NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1. Basis of Presentation

In the opinion of management, the accompanying unaudited condensed consolidated financial statements contain all normal, recurring adjustments necessary for a fair presentation of results for such periods. The results for any interim period are not necessarily indicative of those for the full year. Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been omitted. These condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes for the year ended December 31, 2003.

2. Reclassification

Certain 2003 amounts have been reclassified to conform to the 2004 presentation.

3. Comprehensive Income

The Company has no components of other comprehensive income; therefore comprehensive income equals net income.

4. Earnings Per Common Share

Basic earnings per share have been computed based upon the weighted average number of common shares outstanding. Dilutive earnings per share have been computed based upon the weighted average number of common shares outstanding plus the effect of all potentially dilutive common stock equivalents outstanding during the reporting period.

	Three Months Ended		Six Months Ended

Amounts payable to brokers, dealers and clearing agencies consisted of the following at:

	June 30,	December 31,
<i>(In thousands of dollars)</i>	2004	2003
Adjustment to record securities owned on a trade date basis, net	\$ -	\$ 16,593
Payable to clearing organizations	11,760	-
Securities failed-to-receive	7,743	3,782
Total	\$ 19,503	\$ 20,375

Proprietary securities transactions are recorded on trade date, as if they had settled. The related amounts receivable and payable for unsettled securities transactions are recorded net in receivables or payables to brokers, dealers and clearing agencies on the Statement of Financial Condition.

6. Receivables from Customers

The majority of the Company's non-institutional customer securities transactions, including those of officers, directors, employees and related individuals, are cleared through a third party under a clearing agreement. Under this agreement, the clearing agent executes and settles customer securities transactions, collects margin receivables related to these transactions, monitors the credit standing and required margin levels related to these customers and, pursuant to margin guidelines, requires the customer to deposit additional collateral with them or to reduce positions, if necessary. In the event the customer is unable to fulfill its contractual obligations, the clearing agent may purchase or sell the financial instrument underlying the contract, and as a result may incur a loss.

If the clearing agent incurs a loss, it has the right to pass the loss through to the Company which exposes the Company to off-balance-sheet risk. The Company has retained the right to pursue collection or performance from customers who do not perform under their contractual obligations and monitors customer balances on a daily basis along with the credit standing of the clearing agent. As the potential amount of losses during the term of this contract has no maximum, the Company believes there is no maximum amount assignable to this right. At June 30, 2004, substantially all customer obligations were fully collateralized and the Company has not recorded a liability related to the clearing agent's right to pass losses through to the Company.

At June 30, 2004, receivables from customers are mainly comprised of the purchase of securities by institutional clients. Delivery of these securities is made only when the Company is in receipt of the funds from the institutional client.

7. Securities Owned And Sold, But Not Yet Purchased

Securities owned and sold, but not yet purchased consisted of the following at:

<i>(In thousands of dollars)</i>	June 30, 2004		December 31, 2003	
	Owned	Sold, but not yet Purchased	Owned	Sold, but not yet Purchased

Publicly held investments include 853,924 shares of META Group Inc. (METG) with a market value of \$3.5 million. These shares are freely tradable and transferable. Also, included in publicly held investments are 2,991,040 shares of Mechanical Technology Incorporated (MKTY). As of June 30, 2004, the MKTY shares have a market value of \$17.9 million and cannot be sold until after December 23, 2004 as a result of a lock-up agreement entered into by the Company with MKTY. Following the expiration of the lock-up period, the MKTY shares are subject to the trading restrictions provisions of Rule 144 of the Securities Act of 1933 (Rule 144).

In April 2004, the Company declared a special dividend of one share of Plug Power (PLUG) stock for every seven shares of the Company's stock, payable May 18, 2004 to shareholders of record as of May 4, 2004. In May 2004, the Company distributed approximately 2 million shares of PLUG as a special dividend to the Company's shareholders, which represents a reduction of retained earnings of \$18.8 million. Due to this distribution, the Company recorded a realized investment gain of \$9.5 million offset by unrealized losses relating to Plug for the six months ended June 30, 2004 of \$5.4 million. The Company also realized an approximate \$2.2 million tax benefit due to a difference in the accounting versus tax treatment of this distribution. After the distribution, the Company holds 676,834 shares of PLUG with a market value of \$5.1 million at June 30, 2004. The remaining PLUG shares may only be sold pursuant to Rule 144. Under the restrictions of Rule 144, the Company's sale of PLUG stock for a three month period may not exceed the greater of one percent of the outstanding shares of PLUG or the average weekly volume of trading in PLUG during the four calendar weeks preceding the sale. PLUG currently has 73.0 million shares outstanding and had an average weekly volume for the four calendar weeks ended June 30, 2004 of approximately 3,300,000 shares.

Privately held investments include an investment of \$6.6 million in FA Technology Ventures Corporation (the Partnership). At June 30, 2004, \$6.6 million is the Company's maximum exposure to loss in the Partnership. The Partnership's primary purpose is to provide investment returns consistent with risks of investing in venture capital. At

June 30, 2004 total Partnership capital for all investors in the Partnership equaled \$26.3 million. FA Technology Ventures Corporation (FATV), a wholly owned subsidiary of the Company, is the investment advisor for the Partnership. Revenues derived from management of this investment for the six months ended June 30, 2004 were \$0.7 million in consolidation.

The Company has consolidated its Employee Investment Funds (EIF). The EIF are limited liability companies, established by the Company for the purpose of having select employees invest in private equity placements. The EIF is managed by FAC Management Corp., a wholly owned subsidiary of the Company, which has contracted with FATV to act as an investment advisor with respect to funds invested. At June 30, 2004, the Company's exposure to loss as a result of its involvement with the EIF includes the following: the Company's direct investment of \$0.8 million in the EIF and a \$3.7 million loan to the EIF and a commitment to loan an additional \$0.5 million to the EIF. The effect of consolidating the EIF was to increase Investments by \$6.0 million, decrease Receivable from Others by \$3.7 million (to reclassify the amount loaned by the Company to the EIF) and increase Payable to Others by \$2.2 million. The Payable to Others amount relates to the value of the EIF owned by employees.

Both customer related intangible assets and goodwill increased due to the acquisition of Descap Securities, Inc. (see Acquisitions footnote).

The carrying amount of goodwill for the institutional convertible bond arbitrage group acquisition increased by \$84 thousand for the six months ended June 30, 2004, related primarily to additional cash consideration under the purchase agreement based on the amount of assets under management.

Aggregate amortization expense for the six-month period ending June 30, 2004 and 2003 was \$80 thousand and \$50 thousand, respectively.

Drafts payable represent amounts drawn by the Company against bank overdrafts under a sweep agreement with a bank.

11. Notes Payable

Edgar Filing: FIRST ALBANY COMPANIES INC - Form 10-Q

Notes payable include a note for \$4.0 million collateralized by marketable securities included in the Company's investment portfolio, which is payable in quarterly principal payments of \$525,000 plus interest. The interest rate is fixed at 7% for the term of the loan. This loan matures September 1, 2006.

Notes payable also include Senior Notes dated June 13, 2003 for \$10 million with a fixed interest rate of 8.5%, payable semiannually, maturing on June 30, 2010. Principal payments of \$2 million are due on June 30th of each year, commencing June 30, 2006 through June 30, 2010. The purchasers of these notes are customers of the Company.

There were 437,000 warrants issued to the purchasers of the Senior Notes, which are exercisable between \$10.08 and \$11.54 per share through June 13, 2010. The value assigned to the warrants was \$1 million. The value of the Senior Notes was discounted by the value of the warrants and is being amortized over the term of the notes.

The Senior Notes contain various covenants, as defined in the agreements, including restrictions on the incurrence of debt, the maintenance of not less than \$50 million of net worth (as of June 30, 2004, the Company's net worth was \$89.8 million) and an adjusted cash flow coverage rate for First Albany Capital Inc. (a wholly owned subsidiary) of not less than 1.2 to 1 as at the end of each fiscal quarter based on a the most recently concluded period of four consecutive quarters (at the end of the June 2004 quarter, the Company's adjusted cash flow coverage rate was 27.0 to 1). As of June 30, 2004, the Company was in compliance with these covenants.

Notes payable also include a \$20 million Term Loan to finance the acquisition of Descap Securities, Inc. Interest rate is 2.4% over the 30-day London InterBank Offered Rate (LIBOR) (1.37% at June 30, 2004). Interest only is payable for first six months, and thereafter monthly payments of principal and interest over the life of loan which matures on May 14, 2011.

The Term Loan contains various covenants, as defined in the agreement, including maintenance of not less than \$22.5 million of earnings before interest, taxes, depreciation, amortization and lease expense (EBITDAR) (for the twelve months period ending June 30, 2004, the Company's EBITDAR was \$32.1 million), operating cash flow to total fixed charge ratio of not less than 1.15 to 1 (for the twelve months period ending June 30, 2004, the operating cash flow to total fixed charge ratio was 1.57 to 1) and modified total funded debt to EBITDAR ratio of less than 1.75 to 1 (for the twelve months period ending June 30, 2004, modified total funded debt to EBITDAR ratio was 1.15 to 1). As of June 30, 2004, the Company was in compliance with these covenants.

Principal payments for all notes, which include \$797,000 discounted on the Senior Notes, are due as follows:

13. Commitments and Contingencies

Commitments: As of June 30, 2004, the Company had a commitment through July 2006 to invest up to \$11.5 million in FA Technology Ventures Corporation (the Partnership). The Company intends to fund this commitment from the sale of other investments and operating cash flow. The Partnership's primary purpose is to provide investment returns consistent with risks of investing in venture capital. In addition to the Company, certain other limited partners of the Partnership are officers or directors of the Company. The majority of the commitments to the Partnership are from non-affiliates of the Company.

The General Partner for the Partnership is FATV GP LLC. The General Partner is responsible for the management of the Partnership, including among other things, making investments for the Partnership. The members of the General Partnership are George McNamee, Chairman of the Company, First Albany Enterprise Funding, Inc., a wholly owned subsidiary of the Company, and other employees and former employees of the Company or its subsidiaries. Mr. McNamee is required under the Partnership agreement to devote a majority of his business time to the conduct of the affairs of the Partnership and any parallel funds. Subject to the terms of the Partnership agreement, under certain

conditions, the General Partnership is entitled to share in the gains received by the Partnership in respect of its investment in a portfolio company. The General Partner will receive a carried interest on customary terms. The General Partner has contracted with FA Technology Ventures Corporation (FATV), a wholly owned subsidiary of the Company, to act as investment advisor to the General Partner.

As of June 30, 2004, the Company had an additional commitment through July 2006 to invest up to \$8.8 million in funds that invest in parallel with the Partnership, which it intends to fund, at least in part, through current and future Employee Investment Funds (EIF). EIF are limited liability companies, established by the Company for the purpose of allowing select employees to invest their own funds in private equity placements.

The EIF are managed by FAC Management Corp., a wholly owned subsidiary of the Company, which has contracted with FATV to act as an investment advisor with respect to funds invested in parallel with the Partnership. The Company anticipates that the portion of the commitment that is not funded by employees through the EIF will be funded by the Company through the sale of other investments and operating cash flow.

In 1999, the Company acted as a placement agent for a \$7.5 million bond issue. In July 2002, as a result of a dispute between the Company and the buyer of the bonds, the Company entered into an agreement which indemnified the buyer for up to \$3.7 million of potential realized losses which might be incurred on the outstanding principal amount of the bonds. At March 31, 2004, the Company had accrued \$3.1 million as a liability related to the agreement.

During the second quarter of 2004 a final settlement was reached for a total of \$3.0 million. In entering into this agreement, the Company and the buyer of the bonds did not admit or concede to any liability, wrongdoing, misconduct or damages of any kind.

Litigation: In 1998 the Company was named in lawsuits by Lawrence Group, Inc. and certain related entities (the Lawrence Parties) in connection with a private sale of Mechanical Technology Incorporated stock from the Lawrence Parties that was previously approved by the United States Bankruptcy Court for the Northern District of New York (the "Bankruptcy Court"). The Company acted as placement agent in that sale, and a number of employees and officers of the Company, who have also been named as defendants, purchased shares in the sale. The complaints alleged that the defendants did not disclose certain information to the sellers and that the price approved by the court was therefore not proper. The cases were initially filed in the Bankruptcy Court and the United States District Court for the Northern District of New York (the "District Court"), and were subsequently consolidated in the District Court. The District Court dismissed the cases, and that decision was subsequently vacated by the United States Court of Appeals for the Second Circuit, which remanded the cases for consideration of the plaintiffs' claims as motions to modify the Bankruptcy Court sale order. The plaintiffs' claims have now been referred back to the Bankruptcy Court for such consideration. The Company believes that it has strong defenses to, and intends to vigorously defend itself against the plaintiffs' claims, and believes that the claims lack merit.

In the normal course of business, the Company has been named a defendant, or otherwise has possible exposure, in several claims. Certain of these are class actions, which seek unspecified damages, which could be substantial.

Although there can be no assurance as to the eventual outcome of litigation in which the Company has been named as a defendant or otherwise has possible exposure, the Company has provided for those actions most likely of adverse

dispositions. Although further losses are possible, the opinion of management, based upon the advice of its attorneys and General Counsel, is that such litigation will not, in the aggregate, have a material adverse effect on the Company's liquidity or financial position, although it could have a material effect on quarterly or annual operating results in the period in which it is resolved.

Other: The Company enters into underwriting commitments to purchase securities, as part of its investment banking business and may also purchase or sell securities on a when-issued basis. As of June 30, 2004, the Company had \$1.6 million in outstanding underwriting commitments and had purchased no securities on a when-issued basis.

In connection with a \$47.4 million underwriting transaction, the Company sent unauthorized emails to 223 addressees, each of which may have constituted a nonconforming prospectus under the Securities Act of 1933. A recipient of the unauthorized emails may be entitled to rescission rights if they purchased shares of common stock issued through the underwriting transaction. The rescission rights would allow any recipient of the communication, for a period of one year from March 30, 2004, the date of such recipient's purchase of shares of common stock issued through the underwriting, to seek recovery of the consideration paid in connection with the purchase. The Company has agreed to indemnify the company whose common stock was underwritten for losses, costs and expenses that might be incurred as a result of the unauthorized communications. In an effort to avoid further Securities Act implications and to minimize the risk related to the indemnification provided as a result of the unauthorized communication, the Company took a number of steps to control the solicitation, allocation and distribution of the shares of common stock issued in the transaction, which included selling only to institutional investors and prohibiting sales to those who were among the 223 original addressees. As of June 30, 2004, the Company has not accrued any liability related to this agreement.

14. Stockholders Equity

Dividend

In July 2004, the Board of Directors declared a quarterly dividend of \$.05 per share for the second quarter ended June 30, 2004, payable August 30, 2004 to stockholders of record on August 16, 2004.

In April 2004, the Board of Directors declared a quarterly dividend of \$.05 per share for the first quarter ended March 31, 2004, payable on May 28, 2004 to stockholders of record on May 14, 2004.

Special Dividend

In May 2004, the Company distributed approximately 2 million shares of PLUG as a special dividend (see Investments footnote).

Private Placement

The Company raised \$9.3 million, net of issuance costs in equity through a private placement of approximately 896,000 shares of the Company's stock.

Acquisitions - Descap Securities, Inc.

On May 14, 2004, the Company acquired 100% of the outstanding common shares of Descap Securities, Inc., a New York-based broker-dealer and investment bank. The value of the transaction is approximately \$31 million, which consists of \$25 million in cash and 549,476 shares of the Company's common stock, plus future consideration based on financial performance. These shares issued to the sellers of Descap Securities, Inc. provide the sellers the right to require the Company to purchase back these shares at a price of \$6.14 per share. The Company also has the right to purchase back these shares from the sellers at a price of \$14.46. Both the put and call rights expires on May 31, 2007. The Company also issued 270,843 shares of restricted stock to employees of Descap Securities, which vests over a three-year period (see Acquisitions footnote).

Deferred Compensation and Employee Stock Trust

The Company has adopted various nonqualified deferred compensation plans (the Plans) for the benefit of a select group of highly compensated employees who contribute significantly to the continued growth and development and future business success of the Company. Plan participants may elect under the Plans to have the value of their Plans accounts track the performance of one or more investment benchmarks available under the Plans, including First Albany Companies Common Stock Investment Benchmark, which tracks the performance of First Albany Companies Inc. common stock (Company Stock). With respect to the First Albany Companies Common Stock Investment Benchmark, the Company contributes Company Stock to a rabbi trust (the Trust) it has established in connection with meeting its related liability under the Plans.

Assets of the Trust have been consolidated with those of the Company. The value of the Company's stock at the time contributed to the Trust has been classified in stockholders' equity as treasury stock. The deferred compensation arrangement requires the related liability to be settled by delivery of a fixed number of shares of Company Stock.

Accordingly, the related liability is classified in stockholders' equity as deferred compensation and changes in the fair market value of the amount owed to the participant in the Plan is not recognized.

Unearned Compensation

The Company has established several stock incentive plans through which employees of the Company may be awarded stock options, stock appreciation rights and restricted common stock. The unamortized amount related to restricted common stocks awarded under these plans is classified in equity under unearned compensation.

15. Benefit Plans

First Albany Companies Inc. has established several stock incentive plans through which eligible employees of the Company may be awarded stock options, stock appreciation rights and restricted common stock of the Company. The

purpose of these stock incentive plans are to promote the interests of the Company, its subsidiaries and its stockholders by enabling the Company and its subsidiaries to attract, retain and motivate employees and officers or those who will become employees or officers of the Company and/or its subsidiaries, and to align the interest of those individuals with the Company's stockholders. To do this, these plans offer performance-based incentive awards and equity-based opportunities to provide such persons with a proprietary interest in maximizing the growth, profitability and overall success of the Company.

Restricted Stock: 975,807 shares of restricted stock were awarded under the plans during the six months of 2004, at a weighted average grant date price of \$15.19. 270,843 shares of restricted stock were awarded to employees of Descap Securities at a weighted average grant price of \$10.30. The fair market value of the awards will be amortized over the three-year period in which the restrictions are outstanding.

Options: Stock-based compensation cost related to stock options awards is measured at the grant date based on the value of the award and is recognized as expense over the vesting period for awards granted after December 31, 2002.

The following table reflects the effect on net income if the fair value based method had been applied to all outstanding and unvested stock options in each period.

16. Net Capital Requirements

The Company's broker-dealer subsidiary, First Albany Capital Inc. (the Corporation) is subject to the Securities and Exchange Commission's Uniform Net Capital Rule, which requires the maintenance of a minimum net capital. The Corporation has elected to use the alternative method permitted by the rule, which requires the Corporation to maintain a minimum net capital amount of 2% of aggregate debit balances arising from customer transactions as defined or \$1 million, whichever is greater. As of June 30, 2004, the Corporation had aggregate net capital, as defined, of \$13.3 million, which equaled 138.51% of aggregate debit balances and \$12.3 million in excess of required minimum net capital.

Descap is subject to the Securities and Exchange Commission Uniform Net Capital Rule (15c3-1), which requires the maintenance of minimum net capital and that the ratio of aggregate indebtedness to net capital, both as defined by the rule, shall not exceed 15:1. The rule also provides that capital may not be withdrawn or cash dividends paid if the resulting net capital ratio would exceed 10:1. At June 30, 2004, Descap had net capital of \$6.0 million, which was \$5.9 million in excess of its required net capital. Descap's ratio of Aggregate Indebtedness to Net Capital was 0.24 to 1.

17. Segment Analysis

The Company has announced it will discontinue its asset management business FA Asset Management Inc. with the exception of the institutional convertible bond arbitrage advisory group. The convertible bond arbitrage advisory group is now included in the Parent and Affiliates segment. The FA Asset Management Inc. segment, includes those operations which are expected to be discontinued in the future.

The Company's reportable segments include Taxable Fixed Income, Municipal Capital Markets, Equity Capital Markets, Fixed Income-Other and Corporate-Other, which collectively comprise First Albany Capital Inc. The Company's brokerage operations include both First Albany Capital Inc. and Descap Securities, Inc., the newly acquired broker-dealer and investment bank specializing in mortgage-based securities. The Company's reportable segments also include Parent & Affiliates, FA Asset Management Inc. (future discontinued operations) and Investments. The Company evaluates the performance of its segments and allocates resources to them based on various factors, including prospects for growth, return on revenue and expected profitability.

The Taxable Fixed Income segment includes institutional sales and trading of corporate, federal government and agency securities. The Municipal Capital Markets segment includes underwriting and institutional sales and trading of municipal securities as well as financial advisory services for municipalities. The Equity Capital Markets segment includes institutional sales and trading of equity securities, corporate finance advisory services and underwritings. The Fixed Income-Other segment includes institutional sales and trading of fixed income middle markets and taxable municipal securities. The Corporate-Other segment includes internal operations and support costs, along with other

unallocated revenues and expenses.

The Parent and Affiliates segment includes the Parent company, excluding its investment portfolio, the asset management services of FATV, and the Company's institutional convertible bond arbitrage advisory group. The Investment segment includes realized gains and losses and unrealized gains and losses from the Company's investment portfolio. The Investment segment does not include revenues the Company receives through FATV for management of some of its private investments, which are eliminated in consolidation in investment gains (losses). These revenues are included in the Parent and Affiliates segment.

Intersegment revenue have been eliminated for purposes of presenting net revenue so that total net revenue presented is from external sources. Interest revenue is allocated to the operating segments and is presented net of interest expense for purposes of assessing the performance of the business segment. Depreciation and amortization is allocated to the business segments.

19. New Accounting Standards

In January 2003, the FASB issued FIN No. 46R, "Consolidation of Variable Interest Entities (Revised)". FIN No. 46R requires a company to consolidate a variable interest entity (VIE) if the company has variable interests that give it a majority of the expected losses or a majority of the expected residual returns of the entity. FIN No. 46R is effective for VIEs as of March 31, 2004. FIN No. 46R was adopted March 31, 2004 and did not result in the consolidation of any VIE.

20. Acquisitions**Descap Securities, Inc.**

On May 14, 2004, the Company acquired 100% of the outstanding common shares of Descap Securities, Inc. (Descap), a New York-based broker-dealer and investment bank. Descap specializes in the primary issuance and secondary trading of mortgage-backed securities, asset-backed securities, collateralized mortgage obligations and derivatives, and commercial mortgage-backed securities. Its investment banking group provides advisory and capital raising services, and specializes in structured finance and asset-backed securities. Descap will continue to operate under its current name.

The value of the transaction is approximately \$31 million, which consists of \$25 million in cash and 549,476 shares of the Company's common stock, plus future consideration based on financial performance. Approximately \$9.4 million of the purchase price was to acquire the net assets of the business, which consisted of assets of \$68.7 million and liabilities of \$59.3 million (see table below). The purchase price in excess of net assets (\$21.7 million) was preliminarily allocated to intangible assets based upon an independent third party valuation (see Intangible Asset footnote). The Company also issued 270,843 shares of restricted stock to employees of Descap Securities, which vests over a three-year period.

The following is management's discussion and analysis of certain significant factors, which have affected the Company's financial position and results of operations during the periods included in the accompanying condensed consolidated financial statements.

Business Environment

First Albany Companies Inc. (the Company) is the parent company whose principal subsidiaries include First Albany Capital Inc. (First Albany Capital), Descap Securities, Inc. (Descap Securities), FA Technology Ventures Corporation and FA Asset Management Inc. First Albany Capital Inc. provides investment banking services to corporate and public clients, and engages in market making and trading of corporate, government and municipal securities. Descap Securities is a New York-based broker-dealer and investment bank specializing in mortgage-backed securities. FA Technology Ventures Corporation provides venture capital and merchant banking to the investment and corporate communities, and FA Asset Management Inc. provides asset management services to individuals and institutions.

The investment banking and brokerage businesses generate revenues in direct correlation with the general level of trading activity in the stock and bond markets. The Company cannot control this level of activity, however many of the Company's costs are fixed. Therefore, the Company's earnings, like those of others in the industry, reflect the activity in the markets and can fluctuate accordingly.

BUSINESS OVERVIEW

The Company's 2004 second quarter net revenues were \$41.0 million compared to \$46.9 million for the same period in 2003. The Company had net income of \$2.7 million for the second quarter 2004, compared to net income of \$2.5 million for the same period in 2003. Second quarter 2004 net income per diluted share was \$0.19 compared to net income of \$0.22 per diluted share in the second quarter of 2003. Net income from continuing operations was \$2.4 million for the second quarter of 2004 compared to \$2.4 million in the second quarter of 2003. Diluted earnings per share from continuing operations for the second quarter of 2004 was \$0.17 per share compared to \$0.21 in the second quarter of 2003.

For the six months ended June 30, 2004, net revenues were \$83.5 million compared to \$92.6 million for the same period in 2003, and net income was \$0.7 million compared to \$4.7 million for the same period in 2003. Earnings per diluted share for the six months ended June 30, 2004 was \$0.06 compared to \$0.43 per diluted share for the same period in 2003. Net income from continuing operations was \$0.5 million for the six months ended June 30, 2004 compared to \$4.6 million in the same period of 2003. Diluted earnings per share from continuing operations for the six months ended June 30, 2004 was \$0.04 per share compared to \$0.42 for the six months ended June 30, 2003.

Major Segment Operating Results

Brokerage Operations

Brokerage Operations is comprised of First Albany Capital, the securities brokerage and investment banking operation of the Company, and its wholly owned subsidiary, Descap Securities, a broker-dealer and investment bank specializing in mortgage-backed securities.

Net revenues from the Company's Brokerage Operations were \$36.2 million for the second quarter ended June 30, 2004, compared to \$42.7 million for the same period in 2003. The Company's Brokerage Operations had a net loss of \$0.9 million for the second quarter 2004, compared to net income of \$1.6 million for the same period in 2003. For the first half of 2004, net revenues from the Brokerage Operations were \$78.5 million, as compared with \$82.0 million for the first half of 2003. Net income for the first half of 2004 was a net loss of \$0.9 million compared to net income of \$2.6 million for the same period in 2003.

Results for the divisions of the Company's Brokerage Operations are:

•

Net revenues for Equity Capital Markets were \$16.6 million for the second quarter of 2004, up from \$12.0 million in the second quarter of 2003. Continued strength in investment banking fees and improvement in listed trading revenue were the primary reasons for the year-over-year improvement for the quarter. Compared to the second quarter of 2003, investment banking revenues were \$3.8 million up from \$1.2 million and listed net revenue was up \$1.5 million.

During the second quarter of 2004, the Company acted as a co-manager on seven equity transactions and an advisor on two transactions. For the first six months of 2004, net revenues for Equity Capital Markets were \$38.4 million as compared to \$21.7 million for the first six months of 2003.

•

The Municipal Capital Markets group net revenue was \$9.8 million for the second quarter of 2004 as compared to \$9.9 million for the same period in 2003. During the second quarter the firm acted as a sole or senior manager on twelve transactions, a co-manager on twenty transactions and an advisor on seventeen transactions. For the first six

months of 2004, net revenues for Municipal Capital Markets were \$16.6 million as compared to \$18.9 million for the first six months of 2003. The Public Finance group acted as senior-manager and lead accounts runner on a \$500 million offering for the state of California, which was the group's largest senior-managed transaction in its history.

•

The Taxable Fixed Income unit reported net revenue for the second quarter of \$5.3 million compared to \$15.5 million in the second quarter of 2003. Declining institutional investor transaction activity and the overall compression spreads in their markets continued to negatively impact net revenue in Taxable Fixed Income. For the first six months of 2004, net revenues were \$14.5 million as compared to \$31.2 million for the first six months of 2003.

Parent & Affiliates

•

The Company is continuing to review alternatives with regard to the discontinuance of its asset management business, other than its convertible bond arbitrage group, and anticipates it will become a discontinued operation as of the end of the 2004 third quarter.

•

FA Technology Ventures (FATV) added two new portfolio companies in the second quarter. FATV acted as a co-lead investor in CreditSights, Inc., an internet-enabled, independent research firm providing capital market research to institutional investors, and also invested in Autotask, Inc., which develops, markets, and hosts professional services automation software. As of June 30, 2004 the fund was 50% invested/reserved.

•

Investment gains for the quarter ended June 30, 2004 were \$4.7 million, net of tax, due primarily to an increase in fair market value of the investment portfolio held by First Albany Companies.

Three-Month Period Ended June 30, 2004

Commissions

Commission revenue represents revenues generated by the Company in executing customers' orders to buy or sell listed securities and securities in which it does not make a market, the Company generally acts as an

agent and charges a commission. Commission revenue was generated from the following business segments:

<i>(In thousands of dollars)</i>	Three Months Ended June 30	
	2004	2003
Taxable Fixed Income	\$ 17	\$ 22
Municipal Capital Markets	7	14
Equity Capital Markets	5,335	3,666
Fixed Income - Other	-	-
Parent & Affiliates/Corporate-Other	1	6
Total Commissions Revenue	\$ 5,360	\$ 3,708

The increase in commission revenue in 2004 was a result of the increase in listed agency transactions by the Equity Capital Markets segment.

Principal Transactions

Principal transactions revenue represents trading of municipal debt (tax-exempt and taxable) through its Municipal Capital Markets segment, U.S. government and federal agency obligations, corporate debt and convertible securities through its Taxable Fixed Income and Descap Securities segments and equity securities through its Equity Capital Markets segment as a "market maker" for sale of those securities to other dealers and to customers. Most of the trading is for the purpose of generating sales credits for the institutional sales force. Principal transactions revenue was generated from the following business segments:

Descap Securities	2,458	-
Parent & Affiliates/Corporate-Other	(142)	91
Total Principal Transactions Revenue	\$ 20,300	\$ 30,176

Principal transactions in 2004 decreased \$9.9 million or 33%. These revenues were negatively impacted by declining institutional investor transaction activity and by overall compression in price spreads in the secondary corporate bond market, which resulted in a \$9.9 million decline in revenue from the Taxable Fixed Income segment and a \$3.6 million decline in revenues in the Fixed Income-Other segment. These declines were offset by \$2.5 million in revenues from the newly acquired Descap Securities, along with the Equity Capital Markets segment revenues increasing \$0.4 million and Municipal Capital Markets revenue increasing \$1.1 million.

Investment Banking

Investment Banking revenue represents revenues generated by the Company managing, co-managing, and participating in corporate securities offerings through its Equity Capital Markets segment and municipal securities offerings through its Municipal Capital Markets segment. Investment Banking revenue was generated from the following business segments:

<i>(In thousands of dollars)</i>	Three Months Ended June 30

Equity Capital Markets	3,836	1,223
Fixed Income - Other	92	(115)
Total Investment Banking	\$ 9,228	\$ 7,720

Investment banking revenues increased \$1.5 million or 20% in 2004. The increase was comprised mainly of an increase in the Equity Capital Markets segment where the number of managed and co-managed corporate equity offerings and financial advisory transactions increased to 9 compared to 3 in 2003.

Investment Gains (losses)

Investment gains increased \$1.2 million in 2004 due primarily to an increase in fair market value of the Investment portfolio held by the Parent & Affiliates segment.

Fees and Other

A majority of the fees the Company earns relates to the activity of FA Technology Ventures Corporation (managing private equity funds, and providing venture financing to emerging growth companies) and the institutional convertible bond arbitrage advisory group, both of which are included in the Parent and

Affiliates segment along with FA Asset Management Inc., acting as an investment advisor, managing the assets of institutions and individuals.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION
AND RESULTS OF OPERATIONS

Six-Month Period Ended June 30, 2004Commissions

Commission revenue represents revenues generated by the Company in executing customers' orders to buy or sell listed securities and securities in which it does not make a market, the Company generally acts as an agent and charges a commission. Commission revenue was generated from the following business segments:

<i>(In thousands of dollars)</i>	Six Months Ended June 30	
	2004	2003
Taxable Fixed Income	\$ 109	\$ 38
Municipal Capital Markets	14	26
Equity Capital Markets	11,034	7,816
Fixed Income - Other	-	-
Parent & Affiliates/Corporate-Other	1	15
Total Commissions Revenue	\$ 11,158	\$ 7,895

The increase in commission revenue in 2004 was a result of the increase in listed agency transactions by the Equity Capital Markets segment.

Principal Transactions

Principal transactions revenue represents trading of municipal debt (tax-exempt and taxable) through its Municipal Capital Markets segment, U.S. government and federal agency obligations, corporate debt and convertible securities through its Taxable Fixed Income and Descap Securities segments and equity securities through its Equity Capital Markets segment as a "market maker" for sale of those securities to other dealers and to customers. Most of the trading is for the purpose of generating sales credits for the institutional sales force. Principal transactions revenue was generated from the following business segments:

<i>(In thousands of dollars)</i>	Six Months Ended June 30	
	2004	2003
Taxable Fixed Income	\$ 13,788	\$ 30,517
Municipal Capital Markets	6,475	7,296
Equity Capital Markets	17,890	11,775
Fixed Income - Other	4,646	8,935
Descap Securities	2,458	-
Parent & Affiliates/Corporate-Other	6	61
Total Principal Transactions Revenue	\$ 45,263	\$ 58,584

Principal transactions in 2004 decreased \$13.3 million or 23%. These revenues were negatively impacted by the overall compression in price spreads in the secondary corporate bond market and declining institutional investor transaction activity, which resulted in a \$16.8 million decline in revenue from the Taxable Fixed Income segment. Also, revenues in the Municipal Capital Market segment and the Fixed Income-Other segment were negatively impacted by the current interest rate environment. These declines were offset by an increase in the Equity Capital Markets segment revenues of \$6.1 million as a result of the Company's NASDAQ trading effort and improved NASDAQ markets and in revenues of \$2.5 million in the newly acquired Descap Securities segment..

Investment Banking

Investment Banking revenue represents revenues generated by the Company managing, co-managing, and participating in corporate securities offerings through its Equity Capital Markets segment and municipal securities offerings through its Municipal Capital Markets segment. Investment Banking revenue was generated from the following business segments:

FIRST ALBANY COMPANIES INC.

Fixed Income - Other	89	(96)
Parent & Affiliates/Corporate-Other	-	-
Total Investment Banking	\$ 19,457	\$ 12,970

Investment banking revenues increased \$6.5 million or 50% in 2004. The increase was comprised mainly of an increase in the Equity Capital Markets segment where the number of managed, co-managed and mergers and acquisitions transactions in corporate offerings and debt transactions increased to 19 compared to 7 in 2003.

Investment Gains (losses)

Investment gains decreased \$3.9 million in 2004 compared to the same period in 2003. In the first six months of 2003, the fair market value of investments increased \$7.8 million, while in the first six months of 2004, the market fair value of investments increased only \$3.9 million.

Fees and Other

A majority of the fees the Company earns relates to the activity of FA Technology Ventures Corporation (managing private equity funds, and providing venture financing to emerging growth companies) and the institutional convertible bond arbitrage advisory group, both of which are included in the Parent and Affiliates segment along with FA Asset Management Inc., acting as an investment advisor, managing the assets of institutions and individuals.

Other expense increased \$1.8 million in 2004 due mainly to increases in reserves related to a previously-disclosed customer dispute (Municipal Capital Markets segment) and an arbitration award in an employment dispute (Equity Capital Markets segment).

Income Tax (Benefit) Expense

Income tax expense decreased \$7.3 million in 2004 due mainly to a decrease in income (loss) before income tax and to the difference in accounting versus tax treatment of the Plug Power stock distribution (see Investments footnote in the Notes to Condensed Consolidated Financial Statements).

FIRST ALBANY COMPANIES INC.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION

AND RESULTS OF OPERATIONS

Liquidity and Capital Resource

A substantial portion of the Company's assets, similar to other brokerage and investment banking firms, are liquid, consisting of cash and assets readily convertible into cash. These assets are financed primarily by the Company's payables to brokers, dealers and clearing agencies, bank lines of credit and customer payables. The level of assets and liabilities will fluctuate as a result of the changes in the level of positions held to facilitate customer transactions and changes in market conditions.

As of June 30, 2004, First Albany Capital Inc. and Descap Securities, Inc., both registered broker-dealer subsidiaries of First Albany Companies Inc., were in compliance with the net capital requirements of the Securities and Exchange Commission. The net capital rules restrict the amount of a broker-dealer's net assets that may be distributed. Also, a significant operating loss or extraordinary charge against net capital may adversely affect the ability of the Company's broker-dealer subsidiary to expand or even maintain its present levels of business and the ability to support the obligations or requirements of the Company. As of June 30, 2004, First Albany Capital Inc. had net capital of \$13.3 million, which exceeded minimum net capital requirements by \$12.3 million, while Descap Securities, Inc. had net capital of \$6.0 million, which exceeded minimum net capital requirements by \$5.9 million.

As of June 30, 2004, the Company had a commitment through July 2006 to invest up to \$11.5 million in FA Technology Ventures, LP (the Partnership). The Company intends to fund this commitment from the sale of other investments and operating cash flow. The Partnership's primary purpose is to provide investment returns consistent with risks of investing in venture capital. In addition to the Company, certain other limited partners of the Partnership are officers or directors of the Company. The majority of the commitments to the Partnership are from non-affiliates of the Company.

The General Partner for the Partnership is FATV GP LLC. The General Partner is responsible for the management of the Partnership, including among other things, making investments for the Partnership. The members of the General Partnership are George McNamee, Chairman of the Company, First Albany Enterprise Funding, Inc., a wholly owned subsidiary of the Company, and other employees and former employees of the Company or its subsidiaries. Mr. McNamee is required under the Partnership agreement to devote a majority of his business time to the conduct of the affairs of the Partnership and any parallel funds. Subject to the terms of the Partnership agreement, under certain conditions, the General Partnership is entitled to share in the gains received by the Partnership in respect of its investment in a portfolio company. The General Partner will receive a carried interest on customary terms. The General Partner has contracted with FA Technology Ventures Corporation, a wholly owned subsidiary of the Company, to act as investment advisor to the General Partner.

As of June 30, 2004, the Company had an additional commitment through July 2006 to invest up to \$8.8 million in funds that invest in parallel with the Partnership, which it intends to fund, at least in part, through current and future Employee Investment Funds (EIF). EIF are limited liability companies, established by the Company for the purpose of allowing select employees to invest their own funds in private equity placements.

The Company has deferred tax assets of \$12.5 million and deferred tax liabilities of \$7.2 million as of June 30, 2004. The Company expects that it will realize the benefit of the deferred tax assets through the combination of future taxable income and income available in years in which the reversal of the asset can be carried back.

The Company enters into underwriting commitments to purchase securities as part of its investment banking business and may also purchase and sell securities on a when-issued basis. As of June 30, 2004, the Company had \$1.6 million outstanding underwriting commitments and had purchased no securities on a when-issued basis.

On May 14, 2004, the Company acquired 100% of the outstanding common shares of Descap Securities, Inc., a New York-based broker-dealer and investment bank. The value of the transaction was approximately \$31 million, which consisted of \$25 million in cash and 549,476 shares of the Company's common stock, plus future consideration based on financial performance (see Acquisitions footnote in the Notes to Condensed Consolidated Financial Statements). The shares of the Company's stock issued to the sellers of Descap Securities, Inc. provide the sellers the right to require the Company to purchase back these shares at a price of \$6.14 per share. The Company also has the right to purchase back these shares from the sellers at a price of \$14.46. Both the put and call rights expires on May 31, 2007.

The Company's notes payable include Senior Notes for \$10 million which contain various covenants, as defined in the agreements, including restrictions on the incurrence of debt, the maintenance of not less than \$50 million of net worth (at June 30, 2004, the Company's net worth was \$89.8 million) and an adjusted cash flow coverage rate for First Albany Capital Inc. (a wholly owned subsidiary) of not less than 1.2 to 1 as at the end of each fiscal quarter based on a the most recently concluded period of four consecutive quarters (as of the end of the June 2004 quarter, the Company's adjusted cash flow coverage rate was 27.0 to 1). As of June 30, 2004, the Company was in compliance with these covenants.

The Company's notes payable also include a \$20 million Term Loan to finance the acquisition of Descap Securities, Inc. which contains various covenants, as defined in the agreement, including maintenance of not less than \$22.5 million of earnings before interest, taxes, depreciation, amortization and lease expense (EBITDAR) (for the twelve months period ending June 30, 2004, the Company's EBITDAR was \$32.1 million), operating cash flow to total fixed charge ratio of not less than 1.15 to 1 (for the twelve months period ending June 30, 2004, the operating cash flow to total fixed charge ratio was 1.57 to 1) and modified total funded debt to EBITDAR ratio of less than 1.75 to 1 (for the twelve months period ending June 30, 2004, modified total funded debt to EBITDAR ratio was 1.15 to 1). As of June 30, 2004, the Company was in compliance with these covenants.

Management believes that funds provided by operations and a variety of bank lines of credit totaling at least \$300 million, of which approximately \$84 million were unused as of June 30, 2004, will provide sufficient resources to meet present and reasonably foreseeable short-term and long-term financial needs. These bank lines of credit consist of credit lines that the Company has been advised are available but for which no contractual lending obligations exist and are repayable on demand. These bank lines of credit are limited to financing securities eligible for collateralization, which includes Company owned securities.

CONTRACTUAL OBLIGATIONS

First Albany Companies Inc. has contractual obligations to make future payments in connection with our short-term debt, long-term debt, capital leases, and operating leases. See Notes to Consolidated Financial Statements for additional disclosures related to our commitments.

The following table sets forth these contractual obligations by fiscal year:

<i>(In thousands of dollars)</i>	2004	2005	2006	2007	2008	Thereafter	Total

(1)

The Company has several notes payable which have principal payments associated with each. See Notes to the Consolidated Financial Statements.

(2)

The Company's headquarters and sales offices, and certain office and communication equipment, are leased under non-cancelable operating leases, certain of which contain escalation clauses and which expire at various times through 2015.

(3)

A select group of management and highly compensated employees are eligible to participate in the First Albany Companies Inc. Deferred Compensation Plan for Key Employees (the Plan). The employees enter into subordinate loans with the Company to provide for the deferral of compensation and employer allocations under the Plan. The accounts of the participants of the Plan are credited with earnings and/or losses based on the performance of various investment benchmarks selected by the participants. Maturities of the subordinated debt are based on the distribution election made by each participant, which may be deferred to a later date by the participant.

QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Item 3. Quantitative and Qualitative Disclosures about Market Risk**MARKET RISK**

Market risk generally represents the risk of loss that may result from the potential change in the value of a financial instrument as a result of fluctuations in interest rates and equity prices, changes in the implied volatility of interest rates and equity prices and also changes in the credit ratings of either the issuer or its related country of origin.

Market risk is inherent to both derivative and non-derivative financial instruments, and accordingly, the scope of the Company's market risk management procedures extends beyond derivatives to include all market-risk-sensitive financial instruments. The Company's exposure to market risk is directly related to its role as a financial intermediary in customer-related transactions and to its proprietary trading.

The Company trades tax exempt and taxable debt obligations, including U.S. Treasury bills, notes, and bonds; U.S. Government agency notes and bonds; bank certificates of deposit; mortgage-backed securities, and corporate obligations. The Company is also an active market maker in the NASDAQ equity markets. In connection with these activities, the Company may be required to maintain inventories in order to ensure availability and to facilitate customer transactions. In connection with some of these activities, the Company attempts to mitigate its exposure to such market risk by entering into hedging transactions, which may include highly liquid future contracts, options and U.S. Government securities.

The following table categorizes the Company's market risk sensitive financial instruments by type of security and maturity date. The amounts shown are net of long and short positions.

<i>(In thousands of dollars)</i>	2004	2005	2006	2007	2008	Thereafter	Total

Fair value of securities

Following is a discussion of the Company's primary market risk exposures as of June 30, 2004, including a discussion of how those exposures are currently managed.

Interest Rate Risk

Interest rate risk is a consequence of maintaining inventory positions and trading in interest-rate-sensitive financial instruments. In connection with trading activities, the Company exposes itself to interest rate risk, arising from changes in the level or volatility of interest rates or the shape and slope of the yield curve. The Company's fixed income activities also expose it to the risk of loss related to changes in credit spreads. The Company attempts to hedge its exposure to interest rate risk primarily through the use of U.S. Government securities, highly liquid futures and options designed to reduce the Company's risk profile.

A sensitivity analysis has been prepared to estimate the Company's exposure to interest rate risk of its net inventory positions. The fair market value of these securities included in the Company's inventory at June 30, 2004 was \$136.3 million and \$147.2 million at December 31, 2003 (net of municipal futures positions). Interest rate risk is estimated as the potential loss in fair value resulting from a hypothetical one-half percent change in interest rates. At June 30, 2004, the potential change in fair value using a yield to maturity calculation and assuming this hypothetical change, was \$5.0 million and at year-end 2003 was \$4.5 million. The actual risks and results of such adverse effects may differ substantially.

Equity Price Risk

The Company is exposed to equity price risk as a consequence of making markets in equity securities. Equity price risk results from changes in the level or volatility of equity prices, which affect the value of equity securities or instruments that derive their value from a particular stock. The Company attempts to reduce the risk of loss inherent in its inventory of equity securities by monitoring those security positions constantly throughout each day.

Marketable equity securities included in the Company's inventory were recorded at a fair value of \$8.2 million at June 30, 2004 and \$7.6 million at December 31, 2003, have exposure to equity price risk. This risk is estimated as the potential loss in fair value resulting from a hypothetical 10% adverse change in prices quoted by stock exchanges and amounts to \$0.8 million at June 30, 2004 and \$0.8 million at year-end 2003.

The Company's investment portfolio excluding the consolidation of Employee Investment Fund (see Investments footnote in the Notes to Condensed Consolidated Financial Statements) at June 30, 2004 and December 31, 2003, had

a fair market value of \$41.3 million and \$53.0 million, respectively. This equity price risk is also estimated as the potential loss in fair value resulting from a hypothetical 10% adverse change in prices quoted by stock exchanges and amounts to \$4.1 million at June 30, 2004 and \$5.3 million at year-end 2003. The actual risks and results of such adverse effects may differ substantially.

CREDIT RISK

The Company is engaged in various trading and brokerage activities whose counter parties primarily include broker-dealers, banks, and other financial institutions. In the event counter parties do not fulfill their obligations, the Company may be exposed to risk. The risk of default depends on the credit worthiness of the counter party or issuer of the instrument. The Company seeks to control credit risk by following an established credit approval process, monitoring credit limits, and requiring collateral where it deems appropriate.

The Company purchases debt securities and may have significant positions in its inventory subject to market and credit risk. In order to control these risks, security positions are monitored on at least a daily basis. Should the Company find it necessary to sell such a security, it may not be able to realize the full carrying value of the security due to the size of the position sold. The Company attempts to reduce its exposure to changes in municipal securities valuation with the use as hedges of highly liquid municipal bond index futures contracts.

OPERATING RISK

Operating risk is the potential for loss arising from limitations in the Company's financial systems and controls, deficiencies in legal documentation and the execution of legal and fiduciary responsibilities, deficiencies in technology and the risk of loss attributable to operational problems. These risks are less direct than credit and market risk, but managing them is critical, particularly in a rapidly changing environment with increasing transaction volumes. In order to reduce or mitigate these risks, the Company has established and maintains an internal control environment that incorporates various control mechanisms at different levels throughout the organization and within such departments as Finance and Accounting, Operations, Legal, Compliance and Internal Audit. These control mechanisms attempt to ensure that operational policies and procedures are being followed and that the Company's various businesses are operating within established corporate policies and limits.

OTHER RISKS

Other risks encountered by the Company include political, regulatory and tax risks. These risks reflect the potential impact that changes in local laws, regulatory requirements or tax statutes have on the economics and viability of current or future transactions. In an effort to mitigate these risks, the Company seeks to review new and pending regulations and legislation and their potential impact on its business.

FIRST ALBANY COMPANIES INC.

CONTROLS AND PROCEDURES

Item 4. Controls and Procedures

As of the end of the period covered by this Form 10-Q, the Company's management, including the Chief Executive Officer and the Principal Financial Officer, evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures. Based on that evaluation, the Company's management, including the Chief Executive Officer and the Principal Financial Officer, concluded that the Company's disclosure controls and procedures were effective in timely alerting management, including the Chief Executive Officer and the Principal Financial Officer, of material information about the Company required to be included in periodic Securities and Exchange Commission filings. However, in evaluating the disclosure controls and procedures, management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures. There have been no significant changes in the Company's internal controls or in other factors that could significantly affect its internal controls subsequent to the date of the evaluation.

Part II-Other Information

Item 1. Legal Proceedings

In 1998 the Company was named in lawsuits by Lawrence Group, Inc. and certain related entities (the "Lawrence Parties") in connection with a private sale of Mechanical Technology Incorporated stock from the Lawrence Parties that was previously approved by the United States Bankruptcy Court for the Northern District of New York (the "Bankruptcy Court"). The Company acted as placement agent in that sale, and a number of employees and officers of the Company, who have also been named as defendants, purchased shares in the sale. The complaints alleged that the defendants did not disclose certain information to the sellers and that the price approved by the court was therefore not proper. The cases were initially filed in the Bankruptcy Court and the United States District Court for the Northern District of New York (the "District Court"), and were subsequently consolidated in the District Court. The District Court dismissed the cases, and that decision was subsequently vacated by the United States Court of Appeals for the Second Circuit, which remanded the cases for consideration of the plaintiffs' claims as motions to modify the Bankruptcy Court sale order. The plaintiffs' claims have now been referred back to the Bankruptcy Court for such consideration. The Company believes that it has strong defenses to and intends to vigorously defend itself against the plaintiffs' claims, and believes that the claims lack merit.

In the normal course of business, the Company has been named a defendant, or otherwise has possible exposure, in several claims. Certain of these are class actions, which seek unspecified damages, which could be substantial.

Although there can be no assurance as to the eventual outcome of litigation in which the Company has been named as a defendant or otherwise has possible exposure, the Company has provided for those actions most likely of adverse dispositions. Although further losses are possible, the opinion of management, based upon the advice of its attorneys and General Counsel, is that such litigation will not, in the aggregate, have a material adverse effect on the Company's liquidity or financial position, although it could have a material effect on quarterly or annual operating results in the period in which it is resolved.
