Sidebar text: "NO ONE KNOWS WHAT THE FUTURE WILL BRING, WHICH IS WHY WE THINK A WELL-BALANCED PORTFOLIO..... IS AN IMPORTANT COMPONENT IN ACHIEVING YOUR LONG-TERM FINANCIAL GOALS."

Dear  
SHAREHOLDER

Once again, I am pleased to report that over the most recent reporting period your Fund continued to provide you with monthly tax-free income and an attractive total return. For more specific information about the performance of your Fund, please see the Portfolio Managers' Comments and Performance Overview sections of this report.

With interest rates at historically low levels, many have begun to wonder whether interest rates will rise, and whether that possibility should cause them to adjust their holdings of fixed-income investments. No one knows what the future will bring, which is why we think a well-balanced portfolio that is structured and carefully monitored with the help of an investment professional is an important component in achieving your long-term financial goals. A well-diversified portfolio may actually help to reduce your overall investment risk, and we believe that municipal bond investments like your Nuveen Fund can be important building blocks in a portfolio crafted to perform well through a variety of market conditions.

I'd also like to direct your attention to the inside front cover of this report, which explains the quick and easy process to begin receiving Fund reports like this via e-mail and the internet. Thousands of Nuveen Fund shareholders already have signed-up, and they are getting their Fund information faster and more conveniently than ever. I urge you to consider joining them.

Since 1898, Nuveen Investments has offered financial products and solutions that incorporate careful research, diversification, and the application of conservative risk-management principles. We are grateful that you have chosen us as a partner as you pursue your financial goals. We look forward to continuing to earn your trust in the months and years ahead.

Sincerely,

Portfolio Managers'  
COMMENTS

Portfolio managers Paul Brennan, Tom O'Shaughnessy and Rick Huber review economic and market conditions, key investment strategies and the recent performance of the Funds. With 12 years of investment experience, Paul has managed NTC since 1999, NFC since its inception in 2001, NGK and NGO since their inceptions in 2002, and NMT and NMB since January 2003. Tom, a 20-year veteran of Nuveen, assumed portfolio management responsibility for NGX at its inception

in November 2002. Rick, who has 18 years of investment experience, took over management responsibilities for NOM in January 2003.

### WHAT FACTORS AFFECTED THE U.S. ECONOMY AND MUNICIPAL MARKET DURING THE TWELVE-MONTH PERIOD ENDED MAY 31, 2003?

The underlying economic and market conditions remained similar to those we discussed in our last shareholder report dated November 30, 2002. We believe the most influential factors affecting the performance of the U.S. economy and the municipal market continued to be the sluggish pace of economic growth and interest rates that remained at 40-year lows. At the same time, continued geopolitical concerns, centering on the threat of terrorism and the Iraqi situation, also had an impact during this reporting period.

In the municipal market, the slow economic recovery and the continued lack of inflationary pressures during the reporting period created conditions that helped many bonds, and especially higher-rated bonds, perform well. Following a record \$357 billion of new supply in calendar year 2002, municipal issuance nationwide remained strong during the first five months of 2003, with \$145.6 billion in new municipal securities, up 14% over the same period in 2002. Much of this increase in supply reflects issuance intended to address fiscal problems facing states and localities as the result of slow economic growth, rising costs (especially for healthcare and pensions) and sharp declines in tax collections. Given the relatively low interest rate environment, many states and local governments have turned to borrowing in order to close budget gaps, fund needed capital projects and free up cash for operating purposes.

The heavy supply of municipal bonds was met with evidence of continued strong demand over most of this reporting period, as the record issuance was absorbed without a significant decline in prices. Both individual and institutional investors were active buyers.

### HOW WERE ECONOMIC AND MARKET CONDITIONS IN CONNECTICUT AND MASSACHUSETTS?

Despite weak employment trends and a heavy debt load, Connecticut remained a high-wealth state with a diverse economy. Although we saw some growth in the biopharmaceutical industry, the main drivers of the state's economy--financial services, insurance and manufacturing--remained weak, with continued layoffs and job losses. Even with a contraction in the labor force, unemployment continued to climb, reaching 4.9% in May 2003, up from 4.2% in May 2002 but still well below the current national average of 6.1%. Connecticut continued to experience budgetary pressures due mainly to a steep drop in tax collections. In February 2003, the state exhausted its reserves and used a number of one-time resources to close an \$817 million gap in the fiscal 2002 budget. That left Connecticut with few means to resolve the state's \$1 billion deficit for fiscal 2003, with a larger shortfall (\$2 billion) forecast for fiscal 2004. Currently, plans call for the state to cut its aid to local municipalities and transfer a portion of the

2

deficit to local governments that rely on state revenues to balance their own budgets. During the first five months of 2003, Connecticut borrowers issued \$2.3 billion in new municipal bonds, up 16% over the same period in 2002. As a result of these fiscal problems, state-issued GOs were rated Aa2/AA, with a negative outlook, by both Moody's and Standard & Poor's as of the end of the reporting period.

Like Connecticut, Massachusetts grappled with budgetary stress resulting from decreased tax revenues, aggravated by the cut in personal income taxes approved by voters in 2000. The commonwealth addressed the \$2.3 billion shortfall in the

## Edgar Filing: NUVEEN MASSACHUSETTS PREMIUM INCOME MUNICIPAL FUND - Form N-CSR

fiscal 2003 budget by cutting expenditures, drawing down on its rainy day fund, freezing a scheduled tax cut and reinstating taxes on capital gains. The commonwealth's primary growth drivers remained healthcare, education, financial services and technology. Although the manufacturing sector continued to shed jobs, area defense contractors were benefiting from increased federal spending. Massachusetts' debt burden is among the highest in the nation, largely as the result of borrowing in connection with the \$14.6 billion Central Artery/ Ted Williams Tunnel (Big Dig), which partially opened in early 2003 and is now scheduled for completion in May 2005. During the first five months of 2003, Massachusetts borrowers issued \$5.2 billion in municipal bonds, a 16.1% increase over the same period during 2002. As of May 31, 2003, Moody's rated the commonwealth Aa2 with a negative outlook, while S&P's rating was AA- with a stable outlook.

### WHAT ABOUT MISSOURI?

The Missouri economy remained weak, with job losses across its diverse industry base, including construction, wholesale trade, transportation, communications, utilities and the particularly hard-hit manufacturing sector. Job growth is expected to remain weak, largely as the result of the state's high exposure to old-line manufacturing such as automobiles. While Kansas City has become an attractive center for transportation, communications and technology, the St. Louis economy continued to perform poorly. In our opinion, Missouri's financial operations were well managed, and the state continued to maintain adequate financial flexibility, along with good reserve positions and relatively low debt levels. Although tax revenues remained soft, the state has been able to build reserve levels following a series of deep budget cuts. Municipal issuance in the state for the first five months of 2003 topped \$2.2 billion, up 51% over the same period last year, and at the end of this reporting period both Moody's and Standard & Poor's retained their Missouri credit ratings of Aaa/AAA, respectively.

- 1 The total annual returns on common share net asset value (NAV) for these Nuveen Funds are compared with the total annual return of the Lehman Brothers Municipal Bond Index, an unleveraged, unmanaged national index comprising a broad range of investment-grade municipal bonds. Results for the Lehman index do not reflect any expenses.
- 2 The total returns of these Funds are compared with the average annualized return of the 36 funds in the Lipper Other States Municipal Debt Funds category. Fund and Lipper returns assume reinvestment of dividends. It should be noted that the performance of the Lipper Other States category represents the overall average of annual returns for funds from 10 different states with a wide variety of economic and municipal market conditions and investment guidelines, making direct comparisons less applicable.
- 3 The taxable-equivalent yield represents the yield that must be earned on a taxable investment in order to equal the yield of the Nuveen Fund on an after-tax basis. The taxable-equivalent yield is based on the Fund's market yield on the indicated date and a federal income tax rate of 28% plus the applicable state income tax rate. The combined federal and state tax rates used in this report are as follows: Connecticut 31.5%, Massachusetts 32%, and Missouri 32.5%.

3

For the twelve months ended May 31, 2003, all of the Funds in this report with at least one year of performance history outperformed the national, unleveraged Lehman Brothers Municipal Bond Index. Their performances were mixed when compared with the Lipper Other States Municipal Debt Funds category. While these Lipper comparisons carry some value, we believe they have limited usefulness because the Lipper average includes the results of funds from ten different states, each with its own unique conditions and circumstances.

The performance of these Funds benefited when compared with the results of the Lehman Index from their use of leverage, a strategy that can provide the opportunity for additional income for common shareholders. Most of the Funds also were helped by their relatively long durations.<sup>4</sup> During periods of declining interest rates, such as we experienced over most of the twelve-month reporting period, longer duration investments generally would be expected to outperform shorter duration investments, assuming all other factors were equal. As of May 31, 2003, the durations of these Funds, with the exception of NTC, ranged from 8.00 to 12.29, compared with 7.80 for the Lehman index. (Please see the individual Performance Overview pages for individual Fund durations.)

In addition to leverage and duration, the relative performances of these Nuveen Funds were influenced by factors including call exposure, portfolio trading activity and the price movement of specific sectors and holdings. For example, as of May 31, 2003, NMT held 11% of its portfolio in multifamily housing bonds, down from 20% at the end of November 2002 but still the largest allocation to this sector among these eight Funds. NGX and NOM each held smaller positions in this sector (8% and 7%, respectively). For the twelve months ended May 31, 2003, the housing sector was one of the poorer performing municipal market sectors, as measured by Lehman. This was largely due to the fact that the decline in interest rates led to dramatic growth in mortgage refinancings and increased the rate of prepayments, which adversely affected both the prices and yields of housing bonds.

HOW DID THE MARKET ENVIRONMENT AFFECT THE FUNDS' DIVIDENDS AND SHARE PRICES?

As noted earlier, with short-term interest rates at historically low levels, the dividend-payment capabilities of these Funds benefited from their use of leverage. The amount of this benefit is tied in part to the short-term rates the Funds pay their MuniPreferred(R) shareholders. Low short-term rates can enable the Funds to reduce the amount of income paid to MuniPreferred shareholders, which potentially can leave more earnings to support common share dividends.

During the twelve months ended May 31, 2003, the continued low level of short-term interest rates enabled us to implement two dividend increases in NTC and NMT and one increase in NOM. As of May 2003, NFC and NMB had paid dependable, attractive dividends for 27 consecutive months, while NGK had offered shareholders steady dividends for 13 consecutive months. NGO and NGX, which were introduced in September and November 2002, respectively, declared their first monthly distributions in November 2002 and January 2003.

Over the course of this reporting period, strong demand and favorable market conditions helped to boost the share prices and net asset values of

- 4 Duration is a measure of a fund's NAV volatility in reaction to interest rate movements. Fund duration, also known as leverage-adjusted duration, takes into account the leveraging process for a fund and therefore is generally longer than the duration of the actual portfolio of individual bonds that make up the fund. References to duration in this commentary are intended to indicate fund duration unless otherwise noted.

4

these Funds. As of May 31, 2003, NTC, NFC, NMT, NMB, NGX and NOM were trading at premiums to their common share NAVs, while NGO was trading at virtually the same level as its NAV. Over the period, the NAV of NGK appreciated more rapidly than its share price, and this Fund moved from trading at a premium to a discount (see charts on individual Performance Overview pages).

WHAT KEY STRATEGIES WERE USED TO MANAGE THESE FUNDS DURING THE YEAR ENDED MAY 31, 2003?

Over this twelve-month reporting period, we continued to place strong emphasis on diversifying the portfolios, enhancing call protection and improving dividend-paying capabilities. Strategically, our main focus centered on systematically shortening the Funds' durations, which we believed would enhance our ability to control the Funds' interest rate risk and produce more consistent returns over time. Interest rate risk is the risk that the value of a Fund's portfolio will decline when market interest rates rise (since bond prices move in the opposite direction of interest rates). The longer the duration of a Fund's portfolio, the greater its interest rate risk.

In line with our duration strategy as well as the recent steepness of the municipal yield curve, we concentrated on finding value in the intermediate part of the yield curve (i.e., bonds that mature in 15 to 20 years), particularly in the newer Funds with longer durations. In many cases, bonds in this part of the curve were offering yields similar to those of longer-term bonds but, in our opinion, had less inherent interest rate risk.

In the older Funds--NTC, NMT, and NOM--larger holdings of bonds priced to near-term call dates, rather than to their maturities, also served to shorten the Funds' durations.

In general, the relatively heavy municipal bond issuance in these states created increased purchase opportunities. We looked for individual issues that we believed would perform well regardless of the future direction of interest

rates. In Connecticut, which is in the midst of a major capital improvement program for its state university system, many of the new bonds were either state-issued debt or education bonds, and we took advantage of attractively priced offerings in both sectors. Over this reporting period, the Massachusetts municipal market saw unusually heavy issuance of general obligation debt, including nearly \$1 billion in February 2003. As in Connecticut, this increased issuance presented some value investing opportunities. Each of the Connecticut and Massachusetts Funds remained heavily weighted in education bonds, while the Massachusetts Funds and NOM also had large exposures to healthcare. Education and healthcare were among the top performing Lehman revenue sectors over this reporting period.

Each of the Connecticut Funds also has invested a small portion (less than 5%) of its portfolio in bonds backed by the 1998 master tobacco settlement agreement. In recent months, the prices of these bonds weakened as the result of lawsuits involving the major tobacco companies as well as the increased issuance of such bonds by states planning to use the proceeds to help close budget gaps. Although the sector as a whole produced negative returns over this reporting period, tobacco-backed bonds have rebounded somewhat following the April payment by the Altria Group of \$2.6 billion to the 46 states covered by the

5

agreement, as well as by a number of recent legal developments favorable to the tobacco companies. As of the end of the reporting period, our strategy was to maintain our tobacco holdings while we continued to regularly evaluate the situation.

In November 2002, we introduced the Nuveen Insured Massachusetts Tax-Free Advantage Municipal Fund (NGX), which was fully invested by the end of the reporting period. As mentioned earlier, the Fund began declaring regular monthly dividends in January 2003. Although 92% of NGX's portfolio is currently invested in insured or AAA rated bonds, this Fund can invest up to 20% in uninsured investment-grade (rated BBB or higher or unrated but judged to be of equivalent quality) securities, with the goal of enhancing the Fund's dividend-paying capabilities. In addition, NGX cannot hold any bond whose income is subject to the federal alternative minimum tax (AMT). Over the past few months, we have been replacing the Puerto Rico bonds that were purchased during the initial investment phase last fall with Massachusetts-issued bonds. As of May 31, 2003, approximately 9% of NGX's portfolio was invested in Puerto Rico securities, a level that is fairly typical for a new Nuveen state municipal bond fund. We expect to continue to reduce this percentage through additional purchases of Massachusetts bonds as attractive opportunities arise.

Given the current geopolitical and economic climate, we believed that maintaining strong credit quality remained a vital requirement. As of May 31, 2003, each of the non-insured Funds offered excellent credit quality, with allocations of bonds rated AAA/U.S. guaranteed and AA ranging from 76% to 88%. As mentioned in the previous paragraph, the insured NGX holds 92% of its portfolio in AAA rated bonds and another 5% in bonds rated AA. In general, our weightings in insured and AAA bonds benefited the performance of these Funds during the past year.

WHAT IS YOUR OUTLOOK FOR THE MUNICIPAL MARKET IN GENERAL AND THESE FUNDS IN PARTICULAR?

We continue to believe the U.S. economy is slowly headed for a recovery, but one that may take longer and be less robust than some originally anticipated. As a result, we think that inflation and interest rates should remain relatively low over the near term.

## Edgar Filing: NUVEEN MASSACHUSETTS PREMIUM INCOME MUNICIPAL FUND - Form N-CSR

However, the threat of an eventual rise in interest rates remains, and we intend to keep a careful watch on the Funds' durations and holdings to modulate interest rate risk if and when rates do reverse course.

Given the budget situations in these three states, as well as their continued need for spending on infrastructure, education, and healthcare, we expect to see continued good levels of issuance. Recently, anticipation of changes to the national tax code led some to wonder about the new law's potential impact on tax-exempt investments. The final version of the 2003 tax relief law reduced, but did not eliminate, taxes on corporate dividends, and, as a result, we do not expect to see any significant impact on the demand or pricing for tax-exempt municipal bonds.

Looking at bond call exposure, the five newer Funds currently offer good levels of call protection, with call exposure ranging from zero to 3% during the remainder of 2003 and through 2004. The older Funds--NTC, NMT and, to a lesser degree, NOM -- all mark their ten-year anniversaries in 2003 and have entered that part of their life cycles

6

typically associated with an increase in bond calls. Over the recently completed reporting period, we worked to mitigate this call risk and improve the positions of these three Funds. As of May 31, 2003, the percentage of bonds eligible for calls during 2003 and 2004 was 15% in NTC and 19% in NMT, down from 18% and 26%, respectively, six months ago. In NOM, the Fund's current level of call protection--2% during 2003 and 2004--allowed us to focus on moving some calls scheduled for 2005 out to 2009-2011. The number of actual calls over the coming months will depend largely on market interest rates.

In coming months, we plan to continue to closely monitor the budgetary situations in all three states for any potential impact on credit ratings or local governments as well as any spillover effect of Medicaid/Medicare issues into the hospital sector. In NGX specifically, we plan to work on reducing the Fund's high weighting in general obligation bonds and enhancing this Fund's diversification. In NOM, because Missouri remains a very high quality issuer, we plan to continue searching for opportunities to add bonds with lower investment-grade quality ratings, which are in short supply in this state.

We believe that these Nuveen Funds can continue to serve as attractive sources of tax-free income, as well as offer considerable portfolio diversification potential. We remain convinced that these Funds are quality investments that can continue to benefit shareholders as part of a well-balanced core investment portfolio.

At least 80% of the Fund's net assets are invested in municipal securities that are either covered by Original Issue Insurance, Secondary Market Insurance or Portfolio Insurance which ensures the timely payment of principal and interest. Up to 20% of the Fund's net assets may be invested in municipal securities that are (i) either backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency securities (also ensuring the timely payment of principal and interest), or (ii) municipal bonds that are rated, at the time of investment, within the four highest grades (Baa or BBB or better by Moody's, S&P or Fitch) or unrated but judged to be of comparable quality by the Adviser.

(1) All percentages shown in the Portfolio of Investments are based on net assets applicable to Common shares.

\* Optional Call Provisions (not covered by the report of independent auditors): Dates (month and year) and prices of the earliest optional call or redemption. There may be other call provisions at varying prices at later dates.

\*\* Ratings (not covered by the report of independent auditors): Using the higher of Standard & Poor's or Moody's rating.

(DD) Security purchased on a delayed delivery basis.

FINANCIAL STATEMENTS

1. GENERAL INFORMATION AND SIGNIFICANT ACCOUNTING POLICIES

The state Funds (the "Funds") covered in this report and their corresponding Common share stock exchange symbols are Nuveen Connecticut Premium Income Municipal Fund (NTC), Nuveen Connecticut Dividend Advantage Municipal Fund (NFC), Nuveen Connecticut Dividend Advantage Municipal Fund 2 (NGK), Nuveen Connecticut Dividend Advantage Municipal Fund 3 (NGO), Nuveen Massachusetts Premium Income Municipal Fund (NMT), Nuveen Massachusetts Dividend Advantage

## Edgar Filing: NUVEEN MASSACHUSETTS PREMIUM INCOME MUNICIPAL FUND - Form N-CSR

Municipal Fund (NMB), Nuveen Insured Massachusetts Tax-Free Advantage Municipal Fund (NGX) and Nuveen Missouri Premium Income Municipal Fund (NOM). Connecticut Premium Income (NTC) and Massachusetts Premium Income (NMT) are traded on the New York Stock Exchange while Connecticut Dividend Advantage (NFC), Connecticut Dividend Advantage 2 (NGK), Connecticut Dividend Advantage 3 (NGO), Massachusetts Dividend Advantage (NMB), Insured Massachusetts Tax-Free Advantage (NGX) and Missouri Premium Income (NOM) are traded on the American Stock Exchange. The Funds are registered under the Investment Company Act of 1940, as amended, as closed-end management investment companies.

Prior to the commencement of operations of Connecticut Dividend Advantage 2 (NGK), Connecticut Dividend Advantage 3 (NGO) and Insured Massachusetts Tax-Free Advantage (NGX), each Fund had no operations other than those related to organizational matters, the initial capital contribution of \$100,275 per Fund by Nuveen Advisory Corp. (the "Adviser"), a wholly owned subsidiary of Nuveen Investments, Inc. (formerly, The John Nuveen Company), and the recording of the organization expenses (\$11,500 per Fund) and their reimbursement by Nuveen Investments, LLC (formerly, Nuveen Investments), also a wholly owned subsidiary of Nuveen Investments, Inc.

Each Fund seeks to provide current income exempt from both regular federal and designated state income taxes, and in the case of Insured Massachusetts Tax-Free Advantage (NGX) the alternative minimum tax applicable to individuals, by investing primarily in a diversified portfolio of municipal obligations issued by state and local government authorities within a single state.

The following is a summary of significant accounting policies followed by the Funds in the preparation of their financial statements in accordance with accounting principles generally accepted in the United States.

### Securities Valuation

The prices of municipal bonds in each Fund's investment portfolio are provided by a pricing service approved by the Fund's Board of Trustees. When price quotes are not readily available (which is usually the case for municipal securities), the pricing service establishes fair market value based on yields or prices of municipal bonds of comparable quality, type of issue, coupon, maturity and rating, indications of value from securities dealers and general market conditions. If it is determined that market prices for a security are unavailable or inappropriate, the Board of Trustees of the Funds, or its designee, may establish a fair value for the security. Temporary investments in securities that have variable rate and demand features qualifying them as short-term securities are valued at amortized cost, which approximates market value.

### Securities Transactions

Securities transactions are recorded on a trade date basis. Realized gains and losses from such transactions are determined on the specific identification method. Securities purchased or sold on a when-issued or delayed delivery basis may have extended settlement periods. The securities so purchased are subject to market fluctuation during this period. The Funds have instructed the custodian to segregate assets with a current value at least equal to the amount of the when-issued and delayed delivery purchase commitments. At May 31, 2003, Insured Massachusetts Tax-Free Advantage (NGX) had an outstanding delayed delivery purchase commitment of \$3,153,890. There were no such outstanding purchase commitments in any of the other Funds.

### Investment Income

Interest income, which includes the amortization of premiums and accretion of discounts for financial reporting purposes, is recorded on an accrual basis.

Notes to  
FINANCIAL STATEMENTS (continued)

Income Taxes

Each Fund is a separate taxpayer for federal income tax purposes. Each Fund intends to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its net investment income to its shareholders. Therefore, no federal income tax provision is required. Furthermore, each Fund intends to satisfy conditions which will enable interest from municipal securities, which is exempt from regular federal and designated state income taxes, and in the case of Insured Massachusetts Tax-Free Advantage (NGX) the alternative minimum tax applicable to individuals, to retain such tax-exempt status when distributed to shareholders of the Funds. All monthly tax-exempt income dividends paid during the fiscal year ended May 31, 2003, have been designated Exempt Interest Dividends.

Dividends and Distributions to Common Shareholders

Dividends from tax-exempt net investment income are declared and paid monthly. Net realized capital gains and/or market discount from investment transactions, if any, are distributed to shareholders not less frequently than annually. Furthermore, capital gains are distributed only to the extent they exceed available capital loss carryforwards.

Distributions to Common shareholders of tax-exempt net investment income, net realized capital gains and/or market discount, if any, are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with federal income tax regulations, which may differ from accounting principles generally accepted in the United States.

Preferred Shares

The Funds have issued and outstanding \$25,000 stated value Preferred shares. Each Fund's Preferred shares are issued in one Series. The dividend rate on each Series may change every seven days, as set pursuant to a dutch auction process by the auction agent, and is payable at or near the end of each rate period. The number of Preferred shares outstanding for each Fund is as follows:

	CONNECTICUT PREMIUM INCOME (NTC)	CONNECTICUT DIVIDEND ADVANTAGE (NFC)	CONNECTICUT DIVIDEND ADVANTAGE 2 (NGK)	CON

=====

Effective November 15, 2002, Connecticut Dividend Advantage 3 (NGO) issued 1,280 Series F, \$25,000 stated value Preferred shares.

Effective January 17, 2003, Insured Massachusetts Tax-Free Advantage (NGX) issued 820 Series W, \$25,000 stated value Preferred shares.

48

Derivative Financial Instruments

The Funds may invest in certain derivative financial instruments including futures, forward, swap and option contracts, and other financial instruments with similar characteristics. Although the Funds are authorized to invest in such financial instruments, and may do so in the future, they did not make any such investments during the period ended May 31, 2003.

Custodian Fee Credit

Each Fund has an arrangement with the custodian bank whereby certain custodian fees and expenses are reduced by credits earned on each Fund's cash on deposit with the bank. Such deposit arrangements are an alternative to overnight investments.

Offering Costs

Nuveen Investments, LLC has agreed to pay all Common share offering costs (other than the sales load) that exceed \$.03 per Common share for Connecticut Dividend Advantage 2 (NGK), Connecticut Dividend Advantage 3 (NGO) and Insured Massachusetts Tax-Free Advantage (NGX). Connecticut Dividend Advantage 2's (NGK), Connecticut Dividend Advantage 3's (NGO) and Insured Massachusetts Tax-Free Advantage's (NGX) share of Common share offering costs (\$69,000, \$129,330 and \$81,000, respectively) were recorded as a reduction of the proceeds from the sale of Common shares.

Costs incurred by Connecticut Dividend Advantage 2 (NGK), Connecticut Dividend Advantage 3 (NGO) and Insured Massachusetts Tax-Free Advantage (NGX) in connection with their offering of Preferred shares (\$275,590, \$761,500 and \$555,200, respectively) were recorded as a reduction to paid-in surplus.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets applicable to Common shares from operations during the reporting period. Actual results may differ from those estimates.

Build Your Wealth  
AUTOMATICALLY

SIDEBAR TEXT: NUVEEN MAKES REINVESTING EASY. A PHONE CALL IS ALL IT TAKES TO SET UP YOUR REINVESTMENT ACCOUNT.

NUVEEN CLOSED-END EXCHANGE-TRADED FUNDS DIVIDEND REINVESTMENT PLAN

Your Nuveen Closed-End Exchange-Traded Fund allows you to conveniently reinvest dividends and/or capital gains distributions in additional fund shares.

By choosing to reinvest, you'll be able to invest money regularly and automatically, and watch your investment grow through the power of tax-free compounding. Just like dividends or distributions in cash, there may be times when income or capital gains taxes may be payable on dividends or distributions that are reinvested.

It is important to note that an automatic reinvestment plan does not ensure a profit, nor does it protect you against loss in a declining market.

EASY AND CONVENIENT

To make recordkeeping easy and convenient, each month you'll receive a statement showing your total dividends and distributions, the date of investment, the shares acquired and the price per share, and the total number of shares you own.

HOW SHARES ARE PURCHASED

The shares you acquire by reinvesting will either be purchased on the open market or newly issued by the Fund. If the shares are trading at or above net asset value at the time of valuation, the Fund will issue new shares at the then-current market price. If the shares are trading at less than net asset value, shares for your account will be purchased on the open market. Dividends

and distributions received to purchase shares in the open market will normally be invested shortly after the dividend payment date. No interest will be paid on dividends and distributions awaiting reinvestment. Because the market price of shares may increase before purchases are completed, the average purchase price per share may exceed the market price at the time of valuation, resulting in the acquisition of fewer shares than if the dividend or distribution had been paid in shares issued by the Fund. A pro rata portion of any applicable brokerage commissions on open market purchases will be paid by Plan participants. These commissions usually will be lower than those charged on individual transactions.

#### FLEXIBILITY

You may change your distribution option or withdraw from the Plan at any time, should your needs or situation change. Should you withdraw, you can receive a certificate for all whole shares credited to your reinvestment account and cash payment for fractional shares, or cash payment for all reinvestment account shares, less brokerage commissions and a \$2.50 service fee.

You can reinvest whether your shares are registered in your name, or in the name of a brokerage firm, bank, or other nominee. Ask your investment advisor if his or her firm will participate on your behalf. Participants whose shares are registered in the name of one firm may not be able to transfer the shares to another firm and continue to participate in the Plan.

The Fund reserves the right to amend or terminate the Plan at any time. Although the Fund reserves the right to amend the Plan to include a service charge payable by the participants, there is no direct service charge to participants in the Plan at this time.

For more information on the Nuveen Automatic Reinvestment Plan or to enroll in or withdraw from the Plan, speak with your financial advisor or call us at (800) 257-8787.

### POLICY CHANGE

On November 14, 2002, the Board adopted a policy that allows these Funds, in addition to investments in municipal bonds, to invest up to 5% of its net assets (including assets attributable to preferred shares, if any) in tax-exempt or taxable fixed-income securities or equity securities for the purpose of acquiring control of an issuer whose municipal bonds (a) the Fund already owns and (b) have deteriorated or are expected shortly to deteriorate significantly in credit quality, provided Nuveen Advisory determines that such investment should enable the Fund to better maximize the value of its existing investment in such issuer. This policy is a non-fundamental policy of each Fund which means that it can be changed at any time by the Board of Trustees without vote of the shareholders.

### Glossary of Terms Used in this Report

**Average Annual Total Return:** This is a commonly used method to express an investment's performance over a particular, usually multi-year time period. It expresses the return (including change in NAV and reinvested dividends) that would have been necessary on an annual basis to equal the investment's actual performance over the time period being considered.

**Average Effective Maturity:** The average of all the maturities of the bonds in a fund's portfolio, computed by weighting each maturity date (the date the security comes due) by the market value of the security. This figure does not account for the likelihood of prepayments or the exercise of call provisions.

**Leverage-Adjusted Duration:** Duration is a measure of a bond or bond fund's sensitivity to changes in interest rates. Generally, the longer a bond or fund's duration, the more the price of the bond or fund will change as interest rates change. Leverage-adjusted duration takes into account the leveraging process for a Fund and therefore is generally longer than the duration of the actual portfolio of individual bonds that make up the Fund.

**Market Yield (also known as Dividend Yield or Current Yield):** An investment's current annualized dividend divided by its current market price.

**Net Asset Value (NAV):** A fund's NAV is calculated by subtracting the liabilities of the fund from its total assets and then dividing the remainder by the number of shares outstanding. Fund NAVs are calculated at the end of each business day.

**Taxable-Equivalent Yield:** The yield necessary from a fully taxable investment to equal, on an after-tax basis, the yield of a municipal bond investment.

-----  
Each Fund intends to repurchase shares of its own common or preferred stock in the future at such times and in such amounts as is deemed advisable. No shares were repurchased during the period ended May 31, 2003. Any future repurchases

will be reported to shareholders in the next annual or semiannual report.

Serving Investors  
FOR GENERATIONS

Since 1898, financial advisors and their clients have relied on Nuveen Investments to provide dependable investment solutions. For the past century, Nuveen Investments has adhered to the belief that the best approach to investing is to apply conservative risk-management principles to help minimize volatility.

Building on this tradition, we today offer a range of high quality equity and fixed-income solutions that are integral to a well-diversified core portfolio. Our clients have come to appreciate this diversity, as well as our continued adherence to proven, long-term investing principles.

Managing \$80 billion in assets, Nuveen Investments offers access to a number of different asset classes and investing solutions through a variety of products. Nuveen Investments markets its capabilities under four distinct brands: Nuveen, a leader in tax-free investments; NWQ, a leader in value-style equities; Rittenhouse, a leader in growth-style equities; and Symphony, a leading institutional manager of market-neutral alternative investment portfolios.
