share	$0.05	$0.22	$(0.02)	$(0.27)

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2014	2013	2014	2013
Securities excluded from the weighted average dilutive common shares outstanding because their inclusion would have been anti-dilutive:				
Stock options	1	1	1	1
Restricted stock	—	—	1	—
Restricted stock units	—	—	—	—
Warrants	—	29	—	29

In 2009, we issued warrants in connection with the issuance of 3.25% Cash Convertible Senior Notes which matured on June 1, 2014. The warrants are exercisable only at expiration in equal tranches over a 60 day period which began on September 2, 2014 and ends on November 26, 2014. The warrants are net share settled, which means that, with respect to any exercise date, we will deliver to the warrant holders a number of shares for each warrant equal to the excess (if any) of the volume-weighted average price of our common stock on each exercise date over the then effective strike price of the warrants, divided by such volume- weighted average price of our common stock, with a cash payment in lieu of fractional shares.

During the three months ended September 30, 2014, 156,732 shares of our common stock were issuable in connection with warrant exercises. The remaining warrants will have a dilutive effect to the extent that the volume-weighted average price of our common stock on any daily expiration through November 26, 2014 exceeds the then effective warrant strike price ($20.80 effective as of September 25, 2014). As of September 30, 2014, the dilutive effect of the remaining warrants on earnings per share was not material.

Equity

In May 2014, the stockholders of the Company approved the Covanta Holding Corporation 2014 Equity Award Plan (the "Plan"), to provide incentive compensation to non-employee directors, officers and employees, and to consolidate the two previously existing equity compensation plans into a single plan: the Company's Equity Award Plan for Employees and Officers (the "Former Employee Plan") and the Company's Equity Award Plan for Directors (the "Former Director Plan," and together with the Former Employee Plan, the "Former Plans"). Shares that were available for issuance under the Former Plans will be available for issuance under the Plan. The stockholders of the Company also approved the authorization of 6 million new shares of our common stock for issuance under the Plan.

During the nine months ended September 30, 2014, we granted awards of 720,217 shares of restricted stock, 246,825 restricted stock units and 25,000 stock options. For information related to stock-based award plans, see Note 10. Stock-Based Compensation. During the nine months ended September 30, 2014, we withheld 216,477 shares of our common stock in connection with tax withholdings for vested stock awards.

Dividends declared to stockholders were as follows (in millions, except per share amounts):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2014	2013	2014	2013
Cash dividend				
Declared	$33	$21	$81	$65
Per Share	$0.25	$0.165	$0.61	$0.495

Noncontrolling interests in subsidiaries

Noncontrolling interests in subsidiaries were as follows (in millions):

	As of September 30,	
	2014	2013
Noncontrolling interests in subsidiaries, balance as of beginning of period	$4	$7
Acquisition of noncontrolling interests in subsidiaries	(2)	(2)
Net loss	—	(1)
Noncontrolling interests in subsidiaries, balance as of end of period	$2	$4

In June 2014, we exercised our option to acquire a nominal general partner interest held by a third party in our subsidiary which owns and operates the Southeast Massachusetts energy-from-waste facility.

In August 2014, we purchased the interest held by our partner in a joint venture which was originally formed to pursue the development of the Dublin Waste-to-Energy Facility.

Table of Contents

Credit Facilities

Our subsidiary, Covanta Energy, has senior secured credit facilities consisting of a $1.0 billion revolving credit facility expiring in 2019 (the “Revolving Credit Facility”) and a $198 million term loan due 2019 (the “Term Loan”) (collectively referred to as the "Credit Facilities").

On March 21, 2014, we amended the Credit Facilities to:

- extend the termination date of the Revolving Credit Facility by two years from March 28, 2017 to March 21, 2019;
- increase the aggregate amount of the Revolving Credit Facility by $100 million to $1.0 billion; and
- reduce the applicable margin payable on the Term Loan by 25 basis points, as noted below under Interest and Fees.

We incurred approximately $3 million in costs related to this amendment which will be deferred and amortized over the remaining term of the Credit Facilities.

On March 20, 2014, we made a voluntary prepayment on the Term Loan of $95 million, reducing the outstanding principal to $200 million.

The Revolving Credit Facility is available for the issuance of letters of credit up to the full amount of the facility, provides for a $50 million sub-limit for the issuance of swing line loans (a loan that can be requested in US Dollars on a same day basis for a short drawing period); and is available in US Dollars, Euros, Pounds Sterling, Canadian Dollars and certain other currencies to be agreed upon, in each case for either borrowings or for the issuance of letters of credit. The proceeds under the Revolving Credit Facility are available for working capital and general corporate purposes.

We have the option to establish additional term loan commitments and/or increase the size of the Revolving Credit Facility (collectively, the “Incremental Facilities”), subject to the satisfaction of certain conditions and obtaining sufficient lender commitments, in an amount up to the greater of $500 million and the amount that, after giving effect to the incurrence of such Incremental Facilities, would not result in a leverage ratio, as defined in the credit agreement governing our Credit Facilities (the “Credit Agreement”), exceeding 2.75:1.00.

Availability under Revolving Credit Facility

As of September 30, 2014, we had availability under the Revolving Credit Facility as follows (in millions):

	Total Available Under Credit Facility	Expiring	Direct Borrowings as of September 30, 2014	Outstanding Letters of Credit as of September 30, 2014	Availability as of September 30, 2014
Revolving Credit Facility	$ 1,000	2019	$180	$163	$657

During the nine months ended September 30, 2014, borrowing under the Revolving Credit Facility increased by $70 million.

Repayment Terms

As of September 30, 2014, the Term Loan has mandatory amortization payments of $2 million in each of the years 2015 to 2018 and $190 million in 2019. The Credit Facilities are pre-payable at our option at any time.

Under certain circumstances, the Credit Facilities obligate us to apply 25% of our excess cash flow (as defined in the Credit Agreement) for each fiscal year commencing in 2013, as well as net cash proceeds from specified other sources, such as asset sales or insurance proceeds, to prepay the Term Loan, provided that this excess cash flow percentage shall be reduced to 0% in the event the Leverage Ratio (as defined below under Credit Agreement Covenants) is at or below 3.00:1.00.

Interest and Fees

Borrowings under the Credit Facilities bear interest, at our option, at either a base rate or a Eurodollar rate plus an applicable margin determined by a pricing grid, in the case of the Revolving Credit Facility, which is based on

Covanta Energy’s leverage ratio. Base rate is defined as the higher of (i) the Federal Funds Effective Rate plus 0.50%, (ii) the rate the administrative agent announces from time to time as its per annum “prime rate” or (iii) the one-month LIBOR rate plus 1.00%. Eurodollar rate borrowings bear interest at the London Interbank Offered Rate, commonly referred to as “LIBOR”, or a comparable or successor rate, for the interest period selected by us. Base rate borrowings under the Revolving Credit Facility shall bear interest at the base rate plus an applicable margin ranging from 1.25% to 1.75%. Eurodollar borrowings under the Revolving Credit Facility shall bear interest at LIBOR plus an applicable margin ranging from 2.00% to 2.75%. Fees for issuances of letters of credit include fronting fees equal to 0.125% per annum and a participation fee for the lenders equal to the applicable interest margin for LIBOR rate borrowings. We will incur an unused commitment fee ranging from 0.375% to 0.50% on the unused amount of commitments under the Revolving Credit Facility. Effective March 21, 2014 the Term Loan bears interest, at our option, at either (i) the base rate plus an applicable margin of 1.50% , or (ii) LIBOR plus an applicable margin of to 2.50%, subject to a LIBOR floor of 0.75%.

Guarantees and Security

The Credit Facilities are guaranteed by us and by certain of our subsidiaries. The subsidiaries that are party to the Credit Facilities agreed to secure all of the obligations under the Credit Facilities by granting, for the benefit of secured parties, a first priority lien on substantially all of their assets, to the extent permitted by existing contractual obligations; a pledge of substantially all of the capital stock of each of our domestic subsidiaries and 65% of substantially all the capital stock of each of our foreign subsidiaries which are directly owned, in each case to the extent not otherwise pledged.

Credit Agreement Covenants

The loan documentation governing the Credit Facilities contains various affirmative and negative covenants, as well as financial maintenance covenants, that limit our ability to engage in certain types of transactions. We were in compliance with all of the affirmative and negative covenants under the Credit Facilities as of September 30, 2014.

The negative covenants of the Credit Facilities limit our and our restricted subsidiaries' ability to, among other things:

- incur additional indebtedness (including guarantee obligations);
- create certain liens against or security interests over certain property;
- pay dividends on, redeem, or repurchase our capital stock or make other restricted junior payments;
- enter into agreements that restrict the ability of our subsidiaries to make distributions or other payments to us;
- make investments;
- consolidate, merge or transfer all or substantially all of our assets and the assets of our subsidiaries on a consolidated basis;
- dispose of certain assets; and
- make certain acquisitions.

The financial maintenance covenants of the Credit Facilities, which are measured on a trailing four quarter period basis, include the following:

- a maximum Leverage Ratio of 4.00 to 1.00 for the trailing four quarter period, which measures the principal amount of Covanta Energy's consolidated debt less certain restricted funds dedicated to repayment of project debt principal and construction costs ("Consolidated Adjusted Debt") to its adjusted earnings before interest, taxes, depreciation and amortization, as calculated in the Credit Agreement ("Adjusted EBITDA"). The definition of Adjusted EBITDA in the Credit Facilities excludes certain non-recurring and non-cash charges.
- a minimum Interest Coverage Ratio of 3.00 to 1.00, which measures Covanta Energy's Adjusted EBITDA to its consolidated interest expense plus certain interest expense of ours, to the extent paid by Covanta Energy, as calculated in the Credit Agreement.

7.25% Senior Notes due 2020 (the "7.25% Notes")

For specific criteria related to redemption features of the 7.25% Notes, refer to Note 11. Consolidated Debt of the Notes to Consolidated Financial Statements in our Form 10-K.

6.375% Senior Notes due 2022 (the "6.375% Notes")

For specific criteria related to redemption features of the 6.375% Notes, refer to Note 11. Consolidated Debt of the Notes to Consolidated Financial Statements in our Form 10-K.

5.875% Senior Notes due 2024 (the "5.875% Notes")

In March 2014, we sold $400 million aggregate principal amount of 5.875% Senior Notes due March 2024. Interest on the 5.875% Notes is payable semi-annually on March 1 and September 1 of each year, commencing on September 1, 2014, and the 5.875% Notes will mature on March 1, 2024 unless earlier redeemed or repurchased. Net proceeds from the sale of the 5.875% Notes were approximately $393 million, consisting of gross proceeds of $400 million net of approximately $7 million in offering expenses. We used the net proceeds of the 5.875% Notes offering for the repayment of the 3.25% Cash Convertible Notes at maturity on June 1, 2014.

The 5.875% Notes are senior unsecured obligations, ranking equally in right of payment with any of the current and future senior unsecured indebtedness of Covanta Holding Corporation. The 5.875% Notes are effectively junior to our

existing and future secured indebtedness, including any guarantee of indebtedness under the Credit Facilities. The 5.875% Notes are not guaranteed by any of our subsidiaries and are effectively subordinated to all existing and future indebtedness and other liabilities of our subsidiaries.

The 5.875% Notes are subject to redemption at our option, at any time on or after March 1, 2019, in whole or in part, at the redemption prices set forth in the prospectus supplement, plus accrued and unpaid interest. At any time prior to March 1, 2017, we may redeem up to 35% of the original principal amount of the 5.875% Notes with the proceeds of certain equity offerings at a redemption price of 105.875% of the principal amount of the 5.875% Notes plus accrued and unpaid interest. At any time prior to March 1, 2019, we may also redeem the 5.875% Notes, in whole but not in part, at a price equal to 100% of the principal amount of the 5.875% Notes, plus accrued and unpaid interest and a "make-whole premium." The occurrence of specific kinds of changes in control will be a triggering event requiring us to offer to purchase from the holders all or a portion of the 5.875% Notes at a price equal to 101% of the principal amount, plus accrued and unpaid interest. In addition, certain asset dispositions will be triggering events that may require us to use the proceeds from those asset dispositions to make an offer to purchase the 5.875% Notes at 100% of the principal amount, plus accrued and unpaid interest, if any, to the date of purchase if such proceeds are not otherwise used within 365 days to repay indebtedness or to invest or commit to invest such proceeds in additional assets related to our business or capital stock of a restricted subsidiary.

3.25% Cash Convertible Senior Notes due 2014 (the "3.25% Notes")

On June 1, 2014, we repaid the $460 million of 3.25% Cash Convertible Senior Notes utilizing net proceeds from the March 2014 5.875% Notes issuance.

During the period from March 1, 2014 to May 30, 2014, and under certain additional limited circumstances, the 3.25% Notes were cash convertible by holders thereof (the "Cash Conversion Option"). The conversion rate was 64.6669 shares of our common stock (which represented a conversion price of approximately $15.46 per share) for the period from March 17, 2014 through March 21, 2014, and65.3501 shares of our common stock (which represented a conversion price of approximately $15.30 per share), as adjusted for the dividend paid on April 2, 2014, for the period from March 24, 2014 to May 30, 2014. We did not deliver common stock (or any other securities) upon conversion. Upon maturity, we were required to pay $83 million to satisfy the obligation under the Cash Conversion Option in addition to the principal amount of the 3.25% Notes.

In connection with the issuance of 3.25% Notes offering, we entered into privately negotiated cash convertible note hedge transactions (the "Note Hedge") with affiliates of certain of the initial purchasers of the 3.25% Notes (the "Option Counterparties") which we cash-settled for $83 million upon maturity of the 3.25% Notes and effectively offset our liability under the Cash Conversion Option. The income recognized as a result of changes in the credit valuation adjustment related to the note hedge was not material.

In connection with the issuance of the 3.25% Notes, we also sold warrants, correlating to the number of shares underlying the 3.25% Notes, which currently have a strike price of approximately $20.80 and settle on a net share basis. The warrants are exercisable only at expiration in equal tranches over a 60 day period which began on September 2, 2014 and ends on November 26, 2014. During the three months ended September 30, 2014, 156,732 shares of our common stock were issuable in connection with warrant exercises. For additional information, see Note 5. Earnings per Share and Equity above and Item 3. Quantitative and Qualitative Disclosures About Market Risk in this Quarterly report on Form 10-Q and Item 7A. Quantitative and Qualitative Disclosures About Market Risk in our Form 10-K.

4.00% - 5.25% Tax-Exempt Bonds due from 2024 to 2042 ("Tax Exempt Bonds")

For specific criteria related to redemption features of the Tax Exempt Bonds, refer to Note 11. Consolidated Debt of the Notes to Consolidated Financial Statements in our Form 10-K.

Variable Rate Tax-Exempt Demand Bonds due 2043 ("Variable Rate Bonds")

The Variable Rate Bonds bear interest either on a daily or weekly interest rate as determined by the remarketing agent on the basis of examination of bonds comparable to the Variable Rate Bonds known by the remarketing agent to have been priced or traded under then prevailing market conditions. As of September 30, 2014, the weekly interest rate was 0.07%.

On July 1, 2014, we issued an additional $12 million of tax-exempt corporate variable-rate demand bonds, which are secured by a letter of credit issued under our Revolving Credit Facility and will mature on July 1, 2043. Proceeds from the offering were utilized to refinance $12 million of project debt at our Delaware Valley facility due on July 1, 2014. The terms of these bonds are identical to the variable rate bonds issued in July 2013. Interest on the bonds is paid monthly on the first business day of each month beginning on August 1, 2014. Financing costs were not material.
For specific criteria related to redemption features of the Variable Rate Bonds, refer to Note 11. Consolidated Debt of the Notes to Consolidated Financial Statements in our Form 10-K.

Table of Contents

Equipment Financing Capital Leases

In 2014, we entered into equipment financing capital lease arrangements to finance the purchase of barges, railcars, containers and intermodal equipment related to our New York City contract. During the three months ended September 30, 2014, we borrowed $47 million under the equipment financing capital lease arrangements. The lease terms range from 10 years to 12 years and the fixed interest rates range from 3.63% to 4.52%, with payments commencing on October 1, 2014. As of September 30, 2014, the outstanding borrowings under the equipment financing capital leases have mandatory amortization payments remaining as follows (in millions):

	2014	2015	2016	2017	2018	Thereafter
Annual Remaining Amortization	$1	$2	$2	$3	$3	$36

Dublin Project Financing

In September 2014, we executed agreements for project financing totaling €375 million to fund a majority of the construction costs of the Dublin Waste-to-Energy Facility. The project financing package includes: (i) €300 million of project debt to be borrowed under a credit facility agreement with various lenders (the “Dublin Credit Agreement”), which consists of a €250 million senior secured term loan (the “Dublin Senior Term Loan”) and a€50 million second lien term loan (the “Dublin Junior Term Loan”), and (ii) a €75 million convertible preferred investment (the “Dublin Convertible Preferred”), which has been committed by a leading global energy infrastructure investor. For additional information related to this project, see Note 3. Business Development and Organic Growth.

Dublin Senior Term Loan due 2021

The €250 million Dublin Senior Term Loan is expected to be drawn in 2016 and 2017 to fund remaining construction costs after our equity investment into the project (estimated at approximately €125 million), the Dublin Convertible Preferred, and the Dublin Junior Term Loan have been fully utilized. Key commercial terms of the Dublin Senior Term Loan include:

- Final maturity on September 30, 2021 (approximately four years after the anticipated operational commencement date of the facility).
- Scheduled repayments will be made semi-annually according to a 15-year amortization profile, beginning in 2018. The loan is pre-payable at our option following operational commencement.
- Borrowings will bear interest at the Euro Interbank Offered Rate ("EURIBOR") plus an applicable margin, which will range from 4.00% to 4.50% according to a pre-determined schedule. Interest on outstanding borrowings will be payable in cash monthly prior to the operational commencement date of the facility, and payable in cash semi-annually after the operational commencement date, based on the prevailing one and six month EURIBOR rates, respectively. Undrawn commitments will accrue commitments fees at a rate of 2.25% per annum. We entered into interest rate swap agreements in order to hedge our exposure to adverse variable interest rate fluctuations under the Dublin Senior Term Loan. For additional information, see Note 12. Derivative Instruments.
- The Dublin Senior Term Loan is a senior obligation of the project company and certain other related subsidiaries, all of which are wholly-owned by us, and is secured by a first priority lien on substantially all of the wholly-owned subsidiary assets. The Dublin Senior Term Loan is non-recourse to Covanta Energy or Covanta Holding Corp. See Note 13. Commitments and Contingencies for a description of the commitments of Covanta Energy related to the Dublin project financing.
- The Dublin Credit Agreement contains positive, negative and financial maintenance covenants that are customary for a project financing of this type. Our ability to service the Dublin Junior Term Loan and the Dublin Convertible Preferred and to make cash distributions to common equity following the operational commencement date is subject to ongoing compliance with these covenants, including maintaining a minimum debt service coverage ratio and loan life coverage ratio on the Dublin Senior Term Loan.

Dublin Junior Term Loan due 2022

The €50 million Dublin Junior Term Loan was funded into an escrow account in September 2014, with proceeds expected to be drawn from the account to fund construction costs in 2015 and 2016 after our equity investment into the project and the Dublin Convertible Preferred have been fully utilized. As of September 30, 2014, $63 million (€50 million) is included in both project debt and noncurrent restricted funds held in trust on our condensed consolidated balance sheet. Key commercial terms of the Dublin Junior Term Loan include:

- Final maturity on March 31, 2022 (six months after the maturity of the Dublin Senior Term Loan).
- Scheduled repayments will be made semi-annually according to a 15-year amortization profile, beginning in 2018. The loan is pre-payable at our option following operational commencement.

Table of Contents

- Borrowings will bear interest at a fixed rate of 5.23% during the first six months of the loan, and thereafter at fixed rates from 9.23% to 9.73% according to a pre-determined schedule. Interest on outstanding borrowings will be payable 50% in cash and 50% accrued to the balance of the loan monthly prior to the operational commencement date of the facility, and payable 100% in cash semi-annually after the operational commencement date.
- The Dublin Junior Term Loan is a junior obligation of the project company and certain other related subsidiaries, all of which are wholly-owned by us, and is secured by a second priority lien on substantially all of the wholly-owned subsidiary assets and a first priority lien on the assets of the top tier project holding company. The Dublin Junior Term Loan is non-recourse to Covanta Energy or Covanta Holding Corp.
- Under the Dublin Credit Agreement, our ability to service the Dublin Convertible Preferred and to make cash distributions to common equity is subject to ongoing compliance with the covenants under the agreement, including maintaining a minimum debt service coverage ratio and loan life coverage ratio on the Dublin Junior Term Loan.

Dublin Convertible Preferred

The €75 million Dublin Convertible Preferred is expected to be drawn to fund construction costs in 2015 after our equity investment into the project has been fully utilized. The instrument will have: (i) liquidation preference equal to par value of the investment, (ii) a preferred claim on project cash flows during operations (after debt service) to pay a fixed dividend rate and repay principal according to an amortization schedule, and (iii) an option to convert loan principal into a common equity interest in the project.

The Dublin Convertible Preferred is structured as a shareholder loan (the "Stakeholder Loan") with the concurrent issuance of warrants (the "Stakeholder Warrants"). Key commercial terms of the Dublin Convertible Preferred include:

- The Stakeholder Loan will accrue dividends at a fixed rate of 13.50% per annum. The dividends are payable 50% in cash and 50% accrued to the principal balance on a monthly basis prior to the operational commencement date, and payable 100% in cash semi-annually thereafter, subject to available project cash flows after debt service.
- Scheduled repayments of principal of the Stakeholder Loan will be made semi-annually according to a 13-year amortization profile beginning in 2020 (two years after the operational commencement date), with a final repayment date of September 30, 2032, all subject to available project cash flows after debt service.
- Voluntary prepayments are not permitted during the first five years of the Stakeholder Loan, after which the principal is pre-payable at our option in increments of 33% of the aggregate outstanding principal balance per year.
- The Stakeholder Loan is mandatorily pre-payable at the option of the Stakeholder Loan holder(s) under certain circumstances in the event of a refinancing of the Dublin Senior Term Loan and/or the Dublin Junior Term Loan.
- The Stakeholder Warrants are exercisable into ordinary shares of our subsidiary holding company that owns 100% of the project company on five conversion dates, scheduled at six month intervals, beginning on the operational commencement date, or upon a refinancing of the Dublin Credit Agreement. The warrants contain customary anti-dilution protection and are exercisable on a cashless basis at a specified conversion price on each conversion date, representing a set premium to the original subscription price for common shares (i.e., Covanta's subscription price) that increases over time. The number of shares that can potentially be issued upon exercise is limited to a maximum of 24.99% of the outstanding shares.
- The Dublin Convertible Preferred holder(s) is entitled to nominate two out of five voting board members of the project subsidiary holding company. The right to nominate board members will be reduced with future reductions in the outstanding principal amount of the Stakeholder Loan and/or number of common shares held following conversion of the Stakeholder Warrants.

Financing Costs and Capitalized Interest

Financing costs related to the Dublin project financing totaled approximately $24 million. Interest expense paid on the Dublin project financing and costs amortized to interest expense will be capitalized during the construction phase of the project.

Loss on Extinguishment of Debt

During the nine months ended September 30, 2014 and 2013, we incurred approximately $2 million and $1 million, pre-tax, respectively, of loss on extinguishment of debt expense comprised of the write-off of unamortized discounts and deferred financing costs resulting from amendments to the Credit Facilities completed during the respective periods.

NOTE 8. INCOME TAXES

We record our interim tax provision based upon our estimated annual effective tax rate (“ETR”) and account for the tax effects of discrete events in the period in which they occur. We file a federal consolidated income tax return with our eligible subsidiaries. Our federal consolidated income tax return also includes the taxable results of certain grantor trusts described below.

We currently estimate that our ETR for the year ending December 31, 2014 will be approximately 89%. We review the annual effective tax rate on a quarterly basis as projections are revised and laws are enacted. The ETR was approximately 74% and 43% for the nine months ended September 30, 2014 and 2013, respectively. The increase in the effective tax rate primarily resulted from the impact of write-downs on net income.

During the second quarter of 2014, we increased goodwill and net non-current deferred income tax liabilities by $47 million to correct the purchase price allocation associated with the ARC Holdings acquisition in June 2005. This correction related to the deferred tax impact associated with partnership entities that were owned by ARC Holdings at the time of the acquisition and is immaterial to prior periods and for the nine months ended September 30, 2014. The correction of this error increased income tax expense by $4 million and decreased earnings per share by $0.03 per share for the nine months ended September 30, 2014.

Uncertain tax positions, exclusive of interest and penalties, were $132 million and $128 million as of September 30, 2014 and December 31, 2013, respectively. The increase in this liability primarily relates to accelerated deductions associated with the ARC Holdings purchase price allocation adjustments and interest. Included in the balance of unrecognized tax benefits as of September 30, 2014 are potential benefits of $132 million that, if recognized, would impact the effective tax rate. For both the three and nine months ended September 30, 2014 and 2013, we recognized a net tax expense of $5 million and a net tax benefit of $2 million for uncertain tax positions, including interest and penalties. We have accrued interest and penalties associated with liabilities for uncertain tax positions of $2 million and $1 million at September 30, 2014 and December 31, 2013, respectively. We continue to reflect tax related interest and penalties as part of the tax provision.

In the ordinary course of our business, the Internal Revenue Service (“IRS”) and state tax authorities will periodically audit our federal and state tax returns. As issues are examined by the IRS and state auditors, we may decide to adjust the existing liability for uncertain tax positions for issues that were not previously deemed an exposure. Federal income tax returns for Covanta Energy are closed for the years through 2003. However, to the extent net operating loss carryforwards (“NOLs”) are utilized from earlier years, federal income tax returns for Covanta Holding Corporation, formerly known as Danielson Holding Corporation, are still open. The IRS is currently auditing our tax returns for the years 2004 through 2009, which includes years during the carryforward period including returns in which some of the losses giving rise to the NOLs that were reported. In connection with this audit, the IRS has proposed certain adjustments to our 2008 tax return. We do not believe such proposed adjustments are consistent with applicable rules, and we have challenged them through the IRS's administrative appeals procedures. If we are unsuccessful in challenging such adjustments, some portion or all of the NOLs would not be available to offset consolidated taxable income, and/or we could be required to pay federal income taxes (and potentially interest and penalties) for prior years. State income tax returns are generally subject to examination for a period of three to five years after the filing of the respective return. The state impact of any federal changes remains subject to examination by various states for a period of up to one year after formal notification to the states. We have various state income tax returns in the process of examination, administrative appeals or litigation.

Our NOLs predominantly arose from our predecessor insurance entities, formerly named Mission Insurance Group, Inc., (“Mission”). These Mission insurance entities have been in state insolvency proceedings in California and Missouri since the late 1980's. The amount of NOLs available to us will be reduced by any taxable income or increased by any taxable losses generated by current members of our consolidated tax group, which include grantor trusts associated with the Mission insurance entities.

While we cannot predict what amounts, if any, may be includable in taxable income as a result of the final administration of these grantor trusts, substantial actions toward such final administration have been taken and we believe that neither arrangements with the California Commissioner of Insurance nor the final administration by the Director of the Division of Insurance for the State of Missouri will result in a material reduction in available NOLs. We had consolidated federal NOLs estimated to be approximately $557 million for federal income tax purposes as of December 31, 2013, based on the income tax returns filed and projected to be filed. The federal NOLs will expire in various amounts from December 31, 2028 through December 31, 2033, if not used. In addition to the consolidated federal NOLs, as of December 31, 2013, we had state NOL carryforwards of approximately $466 million, which expire between 2014 and 2033, net foreign NOL carryforwards of approximately $30 million expiring between 2014 and 2032, federal tax credit carryforwards, including production tax credits of $53 million expiring between 2024 and 2033, and minimum tax credits of $7 million with no expiration. These deferred tax assets are offset by a valuation allowance of approximately $42 million. For further information, refer to Note 15. Income Taxes of the Notes to the Consolidated Financial Statements in our Form 10-K.

Table of Contents

NOTE 9. SUPPLEMENTARY INFORMATION

Operating Revenues

The components of waste and service revenues are as follows (in millions):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2014	2013	2014	2013
Waste and service revenue unrelated to project debt	$247	$246	$743	$713
Revenue earned explicitly to service project debt - principal	5	8	15	25
Revenue earned explicitly to service project debt - interest	—	1	2	4
Total waste and service revenue	$252	$255	$760	$742

Under some of our service agreements, we bill fees to municipalities to service project debt (principal and interest). The amounts billed are based on the actual principal amortization schedule for the project bonds. Regardless of the amounts billed to client communities relating to project debt principal, we recognize revenue earned explicitly to service project debt principal on a levelized basis over the term of the applicable agreement. In the beginning of the agreement, principal billed is less than the amount of levelized revenue recognized related to principal and we record an unbilled service receivable asset. At some point during the agreement, the amount we bill will exceed the levelized revenue and the unbilled service receivable begins to reduce, and ultimately becomes nil at the end of the contract. In the final year(s) of a contract, cash may be utilized from available debt service reserve accounts to pay remaining principal amounts due to project bondholders and such amounts are no longer billed to or paid by municipalities. Generally, therefore, in the last year of the applicable agreement, little or no cash is received from municipalities relating to project debt, while our levelized service revenue continues to be recognized until the expiration date of the term of the agreement.

Operating Costs

Renewable Energy Credits

Renewable Energy Credits (“RECs”) are environmental commodities that can be sold and traded in certain states, and represent the renewable energy attributes created when electricity is produced from an eligible renewable energy source. The RECs are recognized at fair value as a reduction to plant operating expense in the condensed consolidated statements of operations and as an intangible asset within other current assets in the consolidated balance sheets on the date the renewable energy is generated. The fair value amount recognized is reduced by a valuation allowance for those RECs which management believes will ultimately be sold at below market or depressed market prices. As the RECs are delivered, the intangible asset is relieved. Fair values for the RECs are based on prices established by executed contracts, pending contracts or management estimates of current market prices. The total RECs amount recognized as a reduction to plant operating expense in the condensed consolidated statements of operations was $7 million and $6 million for the three months ended September 30, 2014 and 2013, respectively, and $18 million and $11 million for the nine months ended September 30, 2014 and 2013, respectively.

Pass through costs

Pass through costs are costs for which we receive a direct contractually committed reimbursement from the municipal client which sponsors an energy-from-waste project. These costs generally include utility charges, insurance premiums, ash residue transportation and disposal and certain chemical costs. These costs are recorded net of municipal client reimbursements in our condensed consolidated financial statements. Total pass through costs were $12 million and $17 million for the three months ended September 30, 2014 and 2013, respectively, and $42 million and $52 million for the nine months ended September 30, 2014 and 2013, respectively.

Table of Contents

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) – (Continued)

Other operating expenses

The components of other operating expenses are as follows (in millions):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2014	2013	2014	2013
Construction costs	$18	$32	$63	$86
Insurance subsidiary operating expenses	1	—	3	3
Defined benefit pension plan settlement gain [1]	—	—	—	(6)
Insurance recoveries	(1)	(4)	(1)	(4)
Other [2]	1	(1)	1	(10)
Total other operating expenses	$19	$27	$66	$69

(1) During the first quarter of 2013, we recorded a gain related to the final settlement of our defined benefit pension plan. For additional information, refer to Note 16. Employee Benefit Plans of the Notes to Consolidated Financial Statements in our Form 10-K.

(2) During the three and nine months ended September 30, 2013, we recognized a gain of $3 million related to a contract amendment. During the nine months ended September 30, 2013, we recognized operating income of $8 million related to early termination of a power purchase agreement.

Amortization of waste, service and energy contracts

Our waste, service, energy and other contract intangibles are intangible assets and liabilities relating to long-term operating contracts at acquired facilities and are recorded upon acquisition at their estimated fair market values based upon discounted cash flows. Intangible assets and liabilities are amortized using the straight line method over their remaining useful lives.

The following table details the amount of the actual/estimated amortization expense and contra-expense associated with these intangible assets and liabilities as of September 30, 2014 included or expected to be included in our condensed consolidated statements of operations for each of the years indicated (in millions):

	Waste, Service and Energy Contract Intangibles (Amortization Expense)	Waste, Service and Other Contract Intangibles (Contra-Expense)
Nine Months Ended September 30, 2014	$ 22	$(8)
Remainder of 2014	$ 7	$(3)
2015	25	(6)
2016	22	(6)
2017	15	(4)
2018	13	(2)
Thereafter	242	(1)
Total	$ 324	$(22)

During the nine months ended September 30, 2014, we recorded non-cash impairment write-offs totaling $16 million related to service contract intangibles that were recorded upon acquisition in 2009. See Net Write-offs discussion below for additional information.

Table of Contents

COVANTA HOLDING CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) – (Continued)

Net write-offs

The components of net write-offs are as follows (in millions):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2014	2013	2014	2013
North America segment:				
Write-off of intangible asset - Hudson Valley EfW facility (1)	$—	$—	$9	$—
Write-off of intangible asset - Abington Transfer Station (2)	—	—	7	—
Write-down of insurance business (3)	14	—	14	—
Write-down of California biomass facilities (4)	34	—	34	—
Write-down of Wallingford EfW facility assets (5)	—	9	—	9
Write-down of equity investment in biomass facility (6)	—	3	—	3
Write-off of loan issued for the Harrisburg EfW facility (7)	—	—	—	4
Total net write-offs	$48	$12	$64	$16

(1) See Hudson Valley Energy-from-Waste Facility discussion below.

(2) See Abington Transfer Station discussion below.

(3) During the third quarter of 2014, we entered into an agreement to sell our insurance subsidiary, subject to regulatory approval. We recorded a non-cash write-down of $14 million comprised of the write-down of the carrying amount in excess of the realizable fair value of $12 million, plus $2 million in disposal costs.

(4) See California Biomass Facilities discussion below.

(5) During the three and nine months ended September 30, 2013 we recorded a non-cash write down of $9 million resulting from an impairment charge related to our Wallingford EfW facility assets in Connecticut. For additional details, refer to Note 14. Supplementary Information of the Notes to Consolidated Financial Statements in our Form 10-K.

(6) During the three and nine months ended September 30, 2013 we recorded a non-cash write down of $3 million related to our 55% equity investment in the Pacific Ultrapower Chinese Station biomass facility in California. For additional details, refer to Note 14. Supplementary Information of the Notes to Consolidated Financial Statements in our Form 10-K.

(7) During the nine months ended September 30, 2013, we recorded a non-cash write-off of $4 million associated with funds advanced for certain improvements related to the Harrisburg EfW facility. For additional details, refer to Note 14. Supplementary Information of the Notes to Consolidated Financial Statements in our Form 10-K.

Hudson Valley Energy-from-Waste Facility

On June 30, 2014, our service agreement with the Dutchess County Resource Recovery Agency under which we operated the Hudson Valley EfW facility expired. We were notified in April 2014 that we will not receive an extension of this contract, therefore, during the three months ended March 31, 2014, we recorded a $9 million non-cash impairment write-off of the intangible asset that was recorded upon acquisition in 2009 based on the expected cash flows over the remaining life of the contract.

Abington Transfer Station

On April 3, 2014, the Montgomery County (PA) Commissioners (the “County”) unanimously voted to dissolve the Waste System Authority of Eastern Montgomery County (the “WSA”). The Abington transfer station was constructed by the County and subsequently deeded to the WSA, which was responsible for its operation. We expect to operate the transfer station through the end of the current contract, which expires on December 31, 2014. However, due to the

dissolution of the WSA, it is not able to renew our current contract to operate the Abington transfer station. During the three months ended June 30, 2014, we recorded a non-cash impairment write-off of $7 million of the service contract intangible that was recorded upon acquisition in 2009 based on the expected cash flows over the remaining life of the contract.

California Biomass Facilities

During the three months ended September 30, 2014, we identified indicators of impairment associated with our California Biomass facilities, primarily that we have been unsuccessful to date to secure new long-term power purchase agreements to replace the current power purchase agreements which are approaching the end of their terms. Based on expected cash flows, we have recorded a non-cash write-down of $34 million to reduce the carrying value of the California Biomass assets to their estimated fair value.

	—	(6)	Total before tax
	—	2	Tax benefit
	$—	$(4)	Net of tax

NOTE 10. STOCK-BASED COMPENSATION

In May 2014, the stockholders of the Company approved the Covanta Holding Corporation 2014 Equity Award Plan. For additional information, see Note 5. Earnings Per Share and Equity.

During the nine months ended September 30, 2014, we awarded certain employees grants of 664,844 shares of restricted stock and 39,592 restricted stock units ("RSUs"). The restricted stock awards will be expensed over the requisite service period, subject to an assumed 12% average forfeiture rate. The terms of the restricted stock awards include vesting provisions based solely on continued service. If the service criteria are satisfied, the restricted stock awards generally vest during March of 2015, 2016, and 2017.

During the nine months ended September 30, 2014, we awarded an additional 207,233 RSUs that will vest based upon the total stockholder return ("TSR") performance of our common stock over a three year period relative to companies included in published indices for the waste and disposal industry, the conventional electricity utilities industry and other similarly sized "mid-cap" companies (the "TSR Equity Awards"). We recognize compensation expense for the TSR Equity Awards based on the grant date fair value of the award which was determined using a Monte Carlo model.

On May 8, 2014, we awarded 55,373 shares of restricted stock for annual director compensation. We determined the service vesting condition of these restricted stock awards to be non-substantive and, in accordance with accounting principles for stock compensation, recorded the entire fair value of the award as compensation expense on the grant date.

On July 8, 2014, we awarded 25,000 stock options to a director as compensation for responsibilities as Vice Chairman of the Board. We determined the service vesting condition of these stock options to be non-substantive and, in accordance with accounting principles for stock compensation, recorded the entire fair value of the award as compensation expense on the grant date. The options cannot be exercised before January 8, 2015.

Compensation expense related to our stock-based awards totaled $7 million and $3 million for the three months ended September 30, 2014 and 2013, respectively, and $15 million and $12 million for the nine months ended September 30, 2014 and 2013, respectively. The increase in stock-based award compensation is primarily due to the change in status of previously issued RSUs related to development projects that have now commenced. Vesting of the RSUs will not occur until one year following the commencement of commercial operations for development projects.

Unrecognized stock-based compensation expense and weighted-average years to be recognized are as follows (in millions, except for weighted average years):

	As of September 30, 2014	
	Unrecognized stock-based compensation	Weighted-average years to be recognized
Restricted Stock Awards	$ 9	1.5
Restricted Stock Units	$ 4	2.5

27

NOTE 11. FINANCIAL INSTRUMENTS

Fair Value Measurements

Authoritative guidance associated with fair value measurements provides a framework for measuring fair value and establishes a fair value hierarchy that prioritizes the inputs used to measure fair value, giving the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 inputs), then significant other observable inputs (Level 2 inputs) and the lowest priority to significant unobservable inputs (Level 3 inputs).The following methods and assumptions were used to estimate the fair value of each class of financial instruments:

- For cash and cash equivalents, restricted funds, and marketable securities, the carrying value of these amounts is a reasonable estimate of their fair value. The fair value of restricted funds held in trust is based on quoted market prices of the investments held by the trustee.
- Fair values for long-term debt and project debt are determined using quoted market prices.
- The fair value of the note hedge and the cash conversion option were determined using an option pricing model based on observable inputs such as implied volatility, risk free interest rate, and other factors. The fair value of the note hedge was adjusted to reflect counterparty risk of non-performance, and is based on the counterparty's credit spread in the credit derivatives market.
- The contingent interest features were valued quarterly using the present value of expected cash flow models incorporating the probabilities of the contingent events occurring.
- The fair value for interest rate swaps were determined by obtaining quotes from two counterparties (one is a holder of the long position and the other is in the short) and extrapolating those across the long and short notional amounts.
- The estimated fair value amounts have been determined using available market information and appropriate valuation methodologies. However, considerable judgment is necessarily required in interpreting market data to develop estimates of fair value. Accordingly, the estimates presented herein are not necessarily indicative of the amounts that we would realize in a current market exchange. The fair-value estimates presented herein are based on pertinent information available to us as of September 30, 2014. Such amounts have not been comprehensively revalued for purposes of these financial statements since September 30, 2014, and current estimates of fair value may differ significantly from the amounts presented herein.

The following table presents information about the fair value measurement of our assets and liabilities as of September 30, 2014 and December 31, 2013:

Financial Instruments Recorded at Fair Value on a Recurring Basis:	Fair Value Measurement Level	As of September 30, 2014	As of December 31, 2013
		(In millions)	
Assets:			
Cash and cash equivalents:			
Bank deposits and certificates of deposit	1	$84	$194
Money market funds	1	3	1
Total cash and cash equivalents:		87	195
Restricted funds held in trust:			
Bank deposits and certificates of deposit	1	86	4
Money market funds	1	47	52
U.S. Treasury/Agency obligations [1]	1	—	2
State and municipal obligations	1	92	97
Commercial paper/Guaranteed investment contracts/Repurchase agreements	1	4	12
Total restricted funds held in trust:		229	167
Restricted funds — other:			
Bank deposits and certificates of deposit [2][3]	1	1	1
Investments:			
Mutual and bond funds [2][3]	1	13	13
Derivative Asset — Note Hedge	2	—	78
Total assets:		$330	$454
Liabilities:			
Derivative Liability — Cash Conversion Option	2	$—	$78
Derivative Liabilities — Contingent interest features of the 3.25% Notes and Debentures	2	—	0
Derivative Liability — Energy Hedges	2	16	8
Derivative Liability — Interest rate swaps	2	7	—
Liability — Contingent consideration related to acquisition	3	2	—
Total liabilities:		$25	$86

The following financial instruments are recorded at their carrying amount (in millions):

Financial Instruments Recorded at Carrying Amount:	As of September 30, 2014 Carrying Amount	As of September 30, 2014 Estimated Fair Value	As of December 31, 2013 Carrying Amount	As of December 31, 2013 Estimated Fair Value
Assets:				
Accounts receivable [4]	$305	$305	$288	$288
Liabilities:				
Long-term debt	$1,993	$2,045	$2,085	$2,092
Project debt	$265	$281	$236	$248

(1)

The U.S. Treasury/Agency obligations in restricted funds held in trust are primarily comprised of Federal Home Loan Mortgage Corporation securities at fair value.

(2) Included in other noncurrent assets in the condensed consolidated balance sheets.

(3) Included in prepaid expenses and other current assets in the condensed consolidated balance sheets.

(4) Includes $23 million and $24 million of noncurrent receivables in other noncurrent assets in the condensed consolidated balance sheets as September 30, 2014 and December 31, 2013, respectively.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED) – (Continued)

NOTE 12. DERIVATIVE INSTRUMENTS

The following disclosures summarize the fair value of derivative instruments not designated as hedging instruments in the condensed consolidated balance sheets and the effect of changes in fair value related to those derivative instruments not designated as hedging instruments on the condensed consolidated statements of operations (in millions):

Derivative Instruments Not Designated As Hedging Instruments	Balance Sheet Location	Fair Value as of September 30, 2014	December 31, 2013
Asset Derivatives:			
Note Hedge	Note Hedge	$—	$78
Liability Derivatives:			
Cash Conversion Option	Current portion of long-term debt	$—	$78
Contingent interest features of the Debentures and 3.25% Notes		$—	$0

Effect on Income of Derivative Instruments Not Designated As Hedging Instruments	Location of Gain or (Loss) Recognized in Income on Derivatives	Amount of Gain or (Loss) Recognized In Income on Derivatives: For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
		2014	2013	2014	2013
Note Hedge	Non-cash convertible debt related expense	$—	$35	$5	$71
Cash Conversion Option	Non-cash convertible debt related expense	—	(35)	(5)	(71)
Contingent interest features of the 3.25% Notes and Debentures	Non-cash convertible debt related expense	—	—	—	—
Effect on income of derivative instruments not designated as hedging instruments		$—	$—	$—	$—

Cash Conversion Option, Note Hedge and Contingent Interest features related to the 3.25% Cash Convertible Senior Notes

The cash conversion option was a derivative instrument which was recorded at fair value quarterly with any change in fair value recognized in our condensed consolidated statements of operations as non-cash convertible debt related expense. The note hedge was accounted for as a derivative instrument and, as such, was recorded at fair value quarterly with any change in fair value recognized in our condensed consolidated statements of operations as non-cash convertible debt related expense.

The 3.25% Notes matured on June 1, 2014. Upon maturity, we were required to pay $83 million to satisfy the obligation under the cash conversion option in addition to the principal amount of the 3.25% Notes. The note hedge settled for $83 million and effectively offset our exposure to the cash payments in excess of the principal amount made under the cash conversion option. The income recognized as a result of changes in the credit valuation adjustment related to the note hedge was not material.

For specific details related to the cash conversion option, note hedge and contingent interest features of the 3.25% Notes, refer to Note 7. Consolidated Debt and Note 11 of the Notes to Consolidated Financial Statements in

our Form 10-K.

Energy Price Risk

Following the expiration of certain long-term energy sales contracts, we may have exposure to market risk, and therefore revenue fluctuations, in energy markets. We have entered into contractual arrangements that will mitigate our exposure to short-term volatility through a variety of hedging techniques, and will continue to do so in the future. Our efforts in this regard will involve only mitigation of price volatility for the energy we produce, and will not involve speculative energy trading. We have entered into agreements with various financial institutions to hedge approximately 1.4 million MWh, 1.2 million MWh and 0.5 million MWh of energy production from exposure to market risk for fiscal years 2014, 2015 and 2016, respectively. As of September 30, 2014, the fair value of the energy derivatives of $16 million, pre-tax, was recorded as a current liability and as a component of AOCI. As of September 30, 2014, the amount of hedge ineffectiveness was not material.

Interest Rate Swaps

In order to hedge the risk of adverse variable interest rate fluctuations associated with the Dublin Senior Term Loan, we have entered into floating to fixed rate swap agreements with various financial institutions terminating between 2016 and 2021, denominated in Euros, for the full €250 million loan amount. This interest rate swap is designated as a cash flow hedge which is recorded at fair value as a current liability with changes in fair value recorded as a component of Accumulated Other Comprehensive Income ("AOCI"). As of September 30, 2014, the fair value of the interest rate swap derivative of $7 million, pre-tax, was recorded as a current liability.

NOTE 13. COMMITMENTS AND CONTINGENCIES

We and/or our subsidiaries are party to a number of claims, lawsuits and pending actions, most of which are routine and all of which are incidental to our business. We assess the likelihood of potential losses on an ongoing basis and when losses are considered probable and reasonably estimable, record as a loss an estimate of the outcome. If we can only estimate the range of a possible loss, an amount representing the low end of the range of possible outcomes is recorded. The final consequences of these proceedings are not presently determinable with certainty.

Environmental Matters

Our operations are subject to environmental regulatory laws and environmental remediation laws. Although our operations are occasionally subject to proceedings and orders pertaining to emissions into the environment and other environmental violations, which may result in fines, penalties, damages or other sanctions, we believe that we are in substantial compliance with existing environmental laws and regulations.

We may be identified, along with other entities, as being among parties potentially responsible for contribution to costs associated with the correction and remediation of environmental conditions at disposal sites subject to federal and/or analogous state laws. In certain instances, we may be exposed to joint and several liabilities for remedial action or damages. Our liability in connection with such environmental claims will depend on many factors, including our volumetric share of waste, the total cost of remediation, and the financial viability of other companies that also sent waste to a given site and, in the case of divested operations, the contractual arrangement with the purchaser of such operations.

The potential costs related to the matters described below and the possible impact on future operations are uncertain due in part to the complexity of governmental laws and regulations and their interpretations, the varying costs and effectiveness of cleanup technologies, the uncertain level of insurance or other types of recovery and the questionable level of our responsibility. Although the ultimate outcome and expense of any litigation, including environmental remediation, is uncertain, we believe that the following proceedings will not have a material adverse effect on our condensed consolidated financial position or results of operations.

Lower Passaic River Matter. In August 2004, the United States Environmental Protection Agency (“EPA”) notified Covanta Essex Company (“Essex”) that it was a potentially responsible party (“PRP”) for Superfund response actions in the Lower Passaic River Study Area, referred to as “LPRSA,” a 17 mile stretch of river in northern New Jersey. Essex is one of the PRPs undertaking a Remedial Investigation/Feasibility Study (“Study”) of the LPRSA under EPA oversight. Essex’s share of the Study costs to date are not material to its financial position and results of operations; however, the Study costs are exclusive of any LPRSA remedial costs or natural resource damages that may ultimately be assessed against PRPs. On April 11, 2014, EPA released for public comment a Focused Feasibility Study (“FFS”) proposing a capping/dredging plan for the lower 8 miles of the 17 mile LPRSA. EPA has indicated it expects the FFS public comment and response period to take approximately one year. The Essex facility started operating in 1990 and Essex does not believe there have been any releases to the LPRSA, but in any event believes any releases would have been de minimis considering the history of the LPRSA; however, it is not possible at this time to predict that outcome or to estimate the range of possible loss relating to Essex’s liability in the matter, including for LPRSA remedial costs and/or natural resource damages.

California Matter. In March 2012, we received a letter from the Department of Toxic Substances Control of the State of California (the "Department") notifying us that the Department and several District Attorneys' offices in the State of California are investigating the operation of our biomass facilities in California. The investigation is focused on issues relating to (i) the feedstock at our biomass facilities and the impact of that fuel on the quality and character of the ash residue generated at these facilities and (ii) our compliance with California's environmental laws at our biomass facilities. We believe that our biomass operations in California are in compliance with existing environmental laws and regulations in all material respects. We are cooperating with the Department's and District Attorney's investigation. We do not believe that the investigation or any matters arising therefrom will have a material adverse effect on our condensed consolidated financial position or results of operations.

North Carolina Transformer Site Matter. In December 2012, our subsidiary, Covanta Dade Power Corp. (“Dade”) received a letter from the EPA indicating Dade was named as a PRP, along with numerous other unidentified PRPs, relating to the cleanup of the Ward Transformer Superfund Site in Raleigh, North Carolina (“Ward Site”). Dade's alleged liability as a PRP stems from the 1994 servicing at the Ward Site of a transformer alleged to have contained PCB-contaminated oil. EPA is seeking reimbursement from PRPs for its oversight costs in connection with ongoing cleanup activities at the Ward Site. While our investigation in this matter is continuing, based on information obtained to date, we believe Dade's responsibility, if any, in connection with this matter to be de minimis; and subject to indemnity by Veolia Environmental Services North America, LLC, from which we acquired Dade in 2010; however, it is not possible at this time to estimate the range of possible loss relating to Dade's ultimate liability, if any, in this matter.

Other Matters

Other commitments as of September 30, 2014 were as follows (in millions):

	Commitments Expiring by Period		
	Total	Less Than One Year	More Than One Year
Letters of credit issued under the Revolving Credit Facility	$163	$15	$148
Letters of credit - other	86	—	86
Surety bonds	321	—	321
Total other commitments — net	$570	$15	$555

The letters of credit were issued to secure our performance under various contractual undertakings related to our domestic and international projects or to secure obligations under our insurance program. Each letter of credit relating to a project is required to be maintained in effect for the period specified in related project contracts, and generally may be drawn if it is not renewed prior to expiration of that period.

We believe that we will be able to fully perform under our contracts to which these existing letters of credit relate, and that it is unlikely that letters of credit would be drawn because of a default of our performance obligations. If any of these letters of credit were to be drawn by the beneficiary, the amount drawn would be immediately repayable by us to the issuing bank. If we do not immediately repay such amounts drawn under letters of credit issued under the Revolving Credit Facility, unreimbursed amounts would be treated under the Credit Facilities as either additional term loans or as revolving loans.

The surety bonds listed on the table above relate primarily to performance obligations ($305 million) and support for closure obligations of various energy projects when such projects cease operating ($16 million). Were these bonds to be drawn upon, we would have a contractual obligation to indemnify the surety company.

We have certain contingent obligations related to the 7.25% Notes, 6.375% Notes, 5.875% Notes, and Tax-Exempt Bonds. These arise as follows:

- holders may require us to repurchase their 7.25% Notes, 6.375% Notes, 5.875% Notes and Tax-Exempt Bonds if a fundamental change occurs; and
- holders may exercise their conversion rights upon the occurrence of certain events, which would require us to pay the conversion settlement amount in cash.

For specific criteria related to redemption features of the 5.875% Notes, see Note 7. Consolidated Debt. For specific criteria related to contingent interest, conversion or redemption features of the 7.25% Notes or 6.375% Notes, see Item 8. Financial Statements And Supplementary Data — Note 11. Consolidated Debt in our Form 10-K.

We have issued or are party to guarantees and related contractual support obligations undertaken pursuant to agreements to construct and operate waste and energy facilities. For some projects, such performance guarantees include obligations to repay certain financial obligations if the project revenues are insufficient to do so, or to obtain or guarantee financing for a project. With respect to our businesses, we have issued guarantees to municipal clients and other parties that our subsidiaries will perform in accordance with contractual terms, including, where required,

the payment of damages or other obligations. Additionally, damages payable under such guarantees for our energy-from-waste facilities could expose us to recourse liability on project debt. If we must perform under one or more of such guarantees, our liability for damages upon contract termination would be reduced by funds held in trust and proceeds from sales of the facilities securing the project debt and is presently not estimable. Depending upon the circumstances giving rise to such damages, the contractual terms of the applicable contracts, and the contract counterparty's choice of remedy at the time a claim against a guarantee is made, the amounts owed pursuant to one or more of such guarantees could be greater than our then-available sources of funds. To date, we have not incurred material liabilities under such guarantees.

Benefit Obligations - Defined Contribution Plans

Substantially all of our employees in the United States are eligible to participate in defined contribution plans we sponsor. Our costs related to defined contribution plans were $4 million for both the three months ended September 30, 2014 and 2013 and $12 million for both the nine months ended September 30, 2014 and 2013.

Dublin Waste-to-Energy Facility

In connection with the financing of the Dublin Waste-to-Energy facility, Covanta Energy has made commitments for funding and contingent support as follows: (1) equity contribution commitments to fund approximately €155 million of project and financing costs during construction (approximately €30 million of which was contributed prior to financial close); (2) under the Dublin Credit Agreement, lending commitments to fund working capital shortfalls in the project company during operations, under certain circumstances, up to €25 million; and (3) a commitment to provide support payments to the project company, under certain circumstances, in the event of shortfalls in waste revenue below minimum levels (set far below anticipated levels), up to €75 million in the aggregate.

Essex Energy-from-Waste Facility

We are implementing significant operational improvements at our Essex EfW facility, including a state-of-the-art particulate emissions control system, at a total estimated cost of $90 million. Construction on the system commenced in 2014 and is expected to be completed by 2016. As of September 30, 2014, we have approximately $78 million of capital expenditures remaining to be incurred related to these improvements. The facility's environmental performance is currently compliant with all environmental permits and will be further improved with the installation of this equipment.

New York City Waste Transport and Disposal Contract

In August 2013, New York City awarded us a contract to handle waste transport and disposal from two marine transfer stations located in Queens and Manhattan. We expect to invest approximately $140 million in new equipment and enhancements to existing facilities that support service under this contract. These investments commenced in 2013 and will be made over several years. These investments commenced in 2013 and will be made over several years. As of September 30, 2014, we have approximately $72 million of capital expenditures remaining to be incurred relating to this contract. For additional information, see Note 3. Business Development and Organic Growth.

Table of Contents

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The terms "we," "our," "ours," "us," "Covanta" and "Company" refer to Covanta Holding Corporation and its subsidiaries; the term "Covanta Energy" refers to our subsidiary Covanta Energy Corporation and its subsidiaries. The following discussion addresses our financial condition as of September 30, 2014 and our results of operations for the three and nine months ended September 30, 2014, compared with the same periods last year. It should be read in conjunction with our Audited Consolidated Financial Statements and Notes thereto for the year ended December 31, 2013 and Management's Discussion and Analysis of Financial Condition and Results of Operations included in our Form 10-K for the year ended December 31, 2013 ("Form 10-K"), to which the reader is directed for additional information.

The preparation of interim financial statements necessarily relies heavily on estimates. Due to the use of estimates and certain other factors, such as the seasonal nature of our waste and energy services business, as well as competitive and other market conditions, we do not believe that interim results of operations are indicative of full year results of operations. The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts and classification of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ materially from those estimates.

OVERVIEW

Covanta is one of the world's largest owners and operators of infrastructure for the conversion of waste to energy (known as "energy-from-waste" or "EfW"), and also owns and operates related waste transport and disposal and other renewable energy production businesses. Energy-from-waste serves two key markets as both a sustainable waste management solution that is environmentally superior to landfilling and as a source of clean energy that reduces overall greenhouse gas emissions. Energy-from-waste is also considered renewable under the laws of many states and under federal law. Our facilities are critical infrastructure assets that allow our customers, which are principally municipal entities, to provide an essential public service.

In addition to our core EfW business, we offer a variety of sustainable service offerings in response to customer demand, which are sometimes offered through joint ventures or with third parties. We can help clients adopt a holistic "Reduce, Reuse, Recycle, Recover" waste management strategy from end to end. We offer tailored recycling and recovery solutions, providing alternatives to landfills to enhance our customers' reputation and reduce their risk.

For a discussion of our facilities, the energy-from-waste process and the environmental benefits of energy-from-waste, see Item. 1. Business in our Form 10-K.

Our EfW facilities earn revenue from both the disposal of waste and the generation of electricity and/or steam, generally under contracts, as well as from the sale of metal recovered during the EfW process. We process approximately 20 million tons of solid waste annually, representing approximately 5% of the solid waste generation in the United States. We operate and/or have ownership positions in 45 EfW facilities which are primarily located in North America, and 11 additional energy generation facilities, including other renewable energy production facilities in North America (wood biomass and hydroelectric) and 18 transfer stations. In total, these assets produce approximately 10 million megawatt hours ("MWh") of baseload electricity annually. We also operate a waste management infrastructure that is complementary to our core EfW business. We own or hold equity interests in energy-from-waste facilities in China and Italy.

We also have investments in subsidiaries engaged in insurance operations in California, primarily in property and casualty insurance, whose remaining business was transitioned into run-off in 2012, and collectively account for less than 1% of our consolidated revenue. During the third quarter of 2014, we entered into an agreement to sell our insurance business, subject to regulatory approval.

Strategy

Our mission is to provide sustainable waste and energy solutions, which we intend to pursue through the following key strategies:

- Preserve and grow the value of our existing portfolio. We intend to maximize the long-term value of our existing portfolio of facilities by continuously improving safety, health and environmental performance, working to provide

superior customer service, continuing to operate at our historic production levels, maintaining our facilities in optimal condition, extending waste and service contracts and conducting our business more efficiently. We intend to achieve organic growth through expanding our customer base and service offerings, adding waste, service or energy contracts, seeking incremental revenue opportunities by investing in and enhancing the capabilities of our existing assets, and deploying new or improved technologies, systems, processes and controls targeted at increasing revenue or reducing costs.

- Expand through acquisitions and/or development in selected attractive markets. We seek to grow our portfolio primarily through acquisitions and the development of new facilities or businesses where we believe that market and regulatory conditions will enable us to utilize our skills and invest our capital at attractive risk-adjusted rates of return. We are currently focusing on opportunities in the United States, Canada, Ireland, and China.

We believe that our approach to these opportunities is highly-disciplined, both with regard to our required rates of return and the manner in which potential acquired businesses or new projects will be structured and financed.

Table of Contents

- Develop and commercialize new technology. We believe that our efforts to protect and expand our business will be enhanced by the development of additional technologies in such fields as recycling, alternative waste treatment processes, gasification, combustion controls, emission controls and residue recovery, reuse or disposal. We have advanced our research and development efforts in some of these areas relevant to our EfW business, and have patents and patents pending for major advances in controlling nitrogen oxide (“NOx”) emissions.
- Advocate for public policy favorable to EfW and other sustainable waste solutions. We seek to educate policymakers and regulators about the environmental and economic benefits of energy-from-waste and advocate for policies and regulations that appropriately reflect these benefits. Our business is highly regulated, and as such we believe that it is critically important for us, as an industry leader, to play an active role in the debates surrounding potential policy developments that could impact our business.
- Allocate capital efficiently for long-term shareholder value. We plan to allocate capital to maximize shareholder value by: investing in our existing businesses to maintain and enhance assets; investing in strategic acquisitions or development projects, when available; and by returning capital to our shareholders.
- Maintain a focus on sustainability. Our corporate culture is focused on themes of sustainability in all of its forms in support of our mission. We seek to achieve continuous improvement in environmental performance, beyond mere compliance with legally required standards.

EXECUTION ON STRATEGY

Consistent with our strategy, we have executed on the following during the first nine months of 2014:

Capital Access and Allocation

During the first nine months of 2014, we:

- increased our quarterly cash dividend by 39% to $1.00 per share on an annualized basis beginning in the third quarter of 2014;
- executed agreements for project financing in September 2014 totaling €375 million to fund a majority of the construction costs of the Dublin Waste-to-Energy Facility (see discussion below under Asset Management);
- borrowed $47 million under an equipment financing capital lease arrangement in August 2014 to purchase barges, rail cars, containers and intermodal equipment related to our contract with New York City;
- issued $400 million of 5.875% senior notes due March 2024 to fund the repayment of $460 million of 3.25% Cash Convertible Notes which matured on June 1, 2014; and
- amended our Credit Facilities to:

extend the termination date of our Revolving Credit Facility by two years from March 28, 2017 to March 21, 2019;
increase the aggregate amount of the Revolving Credit Facility by $100 million to $1.0 billion; and
lower the pricing on our Term Loan due 2019 by 0.25% from the prior rate.

Asset Management, Development and Acquisitions

Fairfax Energy-from-Waste Facility

In April 2014, we entered into a waste disposal agreement with our client at the Fairfax EfW facility, extending our relationship under a tip fee arrangement effective at the end of the current service agreement in February 2016. The initial term of the new agreement will end in 2021, with two additional five year renewal periods upon mutual agreement of the parties. Beginning in 2016, the client will provide approximately 60% of the facility's waste capacity under the new agreement.

York Energy-from-waste facility

In May 2014, we extended the service agreement for the York EfW facility from 2015 to 2020 on substantially the same terms as the existing agreement.

Niagara Energy-from-Waste facility

At our Niagara EfW facility, we installed a new natural gas package boiler to augment the steam generation from our EfW boilers, as well as a steam line connection to new customers. The improvements, which began in 2012, were essentially completed by the second quarter of 2014 and the boiler became fully operational during the third quarter of 2014. Capital expenditures related to these improvements were approximately $4 million for the nine months ended September 30, 2014 and $13 million for the twelve months ended December 31, 2013.

35

Table of Contents

Indianapolis Energy-from-Waste Facility and Advanced Recycling Center

In August 2014, we extended our existing waste disposal agreement with the City of Indianapolis from 2018 to 2028, under which it will continue to supply approximately 35% of the facility's waste capacity. The agreement also contemplates the construction and operation of an Advanced Recycling Center ("ARC") adjacent to our Indianapolis EfW facility, which will recover recyclables from mixed municipal solid waste using state-of-the-art sorting technology. Once necessary permits are received, we expect to invest approximately $45 million to build the ARC facility.

Dublin Energy-from-Waste Facility

In September 2014, we entered into an agreement with the Dublin City Council ("Dublin") to build, own and operate a new 600,000 tonne per-year, 58 megawatt facility in Dublin, Ireland (the "Dublin Waste-to-Energy Facility"). The project will source residential, commercial and industrial waste from Dublin and the surrounding areas and will sell electricity into the local electricity grid, with over 50% of the facility's generation expected to qualify for preferential pricing under Ireland's renewable feed-in tariff. We have commenced construction of the facility, which will take approximately three years to complete, with operational commencement expected in late 2017. We will operate the facility under a 45-year public-private-partnership, after which ownership of the facility will transfer to Dublin. Our total investment in the project is expected to be approximately €500 million, funded by a combination of third party non-recourse project financing (€375 million) and project equity (approximately €125 million). For additional information related to funding for this project, see Item 1. Financial Statements - Note 7. Consolidated Debt - Dublin Project Financing.

Garco Industrial TSDF Acquisition

In September 2014, we acquired Garco, Inc., a treatment, storage and disposal facility ("TSDF") located in Asheboro, North Carolina, specializing in the treatment, management, transportation and disposal of non-hazardous industrial waste and field/facility remediation projects. This acquisition is not material to our condensed consolidated financial statements and therefore, disclosures of pro forma financial information have not been presented.

Durham-York EfW Facility

We are constructing a municipally-owned 140,000 tonne-per-year EfW facility to be built in Clarington, Ontario, located in Durham Region, Canada. The project is expected to begin operations in early 2015, after which we will operate the facility under a 20 year contract.

Organic Growth Investments

During the nine months ended September 30, 2014, we invested approximately $29 million in various organic growth investments, primarily for the Niagara natural gas package boiler ($4 million), Essex particulate emissions control system ($12 million) and various metals recovery systems ($7 million).

Growth Investments (in millions):	Nine Months Ended September 30, 2014
Organic growth investments	$29
New York City contract (intermodal equipment purchases and enhancements to existing facilities)	45
Total Organic Growth Investments and New York City contract	$74

Cost Savings Initiatives

In June 2014, we announced that we are implementing several initiatives to improve process efficiency and reduce ongoing expenses across our business. We are targeting cost savings that we expect to benefit Adjusted EBITDA by approximately $30 million in 2015. It is expected that the initiatives will not materially impact Adjusted EBITDA in 2014, as the costs of implementation will generally be expected to be offset by initial savings. The initiatives can be categorized under two broad themes:

1. Reducing costs of goods and services. This will be driven by:

- New strategic procurement practices to further leverage our scale and purchasing power; and
-

- A multi-year effort to increase labor efficiency during maintenance outages. This is planned to be accomplished with a combination of best practices, enhanced planning and modest capital investments.

2. Reducing staff during the second half of 2014 by improving process efficiency and implementing best practices including:

- Upgrading and leveraging existing information technology systems to streamline processes; and
- Centralization and reorganization of certain overhead functions, including accounting, finance, and procurement.

Business Outlook

In 2014 and beyond, we expect that our financial results will be affected by several factors, including: market price movements, contract transitions, organic growth and acquisitions, and our ability to manage facility production and operating costs. Based upon current assumptions for market prices upon contract expirations, future contract transitions in the aggregate are expected to adversely impact our financial results; however, we expect that these impacts will be more than offset by the combined benefits of our organic growth initiatives, such as metals recovery systems and increased special waste revenue, cost efficiencies expected under our recently announced cost savings initiatives and our new contracts such as New York City and Dublin.

Factors Affecting Business Conditions and Financial Results

Economic - Changes in the economy affect the demand for goods and services generally, which affects overall volumes of waste requiring management and the pricing at which we can attract waste to fill available capacity. We receive the majority of our revenue under short- and long-term contracts, which limits our exposure to price volatility, but with adjustments intended to reflect changes in our costs. Where our revenue is received under other arrangements and depending upon the revenue source, we have varying amounts of exposure to price volatility.

The largest component of our revenue is waste revenue, which has generally been subject to less price volatility than our revenue derived from the sale of energy and metals. Waste markets tend to be affected, both with respect to volume and price, by local and regional economic activity, as well as state and local waste management policies. Furthermore, global demand and pricing of certain commodities, such as the scrap metals we recycle from our EfW facilities, can be materially affected by economic activity. In recent years, metal markets have been less volatile.

At the same time, United States natural gas market prices influence electricity and steam pricing in regions where we operate, and thus affect our revenue for the portion of the energy we sell that is not under fixed-price contracts. Energy markets tend to be affected by regional supply and demand, as well as national economic activity and regulations.

At certain of our biomass facilities, lower energy prices combined with higher fuel prices have caused us to economically dispatch operations where continued operations are not currently profitable. We will continue to consider this practice.

Seasonal - Our quarterly operating income within the same fiscal year typically differs substantially due to seasonal factors, primarily as a result of the timing of scheduled plant maintenance. We conduct scheduled maintenance periodically each year, which requires that individual boiler and/or turbine units temporarily cease operations. During these scheduled maintenance periods, we incur material repair and maintenance expenses and receive less revenue until the boiler and/or turbine units resume operations. This scheduled maintenance usually occurs during periods of off-peak electric demand and/or lower waste volumes, which are our first, second and fourth fiscal quarters. The scheduled maintenance period in the first half of the year (primarily first quarter and early second quarter) is typically the most extensive, while the third quarter scheduled maintenance period is the least extensive. Given these factors, we normally experience our lowest operating income from our projects during the first half of each year.

Our operating income may also be affected by seasonal weather extremes during summers and winters. Increased demand for electricity and natural gas during unusually hot or cold periods may affect certain operating expenses and may trigger material price increases for a portion of the electricity and steam we sell.

Performance - Our EfW facilities have historically demonstrated consistent reliability; in 2013 our average boiler availability was 92%. We have historically performed our operating obligations without experiencing material unexpected service interruptions or incurring material increases in costs. Across our fleet of facilities, we operate and maintain a large number of combustion units, turbine generators, and air and water-cooled condensers, among other systems. On an ongoing basis, we assess the effectiveness of our preventative maintenance programs, and implement adjustments to those programs in order to improve facility safety, reliability and performance. These assessments are tailored to each facility's particular technologies, age, historical performance and other factors. As our facilities age, we expect that the scope of work required to maintain our portfolio of facilities will increase in order to replace or extend the useful life of facility components and to ensure that historical levels of safe, reliable performance continue. For additional information about such risks and damages that we may owe for unexcused operating performance failures, see Item 1A. Risk Factors included in our Form 10-K. In monitoring and assessing the ongoing operating and

financial performance of our businesses, we focus on certain key factors: tons of waste processed, electricity and steam sold, and boiler availability.

Our ability to meet or exceed historical levels of performance at projects, and our general financial performance, is affected by the following:

- seasonal or long-term changes in market prices for waste, energy, or ferrous and non-ferrous metals for projects where we sell into those markets;
- our ability to operate at historic performance levels as our facilities age, and the extent to which our annual maintenance expenditures increase over time;

Table of Contents

- our ability to avoid increases in operating and maintenance costs and unscheduled or extended outages while ensuring that adequate facility maintenance is conducted so that historic levels of operating performance can be sustained;
- seasonal or geographic changes in the price and availability of wood waste as fuel for our biomass facilities;
- seasonal, geographic and other variations in the heat content of waste processed, and thereby the amount of waste that can be processed by an EfW facility;
- contract counterparties’ ability to fulfill their obligations, including the ability of our various municipal customers to supply waste in contractually committed amounts, and the availability of alternate or additional sources of waste if excess processing capacity exists at our facilities;
- our ability to extend or replace existing waste and energy contracts, and the extent to which prevailing market conditions result in decreased or increased pricing or adjustment of other terms under such contracts;
- the success or lack of success in implementing our organic growth programs which are focused on growing our waste revenue, increasing our metal revenue, managing our assets and improving efficiency to reduce cost;
- the extent and success of our construction activity and the timing of payments we receive for such activity; and
- the availability and adequacy of insurance to cover losses from business interruption in the event of casualty or other insured events.

General financial performance at our international projects is also affected by the financial condition and creditworthiness of our international customers and partners, fluctuations in the value of the domestic currency against the value of the U.S. dollar, and political risks inherent to the international business.

Business Segment

We have one reportable segment, North America, which is comprised of waste and energy services operations located primarily in the United States and Canada.

Our EfW projects generate revenue from three main sources: (1) fees charged for operating projects or processing waste received, (2) the sale of electricity and/or steam, and (3) the sale of ferrous and non-ferrous metals that are recovered from the waste stream as part of the EfW process. We may also generate additional revenue from the construction or expansion of a facility when a municipal client owns the facility. Our customers for waste services or facility operations are principally municipal entities, though we also market disposal capacity at certain facilities to commercial and sustainable waste solutions customers. Our facilities sell energy primarily to utilities at contracted rates or, in situations where a contract is not in place, at prevailing market rates in regional markets (primarily PJM, NEPOOL and NYISO in the Northeastern United States).

We also operate, and in some cases have ownership interests in, transfer stations and landfills (primarily used for ash disposal rather than municipal solid waste) that are ancillary and complementary to our EfW projects and generate additional revenue from disposal fees or operating fees.

We currently operate EfW projects in 16 states and one Canadian province, and are constructing an EfW project in a second Canadian province. In September 2014, we entered into an agreement to build, own and operate a new energy-from-waste facility in Dublin, Ireland. Most of our EfW projects were developed and structured contractually as part of competitive procurement processes conducted by municipal entities. As a result, many of these projects have common features. However, each contractual agreement is different, reflecting the specific needs and concerns of a client community, applicable regulatory requirements and/or other factors.

Table of Contents

The following summarizes the typical contractual and economic characteristics of the three project structures in the North America segment:

	Tip Fee	Service Fee (Owned)	Service Fee (Operated)
Number of facilities:	18	7	16
Client(s):	Host community and municipal and commercial waste customers	Host community, with limited merchant capacity in some cases	Dedicated to host community exclusively
Waste or service revenue:	Per ton "tipping fee"	Fixed fee, with performance incentives and inflation escalation	
Energy revenue:	Covanta retains 100%	Share with client (Covanta retains approximately 20% on average)	
Metals revenue:	Covanta retains 100%	Share with client (Covanta typically retains approximately 50%)	
Operating costs:	Covanta responsible for all operating costs	Pass through certain costs to municipal client (e.g. ash disposal)	
Project debt service:	Covanta project subsidiary responsible	Paid by client explicitly as part of service fee	Client responsible for debt service
After service contract expiration:	N/A	Covanta owns the facility; clients have certain rights set forth in contracts; facility converts to Tip Fee or remains Service Fee with new terms	Client owns the facility; extend with Covanta or tender for new contract

For a discussion of the common features to these agreements, as well as important distinctions among them, see Item. 1. Business in our Form 10-K.

Our waste service and energy contracts expire at various times between 2014 and 2038. The extent to which any such expiration will affect us will depend upon a variety of factors, including whether we own the project and/or the real estate to which a contract relates, market conditions then prevailing, and whether the municipal client exercises options it may have to extend the contract term. As our contracts expire, we become subject to greater market risk in maintaining and enhancing our revenues. As service agreements at municipally-owned facilities expire, we intend to seek to enter into renewal or replacement contracts to operate such facilities. As our waste service agreements at facilities we own or lease expire, we intend to seek replacement or additional contracts, and because project debt on these facilities will be paid off at such time, we expect to be able to offer rates that will attract sufficient quantities of waste while providing acceptable revenues to us. At facilities we own, the expiration of existing energy contracts will require us to sell our output either into the local electricity grid at prevailing rates or pursuant to new contracts.

We generated 82% of our waste and service revenues in the North America segment in 2013 under contracts at set rates, while 18% was generated at prevailing market prices. Over time, we will seek to renew, extend or sign new waste and service contracts in order to maintain a significant majority of our waste and service revenue (and EfW fuel supply) under multi-year contracts. We will pursue opportunities to enter into fixed contracts for energy generation as well; however, we expect that the percentage of our energy revenue sold under contract will decline as existing arrangements expire, thereby increasing our exposure to energy market prices over time.

To date, we have been successful in extending a majority of our existing contracts to operate energy-from-waste facilities owned by municipal clients where market conditions and other factors make it attractive for both us and our municipal clients to do so. See the Execution on Strategy discussion above and Item 8. Financial Statements And Supplementary Data — Note 3. Acquisitions and Asset Management in our Form 10-K for additional information. The extent to which additional extensions will be attractive to us and to our municipal clients who own their projects will depend upon the market and other factors noted above.

We expect that multi-year contracts for waste supply at facilities we own or lease will continue to be available on acceptable terms in the marketplace, at least for a substantial portion of facility capacity, as municipalities continue to value long-term committed and sustainable waste disposal capacity. We also expect that an increasing portion of system capacity will be contracted on a shorter-term basis, and so we will have more frequent exposure to waste market risk.

In contrast, as a result of structural and regulatory changes in the energy markets over time, we expect that multi-year contracts for energy sales will generally be less available than in the past, thereby increasing our exposure to energy market prices upon expiration. As our existing contracts have expired and our exposure to market energy prices has increased we have begun entering into hedging arrangements in order to mitigate our exposure to near-term (one to three years) revenue fluctuations in energy markets, and we expect to continue to do so in the future. Our efforts in this regard will involve only mitigation of price volatility for the energy we produce, and will not involve speculative energy trading.

Table of Contents

Our 2014 projected mix of contracted and market-exposed energy generation is as follows:

Projected Energy Megawatt Hours (MWh) At Market and Contracted by Facility Type [(a)]	Full Year 2014E As of October 1, 2014
EfW	
At Market	0.9
Contracted & Hedged	4.7
Total EfW	5.6
Biomass [(b)]	
At Market	0.4
Contracted	0.3
Total Biomass	0.7
Total	6.3

(a) Covanta share only
(b) Additional 0.3 million MWh of Biomass energy is economically dispatched, but available to run

In conjunction with our EfW business, we also own and/or operate 18 transfer stations and four ash landfills in the northeast United States, which we utilize to supplement and more efficiently manage the waste supply and ash disposal requirements at our EfW operations.

With respect to our sustainable service offered in addition to our EfW services, we expect to enter into a range of short- and longer-term contractual arrangements, depending upon the service sought by customers.

RESULTS OF OPERATIONS

The following general discussions should be read in conjunction with the condensed consolidated financial statements, the notes to the condensed consolidated financial statements and other financial information appearing and referred to elsewhere in this report. Additional detail relating to changes in operating revenues and operating expenses and the quantification of specific factors affecting or causing such changes is provided in the segment discussion below.

During the fourth quarter of 2013, assets related to our development activities in the United Kingdom met the criteria for classification as Discontinued Operations and as such all prior periods have been reclassified to conform to this presentation. See Item 8. Financial Statements And Supplementary Data — Note 4. Dispositions and Discontinued Operations in our Form 10-K for additional information.

The comparability of the information provided below with respect to our revenues, expenses and certain other items for the periods presented was affected by several factors. As outlined above under Overview — Execution on Strategy and in Item 8. Financial Statements And Supplementary Data — Note 3. Acquisitions and Asset Management in our Form 10-K, our business development initiatives, contract transitions, and acquisitions resulted in various transactions which are reflected in comparative revenues and expenses. These factors must be taken into account in developing meaningful comparisons between the periods compared below.

The Results of Operations discussion below compares our revenues, expenses and certain other items during each of the years presented for continuing operations.

The following terms used within the Results of Operations discussion are defined as follows:

“Same store”: reflects the performance at each facility on a comparable period-over-period basis, excluding the impacts of transitions and transactions.

“Transitions”: includes the impact of the expiration of: (a) long-term major waste and service contracts, most typically representing the transition to a new contract structure, and (b) long-term energy contracts.

“Transactions”: includes the impacts of acquisitions, divestures, and the addition or loss of operating contracts.

Table of Contents

Operating Revenues

Waste and Service Revenues

For the three month comparative period, waste and service revenues on both a consolidated and North America segment basis decreased by $3 million.

Waste and service revenues from EfW operations decreased by $8 million year-over-year, impacted by the following:

- same store revenues increased by $1 million, or 0.3%, driven by $2 million in price improvement due to contract escalation and special waste growth, offset by a $1 million reduction in revenue due to volume, as relatively less waste was processed for the quarter;
- revenue related to contract transitions decreased by $2 million;
- transaction activity decreased by $1 million; and
- revenue earned explicitly to service project debt decreased by $4 million.

Revenue from non-EfW operations increased by $5 million primarily due to transfer stations acquired in the fourth quarter of 2013.

For the nine month comparative period, waste and service revenues on both a consolidated and North America segment basis increased by $18 million.

Waste and service revenues from EfW operations increased $5 million year-over-year, impacted by the following:

- same store revenues increased by $12 million, or 1.9%, including $9 million in price improvement due to contract escalation and special waste growth, and $3 million in volume;
- revenue related to contract transitions decreased by $2 million;
- net transaction activity contributed $8 million; and
- revenue earned explicitly to service project debt decreased by $11 million.

Revenue from non-EfW operations increased by $13 million primarily due to transfer stations acquired in the fourth quarter of 2013.

Consolidated (in millions):	For the Three Months Ended September 30,		For the Nine Months Ended September 30,		Variance Increase (Decrease)	
	2014	2013	2014	2013	Three Month	Nine Month
Waste and service revenue unrelated to project debt	$247	$246	$743	$713	$1	$30
Revenue earned explicitly to service project debt - principal	5	8	15	25	(3)	(10)
Revenue earned explicitly to service project debt - interest	—	1	2	4	(1)	(2)
Total waste and service revenue	$252	$255	$760	$742	(3)	18

North America segment - EfW facilities - Tons [(1)] (in millions):	For the Three Months Ended September 30,		For the Nine Months Ended September 30,		Variance Increase (Decrease)	
	2014	2013	2014	2013	Three Month	Nine Month
Contracted	3.9	3.8	11.3	10.8	0.1	0.5
Internalization from Transfer Stations	0.3	0.2	0.7	0.4	0.1	0.3
Uncontracted	0.6	0.9	2.0	2.4	(0.3)	(0.4)
Total Tons	4.8	4.9	14.0	13.6	(0.1)	0.4

(1) Includes solid tons only. Certain amounts may not total due to rounding.

Recycled Metal Revenues

For the three month comparative period, recycled metals revenues on both a consolidated and North America segment basis increased by $7 million primarily from EfW operations. The increase was driven by $4 million from higher volume of recovered metals, primarily as a result of the installation of new recovery systems, as well as $3 million from higher recycled metal pricing, due to both higher market prices and selling product at a higher percentage of underlying market indices.

Table of Contents

For the nine month comparative period, recycled metals revenues on both a consolidated and North America segment basis increased by $20 million.

Recycled metals revenues from EfW increased $18 million year-over-year, impacted by the following:

- same store revenues increased by $17 million, driven by $10 million from higher volume of recovered metals, primarily as a result of the installation of new recovery systems, as well as $7 million from higher recycled metal pricing, due to both higher market prices and selling product at a higher percentage of underlying market indices; and
- an acquisition contributed $1 million.

Revenue from non-EfW operations increased by $2 million.

	For the Quarters Ended		
Recycled Metal Revenues (in millions):	2014	2013	2012
March 31,	$21	$16	$20
June 30,	25	17	18
September 30,	26	19	17
December 31,	—	21	17
Total for the Year Ended December 31,	N/A	$73	$72

	Three Months Ended September 30,			
	Recycled Metal Revenue by Type (In millions)		Net Tons Recovered by Type (In thousands) (1)	
	2014	2013	2014	2013
Ferrous Metal	$18	$14	92	84
Non-Ferrous Metal	8	5	8	5
Total	$26	$19		

(1) Covanta share only.

Energy Revenues

For the three month comparative period, energy revenues on a consolidated basis increased by $3 million.

Energy revenues from EfW operations increased $3 million year-over-year, impacted by the following:

- same store revenues increased by $4 million, driven by higher energy production;
- an acquisition contributed $1 million;
- contract transitions contributed $2 million; and
- revenue in connection with the transition of energy contracts to market prices declined by $3 million.

Energy revenue from non-EfW operations was flat, with $2 million in higher steam revenue from a facility in China, partially offset by a $2 million decrease in revenue from biomass operations.

For the nine month comparative period, energy revenues on a consolidated basis increased by $28 million.

Energy revenues from EfW operations increased $17 million year-over-year, impacted by the following:

- same store revenues increased by $14 million, driven by $12 million in higher energy pricing, primarily resulting from cold weather energy demands in the first quarter, and $2 million in higher energy production; and
- an acquisition contributed $4 million;
- contract transitions contributed $2 million; and
- revenue in connection with the transition of energy contracts to market prices declined by $3 million.

Energy revenue from non-EfW operations increased by $11 million, driven by a $3 million increase in revenue from biomass operations due to higher energy prices and $8 million in higher steam revenue from a facility in China.

Table of Contents

Energy Sales Revenue and MWh by Contract Status and Facility Type
(in millions)

	Three Months Ended September 30,									
	2014				2013				Variance Increase (Decrease)	
North America Segment:	Revenue [1]	Volume[1], [2]	% of Total Volume		Revenue [1]	Volume[1], [2]	% of Total Volume		Revenue	Volume
EfW										
At Market	$13	0.32	19	%	$11	0.27	17	%		
Contracted	62	0.82	49	%	65	0.82	53	%		
Hedged	14	0.33	20	%	11	0.27	17	%		
Total EfW	$89	1.47	88	%	$87	1.36	87	%	$2	0.11
Biomass										
At Market	$3	0.09	5	%	$4	0.10	6	%

Total Biomass	$21	0.20	12	%	$22	0.20	13	%	$(1)	—
Total	$110	1.67	100	%	$109	1.56	100	%	$1	0.11

(1) Covanta share only. Represents the sale of electricity and steam based upon output delivered and capacity provided.
(2) Steam converted to MWh at an assumed average rate of 11 klbs of steam / MWh.

Other Operating Revenues
The decreases of $18 million and $27 million in other operating revenues for the three and nine month comparative periods, respectively, were primarily due to lower construction revenue.

Operating Expenses
Plant Operating Expenses
For the three month comparative period, plant operating expenses on both a consolidated and North America segment basis increased by $18 million.
Plant operating expenses from EfW operations increased $7 million year-over-year, impacted by the following:
- plant maintenance increased by $6 million primarily due to timing of scheduled maintenance;
- plant operating expenses for contract transitions increased by $2 million; and
- net transaction activity decreased plant operating expenses by $1 million.

Plant operating expenses from non-EfW operations in our North America segment increased by $11 million primarily due to additional expenses from transfer stations acquired in the fourth quarter of 2013 and other expenses.
For the nine month comparative period, plant operating expenses on a consolidated and North America segment basis increased by $38 million and $37 million, respectively.
Plant operating expenses from EfW operations increased $17 million year-over-year, impacted by the following:
- same store expenses increased by $5 million, primarily due to higher fuel expense incurred primarily as a result of cold weather in the first quarter of 2014 ($5 million) and insurance recoveries that occurred in the second quarter of 2013 ($3 million). This is partially offset by lower operating leases ($2 million), cost saving initiatives and lower plant maintenance expense ($1 million);
- plant operating expenses for contract transitions increased by $2 million; and
- an acquisition increased plant operating expenses by $10 million.

Plant operating expenses from non-EfW operations in our North America segment increased by $20 million, with additional expenses from transfer stations acquired in the fourth quarter of 2013 ($11 million) and higher wood fuel cost at our biomass facilities ($3 million) and other expenses ($9 million), partially offset by the benefit of higher renewable energy credits which are accounted for as a contra expense ($3 million).
Consolidated plant operating expenses further increased by $1 million due to higher fuel costs at a facility in China.

Table of Contents

North America segment (in millions):	For the Three Months Ended September 30,		For the Nine Months Ended September 30,		Variance Increase (Decrease)	
	2014	2013	2014	2013	Three Month	Nine Month
Plant Operating Expenses:						
Plant maintenance [1]	$46	$36	$191	$187	$10	$4
All other	194	186	581	548	8	33
Plant operating expenses	$240	$222	$772	$735	18	37

(1) Plant maintenance costs include our internal maintenance team and non-facility employee costs for facility scheduled and unscheduled maintenance and repair expenses.

Other Operating Expenses

Other operating expenses in our North America segment decreased by $8 million for the three month comparative period primarily due to lower construction expense ($14 million). This was partially offset by insurance recoveries ($4 million) and a gain related to a contract amendment in the third quarter of 2013 ($3 million). For additional information, see Item 1. Financial Statements - Note 9. Supplementary Information - Other Operating Expenses.

Other operating expenses in our North America segment decreased by $2 million for the nine month comparative period primarily due to lower construction expense ($23 million). This was partially offset by a gain related to the termination of our defined benefit pension plans in the first quarter of 2013 ($6 million), an energy contract termination payment in the second quarter of 2013 ($8 million). In addition, insurance recoveries ($4 million) and a gain related to a contract amendment in the third quarter of 2013 ($3 million). For additional information, see Item 1. Financial Statements - Note 9. Supplementary Information - Other Operating Expenses.

General and Administrative Expenses

Consolidated general and administrative expenses increased by $6 million and $11 million for the three and nine month comparative periods, respectively, primarily due to additional expenses incurred related to an increase in non-cash stock-based compensation expense and cost to implement saving initiatives.

Net Write-offs

During the three months ended September 30, 2014, we recorded a non-cash write-down of $14 million comprised of the write-down of the carrying amount in excess of the realizable fair value of $12 million, plus $2 million in disposal costs related to the pending sale of our insurance business, and we recorded a non-cash write-down of $34 million resulting from an impairment charge related to our California biomass facility assets. During the three months ended September 30, 2013, we recorded non-cash write-offs of $12 million, which was comprised of a $9 million impairment of our Wallingford EfW facility assets and a $3 million impairment of our 55% equity investment in the Pacific Ultrapower Chinese Station biomass facility. For additional information, see Item 1. Financial Statements - Note 9. Supplementary Information.

For the nine months ended September 30, 2014, total net write-offs increased by $48 million, consisting of the items discussed above. In addition, during the nine months ended September 30, 2014, we recorded non-cash write-offs of $16 million which was comprised of intangible assets relating to contracts relating to the Abington transfer station ($7 million) and the Hudson Valley EfW facility ($9 million) both of which we assumed in a 2009 acquisition. For additional information, see Item 1. Financial Statements - Note 9. Supplementary Information.

Operating Income

Excluding the net write-offs discussed above, operating income decreased by $27 million on a consolidated basis for the three month comparative period. In our North America segment, operating income decreased by $28 million, primarily due to contract transactions (primarily due to a reduction in debt service revenue), higher general and administrative expenses (primarily related to cost to implement savings initiatives and increased non-cash stock compensation expense), lower construction profit, lower insurance recoveries and a third quarter 2013 gain related to a contract amendment. Operating income from our international operations improved by $2 million primarily due to increased steam sales at a facility in China.

Excluding the net write-offs discussed above, operating income decreased by $6 million on a consolidated basis for the nine month comparative period. In our North America segment, operating income decreased by $11 million, primarily due to higher plant operating expenses ($38 million) on higher plant maintenance expenses and higher fuel costs, lower construction margin, the net change in pension plan settlement expense ($6 million), and certain items in the second quarter of 2013 noted above that did not reoccur in 2014 ($7 million). This is partially offset by higher energy, waste and service, and recycled metals revenues. Operating income from our international operations improved by $6 million primarily due to increased steam sales at a facility in China and lower development spending.

Table of Contents

CONSOLIDATED RESULTS OF OPERATIONS — NON-OPERATING INCOME ITEMS
Three Months Ended September 30, 2014 and 2013
Other Expenses:

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,		Variance Increase (Decrease)	
	2014	2013	2014	2013	Three Month	Nine Month
	(In millions)					
Other expenses:						
Interest expense	$(30)	$(30)	$(92)	$(88)	$—	$(4)
Non-cash convertible debt related expense	—	(7)	(13)	(21)	7	8
Loss on extinguishment of debt	—	—	(2)	(1)	—	(1)
Total other expenses	$(30)	$(37)	$(107)	$(110)	7	3

During the nine months ended September 30, 2014 and 2013, we incurred approximately $2 million and $1 million, pre-tax, respectively, of loss on extinguishment of debt expense, comprised of the write-off of unamortized discounts and deferred financing costs resulting from amendments to the Credit Facilities completed during the respective periods. See Liquidity and Capital Resources discussion below.

Income Tax Benefit (Expense):

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,		Variance Increase (Decrease)	
	2014	2013	2014	2013	Three Month	Nine Month
	(In millions, except percentages)					
CONSOLIDATED RESULTS OF OPERATIONS:						
Income tax benefit (expense)	$16	$(20)	$20	$(11)	$36	$31
Effective income tax rate	136%	42%	74%	43%	N/A	N/A

The increase in the effective tax rate primarily resulted from the impact of write-downs on net income. We currently estimate our annual effective tax rate for the year ending December 31, 2014 to be approximately 89%. We review the annual effective tax rate on a quarterly basis as projections are revised and laws are enacted. For additional information, see Item 1. Financial Statements - Note 8. Income Taxes.

Net Income (Loss) Attributable to Covanta Holding Corporation and Earnings (Loss) Per Share:

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,		Variance Increase (Decrease)

Adjusted EPS — Non-GAAP (2)	$0.26	$0.28	$0.29	$0.20	$(0.02)	$0.09

(1) For information on dividends declared to stockholders, see Liquidity and Capital Resources below.

(2) See Supplementary Financial Information — Adjusted EPS (Non-GAAP Discussion) below.

Supplementary Financial Information — Adjusted Earnings Per Share ("Adjusted EPS") (Non-GAAP Discussion)

We use a number of different financial measures, both United States generally accepted accounting principles ("GAAP") and non-GAAP, in assessing the overall performance of our business. To supplement our results prepared in accordance with GAAP, we use the measure of Adjusted EPS, which is a non-GAAP financial measure as defined by the Securities and Exchange Commission ("SEC"). The non-GAAP financial measure of Adjusted EPS is not intended as a substitute or as an alternative to diluted earnings (loss) per share as an indicator of our performance or any other measure of performance derived in accordance with GAAP. In addition, our non-GAAP financial measures may be different from non-GAAP financial measures used by other companies, limiting their usefulness for comparison purposes. We use the non-GAAP financial measure of Adjusted EPS to enhance the usefulness of our financial information by providing a measure which management internally uses to assess and evaluate the overall performance and highlight trends in the ongoing business.

Adjusted EPS excludes certain income and expense items that are not representative of our ongoing business and operations, which are included in the calculation of diluted earnings per share in accordance with GAAP. The following items are not all-inclusive, but are examples of reconciling items in prior comparative and future periods. They would include the results of operations of our insurance subsidiaries, write-offs of assets and liabilities, the effect of derivative instruments not designated as hedging instruments, significant gains or losses from the disposition or restructuring of businesses, gains and losses on assets held for sale, transaction-related costs, income and loss on the extinguishment of debt and other significant items that would not be representative of our ongoing business.

In order to provide a meaningful basis for comparison, we are providing information with respect to our Adjusted EPS for the three and nine months ended September 30, 2014 and 2013, respectively, reconciled for each such period to diluted earnings (loss) per share, which is believed to be the most directly comparable measure under GAAP (in millions, except per share amounts):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2014	2013	2014	2013
Continuing Operations - Diluted Earnings (Loss) Per Share	$0.05	$0.22	$(0.02)	$0.14
Reconciling Items [(1)]	0.21	0.06	0.31	0.06
Adjusted EPS	$0.26	$0.28	$0.29	$0.20

(1) Additional information is provided in the Reconciling Items table below.

	Three Months Ended September 30,		Nine Months Ended September 30,	
Reconciling Items	2014	2013	2014	2013
Operating loss related to insurance subsidiaries	$—	$—	$1	$1
Net write-offs [1]	48	12	64	16
Severance and reorganization costs [2]	3	—	6	—
Pension plan settlement gain	—	—	—	(6)
Loss on extinguishment of debt	—	—	2	1
Other	1	1	1	1
Total reconciling items, pre-tax	52	13	74	13
Pro forma income tax impact	(23)	(5)	(34)	(5)
Total reconciling items, net of tax	$29	$8	$40	$8
Diluted Earnings Per Share Impact	$0.21	$0.06	$0.31	$0.06
Weighted Average Diluted Shares Outstanding	131	130	130	130

(1) The components of Net write-offs are outlined in the table below.
(2) Includes certain costs incurred in connection with costs savings initiatives.

The components of Net write-offs are as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2014	2013	2014	2013
Write-down of Hudson Valley EFW facility contract intangible [a]	$—	$—	$9	$—
Write-down of Abington transfer station contract intangible [b]	—	—	7	—
Write-down of insurance business [c]	14	—	14	—
Write-down of California biomass facilities[d]	34	—	34	—
Write-down of Wallingford EfW facility assets [e]	—	9	—	9
Write-down of equity investment in biomass facility [f]	—	3	—	3
Write-off of loan issued for the Harrisburg EfW facility [g]	—	—	—	4
Total net write-offs	$48	$12	$64	$16

(a) The service contract to operate the Hudson Valley EfW facility expired on June 30, 2014. During the nine months ended September 30, 2014, we recorded a $9 million non-cash write-down of the intangible asset associated with the contract we assumed in a 2009 acquisition.
(b) The service contract for the Abington transfer station will expire at December 31, 2014. During the nine months ended September 30, 2014, we recorded a $7 million non-cash write-down of the intangible asset associated with this contract we assumed in a 2009 acquisition.
(c) During the three months ended September 30, 2014, we entered into an agreement to sell our insurance business, subject to regulatory approval. We recorded a non-cash write-down of $14 million comprised of the write-down of the carrying amount in excess of the realizable fair value of $12 million, plus $2 million in disposal costs.
(d) During the three and nine months ended September 30, 2014, we recorded a non-cash write-down of $34 million resulting from an impairment charge related to our California biomass facility assets.
(e) During the three and nine months ended September 30, 2013, we recorded a non-cash write-down of $9 million resulting from an impairment charge related to our Wallingford EfW facility assets.
(f) During the three and nine months ended September 30, 2013, we recorded a non-cash write-down of $3 million related to our 55% equity investment in the Pacific Ultrapower Chinese Station biomass facility.

(g) During the nine months ended September 30, 2013, we recorded a non-cash write-off of $4 million associated with funds advanced for certain improvements related to the Harrisburg EfW facility.

Table of Contents

Supplementary Financial Information — Adjusted EBITDA (Non-GAAP Discussion)
To supplement our results prepared in accordance with GAAP, we use the measure of Adjusted EBITDA, which is a non-GAAP financial measure as defined by the SEC. This non-GAAP financial measure is described below, and is not intended as a substitute and should not be considered in isolation from measures of financial performance prepared in accordance with GAAP. In addition, our use of non-GAAP financial measures may be different from non-GAAP financial measures used by other companies, limiting their usefulness for comparison purposes. The presentation of Adjusted EBITDA is intended to enhance the usefulness of our financial information by providing a measure which management internally uses to assess and evaluate the overall performance of its business and those of possible acquisition candidates, and highlight trends in the overall business.
We use Adjusted EBITDA to provide further information that is useful to an understanding of the financial covenants contained in the credit facilities of our most significant subsidiary, Covanta Energy, and as additional ways of viewing aspects of its operations that, when viewed with the GAAP results and the accompanying reconciliations to corresponding GAAP financial measures, provide a more complete understanding of our core business. The calculation of Adjusted EBITDA is based on the definition in Covanta Energy’s Credit Facilities (as defined and described below under Liquidity and Capital Resources), which we have guaranteed. Adjusted EBITDA is defined as earnings before interest, taxes, depreciation and amortization, as adjusted for additional items subtracted from or added to net income. Because our business is substantially comprised of that of Covanta Energy, our financial performance is substantially similar to that of Covanta Energy. For this reason, and in order to avoid use of multiple financial measures which are not all from the same entity, the calculation of Adjusted EBITDA and other financial measures presented herein are measured on a consolidated basis for continuing operations, less the results of operations of our insurance subsidiaries. Under the Credit Facilities, Covanta Energy is required to satisfy certain financial covenants, including certain ratios of which Adjusted EBITDA is an important component. Compliance with such financial covenants is expected to be the principal limiting factor which will affect our ability to engage in a broad range of activities in furtherance of our business, including making certain investments, acquiring businesses and incurring additional debt. Covanta Energy was in compliance with these covenants as of September 30, 2014. Failure to comply with such financial covenants could result in a default under the Credit Facilities, which default would have a material adverse effect on our financial condition and liquidity.
Adjusted EBITDA should not be considered as an alternative to net income or cash flow provided by operating activities as indicators of our performance or liquidity or any other measures of performance or liquidity derived in accordance with GAAP.
In order to provide a meaningful basis for comparison, we are providing information with respect to our Adjusted EBITDA for the three and nine months ended September 30, 2014 and 2013, respectively, reconciled for each such period to net income (loss) and cash flow provided by operating activities, which are believed to be the most directly comparable measures under GAAP. The following is a reconciliation of Net Income (Loss) to Adjusted EBITDA (in millions):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2014	2013	2014	2013
Net Income (Loss) from Continuing Operations Attributable to Covanta Holding Corporation	$6	$28	$(2)	$18
Operating loss related to insurance subsidiaries	—	—	1	1
Depreciation and amortization expense	52	52	158	157
Debt service:				
Net interest expense on project debt	3	3	8	10
Interest expense	30	30	92	88
Non-cash convertible debt related expense	—	7	13	21
Subtotal debt service	33	40	113	119
Income tax (benefit) expense	(16)	20	(20)	11
Net write-offs [(1)]	48	12	64	16
Pension plan settlement gain	—	—	—	(6)
Loss on extinguishment of debt	—	—	2	1
Net loss attributable to noncontrolling interests in subsidiaries	—	—	—	(1)
Other adjustments:				
Debt service billing in excess of revenue recognized	(1)	1	1	9
Severance and reorganization costs [(2)]	3	—	6	—
Non-cash compensation expense	7	3	15	12
Other non-cash item [(3)]	3	1	5	5
Subtotal other adjustments	12	5	27	26
Total adjustments	129	129	345	324
Adjusted EBITDA	$135	$157	$343	$342

(1) See Adjusted EPS above.

(2) Includes certain costs incurred in connection with costs savings initiatives.

(3) Includes certain non-cash items that are added back under the definition of Adjusted EBITDA in Covanta Energy's credit agreement.

The following is a reconciliation of cash flow provided by operating activities to Adjusted EBITDA (in millions):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2014	2013	2014	2013
Cash flow provided by operating activities from continuing operations	$121	$171	$264	$275
Cash flow used in operating activities from insurance subsidiaries	—	1	—	4
Debt service	33	40	113	119
Change in working capital	(9)	(51)	(1)	(34)
Change in restricted funds held in trust	(13)	(9)	(14)	(17)
Non-cash convertible debt related expense	—	(7)	(13)	(21)
Equity in net income from unconsolidated investments	2	4	5	4

Dividends from unconsolidated investments	—	(1)	(10)	(7)
Current tax provision	(2)	6	(7)	3
Other	3	3	6	16
Sub-total:	(19)	(55)	(34)	(56)
Adjusted EBITDA	$135	$157	$343	$342

For additional discussion related to management's use of non-GAAP measures, see Liquidity and Capital Resources — Supplementary Financial Information — Free Cash Flow (Non-GAAP Discussion) below.

Table of Contents

LIQUIDITY AND CAPITAL RESOURCES

Our principal sources of liquidity are our cash and cash equivalents, cash flow generated from our ongoing operations, and available capacity under of our Revolving Credit Facility, which we believe will collectively allow us to meet our liquidity needs.

The following summarizes our financing activities completed during the nine months ended September 30, 2014:

- In September 2014, we executed agreements for project financing totaling €375 million to fund a majority of the construction costs of the Dublin Waste-to-Energy Facility (see discussion below).
- In August 2014, we borrowed $47 million under an equipment financing capital lease arrangement to purchase barges, rail cars, containers and intermodal equipment related to our contract with New York City;
- On July 1, 2014, we issued $12 million of tax-exempt corporate variable-rate demand bonds, which are secured by a letter of credit issued under our Revolving Credit Facility and will mature on July 1, 2043. Proceeds from the offering were utilized to refinance $12 million of project debt at our Delaware Valley facility due on July 1, 2014.
- On June 1, 2014, we repaid the $460 million of 3.25% Cash Convertible Senior Notes upon maturity. Additionally, we were required to pay $83 million to satisfy the obligation under the Cash Conversion Option in addition to the principal amount of the 3.25% Notes and we settled the Note Hedge for $83 million effectively offsetting our exposure to the cash payments in excess of the principal amount made under the Cash Conversion Option.
- In March 2014, we issued $400 million aggregate principal amount of 5.875% Senior Notes due March 2024. We used the net proceeds of the 5.875% Notes offering for the repayment of the 3.25% Cash Convertible Notes at maturity on June 1, 2014.
- In March 2014, we extended the termination date of the Revolving Credit Facility by two years from March 28, 2017 to March 21, 2019; increased the aggregate amount of the Revolving Credit Facility by $100 million to a total commitment of $1 billion; reduced the applicable margin payable on the Term Loan by 25 basis points; and made a voluntary prepayment on the Term Loan of $95 million, reducing the outstanding principal to $200 million. See discussion below under Available Sources of Liquidity.

As of September 30, 2014, Covanta Energy had $1.2 billion in credit facilities, which include a $1.0 billion Revolving Credit Facility which expires in 2019. As of September 30, 2014, our available liquidity was as follows (in millions):

	As of September 30, 2014
Unrestricted Cash and Cash Equivalents	$ 87
Borrowings available under Revolving Credit Facility	657
Total available liquidity	$ 744

In addition, as of September 30, 2014, we had restricted cash of $229 million, of which $101 million was designated for future payment of project debt principal.

We typically receive cash distributions from our North America segment projects on a monthly basis. The frequency and predictability of our receipt of cash from projects differs depending upon various factors, including, whether a project is domestic or international, and whether a project has been able to operate at historical levels of production. The timing of our receipt of cash from construction projects for public sector clients is generally based upon completion milestones as set forth in the applicable contracts, and the timing and size of these milestone payments can result in material working capital variability between periods.

Our primary future cash requirements will be to fund capital expenditures to maintain our existing businesses, service our debt, invest in the growth of our business, and return surplus capital to our shareholders. We believe that our liquidity position and ongoing cash flow from operations will be sufficient to finance these requirements.

2014 Dividends

During the first quarter of 2014, we increased our quarterly cash dividend by 9%, to $0.72 per share on an annualized basis. During the third quarter of 2014 we further increased our dividend by 39% to $1.00 per share on an annualized basis. Dividends declared to stockholders are as follows (in millions, except per share amounts):

	Three Months Ended September 30,	Nine Months Ended September 30,

	2014	2013	2014	2013
Regular cash dividend				
Declared	$33	$21	$81	$65
Per Share	$0.25	$0.165	$0.61	$0.495

Table of Contents

Sources and Uses of Cash Flow from Continuing Operations for the Nine Months Ended September 30, 2014 and 2013:

	Nine Months Ended September 30,		Increase (Decrease)
	2014	2013	2014 vs 2013
	(Unaudited, in millions)		
Net cash provided by operating activities	$264	$275	$(11)
Net cash used in investing activities	(201)	(210)	(9)
Net cash used in financing activities	(167)	(62)	105
Effect of exchange rate changes on cash and cash equivalents	(3)	1	(4)
Net decrease in cash and cash equivalents	$(107)	$4	(111)

Net cash provided by operating activities from continuing operations for the nine months ended September 30, 2014 was $264 million, a decrease of $11 million from the prior year period. The decrease was primarily due to working capital.

Net cash used in investing activities from continuing operations for the nine months ended September 30, 2014 was $201 million, a net decrease of $9 million from the prior year period. The decrease was primarily due to an higher outflows for the purchase of property, plant and equipment of $12 million and an increase in restricted funds related to the Dublin project of $20 million, offset by lower payments for the acquisition of businesses and noncontrolling interests of $38 million.

Net cash used in financing activities from continuing operations for the nine months ended September 30, 2014 was $167 million, a net change of $105 million from the prior period. The net increase was primarily driven by the net financing activities completed during the nine months ended September 30, 2014 as described above under Liquidity and Capital Resources, higher cash dividends of $24 million, partially offset by lower repayments of project debt of $20 million.

Supplementary Financial Information — Free Cash Flow (Non-GAAP Discussion)

To supplement our results prepared in accordance with GAAP, we use the measure of Free Cash Flow, which is a non-GAAP measure as defined by the SEC. This non-GAAP financial measure is not intended as a substitute and should not be considered in isolation from measures of liquidity prepared in accordance with GAAP. In addition, our use of Free Cash Flow may be different from similarly identified non-GAAP measures used by other companies, limiting its usefulness for comparison purposes. The presentation of Free Cash Flow is intended to enhance the usefulness of our financial information by providing measures which management internally uses to assess and evaluate the overall performance of its business and those of possible acquisition candidates, and highlight trends in the overall business.

We use the non-GAAP financial measure of Free Cash Flow as a criterion of liquidity and performance-based components of employee compensation. Free Cash Flow is defined as cash flow provided by operating activities, excluding the cash flow provided by or used in our insurance subsidiaries, less maintenance capital expenditures, which are capital expenditures primarily to maintain our existing facilities. We use Free Cash Flow as a measure of liquidity to determine amounts we can reinvest in our core businesses, such as amounts available to make acquisitions, invest in construction of new projects, make principal payments on debt, or return capital to our stockholders through dividends and/or stock repurchases. For additional discussion related to management’s use of non-GAAP measures, see Results of Operations — Supplementary Financial Information — Adjusted EBITDA (Non-GAAP Discussion) above.

In order to provide a meaningful basis for comparison, we are providing information with respect to our Free Cash Flow for the three and nine months ended September 30, 2014 and 2013, reconciled for each such period to cash flow provided by operating activities, which we believe to be the most directly comparable measure under GAAP.

Table of Contents

The following is a reconciliation of Free Cash Flow and its primary uses (in millions):

Table of Contents

(1) Purchases of property, plant and equipment are also referred to as capital expenditures. Capital expenditures that primarily maintain existing facilities are classified as maintenance capital expenditures. Growth investments include investments in growth opportunities, including organic growth initiatives, technology, business development, and other similar expenditures. The following table provides the components of total purchases of property, plant and equipment:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2014	2013	2014	2013
Maintenance capital expenditures	$(17)	$(10)	$(78)	$(67)
Capital expenditures associated with organic growth initiatives	(13)	(24)	(29)	(61)
Capital expenditures associated with the New York City contract	(7)	(9)	(45)	(12)
Total capital expenditures associated with organic growth investments and New York City contract	(20)	(33)	(74)	(73)
Total purchases of property, plant and equipment	$(37)	$(43)	$(152)	$(140)

(2) Growth investments include investments in growth opportunities, including organic growth initiatives, technology, business development and other similar expenditures. Organic growth investments include investments primarily in our TARTECH joint venture.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2014	2013	2014	2013
Capital expenditures associated with organic growth initiatives	$(13)	$(24)	$(29)	$(61)
Capital expenditures associated with the New York City contract	(7)	(9)	(45)	(12)
Other organic growth investments	(1)	(3)	(1)	(3)
Acquisition of business, net of cash acquired	(13)	(49)	(13)	(49)
Investments in connection with the Dublin Waste-to-Energy facility	(16)	—	(16)	—
Total growth investments	$(50)	$(85)	$(104)	$(125)

(3) Other investing activities includes net payments from the purchase/sale of investment securities.

(4) Excludes borrowings under Revolving Credit Facility. Calculated as follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2014	2013	2014	2013
Proceeds from borrowings on long-term debt	$12	$22	$412	$22

Table of Contents

Available Sources of Liquidity

Cash and Cash Equivalents

Cash and cash equivalents include all cash balances and highly liquid investments having maturities of three months or less from the date of purchase. These short-term investments are stated at cost, which approximates market value. As of September 30, 2014, we had unrestricted cash and cash equivalents of $87 million. Balances held by our international subsidiaries are not generally available for near-term liquidity in our domestic operations. A substantial majority of our cash held outside the United States is denominated in US dollars.

	As of	
	September 30, 2014	December 31, 2013
	(in millions)	
Domestic	$23	$21
International	64	174
Total Cash and Cash Equivalents	$87	$195

Credit Facilities

Our subsidiary, Covanta Energy, has senior secured credit facilities consisting of a $1.0 billion revolving credit facility expiring in 2019 (the “Revolving Credit Facility”) and a $198 million term loan due 2019 (the “Term Loan”) (collectively referred to as the "Credit Facilities").

On March 21, 2014, we amended the Credit Facilities to:

- extend the termination date of the Revolving Credit Facility by two years from March 28, 2017 to March 21, 2019;
- increase the aggregate amount of the Revolving Credit Facility by $100 million to $1.0 billion; and
- reduce the applicable margin payable on the Term Loan by 25 basis points, as noted below under Interest and Fees.

We incurred approximately $3 million in costs related to this amendment which will be deferred and amortized over the remaining term of the Credit Facilities.

On March 20, 2014, we made a voluntary prepayment on the Term Loan of $95 million, reducing the outstanding principal to $200 million.

The Revolving Credit Facility is available for the issuance of letters of credit up to the full amount of the facility, provides for a $50 million sub-limit for the issuance of swing line loans (a loan that can be requested in US Dollars on a same day basis for a short drawing period); and is available in US Dollars, Euros, Pounds Sterling, Canadian Dollars and certain other currencies to be agreed upon, in each case for either borrowings or for the issuance of letters of credit. The proceeds under the Revolving Credit Facility are available for working capital and general corporate purposes of Covanta Energy and its subsidiaries.

We have the option to establish additional term loan commitments and/or increase the size of the Revolving Credit Facility (collectively, the “Incremental Facilities”), subject to the satisfaction of certain conditions and obtaining sufficient lender commitments, in an amount up to the greater of $500 million and the amount that, after giving effect to the incurrence of such Incremental Facilities, would not result in a leverage ratio, as defined in the credit agreement governing our Credit Facilities (the “Credit Agreement”), exceeding 2.75:1.00.

Availability under Revolving Credit Facility

As of September 30, 2014, we had availability under the Revolving Credit Facility as follows (in millions):

	Total Available Under Credit Facility	Expiring	Direct Borrowings as of September 30, 2014	Outstanding Letters of Credit as of September 30, 2014	Availability as of September 30, 2014
Revolving Credit Facility	$ 1,000	2019	$180	$163	$657

During the nine months ended September 30, 2014, borrowing under the Revolving Credit Facility increased by $70 million.

55

Repayment Terms

As of September 30, 2014, the Term Loan has mandatory amortization payments of $2 million in each of the years 2015 to 2018 and $190 million in 2019. The Credit Facilities are pre-payable at our option at any time.

Under certain circumstances, the Credit Facilities obligate us to apply 25% of our excess cash flow (as defined in the Credit Agreement) for each fiscal year commencing in 2013, as well as net cash proceeds from specified other sources, such as asset sales or insurance proceeds, to prepay the Term Loan, provided that this excess cash flow percentage shall be reduced to 0% in the event the Leverage Ratio (as defined below under Credit Agreement Covenants) is at or below 3.00:1.00.

For a detailed description of the terms of the Credit Facilities, see Item. 8. Financial Data and Supplementary Data - Note 11. Consolidated Debt in our Form 10-K.

Interest and Fees

Borrowings under the Credit Facilities bear interest, at our option, at either a base rate or a Eurodollar rate plus an applicable margin determined by a pricing grid, in the case of the Revolving Credit Facility, which is based on Covanta Energy's leverage ratio. Base rate is defined as the higher of (i) the Federal Funds Effective Rate plus 0.50%, (ii) the rate the administrative agent announces from time to time as its per annum "prime rate" or (iii) the one-month LIBOR rate plus 1.00%. Eurodollar rate borrowings bear interest at the London Interbank Offered Rate, commonly referred to as "LIBOR", or a comparable or successor rate, for the interest period selected by us. Base rate borrowings under the Revolving Credit Facility shall bear interest at the base rate plus an applicable margin ranging from 1.25% to 1.75%. Eurodollar borrowings under the Revolving Credit Facility shall bear interest at LIBOR plus an applicable margin ranging from 2.00% to 2.75%. Fees for issuances of letters of credit include fronting fees equal to 0.125% per annum and a participation fee for the lenders equal to the applicable interest margin for LIBOR rate borrowings. We will incur an unused commitment fee ranging from 0.375% to 0.50% on the unused amount of commitments under the Revolving Credit Facility. Effective March 21, 2014 the Term Loan bears interest, at our option, at either (i) the base rate plus an applicable margin of 1.50% , or (ii) LIBOR plus an applicable margin of to 2.50%, subject to a LIBOR floor of 0.75%.

Guarantees and Security

The Credit Facilities are guaranteed by us and by certain of our subsidiaries. The subsidiaries that are party to the Credit Facilities agreed to secure all of the obligations under the Credit Facilities by granting, for the benefit of secured parties, a first priority lien on substantially all of their assets, to the extent permitted by existing contractual obligations; a pledge of substantially all of the capital stock of each of our domestic subsidiaries and 65% of substantially all the capital stock of each of our foreign subsidiaries which are directly owned, in each case to the extent not otherwise pledged.

Credit Agreement Financial Covenants

The loan documentation under the Credit Facilities contains customary affirmative and negative covenants and financial covenants as discussed in Item 1. Financial Statements — Note 7. Consolidated Debt. As of September 30, 2014, we were in compliance with all of the affirmative and negative covenants under the Credit Facilities.

The financial covenants of the Credit Facilities, which are measured on a trailing four quarter period basis, include the following:

- a maximum Leverage Ratio of 4.00 to 1.00 for the trailing four quarter period, which measures the principal amount of Covanta Energy's consolidated debt less certain restricted funds dedicated to repayment of project debt principal and construction costs ("Consolidated Adjusted Debt") to its adjusted earnings before interest, taxes, depreciation and amortization, as calculated under the Credit Facilities ("Adjusted EBITDA"). The definition of Adjusted EBITDA in the Credit Facilities excludes certain non-cash charges.
- a minimum Interest Coverage Ratio of 3.00 to 1.00, which measures Covanta Energy's Adjusted EBITDA to its consolidated interest expense plus certain interest expense of ours, to the extent paid by Covanta Energy.

For additional information on the calculation of Adjusted EBITDA, see Results of Operations — Supplementary Financial Information — Adjusted EBITDA (Non-GAAP Discussion) above.

Long-Term Debt

7.25% Senior Notes due 2020 (the “7.25% Notes”)

For specific criteria related to redemption features of the 7.25% Notes, see Item. 8. Financial Data and Supplementary Data - Note 11. Consolidated Debt in our Form 10-K.

6.375% Senior Notes due 2022 (the “6.375% Notes”)

For specific criteria related to redemption features of the 6.375% Notes, see Item. 8. Financial Data and Supplementary Data - Note 11. Consolidated Debt in our Form 10-K.

5.875% Senior Notes due 2024 (the "5.875% Notes")

In March 2014, we sold $400 million aggregate principal amount of 5.875% Senior Notes due March 2024. Interest on the 5.875% Notes is payable semi-annually on March 1 and September 1 of each year, commencing on September 1, 2014, and the 5.875% Notes will mature on March 1, 2024 unless earlier redeemed or repurchased. Net proceeds from the sale of the 5.875% Notes were approximately $393 million, consisting of gross proceeds of $400 million net of approximately $7 million in offering

expenses. We used the net proceeds of the 5.875% Notes offering for the repayment of the 3.25% Cash Convertible Notes at maturity on June 1, 2014.

The 5.875% Notes are senior unsecured obligations, ranking equally in right of payment with any of the current and future senior unsecured indebtedness of Covanta Holding Corporation. The 5.875% Notes are effectively junior to our existing and future secured indebtedness, including any guarantee of indebtedness under the Credit Facilities. The 5.875% Notes are not guaranteed by any of our subsidiaries and are effectively subordinated to all existing and future indebtedness and other liabilities of our subsidiaries.

For specific criteria related to redemption features of the 5.875% Notes, see Item. 1. Financial Statements — Note 7. Consolidated Debt of this report.

3.25% Cash Convertible Senior Notes due 2014 (the "3.25% Notes")

On June 1, 2014, we repaid the $460 million of 3.25% Cash Convertible Senior Notes utilizing net proceeds from the March 2014 5.875% Notes issuance.

During the period from March 1, 2014 to May 30, 2014, and under certain additional limited circumstances, the 3.25% Notes were cash convertible by holders thereof (the "Cash Conversion Option"). The conversion rate was 64.6669 shares of our common stock (which represented a conversion price of approximately $15.46 per share) for the period from March 17, 2014 through March 21, 2014, and 65.3501 shares of our common stock (which represented a conversion price of approximately $15.30 per share), as adjusted for the dividend paid on April 2, 2014, for the period from March 24, 2014 to May 30, 2014. We did not deliver common stock (or any other securities) upon conversion. Upon maturity, we were required to pay $83 million to satisfy the obligation under the Cash Conversion Option in addition to the principal amount of the 3.25% Notes.

In connection with the issuance of 3.25% Notes offering, we entered into privately negotiated cash convertible note hedge transactions (the "Note Hedge") with affiliates of certain of the initial purchasers of the 3.25% Notes (the "Option Counterparties") which we cash-settled for $83 million upon maturity of the 3.25% Notes and effectively offset our liability under the Cash Conversion Option. The income recognized as a result of changes in the credit valuation adjustment related to the note hedge was not material.

In connection with the issuance of the 3.25% Notes, we also sold warrants, correlating to the number of shares underlying the 3.25% Notes, which currently have a strike price of approximately $20.80 and settle on a net share basis. The warrants are exercisable only at expiration in equal tranches over a 60 day period which began on September 2, 2014 and ends on November 26, 2014. During the third quarter of 2014, 156,732 shares of our common stock were issuable in connection with warrant exercises. For additional information, see Note 5. Earnings per Share and Equity above and Item 3. Quantitative and Qualitative Disclosures About Market Risk in this Quarterly report on Form 10-Q and Item 7A. Quantitative and Qualitative Disclosures About Market Risk in our Form 10-K.

4.00% - 5.25% Tax-Exempt Bonds due from 2024 to 2042 ("Tax Exempt Bonds")

For a detailed description of the terms of the Tax-Exempt Bonds, see Item 8. Financial Statements And Supplementary Data — Note 11. Consolidated Debt in our Form 10-K.

Equipment Financing Capital Leases

In 2014, we entered into equipment financing capital lease arrangements to finance the purchase of barges, railcars, containers and intermodal equipment related to our New York City contract. During the three months ended September 30, 2014, we borrowed $47 million under the equipment financing capital lease arrangements. The lease terms range from 10 years to 12 years and the fixed interest rates range from 3.63% to 4.52%, with payments commencing on October 1, 2014. As of September 30, 2014, the outstanding borrowings under the equipment financing capital lease have mandatory amortization payments remaining as follows (in millions):

	2014	2015	2016	2017	2018	Thereafter
Annual Remaining Amortization	$1	$2	$2	$3	$3	$36

Table of Contents

Dublin Project Financing

In September 2014, we executed agreements for project financing totaling €375 million to fund a majority of the construction costs of the Dublin Waste-to-Energy Facility. The project financing package includes: (i) €300 million of project debt to be borrowed under a credit facility agreement with various lenders (the “Dublin Credit Agreement”), which consists of a €250 million senior secured term loan (the “Dublin Senior Term Loan”) and a €50 million second lien term loan (the “Dublin Junior Term Loan”), and (ii) a €75 million convertible preferred investment (the “Dublin Convertible Preferred”), which has been committed by a leading global energy infrastructure investor. For additional information related to this project, see Item 1. Financial Statements - Note 3. Business Development and Organic Growth. For information on repayment terms and interest rate details for the borrowings discussed below, see Item 1. Financial Statements - Note7. Consolidated Debt.

Dublin Senior Term Loan due 2021

The €250 million Dublin Senior Term Loan is expected to be drawn in 2016 and 2017 to fund remaining construction costs after our equity investment into the project (estimated at approximately €125 million), the Dublin Convertible Preferred, and the Dublin Junior Term Loan have been fully utilized. Key commercial terms of the Dublin Senior Term Loan include:

- Final maturity on September 30, 2021 (approximately four years after the anticipated operational commencement date of the facility).
- Scheduled repayments will be made semi-annually according to a 15-year amortization profile, beginning in 2018. The loan is pre-payable at our option following operational commencement.
- Borrowings will bear interest at the Euro Interbank Offered Rate ("EURIBOR") plus an applicable margin, which will range from 4.00% to 4.50% according to a pre-determined schedule. Interest on outstanding borrowings will be payable in cash monthly prior to the operational commencement date of the facility and payable in cash semi-annually after the operational commencement date, based on the prevailing one and six month EURIBOR rates, respectively. Undrawn commitments will accrue commitments fees at a rate of 2.25% per annum. We entered into interest rate swap agreements in order to hedge our exposure to adverse variable interest rate fluctuations under the Dublin Senior Term Loan. For additional information, see Item. 1. Financial Statements — Note 12. Derivative Instruments.
- The Dublin Senior Term Loan is a senior obligation of the project company and certain other related subsidiaries, all of which are wholly-owned by us, and is secured by a first priority lien on substantially all of the wholly-owned subsidiary assets. The Dublin Senior Term Loan is non-recourse to Covanta Energy or Covanta Holding Corp. See Note 13. Commitments and Contingencies for a description of the commitments of Covanta Energy related to the Dublin project financing.
- The Dublin Credit Agreement contains positive, negative and financial maintenance covenants that are customary for a project financing of this type. Our ability to service the Dublin Junior Term Loan and the Dublin Convertible Preferred and to make cash distributions to common equity following the operational commencement date is subject to ongoing compliance with these covenants, including maintaining a minimum debt service coverage ratio and loan life coverage ratio on the Dublin Senior Term Loan.

Dublin Junior Term Loan due 2022

The €50 million Dublin Junior Term Loan was funded into an escrow account in September 2014, with proceeds expected to be drawn from the account to fund construction costs in 2015 and 2016 after our equity investment into the project and the Dublin Convertible Preferred have been fully utilized. As of September 30, 2014, $63 million (€50 million) is included in both project debt and noncurrent restricted funds held in trust on our condensed consolidated balance sheet. Key commercial terms of the Dublin Junior Term Loan include:

- Final maturity on March 31, 2022 (six months after the maturity of the Dublin Senior Term Loan).
- Scheduled repayments will be made semi-annually according to a 15-year amortization profile, beginning in 2018. The loan is pre-payable at our option following operational commencement.
- Borrowings will bear interest at a fixed rate of 5.23% during the first six months of the loan, and thereafter at fixed rates from 9.23% to 9.73% according to a pre-determined schedule. Interest on outstanding borrowings will be payable 50% in cash and 50% accrued to the balance of the loan monthly prior to the operational commencement date

of the facility, and payable 100% in cash semi-annually after the operational commencement date.

- The Dublin Junior Term Loan is a junior obligation of the project company and certain other related subsidiaries, all of which are wholly-owned by us, and is secured by a second priority lien on substantially all of the wholly-owned subsidiary assets and a first priority lien on the assets of the top tier project holding company. The Dublin Junior Term Loan is non-recourse to Covanta Energy or Covanta Holding Corp.
- Under the Dublin Credit Agreement, our ability to service the Dublin Convertible Preferred and to make cash distributions to common equity is subject to ongoing compliance with the covenants under the agreement, including maintaining a minimum debt service coverage ratio and loan life coverage ratio on the Dublin Junior Term Loan.

Table of Contents

Dublin Convertible Preferred

The €75 million Dublin Convertible Preferred is expected to be drawn to fund construction costs in 2015 after our equity investment into the project has been fully utilized. The instrument will have: (i) liquidation preference equal to par value of the investment, (ii) a preferred claim on project cash flows during operations (after debt service) to pay a fixed dividend rate and repay principal according to an amortization schedule, and (iii) an option to convert loan principal into a common equity interest in the project.

The Dublin Convertible Preferred is structured as a shareholder loan (the “Stakeholder Loan”) with the concurrent issuance of warrants (the “Stakeholder Warrants”). Key commercial terms of the Dublin Convertible Preferred include:

- The Stakeholder Loan will accrue dividends at a fixed rate of 13.50% per annum. The dividends are payable 50% in cash and 50% accrued to the principal balance on a monthly basis prior to the operational commencement date, and payable 100% in cash semi-annually thereafter, subject to available project cash flows after debt service.
- Scheduled repayments of principal of the Stakeholder Loan will be made semi-annually according to a 13-year amortization profile beginning in 2020 (two years after the operational commencement date), with a final repayment date of September 30, 2032, all subject to available project cash flows after debt service.
- Voluntary prepayments are not permitted during the first five years of the Stakeholder Loan, after which the principal is pre-payable at our option in increments of 33% of the aggregate outstanding principal balance per year.
- The Stakeholder Loan is mandatorily pre-payable at the option of the Stakeholder Loan holder(s) under certain circumstances in the event of a refinancing of the Dublin Senior Term Loan and/or the Dublin Junior Term Loan.
- The Stakeholder Warrants are exercisable into ordinary shares of our subsidiary holding company that owns 100% of the project company on five conversion dates, scheduled at six month intervals, beginning on the operational commencement date, or upon a refinancing of the Dublin Credit Agreement. The warrants contain customary anti-dilution protection and are exercisable on a cashless basis at a specified conversion price on each conversion date, representing a set premium to the original subscription price for common shares (i.e., Covanta’s subscription price) that increases over time. The number of shares that can potentially be issued upon exercise is limited to a maximum of 24.99% of the outstanding shares.
- The Dublin Convertible Preferred holder(s) is entitled to nominate two out of five voting board members of the project subsidiary holding company. The right to nominate board members will be reduced with future reductions in the outstanding principal amount of the Stakeholder Loan and/or number of common shares held following conversion of the Stakeholder Warrants.

Financing Costs and Capitalized Interest

Financing costs related to the Dublin project financing totaled approximately $24 million. Interest expense paid on the Dublin project financing and costs amortized to interest expense will be capitalized during the construction phase of the project.

Variable Rate Tax-Exempt Demand Bonds due 2043 ("Variable Rate Bonds")

The Variable Rate Bonds bear interest either on a daily or weekly interest rate as determined by the remarketing agent on the basis of examination of bonds comparable to the Variable Rate Bonds known by the remarketing agent to have been priced or traded under then prevailing market conditions. As of September 30, 2014, the weekly interest rate was 0.07%.

On July 1, 2014, we issued an additional $12 million of tax-exempt corporate variable-rate demand bonds, which are secured by a letter of credit issued under our Revolving Credit Facility and will mature on July 1, 2043. Proceeds from the offering were utilized to refinance $12 million of project debt at our Delaware Valley facility due on July 1, 2014. The terms of these bonds are identical to the variable rate bonds issued in July 2013. Interest on the bonds is paid monthly on the first business day of each month beginning on August 1, 2014. Financing costs were not material.

For specific criteria related to redemption features of the Variable Rate Bonds, refer to Note 11. Consolidated Debt of the Notes to Consolidated Financial Statements in our Form 10-K.

Project Debt - North America Project Debt

Financing for the construction of our existing energy-from-waste projects in the North America segment was generally raised through tax-exempt and taxable municipal revenue bonds issued by or on behalf of the municipal

client. In the case of facilities owned by a subsidiary of ours, the municipal issuers of the bond loaned the bond proceeds to our subsidiary to pay for facility construction. At such owned facilities, project-related debt is included as "Project debt (short- and long-term)" in our consolidated financial statements. Generally, such project debt is secured by the project revenues and by the project assets including the related facility. The potential recourse to us with respect to such project debt arises primarily under the operating performance guarantees described below under Other Commitments and Factors Affecting Liquidity. As of September 30, 2014, certain of our intermediate subsidiaries had recourse liability for project debt of $44 million at our Southeast Connecticut facility, which is non-recourse to us.

Table of Contents

Project Debt — Other

Financing for international projects in which we have an ownership or operating interest is generally raised through commercial loans from local lenders; financing arranged through international banks; and/or bonds issued to institutional investors. Such debt is generally secured by the revenues generated by the project and by project assets and is without recourse to us. In most international projects, the instruments defining the rights of debt holders generally provide that the project subsidiary may not make distributions to its parent until periodic debt service obligations are satisfied and other financial covenants are complied with.

Restricted Funds Held in Trust

Restricted funds held in trust are primarily amounts received and held by third-party trustees relating to certain projects we own. We generally do not control these accounts and these funds may be used only for specified purposes. These funds primarily include debt service reserves for payment of principal and interest on project debt. Revenue funds are comprised of deposits of revenues received with respect to projects prior to their disbursement. Other funds are primarily amounts held in trust for operations, maintenance, environmental obligations, operating lease reserves in accordance with agreements with our clients, and amounts held for future scheduled distributions. Such funds are invested principally in money market funds, bank deposits and certificates of deposit, United States treasury bills and notes, United States government agency securities, and high-quality municipal bonds. Restricted fund balances are as follows (in millions):

	As of September 30, 2014		As of December 31, 2013	
	Current	Noncurrent	Current	Noncurrent
Debt service funds - principal	$24	$77	$31	$14
Debt service funds - interest	2	—	4	—
Total debt service funds	26	77	35	14
Revenue funds	3	—	3	—
Other funds	40	84	3	112
Total	$69	$161	$41	$126

Of the $229 million in total restricted funds as of September 30, 2014, approximately $101 million was designated for future payment of project debt principal.

The increase in restricted funds is primarily due to net proceeds from borrowings in September 2014 under the Dublin Junior Term Loan of approximately $63 million that were funded into escrow. The funds will be available to fund project costs after our equity investment and the Dublin Convertible Preferred have been utilized.

Capital Requirements

Our projected contractual obligations are consistent with amounts disclosed in our Form 10-K for the year ended December 31, 2013. We believe that when combined with our other sources of liquidity, including our existing cash on hand and the Revolving Credit Facility, we will generate sufficient cash over at least the next twelve months to meet operational needs, make capital expenditures, invest in the business and service debt due.

Dublin Waste-to-Energy Facility

The total investment in the Dublin Waste-to-Energy Facility is expected to be approximately €500 million, funded by a combination of third party non-recourse project financing (€375 million) and the contribution of project equity by Covanta Energy (approximately €125 million net investment through commencement of operations, including previously invested amounts towards project development and pre-construction works, which total approximately €30 million). We expect to fund the majority of our additional project equity in 2014 and 2015. Following the utilization of Covanta's equity investment for project costs, the Dublin project company will utilize committed funding from the Dublin Convertible Preferred (€75 million, anticipated funding in 2015), the Dublin Junior Term Loan (€50 million, anticipated funding in 2015 / 2016), and finally the Dublin Senior Term Loan (€250 million, anticipated in 2016 / 2017).

We plan to fund the majority of our equity investment with cash balances offshore, with any additional or interim project funding requirements to be funded with ongoing cash flow and/or capacity under the Revolving Credit Facility.

Table of Contents

Other Commitments and Factors Affecting Liquidity

Other commitments as of September 30, 2014 were as follows (in millions):

	Commitments Expiring by Period		
	Total	Less Than One Year	More Than One Year
Letters of credit issued under the Revolving Credit Facility	$163	$15	$148
Letters of credit - other	86	—	86
Surety bonds	321	—	321
Total other commitments — net	$570	$15	$555

The letters of credit were issued to secure our performance under various contractual undertakings related to our domestic and international projects, or to secure obligations under our insurance program. Each letter of credit relating to a project is required to be maintained in effect for the period specified in related project contracts, and generally may be drawn if it is not renewed prior to expiration of that period.

We believe that we will be able to fully perform under our contracts to which these existing letters of credit relate, and that it is unlikely that letters of credit would be drawn because of a default of our performance obligations. If any of these letters of credit were to be drawn by the beneficiary, the amount drawn would be immediately repayable by us to the issuing bank. If we do not immediately repay such amounts drawn under letters of credit issued under the Revolving Credit Facility, unreimbursed amounts would be treated under the Credit Facilities as either additional term loans or as revolving loans.

The surety bonds listed on the table above relate primarily to performance obligations ($305 million) and support for closure obligations of various energy projects when such projects cease operating ($16 million). Were these bonds to be drawn upon, we would have a contractual obligation to indemnify the surety company.

We have certain contingent obligations related to the 7.25% Notes, 6.375% Notes, 5.875% Notes, and Tax-Exempt Bonds. These arise as follows:

- holders may require us to repurchase their 7.25% Notes, 6.375% Notes, 5.875% Notes, and Tax-Exempt Bonds if a fundamental change occurs; and
- holders may exercise their conversion rights upon the occurrence of certain events, which would require us to pay the conversion settlement amount in cash.

For specific criteria related to redemption features of the 5.875% Notes, see Liquidity and Capital Resources above. For specific criteria related to contingent interest, conversion or redemption features of the 7.25% Notes or 6.375% Notes, see Item 8. Financial Statements And Supplementary Data — Note 11. Consolidated Debt in our Form 10-K.

As discussed in the Overview above, we are focused on developing new projects and making acquisitions to grow our business. We are pursuing additional growth opportunities through the development and construction of new waste and energy facilities. Due to permitting and other regulatory factors, these projects generally evolve over lengthy periods and project financing is generally obtained at the time construction begins, at which time, we can more accurately determine our commitment for a development project.

We have either issued or are party to guarantees and related contractual support obligations undertaken pursuant to agreements to construct and operate EfW facilities. For some projects, such performance guarantees include obligations to repay certain financial obligations if the project revenues are insufficient to do so, or to obtain or guarantee financing for a project. With respect to our businesses, we have issued guarantees to municipal clients and other parties that our subsidiaries will perform in accordance with contractual terms, including, where required, the payment of damages or other obligations. Additionally, damages payable under such guarantees for our energy-from-waste facilities could expose us to recourse liability on project debt. If we must perform under one or more of such guarantees, our liability for damages upon contract termination would be reduced by funds held in trust and proceeds from sales of the facilities securing the project debt and is presently not estimable. Depending upon the circumstances giving rise to such damages, the contractual terms of the applicable contracts, and the contract counterparty's choice of remedy at the time a claim against a guarantee is made, the amounts owed pursuant to one or

more of such guarantees could be greater than our then-available sources of funds. To date, we have not incurred material liabilities under such performance guarantees. See Item 1A. Risk Factors — We have provided guarantees and financial support in connection with our projects in our Form 10-K.

Dublin Waste-to-Energy Facility

The total investment in the Dublin Waste-to-Energy Facility is expected to be approximately €500 million, funded by a combination of third party non-recourse project financing (€375 million) and the contribution of project equity by Covanta Energy (approximately €125 million net investment through commencement of operations, including previously invested amounts towards project development and pre-construction works, which total approximately €30 million). We expect to fund the majority of our additional project equity in 2014 and 2015. Following the utilization of Covanta's equity investment for project costs, the Dublin

project company will utilize committed funding from the Dublin Convertible Preferred (€75 million, anticipated funding in 2015), the Dublin Junior Term Loan (€50 million, anticipated funding in 2015 / 2016), and finally the Dublin Senior Term Loan (€250 million, anticipated in 2016 / 2017).

We plan to fund the majority of our equity investment with cash balances offshore, with any additional or interim project funding requirements to be funded with ongoing cash flow and/or capacity under the Revolving Credit Facility.

Essex Energy-from-Waste Facility

We are implementing significant operational improvements at our Essex EfW facility, including a state-of-the-art particulate emissions control system, at a total estimated cost of $90 million. Construction on the system commenced in 2014 and is expected to be completed by 2016. As of September 30, 2014, we have approximately $78 million of capital expenditures remaining to be incurred related to these improvements. The facility's environmental performance is currently compliant with all environmental permits and will be further improved with the installation of this equipment. For additional information, see Item 8. Financial Statements And Supplementary Data — Note 3. Acquisitions and Asset Management in our Form 10-K.

New York City Waste Transport and Disposal Contract

In August 2013, New York City awarded us a contract to handle waste transport and disposal from two marine transfer stations located in Queens and Manhattan. We plan to utilize capacity at existing facilities for the disposal of an estimated 800,000 tons per year of municipal solid waste relating to this contract. Service for the Queens marine transfer station is expected to begin in early 2015, with service for the Manhattan marine transfer station expected to follow pending notice to proceed yet to be issued by New York City. The contract is for 20 years, effective from the date operations commence, with options for New York City to extend the term for two additional five-year periods, and requires waste to be transported using a multi-modal approach. We have begun to purchase equipment, including barges, rail cars, containers, and intermodal equipment to support this contract. We expect to invest approximately $140 million in new equipment and enhancements to existing facilities that support service under this contract. These investments commenced in 2013 and will be made over several years. As of September 30, 2014, we have approximately $72 million of capital expenditures remaining to be incurred relating to this contract.

Income Tax Implications on Liquidity

We had consolidated federal NOLs estimated to be $557 million for federal income tax purposes as of December 31, 2013, based on the income tax returns filed. Our federal and state NOLs act to reduce the cash taxes we pay and thus enhance our liquidity. We expect that our federal NOLs will be fully utilized over the next two to three years, and thereafter our cash tax liability for federal income tax will increase substantially as production tax credit carryforwards and minimum tax credits are utilized over the next several years after that. Our actual federal NOL utilization will be a function of numerous factors, including in particular federal tax law changes that may come into effect, the outcome of the current audit of our consolidated federal tax returns by the IRS, and any tax planning measures we are able to put into effect. For additional information, see discussion under Item 1. Financial Statements — Note 8. Income Taxes of this Form 10-Q, Item 1A. Risk Factors - We cannot be certain that our NOLs will continue to be available to offset our federal tax liability and Item 8. Financial Statements And Supplementary Data - Note 15. Income Taxes in our Form 10-K.

Other Factors Affecting Liquidity

We may from time to time engage in construction activity for public sector clients, either for new projects or expansions of existing projects. We historically receive payments for this activity based upon completion of milestones as set forth in the applicable contracts, and the timing and size of these milestone payments can result in material working capital variability between periods. This variability can in turn result in meaningful swings between periods in our Cash Flow from Operations and Free Cash Flow (which we use as a non-GAAP liquidity measure). During the nine months ended September 30, 2014 and 2013, construction working capital (reduced) increased cash flow from operations by $(40) million and $19 million, respectively. During the year ended December 31, 2013, construction working capital reduced cash flow from operations by $6 million. For the year ended December 31, 2014, we expect construction working capital to reduce cash flow from operations by $35 million to $45 million, and

then increase cash flow from operations by a similar amount during the year ended December 31, 2015 when we receive final payments related to our Durham York construction project. For additional information related to Cash Flow from Operations see Liquidity and Capital Resources — Sources and Uses of Cash Flow for the Nine Months Ended September 30, 2014 and 2013 and Liquidity and Capital Resources — Supplementary Financial Information — Free Cash Flow (Non-GAAP Discussion) above.

Our capital structure includes multiple debt securities and credit facilities, each with different maturity dates. As and when we refinance each element of our capital structure, we may consider utilizing the same or different types of debt securities and credit facilities, depending upon market conditions and general business requirements. Our selection of the same or different refinancing structures could materially increase or decrease our annual cash interest expense in future periods.

Recent Accounting Pronouncements

See Item 1. Financial Statements — Note 2. Recent Accounting Pronouncements for information related to new accounting pronouncements.

Discussion of Critical Accounting Policies and Estimates

In preparing our condensed consolidated financial statements in accordance with United States Generally Accepted Accounting Principles (“GAAP”), we are required to use judgment in making estimates and assumptions that affect the amounts reported in our financial statements and related Notes. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances. These estimates form the basis for making judgments about the carrying value of assets and liabilities that are not readily apparent from other sources. Many of our critical accounting policies are subject to significant judgments and uncertainties which could potentially result in materially different results under different conditions and assumptions. Future events rarely develop exactly as forecast, and the best estimates routinely require adjustment. Management believes there have been no material changes during the nine months ended September 30, 2014 to the items discussed in Discussion of Critical Accounting Policies in Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations of our Annual Report on Form 10-K for the year ended December 31, 2013.

Table of Contents

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

In the normal course of business, our subsidiaries are party to financial instruments that are subject to market risks arising from changes in commodity prices, interest rates, foreign currency exchange rates, and derivative instruments. Our use of derivative instruments is very limited and we do not enter into derivative instruments for trading purposes. Except as discussed below, there have been no material changes during the nine months ended September 30, 2014 to the items discussed in Item 7A. Quantitative and Qualitative Disclosures About Market Risk in our Annual Report on Form 10-K for the year ended December 31, 2013.

Cash Conversion Option, Note Hedge and Contingent Interest related to the 3.25% Cash Convertible Senior Notes

The $460 million of 3.25% Cash Convertible Senior Notes matured on June 1, 2014. Upon maturity, we were required to pay $83 million to satisfy the obligation under the Cash Conversion Option in addition to the principal amount of the 3.25% Notes. We cash- settled the Note Hedge for $83 million effectively offsetting our liability under the Cash Conversion Option. The income recognized as a result of changes in the credit valuation adjustment related to the Note Hedge was not material.

For additional information related to the settlement of the 3.25% Notes, Cash Conversion Option, and Note Hedge, see Item 1. Financial Statements — Note 7. Consolidated Debt and Note 12. Derivative Instruments.

Interest Rate Swap

In order to hedge the risk of adverse variable interest rate fluctuations associated with the Dublin Project Senior Term Loan entered into in connection with our Dublin project financing, we have entered into floating to fixed rate swap agreements with various financial institutions terminating between 2016 and 2021, denominated in Euros, for the full €250 million loan amount. This interest rate swap is designated as a cash flow hedge which is recorded at fair value as a current liability with changes in fair value recorded as a component of Accumulated Other Comprehensive Income ("AOCI"). As of September 30, 2014, the fair value of the interest rate swap derivative of $7 million, pre-tax, was recorded as a current liability. For additional information, see Item 1. Financial Statements — Note 12. Derivative Instruments.

Item 4. CONTROLS AND PROCEDURES

Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of Covanta’s disclosure controls and procedures, as required by Rule 13a-15(b) and 15d-15(b) under the Securities Exchange Act of 1934 (the “Exchange Act”) as of September 30, 2014. Our disclosure controls and procedures are designed to reasonably assure that information required to be disclosed by us in reports we file or submit under the Exchange Act is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding disclosure and is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission’s rules and forms.

Our Chief Executive Officer and Chief Financial Officer have concluded that, based on their reviews, our disclosure controls and procedures are effective to provide such reasonable assurance.

Our management, including our Chief Executive Officer and Chief Financial Officer, believes that any disclosure controls and procedures or internal controls and procedures, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must consider the benefits of controls relative to their costs. Inherent limitations within a control system include the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people, or by unauthorized override of the control. While the design of any system of controls is to provide reasonable assurance of the effectiveness of disclosure controls, such design is also based in part upon certain assumptions about the likelihood of future events, and such assumptions, while reasonable, may not take into account all potential future conditions. Accordingly, because of the inherent limitations in a cost effective control system, misstatements due to error or fraud may occur and may not be prevented or detected.

Changes in Internal Control over Financial Reporting

There has not been any change in our system of internal control over financial reporting during the fiscal quarter ended September 30, 2014 that has materially affected, or is reasonably likely to materially affect, internal control over financial reporting.

PART II — OTHER INFORMATION

Item 1. LEGAL PROCEEDINGS

For information regarding legal proceedings, see Item 1. Financial Statements — Note 13. Commitments and Contingencies, which information is incorporated herein by reference.

Item 1A. RISK FACTORS

There have been no material changes during the nine months ended September 30, 2014 to the risk factors discussed in Item 1A. Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2013.

Item 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

During the three months ended September 30, 2014, 156,732 shares of our common stock were issued in connection with exercises of warrants issued in connection with the 3.25% Notes offering. The warrant exercises were net share settled, meaning that we delivered to the warrant holders a number of shares for each warrant equal to the excess (if any) of the volume weighted average price of our common stock on each exercise date over the then effective strike price of the warrants, divided by such volume-weighted average price of our common stock, with a cash payment in lieu of fractional shares. Accordingly, we did not receive any proceeds from the exercise of the warrants. The shares of common stock issued upon exercise of the warrants were issued in reliance on the exemption from registration provided by Section 3(a)(9) of the Securities Act of 1933, as amended, and no underwriters were used in connection with the warrant exercises. For additional information related to the warrants, see Part I. Financial Statements - Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity - 3.25% Cash Convertible Senior Notes due 2014.

During the nine months ended September 30, 2014, we withheld 216,477 shares of our common stock in connection with tax withholdings for vested stock awards.

Item 3. DEFAULTS UPON SENIOR SECURITIES

None.

Item 4. MINE SAFETY DISCLOSURES

Not applicable.

Item 5. OTHER INFORMATION

(a) None.

(b) Not applicable.

Item 6. EXHIBITS

Exhibit Number	Description
