Item 2.02 Results of Operations and Financial Condition

On April 30, 2019, we issued a press release reporting our financial results for the three months ended March 31, 2019 (the “Press Release”). We will also host a conference call and webcast on April 30, 2019 during which we will make a presentation on our financial results for the three months ended March 31, 2019 (the “Presentation”). The Press Release and the Presentation are available on our website at <http://investors.ryder.com>.

The Press Release includes information regarding non-GAAP financial measures, as defined by SEC regulations, as well as a reconciliation of each non-GAAP financial measure to the nearest GAAP measure in the tables following the press release. Set forth in the table below is an explanation of each non-GAAP financial measure and why management believes that presentation of each measure provides useful information to investors:

Operating Revenue Measures:

| | |
|---|-------------------|
| Operating Revenue | Operating |
| FMS Operating Revenue | revenue is |
| DTS Operating Revenue | defined as total |
| SCS Operating Revenue | revenue for |
| FMS EBT as a % of FMS Operating Revenue | Ryder System, |
| DTS EBT as a % of DTS Operating Revenue | Inc. or each |
| SCS EBT as a % of SCS Operating Revenue | business |
| | segment (FMS, |
| | DTS and SCS), |
| | respectively, |
| | excluding any |
| | (1) fuel and (2) |
| | subcontracted |
| | transportation. |
| | We believe |
| | operating |
| | revenue |
| | provides useful |
| | information to |
| | investors as we |
| | use it to |
| | evaluate the |
| | operating |
| | performance of |
| | our core |
| | businesses and |
| | as a measure of |
| | sales activity at |
| | the |
| | consolidated |
| | level for Ryder |
| | System, Inc., |
| | as well as for |
| | each of our |
| | business |
| | segments. We |
| | also use |
| | segment EBT |
| | as a percentage |

of segment
operating
revenue for
each business
segment for the
same reason.

Note: FMS
EBT, DTS
EBT and SCS
EBT, our
primary
measures of
segment
performance,
are not
non-GAAP
measures.

Fuel: We
exclude FMS,
DTS and SCS
fuel from the
calculation of
our operating
revenue
measures, as
fuel is an
ancillary
service that we
provide our
customers,
which is
impacted by
fluctuations in
market fuel
prices, and the
costs are
largely a
pass-through to
our customers,
resulting in
minimal
changes in our
profitability
during periods
of steady
market fuel
prices.
However,
profitability
may be
positively or

negatively impacted by rapid changes in market fuel prices during a short period of time, as customer pricing for fuel services is established based on trailing market fuel costs.

Subcontracted transportation:

We also exclude subcontracted transportation from the calculation of our operating revenue measures, as these services are also typically a pass-through to our customers and, therefore, fluctuations result in minimal changes to our profitability.

While our DTS and SCS business segments subcontract certain transportation services to third party providers, our FMS business segment does not engage in subcontracted transportation

and, therefore,
this item is not
applicable to
FMS.

Comparable Earnings Measures:

Comparable earnings before income tax (EBT)
Comparable earnings
Comparable earnings per diluted common share (EPS)
Comparable EPS Forecast
Comparable Tax Rate

Comparable
EBT,
comparable
earnings,
comparable
EPS,
comparable
EPS forecast
and
comparable tax
rate are
defined,
respectively, as
GAAP EBT,
earnings, EPS,
EPS forecast
and effective
tax rate, all
from
continuing
operations,
excluding (1)
non-operating
pension costs
and (2) any
other items that
are not
representative
of our business
operations. We
believe these
comparable
earnings
measures
provide useful
information to
investors and
allow for better
year-over-year
comparison of
operating
performance.

Non-Operating
Pension Costs:
Our

comparable earnings measures exclude non-operating pension costs, which include the amortization of net actuarial loss, interest cost and expected return on plan assets components of pension and postretirement costs. We exclude non-operating pension costs because we consider these to be impacted by financial market performance and outside the operational performance of our business.

Other Significant Items: Our comparable earnings measures also exclude other significant items that are not representative of our business operations as detailed in the reconciliation on pages 17-22 of the Press Release furnished as

Exhibit 99.1 to this Report on Form 8-K. These other significant items vary from period to period and, in some periods, there may be no such significant items.

Calculation of comparable tax rate: The comparable provision for income taxes is computed using the same methodology as the GAAP provision for income taxes. Income tax effects of non-GAAP adjustments are calculated based on the statutory tax rates of the jurisdictions to which the non-GAAP adjustments relate.

Comparable Earnings Before Interest, Taxes, Depreciation and Amortization (comparable EBITDA)

Comparable EBITDA is defined as earnings from continuing operations, net of tax, first adjusted to exclude the following items, all from continuing operations: (1) non-operating pension costs and (2) any other items that are not representative of our business operations (these items are the same items that are excluded from comparable earnings measures for the relevant periods and are described under Comparable Earnings Measures above) and then adjusted further for (1) interest expense, (2) income taxes, (3) depreciation, (4) losses from used vehicle fair value adjustments and (5) amortization.

We believe comparable EBITDA provides investors with useful information, as it is a standard measure commonly reported and widely used by analysts, investors and other interested parties to measure financial performance and our ability to service debt and meet our payment

obligations. In addition, we believe that the inclusion of comparable EBITDA provides consistency in financial reporting and enables analysts and investors to perform meaningful comparisons of past, present and future operating results. Other companies may calculate comparable EBITDA differently; therefore, our presentation of comparable EBITDA may not be comparable to similarly-titled measures used by other companies.

Comparable EBITDA should not be considered as an alternative to earnings from continuing operations before income taxes or earnings from continuing operations determined in accordance with GAAP, as an indicator of the Company's operating performance, as an alternative to cash flows from operating activities, determined in accordance with GAAP, as an indicator of cash flows, or as a measure of liquidity. Adjusted ROC: Adjusted ROC is defined as adjusted net earnings divided

Adjusted Return on Average Capital (ROC)
Adjusted ROC Spread

by average adjusted total capital and represents the rate of return generated by the capital deployed in our business. The adjustments represent the comparable items described above which are excluded, as applicable, from the calculation of net earnings and average shareholder's equity (a component of average total capital).

Adjusted ROC Spread: Adjusted ROC spread is defined as the difference between adjusted ROC and the weighted average cost of capital.

We use adjusted ROC and adjusted ROC spread as internal measures of how effectively we use the capital invested (borrowed or owned) in our operations.

Cash Flow Measures:
Total Cash Generated
Free Cash Flow
Free Cash Flow Forecast

We consider total cash generated and free cash flow to be important measures of comparative operating performance, as our principal sources of operating liquidity are cash from operations and proceeds from the sale of revenue earning equipment. Total Cash Generated: Total cash generated is defined as the sum of (1) net

cash provided by operating activities, (2) net cash provided by the sale of revenue earning equipment and operating property and equipment, and (3) other cash inflows from investing activities. We believe total cash generated is an important measure of total cash flows generated from our ongoing business activities.

Free Cash Flow: We refer to the net amount of cash generated from operating activities and investing activities (excluding changes in restricted cash and acquisitions) from continuing operations as “free cash flow”. We calculate free cash flow as the sum of (1) net cash provided by operating activities, (2) net cash provided by the sale of revenue earning equipment and operating property and equipment, (3) other cash inflows from investing activities, less (4) purchases of property and revenue earning equipment. We believe free cash flow provides investors with an important perspective on the cash available for debt service and

for shareholders, after making capital investments required to support ongoing business operations. Our calculation of free cash flow may be different from the calculation used by other companies and, therefore, comparability may be limited.

Additional information regarding non-GAAP financial measures can be found in the Press Release and our most recent Form 10-K and Form 10-Q filed with the SEC.

The information in this Report, including Exhibit 99.1, is being furnished pursuant to Item 2.02 of Form 8-K and General Instruction B.2 thereunder and shall not be deemed to be incorporated by reference in any filing under the Securities Act of 1933 or the Securities Exchange Act of 1934, except as expressly set forth by specific reference to such filing.
