AND SUBSIDIARIES

**Notes to Condensed Consolidated Financial Statements
(Unaudited)**

(1) Unaudited Financial Statements

The accompanying condensed consolidated financial statements of Navigation Technologies Corporation (the "Company") have been prepared in accordance with generally accepted accounting principles for interim financial information, the instructions to United States Securities and Exchange Commission Form 10-Q and Rule 10-01 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. These condensed consolidated financial statements should be read in conjunction with the Company's Annual Report on Form 10-K for the year ended December 31, 2001.

In the opinion of management, all adjustments (consisting of normal recurring adjustments) considered necessary for a fair presentation have been included. The results of operations for the interim periods are not necessarily indicative of the results that may be expected for the fiscal year. For further information, refer to the consolidated financial statements and accompanying notes included in the Company's Annual Report on Form 10-K for the year ended December 31, 2001.

The Company's fiscal quarterly periods end on the Sunday nearest the calendar quarter end. The 2001 and 2002 second quarters each had 91 days. The 2001 year to date had 182 days and the 2002 year to date had 181 days. The Company's fiscal year end is December 31.

Certain 2001 amounts in the condensed consolidated financial statements have been reclassified to conform to the 2002 presentation.

(2) Recent Accounting Pronouncements

In July 2001, Statement of Financial Accounting Standards ("SFAS") No. 141, "Business Combinations", and SFAS No. 142, "Goodwill and Intangible Assets", were issued. In October 2001, SFAS No. 144, "Accounting for the Impairment or Disposal of Long Lived Assets", was issued. SFAS No. 141 requires that all business combinations initiated after June 30, 2001, be accounted for using the purchase method of accounting, and prohibits the use of the pooling-of-interests method for such transactions. SFAS No. 141 also requires identified intangible assets acquired in a business combination to be recognized as an asset apart from goodwill if they meet certain criteria. The adoption of SFAS No. 141 had no impact on the Company's condensed consolidated financial statements.

SFAS No. 142 applies to all goodwill and identified intangible assets acquired in a business combination. Under the new standard, all goodwill, including that acquired before initial application of the standard, will not be amortized but must be tested for impairment at least annually. Identified intangible assets should be amortized over their estimated useful lives and reviewed for impairment in accordance with SFAS No. 144. Within six months of initial application of the new standard, a transitional impairment test must be performed on all goodwill. Any impairment loss recognized as a result of the transitional impairment test should be reported as a change in accounting principle. In addition to the transitional impairment test, the required annual impairment test should be performed in the year of adoption of SFAS No. 142. SFAS No. 142 is effective for fiscal years beginning after December 15, 2001, and must be adopted as of the beginning of a fiscal year. The adoption of SFAS No. 142 on January 1, 2002 had no impact on the Company's condensed consolidated financial statements.

**Notes to Condensed Consolidated Financial Statements
(Unaudited)**

SFAS No. 144 addresses financial accounting and reporting for the impairment or disposal of long-lived assets. While SFAS No. 144 supersedes SFAS No. 121, "Accounting for the Impairment of Long-Lived Assets and for Long-Lived Assets to Be Disposed Of", it retains many of the fundamental provisions of that Statement. SFAS No. 144 also supersedes the accounting and reporting provisions of APB Opinion No. 30, "Reporting the Results of Operations Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions", for the disposal of a segment of a business. However, it retains the requirement in Opinion 30 to report separately discontinued operations and extends that reporting to a component of an entity that either has been disposed of (by sale, abandonment, or in a distribution to owners) or is classified as held for sale. SFAS No. 144 is effective for fiscal years beginning after December 15, 2001 and interim periods within those fiscal years. The adoption of SFAS No. 144 on January 1, 2002 had no impact on the Company's condensed consolidated financial statements.

Edgar Filing: NAVIGATION TECHNOLOGIES CORP - Form 10-Q

On April 30, 2002, the FASB issued SFAS No. 145, "Rescission of FASB Statements No. 4, 44, and 64, Amendment of FASB Statement No. 13, and Technical Corrections." SFAS No. 145 rescinds SFAS No. 4, which required all gains and losses from the extinguishment of debt to be aggregated and, if material, classified as an extraordinary item, net of the related income tax effect. SFAS No. 145 will be effective for fiscal years beginning after May 15, 2002. The Company will adopt SFAS No. 145 on January 1, 2003, at which time the extraordinary loss on early extinguishment of debt that was incurred during 2001 will be reclassified as a component of other income (expense) in the Company's condensed consolidated statement of operations presented for 2001.

(3) Comprehensive Income (Loss)

Comprehensive income (loss) for the quarters and the six months ended July 1, 2001 and June 30, 2002, was as follows (in thousands):

	Quarter Ended		Six Months Ended	
	July 1, 2001	June 30, 2002	July 1, 2001	June 30, 2002
Net income (loss)	\$ (9,139)	1,990	(106,538)	(595)
Foreign currency translation adjustment	66	(172)	209	(183)
	\$ (9,073)	1,818	(106,329)	(778)

(4) Loss Per Share

Basic and diluted loss per share is computed based on the net loss after deducting cumulative preferred stock dividends, divided by the weighted average number of shares of common stock outstanding for the period, in accordance with SFAS No. 128, "Earnings Per Share." Options to purchase 111,609,000 and 111,709,000 shares of common stock were outstanding at July 1, 2001 and June 30, 2002, respectively. The Company granted replacement options to purchase 83,927,226 shares of common stock in connection with its stock option exchange offer on May 15, 2002. See Note 5 Stock Option Exchange Offer. Warrants to purchase 47,380,000 shares of common stock were outstanding at July 1, 2001 and June 30, 2002, respectively. There were 3,405,968.805 and 4,005,968.805 shares of Series A cumulative convertible preferred stock outstanding at July 1, 2001 and June 30, 2002, respectively. There were 42,600,002.533 shares of Series B cumulative convertible preferred stock outstanding at July 1, 2001 and June 30, 2002, respectively. These options, warrants and shares of preferred stock were not included in the computation of diluted loss per share because the effect of their inclusion would be antidilutive.

6

Notes to Condensed Consolidated Financial Statements (Unaudited)

(5) Stock Option Exchange Offer

On October 1, 2001, the Company completed an offer to substantially all employees, other than employees resident in Canada, holding stock options having an exercise price of \$0.85 or \$1.10, that would enable such holders to cancel their options in return for a promise to grant new options to purchase an equal number of shares of common stock no sooner than six months and one day after such cancellation at an exercise price equal to the fair market value on the date of grant. No options were granted to the Company's employees within six months prior to the cancellation. Pursuant to the exchange offer, options to purchase 61,210,174 shares of common stock with an exercise price of \$0.85 and options to purchase 23,199,142 shares of common stock with an exercise price of \$1.10 were canceled. The Company granted replacement options to purchase 83,927,226 shares of common stock to employees on May 15, 2002, with an exercise price equal to \$0.10 per share, which was determined to be the fair market value of the Company's common stock on the date thereof. In connection with the determination of fair market value, the Board had the assistance of an independent valuation firm, considered information provided by the Company's principal shareholders, and reviewed such other information as deemed relevant. The Company did not enter into any agreements, formal or otherwise, to compensate its employees for increases in the fair market value of the Company's common stock during the period between cancellation and the grant of the replacement awards.

(6) Notes Receivable from affiliate

The Company entered into a deposit agreement dated as of May 21, 2002, with Koninklijke Philips Electronics N.V. ("Philips"). Pursuant to the terms of the deposit agreement, the Company deposited \$4,500,000 on June 21, 2002 and \$1,000,000 on June 28, 2002 with Philips for the

Edgar Filing: NAVIGATION TECHNOLOGIES CORP - Form 10-Q

purpose of optimizing the returns on temporary excess cash. The deposits with Philips bear interest at a rate of LIBOR minus $\frac{1}{4}\%$, and had a final maturity date of July 5, 2002, at which time all amounts were required to be paid or rolled over at the Company's option.

(7) Enterprise-wide Disclosures

The Company operates in one business segment and therefore does not report operating loss, identifiable assets and/or other resources related to business segments. The Company derives its revenues from database license fees and professional services. Database licensing revenues were \$27,172,000 and \$37,614,000 for the quarters ended July 1, 2001 and June 30, 2002, respectively, and \$49,234,000 and \$67,609,000 for the six months ended July 1, 2001 and June 30, 2002, respectively. Professional services revenues were \$881,000 and \$979,000 for the quarters ended July 1, 2001 and June 30, 2002, respectively, and \$1,420,000 and \$1,769,000 for the six months ended July 1, 2001 and June 30, 2002, respectively. Revenues are attributed to North America (United States and Canada) and Europe based on the region where the related products and services are sold.

The following summarizes net revenue on a geographic basis for the quarters and the six months ended July 1, 2001 and June 30, 2002 (in thousands):

	Quarter Ended		Six Months Ended	
	July 1, 2001	June 30, 2002	July 1, 2001	June 30, 2002

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

You should read the following discussion and analysis of our financial condition and results of operations in conjunction with our condensed consolidated financial statements and the related notes thereto contained elsewhere in this document. Certain information contained in this discussion and analysis and presented elsewhere in this document, including information with respect to our plans and strategy for our business, includes forward-looking statements that involve risk and uncertainties. In evaluating these statements, you should specifically consider the various risk factors identified in Navigation Technologies' Registration Statement on Form 10, as amended, File No. 0-21323, that could cause actual results to differ materially from those expressed in such forward-looking statements.

Overview.

Navigation Technologies Corporation is a leading provider of digital map information and related software and services used in a wide range of navigation, mapping and geographic-related applications, including products and services that provide maps, driving directions, turn-by-turn route guidance, fleet management and tracking and geographic information systems. These products and services are provided to end users by our customers on various platforms, including: self-contained hardware and software systems installed in vehicles; personal computing devices, such as personal digital assistants and cell phones; server-based systems, including internet and wireless services; and paper media.

We have been unprofitable on an annual basis since our inception and as of June 30, 2002, we had an accumulated deficit of approximately \$766.3 million. Our operating expenses have generally increased as we have made investments related to the development, improvement and commercialization of our database, offset in part, by cost control efforts. We anticipate that operating expenses will continue to increase as we continue our growth and development activities, including further development and enhancement of the NAVTECH database and increasing our sales and marketing efforts. Although our revenues have grown significantly over the past three years, we may not be able to sustain these growth rates. While we have been successful in reducing our operating loss over the past three years and had an operating profit for the second quarter of 2002, we cannot assure you that we will achieve profitable operations for the 2002 fiscal year or in the future.

The market for products and services that use the NAVTECH database is evolving, and we believe that our future success depends upon the development of markets for a variety of products and services that use our database. Even if such products and services continue to be developed and marketed by our customers and gain market acceptance, we may not be able to license the database at prices that will result in our achieving and maintaining profitable operations for the 2002 fiscal year or in the future. Moreover, the market for map information is highly competitive, and competitive pressures in this area may result in price reductions for our database that could materially adversely affect our business and prospects.

A material portion of our revenues and expenses have been generated by our European operations and we expect that our European operations will account for a material portion of our revenues and expenses in the future. Substantially all of our international expenses and revenue are denominated in foreign currencies, and fluctuations in the value of these currencies in relation to the United States dollar have caused and will continue to cause dollar-translated amounts to vary from one period to another. Historically, we have not engaged in activities to hedge our foreign currency exposures and have no plans to do so in the foreseeable future. Revenues derived from our European operations during the second quarters of 2001 and 2002 accounted for approximately 65% and 70%, respectively, of our total revenue. Revenues derived from our European operations during the six months ended July 1, 2001 and June 30, 2002 accounted for approximately 65% and 70%, respectively, of our total revenue.

Critical Accounting Policies.

Our condensed consolidated financial statements are impacted by the accounting policies used and the estimates and assumptions made by management during their preparation. The significant accounting policies that most impact our condensed consolidated financial statements are those that relate to revenue recognition and database licensing and production costs.

We derive a substantial majority of our revenue from licensing our database. We also generate revenue from professional services. Revenue is recognized net of provisions for estimated uncollectible amounts. Database licensing revenue includes revenue that is associated with nonrefundable minimum licensing fees, license fees from

Edgar Filing: NAVIGATION TECHNOLOGIES CORP - Form 10-Q

from usage (including license fees in excess of the nonrefundable minimum fees) are recognized in the period in which the fees are reported by the customer to us. Prepaid licensing fees are recognized in the period in which the distributor or customer reports that it has shipped our database to the end user. Licensing arrangements including database updates are allocated to the multiple databases and recognized when Navigation Technologies ships the databases to the end users. Revenue for direct sales licensing is recognized when the database is shipped to the end user. Revenue from the sale of professional services provided on a time and material basis is recognized as the services are performed.

Since our inception we have invested significant amounts in creating and updating our database and developing related software applications for internal use. Database licensing and production costs consist of database creation and updating, database licensing and distribution, and database-related software development. Database creation and updating costs are expensed as incurred. These costs include the direct costs of database creation and validation, costs to obtain information used to construct the database, and ongoing costs for updating and enhancing the database content. Database licensing and distribution costs include the direct costs related to reproduction of the database for licensing and per-copy sales and shipping and handling costs. Database-related software development costs consist primarily of costs for the development of software as follows: (i) applications used internally to improve the effectiveness of database creation and updating activities, (ii) enhancements to internal applications that enable our core database to operate with emerging technologies, and (iii) applications to facilitate customer use of our database. Costs of internal-use software are accounted for in accordance with AICPA Statement of Position No. 98-1, "Accounting for the Costs of Computer Software Developed or Obtained for Internal Use." Accordingly, certain application development costs relating to internal-use software have been capitalized and are being amortized on a straight-line basis over the estimated useful lives of the assets, generally five years. Research and development activities are expensed as incurred.

Results of Operations.

Comparison of second quarter of 2001 to second quarter of 2002

Revenues. Our total revenues increased 37.4% from \$28.1 million during the second quarter of 2001 to \$38.6 million during the second quarter of 2002. The increase in total revenues was due to a significant increase in revenues from database licensing, which resulted primarily from increased sales to existing customers. Growth was strong in all geographic regions in 2002, as North American revenues increased 18.2% from \$9.9 million during the second quarter of 2001 to \$11.7 million during the second quarter of 2002, and European revenues increased 47.8% from \$18.2 million during the second quarter of 2001 to \$26.9 million during the second quarter of 2002. European revenue was positively affected by the strengthening economy in the second quarter of 2002. Foreign currency translation increased revenues within the European operations by \$2.1 million during the second quarter of 2002 due to the strengthening of the Euro. Approximately 36% of our revenues during the second quarter of 2001 came from two customers (accounting for 24% and 12% of total revenues, respectively), while approximately 33% of our revenues during the second quarter of 2002 came from two customers (accounting for 20% and 13% of total revenues, respectively).

Database Licensing and Production Costs. Database licensing and production costs increased slightly (1.0%) from \$21.6 million during the second quarter of 2001 to \$21.8 million during the second quarter of 2002. This increase was due primarily to our continued investment in updating, improving, and maintaining the coverage of our database in both North America and Europe, offset, in part, by continued cost control efforts. In addition, we incurred and capitalized \$2.2 million and \$2.5 million of development costs for internal-use software during the second quarters of 2001 and 2002, respectively.

Selling, General and Administrative Expenses. Selling, general and administrative expenses decreased 7.7% from \$15.5 million during the second quarter of 2001 to \$14.3 million during the second quarter of 2002. This decrease was due primarily to continued cost control efforts, offset in part, by additional spending on improving our infrastructure to support future growth.

Other Income and Expense. Interest expense increased from \$0.1 million during the second quarter of 2001 to \$0.3 million during the second quarter of 2002. The increase was due primarily to the increase in interest expense on refundable deferred licensing advances.

Operating Income (Loss), Net Income (Loss) and Net Loss Per Share of Common Stock. Our operating results improved from an operating loss of \$(9.0) million during the second quarter of 2001 to operating income of \$2.4 million during the second quarter of 2002, due primarily to the operating leverage generated by our revenue growth and cost control efforts in 2002. Our net income (loss) of \$(9.1) million during the second quarter of 2001 changed to net income of \$2.0 million during the second quarter of 2002, as a result of the improved operating results of our core business. Basic and diluted net loss per share of common stock was \$(0.09) per share for both the second quarter of 2001 and the second quarter of 2002. The basic and diluted net loss per share amounts reflect the impact of cumulative preferred stock dividends of \$28.1 million and \$36.8 million during the second quarter of 2001 and 2002, respectively, on the preferred stock issued to Koninklijke Philips Electronics N.V. ("Philips") in exchange for the extinguishment of debt during the first quarter of 2001.

Edgar Filing: NAVIGATION TECHNOLOGIES CORP - Form 10-Q

Comparison of the six months ended July 1, 2001 and June 30, 2002

Revenues. Our total revenues increased 36.9% from \$50.7 million during the six months ended July 1, 2001 to \$69.4 million during the same period in 2002. The increase in total revenues was due to a significant increase in revenues from database licensing, which resulted primarily from increased sales to existing customers. Growth was strong in all geographic regions in 2002, as North American revenues increased 17.0% from \$17.6 million during the six months ended July 1, 2001 to \$20.6 million during the same period in 2002, and European revenues increased 47.4% from \$33.1 million during the six months ended July 1, 2001 to \$48.8 million during the same period in 2002. European revenue was positively affected by the strengthening economy in the first half of the 2002. Foreign currency translation increased revenues within the European operations by \$1.1 million during 2002 due to the strengthening of the Euro. Approximately 32% of our revenues during the six months ended July 1, 2001 came from two customers (accounting for 21% and 11% of total revenues, respectively), while approximately 31% of our revenues during the six months ended June 30, 2002 came from two customers (accounting for 20% and 11% of total revenues, respectively).

Database Licensing and Production Costs. Database licensing and production costs increased slightly (1.0%) from \$41.3 million during the six months ended July 1, 2001 to \$41.7 million during the same period in 2002. This increase was due primarily to our continued investment in updating, improving, and maintaining the coverage of our database in both North America and Europe, offset in part, by continued cost control efforts. In addition, we incurred and capitalized \$4.6 million and \$5.1 million of development costs for internal-use software during the six months ended July 1, 2001 and June 30, 2002, respectively.

Selling, General and Administrative Expenses. Selling, general and administrative expenses decreased 4.2% from \$28.7 million during the six months ended July 1, 2001 to \$27.5 million during the same period in 2002. This decrease was due primarily to continued cost control efforts, offset in part, by additional spending on improving our infrastructure to support future growth.

Other Income and Expense. Interest expense decreased from \$17.4 million during the six months ended July 1, 2001 to \$0.5 million during the same period in 2002. The decrease was due primarily to the reduction of our indebtedness during the first quarter of 2001 through the exchange of shares of our Series A and Series B preferred stock for our outstanding borrowings from Philips.

Operating Income (Loss), Net Loss and Net Loss Per Share of Common Stock. Our operating results improved from an operating loss of \$(19.3) million during the six months ended July 1, 2001 to operating income of \$0.2 million during the same period in 2002, due primarily to the operating leverage generated by our revenue growth and cost control efforts in 2002. Our net loss decreased from \$(106.5) million during the six months ended July 1, 2001 to \$(0.6) million during the same period in 2002, as a result of the improved operating results, the non-recurring nature of the \$69.6 million extraordinary loss from the early extinguishment of debt we incurred in the first quarter of 2001 in connection with the exchange of the shares of our preferred stock for the cancellation of our outstanding indebtedness to Philips, and the corresponding reduction in interest expense caused by the debt extinguishment. Basic and diluted net loss per share of common stock before extraordinary item was \$(0.16) per share for the six months ended July 1, 2001 as compared to \$(0.18) per share for the same period in 2002. This change reflects the impact of cumulative preferred stock dividends of \$28.1 million and \$71.4 million during the six months ended July 1, 2001 and June 30, 2002, respectively, on the preferred stock issued to Philips in exchange for the extinguishment of debt during the first quarter of 2001. This impact was partially offset by reduced operating loss and reduced interest expense in 2002. Including the extraordinary loss on the early extinguishment of debt, basic and diluted net loss per share of common stock decreased from \$(0.34) for the six months ended July 1, 2001 to \$(0.18) for the same period in 2002.

Liquidity and Capital Resources.

We historically have financed our operations through private placements of equity securities, borrowings from Philips and through cash generated from operating revenue. As of June 30, 2002, cash and cash equivalents totaled \$4.8 million. We entered into a deposit agreement dated as of May 21, 2002, with Philips. Pursuant to the terms of the deposit agreement, we deposited \$4.5 million on June 21, 2002 and \$1.0 million on June 28, 2002 with Philips for the purpose of optimizing the returns on temporary excess cash. The deposits with Philips' of \$5.5 million bear interest at a rate of LIBOR minus $\frac{1}{4}\%$, and had a final maturity date of July 5, 2002, at which time all amounts were required to be paid or rolled over at our option.

Historically, we have been substantially dependent upon Philips for funding. We entered into a stock purchase agreement with Philips dated as of March 29, 2001, pursuant to which Philips converted an aggregate of \$443.0 million of our indebtedness to Philips into 1,695,968.805 shares of our Series A preferred stock and 42,600,002.533 shares of our Series B preferred stock. In conjunction with the closing of the stock purchase agreement, Philips purchased 710,000 additional shares of Series A preferred stock for \$7.1 million. The stock purchase agreement stipulates that Philips will provide up to \$50,000,000 of financing to us in exchange for the issuance of Series A cumulative convertible stock

Edgar Filing: NAVIGATION TECHNOLOGIES CORP - Form 10-Q

until such time as the Series A preferred stock converts to common stock pursuant to its terms. As of June 30, 2002, 994,031 shares of our Series A Preferred Stock remain available, subject to call, for an aggregate purchase price of \$9.9 million.

Credit Facility

On March 28, 2002 we obtained a bank line of credit maturing one year from the date thereof. Pursuant to the terms of the line of credit, we may borrow up to \$15.0 million at an interest rate of either LIBOR plus 30 basis points or the prime rate at our option. The line of credit is secured by an unconditional and irrevocable guarantee issued by Philips. Pursuant to the terms of the line of credit, we paid Philips \$18,750 in connection with such guarantee and made a counter guarantee in favor of Philips with respect to any amounts incurred by Philips in connection with the Philips guarantee. We are also required to pay to the bank a commitment fee of 13 basis points per annum on the average daily unused amount during each quarter. As of June 30, 2002, there have been no borrowings on the line of credit.

As of June 30, 2002, we believe that our current cash resources on hand, operating revenues and available sources of financing (including amounts that we may raise by issuing additional shares of Series A preferred stock to Philips or by borrowing on our line of credit) will satisfy our anticipated working capital needs and capital expenditure requirements at our current level of operations for at least 12 months. After that, we expect that we will require additional funds to support our working capital and other requirements at our current level of operations and may seek to raise additional funds from public or private equity issuances, debt financings or other sources. We cannot assure you that additional financing will be available on a timely basis, on terms acceptable or favorable to us, or at all. If such financing is not available, we may be required to delay implementation of our current business plan or to modify our business plan to curtail operations.

Cash flow comparison of the six months ended July 1, 2001 and June 30, 2002

For the six months ended July 1, 2001, net cash used in operating activities was \$15.1 million. For the six months ended June 30, 2002, net cash provided by operating activities was \$4.7 million. The decrease in cash used in operating activities reflects primarily the effect of the reduced operating loss due primarily to improved operating leverage.

Net cash used in investing activities for the six months ended July 1, 2001 was \$7.4 million compared with \$7.9 million during the same period in 2002. Increased investments in software developed for internal use and a net increase in cash management loans made to Philips were offset by reduced investments in property and equipment.

For the six months ended July 1, 2001, cash provided by financing activities was \$26.5 million while minimal cash was provided by financing activities during the same period in 2002. Loans from Philips provided \$16.6 million and sales of our Series A preferred stock to Philips accounted for \$17.1 million of cash from financing activities during the six months ended July 1, 2001, partially offset by financing costs. The repayment of a \$6.8 million refundable licensing advance reduced the net cash provided by financing activities during the six months ended July 1, 2001.

New Accounting Pronouncements.

On April 30, 2002, the FASB issued SFAS No. 145, "Rescission of FASB Statements No. 4, 44, and 64, Amendment of FASB Statement No. 13, and Technical Corrections." SFAS No. 145 rescinds SFAS No. 4, which required all gains and losses from the extinguishment of debt to be aggregated and, if material, classified as an extraordinary item, net of the related income tax effect. SFAS No. 145 will be effective for fiscal years beginning after May 15, 2002. We will adopt SFAS No. 145 on January 1, 2003, at which time the extraordinary loss on early extinguishment of debt that was incurred during 2001 will be reclassified as a component of other income (expense) in our statement of operations presented for that period.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

We invest our cash in highly-liquid cash equivalents and do not currently have investments in derivative financial instruments. We do not believe that our exposure to interest rate risk is material to our results of operations.

A material portion of our revenues and expenses have been generated by our European operations and we expect that our European operations will account for a material portion of our revenues and expenses in the future. In addition, substantially all of our expenses and revenues related to our international operations are denominated in foreign currencies, principally the euro. Historically, we have not engaged in activities to hedge our foreign currency exposure and we currently have no plans to do so in the foreseeable future. As a result, we are, and will continue to be, subject to risks related to foreign currency fluctuations, which may have a negative effect on our earnings. Based on our second

quarter of 2002 net income, a \$0.10 change in the average U.S. dollar/euro currency exchange rate (actual average rate of 0.92 euro/U.S. dollar), would have increased or decreased the Company's net income by \$0.7 million. Based on our net loss for the six months ended June 30, 2002, a \$0.10 change in the average U.S. dollar/euro currency exchange rate (actual average rate of 0.90 euro/U.S. dollar), would have increased or decreased the Company's net loss by \$1.2 million.

**PART II
OTHER INFORMATION**

Item 3. Defaults Upon Senior Securities.

(b)

As of August 13, 2002, accumulated preferred stock dividends on Navigation Technologies' Series A Preferred Stock were \$16,224,024.55 and on Navigation Technologies' Series B Preferred Stock were \$164,995,893.81, each of which are payable in additional shares of preferred stock, respectively. In accordance with the Stock Purchase Agreement dated March 29, 2001 with respect to our preferred stock, these dividends have not been declared by our Board of Directors and, therefore, are not due and payable at this time.
