Notes to Condensed Financial Statements

March 31, 2001 and 2000 (Unaudited)

(1) Basis of Presentation

The accompanying unaudited financial statements have been prepared in accordance with the requirements of Form 10-Q and, therefore, do not include all information and footnotes which would be presented were such financial statements prepared in accordance with generally accepted accounting principles for annual financial statement purposes. These statements should be read in conjunction with the audited financial statements presented in the Company's Form 10-K for the year ended December 31, 2000. In the opinion of management, the accompanying financial statements reflect all adjustments which are necessary for a fair presentation of the results for the interim periods presented. Such adjustments consisted only of normal recurring items. The results of operations for the three months ended March 31, 2001 are not necessarily indicative of results to be expected for the full year.

(2) Inventories

Inventories at March 31, 2001 and December 31, 2000 consist of:

	2001	2000
	-----	-----
Raw materials	\$1,259,153	1,082,829

(4) Earnings (Loss) per Share

Basic earnings (loss) per share are net earnings (loss) divided by the weighted average number of common shares outstanding during the period, and diluted earnings (loss) per share are net earnings (loss) divided by the sum of the weighted average plus an incremental number of shares attributable to outstanding options. Options representing 107,111 shares were not included in the diluted loss calculations for the three months ended March 31, 2001 and 2000 because their effect was antidilutive.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of Operations ----- (Unaudited)	Three Months Ended March 31, ----- 2001 2000 ----- (amounts in thousands)	
Net sales by division:		
Swiss American	\$ 6,414	\$ 4,276
Royal-Angelus	1,325	1,651

Total	\$ 7,739	\$ 5,927
	=====	=====
Sales in thousands of pounds by division:		
Swiss American	4,532	2,967
Royal-Angelus	2,659	3,322

Forward-Looking Statements -----

The following discussion may contain "forward-looking statements" that express or imply expectations of future performance, developments or occurrences. Actual events may differ materially from these expectations due to uncertainties relating to the economy, competition, demand, commodities, credit markets, energy supplies and other factors.

Swiss American Sausage Co. Meat Division -----

Sales by the processed meat division increased about 50% in dollars and 53% in pounds in the 1st three months of 2001 over the same period in 2000. Sales in dollars increased proportionately less than in pounds, in spite of increasing meat prices, because much of the sales increase related to products which normally sell for lower prices per pound. Swiss operated at a \$324,933 profit in the 1st quarter of 2001 compared to a \$268,628 loss for the 1st quarter of 2000. The profit improvement resulted from increased sales and increased margins.

Royal-Angelus Macaroni Company Pasta Division -----

The pasta division's sales decreased about 20% in both dollars and pounds in the 1st quarter of 2001 compared to the 1st quarter of 2000. Royal operated at a \$173,653 loss for the 1st quarter of 2001 compared to an \$18,621 profit for the

Edgar Filing: PROVENA FOODS INC - Form 10-Q

1st quarter of 2000. Sales and operating results were both adversely affected by competition resulting from increased industry capacity, but most of the loss occurred in January 2001, when production was shut down on five days due to electric utility power interruptions. The pasta division has added a manager and intensified its efforts in sales and marketing.

-5-

The Company

Company sales were up about 31% and the Company realized nominal net earnings in the 1st quarter of 2001 compared to a net loss of \$232,930 for the 1st quarter of 2000. Swiss accounted for the increased sales and the improvement in earnings. The Company's gross profit margin for the 1st quarter of 2001 was 11.8% compared to 6.8% a year ago. The Company's margin increased because Swiss's margin increased, with Royal's margin down as a result of sales decreasing proportionately more than production costs.

General and administrative expenses were up about \$60,000 for the 1st quarter of 2001 compared to the same period in 2000, primarily from increased health benefit costs offset by reduced printing expense and bad debt expense at Swiss. Distribution expenses were up about \$45,000 because of increased freight on increased sales at Swiss with smaller increases for advertising, liability insurance and Royal label design costs. Net interest expense increased about \$34,000 because of higher borrowings under the bank line of credit. Other income increased because of the recovery and sale of waste products at Swiss.

Meat plant employees are represented by United Food and Commercial Workers Union, Local 588, AFL-CIO, CLC under a collective bargaining agreement which expires March 31, 2002. Pasta plant employees are represented by United Food and Commercial Workers Union, Local 1428, AFL-CIO, CLC under a collective bargaining agreement which expires September 29, 2002. There has been no significant labor unrest at the Company's plants and the Company believes it has a satisfactory relationship with its employees.

Liquidity and Capital Resources

The Company has generally satisfied its normal working capital requirements with funds derived from operations and borrowings under its bank line of credit, which is part of a credit facility with Comerica Bank-California. The line of credit is payable on demand, is subject to annual review, and bears interest at a variable annual rate of 0.75% over the bank's "Base Rate." The maximum amount of the line of credit is the lesser of \$3,000,000, or 30% of inventories plus 80% of receivables, determined monthly. At March 31, 2001 the "Base Rate" was 8.0% per annum and 30% of inventories plus 80% of receivables was \$3,107,316. At March 31, 2001 the Company had \$3,375,885 of borrowings under the bank line of credit, representing an over-advance by the bank in anticipation of receipt of an income tax refund.

As part of the credit facility, Comerica Bank-California issued a \$4,060,000 letter of credit to support \$4,000,000 of industrial development bonds issued in 1998 for costs relating to the construction of the Company's new meat plant. The bonds bear a variable rate of interest payable monthly and set weekly at a market rate - 3.45% per annum at March 31, 2001. The Company pays a 1.5% per annum fee on the amount of the letter of credit and fees of the bond trustee estimated at 0.5% of the bond principal per year. Monthly payments of bond principal into a sinking fund began May 1, 2000, total \$76,700 the first year and increase about 5.6% each year until May 1, 2022, when \$813,500 of remaining principal is payable in 18 equal monthly payments.

-6-

Also as part of the credit facility, the bank made four loans to the Company for the new meat plant, a \$1,280,000 real estate loan and three equipment loans totalling \$2,614,788. The real estate loan was made in December 1999, bears a fixed rate of interest of 9.1% per annum and is payable in equal monthly payments of principal and interest over its 25 year term. Each equipment loan bears a variable rate of interest and is payable in equal monthly payments of principal plus interest over its term, with issue date, initial amount, term and rate as follows: July 1999, \$1,000,000, 7 year, bank's "Base Rate"; September 1999, \$1,200,000, 7 year, bank's "Base Rate" plus 0.25%; and December 1999, \$414,788, 5 year, bank's "Base Rate" plus 0.75%.

All parts of the credit facility are secured by substantially all of the Company's assets, including accounts receivable, inventory, equipment and fixtures, the Company's two Chino buildings and the new meat plant, none of which is otherwise encumbered. The credit facility prohibits mergers, acquisitions, disposal of assets, borrowing, granting security interests, and changes of management and requires a tangible net worth greater than \$9,000,000, a debt to tangible net worth ratio less than 2, a quick ratio greater than 0.45, and cash flow coverage greater than 1.30. The Company was in default under the quick-asset-ratio covenant at March 31, 2001 and the bank has waived the default. The Company expects to be in compliance with all covenants at June 31, 2001.

Cash decreased \$46,686 in the 1st quarter of 2001 compared to a \$589,794 decrease in the 1st quarter of 2000. Operating activities used \$498,429 of cash primarily from an increase in inventories, augmented by an increase in prepaid expenses and a decrease in accrued liabilities, and partially offset by depreciation and amortization and an increase in accounts payable. Inventories increased because of increased sales and increasing meat costs. Investing activities used \$44,323 of cash for modest additions to property and equipment, and financing activities produced \$496,066 of cash primarily from borrowings under the bank line reduced by payments on long term debt and dividends.

The Company expects that its operations and bank line of credit will provide adequate working capital to satisfy the normal needs of its operations for the foreseeable future, including cash flow to service the debt incurred to finance the new meat plant. The 1st quarter usually requires higher cash expenditures than any other quarter because of annual retirement benefit contributions and initial insurance premiums, and cash flow during the 1st quarter of 2001 was tighter than most because of almost \$300,000 of debt service and over \$600,000 of inventory buildup. Not only has the Company, with the help of Comerica Bank-California, met the cash flow demands of the 1st quarter, but Swiss has shown that it can earn a profit after the depreciation and interest expense arising from the new plant.

The Company believes that it has a good relationship with Comerica Bank-California, as evidenced by the bank making an over-advance on the line of credit to ease cash flow tensions and waiving a default under the financial covenants. That relationship is crucial to the Company, because the line of credit is payable on demand, the Company could not make an immediate repayment of the line of credit, and a failure to repay the line after demand would render the entire credit facility in default. As a result, neither a default under a financial covenant nor the bank's waiver of it affects the bank's power to cause the credit facility to be

-7-

Edgar Filing: PROVENA FOODS INC - Form 10-Q

in default and require that it be restructured or refinanced. The Company regards the financial covenants as check-points triggering a review by the bank, and the bank's waiver as an indication of its current intention to maintain the credit facility.

New Accounting Standards

The Financial Accounting Standards Board issued Statement of Financial Accounting Standards ("SFAS") No. 133, "Accounting for Derivative Instruments and Hedging Activities" in June 1998. SFAS No. 133, as amended by SFAS Nos. 137 and 138, is effective for all fiscal quarters of fiscal years beginning after June 15, 2000. The Securities and Exchange Commission issued Staff Accounting Bulletin ("SAB") No. 101, "Revenue Recognition in Financial Statements" in December 1999. SAB No. 101, as amended by SAB Nos. 101A and 101B, is effective no later than the 4th quarter of fiscal years beginning after December 15, 1999. Application of these standards did not have a material effect on the information presented or the Company's results of operations.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

The industrial development bonds, the bank line of credit, and the equipment loans bear variable rates of interest (see Liquidity and Capital Resources under Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations) which tend to follow market interest rates and change the Company's interest expense in the same direction as changes in interest rates. A 1% per annum change in the rate borne by the industrial development bonds would change annual interest expense by almost \$40,000. Assuming an average bank line of credit balance of \$3,000,000 plus \$1,900,000 average principal balance of equipment loans, a 1% per annum change in the rate borne by those borrowings would change annual interest expense by \$49,000.
