FLAHERTY & CRUMRINE/CLAYMORE TOTAL RETURN FUND

Dear Shareholder:

The Flaherty & Crumrine/Claymore Total Return Fund ("FLC") got off to a good start in fiscal 2004. The total return on net asset value ("NAV") for fiscal first quarter ending February 29th was +3.8%<sup>1</sup>. Since the Fund's inception on August 26, 2003 through the end of the fiscal quarter, the total return was +6.7%<sup>1</sup>.

As of February 29th, 35.9% of the portfolio was invested in corporate debt securities and 60.6% in preferred securities (with the balance comprised of cash, common stocks and hedge instruments). These allocations will change over time as we identify trading opportunities, although preferreds will normally constitute at least half of the portfolio.

With interest rates hovering near all-time lows, individual investors have increasingly turned to preferred securities as they try to increase the income from their portfolios. At the same time, the size of the market has remained fairly stable. There has been a steady stream of new issues brought to market, but older issues are being redeemed at about the same pace. As expected, issuers are replacing older high coupon preferred issues with similar but less expensive ones.

These refinancing transactions are very important to the Fund--if the trend persists for a period of time, there may be downward pressure on the income generated by the portfolio. On the other hand, at the current level of interest rates, the cost of the Fund's leverage is at historically low levels. So far these two effects have roughly offset each other.

The Fund's hedging strategy also performed as expected. To refresh your memory, FLC normally hedges by purchasing put options on U.S. Treasury bond futures. As interest rates go up or down, the prices of these put options typically move in the opposite direction of the preferred securities. There is, however, an important and valuable feature to a put option hedge--in a period of falling interest rates (as in recent months), the value of the preferred portfolio usually goes up by more than the drop in the value of the put options. Although the value of the hedge positions declined during the period, when compared to appreciation in the preferred and corporate bond positions, this hedging loss was small. Of course, if we knew interest rates were going to fall, the best hedge would have been no hedge at all, but our crystal ball is a bit too cloudy for that! We prefer to hedge consistently, knowing that the portfolio should participate in a rally but be protected if interest rates rise significantly.

The Fund's combination of preferred securities and the put option hedge creates an unusual investment product, and we have yet to find a perfect benchmark for comparison. When measured against LONG-TERM fixed income investments, we expect the returns on NAV to lag (but generally only a little!) during periods of falling interest rates (because the hedge will hurt returns), and to perform much better if rates rise substantially. In most interest rate scenarios, the Fund's returns on NAV should out-perform SHORT-TERM investments, although the Fund's returns on NAV may lag briefly during periods of rising short-term rates. In any event, investors should always bear in mind that changes in the Fund's premium or discount to NAV can significantly affect the performance and volatility of the Fund's common share price.

Economic conditions in the United States continue to show signs of improvement. This rising economic tide has benefited corporate profitability and enabled companies to improve the quality of their balance sheets. At the same time, sluggish job formation and subdued inflation have persuaded the Federal Reserve to keep monetary policy accommodative, which has held down the cost of the Fund's leverage.

In the coming weeks, the Fund's adviser, Flaherty & Crumrine, will launch a new web site, [WWW.PREFERREDSTOCKGUIDE.COM](http://WWW.PREFERREDSTOCKGUIDE.COM). The site will contain useful information about most of the issues that make up the preferred securities

universe. We've tried to make the site informative and easy to use. We hope you take the opportunity to explore it, and when you do, we'd like your feedback on ways to make it even better. We hope you will also continue to visit the Fund's web site at WWW.FCCLAYMORE.COM.

Sincerely,

/S/DONALD F. CRUMRINE

/S/ROBERT M. ETTINGER

Donald F. Crumrine  
Chairman of the Board
