

Item 7.01. Regulation FD Disclosure.

On March 27, 2017, State Street Corporation (“State Street”) entered into a series of definitive agreements with DST Systems, Inc. (“DST”) and its affiliates providing for, among other things, the acquisition by affiliates of DST of State Street’s interests in the parties’ joint ventures, Boston Financial Data Services, Inc. (“BFDS”) and International Financial Data Services Limited (“IFDS Ltd”). BFDS provides shareholder recordkeeping, intermediary and investor services, and regulatory compliance solutions to financial services clients in the United States, and IFDS Ltd is an investor and policy holder administrative services and technology provider to the collective funds, insurance and retirement industries. DST and State Street will continue to service offshore and cross-border markets in Canada, Ireland and Luxembourg through the 50/50 joint venture, International Financial Data Services, L.P. The sale of IFDS Ltd was completed today. Completion of the BFDS transaction is expected to occur within the next several days, subject to satisfaction of customary closing conditions.

State Street will exchange its interest in BFDS, in a non-taxable transaction for U.S. federal income tax purposes, for approximately 2.0 million shares of State Street common stock, valued at approximately \$158 million, that are owned by a wholly-owned subsidiary of DST. This acquisition of common stock will be treated as part of State Street’s \$1.4 billion common stock purchase program previously announced in July 2016. State Street sold its interest in IFDS Ltd and related assets for cash consideration of approximately \$175 million. State Street anticipates these dispositions will result in a one-time after-tax gain, in the aggregate, of approximately \$45 million.

State Street accounted for the BFDS and IFDS Ltd joint ventures under the equity method of accounting by recording investment in both joint ventures in other assets on State Street’s consolidated balance sheet and the recognition of quarterly earnings/losses within the processing fees and other revenue on State Street’s consolidated income statement. The disposition of State Street’s interests in the BFDS and IFDS Ltd joint ventures is not expected to have a material impact to revenue in any of the remaining quarters of 2017.

Forward-Looking Statements

This Current Report on Form 8-K contains forward looking statements as defined by United States securities laws. Forward-looking statements are often, but not always, identified by such forward-looking terminology as plan,” “expect,” “intend,” “objective,” “forecast,” “outlook,” “believe,” “priority,” “anticipate,” “estimate,” “seek,” “may,” “will,” “trend,” “target,” “goal,” or similar statements or variations of such terms, are intended to identify forward-looking statements, although not all forward-looking statements contain such terms. These statements are not guarantees of future performance, are inherently uncertain, are based on current assumptions that are difficult to predict and involve a number of risks and uncertainties. Therefore, actual outcomes and results may differ materially from what is expressed in those statements, and those statements should not be relied upon as representing our expectations or beliefs as of any date subsequent to March 27, 2017.

Important factors that may also affect future results and outcomes include, but are not limited to:

- the financial strength and continuing viability of the counterparties with which we or our clients do business and to which we have investment, credit or financial exposure, including, for example, the direct and indirect effects on counterparties of the sovereign-debt risks in the U.S., Europe and other regions;
- increases in the volatility of, or declines in the level of, our net interest revenue, changes in the composition or valuation of the assets recorded in our consolidated statement of condition (and our ability to measure the fair value of investment securities) and the possibility that we may change the manner in which we fund those assets;

- the liquidity of the U.S. and international securities markets, particularly the markets for fixed-income securities and inter-bank credits, and the liquidity requirements of our clients;
 - the level and volatility of interest rates, the valuation of the U.S. dollar relative to other currencies in which we record revenue or accrue expenses and the performance and volatility of securities, credit, currency and other markets in the U.S. and internationally; and the impact of monetary and fiscal policy in the United States and internationally on prevailing rates of interest and currency exchange rates in the markets in which we provide services to our clients;
 - the credit quality, credit-agency ratings and fair values of the securities in our investment securities portfolio, a deterioration or downgrade of which could lead to other-than-temporary impairment of the respective securities and the recognition of an impairment loss in our consolidated statement of income;
 - our ability to attract deposits and other low-cost, short-term funding, our ability to manage levels of such deposits and the relative portion of our deposits that are determined to be operational under regulatory guidelines and our ability to deploy deposits in a profitable manner consistent with our liquidity needs, regulatory requirements and risk profile;
 - the manner and timing with which the Federal Reserve and other U.S. and foreign regulators implement or reevaluate changes to the regulatory framework applicable to our operations, including implementation or modification of the Dodd-Frank Act, the Basel III final rule and European legislation (such as the Alternative Investment Fund Managers Directive, Undertakings for Collective Investment in Transferable Securities Directives and Markets in Financial Instruments Directive II); among other consequences, these regulatory changes impact the levels of regulatory capital we must maintain, acceptable levels of credit exposure to third parties, margin requirements applicable to derivatives, and restrictions on banking and financial activities. In addition, our regulatory posture and related expenses have been and will continue to be affected by changes in regulatory expectations for global systemically important financial institutions applicable to, among other things, risk management, liquidity and capital planning, resolution planning, compliance programs, and changes in governmental enforcement approaches to perceived failures to comply with regulatory or legal obligations;
 - we may not successfully implement our plans to have a credible resolution plan by July 2017, or that plan may not be considered to be sufficient by the Federal Reserve and the FDIC, due to a number of factors, including, but not limited to, challenges we may experience in interpreting and addressing regulatory expectations, failure to implement remediation in a timely manner, the complexities of development of a comprehensive plan to resolve a global custodial bank and related costs and dependencies. If we fail to meet regulatory expectations to the satisfaction of the Federal Reserve and the FDIC in any future submission, we could be subject to more stringent capital, leverage or liquidity requirements, or restrictions on our growth, activities or operations;
 - adverse changes in the regulatory ratios that we are required or will be required to meet, whether arising under the Dodd-Frank Act or the Basel III final rule, or due to changes in regulatory positions, practices or regulations in jurisdictions in which we engage in banking activities, including changes in internal or external data, formulae, models, assumptions or other advanced systems used in the calculation of our capital ratios that cause changes in those ratios as they are measured from period to period;
 - requirements to obtain the prior approval or non-objection of the Federal Reserve or other U.S. and non-U.S. regulators for the use, allocation or distribution of our capital or other specific capital actions or corporate activities, including, without limitation, acquisitions, investments in subsidiaries, dividends and stock purchases, without which our growth plans, distributions to shareholders, share repurchase programs or other capital or corporate initiatives may be restricted;
 - changes in law or regulation, or the enforcement of law or regulation, that may adversely affect our business activities or those of our clients or our counterparties, and the products or services that we sell, including additional or increased taxes or assessments thereon, capital adequacy requirements, margin requirements and changes that expose us to risks related to the adequacy of
-

our controls or compliance programs;

- economic or financial market disruptions in the U.S. or internationally, including those which may result from recessions or political instability; for example, the U.K.'s decision to exit from the European Union may continue to disrupt financial markets or economic growth in Europe or, similarly, financial markets may react sharply or abruptly to actions taken by the new administration in the United States;
 - our ability to develop and execute State Street Beacon, our multi-year transformation program to digitize our business, deliver significant value and innovation for our clients and lower expenses across the organization, any failure of which, in whole or in part, may among other things, reduce our competitive position, diminish the cost-effectiveness of our systems and processes or provide an insufficient return on our associated investment;
 - our ability to promote a strong culture of risk management, operating controls, compliance oversight, ethical behavior and governance that meets our expectations and those of our clients and our regulators, and the financial, regulatory, reputation and other consequences of our failure to meet such expectations; the impact on our compliance and controls enhancement programs of the appointment of a monitor under the deferred prosecution agreement with the DOJ and compliance consultant expected to be appointed under a potential settlement with the SEC, including the potential for such monitor and compliance consultant to require changes to our programs or to identify other issues that require substantial expenditures, changes in our operations, or payments to clients or reporting to U.S. authorities;
 - the results of our review of our billing practices, including additional amounts we may be required to reimburse clients, as well as potential consequences of such review, including damage to our client relationships and adverse actions by governmental authorities;
 - the results of, and costs associated with, governmental or regulatory inquiries and investigations, litigation and similar claims, disputes, or civil or criminal proceedings;
 - changes or potential changes in the amount of compensation we receive from clients for our services, and the mix of services provided by us that clients choose;
 - the large institutional clients on which we focus are often able to exert considerable market influence, and this, combined with strong competitive market forces, subjects us to significant pressure to reduce the fees we charge, to potentially significant changes in our assets under custody and administration or our assets under management in the event of the acquisition or loss of a client, in whole or in part, and to potentially significant changes in our fee revenue in the event a client re-balances or changes its investment approach or otherwise re-directs assets to lower- or higher-fee asset classes;
 - the potential for losses arising from our investments in sponsored investment funds;
 - the possibility that our clients will incur substantial losses in investment pools for which we act as agent, and the possibility of significant reductions in the liquidity or valuation of assets underlying those pools;
 - our ability to anticipate and manage the level and timing of redemptions and withdrawals from our collateral pools and other collective investment products;
 - the credit agency ratings of our debt and depositary obligations and investor and client perceptions of our financial strength;
 - adverse publicity, whether specific to State Street or regarding other industry participants or industry-wide factors, or other reputational harm;
 - our ability to control operational risks, data security breach risks and outsourcing risks, our ability to protect our intellectual property rights, the possibility of errors in the quantitative models we use to manage our business and the possibility that our controls will prove insufficient, fail or be circumvented;
 - our ability to expand our use of technology to enhance the efficiency, accuracy and reliability of our operations and our dependencies on information technology and our ability to control related
-

risks, including cyber-crime and other threats to our information technology infrastructure and systems (including those of our third-party service providers) and their effective operation both independently and with external systems, and complexities and costs of protecting the security of such systems and data;

- our ability to grow revenue, manage expenses, attract and retain highly skilled people and raise the capital necessary to achieve our business goals and comply with regulatory requirements and expectations;
- changes or potential changes to the competitive environment, including changes due to regulatory and technological changes, the effects of industry consolidation and perceptions of State Street as a suitable service provider or counterparty;
- our ability to complete acquisitions, joint ventures and divestitures, including the ability to obtain regulatory approvals, the ability to arrange financing as required and the ability to satisfy closing conditions;
- the risks that our acquired businesses and joint ventures will not achieve their anticipated financial and operational benefits or will not be integrated successfully, or that the integration will take longer than anticipated, that expected synergies will not be achieved or unexpected negative synergies or liabilities will be experienced, that client and deposit retention goals will not be met, that other regulatory or operational challenges will be experienced, and that disruptions from the transaction will harm our relationships with our clients, our employees or regulators;
- our ability to recognize evolving needs of our clients and to develop products that are responsive to such trends and profitable to us, the performance of and demand for the products and services we offer, and the potential for new products and services to impose additional costs on us and expose us to increased operational risk;
- changes in accounting standards and practices; and
- changes in tax legislation and in the interpretation of existing tax laws by U.S. and non-U.S. tax authorities that affect the amount of taxes due.

Other important factors that could cause actual results to differ materially from those indicated by any forward-looking statements are set forth in our 2016 Annual Report on Form 10-K and our subsequent SEC filings. We encourage investors to read these filings, particularly the sections on risk factors, for additional information with respect to any forward-looking statements and prior to making any investment decision. The forward-looking statements contained herein speak only as of the date hereof, March 27, 2017, and we do not undertake efforts to revise those forward-looking statements to reflect events after that time.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned hereunto duly authorized.
