  - o Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))
-

**Item 1.01 Entry into a Material Definitive Agreement**

We have exercised an option under our existing satellite purchase agreement with Space Systems/Loral, Inc. to purchase an additional satellite. Space Systems/Loral will design and construct the satellite, which is expected to be one of the most advanced and powerful satellites ever built.

Construction of this satellite is expected to be completed in 2010. The satellite is expected to be launched into an inclined elliptical orbit to complement our existing satellites, which were also manufactured by Space Systems/Loral. Our unique hybrid constellation, consisting of satellites operating in a highly inclined geosynchronous orbits in combination with one satellite operating in a geostationary orbit, will provide unparalleled redundancy, enhanced coverage and exceptional performance.

The aggregate cost of designing and building this satellite will be approximately \$169 million. A substantial portion of this purchase price will not be paid until 2009 and following the launch and successful completion of on-orbit testing of this satellite.

In June 2006, in connection with the contract to purchase our fifth satellite, which is currently under construction, Space Systems/Loral agreed to provide us a \$100 million vendor financing facility. No amounts in connection with this existing facility have been drawn. As part of the exercise of the option to purchase an additional satellite, Space Systems/Loral has amended and extended this \$100 million vendor financing to permit us to access the facility to pay a portion of the purchase price of the new satellite.

**SIGNATURES**

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

SIRIUS SATELLITE RADIO INC.
