¹ Total investment return is calculated assuming a purchase of a common share at the current market price on the first day and a sale at the current market price on the last day of each year reported. Dividends and distributions, if any, are assumed for purposes of this calculation to be reinvested at prices obtained under the Trust s dividend reinvestment plan. Total investment returns do not reflect brokerage commissions. Total investment returns for less than a full year are not annualized. Past performance is not a guarantee of future results.

2 Ratios calculated on the basis of income and expenses applicable to both the common and preferred shares relative to the average net assets of the common shareholders.

The information in the above Financial Highlights represents the operating performance for a common share outstanding, total investment returns, ratios to average net assets and other supplemental data, for each year indicated. This information has been determined based upon financial information provided in the financial statements and market price data for the Trust_s common shares.
