

Edgar Filing: AT&T CORP - Form 8-K

Consumer Services

We believe that the Consumer business will continue to deliver strong margins and cash flow for the foreseeable future.

With our decision to stop competing in the traditional Consumer services market, the revenue decline will increase. But this business will continue to generate strong operating margins as we realize cost savings associated with our reduced marketing efforts. Margins will also benefit by the optimization of our supporting infrastructure that we've put in place and by putting an end to the costly regulatory battles we've been engaged in for several years now. And based on our observations thus far, we anticipate Consumer operating margins in the fourth quarter of 2004 to be a bit over 20%.

Business Services

Overall we are encouraged by the progress we've made in the large enterprise segment of the market and expect to see ongoing improvement in this area going forward. But this progress will be offset by the negative trends in wholesale and small business in the near term.

-Large Business

The large or "enterprise" market represents about 65% of our business revenue. Our company is in a unique position to serve these large enterprise customers with a superior product set and customer relationships and we are already beginning to see signs of share improvement.

-Wholesale

The wholesale market represents about 20% of our overall business revenue. We expect that continued pricing pressure in wholesale will negatively impact both voice and data revenue, despite continued volume strength.

-Small and Medium Business

Small and medium business represents about 15% of our business revenue. We're adjusting our strategy to be more selective in our approach to the small business market. Specifically, we'll focus more on profitability than overall share at the low end of the market, which will significantly impact revenue in this area - mainly impacting local voice revenue. In fact, we expect that the local voice revenue growth rate will be significantly negative in 2005 as a result of our changed focus in this area.

Cost Reduction

We now believe we're on track to significantly exceed our operating expense reduction target of \$3 billion by the end of 2005. In fact, we'll have already achieved a \$2.5 billion reduction by the end of 2004.

Financial

We previously said we expect to be around \$4.8 billion EBITDA less capital expenditures for the year - and based on where we are to date will likely be a little better than that target.

Non-GAAP Reconciliations

Edgar Filing: AT&T CORP - Form 8-K

Reconciliation of EBITDA, less capital expenditures to cash provided by operating activities

For the Year Ended Dec. 31, 2004 (dollars in billions; all numbers are approximate)

AT&T Business EBITDA, (a) less capital expenditures	\$3.5 - \$3.6
AT&T Consumer EBITDA, (a) less capital expenditures	1.5 - 1.6
Corporate & Other EBITDA, (a) less capital expenditures	~ (0.2)
Consolidated EBITDA, (a) less capital expenditures	4.8 - 5.0
Add capital expenditures	~ 1.8
EBITDA (a)	6.6 - 6.8
Less other cash expenses (b)	(1.3) - (1.2)
Changes in working capital and other operating assets & liabilities	(0.3) - (0.2)
Projected cash provided by operating activities	\$5.0 - \$5.3

(a) Excluding asset impairment and net restructuring and other charges.

(b) Other cash expenses primarily include taxes, interest expense and business restructuring charge payments.
