VANECK VECTORS™ RUSSIA SMALL-CAP ETF*

Ticker: RSXJ®
 Principal U.S. Listing Exchange: NYSE Arca, Inc.
SUMMARY PROSPECTUS
 MAY 1, 2016

RSXJSUM

Before you invest, you may want to review the Fund's prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus and other information about the Fund online at <http://www.vaneck.com/library/etfs/>. You can also get this information at no cost by calling 800.826.2333, or by sending an email request to info@vaneck.com. The Fund's prospectus and statement of additional information, both dated May 1, 2016, are incorporated by reference into this summary prospectus.

INVESTMENT OBJECTIVE

VanEck Vectors Russia Small-Cap ETF (the Fund) seeks to replicate as closely as possible, before fees and expenses, the price and yield performance of the MVIS™ Russia Small-Cap Index (the Russia Small-Cap Index).

FUND FEES AND EXPENSES

The following tables describe the fees and expenses that you may pay if you buy and hold shares of the Fund (Shares).

Shareholder Fees (*fees paid directly from your investment*) None

Annual Fund Operating Expenses

(*expenses that you pay each year as a percentage of the value of your investment*)

Management Fee	0.50%
Other Expenses	0.69%

Total Annual Fund Operating Expenses ^(a)	1.19%
Fee Waivers and Expense Reimbursement ^(a)	-0.42%

Total Annual Fund Operating Expenses After Fee Waiver and Expense Reimbursement ^(a)	0.77%
--	-------

Edgar Filing: VanEck Vectors ETF Trust - Form 497K

(a) Van Eck Associates Corporation (the Adviser) has agreed to waive fees and/or pay Fund expenses to the extent necessary to prevent the operating expenses of the Fund (excluding acquired fund fees and expenses, interest expense, depositary receipt fees up to 0.08% of the Fund's average daily net assets, offering costs, trading expenses, taxes and extraordinary expenses) from exceeding 0.67% of the Fund's average daily net assets per year until at least May 1, 2017. During such time, the expense limitation is expected to continue until the Fund's Board of Trustees acts to discontinue all or a portion of such expense limitation.

EXPENSE EXAMPLE

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. This example does not take into account brokerage commissions that you pay when purchasing or selling Shares of the Fund.

The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your Shares at the end of those periods. The example also assumes that your investment has a 5% annual return and that the Fund's operating expenses remain the same (except that the example incorporates the fee waiver and/or expense reimbursement arrangement for only the first year). Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

YEAR EXPENSES

1	\$	79
3	\$	336
5	\$	614
10	\$	1,406

* Prior to May 1, 2016, the Fund's name was Market Vectors Russia Small-Cap ETF.

PORTFOLIO TURNOVER

The Fund will pay transaction costs, such as commissions, when it purchases and sells securities (or turns over its portfolio). A higher portfolio turnover will cause the Fund to incur additional transaction costs and may result in higher taxes when Fund Shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, may affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 30% of the average value of its portfolio.

PRINCIPAL INVESTMENT STRATEGIES

The Fund normally invests at least 80% of its total assets in securities that comprise the Fund's benchmark index. The Russia Small-Cap Index includes securities of Russian small- and medium-capitalization companies. A company is generally considered to be a Russian company if it is incorporated in Russia or is incorporated outside of Russia but generates at least 50% of its revenues (or, in certain circumstances, has at least 50% of its assets) in Russia. The Fund will normally invest at least 80% of its total assets in securities of small-capitalization Russian companies. The Fund may utilize depositary receipts to seek performance that corresponds to the Fund's benchmark index. Investments in depositary receipts of Russian companies whose securities are represented in the Russia Small-Cap Index, and investments in securities of Russian companies for which the Russia Small-Cap Index holds depositary receipts, will count toward the Fund's 80% investment policy. As of December 31, 2015, the Russia Small-Cap Index included 26 securities of companies with a market capitalization range of between approximately \$150 million and \$4.1 billion and a weighted average market capitalization of \$1.3 billion. The Fund's 80% investment policy is non-fundamental and may be changed without shareholder approval upon 60 days' prior written notice to shareholders.

The Fund, using a passive or indexing investment approach, attempts to approximate the investment performance of the Russia Small-Cap Index by investing in a portfolio of securities that generally replicates the Russia Small-Cap Index.

The Fund is classified as a non-diversified fund and, therefore, may invest a greater percentage of its assets in a particular issuer. The Fund may concentrate its investments in a particular industry or group of industries to the extent that the Russia Small-Cap Index concentrates in an industry or group of industries. As of December 31, 2015, each of the industrials, energy, financial services, basic materials and utilities sectors represented a significant portion of the Russia Small-Cap Index.

PRINCIPAL RISKS OF INVESTING IN THE FUND

Investors in the Fund should be willing to accept a high degree of volatility in the price of the Fund's Shares and the possibility of significant losses. An investment in the Fund involves a substantial degree of risk. An investment in the Fund is not a deposit with a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Therefore, you should consider carefully the following risks before investing in the Fund, each of which could significantly and adversely affect the value of an investment in the Fund.

Special Risk Considerations of Investing in Russian Issuers. Investment in securities of Russian issuers involves risks not typically associated with investments in securities of issuers in more developed countries that may negatively affect the value of your investment in the Fund. Such heightened risks include, among others, expropriation and/or nationalization of assets, restrictions on and government intervention in international trade, confiscatory or punitive taxation, regional conflict, political instability, including authoritarian and/or military involvement in governmental decision making, armed conflict, the imposition of economic sanctions by other nations, the impact on the economy as a result of civil unrest, and social instability as a result of religious, ethnic and/or socioeconomic unrest.

The securities markets of Russia are underdeveloped and are often considered to be less correlated to global economic cycles than those markets located in more developed countries. As a result, securities markets in Russia are subject to greater risks associated with market volatility, lower market capitalization, lower trading volume, inflation, greater price fluctuations, uncertainty regarding the existence of trading markets, governmental control and heavy regulation of labor and industry. Additionally, certain investments in Russia may become less liquid in response to market developments or adverse investor perceptions, or become illiquid after purchase by the Fund, particularly during periods of market turmoil. When the Fund holds illiquid investments, its portfolio may be harder to value, especially in changing markets. Moreover, trading on securities markets in Russia may be suspended altogether.

The government in Russia may restrict or control to varying degrees the ability of foreign investors to invest in securities of issuers located or operating in Russia. These restrictions and/or controls may at times limit or prevent foreign investment in securities of issuers located or operating in Russia. Moreover, governmental approval or special licenses may be required prior to investments by foreign investors and may limit the amount of investments by foreign investors in a particular industry and/or issuer and may limit such foreign investment to a certain class of securities of an issuer that may have less advantageous rights than the classes available for purchase by domiciliaries of Russia and/or impose additional taxes on foreign investors. Less information may be available about companies in which the Fund invests because many companies that are tied economically to Russia are not subject to accounting, auditing and financial reporting standards or to other regulatory practices required by U.S. companies. These factors, among others, make investing in issuers located or operating

in Russia significantly riskier than investing in issuers located or operating in more developed countries, and any one of them could cause a decline in the value of the Fund's Shares.

As a result of recent events involving Ukraine and Russia, the United States and the European Union have imposed sanctions on certain Russian entities and individuals and certain sectors of Russia's economy, which may result in, among other things, the devaluation of Russian currency, a downgrade in the country's credit rating, and/or a decline in the value and liquidating of Russian securities, property or interests. The United States and other nations or international organizations may impose additional economic sanctions or take other actions that may adversely affect Russia-exposed issuers and companies in various sectors of the Russian economy, including, but not limited to, the financial services, energy, metals and mining, engineering, and defense and defense-related materials sectors. These sanctions, any future sanctions or other actions, or even the threat of further sanctions or other actions, may negatively affect the value and liquidity of the Fund's portfolio and may impair the Fund's ability to achieve its investment objective. For example, the Fund may be prohibited from investing in securities issued by companies subject to such sanctions. In addition, the sanctions may require the Fund to freeze its existing investments in Russian companies, prohibiting the Fund from buying, selling or otherwise transacting in these investments. Russia has undertaken and may undertake additional countermeasures or retaliatory actions which may further impair the value and liquidity of the Fund's portfolio and potentially disrupt its operations.

For these or other reasons, the Fund could seek to suspend redemptions of Creation Units, including in the event that an emergency exists in which it is not reasonably practicable for the Fund to dispose of its securities or to determine its net asset value (NAV). The Fund could also, among other things, limit or suspend creations of Creation Units. During the period that creations or redemptions are affected, the Fund's shares could trade at a significant premium or discount to their NAV. In the case of a period during which creations are suspended, the Fund could experience substantial redemptions, which may exacerbate the discount to NAV at which the Fund's shares trade, cause the Fund to experience increased transaction costs, and cause the Fund to make greater taxable distributions to shareholders of the Fund. The Fund may also change its investment objective by, for example, seeking to track an alternative index, or the Fund could liquidate all or a portion of its assets, which may be at unfavorable prices.

Despite recent reform and privatization, the Russian government continues to control a large share of economic activity in the region. The Russian government owns shares in corporations in a range of sectors including banking, energy production and distribution, automotive, transportation and telecommunications. Additionally, because Russia produces and exports large volumes of oil and gas, the Russian economy is particularly sensitive to the price of oil and gas on the world market, and a decline in the price of oil and gas could have a significant negative impact on the Russian economy.

The value of the Russian Ruble may be subject to a high degree of fluctuation. The Fund's assets will be invested primarily in equity securities of Russian issuers and the income received by the Fund will be principally in Russian Rubles. The Fund's exposure to the Russian Ruble and changes in value of the Russian Ruble versus the U.S. dollar may result in reduced returns to the Fund. Moreover, the Fund may incur costs in connection with conversions between U.S. dollars and the Russian Ruble. In addition, current political and economic events in Russia and the effects of the recent global economic crisis on the Russian economy may have significant adverse effects on the Russian Ruble and on the value and liquidity of the Fund's investments.

Risk of Investing in Foreign Securities. Investments in the securities of foreign issuers involve risks beyond those associated with investments in U.S. securities. These additional risks include greater market volatility, the availability of less reliable financial information, higher transactional and custody costs, taxation by foreign governments, decreased market liquidity and political instability. Because certain securities markets may be limited in size, the activity of large traders may have an undue influence on the prices of securities that trade in such markets. Because the Fund may invest in securities denominated in foreign currencies and some of the income received by the Fund

may be in foreign currencies, changes in currency exchange rates may negatively impact the Fund's return. The risks of investing in emerging market countries are greater than risks associated with investments in foreign developed countries.

Risk of Investing in Emerging Market Issuers. Investments in securities of emerging market issuers are exposed to a number of risks that may make these investments volatile in price or difficult to trade. Political risks may include unstable governments, nationalization, restrictions on foreign ownership, laws that prevent investors from getting their money out of a country and legal systems that do not protect property rights as well as the laws of the United States. Market risks may include economies that concentrate in only a few industries, securities issues that are held by only a few investors, limited trading capacity in local exchanges and the possibility that markets or issues may be manipulated by foreign nationals who have inside information.

Risk of Investing in Depositary Receipts. The Fund may invest in depositary receipts which involve similar risks to those associated with investments in foreign securities. Depositary receipts are receipts listed on U.S. or foreign exchanges issued by banks or trust companies that entitle the holder to all dividends and capital gains that are paid out on the underlying foreign shares. Investments in depositary receipts may be less liquid than the underlying shares in their primary trading market

and, if not included in the Russia Small-Cap Index, may negatively affect the Fund's ability to replicate the performance of the Russia Small-Cap Index.

Risk of Investing in the Industrials Sector. To the extent that the industrials sector continues to represent a significant portion of the Fund, the Fund will be sensitive to changes in, and its performance may depend to a greater extent on, the overall condition of the industrials sector. Companies in the industrials sector may be adversely affected by changes in government regulation, world events and economic conditions. In addition, companies in the industrials sector may be adversely affected by environmental damages, product liability claims and exchange rates.

Risk of Investing in the Energy Sector. To the extent that the energy sector continues to represent a significant portion of the Fund, the Fund will be sensitive to changes in, and its performance may depend to a greater extent on, the overall condition of the energy sector. Companies operating in the energy sector are subject to risks including, but not limited to, economic growth, worldwide demand, political instability in the regions that the companies operate, government regulation stipulating rates charged by utilities, interest rate sensitivity, oil price volatility, energy conservation, environmental policies, depletion of resources and the cost of providing the specific utility services. Recently, the price of oil has declined significantly and experienced significant volatility, which has adversely impacted companies operating in the energy sector. In addition, these companies are at risk of civil liability from accidents resulting in injury, loss of life or property, pollution or other environmental damage claims and risk of loss from terrorism and natural disasters.

Risk of Investing in the Financial Services Sector. To the extent that the financial services sector continues to represent a significant portion of the Fund, the Fund will be sensitive to changes in, and its performance may depend to a greater extent on, the overall condition of the financial services sector. Companies in the financial services sector may be subject to extensive government regulation that affects the scope of their activities, the prices they can charge and the amount of capital they must maintain. The profitability of companies in the financial services sector may be adversely affected by increases in interest rates, by loan losses, which usually increase in economic downturns, and by credit rating downgrades. In addition, the financial services sector is undergoing numerous changes, including continuing consolidations, development of new products and structures and changes to its regulatory framework. Furthermore, some companies in the financial services sector perceived as benefitting from government intervention in the past may be subject to future government-imposed restrictions on their businesses or face increased government involvement in their operations. Increased government involvement in the financial services sector, including measures such as taking ownership positions in financial institutions, could result in a dilution of the Fund's investments in financial institutions. Recent developments in the credit markets may cause companies operating in the financial services sector to incur large losses, experience declines in the value of their assets and even cease operations.

Risk of Investing in the Basic Materials Sector. To the extent that the basic materials sector continues to represent a significant portion of the Fund, the Fund will be sensitive to changes in, and its performance may depend to a greater extent on, the overall condition of the basic materials sector. Companies engaged in the production and distribution of basic materials may be adversely affected by changes in world events, political and economic conditions, energy conservation, environmental policies, commodity price volatility, changes in exchange rates, imposition of import controls, increased competition, depletion of resources and labor relations.

Risk of Investing in the Utilities Sector. To the extent that the utilities sector continues to represent a significant portion of the Fund, the Fund will be sensitive to changes in, and its performance may depend to a great extent on, the overall condition of the utilities sector. Companies in the utilities sector may be adversely affected by changes in exchange rates, domestic and international competition, difficulty in raising adequate amounts of capital and governmental limitation on rates charged to customers.

Risk of Investing in Small- and Medium-Capitalization Companies. Small- and medium-capitalization companies may be more volatile and more likely than large-capitalization companies to have narrower product lines, fewer financial resources, less management depth and experience and less competitive strength. In addition, these companies often have greater price volatility, lower trading volume and less liquidity than larger more established companies. Returns on investments in securities of small-capitalization and medium-capitalization companies could trail the returns on investments in securities of large-capitalization companies.

Equity Securities Risk. The value of the equity securities held by the Fund may fall due to general market and economic conditions, perceptions regarding the markets in which the issuers of securities held by the Fund participate, or factors relating to specific issuers in which the Fund invests. Equity securities are subordinated to preferred securities and debt in a company's capital structure with respect to priority in right to a share of corporate income, and therefore will be subject to greater dividend risk than preferred securities or debt instruments. In addition, while broad market measures of equity securities have historically generated higher average returns than fixed income securities, equity securities have generally also experienced significantly more volatility in those returns, although under certain market conditions fixed income securities may have comparable or greater price volatility.

Market Risk. The prices of the securities in the Fund are subject to the risk associated with investing in the securities market, including general economic conditions and sudden and unpredictable drops in value. An investment in the Fund may lose money.

Index Tracking Risk. The Fund's return may not match the return of the Russia Small-Cap Index for a number of reasons. For example, the Fund incurs a number of operating expenses not applicable to the Russia Small-Cap Index and incurs costs associated with buying and selling securities, especially when rebalancing the Fund's securities holdings to reflect changes in the composition of the Russia Small-Cap Index and raising cash to meet redemptions or deploying cash with newly created Creation Units (defined herein). The Fund also bears the costs and risks associated with buying and selling securities while such costs and risks are not factored into the return of the Russia Small-Cap Index. In addition, the Fund may not be able to invest in certain securities included in the Russia Small-Cap Index, or invest in them in the exact proportions in which they are represented in the Russia Small-Cap Index, due to legal restrictions or limitations imposed by the government of Russia, a lack of liquidity on stock exchanges in which such securities trade, potential adverse tax consequences or other regulatory reasons. The Fund is expected to value certain of its investments based on fair value prices. To the extent the Fund calculates its net asset value (NAV) based on fair value prices and the value of the Russia Small-Cap Index is based on securities' closing prices on local foreign markets (*i.e.*, the value of the Russia Small-Cap Index is not based on fair value prices), the Fund's ability to track the Russia Small-Cap Index may be adversely affected. In the event economic sanctions are imposed by the United States against certain Russian companies, the Fund may not be able to fully replicate the Russia Small-Cap Index by investing in the relevant securities, which may lead to increased tracking error. The Fund may also need to rely on borrowings to meet redemptions, which may lead to increased expenses. For tax efficiency purposes, the Fund may sell certain securities, and such sale may cause the Fund to realize a loss and deviate from the performance of the Russia Small-Cap Index. In light of the factors discussed above, the Fund's return may deviate significantly from the return of the Russia Small-Cap Index.

Authorized Participant Concentration Risk. The Fund may have a limited number of financial institutions that act as Authorized Participants (APs), none of which are obligated to engage in creation or redemption transactions. To the extent that those APs exit the business, or are unable to or choose not to process creation and/or redemption orders, and no other AP is able to step forward to create and redeem, Shares may trade like closed-end funds at a discount to NAV and possibly face trading halts and/or de-listing.

No Guarantee of Active Trading Market. While Shares are listed on NYSE Arca, there can be no assurance that an active trading market for the Shares will be maintained. Further, secondary markets may be subject to irregular trading activity, market dislocations, wide bid/ask spreads and extended trade settlement periods, which could cause a material decline in the Fund's NAV.

Trading Issues. Trading in Shares on NYSE Arca may be halted due to market conditions or for reasons that, in the view of NYSE Arca, make trading in Shares inadvisable. In addition, trading in Shares on NYSE Arca is subject to trading halts caused by extraordinary market volatility pursuant to NYSE Arca's circuit breaker rules. There can be no assurance that the requirements of NYSE Arca necessary to maintain the listing of the Fund will continue to be met or will remain unchanged.

Replication Management Risk. An investment in the Fund involves risks similar to those of investing in any fund of equity securities traded on an exchange, such as market fluctuations caused by such factors as economic and political developments, changes in interest rates and perceived trends in security prices. However, because the Fund is not actively managed, unless a specific security is removed from the Russia Small-Cap Index, the Fund generally would not sell a security because the security's issuer was in financial trouble. Therefore, the Fund's performance could be lower than funds that may actively shift their portfolio assets to take advantage of market opportunities or to lessen the impact of a market decline or a decline in the value of one or more issuers.

Risk of Cash Transactions. Unlike other exchange-traded funds (ETFs), the Fund expects to effect its creations and redemptions partially for cash, rather than in-kind securities. Therefore, it may be required to sell portfolio securities and subsequently recognize gains on such sales that the Fund might not have recognized if it were to distribute portfolio securities in kind. As such, investments in Shares may be less tax-efficient than an investment in a conventional ETF.

ETF Shares Trading and Premium/Discount Risk. The market prices of the Shares may fluctuate in response to the Fund's NAV, the intraday value of the Fund's holdings and supply and demand for Shares. The Adviser cannot predict whether Shares will trade above, below, or at their most recent NAV. Disruptions to creations and redemptions, the existence of market volatility or potential lack of an active trading market for Shares (including through a trading halt), as well as other factors, may result in Shares trading at a significant premium or discount to NAV or to the intraday value of the Fund's holdings. If a shareholder purchases Shares at a time when the market price is at a premium to the NAV or sells Shares at a time when the market price is at a discount to the NAV, the shareholder may sustain losses. The securities held by the Fund may be traded in markets that close at a different time than NYSE Arca. Liquidity in those securities may be reduced after the applicable closing times. Accordingly, during the time when NYSE Arca is open but after the applicable market closing,

fixing or settlement times, bid-ask spreads on NYSE Arca and the resulting premium or discount to the Shares' NAV may widen.

Non-Diversified Risk. The Fund is classified as a non-diversified investment company under the Investment Company Act of 1940, as amended (the "1940 Act"). Therefore, the Fund may invest a relatively high percentage of its assets in a smaller number of issuers or may invest a larger proportion of its assets in a single issuer. As a result, the gains and losses on a single investment may have a greater impact on the Fund's NAV and may make the Fund more volatile than more diversified funds.

Concentration Risk. The Fund's assets may be concentrated in a particular sector or sectors or industry or group of industries to the extent the Russia Small-Cap Index concentrates in a particular sector or sectors or industry or group of industries. To the extent that the Russia Small-Cap Index is concentrated in any sector or industry, the Fund will be subject to the risk that economic, political or other conditions that have a negative effect on that sector or industry will negatively impact the Fund to a greater extent than if the Fund's assets were invested in a wider variety of sectors or industries.

PERFORMANCE

The bar chart that follows shows how the Fund performed for the calendar years shown. The table below the bar chart shows the Fund's average annual returns (before and after taxes). The bar chart and table provide an indication of the risks of investing in the Fund by showing the Fund's performance from year to year and by showing how the Fund's average annual returns for the one year and since inception periods compared with the Fund's benchmark index and a broad measure of market performance. All returns assume reinvestment of dividends and distributions. The Fund's past performance (before and after taxes) is not necessarily indicative of how the Fund will perform in the future. Updated performance information is available online at www.vaneck.com.

Annual Total Returns(%) Calendar Years

Best Quarter: 11.60% 1Q 12

Worst Quarter: -32.97% 4Q 14

Average Annual Total Returns for the Periods Ended December 31, 2015

The after-tax returns presented in the table below are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Your actual after-tax returns will depend on your specific tax situation and may differ from those shown below. After-tax returns are not relevant to investors who hold Shares of the Fund through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts.

	Past One Year	Since Inception (4/13/2011)
VanEck Vectors Russia Small-Cap ETF (return before taxes)	0.48%	-23.48%
VanEck Vectors Russia Small-Cap ETF (return after taxes on distributions)	-0.23%	-23.98%
VanEck Vectors Russia Small-Cap ETF (return after taxes on distributions and sale of Fund Shares)	0.40%	-15.43%

Edgar Filing: VanEck Vectors ETF Trust - Form 497K

MVIS Russia Small-Cap Index (reflects no deduction for fees, expenses or taxes)	0.42%	-23.50%
S&P 500® Index (reflects no deduction for fees, expenses or taxes)	1.38%	12.18%

PORTFOLIO MANAGEMENT

Investment Adviser. Van Eck Associates Corporation.

Portfolio Managers. The following individuals are jointly and primarily responsible for the day-to-day management of the Fund's portfolio:

Name	Title with Adviser	Date Began Managing the Fund
Hao-Hung (Peter) Liao	Portfolio Manager	April 2011
George Chao	Portfolio Manager	April 2011

PURCHASE AND SALE OF FUND SHARES

The Fund issues and redeems Shares at NAV only in a large specified number of Shares each called a Creation Unit, or multiples thereof. A Creation Unit consists of 50,000 Shares.

Individual Shares of the Fund may only be purchased and sold in secondary market transactions through brokers. Shares of the Fund are listed on NYSE Arca, Inc. (NYSE Arca) and because Shares trade at market prices rather than NAV, Shares of the Fund may trade at a price greater than or less than NAV.

TAX INFORMATION

The Fund's distributions are taxable and will generally be taxed as ordinary income or capital gains.

PAYMENTS TO BROKER-DEALERS AND OTHER FINANCIAL INTERMEDIARIES

The Adviser and its related companies may pay broker-dealers or other financial intermediaries (such as a bank) for the sale of the Fund Shares and related services. These payments may create a conflict of interest by influencing your broker-dealer or other intermediary or its employees or associated persons to recommend the Fund over another investment. Ask your financial adviser or visit your financial intermediary's website for more information.
