Index

UNITED STATES SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

(Mark One)

Quarterly Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

For the quarterly period ended April 30, 2018

Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

Commission File Number: 0-7928

(Exact name of registrant as specified in its charter)

Delaware

11-2139466

(State or other jurisdiction of incorporation /organization) (I.R.S. Employer Identification Number)

68 South Service Road, Suite 230,

Melville, NY

11747

(Address of principal executive offices)

(Zip Code)

(631) 962-7000

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data file required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Emerging growth company

Non-accelerated filer Smaller reporting company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

APPLICABLE ONLY TO CORPORATE ISSUERS:

As of June 1, 2018, the number of outstanding shares of Common Stock, par value \$.10 per share, of the registrant was 23,641,984 shares.

COMTECH TELECOMMUNICATIONS CORP. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

(1) General

The accompanying condensed consolidated financial statements of Comtech Telecommunications Corp. and its subsidiaries ("Comtech," "we," "us," or "our") as of and for the three and nine months ended April 30, 2018 and 2017 are unaudited. In the opinion of management, the information furnished reflects all material adjustments (which include normal recurring adjustments) necessary for a fair presentation of the results for the unaudited interim periods. Our results of operations for such periods are not necessarily indicative of the results of operations to be expected for the full fiscal year.

The preparation of our condensed consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires us to make estimates and assumptions that affect the reported amount of assets and liabilities, and disclosure of contingent assets and liabilities, at the date of the condensed consolidated financial statements, and the reported amounts of net sales and expenses during the reported period. Actual results may differ from those estimates.

Our condensed consolidated financial statements should be read in conjunction with our audited consolidated financial statements, filed with the Securities and Exchange Commission ("SEC"), for the fiscal year ended July 31, 2017 and the notes thereto contained in our Annual Report on Form 10-K, and all of our other filings with the SEC.

As disclosed in more detail in Note (14) - "Segment Information," we manage our business in two reportable segments: Commercial Solutions and Government Solutions.

Certain reclassifications have been made to previously reported condensed consolidated financial statements to conform to the current fiscal period presentation.

(2) Adoption of Accounting Standards and Updates

We are required to prepare our condensed consolidated financial statements in accordance with the Financial Accounting Standard Board ("FASB") Accounting Standards Codification ("ASC") which is the source for all authoritative U.S. generally accepted accounting principles, which are commonly referred to as "GAAP." The FASB ASC is subject to updates by the FASB, which are known as Accounting Standards Updates ("ASUs"). During the nine months ended April 30, 2018, we adopted:

FASB ASU 2016-09 "Compensation - Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting" ("ASU 2016-09"), which amends several aspects of the accounting for and reporting of share-based payment transactions. Our adoption of this ASU, on August 1, 2017, did not have a material impact on our condensed consolidated financial statements. See Note (12) - "Stock-Based Compensation" for further information regarding our adoption of this ASU.

FASB ASU No. 2016-15 "Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments" ("ASU 2016-15"), issued in August 2016, which amends the guidance on the following cash flow related issues: debt prepayment or debt extinguishment costs; settlement of zero-coupon and similar type debt instruments; contingent consideration payments made after a business combination; proceeds from the settlement of insurance claims (including those related to certain life insurance policies); distributions received from equity method investees; beneficial interests in securitization transactions; and cash receipts or payments with more than one class of cash

flows. Our adoption of this ASU on February 1, 2018 did not have any impact on our condensed consolidated financial statements.

FASB ASU No. 2017-09 "Compensation - Stock Compensation (Topic 718)" ("ASU 2017-09"), issued in May 2017, which provides guidance about which changes to the terms or conditions of a share-based payment award require an entity to apply modification accounting in ASC Topic 718. An entity would not be required to account for changes to the terms or conditions of a share-based payment award as a modification if there were no changes to the award's fair value, vesting conditions and classification. Our adoption of this ASU on February 1, 2018 did not have any impact on our condensed consolidated financial statements.

COMTECH TELECOMMUNICATIONS CORP. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

(Unaudited)

(3) Fair Value Measurements and Financial Instruments

Using the fair value hierarchy described in FASB ASC 820 "Fair Value Measurements and Disclosures," we valued our cash and cash equivalents using Level 1 inputs that were based on quoted market prices.

We believe that the carrying amounts of our other current financial assets (such as accounts receivable) and other current liabilities (including accounts payable, accrued expenses and the current portions of our Secured Credit Facility and favorable AT&T warranty settlement) approximate their fair values due to their short-term maturities.

The fair value of the non-current portion of our Secured Credit Facility as of April 30, 2018 approximates its carrying amount due to its variable interest rate and pricing grid that is dependent upon our leverage ratio as of the end of each fiscal quarter. We believe the fair value of our non-current portion of capital lease and other obligations, which currently has a blended interest rate of 6.0%, would not be materially different than its carrying value as of April 30, 2018.

The fair value of the non-current portion of our favorable AT&T warranty settlement would not be materially different than its carrying value as of April 30, 2018, given our belief that the present value of such liability reflects market participants' assumptions for a similar junior, unsecured debt instrument. See Note (7) - "Accrued Expenses and Other Current Liabilities" for further discussion of the favorable AT&T warranty settlement.

As of April 30, 2018 and July 31, 2017, other than the financial instruments discussed above, we had no other significant assets or liabilities included in our Condensed Consolidated Balance Sheets recorded at fair value, as such term is defined by FASB ASC 820.

(4) Earnings Per Share

Our basic earnings per share ("EPS") is computed based on the weighted average number of common shares (including vested but unissued stock units, share units, performance shares and restricted stock units ("RSUs")), outstanding during each respective period. Our diluted EPS reflects the dilution from potential common stock issuable pursuant to the exercise of equity-classified stock-based awards, if dilutive, outstanding during each respective period. Pursuant to FASB ASC 260 "Earnings Per Share," equity-classified stock-based awards that are subject to performance conditions are not considered in our diluted EPS calculations until the respective performance conditions have been satisfied. When calculating our diluted earnings per share, we consider the amount an employee must pay upon assumed exercise of stock-based awards and the amount of stock-based compensation cost attributed to future services and not yet recognized. On August 1, 2017, we adopted ASU 2016-09, which amends several aspects of the accounting for and reporting of share-based payment transactions. As a result of our adoption of ASU 2016-09, the amount of excess tax benefits assuming exercise of in-the-money stock-based awards is no longer included in the calculation of diluted earnings per share on a prospective basis and the denominator for our diluted calculations could increase in the future as compared to prior calculations. See Note (12) - "Stock-Based Compensation" for more information on the impact of adopting ASU 2016-09.

There were no purchases of our common stock during the nine months ended April 30, 2018 or 2017. See Note (17) - "Stockholders' Equity" for more information.

Weighted average stock options, RSUs and restricted stock outstanding of 1,505,000 and 1,912,000 for the three months ended April 30, 2018 and 2017, respectively, and 1,804,000 and 2,227,000 for the nine months ended April 30, 2018 and 2017, respectively, were not included in our diluted EPS calculation because their effect would have been anti-dilutive.

Our EPS calculations exclude 260,000 and 227,000 weighted average performance shares outstanding for the three months ended April 30, 2018 and 2017, respectively, and 257,000 and 233,000 weighted average performance shares outstanding for the nine months ended April 30, 2018 and 2017, respectively, as the performance conditions have not yet been satisfied. However, the compensation expense related to these awards is included in net income (the numerator) for EPS calculations for each respective period.

The following table reconciles the numerators and denominators used in the basic and diluted EPS calculations:

	Three months ended		Nine months ended	
	April 30,		April 30,	
	2018	2017	2018	2017
Numerator:				
Net income for basic calculation	\$8,210,000	4,417,000	22,311,000	8,513,000
Numerator for diluted calculation	\$8,210,000	4,417,000	22,311,000	8,513,000
Denominator:				
Denominator for basic calculation	23,834,000	23,449,000	23,819,000	23,420,000
Effect of dilutive securities:				
Stock-based awards	218,000	54,000	180,000	29,000
Denominator for diluted calculation	24,052,000	23,503,000	23,999,000	23,449,000

(5) Accounts Receivable

Accounts receivable consist of the following at:

	April 30, 2018	July 31, 2017
Billed receivables from commercial and international customers	\$72,889,000	71,404,000
Unbilled receivables from commercial and international customers	18,184,000	24,668,000
Billed receivables from the U.S. government and its agencies	22,020,000	18,497,000
Unbilled receivables from the U.S. government and its agencies	15,780,000	11,693,000
Total accounts receivable	128,873,000	126,262,000
Less allowance for doubtful accounts	1,606,000	1,300,000
Accounts receivable, net	\$127,267,000	124,962,000

Unbilled receivables relate to contracts-in-progress for which revenue has been recognized but we have not yet billed the customer for work performed. We had \$130,000 and \$118,000 of retainage included in unbilled receivables at April 30, 2018 and July 31, 2017, respectively, and management estimates that substantially all of the unbilled receivables at April 30, 2018 will be billed and collected within one year. Of the unbilled receivables from commercial and international customers at April 30, 2018 and July 31, 2017, approximately \$1,049,000 and \$2,995,000, respectively, relates to a large over-the-horizon microwave system contract with our large U.S. prime contractor customer (all of which related to our North African country end-customer).

As of April 30, 2018, the U.S. government (and its agencies) and Verizon Communications Inc. (through various divisions and, collectively, "Verizon") represented 29.3% and 14.5%, respectively, of total accounts receivable. As of July 31, 2017, except for the U.S. government (and its agencies), which represented 23.9% of total accounts receivable, there were no other customers which accounted for greater than 10.0% of total accounts receivable.

(6) Inventories

Inventories consist of the following at:

	April 30, 2018	July 31, 2017
Raw materials and components	\$55,128,000	50,569,000
Work-in-process and finished goods	37,149,000	26,053,000
Total inventories	92,277,000	76,622,000
Less reserve for excess and obsolete inventories	15,723,000	16,019,000
Inventories, net	\$76,554,000	60,603,000

Index

COMTECH TELECOMMUNICATIONS CORP. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

(Unaudited)

As of April 30, 2018 and July 31, 2017, the amount of inventory directly related to long-term contracts (including contracts-in-progress) was \$1,008,000 and \$2,148,000, respectively.

As of April 30, 2018 and July 31, 2017, \$1,722,000 and \$1,718,000, respectively, of the inventory balance above related to contracts from third party commercial customers who outsource their manufacturing to us.

(7) Accrued Expenses and Other Current Liabilities

Accrued expenses and other current liabilities consist of the following at:

	April 30, 2018	July 31, 2017
Accrued wages and benefits	\$23,720,000	19,622,000
Accrued warranty obligations	12,499,000	17,617,000
Accrued contract costs	8,705,000	8,644,000
Accrued legal costs	7,882,000	8,402,000
Accrued commissions and royalties	3,549,000	3,600,000
Other	9,903,000	10,725,000
Accrued expenses and other current liabilities	\$66,258,000	68,610,000

Accrued legal costs as of April 30, 2018 and July 31, 2017 include \$3,377,000 and \$4,120,000, respectively, related to estimated costs associated with certain TeleCommunication Systems, Inc. ("TCS") intellectual property matters. The accrued potential settlement costs do not reflect the final amounts we may actually pay. Ongoing legal costs associated with defending legacy TCS intellectual property matters and the ultimate resolution could vary and have a material adverse effect on our future consolidated results of operations, financial position or cash flows. TCS intellectual property matters are discussed in more detail in Note (18) - "Legal Proceedings and Other Matters."

Accrued contract costs represent direct and indirect costs on contracts as well as estimates of amounts owed for invoices not yet received from vendors or reflected in accounts payable.

Accrued warranty obligations relate to estimated liabilities for warranty coverage that we provide to our customers. We generally provide warranty coverage for some of our products for a period of at least one year from the date of delivery. We record a liability for estimated warranty expense based on historical claims, product failure rates, a consideration of contractual obligations, future costs to resolve software issues and other factors. Some of our product warranties are provided under long-term contracts, the costs of which are incorporated into our estimates of total contract costs.

Changes in our current accrued warranty obligations during the nine months ended April 30, 2018 and 2017 were as follows:

	Nine months ended April 30,	
	2018	2017
Balance at beginning of period	\$17,617,000	15,362,000
Provision for warranty obligations	4,292,000	4,147,000
Charges incurred	(6,311,000)	(5,486,000)

Warranty settlement and reclass (see below)	(3,099,000)	—
Adjustments to TCS pre-acquisition contingent liability	—	4,200,000
Balance at end of period	\$ 12,499,000	18,223,000

10

Index

COMTECH TELECOMMUNICATIONS CORP. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

(Unaudited)

Our current accrued warranty obligations at April 30, 2018 and July 31, 2017 include \$4,946,000 and \$9,909,000, respectively, of warranty obligations for a small product line that we refer to as the TCS 911 call handling software solution. This solution was licensed to customers prior to our acquisition of TCS. During the nine months ended April 30, 2018, we entered into a full and final warranty settlement with AT&T, the largest customer/distributor of this product line, pursuant to which we issued thirty-six credits to AT&T of \$153,000 which AT&T can apply on a monthly basis to purchases of solutions from us, beginning October 2017 through September 2020. As of April 30, 2018, the total present value of these monthly credits is \$3,992,000, of which \$1,553,000 is included in our current accrued warranty obligations and \$2,439,000 is reflected in other liabilities (non-current) on our Condensed Consolidated Balance Sheet. In connection with this favorable settlement, during the nine months ended April 30, 2018, we recorded a benefit to cost of sales of \$660,000.

(8) Acquisition-Related Restructuring Plans

Radyne

In connection with our August 1, 2008 acquisition of Radyne, we adopted a restructuring plan for which we recorded \$2,713,000 of estimated restructuring costs. Of this amount, \$613,000 related to severance for Radyne employees which was paid in fiscal 2009. The remaining estimated amounts relate to facility exit costs and were determined as follows:

	At August 1, 2008
Total non-cancelable lease obligations	\$ 12,741,000
Less: Estimated sublease income	8,600,000
Total net estimated facility exit costs	4,141,000
Less: Interest expense to be accreted	2,041,000
Present value of estimated facility exit costs	\$ 2,100,000

Our total non-cancelable lease obligations were based on the actual lease term which runs from November 1, 2008 through October 31, 2018. We estimated sublease income based on (i) the terms of a fully executed sublease agreement that expired on October 31, 2015, and (ii) our assessment of future uncertainties relating to the commercial real estate market. Based on our assessment of commercial real estate market conditions, we currently believe that it is not probable that we will be able to sublease the facility for the remaining lease term. As such, in accordance with grandfathered accounting standards that were not incorporated into the FASB's ASC, we recorded these costs, at fair value, as assumed liabilities as of August 1, 2008, with a corresponding increase to goodwill.

As of April 30, 2018, the amount of the acquisition-related restructuring reserve is as follows:

	Cumulative Activity Through April 30, 2018
Present value of estimated facility exit costs at August 1, 2008	\$2,100,000
Cash payments made	(11,802,000)
Cash payments received	8,600,000
Accreted interest recorded	1,905,000

Liability recorded as of period end as accrued expenses and other current liabilities in the Condensed Consolidated Balance Sheet	\$803,000
---	-----------

As of July 31, 2017, the present value of the estimated facility exit costs was \$1,941,000. During the nine months ended April 30, 2018, we made cash payments of \$1,214,000. Interest accreted for the three and nine months ended April 30, 2018 and 2017 was \$19,000 and \$76,000, respectively, and \$44,000 and \$151,000, respectively, and is included in interest expense for each respective fiscal period.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

(Unaudited)

Future cash payments associated with our restructuring plan are summarized below:

	As of
	April 30,
	2018
Future lease payments to be made	\$803,000
Interest expense to be accreted in future periods	136,000
Total remaining payments	\$939,000

TCS and Cost Reduction Activities

In connection with our February 23, 2016 acquisition of TCS, we continue to implement a tactical shift in strategy in our Government Solutions segment and have initiated certain cost reduction actions. We continue to evaluate and implement cost reduction initiatives to reduce unnecessary spending, reduce the size and cost of our facilities and improve productivity. To date, we have incurred an immaterial amount of severance and retention costs related to our shift in strategy.

(9) Secured Credit Facility

On February 23, 2016, in connection with our acquisition of TCS, we entered into a \$400,000,000 secured credit facility (the "Secured Credit Facility") with a syndicate of lenders. The Secured Credit Facility, as amended June 6, 2017 (the "June 2017 Amendment"), comprises a senior secured term loan A facility of \$250,000,000 (the "Term Loan Facility") and a secured revolving loan facility of up to \$150,000,000, including a \$25,000,000 letter of credit sublimit (the "Revolving Loan Facility") and, together with the Term Loan Facility, matures on February 23, 2021. The proceeds of these borrowings were primarily used to finance our acquisition of TCS, including the repayment of certain existing indebtedness of TCS. The Term Loan Facility requires mandatory quarterly repayments. During the nine months ended April 30, 2018 and 2017, we repaid \$14,657,000 and \$7,747,000, respectively, principal amount of borrowings under the Term Loan Facility. Under the Revolving Loan Facility, we had outstanding balances ranging from \$41,904,000 to \$66,804,000 during the nine months ended April 30, 2018.

As of April 30, 2018 and July 31, 2017, amounts outstanding under our Secured Credit Facility, net, were as follows:

	April 30, 2018	July 31, 2017
Term Loan Facility	\$124,423,000	139,080,000
Less unamortized deferred financing costs related to Term Loan Facility	3,760,000	4,763,000
Term Loan Facility, net	120,663,000	134,317,000
Revolving Loan Facility	58,404,000	57,405,000
Amount outstanding under Secured Credit Facility, net	179,067,000	191,722,000
Less current portion of long-term debt	17,211,000	15,494,000
Non-current portion of long-term debt	\$161,856,000	176,228,000

Interest expense, including amortization of deferred financing costs, recorded during the three and nine months ended April 30, 2018 and 2017 related to the Secured Credit Facility was \$2,351,000 and \$7,166,000, respectively, and \$2,641,000 and \$8,524,000, respectively, and reflects a blended interest rate of approximately 5.49% and 4.83% for the three months ended April 30, 2018 and 2017, respectively, and 5.29% and 4.80% for the nine months ended April 30, 2018 and 2017, respectively.

At April 30, 2018, we had \$3,268,000 of standby letters of credit outstanding under our Secured Credit Facility, as amended, related to our guarantees of future performance on certain customer contracts and no outstanding commercial letters of credit.

Index

COMTECH TELECOMMUNICATIONS CORP. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

(Unaudited)

The Revolving Loan Facility is primarily used for working capital and other general corporate purposes of the Company and its subsidiaries, including the issuance of letters of credit. Borrowings under the Secured Credit Facility, pursuant to terms defined in the Secured Credit Facility, shall be either (i) Alternate Base Rate ("ABR") borrowings, which bear interest from the applicable borrowing date at a rate per annum equal to (x) the greatest of (a) the Prime Rate in effect on such day, (b) the Federal Funds Effective Rate in effect on such day plus 0.50% per annum and (c) the Adjusted LIBO Rate on such day (or, if such day is not a business day, the immediately preceding business day) plus 1.00% per annum (provided that if the LIBO Rate is less than 1.00%, then the LIBO Rate shall be deemed to be 1.00%), plus (y) the Applicable Rate, or (ii) Eurodollar borrowings, which bear interest from the applicable borrowing date at a rate per annum equal to (x) the Adjusted LIBO Rate for such interest period (provided that if the LIBO Rate is less than 1.00%, then the LIBO Rate shall be deemed to be 1.00%) plus (y) the Applicable Rate. The Applicable Rate is determined based on a pricing grid that is dependent upon our leverage ratio as of the end of each fiscal quarter. The Secured Credit Facility contains customary representations, warranties and affirmative covenants and customary negative covenants, subject to negotiated exceptions, on (i) liens, (ii) investments, (iii) indebtedness, (iv) significant corporate changes, including mergers and acquisitions, (v) dispositions, (vi) restricted payments, including stockholder dividends, and (vii) certain other restrictive agreements. The Secured Credit Facility also contains certain financial covenants and customary events of default (subject to grace periods, as appropriate), such as payment defaults, cross-defaults to other material indebtedness, bankruptcy and insolvency, the occurrence of a defined change in control and the failure to observe the negative covenants and other covenants related to the operation of our business.

The June 2017 Amendment is expected to result in increased operating and acquisition flexibility and simplify the calculations of our financial covenants. The June 2017 Amendment resulted in, among other things, that the:

- (i) Consolidated EBITDA definition more closely aligns with our Adjusted EBITDA metric by eliminating favorable adjustments to operating income related to settlements of TCS intellectual property matters;

- (ii) Leverage Ratio is calculated on a "gross" basis using the quotient of Total Indebtedness (excluding unamortized deferred financing costs) divided by our trailing twelve month ("TTM") Consolidated EBITDA. The prior Leverage Ratio was calculated on a "net" basis but did not include a reduction for any cash or cash equivalents above \$50,000,000;

- (iii) Fixed Charge Coverage Ratio includes a deduction for all cash dividends, regardless of the amount of our cash and cash equivalents and the related allowable Quarterly Dividend Amount, as defined, will now align with our current quarterly dividend target of \$0.10 per common share;

- (iv) Balloon or final payment of the Term Loan Facility (which is not due until February 23, 2021) was reduced by \$22,500,000 through increased borrowings from the Revolving Loan Facility (which does not expire until February 23, 2021); and

- (v) Leverage Ratios will be adjusted, in certain conditions, to provide for additional flexibility for us to make acquisitions.

In connection with the June 2017 Amendment, there were no changes to: (i) the committed borrowing capacity; (ii) the maturity date; or (iii) interest rates payable (except that the interest rate pricing grid will now be based on the new Leverage Ratio). Also, the June 2017 Amendment did not result in an extinguishment for accounting purposes (as

such term is defined in ASC 470 - "Debt"); instead, the June 2017 Amendment was accounted for as a debt modification. As a result, deferred financing costs (including incremental fees for the June 2017 Amendment) will continue to be amortized over the remaining maturity term of the Secured Credit Facility.

As of April 30, 2018, our Leverage Ratio was 2.43x TTM Consolidated EBITDA compared to the maximum allowable Leverage Ratio of 3.10x TTM Consolidated EBITDA. During the fourth quarter of fiscal 2018, the maximum allowable Leverage Ratio will decrease to 3.00x TTM Consolidated EBITDA, with no further reductions thereafter. Our Fixed Charge Coverage Ratio as of April 30, 2018 was 2.36x compared to the minimum required Fixed Charge Coverage Ratio of 1.25x. The Fixed Charge Coverage Ratio will not change for the remaining term of the Secured Credit Facility, as amended. Given our expected future business performance, we anticipate maintaining compliance with the terms and financial covenants in our Secured Credit Facility, as amended, for the foreseeable future.

Index

COMTECH TELECOMMUNICATIONS CORP. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

(Unaudited)

The obligations under the Secured Credit Facility, as amended, are guaranteed by certain of our domestic subsidiaries (the "Subsidiary Guarantors"). As collateral security for amounts outstanding under our Secured Credit Facility, as amended, and the guarantees thereof, we and our Subsidiary Guarantors have granted to an administrative agent, for the benefit of the lenders, a lien on, and first priority security interest in, substantially all of our tangible and intangible assets.

Capitalized terms used but not defined herein have the meanings set forth for such terms in the Secured Credit Facility, dated as of February 23, 2016, and the First Amendment of the Secured Credit Facility, dated as of June 6, 2017, both of which have been documented and filed with the SEC.

(10) Capital Lease and Other Obligations

We lease certain equipment under capital leases. As of April 30, 2018 and July 31, 2017, the net book value of the leased assets which collateralize the capital lease and other obligations was \$3,294,000 and \$5,419,000, respectively, and consisted primarily of machinery and equipment. Depreciation of leased assets is included in depreciation expense.

As of April 30, 2018, our capital lease and other obligations reflect a blended interest rate of approximately 6.0%. Our capital leases generally contain provisions whereby we can purchase the equipment at the end of the lease for a one dollar buyout.

Future minimum payments under capital lease and other obligations consisted of the following at April 30, 2018:

Remainder of fiscal 2018	\$ 997,000
Fiscal 2019	1,955,000
Fiscal 2020	780,000
Fiscal 2021 and beyond	—
Total minimum lease payments	3,732,000
Less: amounts representing interest	199,000
Present value of net minimum lease payments	3,533,000
Current portion of capital lease and other obligations	2,540,000
Non-current portion of capital lease and other obligations	\$ 993,000

(11) Income Taxes

On December 22, 2017, H.R.1, also known as the Tax Cuts and Jobs Act ("Tax Reform"), was enacted in the U.S. Tax Reform significantly lowered the amount of our current and future income tax expense primarily due to the reduction in the U.S. statutory income tax rate from 35.0% to 21.0%. This provision went into effect on January 1, 2018 and required us to remeasure our deferred tax assets and liabilities. In fiscal 2019 and beyond, Tax Reform will result in the loss of our ability to take the domestic production activities deduction, which has been repealed, and is also likely to result in lower tax deductions for certain executive compensation expenses.

For fiscal 2018, we will be subject to a 35.0% statutory income tax rate with respect to the period August 1, 2017 through December 31, 2017 and a 21.0% statutory income tax rate with respect to the period January 1, 2018 through July 31, 2018, or a blended statutory income tax rate for fiscal 2018 of approximately 27.0%. As such, our effective tax rate for accounting purposes in fiscal 2018, excluding discrete items, is now expected to approximate 27.0%. We

expect to fully benefit from the lower statutory income tax rate in fiscal 2019 and thereafter.

During the nine months ended April 30, 2018, we recorded an estimated net discrete tax benefit of \$14,071,000 which, as a result of Tax Reform, primarily related to the remeasurement of deferred tax liabilities associated with non-deductible amortization related to intangible assets. The remeasurement was recorded pursuant to ASC 740 "Income Taxes" and SEC Staff Accounting Bulletin ("SAB") 118, using estimates based on reasonable and supportable assumptions and available information as of the reporting date. As such, we expect to finalize this net discrete tax benefit during the remainder of fiscal 2018. In addition, it is possible that the Internal Revenue Service ("IRS") will issue clarifying or interpretive guidance related to Tax Reform, which may ultimately result in a change to our estimated income tax.

Index

COMTECH TELECOMMUNICATIONS CORP. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

(Unaudited)

At April 30, 2018 and July 31, 2017, total unrecognized tax benefits were \$9,263,000 and \$8,681,000, respectively, including interest of \$181,000 and \$95,000, respectively. At April 30, 2018 and July 31, 2017, \$2,592,000 and \$2,515,000, respectively, of our unrecognized tax benefits were recorded as non-current income taxes payable in our Condensed Consolidated Balance Sheets. The remaining unrecognized tax benefits of \$6,671,000 and \$6,166,000 at April 30, 2018 and July 31, 2017, respectively, were presented as an offset to the associated non-current deferred tax assets in our Condensed Consolidated Balance Sheets. Of the total unrecognized tax benefits, \$8,517,000 and \$7,727,000, at April 30, 2018 and July 31, 2017, respectively, net of the reversal of the federal benefit recognized as a deferred tax asset relating to state reserves, excluding interest, would favorably impact our effective tax rate, if recognized. Unrecognized tax benefits result from income tax positions taken or expected to be taken on our income tax returns for which a tax benefit has not been recorded in our condensed consolidated financial statements. Our policy is to recognize interest and penalties relating to uncertain tax positions in income tax expense.

Since November 2017, our federal income tax return for fiscal 2016 has been under audit by the IRS. The audit is ongoing and we are unaware of any proposed adjustments by the IRS. Our federal income tax return for fiscal 2015 is also subject to potential future IRS audit. None of our state income tax returns prior to fiscal 2013 are subject to audit. TCS's federal income tax returns for tax years 2014 and 2015 and the tax period from January 1, 2016 to February 23, 2016 are subject to potential IRS audit. None of TCS's state income tax returns prior to calendar year 2013 are subject to audit. The results of the IRS tax audit for fiscal 2016, future tax assessments or settlements could have a material adverse effect on our consolidated results of operations and financial condition.

(12) Stock Based Compensation

Overview

We issue stock-based awards to certain of our employees and our Board of Directors pursuant to our 2000 Stock Incentive Plan, as amended, (the "Plan") and our 2001 Employee Stock Purchase Plan (the "ESPP"), and recognize related stock-based compensation in our condensed consolidated financial statements. The Plan provides for the granting to employees and consultants of Comtech (including prospective employees and consultants): (i) incentive and non-qualified stock options, (ii) restricted stock units ("RSUs"), (iii) RSUs with performance measures (which we refer to as "performance shares"), (iv) restricted stock, (v) stock units (reserved for issuance to non-employee directors) and share units (reserved for issuance to employees) (collectively, "share units") and (vi) stock appreciation rights ("SARs"), among other types of awards. Our non-employee directors are eligible to receive non-discretionary grants of stock-based awards, subject to certain limitations.

On August 1, 2017, we adopted ASU 2016-09, which amended several aspects of the accounting for and reporting of our share-based payment transactions, including:

Excess tax benefits and shortfalls - ASU 2016-09 requires that all tax effects related to our share-based awards be recognized in the Condensed Consolidated Statement of Operations. ASU 2016-09 also removes the prior requirement to delay recognition of excess tax benefits until it reduces current taxes payable; instead, we are now required to recognize excess tax benefits as discrete items in the interim period in which they occur, subject to normal valuation allowance considerations. As ASU 2016-09 eliminated the concept of accumulated hypothetical tax benefits, excess tax benefits and shortfalls are no longer recognized in stockholders' equity. As a result, ASU 2016-09 is expected to result in future volatility of our income tax expense (as the future tax effects of share-based awards will be dependent on the price of our common stock at the time of settlement). Additionally, on a prospective basis, excess income tax

benefits from the settlement of share-based awards are presented as a cash inflow from operating activities in our Condensed Consolidated Statement of Cash Flows.

Diluted earnings per share - Prior to the adoption of ASU 2016-09, in addition to considering the amount an employee must pay upon assumed exercise of stock-based awards and the amount of stock-based compensation cost attributed to future services and not yet recognized, when calculating our diluted earnings per share, the assumed proceeds also included the amount of excess tax benefits, if any, that would have been credited to additional paid-in capital assuming exercise of in-the-money stock-based awards. Effective with our adoption of ASU 2016-09, excess tax benefits are to be excluded from the calculation on a prospective basis. As a result, the denominator for our diluted calculations could increase in the future as compared to prior calculations.

Index

COMTECH TELECOMMUNICATIONS CORP. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

(Unaudited)

Forfeitures - As permitted by ASU 2016-09, we elected to continue to estimate forfeitures of share-based awards.

Statutory Tax Withholding Requirements - ASU 2016-09 now allows us, when net settling share-based awards, to withhold an amount up to the employees' maximum individual tax rate in the relevant jurisdiction, without resulting in liability classification of the award. To qualify, we must have at least some withholding obligation. This aspect of adopting ASU 2016-09 did not have any material impact on us. However, with respect to cash payments that we make to taxing authorities on behalf of employees for such shares withheld, on a retrospective basis, we are required to present such payments as a cash outflow from financing activities in our Condensed Consolidated Statements of Cash Flows (as opposed to operating activities).

As of April 30, 2018, the aggregate number of shares of common stock which may be issued, pursuant to the Plan, may not exceed 10,362,500. Stock options granted may not have a term exceeding ten years or, in the case of an incentive stock award granted to a stockholder who owns stock representing more than 10.0% of the voting power, no more than five years. We expect to settle all outstanding awards under the Plan and employee purchases under the ESPP with the issuance of new shares of our common stock.

As of April 30, 2018, we had granted stock-based awards pursuant to the Plan representing the right to purchase and/or acquire an aggregate of 8,082,846 shares (net of 3,847,804 expired and canceled awards), of which an aggregate of 5,379,719 have been exercised or settled.

As of April 30, 2018, the following stock-based awards, by award type, were outstanding:

Stock options	1,734,775
Performance shares	278,860
RSUs and restricted stock	421,886
Share units	267,606
Total	2,703,127

Our ESPP provides for the issuance of up to 800,000 shares of our common stock. Our ESPP is intended to provide our eligible employees the opportunity to acquire our common stock at 85% of fair market value at the date of issuance. Through April 30, 2018, we have cumulatively issued 734,569 shares of our common stock to participating employees in connection with our ESPP.

Stock-based compensation for awards issued is reflected in the following line items in our Condensed Consolidated Statements of Operations:

	Three months ended April 30,		Nine months ended April 30,	
	2018	2017	2018	2017
Cost of sales	\$55,000	56,000	146,000	162,000
Selling, general and administrative expenses	976,000	862,000	2,584,000	2,591,000
Research and development expenses	73,000	73,000	201,000	227,000
Stock-based compensation expense before income tax benefit	1,104,000	991,000	2,931,000	2,980,000
Estimated income tax benefit	(240,000)	(349,000)	(734,000)	(1,051,000)
Net stock-based compensation expense	\$864,000	642,000	2,197,000	1,929,000

Stock-based compensation for equity-classified awards is measured at the date of grant, based on an estimate of the fair value of the award and is generally expensed over the vesting period of the award. At April 30, 2018, unrecognized stock-based compensation of \$8,088,000, net of estimated forfeitures of \$801,000, is expected to be recognized over a weighted average period of 2.9 years. Total stock-based compensation capitalized and included in ending inventory at both April 30, 2018 and July 31, 2017 was \$12,000. There are no liability-classified stock-based awards outstanding as of April 30, 2018 or July 31, 2017.

COMTECH TELECOMMUNICATIONS CORP. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

(Unaudited)

Stock-based compensation expense (benefit), by award type, is summarized as follows:

	Three months ended April 30,		Nine months ended April 30,	
	2018	2017	2018	2017
Stock options	\$ 309,000	368,000	845,000	1,000,000
Performance shares	363,000	361,000	846,000	1,227,000
RSUs and restricted stock	376,000	221,000	1,150,000	633,000
ESPP	56,000	41,000	152,000	120,000
Share units	—	—	(62,000)	—
Stock-based compensation expense before income tax benefit	1,104,000	991,000	2,931,000	2,980,000
Estimated income tax benefit	(240,000)	(349,000)	(734,000)	(1,051,000)
Net stock-based compensation expense	\$ 864,000	642,000	2,197,000	1,929,000

ESPP stock-based compensation expense primarily relates to the 15% discount offered to participants in the ESPP.

During the nine months ended April 30, 2018, we recorded a \$62,000 net benefit which primarily represents the recoupment of certain share units.

The estimated income tax benefit as shown in the above table was computed using income tax rates expected to apply when the awards are settled. Such deferred tax asset was recorded net as part of our non-current deferred tax liability in our Condensed Consolidated Balance Sheet as of April 30, 2018 and July 31, 2017. The actual income tax benefit recognized for tax reporting is based on the fair market value of our common stock at the time of settlement and can significantly differ from the estimated income tax benefit recorded for financial reporting.

Stock Options

The following table summarizes the Plan's activity during the nine months ended April 30, 2018:

	Awards (in Shares)	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value
Outstanding at July 31, 2017	1,855,875	\$ 28.60		
Expired/canceled	(41,040)	28.97		
Outstanding at October 31, 2017	1,814,835	28.59		
Expired/canceled	(9,350)	29.02		
Outstanding at January 31, 2018	1,805,485	28.59		
Expired/canceled	(2,400)	28.11		
Exercised	(68,310)	27.40		
Outstanding at April 30, 2018	1,734,775	\$ 28.64	4.80	\$ 4,095,000
Exercisable at April 30, 2018	1,303,808	\$ 28.64	4.29	\$ 2,973,000
Vested and expected to vest at April 30, 2018	1,693,769	\$ 28.61	4.76	\$ 4,014,000

Stock options outstanding as of April 30, 2018 have exercise prices ranging from \$20.90 to \$33.94, representing the fair market value of our common stock on the date of grant, a contractual term of five or ten years and a vesting period

of three or five years. The total intrinsic value relating to stock options exercised during the three and nine months ended April 30, 2018 was \$225,000. There were no stock options exercised during the nine months ended April 30, 2017. There were no stock options granted during the nine months ended April 30, 2018 and 2017.

Index

COMTECH TELECOMMUNICATIONS CORP. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

(Unaudited)

During the three and nine months ended April 30, 2018, at the election of certain holders of vested stock options, 63,410 stock options were net settled upon exercise. As a result, 4,937 net shares of our common stock were issued after reduction of shares retained to satisfy the exercise price and minimum statutory tax withholding requirements.

Performance Shares, RSUs, Restricted Stock and Share Unit Awards

The following table summarizes the Plan's activity relating to performance shares, RSUs, restricted stock and share units:

	Awards (in Shares)	Weighted Average Grant Date Fair Value	Aggregate Intrinsic Value
Outstanding at July 31, 2017	830,197	\$ 16.95	
Granted	307,194	18.25	
Settled	(100,321)	20.67	
Forfeited	(61,520)	18.88	
Outstanding at October 31, 2017	975,550	16.86	
Settled	(526)	11.40	
Forfeited	(4,311)	15.26	
Outstanding at January 31, 2018	970,713	16.86	
Granted	3,212	28.37	
Settled	(687)	11.04	
Forfeited	(4,886)	15.36	
Outstanding at April 30, 2018	968,352	\$ 16.91	\$29,622,000
Vested at April 30, 2018	309,853	\$ 17.55	\$9,478,000
Vested and expected to vest at April 30, 2018	933,270	\$ 16.94	\$28,549,000

The total intrinsic value relating to fully-vested awards settled during the three months ended April 30, 2018 was \$17,000. There were no fully-vested awards converted into our common stock during the three months ended April 30, 2017. The total intrinsic value relating to fully-vested awards settled during the nine months ended April 30, 2018 and 2017 was \$1,964,000 and \$633,000, respectively.

Performance shares granted to employees prior to fiscal 2014 generally vest over a 5.3 year period, beginning on the date of grant once pre-established performance goals were attained, and are convertible into shares of our common stock at the time of vesting, on a one-for-one basis for no cash consideration. The performance shares granted to employees since fiscal 2014 principally vest over a three-year performance period, if pre-established performance goals are attained or as specified pursuant to the Plan and related agreements. As of April 30, 2018, the number of outstanding performance shares included in the above table, and the related compensation expense prior to consideration of estimated pre-vesting forfeitures, assume achievement of the pre-established goals at a target level.

RSUs and restricted stock granted to non-employee directors have a vesting period of three years and are convertible into shares of our common stock generally at the time of termination, on a one-for-one basis for no cash consideration,

or earlier under certain circumstances. RSUs granted to employees have a vesting period of five years and are convertible into shares of our common stock, generally at the time of vesting, on a one-for-one basis for no cash consideration.

Share units granted prior to July 31, 2017 were vested when issued and are convertible into shares of our common stock, generally at the time of termination, on a one-for-one basis for no cash consideration, or earlier under certain circumstances. Share units granted on or after July 31, 2017 were granted to certain employees in lieu of fiscal 2017 non-equity incentive compensation and are convertible into shares of our common stock on the one-year anniversary of the grant date. Cumulatively through April 30, 2018, 14,777 share units granted have been settled.

Index

COMTECH TELECOMMUNICATIONS CORP. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

(Unaudited)

The fair value of performance shares, RSUs, restricted stock and share units is determined using the closing market price of our common stock on the date of grant, less the present value of any estimated future dividend equivalents such awards are not entitled to receive and an applicable estimated discount for post vesting restrictions. RSUs, performance shares and restricted stock granted since fiscal 2013 are entitled to dividend equivalents unless forfeited before vesting occurs; however, performance shares granted in fiscal 2013 were not entitled to such dividend equivalents until our Board of Directors determined that the pre-established performance goals were met. Share units granted prior to fiscal 2014 are not entitled to dividend equivalents. Share units granted since fiscal 2014 are entitled to dividend equivalents while the underlying shares are unissued.

Dividend equivalents are subject to forfeiture, similar to the terms of the underlying stock-based awards, and are payable in cash generally at the time of settlement of the underlying shares into our common stock. During the nine months ended April 30, 2018, we accrued \$247,000 of dividend equivalents and paid out \$129,000. Accrued dividend equivalents were recorded as a reduction to retained earnings. As of April 30, 2018 and July 31, 2017, accrued dividend equivalents were \$672,000 and \$554,000, respectively.

We recorded \$96,000 of income tax expense in our Condensed Consolidated Statements of Operations for the nine months ended April 30, 2018, which represents net income tax shortfalls from the settlement of stock-based awards and the reversal of deferred tax assets associated with expired and unexercised stock-based awards. During the nine months ended April 30, 2017, net income tax shortfalls from similar items totaled \$590,000 and, pursuant to prior GAAP, were recorded as a reduction to additional paid-in capital.

(13) Customer and Geographic Information

Sales by geography and customer type, as a percentage of consolidated net sales, are as follows:

	Three months ended April 30, 2018		Nine months ended April 30, 2017	
U.S. government	37.4 %	32.0 %	34.0 %	33.1 %
Domestic	38.0 %	41.3 %	41.2 %	37.9 %
Total United States	75.4 %	73.3 %	75.2 %	71.0 %
International	24.6 %	26.7 %	24.8 %	29.0 %
Total	100.0%	100.0%	100.0%	100.0%

Sales to U.S. government customers include sales to the U.S. Department of Defense ("DoD"), intelligence and civilian agencies, as well as sales directly to or through prime contractors.

Domestic sales include sales to commercial customers, as well as to U.S. state and local governments. Included in domestic sales, are sales to Verizon which represented 9.8% and 10.6% of consolidated net sales for the three and nine months ended April 30, 2018, respectively. Sales to Verizon were less than 10.0% of consolidated net sales for the three and nine months ended April 30, 2017.

International sales for the three months ended April 30, 2018 and 2017 (which include sales to U.S. domestic companies for inclusion in products that are sold to international customers) were \$36,316,000 and \$34,131,000, respectively. International sales for the nine months ended April 30, 2018 and 2017 (which include sales to U.S. domestic companies for inclusion in products that are sold to international customers) were \$100,030,000 and \$116,588,000, respectively.

Except for the U.S., no individual country (including sales to U.S. domestic companies for inclusion in products that are sold to a foreign country) represented more than 10% of consolidated net sales for the three and nine months ended April 30, 2018 and 2017.

(14) Segment Information

Reportable operating segments are determined based on Comtech's management approach. The management approach, as defined by FASB ASC 280 "Segment Reporting" is based on the way that the chief operating decision-maker ("CODM") organizes the segments within an enterprise for making decisions about resources to be allocated and assessing their performance. Our CODM, for purposes of FASB ASC 280, is our Chief Executive Officer and President.

Our Commercial Solutions segment serves commercial customers and smaller government customers, such as state and local governments, that require advanced communications technologies to meet their needs. This segment also serves certain large government customers (including the U.S. government) when they have requirements for off-the-shelf commercial equipment. Commercial solutions products include satellite earth station communications equipment such as modems and traveling wave tube amplifiers, public safety technologies including those that are utilized in next generation 911 systems and enterprise technologies such as trusted location and text-messaging platforms.

Our Government Solutions segment serves large U.S. and foreign government end-users that require mission critical technologies and systems. Government solutions products include command and control technologies (such as mobile satellite transceivers used on the Blue Force Tracking-1 and Blue Force Tracking-2 programs), troposcatter technologies systems (such as digital troposcatter multiplexers, digital over-the-horizon modems, troposcatter systems and frequency converter systems) and RF power and switching technologies products (such as solid-state high-power narrow and broadband amplifiers, enhanced position location reporting system ("EPLRS") amplifier assemblies, identification friend or foe amplifiers and amplifiers used in the counteraction of improvised explosive devices).

Our CODM primarily uses a metric that we refer to as Adjusted Earnings Before Interest, Taxes, Depreciation and Amortization ("Adjusted EBITDA") to measure an operating segment's performance and to make decisions about resources to be allocated. Our Adjusted EBITDA metric for the Commercial Solutions and Government Solutions segments do not consider any allocation of indirect expenses, including the following: income taxes, interest (income) and other expense, interest expense, amortization of stock-based compensation, amortization of intangibles, depreciation expense, settlement of intellectual property litigation, acquisition plan expenses or strategic alternatives analysis expenses and other expenses that relate to our Unallocated segment. These items, while periodically affecting our results, may vary significantly from period to period and may have a disproportionate effect in a given period, thereby affecting the comparability of results. Any amounts shown in the Adjusted EBITDA calculation for our Commercial Solutions and Government Solutions segments are directly attributable to those segments. Our Adjusted EBITDA is also used by our management in assessing the Company's operating results. Although closely aligned, the Company's definition of Adjusted EBITDA is different than the Consolidated EBITDA (as such term is defined in our Secured Credit Facility, as amended) utilized for financial covenant calculations and also may differ from the definition of EBITDA or Adjusted EBITDA used by other companies and, therefore, may not be comparable to similarly titled measures used by other companies.

Total assets at April 30, 2017	\$619,215,000	184,764,000	59,779,000	\$863,758,000

Unallocated expenses result from corporate expenses such as executive compensation, accounting, legal and other regulatory compliance related costs and also includes all of our amortization of stock-based compensation. In addition, during fiscal 2017, unallocated expenses also reflect the favorable adjustments to operating income related to the settlement of certain legacy TCS intellectual property matters.

Interest expense for the three and nine months ended April 30, 2018 and 2017 includes \$2,351,000 and \$7,166,000, respectively, and \$2,641,000 and \$8,524,000, respectively, related to our Secured Credit Facility, as amended, and includes the amortization of deferred financing costs. See Note (9) - "Secured Credit Facility" for further discussion of

such debt.

COMTECH TELECOMMUNICATIONS CORP. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

(Unaudited)

Intersegment sales for the three months ended April 30, 2018 and 2017 by the Commercial Solutions segment to the Government Solutions segment were \$2,664,000 and \$2,812,000, respectively. Intersegment sales for the nine months ended April 30, 2018 and 2017 by the Commercial Solutions segment to the Government Solutions segment were \$7,613,000 and \$9,297,000, respectively. There were nominal sales by the Government Solutions segment to the Commercial Solutions segment for these periods. All intersegment sales are eliminated in consolidation and are excluded from the tables above.

Unallocated assets at April 30, 2018 consist principally of cash and cash equivalents, income taxes receivable, corporate property, plant and equipment and deferred financing costs. Substantially all of our long-lived assets are located in the U.S.

(15) Goodwill

The following table represents goodwill by reportable operating segment as of April 30, 2018 and July 31, 2017:

	Commercial Solutions	Government Solutions	Total
Goodwill	\$231,440,000	\$59,193,000	\$290,633,000

In accordance with FASB ASC 350 "Intangibles - Goodwill and Other," we perform a goodwill impairment analysis at least annually (in the first quarter of each fiscal year), unless indicators of impairment exist in interim periods. If we fail the quantitative assessment of goodwill impairment ("quantitative assessment"), pursuant to our adoption of FASB ASU No. 2017-04 in fiscal 2017, we would be required to recognize an impairment loss equal to the amount that a reporting unit's carrying value exceeded its fair value; however, any loss recognized should not exceed the total amount of goodwill allocated to that reporting unit.

On August 1, 2017 (the first day of our fiscal 2018), we performed our annual quantitative assessment using market participant assumptions to determine if the fair value of each of our reporting units with goodwill exceeded its carrying value. In making this assessment, we considered, among other things, expectations of projected net sales and cash flows, assumptions impacting the weighted average cost of capital, trends in trading multiples of comparable companies, changes in our stock price and changes in the carrying values of our reporting units with goodwill. We also considered overall business conditions.

In performing the quantitative assessment, we estimated the fair value of each of our reporting units using a combination of the income and market approaches. The income approach, also known as the discounted cash flow ("DCF") method, utilizes the present value of cash flows to estimate fair value. The future cash flows for our reporting units were projected based on our estimates, at that time, of future revenues, operating income and other factors (such as working capital and capital expenditures). For purposes of conducting our impairment analysis, we assumed revenue growth rates and cash flow projections that are below our actual long-term expectations. The discount rates used in our DCF method were based on a weighted-average cost of capital ("WACC") determined from relevant market comparisons, adjusted upward for specific reporting unit risks (primarily the uncertainty of achieving projected operating cash flows). A terminal value growth rate was applied to the final year of the projected period and reflected our estimate of stable, perpetual growth. We then calculated a present value of the respective cash flows for each reporting unit to arrive at an estimate of fair value under the income approach. Under the market approach, we estimated a fair value based on comparable companies' market multiples of revenues and earnings before interest,

taxes, depreciation and amortization and factored in a control premium. Finally, we compared our estimates of fair values to our August 1, 2017 total public market capitalization and assessed implied control premiums based on our common stock price of \$18.47 as of August 1, 2017.

Index

COMTECH TELECOMMUNICATIONS CORP. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

(Unaudited)

Based on our quantitative evaluation, we determined that our Commercial Solutions and Government Solutions reporting units had estimated fair values in excess of their carrying values of at least 17.8% and 52.9%, respectively, and concluded that our goodwill was not impaired and that neither of our two reporting units was at risk of failing the quantitative assessment. However, in order to sensitize our goodwill impairment test, we performed a second analysis using only the income approach and concluded that neither reporting units' goodwill was impaired or at risk of failing the quantitative assessment. It is possible that, during fiscal 2018 or beyond, business conditions (both in the U.S. and internationally) could deteriorate from the current state, our current or prospective customers could materially postpone, reduce or even forgo purchases of our products and services to a greater extent than we currently anticipate, or our common stock price could decline. A significant decline in our customers' spending that is greater than we anticipate or a shift in funding priorities may also have a negative effect on future orders, sales, income and cash flows and we might be required to perform a quantitative assessment during fiscal 2018 or beyond. If assumed net sales and cash flow projections are not achieved in future periods or our common stock price significantly declines from current levels, our Commercial Solutions and Government Solutions reporting units could be at risk of failing the quantitative assessment and goodwill assigned to the respective reporting units could be impaired. Any impairment charges that we may record in the future could be material to our results of operation and financial condition.

In any event, we are required to perform the next annual goodwill impairment analysis on August 1, 2018 (the start of our fiscal 2019). If our assumptions and related estimates change in the future, or if we change our reporting unit structure or other events and circumstances change (e.g., a sustained decrease in the price of our common stock (considered on both absolute terms and relative to peers)), we may be required to record impairment charges when we perform these tests, or in other future periods.

(16) Intangible Assets

Intangible assets with finite lives are as follows:

As of April 30, 2018

	Weighted Average Amortization Period	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Customer relationships	20.3	\$249,831,000	51,993,000	\$197,838,000
Technologies	12.3	82,370,000	52,945,000	29,425,000
Trademarks and other	16.4	28,894,000	10,092,000	18,802,000
Total		\$361,095,000	115,030,000	\$246,065,000

As of July 31, 2017

	Weighted Average Amortization Period	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Customer relationships	20.3	\$249,831,000	41,923,000	\$207,908,000
Technologies	12.3	82,370,000	48,623,000	33,747,000
Trademarks and other	16.4	28,894,000	8,678,000	20,216,000
Total		\$361,095,000	99,224,000	\$261,871,000

The weighted average amortization period in the above table excludes fully amortized intangible assets.

Amortization expense for the three months ended April 30, 2018 and 2017 was \$5,269,000 and \$5,468,000, respectively. Amortization expense for the nine months ended April 30, 2018 and 2017 was \$15,806,000 and \$17,555,000, respectively.

Index

COMTECH TELECOMMUNICATIONS CORP. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

(Unaudited)

The estimated amortization expense consists of the following for the fiscal years ending July 31,:

2018 \$21,075,000

2019 17,155,000

2020 17,155,000

2021 16,196,000

2022 14,955,000

We review net intangible assets with finite lives for impairment when an event occurs indicating the potential for impairment. No such event has occurred during the nine months ended April 30, 2018. We believe that the carrying values of our net intangible assets were recoverable as of April 30, 2018. Any impairment charges that we may record in the future could be material to our results of operation and financial condition.

(17) Stockholders' Equity

Sale of Common Stock

In June 2016, the Company sold 7,145,000 shares of its common stock in a public offering at a price to the public of \$14.00 per share, resulting in proceeds to the Company of \$95,029,000, net of underwriting discounts and commissions. As of April 30, 2018 and June 6, 2018, an aggregate registered amount of \$74,970,000 under the Company's existing Shelf Registration Statement filed with the SEC remains available for sale of various types of securities, including debt.

Stock Repurchase Program

As of April 30, 2018 and June 6, 2018, we were authorized to repurchase up to an additional \$8,664,000 of our common stock, pursuant to our current \$100,000,000 stock repurchase program. Our stock repurchase program has no time restrictions and repurchases may be made in open-market or privately negotiated transactions and may be made pursuant to SEC Rule 10b5-1 trading plans. There were no repurchases made during the nine months ended April 30, 2018 or 2017.

Dividends

Since September 2010, we have paid quarterly dividends pursuant to an annual targeted dividend amount that was established by our Board of Directors. On September 27, 2017, December 6, 2017 and March 7, 2018, our Board of Directors declared a dividend of \$0.10 per common share, which was paid on November 17, 2017, February 16, 2018 and May 18, 2018, respectively. On June 6, 2018, our Board of Directors declared a dividend of \$0.10 per common share, payable on August 17, 2018 to stockholders of record at the close of business on July 16, 2018.

Future dividends remain subject to compliance with financial covenants under our Secured Credit Facility, as amended, as well as Board approval.

(18) Legal Proceedings and Other Matters

Legacy TCS Intellectual Property Matter - Vehicle IP

In December 2009, Vehicle IP, LLC ("Vehicle IP") filed a patent infringement lawsuit in the U.S. District Court for the District of Delaware (the "District Court"), seeking monetary damages, fees and expenses and other relief from, among others, our customer Verizon Wireless ("Verizon"), based on the VZ Navigator product, and TCS is defending Verizon against Vehicle IP. In 2013, the District Court granted the defendants' motion for summary judgment on the

basis that the products in question did not infringe plaintiff's patent. Plaintiff appealed that decision and, in 2014, the U.S. Court of Appeals for the Federal Circuit reversed the District Court's claim construction, overturned the District Court's grant of summary judgment of noninfringement, and remanded the case for further proceedings. Fact discovery and expert discovery has closed. Substantive settlement conversations have occurred but, to date, the parties have been unable to reach a settlement. As discussed in Note (7) - "Accrued Expenses and Other Current Liabilities," we have accrued certain legal and settlement costs related to the Vehicle IP matter. The accrued settlement costs related to this matter do not reflect the final amounts we actually may pay, if any.

Index

COMTECH TELECOMMUNICATIONS CORP. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

(Unaudited)

On May 30, 2017, we received positive news that the District Court issued a supplemental claim construction order in our favor. As a result, the plaintiff agreed to file a joint status report to the District Court that requested that the District Court cancel the trial date (which was scheduled for July 2017). On July 28, 2017, the parties entered into a stipulation that the defendants' accused products do not infringe Vehicle IP's patent under the District Court's current revised construction of the disputed patent claim term and requested that the District Court therefore enter a judgment of noninfringement. On August 18, 2017, the court entered such a judgment of noninfringement. As expected, following the judgment, Vehicle IP filed a notice of appeal on August 29, 2017. Vehicle IP's opening brief on appeal of the District Court's claim construction was submitted in October 2017. TCS's brief in response was filed on January 19, 2018. Vehicle IP's reply brief was filed on February 23, 2018. Oral argument has not yet been scheduled and an appellate ruling may take several months to a year to be issued. If the District Court's current claim construction is ultimately upheld at the appellate level, it is possible that we may not have to go to trial or pay any monetary damages.

Ongoing legal expenses associated with defending this matter and its ultimate resolution could vary and have a material adverse effect on our consolidated results of operations, financial position or cash flows in future periods.

Other Matters

In October 2014, we disclosed to the U.S. Department of the Treasury, Office of Foreign Assets Control ("OFAC") that we learned during a self-assessment of our export transactions that a shipment of modems sent to a Canadian customer by Comtech EF Data Corp. was incorporated into a communication system, the ultimate end user of which was the Sudan Civil Aviation Authority. The sales value of this equipment was approximately \$288,000. At the time of shipment, OFAC regulations prohibited U.S. persons from doing business directly or indirectly with Sudan. In late 2015, OFAC issued an administrative subpoena seeking further information about the disclosed transaction. We have responded to the subpoena, including alerting OFAC to Comtech's repair of three modems for a customer in Lebanon who may have rerouted the modems from Lebanon to Sudan without the required U.S. licensing authorization. Subsequently, in October 2017, U.S. sanctions with respect to Sudan were revoked. Consistent with the revocation of the Sudan Sanction Regulations ("SSR"), shipments to the Sudan Civil Aviation Authority by U.S. persons are now permissible. We are not able to predict when OFAC will complete its review, nor whether it will take any enforcement action against us in light of the recent revocation of the SSR. If OFAC determines that we have violated U.S. trade sanctions, civil and criminal penalties could apply, and we may suffer reputational harm. Even though we take precautions to avoid engaging in transactions that may violate U.S. trade sanctions, those measures may not be effective in every instance.

In May 2018, we were informed by the Office of Export Enforcement ("OEE") of the Department of Commerce ("DoC") that it was forwarding to the DoC's Office of Chief Counsel, the results of its audit of international shipments by Comtech Xicom Technology, Inc. for further review and possible determination of an administrative penalty. We fully cooperated with the OEE in their audit and, based on our self-assessment of the approximately 7,800 individual transactions audited, have determined that six (6) transactions may not have been fully in compliance with the Export Administration Regulations ("EAR"). These six (6) items, for which export licenses were not obtained, were either spares or repaired power amplifier subassembly components valued at less than \$100,000 (in aggregate) and were shipped to Brazil, Italy, Russia, Thailand and the United Arab Emirates. The EAR provides an exception to the requirement to obtain an export license for the replacement of a defective or damaged component. During our self-assessment, we determined that we inadvertently did not obtain export licenses for the spares, or had evidence of the return or destruction of the defective or damaged components necessary to authorize our use of the export license exception for the replacements. Since discovering this issue, we have implemented additional controls and procedures and have increased awareness of these specific export requirements throughout the Company to help avoid similar

occurrences in the future. Administrative penalties under the EAR can range from a warning letter to a denial of export privileges. Given the lapsed legal status of the Export Administration Act ("EAA") itself, administrative penalties under the EAR are currently determined pursuant to the International Emergency Economic Powers Act ("IEEPA"), which can reach the greater of twice the amount of the transaction that is the basis of the violation or approximately \$300,000 per violation. We have not recorded an accrual related to a possible administrative penalty and continue to work cooperatively with the OEE.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

(Unaudited)

In the ordinary course of business, we include indemnification provisions in certain of our customer contracts to indemnify, hold harmless and reimburse such customers for certain losses, including but not limited to losses related to third-party claims of intellectual property infringement arising from the customer's use of our products or services. From time to time, customers seek indemnification under these contractual arrangements and we evaluate such claims as and when they arise. We do not always agree with customers that they are entitled to indemnification and in such cases reject their indemnification claims. However, pending or future claims asserted against us by a party that we agree to indemnify could result in legal costs and damages that could have a material adverse effect on our consolidated results of operations and financial condition.

There are certain other pending and threatened legal actions which arise in the normal course of business. Although the ultimate outcome of litigation is difficult to accurately predict, we believe that the outcome of these other pending and threatened actions will not have a material adverse effect on our consolidated financial condition or results of operations.

MANAGEMENT'S
DISCUSSION
AND ANALYSIS
OF FINANCIAL
CONDITION
AND RESULTS
OF OPERATIONS

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

Certain information in this Quarterly Report on Form 10-Q contains forward-looking statements, including but not limited to, information relating to our future performance and financial condition, plans and objectives of our management and our assumptions regarding such future performance, financial condition, and plans and objectives that involve certain significant known and unknown risks and uncertainties and other factors not under our control which may cause our actual results, future performance and financial condition, and achievement of our plans and objectives to be materially different from the results, performance or other expectations implied by these forward-looking statements. These factors include, among other things: the risk that Comtech will be unsuccessful in implementing a tactical shift in its Government Solutions segment away from bidding on large commodity service contracts and toward pursuing contracts for its niche products with higher margins; the nature and timing of receipt of, and our performance on, new or existing orders that can cause significant fluctuations in net sales and operating results; the timing and funding of government contracts; adjustments to gross profits on long-term contracts; risks associated with international sales; rapid technological change; evolving industry standards; new product announcements and enhancements, including the risks associated with Comtech's recent launch of Heights™ Dynamic Network Access Technology ("HEIGHTS" or "HDNA"); changing customer demands; changes in prevailing economic and political conditions; changes in the price of oil in global markets; changes in foreign currency exchange rates; risks associated with Comtech's and TeleCommunication Systems, Inc.'s ("TCS") legacy legal proceedings, customer claims for indemnification, and other similar matters; risks associated with our obligations under our Secured Credit Facility, as amended; risks associated with our large contracts; the impact of H.R.1, also known as the Tax Cuts and Jobs Act ("Tax Reform"), which was enacted in December 2017 in the U.S.; and other factors described in this and our other filings with the Securities and Exchange Commission ("SEC").

OVERVIEW

We are a leading provider of advanced communications solutions for both commercial and government customers worldwide. Our solutions fulfill our customers' needs for secure wireless communications in some of the most demanding environments, including those where traditional communications are unavailable or cost-prohibitive, and in mission-critical and other scenarios where performance is crucial.

We manage our business through two reportable operating segments:

Commercial Solutions - serves commercial customers and smaller government customers, such as state and local governments, that require advanced communication technologies to meet their needs. This segment also serves certain large government customers (including the U.S. government) that have requirements for off-the-shelf commercial equipment. We believe this segment is a leading provider of satellite communications (such as satellite earth station modems and traveling wave tube amplifiers ("TWTA")), public safety systems (such as next generation 911 ("NG911") technologies) and enterprise application technologies (such as messaging and trusted location-based technologies).

Government Solutions - serves large government end-users (including those of foreign countries) that require mission critical technologies and systems. We believe this segment is a leading provider of command and control applications (such as the design, installation and operation of data networks that integrate computing and communications (including both satellite and terrestrial links)), ongoing network operation and management support services (including telecom expense management, project management and fielding and maintenance solutions related to satellite ground terminals), troposcatter communications (such as digital troposcatter multiplexers, digital over-the-horizon modems, troposcatter systems, and frequency converter systems) and RF power and switching technologies (such as solid state high-power broadband amplifiers, enhanced position location reporting system (commonly known as "EPLRS") amplifier assemblies, identification friend or foe amplifiers, and amplifiers used in the counteraction of improvised explosive devices).

Index

Our Quarterly Financial Information

Quarterly and period-to-period sales and operating results may be significantly affected by either short-term or long-term contracts with our customers. In addition, our gross profit is affected by a variety of factors, including the mix of products, systems and services sold, production efficiencies, estimates of warranty expense, price competition and general economic conditions. Our gross profit may also be affected by the impact of any cumulative adjustments to contracts that are accounted for under the percentage-of-completion method.

Our contracts with the U.S. government can be terminated for convenience by it at any time and orders are subject to unpredictable funding, deployment and technology decisions by the U.S. government. Some of these contracts are indefinite delivery/indefinite quantity ("IDIQ") contracts and, as such, the U.S. government is not obligated to purchase any equipment or services under these contracts. We have, in the past, experienced and we continue to expect significant fluctuations in sales and operating results from quarter-to-quarter and period-to-period. As such, comparisons between periods and our current results may not be indicative of a trend or future performance.

CRITICAL ACCOUNTING POLICIES

We consider certain accounting policies to be critical due to the estimation process involved in each.

Revenue Recognition. We earn revenue from the sale of advanced communication solutions to customers around the world. Sales of advanced communication solutions can consist of any one or a combination of items required by our customer including hardware, technology platforms and related support. A large portion of our revenue from advanced communication solutions is derived from contracts relating to the design, development or manufacture of complex electronic equipment to a buyer's specification or to provide services relating to the performance of such contracts and is recognized in accordance with FASB ASC 605-35. For these contracts, we primarily apply the percentage-of-completion accounting method and generally recognize revenue based on the relationship of total costs incurred to total projected costs, or, alternatively, based on output measures, such as units delivered or produced. Profits expected to be realized on such contracts are based on total estimated sales for the contract compared to total estimated costs, including warranty costs, at completion of the contract.

Direct costs which include materials, labor and overhead are charged to work-in-progress (including our contracts-in-progress) inventory or cost of sales. Indirect costs relating to long-term contracts, which include expenses such as general and administrative, are charged to expense as incurred and are not included in our work-in-process (including our contracts-in-progress) inventory or cost of sales. Total estimates are reviewed and revised periodically throughout the lives of the contracts, and adjustments to profits resulting from such revisions are made cumulative to the date of the change. Estimated losses on long-term contracts are recorded in the period in which the losses become evident. Long-term U.S. government cost-reimbursable type contracts are also specifically covered by FASB ASC 605-35.

We have been engaged in the production and delivery of goods and services on a continual basis under contractual arrangements for many years. Historically, we have demonstrated an ability to accurately estimate total revenues and total expenses relating to our long-term contracts. However, there exist inherent risks and uncertainties in estimating revenues, expenses and progress toward completion, particularly on larger or longer-term contracts. If we do not accurately estimate the total sales, related costs and progress towards completion on such contracts, the estimated gross margins may be significantly impacted or losses may need to be recognized in future periods. Any such resulting changes in margins or contract losses could be material to our results of operations and financial condition.

In addition, most government contracts have termination for convenience clauses that provide the customer with the right to terminate the contract at any time. Such terminations could impact the assumptions regarding total contract revenues and expenses utilized in recognizing profit under the percentage-of-completion method of accounting.

Changes to these assumptions could materially impact our results of operations and financial condition. Historically, we have not experienced material terminations of our long-term contracts. We also address customer acceptance provisions in assessing our ability to perform our contractual obligations under long-term contracts. Our inability to perform on our long-term contracts could materially impact our results of operations and financial condition. Historically, we have been able to perform on our long-term contracts.

Index

We also derive a portion of our revenues for advanced communication solutions from contracts and purchase orders where revenue is recorded on delivery of products or performance of services. Such revenues are recognized in accordance with the authoritative guidance contained in FASB ASC 605-25 "Revenue Recognition - Multiple Deliverable Revenue Arrangements" ("FASB ASC 605-25") and, as applicable, FASB ASC 605-20 "Revenue Recognition - Services" ("FASB ASC 605-20") and Accounting Standards Update ("ASU") 2009-14 (FASB ASC Topic 985) "Certain Revenue Arrangements That Include Software Elements." Revenue recognition for multiple-element arrangements requires judgment to determine if multiple elements exist, whether elements can be accounted for as separate units of accounting, and if so, the fair value for each of the elements. In summary, we recognize revenue for each separate unit of accounting when the applicable revenue recognition criteria for each element have been met. We allocate revenue to each separate unit of accounting in a multi-element arrangement based on the relative fair value of each element, using vendor-specific objective evidence ("VSOE") of their fair values, if available. VSOE is generally determined based on the price charged when an element is sold separately. In the absence of VSOE of fair value, the fee is allocated among each element based on third-party evidence ("TPE") of fair value, which is determined based on competitor pricing for similar deliverables when sold separately. When we are unable to establish fair value using VSOE or TPE, we use estimated selling price ("ESP") to allocate value to each element. The objective of ESP is to determine the price at which we would transact a sale if the product or service were sold separately. We determine ESP for deliverables by considering multiple factors including, but not limited to, prices we charge for similar offerings, market conditions, competitive landscape, and pricing practices. For multiple element arrangements that contain only software and software-related elements, we allocate the fees to each element based on the VSOE of fair value of each element. Due to the nature of some of the agreements it may be difficult to establish VSOE of separate elements of an agreement; in these circumstances the appropriate recognition of revenue may require the use of judgment based on the particular facts and circumstances.

Adoption of New Revenue Standard

On August 1, 2018 (our first quarter of fiscal 2019), we are required to adopt FASB ASU No. 2014-09 "Revenue from Contracts with Customers (Topic 606)," which replaces numerous requirements in U.S. GAAP, including industry specific requirements, and provides a single revenue recognition model for contracts with customers. The core principle of the new standard is that a company should record revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services. In August 2015, FASB ASU No. 2015-14 "Revenue from Contracts with Customers (Topic 606): Deferral of the Effective Date" was issued to defer the effective date of FASB ASU No. 2014-09 by one year. In March 2016, April 2016, May 2016 and February 2017, FASB ASU Nos. 2016-08 "Revenue from Contracts with Customers (Topic 606): Principal Versus Agent Considerations (Reporting Revenue Gross Versus Net)," 2016-10 "Revenue from Contracts with Customers (Topic 606): Identifying Performance Obligations and Licensing," 2016-12 "Revenue from Contracts with Customers (Topic 606): Narrow-Scope Improvements and Practical Expedients" and 2017-05 "Other Income - Gains and Losses from the Derecognition of Nonfinancial Assets (Subtopic 610-20): Clarifying the Scope of Asset Derecognition Guidance and Accounting for Partial Sales of Nonfinancial Assets" were issued, respectively, to clarify certain implementation matters related to the new revenue standard. The effective dates for these ASUs coincide with the effective date of FASB ASU 2014-09. FASB ASU No. 2014-09 can be adopted either retrospectively to each prior reporting period presented, or as a cumulative-effect adjustment as of the date of adoption.

Because of the broad scope of FASB ASU No. 2014-09, it could impact the reporting of the amount and/or timing of our net sales and operating income across our two operating segments, as well as related business processes and IT systems. During the third quarter of fiscal 2018, our project team continued to perform a detailed evaluation of the operational impact of this new standard, which transition approach to use and the overall adoption impact of FASB ASU No. 2014-09 on our consolidated financial statements and disclosures. We expect our evaluation to be completed shortly before our first quarter of fiscal 2019.

Goodwill and Other Intangible Assets. As of April 30, 2018, total goodwill recorded on our Condensed Consolidated Balance Sheet aggregated \$290.6 million (of which \$231.4 million relates to our Commercial Solutions segment and \$59.2 million relates to our Government Solutions segment). Additionally, as of April 30, 2018, net intangibles recorded on our Condensed Consolidated Balance Sheet aggregated \$246.1 million (of which \$203.4 million relates to our Commercial Solutions segment and \$42.6 million relates to our Government Solutions segment). Each of our two operating segments constitutes a reporting unit and we must make various assumptions in determining their estimated fair values.

In accordance with FASB ASC 350 "Intangibles - Goodwill and Other," we perform a goodwill impairment analysis at least annually (in the first quarter of each fiscal year), unless indicators of impairment exist in interim periods. If we fail the quantitative assessment of goodwill impairment ("quantitative assessment"), pursuant to our adoption of FASB ASU No. 2017-04 in fiscal 2017, we would be required to recognize an impairment loss equal to the amount that a reporting unit's carrying value exceeded its fair value; however, any loss recognized should not exceed the total amount of goodwill allocated to that reporting unit.

Index

On August 1, 2017 (the first day of our fiscal 2018), we performed our annual quantitative assessment using market participant assumptions to determine if the fair value of each of our reporting units with goodwill exceeded its carrying value. In making this assessment, we considered, among other things, expectations of projected net sales and cash flows, assumptions impacting the weighted average cost of capital, trends in trading multiples of comparable companies, changes in our stock price and changes in the carrying values of our reporting units with goodwill. We also considered overall business conditions.

In performing the quantitative assessment, we estimated the fair value of each of our reporting units using a combination of the income and market approaches. The income approach, also known as the discounted cash flow ("DCF") method, utilizes the present value of cash flows to estimate fair value. The future cash flows for our reporting units were projected based on our estimates, at that time, of future revenues, operating income and other factors (such as working capital and capital expenditures). For purposes of conducting our impairment analysis, we assumed revenue growth rates and cash flow projections that are below our actual long-term expectations. The discount rates used in our DCF method were based on a weighted-average cost of capital ("WACC") determined from relevant market comparisons, adjusted upward for specific reporting unit risks (primarily the uncertainty of achieving projected operating cash flows). A terminal value growth rate was applied to the final year of the projected period and reflected our estimate of stable, perpetual growth. We then calculated a present value of the respective cash flows for each reporting unit to arrive at an estimate of fair value under the income approach. Under the market approach, we estimated a fair value based on comparable companies' market multiples of revenues and earnings before interest, taxes, depreciation and amortization and factored in a control premium. Finally, we compared our estimates of fair values to our August 1, 2017 total public market capitalization and assessed implied control premiums based on our common stock price of \$18.47 as of August 1, 2017.

Based on our quantitative evaluation, we determined that our Commercial Solutions and Government Solutions reporting units had estimated fair values in excess of their carrying values of at least 17.8% and 52.9%, respectively, and concluded that our goodwill was not impaired and that neither of our two reporting units was at risk of failing the quantitative assessment. However, in order to sensitize our goodwill impairment test, we performed a second analysis using only the income approach and concluded that neither reporting units' goodwill was impaired or at risk of failing the quantitative assessment. It is possible that, during fiscal 2018 or beyond, business conditions (both in the U.S. and internationally) could deteriorate from the current state, our current or prospective customers could materially postpone, reduce or even forgo purchases of our products and services to a greater extent than we currently anticipate, or our common stock price could decline. A significant decline in our customers' spending that is greater than we anticipate or a shift in funding priorities may also have a negative effect on future orders, sales, income and cash flows and we might be required to perform a quantitative assessment during fiscal 2018 or beyond. If assumed net sales and cash flow projections are not achieved in future periods or our common stock price significantly declines from current levels, our Commercial Solutions and Government Solutions reporting units could be at risk of failing the quantitative assessment and goodwill assigned to the respective reporting units could be impaired.

In any event, we are required to perform the next annual goodwill impairment analysis on August 1, 2018 (the start of our fiscal 2019). If our assumptions and related estimates change in the future, or if we change our reporting unit structure or other events and circumstances change (e.g., a sustained decrease in the price of our common stock (considered on both absolute terms and relative to peers)), we may be required to record impairment charges when we perform these tests, or in other future periods. In addition to our impairment analysis of goodwill, we also review net intangible assets with finite lives when an event occurs indicating the potential for impairment. We believe that the carrying values of our net intangible assets were recoverable as of April 30, 2018. Any impairment charges that we may record in the future could be material to our results of operation and financial condition.

Provision for Warranty Obligations. We provide warranty coverage for most of our products, including products under long-term contracts, for a period of at least one year from the date of shipment. We record a liability for

estimated warranty expense based on historical claims, product failure rates and other factors. Costs associated with some of our warranties that are provided under long-term contracts are incorporated into our estimates of total contract costs. There exist inherent risks and uncertainties in estimating warranty expenses, particularly on larger or longer-term contracts. If we do not accurately estimate our warranty costs, any changes to our original estimates could be material to our results of operations and financial condition.

Accounting for Income Taxes. Our deferred tax assets and liabilities are determined based on temporary differences between financial reporting and tax bases of assets and liabilities, and applying enacted tax rates expected to be in effect for the year in which we expect the differences to reverse. Our provision for income taxes is based on domestic (including federal and state) and international statutory income tax rates in the tax jurisdictions where we operate, permanent differences between financial reporting and tax reporting and available credits and incentives. We recognize interest and penalties related to uncertain tax positions in income tax expense. The U.S. federal government is our most significant income tax jurisdiction.

Index

Significant judgment is required in determining income tax provisions and tax positions. We may be challenged upon review by the applicable taxing authority and positions taken by us may not be sustained. We recognize all or a portion of the benefit of income tax positions only when we have made a determination that it is more likely than not that the tax position will be sustained upon examination, based upon the technical merits of the position and other factors. For tax positions that are determined as more likely than not to be sustained upon examination, the tax benefit recognized is the largest amount of benefit that is greater than 50% likely of being realized upon ultimate settlement. The development of valuation allowances for deferred tax assets and reserves for income tax positions requires consideration of timing and judgments about future taxable income, tax issues and potential outcomes, and are subjective critical estimates. A portion of our deferred tax assets consist of federal net operating losses and federal research and experimentation tax credit carryforwards, most of which was acquired in connection with our acquisition of TCS. No valuation allowance has been established on these deferred tax assets based on our evaluation that our ability to realize such assets has met the criteria of "more likely than not." We continuously evaluate additional facts representing positive and negative evidence in determining our ability to realize these deferred tax assets. In certain circumstances, the ultimate outcome of exposures and risks involves significant uncertainties. If actual outcomes differ materially from these estimates, they could have a material impact on our results of operations and financial condition.

On December 22, 2017, H.R.1, also known as the Tax Cuts and Jobs Act ("Tax Reform") was enacted in the U.S. Tax Reform significantly lowered the amount of our current and future income tax expense primarily due to the reduction in the U.S. statutory income tax rate from 35.0% to 21.0%. This provision went into effect on January 1, 2018 and required us to remeasure our deferred tax assets and liabilities. In fiscal 2019 and beyond, Tax Reform will result in the loss of our ability to take the domestic production activities deduction, which has been repealed, and is likely to result in lower tax deductions for certain executive compensation expenses.

During the nine months ended April 30, 2018, we recorded an estimated net discrete tax benefit of \$14.1 million which, as a result of Tax Reform, primarily related to the remeasurement of deferred tax liabilities associated with non-deductible amortization related to intangible assets. The remeasurement was recorded pursuant to ASC 740 "Income Taxes" and SEC Staff Accounting Bulletin ("SAB") 118, using estimates based on reasonable and supportable assumptions and available information as of the reporting date. As such, we expect to finalize this net discrete tax benefit during the remainder of fiscal 2018. In addition, it is possible that the Internal Revenue Service ("IRS") will issue clarifying or interpretive guidance related to Tax Reform, which may ultimately result in a change to our estimated income tax.

Since November 2017, our federal income tax return for fiscal 2016 has been under audit by the IRS. The audit is ongoing and we are unaware of any proposed adjustments by the IRS. Our federal income tax return for fiscal 2015 is also subject to potential future IRS audit. None of our state income tax returns prior to fiscal 2013 are subject to audit. TCS's federal income tax returns for tax years 2014 and 2015 and the tax period from January 1, 2016 to February 23, 2016 are subject to potential IRS audit. None of TCS's state income tax returns prior to calendar year 2013 are subject to audit. The results of the IRS tax audit for fiscal 2016, future tax assessments or settlements could have a material adverse effect on our consolidated results of operations and financial condition.

Research and Development Costs. We generally expense all research and development costs. Research and development expenses include payroll, employee benefits, stock-based compensation expense, and other personnel-related expenses associated with product development. Research and development expenses also include third-party development and programming costs. Costs incurred internally in researching and developing software to be sold are charged to expense until technological feasibility has been established for the software. Judgment is required in determining when technological feasibility of a product is established. Technological feasibility for our advanced communication software solutions is generally reached after all high-risk development issues have been resolved through coding and testing. Generally, this occurs shortly before the products are released to customers and

when we are able to validate the marketability of such product. Once technological feasibility is established, all software costs are capitalized until the product is available for general release to customers. To date, we have not capitalized any of our internally developed software costs.

Provisions for Excess and Obsolete Inventory. We record a provision for excess and obsolete inventory based on historical and future usage trends. Other factors may also influence our provision, including decisions to exit a product line, technological change and new product development. These factors could result in a change in the amount of excess and obsolete inventory on hand. Additionally, our estimates of future product demand may prove to be inaccurate, in which case we may have understated or overstated the provision required for excess and obsolete inventory. In the future, if we determine that our inventory was overvalued, we would be required to recognize such costs in our financial statements at the time of such determination. Any such charge could be material to our results of operations and financial condition.

Index

Allowance for Doubtful Accounts. We perform credit evaluations of our customers and adjust credit limits based upon customer payment history and current creditworthiness, as determined by our review of our customers' current credit information. Generally, we will require cash in advance or payment secured by irrevocable letters of credit before an order is accepted from an international customer that we do not do business with regularly. In addition, we seek to obtain insurance for certain domestic and international customers.

We monitor collections and payments from our customers and maintain an allowance for doubtful accounts based upon our historical experience and any specific customer collection issues that we have identified. In light of ongoing tight credit market conditions, we continue to see requests from our customers for higher credit limits and longer payment terms. Because of our strong cash position and the nominal amount of interest we are earning on our cash and cash equivalents, we have, on a limited basis, approved certain customer requests.

We continue to monitor our accounts receivable credit portfolio. Our overall credit losses have historically been within our expectations of the allowances established; however, we cannot guarantee that we will continue to experience the same credit loss rates that we have in the past. Measurement of credit losses requires consideration of historical loss experience, including the need to adjust for changing business conditions, and judgments about the probable effects of relevant observable data, including present economic conditions such as delinquency rates and the financial health of specific customers. Changes to the estimated allowance for doubtful accounts could be material to our results of operations and financial condition.

Index

Business Outlook for Fiscal 2018

Our results for the third quarter exceeded our expectation and we generated consolidated:

Net sales of \$147.9 million;

Operating income of \$14.0 million;

Net income of \$8.2 million;

Cash flows from operating activities of \$21.4 million; and

Adjusted EBITDA (a Non-GAAP financial measure discussed below) of \$23.5 million.

Our pipeline of opportunities remains strong and overall business activity is at the highest level it has been in several years. As discussed below, our third quarter results reflect the impact of strong demand and favorable product mix changes.

During the three months ended April 30, 2018, our Commercial Solutions segment received a large strategic multi-year contract award from the U.S. Navy's Space and Naval Warfare Systems Command in the amount of \$59.0 million to purchase our SLM-5650B satellite modems, upgrade kits and related services. We have received initial funding of approximately \$8.2 million and given the U.S. Navy's pressing operational needs, we shipped most of these orders during our third quarter, which positively impacted our operating income. We originally expected to begin shipments of this satellite earth station equipment during our fourth quarter of fiscal 2018. Although timing for U.S. government orders are generally difficult to predict, we are optimistic that we will receive and ship additional orders for this equipment during the remainder of fiscal 2018. In addition to strong demand from our U.S. Navy customer, we continue to see signs that our Heights™ Dynamic Network Access Technology ("HEIGHTS" or "HDNA") solutions are gaining traction. During the third quarter, Orange Business Services, one of the largest telecommunications operations and IT services company in the world, selected HEIGHTS to support relief projects in two African countries. This award is a testament to our HEIGHTS products and bodes well for future orders from this and other similar customers. Our Commercial Solutions segment was awarded a \$10.1 million multi-year contract to provide one of the largest wireless carriers in the U.S. with a hosted, advanced location services platform. During our third quarter, we were also awarded a two-year multi-million dollar contract to provide Next Generation ("NG") Text to 911 emergency services for the state of Maryland. Through this contract award, 911 call centers located across the state of Maryland will be outfitted to receive and respond to text messages sent to 911.

Our Government Solutions segment continued to show positive business momentum and improvement in both operating income and Adjusted EBITDA. During the third quarter, we received a number of important awards, including: (i) \$16.9 million of orders to provide ongoing sustainment services for the AN/TSC-198A SNAP (Secret Internet Protocol Router ("SIPR") and Non-classified Internet Protocol Router ("NIPR") Access Point), Very Small Aperture Terminals ("VSATs"); (ii) \$14.2 million of orders to supply the U.S. Army with advanced VSAT equipment; and (iii) \$8.5 million in contracts to supply our Modular Transportable Transmission System ("MTTS") troposcatter terminals to two international customers. In addition, we received a \$3.7 million contract modification from the Consortium Management Group ("CMG") to support the U.S. Army Project Manager Mission Command ("PM MC") and the Blue Force Tracking-2 ("BFT-2") program to port additional waveforms onto the current BFT-2 transceivers. Separately, we continue to work with the U.S. Army to deploy our MT-2025 mobile satellite transceivers, which are also known as the Blue Force Tracker-2 High Capacity ("BFT-2-HC") Satellite Transceivers. The MT-2025 transceivers meet BFT-2 protocols, provides best-in-class reliability and is fully backward compatible with the BFT-1 system. Comtech currently provides sustaining support for the BFT-1 system and previously shipped over 100,000 BFT-1 mobile satellite transceivers. We expect initial shipments of MT-2025 transceivers to start during our fourth quarter of fiscal 2018 and additional orders for our MT-2025 transceivers are ultimately expected.

Overall, we experienced strong order flow across many of our product lines and achieved a consolidated book-to-bill ratio (a measure defined as bookings divided by net sales) of 1.11 for the most recent quarter. As of April 30, 2018,

our consolidated backlog was \$583.7 million, close to our record high. Our backlog, as more fully defined in our most recent Annual Report on Form 10-K filed with the SEC, only consists of funded and firm contract orders. Our backlog does not include the unfunded portions of multi-year contracts. As such, the total value of multi-year contracts that we have received is substantially higher than our reported backlog.

Given our expectations for the fourth quarter, we expect fiscal 2018 to be a year of net sales and Adjusted EBITDA growth. Excluding a number of favorable adjustments throughout fiscal 2017, which aggregated \$18.8 million and which are more fully discussed in our Annual Report on Form 10-K for the fiscal year ended July 31, 2017, as filed with the SEC, fiscal 2018 is also expected to be a year of operating income growth.

Index

Notwithstanding a number of timing changes with respect to product shipments between the third and fourth quarters of fiscal 2018 and updated product mix assumptions, we believe our Business Outlook for Fiscal 2018 has improved since our Business Outlook for Fiscal 2018 discussed in our Quarterly Report on Form 10-Q filed with the SEC on March 7, 2018. Our current Business Outlook for Fiscal 2018 targets:

- an annual net sales growth rate of close to 5.0% as compared to fiscal 2017;

- consolidated operating income, as a percentage of net sales, of approximately 5.2% which compares favorably with the 3.3% of consolidated net sales we achieved in fiscal 2017 (excluding the \$18.8 million of favorable adjustments that are more fully discussed in our Annual Report on Form 10-K for the fiscal year ended July 31, 2017, as filed with the SEC);

- an annual Adjusted EBITDA growth rate of close to 6.0%; and

- Adjusted EBITDA, as a percentage of consolidated net sales, of close to 13.0%.

We believe these targeted metrics demonstrate the strength of our business, particularly considering that our fiscal 2017 results include the benefit of \$6.7 million of BFT-1 intellectual property license fees (which the U.S. Army is no longer obligated to pay us to support the BFT-1 system).

From a timing perspective, our fourth quarter of fiscal 2018 is still expected to be the peak quarter for both consolidated net sales and Adjusted EBITDA but our third quarter of fiscal 2018 is now expected to be the peak quarter of consolidated operating income. As discussed above, our operating income for the third quarter reflects the benefit of shipments of satellite earth station equipment to the U.S. Navy that were previously expected to occur in our fourth quarter of fiscal 2018. Our fourth quarter net sales assumptions now reflect this and other changes in product mix (including lower expected sales of higher margin cyber training software solutions). As we did last year, we intend to pay certain fiscal 2018 non-equity incentive awards in the form of fully vested share units which will result in an increase in amortization of stock-based compensation in our fourth quarter of fiscal 2018 as compared to the third quarter of fiscal 2018. This amortization expense is included in the calculation of operating income but is excluded from our Adjusted EBITDA financial measure. Based on the type of awards currently outstanding and awards expected to be issued during the remainder of fiscal 2018, total amortization of stock-based compensation is expected to be higher in fiscal 2018 than in fiscal 2017. If order flow remains strong and we are able to achieve all of our fiscal 2018 business goals, it is possible that our fiscal 2018 net sales and Adjusted EBITDA growth rates could be higher than our targeted amounts. We expect our GAAP net income to be higher in fiscal 2018 as compared to fiscal 2017 primarily due to the benefits associated with H.R.1, also known as the Tax Cuts and Jobs Act ("Tax Reform") which was enacted on December 22, 2017.

Our effective tax rate in fiscal 2018, excluding discrete items, is expected to approximate 27.0% and reflects the benefit related to the reduction of the statutory income tax rate from 35.0% to 21.0%, or a blended income tax rate of approximately 27.0%. This decrease is the result of Tax Reform. During the nine months ended April 30, 2018, we recorded an estimated net discrete tax benefit of \$14.1 million, primarily due to the remeasurement of deferred tax liabilities associated with non-deductible amortization related to intangible assets that was required as a result of Tax Reform. In fiscal 2019 and beyond, we expect to fully benefit from the lower statutory income tax rate. As such, and based on an initial analysis, we estimate that our fiscal 2019 effective tax rate, before any discrete items, will range from 23.5% to 25.0%. If the Internal Revenue Service ("IRS") issues clarifying or interpretive guidance, and/or new information becomes available, our estimated effective tax rates may change.

Our fourth quarter expectations and Business Outlook for Fiscal 2018 depend, in large part, on timely deliveries and the receipt of and performance on orders from our customers and could be adversely impacted if deliveries are

delayed, business conditions deteriorate or our current or prospective customers materially postpone, reduce or even forgo purchases of our products and services. Additionally, we continue to evaluate cost reduction initiatives in our business. Such actions primarily relate to reducing the size and cost of our facilities. Our Business Outlook for Fiscal 2018 does not consider the financial impact of any actions we may take.

On June 6, 2018, our Board of Directors declared a dividend of \$0.10 per common share, payable on August 17, 2018 to stockholders of record at the close of business on July 16, 2018. Future dividends remain subject to compliance with financial covenants under our Secured Credit Facility, as amended, as well as Board approval.

Additional information related to our Business Outlook for Fiscal 2018 and a definition and explanation of Adjusted EBITDA is included in the below section "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Comparison of the Results of Operations for the Three Months Ended April 30, 2018 and 2017" and "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Comparison of the Results of Operations for the Nine Months Ended April 30, 2018 and 2017."

Index

COMPARISON OF THE RESULTS OF OPERATIONS FOR THE THREE MONTHS ENDED APRIL 30, 2018 AND 2017

Net Sales. Consolidated net sales were \$147.9 million and \$127.8 million for the three months ended April 30, 2018 and 2017, respectively, representing an increase of \$20.1 million, or 15.7%. The period-over-period increase in net sales was due primarily to higher net sales in both our Commercial Solutions segment and Government Solutions segment. Net sales by operating segment are discussed below.

Commercial Solutions

Net sales in our Commercial Solutions segment were \$89.9 million for the three months ended April 30, 2018, as compared to \$79.4 million for the three months ended April 30, 2017, an increase of \$10.5 million, or 13.2%. Our Commercial Solutions segment represented 60.8% of consolidated net sales for the three months ended April 30, 2018 as compared to 62.1% for the three months ended April 30, 2017.

Bookings during the three months ended April 30, 2018 were solid. Although bookings were lower than the amount we achieved during the second quarter of fiscal 2018, bookings increased as compared to the three months ended April 30, 2017. Our second quarter of fiscal 2018 reflected the benefit of a large multi-year strategic contract valued at \$134.0 million to provide one of the largest wireless carriers in the U.S. with enhanced 911 ("E911") services. Our book-to-bill ratio (a measure defined as bookings divided by net sales) for the three months ended April 30, 2018 was 0.93. As further discussed below, we have a growing pipeline of opportunities and expect that the book-to-bill ratio in this segment will exceed 1.00 for fiscal 2018. We continue to see strong demand in almost all of our Commercial Solutions product lines, which are further discussed below.

Net sales of our satellite earth station products (which include satellite modems and solid-state power amplifiers ("SSPAs")) during the three months ended April 30, 2018 were higher than the three months ended April 30, 2017. Both bookings and sales for this quarter increased as compared to the respective amounts we achieved in the first and second quarters of fiscal 2018. Given our fiscal 2018 year-to-date performance and our order expectations for our fourth quarter, we believe that fiscal 2018 will be a year of net sales growth for this product line. We continue to see increased interest from U.S. government customers for our satellite earth station products as evidenced by the \$59.0 million contract award we received this quarter from the U.S. Navy's Space and Naval Warfare Systems Command for our SLM-5650B satellite modems, upgrade kits and related services. This indefinite delivery / indefinite quantity ("IDIQ") sole-source contract has five one-year ordering periods. We have received initial funding of \$8.2 million and given the U.S. Navy's pressing operational needs, we shipped most of these initial orders during the third quarter, which positively impacted our operating income. We originally expected to begin shipments of this satellite earth station equipment during the fourth quarter of fiscal 2018. Although timing of the U.S. government orders are generally difficult to predict, we are optimistic that we will receive and ship additional orders for this equipment during the remainder of fiscal 2018.

Net sales of our satellite earth station products in fiscal 2018 also reflect the benefit of orders received for our Heights™ Dynamic Network Access Technology ("HEIGHTS" or "HDNA") solutions. We continue to see signs that our HEIGHTS solutions are gaining traction. We believe HEIGHTS is a revolutionary technology that is designed to deliver the highest Internet Protocol bits per Hertz in its class, as well as robust reliability. HEIGHTS has been and will continue to be a cornerstone of our future research and development efforts. Although the sales cycle for this product line is longer than our historical satellite earth station product line sales cycle, to-date, we have announced several important customer wins for this product line and our pipeline of opportunities continues to grow. For example, during the third quarter of fiscal 2018, we announced that Orange Business Services, one of the largest telecommunications operations and IT services companies in the world, selected HEIGHTS to help them support relief projects in two African countries. We believe this order bodes well for the future given the purchasing influence that Orange Business Services has in other countries.

Net sales during the three months ended April 30, 2018 of both enterprise technology solutions (such as our location and messaging platforms) and safety and security technology solutions (such as our wireless and next generation 911 ("NG911") platforms) were higher as compared to the net sales we achieved during the three months ended April 30, 2017. During our third quarter of fiscal 2018, we were awarded a \$10.1 million multi-year contract to provide one of the largest wireless carriers in the U.S. with a hosted, advanced location services platform which leverages our Position Determining Engine ("PDE"). Under this competitively awarded contract, the U.S. wireless carrier is expected to migrate existing location services from a competitive solution to our more advanced, secure and reliable technologies. Also, we were awarded a two-year multi-million dollar contract to provide Next Generation ("NG") Text to 911 emergency services for the state of Maryland. Through this contract award, 911 call centers located across the state of Maryland will be outfitted to receive and respond to text messages sent to 911. In our view, these contract awards validate that our enterprise technology solutions and safety and security technology solutions are more advanced, secure and reliable than any existing competitive technology. Market conditions remain favorable and we expect that aggregate net sales of these solutions in fiscal 2018 will be higher than in fiscal 2017.

Index

Overall, we expect fiscal 2018 net sales in our Commercial Solutions segment to be higher than fiscal 2017. Bookings, sales and profitability in our Commercial Solutions segment can fluctuate from period-to-period due to many factors, including changes in the general business environment. As such, period-to-period comparisons of our results may not be indicative of a trend or future performance.

Government Solutions

Net sales in our Government Solutions segment were \$57.9 million for the three months ended April 30, 2018 as compared to \$48.4 million for the three months ended April 30, 2017, an increase of \$9.5 million, or 19.6%. Our Government Solutions segment represented 39.2% of consolidated net sales for the three months ended April 30, 2018, as compared to 37.9% for the three months ended April 30, 2017.

Bookings for this segment were strong and reflect continued strength in almost all of our Government Solutions product lines. During the third quarter of fiscal 2018, we received \$16.9 million of orders to provide ongoing sustainment services for the AN/TSC-198A SNAP (Secret Internet Protocol Router ("SIPR") and Non-classified Internet Protocol Router ("NIPR") Access Point), Very Small Aperture Terminals ("VSATs"). The \$16.9 million of orders were issued pursuant to a three-year \$123.6 million IDIQ contract that we received earlier in fiscal 2018 from the U.S. Army. SNAP terminals provide quick and mobile satellite communications capability to personnel in the field and Comtech is the sole provider to the U.S. Army of these sustainment services. We also were awarded \$14.2 million of orders to supply the U.S. Army with advanced VSAT equipment. We received \$8.5 million in contracts to supply our Modular Transportable Transmission System ("MTTS") troposcatter terminals to two international customers. In addition we received a \$3.7 million contract modification from the Consortium Management Group ("CMG") to support the U.S. Army Project Manager Mission Command ("PM MC") and the Blue Force Tracking-2 ("BFT-2") program to port additional waveforms onto the current BFT-2 transceivers. Our book-to-bill ratio for the three months ended April 30, 2018 was 1.40. This was the fifth consecutive quarter in which the book-to-bill ratio exceeded 1.00 and backlog for this segment is at the highest level since our acquisition of TCS in February 2016. We see a growing pipeline of potential orders from large government end-users (including those of foreign countries) who have a growing need to mitigate threats using command and control technology solutions to increase decision-maker's situational awareness. This growing order pipeline is occurring in almost all of our Government Solutions product lines, which are further discussed below.

Net sales of our command and control solutions (which include the design, installation and operation of secure wireless communication networks, cyber intelligence solutions and blue-force tracking solutions) during the three months ended April 30, 2018 were significantly higher than the three months ended April 30, 2017. Our most recent quarter benefited from sales to a major U.S. space contractor to source and test space level Electrical, Electronic and Electromechanical ("EEE") parts in support of critical NASA programs and from an international space agency for the design, development and installation of multiple launch vehicle tracking stations in the South Pacific. We continue to work with the U.S. Army on our recently awarded \$11.7 million order to provide several thousand of our next generation MT-2025 mobile satellite transceivers to support the U.S. Army's BFT-2 system. The BFT-2 system, which is part of the U.S. Army's JBC-P program, provides global real-time situational awareness and networking capabilities for U.S. warfighters and is the successor to the BFT-1 system. We expect initial shipments of MT-2025 transceivers to start during our fourth quarter of fiscal 2018 and additional orders for our MT-2025 transceivers are ultimately expected.

Although net sales of our over-the-horizon microwave systems products this quarter were lower than the comparative quarter ended April 30, 2017, business activity in our over-the-horizon microwave systems product line continues to pick-up. During the third quarter of fiscal 2018, we shipped certain troposcatter equipment to support U.S. Army activities throughout the Korean Peninsula. We believe demand for our over-the-horizon microwave systems will increase and have recently submitted a proposal to supply a significant quantity of our over-the-horizon microwave systems to the U.S. Army. We teamed with a large prime contractor and we are hopeful that we can win this

multi-million dollar award in fiscal 2019.

Although the timing of large contract awards makes it difficult to predict our book-to-bill ratio in any given period, we have a growing pipeline of opportunities and expect the book-to-bill ratio in this segment for fiscal 2018 to exceed 1.00. Given year-to-date order flow and expected new orders, we anticipate that fiscal 2018 net sales for our Government Solutions segment will be higher than the amount we achieved in fiscal 2017.

Bookings, sales and profitability in our Government Solutions segment can fluctuate dramatically from period-to-period due to many factors, including unpredictable funding, deployment and technology decisions by our U.S. and international government customers. As such, period-to-period comparisons of our results may not be indicative of a trend or future performance.

Index

Geography and Customer Type

Sales by geography and customer type, as a percentage of related sales, for the three months ended April 30, 2018 and 2017 are as follows:

	Three months ended April 30, 2018					
	2018	2017	2018	2017	2018	2017
	Commercial Solutions		Government Solutions		Consolidated	
U.S. government	22.2 %	17.1 %	61.0 %	56.5 %	37.4 %	32.0 %
Domestic	53.3 %	55.9 %	14.4 %	17.3 %	38.0 %	41.3 %
Total U.S.	75.5 %	73.0 %	75.4 %	73.8 %	75.4 %	73.3 %
International	24.5 %	27.0 %	24.6 %	26.2 %	24.6 %	26.7 %
Total	100.0 %	100.0 %	100.0 %	100.0 %	100.0 %	100.0 %

Sales to U.S. government customers include sales to the U.S. Department of Defense ("DoD"), intelligence and civilian agencies, as well as sales directly to or through prime contractors.

Domestic sales include sales to commercial customers, as well as to U.S. state and local governments. Included in domestic sales, are sales to Verizon Communications Inc. ("Verizon"), which represented 9.8% of consolidated net sales for the three months ended April 30, 2018. Sales to Verizon were less than 10.0% of consolidated net sales for the comparable prior year period.

International sales for the three months ended April 30, 2018 and 2017 (which include sales to U.S. domestic companies for inclusion in products that are sold to international customers) were \$36.3 million and \$34.1 million, respectively. Except for the U.S., no individual country (including sales to U.S. domestic companies for inclusion in products that are sold to a foreign country) represented more than 10.0% of consolidated net sales for the three months ended April 30, 2018 and 2017.

Gross Profit. Gross profit was \$62.4 million for the three months ended April 30, 2018 as compared to \$52.5 million for the three months ended April 30, 2017, an increase of \$9.9 million. This increase in gross profit dollars was largely driven by higher net sales in both our Commercial Solutions and Government Solutions segments, offset in part by the absence of \$1.7 million of BFT-1 intellectual property license fees during the third quarter of fiscal 2018. Gross profit, as a percentage of consolidated net sales, was 42.2% for the three months ended April 30, 2018 as compared to 41.1% for the three months ended April 30, 2017. Gross profit, as a percentage of related segment net sales, is further discussed below.

Our Commercial Solutions segment's gross profit, as a percentage of related segment net sales, for the three months ended April 30, 2018 was higher than the comparable prior year period. The increase was primarily due to higher net sales and overall favorable product mix changes (including earlier than expected shipments of satellite earth station equipment to the U.S. Navy) during the most recent fiscal quarter. Given timing and other product mix changes, gross profit in the fourth quarter of fiscal 2018 in this segment is expected to decline from the level achieved in the third quarter of fiscal 2018. Overall, we expect gross profit in this segment, as a percentage of related fiscal 2018 net sales, to be comparable to the percentage achieved in fiscal 2017.

Our Government Solutions segment's gross profit, as a percentage of related segment net sales, for the three months ended April 30, 2018 was slightly lower when compared to the prior year period, but an improvement over the first two quarters of fiscal 2018. Our third quarter of fiscal 2018 reflects the absence of \$1.7 million of BFT-1 intellectual property license fees that benefited the fiscal quarter ended April 30, 2017, as discussed above. Although we expect

net sales in the fourth quarter in this segment to increase as compared to our most recent quarter, we have updated our product mix assumptions for the remainder of fiscal 2018 which now reflect lower expected sales of higher margin cyber training software solutions, offset by other anticipated command and control solution sales. Sales cycles for cyber training software solutions are generally long and timing of related awards is difficult to predict. As a result of our updated product mix assumptions, we believe that gross profit (both in dollars and as a percentage of net sales in this segment) will be lower in the fourth quarter as compared to our third quarter of fiscal 2018. Overall, given the absence of BFT-1 intellectual property license fees in fiscal 2018, we expect gross profit in this segment, both in dollars and as a percentage of related net sales, to be lower than the respective metrics achieved in fiscal 2017. However, over time, we believe the implementation of our strategy of shifting our Government Solutions segment away from bidding on large commodity service contracts and toward pursuing contracts for our niche solutions will result in higher gross margins in this segment.

Index

Included in consolidated cost of sales for the three months ended April 30, 2018 and 2017 are provisions for excess and obsolete inventory of \$1.2 million and \$0.7 million, respectively. As discussed in "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Critical Accounting Policies - Provisions for Excess and Obsolete Inventory," we regularly review our inventory and record a provision for excess and obsolete inventory based on historical and projected usage assumptions.

Because our consolidated gross profit, as a percentage of consolidated net sales, depends on the volume of sales, sales mix and related gross profit for each individual segment, it is inherently difficult to forecast. Nevertheless, based on expected bookings, the anticipated timing of our performance on orders and the absence of the BFT-1 intellectual property license fees, we currently expect our consolidated gross profit, as a percentage of consolidated net sales, for fiscal 2018 to be slightly lower than the percentage we achieved in fiscal 2017.

Selling, General and Administrative Expenses. Selling, general and administrative expenses were \$30.4 million and \$25.9 million for the three months ended April 30, 2018 and 2017, respectively, representing an increase of \$4.5 million. As a percentage of consolidated net sales, selling, general and administrative expenses were 20.6% and 20.3% for the three months ended April 30, 2018 and 2017, respectively. The increase in spending, both in dollars and as a percentage of consolidated net sales, is primarily attributable to the recovery of certain legal expenses from a third party during the three months ended April 30, 2017. Our results for the most recent quarter reflect the benefits of prior cost reduction actions. We continue to evaluate and implement cost reduction initiatives to reduce unnecessary spending, reduce the size and cost of our facilities and improve our productivity. Our Business Outlook for Fiscal 2018 does not consider the financial impact of any actions we may take.

Amortization of stock-based compensation expense recorded as selling, general and administrative expenses was \$1.0 million and \$0.9 million for the three months ended April 30, 2018 and 2017, respectively.

Based on our current spending plans, we expect fiscal 2018 selling, general and administrative expenses, as a percentage of consolidated net sales, to be comparable to fiscal 2017.

Research and Development Expenses. Research and development expenses were \$12.8 million and \$13.0 million for the three months ended April 30, 2018 and 2017, respectively, representing a decrease of \$0.2 million, or 1.5%. As a percentage of consolidated net sales, research and development expenses were 8.7% and 10.2% for the three months ended April 30, 2018 and 2017, respectively. The decrease, as a percentage of consolidated net sales, was due primarily to the higher net sales during the most recent fiscal quarter, as discussed above.

For the three months ended April 30, 2018 and 2017, research and development expenses of \$11.3 million and \$10.7 million, respectively, related to our Commercial Solutions segment and \$1.4 million and \$2.2 million, respectively, related to our Government Solutions segment. The remaining research and development expenses of \$0.1 million for both the three months ended April 30, 2018 and 2017, respectively, related to the amortization of stock-based compensation expense.

Whenever possible, we seek customer funding for research and development to adapt our products to specialized customer requirements. During the three months ended April 30, 2018 and 2017, customers reimbursed us \$5.0 million and \$5.9 million, respectively, which is not reflected in the reported research and development expenses, but is included in consolidated net sales with the related costs included in cost of sales.

We continue to invest in enhancements to existing products as well as in new products across almost all of our product lines. Based on our current spending plans, we expect fiscal 2018 research and development expenses, as a percentage of consolidated net sales, to be comparable to fiscal 2017.

Amortization of Intangibles. Amortization relating to intangible assets with finite lives was \$5.3 million (of which \$4.4 million was for the Commercial Solutions segment and \$0.8 million was for the Government Solutions segment) for the three months ended April 30, 2018 and \$5.5 million (of which \$4.4 million was for the Commercial Solutions segment and \$1.0 million was for the Government Solutions segment) for the three months ended April 30, 2017. The decrease is a result of certain intangibles that became fully amortized in fiscal 2017. As such, we anticipate amortization of intangibles in fiscal 2018 to be lower than in fiscal 2017.

Settlement of Intellectual Property Litigation. During the three months ended April 30, 2017, we recorded a favorable adjustment to operating income of \$2.0 million, net of estimated legal fees, to reflect a lower loss than originally estimated for a TCS intellectual property matter which was settled during that period. There was no comparable adjustment in the three months ended April 30, 2018.

Index

Operating Income. Operating income for the three months ended April 30, 2018 was \$14.0 million as compared to \$10.2 million for the three months ended April 30, 2017. Operating income (loss) by reportable segment is shown in the table below:

	Three months ended April 30, 2018							
	2018	2017	2018	2017	2018	2017	2018	2017
(\$ in millions)	Commercial Solutions		Government Solutions		Unallocated		Consolidated	
Operating income (loss)	\$13.3	8.6	6.0	1.3	(5.4)	0.2	\$14.0	10.2
Percentage of related net sales	14.8 %	10.8%	10.4%	2.7%	NA	NA	9.5 %	8.0 %

The increase during the most recent fiscal quarter in our Commercial Solutions segment's operating income, in dollars and as a percentage of related segment net sales, was primarily due to higher net sales, overall favorable product mix changes and the benefit of cost reduction actions previously initiated, as discussed above. Given earlier than expected shipments of satellite earth station equipment to the U.S. Navy, our third quarter of fiscal 2018 is expected to be the peak quarter of operating income for this segment. Overall, we expect fiscal 2018 operating income in our Commercial Solutions segment, in dollars and as a percentage of related segment net sales, to increase as compared to fiscal 2017.

The increase during the most recent fiscal quarter in our Government Solutions segment's operating income, in dollars and as a percentage of related segment net sales, was primarily due to higher net sales, overall product mix changes and the benefit of cost reduction actions previously initiated, offset in part by the absence of \$1.7 million of BFT-1 intellectual property license fees, as discussed above. Based on the strength of our third quarter performance, an assessment of timing associated with our current backlog and updated product mix assumptions for the remainder of fiscal 2018 (including lower expected sales of higher margin cyber training software solutions), we expect this segment's operating income for the fourth quarter of fiscal 2018 to be comparable to the amount we achieved during the third quarter of fiscal 2018. Overall, operating income for this segment, in dollars and as a percentage of related segment net sales, is expected to be higher in fiscal 2018 than in fiscal 2017.

Unallocated operating expenses for the three months ended April 30, 2018 were \$5.4 million as compared to operating income of \$0.2 million for the three months ended April 30, 2017 (which includes a favorable adjustment of \$2.0 million, as discussed above). Excluding the \$2.0 million adjustment, unallocated operating expenses would have been \$1.8 million for the three months ended April 30, 2017. The increase to \$5.4 million from \$1.8 million is primarily attributable to the recovery of certain legal expenses from a third party during the three months ended April 30, 2017. Unallocated operating expenses for the most recent fiscal quarter includes the benefit of cost reduction actions previously initiated.

Unallocated operating expenses for the three months ended April 30, 2018 and 2017 include amortization of stock-based compensation of \$1.1 million and \$1.0 million, respectively. Amortization of stock-based compensation expense can fluctuate from period-to-period based on the type and timing of stock-based awards. Given the timing of anticipated fiscal 2018 awards, amortization of stock-based compensation is expected to be significantly higher in the fourth quarter of fiscal 2018 as compared to our most recent quarter. Based on the type of awards currently outstanding and awards expected to be issued during the remainder of fiscal 2018, amortization of stock-based compensation is also expected to be higher in fiscal 2018 than in fiscal 2017.

Looking forward, we expect our unallocated operating expenses in fiscal 2018 to significantly increase as compared to the \$5.6 million of unallocated operating expenses for fiscal 2017. During fiscal 2017, unallocated operating expenses were offset by a number of favorable adjustments throughout the fiscal year, which aggregated \$18.8 million and which are more fully discussed in our Annual Report on Form 10-K for the fiscal year ended July 31, 2017, as filed

with the SEC. Excluding the \$18.8 million of favorable adjustments, unallocated operating expenses in fiscal 2017 would have been \$24.4 million. Given the success of our cost reduction actions taken to date and current spending plans, we expect our unallocated operating expenses in fiscal 2018 to be lower than the \$24.4 million of unallocated operating expenses incurred in fiscal 2017, prior to the favorable adjustments discussed above.

On a consolidated basis, we are targeting to achieve operating income, as a percentage of net sales, of approximately 5.2% in fiscal 2018, which compares favorably with the 3.3% of consolidated net sales we achieved in fiscal 2017 (excluding the \$18.8 million of favorable adjustments to operating income discussed above). Based on the strength of our third quarter performance, an assessment of timing associated with our current backlog and updated product mix assumptions for the remainder of fiscal 2018, we now expect consolidated operating income for the third quarter of fiscal 2018 to be the peak quarter for the fiscal year.

Index

Interest Expense. Interest expense was \$2.5 million and \$2.8 million for the three months ended April 30, 2018 and 2017, respectively. The decline in interest expense primarily reflects lower total indebtedness, which declined from \$235.4 million as of April 30, 2017 to \$186.4 million as of April 30, 2018. Interest expense for both periods primarily reflects interest on our Secured Credit Facility, as amended. Based on the type, terms, amount of outstanding debt (including capital leases and other obligations) and current interest rates, we estimate that our effective interest rate (including amortization of deferred financing costs) will approximate 5.4% in fiscal 2018. Our actual cash borrowing rate (which excludes the amortization of deferred financing costs) currently approximates 4.3%.

Interest (Income) and Other. Interest (income) and other for both the three months ended April 30, 2018 and 2017 was nominal. All of our available cash and cash equivalents are currently invested in bank deposits and money market deposit accounts which, at this time, are currently yielding a blended annual interest rate of approximately 0.64%.

Provision For Income Taxes. Our provision for income taxes was \$3.1 million and \$2.9 million for the three months ended April 30, 2018 and 2017, respectively. Our effective tax rate was 27.2% for the three months ended April 30, 2018, as compared to 39.5% for the three months ended April 30, 2017.

During the three months ended April 30, 2018, we recorded a net discrete tax expense of less than \$0.1 million. Our effective tax rate for the three months ended April 30, 2017 reflects a net discrete tax expense of \$0.3 million. Excluding discrete tax items for the three months ended April 30, 2018, our estimated effective tax rate would have been 27.0%. Our effective tax rate, excluding discrete tax items, for the three months ended April 30, 2017 was 36.0%. The decrease from 36.0% to 27.0% is principally attributable to the passage of Tax Reform which reduced the statutory income tax rate from 35.0% to 21.0%, or a blended income tax rate of approximately 27.0%.

Net Income. During the three months ended April 30, 2018, consolidated net income was \$8.2 million as compared to \$4.4 million during the three months ended April 30, 2017.

Adjusted EBITDA. Adjusted EBITDA (both in dollars and as a percentage of related net sales) for both the three months ended April 30, 2018 and 2017 are shown in the table below (numbers in the table may not foot due to rounding):

(\$ in millions)	Three months ended April 30,							
	2018	2017	2018	2017	2018	2017	2018	2017
	Commercial Solutions		Government Solutions		Unallocated		Consolidated	
Net income (loss)	\$12.9	8.5	6.0	1.3	(10.7)	(5.4)	\$8.2	4.4
Provision for income taxes	0.2	—	—	—	2.9	2.9	3.1	2.9
Interest (income) and other expenses	0.1	0.1	0.1	—	—	—	0.2	0.1
Interest expense	—	—	—	—	2.5	2.7	2.5	2.8
Amortization of stock-based compensation	—	—	—	—	1.1	1.0	1.1	1.0
Amortization of intangibles	4.4	4.4	0.8	1.0	—	—	5.3	5.5
Depreciation	2.3	2.4	0.6	0.8	0.3	0.4	3.2	3.5
Settlement of intellectual property litigation	—	—	—	—	—	(2.0)	—	(2.0)
Adjusted EBITDA	\$20.0	15.5	7.5	3.1	(4.0)	(0.5)	\$23.5	18.1
Percentage of related net sales	22.3 %	19.5 %	12.9 %	6.4 %	NA	NA	15.9 %	14.2 %

The increase in consolidated Adjusted EBITDA during the three months ended April 30, 2018 as compared to the three months ended April 30, 2017 was primarily attributable to higher net sales and overall favorable product mix changes, offset in part by higher operating expenses during the three months ended April 30, 2018 as a result of the increased sales activity during the period. Also, selling, general and administrative expenses during the three months

ended April 30, 2017 included a recovery of certain legal expenses from a third party, as discussed above.

Index

The increase in our Commercial Solutions segment's Adjusted EBITDA, in dollars and as a percentage of related segment net sales, during the most recent fiscal quarter was primarily due to higher net sales, overall favorable product mix changes and the benefit of cost reduction actions previously initiated, as discussed above.

The increase in our Government Solutions segment's Adjusted EBITDA, in dollars and as a percentage of related segment net sales, during the most recent fiscal quarter was primarily due to higher net sales, overall product mix changes and the benefit of cost reduction actions previously initiated, offset in part by an absence of \$1.7 million of BFT-1 intellectual property license fees, as discussed above. As a result of the aforementioned change in product mix assumptions for the remainder of fiscal 2018, our fourth quarter of fiscal 2018 Adjusted EBITDA in this segment is expected to be lower than the amount we reported in our most recent period.

Looking forward, we anticipate consolidated Adjusted EBITDA to increase in the fourth quarter as compared to the amount we achieved in the third quarter.

Given our year-to-date performance, we are targeting fiscal 2018 Adjusted EBITDA to grow close to 6.0% over the \$70.7 million we achieved in fiscal 2017. In addition, despite the absence of \$6.7 million of BFT-1 intellectual property license fees (which the U.S. Army is no longer obligated to pay us to support the BFT-1 system), we expect Adjusted EBITDA, as a percentage of fiscal 2018 consolidated net sales, to be close to 13.0%, which is slightly higher than the 12.8% we achieved in fiscal 2017. We believe these targeted financial metrics demonstrate the strength of our business. If order flow remains strong and we are able to achieve all of our fiscal 2018 business goals, it is possible that our fiscal 2018 Adjusted EBITDA financial metrics could be higher than our targeted amounts.

A reconciliation of our fiscal 2017 GAAP Net Income to Adjusted EBITDA of \$70.7 million is shown in the table below:

(\$ in millions)	Fiscal Year 2017
Reconciliation of GAAP Net Income to Adjusted EBITDA:	
Net income	\$ 15.8
Income taxes	9.7
Interest (income) and other expense	(0.1)
Interest expense	11.6
Amortization of stock-based compensation	8.5
Amortization of intangibles	22.8
Depreciation	14.4
Settlement of intellectual property litigation	(12.0)
Adjusted EBITDA	\$70.7

Index

Our Adjusted EBITDA is a Non-GAAP measure that represents earnings (loss) before income taxes, interest (income) and other expense, interest expense, amortization of stock-based compensation, amortization of intangibles, depreciation expense, settlement of intellectual property litigation, acquisition plan expenses or strategic alternatives analysis expenses and other. Our definition of Adjusted EBITDA may differ from the definition of EBITDA used by other companies and therefore may not be comparable to similarly titled measures used by other companies. Adjusted EBITDA is also a measure frequently requested by our investors and analysts. We believe that investors and analysts may use Adjusted EBITDA, along with other information contained in our SEC filings, in assessing our performance and comparability of our results with other companies. These Non-GAAP financial measures have limitations as an analytical tool as they exclude the financial impact of transactions necessary to conduct our business, such as the granting of equity compensation awards, and are not intended to be an alternative to financial measures prepared in accordance with GAAP. These measures are adjusted as described in the reconciliation of GAAP to Non-GAAP in the above table, but these adjustments should not be construed as an inference that all of these adjustments or costs are unusual, infrequent or non-recurring. Non-GAAP financial measures should be considered in addition to, and not as a substitute for or superior to, financial measures determined in accordance with GAAP. Investors are advised to carefully review the GAAP financial results that are disclosed in our SEC filings. We have not quantitatively reconciled our fiscal 2018 Adjusted EBITDA target to the most directly comparable GAAP measure because items such as stock-based compensation, adjustments to the provision for income taxes, amortization of intangibles and interest expense, which are specific items that impact these measures, have not yet occurred, are out of our control, or cannot be predicted. For example, quantification of stock-based compensation expense requires inputs such as the number of shares granted and market price that are not currently ascertainable. Accordingly, reconciliations to the Non-GAAP forward looking metrics are not available without unreasonable effort and such unavailable reconciling items could significantly impact our financial results.

Index

COMPARISON OF THE RESULTS OF OPERATIONS FOR NINE MONTHS ENDED APRIL 30, 2018 AND 2017

Net Sales. Consolidated net sales were \$403.2 million and \$402.6 million for the nine months ended April 30, 2018 and 2017, respectively, representing an increase of \$0.6 million, or 0.1%. The period-over-period increase in net sales was due primarily to higher net sales in our Commercial Solutions segment offset by lower net sales in our Government Solutions segment. Net sales by operating segment are discussed below.

Commercial Solutions

Net sales in our Commercial Solutions segment were \$251.9 million for the nine months ended April 30, 2018, as compared to \$237.7 million for the nine months ended April 30, 2017, an increase of \$14.2 million, or 6.0%. Our Commercial Solutions segment represented 62.5% of consolidated net sales for the nine months ended April 30, 2018 as compared to 59.0% for the nine months ended April 30, 2017.

Bookings during the nine month period in fiscal 2018 were strong and reflect strength in almost all of our Commercial Solutions product lines. Our book-to-bill ratio (a measure defined as bookings divided by net sales) for the nine months ended April 30, 2018 was 1.40. As further discussed below, we have a growing pipeline of opportunities and expect that the book-to-bill ratio in this segment will exceed 1.00 for fiscal 2018.

Net sales of our satellite earth station products (which include satellite modems and solid-state power amplifiers ("SSPAs")) during the nine months ended April 30, 2018 were higher than the nine months ended April 30, 2017. Given our fiscal 2018 year-to-date performance and our order expectations for our fourth quarter, we believe that fiscal 2018 will be a year of net sales growth for this product line. We continue to see increased interest from U.S. government customers for our satellite earth station products. For example, during the nine months ended April 30, 2018, we received a multi-year follow-on contract with a potential value of up to \$19.1 million to provide the U.S. Navy's Space and Naval Warfare Systems Command with Advanced Time Division Multiple Access ("TDMA") Interface Processor ("ATIP") production terminals. Also, the U.S. Navy awarded us a \$59.0 million indefinite delivery / indefinite quantity ("IDIQ") sole-source contract for our SLM-5650B satellite modems, upgrade kits and related services. This IDIQ contract has five one-year ordering periods. We have received initial funding of \$8.2 million and given the U.S. Navy's pressing operational needs, we shipped most of these initial orders during the third quarter, which positively impacted our operating income. We originally expected to begin shipments of this satellite earth station equipment during the fourth quarter of fiscal 2018. Although timing of the U.S. government orders are generally difficult to predict, we are optimistic that we will receive and ship additional orders for this equipment during the remainder of fiscal 2018.

Net sales of our satellite earth station products in fiscal 2018 also reflect the benefit of orders received for our Heights™ Dynamic Network Access Technology ("HEIGHTS" or "HDNA") solutions. We continue to see signs that our HEIGHTS solutions are gaining traction. We believe HEIGHTS is a revolutionary technology that is designed to deliver the highest Internet Protocol bits per Hertz in its class, as well as robust reliability. HEIGHTS has been and will continue to be a cornerstone of our future research and development efforts. Although the sales cycle for this product line is longer than our historical satellite earth station product line sales cycle, to-date, we have announced several important customer wins for this product line and our pipeline of opportunities continues to grow. For example, during the third quarter of fiscal 2018, we announced that Orange Business Services, one of the largest telecommunications operations and IT services companies in the world, selected HEIGHTS to help them support relief projects in two African countries. We believe this order bodes well for the future given the purchasing influence that Orange Business Services has in other countries.

Net sales during the nine months ended April 30, 2018 of both enterprise technology solutions (such as our location and messaging platforms) and safety and security technology solutions (such as our wireless and next generation 911

("NG911") platforms) were higher as compared to the net sales we achieved during the nine months ended April 30, 2017. During fiscal 2018, we were awarded several large multi-year strategic contracts. We were awarded a contract valued at \$134.0 million to provide safety and security technology solutions to one of the largest wireless carriers in the U.S. As a result of this contract, we will become the leading provider to this wireless carrier for E911 services for its nationwide 3G, 4G and 5G networks. We were also awarded a \$10.1 million multi-year contract to provide this same wireless carrier with a hosted, advanced location services platform which leverages our Position Determining Engine ("PDE"). Under this competitively awarded contract, the U.S. wireless carrier is expected to migrate existing location services from a competitive solution to our more advanced, secure and reliable technologies. We also received an aggregate of \$96.2 million of contracts from AT&T, which provide for a variety of safety and security technology and enterprise technology solutions including NG911 public safety Call Handling and Emergency Services IP Network ("ESInet") and E911 solutions. In our view, these contract awards validate that our enterprise technology solutions and safety and security technology solutions are more advanced, secure and reliable than any existing competitive technology. Market conditions remain favorable and we expect that aggregate net sales of these solutions in fiscal 2018 will be higher than in fiscal 2017.

Index

Overall, we expect fiscal 2018 net sales in our Commercial Solutions segment to be higher than fiscal 2017. Bookings, sales and profitability in our Commercial Solutions segment can fluctuate from period-to-period due to many factors, including changes in the general business environment. As such, period-to-period comparisons of our results may not be indicative of a trend or future performance.

Government Solutions

Net sales in our Government Solutions segment were \$151.3 million for the nine months ended April 30, 2018 as compared to \$164.9 million for the nine months ended April 30, 2017, a decrease of \$13.6 million, or 8.2%. Our Government Solutions segment represented 37.5% of consolidated net sales for the nine months ended April 30, 2018, as compared to 41.0% for the nine months ended April 30, 2017.

The expected period-over-period decrease in net sales primarily reflects: (i) significantly lower net sales of over-the-horizon microwave systems products; (ii) the absence of \$6.7 million of BFT-1 intellectual property license fees during the most recent nine month period; and (iii) the impact of our tactical shift in strategy away from bidding on large commodity service contracts and toward pursuing contracts for our niche solutions with higher margins.

Bookings for this segment were strong and reflect continued strength in almost all of our Government Solutions product lines. During the nine months ended April 30, 2018, we received \$16.9 million of orders to provide ongoing sustainment services for the AN/TSC-198A SNAP (Secret Internet Protocol Router ("SIPR") and Non-classified Internet Protocol Router ("NIPR") Access Point), Very Small Aperture Terminals ("VSATs"). The \$16.9 million of orders were issued pursuant to a three-year \$123.6 million IDIQ contract that we received earlier in fiscal 2018 from the U.S. Army. SNAP terminals provide quick and mobile satellite communications capability to personnel in the field and Comtech is the sole provider to the U.S. Army of these sustainment services. We also were awarded \$14.2 million of orders to supply the U.S. Army with advanced VSAT equipment. We received \$8.5 million in contracts to supply our Modular Transportable Transmission System ("MTTS") troposcatter terminals to two international customers. In addition we received a \$3.7 million contract modification from the Consortium Management Group ("CMG") to support the U.S. Army Project Manager Mission Command ("PM MC") and the Blue Force Tracking-2 ("BFT-2") program to port additional waveforms onto the current BFT-2 transceivers. Our book-to-bill ratio for the nine months ended April 30, 2018 was 1.25. Backlog for this segment is at the highest level since our acquisition of TCS in February 2016. We see a growing pipeline of potential orders from large government end-users (including those of foreign countries) who have a growing need to mitigate threats using command and control technology solutions to increase decision-maker's situational awareness. This growing order pipeline is occurring in almost all of our Government Solutions product lines, which are further discussed below.

Net sales of our command and control solutions (which include the design, installation and operation of secure wireless communication networks, cyber intelligence solutions and blue-force tracking solutions) during the nine months ended April 30, 2018 were higher than the nine months ended April 30, 2017. Our most recent nine month period benefited from sales to a major U.S. space contractor to source and test space level Electrical, Electronic and Electromechanical ("EEE") parts in support of critical NASA programs and from an international space agency for the design, development and installation of multiple launch vehicle tracking stations in the South Pacific. We continue to work with the U.S. Army on our recently awarded \$11.7 million order to provide several thousand of our next generation MT-2025 mobile satellite transceivers to support the U.S. Army's BFT-2 system. The BFT-2 system, which is part of the U.S. Army's JBC-P program, provides global real-time situational awareness and networking capabilities for U.S. warfighters and is the successor to the BFT-1 system. We expect initial shipments of MT-2025 transceivers to start during our fourth quarter of fiscal 2018 and additional orders for our MT-2025 transceivers are ultimately expected.

Although net sales of our over-the-horizon microwave systems products for the nine months ended April 30, 2018 were lower than the comparative period of the prior year, business activity in our over-the-horizon microwave systems

product line continues to pick-up. During the nine months ended April 30, 2018, we shipped certain troposcatter equipment to support U.S. Army activities throughout the Korean Peninsula. We believe demand for our over-the-horizon microwave systems will increase and have recently submitted a proposal to supply a significant quantity of our over-the-horizon microwave systems to the U.S. Army. We teamed with a large prime contractor and we are hopeful that we can win this multi-million dollar award in fiscal 2019.

Although the timing of large contract awards makes it difficult to predict our book-to-bill ratio in any given period, we have a growing pipeline of opportunities and expect the book-to-bill ratio in this segment for fiscal 2018 to exceed 1.00. Given year-to-date order flow and expected new orders, we anticipate that fiscal 2018 net sales for our Government Solutions segment will be higher than the amount we achieved in fiscal 2017.

Bookings, sales and profitability in our Government Solutions segment can fluctuate dramatically from period-to-period due to many factors, including unpredictable funding, deployment and technology decisions by our U.S. and international government customers. As such, period-to-period comparisons of our results may not be indicative of a trend or future performance.

Index

Geography and Customer Type

Sales by geography and customer type, as a percentage of related sales, for the nine months ended April 30, 2018 and 2017 are as follows:

	Nine months ended April 30,					
	2018	2017	2018	2017	2018	2017
	Commercial Solutions		Government Solutions		Consolidated	
U.S. government	17.7 %	14.0 %	61.0 %	60.7 %	34.0 %	33.1 %
Domestic	55.5 %	54.4 %	17.5 %	14.1 %	41.2 %	37.9 %
Total U.S.	73.2 %	68.4 %	78.5 %	74.8 %	75.2 %	71.0 %
International	26.8 %	31.6 %	21.5 %	25.2 %	24.8 %	29.0 %
Total	100.0 %	100.0 %	100.0 %	100.0 %	100.0 %	100.0 %

Sales to U.S. government customers include sales to the U.S. Department of Defense ("DoD"), intelligence and civilian agencies, as well as sales directly to or through prime contractors.

Domestic sales include sales to commercial customers, as well as to U.S. state and local governments. Included in domestic sales, are sales to Verizon Communications Inc. ("Verizon"), which represented 10.6% of consolidated net sales for the nine months ended April 30, 2018. Sales to Verizon were less than 10.0% of consolidated net sales for the nine months ended April 30, 2017.

International sales for the nine months ended April 30, 2018 and 2017 (which include sales to U.S. domestic companies for inclusion in products that are sold to international customers) were \$100.0 million and \$116.6 million, respectively. Except for the U.S., no individual country (including sales to U.S. domestic companies for inclusion in products that are sold to a foreign country) represented more than 10.0% of consolidated net sales for the nine months ended April 30, 2018 and 2017.

Gross Profit. Gross profit was \$161.0 million and \$157.8 million for the nine months ended April 30, 2018 and 2017, respectively. The increase of \$3.2 million in gross profit dollars was largely driven by higher net sales and overall favorable product mix changes in our Commercial Solutions segment, offset by significantly lower net sales of over-the-horizon microwave systems products and the absence of \$6.7 million of BFT-1 intellectual property license fees in our Government Solutions segment, as discussed above. Gross profit, as a percentage of consolidated net sales, increased from 39.2% for the nine months ended April 30, 2017 to 39.9% for the nine months ended April 30, 2018. The increase in gross profit percentage is largely attributable to a greater percentage of our consolidated net sales during the nine months ended April 30, 2018 occurring in our Commercial Solutions segment, which historically achieves higher gross margins than our Government Solutions segment, as well as a favorable warranty settlement during the nine months ended April 30, 2018 that resulted in a \$0.7 million reduction to cost of sales (which is reflected in our unallocated segment). Gross profit, as a percentage of related segment net sales, is further discussed below.

Our Commercial Solutions segment's gross profit, as a percentage of related segment net sales, for the nine months ended April 30, 2018 was higher than the comparable prior year period. The increase was primarily due to higher net sales and overall favorable product mix changes (including earlier than expected shipments of satellite earth station equipment to the U.S. Navy) during the most recent nine month period. Given timing and other product mix changes, gross profit in the fourth quarter of fiscal 2018 in this segment is expected to decline from the level achieved in the third quarter of fiscal 2018. Overall, we expect gross profit in this segment, as a percentage of related fiscal 2018 net sales, to be comparable to the percentage achieved in fiscal 2017.

Index

Our Government Solutions segment's gross profit, as a percentage of related segment net sales, for the nine months ended April 30, 2018 was lower as compared to the nine months ended April 30, 2017. The decrease was primarily driven by lower net sales in this segment, particularly significantly lower net sales of over-the-horizon microwave systems products. In addition, our gross profit during the nine months ended April 30, 2018 reflects an absence of \$6.7 million of BFT-1 intellectual property license fees, as discussed above. Although we expect net sales in the fourth quarter in this segment to increase as compared to our most recent quarter, we have updated our product mix assumptions for the remainder of fiscal 2018 which now reflect lower expected sales of higher margin cyber training software solutions, offset by other anticipated command and control solution sales. Sales cycles for cyber training software solutions are generally long and timing of related awards is difficult to predict. As a result of our updated product mix assumptions, we believe that gross profit (both in dollars and as a percentage of net sales in this segment) will be lower in the fourth quarter as compared to our third quarter of fiscal 2018. Overall, given the absence of BFT-1 intellectual property license fees in fiscal 2018, we expect gross profit, both in dollars and as a percentage of related net sales, to be lower than the respective metrics achieved in fiscal 2017. However, over time, we believe the implementation of our strategy of shifting our Government Solutions segment away from bidding on large commodity service contracts and toward pursuing contracts for our niche solutions will result in higher gross margins in this segment.

Included in consolidated cost of sales for the nine months ended April 30, 2018 and 2017 are provisions for excess and obsolete inventory of \$3.7 million and \$1.8 million, respectively. As discussed in "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Critical Accounting Policies - Provisions for Excess and Obsolete Inventory," we regularly review our inventory and record a provision for excess and obsolete inventory based on historical and projected usage assumptions.

Because our consolidated gross profit, as a percentage of consolidated net sales, depends on the volume of sales, sales mix and related gross profit for each individual segment, it is inherently difficult to forecast. Nevertheless, based on expected bookings, the anticipated timing of our performance on orders and the absence of the BFT-1 intellectual property license fees, we currently expect our consolidated gross profit, as a percentage of consolidated net sales, for fiscal 2018 to be slightly lower than the percentage we achieved in fiscal 2017.

Selling, General and Administrative Expenses. Selling, general and administrative expenses were \$86.1 million and \$89.6 million for the nine months ended April 30, 2018 and 2017, respectively, representing a decrease of \$3.5 million. As a percentage of consolidated net sales, selling, general and administrative expenses were 21.4% and 22.3% for the nine months ended April 30, 2018 and 2017, respectively. The decrease in spending, both in dollars and as a percentage of consolidated net sales, is primarily attributable to the benefit of cost reduction actions previously initiated and, to a lesser extent, higher net sales during the nine months ended April 30, 2018, as discussed above. We continue to evaluate and implement cost reduction initiatives to reduce unnecessary spending, reduce the size and cost of our facilities and improve our productivity. Our Business Outlook for Fiscal 2018 does not consider the financial impact of any actions we may take.

Amortization of stock-based compensation expense recorded as selling, general and administrative expenses was \$2.6 million for both the nine months ended April 30, 2018 and 2017, respectively. The most recent nine month period includes a \$0.4 million reversal of stock-based compensation expense related to certain performance shares previously expected to be earned.

Based on our current spending plans, we expect fiscal 2018 selling, general and administrative expenses, as a percentage of consolidated net sales, to be comparable to fiscal 2017.

Research and Development Expenses. Research and development expenses were \$40.0 million and \$40.4 million for the nine months ended April 30, 2018 and 2017, respectively, representing a decrease of \$0.4 million. As a percentage

of consolidated net sales, research and development expenses were 9.9% and 10.0% for the nine months ended April 30, 2018 and 2017, respectively.

For the nine months ended April 30, 2018 and 2017, research and development expenses of \$34.5 million and \$33.4 million, respectively, related to our Commercial Solutions segment and \$5.3 million and \$6.8 million, respectively, related to our Government Solutions segment. The remaining research and development expenses of \$0.2 million for both the nine months ended April 30, 2018 and 2017, respectively, related to the amortization of stock-based compensation expense.

Whenever possible, we seek customer funding for research and development to adapt our products to specialized customer requirements. During the nine months ended April 30, 2018 and 2017, customers reimbursed us \$13.2 million and \$21.9 million, respectively, which is not reflected in the reported research and development expenses, but is included in consolidated net sales with the related costs included in cost of sales.

Index

We continue to invest in enhancements to existing products as well as in new products across almost all of our product lines. Based on our current spending plans, we expect fiscal 2018 research and development expenses, as a percentage of consolidated net sales, to be comparable to fiscal 2017.

Amortization of Intangibles. Amortization relating to intangible assets with finite lives was \$15.8 million (of which \$13.3 million was for the Commercial Solutions segment and \$2.5 million was for the Government Solutions segment) for the nine months ended April 30, 2018 and \$17.6 million (of which \$13.3 million was for the Commercial Solutions segment and \$4.3 million was for the Government Solutions segment) for the nine months ended April 30, 2017. The decrease is a result of certain intangibles that became fully amortized in fiscal 2017. As such, we anticipate amortization of intangibles in fiscal 2018 to be lower than in fiscal 2017.

Settlement of Intellectual Property Litigation. During the nine months ended April 30, 2017, we recorded a favorable adjustment to operating income of \$12.0 million, net of estimated legal fees, to reflect a lower loss than originally estimated for a TCS intellectual property matter which was settled during that period. There was no comparable adjustment in the nine months ended April 30, 2018.

Operating Income. Operating income for the nine months ended April 30, 2018 was \$19.1 million as compared to \$22.3 million for the nine months ended April 30, 2017. Operating income by reportable segment is shown in the table below:

	Nine months ended April 30,							
	2018	2017	2018	2017	2018	2017	2018	2017
(\$ in millions)	Commercial Solutions		Government Solutions		Unallocated		Consolidated	
Operating income (loss)	\$27.0	17.6	5.1	6.2	(13.0)	(1.5)	\$19.1	22.3
Percentage of related net sales	10.7 %	7.4 %	3.4 %	3.8 %	NA	NA	4.7 %	5.5 %

The increase during the most recent nine month period in our Commercial Solutions segment's operating income, in dollars and as a percentage of related segment net sales, was primarily due to higher net sales, overall favorable product mix changes and the benefit of cost reduction actions previously initiated, as discussed above. Given earlier than expected shipments of satellite earth station equipment to the U.S. Navy, our third quarter of fiscal 2018 is expected to be the peak quarter of operating income for this segment. Overall, we expect fiscal 2018 operating income in our Commercial Solutions segment, in dollars and as a percentage of related segment net sales, to increase as compared to fiscal 2017.

The decrease during the most recent nine month period in our Government Solutions segment's operating income, in dollars and as a percentage of related segment net sales, was driven by lower net sales, most notably significantly lower over-the-horizon microwave systems sales and the absence of \$6.7 million of BFT-1 intellectual property license fees, as discussed above. Based on the strength of our third quarter performance, an assessment of timing associated with our current backlog and updated product mix assumptions for the remainder of fiscal 2018 (including lower expected sales of higher margin cyber training software solutions), we expect this segment's operating income for the fourth quarter of fiscal 2018 to be comparable to the amount we achieved during the third quarter of fiscal 2018. Overall, operating income for this segment, in dollars and as a percentage of related segment net sales, is expected to be higher in fiscal 2018 than in fiscal 2017.

Unallocated operating expenses for the nine months ended April 30, 2018 and 2017 were \$13.0 million and \$1.5 million, respectively. Excluding a \$0.7 million favorable warranty settlement and a \$12.0 million adjustment (both as discussed above), unallocated operating expenses for the nine months ended April 30, 2018 and 2017 were \$13.7 million and \$13.5 million, respectively. Unallocated operating expenses for the nine months ended April 30, 2017 includes a recovery of certain legal expenses from a third party. Unallocated operating expenses for the nine months

ended April 30, 2018 includes the benefit of cost reduction actions previously initiated.

Unallocated expenses for the nine months ended April 30, 2018 and 2017 include amortization of stock-based compensation of \$2.9 million and \$3.0 million, respectively. Stock-based compensation for the nine months ended April 30, 2018 includes a reversal of \$0.4 million of stock-based compensation expense related to certain performance shares that were previously expected to be earned. Amortization of stock-based compensation expense can fluctuate from period-to-period based on the type and timing of stock-based awards. Given the timing of anticipated fiscal 2018 awards, amortization of stock-based compensation is expected to be significantly higher in the fourth quarter of fiscal 2018 as compared to our most recent quarter. Based on the type of awards currently outstanding and awards expected to be issued during the remainder of fiscal 2018, amortization of stock-based compensation is also expected to be higher in fiscal 2018 than in fiscal 2017.

Index

Looking forward, we expect our unallocated operating expenses in fiscal 2018 to significantly increase as compared to the \$5.6 million of unallocated operating expenses for fiscal 2017. During fiscal 2017, unallocated operating expenses were offset by a number of favorable adjustments throughout the fiscal year, which aggregated \$18.8 million and which are more fully discussed in our Annual Report on Form 10-K for the fiscal year ended July 31, 2017, as filed with the SEC. Excluding the \$18.8 million of favorable adjustments, unallocated operating expenses in fiscal 2017 would have been \$24.4 million. Given the success of our cost reduction actions taken to date and current spending plans, we expect our unallocated operating expenses in fiscal 2018 to be lower than the \$24.4 million of unallocated operating expenses incurred in fiscal 2017, prior to the favorable adjustments discussed above.

On a consolidated basis, we are targeting to achieve operating income, as a percentage of net sales, of approximately 5.2% in fiscal 2018, which compares favorably with the 3.3% of consolidated net sales we achieved in fiscal 2017 (excluding the \$18.8 million of favorable adjustments to operating income discussed above). Based on the strength of our third quarter performance, an assessment of timing associated with our current backlog and updated mix assumptions for the remainder of fiscal 2018, we now expect consolidated operating income for the third quarter of fiscal 2018 to be the peak quarter for the fiscal year.

Interest Expense. Interest expense was \$7.6 million and \$8.9 million for the nine months ended April 30, 2018 and 2017, respectively. The decline in interest expense primarily reflects lower total indebtedness, which declined from \$235.4 million as of April 30, 2017 to \$186.4 million as of April 30, 2018. Interest expense for both periods primarily reflects interest on our Secured Credit Facility, as amended. Based on the type, terms, amount of outstanding debt (including capital leases and other obligations) and current interest rates, we estimate that our effective interest rate (including amortization of deferred financing costs) will approximate 5.4% in fiscal 2018. Our actual cash borrowing rate (which excludes the amortization of deferred financing costs) currently approximates 4.3%.

Interest (Income) and Other. Interest (income) and other for both the nine months ended April 30, 2018 and 2017 was nominal. All of our available cash and cash equivalents are currently invested in bank deposits and money market deposit accounts which, at this time, are currently yielding a blended annual interest rate of approximately 0.64%.

(Benefit From) Provision For Income Taxes. Our benefit from income taxes during the nine months ended April 30, 2018 was \$11.0 million as compared to a tax provision of \$4.8 million for the nine months ended April 30, 2017.

During the nine months ended April 30, 2018, we recorded an estimated net discrete tax benefit of \$14.1 million which, as a result of Tax Reform, primarily related to the remeasurement of deferred tax liabilities associated with non-deductible amortization related to intangible assets. Our effective tax rate for the nine months ended April 30, 2017 reflects a net discrete tax expense of less than \$0.1 million. Excluding discrete tax items for the nine months ended April 30, 2018, our estimated effective tax rate was 27.0%. Our effective tax rate, excluding discrete tax items, for the nine months ended April 30, 2017 was 36.0%. The decrease from 36.0% to 27.0% is principally attributable to the passage of Tax Reform which reduced the statutory income tax rate from 35.0% to 21.0%, or a blended income tax rate of approximately 27.0%.

Net Income. During the nine months ended April 30, 2018, consolidated net income was \$22.3 million as compared \$8.5 million during the nine months ended April 30, 2017.

Index

Adjusted EBITDA. Adjusted EBITDA (both in dollars and as a percentage of related net sales) for both the nine months ended April 30, 2018 and 2017 are shown in the table below (numbers in the table may not foot due to rounding):

(\$ in millions)	Nine months ended April 30,							
	2018	2017	2018	2017	2018	2017	2018	2017
	Commercial Solutions		Government Solutions		Unallocated		Consolidated	
Net income (loss)	\$26.6	17.2	5.0	6.2	(9.3)	(14.9)	\$22.3	8.5
Provision for (benefit from) income taxes	0.2	0.2	—	—	(11.2)	4.6	(11.0)	4.8
Interest (income) and other expenses	0.1	—	0.1	—	—	—	0.2	—
Interest expense	0.1	0.2	—	—	7.5	8.8	7.6	8.9
Amortization of stock-based compensation	—	—	—	—	2.9	3.0	2.9	3.0
Amortization of intangibles	13.3	13.3	2.5	4.3	—	—	15.8	17.6
Depreciation	7.2	7.4	1.8	2.3	0.8	1.2	9.8	10.8
Settlement of intellectual property litigation	—	—	—	—	—	(12.0)	—	(12.0)
Adjusted EBITDA	\$47.5	38.3	9.4	12.7	(9.3)	(9.4)	\$47.7	41.6
Percentage of related net sales	18.9 %	16.1 %	6.2 %	7.7 %	NA	NA	11.8 %	10.3 %

The increase in consolidated Adjusted EBITDA during the nine months ended April 30, 2018 as compared to the nine months ended April 30, 2017 was primarily attributable to overall favorable product mix changes (including a higher percentage of consolidated net sales occurring in the Commercial Solutions segment as compared to the prior year period), the benefit of cost reduction actions previously taken and a favorable warranty settlement during the nine months ended April 30, 2018 that resulted in a \$0.7 million reduction to cost of sales, as discussed above.

The increase in our Commercial Solutions segment's Adjusted EBITDA, in dollars and as a percentage of related segment net sales, during the most recent nine month period, was primarily attributable to higher net sales, overall favorable product mix changes and the benefit of cost reduction actions previously initiated, as discussed above.

The decrease in our Government Solutions segment's Adjusted EBITDA, in dollars and as a percentage of related segment net sales, during the most recent nine month period was primarily driven by lower net sales, most notably significantly lower sales of over-the-horizon microwave systems products and the absence of \$6.7 million of BFT-1 intellectual property license fees, as discussed above. As a result of the aforementioned change in product mix assumptions for the remainder of fiscal 2018, our fourth quarter of fiscal 2018 Adjusted EBITDA in this segment is expected to be lower than the amount we reported in our most recent period.

Looking forward, we anticipate consolidated Adjusted EBITDA to increase in the fourth quarter as compared to the amount we achieved in the third quarter.

Given our year-to-date performance, we are targeting fiscal 2018 Adjusted EBITDA to grow close to 6.0% over the \$70.7 million we achieved in fiscal 2017. In addition, despite the absence of \$6.7 million of BFT-1 intellectual property license fees (which the U.S. Army is no longer obligated to pay us to support the BFT-1 system), we expect Adjusted EBITDA, as a percentage of fiscal 2018 consolidated net sales, to be close to 13.0%, which is slightly higher than the 12.8% we achieved in fiscal 2017. We believe these targeted financial metrics demonstrate the strength of our business. If order flow remains strong and we are able to achieve all of our fiscal 2018 business goals, it is possible that our fiscal 2018 Adjusted EBITDA financial metrics could be higher than our targeted amounts.

Index

A reconciliation of our fiscal 2017 GAAP Net Income to Adjusted EBITDA of \$70.7 million is shown in the table below:

(\$ in millions)	Fiscal Year 2017
Reconciliation of GAAP Net Income to Adjusted EBITDA:	
Net income	\$ 15.8
Income taxes	9.7
Interest (income) and other expense	(0.1)
Interest expense	11.6
Amortization of stock-based compensation	8.5
Amortization of intangibles	22.8
Depreciation	14.4
Settlement of intellectual property litigation	(12.0)
Adjusted EBITDA	\$70.7

Our Adjusted EBITDA is a Non-GAAP measure that represents earnings (loss) before income taxes, interest (income) and other expense, interest expense, amortization of stock-based compensation, amortization of intangibles, depreciation expense, settlement of intellectual property litigation, acquisition plan expenses or strategic alternatives analysis expenses and other. Our definition of Adjusted EBITDA may differ from the definition of EBITDA used by other companies and therefore may not be comparable to similarly titled measures used by other companies. Adjusted EBITDA is also a measure frequently requested by our investors and analysts. We believe that investors and analysts may use Adjusted EBITDA, along with other information contained in our SEC filings, in assessing our performance and comparability of our results with other companies. These Non-GAAP financial measures have limitations as an analytical tool as they exclude the financial impact of transactions necessary to conduct our business, such as the granting of equity compensation awards, and are not intended to be an alternative to financial measures prepared in accordance with GAAP. These measures are adjusted as described in the reconciliation of GAAP to Non-GAAP in the above table, but these adjustments should not be construed as an inference that all of these adjustments or costs are unusual, infrequent or non-recurring. Non-GAAP financial measures should be considered in addition to, and not as a substitute for or superior to, financial measures determined in accordance with GAAP. Investors are advised to carefully review the GAAP financial results that are disclosed in our SEC filings. We have not quantitatively reconciled our fiscal 2018 Adjusted EBITDA target to the most directly comparable GAAP measure because items such as stock-based compensation, adjustments to the provision for income taxes, amortization of intangibles and interest expense, which are specific items that impact these measures, have not yet occurred, are out of our control, or cannot be predicted. For example, quantification of stock-based compensation expense requires inputs such as the number of shares granted and market price that are not currently ascertainable. Accordingly, reconciliations to the Non-GAAP forward looking metrics are not available without unreasonable effort and such unavailable reconciling items could significantly impact our financial results.

Index

LIQUIDITY AND CAPITAL RESOURCES

Our cash and cash equivalents increased to \$44.2 million at April 30, 2018 from \$41.8 million at July 31, 2017, an increase of \$2.3 million, and our total indebtedness decreased from \$235.4 million as of April 30, 2017 to \$186.4 million as of April 30, 2018. The increase in cash and cash equivalents during the nine months ended April 30, 2018 was driven by the following:

Net cash provided by operating activities was \$30.6 million for the nine months ended April 30, 2018 as compared to \$43.9 million for the nine months ended April 30, 2017. The period-over-period decrease in cash flow from operating activities is attributable to overall changes in net working capital requirements, principally the timing of shipments, billings and payments.

Net cash used in investing activities for the nine months ended April 30, 2018 was \$5.3 million as compared to \$6.2 million for the nine months ended April 30, 2017. Both of these amounts primarily represent expenditures relating to ongoing equipment upgrades and enhancements.

Net cash used in financing activities was \$23.0 million for the nine months ended April 30, 2018 as compared to \$45.7 million for the nine months ended April 30, 2017. During the nine months ended April 30, 2018, we had net borrowings under our Revolving Loan Facility of \$1.0 million and we made \$16.5 million of principal repayments related to our Term Loan Facility and capital lease and other obligations. During the nine months ended April 30, 2017, we made \$18.3 million of net repayments under our Revolving Loan Facility and \$10.5 million of principal repayments related to our Term Loan Facility and capital lease and other obligations. During the nine months ended April 30, 2018 and 2017, we paid \$7.2 million and \$16.5 million, respectively, in cash dividends to our shareholders. We also made \$1.1 million and \$0.2 million, respectively, of payments to remit employees' statutory tax withholding requirements related to the net settlement of stock-based awards during the nine months ended April 30, 2018 and 2017.

Our investment policy relating to our cash and cash equivalents is intended to minimize principal loss while at the same time maximize the income we receive without significantly increasing risk. To minimize risk, we generally invest our cash and cash equivalents in money market mutual funds (both government and commercial), certificates of deposit, bank deposits, and U.S. Treasury securities. Many of our money market mutual funds invest in direct obligations of the U.S. government, bank securities guaranteed by the Federal Deposit Insurance Corporation, certificates of deposit and commercial paper and other securities issued by other companies. While we cannot predict future market conditions or market liquidity, we believe our investment policies are appropriate in the current environment. Ultimately, the availability of our cash and cash equivalents is dependent on a well-functioning liquid market.

The Secured Credit Facility, as amended, is discussed below and in "Notes to Condensed Consolidated Financial Statements - Note (9) - Secured Credit Facility."

As of April 30, 2018, our material short-term cash requirements primarily consist of: (i) remaining fiscal 2018 mandatory principal repayments of \$4.3 million associated with the Term Loan Facility and related interest payments of approximately \$1.4 million; (ii) estimated interest payments for fiscal 2018 under our Revolving Loan Facility; (iii) capital lease and other obligations; (iv) operating lease commitments; (v) our ongoing working capital needs, including income tax payments; (vi) accrued quarterly dividends; and (vii) cash payments of approximately \$0.9 million related to our 2009 Radyne-related restructuring plan, including accreted interest as discussed in "Notes to Condensed Consolidated Financial Statements - Note (8) - Acquisition-Related Restructuring Plans."

In June 2016, we sold 7.1 million shares of our common stock in a public offering at a price of \$14.00 per share, resulting in proceeds to us of \$95.0 million, net of underwriting discounts and commissions. As of April 30, 2018 and June 6, 2018, an aggregate registered amount of \$75.0 million under our existing Shelf Registration Statement filed with the SEC remains available for sale of various types of securities, including debt.

As of April 30, 2018 and June 6, 2018, we were authorized to repurchase up to an additional \$8.7 million of our common stock, pursuant to our current \$100.0 million stock repurchase program. Our stock repurchase program has no time restrictions and repurchases may be made in open-market or privately negotiated transactions and may be made pursuant to SEC Rule 10b5-1 trading plans. There were no repurchases of our common stock during the nine months ended April 30, 2018 and 2017.

Index

On September 27, 2017, December 6, 2017 and March 7, 2018, our Board of Directors declared a dividend of \$0.10 per common share, which were paid on November 17, 2017, February 16, 2018 and May 18, 2018, respectively. On June 6, 2018, our Board of Directors declared a dividend of \$0.10 per common share, payable on August 17, 2018 to stockholders of record at the close of business on July 16, 2018. Future dividends remain subject to compliance with financial covenants under our Secured Credit Facility, as amended, as well as Board approval.

Our material long-term cash requirements primarily consist of: (i) mandatory interest payments and principal repayments pursuant to our Secured Credit Facility, as amended; (ii) payments relating to our capital lease and other obligations; and (iii) operating lease commitments.

We continue to receive (and approve on a limited basis) requests from our customers for higher credit limits and longer payment terms. We also continue to monitor our accounts receivable credit portfolio and have not had material negative customer credit experiences historically.

We have historically met both our short-term and long-term cash requirements with funds provided by a combination of cash and cash equivalent balances, cash generated from operating activities and cash generated from financing transactions. Based on our anticipated level of future sales and operating income, we believe that our existing cash and cash equivalent balances, our cash generated from operating activities and amounts potentially available under the Revolving Loan Facility under our Secured Credit Facility, as amended, will be sufficient to meet both our currently anticipated short-term and long-term operating cash requirements.

Although it is difficult in the current economic and credit environment to predict the terms and conditions of financing that may be available in the future, should our short-term or long-term cash requirements increase beyond our current expectations, we believe that we would have sufficient access to credit from financial institutions and/or financing from public and private debt and equity markets.

Secured Credit Facility

On February 23, 2016, in connection with our acquisition of TCS, we entered into a \$400.0 million secured credit facility (the "Secured Credit Facility") with a syndicate of lenders. The Secured Credit Facility, as amended June 6, 2017 (the "June 2017 Amendment"), comprises a senior secured term loan A facility of \$250.0 million (the "Term Loan Facility") and a secured revolving loan facility of up to \$150.0 million, including a \$25.0 million letter of credit sublimit (the "Revolving Loan Facility"), and, together with the Term Loan Facility, matures on February 23, 2021. The proceeds of these borrowings were primarily used to finance our acquisition of TCS, including the repayment of certain existing indebtedness of TCS. The Term Loan Facility requires mandatory quarterly repayments. During the nine months ended April 30, 2018 and 2017, we repaid \$14.7 million and \$7.7 million, respectively, principal amount of borrowings under the Term Loan Facility. Under the Revolving Loan Facility, we had outstanding balances ranging from \$41.9 million to \$66.8 million during nine months ended April 30, 2018.

The Revolving Loan Facility is primarily used for working capital and other general corporate purposes of the Company and its subsidiaries, including the issuance of letters of credit. Borrowings under the Secured Credit Facility, pursuant to terms defined in the Secured Credit Facility, shall be either (i) Alternate Base Rate ("ABR") borrowings, which bear interest from the applicable borrowing date at a rate per annum equal to (x) the greatest of (a) the Prime Rate in effect on such day, (b) the Federal Funds Effective Rate in effect on such day plus 0.50% per annum and (c) the Adjusted LIBO Rate on such day (or, if such day is not a business day, the immediately preceding business day) plus 1.00% per annum (provided that if the LIBO Rate is less than 1.00%, then the LIBO Rate shall be deemed to be 1.00%), plus (y) the Applicable Rate, or (ii) Eurodollar borrowings, which bear interest from the applicable borrowing date at a rate per annum equal to (x) the Adjusted LIBO Rate for such interest period (provided that if the LIBO Rate is less than 1.00%, then the LIBO Rate shall be deemed to be 1.00%) plus (y) the Applicable Rate. The Applicable Rate is determined based on a pricing grid that is dependent upon our leverage ratio as of the end of each fiscal

quarter. The Secured Credit Facility contains customary representations, warranties and affirmative covenants and customary negative covenants, subject to negotiated exceptions, on (i) liens, (ii) investments, (iii) indebtedness, (iv) significant corporate changes, including mergers and acquisitions, (v) dispositions, (vi) restricted payments, including stockholder dividends, and (vii) certain other restrictive agreements. The Secured Credit Facility also contains certain financial covenants and customary events of default (subject to grace periods, as appropriate), such as payment defaults, cross-defaults to other material indebtedness, bankruptcy and insolvency, the occurrence of a defined change in control and the failure to observe the negative covenants and other covenants related to the operation of our business.

Index

The June 2017 Amendment is expected to result in increased operating and acquisition flexibility and simplify the calculations of our financial covenants. The June 2017 Amendment resulted in, among other things, that the:

- (i) Consolidated EBITDA definition more closely aligns with our Adjusted EBITDA metric by eliminating favorable adjustments to operating income related to settlements of TCS intellectual property matters;

- (ii) Leverage Ratio is calculated on a "gross" basis using the quotient of Total Indebtedness (excluding unamortized deferred financing costs) divided by our trailing twelve month ("TTM") Consolidated EBITDA. The prior Leverage Ratio was calculated on a "net" basis but did not include a reduction for any cash or cash equivalents above \$50.0 million;

- (iii) Fixed Charge Coverage Ratio includes a deduction for all cash dividends, regardless of the amount of our cash and cash equivalents and the related allowable Quarterly Dividend Amount, as defined, will now align with our current quarterly dividend target of \$0.10 per common share;

- (iv) Balloon or final payment of the Term Loan Facility (which is not due until February 23, 2021) was reduced by \$22.5 million through increased borrowings from the Revolving Loan Facility (which does not expire until February 23, 2021); and

- (v) Leverage Ratios will be adjusted, in certain conditions, to provide for additional flexibility for us to make acquisitions.

In connection with the June 2017 Amendment, there were no changes to: (i) the committed borrowing capacity; (ii) the maturity date; or (iii) interest rates payable (except that the interest rate pricing grid will now be based on the new Leverage Ratio). Also, the June 2017 Amendment did not result in an extinguishment for accounting purposes (as such term is defined in ASC 470 "Debt"); instead, the June 2017 Amendment was accounted for as a debt modification. As a result, deferred financing costs (including incremental fees for the June 2017 Amendment) will continue to be amortized over the remaining maturity term of the Secured Credit Facility.

As of April 30, 2018, our Leverage Ratio was 2.43x TTM Consolidated EBITDA compared to the maximum allowable Leverage Ratio of 3.10x TTM Consolidated EBITDA. During the fourth quarter of fiscal 2018, the maximum allowable Leverage Ratio will decrease to 3.00x TTM Consolidated EBITDA, with no further reductions thereafter. Our Fixed Charge Coverage Ratio as of April 30, 2018 was 2.36x compared to the minimum required Fixed Charge Coverage Ratio of 1.25x. The Fixed Charge Coverage Ratio will not change for the remaining term of the Secured Credit Facility, as amended. Given our expected future business performance, we anticipate maintaining compliance with the terms and financial covenants in our Secured Credit Facility, as amended, for the foreseeable future.

The obligations under the Secured Credit Facility, as amended, are guaranteed by certain of our domestic subsidiaries (the "Subsidiary Guarantors"). As collateral security for amounts outstanding under our Secured Credit Facility, as amended, and the guarantees thereof, we and our Subsidiary Guarantors have granted to an administrative agent, for the benefit of the lenders, a lien on, and first priority security interest in, substantially all of our tangible and intangible assets.

Capitalized terms used but not defined herein have the meanings set forth for such terms in the Secured Credit Facility, dated as of February 23, 2016, and the First Amendment of the Secured Credit Facility, dated as of June 6, 2017, both of which have been documented and filed with the SEC.

OFF-BALANCE SHEET ARRANGEMENTS

As of April 30, 2018, we did not have any off-balance sheet arrangements as defined in Item 303(a)(4) of Regulation S-K.

Index

COMMITMENTS

In the normal course of business, other than as discussed below, we routinely enter into binding and non-binding purchase obligations primarily covering anticipated purchases of inventory and equipment. We do not expect that these commitments, as of April 30, 2018, will materially adversely affect our liquidity.

At April 30, 2018, cash payments due under long-term obligations (including estimated interest expense on our Secured Credit Facility), excluding purchase orders that we entered into in our normal course of business, are as follows:

	Obligations Due by Fiscal Years or Maturity Date (in thousands)				
	Total	Remainder of 2018	2019 and 2020	2021 and 2022	After 2022
Secured Credit Facility - principal payments	\$182,828	4,303	34,422	144,103	—
Secured Credit Facility - interest payments	18,810	1,903	13,605	3,302	—
Operating lease commitments	49,124	3,190	20,423	12,899	12,612
Capital lease and other obligations	3,732	997	2,735	—	—
Net contractual cash obligations	\$254,494	10,393	71,185	160,304	12,612

As discussed further in "Notes to Condensed Consolidated Financial Statements - Note (9) - Secured Credit Facility," on June 6, 2017, we entered into the June 2017 Amendment to our Secured Credit Facility. In connection with this amendment, the balloon or final payment of the Term Loan Facility, which is not due until February 23, 2021, was reduced by \$22.5 million through increased borrowings from the Revolving Loan Facility which is not required to be repaid in full until February 23, 2021.

As discussed further in "Notes to Condensed Consolidated Financial Statements - Note (17) - Stockholders' Equity," on June 6, 2018, our Board of Directors declared a dividend of \$0.10 per common share, payable on August 17, 2018 to stockholders of record at the close of business on July 16, 2018. Future dividends remain subject to compliance with financial covenants under our Secured Credit Facility, as amended, as well as Board approval.

At April 30, 2018, we had \$3.3 million of standby letters of credit outstanding under our Secured Credit Facility, as amended, related to our guarantees of future performance on certain customer contracts. Such amounts are not included in the above table.

During the nine months ended April 30, 2018, we entered into a full and final warranty settlement with AT&T, the largest customer/distributor of a small product line that we refer to as the TCS 911 call handling software solution. AT&T had previously informed us that they did not believe we met certain contractual specifications related to performance and usability and had requested a refund of certain payments made by them. As discussed in "Notes to Condensed Consolidated Financial Statements - Note (7) - Accrued Expenses and Other Current Liabilities," in addition to this settlement, we agreed to issue thirty-six credits to AT&T of \$0.2 million which AT&T can apply on a monthly basis to purchases of solutions from us, beginning October 2017 through September 2020. As of April 30, 2018, the total present value of these monthly credits is \$4.0 million, of which \$1.6 million is included in accrued expenses and other current liabilities and \$2.4 million is reflected in other liabilities (non-current) on our Condensed Consolidated Balance Sheet. These amounts are not shown in the above commitment table.

In the ordinary course of business, we include indemnification provisions in certain of our customer contracts. Pursuant to these agreements, we have agreed to indemnify, hold harmless and reimburse the indemnified party for losses suffered or incurred by the indemnified party, including but not limited to losses related to third-party

intellectual property claims. It is not possible to determine the maximum potential amount under these agreements due to a history of nominal claims in the Comtech legacy business and the unique facts and circumstances involved in each particular agreement. As discussed further in "Notes to Condensed Consolidated Financial Statements - Note (18) - Legal Proceedings and Other Matters," TCS is a party to one indemnification matter in which we are incurring ongoing legal expenses and we are evaluating other indemnification claims. Our insurance policies may not cover the cost of defending indemnification claims or providing indemnification. As a result, pending or future claims asserted against us by a party that we have agreed to indemnify could result in legal costs and damages that could have a material adverse effect on our consolidated results of operations and financial condition.

We have change in control agreements, severance agreements and indemnification agreements with certain of our executive officers and certain key employees. All of these agreements may require payments by us, in certain circumstances, including, but not limited to, a change in control of our Company or an involuntary termination of employment without cause.

Index

Our Condensed Consolidated Balance Sheet as of April 30, 2018 includes total liabilities of \$9.3 million for uncertain tax positions, including interest, any or all of which may result in a cash payment. The future payments related to uncertain tax positions have not been presented in the table above due to the uncertainty of the amounts and timing of any potential cash settlement with the taxing authorities.

RECENT ACCOUNTING PRONOUNCEMENTS

We are required to prepare our condensed consolidated financial statements in accordance with the Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") which is the source for all authoritative U.S. generally accepted accounting principles, which is commonly referred to as "GAAP." The FASB ASC is subject to updates by the FASB, which are known as Accounting Standards Updates ("ASUs").

As further discussed in "Notes to Condensed Consolidated Financial Statements - Note (2) - Adoption of Accounting Standards and Updates," during the nine months ended April 30, 2018, we adopted:

FASB ASU No. 2016-09, which amends several aspects of the accounting for and reporting of share-based payment transactions. Our adoption of this ASU, on August 1, 2017, did not have a material impact on our condensed consolidated financial statements. See "Notes to Condensed Consolidated Financial Statement - Note (12) - Stock-Based Compensation" for further information regarding our adoption of this ASU.

FASB ASU No. 2016-15, which amends the guidance on the following cash flow related issues: debt prepayment or debt extinguishment costs; settlement of zero-coupon and similar type debt instruments; contingent consideration payments made after a business combination; proceeds from the settlement of insurance claims (including those related to certain life insurance policies); distributions received from equity method investees; beneficial interests in securitization transactions; and cash receipts or payments with more than one class of cash flows. Our adoption of this ASU on February 1, 2018 did not have any impact on our condensed consolidated financial statements.

FASB ASU No. 2017-09, which provides guidance about which changes to the terms or conditions of a share-based payment award require an entity to apply modification accounting in ASC Topic 718. An entity would not be required to account for changes to the terms or conditions of a share-based payment award as a modification if there were no changes to the award's fair value, vesting conditions and classification. Our adoption of this ASU on February 1, 2018 did not have any impact on our condensed consolidated financial statements.

In addition, the following FASB ASUs have been issued and incorporated into the FASB ASC and have not yet been adopted by us as of April 30, 2018:

FASB ASU No. 2014-09 "Revenue from Contracts with Customers (Topic 606)," issued in May 2014, which replaces numerous requirements in U.S. GAAP, including industry specific requirements, and provides a single revenue recognition model for contracts with customers. The core principle of the new standard is that a company should record revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the company expects to be entitled in exchange for those goods or services. In August 2015, FASB ASU No. 2015-14 "Revenue from Contracts with Customers (Topic 606): Deferral of the Effective Date" was issued to defer the effective date of FASB ASU No. 2014-09 by one year. As a result, FASB ASU No. 2014-09 is effective for fiscal years beginning after December 15, 2017 (our fiscal year beginning on August 1, 2018), including interim reporting periods within those fiscal years and can be adopted either retrospectively to each prior reporting period presented, or as a cumulative-effect adjustment as of the date of adoption. Early adoption is permitted only as of fiscal years beginning after December 15, 2016 (our fiscal year beginning on August 1, 2017), including interim reporting periods within those fiscal years. In March 2016, April 2016, May 2016 and February 2017, FASB ASU 2016-08 "Revenue from Contracts with Customers (Topic 606): Principal Versus Agent Considerations (Reporting

Revenue Gross Versus Net)," 2016-10 "Revenue from Contracts with Customers (Topic 606): Identifying Performance Obligations and Licensing," 2016-12 "Revenue from Contracts with Customers (Topic 606): Narrow-Scope Improvements and Practical Expedients" and 2017-05 "Other Income - Gains and Losses from the Derecognition of Nonfinancial Assets (Subtopic 610-20): Clarifying the Scope of Asset Derecognition Guidance and Accounting for Partial Sales of Nonfinancial Assets" were issued, respectively, to clarify certain implementation matters related to the new revenue standard. The effective dates for these ASUs coincide with the effective date of FASB ASU 2014-09.

Index

Because of the broad scope of FASB ASU No. 2014-09, it could impact the reporting of the amount and/or timing of our net sales and operating income across our two operating segments, as well as related business processes and IT systems. During the third quarter of fiscal 2018, our project team continued to perform a detailed evaluation of the operational impact of this new standard, which transition approach to use and the overall adoption impact of FASB ASU No. 2014-09 on our consolidated financial statements and disclosures. We expect our evaluation to be completed shortly before our first quarter of fiscal 2019.

FASB ASU No. 2016-01, issued in January 2016, which addresses certain aspects of recognition, measurement, presentation and disclosure of financial instruments, such as: amending the initial and subsequent measurement requirements for certain equity investments; eliminating the disclosure requirements related to the methods and significant assumptions used to estimate the fair value of financial instruments measured at amortized cost on the balance sheet; requiring the use of the exit price notion when measuring the fair value of financial instruments for disclosure purposes; and requiring separate presentation of financial assets and financial liabilities by measurement category and form of financial asset or liability on the balance sheet or the accompanying notes to the financial statements. In February 2018, FASB ASU 2018-03 “Technical Corrections and Improvements to Financial Instruments - Overall” was issued to clarify the Codification and to correct unintended application of guidance. These ASU’s are effective for fiscal years beginning after December 15, 2017 (our fiscal year beginning on August 1, 2018), including interim periods within those fiscal years and should be applied by means of a cumulative-effect adjustment to the balance sheet as of the beginning of the fiscal year of adoption, except for the provisions related to equity securities without readily determinable fair values which are to be adopted prospectively. Under certain circumstances, early adoption is permitted. Adoption of these ASU's are not expected to have a material impact on our consolidated financial statements and disclosures.

FASB ASU No. 2016-02, issued in February 2016, which requires lessees to recognize the following for all leases (with the exception of short-term leases): (i) a lease liability, which is a lessee's obligation to make lease payments arising from a lease, initially measured at the present value of the lease payments; and (ii) a right-of-use asset, which is an asset that represents the lessee's right to use a specified asset for the lease term. Under the new guidance, lessor accounting is largely unchanged. In January 2018, FASB ASU 2018-02 “Land Easement Practical Expedient” was issued to permit an entity to elect an optional transition practical expedient to not evaluate under Topic 842 land easements that exist or expired before the entity’s adoption of Topic 842. These ASU’s are effective for fiscal years beginning after December 15, 2018 (our fiscal year beginning on August 1, 2019), including interim periods within those fiscal years and should be applied with a modified retrospective approach. Early adoption is permitted. We are evaluating the impact of these ASU's on our consolidated financial statements and disclosures.

FASB ASU No. 2016-13, issued in June 2016, which requires the measurement of expected credit losses for financial assets held at the reporting date to be based on historical experience, current conditions and reasonable and supportable forecasts. This ASU is effective for fiscal years beginning after December 15, 2019 (our fiscal year beginning on August 1, 2020), including interim periods within those fiscal years. All entities may adopt the amendments in this ASU earlier as of the fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. Except for a prospective transition approach required for debt securities for which an other-than-temporary impairment had been recognized before the effective date, an entity will apply the amendments in this ASU through a cumulative-effect adjustment to retained earnings as of the beginning of the first reporting period in which the guidance is effective (that is, on a modified-retrospective approach). We are evaluating the impact of this ASU on our consolidated financial statements and disclosures.

FASB ASU No. 2016-16, issued in October 2016, as amended by ASU 2018-05 in March 2018, which eliminates a prior exception and now requires an entity to recognize the income tax consequences of an intra-entity transfer of an asset other than inventory (for example, intellectual property and property, plant and equipment) when the transfer occurs. These ASU's are effective for fiscal years beginning after December 15, 2017 (our fiscal year beginning on

August 1, 2018), and interim periods within those fiscal years and shall be applied on a modified retrospective basis through a cumulative-effect adjustment directly to retained earnings as of the beginning of the period of adoption. Early adoption is permitted. Adoption of these ASU's are not expected to have a material impact on our consolidated financial statements and disclosures.

Index

FASB ASU No. 2017-11, issued in July 2017, which provides guidance on the accounting for certain financial instruments with embedded features that result in the strike price of the instrument or embedded conversion option being reduced on the basis of the pricing of future equity offerings (commonly referred to as "down round" features). This ASU is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2018 (our fiscal year beginning on August 1, 2019) and early adoption is permitted, including adoption in an interim period. This ASU should be applied retrospectively in accordance with the provisions of the ASU. We are evaluating the impact of this ASU on our consolidated financial statements and disclosures.

FASB ASU No. 2017-12, issued in August 2017, which expands and refines hedge accounting for both nonfinancial and financial risk components and simplifies and aligns the recognition and presentation of the effects of the hedging instrument and the hedged item in the financial statements. This ASU is effective for fiscal years beginning after December 15, 2018 (our fiscal year beginning on August 1, 2019) and for interim periods therein, with early adoption permitted. We are evaluating the impact of this ASU on the consolidated financial statements and disclosures; however, we do not expect the adoption to have any effect given that we historically have not engaged in hedge transactions.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Our earnings and cash flows are subject to fluctuations due to changes in interest rates primarily from borrowings under our Secured Credit Facility, as amended. Based on the amount of outstanding debt under our Secured Credit Facility, as amended, a hypothetical change in interest rates by 10% would change interest expense by \$0.8 million over a one-year period. Although we do not currently use interest rate derivative instruments to manage exposure to interest rate changes, we may choose to do so in the future in connection with our Secured Credit Facility, as amended.

Our earnings and cash flows are also subject to fluctuations due to changes in interest rates on our investment of available cash balances. As of April 30, 2018, we had cash and cash equivalents of \$44.2 million, which consisted of cash and highly-liquid money market deposit accounts. Many of these investments are subject to fluctuations in interest rates, which could impact our results. Based on our investment portfolio balance as of April 30, 2018, a hypothetical change in interest rates of 10% would have a nominal impact on interest income over a one-year period. Ultimately, the availability of our cash and cash equivalents is dependent on a well-functioning liquid market.

Item 4. Controls and Procedures

As of the end of the period covered by this Quarterly Report on Form 10-Q, an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934), was carried out by us under the supervision and with the participation of our management, including our President, Chief Executive Officer and Chairman and Chief Financial Officer. Based on that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of the end of the period covered by the report to provide reasonable assurance that the information required to be disclosed by us in reports filed under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms and is accumulated and communicated to management, as appropriate, to allow timely decisions regarding required disclosure. A system of controls, no matter how well designed and operated, cannot provide absolute assurance that the objectives of the system of controls are met, and no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within a company have been detected.

There have been no changes in our internal controls over financial reporting during the most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

The certifications of our President, Chief Executive Officer and Chairman and Chief Financial Officer, that are Exhibits 31.1 and 31.2, respectively, should be read in conjunction with the foregoing information for a more complete understanding of the references in those Exhibits to disclosure controls and procedures and internal control over financial reporting.
