AT&T Reports Fourth-Quarter and Full-Year Results

FOR RELEASE THURSDAY, JANUARY 23, 2003

## Edgar Filing: AT&T CORP - Form 8-K

BEDMINSTER, N.J. - AT&T today announced its fourth-quarter and full-year 2002 results. The company's fourth-quarter earnings per diluted share, which reflect a gain in discontinued operations from the disposition of AT&T Broadband, partially offset by a loss from continuing operations resulting from restructuring and asset impairment charges announced earlier this month, was \$0.66.

The company reported a loss from continuing operations, primarily resulting from an asset impairment charge associated with the company's past investment in AT&T Latin America (ALA), and also reflecting the impact of a restructuring charge associated with planned employee separations and an asset impairment charge related to the value of the company's DSL assets. The loss per diluted share from continuing operations was \$0.79.

Revenue for the quarter was \$9.3 billion, a decline of 8.6 percent from the year-ago quarter. The company attributes the revenue decline to continued declines in long distance voice services, partially offset by growth in local voice as well as data/Internet protocol (IP) and managed services.

"We had solid operating results in the fourth quarter, reflecting our execution of the basics," said AT&T Chairman and CEO David W. Dorman. "We saw continued growth in our local voice and data businesses, despite an unsettled economic environment. We're entering 2003 with a strong focus on meeting customer needs, improving shareowner value and maintaining our financial discipline and flexibility."

### Full Year 2002 Results

For the full year, the company reported a loss of \$17.08 per diluted share, which reflects a loss related to discontinued operations, a loss related to the adoption of a new accounting standard and income from continuing operations.

The loss related to discontinued operations includes a \$18.95 loss from discontinued operations, partially offset by a gain of \$1.73 per diluted share from the disposal of discontinued operations. The loss related to the adoption of the new accounting standard was \$1.12 per diluted share. Income from continuing operations was \$1.26 per diluted share.

Full-year revenue was \$37.8 billion, a decline of 10.4 percent from the previous year.

### OUTLOOK

AT&T said that it does not yet see a significant turnaround in the overall business services industry, and, as a result, expects total telecom industry spending will be down again in 2003. However, AT&T believes it is well positioned to continue to take market share and therefore expects a slower rate of revenue decline in 2003 compared to 2002. Other expectations for the corporation include: o Full-year operating income margin decline, excluding ALA charge, to be comparable to the 2002 decline o Diluted EPS for the first quarter of 2003 in the range of \$0.50 to \$0.55 o Capital expenditures for 2003 to be approximately \$3.3 to \$3.5 billion

AT&T Business expects a slower rate of revenue decline in 2003 compared to 2002.

AT&T Consumer expects the 2003 rate of revenue decline to be slightly better than the decline in 2002.

EXHIBIT 99.4

Statements of Thomas W. Horton made on January 23, 2003

Over the past year, AT&T has reduced its net debt balance by more than \$21 billion, to end the year with net debt of \$12.9 billion, well ahead of our guidance of a mid-teens level. As a result, our net-debt to EBITDA, excluding

the AT&T Latin America asset impairment charge at year-end was 1.25x.

Effective with our next earnings call, we will no longer be providing quarterly or annual EPS guidance.

Reflected in our segment and corporate outlook are increases in two major non-cash expenses that I would like to briefly highlight. The first is associated with our pension plans. For the 2003 plan year, we have changed the discount rate assumption from 7.25% to 6.50%. We have also reduced the long-term expected return on plan assets from 9.0% to 8.5% to reflect a moderation in long-term returns in the financial markets. We believe that our assumptions are appropriately conservative, relative to both our historical long-term average returns and the assumptions used by other large companies. These changes in assumptions are expected to reduce operating income in 2003 by approximately \$100 million. I'd also like to point out that our pension plans remain well funded on the IRS (ERISA) basis and, as we have previously stated, we would not be required to make any cash contributions to our pension plan in 2003. In addition, we expect to have minimal, if any, cash contribution requirements in 2004. The second non-cash charge pertains to accounting for stock options and the employee stock purchase plan. At this point, while there are a number of variables to this calculation, we'd estimate the collective impact to be up to a \$70 million reduction in operating income in 2003. There will be a minimal impact in the first quarter, and most of the impact will begin at the time of our 2003 annual stock option grants in the second quarter.
