RADVISION Enhances IBM Lotus Sametime with Multiparty Audio and Video Using SCOPIA High Definition Conferencing Platform

Monday January 21, 8:00 am ET

RADVISION's SCOPIA Solution for IBM Lotus Sametime to be Demonstrated at IBM Lotusphere

ORLANDO, Fla. & TEL AVIV, Israel--(BUSINESS WIRE)--RADVISION(R) Ltd. (Nasdaq: RVSN - News), a leading provider of video network infrastructure and developer tools for unified visual communications over IP, 3G, and emerging next-generation IMS networks, today announced that its SCOPIA Conferencing Platform will support IBM Lotus Sametime.

RADVISION's SCOPIA Conferencing Platform with SCOPIA Desktop will bring advanced conferencing capability to IBM's next generation unified communications and collaboration platform enhancing the instant messaging and conferencing capabilities of Lotus Sametime by enabling users to create and initiate multiparty audio and video conferences directly from within Lotus Sametime. By adding RADVISION's unique video and audio plug-in to Lotus Sametime, users can easily escalate Lotus Sametime instant messaging chat sessions into full multiparty audio and video sessions on their PC and extend those conferences to other devices such as room based video conferencing systems, 3G videophones or virtually any telephone available today.

SCOPIA Conferencing Platform's high definition capabilities allow mixed conferences of HD video systems, standard definition video systems and video from desktops in the same call without requiring all participants to downgrade to their common capabilities. Each user participates in the conference at the highest capability available to them. SCOPIA provides the most affordable and flexible platform in the market with support for HD, standard definition, desktop, and 3G in a single solution with pricing and capacity optimized for each conferencing application.

SCOPIA Desktop builds upon the technology of RADVISION's Click to Meet solution for Lotus Sametime with the enhanced HD and high performance media processing capabilities of the SCOPIA Conferencing Platform underneath. These new

## Edgar Filing: RADVISION LTD - Form 6-K

capabilities provide a high quality conferencing experience even with limited bandwidth applications when viewing multiple participants simultaneously within Sametime.

"Integrating the advanced media processing capabilities of the SCOPIA Conferencing Platform into Lotus Sametime brings another dimension of conferencing to the Sametime unified communications environment," said Bob Romano, Vice President Enterprise Marketing. "Now Sametime users can have mixed conferences with virtually any type of device including the latest High Definition products on the market without requiring any of those devices to sacrifice quality."

RADVISION will be demonstrating the SCOPIA Conferencing Platform for Lotus Sametime at the Lotusphere 2008 Product Showcase in Orlando - booth 302 opening today.

### About RADVISION

RADVISION (Nasdaq: RVSN - News) is the industry's leading provider of market-proven products and technologies for unified visual communications over IP, 3G and IMS networks. With its complete set of standards-based video networking infrastructure and developer toolkits for voice, video, data and wireless communications, RADVISION is driving the unified communications evolution by combining the power of video, voice, data and wireless - for high definition video conferencing systems, innovative converged mobile services, and highly scalable video-enabled desktop platforms on IP, 3G and emerging next-generation IMS networks. For more information about RADVISION, visit [www.radvision.com](http://www.radvision.com).

RADVISION Selected as Unified Visual Communications Company  
of the Year 2007 by Industry Analyst VC Insight

Tuesday January 29, 9:15 am ET

RADVISION Wins Awards from VC Insight; SCOPIA(R) Desktop and the SCOPIA V5.5  
Portfolio Recognized as Some of the Best New Video Conferencing Products of the  
Year 2007

TEL AVIV, Israel--(BUSINESS WIRE)--RADVISION(R) Ltd. (Nasdaq: RVSN -  
News), a leading provider of video network infrastructure and developer tools  
for unified visual communications over IP, 3G, and emerging next-generation IMS  
networks, today announced that the company and its products have received a  
series of awards from leading industry analyst Videoconferencing (VC) Insight.

RADVISION was chosen as VC Insight's "Unified Visual Communications Company of  
the Year 2007." In the award selection, VC Insight took the user's perspective  
and looked for innovation, reliability, ease of use, and price-performance.

RADVISION made significant advances in its product line in 2007, including the  
introduction of SCOPIA V5.5 with support for advanced high definition  
capabilities and optimized capacity as well as SCOPIA Desktop, resulting in an  
award-winning portfolio. In describing RADVISION, VC Insight noted, "RADVISION  
specializes in video conferencing infrastructure products. That is why Cisco  
OEMs some RADVISION products and why Sony and Aethra dealers offer RADVISION  
SCOPIA products with their excellent SD and HD endpoints. LifeSize  
infrastructure products also reflect a tie in with RADVISION. That confirms  
SCOPIA are the best infrastructure products available."

The SCOPIA Desktop Video Conferencing client was also chosen as one of "The 10  
Best New Video Conferencing Endpoints of the Year 2007." RADVISION's SCOPIA  
Desktop is a software based video conferencing endpoint which offers an  
extension of the SCOPIA conferencing platform. SCOPIA Desktop extends video  
conferencing deployments based in meeting-rooms allowing remote users to connect  
to conferences and fully participate in audio, video, and data collaboration.  
SCOPIA Desktop is a Web-based plug-in client that can be used by anyone inside  
or outside the enterprise firewall. As stated by VC Insight, "There is no  
simpler way to include many sites in distant locations in a conference between  
two or more room-based systems."

VC Insight also recognized RADVISION's SCOPIA V5.5 conferencing platform as one

## Edgar Filing: RADVISION LTD - Form 6-K

of "The Two Best New Video Network Infrastructure Products of the Year 2007." The new SCOPIA V5.5 software is a system release with significant enhancements across the product line. It provides a comprehensive and affordable solution for High Definition (HD) multipoint video conferencing, including Continuous Presence and the ability to mix HD and Standard Definition (SD) video conferencing room systems and desktops in the same call without all participants downgrading to their common capabilities.

"RADVISION's innovation and attention to customer needs has captured our attention again, and we have selected them as the Unified Visual Communications Company of the Year 2007 as we did for the Year 2006," said Richard Line, Editor of VC Insight. "We like the high quality HD multipoint experience that the SCOPIA platform provides at an affordable price and the convenient way of connecting a remote or mobile worker to a video meeting."

"RADVISION has made significant advances in its product line in 2007 addressing real customer issues in deploying unified visual communications. We invite all those deploying unified communications solutions to take a serious look at our offerings," said Bob Romano, VP Enterprise Marketing for RADVISION. "We are pleased to be recognized across our solution portfolio by VC Insight."

RADVISION Receives INTERNET TELEPHONY(R) Magazine's 10th Annual Product of the Year Award

Thursday January 31, 9:00 am ET

RADVISION SIP Server Platform Recognized for Outstanding Innovation

TEL AVIV, Israel--(BUSINESS WIRE)--RADVISION(R) Ltd. (Nasdaq: RVSN - News), a leading provider of video network infrastructure and developer tools for unified visual communications over IP, 3G, and emerging next-generation IMS networks, today announced that Technology Marketing Corporation's (TMC(R)) INTERNET TELEPHONY magazine (www.itmag.com) has named RADVISION SIP Server Platform as a recipient of its 2007 Product of the Year Award.

RADVISION SIP Server Platform is a unique software framework for the rapid development of high performance, robust and interoperable SIP applications and services for Next Generation Networks.

"The Internet Telephony distinguished award provides an additional proof that the SIP Server Platform answers the market demand for rapid and flexible development of services" said Avishai Sharlin, General Manager of RADVISION's Technology Business Unit. "Using RADVISION's SIP Server Platform Application and Service Creation Framework developers can develop complex SIP applications in fraction of the time, and maintain their competitive edge by adding new services easily as customer demands grow."

"RADVISION has proven they are committed to quality and excellence while addressing real needs in the marketplace. INTERNET TELEPHONY is pleased to grant a 2007 Product of the Year Award to their SIP Server Platform," said Rich Tehrani, TMC President and Editor-in-Chief of INTERNET TELEPHONY magazine. "We're proud to honor their hard work and accomplishments and look forward to more innovative solutions from RADVISION in the future."

RADVISION SIP Server Platform is part of a comprehensive server solution for the development and testing of SIP Network Equipment and SIP Application Servers. RADVISION also offers custom turn key server solutions.
