Edgar Filing: GAMMACAN INTERNATIONAL INC - Form SB-2

**Approximate date of commencement of proposed sale to the public:** As soon as practicable after this Registration Statement becomes effective.

**If any of the securities being registered on this Form are to be offered on a delayed or continuous basis pursuant to Rule 415 under the Securities Act of 1933, check the following box:**

**If this form is filed to register additional securities for an offering pursuant to Rule 462(b) under the Securities Act, please check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering:**

---

If this form is a post-effective amendment filed pursuant to Rule 462(c) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering:

If delivery of the prospectus is expected to be made pursuant to Rule 434, please check the following box:

**CALCULATION OF REGISTRATION FEES**

Title of each class of securities to be registered	Shares of Common Stock to be Registered	Proposed maximum offering price per unit (1)	Proposed maximum aggregate offering price (1)	Amount of registration fee
Common Stock, par value \$.0001 per share	16,250,000(2)	\$ 0.49	7,962,500	\$ 244.45

- (1) Estimated solely for purposes of calculation of the registration fee in accordance with Rule 457 under the Securities Act of 1933, as amended.
- (2) Consists of 16,250,000 shares of the common stock, par value \$0.0001 per share (the *Common Stock*), of the Registrant to be sold by certain selling stockholders named herein.

The Registrant hereby amends this Registration Statement on such date or dates as may be necessary to delay its effective date until the Registrant shall file a further amendment which specifically states that this Registration Statement shall thereafter become effective in accordance with Section 8(a) of the Securities Act of 1933, as amended, or until the Registration Statement shall become effective on such date as the Commission, acting pursuant to Section 8(a), may determine.

The information in this prospectus is not complete and may be changed without notice. GammaCan International, Inc. may not sell these securities until the registration statement filed with the Securities and Exchange Commission is effective. This prospectus is not an offer to sell these securities, and GammaCan International, Inc. is not soliciting offers to buy these securities, in any state where the offer or sale of these securities is not permitted

Prospectus, Subject to Completion

Dated March 29, 2007

## 16,250,000 Shares

### Common Stock

---

This is an offering (the *Offering*) of up to an aggregate of 16,250,000 shares (the *Shares*) of common stock, \$0.0001 par value, of GammaCan International, Inc., a Delaware corporation ( *we* , *us* , or *GammaCan* ), by the selling stockholders named in this prospectus (the *Selling Stockholders* ). The Shares issued by us in private placements of securities or other transactions exempt from the registration requirements of the Securities Act of 1933, as amended (the *Securities Act* ) together with warrants (the *Warrants* ) to acquire an aggregate of 16,250,000 shares of common stock.

Our common stock is quoted on the OTC Bulletin Board (the *OTCBB* ) under the symbol *GCAN.OB* . On March 26, 2007, the closing sales price of our common stock on the OTCBB was \$0.59 per share.

See **Risk Factors** beginning on page 7 for a discussion of factors that you should consider before buying shares of our common stock.

---

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

---

We will receive no proceeds from the sale of the Shares sold by the Selling Stockholders.

---

The date of this prospectus is [\_\_\_\_\_], 2007.

PROSPECTUS SUMMARY

*This summary highlights information contained elsewhere in this prospectus. This summary is not complete and does not contain all of the information that you should consider before investing in our common stock. You should carefully read the entire prospectus, especially the risks of investing in our common stock discussed under Risk Factors . Unless we state otherwise, the terms we , us , our , company , management , or similar terms collectively refer to GammaCan International, Inc., a Delaware corporation, and its subsidiary, as well as their respective predecessors. Some of the statements in this Prospectus Summary are forward-looking statements. See Special Note Regarding Forward-Looking Statements . All dollar amounts refer to US dollars unless otherwise indicated.*

Our Business

General

We are a life sciences company focused upon the development of immunotherapy and related approaches to treat cancer. To date, we have focused upon the use of intravenous immunoglobulin, or *IgG*, derived from human plasma provided by healthy donors to treat melanoma, prostate, and colon cancers. We believe that *IgG* may be the basis of more effective and efficient cancer treatment both, as mono- or combination therapy and adjuvant cancer treatments. Our business objective is to become a recognized leader in the development of immunotherapy and related approaches to treat cancer.

Based upon our research, it appears that non-specific *IgG* has anti-cancer properties. These properties appear to be due to both the immunomodulatory effects of *IgG*, as well as direct effects of certain antibody populations present in the *IgG* mixture. We have demonstrated a reduction in metastatic lesions and an improved survival in mice injected with human sarcoma or human melanoma cells when the animals were treated with *IgG*. There is also anecdotal clinical evidence suggesting that *IgG*-based therapy is efficacious in some human cancers, including melanoma, soft tissue sarcoma, and Kaposi's sarcoma. *IgG* has also been found to dramatically reduce the white blood count in chronic lymphocytic leukemia. Based upon the foregoing, we recognize that *IgG*-based therapies possess the following distinctive features as a result of an excess of thirty years of clinical experience from treating immune deficiency and autoimmune diseases as well as manufacturing know-how:

*Superior product safety - IgG is safe and non-toxic; and*

*Minimal manufacturing risk* The manufacturing process for *IgG* is well established and optimized as a result of the numerous products that have been developed from human plasma to date.

We have developed and are developing additional product candidates on the basis of our research and development to date. Our lead product candidate, *VitiGam* , is a first-in-class anti-cancer immunotherapy derived entirely from the plasma of donors with vitiligo, a benign autoimmune skin condition affecting up to 2% of the general population. We are initially utilizing *VitiGam* to target melanoma. We have demonstrated that plasma from individuals with vitiligo contains anti-melanoma activities and we are using this discovery to develop *VitiGam* for the treatment of Stage III and Stage IV melanoma. The incidence of melanoma, despite new developments in other cancers, continues to increase and has experienced little if any therapeutic progress in the last ten years. In addition to *VitiGam* , we are developing the following:

*Adjuvant therapies - IgG-based adjuvant therapies to modulate both the proliferation of cancer cells and the metastasis of tumor cells.*

*Next generation (recombinant) VitiGam* - *VitiGam* is currently manufactured as a mixture that largely consists of *IgG* molecules (antibodies of the *IgG* type). We anticipate that within that mixture, only a subset of *IgG* molecules will be responsible for the biological activity of *VitiGam* . Next generation *VitiGam* will be composed of *only the IgGs required to exert the anti-melanoma effect*, thereby creating a more effective compound. Identifying the relevant *IgGs* will also allow cost reductions.

*Cancer Vaccines Based on VitiGam* - An off-the-shelf cancer vaccine is considered a silver bullet in cancer therapy. We anticipate that based on our evolving understanding of the mechanism associated with *VitiGam* , we may be in a position to develop such a vaccine in the future.

We have embarked on a non-FDA Phase II clinical trial to test the safety and efficacy of standard (e.g., collected and manufactured from healthy donors) *IgG* in patients with three types of late stage malignancies that have failed to respond to all other standard therapies as well as certain experimental therapies. The cancers evaluated in the non-FDA, open-label Phase II trial were:

## Edgar Filing: GAMMACAN INTERNATIONAL INC - Form SB-2

melanoma, prostate, and colon cancer. Patients in the study receive standard IgG at a consistent dose every 28 days (a cycle). Patients were evaluated by standard criteria for tumor progression and other markers after three cycles, and if stable or improved, such treatment continues for three additional cycles. We expect the study to close by mid-year 2007. Results from melanoma patients are promising and can be summarized as follows:

No serious untoward effects of IgG were noted; and

One patient with melanoma (out of 8) and one with prostate cancer (out of 9) have been stable or improved at six cycles of therapy or beyond. Indeed, the melanoma patient has completed twelve cycles, after which tumor progression was noted.

In addition to the body of pre-clinical evidence accumulated using vitiligo derived plasma or IgG, observations with melanoma patients in this study provide a clinical foundation for the current plan to develop VitiGam .

We plan to file an Investigational New Drug Application, or *IND*, for VitiGam in late 2007. We believe that the FDA is well acquainted with IgG-based therapies and their non-toxic characteristics from a long history of approvals of products based on plasma.

We own a significant portfolio of patents and patent applications covering our technology and are aggressively protecting our technology developments on a worldwide basis. In addition to protecting our intellectual property, we are currently applying for a U.S. Orphan Drug Status designation for VitiGam . Orphan Drug Status is granted by the U.S. FDA to promote the development of drugs for diseases affecting less than 200,000 people in the United States. This status will provide, if granted, a seven year period of market exclusivity as well as regulatory and income tax advantages. We are continuously evaluating in-licensing and/or acquisition opportunities to broaden our product portfolio and technology base.

We are led by a highly-experienced management team knowledgeable in applying immunotherapy for the treatment of cancer. Our management team has access to an internationally recognized Scientific Advisory Board whose members are thought-leaders in their respective areas. Our Chief Scientist, Professor Yehuda Shoenfeld, M.D., FRCP, is a world-recognized immunologist and the innovator responsible for much of our IgG-based technology development and know-how.

### **Our Background**

We were incorporated under the laws of the state of Delaware on October 6, 1998 under the name of San Jose International, Inc. We engaged in several businesses and acquisition plans. On August 17, 2004, pursuant to an agreement for the purchase and sale of intellectual property between our newly formed Israeli subsidiary, GammaCan, Ltd., and ARP Biomed, Ltd. ( *ARP* ), GammaCan Ltd. completed the acquisition of ARP 's intellectual property (the *Intellectual Property* ) in consideration for the issuance to ARP of 12.5% of the common shares of GammaCan, Ltd. As a result, we own beneficially and of record 87.5% of the outstanding capital stock of our subsidiary, GammaCan, Ltd. On August 19, 2004, we changed the name of our company to GammaCan International, Inc. in the State of Delaware.

The Offering

Common stock offered	16,250,000 shares
Common stock outstanding after this offering	61,125,164 shares (1)
Use of proceeds after expenses	For general corporate purposes and working capital. See Use of Proceeds.
<u>OTC Bulletin Board Trading Symbol.</u>	GCAN.OB

(1) Assumes the exercise in full of the Warrants.

Unless otherwise indicated, the information contained in this prospectus does not give effect to the issuance of shares of our common stock upon exercise of the Warrants.

**You should rely only on the information contained in this prospectus. We have not authorized anyone to provide you with different information. We are not making an offer to sell these securities in any jurisdiction where the offer or sale is not permitted. You should assume that the information appearing in this prospectus is accurate as of the date on the front cover of this prospectus only. Our business, prospects, financial condition, and results of operations may have changed since that date.**

Edgar Filing: GAMMACAN INTERNATIONAL INC - Form SB-2

Summary Consolidated Financial Data of Gammacan International, Inc.

The following condensed statement of operations data for the years ended September 30, 2006 and 2005, and the selected balance sheet data at September 30, 2006 and 2005, are derived from our audited financial statements and the related notes. Our financial statements and the related notes as of September 30, 2006 and 2005 and for the two years then ended are included elsewhere herein. The unaudited selected statement of operations data for the three months ended December 31, 2006 and 2005, and the unaudited consolidated selected balance sheet data at December 31, 2006 and 2005, are derived from our unaudited financial statements, which have been prepared on a basis consistent with our audited financial statements except for the change in accounting for stock based compensation and the adoption of FAS 123R on October 1, 2006, and, in the opinion of management, include all adjustments, consisting of normal recurring adjustments, necessary for a fair presentation of our financial position and results of operations. The results of operations for any interim period are not necessarily indicative of results to be expected for the entire year. The following data should be read in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations and our financial statements and the related notes included elsewhere in this prospectus.

Statement of Operations Data:

	Years Ended September 30,		Period from October 6, 1998 through September 30,	Three Months Ended December 31,		Period from October 6, 1998 through December 31,
	2006	2005	2006	2006	2005	2006

## RISK FACTORS

*An investment in our common stock involves a high degree of risk. You should consider carefully the following information about these risks, together with the other information contained in this prospectus before buying shares of our common stock. Our business, prospects, financial condition, and results of operations may be materially and adversely affected as a result of any of the following risks. The trading of our common stock could decline as a result of any of these risks. You could lose all or part of your investment in our common stock. Some of the statements in Risk Factors are forward looking statements. See Special Note Regarding Forward Looking Statements .*

### Risks Related to Our Business

#### **There is substantial doubt as to our ability to continue as a going concern.**

Our financial statements were prepared on the assumption that we will continue as a going concern. If sufficient capital is not available, we would likely be required to scale back or terminate our research and development efforts. We estimate that, as a result of the 2007 Private Placement, our cash reserves will be sufficient to permit us to continue our anticipated level of operations for at least 10 months from the date of this prospectus. However, we plan to increase research and development, product development, and administrative expenses relating to our business during 2007 and 2008, including expenses related to research and development related to our IgG technology. We intend to use these resources, as well as others in the event that they shall be available on commercially reasonable terms, to fund these activities and other activities described herein, although we can provide no assurance that these additional funds will be available in the amounts or at the times we may require. See Risk Factors We will need additional capital in order to satisfy our business objectives .

#### **As we have a limited operating history, investors may not have a sufficient history on which to base an investment decision.**

Although we were incorporated in 1998, we acquired our operating subsidiary in August 2004 and are in the development stage. Accordingly, we have a limited operating history upon which investors may evaluate our prospects for success. Investors must consider the risks and difficulties frequently encountered by early stage companies, particularly in rapidly evolving markets such as the life science industry. Such risks include, without limitation, the following:

competition;

need for acceptance of products;

ability to anticipate and adapt to a competitive market and rapid technological developments;

amount and timing of operating costs and capital expenditures relating to expansion of our business, operations, and infrastructure; and

dependence upon key personnel.

We cannot be certain our strategy will be successful or that we will successfully address these risks. In the event that we do not successfully address these risks, our business, prospects, financial condition, and results of operations could be materially and adversely affected. Information regarding all of our past operations can be found in our reports and registration statements that have been previously filed with the Securities and Exchange Commission.

#### **We are a development stage company with a history of losses and can provide no assurance as our future operating results.**

We are a development stage company with no revenues from our contemplated principal business activity. Consequently, we have incurred net losses and negative cash flows since inception. We currently have no product revenues, and may not succeed in developing or commercializing any products which will generate product or licensing revenues. We do not expect to have any products on the market for several years. In addition, development of our product candidates requires a process of pre-clinical and clinical testing, during which our products could fail. We may not be able to enter into agreements with one or more companies experienced in the manufacturing and marketing of therapeutic drugs and, to the extent that we are unable to do so, we will not be able to market our product candidates. Eventual profitability will depend on our success in developing, manufacturing, and marketing our product candidates. We have experienced net losses and negative cash flows from operating activities since inception and expect such losses and negative cash flows to continue in the foreseeable future. As of September 30, 2006 and 2005 and as of December 31,

## Edgar Filing: GAMMACAN INTERNATIONAL INC - Form SB-2

2006, we had a working capital (deficiency) of \$222,133, \$567,753, and \$(236,433), respectively, and stockholders' equity (deficit) of \$259,190, \$577,028, and \$(205,498), respectively. See the consolidated financial statements and the related notes. We generated no revenues to date. We have incurred net losses since inception and expect to continue to operate at a loss for the foreseeable future. For the period from our inception on October 6, 1998 through December 31, 2006, the years ended September 30, 2006 and 2005, and for the three months ended December 31, 2006, we incurred net losses of \$(4,584,828), \$(2,064,795), \$(1,198,532), and \$(807,415), respectively. We may never achieve profitability. See Management's Discussion and Analysis of Financial Condition and Results of Operations.

**At present, our success depends solely on the successful commercialization of IgG-based therapies for our proposed use as a cancer therapy alternative.**

The successful commercialization of IgG-based cancer immunotherapies is crucial for our success. Our proposed products and their potential applications are in an early stage of clinical and manufacturing/process development and face a variety of risks and uncertainties. Principally, these risks include the following:

future clinical trial results may show that IgG based therapy is not well tolerated by recipients at its effective doses or is not efficacious as compared to placebo;

future clinical trial results may be inconsistent with ARP's previous preliminary testing results and data from our earlier studies may be inconsistent with clinical data;

even if our IgG based therapies are shown to be safe and effective for their intended purposes, we may face significant or unforeseen difficulties in obtaining or manufacturing sufficient quantities at or at reasonable prices;

our ability to complete the development and commercialization of IgG-based therapies for our intended use is significantly dependent upon our ability to obtain and maintain experienced and committed partners to assist us with obtaining clinical and regulatory approvals for, and the manufacturing, marketing and distribution of, IgGs on a worldwide basis;

even if IgG products are successfully developed, commercially produced and receive all necessary regulatory approvals, there is no guarantee that there will be market acceptance of the products; and

our competitors may develop therapeutics or other treatments which are superior or less costly than our own with the result that our products, even if they are successfully developed, manufactured and approved, may not generate significant revenues

If we are unsuccessful in dealing with any of these risks, or if we are unable to successfully commercialize our IgG products for some other reason, it would likely seriously harm our business.

**We can provide no assurance of the successful and timely development of our new products.**

Our product candidates are at various stages of research and development. Further development and extensive testing will be required to determine their technical feasibility and commercial viability. Our success will depend on our ability to achieve scientific and technological advances and to translate such advances into reliable, commercially competitive products on a timely basis. Products that we have developed and may in the future develop are not likely to be commercially available for some time. The proposed development schedules for our products may be affected by a variety of factors, including technological difficulties, proprietary technology of others, and changes in governmental regulation, many of which will not be within our control. Any delay in the development, introduction, or marketing of our products could result either in such products being marketed at a time when their cost and performance characteristics would not be competitive in the marketplace or in the shortening of their commercial lives. In light of the long-term nature of our projects, the nature technology involved, and the other factors, described elsewhere in Risk Factors, there can be no assurance that we will be able to complete successfully the development or marketing of any new products.

**We will need additional capital in order to satisfy our business objectives.**

To date, we have financed our operations principally through offerings of securities exempt from the registration requirements of the Securities Act. We believe that our available resources and cash flow will be sufficient to meet our anticipated working capital needs for at least the next 10 months from the date of this prospectus. Notwithstanding the foregoing, we estimate that we will require substantial additional financing at various intervals in order to continue our research and development programs, including significant requirements for operating expenses including intellectual property protection and enforcement, for pursuit of

## Edgar Filing: GAMMACAN INTERNATIONAL INC - Form SB-2

regulatory approvals, and for commercialization of our products. We can provide no assurance that additional funding will be available on a timely basis, terms acceptable to us, or at all. In the event that we are unable to obtain such financing, we will not be able to fully develop and commercialize our technology. Our future capital requirements will depend upon many factors, including:

continued scientific progress in our research and development programs;

costs and timing of conducting clinical trials and seeking regulatory approvals and patent prosecutions;

competing technological and market developments;

our ability to establish additional collaborative relationships; and

effects of commercialization activities and facility expansions if and as required.

If we cannot secure adequate financing when needed, we may be required to delay, scale back or eliminate one or more of our research and development programs or to enter into license or other arrangements with third parties to commercialize products or technologies that we would otherwise seek to develop ourselves and commercialize ourselves. In such event, our business, prospects, financial condition, and results of operations may be adversely affected as we may be required to scale-back, eliminate, or delay development efforts or product introductions or enter into royalty, sales or other agreements with third parties in order to commercialize our products.

### **In the future, we may rely upon our collaborative agreements with large pharmaceutical companies.**

In the future, we may rely heavily on collaborative agreements with large pharmaceutical companies, governments, or other parties for our revenues. Our inability to obtain any one or more of these agreements, on commercially reasonable terms, or at all, or to circumvent the need for any such agreement, could cause significant delays and cost increases and materially affect our ability to develop and commercialize its product candidates. Some of our programs may require the use of multiple proprietary technologies, especially patented drugs. Obtaining licenses for these technologies may require us to make cumulative royalty payments or other payments to several third parties, potentially reducing amounts paid to us or making the cost of our products commercially prohibitive. Manufacturing of drug products may also require licensing technologies and intellectual property from third parties.

### **We rely upon patents to protect our technology. We may be unable to protect our intellectual property rights and we may be liable for infringing the intellectual property rights of others.**

Our ability to compete effectively will depend on our ability to maintain the proprietary nature of our technologies, including IgG technologies. We currently hold several patents and pending patent applications in the United States and corresponding patents and patent applications filed in certain other countries covering IgG and its proposed use in cancer therapeutics. Further, we intend to rely on a combination of trade secrets and non-disclosure, and other contractual agreements and technical measures to protect our rights in our technology. We intend to depend upon confidentiality agreements with our officers, directors, employees, consultants, and subcontractors, as well as collaborative partners, to maintain the proprietary nature of our technology. These measures may not afford us sufficient or complete protection, and others may independently develop technology similar to ours, otherwise avoid our confidentiality agreements, or produce patents that would materially and adversely affect our business, prospects, financial condition, and results of operations. We believe that our technology is not subject to any infringement actions based upon the patents of any third parties; however, our technology may in the future be found to infringe upon the rights of others. Others may assert infringement claims against us, and if we should be found to infringe upon their patents, or otherwise impermissibly utilize their intellectual property, our ability to continue to use our technology or the licensed technology could be materially restricted or prohibited. If this event occurs, we may be required to obtain licenses from the holders of this intellectual property, enter into royalty agreements, or redesign our products so as not to utilize this intellectual property, each of which may prove to be uneconomical or otherwise impossible. Licenses or royalty agreements required in order for us to use this technology may not be available on terms acceptable to us, or at all. These claims could result in litigation, which could materially adversely affect our business, prospects, financial condition, and results of operations.

The patent position of biopharmaceutical and biotechnology firms is generally uncertain and involves complex legal and factual questions. We do not know whether any of our current or future patent applications will result in the issuance of any patents. Even issued patents may be challenged, invalidated or circumvented. Patents may not provide a competitive advantage or afford protection against competitors with similar technology. Competitors or potential competitors may have filed applications for, or may have received patents and may obtain additional and proprietary rights to compounds or processes used by or competitive with ours. In addition, laws of certain foreign countries do not protect intellectual property rights to the same extent as do the laws of the United States or Canada.

## Edgar Filing: GAMMACAN INTERNATIONAL INC - Form SB-2

Patent litigation is becoming widespread in the biotechnology industry and we cannot predict how this will affect our efforts to form strategic alliances, conduct clinical testing or manufacture and market any products under development. If challenged, our patents may not be held valid. We could also become involved in interference proceedings in connection with one or more of our patents or patent applications to determine priority of invention. If we become involved in any litigation, interference or other administrative proceedings, we will likely incur substantial expenses and the efforts of our technical and management personnel will be significantly diverted. In addition, an adverse determination could subject us to significant liabilities or require us to seek licenses that may not be available on favorable terms, if at all. We may be restricted or prevented from manufacturing and selling our products in the event of an adverse determination in a judicial or administrative proceeding or if we fail to obtain necessary licenses.

Our commercial success will also depend significantly on our ability to operate without infringing the patents and other proprietary rights of third parties. Patent applications are, in many cases, maintained in secrecy until patents are issued. The publication of discoveries in the scientific or patent literature frequently occurs substantially later than the date on which the underlying discoveries were made and patent applications are filed. In the event of infringement or violation of another party's patent, we may be prevented from pursuing product development or commercialization. See Business Patents and Licenses .

### **We can provide no assurance that our products will obtain regulatory approval or that the results of clinical studies will be favorable.**

The testing, marketing and manufacturing of any of our products will require the approval of the FDA. We cannot predict with any certainty the amount of time necessary to obtain such FDA approvals and whether any such approvals will ultimately be granted. In any event, review and approval by the FDA is anticipated to take a number of years. Preclinical and clinical trials may reveal that one or more of our products are ineffective or unsafe, in which event further development of such products could be seriously delayed or terminated. Moreover, obtaining approval for certain products may require the testing on human subjects of substances whose effects on humans are not fully understood or documented. Delays in obtaining FDA or any other necessary regulatory approvals of any proposed product and failure to receive such approvals would have an adverse effect on the product's potential commercial success and on our business, prospects, financial condition, and results of operations. In addition, it is possible that a product may be found to be ineffective or unsafe due to conditions or facts which arise after development has been completed and regulatory approvals have been obtained. In this event we may be required to withdraw such product from the market. To the extent that our success will depend on any regulatory approvals from governmental authorities outside of the United States which perform roles similar to that of the FDA, uncertainties similar to those stated above will also exist. See Business Governmental Regulation .

### **If our products are commercialized, we may be subject to product liability claims.**

The testing, marketing, and sale of pharmaceutical products entail inherent risks. If we succeed in developing new pharmaceutical products, the sale of such products may expose us to potential liability resulting from the use of such products. Such liability might result from claims made directly by consumers or by pharmaceutical companies or others selling such products. While we may seek to obtain product liability insurance, there can be no assurance that we will be able to obtain such insurance or, if obtained, that such insurance can be acquired in amounts sufficient to protect us against such potential liability or at a reasonable cost. We do not maintain product liability insurance.

### **As we have no sales, marketing, and distribution capabilities, we will be required to either develop such capabilities or to outsource these activities to third parties.**

We currently have no sales, marketing or distribution capabilities. In order to succeed, we ultimately will be required to either develop such capabilities or to outsource these activities to third parties. We can provide no assurance that third parties will be interested in acting as our outsourced sales, marketing, and distribution arms on a timely basis, on commercially reasonable terms, or at all. If we are unable to establish sales, marketing, or distribution capabilities either by developing our own organization or by entering into agreements with others, we may be unable to successfully sell any products that we are able to begin to commercialize, which would have a material adverse effect upon our business, prospects, financial condition, and results of operations. Further, in the event that we are required to outsource these functions on disadvantageous terms, we may be required to pay a relatively large portion of our net revenue to these organizations, which would have a material adverse effect upon our business, prospects, financial condition, and results of operations.

### **We have no experience manufacturing our products.**

We currently lack the resources to manufacture any of our product candidates on a large scale. Our ability to conduct clinical trials and commercialize our product candidates will depend, in part, on our ability to manufacture our products, either directly or, as currently intended, through contract manufacturers, at a competitive cost and in accordance with current Good Manufacturing Practices ( cGMP ) and other regulatory requirements. We anticipate that we will be required to depend on contract manufacturers or collaborative partners for the manufacturing of our product candidates for preclinical studies and clinical trials and intend to use

contract manufacturers to produce any products we may eventually commercialize. If we are not able to obtain contract manufacturing on commercially reasonable terms, we may not be able to conduct or complete clinical trials or commercialize our product candidates. We have identified multiple suppliers for most if not all of the components of our drug product candidates, although we can provide no assurance that these components will be available when needed on commercially reasonable terms.

In order to succeed, we ultimately will be required to either develop such manufacturing capabilities or to outsource manufacturing on a long-term basis to third parties. We can provide no assurance that third parties will be interested in manufacturing our products on a timely basis, on commercially reasonable terms, or at all. If we are unable to establish manufacturing capabilities either by developing our own organization or by entering into agreements with others, we may be unable to commercialize our products, which would have a material adverse effect upon our business, prospects, financial condition, and results of operations. Further, in the event that we are required to outsource these functions on disadvantageous terms, we may be required to pay a relatively large portion of our net revenue to these organizations, which would have a material adverse effect upon our business, prospects, financial condition, and results of operations.

**We have limited experience in conducting clinical trials.**

Clinical trials must meet FDA and foreign regulatory requirements. We have limited experience in designing, conducting and managing the preclinical studies and clinical trials necessary to obtain regulatory approval for our product candidates in any country. We may encounter problems in clinical trials that may cause us or the FDA or foreign regulatory agencies to delay, suspend or terminate our clinical trials at any phase. These problems could include the possibility that we may not be able to conduct clinical trials at our preferred sites, enroll a sufficient number of patients for our clinical trials at one or more sites or begin or successfully complete clinical trials in a timely fashion, if at all. Furthermore, we, the FDA or foreign regulatory agencies may suspend clinical trials at any time if we or they believe the subjects participating in the trials are being exposed to unacceptable health risks or if we or they find deficiencies in the clinical trial process or conduct of the investigation. If clinical trials of any of the product candidates fail, we will not be able to market the product candidate which is the subject of the failed clinical trials. The FDA and foreign regulatory agencies could also require additional clinical trials, which would result in increased costs and significant development delays. Our failure to adequately demonstrate the safety and effectiveness of a pharmaceutical product candidate under development could delay or prevent regulatory approval of the product candidate and could have a material adverse effect on our business, prospects, financial condition, and results of operations.

**We are dependent upon third party suppliers of our raw materials.**

We are dependent on outside vendors for our entire supply of IgG. While we believe that there are numerous sources of supply available, if the third party suppliers were to cease production or otherwise fail to supply us with quality IgG in sufficient quantities on a timely basis and we were unable to contract on acceptable terms for these services with alternative suppliers, our ability to produce our products and to conduct testing and clinical trials would be materially adversely affected.

**We have limited senior management resources; we may be unable to effectively manage growth with our limited resources.**

We expect the expansion of our business to place a significant strain on our limited managerial, operational, and financial resources. We will be required to expand our operational and financial systems significantly and to expand, train, and manage our work force in order to manage the expansion of our operations. Our failure to fully integrate our new employees into our operations could have a material adverse effect on our business, prospects, financial condition, and results of operations. Our ability to attract and retain highly skilled personnel is critical to our operations and expansion. We face competition for these types of personnel from other technology companies and more established organizations, many of which have significantly larger operations and greater financial, technical, human, and other resources than we have. We may not be successful in attracting and retaining qualified personnel on a timely basis, on competitive terms, or at all. If we are not successful in attracting and retaining these personnel, our business, prospects, financial condition, and results of operations will be materially adversely affected. See Management's Discussion and Analysis of Financial Condition and Results of Operations, Business Strategy, and Business Employees.

**We depend upon our senior management and skilled personnel and their loss or unavailability could put us at a competitive disadvantage.**

We currently depend upon the efforts and abilities of our senior executives, as well as the services of several key consultants and other key personnel. The loss or unavailability of the services of any of these individuals for any significant period of time could have a material adverse effect on our business, prospects, financial condition, and results of operations. In addition, recruiting and retaining qualified scientific personnel to perform future research and development work will be critical to our success. There is currently a shortage of employees with expertise in our areas of research and clinical and regulatory affairs, and this shortage is likely to continue. Competition for skilled personnel is intense and turnover rates are high. Our ability to attract and retain qualified

personnel may be limited. Our inability to attract and retain qualified skilled personnel would have a material adverse effect on our business, prospects, financial condition, and results of operations.

**Because we will not pay cash dividends, investors may have to sell shares in order to realize their investment.**

We have not paid any cash dividends on our common stock and do not intend to pay cash dividends in the foreseeable future. We intend to retain future earnings, if any, for reinvestment in the development and expansion of our business. Any credit agreements which we may enter into with institutional lenders or otherwise may restrict our ability to pay dividends. Whether we pay cash dividends in the future will be at the discretion of our board of directors and will be dependent upon our financial condition, results of operations, capital requirements, and any other factors that the board of directors decides is relevant. See Dividend Policy and Description of Securities Common Stock .

**Risks Related to Our Industry**

**The biotechnology and biopharmaceutical industries are characterized by rapid technological developments and a high degree of competition. We may be unable to compete with more substantial enterprises.**

The biotechnology and biopharmaceutical industries are characterized by rapid technological developments and a high degree of competition. As a result, our actual or proposed products could become obsolete before we recoup any portion of our related research and development and commercialization expenses. Our industries are highly competitive, and this competition comes from both from biotechnology firms and from major pharmaceutical and chemical companies. Many of these companies have substantially greater financial, marketing, and human resources than we do (including, in some cases, substantially greater experience in clinical testing, manufacturing, and marketing of pharmaceutical products). We also experience competition in the development of our products from universities and other research institutions and compete with others in acquiring technology from such universities and institutions. In addition, certain of our products may be subject to competition from products developed using other technologies. See Business Competition .

**The industry in which we operate is highly competitive.**

Numerous well-known companies, which have substantially greater capital, research and development capabilities and experience than we have, are presently engaged in the research and development efforts with respect to our target indications. By virtue of having or introducing competitive products on the market before us, these entities may gain a competitive advantage. Further future technological developments may render some or all of our current or future products noncompetitive or obsolete, and we may not be able to make the enhancements to our products necessary to compete successfully with newly emerging technologies. If we are unable to successfully compete in our chosen markets, our business prospects, financial condition, and results of operations would be materially adversely affected. See Business Competition .

**The government regulatory approval process is time consuming and expensive.**

To date, we have not submitted a marketing application for any product candidate to the FDA or any foreign regulatory agency, and none of our product candidates have been approved for commercialization in any country. Prior to commercialization, each product candidate will be subject to an extensive and lengthy governmental regulatory approval process in the United States and in other countries. We may not be able to obtain regulatory approval for any product candidate we develop or, even if approval is obtained, the labeling for such products may place restrictions on their use that could materially impact the marketability and profitability of the product subject to such restrictions. We have limited experience in designing, conducting and managing the clinical testing necessary to obtain such regulatory approval. Satisfaction of these regulatory requirements, which includes satisfying the FDA and foreign regulatory authorities that the product is both safe and effective for its intended therapeutic uses, typically takes several years depending upon the type, complexity and novelty of the product and requires the expenditure of substantial resources.

**Any manufacturer to produce our products will be required to comply with extensive government regulation.**

Before we can begin to commercially manufacture any of our product candidates, we must either secure manufacturing in an approved manufacturing facility or obtain regulatory approval of our own manufacturing facility and processes. In addition, the manufacturing of our product candidates must comply with cGMP and/or other requirements of the FDA and requirements by regulatory agencies in other countries. These requirements govern, among other things, quality control and documentation procedures. We or any third-party manufacturer of our product candidates, may not be able to comply with these requirements, which would prevent us from selling such products. Material changes to the manufacturing processes of our products after approvals have been granted are also subject to review and approval by the FDA or other regulatory agencies.

**The commercial success of any newly-introduced pharmaceutical product depends in part upon the ability of patients to obtain adequate reimbursement.**

If we succeed in bringing our product candidates to market, they may not be considered cost-effective, and coverage and adequate payments may not be available or may not be sufficient to allow us to sell our products on a competitive basis. In both the United States and elsewhere, sales of medical products, diagnostics, and therapeutics are dependent, in part, on the availability of reimbursement from third party payors, such as health maintenance organizations and other private insurance plans and governmental programs such as Medicare. Third party payors are increasingly challenging the prices charged for pharmaceutical products and services. We anticipate that our business will be affected by the efforts of government and third party payors to contain or reduce the cost of health care through various means. In the United States, there have been and will continue to be a number of federal and state proposals to implement government controls on pricing. Similar government pricing controls exist in varying degrees in other countries. In addition, the emphasis on managed care in the United States has increased and will continue to increase the pressure on the pricing of pharmaceutical products. We cannot predict whether any legislative or regulatory proposals will be adopted or the effect these proposals or managed care efforts may have on our business.

**Risks Related to this Offering**

**In recent years, the stock market in general has experienced periodic price and volume fluctuations. This volatility has had a significant effect on the market price of securities issued by many companies for reasons often unrelated to their operating performance. These broad market fluctuations may adversely affect our stock price, regardless of our operating results. As the market price of our common stock may fluctuate significantly, it may be difficult for you to resell your shares of common stock when you want or at prices you find attractive.**

The price of the common stock is quoted on the OTCBB and constantly changes. We expect that the market price of the common stock will continue to fluctuate. These fluctuations may result from a variety of factors, many of which are beyond our control. These factors include:

quarterly variations in our financial results;

operating results that vary from the expectations of management, securities analysts and investors;

changes in expectations as to our business, prospects, financial condition, and results of operations;

announcements by us, our partners or our competitors of material developments;

the operating and securities price performance of other companies that investors believe are comparable to us;

future sales of our equity or equity-related securities;

changes in general conditions in our industry and in the economy, the financial markets and the domestic or international political situation;

departures of key personnel; and

regulatory considerations.

As a result of these fluctuations, you may experience difficulty selling shares of our common stock when desired or at acceptable prices.

**Future sales of common stock or the issuance of securities senior to the common stock or convertible into, or exchangeable or exercisable for, common stock could materially adversely affect the trading price of the common stock, and our ability to raise funds in new equity offerings.**

Future sales of substantial amounts of our common stock or other equity-related securities in the public market or privately, or the perception that such sales could occur, could adversely affect prevailing trading prices of our common stock and could impair our ability to raise capital through future offerings of equity or other equity-related securities. We can make no prediction as to the effect, if any, that future sales of shares of common stock or equity-related securities, or the availability of shares of common stock for future sale, will have on the trading price of our common stock.

**If penny stock regulations impose restrictions on the marketability of our common stock, the ability of our stockholders to sell shares of our stock could be impaired.**

The Commission has adopted regulations that generally define a penny stock to be an equity security that has a market price of less than \$5.00 per share or an exercise price of less than \$5.00 per share subject to certain exceptions. Exceptions include equity securities issued by an issuer that has (i) net tangible assets of at least \$2,000,000, if such issuer has been in continuous operation for more than three years, or (ii) net tangible assets of at least \$5,000,000, if such issuer has been in continuous operation for less than three years, or (iii) average revenue of at least \$6,000,000 for the preceding three years. Unless an exception is available, the regulations require that prior to any transaction involving a penny stock, and a risk disclosure schedule must be delivered to the buyer explaining the penny stock market and its risks. Our common stock currently trades on a limited basis. Although we believe that we currently fall under one of the exceptions, if at a later time we fail to meet one of the exceptions, our common stock will be considered a penny stock. As such the market liquidity for the common stock will be limited to the ability of broker-dealers to sell it in compliance with the above-mentioned disclosure requirements.

You should be aware that, according to the Commission, the market for penny stocks has suffered in recent years from patterns of fraud and abuse. Such patterns include:

Control of the market for the security by one or a few broker-dealers;

Boiler room practices involving high-pressure sales tactics;

Manipulation of prices through prearranged matching of purchases and sales;

The release of misleading information;

Excessive and undisclosed bid-ask differentials and markups by selling broker-dealers; and

Dumping of securities by broker-dealers after prices have been manipulated to a desired level, which hurts the price of the stock and causes investors to suffer loss.

We are aware of the abuses that have occurred in the penny stock market. Although we do not expect to be in a position to dictate the behavior of the market or of broker-dealers who participate in the market, we will strive within the confines of practical limitations to prevent such abuses with respect to our common stock.

**The market for the common stock may suffer in the event of delisting from OTCBB or if our common stock is penny stock .**

If our common stock were delisted from the OTCBB or no exclusion from the definition of a penny stock under the Securities Exchange Act of 1934, as amended, were available, our common stock could be subject to the penny stock rules that impose additional sales practice requirements on broker-dealers who sell these securities to persons other than established customers and accredited investors. Accredited investors are generally those investors with net worth in excess of \$1,000,000 or annual income exceeding \$200,000 or \$300,000 together with a spouse. For transactions covered by these rules, the broker-dealer must make a special suitability determination for the purchase, and must have received the purchaser's written consent to the transaction prior to sale. As a result, delisting, if it were to occur, could materially adversely affect the ability of broker-dealers to sell our common stock and the ability of purchasers to sell their shares in the secondary market.

**Future sales of common stock by our existing stockholders could adversely affect our stock price.**

The market price of our common stock could decline as a result of sales of a large number of shares of our common stock in the market after this offering, or the perception that these sales could occur. These sales also might make it more difficult for us to sell equity securities in the future at a time and at a price that we deem appropriate. Immediately after the effectiveness under the Securities Act of the registration statement of which this prospectus forms a part, we will have outstanding 44,875,164 shares of common stock. Of these shares, 33,692,478 shares, including 16,250,000 of the shares being offered in this offering, will be freely tradable. Giving effect to the exercise in full of the Warrants, immediately after the commencement of this offering, we would have outstanding 61,125,164 shares of common stock. This leaves 11,182,686 shares eligible for sale in the public market. Without giving effect to the exercise in full of the Warrants, the number of shares of common stock and the dates when these shares will become freely tradable in the market, subject to the lock-up agreements, is as follows:

<u>Number of Shares</u>	<u>Date</u>
33,692,478	On the date of this prospectus
33,692,478	Within six months of the date of this prospectus

33,863,910

Between six and twelve months from the date of this prospectus

14

---

## Edgar Filing: GAMMACAN INTERNATIONAL INC - Form SB-2

The holders of the Warrants are entitled to the registration of the resale of the shares of common stock issuable upon the exercise of the Warrants following the effectiveness of the registration statement of which this prospectus forms a part, subject to limitations established by the Securities and Exchange Commission.

Some of our stockholders, holding approximately 1,333,332 shares of common stock, have the right, subject to a number of conditions and limitations, to include their shares in registration statements relating to our securities. By exercising their registration rights and causing a large number of shares to be registered and sold in the public market, these holders may cause the market price of the common stock to fall. In addition, any demand to include these shares in our registration statements could have an adverse effect on our ability to raise needed capital. In connection with the 2007 Private Placement, directors, officers, employees, consultants and certain stockholders beneficially owning in the aggregate 16,000,013 shares of common stock, agreed to restrict their ability to dispose of their shares of common stock or common stock equivalents until the first anniversary of the effective date under the Securities Act of the registration statement of which this prospectus forms a part. See *Principal and Management Stockholders* , and *Plan of Distribution* .

### **Our issuance of warrants and options to investors, employees and consultants and the registration rights for the underlying shares of common stock may have a negative effect on the trading prices of our common stock as well as a dilutive effect.**

We have issued and may continue to issue warrants and options at or below the current market price. As of September 30, 2006, we had 5,917,775 outstanding warrants and options (1,510,000 for the year ended September 30, 2005) to investors employees and consultants. In addition to the dilutive effect of a large number of shares and a low exercise price for the warrants and options, there is a potential that a large number of underlying shares may be sold in the open market at any given time, which could place downward pressure on the trading of our common stock.

### **Risks Related to conducting Business in Israel**

#### **We are affected by the political, economic, and military risks of locating our principal operations in Israel.**

Our operations are located in the State of Israel, and we are directly affected by political, economic, and military conditions in that country. Since December 1987, the State of Israel has experienced severe civil unrest primarily in the areas that have been under its control since 1967. No prediction can be made as to whether these problems will be resolved. Our business, prospects, financial condition, and results of operations could be materially adversely affected if major hostilities involving Israel should occur or if trade between Israel and its current trading partners is interrupted or curtailed.

All adult male permanent residents of Israel under the age of 51, unless exempt, may be required to perform between 14 and 40 days of military reserve duty annually. Additionally, all such residents are subject to being called to active duty at any time under emergency circumstances. Some of our officers, directors, and employees currently are obligated to perform annual military reserve duty. We can provide no assurance that such requirements will not have a material adverse effect on our business, prospects, financial condition, and results of operations in the future, particularly if emergency circumstances occur.

#### **Because some of our officers and directors are located in non-U.S. jurisdictions, you may have no effective recourse against the management for misconduct and may not be able to enforce judgment and civil liabilities against our officers, directors, experts and agents.**

Many of our directors and officers are nationals and/or residents of countries other than the United States, and all or a substantial portion of their assets are located outside the United States. As a result, it may be difficult for investors to enforce within the United States any judgments obtained against our officers or directors, including judgments predicated upon the civil liability provisions of the securities laws of the United States or any U.S. state.

#### **Fulfilling our obligations incident to being a public company will be expensive and time consuming.**

As a public company, the Sarbanes-Oxley Act of 2002 and the related rules and regulations of the SEC, will require us to implement additional corporate governance practices and adhere to a variety of reporting requirements and complex accounting rules. Compliance with these public company obligations will increase our legal and financial compliance costs and place significant additional demands on our finance and accounting staff and on our financial, accounting and information systems.

## Edgar Filing: GAMMACAN INTERNATIONAL INC - Form SB-2

In particular, as a public company, our management will be required to conduct an annual evaluation of our internal controls over financial reporting and include a report of management on our internal controls in our annual reports on Form 10-KSB. Under current rules, we will be subject to this requirement beginning with our annual report on Form 10-KSB for our fiscal year ending September 30, 2008. In addition, we will be required to have our independent public accounting firm attest to and report on management's assessment of the effectiveness of our internal controls over financial reporting. Under current rules, we will be subject to this requirement beginning with our annual report on Form 10-KSB for our fiscal year ending September 30, 2009. If we are unable to conclude that we have effective internal controls over financial reporting or, if our independent auditors are unable to provide us with an attestation and an unqualified report as to the effectiveness of our internal controls over financial reporting, investors could lose confidence in the reliability of our financial statements, which could result in a decrease in the value of our common stock.

**SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS**

This prospectus contains forward-looking statements. We have based these forward-looking statements on our current expectations and projections about future events. These statements include, but are not limited to:

statements as to the anticipated timing of business developments;

statements as to the development of new products;

expectations as to the adequacy of our cash balances and the proceeds of this offering to support our operations for specified periods of time and as to the nature and level of cash expenditures;

expectations as to the market opportunities for our products, as well as our ability to take advantage of those opportunities; and

estimates of how we intend to use the net proceeds of this offering.

These statements may be found in the sections of this prospectus entitled Prospectus Summary , Risk Factors , Use of Proceeds , Management's Discussion and Analysis of Financial Condition and Results of Operations , and Business , as well as in this prospectus generally. Actual results could differ materially from those anticipated in these forward-looking statements as a result of various factors, including all the risks discussed in Risk Factors and elsewhere in this prospectus.

In addition, statements that use the terms can , continue , could , may , potential , predicts , should , will , believe , expect , anticipate , and similar expressions are intended to identify forward-looking statements. All forward-looking statements in this prospectus reflect our current views about future events and are based on assumptions and are subject to risks and uncertainties that could cause our actual results to differ materially from future results expressed or implied by the forward-looking statements. Many of these factors are beyond our ability to control or predict. You should not put undue reliance on any forward-looking statements. Unless we are required to do so under federal securities laws or other applicable laws, we do not intend to update or revise any forward-looking statements.

**USE OF PROCEEDS**

We estimate that we will receive a gross amount of \$7,800,000 in proceeds assuming the exercise in full of the Warrants for cash. We intend to use the net proceeds of such exercises for general corporate purposes and working capital purposes. We will receive no proceeds from the resale of the Shares by the selling stockholders.

**DIVIDEND POLICY**

We have not paid any cash dividends on our common stock and do not currently anticipate paying cash dividends in the foreseeable future. The agreements, into which we may enter in the future, including indebtedness, may impose limitations on our ability to pay dividends or make other distributions on our capital stock.

Future dividends on our common stock, if any, will be at the discretion of our board of directors and will depend on, among other things, our results of operations, cash requirements and surplus, financial condition, contractual restrictions and other factors that our board of directors may deem relevant. We intend to retain future earnings, if any, for reinvestment in the development and expansion of our business.

## CAPITALIZATION

The following table presents our capitalization as of December 31, 2006 on an actual basis and an adjusted basis. The actual column reflects our actual capital at December 31, 2006, and the as adjusted column reflects the consummation of the 2007 Private Placement and the receipt of net proceeds of \$5,892,462 from such offering, after deducting commissions and estimated offering expenses paid and payable by us (total estimated costs included are \$107,500).

You should read the following table in conjunction with *Selected Consolidated Financial Data*, *Management's Discussion and Analysis of Financial Condition and Results of Operations* and our financial statements and related notes included elsewhere in this prospectus.

	<b>December 31, 2006 Actual (in US \$)</b>	<b>December 31, 2006 As Adjusted (in US \$)</b>
	<u>          </u>	<u>          </u>
Cash and cash equivalents	\$ 516,545	\$ 6,409,007
Long-term debt	38,339	38,339
Capital leases		
Stockholders' equity:		
Preferred Stock, 0.0001 par value, authorized 20,000,000 shares, none issued and outstanding		
Common Stock, \$0.0001 par value, authorized 100,000,000 shares, issued and outstanding *28,496,590 shares (44,875,164 shares as adjusted)	2,849	4,474
Additional paid in capital	3,515,007	7,171,830
Warrants	861,474	3,095,488
	<u>          </u>	<u>          </u>
Total stockholders equity (deficit)	(205,498)	5,686,964
	<u>          </u>	<u>          </u>
Total capitalization	(167,159)	5,725,303
	<u>          </u>	<u>          </u>

\* On October 18, 2006, we entered into a Strategic Alliance Agreement with UTEK Corporation ( *UTEK* ), pursuant to which UTEK would assist us in identifying technology acquisition opportunities. Pursuant to the agreement, in consideration of the services being provided to us by UTEK, we shall pay \$120,000 in the form of 171,432 unregistered shares of common stock. We had the option of paying UTEK \$10,000 per month. We have agreed to issue UTEK an aggregate of 171,432 shares of common stock which will vest in 12 equal monthly instalments of 14,286 shares. If the agreement is terminated any unvested shares will be returned to us. The outstanding shares presented represent issued shares in respect of service received up to December 31, 2006, since the rest of the shares are not considered issued for accounting purposes.

Edgar Filing: GAMMACAN INTERNATIONAL INC - Form SB-2

SELECTED CONSOLIDATED FINANCIAL DATA

The following condensed statement of operations data for the years ended September 30, 2006 and 2005, and the selected balance sheet data at September 30, 2005 and 2006, are derived from our audited financial statements and the related notes. Our financial statements and the related notes as of September 30, 2006 and 2005 and for the two years ended are included elsewhere herein. The unaudited selected statement of operations data for the three months ended December 31, 2006 and 2005, and the unaudited consolidated selected balance sheet data at December 31, 2006 and 2005, are derived from our unaudited financial statements, which have been prepared on a basis consistent with our audited financial statements except for the change in accounting for stock based compensation and the adoption of FAS 123R on October 1, 2006, and, in the opinion of management, include all adjustments, consisting of normal recurring adjustments, necessary for a fair presentation of our financial position and results of operations. The results of operations for any interim period are not necessarily indicative of results to be expected for the entire year. The following data should be read in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations and our financial statements and the related notes included elsewhere in this prospectus.

Statement of Operations Data:

	Years Ended September 30,		Period from October 6, 1998 through September 30,	Three Months Ended December 31,		Period from October 6, 1998 through December 31,
	2006	2005	2006	2006	2005	2006

MANAGEMENT'S DISCUSSION AND ANALYSIS AND PLAN OF OPERATIONS

*The following management's discussion and analysis of financial condition and plan of operations contains forward-looking statements which involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including those set forth under Risk Factors and elsewhere in this prospectus. We assume no obligation to update forward-looking statements or the risk factors. You should read the following discussion in conjunction with our financial statements and related notes filed as an exhibit to the registration statement of which this prospectus forms a part.*

**General**

We are a development stage Company and currently have no revenue from operations. Other than existing cash reserves and our intellectual property we have no significant assets, tangible or intangible. There can be no assurance that we will generate revenues in the future, or that we will be able to operate profitably in the future, if at all. We have incurred net losses in each fiscal year since inception of our operations.

As we are in the development stage of operations, the relationships between revenue, cost of revenue, and operating expenses reflected in the financial information included in this prospectus are not necessarily indicative of the relationship between and among such items as we expand and as we progress towards operations.

We were incorporated under the laws of the state of Delaware on October 6, 1998 under the name of San Jose International, Inc. We engaged in several businesses, until in June 2004, approximately 27% of our then outstanding shares of common stock were acquired by Ze'ev Bronfeld and Vered Caplan in a private transaction. Shortly thereafter, on August 13, we raised approximately \$900,000 in a private placement, and, pursuant to an agreement for the purchase and sale of intellectual property between our newly formed subsidiary, GammaCan, Ltd., and ARP, GammaCan Ltd. completed the purchase and sale of ARP's intellectual property (the *Intellectual Property*) on August 17, 2004 in consideration for the issuance to ARP of 12.5% of the common shares of GammaCan, Ltd. As a result, we became the owner of 87.5% of GammaCan, Ltd., which in turn owns all of the Intellectual Property consisting of IgG research and development, patents and other intellectual property, which appears to hold promising potential for the clinical treatment for various cancer types. At the same time, we also made a loan of \$800,000 from the proceeds of the private placement to GammaCan, Ltd. to finance its new business. On August 19, 2004, we changed our name to GammaCan International, Inc. in the State of Delaware.

All dollar amounts refer to US dollars unless otherwise indicated.

**Plan of Operation**

**Short Term Business Plan**

Our near term focus is to demonstrate efficacy of IgG-based cancer immunotherapy in human clinical trials. Efficacy is the ability of a drug or other treatments to produce the desired result when taken by its intended users. If ultimately proven to be successful, and we can provide no assurance that it will be, we could be well-positioned to enter into a strategic marketing and/or licensing agreement with one or more major pharmaceutical partners for late stage clinical development and/or commercial market development and sales.

IgG immunotherapy will require regulatory approval before being commercially marketed for human therapeutic use. Clinical trials generally include three phases that together may take several years to complete. Phase I clinical studies (toxicity trials) are primarily conducted to establish the safety and determine the maximally tolerated dose, or MTD. Phase II studies are designed to determine preliminary efficacy and establish dosing. Phase III studies are conducted to demonstrate therapeutic efficacy in a statistically significant manner at the levels of optimal dose, method or route of delivery into the body, and the schedule of administration. Once clinical trials are completed successfully, products may receive regulatory approval. See Business Government Regulation .

Since July 2005, we have been conducting a non FDA, open-label Phase II clinical trial (GCAN-01) in humans to demonstrate clinical efficacy of IgG-based immunotherapy in three major cancers: colon, prostate, and melanoma. To date, 32 patients have been enrolled, out of which 27 have actually received the IgG treatment. This Phase II open label clinical trial is being conducted at three medical centers in Israel. We anticipate that final results of this clinical trial will likely be available during 2007 and that the trial is due to be completed during 2007. We may continue to monitor patients for a number of years after the trial in order to collect additional evidence of efficacy and monitor potential benefits or adverse effects of the IgG-based treatment. If successful or promising, and at this preliminary stage we can provide no assurance they will be, we may utilize the results of these clinical trials to enter into discussions with a major pharmaceutical partner and plasma-based product manufacturers to work with us to potentially

## Edgar Filing: GAMMACAN INTERNATIONAL INC - Form SB-2

commercialize this IgG based product. Prior to commercialization, we, together with any collaborative partners, will be required to conduct Phase III clinical trials in accordance with local regulatory requirements. Such trials may be long-term trials and may require substantial financial resources that we do not presently possess.

We are also in the process of applying for a U.S. Investigational New Drug Application ( *IND* ) with the FDA for VitiGam , our next generation, IgG-based product and a first-in-class anti-cancer immunotherapy. We expect that VitiGam will enter the clinic under a U.S. IND within the next 12 months. VitiGam is designed to target melanoma patients with stage III and IV melanoma.

VitiGam is an intravenous IgG formulation derived from IgG manufactured from plasma collected from donors with vitiligo, a benign autoimmune skin condition affecting up to 2% of the general population. GammaCan scientists have shown that vitiligo derived IgG (VitiGam ) contains anti-melanoma activities in substantially higher quantities than those found in IgG from other donors. This enriched vitiligo IgG formulation has potent anti-melanoma activity in both *in vitro* and *in vivo* melanoma models. Preliminary data from the ongoing, open-label Phase II trial of GCAN 101 ( standard IgG) in melanoma patients further support the rationale underling the VitiGam program.

We intend to conduct a Phase I/II trial under a U.S. IND to evaluate VitiGam in patients with stage III and IV melanoma. We estimate that the costs of this Phase I/II will be substantial; the timing of initiation of the Phase I/II trials will be based on several major factors, including our ability to attract sufficient financing on acceptable terms.

We are also contemplating conducting additional clinical trials to test new formulations and/or combinations of IgG-based immunotherapies and to test these formulations and/or methods for different cancers at different stages of disease progression with varying dosages and routes of administration. To achieve this we may elect to partner with a pharmaceutical company to conduct these further clinical trials, in order to attain broad-based regulatory approval.

We expect that it will take a number of years to receive final approval and registration of our IgG preparation for commercial use as an anti-cancer agent. Our strategy is to collaborate with a suitable partner to support late stage (Phase III) clinical development, registration and/or sales for our IgG-based cancer products.

### **Long Term Business Strategy**

If our IgG-based cancer immunotherapies show significant promise through clinical trials, we plan to ultimately seek a strategic commercial partner, or partners, with extensive experience in the development, commercialization, and marketing of cancer drugs and/ or other infused therapeutic proteins. We anticipate that the partner, or partners, would be responsible for, or substantially support, late stage clinical trials (Phase III) to ensure regulatory approvals and registrations in the appropriate territories in a timely manner. We further anticipate that the partner, or partners, would be responsible for sales and marketing of our IgG-based immunotherapies in certain agreed upon territories. Such planned strategic partnership, or partnerships, may provide a marketing and sales infrastructure for our products as well as financial and operational support for global clinical trials, post marketing studies, label expansions and other regulatory requirements concerning future clinical development in the United States and elsewhere. Any future strategic partner, or partners, may also provide capital and expertise that would enable the partnership to develop new formulations of IgG cancer immunotherapy suitable for patients at different stages of disease progression as well as IgG derivatives. Under certain circumstances, we may determine to develop one or more of our IgG based cancer immunotherapies on our own, either world-wide or in select territories.

### **Other Research and Development Plans**

In addition to conducting early-stage clinical trials, we plan to conduct pre-clinical research to accomplish the following:

further deepen and broaden our understanding of the biology of our IgG products in cancer;

develop alternative delivery systems, determine the optimal dosage for different patient groups;

investigate alternative sources of immunoglobulin other than human plasma;

develop novel IgG-based therapies; and

develop successor products to our current products.

For example, we plan to conduct research to isolate the fraction of IgG, which is responsible for its anti-metastatic effects and to develop a potential synthetic version of IgG. These formulations may be suitable for:

high dose, for use in conjunction with surgery and other cancer treatments; and

maintenance dose for use to prevent recurrence of cancer growth.

Our plan is to patent any successful inventions resulting from our future research activities and to exploit any other means that may exist to protect our future IgG anti-cancer therapies in the commercial markets. For example, we may seek Orphan Drug Status for future IgG-based anti-cancer therapies for certain indications in certain markets. See [Business Government Regulation](#) .

In addition to conducting early-stage clinical trials, as described above, we may in-license or acquire additional technologies and/or therapeutics to complement or supplement our current immunotherapy focused development efforts to discover and develop novel cancer therapies.

### **Other Strategic Plans**

In addition to developing our own IgG based anti-cancer therapies drug portfolio, we are considering in-licensing and other means of obtaining additional lead molecules of technologies to complement and/or expand our current product portfolio. The goal of this is to create a well-balanced product portfolio including lead molecules in different stages of development and addressing different medical needs.

### **Critical accounting policies and estimates**

This Management's Discussion and Analysis of the Financial Condition and Plan of Operations is based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets and liabilities, expenses and related disclosure of contingent assets and liabilities. On an on-going basis, we evaluate our estimates and judgments. We base our estimates on various factors, including historical experience that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other resources. Actual results may differ materially from these estimates under different assumptions or conditions.

We believe the following critical accounting policies affect our more significant judgments and estimates used in the preparation of our consolidated financial statements.

#### **Going concern assumption**

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. The Company has net losses for the period from inception (October 6, 1998) through December 31, 2006 of \$4,584,828, as well as negative cash flow from operating activities. Presently, the company does not have sufficient cash resources to meet its requirements in the twelve months following the date of this prospectus. These factors raise substantial doubt about the company's ability to continue as a going concern. Management is in the process of evaluating various financing alternatives as the Company will need to finance future research and development activities and general and administrative expenses through fund raising in the public or private equity markets. Although there is no assurance that the Company will be successful with those initiatives, management is confident that it will be able to secure the necessary financing as a result of ongoing financing discussions with third party investors and existing shareholders. See [Risk Factors Risks Related to Our Business](#) There is substantial doubt as to our ability to continue as a going concern.

#### **Principles of consolidation**

The consolidated financial statements include the consolidated accounts of GammaCan International, Inc. and its subsidiary GammaCan Ltd. All material inter-company transactions and balances have been eliminated in consolidation

#### **Research and development**

We expense research and development costs as incurred. Research and development expenses include, but are not limited to, research salaries, patent attorney professional fees, research consulting, and funding of various research projects. Acquisition of in- process research and development are expensed as incurred.

### Stock-based compensation

We granted options to purchase shares of our common stock to employees and consultants and issued warrants in connection with fund raising. Until September 30, 2006 we accounted for employee stock based compensation in accordance with Accounting Principles Board Opinion No. 25 *Accounting for Stock Issued to Employees* ( *APB 25* ) and related interpretations. In accordance with FAS 123 - *Accounting for Stock-Based Compensation* ( *FAS 123* ), we disclosed pro forma data assuming that we had accounted for employee stock option grants using the fair value-based method defined in FAS 123. On October 1, 2006 we adopted the revised Statement of Financial Accounting Standards ( *FAS* ) No. 123, *Share-Based Payment* ( *FAS 123R* ), which addresses the accounting for share-based payment transactions in which we obtain employee services in exchange for (a) our equity instruments or (b) liabilities that are based on the fair value of our equity instruments or that may be settled by the issuance of such equity instruments. FAS 123R eliminates the ability to account for employee share-based payment transactions using APB Opinion No. 25, *Accounting for Stock Issued to Employees*, and requires instead that such transactions be accounted for using the grant-date fair value based method. This Statement is effective as of the beginning of the first annual reporting period that begins after December 15, 2005, for small business issuers, which is October 1, 2006 for us. FASB 123R applies to all awards granted or modified after the Statement's effective date. In addition, compensation cost for the unvested portion of previously granted awards that remain outstanding on the Statement's effective date shall be recognized on or after the effective date, as the related services are rendered, based on the awards' grant-date fair value as previously calculated for the pro-forma disclosure under FAS 123. We applied the modified prospective application transition method, as permitted by the Statement. Under such transition method, upon the adoption of FAS 123R, our financial statements for periods prior to the effective date of the Statement is not restated.

We account for equity instruments issued to third party service providers (non-employees) in accordance with the fair value based on an option-pricing model, pursuant to the guidance in EITF 96-18 *Accounting for Equity Instruments That Are Issued to Other Than Employees for Acquiring, or in Conjunction with Selling Goods or Services*. The fair value of the options granted is revalued over the related service periods and recognized using the accelerated method.

### Deferred income taxes

Deferred taxes are determined utilizing the assets and liabilities method based on the estimated future tax effects of differences between the financial accounting and tax bases of assets and liabilities under the applicable tax laws. Deferred tax balances are computed using the tax rates expected to be in effect when those differences reverse. A valuation allowance in respect of deferred tax assets is provided if, based upon the weight of available evidence, it is more likely than not that some or all of the deferred tax assets will not be realized. We have provided a full valuation allowance with respect to its deferred tax assets.

Regarding our Israeli subsidiary, paragraph 9(f) of FAS 109, *Accounting for Income Taxes*, prohibits the recognition of deferred tax liabilities or assets that arise from differences between the financial reporting and tax bases of assets and liabilities that are measured from the local currency into dollars using historical exchange rates, and that result from changes in exchange rates or indexing for tax purposes. Consequently, these above mentioned differences were not reflected in the computation of deferred tax assets and liabilities.

### Results of Operations

#### Comparison of the three months ended December 31, 2006 and 2005

*Research and development costs.* Research and development expenses are the costs incurred in the process of our pre-clinical and our clinical trials. Clinical trial and pre-clinical expenses include regulatory consultants and fees, research expenses, purchase of plasma, the cost of manufacturing IgG and payments to medical centers for patient recruitment and treatment. During the three months ended December 31, 2006 and December 31, 2005 the research and development expenses included, among others, the clinical trial and pre-clinical trial expenses, the consultants compensation, costs related to the registered patents as well as salaries and related expenses. During the three months ended December 31, 2006 the research and development expenses were \$167,972, compared to \$225,161 during the three months ended December 31, 2005. The decrease in cost is attributable to the final stages of the Phase II clinical trial we are currently conducting.

*General and administrative expenses.* The general and administrative expense includes the salaries and related expenses of our management, consulting, legal and professional fees, traveling, business development costs as well as insurance expenses. For the three months ending December 31, 2006 the general and administrative expenses were \$632,866, compared to \$212,775 for the three months ended December 31, 2005. Costs incurred related to general and administrative activities in the three months ended December 31, 2006 reflect an increase in the number of employees as compared to the three months period ending December 31, 2005. During the three months ended December 31, 2006, we incurred \$348,751 of costs due to the implementation of FAS 123R related to stock options granted to employees, \$329,542 of these costs were classified to the general and administrative expenses. We did not incur similar costs in the three months ended December 31, 2005.

## Edgar Filing: GAMMACAN INTERNATIONAL INC - Form SB-2

*Financial income/expense, net.* During the three months ending December 31, 2006 and December 31, 2005, we generated interest income on available cash and cash equivalents balance and incurred interest expenses related to our issued convertible promissory note.

### Comparison of the year ended September 30, 2006 and 2005

*Research & development costs.* Research and development expenses are the costs incurred in the process of our pre-clinical and our clinical trials. Clinical trial and pre-clinical expenses include regulatory consultants and fees, research expenses, purchase of plasma, the cost of manufacturing IgG and payments to medical centers for patient recruitment and treatment. During the year ended September 30, 2006 and 2005 the research and development expenses included, among other things, the clinical and pre-clinical trial expenses, consultants compensation, costs related to the registered patents as well as salaries and related expenses. During the year ended September 30, 2006 the research and development expenses were \$802,254, compared to \$545,928 during the year ended September 30, 2005. The increase is resulting from a research project relating to the mechanism of action of IgG done by Tel Ha Shomer Medical Research Infrastructure and Services Ltd. ( THM ) according to a research and licensing agreement signed with THM.

*General and administrative expenses.* The general and administrative expense includes the salaries and related expenses of our management, consulting, legal and professional fees, traveling, business development costs as well as insurance expenses. For the year ended September 30, 2006 the general and administrative expenses were \$1,263,070 compared to \$666,477 for the year ended September 30, 2005. The increase is attributable to the hiring of our new chief executive officer, consulting services provided in connection with financing and merger and acquisition activities, and legal and professional services, as well an increase in the rent and maintenance expenses due to change in our office facilities as well as the leasing of an office space in New York. Salaries and related expenses for the year ended September 30, 2006 were \$567,785 compared with \$245,197 for the year ended September 30, 2005. Consulting services increased from \$0 in the year ended September 30, 2005 to \$83,113 for the year ended September 30, 2006. During the year ended September 30, 2006 we incurred \$247,132 related to legal and professional fees compared to \$149,609 during the previous year. Traveling expenses for the year ended September 30, 2006 totaled \$99,417 compared with \$66,993 for the year ended September 30, 2005. Insurance expense for the year ended September 30, 2006 totaled \$57,481 compared with \$56,162 for the year ended September 30, 2005 and included the directors and officers insurance as well as office and equipment insurance. Other general and administrative expenses for the year ended September 30, 2006 totaled \$113,356 compared to \$48,205 for the year ended September 30, 2005. The increase is mainly contributed to the increase of rent and maintenance expenses.

*Financial income/expense, net.* During the year ended September 30, 2006, we generated interest income on available cash and cash equivalents balance.

### Liquidity and Capital Recourses

Our principal source of liquidity has been cash provided by offerings of securities. Our principal uses of cash have been for research and development and working capital. We anticipate these uses will continue to be our principal uses of cash in the future.

To date, we have financed our operations principally through offerings of securities exempt from the registration requirements of the Securities Act. We believe that our available resources and cash flow will be sufficient to meet our anticipated working capital needs for at least the next 10 months from the date of this prospectus. Notwithstanding the foregoing, we estimate that we will require substantial additional financing at various intervals in order to continue our research and development programs, including significant requirements for operating expenses including intellectual property protection and enforcement, for pursuit of regulatory approvals, and for commercialization of our products. We can provide no assurance that additional funding will be available on a timely basis, terms acceptable to us, or at all. In the event that we are unable to obtain such financing, we will not be able to fully develop and commercialize our technology. Our future capital requirements will depend upon many factors, including:

- continued scientific progress in our research and development programs;
- costs and timing of conducting clinical trials and seeking regulatory approvals and patent prosecutions;
- competing technological and market developments;
- our ability to establish additional collaborative relationships; and
- the effect of commercialization activities and facility expansions if and as required.

## Edgar Filing: GAMMACAN INTERNATIONAL INC - Form SB-2

Accordingly, we will be required to issue equity or debt securities or enter into other financial arrangements, including relationships with corporate and other partners, in order to raise additional capital. Depending upon market conditions, we may not be successful in raising sufficient additional capital for our long-term requirements. In such event, our business, prospects, financial condition, and results of operations could be materially adversely affected. See Risk Factors Risks Related to Our Business We will need additional capital in order to satisfy our business objectives .

The following factors, among others, could cause actual results to differ from those indicated in the above forward-looking statements:

timing of clinical studies and other business developments;

timing of the development of new products;

the adequacy of our cash balances to support our operations for specified periods of time; and

changes in the market opportunities for our products, as well as our ability to take advantage of those opportunities.

These factors or additional risks and uncertainties not known to us or that we currently deem immaterial may impair business operations and may cause our actual results to differ materially from any forward-looking statement. Although we believe the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee future results, levels of activity, performance or achievements. We are under no duty to update any of the forward-looking statements after the date of this report, to conform them to actual results, or to make changes in our expectations.

### Operating Activities

For the year ended September 30, 2006, net cash used in by operating activities was \$1,674,717, compared to \$1,142,310 for the year ended September 30, 2005. Such increase was primarily attributable to an increase in our net loss during the year ended September 30, 2006 of \$866,263, or 72.3%, to \$2,064,795, compared to \$1,198,532 during the year ended September 30, 2005.

For the three months ended December 31, 2006, net cash flow used in operating activities was \$366,161, compared to \$270,754 for the three months ended December 31, 2005. Such increase was primarily attributable to an increased in our net loss during the three months ended December 31, 2006 of 374,501, or 86.5%, to \$807,415, compared to \$432,914 during the three months ended December 31, 2005.

### Investing Activities

Net cash provided by investing activities was immaterial during the years ended September 30, 2006 and 2005 and during the three months ended December 31, 2006 and 2005.

### Financing activities

Through December 31, 2006, we incurred losses in an aggregate amount of \$4,584,828. To date, we have financed our operation from private placement of common stock and loans received. Through December 31, 2006, we raised a total of \$3,652,829, net of transaction costs, through private placements and received a total of \$350,000 in loans and we anticipate that additional financing will be through similar sources.

On February 27, 2007, we completed the closing of the 2007 Private Placement, whereby we sold an aggregate of 16,250,000 shares (the *Shares* ) of common stock and warrants to acquire an aggregate of 16,250,000 shares of common stock to accredited investors, as defined by Rule 501 under the Securities Act of 1933, as amended. The gross proceeds of the Private Placement were \$6,500,000, or \$0.40 per share of Common Stock. The Warrants are exercisable through February 27, 2012 at the exercise price of \$0.48 per share, subject to adjustment for, among other things, stock splits, stock dividends, reverse stock splits, certain fundamental transactions, issuances of equity securities at effective prices less than the then effective exercise price of the Warrants, and pro rata distributions to stockholders. Further, commencing at any time after the sixteen month anniversary from the date of issuance of the Warrants, if at the time of exercise there is no effective registration statement registering, or no current prospectus available for, the resale of the shares of common stock issuable upon the exercise of the Warrants, then the Warrants may also be exercised at such time on a cashless or net issuance basis. The Warrants permit the holders thereof remedies in the event that we shall fail to timely deliver shares of common stock issuable upon exercise of the Warrants following exercise. In connection with the 2007 Private Placement, we agreed to file a registration statement under the Securities Act to register the resale of the shares sold within 30 days following the date of the closing. We have agreed to use our best efforts to cause the registration statement to become effective within 90calendar days following the date of the closing (or, in the event of a review of such registration statement by the Securities and Exchange Commission, within 150 calendar days following the date of the closing). In the event that we should be required to limit the number

## Edgar Filing: GAMMACAN INTERNATIONAL INC - Form SB-2

of shares of common stock covered by such registration statement, we have agreed to file additional registration statements, which additional registration statements shall become effective within 60 days following the date on which such additional registration statement is required to be filed. In the event that we shall not comply with the timing requirements relating to filing and effectiveness of the registration statements, we shall be required to pay to the purchasers, as liquidated damages and not as a penalty, an amount equal to 1.5% of the purchase price per month with a maximum of 10% of the purchase price.

In connection with the 2007 Private Placement, the officers, directors, and holders of greater than 5% of the outstanding Common Stock agreed to restrictions on resale until the first anniversary of the effective date of the initial registration statement. The Private Placement was conducted in reliance upon exemptions from registration pursuant to Section 4(2) under the Securities Act of and Rule 506 promulgated thereunder.

### Planned Expenditures

As our technology is still in the development stage, it can be expected that there will be changes in some budgetary items. Our planned expenditures for the 12 months following the date of this prospectus include:

Category	Amount
Research & Development	\$ 4,593,000
General & Administrative Expenses	2,161,000
Finance Income, net	(55,000)
<b>Total</b>	<b>\$ 6,699,000</b>

### Contractual obligations

On May 18, 2006, we executed an agreement for the lease of our office facilities to which we entered on August 10, 2006. The new lease agreement is for a period of 36 months with an option to extend the lease for an additional 36 months period. The monthly lease payment is \$2,236. The future rental payments, on a fiscal year basis under the lease are \$26,827, 26,827 and 22,356 for the years ending September 30, 2007, 2008 and 2009 respectively.

On June 8, 2006, we entered into a lease agreement for our office facilities in New-York. The lease agreement is for a 12 month period with an automatic option to renew for another 60 days. The monthly lease payment is \$1,800. As security for our obligations under this agreement, we provided a security deposit in the amount of \$4,500. The future lease payments under this lease are \$14,400 for the year ending September 30, 2007

Rental expenses for the years ended September 30, 2006 and 2005, and the three months ended December 31, 2006 were \$18,307, \$8,148, and \$12,108, respectively.

From time to time, we retain consultants to assist us with various aspects of our business and compensate these consultants through the grant of options and warrants. Through the date of this prospectus, we have granted to consultants options and warrants exercisable for an aggregate of 1,264,781 shares of common stock (including 200,000 options granted to Scientific Advisory Board members).

On February 2, 2005, we entered into an agreement with Kamada Ltd. pursuant to which we ordered 9.5Kg of vigan liquid (IgG) for the purposes of the clinical trial. The total purchase price was set at \$332,500 (\$35/gram) which was paid according to a delivery schedule. As of September 30, 2006, we fulfilled our obligations under this agreement. During the three months ended December 31, 2006 we returned to Kamada Ltd. 1.2Kg of unused IgG and was refunded in the amount of \$42,000.

On December 13, 2005, we entered into a Research and Licensing Agreement with Tel Ha Shomer Medical Research Infrastructure and Services Ltd. ( THM ), pursuant to which we have agreed to provide THM with \$200,000 in funding for THM to conduct a research project relating to the mechanism of action for intravenous IgG, hyper-immune intravenous IgG and use of intravenous IgG as an anti-cancer treatment. To date we paid a total of \$200,000 to THM under this agreement. Pursuant to the agreement, THM has granted our subsidiary an exclusive world wide license to any resulting technology and know-how as described in the above mentioned agreement. We are currently in the process of extending this agreement for another year.

Israeli labor laws and agreements require payment of severance pay upon dismissal of an employee or upon termination of employment in certain other circumstances. Our subsidiary's severance pay liability to its employees mainly based upon length of

service and the latest monthly salary (one month's salary for each year worked). The liability is partly funded by purchase of insurance policies. The policies are our assets and under labor agreements, subject to certain limitations, they may be transferred to the ownership of the beneficiary employees.

**Quantitative and Qualitative Disclosures about Market Risk**

Our exposure to market risk for changes in interest rates relates primarily to corresponding future increases or decreases in the amount of interest income we expect to earn on our available funds for investment. We ensure the safety and preservation of our invested principal funds by limiting default risk, market risk, and reinvestment risk. We mitigate default risk by investing in high quality, short-term securities. We do not believe that changes in interest rates will have a material effect on our liquidity, financial condition or results of operations. We do not have interest rate risk in our outstanding debt and do not enter into interest rate swap agreements.

**Impact of Inflation**

We believe that our results of operations are not dependant upon moderate changes in inflation rates.

**Seasonality**

There are no material seasonal impacts to our results of operating, working capital, or cash flows. There is a modest increase in expenses during the first quarter of the fiscal year related to the holiday season.

## BUSINESS

## General

We are a life science company focused upon the development of immunotherapy and related approaches to treat cancer. To date, we have focused upon the use of intravenous immunoglobulin, or *IgG*, derived from human plasma provided by healthy donors to treat melanoma, prostate, and colon cancers. We believe that *IgG* may be the basis of more effective and efficient cancer treatment both, as mono- or combination therapy and adjuvant cancer treatments. Our business objective is to become a recognized leader in the development of immunotherapy and related approaches to treat cancer.

Based upon our research, it appears that non-specific *IgG* has anti-cancer properties. These properties appear to be due to both the immunomodulatory effects of *IgG*, as well as direct effects of certain antibody populations present in the *IgG* mixture. We have demonstrated a reduction in metastatic lesions and an improved survival in mice injected with human sarcoma or human melanoma cells when the animals were treated with *IgG*. There is also anecdotal clinical evidence suggesting that *IgG*-based therapy is efficacious in some human cancers, including melanoma, soft tissue sarcoma, and Kaposi's sarcoma. *IgG* has also been found to dramatically reduce the white blood count in chronic lymphocytic leukemia. Based upon the foregoing, we recognize that *IgG*-based therapies possess the following distinctive features as a result of an excess of thirty years of clinical experience from treating immune deficiency and autoimmune diseases as well as manufacturing know-how:

*Superior product safety* - *IgG* is safe and non-toxic; and

*Minimal manufacturing risk* - The manufacturing process for *IgG* is well established and optimized as a result of the numerous products that have been developed from human plasma to date.

We have developed and are developing additional product candidates on the basis of our research and development to date. Our lead product candidate, VitiGam, is a first-in-class anti-cancer immunotherapy derived entirely from the plasma of donors with vitiligo, a benign autoimmune skin condition affecting up to 2% of the general population. We are initially utilizing VitiGam to target melanoma. We have demonstrated that plasma from individuals with vitiligo contains anti-melanoma activities, and we are using this discovery to develop VitiGam for the treatment of Stage III and Stage IV melanoma. The incidence of melanoma, despite new developments in other cancers, continues to increase and has experienced little if any therapeutic progress in the last ten years. In addition to VitiGam, we are developing the following:

*Adjuvant therapies* - *IgG*-based adjuvant therapies to modulate both the proliferation of cancer cells and the metastasis of tumor cells.

*Next generation (recombinant) VitiGam* - VitiGam is currently manufactured as a mixture that largely consists of *IgG* molecules (antibodies of the *IgG* type). We anticipate that within that mixture, only a subset of *IgG* molecules will be responsible for the biological activity of VitiGam. Next generation VitiGam will be composed of *only the IgGs required to exert the anti-melanoma effect*, thereby creating a more effective compound. Identifying the relevant *IgGs* will also allow cost reductions.

*Cancer Vaccines Based on VitiGam* - An off-the-shelf cancer vaccine is considered a silver bullet in cancer therapy. We anticipate that based on our evolving understanding of the mechanism associated with VitiGam, we may be in a position to develop such a vaccine in the future.

We have embarked on a non-FDA Phase II clinical trial to test the safety and efficacy of standard (e.g., collected and manufactured from healthy donors) *IgG* in patients with three types of late stage malignancies that have failed to respond to all other standard therapies as well as certain experimental therapies. The cancers evaluated in the non-FDA, open-label Phase II trial were: melanoma, prostate, and colon cancer. Patients in the study receive standard *IgG* at a consistent dose every 28 days (a cycle). Patients were evaluated by standard criteria for tumor progression and other markers after three cycles, and if stable or improved, such treatment continues for three additional cycles. We expect the study to close by mid-year 2007. Results from melanoma patients are promising and can be summarized as follows:

No serious untoward effects of *IgG* were noted; and

One patient with melanoma (out of 8) and one with prostate cancer (out of 9) have been stable or improved at six cycles of therapy or beyond. Indeed, the melanoma patient has completed twelve cycles, after which tumor progression was noted.

## Edgar Filing: GAMMACAN INTERNATIONAL INC - Form SB-2

In addition to the body of pre-clinical evidence accumulated using vitiligo derived plasma or IgG, observations with melanoma patients in this study provide a clinical foundation for the current plan to develop VitiGam .

We plan to file an Investigational New Drug Application, or *IND*, for VitiGam in late 2007. We believe that the FDA is well acquainted with IgG-based therapies and their non-toxic characteristics from a long history of approvals of products based on plasma.

We own a significant portfolio of patents and patent applications covering our technology and are aggressively protecting our technology developments on a worldwide basis. In addition to protecting our intellectual property, we are currently applying for a U.S. Orphan Drug Status designation for VitiGam . Orphan Drug Status is granted by the U.S. FDA to promote the development of drugs for diseases affecting less than 200,000 people in the United States. This status will provide, if granted, a seven year period of market exclusivity as well as regulatory and income tax advantages. We are continuously evaluating in-licensing and/or acquisition opportunities to broaden its product portfolio and technology base.

We are led by a highly-experienced management team knowledgeable in applying immunotherapy for the treatment of cancer. Our management team has access to an internationally recognized Scientific Advisory Board whose members are thought-leaders in their respective areas. Our Chief Scientist, Professor Yehuda Shoenfeld, M.D., FRCP, is a world-recognized immunologist and the innovator responsible for much of our IgG-based technology development and know-how.

### Background

#### Current Approaches to Cancer Therapy

Cancer is a malignant condition which starts in a cell of a specific organ in the body. If left untreated, the cancer will grow in size, affect the organ, and ultimately spread (metastasize) to other organs throughout the body where it will also grow and affect the vital function of the organs to which it has spread. Malignant cancers are ultimately terminal because they affect vital organ function. The rate at which these events occur depends on the natural course of the specific cancer, host factors such as the general health of the patient, his or her age, the ability of his or her immune system to deal with the cancer, and other factors.

In general and whenever possible, primary cancers are surgically removed, particularly if the tumor has not spread beyond the site where it originated. In most cases excision will be curative if the cancer has not spread (e.g. such is the case with early stage melanomas). For some cases, adjuvant chemo and/or radiation therapy may be indicated, even when the primary tumor does not appear to have spread elsewhere. Once the cancer has spread beyond its primary site, a variety of therapeutic options are available depending on the location and extent of metastases and the natural history of the cancer. Patient factors also play a role. Therapeutic options can be one or more of the following:

Further surgical removal;

Chemotherapy the use of drugs designed to destroy cancer cells;

Radiotherapy the use of radiation to kill the cancer. Radiation may be administered externally (e.g. x-ray) or via a drug that targets the cancer (brachytherapy);

Hormonal therapy Some cancers are hormone-sensitive (e.g. prostate and breast);

Immunotherapy the use of drugs such as antibodies or cancer vaccines that attack the cancer immunologically; and

Combinations of any of the above.

More recently, the use of antibodies plus chemotherapy has emerged as a promising approach to treat cancers.

#### Use of Immunotherapy in Cancer Treatment

Cancer develops from a single abnormal cell. Most individuals immune systems recognize the cancer cell as a foreign invader and destroy it. Under certain conditions, however, when the individual s immune system is inadequate or when the cancerous cell fools the immune system into treating the cell as normal tissue, the cancerous cell will multiply unchecked and over time cancer will develop. Because of the importance of the immune system in protecting against cancer in the natural state, there has been extensive research dedicated to enlisting immunological approaches to treat cancer. These may be summarized as follows:

*Immunoglobulin or Antibody-Based Treatments*

Antibodies are plasma-derived proteins (also called immunoglobulins) that bind or interact with one specific (unique) target. The body synthesizes antibodies to destroy and eliminate any cell or organism that bears (expresses) the target to which the immunoglobulin is specific. After the antibodies have bound to their targets, immune cells (B and T cells and macrophages) effect the destruction of the target cell and remove the debris.

Scientists have harnessed the body's tools and are now able to make antibodies against virtually any target. Antibodies are manufactured outside the body, usually in cell lines, in large manufacturing plants. These antibodies are generally monoclonal - and may affect the cancer in a variety of ways:

A monoclonal antibody may attack the tumor cell itself. An example of such a drug is Herceptin trastuzumab (it binds to the HER-2 receptor which is over-expressed in cancerous breast tissue), used in the treatment of certain patients with breast cancer.

The antibody may react against a substance that is secreted by the tumor to enhance its own cancerous capabilities (for example to stimulate the formation of new blood vessels). Avastin bevacizumab (it targets VEGF, a growth factor that stimulates blood vessel formation or angiogenesis) used to treat colon and other cancers, is an example of such a drug.

The antibody may attack a target central to the modulation of the immune system. Although there are no approved therapies available for cancer, there are several products in late stage development including anti-CTLA4 antibodies (Antegren natalizumab targets a receptor in the Integrin family and is approved for the treatment of multiple sclerosis).

GammaCan is developing immunoglobulin or antibody-based therapies. We use more than one antibody which we understand enhances our product vis-à-vis the others discussed above. Moreover, we harvest IgG from human donors which we think makes our IgG-based therapy safer than others. Our donors are considered healthy and are extensively screened for possible diseases or contaminants.

Immunoglobulins are also used in combination with chemotherapeutic drugs as an adjuvant therapy. We are active in developing this approach as well.

*Cell-Based Therapies*

There are two basic approaches to this therapy. The first involves harvesting the patient's own immune or other cells, manipulating them outside the body and then returning them to the patient as an anti-cancer therapy. A second approach involves taking established immune or other cells and giving them to a cancer patient. Clinical and commercial development of cell-based therapies has been challenging and there are no commercial products in the market at present.

*Tumor Vaccinations*

This is the use of tumor extracts or other substances related to the tumor to induce the patient's immune system to act against the tumor. Such vaccines would work in a manner similar to any other vaccine (e.g. rubella, varicella) except that the target is an internal invader, the cancer, rather than an external pathogen such as a virus. To date, only two cancer vaccines are commercially available (Melacine, sold by GlaxoSmithKline in Canada to treat melanoma and Merck's Gardasil human papilloma virus vaccine to prevent cervical cancer). We are also pursuing novel ways to leverage our knowledge of the immune system, IgG biology, and the cellular immune response in order to develop cancer vaccines.

*Immune Modulators*

Small stretches of nucleic acids have been shown to be *immunostimulatory*. These molecules affect the innate immune response by means of so called pattern recognition receptors. Several therapies based on this concept are in clinical development.

**Stage III and Stage IV Melanoma**

Melanoma is a serious skin cancer that originates from the transformation (e.g., conversion from normal cells to cancerous cells) of melanocytes, the skin's pigment (melanin) producing cells. In 2002, the American Joint Committee on Cancer (AJCC) published a revised staging system for melanoma comprising five different stages of the degree of the disease (Stages 0 through IV).

## Edgar Filing: GAMMACAN INTERNATIONAL INC - Form SB-2

Current therapies for melanoma, especially those available for the treatment of Stage III and Stage IV metastatic melanoma, are unsatisfactory. Chemotherapy, with or without the addition of biologics have improved survival only slightly, if at all, and the overall prognosis in these patients is poor. Interferon (IFN), interleukin-2 (IL-2) and dacarbazine are the most commonly prescribed therapeutics for the treatment of Stage III and Stage IV melanoma. Their efficacy is moderate and these drugs are plagued by significant side effects. Newer therapies, including monoclonal antibodies and vaccines, are still in development stage. Accordingly, new approaches for the treatment of melanoma are being actively pursued and metastatic melanoma remains a major unmet medical need.

According to the *American Cancer Society (ACS)*:

there were 62,160 new cases melanoma diagnosed in the U.S. during 2006; and

the incidence of melanoma in the U.S. has doubled since 1973 and has doubled around the world as well.

If recognized early, melanoma is curable by surgery alone. Most new cases are, in fact, cured surgically. For Stage 0, simple excision is 100% effective. For Stage I melanoma, surgery is also almost 100% effective.

Melanoma can be a particularly aggressive cancer. Although melanoma accounts for only 4% of all skin cancers, it accounts for 80% of all skin cancer deaths. Once the disease has spread, the prognosis worsens dramatically. There have been no significant advances in improving the survival of patients with advanced melanoma (Stages II to IV) in the ten last years and limited success in improving their quality of life. We are committed to developing better and safer immune mediated approaches to treat melanoma and other cancers.

We believe that the U.S. melanoma market will continue to grow significantly in the next few years as a result of:

ozone depletion;

increased exposure to the sun; and

population growth in the sunbelt.

Market researchers estimate the number of melanoma cases will grow from 731,000 cases in 2004 to over 1,000,000 cases in 2010.

Accordingly to Navigant Consulting, the worldwide melanoma market is expected to double from \$265 million in 2004 to over \$600 million in 2009. Experts estimate that it will exceed \$1 billion in 2010. The U.S. accounts for close to 50% of the worldwide melanoma market.

### **Intravenous Immunoglobulin (IgG)**

Intravenous immunoglobulins are manufactured from human plasma. More than 12 million liters of source plasma are collected annually in the U.S. Virtually all this plasma is collected from paid donors.

The plasma industry has existed for more than 50 years and has developed substantial experience and know-how in methods to attract, recruit and retain donors. The industry recruits individuals to donate plasma for the manufacture of standard plasma products as well as other individuals who agree to be immunized prior to the donation of plasma for the production of specific immunoglobulin preparations (e.g. rabies immune globulin, Rh immune globulin, hepatitis B immune globulin, etc.). This also includes recruiting specific patients whose plasma contains commercially valuable constituents, particularly for use as control reagents in the diagnostic field and for research (e.g. patients with anti-mitochondrial antibodies, patients with various hyperglobulinemic syndromes, etc.).

Plasma for manufacture into *plasma derivatives* is collected by *plasmapheresis*. This is a process where the donor is connected to a machine for about 40 minutes. The machine extracts plasma, and returns the blood's cellular components to the donor automatically. Plasma collected by this approach is termed *source plasma*. On average, about 800 to 850 mls of plasma are harvested per donation. Donors may donate twice per week and are monitored with an FDA-mandated series of tests with every donation which includes a plasma protein determination and testing for transmissible diseases. There is substantial literature going back more than 30 years indicating that regular plasmapheresis donors suffer no ill effects from this activity.

## Strategy

Our business objective is to become a recognized leader in the development of immunotherapy and related approaches to treat cancer. We intend to pursue our objective by implementing the following key strategies:

### **Market Introduction of VitiGam Through Its Designation as an Orphan Drug**

We are currently applying for a U.S. Orphan Drug Status designation for VitiGam . Orphan Drug Status is granted by the FDA to promote the development of drugs for diseases affecting less than 200,000 people in the U.S. If granted, Orphan Drug Status will provide us with the following:

seven year period of market exclusivity;

waiver of fees required for FDA filings and registrations; and

tax incentives for up to 50% of clinical development costs.

Based on the precedent of other innovators' drugs being awarded Orphan Drug status, and informal advice received during our 2006 pre-IND meeting with the FDA, we feel comfortable with pursuing an Orphan Drug Status designation for VitiGam .

### **Leverage Our Capabilities in Order to Bring To Market Novel and Improved Cancer Therapy Products**

We intend to leverage our IgG-based technology, the expertise of our development team, and the expertise of GammaCan's research and development partner, Sheba Hospital in Tel Ha Shomer, and Professor Yehuda Shoenfeld, M.D., F.R.C.P., a world renowned immunologist.

### **Leverage Our Research and Development Efforts to Attract Collaborative Partners to Assist Us**

We intend to utilize our research and development efforts to attract collaborative partners with expertise in, and resources necessary for, clinical trials and manufacturing. By entering into collaborative arrangements, we anticipate that we will gain access to sales, marketing, and other resources to expedite commercialization of our product candidates.

### **Continue to Leverage Our Technology to Develop Additional Products**

We intend to build upon our technology to develop the following:

*Adjuvant therapies* - IgG-based adjuvant therapies to modulate both the proliferation of cancer cells and the metastasis of tumor cells.

*Next generation (recombinant) VitiGam* - VitiGam is currently manufactured as a mixture that largely consists of IgG molecules (antibodies of the IgG type). We anticipate that within that mixture, only a subset of IgG molecules will be responsible for the biological activity of VitiGam . Next generation VitiGam will be composed of *only the IgGs required to exert the anti-melanoma effect*, thereby creating a more effective compound. Identifying the relevant IgGs will also allow cost reductions.

*Cancer Vaccines Based on VitiGam* - An off-the-shelf cancer vaccine is considered a silver bullet in cancer therapy. We anticipate that based on our evolving understanding of the mechanism associated with VitiGam , we may be in a position to develop such a vaccine in the future.

## **Research and Development Program**

### **Foundational Research**

Prior to the acquisition of ARP by us, ARP scientists have conducted extensive pre-clinical research to test the effectiveness of IgG immunotherapy in treating cancer. They have employed mouse models of various types of cancers as well as various types of human cancers introduced into these mice. They have investigated the effectiveness of IgG treatment at various stages of disease progression, using alternative dosages and routes of administration. These pre-clinical and preliminary experiments have shown that IgG treatment prevents metastases and tumor recurrence for a broad spectrum of cancers with little or no side effects.

## Edgar Filing: GAMMACAN INTERNATIONAL INC - Form SB-2

Most pre-clinical experiments were conducted using a standard dosage of 2.0 grams per kilogram body weight. Additional experiments have shown that our proposed therapy is effective with low doses of IgG representing 1% (20 milligrams per kilogram body weight) of the standard IgG dosage. These experiments suggest that IgG treatment could be affordably administered as a preventative measure. IgG has been shown in mice experiments to be effective when administered subcutaneously, intravenously, or through intra-cavitary injection. The option of alternative routes of administration dramatically improves ease-of-use and enables the treatment of previously untreatable conditions such as intra-peritoneal spread (i.e. ovarian carcinoma). IgG has also been shown to be effective when administered as a whole molecule or as a fraction.

### Product Development

Our near term focus is to demonstrate efficacy of IgG-based cancer immunotherapy in human clinical trials. Efficacy is the ability of a drug or other treatments to produce the desired result when taken by its intended users. If ultimately proven to be successful, and we can provide no assurance that it will be, we could be well-positioned to enter a licensing agreement with one or more major pharmaceutical partners for late stage clinical development and/or commercial market development and sales.

IgG immunotherapy will require regulatory approval before being commercially marketed for human therapeutic use. Clinical trials generally include three phases that together may take several years to complete. Phase I clinical studies (toxicity trials) are primarily conducted to establish the safety and determine the maximum tolerated dose, or MTD. Phase II studies are designed to determine preliminary efficacy and establish dosing. Phase III studies are conducted to demonstrate therapeutic efficacy in a statistically significant manner at the levels of optimal dose, method or route of delivery into the body, and the schedule of administration. Once clinical trials are completed successfully, products may receive regulatory approval. See Business Government Regulation .

Since July 2005, we have been conducting a Non FDA, open-label Phase II clinical trial (GCAN-01) in humans to demonstrate clinical efficacy of IgG-based immunotherapy in three major cancers: colon, prostate, and melanoma. To date, 32 patients have been enrolled, out of which 27 have actually received the IgG treatment. This Phase II open label clinical trial is being conducted at three medical centers in Israel. We anticipate that final results of this clinical trial will likely be available during 2007 and that the trial is due to be completed during 2007. We may continue to monitor patients for a number of years after the trial in order to collect additional evidence of efficacy and monitor potential benefits or adverse effects of the IgG-based treatment. If successful or promising, and at this preliminary stage we can provide no assurance they will be, we may utilize the results of these clinical trials to enter into discussions with a major pharmaceutical partner and plasma-based product manufacturers to work with us to potentially commercialize this IgG based product. Prior to commercialization, we, together with any collaborative partners, will be required to conduct Phase III clinical trials in accordance with local regulatory requirements. Such trials may be long-term trials and may require substantial financial resources that we do not presently possess.

We are also in the process of applying for a U.S. Investigational New Drug Application ( IND ) with the FDA for VitiGam , our next generation IgG-based product and a first-in-class anti-cancer immunotherapy. We expect that VitiGam will enter the clinic under a U.S. IND in the near future. VitiGam is designed to target melanoma patients with stage III and IV melanoma.

VitiGam is an intravenous IgG formulation derived from IgG manufactured from plasma collected from donors with vitiligo, a benign autoimmune skin condition affecting up to 2% of the general population. GammaCan scientists have shown that vitiligo derived IgG (VitiGam ) contains anti-melanoma activities in substantially higher quantities than those found in IgG from other donors. This enriched vitiligo IgG formulation has potent anti-melanoma activity in both *in vitro* and *in vivo* melanoma models. Preliminary data from the ongoing, open-label Phase II trial of GCAN 101 ( standard IgG) in melanoma patients further support the rationale underling the VitiGam program.

We intend to conduct a Phase I/2 trial under a U.S. IND to evaluate VitiGam in patients with stage III and IV melanoma. We estimate that the costs of this Phase I/2 will be substantial; the timing of initiation of the Phase I/2 trials will be based on several major factors, including our ability to attract sufficient financing on acceptable terms.

We are also contemplating conducting additional clinical trials to test new formulations and/or combinations of IgG-based immunotherapies and to test these formulations and/or methods for different cancers at different stages of disease progression with varying dosages and routes of administration. To achieve this we may elect to partner with a pharmaceutical company to conduct these further clinical trials, in order to attain broad-based regulatory approval.

We expect that it will take a number of years to receive final approval and registration of our IgG preparation for commercial use as an anti-cancer agent. Our strategy is to collaborate with a suitable partner to support late stage (Phase III) clinical development, registration and/or sales for our IgG-based cancer products.

## Edgar Filing: GAMMACAN INTERNATIONAL INC - Form SB-2

We have spent approximately \$1.7Million through December 31, 2006 on our research and development.

### Raw Materials

IgGs are manufactured from human plasma. More than 12 million liters of source plasma are collected annually in the U.S. Virtually all this plasma is collected from paid donors. The U.S. supplies the majority of the plasma needed for the in excess of \$6 billion plasma-derivatives market worldwide. The largest producers of IgG are CSL-Behring, a subsidiary of CSL LTD., Baxter Bioscience, a business of Baxter International Inc., and Talecris Biotherapeutics, Inc. (formerly the plasma business of Bayer A.G.'s Biological Products business unit). In addition, there are numerous smaller suppliers serving the market. We generally depend upon a limited number of suppliers for our IgGs. Although alternative sources of supply for these materials are generally available, we could incur significant costs and disruptions in changing suppliers. The termination of our relationship with our suppliers or the failure of these suppliers to meet our requirements for raw materials on a timely and cost-effective basis could materially adversely affect our business, prospects, financial condition and results of operations.

### Patents and Licenses

To the best of our knowledge, we are the only entity to own issued patents covering the use of IgG-based therapies for the treatment of cancer. We have been issued two U.S. patents that cover the use of basic IgG to treat cancers.

*U.S. Patent 5,562,902, Immunotherapeutic Method of Treating Cancerous Disease by Administration of Intravenous Immunoglobulin* claims the use of intravenous IgG or fragments to inhibit melanoma metastasis. The claims further recite the intracavitary and subcutaneous administration of intravenous IgG or fragments to inhibit tumor metastasis. The patent was issued on October 8, 1996.

*US Patent 5,965,130, Immunotherapeutic Method of Treating Cancerous Disease by Administration of Gamma Globulins* claims the use of 2g/kg bodyweight/month to inhibit the growth of a primary tumor or metastases. The claims further recite the intracavitary and subcutaneous administration of intravenous IgG or fragments to inhibit tumor metastasis. The patent was issued on October 12, 1999.

In December 2006, we filed two Continuations in Part ( *CIPs* ) to these patents. The first CIP is titled *Administration of Gamma Globulins to Treat Metastatic Melanoma* and builds on the pre-clinical work conducted at GammaCan and substantiates these findings with data from ongoing clinical trials. The second CIP is titled *Administration of Gamma Globulins to Treat Cancer* and provides experimental data supporting the use of IgG-based therapy for colorectal cancers.

Consistent with a strategy to seek protection in key markets worldwide, we have been issued or are prosecuting national counterparts to its issued U.S. patents.

We have filed two additional U.S. patent applications that cover both composition of matter and methods for using IgG manufactured from donors with Vitiligo (VitiGam) and its use in melanoma. The prosecution of these and related patents is taking place in the U.S. and worldwide.

We have filed one additional U.S. patent application covering IgG-based therapy in an undisclosed field of use.

Our patent strategy is as follows:

Aggressively protect all current and future technological developments to assure strong and broad protection by filing patents and/or continuations in part as appropriate;

Protect technological developments at various levels, in a complementary manner, including the base technology, as well as specific applications of the technology; and

Establish comprehensive coverage in the U.S. and in all relevant foreign markets in anticipation of future commercialization opportunities

We believe that our success will depend in part on our ability to obtain patent protection for our Intellectual Property. Our patent coverage includes a wide range of matters including but not limited to: a novel method of administering to a mammal a preparation of IgG for inhibiting tumor metastasis, for treating primary tumors, and for a broad spectrum of cancerous diseases. Our patents will both expire in November 2014.

We believe anyone selling IgG for treatment of cancer is subject to these patents. However, the validity and breadth of claims

## Edgar Filing: GAMMACAN INTERNATIONAL INC - Form SB-2

in medical technology patents involve complex legal and factual questions and, therefore, may be highly uncertain. No assurance can be given that any patents based on pending patent applications or any future patent applications by us will be issued, that the scope of any patent protection will exclude competitors or provide competitive advantages to us, that any of the patents that have been or may be issued to us will be held valid if subsequently challenged or that others will not claim rights in or ownership of the patents and other proprietary rights held or licensed by us. Furthermore, there can be no assurance that others have not developed or will not develop similar products, duplicate any of our technology or design around any patents that have been or may be issued to us. Since patent applications in the United States are maintained in secrecy for the initial period of time following filing, we also cannot be certain that others did not first file applications for inventions covered by our pending patent applications, nor can we be certain that we will not infringe any patents that may be issued to others on such applications.

In addition we have pending applications for the use of IgG based therapies for the treatment of melanoma and other additional U.S. and international patents and or patent applications. In October 2006 we filed a patent application for the utilization of IgG therapy as a potential treatment for Avian Influenza.

We also rely on trade secrets and unpatentable know-how that we seek to protect, in part, by confidentiality agreements. Our policy is to require our employees, consultants, contractors, manufacturers, outside scientific collaborators and sponsored researchers, board of directors, technical review board and other advisors to execute confidentiality agreements upon the commencement of employment or consulting relationships with us. These agreements provide that all confidential information developed or made known to the individual during the course of the individual's relationship with us is to be kept confidential and not disclosed to third parties except in specific limited circumstances. We also require signed confidentiality or material transfer agreements from any company that is to receive our confidential information. In the case of employees, consultants and contractors, the agreements provide that all inventions conceived by the individual while rendering services to us shall be assigned to us as the exclusive property of our company. There can be no assurance, however, that all persons who we desire to sign such agreements will sign, or if they do, that these agreements will not be breached, that we would have adequate remedies for any breach, or that our trade secrets or unpatentable know-how will not otherwise become known or be independently developed by competitors.

Our success will also depend in part on our ability to commercialize our technology without infringing the proprietary rights of others. Although we have conducted freedom of use patent searches no assurance can be given that patents do not exist or could not be filed which would have an adverse affect on our ability to market our technology or maintain our competitive position with respect to our technology. If our technology components, products, processes or other subject matter are claimed under other existing United States or foreign patents or are otherwise protected by third party proprietary rights, we may be subject to infringement actions. In such event, we may challenge the validity of such patents or other proprietary rights or we may be required to obtain licenses from such companies in order to develop, manufacture or market our technology. There can be no assurances that we would be able to obtain such licenses or that such licenses, if available, could be obtained on commercially reasonable terms. Furthermore, the failure to either develop a commercially viable alternative or obtain such licenses could result in delays in marketing our proposed technology or the inability to proceed with the development, manufacture or sale of products requiring such licenses, which could have a material adverse affect on our business, financial condition and results of operations. If we are required to defend ourselves against charges of patent infringement or to protect our proprietary rights against third parties, substantial costs will be incurred regardless of whether we are successful. Such proceedings are typically protracted with no certainty of success. An adverse outcome could subject us to significant liabilities to third parties and force us to curtail or cease our development and commercialization of our technology.

### Partnerships and Collaborative Arrangements

We anticipate that we will enter into strategic relationships for plasma collection and for the manufacture of VitiGam . There is considerable specialized expertise associated with the collection and manufacture (fractionation) of plasma products. There are also significant expenses, capital expenditures and infrastructure involved in the manufacture of plasma. We believe that working together with strategic partners will expedite product formulation, production and approval.

On December 13, 2005, we entered into a Research and Licensing Agreement with Tel Ha Shomer Medical Research Infrastructure and Services Ltd. ( *THM* ), pursuant to which we have agreed to provide THM with \$200,000 in funding for THM to conduct a research project relating to the mechanism of action for intravenous IgG, hyper-immune intravenous IgG and use of intravenous IgG as an anti-cancer treatment. To date we paid a total of \$200,000 to THS under this agreement. Pursuant to the agreement, THM has granted our subsidiary an exclusive world wide license to any resulting technology and know-how as described in the above mentioned agreement.

In October 2006, we entered into a strategic agreement with Life Therapeutics, Inc. ( *Life* ) for the purpose of collecting source plasma from individuals with Vitiligo. Under the agreement, Life will be responsible for the collection, storage, quality control, import/export, delivery, and supply of plasma to us in such amounts as required to complete Phase I and Phase II clinical trials for VitiGam . Life is a U.S./Australian company that specializes in niche therapeutic hyperimmune products. Life currently operates 13 plasma collection centers in eight American states and has considerable experience recruiting and collecting hard to find plasma

## Edgar Filing: GAMMACAN INTERNATIONAL INC - Form SB-2

donors. Life is headquartered in Atlanta, Georgia and operates facilities in the U.S. and in Australia. In the event that Life, for any reason, fails to provide us with its total required plasma for the timely initiation and completion of Phase I and Phase II clinical testing for VitiGam, we will have the unrestricted right to acquire plasma from other sources. We recognize the importance of having access to sufficient plasma for the clinical development of VitiGam as well as for commercial sale. To assure adequate and timely access to plasma, we have in addition to Life, entered into discussions with other FDA-approved plasma collectors. Life and GammaCan have been approved for a \$1 million dollar grant for VitiGam's Phase I and Phase II clinical program by the BIRD Foundation, an Israeli Government non-profit organization that promotes U.S./Israeli joint programs.

We have engaged Theradex, a highly-regarded U.S.-based contract research organization, or CRO, with extensive experience in clinical trial design and execution in melanoma to help design the Phase I and Phase II studies. A full protocol is being written and is currently undergoing a review by oncologists, bio-statisticians, consultants, our Scientific Advisory Board, and another highly-experienced CRO called INC Research. We are in the final stages of completing negotiating with INC, who has been engaged to assist us in conducting our clinical trials.

We have engaged BioSolutions Services, LLC (BioSolutions), for various projects to assist the Corporation with the commercialization of its anti-cancer immunotherapy to treat metastatic cancer. The first project relates to regulatory consulting services to be provided by Biosolutions in connection with the application for an IND with the US FDA for VitiGam.

### Government Regulation

#### The Drug and Therapeutic Product Development Process

The FDA requires that pharmaceutical and certain other therapeutic products undergo significant clinical experimentation and clinical testing prior to their marketing or introduction to the general public. Clinical testing, known as *clinical trials* or *clinical studies*, is either conducted internally by life science, pharmaceutical, or biotechnology companies or is conducted on behalf of these companies by contract research organizations.

The process of conducting clinical studies is highly regulated by the FDA, as well as by other governmental and professional bodies. Below we describe the principal framework in which clinical studies are conducted, as well as describe a number of the parties involved in these studies.

*Protocols.* Before commencing human clinical studies, the sponsor of a new drug or therapeutic product must submit an investigational new drug application, or IND, to the FDA. The application contains what is known in the industry as a *protocol*. A protocol is the blueprint for each drug study. The protocol sets forth, among other things, the following:

- who must be recruited as qualified participants;

- how often to administer the drug or product;

- what tests to perform on the participants; and

- what dosage of the drug or amount of the product to give to the participants.

*Institutional Review Board.* An institutional review board is an independent committee of professionals and lay persons which reviews clinical research studies involving human beings and is required to adhere to guidelines issued by the FDA. The institutional review board does not report to the FDA, but its records are audited by the FDA. Its members are not appointed by the FDA. All clinical studies must be approved by an institutional review board. The institutional review board's role is to protect the rights of the participants in the clinical studies. It approves the protocols to be used, the advertisements which the company or contract research organization conducting the study proposes to use to recruit participants, and the form of consent which the participants will be required to sign prior to their participation in the clinical studies.

*Clinical Trials.* Human clinical studies or testing of a potential product are generally done in three stages known as phase I through phase III testing. The names of the phases are derived from the regulations of the FDA. Generally, there are multiple studies conducted in each phase.

*Phase I.* Phase I studies involve testing a drug or product on a limited number of healthy participants, typically 24 to 100 people at a time. Phase I studies determine a product's basic safety and how the product is absorbed by, and eliminated from, the body. This phase lasts an average of six months to a year.

*Phase II.* Phase II trials involve testing up to 200 participants at a time who may suffer from the targeted disease or condition. Phase II testing typically lasts an average of one to two years. In phase II, the drug is tested to determine its safety and effectiveness for treating a specific illness or condition. Phase II testing also involves determining acceptable dosage levels of the drug. If phase II studies show that a new drug has an acceptable range of safety risks and probable effectiveness, a company will continue to review the substance in phase III studies.

## Edgar Filing: GAMMACAN INTERNATIONAL INC - Form SB-2

*Phase III.* Phase III studies involve testing large numbers of participants, typically several hundred to several thousand persons. The purpose is to verify effectiveness and long-term safety on a large scale. These studies generally last two to three years. Phase III studies are conducted at multiple locations or sites. Like the other phases, phase III requires the site to keep detailed records of data collected and procedures performed.

*New Drug Approval.* The results of the clinical trials are submitted to the FDA as part of a new drug application ( NDA ). Following the completion of phase III studies, assuming, the sponsor of a potential product in the United States believes it has sufficient information to support the safety and effectiveness of its product, it submits an NDA to the FDA requesting that the product be approved for marketing. The application is a comprehensive, multi-volume filing that includes the results of all clinical studies, information about the drug s composition, and the sponsor s plans for producing, packaging and labeling the product. The FDA s review of an application can take a few months to many years, with the average review lasting 18 months. Once approved, drugs and other products may be marketed in the United States, subject to any conditions imposed by the FDA.

*Phase IV.* The FDA may require that the sponsor conduct additional clinical trials following new drug approval. The purpose of these trials, known as phase IV studies, is to monitor long-term risks and benefits, study different dosage levels or evaluate safety and effectiveness. In recent years, the FDA has increased its reliance on these trials. Phase IV studies usually involve thousands of participants. Phase IV studies also may be initiated by the company sponsoring the new drug to gain broader market value for an approved drug. For example, large-scale trials may also be used to prove effectiveness and safety of new forms of drug delivery for approved drugs. Examples may be using an inhalation spray versus taking tablets or a sustained-release form of medication versus capsules taken multiple times per day.

*Biologics License Application.* Once clinical trials are completed and the results tabulated and analyzed, a Biologics License Application ( BLA ) is submitted to the FDA. The application presents to FDA reviewers the entire history or the whole story of the drug product including animal studies/human studies, manufacturing, and labeling/medical claims. Before the FDA applies its scientific technical expertise to the review of the application, it will decide if the application gets a priority review or a standard review . This classification determines the review timeframe. A priority review is for a drug that appears to represent an advance over available therapy, whereas, a standard review is for a drug that appears to have therapeutic qualities similar to those of an already marketed product. Generally, an advisory committee (the Oncology Drug Advisory Committee, ODAC) will review the BLA and make a recommendation to the FDA. This outside advice is sought so that the FDA will have the benefit of wider expert input. The FDA usually agrees with the advisory committee decisions but they are not binding.

The FDA takes action on the BLA after their review is complete. There are three possible actions to be taken by the review team:

Approved This indicates to a company that they may now market in the U.S.;

Not Approved This tells a company that the product may not be marketed in the U.S. and is accompanied by a detailed explanation as to why; and

Approvable This indicates that the FDA is prepared to approve the application upon the satisfaction of certain conditions. These drug products may not be legally marketed until the deficiencies have been satisfied, as well as any other requirements that may be imposed by the FDA.

The drug approval process is time-consuming, involves substantial expenditures of resources, and depends upon a number of factors, including the severity of the illness in question, the availability of alternative treatments, and the risks and benefits demonstrated in the clinical trials.

*Orphan Drug Act.* The Orphan Drug Act provides incentives to develop and market drugs ( Orphan Drugs ) for rare disease conditions in the United States. A drug that receives Orphan Drug designation and is the first product to receive FDA marketing approval for its product claim is entitled to a seven-year exclusive marketing period in the United States for that product claim. A drug which is considered by the FDA to be different than such FDA-approved Orphan Drug is not barred from sale in the United States during such exclusive marketing period even if it receives approval for the same claim. We can provide no assurance that the Orphan Drug Act s provisions will be the same at the time of the approval, if any, of our products.

### Other Regulations

Various Federal and state laws, regulations, and recommendations relating to safe working conditions, laboratory practices, the experimental use of animals, and the purchase, storage, movements, import, export, use, and disposal of hazardous or potentially hazardous substances, including radioactive compounds and infectious disease agents, used in connection with our research or applicable to our activities. They include, among others, the United States Atomic Energy Act, the Clean Air Act, the Clean Water Act, the Occupational Safety and Health Act, the National Environmental Policy Act, the Toxic Substances Control Act, and

Resources Conservation and Recovery Act, national restrictions on technology transfer, import, export, and customs regulations, and other present and possible future local, state, or federal regulation. The extent of governmental regulation which might result from future legislation or administrative action cannot be accurately predicted.

## Competition

### Competition in General

Competition in the area of biomedical and pharmaceutical research and development is intense and significantly depends on scientific and technological factors. These factors include the availability of patent and other protection for technology and products, the ability to commercialize technological developments and the ability to obtain governmental approval for testing, manufacturing and marketing. Our competitors include major pharmaceutical, medical products, chemical and specialized biotechnology companies, many of which have financial, technical and marketing resources significantly greater than ours. In addition, many biotechnology companies have formed collaborations with large, established companies to support research, development and commercialization of products that may be competitive with ours. Academic institutions, governmental agencies and other public and private research organizations are also conducting research activities and seeking patent protection and may commercialize products on their own or through joint ventures. We are aware of certain other products manufactured or under development by competitors that are used for the treatment of the diseases and health conditions that we have targeted for product development. We can provide no assurance that developments by others will not render our technology obsolete or noncompetitive, that we will be able to keep pace with new technological developments or that our technology will be able to supplant established products and methodologies in the therapeutic areas that are targeted by us. The foregoing factors could have a material adverse affect on our business, prospects, financial condition and results of operations. These companies, as well as academic institutions, governmental agencies and private research organizations, also compete with our company in recruiting and retaining highly qualified scientific personnel and consultants.

Competition within our sector itself is increasing, so we will encounter competition from existing firms that offer competitive solutions in the cancer treatment solutions. These competitive companies could develop products that are superior to, or have greater market acceptance, than the products being developed by our company. We will have to compete against other biotechnology and pharmaceutical companies with greater market recognition and greater financial, marketing and other resources.

Our competition will be determined in part by the potential indications for which our technology is developed and ultimately approved by regulatory authorities. In addition, the first product to reach the market in a therapeutic or preventive area is often at a significant competitive advantage relative to later entrants to the market. Accordingly, the relative speed with which we, or our potential corporate partners, can develop products, complete the clinical trials and approval processes and supply commercial quantities of the products to the market are expected to be important competitive factors. Our competitive position will also depend on our ability to attract and retain qualified scientific and other personnel, develop effective proprietary products, develop and implement production and marketing plans, obtain and maintain patent protection and secure adequate capital resources. We expect our technology, if approved for sale, to compete primarily on the basis of product efficacy, safety, patient convenience, reliability, value and patent position.

### Competition for VitiGam

We anticipate VitiGam to be a competitive anti-melanoma drug because of its anticipated efficacy and safety profile. Treatment options for Stage III and Stage IV melanoma comprise three drugs from major drug classes as follows:

**Antineoplastics** Antineoplastics include chemotherapeutics (alkylating agents, antimetabolites and antimetabolic agents) that are administered intravenously or orally. Generally speaking, they have significant toxicity associated with severe side effects to the patient. Antineoplastics are typically used to treat Stage IV melanoma.

**Immunomodulators** Substances that suppress, stimulate or boost the immune system. These have some efficacy (10% to 20%), with side effects that are moderate compared to antineoplastics.

**Vaccines** Preparations that aim at coaxing the patient's immune system to mount an immune response against the tumor. Because of the paucity of safe and effective therapies to treat late stage melanomas, so called "off-label" use of drugs is common and physicians typically use antineoplastics approved for other cancers in treating melanoma.

Antineoplastics and immunomodulators account for 80% of the treatment for Stage III and Stage IV melanoma. Interferon (IFN), interleukin-2 (IL-2) and dacarbazine are the most commonly prescribed therapeutics in these categories.

## Edgar Filing: GAMMACAN INTERNATIONAL INC - Form SB-2

Schering Corporation's INTRON® A (Interferon alfa-2b, recombinant) dominates the melanoma market with a 46% market share;

Chiron's PROLEUKIN® (aldesleukin, recombinant human interleukin-2, rhIL-2) commands approximately 28% of the total melanoma market; and

Bayer's DITC DOME (dacarbazine, alkylating agent) accounts for 9%.

The majority of the remaining 17% of the market is comprised of a group of antineoplastics that are sold by Bristol Myers Squibb, Daiichi, Eli Lilly, and Roche. GlaxoSmithKline is currently the only company selling a melanoma vaccine.

### Scientific Advisory Board

We maintain a scientific advisory board consisting of internationally recognized scientists who advise us on scientific and technical aspects of our business. The scientific advisory board meets periodically to review specific projects and to assess the value of new technologies and developments to us. In addition, individual members of the scientific advisory board meet with us periodically to provide advice in particular areas of expertise. The scientific advisory board consists of the following members, information with respect to whom is set forth below: David Sidransky; Richard Spritz, M.D.; Yoseff Yarden M.D., Ph.D.; Lynn M. Schuchter M.D.; and Pearl E. Grimes M.D.

*David Sidransky, M.D.* Dr. Sidransky is the Director of the Head and Neck Cancer Research Division at Johns Hopkins University School of Medicine. In addition, he is Professor of Oncology, Otolaryngology-Head and Neck Surgery, Cellular & Molecular Medicine, Urology, Genetics, and Pathology at Johns Hopkins University and Hospital. Dr. Sidransky is certified in Internal Medicine and Medical Oncology by the American Board of Medicine. He has served as a Director of Imclone since January 2004. He is a founder of several private biotechnology companies and has served on the scientific advisory boards of many private and public companies including MedImmune, Telik, Roche and Amgen. He was formerly on the Board of Scientific Counselors at the NIDCR and is currently a member of the Recombinant DNA Advisory Committee at the National Institute of Health (NIH). Dr. Sidransky is a member of numerous editorial boards. He has over 250 peer-reviewed publications, has contributed more than 40 cancer reviews, and also has numerous issued biotechnology patents. He has been the recipient of many awards and honors, including the 1997 Sarstedt International Prize from the German Society of Clinical Chemistry, the 1998 Alton Ochsner Award Relating To Smoking and Health by the American College of Chest Physicians, and the 2004 Hinda and Richard Rosenthal Award from the American Association of Cancer Research.

*Richard Spritz, M.D.* Dr. Spritz is the Director Human Medical Genetics Program and Professor of Pediatrics, Biochemistry and Molecular Genetics at the University of Colorado Health Science Center. Prior to his tenure at the University of Colorado, Dr. Spritz served as Professor of Medical Genetics and Pediatrics at the University of Wisconsin. Among his numerous accomplishments, Dr. Spritz sits on the Medical Advisory Board of Vitiligo Support International, is a member of the Council of the PanAmerican Pigment Cell Society, and has chaired a number of NIH Committees. He has for many years served on various national research advisory committees and for the March of Dimes Birth Defects Foundation. He has published over 170 peer-reviewed papers and receives ongoing research support from the NIH, specifically for studies of the genetics of human pigmentation and autoimmune disorders. Dr. Spritz holds an M.D. from Pennsylvania State University, was a Resident in Pediatrics at the Children's Hospital of Philadelphia, and was a Fellow in Human Genetics at the Yale University School of Medicine. Dr. Spritz has received many honors and awards, including the first Annual Research Award from the Society for Pediatric Dermatology, the Vitiligo and Melanocyte Biology Research Achievement Award from the American Skin Association, the Tanioku Memorial Lectureship from the Japanese Society for Investigative Dermatology, and the Alumni Fellow Medal from Pennsylvania State University.

*Yoseff Yarden M.D., Ph.D.* Dr. Yarden is professor in the Department of Biological Regulation at the Weizmann Institute of Science in Rehovot. He received his B.Sc. in Biology and Geology (cum laude) at the Hebrew University in Jerusalem in 1979, and his Ph.D. at the Weizmann Institute in 1985. Dr. Yarden's research career has been devoted to understanding the role of the EGFR family of growth-factor receptors and EGF-like growth factors in human cancers. He has been involved in many crucial developments in this field, including isolating the EGFR, isolating several neuregulins, establishing the pivotal role of receptor dimerization in transmembrane signaling, understanding the role of HER2 in signal transduction and tumor development, and resolving the process of ligand-induced degradation of oncogenic receptors.

*Lynn M. Schuchter M.D.* Dr. Schuchter is Director of the Abramson Cancer Center at the University of Pennsylvania and is a world renowned hematologist and oncologist. Her published research and focus of investigative clinical trial activity is melanoma and breast cancer. Dr. Schuchter's research has led to the development of leading-edge approaches to melanoma therapy.

## Edgar Filing: GAMMACAN INTERNATIONAL INC - Form SB-2

*Pearl E. Grimes M.D.* Dr. Grimes is nationally and internationally recognized for her work on pigmentary disorders. She lectures worldwide on pigmentary disorders including Vitiligo, Melasma, and post-inflammatory hyperpigmentation. Dr. Grimes is the past Assistant Editor of the Journal of the American Academy of Dermatology, and has served on the Editorial Board of the Journal of Clinical Dermatology, Practical Dermatology, and Skin & Allergy News. Dr. Grimes is presently a contributing editor to Cosmetic Dermatology. As founder of The Vitiligo and Pigmentation Institute of Southern California and its ongoing research program, Dr. Grimes' mission is to provide cutting edge therapies to patients suffering from Vitiligo and other pigmentary disorders. She has authored over 100 publications and abstracts and is a member of: The American Academy of Dermatology; the American Society of Dermatological Surgery; the American Dermatological Association; Society of Investigative Dermatology; Dermatology Foundation; and the International Pigment Cell Society. Dr. Grimes is a graduate of Washington University in St. Louis, Missouri and completed her Dermatology Residency at Howard University Hospital in Washington, D.C.

### **Employees**

We have been successful in retaining the experienced personnel involved in our research and development program. In addition, we believe we have successfully recruited clinical/regulatory, quality assurance and other personnel needed to advance through clinical studies or have engaged the services of experts in the field for these requirements. As of February 28, 2007, we employed eight individuals and engaged the services of several consultants. Of our employees, three are officers, three were engaged in research and development work, and the remaining two in administration work.

### **Facilities**

Our principal executive offices are located in approximately 1337 square feet of office space in Kiryat Ono, Israel. The lease commenced on August 10, 2006 and is for a period of 36 months. The aggregate annual base rental for this space is \$26,827. Since, June 8, 2006, we have been leasing a suite in New York for the use of our CEO. The lease agreement is for a period of 12 months and the aggregate annual base rental for this space is \$21,600. We believe that our existing facilities are suitable and adequate to meet our current business requirements. In the event that we should require additional or alternative facilities, we believe that such facilities can be obtained on short notice at competitive rates.

### **Legal Proceedings**

We are not a party to any material legal proceedings.

Edgar Filing: GAMMACAN INTERNATIONAL INC - Form SB-2

**MARKET PRICE FOR THE COMMON STOCK**

Our common stock is quoted on the OTC Bulletin Board (the *OTCBB*) under the symbol *GCAN.OB*. The quarterly high and low reported sales prices for our common stock as quoted on the OTCBB for the periods indicated are as follows:

	<u>High</u>	<u>Low</u>
<b>Year Ended September 30, 2005</b>		
Three Months Ended December 31, 2004	\$2.20	\$1.50
Three Months Ended March 31, 2005	\$1.92	\$1.45
Three Months Ended June 30, 2005	\$1.85	\$0.90
Three Months Ended September 30, 2005	\$1.45	\$0.85
<b>Year Ending September 30, 2006</b>		
Three Months Ended December 31, 2005	\$1.75	\$1.01
Three Months Ended March 31, 2006	\$1.72	\$1.05
Three Months Ended June 30, 2006	\$1.69	\$0.71
Three Months Ended September 30, 2006	\$1.20	\$0.53
<b>Year Ending September 30, 2007</b>		
Three Months Ended December 31, 2006	\$0.70	\$0.35
Three Months Ended March 31, 2007 (through March 27, 2007)	\$0.59	\$0.37

The foregoing quotations were provided by Yahoo finance and the quotations reflect inter-dealer prices, without retail mark-up, mark-down or commission and may not represent actual transactions.

The last reported sale price per share of common stock as quoted on the OTCBB was \$0.59 on March 27, 2007. As of such date, we had 44,875,164 shares of common stock outstanding. Based on information available from our registrar and transfer agent, we estimate that we had approximately 53 stockholders of record on March 27, 2007.

**Securities Authorized for Issuance under Equity Compensation Plans**

The following table summarizes securities authorized under equity compensation plans:

**Equity Compensation Plan Information**

Plan Category	Number of securities to be issued upon exercise of outstanding options, warrants and rights	Weight-average exercise price of outstanding options, warrants and rights	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a))
	(a)	(b)	(c)
Equity compensation plans approved by security holders			
Equity compensation plans not approved by security holders	5,770,000	\$0.88	4,230,000
<b>Total</b>			

## MANAGEMENT

## Executive Officers, Directors, and Key Employees

Set forth below is certain information with respect to the individuals who are our directors and executive officers.

<u>Name</u>	<u>Age</u>	<u>Position</u>
Patrick Schnegelsberg	43	President, Chief Executive Officer
Vered Caplan	38	Chief Executive Officer of GammaCan, Ltd.
Steven Katz <sup>(1)</sup>	59	Chairman of the Board of Directors
Albert Passner	68	Director of GammaCan International, Inc.
Yair Aloni <sup>(2)</sup>	56	Director of GammaCan International, Inc. and GammaCan, Ltd.
Shmuel Levi <sup>(1) (2)</sup>	56	Director of GammaCan International, Inc. and GammaCan, Ltd.
Josef Neuhaus <sup>(1)</sup>	43	Director of GammaCan International, Inc. and GammaCan, Ltd.
Chaime Orlev	36	Chief Financial Officer of GammaCan International, Inc. and GammaCan, Ltd.
Prof. Yehuda Shoenfeld, M.D.	57	Chief Scientist of GammaCan, Ltd.

(1) Member of the Audit Committee.

(2) Member of the Compensation Committee.

Set forth below is biographical information with respect to each of the aforementioned individuals.

**Mr. Patrick Schnegelsberg** served as Director of Investment Banking for Global Capital Markets Group (GCMG), an independent investment bank known internationally for advising on mergers and acquisitions and crafting innovative financial and strategic solutions for clients globally, with offices in New York and Sydney, Australia. Prior to GCMG Mr. Schnegelsberg served as Director of Investment Banking at Rodman & Renshaw. In this position, he led M&A and private transactions for a host of significant companies in Life Sciences. Prior to entering investment banking, Mr. Schnegelsberg acted as a buy-side analyst and portfolio manager for Mehta Partners, a leading healthcare-focused hedge fund. He joined Mehta Partners after having worked for several years in the consulting industry with tenures at Booz Allen Hamilton's New York healthcare practice and at Boston-based Global Prior Art, where he founded and fostered the growth of the Company's Life Sciences practice and intellectual property practice. The client roster included top tier pharmaceutical and biotechnology companies as well as some of the top U.S. and EU IP law firms. Mr. Schnegelsberg graduated from Harvard Medical School and preformed his Ph.D. thesis research in the laboratory of Dr. Rudolf Jaenisch at the Whitehead Institute/M.I.T. He published his first peer-reviewed paper as an undergraduate and since then his work has been published in peer reviewed journals including *Cell* and *Nature*.

**Ms. Vered Caplan** earned her M.Sc. in Bio-Medical Engineering and Business Management from Tel Aviv University and a B.A. in Mechanical Engineering from the Technion and is presently writing her Ph.D. thesis in Biomedical Engineering. She is a major GammaCan shareholder. From 2005 to 2006 she was the CEO of both GammaCan International Inc. and GammaCan LTD. In July 2006 Ms. Caplan became the CEO of GammaCan LTD. Ms. Caplan is one of the most active entrepreneurs in Israeli Life Sciences. Before the formation of GammaCan, she was involved in the founding and management of more than ten ventures in which she served in a CEO or senior management position, including: Critisense LTD. (an electro-optic based metabolic monitoring company); Serapis LTD. (a drug development company based on GPCR targeted assays); Drugon Biotechnology LTD. (a proteomic high throughput assays company); Barnev LTD. (a labor monitor company); SloFlo LTD. (an infertility treatment company); Contipi LTD. (an incontinence treatment company); Mind Guard LTD. (a peripheral stunts company); MTRE LTD. (a thermo-regulation systems company); and Meduck, LTD (an anesthesia monitoring systems company). From 1997 to 1998, Ms. Caplan served as a manager of Aran, one of the largest development companies in Israel with responsibility for investments in start-up medical

## Edgar Filing: GAMMACAN INTERNATIONAL INC - Form SB-2

companies, and head of medical development. From 1995 to 1997 Ms. Caplan served as a manager for Medispec, LTD., a company manufacturing and marketing urology devices and systems worldwide.

**Mr. Steven Katz** is President of Steven Katz & Associates, Inc., a health care and technology-based management consulting firm specializing in strategic planning, corporate development, new product planning, technology licensing, and structuring and securing various forms of financing. Mr. Katz has been President of Steven Katz & Associates, Inc. since 1982 and is presently a member of the Boards of Directors of a number of publicly-held corporations and several private companies. From January 2000 to October 2001, Mr. Katz was also President and Chief Operating Officer of Senesco Technologies, Inc., an American Stock Exchange company engaged in the identification and development of proprietary gene technology with application to human, animal and plant systems. From 1983 to 1984 he was a co-founder and Executive Vice President of S.K.Y. Polymers, Inc., a biomaterials company. Prior to this, Mr. Katz was Vice President and General Manager of a non-banking division of Citicorp. From 1976 to 1981 he held various senior management positions at National Patent Development Corporation, including President of three subsidiaries. Prior positions were with Revlon, Inc. (1975) and Price Waterhouse & Co. (1969 to 1974). Mr. Katz received a Bachelors of Business Administration degree in Accounting from the City College of New York in 1969. Mr. Katz is presently a member of the Board of Directors of the following publicly-held corporations; USA Technologies, Inc, NaturalNano, Inc and Health Systems Solutions, Inc and the following privet companies; Expert Real Estate Services, Inc. and MDSERVE, Inc.

**Mr. Albert Passner** is a consultant in the fields of physics and engineering following an illustrious career at Lucent/AT&T Bell Labs. Among his many achievements with Lucent were: the development of ultra-low noise amplifiers used to measure transistor noise; the design of the world's most powerful pulsed electromagnet; produced a positron plasma in the laboratory; produced the first transverse laser in semi-conductor thin film, and demonstrated that stellar images could be corrected in real time using an electronically deformed mirror. In addition, Mr. Passner has authored and co-authored more than fifty publications. Prior to his thirty plus years at Lucent /AT&T Bell Labs, Mr. Passner served as an engineer at RCA (1961 to 1963) and a Member of Staff at the Princeton-Penn Accelerator in Princeton, N.J. (1963 to 1969). He received a B.S. in Physics from CCNY in 1960 and an M.S. in Physics from NYU in 1966.

**Mr. Yair Aloni** brings over 25 years of experience as a senior executive in a number of companies. From 2002 to 2005 he served as the Chief Executive Officer of Solidimension LTD., a private company specializing in 3D printers. From 1996 to 2002 Mr. Aloni served as the Chief Executive Officer of Avnan Yazamut LTD., a company involved in investing in high technology, biotechnology and electronics companies. Prior to 1996 Mr. Aloni worked as an executive or senior manager at several electronic and auto parts companies.

**Mr. Shmuel Levi** has held senior level financial management positions for over 30 years at major organizations in Israel. These include serving as the Chief Financial Officer of Rafael Group from 1996 to 1999, Corporate Finance Manager of Strauss Group from 1991 to 1996, and a Senior Vice President of Finance of North Hills Israel LTD. For the last 7 years, Mr. Levi has concentrated in high-tech and start-up companies using his expertise in performing due diligence, fund raising, public offerings and structuring financial and legal transactions. From 2003 to 2004, he acted as the Chief Financial Officer of Pluristem Life Systems, Inc., a biotechnology company whose shares are quoted on the Over the Counter Bulletin Board. Mr. Levi received a M.Sc. and B.Sc. in Economics and Management from the Technion and Israel Institute of Technology in 1976.

**Mr. Josef Neuhaus** brings extensive experience as a senior executive in a number of companies. From 2004 to the present he is working as an independent consultant. From 2003 to 2004 he served as CEO of RoadEye FLR G.P. and Managing Director of Gintec Active Safety LTD., both private companies dealing with collision avoidance systems. From 2000 to 2001 Mr. Neuhaus was the CFO of PassCall Advanced Technologies LTD., a startup dealing with wireless Internet. From 1998 to 2000 he was Managing Director and CFO of ITA (International Tourist Attractions) LTD. a private company initiating and building tourist attractions. From 1995 to 1998 he served as the CFO of ICTS International NV (Nasdaq: ICTS ). Prior to 1995, Mr. Neuhaus worked as a senior auditor at Somekh Chaikin (KPMG in Israel). Mr. Neuhaus received both his M.B.A and B.A. in Accounting and Economics at the Tel Aviv University. He is an Israeli CPA.

**Mr. Chaime Orlev** joined GammaCan in October 2005 as CFO. He is a certified public accountant in Israel. Prior to joining Gammacan, Mr. Orlev acted as Chief Financial Officer for Solel Solar Systems, an Israeli-based company specializing in the development, manufacturing and marketing of solar energy systems and related equipment, as well as coatings for different substrates. From 2001 to 2004 Mr. Orlev was the Vice President, Finance and Chief Financial Officer of Huntleigh, a provider of airport services to carriers. From 1999 to 2001 he served as Financial Controller and Acting Chief Financial Officer for ICTS International N.V. (NASDAQ:ICTS).

**Prof. Yehuda Shoenfeld, M.D** is one of Israel's most prominent physicians and scientists in the field of immunology. He heads the Department of Internal Medicine at Israel's largest hospital, Sheba Medical Center at Tel Ha Shomer. Professor Shoenfeld

## Edgar Filing: GAMMACAN INTERNATIONAL INC - Form SB-2

also heads the Research Center for Autoimmune Diseases at Sheba Medical Center and is a Professor of Medicine in Tel Aviv University and the incumbent of the Laura Schwartz-Kipp Chair for Autoimmunity. He is the author of more than 1,000 scientific papers and more than 40 scientific books. Fifty eight of his publications relate to intravenous IgG, of which seven focus on intravenous IgG as a treatment for cancer. Prof. Shoenfeld also serves as editor of several medical journals and as scientific consultant to a number of biotechnology companies. He received the prestigious Carol Nachman Award for Rheumatology in 2004 for outstanding innovative research work and the EULAR (European Union Congress of Rheumatology) Prize in 2005.

### **Board of Directors and Officers**

Each director is elected for a period of one year at our annual meeting of stockholders and serves until the next such meeting and until his or her successor is duly elected and qualified. Officers are elected by, and serve at the discretion of, our board of directors. The board of directors may also appoint additional directors up to the maximum number permitted under our by-laws. A director so chosen or appointed will hold office until the next annual meeting of stockholders.

Each of our executive officers serves at the discretion of our board of directors and holds office until his or her successor is elected or until his or her earlier resignation or removal in accordance with our certificate of incorporation and by-laws.

### **Meetings and Committees of the Board of Directors**

During the year ended September 30, 2006 and during the three months ended December 31, 2006, our board of directors held 30 meetings and took actions by written consent on 22 occasions.

### **Committees of the Board of Directors**

On January 11, 2005, we established an Audit Committee and a Compensation Committee, which shall be responsible, respectively, for the matters described below.

#### **Audit Committee**

The Audit Committee is responsible for the following:

reviewing the results of the audit engagement with the independent auditors;

identifying irregularities in the management of our business, and suggesting an appropriate course of action;

reviewing the adequacy, scope, and results of the internal accounting controls and procedures;

reviewing the degree of independence of the auditors, as well as the nature and scope of our relationship with our independent auditors;

reviewing the auditors' fees; and

recommending the engagement of auditors to the full board of directors.

A charter has been adopted to govern the Audit Committee. The Board has determined that each of the members of the Audit Committee is an unrelated, outside member with no other affiliation with us and is independent as defined by the rules of the SEC. The Board has determined that Messrs Steven Katz, Shmuel Levi and Josef Neuhaus are audit committee financial experts as defined by the SEC. The Audit Committee was formed on January 11, 2005.

#### **Compensation Committee**

The Compensation Committee determines the salaries and incentive compensation of our officers and provide recommendations for the salaries and incentive compensation of its other employees and consultants. The members of the compensation committee are Yair Aloni and Shmuel Levi. The compensation of our executive officers is generally determined by the compensation committee of the board of directors, subject to applicable employment agreements. Our compensation programs are intended to enable the attraction, motivation, reward, and retention of the management talent required to achieve corporate objectives and thereby increase stockholder value. Our policy has been to provide incentives to our senior management to achieve both short-term and long-term objectives and to reward exceptional performance and contributions to the development of our business. To attain these objectives, the executive compensation program may include a competitive base salary, cash incentive bonuses, and stock-based compensation.

### **Relationship of Compensation to Performance and Compensation of Executive Officers**

The compensation committee annually establishes, subject to the approval of our board of directors and any applicable employment agreements, the salaries that will be paid to our executive officers during the coming year. In setting salaries, the compensation committee intends to take into account several factors, including the following:

competitive compensation data;

the extent to which an individual may participate in the stock plans which may be maintained by us; and

qualitative factors bearing on an individual's experience, responsibilities, management and leadership abilities, and job performance.

### **Code of Ethics**

We adopted a Code of Ethics that applies to our officers, employees and directors, including our principal executive officers, principal financial officers and principal accounting officers. The code of ethics sets forth written standards that are designated to deter wrongdoing and to promote:

Honest and ethical conduct, including the ethical handling of actual or apparent conflicts of interest between personal and professional relationships;

Full, fair, accurate, timely and understandable disclosure in reports and documents that we file with, or submit to, the SEC and in other public communications made by us;

Compliance with applicable governmental laws, rules and regulations;

The prompt internal reporting of violations of the code to an appropriate person or persons identified in the code of ethics; and

Accountability for adherence to the code of ethics.

### **Compensation of Directors**

We reimburse our directors for expenses incurred in connection with attending board meetings but did not pay director's fees or other cash compensation for services rendered as a director in the year ended September 30, 2004. Effective as of January 11, 2005 and until October 1, 2006, members of the Board of Directors are being paid a fee of \$500 for each Board meeting attended. Directors are entitled to reimbursement for reasonable travel and other out-of-pocket expenses incurred in connection with attendance at meetings of our board of directors. Effective October 1, 2006 each outside director shall be entitled to receive as remuneration for his or her service as a member of the Board of Directors a sum equal to US\$8,000 per annum, to be paid quarterly and shortly after the close of each quarter. The Board of Directors may award special remuneration to any director undertaking any special services on behalf of our company other than services ordinarily required of a director. Other than indicated in this annual report, no director received and/or accrued any compensation for his or her services as a director, including committee participation and/or special assignments.

### **Compensation Committee Interlocks and Insider Participation**

During the years ended September 30, 2005 and 2006 and the three months ended December 31, 2006, our officers and directors participated in deliberations of our board of directors concerning executive officer compensation. There were no interlocking relationships between us and other entities that might affect the determination of the compensation of our directors and executive officers.

### **Executive Compensation**

The following table sets forth the compensation earned during the years ended September 30, 2006, 2005, and 2004 by our former Chief Executive Officer, our current Chief Executive Officer and of each executive whose annual compensation in the fiscal year ended September 30, 2006, 2005, and 2004 exceeded \$100,000:

## Summary Compensation Table

Name and Principal Position	Year	Salary (\$)	Bonus (\$)	Stock Awards (\$)	Option Awards (\$)	Non-Equity Incentive Plan Compensation (\$)	Nonqualified Deferred Compensation (\$)	All Other Compensation (\$)	Total (\$)
Patrick Schnegelsberg, Chief Executive Officer <sup>(1)</sup>	2006	99,084	Nil	Nil	494,557	Nil	Nil	Nil	593,641
Vered Caplan, <sup>(2)</sup> Acting Chief Executive Officer	2006	96,385	Nil	Nil	Nil	Nil	Nil	15,225	111,610
Chaime Orlev, Chief financial Officer <sup>(3)</sup>	2006	88,158	Nil	Nil	174,887	Nil	Nil	7,886	270,931
Vered Caplan, <sup>(2)</sup> Acting Chief Executive Officer	2005	49,538	Nil	Nil	Nil	Nil	Nil	3,792	53,330
Dr. Dan J. Gelvan, Former Chief Executive Officer	2005	102,283	Nil	Nil	Nil	Nil	Nil	12,594	114,877
Dr. Dan J. Gelvan, Former Chief Executive Officer	2004	14,620	Nil	Nil	118,193	Nil	Nil	2,290	16,910

- (1) Mr. Schnegelsberg became Chief Executive Officer on April 16, 2006.
- (2) Ms. Caplan resigned from her position as Acting Chief Executive Officer on April 15, 2006.
- (3) Mr. Orlev became Chief Financial Officer on October 6, 2005.
- (4) Dr. Dan J. Gelvan resigned for his position as our Chief Executive Officer on June 2, 2005 and his options were forfeited.

**Option Grants during 2005 Fiscal Year**

The following table provides information related to options granted to certain directors and employees (none of which was a named executive officer) by GammaCan International, Inc. during the 2005 fiscal year. There were no option grants to named executive officers in the 2005 fiscal year. We do not have any stock appreciation rights.

Name	No. of Securities Underlying Options Granted (#)	% of Total Options Granted to Employees in Fiscal Year	Exercise Price (\$/Sh)	Expiration Date
Shmuel Levi	50,000	11.1	1.15	June 21, 2015
Yair Aloni	50,000	11.1	1.15	June 21, 2015
Jean-Pierre Elisha Martinez	50,000	11.1	1.15	June 21, 2015

**Aggregated Option Exercises During 2006 Fiscal Year and Fiscal Year-End Option Values**

There have been no option exercises during fiscal year 2006.

**Option Grants during the 2007 Fiscal Year**

On February 26, 2007, the Board of Directors determined to grant options to acquire an aggregate of 865,000 shares of common stock under our 2004 Plan. In addition, on this date, the Board approved The 2007 Global Share Option Plan (the *2007 Plan*) and granted options to acquire an aggregate of 1,475,000 shares of common stock under such plan, which grants shall become effective only upon the approval of the 2007 Plan by our stockholders. Each grant vests in equal installments on the first, second, and third anniversaries of the date of grant. The exercise price per share is \$0.53. The options expire on February 26, 2017.

The following table provides information related to such options granted to certain directors and employees (of which only Mr. Schnegelsberg and Mr. Orlev are named executive officers) by GammaCan International, Inc. during the 2007 fiscal year. Except with respect to Mr. Schnegelsberg and Mr. Orlev, there were no option grants to named executive officers in the 2007 fiscal year through March 27, 2007. We do not have any stock appreciation rights.

Name	No. of Securities Underlying Options Granted (#)	% of Total Options Granted to Employees in Fiscal Year	Exercise Price (\$/Sh)	Expiration Date

Lior Soussan-Gutman	25,000	0.9	0.53	February 25, 2017

(1) Granted under the 2007 Plan.

(2) Additional 100,000 options may be issued upon agreement to full time employment.

**Employment Agreements**

On August 17, 2004, we entered into a services agreement with Professor Yehuda Shoenfeld, M.D., who serves as the Chief Scientist of our subsidiary, GammaCan, Ltd., commencing on September 1, 2004. Prof. Shoenfeld receives a monthly compensation in the amount of approximately \$5,000 USD, for his services as the Chief Scientist of GammaCan, Ltd. Either Prof. Shoenfeld or our company may terminate the services agreement with Prof. Shoenfeld without cause, for any reason whatsoever, with 30 days notice.

On March 1, 2005, we and GammaCan, Ltd. entered into an agreement appointing Vered Caplan as Vice President of Business Development. Ms. Caplan, who provided at least 20 hours of service per week, had received a salary of \$4,000 per month.

## Edgar Filing: GAMMACAN INTERNATIONAL INC - Form SB-2

On June 6, 2005, we and GammaCan, Ltd. appointed Vered Caplan as acting Chief Executive Officer of both companies, effective July 2, 2005. Vered Caplan devoted approximately 70% of her business time to the affairs of GammaCan International, Inc. and GammaCan, Ltd. Vered Caplan new monthly salary became \$6,475 per month.

On April 15, 2006 Ms. Caplan has resigned as our Acting Chief Executive Officer, effective April 15, 2006.

On September 6, 2005, GammaCan, Ltd. entered into an employment agreement with Chaime Orlev pursuant to which Mr. Orlev serves as Chief Financial Officer of GammaCan, Ltd., and GammaCan International Inc. effective October 6, 2005. Mr. Orlev receives a salary of 25,000 NIS per month (which equals approximately US \$5,534.65, as of the date hereof). Mr. Orlev was granted up to 350,000 stock options, pursuant to our 2004 Stock Option Plan, adopted by the Board on August 17, 2004. Options will be exercisable at an exercise price, being 90% of the market price of the common stock on the date of grant, such that 30,000 Options shall vest on the first anniversary from their date of grant, and the remaining Options shall vest in 36 equal monthly installments thereafter. On April 16, 2006, we agreed to amend the employment agreement of Mr. Orlev effective April 1, 2006. The amendment to the employment agreement provides for an increase in monthly compensation to \$6,500 per month. On May 2, 2006 we amended the vesting of the period of the options granted to Mr. Orlev such that 25% of the options shall vest the first anniversary commencing the grant date and the remaining 75% of the options shall vest in 36 equal monthly installments thereafter.

On April 16, 2006, we entered into an employment agreement with Patrick Schnegelsberg pursuant to which Mr. Schnegelsberg serves as our Chief Executive Officer, effective April 15, 2006. Mr. Schnegelsberg receives a salary of \$200,000 and an annual bonus of up to \$200,000 upon achieving certain objectives. Pursuant to a separate agreement between us and Mr. Schnegelsberg, we agreed to indemnify Mr. Schnegelsberg for substantially all liabilities he may incur as a result of his employment by or service to us. Mr. Schnegelsberg was granted up to 1,400,000 stock options pursuant to our 2004 Stock Option Plan, adopted by the Board on August 17, 2004. Options are exercisable at an exercise price of \$1.29 per share. 350,000 of the Options shall vest on the first anniversary from their date of grant, and the remaining Options shall vest in 36 equal monthly installments thereafter.

### Stock Option Plans

#### 2004 Employees and Consultants Stock Option Plan

On August 17, 2004, our board of directors adopted the 2004 Employees and Consultants Stock Option Plan in order to attract and retain quality personnel. Under the 2004 Employees and Consultants Stock Option Plan (the *2004 Plan*), 5,000,000 shares have been reserved for the grant of options, which may be issued at the discretion of our board of directors from time to time. As of February 28, 2007, options exercisable for an aggregate of 4,295,000 shares have been granted.

#### 2007 Employees and Consultants Stock Option Plan

On February 26, 2007, our board of directors adopted The 2007 Global Share Option Plan (the *2007 Plan*) in order to attract and retain quality personnel. Under the 2007 Plan, 5,000,000 shares have been reserved for the grant of options, which may be issued at the discretion of our board of directors from time to time. As of February 28, 2007, options exercisable for an aggregate of 1,475,000 shares have been granted.

## Edgar Filing: GAMMACAN INTERNATIONAL INC - Form SB-2

### CERTAIN RELATIONSHIPS AND RELATED PARTY TRANSACTIONS

Our policy is to enter into transactions with related parties on terms that, on the whole, are more favorable, or no less favorable, than those available from unaffiliated third parties. Based on our experience in the business sectors in which we operate and the terms of our transactions with unaffiliated third parties, we believe that all of the transactions described below met this policy standard at the time they occurred.

Mr. Yair Aloni, a director of our company, and Professor Yehuda Shoenfeld, M.D., the Chief Scientist of our subsidiary, GammaCan, Ltd., are authorized signatories of ARP Biomed Ltd. ( ARP ) for the Intellectual Property Purchase and Sale Agreement ( Purchase Agreement ) we entered into with ARP on June 11, 2004. Mr. Aloni is the Chief Executive Officer of ARP and Professor Shoenfeld is an advisor to ARP. As a result of the Purchase Agreement, ARP owns 12.5% of our subsidiary, Gammacan Ltd.

On November 4, 2004, our subsidiary Gammacan Ltd. entered into a consulting agreement with PBD Ltd., a company controlled by Vered Caplan, a principal shareholder of Gammacan International, Inc. and currently Chief Executive Officer of our subsidiary. Pursuant to the terms of the agreement, Gammacan Ltd. will pay PBD a total fee of \$50,000 for services including:

- summary of pre-clinical data and collection of historical research data;
- preparation of clinical trial;
- oncologists survey for cancer indication;
- survey of complementary technologies;
- survey of potential intravenous IgG collaborators; and
- initiation of contacts with potential partners.

On March 1, 2005, we and our subsidiary entered into an agreement appointing Ms. Caplan as Vice President of Business Development according to which Ms. Caplan, received a salary of \$4,000 per month for at least 20 hours of service per week.

On June 6, 2005, we and our subsidiary appointed Ms. Caplan as acting Chief Executive Officer of both companies, effective July 2, 2005 at a salary of \$6,475 per month. On April 15, 2006, Ms. Caplan resigned from her position as the acting Chief Executive Officer. Ms. Caplan remained as the Chief Executive Officer of our subsidiary, GammaCan, Ltd.

On October 31, 2006, we entered into a consulting agreement with Steven Katz and Associates, Inc., ( SKA ) a company wholly-owned by Steven Katz, the Chairman of the Board of GammaCan International, Inc. According to the agreement, consulting services will be provided by SKA at \$345 per hour.

For a description of employment agreements, please see Management Employment Agreements .

All Current Executive Officers and Directors as a group (five persons)	5,545,632 <sup>(14)</sup>	12.2

---

\* Less than 1%

- (1) Includes 3,833,334 shares of common stock issuable upon the exercise of the Warrants beneficially owned by the referenced entity.
- (2) Includes 2,500,000 shares of common stock issuable upon the exercise of the Warrants beneficially owned by the referenced entity.
- (3) Includes 1,500,000 shares of common stock issuable upon the exercise of the Warrants beneficially owned by the referenced entity.
- (4) Includes 1,500,000 shares of common stock issuable upon the exercise of the Warrants beneficially owned by the referenced entity.
- (5) Includes 1,250,000 shares of common stock issuable upon the exercise of the Warrants beneficially owned by the referenced entity.
- (6) Includes 1,250,000 shares of common stock issuable upon the exercise of the Warrants beneficially owned by the referenced entity.
- (7) Indicates Director.
- (8) Consists of 379,167 shares of common stock issuable upon the exercise of outstanding stock options.
- (9) Indicates Officer.
- (10) Includes 54,167 shares of common stock issuable upon the exercise of outstanding stock options.
- (11) Consists of 54,167 shares of common stock issuable upon the exercise of outstanding stock options.
- (12) Consists of 39,583 shares of common stock issuable upon the exercise of outstanding stock options.
- (13) Consists of 138,542 shares of common stock issuable upon the exercise of outstanding stock options.
- (14) Includes 665,625 shares of common stock issuable upon the exercise of outstanding stock options.
- (15) Notwithstanding the inclusion of the Warrants beneficially owned by the referenced investors in the beneficial ownership calculation, the Warrants provide that the holder of the Warrants shall not have the right to exercise any portion of the Warrants, and we shall not effect any exercise of such Warrants, to the extent that after giving effect to such issuance after exercise such holder of the Warrants, together with his, her or its affiliates, would beneficially own in excess of 4.99% of the number of shares of common stock outstanding immediately after giving effect to such issuance. Such 4.99% limitation may be waived by each holder upon not less than 61 days prior notice to change such limitation to 9.99% of the number of shares of common stock outstanding immediately after giving effect to such issuance.

Some of our stockholders, beneficially owning approximately 1,333,332 shares of common stock, have the right, subject to a number of conditions and limitations, to include their shares in registration statements relating to our securities. By exercising their registration rights and causing a large number of shares to be registered and sold in the public market, these holders may cause the market price of our common stock to fall. In addition, any demand to include these shares in our registration statements could have an adverse effect on our ability to raise needed capital.

**SELLING STOCKHOLDERS**

The selling stockholders are offering shares of our common stock, of which 16,250,000 shares are held directly, 16,250,000 shares are issuable upon the exercise of Warrants issued in the 2007 Private Placement exempt from the registration requirements of the Securities Act.

We have granted registration rights to the purchasers in the 2007 Private Placement under the Securities Act at our expense with respect to the securities acquired in such offering.

The following table details the name of each selling stockholder, the number of shares of our common stock beneficially owned by each selling stockholder and the number of shares of our common stock that may be offered for resale under this prospectus. To the extent permitted by law, the selling stockholders who are not natural persons may distribute shares from time to time, to one or more of their respective affiliates, which may sell shares pursuant to this prospectus. We have registered the shares to permit the selling stockholders and their respective permitted transferees or other successors in interest that receive their shares from selling stockholders after the date of this prospectus to resell the shares. Because each selling stockholder may offer all, some or none of the shares it holds, and because there are currently no agreements, arrangements or understandings with respect to the sale of any of the shares, no definitive estimate as to the number of shares that will be held by each selling stockholder after the offering can be provided. The selling stockholders may from time to time offer all or some of the shares pursuant to this offering.

The following table has been prepared on the assumption that all shares offered under this prospectus will be sold to parties unaffiliated with the selling stockholders. Except as indicated by footnote, none of the selling stockholders has had a significant relationship with us within the past three years, other than as a result of the ownership of our shares or other securities. Except as indicated by footnote, the selling stockholders have sole voting and investment power with their respective shares. Percentages in the table below are based on 44,875,164 shares of our common stock outstanding as of February 28, 2007 and assume that, except for the shares issuable to a selling stockholder in question, no Warrants are exercised.

Notwithstanding the inclusion of the Warrants beneficially owned by the referenced investors in the beneficial ownership calculation, the Warrants provide that the holder of the Warrants shall not have the right to exercise any portion of the Warrants, and we shall not effect any exercise of such Warrants, to the extent that after giving effect to such issuance after exercise such holder of the Warrants, together with his, her or its affiliates, would beneficially own in excess of 4.99% of the number of shares of common stock outstanding immediately after giving effect to such issuance. Such 4.99% limitation may be waived by each holder upon not less than 61 days prior notice to change such limitation to 9.99% of the number of shares of common stock outstanding immediately after giving effect to such issuance.

## Edgar Filing: GAMMACAN INTERNATIONAL INC - Form SB-2

### DESCRIPTION OF CAPITAL STOCK

#### General

We are authorized by our certificate of incorporation to issue an aggregate of 100,000,000 shares of common stock, par value \$0.0001 per share, and 20,000,000 shares of preferred stock, par value \$0.0001 per share. As of February 28, 2007, 44,875,164 shares of common stock were outstanding and held of record by 53 stockholders and no shares of preferred stock were outstanding.

#### Common Stock

Holder of common stock are entitled to one vote for each share held of record on each matter submitted to a vote of stockholders. There is no cumulative voting for the election of directors. Subject to the prior rights of any class or series of preferred stock which may from time to time be outstanding, if any, holders of common stock are entitled to receive ratably, dividends when, as, and if declared by the board of directors out of funds legally available for that purpose and, upon our liquidation, dissolution, or winding up, are entitled to share ratably in all assets remaining after payment of liabilities and payment of accrued dividends and liquidation preferences on the preferred stock, if any. Holders of common stock have no preemptive rights and have no rights to convert their common stock into any other securities. The outstanding common stock is validly authorized and issued, fully-paid and nonassessable. In the event we were to elect to sell additional shares of common stock following this offering, investors in this offering would have no prior right to purchase additional shares. As a result, their percentage equity interest in us would be diluted.

The shares of common stock offered in this offering will be, when issued and paid for, fully paid and not liable for further call or assessment. Holders of the common stock do not have cumulative voting rights, which means that the holders of more than one half of the outstanding shares of common stock, subject to the rights of the holders of the preferred stock, can elect all of our directors, if they choose to do so. In this event, the holders of the remaining shares of common stock would not be able to elect any directors. Except as otherwise required by Delaware law, and subject to the rights of the holders of preferred stock, all stockholder action is taken by the vote of a majority of the outstanding shares of common stock voting as a single class present at a meeting of stockholders at which a quorum consisting of a majority of the outstanding shares of common stock is present in person or proxy.

#### Preferred Stock

Preferred stock may be issued in one or more series and having the rights, privileges and limitations, including voting rights, conversion privileges and redemption rights, as may, from time to time, be determined by the board of directors. Preferred stock may be issued in the future in connection with acquisitions, financings, or other matters as the board of directors deems appropriate. In the event that any shares of preferred stock are to be issued, a certificate of designation containing the rights, privileges and limitations of such series of preferred stock shall be filed with the Secretary of State of the State of Delaware. The effect of such preferred stock is that the board of directors alone, and subject to, Federal securities laws and Delaware law, may be able to authorize the issuance of preferred stock which could have the effect of delaying, deferring, or preventing a change in control of us without further action by the stockholders, and may adversely affect the voting and other rights of the holders of the common stock. The issuance of preferred stock with voting and conversion rights may also adversely affect the voting power of the holders of common stock, including the loss of voting control to others.

#### Warrants

At the date hereof, there are Warrants outstanding exercisable for an aggregate of 16,250,000 shares of common stock. The Warrants are exercisable through February 27, 2012 at the exercise price of \$0.48 per share, subject to adjustment for, among other things, stock splits, stock dividends, reverse stock splits, certain fundamental transactions, issuances of equity securities at effective prices less than the then effective exercise price of the Warrants, and pro rata distributions to stockholders. Further, commencing at any time after the sixteenth month anniversary from the date of issuance of the Warrants, if at the time of exercise, there is no effective Registration Statement registering, or no current prospectus available for, the resale of the shares of Common Stock issuable upon the exercise of the Warrants (the Warrant Shares), then the Warrants may also be exercised at such time on a cashless or net issuance basis. The Warrants contain standard reorganization provisions.

#### Quotation on OTCBB

Our common stock is quoted on the OTCBB under the symbol GCAN .

#### Transfer Agent and Registrar

The transfer agent and registrar for the common stock is PACWest Transfer LLC located at 360 Main Street, Washington, Virginia 22747.

**Directors Limitation Of Liability**

Our certificate of incorporation and by-laws include provisions to (1) indemnify the directors and officers to the fullest extent permitted by the Delaware General Corporation Law, including circumstances under which indemnification is otherwise discretionary and (2) eliminate the personal liability of directors and officers for monetary damages resulting from breaches of their fiduciary duty, except for liability for breaches of the duty of loyalty, acts, or omissions not in good faith or which involve intentional misconduct or a knowing violation of law, violations under Section 174 of the Delaware General Corporation Law, or for any transaction from which the director derived an improper personal benefit. We believe that these provisions are necessary to attract and retain qualified persons as directors and officers.

We have entered into an indemnification agreement with each of our directors which provides that we will indemnify our directors and advance expenses to our directors, to the extent permitted by the laws of the State of Delaware.

We have applied for directors and officers liability insurance in an amount of \$5 million.

Insofar as indemnification for liability arising under the Securities Act may be permitted to our directors, officers and controlling persons as stated in the foregoing provisions or otherwise, we have been advised that, in the opinion of the Commission, this indemnification is against public policy as expressed in the Securities Act and is, therefore, unenforceable.

## Edgar Filing: GAMMACAN INTERNATIONAL INC - Form SB-2

### SHARES ELIGIBLE FOR FUTURE SALE

Sales of substantial numbers of shares of our common stock in the public market following this offering, or the perception that such sales may occur, could adversely affect prevailing market prices of shares.

Assuming the exercise in full of the Warrants, immediately following the effectiveness under the Securities Act of the registration statement of which this prospectus forms a part, and further assuming no exercise of options outstanding following this offering, we will have an aggregate of 61,125,164 shares of common stock outstanding upon completion of this offering. Of these shares, 33,692,478 shares (including the 16,250,000 shares sold in this offering) will be freely tradable without restriction or further registration under the Securities Act, unless purchased by affiliates as that term is defined under Rule 144 of the Securities Act, who may sell only the volume of share described below and whose sales would be subject to additional restrictions described below. The remaining 11,182,686 shares of common stock will be held by our existing stockholders and will be deemed to be restricted securities under Rule 144. Restricted securities may only be sold in the public market pursuant to an effective registration statement under the Securities Act or pursuant to an exemption from registration under Rule 144, Rule 701 or Rule 904 under the Securities Act. These rules are summarized below.

#### Eligibility of Restricted Shares for Sale in the Public Market

Immediately after the effectiveness under the Securities Act of the registration statement of which this prospectus forms a part, we will have outstanding 44,875,164 shares of common stock. Of these shares, 33,692,478 shares, including 16,250,000 of the shares being offered in this offering, will be freely tradable. Giving effect to the exercise in full of the Warrants, immediately after the commencement of this offering, we would have outstanding 61,125,164 shares of common stock. Without giving effect to the exercise in full of the Warrants, the number of shares of common stock and the dates when these shares will become freely tradable in the market, subject to the lock-up agreements, is as follows:

<u>Number of Shares</u>	<u>Date</u>
33,692,478	On the date of this prospectus
33,692,478	Within six months of the date of this prospectus
33,863,910	Between six and twelve months from the date of this prospectus

#### Rule 144

In general, under Rule 144 as currently in effect, a person who has beneficially owned shares of common stock for at least one year is entitled to sell within any three-month period a number of shares that does not exceed the greater of:

1.0% of the number of shares of common stock then outstanding, which is expected to equal approximately 448,751 shares of common stock immediately after this offering; or

the average weekly trading volume of the shares of common stock on the OTCBB during the four calendar weeks preceding the filing of a notice on Form 144 in connection with the sale.

Sales under Rule 144 are also subject to manner of sale provisions and notice requirements and to the availability of current public information about us. In addition, under Rule 144(k) as currently in effect, a person:

who is not considered to have been one of our affiliates at any time during the 90 days preceding a sale; and

who has beneficially owned the shares proposed to be sold for at least two years, including the holding period of any prior owner other than an affiliate,

is entitled to sell his shares without complying with the manner of sale, public information, volume limitation or notice provisions of Rule 144.

#### Rule 701

In general, under Rule 701, any of our employees, directors, officers, consultants, or advisors who purchased shares of

## Edgar Filing: GAMMACAN INTERNATIONAL INC - Form SB-2

common stock from us under a compensatory stock option plan or other written agreement before the closing of this offering is entitled to resell these shares. These shares can be resold 90 days after the effective date of this offering in reliance on Rule 144, without having to comply with restrictions, including the holding period, contained in Rule 144.

The Securities and Exchange Commission has indicated that Rule 701 will apply to typical share options granted by an issuer before it becomes subject to the reporting requirements of the Securities Exchange Act of 1934, along with the shares acquired upon exercise of these options, including exercises after the date of this prospectus. Securities issued in reliance on Rule 701 are restricted securities and, subject to the contractual restrictions described above, beginning 90 days after the date of this prospectus, may be sold:

by persons other than affiliates subject only to the manner of sale provisions of Rule 144; and

by affiliates under Rule 144 without compliance with its one year minimum holding period requirement.

### **Registration Rights**

The holders of the Warrants are entitled to the registration of the resale of the shares of common stock issuable upon the exercise of the Warrants following the effectiveness of the registration statement of which this prospectus forms a part, subject to limitations established by the Securities and Exchange Commission.

Following the completion of this offering, the holders of an aggregate of 1,333,332 shares of common stock are entitled to request that we register their shares of common stock under the Securities Act, subject to cutback for marketing reasons, and also are entitled to piggy back registration rights, also subject to cutback for marketing reasons. Registration of such shares under the Securities Act would result in such shares becoming freely tradable without restriction under the Securities Act, except for shares purchased by affiliates, immediately upon the effectiveness of such registration. Any sales of securities by these stockholders could have a material adverse effect on the trading price of our common stock.

**PLAN OF DISTRIBUTION**

Each selling stockholder of the common stock and any of their pledgees (which are accredited investors (as defined in Regulation D under the Securities Act) or which are in connection with bona fide margin accounts with a registered broker-dealer or financial institution which is an accredited investor), assignees and successors-in-interest may, from time to time, sell any or all of their shares of common stock on the OTC Bulletin Board or any other stock exchange, market or trading facility on which the shares are traded or in private transactions. These sales may be at fixed or negotiated prices. A selling stockholder may use any one or more of the following methods when selling shares:

ordinary brokerage transactions and transactions in which the broker-dealer solicits purchasers;

block trades in which the broker-dealer will attempt to sell the shares as agent but may position and resell a portion of the block as principal to facilitate the transaction;

purchases by a broker-dealer as principal and resale by the broker-dealer for its account;

an exchange distribution in accordance with the rules of the applicable exchange;

privately negotiated transactions;

settlement of short sales entered into after the effective date of the registration statement of which this prospectus is a part;

broker-dealers may agree with the selling stockholders to sell a specified number of such shares at a stipulated price per share;

through the writing or settlement of options or other hedging transactions, whether through an options exchange or otherwise;

a combination of any such methods of sale; or

any other method permitted pursuant to applicable law.

The selling stockholders may also sell shares under Rule 144 under the Securities Act if available, rather than under this prospectus. Broker-dealers engaged by the selling stockholders may arrange for other brokers-dealers to participate in sales. Broker-dealers may receive commissions or discounts from the selling stockholders (or, if any broker-dealer acts as agent for the purchaser of shares, from the purchaser) in amounts to be negotiated, but, except as set forth in a supplement to this prospectus, in the case of an agency transaction not in excess of a customary brokerage commission in compliance with NASDR Rule 2440; and in the case of a principal transaction a markup or markdown in compliance with NASDR IM-2440.

In connection with the sale of the common stock or interests therein, the selling stockholders may enter into hedging transactions with broker-dealers or other financial institutions, which may in turn engage in short sales of the common stock in the course of hedging the positions they assume. The selling stockholders may also sell shares of the common stock short and deliver these securities to close out their short positions, or loan or pledge the common stock to broker-dealers that in turn may sell these securities. The selling stockholders may also enter into option or other transactions with broker-dealers or other financial institutions or the creation of one or more derivative securities which require the delivery to such broker-dealer or other financial institution of shares offered by this prospectus, which shares such broker-dealer or other financial institution may resell pursuant to this prospectus (as supplemented or amended to reflect such transaction).

The selling stockholders and any broker-dealers or agents that are involved in selling the shares may be deemed to be underwriters within the meaning of the Securities Act in connection with such sales. In such event, any commissions received by such broker-dealers or agents and any profit on the resale of the shares purchased by them may be deemed to be underwriting commissions or discounts under the Securities Act. Each selling stockholder has informed us that it does not have any written or oral agreement or understanding, directly or indirectly, with any person to distribute the common stock. In no event shall any broker-dealer receive fees, commissions and markups which, in the aggregate, would exceed eight percent (8%).

We are required to pay certain fees and expenses incurred by us incident to the registration of the shares. We have agreed to indemnify the selling stockholders against certain losses, claims, damages and liabilities, including liabilities under the Securities Act.

## Edgar Filing: GAMMACAN INTERNATIONAL INC - Form SB-2

Because selling stockholders may be deemed to be underwriters within the meaning of the Securities Act, they will be subject to the prospectus delivery requirements of the Securities Act including Rule 172 thereunder. In addition, any securities covered by this prospectus which qualify for sale pursuant to Rule 144 under the Securities Act may be sold under Rule 144 rather than under this prospectus. There is no underwriter or coordinating broker acting in connection with the proposed sale of the resale shares by the selling stockholders.

We agreed to keep this prospectus effective until the earlier of (i) the date on which the shares may be resold by the selling stockholders without registration and without regard to any volume limitations by reason of Rule 144(k) under the Securities Act or any other rule of similar effect or (ii) all of the shares have been sold pursuant to this prospectus or Rule 144 under the Securities Act or any other rule of similar effect. The resale shares will be sold only through registered or licensed brokers or dealers if required under applicable state securities laws. In addition, in certain states, the resale shares may not be sold unless they have been registered or qualified for sale in the applicable state or an exemption from the registration or qualification requirement is available and is complied with.

Under applicable rules and regulations under the Exchange Act, any person engaged in the distribution of the resale shares may not simultaneously engage in market making activities with respect to the common stock for the applicable restricted period, as defined in Regulation M, prior to the commencement of the distribution. In addition, the selling stockholders will be subject to applicable provisions of the Exchange Act and the rules and regulations thereunder, including Regulation M, which may limit the timing of purchases and sales of shares of the common stock by the selling stockholders or any other person. We will make copies of this prospectus available to the selling stockholders and have informed them of the need to deliver a copy of this prospectus to each purchaser at or prior to the time of the sale (including by compliance with Rule 172 under the Securities Act).

**LEGAL MATTERS**

Certain legal matters in connection with this offering will be passed upon for us by Reitler Brown & Rosenblatt LLC, New York, New York.

**EXPERTS**

The audited financial statements included in this Prospectus, except as it relates to the cumulative period from October 6, 1998 (date of inception) through September 30, 2003, have been audited by Kesselman & Kesselman, certified public accountants (Isr.), a member of the PricewaterhouseCoopers International Limited, an independent registered public accounting firm. Such financial statements have been so included in reliance on the report of such independent registered public accounting firm given on the authority of such firm as experts in auditing and accounting.

The audited financial statements as it relates to the cumulative period from October 6, 1998 (date of inception) through September 30, 2003, not separately presented in this prospectus, have been audited by Armando C. Ibarra, certified public accountant and independent accounting, whose report thereon appears herein. Such financial statements, to the extent they have been included in the financial statements of Gammacan International, Inc. have been so included in reliance on the report of such independent accountant given the authority of said firm as experts in auditing and accounting.

**WHERE YOU CAN FIND MORE INFORMATION**

We have filed with the Securities and Exchange Commission a registration statement on Form SB-2 under the Securities Act relating to this offering of shares of our common stock. This prospectus does not contain all of the information contained in the registration statement. The rules and regulations of the Securities and Exchange Commission allow us to omit various information from this prospectus that is included in the registration statement. Statements made in this prospectus concerning the contents of any contract, agreement, or other document are summaries of all material information about the documents summarized, but are not complete descriptions of all terms of these documents. If we filed any of these documents as an exhibit to the registration statement, you may read the document itself for a complete description of its terms.

You may read and copy the registration statement, including the related exhibits and schedules, and any document we file with the Securities and Exchange Commission without charge at the Securities and Exchange Commission's public reference room at 100 F Street, N.E., Washington, D.C. 20549-1004. You may also obtain copies of the documents at prescribed rates by writing to the Public Reference Section of the Securities and Exchange Commission by calling 1-800-SEC-0330 for further information on the public reference room. In addition, the registration statement is publicly available through the web site maintained by the Securities and Exchange Commission at [www.sec.gov](http://www.sec.gov).

We are subject to the informational requirements of the Securities Exchange Act of 1934, or Exchange Act, and fulfill the obligations of these requirements by filing reports with the Securities and Exchange Commission. You may obtain copies of any documents that we file electronically with the Securities and Exchange Commission through its website at [www.sec.gov](http://www.sec.gov).

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Shareholders of  
GammaCan International Inc.  
(A Development Stage Company)

We have audited the accompanying consolidated balance sheets of GammaCan International Inc. (A Development Stage Company) and its subsidiary as of September 30, 2006 and 2005, and the related consolidated statements of operations, changes in stockholders' equity and cash flows for each of the two years then ended and cumulatively, for the period from October 1, 2003 to September 30, 2006. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits. We did not audit the cumulative totals of the Company for the period from October 6, 1998 (date of incorporation) to September 30, 2003, which totals reflect a deficit of \$15,640 accumulated during the development stage. Those cumulative totals were audited by other independent auditors, whose report, dated November 17, 2003, expressed an unqualified opinion on the cumulative amounts but included an emphasis of a matter. Our opinion, in so far as it relates to amounts included for that period is based on the report of the other independent auditors, mentioned above.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, based upon our audits and the report of the other independent auditors, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of the Company and its subsidiary as of September 30, 2006 and 2005, and the consolidated results of their operations and their cash flows for each of the years then ended and cumulatively, for the period from October 1, 2003 to September 30, 2006, in conformity with accounting principles generally accepted in the United States of America.

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note 1 to the financial statements, the Company has net losses for the period from inception (October 6, 1998) through September 30, 2006 of \$3,777,413 and presently the Company does not have sufficient cash resources to meet its requirements in the twelve months following October 1, 2006. These reasons raise substantial doubt about its ability to continue as a going concern. Management's plans in regard to these matters are also described in Note 1. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

**INDEPENDENT AUDITORS' REPORT**

To the Board of Directors of  
San Jose International, Inc.  
(A Development Stage Company)

We have audited the statements of operations, changes in stockholders' equity and cash flows for the period from October 6, 1998 (date of inception) through September 30, 2003 of San Jose International, Inc. (A Development Stage Company). These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the results of operations and cash flows of San Jose International, Inc. for the period from October 6, 1998 (date of inception) through September 30, 2003 in conformity with accounting principles generally accepted in the United States of America.

The accompanying financial statements have been prepared assuming the Company will continue as a going concern. As discussed in Note 1 to the financial statements, the Company has had significant losses since inception. This condition raises substantial doubt as to its ability to continue as a going concern. Management's plans regarding those matters are also described in Note 1. These financial statements do not include any adjustments that might result from the outcome of this uncertainty.

\* Incorporation date, see note 1a.

The accompanying notes are an integral part of the financial statements.

**GAMMACAN INTERNATIONAL INC.**  
(A Development Stage Company)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

**NOTE 1 - SIGNIFICANT ACCOUNTING POLICIES:**

**a. General:**

GammaCan International Inc. (A Development Stage Company; the Company ) was incorporated on October 6, 1998, under the laws of the State of Delaware, under the name of San Jose International, Inc. The Company has no significant revenues and in accordance with Statement of financial Accounting Standard ( SFAS ) No. 7 Accounting and Reporting by Development Stage enterprises , the Company is considered a development stage company.

During August 2004, the Company acquired, through its then wholly-owned subsidiary, GammaCan Ltd ( the Subsidiary ), all of the in-process research and development ( IPR&D ) of ARP Biomed, Ltd. ( ARP ), an Israeli Company. The IPR&D was acquired for the purpose of continuing research related to the clinical treatment of various types of cancer. The purchase price was \$100,000 which was settled with the issuance of 12.5% of the Subsidiary issued and outstanding common shares. Under the terms of the agreement, the Company was required to lend \$800,000 to its subsidiary, to finance the clinical trials and conduct further research and development utilizing the acquired IPR&D, which was valued at \$100,000. In accordance with SAB 51, the gain on issuance of the subsidiary's stock, totaling \$86,625, was recorded as an addition to paid in capital within Stockholders' Equity due to the fact that there is no certainty of the realization of this gain.

Subsequent to the transaction, on August 19, 2004, the name of the company was changed from San Jose International, Inc. into GammaCan International, Inc. .

At this point in the development stage, the company's focus is to demonstrate efficacy of IgG cancer immunotherapy in human clinical trials. In July 2005, the company commenced Phase 2 clinical trials in humans to demonstrate clinical efficacy of IgG immunotherapy in three major cancers: colon, prostate and melanoma. These Phase 2 clinical trials are being conducted at three medical centers in Israel and results are anticipated during 2007. The Phase 2 clinical trial is due to be completed during 2007. Following analysis and publication of the results the Company will decide on how to proceed with its future clinical work regarding the use of IgG. The decision will be based on several factors including the ability to attract strategic partners for co-development.

The Company is in the process of applying for an IND with the US FDA for VitiGam, the Company's second generation IgG product and first-in-class anti-cancer immunotherapy. VitiGam is slated to enter the clinic under a US IND in the near future. VitiGam is designed to target metastatic melanoma patients with Stage III and IV melanoma.

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. The Company has net losses for the period from inception (October 6, 1998) through September 30, 2006 of \$3,777,413, as well as negative cash flow from operating activities. Presently, the company does not have sufficient cash resources to meet its requirements in the twelve months following October 1, 2006. These factors raise substantial doubt about the company's ability to continue as a going concern. Management is in the process of evaluating various financing alternatives as the Company will need to finance future research and development activities and general and administrative expenses through fund raising in the public or private equity markets. Although there is no assurance that the Company will be successful with those initiatives, management is confident that it will be able to secure the necessary financing as a result of ongoing financing discussions with third party investors and existing shareholders.

**GAMMACAN INTERNATIONAL INC.**

(A Development Stage Company)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

**NOTE 1 - SIGNIFICANT ACCOUNTING POLICIES** (continued):

These financial statements do not include any adjustments that may be necessary should the company be unable to continue as a going concern. The Company's continuation as a going concern is dependent on its ability to obtain additional financing as may be required and ultimately to attain profitability.

**b. Accounting principles**

The consolidated financial statements have been prepared in accordance with generally accepted accounting principles in the United States of America ( U.S. GAAP ).

**c. Use of estimates in the preparation of financial statements**

The preparation of the financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the financial statement date and the reported expenses during the reporting periods. Actual results could differ from those estimates.

**d. Functional currency**

The currency of the primary economic environment in which the operations of the Company and its subsidiary are conducted is the US dollar ( \$ or dollar ). Most of the Company's research and development cost are incurred in dollars. A significant part of the Company's capital expenditures and most of its financing is in dollars. Thus, the functional currency of the Company and its subsidiary is the dollar.

Transactions and balances originally denominated in dollars are presented at their original amounts. Balances in foreign currencies are translated into dollars using historical and current exchange rates for non-monetary and monetary balances, respectively. For foreign transactions and other items reflected in the statements of operations, the following exchange rates are used: (1) for transactions exchange rates at transaction dates or average rates and (2) for other items (derived from non-monetary balance sheet items such as depreciation) historical exchange rates. The resulting transaction gains or losses are carried to financial income or expenses, as appropriate.

**e. Principles of consolidation**

The consolidated financial statements include the accounts of the Company and its subsidiary GammaCan Ltd. All material inter-company transactions and balances have been eliminated in consolidation.

**f. Property and equipment**

Property and equipment are recorded at cost and depreciated by the straight-line method over the estimated useful lives of the assets.

Annual rates of depreciation are as follows:

	%
Computers and peripheral equipment	33
Office furniture and equipment	6-15

**GAMMACAN INTERNATIONAL INC.**

(A Development Stage Company)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

**NOTE 1 - SIGNIFICANT ACCOUNTING POLICIES (continued):**

**g. Deferred taxes**

Deferred taxes are determined utilizing the assets and liabilities method based on the estimated future tax effects of differences between the financial accounting and tax bases of assets and liabilities under the applicable tax laws. Deferred tax balances are computed using the tax rates expected to be in effect when those differences reverse. A valuation allowance in respect of deferred tax assets is provided if, based upon the weight of available evidence, it is more likely than not that some or all of the deferred tax assets will not be realized. The Company has provided a full valuation allowance with respect to its deferred tax assets.

Regarding the Israeli subsidiary, paragraph 9(f) of FAS 109, Accounting for Income Taxes, prohibits the recognition of deferred tax liabilities or assets that arise from differences between the financial reporting and tax bases of assets and liabilities that are measured from the local currency into dollars using historical exchange rates, and that result from changes in exchange rates or indexing for tax purposes. Consequently, the abovementioned differences were not reflected in the computation of deferred tax assets and liabilities

**h. Research and development**

Research and development costs are expensed as incurred.

Acquisition of in process research and development and the costs of registered patents that have not yet reached technological feasibility and have no alternative future use, are expensed as incurred.

**i. Cash equivalents**

The company considers all short term, highly liquid investments, which include short-term deposits with original maturities of three months or less from the date of purchase that are not restricted as to withdrawal or use and are readily convertible to known amounts of cash, to be cash equivalents.

**j. Comprehensive loss**

The Company has no other comprehensive loss components other than net loss for the reported periods.

**k. Loss per share**

Basic and diluted net losses per common share are computed by dividing the net loss for the period by the weighted average number of common shares outstanding during the period. Outstanding stock options and warrants have been excluded from the calculation of the diluted loss per share because all such securities are anti-dilutive for all periods presented. The total number of common stock options and warrants excluded from the calculation of diluted net loss was 5,917,775 for the year ended September 30, 2006 (1,510,000 for the year ended September 30, 2005).

**GAMMACAN INTERNATIONAL INC.**  
(A Development Stage Company)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

**NOTE 1 - SIGNIFICANT ACCOUNTING POLICIES** (continued):

**l. Impairment in value of long-lived assets**

Under FAS 144 Accounting for the Impairment or Disposal of Long-Lived Assets ( FAS 144 ), the Company reviews long-lived assets, to be held and used, for impairment whenever events or changes in circumstances indicate that the carrying amount of the assets may not be recoverable. Under FAS 144, if the sum of the expected future cash flows (undiscounted and without interest charges) of the long-lived assets is less than the carrying amount of such assets, an impairment loss would be recognized, and the assets are written down to their estimated fair values

**m. Stock based compensation**

The Company accounts for employee stock based compensation in accordance with Accounting Principles Board Opinion No. 25 Accounting for Stock Issued to Employees ( APB 25 ) and related interpretations. Under APB 25 compensation costs for employees stock option plan is measured using the intrinsic value based method of accounting. In accordance with FAS 123 - Accounting for Stock-Based Compensation as amended by FAS 148 ( FAS 123 ), the Company discloses pro forma data assuming the Company had accounted for employee stock option grants using the fair value-based method defined in FAS 123. The Company expects to adopt the provisions of FAS 123 (revised 2004) on October 1, 2006 (see also note 1n).

The company accounts for equity instruments issued to third party service providers (non-employees) in accordance with the fair value based on an option-pricing model, pursuant to the guidance in EITF 96-18 Accounting for Equity Instruments That Are Issued to Other Than Employees for Acquiring, or in Conjunction with Selling Goods or Services . The fair value of the options granted is revalued over the related service periods and recognized using the accelerated method.

The following table illustrates the pro - forma effect on net loss and loss per common share assuming the Company had applied the fair value recognition provisions of FAS 123 to its stock-based employee compensation:

	Year ended September 30,	
	2006	2005
Net loss as reported	\$ (2,064,795)	\$ (1,198,532)
Add back: Stock based employee compensation expense included in net loss as reported	163,517	
Deduct: pro forma stock based employee compensation expense determined under fair value method for all awards	(1,107,201)	(153,287)
Recognize the reversal of the pro forma stock based employee compensation expense determined under fair value method due to forfeiture of awards granted to employees	79,676	118,193
<b>Pro forma net loss</b>	<b>\$ (2,928,803)</b>	<b>\$ (1,233,626)</b>
Net loss per common shares:		
Basic and diluted loss per shares - as reported	\$ (0.074)	\$ (0.046)
Basic and diluted loss per shares - pro forma	\$ (0.104)	\$ (0.047)

**GAMMACAN INTERNATIONAL INC.**  
(A Development Stage Company)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

**NOTE 1 - SIGNIFICANT ACCOUNTING POLICIES** (continued):

Unrecognized compensation as determined under FAS 123 as of September 30, 2006 totaled \$2,123,982.

The weighted average fair value of the options at the date of grant for options granted during 2006 and 2005 was \$1.19 and \$0.90, respectively.

The fair value of each option grant is estimated on the date of grant using the Black Scholes option-pricing model with the following weighted average assumptions:

	For options granted in Year ended September 30,	
	2006	2005
Expected option life (years)	7.85	7.88
Expected stock price volatility	80.0%-85.1%	71.9%-87.0%
Risk free interest rate	4.5%	4.0%
Expected dividend yield	0.0%	0.0%

**n. Recently issued accounting pronouncements:**

- 1) In December 2004, the Financial Accounting Standards Board ( FASB ) issued the revised Statement of Financial Accounting Standards ( FAS ) No. 123, *Share-Based Payment* (FAS 123R), which addresses the accounting for share-based payment transactions in which the Company obtains employee services in exchange for (a) equity instruments of the Company or (b) liabilities that are based on the fair value of the Company's equity instruments or that may be settled by the issuance of such equity instruments. In March 2005, the SEC issued Staff Accounting Bulletin No. 107 (SAB 107) regarding the SEC's interpretation of FAS 123R. FAS 123R eliminates the ability to account for employee share-based payment transactions using APB Opinion No. 25, *Accounting for Stock Issued to Employees*, and requires instead that such transactions be accounted for using the grant-date fair value based method. This Statement will be effective as of the beginning of the first annual reporting period that begins after December 15, 2005, for small business issuers, which is October 1, 2006 for the Company.

This Statement applies to all awards granted or modified after the Statement's effective date. In addition, compensation cost for the unvested portion of previously granted awards that remain outstanding on the Statement's effective date shall be recognized on or after the effective date, as the related services are rendered, based on the awards' grant-date fair value as previously calculated for the pro-forma disclosure under FAS 123.

The Company will apply the modified prospective application transition method, as permitted by the Statement. Under such transition method, upon the adoption of FAS 123R, the Company's financial statements for periods prior to the effective date of the Statement will not be restated.

The adaptation of FAS 123R is expected to have a material impact on the Company's financial statements and its results of operations.

**GAMMACAN INTERNATIONAL INC.**

(A Development Stage Company)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

**NOTE 1 - SIGNIFICANT ACCOUNTING POLICIES** (continued):

- 2) In June 2005, the Financial Accounting Standards Board issued FAS No. 154, Accounting Changes and Error Corrections - a replacement of APB Opinion No. 20 and FASB Statement No. 3. This Statement generally requires retrospective application to prior periods financial statements of changes in accounting principle. Previously, Opinion No. 20 required that most voluntary changes in accounting principle were recognized by including the cumulative effect of changing to the new accounting principle in net income of the period of the change. FAS 154 apply to all voluntary changes in accounting principle. It also applies to changes required by an accounting pronouncement in the unusual instance that the pronouncement does not include specific transition provisions. When a pronouncement includes specific transition provisions, those provisions should be followed. This Statement shall be applied to accounting changes and corrections of errors made in fiscal years beginning after December 15, 2005, which is the year beginning October 1, 2006 for the company.
- 3) In July 2006, the FASB issued FASB Interpretation (FIN) No. 48 Accounting for Uncertainty in Income Taxes (FIN 48). FIN 48 prescribes a comprehensive model for recognizing, measuring, presenting and disclosing in the financial statements tax positions taken or expected to be taken on a tax return, including a decision whether to file or not to file in a particular jurisdiction. FIN 48 is effective for fiscal years beginning after December 15, 2006 (year beginning October 1, 2007 for the Company). If there are changes in net assets as a result of application of FIN 48 these will be accounted for as an adjustment to retained earnings. In the Company's opinion, implementation of this standard is not expected to have a material effect on its financial statements in future periods.
- 4) In September 2006, the FASB issued Statement of Financial Accounting Standard (SFAS) No. 157, Fair Value Measurements (FAS 157). FAS 157 defines fair value, establishes a framework for measuring fair value in accordance with generally accepted accounting principles, and expands disclosures about fair value measurements. SFAS No. 157 will apply whenever another standard requires (or permits) assets or liabilities to be measured at fair value. The standard does not expand the use of fair value to any new circumstances. SFAS No. 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years, which is the year beginning October 1, 2008 for the company.

**GAMMACAN INTERNATIONAL INC.**  
(A Development Stage Company)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

**NOTE 1 - SIGNIFICANT ACCOUNTING POLICIES** (continued):

- 5) In September 2006, the SEC issued Staff Accounting Bulletin No. 108, Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements ( SAB No. 108 ). SAB No. 108 provides guidance on the consideration of the effects of prior year misstatements in quantifying current year misstatements for the purpose of a materiality assessment. SAB 108 establishes an approach that requires quantification of financial statement errors based on the effects of each of the company's balance sheet and statement of operations and the related financial statement disclosures. SAB No. 108 permits existing public companies to record the cumulative effect of initially applying this approach in the first year ending after November 15, 2006 by recording the necessary correcting adjustments to the carrying values of assets and liabilities as of the beginning of that year with the offsetting adjustment recorded to the opening balance of retained earnings. Additionally, the use of the cumulative effect transition method requires detailed disclosure of the nature and amount of each individual error being corrected through the cumulative adjustment and how and when it arose. The company does not expect this Statement to have a material effect on the company's financial statements or its results of operations.
- 6) In September 2006, the Financial Accounting Standards Board (the FASB ) issued Statement of Financial Accounting Standard No. 158, Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans (FAS 158). FAS 158 requires employers to fully recognize the obligations associated with single-employer defined benefit pension, retiree healthcare and other postretirement plans in their financial statements. The provisions of FAS 158 are effective as of the end of the fiscal year ending after December 15, 2006, which is the year beginning October 1, 2007 for the Company. In the Company's opinion, implementation of this standard is not expected to have a material effect on its financial statements in future periods.

**o. Reclassifications**

Certain figures in respect of prior years have been reclassified to conform to the current year presentation.

**GAMMACAN INTERNATIONAL INC.**  
(A Development Stage Company)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

**NOTE 2 - EMPLOYEE RIGHTS UPON RETIREMENT**

- a. Israeli labor laws and agreements require payment of severance pay upon dismissal of an employee or upon termination of employment in certain other circumstances. The subsidiary's severance pay liability to its employees, mainly based upon length of service and the latest monthly salary (one month's salary for each year worked), is reflected by the balance sheet accrual under the liability for employee rights upon retirement. The Company records the liability as if it was payable at each balance sheet date on an undiscounted basis. The liability is partly funded by purchase of insurance policies. The amounts funded are included in the balance sheet as funds in respect of employee rights upon retirement. The policies are the Company's assets and under labor agreements, subject to certain limitations, they may be transferred to the ownership of the beneficiary employees.
- b. The severance pay expenses for the years ended September 30, 2006 and 2005, were \$17,806 and \$13,725 respectively.
- c. Cash flow information regarding the Company's liability for employee rights upon retirement:
1. The Company expects to contribute to the insurance policies \$20,694 in respect of severance pay for the year ended September 30, 2007.
  2. Due to the relatively young age of the Company's and its subsidiary's employees, benefit payments to employees reaching retirement age in the next 10 years, are not material. The amounts were determined based on the employees' current salary rates and the number of service years that will accumulate upon their retirement date. These amounts do not include amounts that might be paid to employees who will cease working for the subsidiary before their normal retirement age.

**NOTE 3 - LONG TERM DEPOSITS**

Amounts represent deposits in respect of lease agreements for the company's office facilities and vehicles used by its employees (see also note 5).

**NOTE 4 - PROPERTY AND EQUIPMENT, net**

- a. Composition of property and equipment, grouped by major classifications, is as follows:

	<b>September 30,</b>	
	<b>2006</b>	<b>2005</b>
Cost:		
Office furniture and equipment	\$ 14,287	\$ 7,400
Computers and peripheral equipment	17,852	5,462
	32,139	12,862
Less - accumulated depreciation	6,892	2,593
	\$ 25,247	\$ 10,269

- b. Depreciation expense totaled \$4,299 and \$2,534 in the years ended September 30, 2006 and 2005, respectively.

**GAMMACAN INTERNATIONAL INC.**  
(A Development Stage Company)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

**NOTE 5 COMMITMENTS:**

- a. On May 18, 2006 the subsidiary entered into a new lease agreement for its new office facilities, to which it entered on August 10, 2006. The new lease agreement is for a period of 36 months with an option to renew the lease for an additional 36 month period. The monthly lease payment is \$2,236 (the monthly lease payment per previous agreement was \$679). The future lease payments under the lease are \$26,827, 26,827 and 22,356 for the years ending September 30, 2007, 2008 and 2009 respectively.

As security for its obligation under this lease agreement the Company provided a bank guarantee in an amount equal to six monthly lease payments, which is secured by a long term bank deposit (see also note 3).

On June 8, 2006 the Company entered into a lease agreement for the office facilities it currently occupies. The lease agreement is for a period of 12 months with an automatic option to renew for another 60 days at the same monthly rate plus an increase of 14.83%. The monthly lease payment is \$1,800. The future lease payments under this lease are \$14,400 for the year ending September 30, 2007.

Rental expenses for the years ended September 30, 2006 and 2005 were \$18,307 and \$8,148, respectively

- b. The subsidiary has entered into operating lease agreements for vehicles used by its employees for a period of 3 years. The lease expenses for the year ended September 30, 2006 and 2005 were approximately \$39,328 and \$19,361, respectively. The future lease payments under the lease agreement are \$43,698, 28,443 and 4,990 for the years ending September 30, 2007, 2008 and 2009 respectively.
- c. On December 13, 2005, the subsidiary entered into a Research and Licensing Agreement with Tel Hashomer Medical Research Infrastructure and Services Ltd. ( THM ), pursuant to which the subsidiary has agreed to provide THM with \$200,000 in funding for THM to conduct a research project relating to the mechanism of action for IVIg, hyper-immune IVIg and use of IVIg as an anti-cancer treatment. As of September 30, 2006 the subsidiary paid a total of \$100,000 to THS under this agreement. According to the agreement THM has granted the subsidiary an exclusive worldwide license to any resulting technology and know-how as described in the above mentioned agreement.

**NOTE 6 - STOCK HOLDERS EQUITY:**

a. **Capital stock**

The Company's shares are traded on the Over-The-Counter ( OTC ) Bulletin Board. The quoted price per share, as of September 30, 2006 was US\$0.60.

On April 20, 2004 the Company effected a 16.5 to 1 reverse stock split of its Common Stock. All shares and per share amounts have been retroactively restated to reflect the 16.5 to 1 stock split.

Following the reverse split the Company also reduced the authorized capital of its common stock from 1,320,000,000 shares to 100,000,000 shares.

**GAMMACAN INTERNATIONAL INC.**

(A Development Stage Company)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

**NOTE 6 - STOCK HOLDERS EQUITY** (continued):

On June 8, 2004, the Company's former main stockholder returned 32,284,988 shares of common stock to the treasury for cancellation. Accordingly, an amount of \$3,228 was deducted from the Common stock amount balance and transferred to the Additional paid in capital balance.

On June 21, 2004, a company owned by the Company's sole officer and director at that time, was granted an option by one of the shareholders to purchase 100,000 options at \$0.01 per share. The fair value of the options is recognized as compensation expense in the amount of \$62,600. The options were exercised on August 17, 2004.

On August 13, 2004 the Company entered into subscription agreements for the sale of 1,224,998 units at a purchase price of \$0.75 per unit for a total consideration of \$918,750. Each unit consisted of one Common Share in the Company and one share purchase warrant, which entitles the holder to purchase an additional Common Share for \$1.50 on or before August 13, 2005. The fair value of the warrants estimated by using the Black Scholes option-pricing model is \$139,494, and is based on the following assumptions: dividend yield of 0% for all years; expected volatility of 103%; risk-free interest rates of 5.4%; and expected lives of 1 year.

On November 11, 2004 the Company entered into subscription agreements for the sale of 978,000 units at a purchase price of \$1.25 per unit for a total consideration of \$1,222,500 (The November issuance). Each unit consisted of one common share and one share purchase warrant. Each share purchase warrant entitles the holder to purchase one additional common share for a period of two years after the date of the subscription agreement at an exercise price of \$1.50 in the first 15 months and \$2.00 for the next nine months. The consideration was allocated to the shares and options issued based on relative fair value. The fair value allocated to the warrants, estimated by using the Black Scholes option-pricing model is \$367,892, which is based on the following assumptions: dividend yield of 0% for all years; expected volatility of 105%; risk-free interest rates of 5.4%; and expected lives of 2 year. Transaction costs of \$87,881 were paid in connection with this subscription agreement.

On January 25, 2005 the Company entered into a subscription agreement for the sale of 32,000 units at a purchase price of \$1.25 per unit for a total consideration of \$40,000. Each unit consisted of one common share and one share purchase warrant. Each share purchase warrant entitles the holder to purchase one additional common share for a period of two years after the date of the subscription agreement at an exercise price of \$1.50 in the first 15 months and \$2.00 for the next nine months. The consideration was allocated to the shares and options issued based on relative fair value. The fair value allocated to the warrants estimated by using the Black Scholes option-pricing model is \$12,037, based on the same assumptions that used in the November issuance. Transaction costs of \$3,200 were paid in connection with this subscription agreement.

**GAMMACAN INTERNATIONAL INC.**  
(A Development Stage Company)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

**NOTE 6 - STOCK HOLDERS EQUITY** (continued):

On October 31, 2005, the company entered into subscription agreement for the sale of 666,666 units at a purchase price of \$0.75 per unit for a total consideration of \$500,000. Each unit comprising one share of the Company's common stock and one common share purchase warrant exercisable for three years. Every 2 warrants can be exercisable to one Share at a price of \$1.00 per Share. In connection with the subscription agreement the company paid \$50,000 cash fee to a third party which assisted in securing the agreement, as well as issued 66,666 warrants to purchase common shares. Every warrant is exercisable for three years and can be exercisable to one Share at a price of \$1.50 per Share. The consideration was allocated to the shares and warrants issued based on relative fair value. The value allocated to the warrants estimated by using the Black Scholes option-pricing model is \$72,410. The value was based on the following assumptions: dividend yield of 0%; expected volatility of 80%; risk-free interest rates of 4.4%; and expected lives of 3 years.

On December 20, 2005, the company entered into subscription agreement for the sale of 1,333,334 units at a purchase price of \$0.75 per unit for a total consideration of \$1,000,000. Each unit comprising one share of the Company's common stock and one common share purchase warrant exercisable for three years. Every warrant can be exercisable to one Share at a price of \$1.20 per Share. In connection with the subscription agreement the company paid \$100,000 cash fee to third parties who assisted in securing the agreement, as well as issued 133,332 warrants to purchase common shares exercisable for three years. 66,666 warrants can be exercisable to 66,666 Share at a price of \$1.25 per Share, and 66,666 warrants can be exercisable to 66,666 Share at a price of \$1.50 per Share. The consideration was allocated to the shares and warrants issued based on relative fair value. The value allocated to all warrants estimated by using the Black Scholes option-pricing model is \$235,527. The value was based on the following assumptions: dividend yield of 0%; expected volatility of 81%; risk-free interest rates of 4.4%; and expected lives of 3 years.

On December 20, 2005, the company entered into subscription agreement for the sale of 222,222 units at a purchase price of \$0.90 per unit for a total consideration of \$200,000. Each unit comprising one share of the Company's common stock and one common share purchase warrant exercisable for three years. Every 2 warrants can be exercisable to one Share at a price of \$1.15 per Share. The consideration was allocated to the shares and warrants issued based on relative fair value. The value allocated to all warrants estimated by using the Black Scholes option-pricing model is \$34,114. The value was based on the following assumptions: dividend yield of 0%; expected volatility of 81%; risk-free interest rates of 4.4%; and expected lives of 3 years.

**GAMMACAN INTERNATIONAL INC.**  
(A Development Stage Company)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

**NOTE 6 - STOCK HOLDERS EQUITY** (continued):

**b. Summary of the company's stock options plans**

On August 17, 2004, the company's board of directors adopted the 2004 Employees and Consultants Stock Option Plan (hereafter - the Stock Option Plan). Under the Plan 5,000,000 shares have been reserved for the grant of options, which may be issued at the discretion of the Company's board of directors from time to time. Under this Plan, each option is exercisable to purchase one common share of \$0.0001 par value of the Company.

The options may be exercised after vesting and only in accordance with the following:

1. On the first anniversary commencing the grant date - 25% of the options.
2. On the last day of each of the 36 months following the first anniversary of the grant date, the options shall vest in equal monthly installments.

The maximum term of the option is 10 years.

In August 2004, 1,450,000 options were granted under the plan (of which 1,400,000 were granted to the Company's CEO). These options were forfeited during June and October 2005 due to the resignation of the related employees.

In June 2005, 50,000 options were granted under the Stock Option Plan to each of four board members (total - 200,000 options). The exercise price has been determined at \$1.15 per share, which was equivalent to the traded market price on the date of grant. The fair value of the above options on the date of grant was estimated by using Black Scholes option-pricing model as \$186,588, and was based on the following assumptions: dividend yield of 0%; expected volatility of 87%; risk-free interest rates of 4%; and expected lives of 7.88 years.

In June 2005, 100,000 options were granted under the Stock Option Plan to an employee of the subsidiary. These options were forfeited during October 2005 due to the resignation of the employee.

On October 6, 2005, 350,000 options were granted to an employee under the Stock Option Plan. The exercise price has been determined at \$0.93 per common share which was equivalent to 90% of the traded market price on the date of grant. Compensation costs calculated in accordance with APB 25 totaled \$35,000. The fair value of the above options on the date of grant estimated by using Black Scholes option-pricing model is \$283,262. The value was based on the following assumptions: dividend yield of 0%; expected volatility of 80%; risk-free interest rates of 4.5%; and expected lives of 7.59 years.

On October 20, 2005, 30,000 options were granted to an employee under the Stock Option Plan. The exercise price has been determined at \$1.35 per common share which was equivalent to the traded market price on the date of grant. The fair value of the above options on the date of grant estimated by using Black Scholes option-pricing model is \$32,637. The value was based on the following assumptions: dividend yield of 0%; expected volatility of 85%; risk-free interest rates of 4.5%; and expected lives of 7.85 years.

**GAMMACAN INTERNATIONAL INC.**  
(A Development Stage Company)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

**NOTE 6 - STOCK HOLDERS EQUITY** (continued):

On December 21, 2005, 250,000 options were granted to an employee under the Stock Option Plan. The exercise price has been determined at \$1.34 per common share which was equivalent to the traded market price on the date of grant. The fair Value of the above mentioned options on the date of the grant estimated by using the Black Scholes option-pricing model is \$269,449. The value was based on the following assumptions: dividend yield of 0%; expected volatility of 85%; risk-free interest rates of 4.5%; and expected lives of 7.85 years.

On January 12, 2006, 50,000 options were granted to an employee under the Stock Option Plan. The exercise price has been determined at \$1.10 per common share which was equivalent to the traded market price on the date of grant. The fair Value of the above mentioned options on the date of the grant estimated by using the Black Scholes option-pricing model is \$44,163. The value was based on the following assumptions: dividend yield of 0%; expected volatility of 85%; risk-free interest rates of 4.5%; and expected lives of 7.85 years.

On March 15, 2006, 50,000 options were granted to a director under the Stock Option Plan. The exercise price has been determined at \$1.37 per common share which was equivalent to the traded market price on the date of grant. The fair Value of the above mentioned options on the date of grant estimated by using the Black Scholes option-pricing model is \$54,712. The value was based on the following assumptions: dividend yield of 0%; expected volatility of 84%; risk-free interest rates of 4.5%; and expected lives of 7.85 years.

On April 17, 2006, 1,400,000 stock options were granted to the new CEO under the Stock Option Plan. The exercise price has been determined at \$1.29 per common share which was equivalent to 90% of the average closing price of the common Stock of the company on the 30 days immediately preceding the date of the resolution. Compensation costs calculated in accordance with APB 25 totaled \$434,000. The fair Value of the above mentioned options on the date of grant estimated by using the Black Scholes option-pricing model is \$1,832,296. The value was based on the following assumptions: dividend yield of 0%; expected volatility of 83%; risk-free interest rates of 4.5%; and expected lives of 7.85 years.

On May 4, 2006, 500,000 (100,000 for each of its five board members) options were granted under the Stock Option Plan. The exercise price has been determined at \$1.29 per common share which was equivalent to 90% of the average closing price of the common Stock of the company on the 30 days immediately preceding the date of the resolution. Compensation costs calculated in accordance with APB 25 totaled \$105,000. The fair Value of the above mentioned options on the date of grant estimated by using the Black Scholes option-pricing model is \$605,909. The value was based on the following assumptions: dividend yield of 0%; expected volatility of 82%; risk-free interest rates of 4.5%; and expected lives of 7.85 years.

## GAMMACAN INTERNATIONAL INC.

(A Development Stage Company)

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

## NOTE 6 - STOCK HOLDERS EQUITY (continued):

A summary of the status of the company's plan as of September 30, 2006 and 2005, and changes during the years ended on those dates, is presented below:

	Year ended September 30			
	2006		2005	
	Number	Weighted average exercise price	Number	Weighted average exercise price
		\$		\$
<b>For options granted to employees:</b>				
Options outstanding at beginning of year	350,000	\$ 1.17	1,450,000	\$ 1.30
Changes during the year:				
Granted at market price	380,000	1.31	300,000	1.15
Granted at an exercise price less than market price	2,250,000	1.23		
Exercised				
Forfeited	(150,000)	1.20	(1,400,000)	1.30
Expired				
Options outstanding at end of year	2,830,000	1.24	350,000	1.17
Options exercisable at end of year	82,292			
Weighted average fair value of options granted during the year	\$ 1.19		\$ 0.90	

The following table presents summary information concerning the options outstanding as of September 30, 2006:

Options outstanding				Options exercisable	
Range of exercise prices	Number outstanding at September 30, 2006	Weighted average remaining contractual life	Weighted average exercise price	Number exercisable at September 30, 2006	Weighted average exercise price
\$		Years	\$		\$
0.93 to 1.37	2,830,000	9.36	1.24	82,292	1.15

**GAMMACAN INTERNATIONAL INC.**  
(A Development Stage Company)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

**NOTE 6 - STOCK HOLDERS EQUITY** (continued):

In June 2005, 50,000 options were granted under the Stock Option Plan to each of three scientific advisors (total - 150,000 options).

The exercise price has been determined at \$1.15 per share, which was equivalent to the traded market price on the date of grant. The fair value of the above options is estimated by using Black Scholes option-pricing model as \$92,383, and was based on the following assumptions: dividend yield of 0% for all years; expected volatility of 91%; risk-free interest rates of 4.5%; and expected lives of 7.88 years.

During September 2006 50,000 of these options were forfeited do to the departure of one of the scientific advisor. Expenses in respect of options forfeited due to non- performance is reversed.

The Company recorded stock compensation of \$33,440 and \$34,590 during the year ended September 2006 and 2005 respectively, related to consulting services.

The company did not grant options to non employees other then to its scientific advisors, as described above.

As to grants of stock options subsequent to September 30, 2006, see note 11.

**NOTE 7 - TAXES ON INCOME:**

**a. Deferred income taxes:**

	September 30,	
	2006	2005
In respect of:		
Net operating loss carryforward	\$ 431,165	\$ 268,935
Research and development expenses	145,840	
Start-up costs	142,932	
Other	6,209	
Less - Valuation allowance	(726,146)	(268,935)
	-	-
Net deferred tax assets	-	-

Realization of deferred tax assets is dependent upon sufficient future taxable income during the period that deductible temporary differences and carryforwards are expected to be available to reduce taxable income. As the achievement of required future taxable income is uncertain, the Company recorded a full valuation allowance.

**b. Corporate taxation in the U.S.**

Taxes on income included in the consolidated statements of operations represent current taxes due to taxable income of the US Company.

The applicable corporate tax rate for the Company is 22%.

**GAMMACAN INTERNATIONAL INC.**  
(A Development Stage Company)

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

**NOTE 7 - TAXES ON INCOME** (continued):

**c. Corporation taxation in Israel**

The subsidiary is taxed in accordance with Israeli tax laws. Under the Income Tax (Inflationary Adjustments) Law, 1985, results for tax purposes are measured in real terms, in accordance with the changes in the Israeli consumer price index (CPI). The Israeli subsidiary is taxed under this law.

The regular corporate tax rate in Israel for 2006 is 31%. The corporate tax rates for 2007 and thereafter are as follows: 2007 29%, 2008 27%, 2009 26% and for 2010 and thereafter 25%.

As of September 30, 2006, the subsidiary has an accumulated tax loss carryforward of approximately \$1,724,661 (September 30, 2005 approximately - \$1,151,579). Under Israeli tax laws, carryforward tax losses are linked to the Israeli CPI. The Israeli loss carryforwards have no expiration date.

**d. Reconciliation of the theoretical tax expense to actual tax expense**

The main reconciling items, between the statutory tax rate of the Company and the subsidiary and the effective rate are the non deductible expenses and the non-recognition of tax benefits from carryforward tax losses due to the uncertainty of the realization of such tax benefits (see above).

**NOTE 8 - RESEARCH AND DEVELOPMENT COSTS:**

	Year ended September 30,	
	2006	2005
Clinical trials	\$ 390,717	\$ 239,200
Consulting	142,404	127,082
Salaries and related expenses	155,116	91,337
Costs of registered patents	79,982	50,916
Compensation costs in respect of warrants granted to consultants	33,440	34,590
Other	595	2,803
	\$ 802,254	\$ 545,928
